S 921. EXEMPT WATER RESALE FROM DRINKING WATER ACT. TO EXEMPT CERTAIN PUBLIC WATER SYSTEMS THAT RESELL WATER FROM THE NORTH CAROLINA DRINKING WATER ACT. GS 130A-314 exempts certain water systems from the Drinking Water Act: they must consist only of distribution and storage facilities, obtain all water from a regulated system, and not sell water to any person. This bill changes the last condition to permit such a system to sell water if authorized to do so by the Utilities Commission pursuant to GS 62-110(g) (which allows the Comm'n to allow resale of water and sewer service to persons who occupy the same contiguous premises, at cost plus an administrative fee). Repeals GS 130A-315(d), which regulates such water systems as consecutive water systems.
