Referred to:

March 19, 2013 1 A BILL TO BE ENTITLED 2 AN ACT TO ESTABLISH AN EXPEDITED PROCESS FOR THE MODIFICATION OF 3 INTERBASIN TRANSFER CERTIFICATES AND FOR THE ISSUANCE OF 4 INTERBASIN TRANSFER CERTIFICATES IN THE CENTRAL COASTAL PLAIN 5 CAPACITY USE AREA AND THE COASTAL AREA COUNTIES. 6 The General Assembly of North Carolina enacts: 7 SECTION 1. G.S. 143-215.22G reads as rewritten: 8 "§ 143-215.22G. Definitions. In addition to the definitions set forth in G.S. 143-212 and G.S. 143-213, the following 9 10 definitions apply to this Part. 11 (1)"River basin" means any of the following river basins designated on the map 12 entitled "Major River Basins and Sub-basins in North Carolina" and filed in the Office of the Secretary of State on 16 April 1991. The term "river basin" 13 includes any portion of the river basin that extends into another state. Any 14 area outside North Carolina that is not included in one of the river basins 15 listed in this subdivision comprises a separate river basin. 16 17 1-1 Broad River. a. 2-1 18 Haw River. b. 2-2 19 Deep River. c. 20 d. 2-3 Cape Fear River. 21 e. 2-4 South River. 22 2-5 Northeast Cape Fear River. f. 23 New River. 2-6 g. 24 3-1 Catawba River. h. 25 3-2 South Fork Catawba River. i. Chowan River. 26 4-1 j. 27 k. 4-2 Meherrin River. 28 5-1 1. Nolichucky River. 29 French Broad River. 5-2 m. Pigeon River. 30 5-3 n. 31 Hiwassee River. 0. 6-1 32 7-1 Little Tennessee River. p. 33 7-2 Tuskasegee (Tuckasegee) River. q. 34 Savannah River. 8-1 r. 35 9-1 Lumber River. s. 36 9-2

Big Shoe Heel Creek.

• -	or an interbasin transfer until the Commission	
environmental documer	it is complete and adequate. A decision of	on the adequacy of th

environmental document is complete and adequate. A decision on the adequacy of the
environmental document is subject to review in a contested case on the decision of the
Commission to issue or deny a certificate under this section.

	General A	Assemb	oly Of North Carolina	Session 2013
1	(g)	Petiti	on. – An applicant for a certificate shall petition the (	Commission for the
2	certificate	. The p	etition shall be in writing and shall include all of the follow	ving:
3		(1)	A general description of the facilities to be used to	transfer the water,
4			including the location and capacity of water intakes, pu	umps, pipelines, and
5			other facilities.including current and projected areas t	to be served by the
6			transfer, current and projected capacities of intakes,	
7			facilities.	
8		(2)	A description of all the proposed consumptive and non-	consumptive uses of
9			the water to be transferred.	
10		(3)	A description of the water quality of the source river	and receiving river,
11			including information on aquatic habitat for rare, threate	ned, and endangered
12			species; in-stream flow data for segments of the source	and receiving rivers
13			that may be affected by the transfer; and any water	-
14			pursuant to section 303(d) of the federal Clean Wate	r Act (33 U.S.C. §
15			1313(d)).	, U
16		(4)	A description of the water conservation measures used	by the applicant at
17			the time of the petition and any additional water conser	• • • •
18			the applicant will implement if the certificate is granted.	
19		(5)	A description of all sources of water within the re	ceiving river basin,
20			including surface water impoundments, groundwater	
21			storage, and purchase of water from another source with	
22			that is a practicable alternative to the proposed transfer	
23			applicant's water supply needs. The description of	
24			include sources available at the time of the petition for	
25			planned or potential water sources.	5
26		(6)	A description of water transfers and withdrawal	s registered under
27			G.S. 143-215.22H or included in a local water supply pla	an prepared pursuant
28			to G.S. 143-355(1) from the source river basin, incl	uding transfers and
29			withdrawals at the time of the petition for a certificate	and any planned or
30			reasonably foreseeable transfers or withdrawals by a	public water system
31			with service area located within the source river basin.	
32		(7)	A demonstration that the proposed transfer, if added to a	ll other transfers and
33			withdrawals required to be registered under G.S. 143-21	5.22H or included in
34			any local water supply plan prepared by a public water	system with service
35			area located within the source basin pursuant to G.S.	143-355(1) from the
36			source river basin at the time of the petition for a ce	ertificate, would not
37			reduce the amount of water available for use in the source the amount of water available for use in the source and the source	urce river basin to a
38			degree that would impair existing uses, pursuant to	the antidegradation
39			policy set out in 40 Code of Federal Regulation § 131.	12 (Antidegradation
40			Policy) (1 July 2006 Edition) and the statewide and	tidegradation policy
41			adopted pursuant thereto, or existing and planned	l consumptive and
42			nonconsumptive uses of the water in the source river ba	asin. If the proposed
43			transfer would impact a reservoir within the source	ce river basin, the
44			demonstration must include a finding that the transfer w	vould not result in a
45			water level in the reservoir that is inadequate to support	existing uses of the
46			reservoir, including recreational uses.	
47		(8)	The applicant's future water supply needs and the pre	sent and reasonably
48			foreseeable future water supply needs for public water s	systems with service
49			area located within the source river basin. The analy	sis of future water
50			supply needs shall include agricultural, recreational, and	l industrial uses, and
51			electric power generation. Local water supply plans p	repared pursuant to

General Assembly Of North Carolina Session 2013
G.S. 143-355(1) for water systems with service area located within the source river basin shall be used to evaluate the projected future water needs
in the source river basin that will be met by public water systems.
(9) The applicant's water supply plan prepared pursuant to G.S. 143-355(1). If
the applicant's water supply plan is more than two years old at the time of
the petition, then the applicant shall include with the petition an updated
(10) Any other information deemed reasoning by the Commission for review of
(10) Any other information deemed necessary by the Commission for review of
<ul><li>(h) Settlement Discussions. – Upon the request of the applicant, any interested party, or</li></ul>
the Department, or upon its own motion, the Commission may appoint a mediation officer. The
mediation officer may be a member of the Commission may appoint a mediation officer. The
neutral third party but shall not be a hearing officer under subsections (e) or (j) of this section
The mediation officer shall make a reasonable effort to initiate settlement discussions between
the applicant and all other interested parties. Evidence of statements made and conduct that
occurs in a settlement discussion conducted under this subsection, whether attributable to a
party, a mediation officer, or other person shall not be subject to discovery and shall be
inadmissible in any subsequent proceeding on the petition for a certificate. The Commission
may adopt rules to govern the conduct of the mediation process.
(i) Draft Determination. – Within 90 days after the Commission determines that the
environmental document prepared in accordance with subsection (d) of this section is adequate
or the applicant submits its petition for a certificate, whichever occurs later, the Commission
shall issue a draft determination on whether to grant the certificate. The draft determination
shall be based on the criteria set out in this section and shall include the conditions and
limitations, findings of fact, and conclusions of law that would be required in a final
determination. Notice of the draft determination shall be given as provided in subsection (c) of
this section.
(j) Public Hearing on the Draft Determination. – Within 60 days of the issuance of the
draft determination as provided in subsection (i) of this section, the Commission shall hold
public hearings on the draft determination. At least one hearing shall be held in the affected
area of the source river basin, and at least one hearing shall be held in the affected area of the
receiving river basin. In determining whether more than one public hearing should be held
within either the source or receiving river basins, the Commission shall consider the differing
or conflicting interests that may exist within the river basins, including the interests of both
upstream and downstream parties potentially affected by the proposed transfer. The public
hearings shall be conducted by one or more hearing officers appointed by the Chair of the
Commission. The hearing officers may be members of the Commission or employees of the
Department. The Commission shall give at least 30 days' written notice of the public hearing as
provided in subsection (c) of this section. The Commission shall accept written comment on the
draft determination for a minimum of 30 days following the last public hearing. The
Commission shall prepare a record of all comments and written responses to questions posed in writing. The record shall include complete conject of acientific or technical comments related to
writing. The record shall include complete copies of scientific or technical comments related to the potential impact of the interbasin transfer. The applicant who patitions the Commission for
the potential impact of the interbasin transfer. The applicant who petitions the Commission for

44 a certificate under this section shall pay the costs associated with the notice and public hearing45 on the draft determination.

(k) Final Determination: Factors to be Considered. – In determining whether a
certificate may be issued for the transfer, the Commission shall specifically consider each of
the following items and state in writing its findings of fact and conclusions of law with regard
to each item:

- 50 51
- (1) The necessity and reasonableness of the amount of surface water proposed to be transferred and its proposed uses.

	General Assemb	oly Of North Carolina	Session 2013
1	(2)	The present and reasonably foreseeable future detrime	ental effects on the
2		source river basin, including present and future effects of	on public, industrial,
3		economic, recreational, and agricultural water supply	needs, wastewater
4		assimilation, water quality, fish and wildlife habit	-
5		generation, navigation, and recreation. Local water supp	
6		water systems with service area located within the	
7		prepared pursuant to G.S. 143-355(1) shall be used to ev	1 0

(n) Final Determination: Certificate Conditions and Limitation	
may grant the certificate in whole or in part, or deny the certificate impose any conditions or limitations on a certificate that the Commi achieve the purposes of this Part including a limit on the period for	ission finds necessary to

1		tions and limitations shall include any mitigation measures proposed by the
2		imize any detrimental effects within the source and receiving river basins. In
3		ificate shall require all of the following conditions and limitations:
4	(1)	A water conservation plan that specifies the water conservation measures
5		that will be implemented by the applicant in the receiving river basin to
6		ensure the efficient use of the transferred water. Except in circumstances of
7		technical or economic infeasibility or adverse environmental impact, the
8		water conservation plan shall provide for the mandatory implementation of
9		water conservation measures by the applicant that equal or exceed the most
10		stringent water conservation plan implemented by a community water
11		system, as defined in G.S. 143-355(1), public water system that withdraws
12		water from the source river basin.
13	(2)	A drought management plan that specifies how the transfer shall be managed
14		to protect the source river basin during drought conditions or other
15		emergencies that occur within the source river basin. Except in
16		circumstances of technical or economic infeasibility or adverse
10		environmental impact, this drought management plan shall include
18		mandatory reductions in the permitted amount of the transfer based on the
18		severity and duration of a drought occurring within the source river basin
20		and shall provide for the mandatory implementation of a drought
21		management plan by the applicant that equals or exceeds the most stringent
22		water conservation plan implemented by a community water system, as defined in $C = 142.255(1)$ sublic water system that with draws water from
23 24		defined in G.S. 143-355(1), public water system that withdraws water from the source river basin.
24 25	(2)	
	(3)	The maximum amount of water that may be transferred on a daily hasis transferred calculated as a daily suprage of a calculated as a daily suprage of a calculated as
26		basis, transferred, calculated as a daily average of a calendar month, and
27		methods or devices required to be installed and operated that measure the
28	(4)	amount of water that is transferred.
29	(4)	A provision that the Commission may amend a certificate to reduce the
30		maximum amount of water authorized to be transferred whenever it appears
31		that an alternative source of water is available to the certificate holder from
32		within the receiving river basin, including, but not limited to, the purchase of
33		water from another water supplier within the receiving basin or to the
34		transfer of water from another sub-basin within the receiving major river
35		basin.
36	(5)	A provision that the Commission shall amend the certificate to reduce the
37		maximum amount of water authorized to be transferred if the Commission
38		finds that the applicant's current projected water needs are significantly less
39		than the applicant's projected water needs at the time the certificate was
40		granted.
41	(6)	A requirement that the certificate holder report the quantity of water
42		transferred during each calendar quarter. The report required by this
43		subdivision shall be submitted to the Commission no later than 30 days after
44		the end of the quarter.
45	(7)	Except as provided in this subdivision, a provision that the applicant will not
46		resell the water that would be transferred pursuant to the certificate to
47		another public water supply system. This limitation shall not apply in the
48		case of a proposed resale or transfer among public water supply-systems
49		within the receiving river basin as part of an interlocal agreement or other
50		regional water supply arrangement, provided that each participant in the
51		interlocal agreement or regional water supply arrangement is a co-applicant

General Assembly Of North Carolina

valid. The conditions and limitations shall include any mitigation measures proposed by the applicant to minimize any detrimental effects within the source and receiving river basins. In

## **General Assembly Of North Carolina**

1 2 for the certificate and will be subject to all the terms, conditions, and limitations made applicable to any lead or primary applicant.

3 (o) Administrative and Judicial Review. – Administrative and judicial review of a final
4 decision on a petition for a certificate under this section shall be governed by Chapter 150B of
5 the General Statutes.

6 (p) Certain Preexisting Transfers. – In cases where an applicant requests approval to 7 increase a transfer that existed on 1 July 1993, the Commission may approve or disapprove 8 only the amount of the increase. If the Commission approves the increase, the certificate shall 9 be issued for the amount of the preexisting transfer plus any increase approved by the 10 Commission. A certificate for a transfer approved by the Commission under G.S. 162A-7 shall 11 remain in effect as approved by the Commission and shall have the same effect as a certificate 12 issued under this Part. A certificate for the increase of a preexisting transfer shall contain all of 13 the conditions and limitations required by subsection (m) of this section.

14 (q) Emergency Transfers. – In the case of water supply problems caused by drought, a 15 pollution incident, temporary failure of a water plant, or any other temporary condition in 16 which the public health, safety, or welfare requires a transfer of water, the Secretary of 17 Environment and Natural Resources may grant approval for a temporary transfer. Prior to 18 approving a temporary transfer, the Secretary shall consult with those parties listed in subdivision (3) of subsection (c) of this section that are likely to be affected by the proposed 19 20 transfer. However, the Secretary shall not be required to satisfy the public notice requirements 21 of this section or make written findings of fact and conclusions of law in approving a temporary 22 transfer under this subsection. If the Secretary approves a temporary transfer under this 23 subsection, the Secretary shall specify conditions to protect other water users. A temporary 24 transfer shall not exceed six months in duration, but the approval may be renewed for a period 25 of six months by the Secretary based on demonstrated need as set forth in this subsection.

(r) Relationship to Federal Law. – The substantive restrictions, conditions, and limitations upon surface water transfers authorized in this section may be imposed pursuant to any federal law that permits the State to certify, restrict, or condition any new or continuing transfers or related activities licensed, relicensed, or otherwise authorized by the federal government. This section shall govern the transfer of water from one river basin to another unless preempted by federal law.

32 Planning Requirements. - When any transfer for which a certificate was issued (s) 33 under this section equals or exceeds eighty percent (80%) of the maximum amount authorized 34 in the certificate, the applicant shall submit to the Department a detailed plan that specifies how 35 the applicant intends to address future foreseeable water needs. If the applicant is required to 36 have a local water supply plan, then this plan shall be an amendment to the local water supply 37 plan required by G.S.143-355(1). When the transfer equals or exceeds ninety percent (90%) of 38 the maximum amount authorized in the certificate, the applicant shall begin implementation of 39 the plan submitted to the Department.

40 Statement of Policy. - It is the public policy of the State to maintain, protect, and (t) 41 enhance water quality within North Carolina. It is the public policy of this State that the 42 reasonably foreseeable future water needs of a public water system with its service area located 43 primarily in the receiving river basin are subordinate to the reasonably foreseeable future water 44 needs of a public water system with its service area located primarily in the source river basin. 45 Further, it is the public policy of the State that the cumulative impact of transfers from a source 46 river basin shall not result in a violation of the antidegradation policy set out in 40 Code of 47 Federal Regulations § 131.12 (1 July 2006 Edition) and the statewide antidegradation policy 48 adopted pursuant thereto.

49 (u) Renewal of Certificate. A petition to extend or renew a certificate shall be treated
 50 as a new petition.

(	General A	ssemł	oly Of I	North Carolina Session 2013
<u>s</u>			fication	of Certificate A certificate may be modified as provided in this
<u>s</u>	subsection.	<u>.</u>		
		(1)		Commission or the Department may make any of the following
				fications to a certificate after providing electronic notice to persons who
			have	identified themselves in writing as interested parties:
			<u>a.</u>	Correction of typographical errors.
			<u>b.</u>	Clarification of existing conditions or language.
			<u>c.</u>	Updates, requested by the certificate holder, to a conservation plan,
				drought management plan, or compliance and monitoring plan.
			<u>d.</u>	Modifications requested by the certificate holder to reflect altered
				requirements due to the amendment of this section.
		(2)	A pe	rson who holds a certificate for an interbasin transfer of water may
			reque	st that the Commission modify the certificate. The request shall be
			consi	dered and a determination made according to the following procedures:
			<u>a.</u>	The certificate must have been issued pursuant to
				G.S. 162A-7, 143-215.22I, or 143-215.22L and the certificate holder
				must be in substantial compliance with the certificate.
			<u>b.</u>	The certificate holder shall file a notice of intent to file a request for
				modification that includes a nontechnical description of the
				certificate holder's request and identification of the proposed water
				source.
			<u>c.</u>	The certificate holder shall prepare an environmental document
			<u></u>	pursuant to subsection (d) of this section, except that an
				environmental impact statement shall not be required for the
				modification of a certificate unless it would otherwise be required by
				Article 1 of Chapter 113A of the General Statutes.
			<u>d.</u>	Upon determining that the documentation submitted by the certificate
			<u>u.</u>	holder is adequate to satisfy the requirements of this subsection, the
				Department shall publish a notice of the request for modification in
				the North Carolina Register and shall hold a public hearing at a
				location convenient to both the source and receiving river basins. The
				Department shall provide written notice of the request for the
				modification and the public hearing in the Environmental Bulletin, a
				newspaper of general circulation in the source river basin, a
				newspaper of general circulation in the receiving river basin, and as
				provided in subdivision (3) of subsection (c) of this section. The
				certificate holder who petitions the Commission for a modification
				under this subdivision shall pay the costs associated with the notice
				and public hearing.
			ρ	The Department shall accept comments on the requested
			<u>e.</u>	modification for a minimum of 30 days following the public hearing.
			<u>f.</u>	The Commission or the Department may require the certificate
			<u>1.</u>	holder to provide any additional information or documentation it
				· ·
			a	deems reasonably necessary in order to make a final determination.
			<u>g.</u>	The Commission shall make a final determination whether to grant the requested modification based on the factors set out in subsection
				the requested modification based on the factors set out in subsection $(k)$ of this section information provided by the certificate holder and
				(k) of this section, information provided by the certificate holder, and
				any other information the Commission deems relevant. The
				Commission shall state in writing its findings of fact and conclusions
				of law with regard to each factor.
