PART II: MOTOR FUEL TAX CHANGES

SECTION 2.1 Effective March 1, 2015, and notwithstanding G.S. 105-449.80, the motor fuel excise tax rate is thirty-five cents (35ϕ) a gallon.

SECTION 2.2. G.S. 105-449.108(c) reads as rewritten:

Sales Tax Amount. - Article 5 of Subchapter I of this Chapter determines the amount of State sales and use tax to be deducted under this section from a motor fuel excise tax refund. Articles 39, 40, and 42 of Subchapter VIII of this Chapter and the Mecklenburg First 1% Sales Tax Act determine the amount of local sales and use tax to be deducted under this section from a motor fuel excise tax refund. The sales price and the cost price of motor fuel to be used in determining the amount to deduct is the average of the wholesale prices used under G.S. 105-449.80 to determine the excise tax rates rate in effect for the two six month periods of the calendar year for which the refund is claimed."

SECTION 2.3. G.S. 105-449.80 reads as rewritten: "§ **105-449.80.** Tax rate.

(a) Rate. – The motor fuel excise tax rate is a flat rate of seventeen and one-half cents $(17 \ 1/2\phi)$ a gallon plus a variable wholesale component. The variable wholesale component is either the greater of three-seventeen and one-half cents $(3 \ 1/2\phi)(17 \ 1/2\phi)$ a gallon or seven percent (7%)nine and nine-tenths percent (9.9%) of the average wholesale price of motor fuel for the applicable base period, whichever is greater period.

The two-base periods are six-month periods; one ends on September 30 and one ends on March 31. period is a twelve-month period ending September 30. The Secretary must set the tax rate twice-for a year based on the wholesale price for each base period. A tax rate set by the Secretary using information for the base period—that ends on September 30 applies to the six-month period—calendar year that begins the following January 1. A tax rate set by the Secretary using information for the base period that ends on March 31 applies to the six-month period that begins the following July 1.

(b) Wholesale Price. – The Secretary must determine the average wholesale price of motor fuel for each base period. To do this, the Secretary must use information on refiner and gas plant operator sales prices of finished motor gasoline and No. 2 diesel fuel for resale, published by the United States Department of Energy in the "Monthly Energy Review", or equivalent data.

The Secretary must compute the average sales price of finished motor gasoline for the base period, compute the average sales price for No. 2 diesel fuel for the base period, and then compute a weighted average of the results of the first two computations based on the proportion of tax collected on each under this Article for the base period. The Secretary must then convert the weighted average price to a cents-per-gallon rate and round the rate to the nearest one-tenth of a cent $(1/10\phi)$. If the converted cents-per-gallon rate is exactly between two-tenths of a cent $(2/10\phi)$ the Secretary must round the rate up to the higher of the two.

(c) Notification. – The Secretary must notify affected taxpayers of the tax rate to be in effect for each six-month periodcalendar year beginning January 1 and July 1."

SECTION 2.4.(a) Section 4.1 of S.L. 2014-100 reads as rewritten:
