HOUSE BILL DRH40370-MH-122

Short Title: Traveling Animals/Pub. Safety Protection Act. (Public)

Sponsors: Representative Ball.

Referred to:

1 A BILL TO BE ENTITLED
2 AN ACT TO ENACT THE TRAVELING ANIMAL AND PUBLIC SAFETY PROTECTION
3 ACT.

4 The General Assembly of North Carolina enacts:

5 SECTION 1. This act shall be known and may be cited as the "Traveling Animal
6 and Public Safety Protection Act."

7 SECTION 2. Findings. – The General Assembly finds all of the following:

- 8 (1) The protection of exotic and wild animals, and the health and safety of workers
9 and the public, are matters of statewide concern.
- 10 (2) Conditions inherent to traveling exotic and wild animal acts, including
11 temporary, collapsible facilities, proximity to the public, constant travel, and
12 prolonged confinement and physical coercion of animals, subject exotic and
13 wild animals to compromised welfare and chronic stress, resulting in animal
14 disease, the spread of zoonotic disease, and animal escape, which present
15 health, welfare, and safety risks not adequately addressed by current
16 regulation.
- 17 (3) Current regulatory oversight of traveling exotic and wild animal acts is
18 complex and costly, and these costs are not typically recouped via licensing
19 fees, but instead are left to be borne by the taxpayers.
- 20 (4) The frequent mobility of traveling exotic and wild animal acts complicates
21 oversight, such that agencies and authorities cannot properly monitor,
22 evaluate, or follow through regarding the condition of animals or facilities;
23 their history of potential injuries, incidents, illnesses, violations; or other
24 issues, and so cannot properly protect animals, workers, or the public.
- 25 (5) Traveling exotic and wild animal acts use collapsible, temporary, mobile
26 facilities, which risk escape and serious harm to animals, workers, and the
27 public.
- 28 (6) Traveling exotic and wild animal acts present health and safety risks by
29 permitting or not preventing public contact and by displaying animals in
30 inappropriate, uncontrolled areas in dangerous proximity to humans and other
31 animals.
- 32 (7) Exotic and wild animals have intrinsic value. Their wild instincts and needs
33 are unpredictable and not naturally suited to the standard business model and
34 practices for traveling acts. Animals suffer when unable to fulfill instinctive,
35 natural behaviors.

- 1 (8) Exotic and wild animals used in traveling acts suffer severe and extended
2 confinement, and, deprived of natural movements and behaviors, are prone to
3 chronic stress and behavioral, health, and psychological problems.
- 4 (9) Exotic and wild animals are forced to perform unnatural tricks requiring
5 extreme physical coercion, including, but not limited to, the use of food and
6 water restrictions, extended confinement, chaining, and abuse with electric
7 shock devices, bullhooks, metal bars, whips, shovels, and pitchforks, among
8 others.
- 9 (10) It is not necessary to use exotic and wild animals in traveling acts to
10 experience the circus or similar events.
- 11 (11) Using exotic and wild animals as commodities traded for traveling
12 performances adds nothing to the understanding and conservation of such
13 animals or their natural environment and actually undermines conservation
14 efforts necessary to protect threatened and endangered species.
- 15 (12) The exploitation and trade of wildlife is a primary driver of biodiversity loss
16 and disease emergence.
- 17 (13) It is not possible to ensure health and safety for the public and workers or
18 appropriate physical and mental welfare for exotic and wild animals under this
19 business model, which inherently and significantly restricts animals' natural
20 movements and behaviors, and which has a prevalence of abuse and
21 problematic oversight.
- 22 (14) Restricting the use of exotic and wild animals in traveling acts is the most
23 cost-effective and efficient way to safeguard the public, workers, and the
24 animals.
