

GENERAL ASSEMBLY OF NORTH CAROLINA  
SESSION 2023

FILED SENATE  
Apr 6, 2023  
S.B. 723  
PRINCIPAL CLERK

S

D

SENATE BILL DRS45313-NB-101

Short Title: Henry's Law.

(Public)

Sponsors: Senator Lee (Primary Sponsor).

Referred to:

1 A BILL TO BE ENTITLED  
2 AN ACT TO ESTABLISH DENTAL SEDATION REQUIREMENTS AND TO DIRECT THE  
3 COLLABORATORY TO CONDUCT A STUDY OF ANESTHESIA PROVIDER  
4 REQUIREMENTS.

5 The General Assembly of North Carolina enacts:

6 SECTION 1. G.S. 90-30.1 reads as rewritten:

7 "§ 90-30.1. Standards for general anesthesia and enteral and parenteral sedation; fees  
8 authorized.

9 ~~The~~ Subject to the requirements of G.S. 90-30.3 through G.S. 90-30.7, the North Carolina  
10 Board of Dental Examiners may establish by regulation reasonable education, training, and  
11 equipment standards for safe administration and monitoring of general anesthesia and enteral and  
12 parenteral sedation for outpatients in the dental setting. Regulatory standards may include a  
13 permit process for general anesthesia and enteral and parenteral sedation by dentists. The  
14 requirements of any permit process adopted under the authority of this section shall include  
15 provisions that will allow a dentist to qualify for continued use of enteral sedation, if he or she is  
16 licensed to practice dentistry in North Carolina and shows the Board that he or she has been  
17 utilizing enteral sedation in a competent manner for the five years preceding January 1, 2002,  
18 and his or her office facilities pass an on-site examination and inspection by qualified  
19 representatives of the Board. For purposes of this section, oral premedication administered for  
20 minimal sedation (anxiolysis) shall not be included in the definition of enteral sedation. In order  
21 to provide the means of regulating general anesthesia and enteral and parenteral sedation,  
22 including examination and inspection of dental offices involved, the Board may charge and  
23 collect fees established by its rules for each permit application, each annual permit renewal, and  
24 each office inspection in an amount not to exceed the maximum fee amounts set forth in  
25 G.S. 90-39."

26 SECTION 2.(a) Article 2 of Chapter 90 of the General Statutes is amended by adding  
27 a new section to read:

28 "§ 90-30.3. Dental sedation procedure.

29 (a) Definitions. – The following definitions apply to G.S. 90-30.3 through G.S. 90-30.7:

- 30 (1) Adverse event. – Any of the following clinical emergencies: anaphylaxis,  
31 aspiration, cardiac arrest, or unplanned advanced airway placement.  
32 (2) Analgesia. – The diminution or elimination of pain.  
33 (3) Anti-anxiety sedative. – A sedative agent administered in a dosage intended  
34 to reduce anxiety without diminishing consciousness or protective reflexes.  
35 (4) Anxiolysis. – Pharmacological reduction of anxiety through the  
36 administration of a single dose of a minor psychosedative, possibly in

\* D R S 4 5 3 1 3 - N B - 1 0 1 \*

1 combination with nitrous oxide, to children or adults prior to commencement  
2 of treatment on the day of the appointment that allows for uninterrupted  
3 interactive ability in an awake patient with no compromise in the ability to  
4 maintain a patent airway independently and continuously.

5 (5) ASA guidelines. – American Society of Anesthesiologists guidelines.

6 (6) BLS-certified. – Basic Life Support certified.

7 (7) General anesthesia. – The intended controlled state of a depressed level of  
8 consciousness that is produced by pharmacologic agents and accompanied by  
9 a partial or complete loss of protective reflexes, including the ability to  
10 maintain an airway and respond to physical stimulation and verbal commands.

11 (8) Certified registered nurse anesthetist or CRNA. – A licensed registered nurse  
12 who completes a program accredited by the Council on Accreditation of Nurse  
13 Anesthesia Educational Programs, is credentialed as a certified registered  
14 nurse anesthetist by the Council on Certification of Nurse Anesthetists, and  
15 who maintains recertification through the Council on Recertification of Nurse  
16 Anesthetists and performs nurse anesthesia activities in collaboration with a  
17 physician, dentist, podiatrist, or other lawfully qualified health care provider.

18 (9) Credentialed surgery center. – A surgical facility accredited by the Joint  
19 Commission on Accreditation of Healthcare Organizations, the Accreditation  
20 Association for Ambulatory Health Care, or the American Association for  
21 Accreditation of Ambulatory Surgery Facilities.

22 (10) Licensed dentist. – An individual licensed to practice dentistry under this  
23 Article who holds a permit for an approved level of anesthesia under this  
24 Article and issued by the Board.

25 (11) Sedation procedure. – A process beginning when any pharmacological agent  
26 is first administered to a patient to induce general anesthesia or sedation and  
27 continues until the dentist permit holder determines that the patient has met  
28 the recovery and discharge criteria set forth in this Article.

29 (b) Dental Sedation Permit Requirements. – A licensed dentist shall hold an unexpired  
30 permit issued by the Board in accordance with G.S. 90-30.1 permitting the dentist to administer  
31 general anesthesia, moderate conscious sedation, or moderate pediatric conscious sedation, or  
32 supervising a CRNA to administer or an RN employed to deliver anesthesia or moderate sedation.  
33 Before performing sedation procedures in a facility other than a hospital or credentialed surgery  
34 center, the licensed dentist shall ensure that the Board has been notified that the licensed dentist  
35 intends to administer anesthesia or moderate sedation at the facility and shall ensure that the  
36 facility has passed a facility inspection by the Board in accordance with this Article.

37 (c) Facility Equipment Requirements. – The licensed dentist shall ensure that the facility  
38 where the sedation procedure is to be performed meets all of the following requirements at the  
39 time of the sedation procedure:

40 (1) The facility must be equipped with all of the following equipment and ensure  
41 that the equipment is immediately available and accessible from the operatory  
42 and recovery rooms:

43 a. An operatory of size and design to permit access of emergency  
44 equipment and personnel and to permit emergency management.

45 b. CPR board or dental chair suitable for providing emergency treatment.

46 c. Lighting as necessary for the procedure to be performed and backup  
47 lighting.

48 d. Suction equipment as necessary for the procedure to be performed,  
49 including non-electrical backup suction.

- 1 e. Positive pressure oxygen delivery system, including full-face masks
- 2 for small, medium, and large patients, and backup E-cylinder portable
- 3 oxygen tanks apart from the central system.
- 4 f. Small, medium, and large oral and nasal airways.
- 5 g. Blood pressure monitoring device.
- 6 h. EKG monitor.
- 7 i. Pulse oximeter.
- 8 j. Automatic external defibrillator.
- 9 k. Capnograph.
- 10 l. Precordial or pretracheal stethoscope.
- 11 m. Thermometer.
- 12 n. Vascular access setup as necessary for the procedure to be performed,
- 13 including hardware and fluids.
- 14 o. A laryngoscope with working batteries.
- 15 p. Intubation forceps and advanced airway devices.
- 16 q. Tonsillar suction with backup suction.
- 17 r. Syringes as necessary for the procedure to be performed.
- 18 s. Tourniquet and tape.
- 19 (2) The licensed dentist shall ensure all monitoring and other equipment in the
- 20 facility receives preventive maintenance no less frequently than once per year,
- 21 including safety and function checks per the manufacturer's
- 22 recommendations. The licensed dentist shall maintain documentation of all
- 23 preventive maintenance performed and shall ensure equipment is replaced
- 24 upon its expiration or as clinically required.
- 25 (3) The licensed dentist shall ensure the following unexpired drugs are
- 26 immediately available and are accessible from the operatory and recovery
- 27 rooms:
- 28 a. Epinephrine.
- 29 b. Atropine.
- 30 c. An antiarrhythmic.
- 31 d. An antihistamine.
- 32 e. An antihypertensive.
- 33 f. A bronchodilator.
- 34 g. An antihypoglycemic agent.
- 35 h. A vasopressor.
- 36 i. A corticosteroid.
- 37 j. An anticonvulsant.
- 38 k. Appropriate reversal agents.
- 39 l. Nitroglycerine.
- 40 m. An antiemetic.
- 41 n. A neuromuscular blocking agent.
- 42 (4) The licensed dentist shall maintain written emergency and patient discharge
- 43 protocols accessible from the operatory and recovery rooms. The written
- 44 emergency manual shall include a protocol for activation of emergency
- 45 management services for life-threatening complications along with any
- 46 information as required by rule.
- 47 (5) The licensed dentist shall satisfy any additional facility requirements
- 48 applicable to the permit level as required by the Board or this Article.
- 49 (d) The licensed dentist shall ensure that the following staffing, education, and training
- 50 requirements are met prior to performing a sedation procedure:

- 1           (1) The licensed dentist shall review and practice responding to clinical  
2 emergencies with all auxiliaries as a team and in person every six months and  
3 shall provide training to familiarize all auxiliaries in the treatment of clinical  
4 emergencies including, at a minimum, all of the following:
- 5           a. Airway obstruction.
  - 6           b. Allergic reactions.
  - 7           c. Angina pectoris.
  - 8           d. Apnea.
  - 9           e. Bradycardia.
  - 10          f. Bronchospasm.
  - 11          g. Cardiac arrest.
  - 12          h. Convulsions.
  - 13          i. Emesis and aspiration.
  - 14          j. Hypertension.
  - 15          k. Hypoglycemia.
  - 16          l. Hypotension.
  - 17          m. Hypoventilation and respiratory arrest.
  - 18          n. Hypoxemia and hypoxia.
  - 19          o. Laryngospasm.
  - 20          p. Myocardial infarction.
  - 21          q. Syncope
- 22          (2) All auxiliaries in the facility shall be BLS-certified.
- 23          (3) Except as provided in subdivision (4) of this subsection, the licensed dentist  
24 performing the surgical procedure or other dental procedure shall ensure that  
25 a registered nurse or a BLS-certified auxiliary is dedicated to patient  
26 monitoring and recording anesthesia or sedation data throughout the sedation  
27 procedure.
- 28          (4) A licensed dentist does not need to comply with subdivision (3) of this  
29 subsection if the licensed dentist or an additional sedation provider is  
30 dedicated to patient care and monitoring regarding anesthesia or moderate  
31 sedation throughout the sedation procedure and is not performing the surgery  
32 or other dental procedure. For the purposes of this subdivision, an additional  
33 sedation provider must be one of the following individuals:
- 34           a. A licensed dentist holding a permit or mobile permit in satisfaction of  
35 this Article to administer the anesthesia or sedation level at the facility  
36 where the sedation procedure is performed.
  - 37           b. An anesthesiologist licensed and practicing in accordance with Article  
38 1 of this Chapter and the rules of the North Carolina Medical Board.
  - 39           c. A certified registered nurse anesthetist licensed and practicing in  
40 accordance with the rules of the North Carolina Board of Nursing,  
41 under the supervision and direction of the licensed dentist who shall  
42 ensure the level of sedation administered does not exceed the level of  
43 the sedation allowed by the licensed dentist's permit.
- 44          (5) The licensed dentist shall satisfy any additional staffing, education, and  
45 training requirements applicable to the level of the permit, consistent with this  
46 Article or rule approved by the Board.
- 47          (e) Before starting any sedation procedure, the licensed dentist shall conduct a  
48 preoperative patient evaluation which shall include the following:
- 49           (1) Evaluating the patient for health risks relevant to the potential sedation  
50 procedure.

- 1           (2)    Evaluating the patient's food and fluid intake following the ASA guidelines  
2           for preoperative fasting applicable to elective procedures involving the  
3           administration of anesthesia or moderate sedation.
- 4           (3)    Satisfying any additional requirements for preoperative patient evaluation and  
5           procedures applicable to the level of the permit as set out in this section.
- 6       (f)    During the sedation procedure, the licensed dentist shall ensure all of the following  
7    occur:
- 8           (1)    Prescriptions intended to accomplish procedural sedation, including enteral  
9           dosages, shall be administered only under the direct supervision of the permit  
10          holder.
- 11          (2)    If IV sedation is used, IV infusion shall be administered before the start of the  
12          procedure and maintained until the patient is ready for discharge.
- 13          (3)    Capnography shall be used to monitor patients unless an individual patient's  
14          behavior or condition prevents use of capnography. In that event, the permit  
15          holder shall document in the sedation record the clinical reason capnography  
16          could not be used.
- 17          (4)    The licensed dentist shall ensure the patient's baseline vital signs are taken and  
18          recorded, including temperature, SPO2, blood pressure, and pulse.
- 19          (5)    The licensed dentist shall ensure the patient's blood pressure, oxygen  
20          saturation, ET CO2, unless capnography cannot be used, pulse, and respiration  
21          rates are monitored continuously in a manner that enables the licensed dentist  
22          to view vital sign trends throughout the procedure.
- 23          (6)    The licensed dentist shall ensure the intraoperative vital sign information is  
24          recorded on the anesthesia or sedation record contemporaneously throughout  
25          the procedure in intervals of five minutes or less for patients over 12 years old  
26          and in intervals of 10 minutes or less for pediatric patients 12 years old or  
27          younger.
- 28          (7)    The licensed dentist shall satisfy any additional requirements for operative  
29          procedures applicable to the level of the permit, as set out in this section.
- 30       (g)    Post-operative monitoring and discharge by the licensed dentist shall include all of  
31    the following:
- 32          (1)    The licensed dentist or an auxiliary under his or her direct supervision shall  
33          monitor the patient's post-operative vital sign information until the patient is  
34          recovered and is ready for discharge from the office. Recovery from  
35          anesthesia or moderate sedation shall include documentation of the following:
- 36               a.    Stable cardiovascular function.
- 37               b.    Uncompromised airway patency.
- 38               c.    Patient arousable and protective reflexes intact.
- 39               d.    State of hydration within normal limits.
- 40               e.    Patient can talk, if applicable.
- 41               f.    Patient can sit unaided, if applicable.
- 42               g.    Patient can ambulate with minimal assistance, if applicable.
- 43               h.    For a special needs patient, the pre-sedation level of responsiveness or  
44               the level as close as possible for that patient shall be achieved.
- 45          (2)    Before allowing the patient to leave the office, the licensed dentist shall  
46          determine that the patient has met the recovery criteria set out in subdivision  
47          (1) of this subsection and all of the following discharge criteria:
- 48               a.    Oxygenation, circulation, activity, skin color, and level of  
49               consciousness are stable and have been documented.

- 1                    b.     Explanation and documentation of written post-operative instructions  
2                            have been provided to the patient or a person responsible for the  
3                            patient at time of discharge.  
4                    c.     A person authorized by or responsible for the patient is available to  
5                            transport the patient after discharge.  
6            (h)    The licensed dentist shall maintain all of the following information in the patient's  
7            treatment records for a period of 10 years:  
8                    (1)    The patient's current written medical history, including known allergies and  
9                            previous surgeries.  
10                   (2)    A preoperative assessment.  
11                   (3)    Consent to the procedure and to the anesthesia or sedation, signed by the  
12                           patient or guardian, identifying the procedure and its risks and benefits, the  
13                           level of anesthesia or sedation and its risks and benefits, and the date signed.  
14                   (4)    The anesthesia or sedation record that shall include all of the following  
15                           information:  
16                    a.     The patient's baseline vital signs and intraoperative vital sign  
17                            information in accordance with subsection (f) of this section.  
18                    b.     The printed or downloaded vital sign information from the  
19                            capnograph. A permit holder's failure to maintain capnograph  
20                            documentation, except as set out in subsection (f) of this section, shall  
21                            be deemed a failure to monitor the patient as required pursuant to this  
22                            section.  
23                    c.     Procedure start and end times.  
24                    d.     Gauge of needle and location of IV on the patient, if used.  
25                    e.     The total amount of any local anesthetic administered during the  
26                            procedure.  
27                    f.     Any analgesic, sedative, pharmacological, or reversal agent, or other  
28                            drugs administered during the procedure, including route of  
29                            administration, dosage, strength, time, and sequence of administration,  
30                            with separate entries for each increment of medication that is titrated  
31                            to effect.  
32                    g.     Documentation of complications or morbidity and clinical responses.  
33                    h.     Status of patient upon discharge, including documentation of  
34                            satisfying the requirements set out in this subsection.  
35                    (5)    Any additional documentation applicable to the level of the permit in  
36                            accordance with this section."

37            **SECTION 2.(b)** Article 2 of Chapter 90 of the General Statutes is amended by  
38 adding a new section to read:

39            **"§ 90-30.4. Moderate parenteral and enteral conscious sedation clinical requirements and**  
40            **equipment.**

41            (a)    A dentist holding or applying for a permit to administer moderate conscious sedation  
42            or supervising any CRNA employed to administer or RN employed to deliver moderate  
43            conscious sedation shall comply with the requirements of this section, in addition to other  
44            requirements of this Article.

45            (b)    In addition to the drugs listed G.S. 90-30.3, an unexpired muscle relaxant shall be  
46            immediately available and be accessible from the operatory and recovery rooms.

47            (c)    As part of the preoperative assessment required by G.S. 90-30.3, the licensed dentist  
48            shall evaluate the patient for health risks as follows:

49                    (1)    A patient who is medically stable and who is ASA I or II shall be evaluated  
50                            by reviewing the patient's current medical history and medication use.

1           (2) A patient who is not medically stable or who is ASA III or higher shall be  
2 evaluated by the permit holder's consultation with the patient's primary care  
3 physician or consulting medical specialist regarding the potential risks posed  
4 by the planned dental procedure.

5           (d) During the sedation procedure, a moderate conscious sedation licensed dentist shall  
6 not administer anesthetic or sedative agents satisfying any of the following criteria:

7           (1) Designed by the manufacturer for use in administering general anesthesia or  
8 deep sedation.

9           (2) Determined by the manufacturer to be contraindicated for use in moderate  
10 conscious sedation.

11           (3) In amounts exceeding the manufacturers' maximum recommended dosages  
12 unless the licensed dentist documents in the sedation record the clinical reason  
13 for exceeding the maximum recommended dosage for the patient."

14           **SECTION 2.(c)** Article 2 of Chapter 90 of the General Statutes is amended by adding  
15 a new section to read:

16 **"§ 90-30.5. Moderate pediatric conscious sedation clinical requirements and equipment.**

17           (a) A dentist holding or applying for a permit to administer moderate pediatric conscious  
18 sedation shall comply with the requirements of this section, in addition to other requirements of  
19 this Article.

20           (b) In addition to the drugs listed G.S. 90-30.3, an unexpired muscle relaxant shall be  
21 immediately available and be accessible from the operatory and recovery rooms.

22           (c) In addition to the requirements set out in G.S. 90-30.3, the licensed dentist's  
23 emergency manual shall include assignments to be performed in the event of emergency by a  
24 BLS-certified auxiliary dedicated to patient monitoring.

25           (d) In addition to the requirements set out in G.S. 90-30.3 concerning preoperative  
26 procedures, the licensed dentist shall ensure that patients who have been administered moderate  
27 pediatric conscious sedation are monitored for alertness, responsiveness, breathing, and skin  
28 coloration during waiting periods before operative procedures by the licensed dentist or an  
29 auxiliary dedicated to patient monitoring.

30           (e) As part of the preoperative assessment required by G.S. 90-30.3, the licensed dentist  
31 shall evaluate the patient for health risks as follows:

32           (1) A patient who is medically stable and who is ASA I or II shall be evaluated  
33 by reviewing the patient's current medical history and medication use.

34           (2) A patient who is not medically stable or who is ASA III or higher shall be  
35 evaluated by the permit holder's consultation with the patient's primary care  
36 physician or consulting medical specialist regarding the potential risks posed  
37 by the planned dental procedure.

38           (f) If a patient immobilization device is used, the licensed dentist shall ensure that all of  
39 the following conditions are met:

40           (1) The device is applied to avoid airway obstruction or chest restriction.

41           (2) The patient's head position and respiratory excursions are checked frequently  
42 to ensure airway patency.

43           (3) A hand or foot is kept exposed.

44           (4) The patient is under observation by the licensed dentist or a BLS-certified  
45 auxiliary at all times.

46           (g) During the sedation procedure, a moderate pediatric conscious sedation licensed  
47 dentist shall not administer any of the following anesthetic or sedative agents:

48           (1) Designed by the manufacturer for use in administering general anesthesia or  
49 deep sedation.

50           (2) Determined by the manufacturer to be contraindicated for use in moderate  
51 pediatric conscious sedation.

1           (3) In amounts exceeding the manufacturers' maximum recommended dosages,  
2           unless the licensed dentist documents in the sedation record the clinical reason  
3           for exceeding the maximum recommended dosage for the patient.

4           (h) In addition to the requirements set out in G.S. 90-30.3 concerning the patient  
5 treatment record, the licensed dentist shall maintain documentation of pre-sedation instructions  
6 and information provided to the patient or person responsible for the patient, which shall include  
7 all of the following:

8           (1) Objectives of the sedation.

9           (2) Anticipated changes in patient behavior during and after sedation.

10          (3) Instructions to the person responsible for a patient transported in a child safety  
11 seat regarding patient head position to avoid airway obstruction.

12          (4) A 24-hour telephone number for the permit holder or his or her BLS-certified  
13 auxiliaries.

14          (5) Instructions on limitations of activities and dietary precautions.

15          (i) For purposes of this section, during an evaluation, a moderate pediatric conscious  
16 sedation licensed dentist or applicant shall demonstrate competency in the deployment of an  
17 intravenous delivery system as follows:

18          (1) A licensed dentist or applicant who uses intravenous sedation shall  
19 demonstrate the administration of moderate pediatric conscious sedation on a  
20 live patient, including the deployment of an intravenous delivery system.

21          (2) A licensed dentist or applicant who does not use intravenous sedation shall  
22 describe the proper deployment of an intravenous delivery system and shall  
23 demonstrate the administration of moderate pediatric conscious sedation on a  
24 live patient."

25          **SECTION 2.(d)** Article 2 of Chapter 90 of the General Statutes is amended by  
26 adding a new section to read:

27 **"§ 90-30.6. Reports of adverse events.**

28          (a) A dentist who holds a permit to administer general anesthesia or sedation shall submit  
29 an adverse occurrence report to the Board within 72 hours after each adverse event if the patient  
30 dies or has permanent organic brain dysfunction within 24 hours after the administration of  
31 general anesthesia or sedation. Sedation permit holders shall cease administration of sedation  
32 until the Board has investigated the death or permanent organic brain dysfunction and approved  
33 resumption of permit privileges. General anesthesia permit holders shall cease administration of  
34 general anesthesia and sedation until the Board has reviewed the adverse event report and  
35 approved resumption of permit privileges.

36          (b) A dentist who holds a permit to administer general anesthesia or sedation shall submit  
37 an adverse event report to the Board within 30 days after each adverse event if the patient is  
38 admitted to a hospital on inpatient status for a medical emergency or physical injury within 24  
39 hours after the administration of general anesthesia or sedation.

40          (c) A dentist who holds a permit to administer general anesthesia or sedation shall submit  
41 an adverse event report to the Board within 30 days after each adverse event, as defined in  
42 G.S. 90-30.3.

43          (d) The adverse event report shall be in writing and shall include, at a minimum, all of  
44 the following:

45          (1) Dentist's name, license number, and permit number.

46          (2) Date and time of the occurrence.

47          (3) Facility where the occurrence took place.

48          (4) Name and address of the patient.

49          (5) Surgical procedure involved.

50          (6) Type and dosage of sedation or anesthesia utilized in the procedure.

51          (7) Circumstances involved in the occurrence.

1           (8)    The entire patient treatment record, including anesthesia records.  
2       (e)    Upon receipt of an adverse event report under this section, the Board shall investigate  
3 and shall take disciplinary action if the evidence demonstrates that a licensee has violated this  
4 Article."

5           **SECTION 2.(e)** Article 2 of Chapter 90 of the General Statutes is amended by adding  
6 a new section to read:

7 **"§ 90-30.7. Requirements for inspections and evaluations.**

8       (a)    During a facility inspection, for a dentist applying for or holding a permit to  
9 administer general anesthesia, moderate conscious sedation, or moderate pediatric conscious  
10 sedation, the applicant or licensed dentist shall demonstrate satisfaction of the requirements set  
11 forth in G.S. 90-30.3.

12       (b)    During an evaluation for a dentist applying for or holding a permit to administer  
13 general anesthesia, moderate conscious sedation, or moderate pediatric conscious sedation, the  
14 applicant or licensed dentist shall demonstrate the administration of anesthesia or sedation in  
15 accordance with the level of the permit and shall demonstrate competency in all of the following  
16 areas in accordance with G.S. 90-30.3:

17           (1)    Preoperative patient evaluation and procedures.

18           (2)    Operative procedures, including the deployment of an intravenous delivery  
19 system.

20           (3)    Post-operative patient monitoring and discharge.

21           (4)    Treatment of the clinical emergencies.

22       (c)    During the evaluation, the applicant shall take a written examination on the topics set  
23 forth in subsection (b) of this section. The applicant shall obtain a passing score on the written  
24 examination by answering eighty percent (80%) of the examination questions correctly. If the  
25 applicant fails to obtain a passing score on the written examination, the applicant may be  
26 reexamined under reexamination procedures as set forth by the Board.

27       (d)    A licensed dentist must be reevaluated once every five years. Each facility where the  
28 permit holder administers anesthesia or sedation shall be subject to a facility inspection upon the  
29 annual renewal of the permit."

30           **SECTION 3.** The North Carolina Policy Collaboratory at the University of North  
31 Carolina at Chapel Hill shall conduct a study to evaluate whether a second health care provider  
32 who is qualified to provide anesthesia services is needed when utilizing drugs that can lead to  
33 deep sedation, such as propofol. The Collaboratory shall submit a report to the Joint Legislative  
34 Oversight Committee on Health and Human Services by April 1, 2024, with any legislative  
35 recommendations addressing this issue.

36           **SECTION 4.** Sections 1 and 2 of this act become effective July 1, 2023. The  
37 remainder of this act effective when it becomes law.
