SECTION 7.(a) The General Assembly makes the following findings:

(1) North Carolina is the home of our nation's first cultivated grape, the variety of native Muscadine grape known as Scuppernong.

(2) French explorers in 1524 first discovered Muscadine grapes while exploring the Cape Fear River Valley, and later British explorers in 1584 and 1585 reported to Queen Elizabeth and Sir Walter Raleigh that the barrier islands were full of grapes and the soil of the land was "so abounding with sweet trees that bring rich and most pleasant gummies, grapes of such greatness, yet wild as France, Spain and Italy hath not greater..."

(3) The thick skins, fruit seed, and sweet pulp and juice that characterize Muscadine grapes make the native fruit a state treasure.

(4) In recent times, researchers have discovered that Muscadine grapes are rich in antioxidants and phytochemicals, including resveratrol, among many others.

SECTION 7.(b) G.S. 145-18(a) reads as rewritten:

"(a) The official fruit of the State of North Carolina is the Scuppernong-Muscadine grape (Vitis genus)."

DESIGNATE THE LONGLEAF PINE AS THE EMBLEM REPRESENTING THE TREES OF NORTH CAROLINA

SECTION 8. G.S. 145-3 reads as rewritten:

The pine is hereby adopted as the official State tree of the State of North Carolina, and the longleaf pine (Pinus palustris) is designated as the emblem representing the trees of North Carolina."

PRESCRIBED BURNING ACT AMENDMENTS

SECTION 9.(a) G.S. 106-966 reads as rewritten:

"§ 106-966. Definitions.
As used in this Article:

(1) "Certified prescribed burner" means an individual who has successfully completed a certification program approved by the North Carolina Forest Service of the Department of Agriculture and Consumer Services.

(2) "Prescribed burning" means the planned and controlled application of fire to naturally occurring vegetative fuels under safe specified weather and safe environmental and other conditions, while following appropriate precautionary measures that will confine the fire to a predetermined area and accomplish the intended management objectives.

(3) "Prescription" means a written plan establishing the conditions and methods for conducting a prescribed burn prepared by a certified prescribed burner for starting, controlling, and extinguishing a prescribed burning."

SECTION 9.(b) G.S. 106-967 reads as rewritten:

"§ 106-967. Immunity from liability.
(a) Any prescribed burning conducted in compliance with G.S. 106-968 is in the public interest and does not constitute a public or private nuisance.

(b) A landowner or the landowner's agent who conducts a prescribed burning in compliance with G.S. 106-968 shall not be liable in any civil action for any damage or injury
caused by fire, including reignition of a smoldering, previously contained burn, or resulting from smoke.

(c) Notwithstanding subsections (a) and (b), this section does not apply when a nuisance or damage results from a negligently or improperly conducted prescribed burning, gross negligence.

(d) Notwithstanding subsections (a), (b) and (c), this section shall not apply to claims by public utilities resulting from damage to their equipment or facilities, where a prescribed burn proximately causes such damage.

(e) For purposes of this section, the term "public utility" means an electric power supplier, as defined in 62-133.8(a)(3), a gas operator, as defined in 62-50(g), or a business providing telecommunications service taxed under G.S. 105-164.4(a)(4c)."

SECTION 9. (c) G.S. 106-968 reads as rewritten: "§ 106-968. Prescribed Certified prescribed burning.

(a) Prior to conducting a prescribed burning, a certified prescribed burner shall prepare and provide to the landowner a prescription for the prescribed burning prepared by a certified prescribed burner and filed by the North Carolina Forest Service of the Department of Agriculture and Consumer Services. A copy of the prescription shall be provided to the landowner. Both the landowner and the certified prescribed burner on site shall retain a copy of this prescription throughout the duration of the prescribed burning. The prescription shall include:

1. The landowner’s name and address.
2. A description of the area to be burned.
3. A map of the area to be burned.
4. An estimate of tons of the fuel located on the area.
5. The objectives of the prescribed burning.
6. A list of the acceptable weather conditions and parameters for the prescribed burning sufficient to minimize the likelihood of smoke damage and fire escaping onto adjacent areas.
7. The name of the certified prescribed burner responsible for conducting the prescribed burning.
8. A summary of the methods that are adequate for the particular circumstances involved to be used to start, control, and extinguish the prescribed burning, including firebreaks and sufficient personnel and firefighting equipment to contain the fire within the burn area.

a. Fire spreading outside the authorized burn area on the day of the prescribed burn ignition shall not constitute conclusive proof of inadequate firebreaks, insufficient personnel, or a lack of firefighting equipment.

b. If the prescribed burn is contained within the authorized burn area during the authorized period, there shall be a rebuttable presumption that adequate firebreaks, sufficient personnel, and sufficient firefighting equipment were present.

c. Continued smoldering of a prescribed burn resulting in a subsequent wildfire does not in itself constitute evidence of gross negligence under G.S. 106-967.

(9) Provision for reasonable notice of the prescribed burning to be provided to nearby homes and businesses located adjacent to the burn site to avoid effects on health and property.

(b) The prescribed burning shall be conducted by a certified prescribed burner in accordance with a prescription that satisfies subsection (a) of this section. The certified prescribed burner
burner shall be present on the site and shall be in charge of the burning throughout the period of
the burning. A landowner may conduct a prescribed burning and be in compliance with this
Article without being a certified prescribed burner if the landowner is burning a tract of forestland
of 50 acres or less owned by that landowner and is following all conditions established in a
prescription prepared by a certified prescribed burner.

(c) Prior to conducting a prescribed burning, the landowner or the landowner’s agent shall
obtain an open-burning permit under Article 78 of this Chapter from the North Carolina Forest
Service of the Department of Agriculture and Consumer Services. This open-burning permit must
remain in effect throughout the period of the prescribed burning. The prescribed burning shall be
conducted in compliance with all the following:

(1) The terms and conditions of the open-burning permit under Article 78 of this
Chapter.
(2) The State’s air pollution control statutes under Article 21 and Article 21B of
Chapter 143 of the General Statutes and any rules adopted pursuant to these
statutes.
(3) Any applicable local ordinances relating to open burning.
(4) The smoke management guidelines adopted by the North Carolina Forest
Service of the Department of Agriculture and Consumer Services.
(5) Any rules adopted by the North Carolina Forest Service of the Department of
Agriculture and Consumer Services, to implement this Article.

(d) The North Carolina Forest Service may accept prescribed burner certification from
another State or other entity for the purpose of prescribed burning under this Article.”

When used in sand-lined trench systems, bed, or fill systems, prefabricated permeable block panel systems shall use the equivalent trench width of 6 feet to calculate the minimum trench length unless otherwise instructed by the manufacturer on a case-by-case basis. The long term acceptance rate for prefabricated permeable block panel systems shall not exceed 0.8 gallons per day per square foot. Prefabricated permeable block panel systems may be used in high strength wastewater systems or other system designs. However, prefabricated permeable block panel systems may not be used where effluent contains high amounts of grease and oil, such as restaurants.

SECTION 16.(d) Additional Rulemaking Authority. – The Commission shall adopt a rule to amend the Prefabricated Permeable Block Panel Systems Rule consistent with subsection (c) of this section. Notwithstanding G.S. 150B-19(4), the rule adopted by the Commission pursuant to this section shall be substantively identical to the provisions of subsection (c) of this section. (h) Accepted Wastewater Dispersal Systems. – A manufacturer of an Innovative wastewater dispersal system or other approved trench dispersal system specifically identified in a rule adopted by the Commission that has been in general use in this State for a minimum of five years may petition the Commission to have the system designated as an Accepted wastewater system as provided in this subsection. The manufacturer shall provide the Commission with the data and findings of all prior evaluations of the performance of the system in this State and other states referenced in the petition, including disclosure of any conditions found to result in unacceptable structural integrity, treatment, or hydraulic performance. In addition, the manufacturer shall provide the Commission with information sufficient to enable the Commission to fully evaluate the performance of the system in this State for at least the five-year period immediately preceding the petition. The Commission shall designate a wastewater dispersal system as an Accepted wastewater system only if it finds that there is clear, convincing, and cogent evidence based on actual field surveys and county activity reports (i) to confirm the findings made by the Department at the time the Department approved the system as a wastewater dispersal system and (ii) that the system performs in a manner that is equal or superior to a conventional or Accepted wastewater system under actual field conditions in this State. The Commission shall specify the circumstances in which use of the system is appropriate and any conditions and limitations related to the use of the system. However, the Commission shall not include more restrictive conditions and limitations established in the approval of a wastewater system as Accepted that are not included in the approval of the wastewater system as Innovative."
If the Department designates a wastewater dispersal system as an Accepted wastewater system pursuant to this section, the following shall apply:

(1) The approval shall be limited to the manufacturer who submitted the petition and received the Accepted status from the Commission.

(2) Neither the Commission, the Department, or any local health department shall condition, delay, or deny the substitution of any Accepted wastewater system based on location of nitrification lines when all parts of the dispersal field can be installed within the approved initial dispersal field area while complying with all Commission rules.

(i) Nonproprietary Wastewater Systems. – The Department may initiate a review of a nonproprietary wastewater system and approve the system for use as a provisional wastewater system or an innovative wastewater system without having received an application from a manufacturer. The Department may recommend that the Commission designate a nonproprietary wastewater system as an accepted wastewater system without having received a petition from a manufacturer.

(j2) Clarification of Use of Native Backfill. – In considering the use of backfill material in subsurface trench dispersal products, neither the Commission nor the Department shall condition, delay, or deny the approval of a subsurface trench dispersal product based on a non-native backfill material requirement without the prior approval of the manufacturer. With respect to approvals already issued by the Department or the Commission that include conditions or requirements specifying the use of non-native backfill material, the Department or Commission, as applicable, shall reissue those approvals, at the written request of the manufacturer, without conditions or requirements relating to the use of non-native backfill material.

SECTION 17.(b) This section is effective when it becomes law and applies retroactively to any wastewater system approvals issued by the Commission for Public Health or the Department of Health and Human Services.

SEVERABILITY CLAUSE AND EFFECTIVE DATE
