Executive Summary

The State Board is authorized in Rule 23 NCAC 02E .0201 to approve programs consistent with the System's mission. The approval processes include curriculum applications (traditional or special) depending on the program type. Community colleges must have State Board of Community Colleges approval to offer a curriculum program prior to implementation.

Approval of curriculum programs is justified by student interest and current and future employment needs within the state. Each college must certify that they can operate the program efficiently and effectively within the resources available to the college.

Colleges may seek approval to offer programs that are new to the System (the curriculum program does not currently exist in the System), or seek approval to offer an established program (the curriculum program is an existing program title within the System).

Instructional Service Agreements (Level III) are utilized when two or more colleges jointly offer a curriculum program. In concordance with Rule 23 SBCC 2E.0604, these agreements are approved by the NC Community College System Office, involve the sharing of resources and may include the sharing of FTE.

From January 2012 through December 2012, a total of **62** curriculum programs were approved. Of the **62** approved programs, **54** programs were existing curriculum programs, **3** were new to the System and **5** were instructional service agreements.

The new to the System programs are:

Business Analytics (A25350)

Mammography (Certificate) (C45830)

(Two colleges jointly developed the program and received simultaneous approval)

Per rule 23 SBCC.2E.0201(b), community colleges shall request to terminate a curriculum program when there has been low or zero enrollment for two years. From January 2012 through December 2012, the North Carolina Community College System received program termination requests from **12** colleges. The colleges requested termination of one or more of their curriculum programs resulting in the termination of **32** curriculum programs system-wide.
