

NORTH CAROLINA TEACHERS

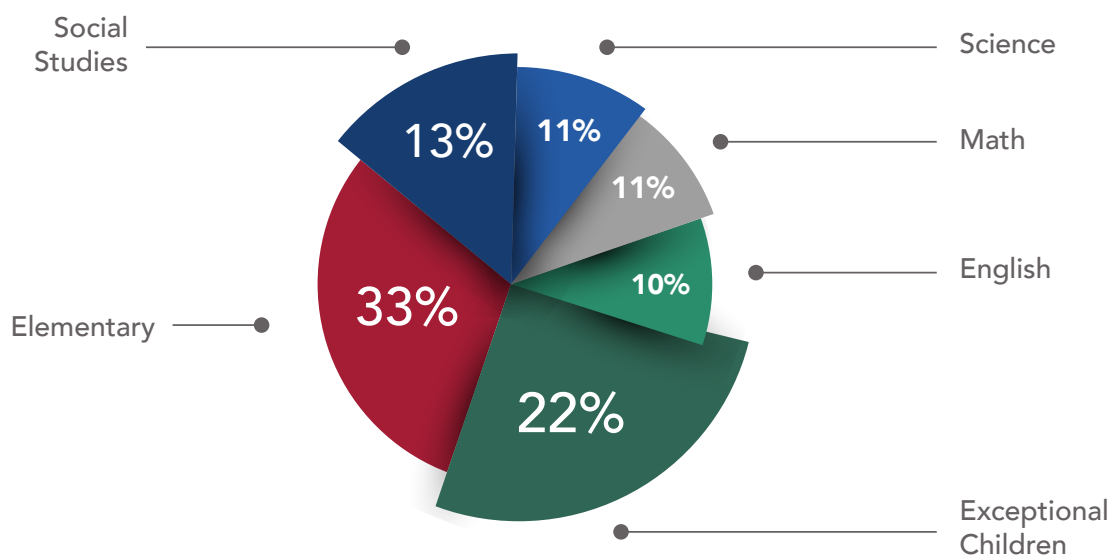

—of Tomorrow—

North Carolina is one of our most productive launches to date – in just 18 months we have close to **500+ enrolled** in the program and have **141+ teachers placed**.

North Carolina Teachers of Tomorrow's Teacher Pipeline

North Carolina Teachers of Tomorrow's Certification Areas

Status Update

- ✓ Application process was very smooth – DPI did a great job in working with us to ensure we understood the process and got the information the state needed to get approved
- ✓ School districts have been great to work once they understood the changes
- ✓ We all could have done a better job communicating with all Lateral Entry people on the transition to the new process
 - Need a list of lateral entry licensed teachers to email them they need to get into new system
- ✓ *Form RL* processing is taking time – and with the current system we don't have visibility
 - Need to know they are working to get field supervision
- ✓ Developing methodology courses for all certifications is cumbersome and for the smaller certifications makes this difficult
- ✓ edTPA – other states are looking at removing this – bill in IL, conversations in AL
