Department of Public Instruction

Report to the North Carolina General Assembly

School Safety Grants Program

Session Law 2019 – 222

Date Due: April 1, 2020

DPI Chronological Schedule 2020-94

Submitted by the NC Superintendent of Public Instruction

STATE BOARD OF EDUCATION

STATE BOARD OF EDUCATION VISION: Every public school student in North Carolina will be empowered to accept academic challenges, prepared to pursue their chosen path after graduating high school, and encouraged to become lifelong learners with the capacity to engage in a globally-collaborative society.

STATE BOARD OF EDUCATION MISSION: The mission of the North Carolina State Board of Education is to use its constitutional authority to guard and maintain the right of a sound, basic education for every child in North Carolina Public Schools.

ERIC DAVIS

Chair: Charlotte – At-Large

JILL CAMNITZ

Legislative Directive

Session Law 2019-222, Part III Section 3, directed the Superintendent of Public Instruction to establish the School Safety Grants program with the purpose of improving safety in public school units through additional school resource officers, services for students in crisis, school safety training, school safety equipment, and school mental health support personnel.

Specific allocations included:

- \$15.0 million for school resource officers
- \$ 6.1 million for school safety equipment
- \$ 4.5 million for services for students in crisis
- \$ 4.5 million for training to increase school safety

This report will serve as the required reporting by Superintendent of Public Instruction to the Joint Legislative Education Oversight Committee, the Joint Legislative Oversight Committee on Health and Human Services, the Joint Legislative Oversight Committee on Justice and Public Safety, the Joint Legislative Commission on Governmental Operations, and the Fiscal Research Division as indicated in SECTION 3.1 of Session Law 2019-222. Appendix A includes the identity of each entity that received a grant through the program and the amount of funding provided to each entity.

Summary

For 2019, the School Safety Grant Program has provided \$30 million to public schools for School Resource Officers, safety equipment, crisis services, and training. While there are still unmet school safety needs, this program has made considerable headway in addressing safety needs for public schools.

Grant (\$ millions)	Funding	Requests	Awards
SROs (base)	\$12.0	\$12.0	\$12.0
SROs (new)	\$3.0	\$5.5	\$2.9
Equipment	\$6.1	\$7.1	\$6.1
Students in Crisis	\$4.5	\$5.3	\$4.5
Training	\$4.5	\$4.2	\$4.2
Total	\$30.1	\$34.1	\$29.7

Immediate Legislative Request

For 2019-20, disruptions due to COVID-19 are presenting challenges for schools in spending these grant funds in the way they originally intended. Public school units have requested the following relief for 2019-20 grant funds, and NC DPI recommends that these flexibilities be granted:

1. Allow carryforward of unexpended grant funds to FY 2020-21 so public school units can continue to spend these funds over the summer and in preparation for the next school year. Examples include delays in procurement or delivery of safety equipment and postponement of training opportunities.
2. Allow transfer of funds between grant categories. Public school units are reporting increased need for students in crisis services due to the COVID-19 disruptions, and delays in training opportunities. NC DPI has received requests to move training funds to crisis services.

Estimate of Future Need

Overall, more than \$34 million in grant funds were requested. Available grant funds totaled \$30 million after withholding \$100,000 for grant administration. However, due to the caps on each individual grant program, NC DPI was only able to award \$29.7 million of the requested funds. Requests for SRO, Equipment, and Students in Crisis grants exceeded available funds in each of those categories. Requests for Training grants were less than the total available.

While \$4 million in requests (12%) did not receive funding, **it is likely that the actual funding gap is significantly greater than \$4 million.** Several factors led to underrepresentation of need:

1. *Timing of grant opportunities:* This is the first year that public school units had the opportunity to request funding for students in crisis and training. These grants were not

established until late September 2019, and public school units had 30 days to work with community partners and submit grant applications. Many public school units with resource needs were not able to complete applications due to this timeframe. If additional funds are appropriated in the future for these programs, it is expected that more public school units will take advantage of the opportunities.

2. *Match requirement for SRO grants:* The required match of \$1 match: \$2 grant was challenging for smaller or low wealth districts. This resulted in some districts reducing their request, declining awarded funds, or not requesting funds.

In addition to the overall challenges with the match requirement, the timing of the \$3M in expansion funds compounded the match issue. Most districts rely on their county governments for local matching funds, so they need to be able to secure funds from the county during the county's budget process in May/June. Since funds were not appropriated until September, districts missed this window to secure local matching funds. The impact of this timeframe is reflected in the results for the \$3M in SRO expansion grants. While public school units requested funds totaling \$5.52 million, ultimately they were only able to accept \$2.92 million when awards were made because of local match availability.

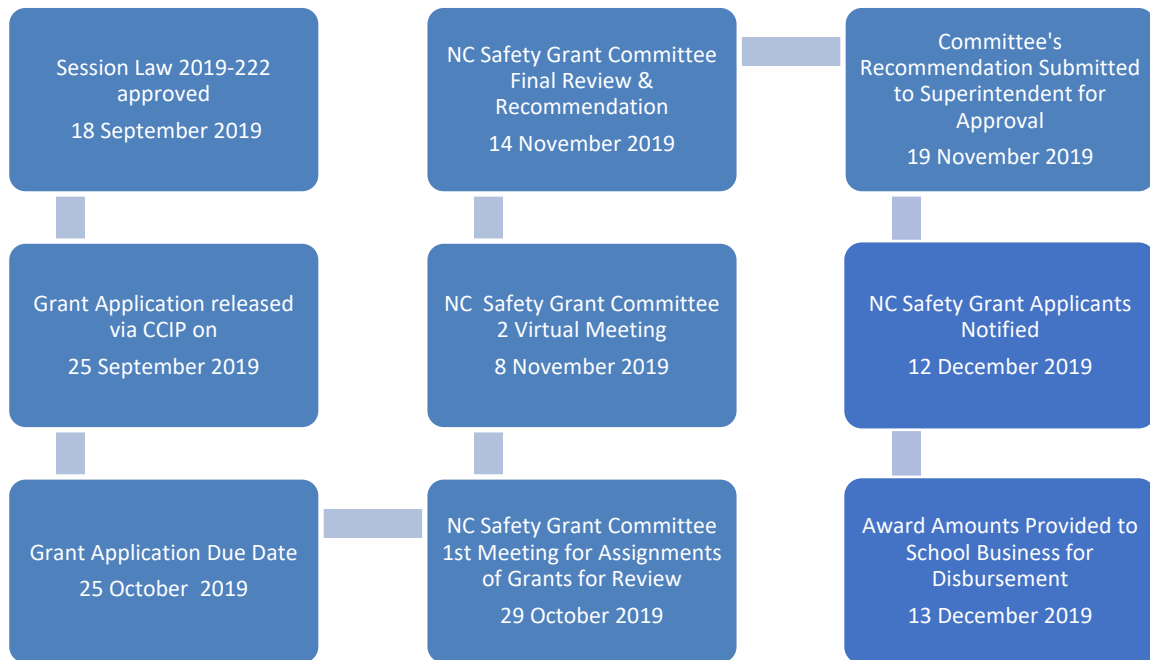

Recommendations

The following changes would improve the effectiveness of the school safety grant program in achieving the goal of improving school safety across the state:

1. Appropriate recurring funds or, at a minimum, funds for both years of the biennium in the biennial budget. Lower wealth and smaller public school units, in particular, require planning and startup time.
2. Permit carryforward of encumbered, unexpended funds. This allows public school units to finish critical trainings over the summer, extend student crisis services during the summer months, and complete procurement processes. This is particularly critical for 2020 due to the disruptions caused by COVID-19 and school closures.
3. Establish a grant-writer assistance program, whereby NC DPI can contract with universities or nonprofits to assist public school units with fewer resources in writing grant applications for the state school safety grants and federal school safety grants.
4. Amend the match requirements to reduce the match ratio for lower wealth districts or authorize the use of in-kind match.

Timeline and Process of Grant Program

The 2019 School Safety Grant Program officially began once the appropriation was signed into law. Below is a timeline that represents the grant process from the time the appropriation was approved to the time that applicants were notified.

Applications were assessed on multiple factors, including level of resources available to the public school unit, whether the public school unit has received other grants of funding for school safety, performance of a safety assessment in conjunction with a local law enforcement agency, and the overall impact on student safety in the public school unit if the identified needs are funded. Consideration was also given for the compressed application and implementation timeline resulting from the establishment of the program toward the end of the first quarter of the fiscal year.

The compressed timeframe created some challenges for public school units both in developing and submitted applications and in expending funds promptly. It is hoped that a July 1 implementation date for 2020 will address these issues.

School Resource Officers

School Resource Officer (SRO) grants are available to district, charter, and other independent public schools serving elementary or middle school grades. Allowable uses include employing or contracting for SROs, and training SROs.

School Resource Officer grants were distributed in two allocations:

Jul. 2019: \$12M distributed as the second year's allocation of two-year grants made with recurring funds in 2018-19.

129 public school units received these funds

Dec. 2019: \$ 3M distributed from the Sep. 2019 appropriation, awarded as one-year grants.

64 public school units received these funds. Total requests exceeded \$5.5 million.

SRO grants required a match of one dollar (\$1.00) in non-State funds for every two dollars (\$2.00) in State funds awarded. Total awards led to the employment of and/or training for 445 school resource officers throughout North Carolina.

School resource officers play a critical role on a broader school safety team. Grantees were encouraged to join forces with their local law enforcement agencies to assess the need for improving school safety in their schools. Over the course of this year, relationships have developed and strengthened between schools and local law enforcement by either MOUs in place or letters of support from local law enforcement.

Challenges and Lessons Learned:

- *Funding certainty and stability.* The September appropriation of the \$3M created some hiring challenges for districts. Going forward, NC DPI will be able to allot the additional recurring funds from the base budget on an earlier timeline. While award notifications would ideally be made in May for the following fiscal year, the current challenges due to COVID-19 may prolong the application process this year. In order for public schools to plan for the local match and agreements with local law enforcement, recurring funding is necessary.
- *Training.* Adequate training before and during the school year is essential. An SRO's work is quite different than policing in communities, so it is important that SROs are consistently receiving training on adolescent development, crisis intervention training, and youth mental health first aid. Although training was emphasized in 2019, the 2020 grant cycle will increase this focus.
- *Local match.* Districts with fewer resources may request less funding than needed due to the match requirement. The General Assembly may wish to consider a tiered approach to the local match based on county wealth.

School Safety Equipment

Overall, public school units requested \$7.1 million in school safety equipment grants. One hundred and forty-three (143) public school units were awarded a total of \$6.1 million to purchase school safety equipment. Examples include:

- Updated communication systems, both walkie talkies and mass communication
- Front entry security systems
- Security card swipes for access by staff
- Exterior cameras for schools' means of egress

Challenges and Lessons Learned: Demand for these funds exceeded availability by \$1 million, so an increase in this category is recommended. In addition, because districts had to competitively bid many of these purchases, there have been challenges in completing the procurements quickly. Overall, NC DPI recommends that public school units be permitted to carry these grant funds forward to complete procurements.

Grants for Students in Crisis

Requests for Students in Crisis grants totaled \$5.2 million. There were 56 public school units across the state awarded \$4.5 million for students in crisis services. All applications were funded in all or part. Per legislation, eligible expenses for this grant program included:

- Crisis respite services for parents or guardians of an individual student to prevent more intensive or costly levels of care.
- Training and expanded services for therapeutic foster care families and licensed child placement agencies that provide services to students who need support to manage their health, welfare, and safety and have any of the following:
 - a. Cognitive or behavioral problems
 - b. Developmental delays
 - c. Aggressive behavior
- Evidence-based therapy services aligned with targeted training for students and their parents or guardians, including any of the following:
 - a. Parent-child interaction therapy
 - b. Trauma-focused cognitive behavioral therapy
 - c. Dialectical behavior therapy
 - d. Child-parent psychotherapy
- Any other crisis service, including peer-to-peer mentoring, that is likely to increase school safety. (No more than \$45,000 could be awarded for services in this category.)

Public School Units applied for funds for a variety of models of service, including:

- small group mental health counseling
- individual psychotherapy
- emergency respite care services
- therapeutic foster care
- transition back to traditional setting support
- Life Coaching
- peer to peer connections
- consultations and assessments
- after school structured activities and support.

Example of Students in Crisis Services: Day Treatment Program

Rockingham County Schools, in conjunction with Youth Haven Services in Reidsville, NC serving as the Critical Access Behavioral Health Agency (CABHA), has a Day Treatment Program. The program focuses on integrating students back to traditional school by assisting students in developing behavior management skills, social skills and coping strategies to help them achieve social, behavioral and academic success. The program offers a team approach to treatment and education by serving small numbers of students with Qualified Mental Health Professionals, Special Education teachers and paraprofessionals. Licensed mental health professional staff also serve students in this program. During the Day Treatment Program, the students receive mental health services all throughout the day in the form of skill building and social-emotional support in addition to the individual counseling sessions. Day Treatment provides individualized education integrated with intensive mental health treatment services

Challenges and Lessons Learned: This grant program was previously structured to provide grants directly to community partners. The new approach in 2019 to grant all funds to public school units has improved collaboration between community partners and schools and eased administrative burdens. Nonetheless, public school units reported a variety of challenges they faced in providing these services, including:

- Providing mental health services without parental permission
- Serving students who are eligible for no-cost services through Medicaid, but have not accessed them
- Funding services for students who are not eligible for Medicaid but qualify for mental health services
- Identifying standardized assessment and referral processes for all school-based providers
- Serving hard to reach populations needing services such as Hispanic and Native American Students
- Involving parents who have transportation and mental health challenges
- Identifying ways to serve students who need more intensive mental health support services including residential treatment
- Continuing services to students when the grant ends

Grants for Training to Increase School Safety

There were 86 public school units across the state awarded over \$4.2M for training to increase school safety. Districts were given the ability to contract with community partners to provide trainings. Eligible expenses for this \$4.2M grant program included targeted and evidence-based training to help students develop healthy responses to trauma and stress. Per legislation, trainings included any of the following services:

1. Counseling on Access to Lethal Means (CALM) training for school mental health support personnel, local first responders, and teachers on the topics of suicide prevention and reducing access by students to lethal means.
2. Training for school mental health support personnel on comprehensive and evidence-based clinical treatments for students and their parents or guardians, including any of the following:
 - a. Parent-child interaction therapy.
 - b. Trauma-focused cognitive behavioral therapy.
 - c. Behavioral therapy.
 - d. Dialectical behavior therapy.
 - e. Child-parent psychotherapy.
3. Training for students and school employees on community resilience models to improve understanding and responses to trauma and significant stress.
4. Training for school mental health support personnel on Modular Approach to Therapy for Children with Anxiety, Depression, Trauma, or Conduct problems (MATCH-ADTC), including any of the following components:
 - a. Trauma-focused cognitive behavioral therapy.
 - b. Parent and student coping skills
 - c. Problem solving
 - d. Safety planning
5. Any other training, including training on the facilitation of peer-to-peer mentoring, that is likely to increase school safety

Many grantees focused training on teachers since they have the most opportunities to regularly impact students. Several grantees focused their trainings on school support staff like counselors, nurses, social workers, SROs, and behavioral support staff. A lesser number expanded training to all school faculty including school bus drivers and janitors. Many of the Community Partner grantees provide the same types of training programs including:

- Youth-Mental Health First Aid (Y-MHFA)
- Reconnect for Resilience and the Champion Level Training
- Social and Emotional Learning Skills (SEL)
- Adverse Childhood Experiences (ACES)

- Peer to Peer Mentoring
- Community Resilience Model
- Counseling on Access to Lethal Means (CALM)
- Question, Persuade and Refer (QPR) Suicide Prevention Training
- Cognitive-Based Behavior Survey
- Building Resiliency in Children
- Life Coaching Skills
- Matrix of Care (Collaborative Action for Resilience Education)
- Motivational Interviewing
- TILT Practices (Trauma Informed Leadership Teams)
- CARE in The Classroom (Child-Adult Relationship Enhancement)
- SPARCS (Structured Psychotherapy for Adolescents Responding to Chronic Stress)
- Trauma Sensitive Schools

Example of Training: Bridges2Success, K-12 Education Reform Idea Lab

Working with Global Scholars Academy Charter in Durham, Bridges2Success provided staff development training in the area of culturally responsive teaching strategies and targeting students with emotional and behavioral problems that impede learning. Through individual and group counseling, targeted students and their families will develop coping strategies to deal with such issues as grief and loss, separation and divorce, drug addiction, and anger management. The program also will help staff develop skills required to buffer and insulate students when stressful events occur in their lives. Training will build skills and competencies for staff in managing classroom behavior, building social and cultural capital as well as developing positive narratives for students, and creating a culture of success.

Challenges and Lessons Learned: This grant program was previously structured to provide grants directly to community partners. The new approach in 2019 to grant all funds to public school units has improved collaboration between community partners and schools and eased administrative burdens. Grantees who had the strongest start to their program had already-established relationships with the schools and districts with whom they had committed to partnering and serving. By contracting with outside experts in mental health services and trainings, schools and districts can more efficiently and effectively provide their students with the necessary supports and expertise their students need.
