

IHE Performance Report

Comparison of Selected 1999, 2000, and 2001 Statistics

September, 2001

Table of Contents

General Findings	1
Table A Enrollment in Teacher Education Programs	2
Table B Admission Test Data	5
Table C Praxis Performance	8
Table D Number of Student Teachers Licensed/Employed within One Year of Program Completion	12
Table E Number of Individuals Employed in the LEAs by IHE	16
Table F Results of Surveys of Program Completers and Employers	18
Table G Lateral Entry Teachers Served	19
Table H Number of Teacher Education Faculty	20

The IHE Performance Report contains both quantitative and qualitative measures of teacher education program quality. To gauge changes across time in teacher education programs on a statewide basis, selected data elements from the IHE Performance Report are contained in this document. The specific data includes enrollment in teacher education programs, admission test data, Praxis test data, student teachers licensed and employed within one year of program completion, and results of the surveys of program completers and employers.

General Findings

1. While the enrollment of undergraduate degree-seeking students is down slightly, from 5988 to 5940 full-time students and 509 to 496 part-time students, the enrollment of students seeking licensure-only is up significantly (23% for full-time students and 21% for part-time students). The percent of minority students enrolled full-time, seeking degrees in teacher education, is down slightly from 14% to 13%; it is down 6% for full-time licensure-only students, and 3% for part-time licensure-only students.

Part-time graduate student enrollment continues to rise. Institutions reported an increase of approximately 7% this year. The percent of minority graduate students enrolled part-time remained steady.
2. Grade point average remains significantly above the 2.5 required for admission to teacher education programs.
3. Praxis performance appears to have improved, with 32 institutions having higher overall specialty area pass rates. This could indicate that the reconfigurations of Praxis testing requirements approved by the Board are having a positive impact.
4. No appreciable differences were evidenced in the percent of student teachers licensed or employed across the three reports. There was, however, a 5% decrease in the number of student teachers from 1999 to 2000.
5. While there was an increased number of program completer surveys returned, the numbers are still problematic. However, those returning the surveys continue to rate teacher education programs favorably.
6. As reported by the institutions, there was a 32% increase in the number of lateral entry teachers enrolled in one or more classes leading to licensure. The number of lateral entry teachers reported as being enrolled in one or more classes leading to licensure has almost doubled (increased 93%) from the first IHE Performance Report.
7. While the number of full-time teacher education faculty remains stable, institutions reported an increase of 24% in the number of individuals employed part-time in teacher education and not otherwise employed by the institution.

IHE Performance Report

Summary Report
2000-2001

Public Schools of North Carolina
State Board of Education • Department of Public Instruction

Preface

This report is the third IHE Performance Report issued by the State of North Carolina. The first report, which contained benchmarking data by which changes in teacher education programs can be gauged, was issued in April 2000. The second report was issued in December 2000. Henceforth the report will be issued annually each fall.

Every effort has been made to ensure the accuracy of the information contained in this report. Future issues of the report will contain two additional items of information not contained in this report because it is not yet available. Using the 1998-99 cohort of students as the baseline, future reports will contain information on graduation rates and the number of individuals employed four years after program completion.

A supplemental report entitled *IHE Performance Report Institutional Reports* provides detailed information on the teacher education program at each college/university. It contains the following information on each IHE:

- Overview of the Institution
- Special Characteristics
- Program Areas and Levels Offered
- Brief Summary of Collaborative Activities with the Public Schools
- Brief Description of Efforts to Assist Low-Performing Schools
- Brief Description of Efforts to Ensure the Technological Competence of Preservice/Inservice Teachers
- Brief Description of Efforts to Serve Lateral Entry Teachers
- Brief Description of Special Efforts to Improve NTE/Praxis Scores
- Brief Description of Efforts to Recruit Students into Teacher Education Programs
- Brief Description of Efforts to Encourage Minority Students to Pursue Teacher Licensure
- Brief Description of New Initiatives (if any) not described above
- Brief Description of Programs Designed to Support Beginning Teachers
- Brief Description of Programs Designed to Support Career Teachers
- Brief Summary of Faculty Involvement in Public Schools
- Characteristics of Students (Full-time and Part-time) Admitted to and Enrolled in Programs Leading to Licensure in the Fall of 2000
- Information on the Number of Lateral Entry Teachers Served
- Admission Test Data (Quality of Students Admitted to Programs during the 2000-01 year)
- Number of Program Completers during the 2000-01 year (as reported by the institution)
- Performance of Program Completers on the Principles of Learning and Teaching Exams and the NTE/Praxis Specialty Area Exams (Note: This information is based on individuals who completed student teaching during the 1999-2000 academic year.)

- Length of Time to Program Completion
- Number of Undergraduate Program Completers Employed in NC Schools within 1 year of Program Completion (Note: This is based on individuals who completed student teaching during the 1999-2000 academic year.)
- Top 10 LEAs Employing Teachers with degrees from the college/university
- Results of the Surveys of Recent Program Completers, Their Mentors, and Their Principals
- Number of Teacher Education Faculty

A definition of the terms used is contained in Appendix A.

TEACHER EDUCATION IN NORTH CAROLINA

An Overview

North Carolina has 47 approved Teacher Education Programs. While the specific course requirements vary from institution to institution, each approved program of study has been judged to be in compliance with the standards, competencies, and guidelines prescribed by the State Board of Education for the specialty area. On-site reviews of approved teacher education programs are conducted every five years. The reviews are typically a joint venture between the North Carolina Department of Public Instruction and the National Council for Accreditation of Teacher Education (NCATE). Team members have been trained in the program approval process. The DPI team members are internal to the state; the NCATE team members are external to the state. In addition to reviewing the reports prepared by the institution for the visits, team members examine course syllabi, handbooks, and samples of student work, visit clinical sites, observe university classes, tour campus facilities, and interview current students, recent graduates, faculty, administrators, support staff, and public school personnel. Working independently but cooperatively, the DPI team focuses on professional studies, program admission standards, and curriculum, faculty, resources, and evaluation of individual specialty areas. The NCATE team focuses on the program as a whole (referred to as the unit) and reviews curriculum, student quality, faculty, governance, and resources. In making accreditation decisions, the State Board of Education considers the results of the reviews of the DPI and NCATE teams, the performance of students on the Praxis exams, the performance of graduates in the Initial Licensure Program, and the licensure of methods faculty.

Preservice Teacher Education

Preservice teachers, like all students enrolled in the college/university, complete a series of **General Education** courses which typically include mathematics, science, English, history, social science, and fine arts. In addition, preservice teachers complete a sequence of **Professional Studies** courses which typically include foundations of education, educational psychology, developmental psychology, reading/writing in the content areas, and exceptional children, and a sequence of **Specialty Studies** courses which are related to the specific licensure area (e.g., prospective math teachers complete courses in trigonometry, calculus, linear algebra, etc.; prospective social studies teachers complete courses in history, economics, political science, geography, etc.). Additional elective hours may be required to fulfill semester-hour graduation requirements. Designated teacher education majors (e.g., elementary education, middle grades education, special education, physical education, and business education) in the public universities are required to complete a second academic concentration to be awarded the baccalaureate degree.

Throughout their professional studies and specialty studies sequences preservice teachers complete supervised field experiences in public school settings, culminating in a 10-week minimum student teaching experience. The public universities have implemented a year-long internship program to strengthen the student teaching experience.

Graduate Teacher Education

In compliance with the Excellent Schools Act of 1997, institutions with graduate teacher education programs have redesigned their programs leading to master's level licensure. The new programs are based on standards and guidelines derived from research, reports of best practice, and nationally recognized models including the National Board for Professional Teaching Standards and the National Council for the Accreditation of Teacher Education standards.

Experienced teachers, university faculty, and other practicing educators were involved in the redesign of the programs. The curricula focus on current trends and issues in education, teaching of reading and writing across the curriculum, meeting the needs of diverse students in inclusive classroom settings, using technology to enhance and support teaching and other professional activities, applying research findings to curriculum development and classroom instruction, developing peer leadership and mentoring skills, and reflecting, diagnosing, and prescribing instruction that fosters student learning. It is expected that on-going clinical or

field experiences link program faculty, students enrolled in the program, and master practitioners in the schools. Students are expected to develop a culminating "product of learning" and demonstrate competencies related to instructional expertise, knowledge of learners, research expertise, connecting subject matter and learners, and professional growth and leadership.

Table I details the teacher education programs offered by each college/university.

QUALITY OF STUDENTS ENTERING THE PROGRAMS

Colleges and universities with approved teacher education programs seek to recruit and retain quality students who reflect the diversity of the state and nation. They work closely with their college/university admission offices to promote teacher education programs. Brochures and other promotional materials are routinely distributed. Teacher education faculty regularly participate in career days, open houses, and other recruitment activities for prospective students. Some institutions have developed specific programs to recruit teacher assistants into teacher education programs. A number of institutions offer off-campus programs designed to bring teacher education programs to prospective students. Some have earmarked special scholarships for teacher education majors in addition to the Teaching Fellows Scholarships and Prospective Teacher Scholarship Loans available from the state.

Information on institution-specific efforts to recruit students into teacher education programs and to recruit minority teacher education candidates is contained in the *Institutional Reports* document which accompanies this Summary Report.

Undergraduate Teacher Education Program Admission Requirements

To be admitted to an approved teacher education program, prospective teachers must:

- have a 2.5 (on a 4.0 scale) grade point average;
- satisfactorily complete the Preprofessional Skills Tests (PPST) or the comparable Computer-Based Tests (CBT) in Reading, Writing, and Mathematics; and
- satisfy institution specific requirements such as an interview, speech proficiency screening, completion of prescribed courses with designated grades (e.g., usually a grade of "C" or better is required in a foundations of education course).

Per State Board of Education policy, undergraduate degree-seeking students must earn at least the following scores on the PPST or CBT exams to be admitted to teacher education. Their progress in completing program requirements must be limited to not more than half of the professional studies course sequence, excluding student teaching, until formal admission has been granted.

<u>Test</u>	<u>Required Score</u>
PPST Reading	176
PPST Math	173
PPST Writing	173
CBT Reading	323
CBT Math	318
CBT Writing	319

Graduate Teacher Education Program Admission Requirements

Graduate Teacher Education Program Admission Requirements vary from institution to institution. Most require prospective students to meet a prescribed grade point average and to earn a satisfactory score on a standardized examination such as the Miller Analogies Test (MAT) or Graduate Record Exam (GRE). Many require references; a number require a writing sample (essay). Prospective students who do not hold an "A" (undergraduate) level teaching license in the proposed area of study may be required to complete additional undergraduate course work.

Table II summarizes the Fall 2000 enrollment in teacher education programs. This data was provided by the institution. **Table III** summarizes admission test results. This data was provided by the institutions for the students reported as admitted to their programs.

QUALITY OF STUDENTS COMPLETING THE PROGRAMS

Teacher education programs are designed to provide preservice and inservice teachers with the knowledge, skills, abilities, and dispositions that will allow them to effectively meet the needs of diverse learners in the public school setting. To this end, students are required to complete defined programs of study which include courses in professional education, content pedagogy, and the discipline(s) the individual is preparing to teach. Colleges and universities take seriously their responsibility to recommend individuals for licensure. For this reason, the progress of students in completing program requirements is monitored and the competence of students is assessed throughout the program of study. As appropriate, students may be advised to consider alternative majors.

Licensure Recommendations

In addition to satisfying all program/course requirements, to be recommended for initial licensure upon program completion prospective teachers must:

- prepare a satisfactory technology product of learning (portfolio) which demonstrates the basic and advanced technology competencies adopted by the SBE;
- satisfy NTE/Praxis testing requirements. These standardized exams are designed to assess content knowledge and pedagogy.
- have the recommendation of the college/university;
- have the recommendation of the Local Education Agency (LEA) in which student teaching was completed.

Initial Licensure Program

Upon completion of a teacher education program, preservice teachers are issued an initial teaching license and participate in the Initial Licensure Program. This three-year program is designed to provide continued support and assistance to the beginning teacher. During this time, the initially licensed teacher is observed at least three times annually by the principal or principal's designee and at least once annually by a teacher. During the first two years of teaching the initially licensed teacher is provided a paid mentor.

To receive a continuing license, the initially licensed teacher must complete three years of teaching and the Performance-Based Licensure (PBL) process. In addition, the employing school system must affirm that it has no knowledge of issues related to character or conduct to deny the continuing license.

The success of individuals recommended for licensure by each approved teacher education program in converting an initial license to a continuing license is monitored by the Department of Public Instruction and current teacher education program approval criteria require institutions to maintain at least a 95% conversion rate. Since the inception of the Initial Licensure Program in the mid-1980s, all institutions have met this criteria.

Efforts to Ensure the Technological Competence of Beginning Teachers

To be recommended for initial licensure, preservice teachers are required to complete a technology "product of learning" which demonstrates their mastery of the basic and advanced technology competencies prescribed by the State Board of Education. These products of learning are to be evaluated by teams of college/university faculty and public school practitioners.

All teacher education programs are expected to integrate the utilization of technology across the curriculum and teacher education faculty are expected to model the use of technology in their instruction. To prepare prospective teachers to effectively use technology to enhance instruction, a number of teacher education programs require prospective teachers to complete specific course work in the use of technology in teaching.

Teacher education faculty have participated in workshops to update their technology skills. Grants have been written to obtain funding to support technology training for teacher education faculty and public school teachers. Each of the public universities with an approved teacher education program is provided funds to employ a technology specialist to work with faculty and students. Graduate level technology courses have been designed for and made available to inservice educators.

Information on the specific efforts of each institution to ensure the technological competence of beginning teachers is contained in the *Institutional Reports* document which accompanies this Summary Report.

Efforts to Assist Students in Satisfying Praxis Testing Requirements

Institutions utilize a variety of means to assist students in satisfying Praxis testing requirements. Information on Praxis testing examination requirements is distributed to students early in their programs of study. Study materials, including those published by the Educational Testing Service (ETS), are made available to students. Most institutions have purchased *Learning Plus*, a computer-based program, from ETS to assist students preparing to take the Preprofessional Skills Tests (PPST). In some cases use of this program is tied to specific courses; in other cases its use is optional. Faculty at a number of institutions have actually taken the Praxis II Specialty Area exams so that they are familiar with the format and scope of the exams. They have used this experience to restructure courses to assure better alignment of course and exam contents. The format of exams used in some university courses has been modified to prepare students for the types of questions they will encounter on the Praxis II Specialty Area exams. Some institutions have brought external consultants, including individuals from ETS, to campus to conduct workshops for faculty and students. Some institutions indicate that they provide tutoring for individuals experiencing difficulty with the exams.

Information on the specific efforts of each institution to assist students in meeting Praxis testing requirements is contained in the *Institutional Reports* document which accompanies this Summary Report.

Table IV summarizes information provided by the institutions on the length of time taken by students to complete the teacher education program from the time of formal admission. **Table V** provides summary information on the performance of program completers on Praxis exams. The data in Table V was generated by comparing those individuals identified by the institution as having student taught in 1999-2000 to the Praxis database available to the Department of Public Instruction. Institutions were provided the opportunity to verify the scores. It should be noted that if less than four students took an exam the results have not been reported. Praxis testing requirements that were in effect for the 1999-2000 year are contained in Appendix B.

EMPLOYMENT AND PROGRAM SATISFACTION

To determine the percent of individuals completing initial licensure programs at each institution who actually were licensed and employed in the public schools of North Carolina one year after program completion, a search of the DPI Licensure and the Salary Administration databases was conducted using the names of individuals provided by the institutions.

To determine the satisfaction with teacher education programs of individuals who have completed the programs and their employers, a survey was distributed to recent undergraduate program completers employed in the public schools of North Carolina, their mentors, and their principals. Respondents were asked to rate their satisfaction with the teacher education program in general, the beginning teacher's preparation for managing the classroom, his/her preparation for using technology as an instructional tool, his/her preparation for meeting the needs of diverse learners, and his/her preparation in curriculum content and delivery strategies. A copy of the surveys is contained in Appendix C.

On a 4.0 scale, program completers expressed the greatest satisfaction with their preparation in curriculum content and delivery strategies (3.50), followed closely the program in general (3.41) and their preparation to work with diverse learners (3.37). Their satisfaction with their preparation to manage the classroom and utilize technology were 3.27 and 3.25 respectively. The mean ratings of principals and mentor teachers ranged from 3.38 to 3.59.

Table VI provides information on the number of individuals completing undergraduate teacher education programs who were licensed and employed in the public schools of North Carolina within one year of program completion. **Table VII** contains summary information on the number of individuals with degrees from each institution employed in the NC public schools during the 2000-01 school year. Note: In the case of individuals who completed licensure-only programs, the institution at which an individual earned a degree may not be the institution which eventually recommended the individual for licensure. **Table VIII** reflects the top 10 LEAs in which individuals with degrees from each IHE are employed. **Table IX** summarizes the results of the survey of program completers, mentor teachers, and principals.
