INTRODUCTION

The schools of North Carolina are working to provide the best possible educational services they currently can while seeking constantly to improve. The Department of Public Instruction is committed to assisting our schools. Each school system's dropout rate is one of the measures of success in the move toward educating all children, and each public school in North Carolina continues to make progress in its own way towards this goal.

Local systems with the support of the Department have focused on keeping students enrolled in the face of historically high dropout rates in North Carolina and the Southeast. The ABCs Program for school reform makes assistance available to all schools in North Carolina; measures of accountability show that this assistance is improving teaching and learning in classrooms throughout the state. As the ABCs help make schools more effective for *all* students, those who might leave will more likely stay.

The dropout rate is a key indicator of school success; unfortunately, the numbers indicate that we are continuing to lose too many students. The future of our state and nation demands that all children be educated. So long as we believe this is their best preparation for becoming active citizens, we must not give up hope on any child or teen.

This book presents self-reported data on dropouts during 2000-01. Local systems collect these data which are not audited by the Department but are checked for discrepancies. We intend that these data should provide a baseline for designing and implementing programs that meet the needs of at-risk school membership. As in past years, the demographic analysis is based on a duplicated count of dropouts, collected by the National Center for Education Statistics, which counts each incident of dropping out. For example, if a student dropped out in 1999-00 only to return and drop out again in 2000-01, he/she is counted twice or duplicated. However, if he/she drops out twice in the same school year, he/she is not counted twice.

A chart appears in the back of this edition which logs local school system data by rate and number for the years 1988-89 through 1997-98. If a system has undergone consolidation, its rates and numbers may be compared before and after the merger. By also using the chart starting on page five, rates and numbers may be compared for each year in the last thirteen years. **The striking increase in the dropout rate beginning in 1998-99 can be largely attributed to a change in counting policy. Students who transfer from high school to community college are now counted as a dropout where they previously were not. Therefore useful comparisons among the three most recent years and the years before are rendered difficult, at best, by this change in policy.**

As an important footnote, local boards have discretionary money to spend on dropout prevention through PRC 69. Each board, advised by its educators, decides how to apply its money to meet local needs (House Bill 6, ratified July, 1995: School Flexibility/Accountability). These funds are not categorical, freeing this Department from the burden of oversight while placing tremendous responsibility on the county or city system. It is our hope that the data in this book will aid North Carolina educators as they measure progress in meeting those responsibilities.

Thirteen Years of North Carolina Data Duplicated Grades 7-12

■ Duplicated Dropout Rate

Numbers in parenthesis show incidents of leaving school. Since 88-89, the total is 273,075.

*See introduction, page 1, for note on change in counting policy beginning with 1998-99.

One of the most informative graphs is shown below and presents that part of each gender/racial group which drops out in grades 1-12. Close study of this graph indicates that males are the more at risk in each racial group except Hispanics.

Percent of Each Race/Gender Group in Grades 1-12 Who Dropped Out 2000-01

More attention needs to be paid to the disaggregated data shown in the graph above. These data may suggest re-focusing programs to address the needs of specific populations.

* (as a percent of total student population, grades 1-12)

2000-01 GRADE LEVELS OF DROPOUTS*

Students in grades one through six accounted for 2.90% of all dropouts during 2000-01. As seen in previous years, grade 9 continues to be the year when the largest number of students leave school. Grade distributions are as follows:

- Grades 1-6 2.90%
- Grade 7 1.26%
- Grade 8 3.07%
- Grade 9 34.08%
- Grade 10 26.04%
- Grade 11 20.58%
- Grade 12 12.07%

AGES OF DROPOUTS 2000-01

Students below the age of 16 comprised 17.31% of all dropouts during 2000-01. All students under the age of 16 are subject to the compulsory attendance law (G.S 115C-378). Until such time as the student reaches 16, LEAs are obligated to continue and document efforts to bring the students back into the public school system or an appropriate alternative educational setting. Percentages for the ages of dropouts are as follows:

- Below age 16 17.31%
- Age 16 29.66%
- Age 17 29.06%
- Age 18 18.10%
- Age 19 4.82%
- Over age 19 1.05%

Ten Years of School System Data – Duplicated Grades 7-12

[illegible]

During the period when Alamance-Burlington, Iredell-Statesville, and Stanly were consolidating, data was reported two ways: as a consolidated system and as two separate systems.

***Consolidated into Alamance-Burlington**

†Consolidated into Beaufort
