

Part Two contains charts, graphs and narrative addressing trends, grade levels, gender/ethnicity, reasons for dropping out, accountability and implications. Part Three is composed of LEA dropout data reported in subgroups by gender and ethnicity for grades 7-12 and grades 9-12. It also includes a table of dropout data by school and LEA by subgroups for grades 1-12.

In April 2004, portions of this report will be combined with data on suspensions, expulsions and alternative program placements to create a single document for meeting legislative reporting requirements.

Summary of Results for School Year 2002-03

Dropout data from 133 school systems (117 LEAs + charter schools) are included in this report. In the 2002-03 school year, 19,834 dropout events were reported for grades 7-12, at a rate of 3.23%. There were 18,964 dropout events reported for grades 9-12, a rate of 4.78%. Table 1 below shows the rates since 1998 and the percent decreases. The 7-12 dropout rate has decreased by 29.8% since 1998, and the 9-12 rate by 29.5%.

Table 1 North Carolina Dropout Event Rates

In 2002-03, 59% of North Carolina's public school dropouts in grades 1-12 were males, while 41% were females. Male dropout events (11,981) made up almost 1% of the total student membership in grades 1-12; total dropout events (20,291) represented approximately 1.7% of the student membership.

Table 2 Dropout Events by Gender, Grades 1-12

Males	11,981	59.05%	.98%
Females	8,310	40.95%	.68%
Total	20,291	100%	1.66%

Per Table 3, column F, most of the dropouts in grades 1-12 were white (54.75%), while another 33.42% was black. In addition, comparisons of dropout rates within ethnic subgroups reveal that ethnic minorities (American Indians, Hispanics, and Blacks) continue to be over-represented in the state's dropout events. According to column D, American Indians have the

highest dropout rates per their ethnic population (2.85%), followed by Hispanics (2.04%) and Blacks (1.77%).

Further disaggregation of the dropout events in grades 1-12 by ethnicity and gender (Part Two, Table 7) indicates that the highest percentages of dropouts occur among American Indian males (3.21%), American Indian females (2.45%), Hispanic males (2.21%), Black males (2.14%), Hispanic females (1.87%) and White males (1.74%).

According to data in Table 4, students drop out of school most frequently in the ninth grade (6,647 or 32.76% in 2002-03).

Table 4 Dropout Events by Grade Level for Grades 1-12

At the same time, as Table 5 reveals, the highest numbers and percentages of dropout events (6,026 events and 29.7%) occur at age 17, followed closely by age 16 (5,834 events and 28.8%). A closer examination of ninth graders who drop out (not included in the table) indicates that 21.5% of ninth grade dropouts are below 16 years of age; 46.1% are age 16; 24.2% are age 17 and 8.2% are age 18 or over.

Part Two

Historical rates

Dropout rates have steadily declined since 1998. Line graphs below present historical rates for grades 7-12 since 1988. The data are presented in two separate graphs due to a significant change in dropout data collection in 1998. Beginning in that year, students who left school to attend a community college were counted as dropouts.

Grade Levels

Most dropout events occur at grade 9. The graph below illustrates the numbers of dropouts by grade levels for the 2002-03 school year. There were 457 dropout events reported in North Carolina in grades 1-6 and 6,647 dropout events at grade 9. The Compulsory Attendance Law (G.S. 115C-378) states every parent, guardian, or other person in North Carolina having charge or control of a child between the ages of 7 and 16 shall see to that child's education. Thus most dropout events occur after students reach age 16.

Dropout Events in North Carolina by Grade Level, 2002-03

Gender and Race

Minority ethnic groups are over-represented in the state's dropout events. Table 6 indicates this disproportion with shaded cells and bolded text. While American Indians make up nearly 1.5% of the state's student membership in grades 1-12, they account for almost 2.5% of the state's dropout events. Blacks, who make up 31.4% of the state's membership, account for 33.4% of the state's dropout events. Hispanics comprise 5.6% of the state's total 1-12 membership, yet they account for almost 6.9% of the total dropout events statewide.

Table 6 Ethnicity, Grades 1-12

Ethnicity	% of Dropout Events, Grades 1-12	% of Total Membership, Grades 1-12
Am. Indian	2.48%	1.45%
Asian	1.27%	1.94%
Black	33.42%	31.39%
Hispanic	6.87%	5.60%
Multiracial	1.21%	NA
White	54.75%	59.62%
	100%	100%

NA - Data not available

Another method of analyzing these data is to compare the dropout events and student membership within each ethnic/gender group. Table 7 depicts these comparisons as percentages of each ethnic/gender group that drops out of public school. According to these data, American Indian males (3.21%) and females (2.45%), Hispanic males (2.21%) and females (1.87%) and Black and White males (2.14% and 1.74%, respectively) drop out at rates that surpass the state average (1.66%). Again, shading and bolding have been used to identify these specific groups.

NA - Data not available

In grades 7-12, dropout events mirror the ethnic make-up of North Carolina's student population. White males and females comprise over half of the state's dropout events.

Why Students Drop Out

North Carolina law and State Board policy require that schools confer with potential dropouts in order to caution them on the seriousness of their decision to leave school and to refer them to appropriate services, including appropriate educational alternatives. They may be referred to an extended school day program, alternative school or optional school.

Students who drop out are coded in the student information management system (SIMS and NCWISE) as dropouts, and one of twenty-one reason codes is entered on their student record. Wherever possible, students provide the reasons for their decision to leave school. Unfortunately, students are not always available to cite reasons for the dropout event. Data managers and dropout prevention coordinators provide reasons in these instances.

Table 9 Why Students Drop Out, Grades 1-12

Reason Code Used	Numbers	Percent
Attendance (total includes attendance - work, family, school and personal)	11,454	56.45%
Moved, school status unknown	2,159	10.64%
Academic problems	1,991	9.81%
Enrollment in a community college	1,325	6.53%
Choice of work over school	813	4.01%
Failure to return after a long-term suspension	703	3.46%
Discipline problems	484	2.39%
Pregnancy	271	1.34%
Incarcerated in adult facility	232	1.14%
Unstable home environment	220	1.08%
Runaway	175	.86%
Health problems	167	.82%
Need to care for children	127	.63%
Marriage	70	.35%
Suspected substance abuse	63	.31%
Employment necessary	37	.18%
TOTAL (excluding expulsions)	20,291	100%

Note: Expulsions, which numbered 203 in 2002-03, are excluded from the dropout events for grades 1-12.

Attendance, moved, academic problems, enrollment in a community college and choice of work over school are the five most cited reasons for dropout events. These are illustrated as portions of all reasons in the following graph.

Accountability and the Dropout Rate

A recent study from Arizona State University, *High Stakes Testing, Uncertainty, and Student Learning* (2002), pointed out the correlation between high stakes testing in accountability programs and dropout rates. In this study, researchers provided a brief history of high-stakes testing in eighteen states. Their findings included the assertion that an increase in dropout rates was an unintended consequence associated with the high-stakes testing programs.

Dropout rates in North Carolina do not support this contention. A review of the line graphs on page 9 of this report indicates that dropout rates in North Carolina have not increased since the implementation of the high-stakes testing and accountability program (ABCs of Public Education) in 1996-97. The grades 7-12 and 9-12 dropout rates in North Carolina have continued to decline during the years of the ABCs: in 1998-99, the state's annual dropout rate for grades 9-12 was 6.78% and in 2002-03 the rate was 4.78%. This represents a decrease of 29.5%.

There has been, however, an increase in the numbers of students who give "academic problems" as their reason for the dropout event during the years of the ABCs. Table 10 provides data that illustrate this. In 1995-96, the year of the ABCs pilot, slightly more than 7% of the reasons given for dropout events were coded as academic problems. In 2002-03 that rate had risen to over 9.8%.

Implications

While the dropout rate in North Carolina continues to decline, the state is still losing too much human potential. More than 20,000 students left school in 2002-03 without graduating. The social and personal costs of dropping out are high. Social costs include less tax revenue, loss of productivity and increased expenditures for social welfare programs. Personal costs include the loss of earning potential and likelihood of living in poverty.

The National Research Council, in *Understanding Dropouts: Statistics, Strategies, and High-Stakes Testing* (Beatty, et al., 2001) stresses that for most students, dropping out of school begins in the early years of elementary school, and the disengagement takes place gradually over a number of years. The dropout event is a culmination of missed opportunities and a series of misfortunes. The Council recommends early intervention as a strategy of prevention. It is important to address the needs of struggling students as soon as they become apparent. These students must be given support, remediation and counseling to encourage them to stay in school.

It is important, too, to remember that each student whose life is captured in dropout statistics is an individual reacting to a unique set of circumstances. The circumstances that cause a particular student to separate from school . . . can rarely be summed up easily, and rarely involve only one factor (Beatty, et al., 2001).
