UNC Report on Overhead Receipts
[Facilities and Administrative (F&A) Receipts]
2013-14

Legislation enacted by the 2013 General Assembly (S.L. 2013-360) included the following special provision directing the Board of Governors to report annually on the amount and uses of facilities and administrative receipts:

UNC BOARD OF GOVERNORS REPORT ON OVERHEAD RECEIPTS

SECTION 11.6.(a) G.S. 116-11 is amended by adding a new subdivision to read: “(9a) The Board of Governors shall report to the Joint Legislative Education Oversight Committee and the Office of State Budget and Management by March 1 of each year regarding the sum of facilities and administrative fees and overhead receipts for The University of North Carolina that are collected and expended by each constituent institution. The report shall include all of the following information:

- a) The collection of facilities and administrative fees and overhead receipts by grant or program.
- b) The use of facilities and administrative fees and overhead receipts showing expenditures by grant or program.
- c) The sum of facilities and administrative fees and overhead receipts collected or expended by each constituent institution for maintenance and operation of facilities that were constructed with or at any time operated by funds from the General Fund.”

In response to that legislation, this report covers the state fiscal year ending June 30, 2014.

Background

The University of North Carolina serves the state's interests through a three-part mission of teaching, research, and public service. UNC's reputation as one of the nation's top public university systems has been built, in part, on the volume and quality of research and sponsored programs conducted by its faculty. With limited direct state appropriations for research, the University has depended heavily on obtaining competitive grants and contracts to support research efforts.

In recent decades, the federal government has increased efforts to promote scientific research at United States universities, as well as research conducted by federal, nonprofit, and commercial laboratories. Recognizing that research carries necessary administrative, facilities,

and other expenses above and beyond the direct costs of the project, federal agencies have included in research grants and contracts a portion of funds to help offset these related costs – commonly called "indirect costs," "overhead receipts," or "facilities and administrative (F&A) receipts." In keeping with current federal reporting practices, the term “facilities and administrative (F&A) receipts” is used for the remainder of this report.

Under federal OMB Circulars, facilities and administrative receipts generally reimburse for costs associated with supporting grants and contracts activities of the institution in a manner consistent with the formulae under which the funds were recovered. Internal university controls pertaining to the compliance requirements for sponsored project expenditures under OMB Circular A-133 are designed to provide reasonable assurance regarding the achievement of the following objectives:

1. Transactions are properly recorded and accounted for in order to permit preparation of reliable financial statements and reports and maintain accountability over assets.
2. Transactions are executed in compliance with laws, regulations and provisions of federal and state laws and in accordance with sponsored agreement terms.
3. Funds, property, and other assets are safeguarded against loss from unauthorized use or disposition.

Research and other sponsored program awards to the 16 UNC campuses and the North Carolina School of Science and Mathematics totaled nearly \$1.34 billion for FY 2013-14. For the year, about three-quarters of research and sponsored program awards come from federal sources, with over 12 percent from private industry and nonprofit organizations, while State and local governments provide about 3 percent of the receipts. Every \$1 million of research supports a total of thirty-six jobs. That does not take into account the economic impact of inventions, patents, or spin-off companies started by University researchers.

Grants and contracts support thousands of individual projects that improve human health, understanding of the natural world, education, national defense, and other areas critical to the nation and state. Not only do grants and contracts support leading-edge science and public

service, but these funds are also used to support the state's workforce. Grants and contracts support salaries for faculty, post-doctoral fellows, staff, graduate assistants, and undergraduate researchers, all of whom keep the University of North Carolina in the forefront of regional economic development and training.

In 2013-14, UNC earned a total of \$229.5 million in facilities and administrative receipts (Attachment A). F&A receipts were expended by each campus to support costs associated with maintaining an environment conducive to conducting research and scholarly advancement and ensuring competitiveness for attracting additional research funds. In 2013-14, UNC expended a total of \$253.3 million of these facilities and administrative receipts (Attachment B). It is important to note that F&A receipts and expenditures for a given year are often not the same due to timing differences between receipts and expenditures and planning F&A receipt supported projects.

UNC institutions also expended \$95.4 million of F&A receipts to operate or maintain facilities constructed with or operated by general fund appropriations (Attachment C).

Amount of Facilities and Administrative Receipts

University-wide, a total of \$229.5 million was earned in facilities and administrative receipts during the 2013-14 fiscal year. Consistent with their research missions, the two major research universities, North Carolina State University (20.5%) and UNC-Chapel Hill (68.5 %), accounted for 89.0 percent of the University-wide total. Receipts for seven institutions – Appalachian State University, East Carolina University, North Carolina A & T State University, North Carolina Central University, UNC Charlotte, UNC Greensboro, and UNC Wilmington accounted for most of the remaining F&A receipts. Research has increased at these seven campuses, which has translated into increased facilities and administrative receipts.

Uses of Facilities and Administrative Receipts

Facilities and Administrative receipts are expended in a manner consistent with the earning rates negotiated with the federal government to recover a part of the actual costs of conducting federally sponsored research that are otherwise not reimbursable from grants and contracts.

The principal priorities for programmatic expenditures were designed to:

- maintain and expand research infrastructure
- provide matching funds/cost-sharing for external grants
- support research-related administrative functions
- encourage new research activity
- foster research/creative activity in the classroom
- provide for research support and assistantships
- promote grantsmanship education
- fund faculty "start-up" packages (support staff, laboratory facilities, equipment, and operating expenses)
- sustain academic programs, including the libraries
- provide for capital improvements and debt service
- support strategic initiatives
- provide scientific equipment

Each of the campuses also reported on the purpose its expenditure priorities for the year in one of the fourteen following programs:

Program	Expenditure
Institutional Support	\$ 61,362,250
Organized Research	49,985,572
Mult-Activity (transfers to capital)	42,839,537
General Academic Support	34,206,171
Regular Term Instruction	33,280,418
Physical Plant	25,525,578
Libraries	2,145,075
Student Services	1,451,807
Student Financial Aid	1,157,877
NCSU Veterinary Medicine	606,242
Community Services	568,541
UNC-CH Institute of Government	153,065
ARRA Various	5,506
Total	\$ 253,287,641

In addition to the programmatic summary, each institution also provided an accounting of how F&A receipts were spent in FY 2013-14. Across the system, expenditures and percentages of each were categorized as follows:

Expenditures	Amount	Percent of Total
Personal Services	84,584,294	33%
R&R/Construction/Debt Service	70,256,996	28%
Purchased Services	55,779,751	22%
Supplies	17,475,560	7%
Property, Plant & Equipment	11,230,402	4%
Other Expenses & Adjustments	9,981,225	4%
Aids & Public Assistance	3,979,413	2%
Total	253,287,641	100%

Expenditures by UNC-Chapel Hill and North Carolina State University account for 88.8 percent of the total F&A expenditures. The University as a whole spent more F&A receipts than were brought in during 2013-14 reducing the F&A fund balance by just under \$23.8 million. System-wide F&A receipts supported approximately \$252 million of fund balance on June 30, 2014. UNC-CH accounted for nearly 55% of this total or \$139 million; for UNC-CH this represents a decrease in fund balance from June 30, 2013 of \$39.7 million. Since the beginning of this fiscal year UNC-CH has allocated this balance to the following major projects:

- Mary Ellen Jones Renovation - \$47 million
- ConnectCarolina Implementation and Post Go-Live Support - \$25 million

Conclusion

Facilities and Administrative receipts are expended to support costs associated with maintaining an environment conducive to research and scholarly advancement and ensuring competitiveness for attracting additional research funds. Specifically, these funds support the staff and operating costs for research functions, audit and compliance related to grants and contracts, facilities and equipment repairs and maintenance, debt service for facilities that provide research space, maintenance and operation of the physical plant and offices that provide support to the universities' research endeavors, and investment in the libraries to maintain current research related collections and services. F&A funds are increasingly important as University research is a critical and growing economic driver for the State of North Carolina.
