Report on Facilities and Administrative (F&A) Receipts

May 23, 2018

UNC Report on Overhead Receipts
[Facilities and Administrative (F&A) Receipts]
2016-17

Legislation enacted by the 2013 General Assembly (S.L. 2013-360) included the following special provision directing the Board of Governors to report annually on the amount and uses of facilities and administrative receipts:

> **UNC BOARD OF GOVERNORS REPORT ON OVERHEAD RECEIPTS**
>
> **SECTION 11.6**.(a) G.S. 116-11 is amended by adding a new subdivision to read: "(9a) The Board of Governors shall report to the Joint Legislative Education Oversight Committee and the Office of State Budget and Management by March 1 of each year regarding the sum of facilities and administrative fees and overhead receipts for The University of North Carolina that are collected and expended by each constituent institution. The report shall include all of the following information:
>
> a) The collection of facilities and administrative fees and overhead receipts by grant or program.
> b) The use of facilities and administrative fees and overhead receipts showing expenditures by grant or program.
> c) The sum of facilities and administrative fees and overhead receipts collected or expended by each constituent institution for maintenance and operation of facilities that were constructed with or at any time operated by funds from the General Fund."

In response to that legislation, this report covers the state fiscal year ending June 30, 2017.

Background

The University of North Carolina System serves the state's interests through a three-part mission of teaching, research, and public service. UNC's reputation as one of the nation's top public university systems has been built, in part, on the volume and quality of research and sponsored programs conducted by its faculty. With limited direct state appropriations for research, the University has depended heavily on obtaining competitive grants and contracts to support research efforts.

In recent decades, the federal government has increased efforts to promote scientific research at United States universities, as well as research conducted by federal, nonprofit, and commercial laboratories. Recognizing that research carries necessary administrative, facilities, and other expenses above and beyond the direct costs of the project, federal agencies have included in research grants and contracts a portion of funds to help offset these related costs – commonly called "indirect costs," "overhead receipts," or "facilities and administrative (F&A) receipts." In keeping with current federal reporting practices, the term "facilities and administrative (F&A) receipts" is used for the remainder of this report.

Under Title 2 U.S. Code of Federal Regulations (CFR) Part 200, *Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards* (Uniform Guidance), facilities and administrative receipts generally reimburse costs associated with supporting

contract and grant activities of the institution in a manner consistent with the formulas under which the funds were recovered. Internal university controls pertaining to the compliance requirements for sponsored project expenditures under Uniform Guidance Subpart F *Audit Requirements* are designed to provide reasonable assurance regarding the achievement of the following objectives:

1. Transactions are properly recorded and accounted for in order to permit preparation of reliable financial statements and reports and to maintain accountability over assets.

2. Transactions are executed in compliance with laws, regulations, and provisions of federal and state laws and in accordance with sponsored agreement terms.

3. Funds, property, and other assets are safeguarded against loss from unauthorized use or disposition.

Research and other sponsored program awards to the 16 UNC System institutions of higher learning and the North Carolina School of Science and Mathematics totaled nearly $1.57 billion for FY 2016-17. For the year, about three-quarters of research and sponsored program awards come from federal sources, with about 24% from private industry and nonprofit organizations, while state and local governments provide about 4% of the receipts. Every $1 million of research supports a total of fifteen jobs.[1] That does not take into account the economic impact of inventions, patents, or spin-off companies started by University researchers.

Contracts and grants support thousands of individual projects that improve human health, understanding of the natural world, education, national defense, and other areas critical to the nation and state. Not only do grants and contracts support leading-edge science and public service, but these funds are also used to support the state's workforce. Contracts and grants support salaries for faculty, post-doctoral fellows, staff, graduate assistants, and undergraduate researchers, all of whom keep the University of North Carolina System in the forefront of regional economic development and training.

In 2016-17, the UNC System earned a total of $254.5 million in facilities and administrative receipts (Attachment A). F&A receipts were expended by each campus to support costs associated with maintaining an environment conducive to conducting research and scholarly advancement and ensuring competitiveness for attracting additional research funds. In 2016-17, the UNC System expended a total of $273.7 million of these facilities and administrative receipts (Attachment B). It is important to note that F&A receipts and expenditures for a given year are often not the same due to timing differences between receipts and expenditures and planning F&A receipt-supported projects.

UNC System institutions also expended $72 million of F&A receipts to operate or maintain facilities constructed with or operated by general fund appropriations (Attachment C).

[1] This information was provided by an economic impact study completed by Economic Modeling Specialists International issued in February 2015 based on FY 2012-13 information. See http://www.northcarolina.edu/economic-impact-2015 for more information on the study.

Amount of Facilities and Administrative Receipts

University-wide, a total of $254.5 million was earned in facilities and administrative receipts during the 2016-17 fiscal year. Consistent with their research missions, the two major research universities, North Carolina State University at Raleigh (20.5%) and UNC-Chapel Hill (67.7 %), accounted for 88.2% of the University-wide total. Receipts for seven institutions – Appalachian State University, East Carolina University, North Carolina A & T State University, North Carolina Central University, UNC Charlotte, UNC Greensboro, and UNC Wilmington – accounted for most of the remaining F&A receipts. Research has increased at these seven institutions, which has translated into increased facilities and administrative receipts.

Uses of Facilities and Administrative Receipts

Facilities and administrative receipts are expended in a manner consistent with the earning rates negotiated with the federal government to recover a part of the actual costs of conducting federally sponsored research that are otherwise not reimbursable from grants and contracts.

The principal priorities for programmatic expenditures were designed to:

- maintain and expand research infrastructure
- provide matching funds/cost-sharing for external grants
- support research-related administrative functions
- encourage new research activity
- foster research/creative activity in the classroom
- provide for research support and assistantships
- promote grantsmanship education
- fund faculty "start-up" packages (support staff, laboratory facilities, equipment, and operating expenses)
- sustain academic programs, including the libraries
- provide for capital improvements and debt service
- support strategic initiatives
- provide scientific equipment

Each of the institutions also reported on the purpose of its expenditure priorities for the year in one of the twelve following programs:

Program	Expenditures
Institutional Support	$ 88,679,229
General Academic Support	45,970,603
Regular Term Instruction	45,340,461
Organized Research	43,847,957
Physical Plant	28,082,476
Multi-Activity (Transfers to Capital)	11,997,608
Libraries	3,502,641
NC State Veterinary Medicine	2,321,768
Student Financial Aid	1,970,702
Student Services	1,634,328
Community Services	341,853
School of Government	8,194
Other Auxiliary Operations	194
Total	**$273,698,014**

In addition to the programmatic summary, each institution also provided an accounting of how F&A receipts were spent in FY 2016-17. Across the UNC System, expenditures and percentages of each were categorized as follows:

Expenditures	Amount	Percent of Total
Personal Services	$ 100,974,221	37%
Purchased Services	62,289,776	23%
R&R Construction Debt Service	44,582,553	16%
Other Expenses & Adjustments	24,441,192	9%
Property, Plant, & Equipment	21,505,973	8%
Supplies	16,605,326	6%
Aid & Public Assistance	3,298,973	1%
Total	**$ 273,698,014**	**100%**

Expenditures by UNC-Chapel Hill and North Carolina State University account for 89% of the total F&A expenditures. The University as a whole spent more F&A receipts than were brought in during 2016-17, reducing the F&A fund balance by just under $20 million. System-wide F&A receipts supported approximately $86.7 million of fund balance (net) on June 30, 2017. UNC-Chapel Hill's ending fund balance as of June 30, 2017 was negative $17.7 million.

In addition, each institution has highlighted its major F&A expenditures for the year:

Appalachian State University

- Personnel necessary to carry out the research and sponsored programs mission (3.5 FTE Pre-Award, 3.5 FTE Post-Award, and other essential personnel).
- Supplies, software, equipment, memberships, and maintenance agreements on equipment used for research.

East Carolina University

- Support indirect grant administration overhead.
- Fund direct costs related to research activities, such as: safety, regulatory compliance, hazardous waste disposal, business services, and information technology.
- Provide funds for strategic research program enhancement as directed by ECU senior leadership.
- Provide start-up funds for new faculty.

Elizabeth City State University

- Fund contracts and grants positions.
- Provide seminars and training workshops for faculty and staff to enhance proposal writing and grants management skills.
- Support research management tools and management of federally mandated research compliance.
- Critical and/or emergency needs as identified by the chancellor.

Fayetteville State University

- Support indirect grant administration overhead.
- Provide grant writing workshops and seminars to promote and encourage faculty and staff to apply for new grants.
- Fund e-procurement and e-payment business innovation initiatives.
- Fund single audit cost of State Auditor costs for federal programs.

North Carolina Agricultural and Technical State University

- Provide research services for workshops, training classes for faculty and graduate students on grant writing, budget preparation and management, research opportunities, and research compliance.
- Support pre-award and post-award research administration functions for sponsored activities.
- Fund scholarships for students within the Graduate College, College of Engineering, and College of Agriculture and Environmental Sciences.

North Carolina Central University

- Provide support for research infrastructure, including but not limited to personnel, research databases, compliance tools, workshops, and maintenance of scientific equipment.
- Provide training for personnel on budget development.
- Support protection of university intellectual property and research-related economic development initiatives.
- Provide seed funding for further grant and proposal submissions which will spur research activities.

North Carolina State University

- Acquire specialized research equipment and provide operational support for shared research facilities in support of faculty recruitment and retention.
- Provide operational support for research units and research training programs.
- Fund building repairs and renovations necessary to support research activities.
- Invest to support research administration and regulatory compliance, as well as to stimulate new research programs.

University of North Carolina at Asheville

- Fund 2.55 FTE of pre- and post-award staff to support faculty and staff activities for the procurement, administration, and compliance of externally funded projects.
- Provide a limited redistribution of F&A receipts to qualifying departments to advance further research and programming initiatives.
- Fund faculty development, instructional, and institutional support.
- Fund debt service for new campus health services facility.

University of North Carolina at Chapel Hill

- Fund the centralized research administration operation to ensure quality research and compliance with award terms and conditions.
- Support strategic initiatives, faculty start-ups, and faculty recruitment and retention.
- Fund debt service on research building construction.

University of North Carolina at Charlotte

- Fund major repair projects for research laboratories related to flooding.
- Fund renovation projects for research facilities, including the Wellness Center, to maintain their level of excellence by expanding services, integrating counseling and wellness, and opening up library space to broaden the range of services provided.
- Fund debt service for the Partnership, Outreach, and Research to Accelerate Learning (PORTAL) facility, a premier workspace and innovation center for regional and global business pioneers.

The University of North Carolina at Greensboro

- Fund direct labor costs related to research/contract and foundation proposal and award management, undergraduate and graduate student support, safety, and regulatory compliance.
- Fund direct labor costs related to local and state requests for economic and community development assistance, including commercialization and technology transfer.
- Renovate and up-fit facilities in order to accommodate grant/contract facility requirements, operation and maintenance of lab facilities, and library expenses related to research.
- Fund faculty and key research staff positions.

The University of North Carolina at Pembroke

- Fund 2 FTE staff positions in the Office of Sponsored Research to assist faculty and staff in proposal development, preparation, and submission.
- Provide on-campus grant workshops, databases and search tools.

University of North Carolina School of the Arts

UNCSA had no F&A receipts or expenditures in 2016-17.

University of North Carolina Wilmington

- Support costs associated with maintaining an environment conducive to conducting research and scholarly advancement.
- Provide debt service for research infrastructure.
- Support research-related administrative functions.
- Foster research/creative activity in the classroom.

Western Carolina University

- Pay salaries and other operating expenses associated with research activities.
- Support research-related professional development for faculty.

Winston-Salem State University

- Fund faculty positions.
- Support faculty professional development and student fellowship initiatives.
- Provide assistance with start-up costs to support new grant-funded initiatives.

North Carolina School of Science and Mathematics

NCSSM had no F&A expenditures in 2016-17.

University of North Carolina System Office

- Provide related compliance infrastructure, funding a director of sponsored programs and accountant position to administer Uniform Guidance (2 CFR Part 200) compliance standards.
- Support nominal F&A costs for sponsored programs not funded in the grant proposals, e.g., compliance systems/services, information technology support and supplies.

Conclusion

Facilities and administrative receipts are expended to support costs associated with maintaining an environment conducive to research and scholarly advancement and ensuring competitiveness for attracting additional research funds. Specifically, these funds support the staff and operating costs for research functions; audit and compliance related to grants and contracts; facilities and equipment repairs and maintenance; debt service for facilities that provide research space; maintenance and operation of the physical plants and offices that provide support to the universities' research endeavors; and investment in libraries to maintain current research related collections and services. F&A funds are increasingly important as University research is a critical and growing economic driver for the State of North Carolina.
