

**Report to the North Carolina General Assembly
on the
Inactive Hazardous Sites Program**

October 2010

**North Carolina Department of Environment and Natural Resources
Division of Waste Management
Superfund Section**

<http://portal.ncdenr.org/web/wm/sf/ihshome>

EXECUTIVE SUMMARY

The Inactive Hazardous Sites Program was created by the North Carolina General Assembly to identify, control and correct properties contaminated with hazardous substances. To date, 2,982 chemical spill or disposal sites and old, unlined dumps or landfills that are not being addressed by other environmental authorities have been catalogued. Of this number, 2,537 still require work to address their hazards.

Of the 2,537 remaining open cases, 667 are old, non-permitted, unlined landfills (pre-regulatory landfills) requiring action. Half of the proceeds of a statewide waste disposal tax are directed by statute to the Inactive Hazardous Sites Cleanup Fund for purposes of addressing contamination at pre-regulatory landfills. Due to budget constraints and income from the tax being less than had been originally anticipated, only three of the seven science and engineering positions needed to implement the program are currently filled. Three of the vacancies are in the process of being filled. The last cannot be filled with current revenue. Income is 13% lower this past fiscal year than originally forecasted based on waste disposal rates. The 2009-2010 appropriations bill cut \$300,000 (approximately 65-70 percent) from the Inactive Hazardous Sites Program administration budget. The appropriations bill made up the shortfall by amending G.S. 130A-295.9(1) to allow use of waste disposal tax revenues for administration of the Inactive Hazardous Sites Program starting in fiscal 2010-11. The General Assembly raised the cap on allowable administration expenses to 13% of the tax income to cover the funding transfer.

Based on data from the Environmental Protection Agency and the Division of Waste Management, most of North Carolina's unlined landfills can be expected to have groundwater contamination. These landfills pose threats in that contaminated groundwater can reach drinking water wells and explosive methane and hazardous substance vapors (off-gassing from the waste and contaminated groundwater) can seep into structures on or near the landfill. Location and use information has been collected for most of the landfills. Of those inspected, 77 percent have a house, school, day care, church or drinking water source on or within 1,000 feet of the landfill. There are 189 landfills that have drinking water wells within 500 feet and another 62 have drinking water wells located between 500 and 1000 feet of the landfill. There are 34 landfills that have residences constructed over the landfill and 79 with buildings other than residences on top of the landfill. Many other landfills have sensitive uses such as parks either on or near the landfill. Seven landfills are known to have elevated levels of methane gas.

With the new tax revenue, DENR has established four contracts to conduct assessment and mitigation work at the old pre-regulatory landfills. Currently there are 31 landfill sites undergoing remedial investigations. In addition, in FY09-10, the program completed location, use and receptor research at 133 landfills; similar work is underway at 26 other landfills. The program tested 38 water supply wells and supplied alternate drinking water at one site.

Limited funds are available for non-landfill orphan site assessment and cleanup. Some funds have been collected through bankruptcy claims for a few sites. Also, this fiscal year the Inactive Hazardous Sites Cleanup Fund began receiving a percentage of receipts from the Scrap Tire Tax. A total of \$269,540 was received from the Scrap Tire Tax in FY09-10. In addition, for FY10-11,

a special appropriation of \$50,000 from the Solid Waste Management Trust Fund was made specifically for monitoring and cleanup of the Texfi, Inc. site in Fayetteville.

There remain many high-risk sites without financially-viable responsible parties. There are currently 216 non-landfill sites with one or more drinking water wells having detectable contamination with hazardous substances - 143 of these cases having no known responsible party. None of the cases in FY09-10 have been found to be eligible for Bernard Allen funding for alternate water supplies based on legislative criteria. The Inactive Hazardous Sites Branch has been able to solicit the US EPA's help in handling many contaminated drinking water well sites where contaminants exceeded federal drinking water standards. The Inactive Hazardous Sites Fund was used to provide alternate water at one site and funds from the waste disposal tax paid for an alternative water supply at one site associated with a pre-regulatory landfill.

To increase the program's effectiveness, the General Assembly authorized the use of private environmental consulting firms to oversee voluntary cleanup actions at sites with responsible parties. Registered Environmental Consultants (RECs) are providing supervision for cleanup work on 118 sites. State staff audit a portion of the REC's work activities. In addition, oversight of several remedial actions is being provided by staff from Guilford County and oversight of work at former manufactured gas plant sites is being provided through an agreement with a consortium of utilities and municipalities that presently funds one staff member. Program staff oversee the higher priority site remedial actions being conducted by responsible parties.

The following summarizes site cleanup activities during the past reporting year.

Sites Identified

| | |
|--|--------------|
| Chemical spill or disposal sites | 2,315 |
| <i>Note: 42 new sites cataloged this reporting year.</i> | |
| Old unlined dumps and landfills | 667 |
| Total Number Sites Identified | 2,982 |

| | |
|---|------------|
| Sites With All Work Complete Since Last Status Report | 17 |
| Total Number Sites Requiring No Further Action | 445 |

Note: 24 sites reactivated based on new information.

Ongoing Cleanup Actions

| | |
|---|------------|
| Ongoing REC-Supervised Site Cleanup Actions | 118 |
| Staff-Supervised Responsible Party Assessment/Cleanup Actions 09-10 | 164 |
| Total | 282 |

Not reported in the numbers above are other site actions conducted during the fiscal year including: overseeing orphan site cleanups; filing bankruptcy claims; emergency response activities; responding to requests for "no further action status" reviews that are not the result of approved voluntary remedial actions; prioritization of sites; responding to public inquiries; and issuing Notices of Regulatory Requirements for newly reported sites.

The Inactive Hazardous Sites Response Act requires annual reporting to the General Assembly. All of the reporting requirements specified under N.C.G.S. 130A-310.10 are met in this report. In 2008, additional reporting requirements were added to N.C.G.S. 130A-310.2(b). The additional reporting items “include the location of each inactive hazardous substance or waste disposal site in the member’s district, the type and amount of hazardous substances or waste known or believed to be located on each of these sites, the last action taken at each of these sites and the date of that last action.” A table of available data is being provided separately in electronic format due to its size. Hard copies can be provided upon request.

I. THE INACTIVE HAZARDOUS SITES INVENTORY AND THE INACTIVE HAZARDOUS WASTE SITES PRIORITY LIST

The Inactive Hazardous Sites Branch is part of the North Carolina Department of Environment and Natural Resources' Division of Waste Management, which implements the Inactive Hazardous Sites Response Act of 1987 (IHSRA). The IHSRA requires DENR to maintain a catalog of inactive hazardous substance or waste disposal sites. There are 2,315 chemical spill sites and 667 old unlined landfills cataloged. Of these, 445 sites now have all work completed and are assigned "No Further Action" status. Seventeen completed all work and were assigned "No Further Action" status this reporting year. Table 2, on page 4, provides a list of sites assigned "No Further Action" status this reporting year. Table 1, on page 2, provides a list of sites added to that inventory since the last program report in October 2009. A total of 42 sites were added this year.

N.C.G.S. 130A-310.2 requires that sites catalogued in the Inactive Hazardous Sites Inventory be prioritized based on their threat to public health and the environment. After discovery, sites are first cataloged in the "Evaluations Pending" category of the Inactive Hazardous Sites Inventory until their rank is determined. Site rankings are determined using the rules found in 15A NCAC 13C .0200. Once ranked, sites are transferred to the Inactive Hazardous Waste Sites Priority List. This list is provided in an appendix to this report organized in order of the threat to public health and the environment. The entire inventory can be provided upon request.

II. SITES THAT MAY OR ARE KNOWN TO REQUIRE USE OF THE INACTIVE HAZARDOUS SITES CLEANUP FUND

Purpose of the Fund

The Inactive Hazardous Sites Cleanup Fund is used to: (1) address imminent hazard sites; (2) pay for assessment and cleanup when responsible parties do not comply with orders to clean up sites; (3) pay for assessment and cleanup of sites that do not have financially-viable responsible parties (orphan sites); and (4) pay for state-contracted survey and legal assistance necessary to prepare notices of Inactive Hazardous Substance or Waste Disposal Sites where owners do not comply with orders to conduct such work. The state must attempt to recover its expenditures from responsible parties in the first, second and fourth cases.

The Inactive Hazardous Waste Sites Priority List helps determine priorities for cleanup. Responsible parties for top priority sites are encouraged to voluntarily clean up their sites. When a responsible party does not comply with a request and subsequent order to clean up a site, the state must perform the cleanup using the Inactive Hazardous Sites Cleanup Fund. The demand for state funds to conduct site cleanups depends on two factors: (1) how often responsible parties refuse to comply with orders to conduct cleanup and (2) the number of sites that lack financially-viable responsible parties.

The statute requires that the program report the list of sites known to require funds and the list of sites suspected to require funds for cleanup. Determining if responsible parties exist (and thus, if funds are needed) is often a complex and lengthy process. This information can become dated as owners and operators of the facilities change over time. To avoid the need to update the information several times, responsible party research is not done until a site is next in priority for action. For this reason, the total number of orphan sites on the Inactive Hazardous Waste Sites Priority List requiring state funds is not presently known.

Orphan Chemical Sites

The Inactive Hazardous Sites Cleanup Fund was used to address several sites this year. A summary of the work is provided in Table 3.

Table 3. Summary of Inactive Hazardous Sites Cleanup Fund Expenditures FY09/10

| Site Name | City/County | Activity | 09/10 Fund Expenditure |
|-------------------------------|---------------------|--|------------------------|
| Crowder's Mountain State Park | Gastonia/ Gaston | DENR's contractor excavated over 1000 cubic yards of soil containing hazardous waste and removed 50 drums. The Inactive Hazardous Sites Cleanup Fund did not have sufficient revenue to complete the removal because the volume was discovered to be much larger than originally estimated. The US EPA completed the soil and drum removal work by excavating over 150 drums and an additional 1000 cubic yards of | \$85,949 |

| Site Name | City/County | Activity | 09/10 Fund Expenditure |
|----------------------------|-----------------------------|---|--|
| | | contaminated soil. The surrounding water supply wells for several residents are all clean, but shallow groundwater has not yet been sampled. | |
| G&B Farmer | Scotland Neck/ Halifax | Site was a piece of residential property where contaminated soils from a local wood treating industry were dumped. DENR completed a soil and groundwater assessment in July 2009. Groundwater is clean but soils will require cleanup. While investigating the property, the property ceased to be used for residential purposes. | \$12,804 |
| National Pin | Saratoga/ Wilson | DENR's contractor installed several temporary groundwater monitoring wells at this site to determine if the contamination that was previously found in nearby water supply wells along Grady Court are attributed to this site. The wells remain contaminated but below drinking water standards. The contamination in the wells was found not to be related to the National Pin site, which was subsequently given No Further Action Status. | \$12,896 |
| Oak Haven Mobile Home Park | Salisbury/ Rowan | The owner of mobile home park found battery casings while installing a sewer line. Last reporting year DENR conducted a soil and waste investigation and found the site to have a large volume of battery chips and lead-contaminated soils exceeding acceptable direct contact cleanup levels. DENR's contractor removed over 1000 cubic yards of lead contaminated soil from the site. The volume of wastes and contaminated soils at the site was found to be much larger than originally estimated. The Inactive Hazardous Sites Fund did not have sufficient revenue to address the entire site. DENR requested the assistance of the US EPA. The US EPA conducted additional assessment tasks and soil removal actions and this site was given No Further Action Status in February 2010. | \$298,501 |
| Texfi Industries | Fayetteville/ Cumberland | Work at this site was funded through bankruptcy proceeds and the Inactive Hazardous Sites Cleanup Fund. The General Assembly has appropriated \$50,000 in funds from the Solid Waste Management Trust Fund for FY 10-11 to assist in the cleanup and monitoring of contamination at the Texfi site. | \$5,573 plus \$78,703 (bankruptcy funds) |

| Site Name | City/County | Activity | 09/10 Fund Expenditure |
|----------------------------------|-----------------------|--|------------------------|
| Hot Spot Solvents/ Tolon Well | Salisbury/ Rowan | Residential well contaminated with chlorinated solvents in excess of the drinking water standards. Site was determined ineligible for Bernard Allen funds and the US EPA declined to take action on an alternate water supply. DENR connected the resident to city service using Inactive Hazardous Sites Cleanup Funds. | \$38,787 |
| Ulah Battery | Asheboro/ Randolph | Site was formerly a large battery dump in a residential neighborhood. DENR conducted a removal of the batteries and contaminated soil in 1988. Later additional disposal areas were discovered. The US EPA then conducted two removal actions in the neighborhood. Following the last removal, DENR found some material still remained. In 2009, DENR conducted soil testing to determine the volume of what remained and to search for any other disposal areas. Three areas remain. DENR conducted testing to delineate the extent of these areas. An estimated 800 cubic yards of contaminated soil/battery chips remain, requiring excavation. DENR has requested the US EPA's assistance on removing the remaining contaminated soils. The US EPA has indicated they will address the site. | \$2,620 |

DENR has also recovered some funds to address specific sites through bankruptcy claims. The following summarizes work activities in fiscal 2009-10 using bankruptcy funds:

Burlington Industries

Approximately \$465,000 was obtained in 2007 through a claim for six Burlington Industries properties. While the amount of funds is limited, the funds were used to remove sources of contamination, thereby reducing the further spread of groundwater contamination and encouraging natural attenuation processes. A total of \$8,962 remains of these funds.

CMI

\$1,250,000, \$750,000 and \$100,000 have been recovered for three CMI sites. These funds have been used to conduct assessment at three CMI sites in Elkin. \$338,989, \$43,410, and \$32,481 remain, respectively, for each site.

Pillowtex

A total of \$210,000 has been recovered to address the Fieldcrest Mills site in Spencer and the Cannon Mills site in Kannapolis. There is a small possibility of additional payout from this bankruptcy, which could provide some additional revenue. DENR is evaluating where best to spend funds at these two sites.

SCM

\$5.3 million was obtained to address the SCM site in Charlotte. The funds are held in a private trust fund. The trustee contracts the work at DENR's direction.

Texfi, Inc.

DENR recovered approximately \$940,000 in funds through a bankruptcy claim against Texfi, Inc., that is being used to remove sources of contamination at the Fayetteville property. A total of \$312,278 remains. Work is continuing.

Pre-Regulatory Landfills

A total of 667 unpermitted, unlined landfills have been cataloged. Landfill permitting requirements did not go into effect until January 1983. Based on information on permitted, unlined landfills, a majority of the unpermitted landfills are expected to have groundwater contaminated with hazardous substances. Hazardous waste disposal regulations did not exist until the 1980s. Therefore, these older pre-regulatory landfills have an even larger potential for releases of hazardous substances. These landfills pose threats from contaminated groundwater reaching drinking water wells and from methane and hazardous substance vapors off-gassing from the waste and contaminated groundwater. These vapors can travel into structures on or near the landfill and pose health threats and explosion hazards.

Location and use information has been collected for most of the landfills. Of those inspected, 77 percent have a house, school, day care, church or drinking water source on or within 1,000 feet of the landfill. There are 189 landfills that have drinking water wells within 500 feet and another 62 that have wells between 500 and 1000 feet. There are 34 landfills that have residences constructed over the landfill; 79 landfills have buildings other than residences on top of the landfill. Many other landfills have sensitive uses such as parks on or near the landfill. Seven landfills are known to have elevated levels of methane gas.

Senate Bill 1492, enacted in 2007, established a state-wide tax on waste disposal, half of which goes to address the hazards posed by the pre-regulatory landfills. The provisions of the bill that relate to the assessment and abatement of contamination at these pre-regulatory landfills went into effect in July 2008. The first proceeds of this tax were received by the Division of Waste Management in February 2009. The Division has since been hiring staff to implement the program, collecting site information and inspecting sites using two pre-existing contracts and establishing four new contracts to conduct assessment and mitigation of the landfills. Location, use and receptor research was completed at 133 landfill sites in FY09-10. There are 26 other sites where this work is currently underway. The four new contracts received final approval in January 2010. There are 31 sites currently undergoing remedial investigations under the new contracts. In addition, the program conducted sampling of private wells and surface water. In one case, the program provided an alternate water supply to a residence with a contaminated drinking water well.

Due to budget constraints and income from the tax being less than had been originally anticipated, only three of the seven positions needed to implement the program are currently filled. Three of the vacancies are in the process of being filled. The last cannot be filled with current revenue. Income is 13% lower this past fiscal year than originally forecasted based on waste disposal rates. In addition, a provision in last year's appropriations bill cut \$300,000

(approximately 65-70 percent) from the Inactive Hazardous Sites Program administration budget. The appropriations bill made up the shortfall by amending G.S. 130A-295.9(1) to allow use of waste disposal tax revenues for administration of the Inactive Hazardous Sites Program starting in fiscal 2010-11. This past fiscal year, the General Assembly raised the cap on allowable administration expenses to 13% of the tax income.

Cleanup Funds Needed

Currently 266 sites -- of which 234 are higher priority cases -- have been identified that have no financially-viable responsible parties and require further action. As explained earlier in this chapter, the total number of orphan sites is not presently known.

Orphan site work can include assessment only; small-to-large soil and waste cleanup;; water line installation and/or significant groundwater restoration projects. An average cost-per-site was determined by first calculating the average cost for orphan soil cleanup actions conducted by DENR's Inactive Hazardous Sites Branch and averaging that figure with an average site cleanup cost for several state programs published by the Association of State and Territorial Solid Waste Management Officials, adjusting for inflation. That figure comes to \$541,855 per site. The total cost for cleanup is estimated then to be \$144,133,430 for 266 orphan sites or \$126,794,070 for 234 higher priority orphan sites.

As of July 1, 2010, the balance of the Inactive Hazardous Sites Cleanup Fund totaled \$650,722. Of this, \$312,278 is bankruptcy proceeds dedicated to conducting contaminant source remediation at the Texfi-Fayetteville site. An additional \$5,646 is committed to continue the operation and maintenance of the Texfi interim remedy. Of the remaining \$332,798, \$229,000 has already been obligated in contracts for assessment and cleanup of the sites. An amount of \$8,962 in remaining bankruptcy proceeds for on-going work at the six Burlington Industry sites is held in separate trust funds. An amount of \$210,000 for two Pillowtex bankruptcy sites is also held in a separate trust account. Work will commence at the Pillowtex sites in the latter part of 2009. A total of \$5.3 million was recovered this reporting year to address the SCM site in Charlotte. Previously, \$1,250,000, \$750,000 and \$100,000 were recovered as part of DENR's bankruptcy claim against CMI for three sites. \$338,989, \$43,410, and \$32,481 remain, respectively, for each CMI site. The SCM and CMI funds are held in private trust accounts. A sum of \$654 was recovered for a Saftey-Kleen site in Wallace and has been deposited in the Inactive Hazardous Sites Cleanup Fund.

III. NATIONAL PRIORITIES LIST SITES REQUIRING A STATE COST SHARE

National Priorities List sites are those hazardous substance or waste disposal sites that are priorities for cleanup under the federal Comprehensive Environmental Response, Compensation and Liability Act, more commonly known as Superfund. North Carolina has 32 NPL sites.

The NPL includes both sites with financially-viable responsible parties and orphan sites. Cleanup costs are financed either by responsible parties or by a federal trust fund with a state cost share. When the federal trust fund is used, CERCLA requires North Carolina to pay 10 percent of the cleanup cost plus 100 percent of the cost to operate and maintain the remediation system.

Table 4 provides a list of the North Carolina NPL sites, their locations, investigation/cleanup status, estimated costs, and projected start dates for cleanup. Part I of Table 4, found on page 12, includes those sites where the Federal Trust Fund/North Carolina cost share is required. A summary of North Carolina's cost share obligations is provided at the end of this part. Part II of Table 4, found on page 14, includes the status of responsible party funded cleanups.

SUMMARY OF NORTH CAROLINA COST SHARE REQUIREMENTS
As of May 31, 2010

| | |
|--|---------------|
| Estimated total cost of pending/ongoing federal trust fund/N.C. cost share cleanups (based on signed contracts): | \$20,780,639* |
| N.C.'s 10 percent cost share for pending/ongoing cleanups (current contract commitments): | \$12,078,064* |
| Fund disbursements for cost share payments: | \$6,841,631 |
| Current fund balance: | \$7,983,742 |
| Encumbered amount of the fund balance for cost share payments: | \$5,236,433 |

* This number will increase due to remedial action cost estimates not being available for all sites. Also, other sites may be added to the National Priorities List which will require a state cost share. Also increases in remedial costs from the original State/US EPA contract amounts can occur.

** Date applies to either entire site or operable unit.

IV. RESPONSIBLE PARTY VOLUNTARY SITE REMEDIAL ACTION

When the Inactive Hazardous Sites Branch solicits the cooperation of responsible parties in taking action at a priority site, most parties agree to voluntarily conduct a cleanup with approval. In addition to these voluntary actions, responsible parties and owners often come forward on their own to initiate an approved assessment and/or remedial action. Due to the number of volunteers and very limited staff resources, the General Assembly has authorized DENR to privatize its oversight role at lower priority, voluntary site remedial actions. Sites with more severe public health threats or concerns are still reviewed by state staff.

The privatized portion of the voluntary cleanup program is called the Registered Environmental Consultant, or REC Program. Under this program, a responsible party hires a REC to conduct the site assessment and cleanup and to certify that those activities comply with regulations. The REC certification replaces state oversight of the assessment and cleanup. For a firm to qualify as a REC, it must meet certain qualifications. The state audits a portion of the REC projects each year to ensure the integrity of the program. The state sanctions RECs where necessary. A state staff auditor is funded through fees collected from the voluntary participants.

A current list of sites where assessments and cleanups are underway in accordance with an administrative agreement with the state is provided in Table 5 on the following page. These are a mixture of REC-directed and DENR-directed actions. Table 6, found on page 21, is a list of additional DENR-directed responsible party assessment and cleanup actions not under consent agreements.

Note: There are many other sites not listed in Tables 5 and 6 where staff are conducting work on residential properties with contaminated drinking water wells or other contamination and having no responsible parties, bankruptcy claims, review of requests for “No Further Action Status,” new site screenings, and responses to complaints.

V. IMMINENT HAZARD SITES

The N.C. Department of Environment and Natural Resources and the US EPA are committed to addressing imminent hazard sites when identified. Table 7 provides a list of sites where imminent hazards have been discovered, or where abatement activities have continued, in fiscal 2009-10. Their location, a site description, status and funding source are also provided.

In addition to the cases outlined in Table 7, there are many contaminated drinking water well cases the program must address. A few hundred high risk sites were transferred to the Inactive Hazardous Sites Branch as part of the consolidation of remediation programs within DENR in 2007. The Inactive Hazardous Sites Branch conducted a limited review of these cases to help determine enforcement priorities and identify sites that may qualify for federal assistance for immediate hazard abatement. This review indicated that approximately 300 sites may have one or more drinking water supply wells having contaminant detections. Further research on these sites was needed, as much of the information was fairly old. Funding from the Bernard Allen Emergency Drinking Water Fund has been instrumental in identifying residential properties that still rely on private drinking water wells and to retest these wells. This research has been completed at all the sites having no responsible parties and where contaminant concentrations exceed the state's 15A NCAC 2L groundwater standards. Research and well testing is continuing using Bernard Allen funds for those with concentrations less than the state groundwater standards, after which those where a well is known to be within 500 feet of a contaminant source will be sampled.

Of the 48 sites currently identified that have one or more residential drinking water wells in use with contaminant concentrations above the federal drinking water standards, 37 have no known financially viable responsible party. Under the Bernard Allen legislation, the funds cannot pay for more than 1/3 of the cost of a water line extension. The Bernard Allen Fund also limits assistance to residences with owners having income below 300 percent of the federal poverty level and where contamination exceeds the federal drinking water standards. Based on these criteria, contaminated residential wells around only two Inactive Hazardous Substance or Waste Disposal Sites have qualified. However, there are about ten sites (one or more homes each) where the Bernard Allen funded research has helped to obtain US EPA funding for water line installation or point-of-use filtration systems. These requests were made last year and all the residents that accepted assistance have been provided with alternate water during the course of this reporting year.

The Inactive Hazardous Sites Branch has also responded to many newly reported contaminated residential supply wells this year. This response involved testing of wells, research into sources of contamination and working with program resources and those of the US EPA to provide alternate water if concentrations exceeded the federal drinking water standards in an actively used well. Only those sites where the alternate water was provided this year are included in Table 7.

TABLE 7. SUMMARY OF IMMINENT HAZARD SITES

| <i>Site</i> | <i>City/ County</i> | <i>Site Description</i> | <i>Status</i> | <i>Funding Source</i> |
|------------------------------|------------------------------|---|---|---------------------------|
| Alamance Road Accident | Burlington/ Alamance | 100 gal Plastisol (screen printing ink) spill during a vehicle accident. | Area diked and spilled material removed. | Responsible Party |
| American Distillation | Leland/ Brunswick | Sheen observed in surface water indicating possible spill. | The Inactive Hazardous Sites Branch is overseeing abatement of contaminated soils. The Division of Water Quality is addressing the surface water. | Responsible Party |
| Bechmann Technologies | Durham/ Durham | Several residences and other property found to have drinking water wells with contaminants above federal drinking water standards. Source of contamination not known. | US EPA has connected 4 residences to city service. The US EPA plans no further work. The DENR plans to investigate whether responsible parties can be located. | US EPA |
| Bennett Street Contamination | Charlotte/ Mecklenburg | Water supply well contaminated with perchloroethylene above the drinking water standard. | DENR and the County enlisted the help of the US EPA and alternate water has been provided. | US EPA |
| 1104 Biddle Street | New Bern/ Craven | Unknown quantity of fertilizer was dumped when tractor trailer was cleaned out in abandoned lot. | Craven County Emergency Services responded to initial report. Site inspected by DENR staff. Sampling required to determine site conditions. DENR plans to contract assessment in near future. | State |
| Breckenwood Subdivision | Pleasant Garden/ Guilford | Residential wells with 1, 1 dichloroethene contamination exceeding the drinking water standards. | US EPA provided filtration systems to some residents. Others declined assistance. | US EPA |
| Capris Abandoned Drums | Morganton/ Burke | Approx 275 containers of abandoned chemicals; some leaking. | US EPA received report of abandoned containers in May 2010. Response pending. | US EPA |
| Carolina Tire Sales Fire | Chadbourne/ Columbus | Facility fire in September 2009. | DENR collected water samples at site. Site reported to US EPA. US EPA response pending. | US EPA |
| ConAgra | Garner/Wake | Plant explosion and ammonia release. | Several plant workers injured or lost their lives in a plant explosion in June 2009. Ammonia containing equipment was damaged and ammonia was released. After emergency abatement, Conagra entered into an agreement with DENR for voluntary cleanup. | Responsible Party |
| Country Club Rd | Roxboro/ Person | Three homes with elevated concentrations of chlorinated solvents above drinking water standards reported to the US EPA in April 2009. | Two residents accepted point of use filtration systems they will maintain. The third declined assistance. | US EPA |
| Crowders Mountain State Park | Gastonia/ Gaston | Large disposal of drummed wastes located next to a residential area and a state park. | The DENR conducted removal of a portion of the drums. Due to large numbers, the DENR did not have the resources to remove all of the drums and contaminated soils. The US EPA agreed to take over the drum/contaminated soil removal. All of the wastes and contaminated soils have been removed. | State/ US EPA |
| Dart Transport Spill | Goldsboro/ Wayne | Paint thinner spill on highway March 20, 2010. | Spill was reported to DENR on April 12. Responsible party reported having remedied the spill. Awaiting confirmation report. | Responsible Party |
| Domtar (Weyerhaeuser) | Plymouth/ Martin | Caustic pulp wash water leaked from pipe. | Line temporarily repaired with permanent fix planned for calendar year 2010. Additional assessment is needed in spill area. | Responsible Party |
| Douglas Battery | Winston Salem/ Forsyth | >1000 pounds of sulfuric acid spilled. | Owner neutralized acid and conducted excavation. DENR overseeing responsible party assessment of off-property areas near creek. | Responsible Party |

| | | | | |
|---|------------------------|---|---|-------------------|
| Eubanks Road Contaminated Well | Chapel Hill/Orange | Residential well contaminated with pesticides. | The US EPA provided bottled water and is arranging for a water line connection. | US EPA |
| Gastonia Industrial Truck | Gastonia/Gaston | Several residential wells contaminated with trichloroethylene above drinking water standards. | The US EPA retested wells. Replaced filters on ones that exceeded drinking water standards. The US EPA plans to conduct additional well testing in the area jointly with the NC Superfund Section. | US EPA |
| Hot Spot/Tolon Well | Salisbury/Rowan | Water supply well with 1,1 dichloroethene exceeding drinking water standards. | Property determined ineligible for Bernard Allen funds for alternate water. DENR solicited aid of the US EPA. The US EPA determined not high enough priority for them to respond. DENR used cleanup funds to connect affected residence to city service. | State |
| I-85 MP 118 | Greensboro/Guilford | Acrylic acid spill during traffic accident. | Responsible party had their response contractor remove contaminated soil. No further action required. | Responsible Party |
| Industrial Ag Chemical Spill | Calypso/Duplin | Agricultural chemicals spilled adjacent to highway drainage ditch during heavy rain event. | Due to the rain event and because the chemicals are not persistent, any spilled material has been diluted and washed away. No further action needed. | |
| International Paper | Riegelwood/Columbus | Process water line leaked an unknown amount. Process water contains chemicals. | The line has been temporarily patched. A permanent repair will be performed at next mill shutdown period. Further assessment is required. | Responsible Party |
| Invista (aka Hercofina/Cape Industries) | Wilmington/New Hanover | <p>Multiple Spills:</p> <p>Oxidate (which contains 4% paraxylene) released in containment area.</p> <p>Unstripped oxidate (which contains paraxylene) released to containment area.</p> <p>Two xylene spills to containment area.</p> <p>Three paraxylene spills.</p> <p>Sodium hypochlorite spilled to soil.</p> <p>Another paraxylene spill (est 2500 gal.) to containment area in dock and field storage area when a pipe split.</p> | <p>Material recovered and returned to process.</p> <p>The material was recovered and returned to the process.</p> <p>Material removed.</p> <p>Two spills were in containment area. Material removed.</p> <p>Approximately 2500 gallons of paraxylene was released when a pipe broke. Spill was contained in a clay-lined containment area. Responsible party removed and recovered as much of the waste as possible.</p> <p>Soil was excavated and will be disposed of in secure landfill. Excavated area will be filled with clean fill.</p> <p>Containment area is clay-lined and material did not penetrate clay very much. Responsible party removed and recovered as much of the waste as possible.</p> <p>Note - While spills have been contained and removed, additional assessment of all spill areas is necessary. The site also has groundwater contamination that needs to be addressed by implementing a site-wide remedial action.</p> | Responsible Party |
| Karolina Polymers | Hickory/Catawba | Abandoned chemical wastes at former polymer facility. | 30 drums waste oil, 7700 waste oil, 80 drums contaminated soils (corrosives, polymers) and 1 radioactive source were removed by the US EPA. | US EPA |

| | | | | |
|-----------------------------------|-----------------------------|---|---|-------------------|
| Kinder Morgan Terminal | Selma/ Johnston | Unknown amount of urea and ammonium nitrate solution spilled in late 2008. | Some soils excavated at area of release. Further work will be required on this and other areas at the site before site can be assigned NFA status. | Responsible Party |
| Norfolk Southern Rail Yard | High Point/ Guilford | Estimated 12 ton release of teraphthalic acid from a rail car. | Responsible party indicted cleaned up spill. Awaiting final cleanup report. | Responsible Party |
| Norfolk Southern Train Derailment | Durham/ Durham | 6000 gallons of sodium hydroxide released in a train derailment in May of 2009. | Responsible party removed spilled liquids and contaminated soils. Remediation is complete. No further action required. | Responsible Party |
| Oak Haven Mobile Home Park | Salisbury/ Rowan | Mobile home park built on battery casing dump. Elevated lead in soils on the property. | The DENR conducted a partial removal of the contaminated soils and the battery casings from the property. The volume of wastes were found to be more than the Inactive Hazardous Sites Program had resources to remove. The US EPA completed the removal and no further action is required. | State/US EPA |
| Ore Knob Mine | Jefferson/ Ashe | Large volume of mine tailings waste have produced acid conditions and elevated metals. Wastes have slumped past the dam containing the wastes. | US EPA has been conducting sampling of the site to determine how to control the wastes. | US EPA |
| Sam's Pit Stop | Delco/ Columbus | September 17, 2009 unknown quantity of chemical spilled from containers inside tractor trailer. | Leaking containers overpacked and removed. No contamination outside tractor trailer. No further action required. | Responsible Party |
| Scercy Well/Robinwood Drive | Charlotte/ Mecklenburg | Residential well exceeding drinking water standard for perchloroethylene. | USE EPA provided 2 residences with filtration systems. | US EPA |
| S&J Agriculture Fertilizer Spill | Pink Hill/ Duplin | 400-500 gallon nitrogen fertilizer spill from tanker truck. | DOT blocked storm drain and used sand to contain spill. Soil samples were collected. Nitrate levels in spill area were above background concentrations but below cleanup levels. | |
| Southside Drive | Lincolnton/ Lincoln | 4 residential wells contaminated with perchloroethylene above the drinking water standard. | The US EPA provided water line connections to 3 of the 4 residences. The 4 th resident refused assistance. | US EPA |
| Staley PCE Wells | Staley/ Randolph | Perchloroethylene exceeded the drinking water standard in several private wells. | The US EPA has provided bottled water to the affected residents and is installing filtration systems on the wells. | US EPA |
| Texasgulf Chemicals | Aurora/ Beaufort | Phosphoric acid spill | Spill cleaned up. Site remains in program inventory due to other contaminant issues. | Responsible Party |
| Texfi Industries | Fayetteville/ Cumberland | Chlorinated solvent groundwater contaminant plume has migrated from a former textile mill to the City of Fayetteville's water plant property. The city's finished drinking water holding tank sits in contact with contaminated groundwater. The city's drinking water intakes on the Cape Fear River are 450 feet downstream from the Texfi property line. | DENR constructed a subsurface barrier wall in 2001 to prevent further contaminant migration to the holding tank area and installed extraction wells to remove contaminated groundwater in the area of the tank. Concentrations have been reduced. DENR has previously been provided special appropriated funds to continue to operate the extraction wells and monitor the groundwater on the City's property. DENR is addressing the source area through use of funds from a bankruptcy settlement. Source treatment in groundwater is underway. | State |
| Winston Container | Charlotte/ Mecklenburg | Abandoned containers buried in creek bank. | US EPA removed drums. Drum removal completed January 2010. Site remains a contaminated, requiring further work. | US EPA |

VI. SUMMARY OF THE INACTIVE HAZARDOUS SITES CLEANUP FUND AND NATIONAL PRIORITIES LIST COST SHARE FUND

Inactive Hazardous Sites Cleanup Fund

Revenue Not Dedicated to the Pre-Regulatory Landfills As of July 1, 2010

| | |
|--|----------------------|
| Deposits (09-10) | |
| Interest | \$11,519 |
| Deposits from Scrap Tire Account | \$269,540 |
| No Further Action review fees | \$7,000 |
| Total Deposits | \$288,713 |
| Withdrawals (09-10) | |
| Texfi Industries-Fayetteville emergency abatement contract | \$6,185 |
| Texfi Industries-Fayetteville source remediation contract | \$78,703 |
| Orphan priority site sampling/removal contract | \$438,060 |
| Total Withdrawals | \$522,948 |
| Current Balance | \$650,721 |
| Obligations | |
| Texfi emergency abatement contract | \$5,646 |
| Texfi source remediation contract | \$312,278 |
| Orphan priority site sampling/removal contract & pending water line contract | \$229,000 |
| Safety-Kleen Bankruptcy | \$654 |
| Total Current Obligations | \$547,578 |
| Effective Balance | \$103,143 |
| Orphan Cleanup Cost Requirements (see Chapter II for more details) | |
| Funds needed for 234 priority orphan sites identified | \$126,794,070 |
| Funds needed for 32 additional orphan sites identified | \$17,339,360 |
| Orphan Site Cleanup Costs | \$144,133,430 |

Funding Notes:

A total of \$464,785 was recovered through a bankruptcy claim for addressing six former Burlington Industries contaminated sites. \$8,651 remains. A total of \$210,000 has been recovered through a bankruptcy claim for two former Pillowtex contaminated sites. These monies have been deposited in separate special trust funds. DENR anticipates possibly receiving one additional allocation in bankruptcy funds for the Pillowtex sites. A new orphan site contract has been let and work will begin on the Pillowtex sites in the latter half of 2010. \$5.3 million has

also been recovered through a bankruptcy claim to address the SCM Corp site in Charlotte. The money is being held in a private trust. \$1,250,000, \$750,000 and \$100,000 were previously recovered for three CMI sites. These funds are also held in private trusts. \$338,989, \$43,410, and \$32,481 remain, respectively, in each account. The \$654 in money recovered for Safety-Kleen has been deposited in the Inactive Hazardous Sites Cleanup Fund.

**Revenue Dedicated to the Pre-Regulatory Landfills
As of July 1, 2010**

| | |
|--|----------------------|
| Deposits (09-10) | |
| Tax | \$9,218,602 |
| Interest | \$119,416 |
| Total Deposits | \$9,338,018 |
| Withdrawals (09-10) | |
| Contracts | \$339,253 |
| Local Government Reimbursement | \$22,325 |
| Operating Budget | \$410,636 |
| Total Withdrawals | \$772,214 |
| Current Balance | \$12,423,219* |
| Current Contract and Local Government Obligations | \$11,873,531 |
| Current Effective Balance | \$572,013 |

- * A portion of a solid waste disposal tax established by the legislature in 2007 is dedicated to the Pre-Regulatory Landfill Program. Funds are used to contract assessment and cleanup work at uncontrolled pre-regulatory landfills and to fund state staff to implement the program. The appropriations bill that was enacted in 2009 provided that starting in fiscal 2010-11, \$300,000 of the Inactive Hazardous Sites Program operating budget that is used to fund staff to address all other hazardous substance contaminated sites must also come out of this revenue source. Formerly, the staff members were funded through appropriations.

**National Priorities List Cost Share Fund
As of May 31, 2010**

| | |
|---|---------------------|
| Estimated cost of federal trust fund/N.C. cost share cleanups | \$120,780,639 |
| N.C.'s 10 percent cost share for pending/ongoing cleanups | \$12,078,064* |
| Fund disbursements for cost share payments | \$6,841,631 |
| Current balance | \$7,983,742 |
| Encumbered amount of the fund balance for cost share payments | \$5,236,433 |
| Effective Balance | \$2,747,309* |

- * Cleanup cost estimates are not yet available for all sites. The cost share figure will increase as cost estimates become available. Also, other sites may be added to the National Priorities List that will require a state cost share. This account is also used to pay for the state's operation and maintenance obligations at these sites. Aside from interest, the fund has no continuing source of income.
