Secretary

## MEMORANDUM

TO: ENVIRONMENTAL REVIEW COMMISSION  
The Honorable Jimmy Dixon, Co-Chairman  
The Honorable Chuck McGrady, Co-Chairman  
The Honorable Trudy Wade, Co-Chairman

FROM: Mollie Young, Director of Legislative Affairs, NCDEQ

SUBJECT: Inactive Hazardous Sites Program Annual Report

*Pursuant to G.S. 130A-310.10, "The Secretary shall report on inactive hazardous sites to the Joint Legislative Commission on Governmental Operations, the Environmental Review Commission, and the Fiscal Research Division on or before October 1 of each year."*

If you have any questions or need additional information, please contact me by phone at (919) 339-9433 or via e-mail at [mollie.young@ncdenr.gov](mailto:mollie.young@ncdenr.gov).

Cc: Don Van der Vaart, Secretary, NCDEQ  
Tom Reeder, Assistant Secretary for Environment, NCDEQ  
Michael Scott, Director of Waste Management, NCDEQ  
Lanier McRee, Fiscal Research Division, NCGA

**October 2016**

## EXECUTIVE SUMMARY

The N.C. General Assembly created the Inactive Hazardous Sites Program in the Department of Environmental Quality's (DEQ) Division of Waste Management (DWM) to identify, investigate and clean up properties contaminated with hazardous substances. The program also manages the assessment and cleanup of old pre-regulatory landfill sites that have environmental contamination and that predate modern landfill standards designed to prevent contamination. This report satisfies the requirements, set out in G.S. 130A-310.10, for an annual report to the General Assembly.

A total of 3,112 chemical spill or disposal sites and old, unlined dumps or landfills (pre-regulatory) have been cataloged. Of this number 2,548 still require work to address public health or environmental hazards.

Of the 2,548 remaining open cases, 669 are old, unlined landfills that predate solid and hazardous waste permitting laws. By state law, approximately 45 percent of the proceeds of a statewide solid waste disposal tax is directed to address contamination at these pre-regulatory landfills. DWM has established contracts with private firms to assess and remediate the pre-regulatory landfill sites. DWM has started a pilot study of an alternative privatized method of state-funded assessment and remediation of four pre-1983 landfills, to evaluate ways to improve efficiency and reduce cost.

At the end of FY2015-16, the uncommitted cash balance in the Inactive Hazardous Sites Cleanup Fund (IHSCF) dedicated to addressing the non-landfill inactive hazardous waste sites was \$0. The fund receives a \$400,000 appropriation for this purpose from the General Fund each year.

The program has recovered funds for assessment and remediation through bankruptcy claims for several sites over the years. In most cases, these new monies go into special trust funds, since the payments can only be used for specific sites in accordance with bankruptcy settlement agreements.

The following provides a status of sites cataloged by the Inactive Hazardous Sites Program.

### **Catalog of Contaminated Sites:**

<b>Total Number of Inactive Hazardous Sites Cataloged</b>	<b>3,112</b>
Chemical Spill or Disposal Sites	2,435
Pre-Regulatory Landfills	677

<b>Total Number of Sites Requiring No Further Action</b>	<b>564</b>
Chemical Spill or Disposal Sites	<b>556</b>
Pre-Regulatory Landfill Sites	<b>8</b>

<b>Remaining Open Sites</b>	<b>2,548</b>
Chemical Spill or Disposal Sites	<b>1879</b>
Pre-Regulatory Landfills	<b>669</b>

### **Program Activities for FY2015-16:**

#### **Chemical Spill or Disposal Sites:**

<b>Oversight of Responsible Party Cleanup Actions - Total</b>	<b>263</b>
Registered Environmental Consultant (REC)-Supervised Remedial Actions	<b>123</b>
Staff-Supervised Remedial Actions under Administrative Agreements	<b>65</b>
Additional Staff-Supervised Actions Pending Administrative Agreements	<b>68</b>
Spill Response Actions	<b>7</b>

<b>High Risk Orphan Site (no responsible party) Actions (completed and ongoing)</b>	<b>101</b>
---	------------

#### **Inactive Hazardous Sites Cleanup Fund Actions in FY2015-16**

Contaminated Site Assessments Completed or Ongoing	<b>34</b>
Contaminated Soil/Waste Removal Actions Completed or Ongoing	<b>5</b>
Homes Provided Alternate Water or Treatment Systems Maintained	<b>10</b>

#### **Testing Conducted by Staff**

Water Supply Wells Sampled at Non-Landfill Sites	<b>74</b>
Sites with Other Testing (soils, surface water)	<b>22</b>

#### **New Site Screenings**

Sites Screened	<b>49</b>
Sites Added to Inventory	<b>37</b>

#### **Sites Evaluated for No Further Action (NFA) Status**

Sites Evaluated	<b>21</b>
NFAs Granted	<b>20</b>

#### **Pre-Regulatory Landfill Sites:**

<b>1st Phase Assessments Completed</b> ( <i>receptor research, geophysical perimeter assessment</i> )	<b>7</b>
<b>Contaminant Delineation Phase Assessments Completed</b>	<b>15</b>
<b>1st Phase Assessments Ongoing</b>	<b>3</b>
<b>Contaminant Delineation Phase Assessments Ongoing</b>	<b>38</b>
<b>Remedial Design Ongoing</b>	<b>20</b>
<b>Remedial Action Ongoing</b>	<b>6</b>

<b>Remedial Action Completed</b>	<b>3</b>
<b>New Site Evaluations</b>	<b>1</b>
<b>Homes Provided Alternate Water or Treatment Systems Maintained</b>	<b>21</b>
<b>Number of water supply wells sampled</b>	<b>139</b>

Other program activities include response to public inquiries (these generally run 2000 to 3000 each year), filing bankruptcy claims to generate cleanup funds, and implementation of the Bernard Allen Emergency Drinking Water Program (BAP) (data for the BAP is provided in a separate report to the N.C. General Assembly).

## **I. THE INACTIVE HAZARDOUS SITES INVENTORY AND THE INACTIVE HAZARDOUS WASTE SITES PRIORITY LIST**

The Division of Waste Management's (DWM) Inactive Hazardous Sites Branch implements the Inactive Hazardous Sites Response Act of 1987 (IHSRA). The IHSRA requires DWM to maintain a catalog of inactive hazardous substance or waste disposal sites. The program has cataloged 2,435 chemical spill sites and 677 old unlined landfills. Of these, 564 sites now have all work completed and are assigned "No Further Action" status. Twenty-three completed all work and were assigned "No Further Action" status in FY 2015-16. This number includes three pre-regulatory landfill sites. Table 2, on page 2, provides a list of those sites. Table 1, on page 2, provides a list of sites added to that inventory in FY 2015-16. A total of 37 new sites were added this past fiscal year and two sites were reopened.

N.C.G.S. 130A-310.2 requires DWM to prioritize sites cataloged in the Inactive Hazardous Sites Inventory based on the threat to public health and the environment. Sites are first cataloged in the "Evaluations Pending" category of the Inactive Hazardous Sites Inventory until DWM ranks the site based on rules found in 15A NCAC 13C .0200. Once ranked, sites are transferred to the Inactive Hazardous Waste Sites Priority List. The priority list is provided in an appendix to this report organized in order of the threat to public health and the environment. The purpose of this list is to prioritize full-scale (complete) remedial actions at sites without responsible parties. The rank or absence of a site on the priority list does not limit DWM in conducting abatement actions at sites with immediate hazards.

N.C.G.S. 130A-310.10 requires reporting of the location of each inactive hazardous waste disposal site, the type and amount of hazardous substances or waste known or believed to be located at each of these sites, the last action taken at each of these of these sites and the date of the last action. Due to the large numbers of contaminated sites, most of the sites have not undergone complete assessments needed to provide all of this information. Appendix B provides the supplemental information to the extent available.

## II. SITES THAT MAY OR ARE KNOWN TO REQUIRE USE OF THE INACTIVE HAZARDOUS SITES CLEANUP FUND

### *Purpose of the Fund*

The Inactive Hazardous Sites Cleanup Fund is used to: (1) address imminent hazard sites; (2) pay for assessment and cleanup when responsible parties do not comply with orders to clean up sites; (3) pay for assessment and cleanup of sites without financially-viable responsible parties (orphan sites); and (4) pay for preparation of a notice of Inactive Hazardous Substance or Waste Disposal Site if the owner does not comply with orders to record a notice. When a financially viable responsible party exists, the state must attempt to recover its expenditures from the responsible party.

The Inactive Hazardous Waste Sites Priority List helps determine priorities for cleanup. Responsible parties for top priority sites are encouraged to voluntarily clean up their sites. When a responsible party does not comply with a request and subsequent order to clean up a site, the state must perform the cleanup using the Inactive Hazardous Sites Cleanup Fund. The demand for state funds to conduct site cleanups depends on two factors: (1) how often responsible parties refuse to comply with orders to conduct cleanup and (2) the number of sites that lack financially viable responsible parties.

### *Inactive Hazardous Sites Cleanup Fund Actions*

The Inactive Hazardous Sites Cleanup Fund was used to address several sites this year. A summary of the work is provided in Table 3.

**Table 3. Summary of Inactive Hazardous Sites Cleanup Fund Expenditures FY2015-16**

<i>Site Name</i>	<i>City/ County</i>	<i>Activity</i>	<i>FY 2015-16 Fund Expenditure</i>
Allen Lane Contaminated Wells	Hillsborough/ Orange	Soil and groundwater testing to attempt to identify source of contamination in a residential area and to determine potential for vapors from contaminated groundwater to enter homes. Work was initiated in FY2014-15 and completed in FY 2015-16. DWM also conducted maintenance on water treatment systems installed on two water supply wells.	\$2,957
Azalea Lane Contamination	Charlotte/ Mecklenburg	Vapor testing and water supply well sampling. Work was initiated in FY2014-15 and completed in FY 2015-16.	\$411
Brekenwood Subdivision	Pleasant Garden/ Guilford	Maintenance of a treatment system installed on a contaminated residential well.	\$1,526

Burke's Hardware	Raleigh/ Wake	Conducted water supply well survey, sampled water supply wells, and conducted testing to determine potential for vapors from contaminated groundwater to enter homes. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$6,076
Busick Road	Reidsville/ Rockingham	Maintenance of a treatment system installed on a contaminated residential well.	\$2,273
Charlotte Aircraft #3	Charlotte/ Mecklenburg	Soil gas testing conducted to evaluate potential for hazardous vapors to enter structures. Work was initiated in FY 2014-15 and completed in FY 2015/16.	\$1,532
Chemical and Solvents, Inc	Greensboro/ Guilford	Groundwater, soil gas and crawl space testing conducted to evaluate potential for hazardous vapors to enter homes. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$34,821
Christian Creek Rd PCE	Swannanoa/ Buncombe	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$8,275
Cinderella Knitting Mills	Kings Mountain/ Cleveland	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes. Work was initiated in FY 2014-15 and completed in FY 2015/16.	\$19,234
Country Club Lane Contamination	Roxboro/ Person	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes. Also conducted maintenance of a treatment system installed on a contaminated residential well.	\$14,072
Cress Property/Bostian Heights	Salisbury/ Rowan	Contaminated groundwater has affected a water supply well. Removed contaminated soils. Also installed groundwater treatment point to allow for future treatment of contaminated groundwater. Resampling of drinking water well. Work was initiated in FY 2014-15 and completed in FY 2015/16.	\$10,542
Crowders Mountain State Park	Gastonia/ Gaston	DWM and the U.S. EPA have conducted waste and soil removal on park and residential property in previous reporting years. In FY 2015-16, DWM conducted hot spot remediation of groundwater.	\$25,245

Derringer Drive	Marshall/ Madison	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$10,517
Diamondback Products	Lexington/ Davidson	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$11,720
Dupont Dump	Navassa/ Brunswick	Testing conducted to determine if contaminated groundwater and any associated vapors were present in nearby residential area that could threaten water supply wells and result in vapors entering homes. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$9,471
Eighth Ave Ext Solvents	Cramerton/ Gaston	Groundwater and soil gas testing to evaluate potential for hazardous vapors to enter homes in a neighborhood. Also provided bottled water to owners with contaminated wells while the U.S. EPA is installing a water line.	\$26,720
Fairland Lane	Lincolnton/ Lincoln	Groundwater and soil gas testing to evaluate potential for hazardous vapors to enter homes in a neighborhood. Threatened water supply wells also tested.	\$13,329
Fallies Dry Cleaning	Mocksville/ Davie	Conducted a groundwater investigation to determine if hazardous vapors from groundwater could enter structures.	\$10,060
Hot Spot Solvents	Salisbury/ Rowan	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes.	\$9,078
Hwy 158/64 Spill	Elizabeth City/ Pasquotank	Spill of unknown origin killed a span of grass along highway. Conducted testing to determine if hazardous substances are present in soil.	\$3,761
John Price Road Site	Charlotte/ Mecklenburg	Multiple homes contaminant concentrations at levels that may pose a risk of vapors from contaminated groundwater entering homes. Conducted preliminary work for conducting vapor testing around a residence. Owner declined access to conduct work.	\$685
Lake Rim Solvents	Fayetteville/ Cumberland	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes.	\$9,590

Lytle Cove Road Solvents	Swannanoa/ Buncombe	Conducted engineering evaluation to determine if affected and threatened homes could be connected to city water service, installed a treatment system on one water supply well when municipal water could not be extended to home, conducted testing to determine potential for vapors from contaminated groundwater to enter affected residence, conducted soil and groundwater investigation to attempt to locate source of drinking water contamination as well, and conducted sampling of nearby water supply wells. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$134,093
Market Street Storage	Greensboro/ Guilford	Soil gas testing conducted to evaluate potential for hazardous vapors to enter apartment buildings.	\$17,832
Mason Residence	Monroe/ Union	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes.	\$12,518
Metal Industries	Marion/ McDowell	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes, water supply well survey conducted, and conducted testing of soil, groundwater, surface water and water supply wells in the area. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$2,690
Metal Recycling Services	Whiteville/ Columbus	Soil and groundwater investigation conducted due to water supply wells near the site. Work was initiated in FY 2014-15 and completed in FY 2015/16.	\$1,208
Old Stake Road	Chadbourn/ Columbus	Removal of lead contaminated soils in a residential area. Work initiated in previous fiscal year and completed this reporting year.	\$9,271
Orr Road	Charlotte/ Mecklenburg	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes.	\$10,287
Poole Road PCE	Raleigh/ Wake	Conducted a soil and groundwater assessment to attempt to identify source of contamination in water supply wells. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$1,372
Priddy Property	Lawsonville/ Stokes	Maintenance of a treatment system installed on a contaminated residential well.	\$9,734

Rhoderia Drive Wells	Stallings/ Union	Conducted water supply well, crawl space vapor, soil gas, surface water and sediment sampling to evaluate potential for additional water supply wells in area to be affected and for hazardous vapors to enter homes.	\$29,705
Scercy Well/ Robinwood Dr	Charlotte/ Mecklenburg	Initiated soil gas testing to evaluate potential for hazardous vapors to enter homes.	\$406
Southside Road Incident	Lincolnton/ Lincoln	Initiated water supply well survey.	\$3,777
Staley PCE/Brown's Grocery	Staley/ Randolph	Initiated soil gas testing to evaluate potential for hazardous vapors to enter homes. Maintenance of a treatment system installed on a contaminated well	\$11,044
Stevens Cleaners	Fairmont/ Robeson	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes. Work was initiated in FY 2014-15 and completed in FY 2015-16.	\$368
Texfi Industries	Fayetteville/ Cumberland	Additional groundwater assessment conducted. This work is a continuation of work that has been conducted at this site over the years to remove and treat sources of groundwater contamination using bankruptcy and special appropriations funding.	\$4,888
Tom Sadler Wells	Charlotte/ Mecklenburg	Soil and groundwater assessment conducted in a residential neighborhood.	\$13,178
Ulah Battery/Battery Piles	Asheboro/ Randolph	Removal of lead contaminated soils in a residential area is ongoing. This removal follows previous state and U.S. EPA soil and waste removal events that have occurred in previous fiscal years.	\$7,813
Watts, Levi	Tabor City/ Columbus	Removal of lead contaminated soils and debris on residential property continuing from the previous fiscal year.	\$3,830
W.E. Garrison Company	Raleigh/ Wake	Installation of a treatment system on a contaminated residential well.	\$6,381
Wilmington Iron Works	Wilmington/ New Hanover	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes.	\$1,156
Woodleaf and Ridge PCE	Salisbury/ Rowan	Maintenance of a treatment system installed on a contaminated well	\$2,261
Woodleaf Road TCE	Wake Forest/ Wake	Soil gas testing conducted to evaluate potential for hazardous vapors to enter homes.	\$9,174

### *Inactive Hazardous Sites Program Bankruptcy Actions*

DWM's Inactive Hazardous Sites Program has also recovered some funds to address specific sites through bankruptcy claims. Since first seeking to recover prospective cleanup costs through bankruptcy claims, DWM's Superfund Section, in conjunction with the state Attorney General's office, has recovered more than \$18 million. All of these funds are held in private escrow accounts or in separate subaccounts of the Inactive Hazardous Sites Cleanup Fund. The following summarizes bankruptcy activities conducted in FY 2015-16:

- **CMC** - \$925,000 was recovered for assessment and cleanup of the Elkin site and is held in a private trust. Remedial action was implemented in FY2010-11. Conducting periodic monitoring of groundwater. Funds in the amount of \$228,997 remain for monitoring. This reporting year, DWM has been coordinating an effort with the trustee of the account, the trustee of the CMI accounts (see below) and the city of Elkin to transfer the property and some of the adjoining former CMI properties to the city of Elkin to be managed as park space.
- **CMI** – \$1.25 million, \$750,000 and \$100,000 have been recovered for three CMI sites in Elkin and the monies are held in private escrow accounts. These funds have been used to conduct assessment/remediation. \$10,761, \$23,678, and \$17,781 remain, respectively, for each site. This reporting year, DWM has been coordinating an effort with the trustee of the account, the trustee of the CMC account and the City of Elkin to transfer the CMC property (see above) and some of the adjoining former CMI properties to the City of Elkin to be managed as park space. This fiscal year assessment at one of the three properties was conducted to allow for a risk-based closure. Additional contaminant assessment is planned at the other two next fiscal year.
- **Fuel Systems** - \$98,010 was recovered in FY 2012-13 for assessment and cleanup of the Kysor site in Charlotte. An additional distribution of \$5,966 was recovered in FY 2014-15. Action pending.
- **Gilbert and Bennett** - \$87,912 recovered for the Cape Fear Wood site in Fayetteville in FY 2005-06. Another responsible party is conducting remediation work under DWM's Hazardous Waste Section. Once completed, the bankruptcy funds will be used to conduct remaining cleanup actions.
- **Furniture Brands** - Bankruptcy claim was filed in FY 2013-14 for the Lane Venture #14 and Broyhill sites in Conover, the Henredon site in Morganton, and the Thomasville Furniture site in West Jefferson. The total sum of DWM's claim is \$16,618,646. DWM continues to negotiate its claim for a settlement.
- **GM** - \$20,205 recovered in FY 2011-12 for the GM Training Center site in Charlotte. An additional \$3,322 was recovered in FY 2013-14. A limited scope of work will be implemented next fiscal year with the available funds.
- **Mark IV** – A total of \$42,738 was recovered for three Dayco sites in Haywood County in FY 2010-11. A limited scope of work will be implemented with the available funds. Work was initiated on a water supply well survey around the three sites in FY 2015-16. In FY 2016-17, groundwater testing will also be conducted to assess threats to water supply wells.
- **Pillowtex** – A total of \$244,800, constituting multiple disbursements, has been recovered to address the Fieldcrest Mills site in Spencer and the Cannon Mills site in Kannapolis. Sampling conducted at the Spencer site shows widespread groundwater contamination.

The Cannon Mills site will be addressed through the Pre-Regulatory Landfill program. DWM is evaluating where best to spend remaining \$198,216 in funds.

- **SCM** – \$5.3 million was obtained to address the SCM site in Charlotte. The funds are held in a private trust fund. The trustee contracts the work at DWM's direction. Funds support one-third of a position to oversee work. Contaminant characterization is completed. Remedial action pending submission and DWM approval of the remedial action plan.
- **Texfi Inc.** – A total of \$941,215 in funds recovered in FY 2005-06 through a bankruptcy claim was used to remove sources of contamination and determine the nature and extent of contamination at the Fayetteville property. Additional special appropriations were granted by the legislature. All of the bankruptcy funds and special appropriations have now been depleted. Insufficient funds are available to conduct a complete removal of sources of groundwater contamination at the site. Removal costs are estimated to be between \$25 million and \$60 million.

#### *Chemical Spill or Disposal Sites That Shall or May Require Use of the Inactive Hazardous Sites Cleanup Fund*

An appropriation of \$400,000 a year is used to address the highest risk chemical spill sites without responsible parties that can pay. A total of 360 sites are known to have no financially-viable responsible party available to pay for contaminant testing and cleanup. Of these, 314 sites are identified as higher risk because they are used for residential purposes, have contaminated water supply wells or have a drinking water source within one-quarter mile of the site. The total number of orphan sites is unknown but expected to be a high percentage of the remaining open cases. It is difficult to prove who caused the contaminant releases at these sites. When it is known, those responsible parties are often no longer in business or are financially unsound. Determining whether a responsible party exists (and thus, whether state funds will be needed for assessment and cleanup) most often requires research, inquiry and sampling. Due to the level of effort required, DWM performs responsible party research for sites that are next in priority for action.

Orphan site work can include determining the nature and extent of contamination through testing and other investigation, soil and waste cleanup, waterline installation or groundwater restoration projects. An average cost-per-site was determined by first calculating the average cost for orphan soil cleanup actions conducted by DWM's Inactive Hazardous Sites Branch and averaging that figure with an average site cleanup cost for several state programs, published by the Association of State and Territorial Solid Waste Management Officials, adjusting for inflation. That figure comes to \$670,467 per site. The total cost for cleanup is estimated to be \$210,526,638 for 314 highest risk orphan sites.

As of July 1, 2016, the balance of the Inactive Hazardous Sites Cleanup Fund was \$139,204. Of this, \$30,000 consists of bankruptcy proceeds dedicated to conducting assessment and remediation at the Frye Creek Site in Hickory. The remaining funds are committed toward payment of contracted work in progress or completed and not yet billed.

### *Pre-Regulatory Landfills*

Session Law 2007- 550 established a statewide tax on solid waste disposal, half of which goes to address the hazards posed by landfills that predate federal and state rules on solid waste disposal. The portion of the solid waste disposal tax received by the program may be used only for addressing the pre-regulatory landfill threats. DWM received \$9,173,960 in tax revenue in FY 2015-16. Thirteen percent may be used for administrative expenses. Included in the administrative expense allowance is \$300,000 for administration of the non-pre-regulatory landfill portion of the Inactive Hazardous Sites Program and \$500,000 of DWM's Solid and Hazardous Waste Section programs, leaving approximately \$400,000 for administration of the Pre-Regulatory Landfill Program.

DWM has cataloged 677 unpermitted, unlined landfills. Initial work at each site involved confirming the location, determining the current use of the property, and identifying the use of surrounding property to help prioritize the sites for action. Based on inspections conducted as part of that work, 80 percent of the sites have been determined to have a water supply source, residence, school, church, day care or park on or within 1,000 feet of the landfill and thus are considered higher risk priority sites. DWM established contracts for contaminant assessment and mitigation of the sites. Using these contracts, the nature and extent of the contamination was defined through testing. A remedy is then designed and implemented to address the exposure risks. DWM also provides review and approval of contaminant assessment work being conducted by local governments at these sites and reimburses the cost of that work from the tax proceeds. In FY 2015-16 three contaminant assessments were being conducted by local governments with DWM oversight and reimbursement.

In FY 2015-16, DWM completed first phase remedial investigations at seven sites. Three other sites have ongoing first phase assessments. That work involves updating information on location of water supply wells, streams, structures and other potential exposure routes, and conducting assessment needed to determine the perimeter of the waste. DWM completed the second phase, contaminant delineation, at 15 sites. During this phase, multiple testing events are conducted to determine the nature and extent of contamination in soils, groundwater, vapors and surface water. An additional 38 sites had contaminant delineation investigations ongoing but not yet completed. Also in FY 2015-16, 29 sites were in the remedial action phase, including three sites where all work was completed this year. The program also sampled 139 private water supply wells on or near pre-regulatory landfills and provided alternate water supplies or maintained treatment systems on wells for 21 homes with unsafe levels of contamination. One new site was screened for program qualification.

The assessment and cleanup process can be a complex one. Exposure caused by contaminated water supplies, contaminated vapors entering buildings, methane gas posing explosion risks and exposed wastes on residential property must be addressed. Difficulties can also arise in attempting to gain access to affected properties at each site and to deal with illegal dumping continuing during the investigation and remedial action. During the assessment and cleanup process, officials must frequently balance the owner's current and planned use of the property with acceptable safe usage.

DWM has started a pilot study of an alternative privatized method of state-funded assessment and remediation of four pre-1983 landfills, to evaluate ways to improve efficiency and reduce cost. In June 2016, DWM advertised qualifications for two contracts for professional engineering firms to implement the independent environmental investigations and risk-based cleanup of those four sites. (DWM is in the process of finalizing the two contracts as of October 1, 2016). The firms are required to develop effective and stable risk-based remedies in a manner consistent with applicable statutes. Work will be conducted independently, and the engineering firms under contract will certify the quality of work. The Division will verify compliance prior to authorizing payment on associated invoices. At the close of the study, a comparison of time and costs between direct program oversight and privatized implementation will be completed and reported to identify ways to improve the cleanup process, reduce costs and make the investigation and cleanup activities associated with pre-1983 landfills more efficient.

The sites in remedial action during FY 2015-16 are:

Buncombe County Landfill	Enka, Buncombe County
Bunn Dump	Bunn, Franklin County
Burnt Mill Creek Landfill	Wilmington, New Hanover
Cannon Mills Landfill	Kannapolis, Rowan County
Central Park Landfill	Winston-Salem, Forsyth County
City of Wilson – 1	Wilson, Wilson County
Cliffside Mill Dump*	Cliffside, Rutherford County
Closed City of Henderson Landfill	Henderson, Vance County
Clyde Leach Dump	Arabia, Hoke County
Cumberland County Landfill	Hope Mills, Cumberland County
Danbury Dump	Danbury, Stokes
Davidson River Dump	Pisgah Forest, Transylvania County
Double Oaks Landfill	Charlotte, Mecklenburg County
Durham County Landfill	Oak Grove/ Durham County
Glass, E.H. LF	Greensboro, Guilford County
Fairview Landfill	Fairview, Buncombe County
Hildebran Disposal Area	Hildebran, Burke County
Jacksonville WWTP Landfill at Sturgeon City	Jacksonville, Onslow County
Lake Lure Dump*	Lake Lure, Rutherford County
Mangum Estates	Wake Forest, Wake County
Mcadenville Dump	Mcadenville, Gaston County
Money-Worth, Inc.	Swannanoa, Buncombe County
Mooreville Landfill	Mooreville, Iredell County
Rolesville Dump	Rolesville, Wake County
Spring Hope Dump	Spring Hope, Nash County
Stanley Refuse Dump	Stanley, Gaston County
W. C. Beck	Durham, Durham County
Walnut Cove Dump*	Walnut Cove, Stokes County
Walton’s Sanitation Service Dump	Morrisville, Wake County

\* - Remedial action completed.

### **III. FEDERAL NATIONAL PRIORITIES LIST SITES REQUIRING A STATE COST SHARE**

National Priorities List (NPL) sites are those hazardous substance or waste disposal sites that are priorities for cleanup under the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), more commonly known as Superfund. These are sites identified by the U.S. EPA as high priorities for environmental cleanup because of the nature of the contamination and actual or potential threat to human health and the environment. North Carolina has 39 NPL sites.

The NPL includes sites with financially-viable responsible parties and orphan sites. Cleanup costs are financed by responsible parties or a federal trust fund with a state cost share. When the federal trust fund is used, CERCLA requires North Carolina to pay 10 percent of the cleanup cost plus 100 percent of the cost to operate and maintain the remediation system.

Table 4 provides a list of the North Carolina NPL sites and the following information for each site: location, investigation/cleanup status, estimated costs and projected start dates for cleanup. Part I of Table 4, found on page 14, includes those sites where the federal trust fund/North Carolina cost share is required. A summary of North Carolina's cost-share obligations is provided at the end of this part. Part II of Table 4, found on page 16, includes the status of responsible party-funded cleanups.

**TABLE 4. NORTH CAROLINA NATIONAL PRIORITIES LIST SITES – PART I

#### **IV. RESPONSIBLE PARTY VOLUNTARY SITE REMEDIAL ACTION**

When the Inactive Hazardous Sites Branch requests that a person responsible for contamination at a priority site take action to address the risks, some parties agree to voluntarily conduct a cleanup. Some responsible parties and owners also initiate an approved assessment and/or remedial action on their own. Due to the number of voluntary remediation projects and limited staff resources, the General Assembly authorized the N.C. Division of Waste Management (DWM) to privatize oversight of voluntary remediation activities at lower-priority sites. DWM continues to provide oversight for assessment and remediation at sites that present more severe public health threats or other concerns.

The privatized portion of the voluntary cleanup program is called the Registered Environmental Consultant (REC) Program. Under this program, a responsible party hires a private consultant to conduct the site assessment and cleanup and to certify that those activities comply with regulations. The REC'S certification replaces DWM oversight of the assessment and cleanup. Firms must meet certain requirements to qualify as an REC. DWM audits a number of the REC projects each year to ensure program integrity. DWM has the authority to sanction an REC where necessary. DWM staff conduct REC certification, training and performance audits. These staff are funded through fees collected from the voluntary program participants.

A current list of the 188 sites where assessments and cleanups are underway in accordance with an administrative agreement with the state is provided in Table 5 on the following page. There are 123 REC-directed and 65 DWM-directed actions. Table 6, found on page 23, is a list of an additional 68 DWM-directed responsible party assessment and cleanup actions pending administrative agreements.

Note: Inactive Hazardous Sites Branch staff are conducting work at many other sites not listed in Tables 5 and 6. Such work includes (1) assessing and abating risk from contaminated drinking water wells and other contamination at residential and other high risk properties where there are no identifiable responsible parties, (2) investigating responsible parties at higher priority sites, (3) preparing bankruptcy claims and overseeing contractor work conducted with receipts, (4) responding to requests for “No Further Action Status” reviews, (5) responding to spills, (6) screening of newly discovered sites and (7) responding to public inquiries on sites.

## V. IMMINENT HAZARD SITES

DWM and the U.S. EPA are committed to addressing imminent hazard sites when identified. Table 7 provides a list of sites where potential imminent hazards were reported, or where abatement activities continued, in FY 2015-16. Their location, a site description, status and funding source are also provided.

**TABLE 7. SUMMARY OF IMMINENT HAZARD SITES**

<i>Site</i>	<i>City/ County</i>	<i>Site Description</i>	<i>Status</i>	<i>Funding Source</i>
Burke's Hardware	Raleigh/ Wake	Chlorinated solvents were detected in groundwater in vicinity of Burke Brothers Hardware store during an underground storage tank investigation. The petroleum portion of the contamination is being addressed by DWM's UST Section.	DWM performed a receptor survey, groundwater sampling and soil gas testing. Tetrachloroethylene and trichloroethylene were confirmed in groundwater however business and residential properties are connected to municipal water and soils gas testing indicated no elevated vapor risks to indoor air.	DWM
Busick Road TCE	Reidsville/ Rockingham	Trichloroethylene (TCE) was detected in water supply wells.	DWM installed a treatment filter on one well with a TCE concentration above the drinking water standard and conducted soil gas sampling to evaluate vapor intrusion risk for three homes. The sampling results indicate that no vapor risk at this time.	DWM
Chemical and Solvents, Inc.	Greensboro/ Guilford	Chlorinated solvents are present in both soil and groundwater at the site. Potential for vapors from groundwater contamination to migrate into homes in a nearby residential area.	DWM conducted groundwater and soil gas investigation in the residential area. Trichloroethylene was detected below two houses. The U.S. EPA is in the process of planning a large scale soil gas sampling event to determine vapor intrusion potential in the residential area.	DWM/U.S. EPA
Cinderella Knitting Mills	Kings Mountain/ Cleveland	Former textile mill with residential properties in close proximity to very elevated perchloroethylene (PCE) levels in soil and groundwater. Contaminated vapors are entering an on-site building's office space above acceptable risk targets. A large groundwater contamination plume extends off the property on to a city park which is bordered by a stream accessible to the public. The stream has PCE concentrations that exceed the state surface water standards.	DWM conducted soil gas sampling around the exterior of the on-site building and along the property edge in the direction of residential properties. Results of this testing warranted the sampling of the air inside the on-site building office space. Indoor air concentrations exceed acceptable risk targets. The U.S. EPA is currently assisting the DWM to continue monitoring, assessing and abating the potential hazards of the PCE levels in the indoor air. The responsible party has filed for bankruptcy. The U.S. EPA and DWM are considering filing a proofs of claim to attempt to secure funds through a bankruptcy settlement.	DWM/U.S. EPA
Continental Automotive Systems Acid Spill	Fletcher/ Henderson	A faulty valve caused release of 4,500 gallons of hydrochloric acid.	Further investigation found that the contents of the spill had been successfully held in the containment structure for the tank and no releases to the environment occurred as a result of the spill.	Responsible Party
Cress Property/ Bostian Heights	Salisbury/ Rowan	Solvents released on residential property where dry-cleaning activities were previously conducted have contaminated groundwater. A drinking water well at the fire department next door was found to be contaminated.	Previously, DWM excavated soil from former drum storage and barre; burn area, installed and sampled a monitoring well, and sampled the adjacent fire department drinking water well. The fire department previously installed and is maintaining a treatment system on their well. DWM continues to sample one monitoring well along with water supply wells at the fire station and surrounding area.	DWM/ Bostian Heights Fire Department
Cribbs-Hobby	Wilmington/ New Hanover	Perchloroethylene detected in a water supply well serving rental homes on a junkyard property following a fire.	DWM sampled soils, groundwater, and on-site and neighboring water supply wells to determine extent and severity of contamination. Three neighboring wells had chlorinated solvent detections but did not exceed drinking water standards and do not appear to be related to the Cribbs Hobby Site. Continued periodic monitoring of the three wells will be performed by Bernard Allen Program.	DWM

Crowders Mountain State Park	Gastonia/ Gaston	Large disposal of drummed wastes located on residential and park property.	DWM removed some of the drums. Due to large numbers, DWM did not have the resources to remove all of the drums and contaminated soils. The U.S. EPA agreed to take over the drum/contaminated soil removal. All of the wastes and contaminated soils have been removed. Following the removal action, DWM detected solvents in one monitoring well at the site. DWM monitors two water supply wells located 200 feet from the contaminated monitoring well twice a year. Both wells have remained clean since monitoring began in 2012. In FY 2015-16 DWM installed one well to inject an oxygen release compound to attempt to reduce elevated groundwater contamination. Additional monitoring of groundwater planned.	U.S. EPA/ DWM
Country Club Lane	Roxboro/ Person	Two water supply wells were contaminated with chlorinated solvents.	The U.S. EPA and DWM responded and conducted area wide sampling of drinking water wells. The U.S. EPA installed treatment filters on the two affected wells and DWM is conducting the annual maintenance on these filters. Due to the elevated concentrations in groundwater, DWM conducted sampling to determine whether hazardous vapors could enter homes. Soil gas samples were collected from five residential properties. One sample exceeded the screening levels for potential for indoor contaminant vapor intrusion. DWM plans to conduct indoor air sampling of this house upon receipt of FY 2016-17 remediation funds. Area soil sampling will also be conducted.	DWM/U.S. EPA
CTI of NC, Inc	Wilmington/ New Hanover	Estimated 148,000 gallon methanol spill occurred in a containment/dike area at bulk storage facility. Spill caused by valve malfunction.	Majority of spilled material recovered during initial abatement activities. Remaining contamination being addressed by monitoring natural degradation of the contamination.	Responsible Party
Diamondback Products, Inc.	Lexington/ Davidson	Former textile facility with trichloroethylene contamination in groundwater. Residences are located near site.	DWM previously conducted a groundwater investigation to determine magnitude and extent of contaminant plume. In FY 2015-16, DWM conducted an evaluation of the potential for contaminated vapors to enter buildings. Results indicate no unacceptable vapor risk present.	DWM
Derringer Drive	Marshall/ Madison	The city of Marshall installed two municipal wells which subsequently were found to be contaminated with trichloroethylene above drinking water standards. Additional wells owned by area residents were also found to be contaminated above standards. The extent of the groundwater contaminant plume is unknown.	Following the installation of treatment systems in affected residential wells during previous fiscal years, the DWM conducted soil gas sampling at residential properties to evaluate the potential for contaminated vapors to enter homes. No properties were found to have elevated levels. No further immediate work is planned.	DWM
Dodson Exterminators	Jacksonville/ Onslow	Pesticides detected in soils and groundwater at property with a petroleum release. DWM's UST Section replaced neighboring water supply well due to petroleum contamination however new well had not be sampled for pesticides.	DWM sampled the new water supply well and no pesticides were detected. Groundwater at the site is still contaminated with pesticides.	DWM
Eighth Avenue Extension Solvents	Cramerton/ Gaston	Residential area has four water supply wells with concentrations of perchloroethylene (PCE) that exceed the drinking water standards. Source for the PCE is unknown.	DWM conducted a groundwater investigation and soil gas sampling on residential properties to evaluate the potential for contaminated vapors from groundwater entering homes. Additional soil gas sampling, groundwater monitoring, and supply well sampling is planned. DWM is providing bottled water to residents with contaminated wells until the U.S. EPA completes installation of water lines in the neighborhood.	U.S. EPA/ DWM

Fallies Drycleaning	Mocksville/ Davie	The former site of a commercial drycleaner with perchloroethylene (PCE) in soil above state clean up goals. One residence and one business appear to be in the direct downgradient pathway of the potential groundwater contaminant plume.	DWM conducted a limited groundwater assessment within the area of the nearest business and residence. PCE levels in groundwater warrant a soil gas investigation during the next fiscal year to evaluate risk of nearby homes for indoor air contamination.	DWM
Highway Transport Rhoplex Spill	Old Fort/ McDowell	A chemical spill occurred when a transport truck was struck from the rear. Approximately 767 gallons of RHOPLEX EMUSION was released on to the road shoulder and into a nearby drainage ditch.	Trucking firm contracted consultant and response crews to excavate. Contractor removed approximately 15 cubic yards of contaminated soil and shipped for disposal at an approved facility. The excavated area was then backfilled with clean soil provided by the NCDOT. The NCDOT applied grass seed and straw over the backfilled area. A final abatement report submitted and approved by the DWM. No further work deemed necessary.	Responsible Party
Hillside Shopping Center	Asheboro/ Randolph	Former dry cleaner in shopping center discharged perchloroethylene (PCE). PCE exceeds commercial and residential screening levels for potential building vapor intrusion in to tenant spaces and up to six homes.	DWM directed responsible party to further investigate vapor intrusion potential. Work currently underway.	Responsible Party
Hot Spot Solvents	Salisbury/ Rowan	Contaminated groundwater near residential homes at levels that warrant a structural vapor intrusion investigation.	DWM conducted soil gas testing to determine risk from contaminated vapors entering homes. Results indicated that no unacceptable vapor risk present.	DWM
Kinder Morgan Southeast Terminal	Charlotte/ Mecklenburg	Truck fire with flame retarding foam discharged onto ground storm drain to ditch leading into nearby stream.	Responsible party conducted soil testing. Lab tests confirmed no detections of contaminants of concern.	Responsible Party
Lake Rim Solvents	Fayetteville/ Cumberland	Chlorinated solvents detected in water supply wells. Source unknown.	DWM closed supply wells and established public water connections during a previous reporting year. In FY 2015-16 DWM performed soil gas testing at residences with previous supply well detections above screening levels for potential vapor intrusion into homes. No elevated vapor risks were found.	DWM
Langer Transportation Spill	Henderson/ Vance	Approximately 100 gallons of glycol ether acetate, ether STD and butyl cellisolve solvent were spilled during a tanker accident in median of I-85.	All contaminated soils were removed. Groundwater, surface water and drinking water wells were not affected. No further action planned.	Responsible Party
Lytle Cove Rd Solvent Contamination	Swannanoa/ Buncombe	Trichloroethylene contamination identified in residential well. Source unknown.	DWM connected affected well to a treatment system. DWM conducted a soil and groundwater investigation to try to identify source of groundwater contamination discovered in residential well as other wells not yet affected are in the area. Two off-property sources are suspect. DWM also collected soil gas samples on the affected property to evaluate the potential for contaminated vapors to enter the home. The results did not show an elevated vapor risk.	DWM
Market Street Storage	Greensboro/ Guilford	Chlorinated solvents released at a former Flav-O-Rich dairy operation contaminated groundwater on neighboring property where eight apartment buildings are present. The current owner of the dairy property, a developer under the state's Brownfield Program, conducted an evaluation of vapors in the apartments with the highest threat. They subsequently installed a mitigation system at the one affected building.	After the owner of the dairy property installed the vapor mitigation system, this past fiscal year DWM conducted additional soil gas sampling around additional units at the apartment property. The results indicate that vapor risk is not a concern for the other apartment building at this time.	DWM

Old Stake Road	Chadbourne/ Columbus	Residential property contaminated with lead from battery casing disposal.	U.S. EPA conducted a partial removal of the contaminated soils. DWM then completed an assessment of the remainder of contaminated soils in FY 2013-14 and completed the removal of contaminated materials and soils in FY 2014-15. Due to lack of rain, vegetation did not grow in excavated area and erosion occurred. In F Y2015-16 DWM returned to site to repair eroded areas. No further action planned.	U.S. EPA/ DWM
Pender Plating	Burgaw/ Pender	High levels of chromium in soil and groundwater in a residential area.	DWM completed assessment of contamination in FY 2011/12. U.S. EPA completed removal of contaminated materials in FY 2014-15. Post-removal sample confirmation data is pending.	DWM/U.S. EPA
Priddy Property, Winifred	Lawsonville/ Stokes	Elevated levels of trichloroethylene and other chlorinated solvents were found in drinking water wells. DWM previously installed water treatment systems on the wells at three homes. Levels of groundwater contamination warranted an evaluation for vapor intrusion potential for the homes.	DWM conducted soil gas sampling to evaluate vapor intrusion risk. Results indicated no unacceptable risk. DWM continues to maintain treatment systems on the water supply wells.	DWM
Quarterhorse Lane Property	Ocean Isle/ Brunswick	Local complaint of chemical dumping. Investigation found trash piles with concrete finishing chemicals. An oily sheen in puddles around a water supply well was also observed.	DWM attempted to gain access to site property and neighboring properties to sample water supply wells. Business and residential owners did not provide permission for access at most of the properties. Water lines have been recently installed to several residences during local upgrade to water system. DWM was granted access to one neighboring property to sample a water supply well which was found to be clean. DWM then sent letters to property owners indicating they should disclose known and/or potential contamination to potential buyers and renters.	DWM
Rhoderia Drive Wells site	Stallings/Union	During 1980s, a resident conducted a wire stripping business in their back yard and dumped used solvents. Solvents contaminated numerous drinking water wells in the surrounding neighborhood. The U.S. EPA connected homes to municipal water in the 1990s. Two irrigation wells are still present. Groundwater contamination exceeds levels that pose a potential threat for contaminated vapor to enter homes.	In FY 2015-16 DWM attempted to collect soil gas samples to evaluate the potential vapor threat to homes in the area. Due to shallow groundwater conditions, samples could not be collected. DWM instead installed monitoring wells and collected groundwater samples in the area of the homes with affected water supply wells. The results indicated the affected area was larger and that contamination in groundwater exceeded screening levels in other areas posing an indoor vapor threat. DWM then collected gas samples from 3 crawlspaces. Vapor in the crawlspaces did not exceed risk levels. Additional testing is planned for FY 2016-17 to investigate potential vapor contamination at homes near elevated groundwater detections as soon as monies are available.	DWM
Salem Uniform	Winston Salem/ Forsyth	Former auto dealership and laundromat with elevated levels of perchloroethylene in soil and groundwater on and off the property. Elevated contamination posed a contaminated vapor threat to nearby homes.	Responsible party razed building and excavated the heavily contaminated soil at the source area. Ongoing groundwater and vapor sampling conducted semiannually. Thus far, no elevated risks of indoor air contamination found. Responsible party is also performing a pilot study on the proposed contaminant remedy.	Responsible Party
Southside Road Incident	Lincolnton/ Lincoln	Residential well in a large neighborhood with perchloroethylene (PCE) above the drinking water standard. Source, magnitude and extent of groundwater contamination is unknown.	The U.S. EPA and the DWM conducted sampling of two residential wells that had previously not been sampled. One well was found to have PCE levels above the drinking water standard. Additional supply well sampling along with soil gas sampling to be conducted during the next fiscal year.	U.S. EPA/DWM
Staley PCE	Staley/ Randolph	Perchloroethylene (PCE) was detected in groundwater during an investigation of an underground storage tank release. The levels exceeded screening levels for potential vapor intrusion into nearby homes.	DWM collected soil gas samples to evaluate the potential for indoor air impacts from the PCE. Three out of five sample locations produced inadequate volume of sample due to the compactness of the soil. The remaining two samples were below screening levels for potential indoor air affects.	DWM

Stoller Chemical	Severn/ Northampton	Former fertilizer formulating company. Hazardous substances left behind after bankruptcy in decaying structures along a river segment.	DWM conducted assessment of abandoned wastes and contaminated soils at the property. The U.S. EPA conducted further assessment in FY 2013-14 and a removal action in FY 2014-15. All fertilizer/pesticide wastes were excavated, treated and properly disposed by U.S. EPA. The U.S. EPA completed all site activities in September 2015. No further action planned.	U.S. EPA/DWM
Texfi Industries	Fayetteville/ Cumberland	Chlorinated solvent groundwater contaminant plume has migrated from a former textile mill to the city of Fayetteville's water plant property. The city's finished drinking water holding tank sits in contact with contaminated groundwater. The city's drinking water intakes on the Cape Fear River are 450 feet downstream from the Texfi property line.	DWM constructed a subsurface barrier wall in 2001 to prevent further contaminant migration to the holding tank area and installed extraction wells to remove contaminated groundwater in the area of the tank. Areas with highly elevated contaminant concentrations in groundwater were treated with injection of HRC-X. Concentrations of chlorinated solvents have decreased. However, contamination found dispersed in a deeper clay layer is causing groundwater contamination to persist. The depth and low permeability of this clay layer makes source removal/treatment extremely expensive. In FY 2014-15, DWM completed removal of removed highly contaminated soils discovered in a ditch and treatment of surface water. Limited remaining bankruptcy funds remaining were used for monitoring in FY 2015-16. No significant changes to the overall status of the groundwater contaminant plume were found.	DWM
Trawick Road	Raleigh/Wake	Solvent and pesticide contamination discovered in water supply wells.	DWM provided alternate water to 3 homes through the Bernard Allen Memorial Drinking Water Fund. The U.S. EPA leading additional investigation of pesticide contamination thought to be due to historical applications for termite treatment at residences.	U.S. EPA/DWM
Twin State Battery	Newton/ Catawba	Sump containing 7,500 gallons of battery wash water in imminent state of overflow.	U.S. EPA conducted removal of wastes. Work continues under the DWM Hazardous Waste (HW) Section. Outstanding contaminant issues outside of HW Section jurisdiction exist. As a result, the site will return to DWM-Inactive Hazardous Sites Branch oversight once HW Section guidelines are satisfied.	U.S. EPA
Ulah Battery/ Battery Piles	Asheboro/ Randolph	Residential area contaminated with lead from battery casing disposal.	DWM and the U.S. EPA have conducted removal of contaminated soils. DWM conducted additional contaminated soil removal in July 2015.	DWM
Watts, Levi Property	Tabor City/ Columbus	Residential area contaminated with lead from battery casing disposal.	DWM conducted removal of contaminated soils on several properties. Removal and restoration activities completed in FY 2015-2016. No further action planned.	DWM
Wilmington Iron Works	Wilmington/ New Hanover	Strong odors and vapors thought to be turpentine were reported by area residents during new residential condo and shop construction.	DWM assessed possible sources and vapor intrusion pathways. No sources were discovered.	DWM
Woodlief Road TCE	Wake Forest/Wake	Residence with trichloroethylene in water supply well.	DWM sampled nearby water supply wells. No contamination was found in other wells. The U.S. EPA installed a treatment system on the one affected well. DWM also collected soil gas samples to investigate the potential for hazardous vapors to enter the home. The results indicated no elevated risk.	USEPA/ DWM

**VI. SUMMARY OF THE INACTIVE HAZARDOUS SITES CLEANUP FUND AND  
NATIONAL PRIORITIES LIST COST SHARE FUND**

**Inactive Hazardous Sites Cleanup Fund  
Fund 6372  
FY2015-16**

<b>Beginning Cash Balance</b>		<b>\$225,684</b>
Deposits (FY2015-16)		
Appropriations		\$400,000
No Further Action review fees		\$13,500
TSG bankruptcy		\$30,000
<b>Total Deposits</b>		<b>\$443,500</b>
Expenditures (FY2015-16)		
Orphan priority site sampling/remediation/alternate water supplies		\$529,981
<b>Total Expenditures</b>		<b>\$529,981</b>
<b>Ending Cash Balance</b>		
	<b>\$139,204</b>	
Obligations		
Orphan priority site sampling/remediation-current contract encumbrance		\$83,830
Orphan priority site sampling/remediation-planned contract encumbrance		\$13,001
Bottled water contract encumbrance		\$2,243
Laboratory contract encumbrance		\$10,130
Frye Creek Site assessment (TSG Bankruptcy Funds)		\$30,000
<b>Total Current Obligations</b>		<b>\$139,204</b>
<b>Current Effective Cash Balance</b>		
	<b>\$0</b>	<b>\$135,806</b>
<b>Orphan Cleanup Cost Requirements (see Chapter II for more details)</b>		
<b>Funds needed for 314 higher priority orphan sites identified</b>		<b>\$210,526,638</b>
<b>Funds needed for all orphan sites thus identified (360 sites)</b>		<b>\$241,368,120</b>

**Additional Funds from Bankruptcy Proceedings**

Since initiating bankruptcy recover actions, DWM has recovered more than \$18 million in funds for assessment and remediation of sites. Payments out of a bankruptcy proceeding must go into a special trust account to be used only for the specific sites identified in the bankruptcy settlement agreement. Some of the settlement funds are also held in private escrow accounts.

Funds in the amount of \$30,000 were recovered this year for the Frye Creek Site in Hickory/Catawba County as part of the division's TSG bankruptcy claim. Also in FY 2015-15

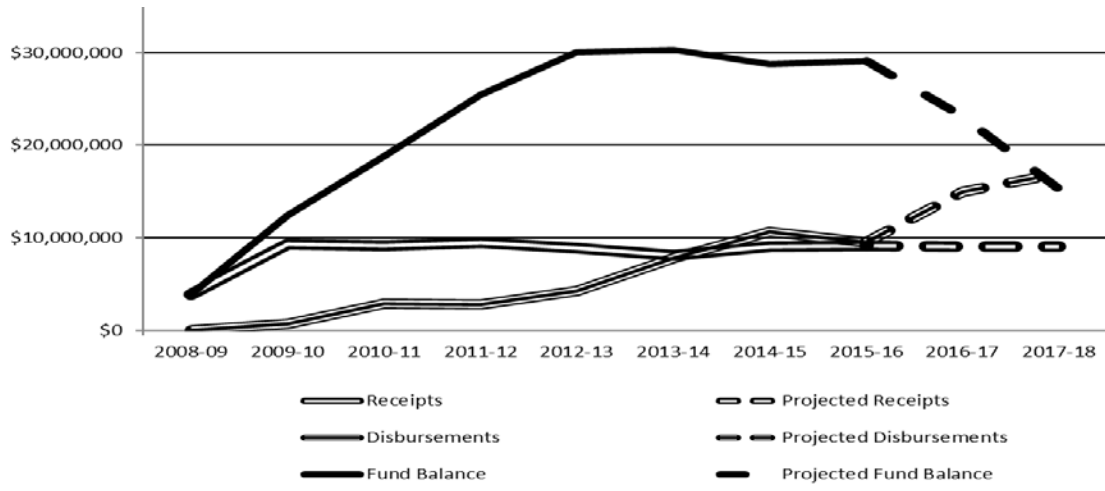

the Inactive Hazardous Sites Program has been negotiating a settlement of its claim in the Furniture Brands bankruptcy for four sites.

**Revenue Dedicated to the Pre-Regulatory Landfills  
FY 2015-16**

<b>Beginning Cash Balance</b>		<b>\$28,712,429</b>
Deposits (FY 2015-16)		
Tax (actual total income)		\$9,173,949
Administrative overcharge		
refund	\$11	
<b>Total Deposits</b>		<b>\$9,173,960</b>
Expenditures (FY 2015-16)		
Contracts		\$7,244,307
Local government reimbursement		\$147,915
Transfer to DWM Solid & Hazardous Waste Programs		\$500,00
Operating Budget:		
PRLF operating budget		\$648,546
Inactive Hazardous Sites operating		
budget	<u>\$291,376</u>	
Combined operating budget		\$939,922
<b>Total Expenditures</b>		<b>\$8,832,144</b>
<b>Ending Cash Balance</b>		<b>\$29,054,245</b>
Obligations		
Current Contract and Local Government encumbrances		\$36,257,855
Unencumbrance actions pending		-\$13,844,343
Three contracts pending signature and encumbrance		\$6,500,000
<b>Total Current</b>		
<b>Obligations</b>	<b>\$28,873,512</b>	
<b>Current Effective Cash Balance</b>		<b>\$180,733</b>

The graph below shows how expenditures will soon deplete the current surplus, which accumulated during the early years when the program was conducting mostly lower cost assessment work. Active remediation is now underway at several sites and the program's rate of disbursements is rising.

**National Priorities List Cost-Share Fund  
Fund 6375  
FY2015-16**

Estimated cost of federal trust fund/N.C. cost-share cleanups	\$119,191,674
\$89,566,598	
North Carolina's 10 percent cost-share for pending/ongoing cleanups	\$11,919,167*
Total fund disbursements for cost-share payments	\$8,879,403
Current balance	\$5,561,575
Encumbered amount of the fund balance for cost-share payments	\$3,039,764
Encumbered amount for operation and maintenance contract	\$651,579
<b>Effective Cash Balance</b>	<b>\$1,870,234*</b>

\* Cleanup cost estimates are not yet available for all sites. The cost-share figure will increase as cost estimates become available. Other sites may be added to the National Priorities List that will require a state cost-share. This account is also used to pay for the state's operation and maintenance obligations at these sites. The fund has no continuing source of income.

APPENDIX B. INACTIVE HAZARDOUS SITES INVENTORY – SITE STATUS  
N.C.G.S. 130A-310.10(a1) Supplemental Reporting

*Note: Upon discovery, sites are added to the Evaluations Pending or Pollutant Only Site-Open categories of the Inactive Hazardous Sites Inventory. As resources are available, the sites are ranked and transferred to the Sites Priority List. The Sites Priority List is used to determine the order of full-scale remedial actions at sites without responsible parties, providing funds are available. If a party volunteers to clean up a site and enters into an agreement with the DWM, the site is then transferred to the Voluntary Action category. Once cleanup is complete, the site is transferred to one of the "No Further Action" categories (NFAs). Information on contaminants and contaminated media have only been compiled for the Sites Priority List. That information can be found in Appendix A. Other information on sites activities this reporting year can be found in sections II -V of this report. Location information on the pre-1983 landfills can be found in Appendix C.*
