Teaching through Differentiation

NORTH CAROLINA VIRTUAL PUBLIC SCHOOL

"I had a call on Monday morning from a parent of an OCS student. Mom was in tears. She said her son had been kicked out of three schools prior to coming to ours and due to his Aspergers, he had never had a friend. She said he used to beg her to stay home. She would send him to school crying most days. She said he had a pretty good year last year, but this year with these online classes he loves school. He never complains about coming and for the first time in his life he has friends. She said he spent from 12:00-6:00pm on Sunday afternoon online chatting with video (that they figured out how to do themselves) with fellow classmates. She walked by his bedroom and he was laughing and having conversation with friends. She was overjoyed. This is what it is all about and I want to thank each of you for your help with this program."
