Raleigh, NC 27699-1617

Dear Sirs:

I am writing in support of the proposed rules to implement the Nutrient Strategy for Jordan Reservoir Watershed. This is an important project that will significantly improve the quality of life of the citizens of the Triad and Triangle. I am a landowner on the Haw River near Saxapahaw and can daily witness the problems that poor nutrient control create in the quality of the water in the Haw. I feel that implementation of these plans will make a significant contribution to the quality of Jordan Reservoir, the Haw River and the Haw watershed. Eventually, these improvements in the environment and water quality will represent improvements to my property and to property values in these areas.

Sincerely,

A handwritten signature in dark ink, appearing to read "James MacFall", is written over the typed name.
