- **Formula for determining the School Performance Grade:**
- 80 percent of the School Performance Grade is based on the school achievement score. The school achievement score is calculated using a composite method based on the points earned by a school on all of the tests measured for that school
- 20 percent of the School Performance Grade is based on academic growth

A+NG Schools: A+NG schools earned a score of 85-100 and do not have significant achievement or graduation gaps.

*By default, most indicators will display the top 5 performing schools within the state for the selected indicator. If a district is selected from the drop-down in the upper right, the report will display the top 5 performing schools within the selected district for the selected indicator. Once school selections are made, those selections will replace the initial schools displayed.

School Performance Grade & Score

School	School Performance Grade	School Performance Score	Growth Statu
A G Cox Middle	C	57	Did Not Meet

◁ Overall | EOG Scores ▷

School Performance Grade:

School Performance Grades were issued as required by the NC General Assembly. All public schools in North Carolina have been assigned an A through F letter grade based on achievement and growth. The achievement score is worth 80% of the school performance grade, and the growth score is worth 20% of the school performance grade. After combining these 2 values, the score is placed on the following scale:

A: 85-100 points
B: 70-84 points
C: 55-69 points
D: 40-54 points
F: Less than 40 points

Schools may be designated with an A+NG if, after being assigned an "A" using the school performance grade calculations, the school does not demonstrate significant gaps between subgroups that exceeds the state gap on achievement/graduation rates.

In the event that a school meets or exceeds growth and their final score and grade are reduced when growth is combined with achievement, growth will not be included in the final score and grade. The achievement score will be used as the final score and grade. For schools that do not meet growth, if their score and grade are reduced, growth will remain in the final score and grade calculation. For more information about the growth score, please double click in the row of the school you are interested in.

In addition to the final score and grade, schools containing any grades K-8 that administer math and English language arts/reading assessments are also given separate scores and grades based on the achievement and growth of math results and English language arts/reading results using the same formula and scale as the overall School Performance Grade.

To protect student privacy, any percentage that is greater than or equal to 95 appears as 95%, and any percentage that is less than 5% is displayed as ".".
