TASK FORCE PROCEEDINGS

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met three times from August 12, 2010 until November 16, 2010. The information below provides an overview of presentations received and issues discussed by the Task Force. Detailed minutes and copies of handouts from each meeting are on file in the Legislative Library or are available for a period of time at the Task Force website: http://www.ncleg.net/gascripts/DocumentSites/browseDocSite.asp?nID=114.

August 12, 2010

The Task Force was presented recommendations on changing the governance of the State Health Plan by two separate entities with a relationship to the Plan.

First, Navigant Consulting, a consulting firm to the State Health Plan, presented recommendations regarding the State Health Plan's governance arrangement. Navigant evaluated the Plan's governance and claims processing function under a General Assembly mandated audit. Representatives for Navigant Consulting recommended that the Plan be organizationally located under the Governor, but functionally responsible to an independent board. This independent board should be tasked with the direct authority to manage the Plan's operations. Representatives of Navigant Consulting noted that in most states, an independent board or executive branch agency or department houses the function of a public employer health benefit plan.

The second recommendation was from the State Health Plan's Board of Trustees. Dr. John Hammond, a member of the State Health Plan's current Board of Trustees, presented a recommendation to require that oversight of the Plan's day-to-day operations and appointment of the Plan's Executive Administrator fall under the responsibility of an executive agency with a reporting relationship to the Governor. The Board of Trustees also recommended that the Plan's Board of Trustees be given the responsibility to formulate policies implemented by the Plan, to conduct rule-making, and to make final agency decisions.

The balance of the meeting was devoted to discussion about the information presented to Task Force members regarding State Health Plan governance changes and ways to move forward with developing a Task Force recommendation.

<u>September 21, 2010</u>

At the request of the co-chairs in an effort to guide the Task Force discussion on governance options, Mark Trogdon, staff fiscal analyst, presented a broad overview of issues related to governance of the State Health Plan. Mr. Trogdon mentioned the following three primary areas the Task Force might wish to consider as they discuss governance options: organizational location within an Executive Branch of State

Government; the authority to appoint and remove the Plan's Executive Administrator; and the distribution of powers and duties relative to the Plan.

Mr. Trogdon reviewed the following location options for organizational placement of the State Health Plan: Office of the Governor, Cabinet agency, Council of State agency, or other location. Mr. Trogdon pointed out that Navigant Consulting, Inc. had provided the Task Force an Assessment of Compatibility of Selected State Departments, Agencies and Entities with the State Health Plan which recommended placement of the State Health Plan in the Office of the Governor. Mr. Trogdon also reminded the Task Force that during their prior meeting they received a report from the Board of Trustees recommending placement of the State Health Plan in an executive agency, but not specifying whether it should be a Cabinet or Council of State agency.

Next Mr. Trogdon reviewed a list of potential authorities to appoint or remove the Executive Administrator of the State Health Plan. The list of authorities included: the Governor; an appointed Cabinet Secretary or elected Council of State Officer; an appointed governing board; or a shared appointment/removal process.

The third area suggested for consideration by the Task Force was the powers and duties that provide the fundamental authority for operation and oversight. This summary list included the authority to: enhance or reduce benefit options; set co-pay, annual deductible and co-insurance maximum amounts; set premiums and contribution rates; negotiate and enter into contracts; fiduciary responsibility; and other broad elements key to the Plan's mission of providing health benefits to State employees and teachers. Mr. Trogdon pointed out that to operate the Plan on a daily basis, the assignment of those powers and duties must be given directly to an executive administrator, to an agency head that carries out the power and duties or delegates them, or to a governing board or authority that carries out the power and duties or delegates them.

The Task Force asked for a reminder of the State Health Plan's current organizational placement. Mr. Trogdon explained that the State Health Plan is currently placed under the executive branch but operates as an independent entity. The Plan does have a Board of Trustees vested with some powers and duties and limited governing authority. Currently, most of the powers and duties are assigned to the Plan's Executive Administrator.

Upon request, Mr. Trogdon reported that research for prior reports received by the Task Force noted that 25 states place the health plan within an executive agency, 15 states place the health plan within an executive agency with a governing advisory board, there are 8 states where the health plan operates as an independent agency with a governing board, and a couple of states where they were not able to determine placement. It was noted that a decision on organizational placement of North Carolina's State Health Plan is complex because the Plan covers employees of both Cabinet and Council of State agency employees, legislative and judicial branch employees, employees of local school systems, employees of community colleges, and

university employees. Since the Task Force had heard from the Commissioner of Insurance, the Task Force suggested that the Auditor, Commissioner of Labor, and Treasurer be asked to comment on organizational placement of the State Health Plan under their agency.

The balance of the meeting was devoted to Task Force discussion of the organizational location of the State Health Plan within an Executive Branch of State Government; the authority to appoint and remove the Plan's Executive Administrator; and the distribution of powers and duties relative to the Plan.

November 16, 2010

The Task Force was presented a draft report to the 2011 Session of the North Carolina General Assembly. Task Force members discussed changes to the report and approved the amended report.

FINDINGS AND RECOMMENDATIONS

FINDINGS:

During the 2010 Interim, the Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees examined issues related to governance of the State Health Plan. Discussions of the Task Force yielded the observations below.

- Responsibility for broad oversight of the State Health Plan should not primarily reside with the General Assembly.
- Compatibility with the mission of existing State agencies and the range of employees covered by the State Health Plan present challenges in finding a logical organizational fit of the State Health Plan within an existing State agency.
- A strong governing board may be a logical entity to provide oversight of the State
 Health Plan. Membership of a strong governing board shall include persons with
 experience in, but not limited to: health benefit financing, managing large group
 employer-sponsored health benefits plans, care quality, prevention and health
 promotion, and utilization management. The governing board shall also include
 representation from employee and retiree groups.
- The operation of the State Health Plan includes the following:
 - o Authority to enhance or reduce benefits.
 - o Authority to set co-pays, deductibles, and co-insurance maximums.
 - o Authority to set premiums.
 - o Authority to negotiate and execute contracts.
 - o Authority to act as fiduciaries to the Plan.
 - o Authority to create rules.
 - o Authority to adjudicate members' appeals.
 - o Authority to conduct strategic planning.
 - o Authority to create and implement medical policy.
- The current appointment and removal process for the Plan's Executive Administrator is unclear.
- The current plan year structure makes it difficult for employees and retirees to focus on their health and not their health care.

The Task Force acknowledges that oversight of the State Health Plan is complex because coverage includes: executive, judicial, and legislative branch employees; local school system employees; community college employees; and university employees. Additionally, similar to most health insurance providers, the State Health Plan must respond to the challenges of an older and less physically active population, increasing health care costs, and compliance with Federal law. The Task Force finds that

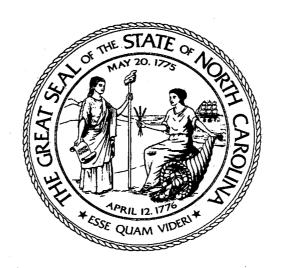

governance of the State Health Plan is a serious and substantial undertaking and must be clarified in order to effectively meet current challenges.

RECOMMENDATIONS:

The Task Force recommends that oversight of the State Health Plan be provided by the executive branch and a strong and independent governing board with broad policy making authority and also recommends that appointment and removal of the Executive Administrator be one of the duties of the governing board.

The Task Force recommends putting the State Health Plan's plan year on a calendar year basis.

TASK FORCE PROCEEDINGS

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met six times from November 11, 2009 until April 22, 2010. The Task Force heard from the individuals listed below during the specified meeting dates. Detailed minutes and copies of handouts from each meeting are on file in the Legislative Library.

November 18, 2009

- Gann Watson, staff attorney, presented to the Task Force a summary of Session Law 2009-16 (SB 287), which made significant changes to the laws governing the operation of the State Health Plan for Teachers and State Employees (State Health Plan). Ms. Watson's presentation covered the key components of the enacted legislation including additional funding appropriated to the State Health Plan, annual premium increases authorized over the 2009-11 biennium, benefit changes affecting out-of-pocket requirements for Plan members, the establishment of a Comprehensive Wellness Initiative, a directive for an operational audit of the State Health Plan's medical and drug claims processing vendors, and the authorizing language for the Blue Ribbon Task Force on the State Health Plan.
- Mark Trogdon, staff fiscal analyst, made a presentation to the Task Force entitled "Overview of the State Health Plan." Mr. Trogdon's presentation covered the State Health Plan's statutory authorization and creation, its size based on enrollment, total claims, and total revenues, benefit design, funding basis, administrative structure, Plan member eligibility guidelines, enrollment demographics, etc. His presentation also provided a financial summary of the State Health Plan including the financial impact of Session Law 2009-16, a historical summary of the State Health Plan's claims growth over time, and the State Health Plan's per capita medical costs by age bands and the percent of Plan members in each of those bands.

<u>December 2, 2009</u>

- Theresa Matula, staff legislative analyst, presented a document listing priorities developed from input provided by Task Force members during the November 18, 2009 meeting.
- Dr. Jack Walker, Executive Administrator, State Health Plan, presented an overview of the State Health Plan and the Comprehensive Wellness Initiative. The presentation included demographic data on Plan membership, statistics concerning the rationale for choosing tobacco use and body mass index (BMI) as targets for the Wellness Initiative, and information on the Comprehensive Wellness Initiative. Comprehensive Wellness Initiative information covered the following topics: employee privacy, employee benefits and support, and desired outcomes for the State Health Plan.

January 21, 2010

- Ann Rogers, Director of Integrated Health Management, State Health Plan, provided information on tobacco use testing for Plan members. Her presentation included information on the development of the Request for Proposal for a vendor to administer off-site tobacco use testing to members and to verify members' enrollment in smoking cessation programs. Ms. Rogers also reviewed the testing process, explained how members' attestation to tobacco use status will drive initial State Health Plan qualifications, and reviewed member consequences for falsifying tobacco use status.
- Dr. Jack Walker, Executive Administrator, State Health Plan, reviewed the financial requirements for the State Health Plan for the next five years. He presented information on current and projected State Health Plan revenues, member cost-sharing, projected annual increases in health costs and utilization, and State Health Plan efforts to detect and prevent fraudulent claims. Dr. Walker's presentation emphasized the importance of improving the health status of active Plan members through behavior management, case management, and disease management, in order to achieve savings and lower the cost trend.
- Lacey Barnes, Deputy Executive Administrator, State Health Plan, provided follow-up information on select inquiries by Task Force Members which included the reduction in cost savings if individual members, rather than entire family units, are moved to the 70/30 State Health Plan; and reasons Plan members are electing to terminate dependent coverage under the State Health Plan.
- Carol Durrell, Director of Product Development, State Health Plan, provided an outline, timeline, and costs for planned actuarial studies to be performed by Aon Consulting in 2010 to address Task Force requests, responses to questions from the Legislative Oversight Committee and constituents, and State Health Plan requirements. Ms. Durrell discussed the Cost Comparison study of State Health Plan benefit options in Georgia, Virginia and Tennessee (which should be available in mid February) and the study concerning Other Post-Employment Benefits like retiree benefits.

February 25, 2010

- Carol Durrell, Director of Product Development, State Health Plan, presented details of our State Health Plan in comparison to the state health plans of Georgia, Virginia, and Tennessee. Ms. Durrell highlighted differences and similarities in state health plan benefits, premium costs, subsidization of dependent care premiums, and other aspects of operations.
- Ann Rogers, Director of Integrated Health Management, State Health Plan, discussed
 the extension of a nutritional visit benefit to all Plan members (previously available only
 to Plan members with diabetes). She noted that for provision of this benefit the State
 Health Plan has contracted for participation in the Eat Smart, Move More, Weigh Less
 program.
- Dr. Derek Prentice, Consulting Medical Director, State Health Plan, discussed a range of issues related to medications prescribed to members participating in State Health Plan weight loss programs.

March 25, 2010

- Chris Schoffner, Managing Partner, White Bear Group, an employee benefit consulting firm, discussed methods of changing member behavior to create savings for the State Health Plan. Mr. Schoffner presented information on the success of the Ashville Project. In the Ashville Project, diabetic employees received support and guidance from counselors, physicians, and pharmacists all working together, and employees received preventive care without any out-of-pocket costs. Mr. Schoffner recommended the following main steps:
 - 1. Identify employees with needs via Health Fairs.
 - 2. Engage beyond the chronically ill; remove barriers to treatment.
 - 3. Educate through face to face coaching.
 - 4. Communicate at all steps to allow all to get information.
- Mark Ruby, Vice President for Business Development, BioSignia, a healthcare risk assessment company located in Research Triangle Park., presented information on BioSignia's "Know You Number" product. BioSignia uses data analysis of large populations and individual test results to help participants better understand their personal health risks. According to Mr. Ruby, the State Health Plan could save \$124 million over five years by screening 300,000 Plan members twice a year for five years.
- Victoria Simmons, Task Force member, provided copies of pay slips for several Guilford County School employees and discussed the importance of the "promise" of affordable health care from the State to its employees. The Task Force discussed the "promise" of health care at no cost and whether employees would be willing to pay a member contribution based on a percentage of their salaries.
- Representative Folwell, Task Force member, advocated the use of a calendar year, rather than State's fiscal year, for the State Health Plan. He cited broad support for the change among various State employee organizations and the use of a calendar year by 24 other states. Although there would be a one-time cost of \$25 millions and a six month moratorium on rate increases, Rep. Folwell requested that the Task Force endorse the idea in order to facilitate health insurance planning by families with non-State Health Plan options.

April 22, 2010

- Jack Walker, Executive Administrator, State Health Plan, presented information concerning the impact on the State Health Plan of the following federal health reform Acts: Patient Protection and Affordable Care Act (HR 3590), and the Health Care and Education Affordability Act of 2010 (HR 4872).
- The Task Force received a draft report to be presented to the 2010 General Assembly, the Governor, and the Committee on Employee Hospital and Medical Benefits. The Task Force approved the report.

FINDINGS AND RECOMMENDATIONS

FINDINGS:

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met six times prior to the convening of the 2010 short session. During these meetings Task Force members received an overview of the State Health Plan, the State Health Plan's Comprehensive Wellness Initiative, and information on issues that will impact the State Health Plan in the future. Members were also apprised of the study issues identified in the legislation creating the Task Force and prioritized the study of these issues. The Task Force explored a number of concerns regarding the State Health Plan and found there is a good bit of information that, although not immediately available, will be forthcoming during the tenure of the Task Force and following adjournment of the 2010 short session. In the coming months, the Task Force anticipates receiving the following reports: Consumer Directed Health Care, Medicare Products and Strategy, Dependent Subsidy including Salary Based Premium Structure, and an Audit of the State Health Plan.

RECOMMENDATION:

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees recommends that the General Assembly continue addressing State Health Plan issues during the 2010 Session and that the Task Force resume its work after adjournment of the 2010 Session and develop a report to the 2011 General Assembly.

GENERAL ASSEMBLY OF NORTH CAROLINA SESSION 2009

SESSION LAW 2009-16 SENATE BILL 287

AN ACT TO APPROPRIATE FUNDS FOR THE STATE HEALTH PLAN FOR TEACHERS AND STATE EMPLOYEES AND TO MAKE OTHER CHANGES RELATED TO THE STATE HEALTH PLAN.

Whereas, the General Assembly must act quickly and prudently to maintain a financially stable State Health Plan to ensure that all members of the Plan have affordable access to medically necessary health benefits and services within available resources; and

Whereas, in order to meet current fiscal obligations, the General Assembly must appropriate \$250,000,000 for the 2008-2009 fiscal year to cover the current year shortfall in funds; and

Whereas, estimates indicate that a substantially larger appropriation will be necessary to maintain the fiscal integrity of the Plan in the next and ensuing fiscal periods; and

Whereas, in order to ensure continued access to medically necessary health care to Plan members, the Plan must implement measures to contain costs through premium increases, benefit changes, and healthy lifestyle programs that not only reduce costs but improve member health: and

Whereas, the Plan estimates that over 70,000 Plan members use tobacco, resulting in a cost to the Plan of \$2,000 per member per year more than the cost of providing coverage for nonusers of tobacco; and

Whereas, cessation of tobacco use has been demonstrated to result in improved member health and substantial savings in health care costs making it fiscally prudent to implement smoking cessation incentives and initiatives with mechanisms to verify member compliance with smoking cessation requirements; and

Whereas, over 60% of North Carolina adults are obese or overweight; and

Whereas, obesity is linked to an over 37% increase in health care spending at a cost of \$2,445 per member per year; and

Whereas, weight management and cessation of tobacco use have been demonstrated to result in improved member health and substantial savings in health care costs making it fiscally prudent to implement smoking cessation and weight management incentives and initiatives with mechanisms to verify member compliance with smoking cessation and weight management requirements; Now, therefore,

The General Assembly of North Carolina enacts:

PART ONE: APPROPRIATIONS, DEFINITIONS, AND SCOPE.

SECTION 1.(a) Appropriation for 2008-2009 Fiscal Year. – There is appropriated from the Savings Reserve Account established in G.S. 143C-4-2 to the Health Benefit Reserve Fund established in G.S. 135-44.5 the sum of two hundred fifty million dollars (\$250,000,000) for the 2008-2009 fiscal year. These funds shall be used to address the shortfall in funds available for the payment of health care and administrative costs under the State Health Plan for Teachers and State Employees ("Plan") for the 2008-2009 fiscal year.

SECTION 1.(b) General Fund Appropriation for 2009-2011 Fiscal Biennium. – Notwithstanding G.S. 143C-5-2, there is appropriated from the General Fund to the Reserve for the State Health Plan in the Office of State Budget and Management the sum of one hundred thirty-two million two hundred fourteen thousand seven hundred fifty-two dollars (\$132,214,752) for the 2009-2010 fiscal year and the sum of two hundred seventy-six million one hundred seventy-nine thousand seven hundred nine dollars (\$276,179,709) for the 2010-2011 fiscal year. These funds shall be used to cover health care and administrative costs to the Plan in the 2009-2011 fiscal biennium.

SECTION 1.(c) Highway Fund Appropriation for the 2009-2011 Fiscal Biennium. – Notwithstanding G.S. 143C-5-2, there is appropriated from the Highway Fund to the Reserve for the State Health Plan in the Office of State Budget and Management the sum of six million one hundred seventy thousand twenty-two dollars (\$6,170,022) for the 2009-2010 fiscal year and the sum of twelve million eight hundred eighty-eight thousand three hundred eighty-six dollars (\$12,888,386) for the 2010-2011 fiscal year. These funds shall be used to cover health care and administrative costs to the Plan in the 2009-2011 fiscal biennium.

SECTION 1.(d) All other agency funds required to fund the premium increase enacted in this act, other than funds appropriated in subsections (b) and (c) of this section, are appropriated for the 2009-2011 fiscal biennium.

SECTION 1.(e) Definitions. – As used in this act unless the context clearly requires otherwise:

(1) "Plan." – The State Health Plan for Teachers and State Employees.

(2) "Basic Plan." – The Plan's PPO option providing for 70/30 in-network coverage after deductibles and co-payments.

"Smoking" or "Smoking cessation." – Includes cessation of the use of all tobacco products.

(4) "Standard Plan." – The Plan's PPO option providing for 80/20 in-network coverage after deductibles and co-payments.

SECTION 1.(f) Scope. – In the event of a conflict between the provisions of this act and Article 3A of Chapter 135 of the General Statutes, this act prevails.

PART TWO: HEALTH BENEFIT CHANGES.

SECTION 2.(a) Eliminate PPO Plus Option. – Effective July 1, 2009, the PPO Plus option (90/10 in-network coverage) under the State Health Plan for Teachers and State Employees ("Plan") is eliminated. The Executive Administrator shall provide notice to all members of the Plan that this option will no longer be available as of July 1, 2009. Employees enrolled in the Plan's Plus option shall have the choice of enrolling in the Basic or Standard Plan options for the 2009-2010 benefit year.

SECTION 2.(b) Implement Comprehensive Wellness Initiative.

- (1) Program development. The Plan shall develop a Comprehensive Wellness Initiative that includes a focus on smoking cessation and weight management and that is designed to be implemented effective July 1, 2010, for smoking cessation and July 1, 2011, for weight management. Benefit levels shall be determined by the Plan based upon tobacco use or the inability of the member to meet national, evidence-based healthy weight clinical guidelines. For purposes of the Comprehensive Wellness Initiative, "member" includes all State Health Plan primary subscribers and their covered dependents. The Plan shall develop a process whereby a Plan member may appeal the Plan's basis for action it takes due to the member's failure or refusal to comply with the Plan's smoking cessation or weight management requirements.
- Smoking cessation. Effective July 1, 2010, all members of the Plan who do (2)not have Medicare as their primary coverage shall be enrolled in the Basic Plan under the Plan's PPO unless the subscriber can attest that the subscriber or any qualifying dependent does not smoke or otherwise use tobacco products. The Plan shall develop a mechanism for verifying that the member does not smoke or use other tobacco products. Tobacco use will be reassessed annually at the time of Plan enrollment. All subscribers who have attested that neither they nor their dependents use tobacco, or whose physician certifies in writing that the member is participating in a smoking cessation program, shall have the choice of remaining in the Basic Plan option or enrolling in the Standard Plan option. For purposes of the smoking cessation initiative, "member" includes all members covered under the Plan. As used in this section, "smoking cessation program" means active participation in a Plan-approved cessation program to include counseling or use of tobacco cessation medications.
- (3) Weight management. Effective July 1, 2011, all members of the Plan who do not have Medicare as their primary coverage shall be enrolled in the Basic Plan under the Plan's PPO Plan unless the subscriber attests that the

weight and height ratio of the member is within a range determined by the Plan based on evidence-based healthy weight clinical guidelines, or unless the member's physician certifies in writing that the member has a medical condition that prevents the attainment of the specified weight range or that the member is actively participating in a Plan-approved weight management program. In either case, the member shall have the option to enroll in the Basic or Standard Plan.

Not later than October 1, 2009, the Executive Administrator shall inform Plan members of the healthy lifestyle initiatives, requirements for compliance, and consequences of noncompliance. The Executive Administrator shall provide to members education and training to assist members in complying with healthy lifestyle initiatives. The Executive Administrator may implement incentive initiatives to further encourage member achievement in smoking cessation, weight management, and other integrated health management programs.

The Executive Administrator shall report to the Committee on Employee Hospital and Medical Benefits recommendations the Plan may have for additional sanctions that may be imposed when the Executive Administrator finds that a member intentionally makes a false statement on a Plan document.

SECTION 2.(c) Prescription Drug Co-Payments. - G.S. 135-45.6(b) reads as rewritten:

"(b) Prescription Drugs. – The Plan's allowable charges for prescription legend drugs to be used outside of a hospital or skilled nursing facility shall be as determined by the Plan's Executive Administrator and Board of Trustees, which determinations are not subject to appeal under Article 3 of Chapter 150B of the General Statutes. Co-payments and other allowable

charges or coverage for prescription drugs shall be as follows:

- The Plan will pay allowable charges for each outpatient prescription drug less a copayment to be paid by each covered individual equal to the following amounts: pharmacy charges up to ten dollars (\$10.00) for each generic prescription, thirty dollars (\$30.00) thirty-five dollars (\$35.00) for each preferred branded prescription without a generic equivalent, and forty dollars (\$40.00) for each preferred branded prescription with a generic equivalent drug, and fifty dollars (\$50.00) fifty-five dollars (\$55.00) for each nonpreferred branded or generic prescription. For each branded prescription drug with a generic equivalent drug, the member shall pay the generic co-payment plus the difference between the Plan's gross allowed cost for the generic prescription and the Plan's cost for the branded prescription drug.
- **(2)** The Plan shall provide coverage of nonacute specialty medications, excluding cancer medications, under the Plan's pharmacy benefit through a specialty pharmacy vendor under contract with the Plan. The Plan may transfer coverage of specified specialty disease medications covered under the Plan's medical benefit to the contracted specialty pharmacy vendor. Specialty medications are covered biotech medications and other medications designated and classified by the Plan as specialty medications that are significantly more expensive than alternative drugs or therapies. Medications classified by the Plan as specialty medications shall meet all of the following conditions:
 - Have unique uses for the treatment of complex diseases.

Require special dosing or administration. <u>b.</u>

<u>c.</u> <u>d.</u> Require special handling.

Are typically prescribed by a specialist provider.

Exceed four hundred dollars (\$400.00) cost to the Plan per prescription.

The Plan shall impose a co-payment in the amount of twenty-five percent (25%) of the Plan's gross allowed cost of the specialty drug not to exceed one hundred dollars (\$100.00) per prescription per 30-day supply.

(3) The Plan may exclude coverage of drugs that have therapeutic equivalents, as defined by the U.S. Food and Drug Administration, that are available over the counter. Before excluding coverage under this subdivision, the Plan shall consult with the Plan's Pharmacy and Therapeutics Committee.

These co-paymentsapply to all optional alternative plans available under the Plan.

(4) Allowable charges shall not be greater than a pharmacy's usual and customary charge to the general public for a particular prescription. Prescriptions shall be for no more than a 34-day 30-day supply for the purposes of the copayments paid by each covered individual. By accepting the copayments and any remaining allowable charges provided by this subsection, pharmacies shall not balance bill an individual covered by the Plan. A prescription legend drug is defined as an article the label of which, under the Federal Food, Drug, and Cosmetic Act, is required to bear the legend: "Caution: Federal Law Prohibits Dispensing Without Prescription." Such articles may not be sold to or purchased by the public without a prescription order. Benefits are provided for insulin even though a prescription is not required. The Plan may use a pharmacy benefit manager to help manage the Plan's outpatient prescription drug coverage. In managing the Plan's outpatient prescription drug benefits, the Plan and its pharmacy benefit manager shall not provide coverage for sexual dysfunction, growth hormone, antiwrinkle, weight loss, and hair growth drugs unless such coverage is medically necessary to the health of the member. The Plan and its pharmacy benefit manager shall not provide coverage for growth hormone and weight loss drugs and antifungal drugs for the treatment of nail fungus and botulinium toxin without approval in advance by the pharmacy benefit manager. The Plan may adopt utilization management procedures for certain drugs, but in no event shall the Plan provide coverage for sexual dysfunction or hair growth drugs or nonmedically necessary drugs used for cosmetic purposes. Any formulary used by the Plan's Executive Administrator and pharmacy benefit manager shall be an open formulary. Plan members shall not be assessed more than two thousand five hundred dollars (\$2,500) per person per fiscal year in copayments required by this subsection. The Plan's Pharmacy Benefit Manager, or any pharmacy or vendor participating in the Plan shall charge the Plan for any prescription legend drug dispensed under the Plan's pharmacy benefit based upon the original National Drug Code (NDC) as established by the manufacturer of the prescription legend drug and published by the United States Food and Drug Administration.

Co-payments and other allowable charges under this subsection shall be the lesser of the Plan's discounted cost of the drug or the co-payment amount or allowable charge and apply to

all optional alternative plans available under the Plan."

SECTION 2.(d) Routine Eye Examinations Not Covered. – Effective January 1, 2010, G.S. 135-45.8(13) reads as rewritten:

"§ 135-45.8. General limitations and exclusions.

The following shall in no event be considered covered expenses nor will benefits described in G.S. 135-45.6 through G.S. 135-45.11 be payable for:

(13) Charges for <u>routine eye examinations</u>, eyeglasses or other corrective lenses (except for cataract lenses certified as medically necessary for aphakia persons) and hearing aids or examinations for the prescription or fitting thereof."

SECTION 2.(e) Deductible and Co-Payment Changes. – Effective July 1, 2009, the Executive Administrator shall make the following changes to deductibles, coinsurance maximums, and co-payments under the Basic and Standard PPO Plans:

(1) Basic plan (70/30):

- a. Increase the in-network annual deductible to eight hundred dollars (\$800.00) for member-only coverage and to one thousand six hundred dollars (\$1,600) for the out-of-network annual deductible for member-only coverage.
 - The aggregate maximum annual deductible for employee-child and employee-family coverage shall be three times the member-only annual deductibles.
- b. Increase the in-network coinsurance maximum to three thousand two hundred fifty dollars (\$3,250) for member-only coverage and to six

- thousand five hundred dollars (\$6,500) for member-only out-of-network maximum coinsurance. The aggregate maximum coinsurance for employee-child and employee-family coverage shall be three times the member-only coinsurance maximums.
- c. Increase the in-network primary care co-payment to thirty dollars (\$30.00) per covered individual.
- d. Increase the in-network specialist co-payment to seventy dollars (\$70.00) per covered individual, except that for mental health and substance abuse services, chiropractic services, and physical therapy, occupational therapy, and speech therapy services, the in-network specialist co-payment shall be fifty-five dollars (\$55.00) per covered individual.
- e. Increase the in-network and out-of-network inpatient co-payment to two hundred fifty dollars (\$250.00) per covered individual.
- f. Increase prescription drug co-pays as required under G.S. 135-45.6(b) as enacted by this act.
- g. Except as otherwise provided in this act, co-payments and coinsurance for coverage not otherwise listed in this subdivision shall remain as applicable in the 2008-2009 benefit year.
- (2) Standard Plan (80/20):
 - a. Increase the in-network annual deductible to six hundred dollars (\$600.00) for member-only coverage and to one thousand two hundred dollars (\$1,200) for the member-only out-of-network annual deductible.
 - The aggregate maximum annual deductible for employee-child and employee-family coverage shall be three times the member-only annual deductibles.
 - b. Increase the in-network coinsurance maximum to two thousand seven hundred fifty dollars (\$2,750) for member-only coverage and to five thousand five hundred dollars (\$5,500) for member-only out-of-network maximum coinsurance. The aggregate maximum coinsurance for employee-child and employee-family coverage shall be three times the member-only coinsurance maximums.
 - c. Increase the in-network urgent care co-payment to seventy-five dollars (\$75.00) per covered individual.
 - d. Increase the in-network primary care co-payment to twenty-five dollars (\$25.00) per covered individual.
 - e. Increase the in-network specialist co-payment to sixty dollars (\$60.00) per covered individual, except that for mental health and substance abuse services, chiropractic services, and physical therapy, occupational therapy, and speech therapy services, the in-network specialist co-payment shall be forty-five dollars (\$45.00) per covered individual.
 - f. Increase the in-network and out-of-network inpatient co-payment to two hundred dollars (\$200.00) per covered individual.
 - g. Increase prescription drug co-pays as required under G.S. 135-45.6(b) as enacted by this act.
 - h. Except as otherwise provided in this act, co-payments and coinsurance for coverage not otherwise listed in this subdivision shall remain as applicable in the 2008-2009 benefit year.

SECTION 2.(f) Limitation on Authority to Change Benefits. – G.S. 135-45(g) reads as rewritten:

"(g) The Executive Administrator and Board of Trustees shall not change the Plan's comprehensive health benefit coverage, co-payments, deductibles, out-of-pocket expenditures, and lifetime maximums in effect on July 1, 2008, July 1, 2009, or a later act of the General Assembly, that would result in a net increased cost to the Plan or in a reduction in benefits to Plan members as a whole unless and until the proposed changes are directed to be made in an act of the General Assembly."

SECTION 2.(g) Premium Increases. – Premium rates for contributory coverage established in accordance with G.S. 135-44.6 shall be increased to eight and nine-tenths percent (8.9%) for contributory coverage for the 2009-2010 fiscal year and shall be increased by an additional eight and nine-tenths percent (8.9%) over the premium rate for contributory coverage for the 2010-2011 fiscal year.

SECTION 2.(h) Pharmacy Benefit Savings. – The Plan shall direct its pharmacy benefit manager (PBM), within the terms of the Plan's PBM contract, to achieve the sum of eighteen million dollars (\$18,000,000) in savings in pharmacy benefit costs in the 2009-2010 fiscal year, and the sum of twenty million dollars (\$20,000,000) in savings in pharmacy benefit costs in the 2010-2011 fiscal year through reduced reimbursements paid to pharmacies for prescription drugs. If the savings achieved in each six-month period of the fiscal year do not exceed one hundred five percent (105%) of the savings amount specified in this section for that fiscal year, there shall be no further adjustment to reimbursements paid to pharmacies for that six-month period. If the total savings achieved, by fiscal year, exceeds one hundred five percent (105%) of the specified savings amount in each six-month period of the fiscal year, the Plan shall adjust pharmacy reimbursement reductions accordingly. The Plan shall review savings achieved twice annually to ensure compliance with this section. The Plan shall calculate the savings to be achieved based on Plan enrollment and estimated cost and utilization trends incorporated in the Plan's Financial Projections as of March 20, 2009. The total savings by fiscal year achieved in this section may be increased or decreased without adjustment based on a change in total enrollment provided that the rate of savings achieved on a per-member permonth basis remains constant. Not later than 60 days immediately following each six-month period, the Plan shall report the amount of savings achieved and any adjustments made for that period to the Committee on Employee Hospital and Medical Benefits.

PART THREE: ELIGIBILITY CLARIFICATION.

SECTION 3.(a) Dependent Child Clarifications. – G.S. 135-45.1(10) reads as rewritten:

"(10) Dependent child. – A natural, legally adopted, or foster child or children of the employee and or spouse, unmarried, up to the first of the month following his or her 19th birthday, whether or not the child is living with the employee, as long as the employee is legally responsible for such child's maintenance and support. Dependent child also includes a stepchild of the member who is married to the stepchild's natural parent. To be eligible, the stepchild must have his or her primary residence with the member. Dependent child shall also include any child under age 19 who has reached his or her 18th birthday, provided the employee was legally responsible for such child's maintenance and support on his or her 18th birthday. Dependent children of firefighters, rescue squad workers, and members of the national guard are subject to the same terms and conditions as are other dependent children covered by this subdivision. Eligibility of dependent children is subject to the requirements of G.S. 135-45.2(d). The Plan may require documentation from the member confirming a child's eligibility to be covered as the member's dependent."

SECTION 3.(b) Eligibility of Full-Time Students. – G.S. 135-45.2(d) reads as

rewritten:

"(d) A foster child is covered as a dependent child (i) if living in a regular parent-child relationship with the expectation that the employee will continue to rear the child into adulthood, (ii) if at the time of enrollment, or at the time a foster child relationship is established, whichever occurs first, the employee applies for coverage for such child and submits evidence of a bona fide foster child relationship, identifying the foster child by name and setting forth all relevant aspects of the relationship, (iii) if the claims processor accepts the foster child as a participant through a separate written document identifying the foster child by name and specifically recognizing the foster child relationship, and (iv) if at the time a claim is incurred, the foster child relationship, as identified by the employee, continues to exist. Children placed in a home by a welfare agency which obtains control of, and provides for maintenance of the child, are not eligible participants.

Coverage of a dependent child may be extended beyond the 19th birthday under the following conditions:

Page 6 Session Law 2009-16 SL2009-0016

- (1) If the dependent is a full-time student, aged 19 years and one month through the end of the month following the student's 26th birthday, birthday. As used in this section, a full-time student is a student who is pursuing a course of study that represents at least the normal workload of a full-time student at a school or college accredited by the state of jurisdiction. In accordance with applicable federal law, coverage of a full-time student that loses full-time status due to illness may be extended for one year from the effective date of the loss of full-time status provided that the student was enrolled at the time of the onset of the illness.
- The dependent is physically or mentally incapacitated to the extent that he or she is incapable of earning a living and (i) such handicap developed or began to develop before the dependent's 19th birthday, or (ii) such handicap developed or began to develop before the dependent's 26th birthday if the dependent was covered by the Plan in accordance with G.S. 135-45.2(5)a."

SECTION 3.(c) Waiting Periods Subject to Federal Law. – G.S. 135-45.3(b) reads as rewritten:

"(b) Newly Except as otherwise required by applicable federal law, newly acquired dependents (spouse/child) enrolled within 30 days of becoming an eligible dependent will not be subject to the 12-month waiting period for preexisting conditions. A dependent can become qualified due to marriage, adoption, entering a foster child relationship, due to the divorce of a dependent child or the death of the spouse of a dependent child, and at the beginning of each legislative session (applies only to enrolled legislators). Effective date for newly acquired dependents if application was made within the 30 days can be the first day of the following month. Effective date for an adopted child can be date of adoption, or date of placement in the adoptive parents' home, or the first of the month following the date of adoption or placement. Firefighters, rescue squad workers, and members of the national guard, and their eligible dependents, are subject to the same terms and conditions as are new employees and their dependents covered by this subdivision. Enrollments in these circumstances must occur within 30 days of eligibility to enroll."

SECTION 3.(d) G.S. 135-45.4(b)(5) reads as rewritten:

"(5) To administer the 12-month waiting period for preexisting conditions under this that Article, the Plan must give credit against the 12-month period for the time a person was covered under a previous plan if the previous plan's coverage was continuous to a date not more than 63 days before the effective date of coverage. As used in this subdivision, a "previous plan" means any policy, certificate, contract, or any other arrangement provided by any accident and health insurer, any hospital or medical service corporation, any health maintenance organization, any preferred provider organization, any multiple employer welfare arrangement, any self-insured health benefit arrangement, any governmental health benefit or health care plan or program, or any other health benefit arrangement. Waiting periods for preexisting conditions administered under this Article are subject to applicable federal law."

SECTION 3.(e) Eligibility Audit. – The Executive Administrator shall provide for an audit of dependent eligibility under the Plan. The audit shall be designed to determine whether all dependents currently covered under the Plan are eligible for coverage under current law. Upon identification of an individual who is enrolled as a dependent but not eligible, the Plan shall disenroll the ineligible dependent effective within 10 days of sending written termination notice to the employee. The notice shall state the date upon which disenrollment will become effective and the basis on which the determination of dependent ineligibility is made. Notwithstanding any other provision of law, the Executive Administrator may waive requirements to collect from the member reimbursement for claims paid for the ineligible covered individual.

SECTION 3.(f) Cessation of Coverage of Ineligible Individuals. – G.S. 135-45.12 is amended by adding the following new subdivision to read:

"(8) The last day of the month in which a covered individual is found to be ineligible for coverage."

SECTION 3.(g) Documentation of Dependent Eligibility. – G.S. 135-45.3 is amended by adding the following new subsection to read:

"(c) When an eligible or enrolled member applies to enroll the member's eligible dependent child or spouse, the member shall provide the documentation required by the Plan to verify the dependent's eligibility for coverage."

PART FOUR: NC HEALTH CHOICE CHANGES.

SECTION 4.(a) Over-the-Counter Medications. – Coverage of over-the-counter medication authorized under G.S. 108A-70.21(d) for the NC Health Choice Program shall become effective on the later of July 1, 2010, or the date upon which the Department of Health and Human Services assumes full responsibility for administration and processing of claims under the NC Health Choice Program.

SECTION 4.(b) Subrogation. – For the period authorized under subsection (a) of this section, the right of subrogation under G.S. 108A-57 applies to the State Health Plan for payments made by the Plan under the NC Health Choice Program. This subsection expires on the later of July 1, 2010, or the date upon which the Department of Health and Human Services assumes full responsibility for administration, processing, and payment of claims under the NC Health Choice Program.

SECTION 4.(c) DHHS Subrogation Under NC Health Choice. – G.S. 108A-57 is

amended by adding the following new subsection to read:

"(c) This section applies to the administration of and claims payments made by the Department of Health and Human Services under the NC Health Choice Program established under Part 8 of this Article."

SECTION 4.(d) G.S. 108A-70.21(g) reads as rewritten:

"(g) Purchase of Extended Coverage. – An enrollee in the Program who loses eligibility due to an increase in family income above two hundred fifty percent (250%)percent (200%) of the federal poverty level and up to and including two hundred seventy-five percent (275%) twenty-five percent (225%) of the federal poverty level may purchase at full premium cost continued coverage under the Program for a period not to exceed one year beginning on the date the enrollee becomes ineligible under the income requirements for the Program. The benefits, copayments, and other conditions of enrollment under the Program applicable to extended coverage purchased under this subsection shall be the same as those applicable to an NC Kids' Care enrollee whose family income equals two hundred fifty percent (250%) percent (200%) of the federal poverty level."

PART FIVE: OTHER CHANGES.

SECTION 5.(a) G.S. 135-45.4(b)(2) reads as rewritten:

"(2) Employees not enrolling or not adding dependents when first eligible may enroll later on the first of any following month, but will be subject to a twelve-month waiting period for preexisting conditions except as provided in subdivision (a)(3) of this section. The waiting period under this subdivision is subject to applicable federal law."

SECTION 5.(b) Powers and Duties of Executive Administrator. – G.S. 135-44.4 is

amended by adding the following new subdivisions to read:

- "(13a) The Plan and its pharmacy benefit manager may implement and administer pharmacy and medical utilization management programs and programs to detect and address utilization abuse of benefits.
- (29) For transplant and bariatric medical procedures, the Plan may restrict coverage to certain in-network providers that are designated by the Plan's Claims Processing Contractor.
- The Executive Administrator shall ensure provisions in contracts between the Plan and the Plan's Claims Processing Contractor that call for the Plan to contract with an independent auditor, selected by the Plan, to review the Claims Processing Contractor's administrative costs and services to the Plan by the Claim's Processing Contractor.
- The Plan shall conduct a monthly review of Plan costs as compared to the same month in the immediately preceding year and a comparison of projected costs and savings to actual costs and savings. The Plan shall report the results of the review to the Committee on Employee Hospital and Medical Benefits and the State Health Plan Blue Ribbon Task Force at least semiannually."

SECTION 5.(c) G.S. 135-44.1(b) reads as rewritten:

"(b) Six A majority of the members of the Board of Trustees in office shall constitute a quorum. Decisions of the Board of Trustees shall be made by a majority vote of the Trustees present, except as otherwise provided in this Part."

SECTION 5.(d) G.S. 135-45.9(b) reads as rewritten:

- "(b) Notwithstanding any other provision of this Part, the following necessary services for the care and treatment of chemical dependency and mental illness shall be covered as provided in this section: allowable institutional and professional charges for inpatient care, outpatient care, intensive outpatient program services, partial hospitalization treatment, and residential care and treatment:
 - (1) For mental illness treatment:
 - a. Licensed psychiatric hospitals; hospitals or State psychiatric hospitals accredited by the Joint Commission on the Accreditation of Healthcare Organizations;

b. Licensed psychiatric beds in licensed general hospitals;

- c. Licensed residential treatment facilities that have 24-hour on-site care provided by a registered nurse who is physically located at the facility at all times and that hold current accreditation by a national accrediting body approved by the Plan's mental health case manager;
- d. Area Mental Health, Developmental Disabilities, and Substance Abuse Authorities or County Programs in accordance with G.S. 122C-141:
- e. Licensed intensive outpatient treatment programs; and

f. Licensed partial hospitalization programs.

(2) For chemical dependency treatment:

 Licensed chemical dependency units in licensed psychiatric hospitals; hospitals or in State psychiatric hospitals accredited by the Joint Commission on the Accreditation of Healthcare Organizations;

b. Licensed chemical dependency hospitals;

c. Licensed chemical dependency treatment facilities;

- d. Area Mental Health, Developmental Disabilities, and Substance Abuse Authorities or County Programs in accordance with G.S. 122C-141;
- e. Licensed intensive outpatient treatment programs;
- f. Licensed partial hospitalization programs; and

g. Medical detoxification facilities or units."

SECTION 5.(e) Section 28.22A(k) of S.L. 2007-323 reads as rewritten:

"SECTION 28.22A.(k) Subsection (j) of this section expires June 30, 2009. June 30, 2011."

SECTION 5.(f) G.S. 135-43(b) reads as rewritten:

"(b) Notwithstanding the provisions of this Article, the Executive Administrator and Board of Trustees of the State Health Plan for Teachers and State Employees may contract with providers of institutional and professional medical care and services to establish preferred provider networks.

The terms pertaining to reimbursement rates or other terms of consideration of any contract between hospitals, hospital authorities, doctors, or other medical providers, or a pharmacy benefit manager and the Plan, or contracts pertaining to the provision of any medical benefit offered under the Plan, including its optional alternative comprehensive benefit plans, and programs available under the optional alternative plans, shall not be a public record under Chapter 132 of the General Statutes for a period of 30 months after the date of the expiration of the contract. The terms of a contract between the Plan and its third party administrator or between the Plan and its pharmacy benefit manager are a public record except that the terms in those contracts that contain trade secrets or proprietary or competitive information are not a public record under Chapter 132 of the General Statutes, and any such proprietary or competitive information and trade secrets contained in the contract shall be redacted by the Plan prior to making it available to the public. Provided, however, nothing in this subsection shall be deemed to This subsection shall not be construed to prevent or restrict the release of any information made not a public record under this subsection to the State Auditor, the Attorney General, the Director of the State Budget, the Plan's Executive Administrator, the Department of Health and Human Services solely for the purpose of implementing the transition of NC

Health Choice from the Plan to the Department of Health and Human Services, and the Committee on Employee Hospital and Medical Benefits solely and exclusively for their use in the furtherance of their duties and responsibilities, responsibilities, and to the Department of Health and Human Services solely for the purpose of implementing the transition of NC Health Choice from the Plan to the Department of Health and Human Services. The design, adoption, and implementation of the preferred provider contracts, networks, and optional alternative comprehensive health benefit plans, and programs available under the optional alternative plans, as authorized under G.S. 135-45 are not subject to the requirements of Article 3 of Chapter 143 of the General Statutes. The Executive Administrator and Board of Trustees shall make reports as requested to the President of the Senate, the President Pro Tempore of the Senate, the Speaker of the House of Representatives, and the Committee on Employee Hospital and Medical Benefits."

SECTION 5.(g) The Executive Administrator of the Plan shall include in the development of its Request for Proposal (RFP) for an independent audit of the Plan, an audit of claims paid by the State Health Plan for Teachers and State Employees. One purpose of the audit is to determine whether savings to the Plan and to Plan members could be achieved if claims payments and processing were more efficiently and effectively administered. The audit shall encompass Plan years beginning in 2005, or earlier, through 2008 and shall look at claims administration and payment under the former Indemnity Plan as compared to the present PPO Plan. In developing the RFP, the Executive Administrator shall consult with the Fiscal Research Division staff and the Director of the Program Evaluation Division of the General Assembly to ensure that all of the following are addressed by the independent audit.

- (1) Estimated or actual savings that could be achieved if changes recommended by the independent auditor were enacted by the General Assembly, and how those savings should be allocated to the benefit of Plan members.
- (2) The governance structure of the Plan and whether it should be under the supervision and oversight of the Governor or a State agency.
- (3) The extent to which the failure or inability to share confidential or otherwise protected information with the Board of Directors and the General Assembly contributes to financial weaknesses in the Plan, and how such data sharing should be strengthened.
- (4) The role of the Board of Directors of the Plan and whether the role should be strengthened or otherwise changed.
- (5) Past, present, and potential areas of overpayments, overutilization, underutilization, or abuse that contributes to increasing costs of Plan benefits, including deductibles, co-payments, dependent premiums, and co-insurance maximums.
- (6) Safeguards to ensure the prompt reporting of claims data and trends to the actuaries under contract with the Plan and the General Assembly.
- (7) Any other matters the Executive Administrator, Fiscal Research Division Staff, the Director of the Program Evaluation Division, or the contracting entity believe would be useful in helping to strengthen the financial integrity of the Plan and Plan benefits.

It is the intent of the General Assembly that savings identified by the independent audit and realized through enactment by the General Assembly, and overpayments identified by the audit or by the Plan, will be allocated by the General Assembly to minimize benefit reductions and maintain affordable contributions, deductibles, and co-payments by Plan members and to maintain the fiscal integrity of the Plan itself.

The Executive Administrator shall provide the RFP developed in accordance with this section to the Division of Purchase and Contract not later than July 1, 2009. A copy of the audit report submitted to the Plan by the contracting entity shall be provided to the Committee on Employee Hospital and Medical Benefits.

SECTION 5.(h) G.S. 135-45(d) reads as rewritten:

"(d) The Plan benefits shall be provided under contracts between the Plan and the claims processors selected by the Plan. The Executive Administrator may contract with a pharmacy benefits manager to administer pharmacy benefits under the Plan. Such contracts shall include the applicable provisions of G.S. 135-45.1 through G.S. 135-45.15 and the description of the Plan in the request for proposal, and shall be administered by the respective claims processor or Pharmacy Benefits Manager, which will determine benefits and other questions arising

thereunder. The contracts necessarily will conform to applicable State law. If any of the provisions of G.S. 135-45.1 through G.S. 135-45.15 and the request for proposals must be modified for inclusion in the contract because of State law, such modification shall be made. The Executive Administrator shall ensure that the terms of the contract between the Plan and the Plan's Claims Processing Contractor, the Pharmacy Benefit Manager, and the Disease Management Contractor require the contractor to provide the following:

Detailed billing by each entity showing itemized cost information, including (1) individual administrative services provided;

Transactional data; and

(2) (3) The cost to the Plan for each administrative function performed by the contractor."

PART SIX: SALARY-RELATED CONTRIBUTIONS.

SECTION 6.(a) Effective for the 2009-2011 fiscal biennium, required employer salary-related contributions for employees whose salaries are paid from department, office, institution, or agency receipts shall be paid from the same source as the source of the employees' salary. If an employee's salary is paid in part from the General Fund or Highway Fund and in part from department, office, institution, or agency receipts, required employer salary-related contributions may be paid from the General Fund or Highway Fund only to the extent of the proportionate part paid from the General Fund or Highway Fund in support of the salary of the employee, and the remainder of the employer's requirements shall be paid from the source that supplies the remainder of the employee's salary. The requirements of this section as to source of payment are also applicable to payments on behalf of the employee for hospital-medical benefits, longevity pay, unemployment compensation, accumulated leave, workers' compensation, severance pay, separation allowances, and applicable disability income benefits.

Notwithstanding any other provision of law, an employing unit that is subject to Part 3A of Article 3A of Chapter 135 of the General Statutes and that hires or has hired as an employee a retiree that is in receipt of monthly retirement benefits from any retirement system supported in whole or in part by contributions of the State shall enroll the retiree in the active group and pay the cost for the hospital-medical benefits if that retiree is employed in a position that would require the employer to pay hospital-medical benefits if the individual had not been retired.

SECTION 6.(b) Effective July 1, 2009, the State's employer contribution rates budgeted for retirement and related benefits as percentage of covered salaries for the 2009-2010 fiscal year are: (i) eight and fifty-four hundredths percent (8.54%) - Teachers and State Employees; (ii) thirteen and fifty-four hundredths percent (13.54%) – State Law Enforcement Officers; (iii) eleven and eighty-six hundredths percent (11.86%) – University Employees' Optional Retirement System; (iv) eleven and eighty-six hundredths percent (11.86%) -Community College Optional Retirement Program; (v) seventeen and seventy-one hundredths percent (17.71%) - Consolidated Judicial Retirement System; and (vi) four and fifty hundredth's percent (4.50%) - Legislative Retirement System. Each of the foregoing contribution rates includes four and fifty hundredths percent (4.50%) for hospital and medical The rate for Teachers and State Employees, State Law Enforcement Officers, Community College Optional Retirement Program, and for the University Employees' Optional Retirement Program includes fifty-two hundredths percent (0.52%) for the Disability Income Plan. The rates for Teachers and State Employees and State Law Enforcement Officers include sixteen-hundredths percent (0.16%) for the Death Benefits Plan. The rate for State Law Enforcement Officers includes five percent (5%) for Supplemental Retirement Income.

SECTION 6.(c) Effective July 1, 2010, the State's employer contribution rates budgeted for retirement and related benefits as percentage of covered salaries for the 2010-2011 fiscal year are: (i) eight and ninety-four hundredths percent (8.94%) - Teachers and State Employees; (ii) thirteen and ninety-four hundredths percent (13.94%) – State Law Enforcement Officers; (iii) twelve and twenty-six hundredths percent (12.26%) – University Employees' Optional Retirement System; (iv) twelve and twenty-six hundredths percent (12.26%) -Community College Optional Retirement Program; (v) eighteen and eleven hundredths percent (18.11%) - Consolidated Judicial Retirement System; and (vi) four and ninety hundredths percent (4.90%) - Legislative Retirement System. Each of the foregoing contribution rates includes four and ninety hundredths percent (4.90%) for hospital and medical benefits. The rate for Teachers and State Employees, State Law Enforcement Officers, Community College

Optional Retirement Program, and for the University Employees' Optional Retirement Program includes fifty-two hundredths percent (0.52%) for the Disability Income Plan. The rates for Teachers and State Employees and State Law Enforcement Officers include sixteen-hundredths percent (0.16%) for the Death Benefits Plan. The rate for State Law Enforcement Officers includes five percent (5%) for Supplemental Retirement Income.

SECTION 6.(d) Effective July 1, 2009, the maximum annual employer contributions, payable monthly, by the State for each covered employee or retiree for the 2009-2010 fiscal year to the State Health Plan for Teachers and State Employees are: (i) Medicare-eligible employees and retirees – three thousand four hundred forty-seven dollars (\$3,447) and (ii) non-Medicare-eligible employees and retirees – four thousand five hundred twenty-seven dollars (\$4,527).

SECTION 6.(e) Effective July 1, 2010, the maximum annual employer contributions, payable monthly, by the State for each covered employee or retiree for the 2010-2011 fiscal year to the State Health Plan for Teachers and State Employees are: (i) Medicare-eligible employees and retirees – three thousand seven hundred fifty-three dollars (\$3,753) and (ii) non-Medicare-eligible employees and retirees – four thousand nine hundred twenty-nine dollars (\$4,929).

PART SEVEN: STATE HEALTH PLAN BLUE RIBBON TASK FORCE.

SECTION 7.(a) State Health Plan Blue Ribbon Task Force. – There is established the Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees (Task Force). The purpose of the Task Force is to review the governance of the State Health Plan for Teachers and State Employees (Plan) and to make recommendations for changes that will ensure the ongoing financial stability of the Plan, increase and maintain high participation rates for dependent coverage under the Plan, study and compare coverage and costs of the Plan to coverage and costs of other State health plans in the region, and address issues of cost, quality, and access to health care coverage under the Plan. In conducting its review of the Plan the Task Force shall consider all of the following:

- (1) The feasibility of transferring the ongoing day-to-day oversight of the Plan to an independent board or to a State agency.
- Tiered premium rates for member-only coverage for employees and future retirees based on income or ability to pay.
- Ways to increase participation in dependent coverage including supplements from the State or other methods for reducing dependent premiums.
- (4) The benefits of implementing a closed prescription drug formulary.
- Whether it is advisable to move the Plan to a calendar year, the costs involved in the move, and the benefits that accrue to the Plan and the members as a result of moving to a calendar year.
- (6) Any other matters the Task Force considers relevant to its purpose.

SÉCTION 7.(b) The Task Force shall consist of 15 members, appointed as follows:

- (1) Six members by the General Assembly upon the recommendation of the Speaker of the House of Representatives, three of whom shall be members of the House of Representatives, one shall be a public schoolteacher, one shall be a State or covered local government retiree other than a retired public schoolteacher, and one at-large. Of the three legislators appointed to the Task Force, one shall be a member of the minority party.
- (2) Six members by the General Assembly upon the recommendation of the President Pro Tempore of the Senate, three of whom shall be members of the Senate, one shall be a State employee who is not a public schoolteacher, one shall be a retired State public school employee, and one at-large. Of the three legislators appointed to the Task Force, one shall be a member of the minority party.
- One member by the Governor with expertise in the business of health insurance or in administering health care services other than an insurance company or third-party administrator or contractor of the Plan.
- (4) The chair of the Board of Directors of the State Health Plan.
- (5) The Commissioner of Insurance or the Commissioner's designee.

SECTION 7.(c) The cochairs of the Task Force shall convene the first meeting as soon as possible after appointments have been made. The Task Force may engage the services

of a consultant to provide independent analysis of Plan costs and recommendations on how to strengthen the Plan's financial stability, benefit structure and coverage, and the most effective and efficient location for Plan administration.

SECTION 7.(d) Upon the convening of each session of the General Assembly, the Task Force shall report its findings and recommendations to the General Assembly, the

Governor, and the Committee on Employee Hospital and Medical Benefits.

SECTION 7.(e) A majority of the Task Force members shall constitute a quorum for the transaction of business. The Speaker of the House of Representatives and the President Pro Tempore of the Senate shall each appoint one Task Force member as chair. Appointments shall be made as soon as possible after this act becomes law. Task Force members shall receive no compensation for their service but shall be paid per diem, subsistence, and travel expenses in accordance with G.S. 120-3.1, G.S. 138-5, and G.S. 138-6, as applicable.

SECTION 7.(f) The Legislative Services Officer shall allocate from a portion of the funds appropriated to the General Assembly for each fiscal year for expenses of the Task

Force.

PART EIGHT: EFFECTIVE DATE.

SECTION 8. Sections 1(b), 1(c), 1(d), 2(c), 2(f), 2(h) of this act become effective July 1, 2009. Section 4(d) of this act applies to applications for the purchase of extended coverage made on and after July 1, 2008. The remainder of this act is effective when it becomes law.

In the General Assembly read three times and ratified this the 22nd day of April, 2009.

NORTH CAROLINA GENERAL ASSEMBLY

16 West Jones Street LEGISLATIVE BUILDING RALEIGH NC 27601

October 22, 2009

MEMORANDUM

TO:

Members, State Health Plan Blue Ribbon Task Force

FROM:

Rep. Hugh Holliman, Co-Chair

Sen. Tony Rand, Co-Chair

SUBJECT:

Committee Meeting Notice

The State Health Plan Blue Ribbon Task Force Committee will meet on the following date:

DAY:

Wednesday

DATE:

November 18, 2009

TIME:

9:00 am

LOCATION: Room 1228 Legislative Building

If you have any questions concerning this meeting or you cannot attend, please contact Carol Bowers, Committee Clerk at 919-715-0873 or Hollimanla@ncleg.net.

Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees

Wednesday, November 18, 2009 9:00 a.m.

Legislative Building, Room 1228

- I. Welcome, Introductions, and Remarks
 Representative Hugh Holliman, Co-Chair
 Senator Tony Rand, Co-Chair
- II. Overview of S.L. 2009-16 (SB 287)

 Gann Watson, Attorney, Bill Drafting Division, NCGA
- III. Overview of the State Health Plan
 Mark Trogdon, Fiscal Analyst, Fiscal Research Division, NCGA
- IV. Task Force Discussion
- V. Future Meeting Dates

MINUTES

BLUE RIBBON TASK FORCE ON THE STATE HEALTH PLAN FOR TEACHERS AND STATE EMPLOYEES

Wednesday, November 18, 2009 9 AM Room 1228, Legislative Building

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees held its first meeting on November 18, 2009 in Room 1228 of the Legislative Building. Senator Tony Rand, Co-Chair presided. (See Attachment: Members Present.) Senator Rand asked the members of the Task Force and staff to introduce themselves. Following those introductions, Senator Rand set a tone by saying the State Health Plan spends about \$50 million dollars per week thus was of significant importance to the General Assembly and the employees covered by the plan. Rep Holliman urged all Task Force members to be involved in the work of the group and assured the members there were no preconceived notions concerning the scope to be covered.

PRESENTATIONS

Overview of S.L. 2009-16 (SB 287)

Gann Watson, Attorney with the Bill Drafting Division of the General Assembly outlined the law which provided for Good Health Initiatives in the State Health Plan, set up premium increases, benefit changes, appropriated \$250 million to the Plan to cover a shortfall, etc. SB 287 also created the Blue Ribbon Task Force. (SEE ATTACHMENT: SB 287.)

The Task Force is at liberty to consider a variety of issues, including, but not limited to an independent board to administer the State Health Plan or operation by a state agency, creation of tiered rates for members, methods to increase participation for dependents, a closed prescription system, and changing the SHP to operate on a calendar year basis. The over-riding purpose is to see that the Plan maintains financial stability, reasonable costs, quality member care and the governance mechanism to achieve such goals. The Task Force will report to each Session of the General Assembly and will cease to operate on December 31, 2010.

An 8.9% premium increase for each year of the biennium is in the appropriations act separate from SB287.

In addition, SB 287 eliminated the 90/10 PPO coverage, increased certain co-pay rates for members and dependent coverage. There were other issues modified such as duties of the executive director, accreditation of state hospitals that provide mental health and chemical dependency treatment, and made various contractual health plan actions public record and requires an independent audit.

Wellness Initiatives are part of the act, in the form of weight reduction and smoking cessation programs. The smoking cessation initiative goes into effect July 1, 2010. The 80/20 plan will be available to employees and their dependents who are non-smokers. If the employee or a dependent proves to be a smoker or uses other tobacco products they will be taken out of the 80/20 plan and re-enrolled in the 70/30 plan. There will be random testing of members to see if they are indeed following the guidelines and if a coverage change should result.

The weight reduction initiative goes into effect July, 2011 and all members must fit into certain criteria set up by the Plan, unless the member is covered by Medicare, or has a physician's written exemption.

Rep. Folwell asked if dependent adherence to the wellness guidelines was required for both the smoking and weight loss programs. Ann Rogers from the SHP said that only the smoking program required dependent adherence. There followed further discussion of dependent adherence. Senator Apodaca was told that policy coverage would change one month after a family member might fail a random smoking test. Rep. Braxton questioned the justification for moving an entire family to the 70/30 plan if only one member smoked or failed a smoking test after the member had certified all the family members were non-smokers. Senator Rand said the main reason was cost.

Mr. Stone termed as a 'penalty' the rate difference when a single family member failed a random test. Senator Rand said it was not a penalty, only that the family would fall under the 70/30 rather than the 80/20 plan. As for the issue that one member could affect the entire family, Ann Rogers from the SHP said that the enrollment was made for a family as a unit, not individual members. Data collected by the Plan show a smoker costs the Plan an additional \$2054 per member month.

Commissioner Goodwin asked if obesity might be considered a pre-existing condition given the federal health insurance debate on pre-existing conditions. Ms. Rogers said the Plan would consider that concern and provide information later. Senator Rand said that obesity may be under the individual's control, whereas asthma for example of a pre-existing condition is not considered to be under a person's control.

Mr. Stone returned to the dependent adherence issue asking if family members could seek individual coverage if one person was founding smoking. It was pointed out that the General Assembly can change the enrollment system, but there could be a cost issue that is not clear at this time.

Senator Apodaca asked the age at which the Plan considered the additional smoker cost would kick in. Ms. Rogers said the statistics did not figure age as a factor in the excessive cost for smokers.

Overview of the State Health Plan

Mark Trogdon, Fiscal Analyst for the General Assembly's Fiscal Research Division provided members with the overview including authorization, benefit design, administration and eligibility. (SEE ATTACHMENT: Overview-this includes the Quarterly Report presented to the Joint Committee on Employee Hospital and Medical Benefits on November 12, 2009))

The Plan began in 1982 as a self-financed indemnity plan, but is a PPO plan now. There are 661,000 members spread across North Carolina's 100 counties, some of the other contiguous states and a few foreign countries. The statewide coverage has a major impact in setting up provider networks due to shortage of medical personnel in some rural counties.

Mr. Trogdon pointed out the statutory home of the Plan and said the Plan is a receipt-supported operation. And he noted the emergency \$250 million appropriation made to the Plan in the 2009 Session of the General Assembly.

The Financial Summary begins on page 12 of the Attachment. On page 13, line 17 is the reflection in the Net Plan Income that is an anomaly. The Plan received a prepayment in June of \$52 million from the State Retirement System that was actually budgeted to be received in July-the next fiscal year. This pre-payment causes a skew in the figures.

Mr. Trogdon pointed to a higher than expected increase in claims in June, due in part to members anticipating premium increases which came in July.

Through the rest of the presentation Mr. Trogdon tracked historical data that showed a steady trend of increases in health care costs at approximately 8% each year. The Plan and the General Assembly have taken steps to equalize this, but it is a difficult level to hold.

Demographic effects can be plotted through the Summary.

There was a further explanation of SB287 (SEE ATTCHMENT: SB 287 and Actuarial Note.) As stated above, the Session Law eliminated the Plan's 90/10 plan which had been losing about \$150 million per year. Other Plan changes such as benefit reductions, premium and co-pay increases and pharmacy discount may be tracked in the attachment.

Ms. Adcock asked about increased costs for specialty drugs. Mr. Trogdon said this involved bio-tech drugs, but not cancer drugs. Mr. Feezor asked if the specialty drugs included genetically tailored drugs. Ms. Stephenson said the definition cover drugs which were not biologically created, not synthetically created, not used for chronic conditions and had only limited distribution. These drugs are channeled through a single vendor as a way to be more cost effective.

Representative Braxton asked why administrative costs had risen when claims had declined. Mr. Trogdon explained that the projections for claims took into account various factors such as the trend for the cost of care, out of pocket expenses and benefits changes. Ms Mona Moon, Chief Financial Officer for the State Health Plan explained that another factor in the change shown on page 13 of the Summary was the settling up of the costplus contract with Blue Cross-Blue Shield. At the end of FY 2007-2009, BCBS paid a refund of \$17 million to the Plan. She said the Plan was making quarterly settling actions in that FY, but now the settling up was done monthly and no refunds this high should be expected. Further, Senator Rand said that this would be subject to extensive audit. Ms. Moon said the audit done by Thomas and Gibbs should be available in late January.

Mr. Stone asked if employee receipts paid for about 20% of the Plan. Mr. Trogdon said the figure was closer to 17%. Mr. Stone also asked who validated the certification that the SHP prescription plan was equal to or better than Medicare Part D. Ms. Stephenson of SHP said the AON consulting firm made this validation.

Mr. Feezor asked if there was data available concerning impact on the Plan based on geography or job category. Ms. Rogers from the SHP said there was information on the Plan's website concerning pilots which had been conducted showing types of disease by government agency or utilization of benefits.

Mr. Feezor also asked about information on the use of mail order versus retail stores for prescription drugs. Mr. Trogdon said there is no incentive in the Plan to prompt the use of mail order. Dr. Jack Walker, Plan Administrator said mail order prescription use was less that 2% of the total.

Task Force Discussion

Co-Chair Representative Holliman asked the members to express their ideas for issues to be considered by the Task Force.

Representative Braxton wants more younger family members covered by the Plan, consideration of an HSA Plan, cost differences between brand drugs and generics.

Ms. Ransome expressed interest in incentives for use of mail order for drugs, and the impact on the family of wellness initiatives.

Ms. Simmons wants a price break for teacher assistants who are in a low salary range.

Mr. Stone is concerned with dependent coverage and younger members, the role of trustees and governance, prescription drugs vis a vis brand name when generics bring on adverse reactions, and he would like to see more coverage options.

Dr. Myers, in his second term on the Board of Trustees, believes there was a Covenant made in 1982 when the Plan began to provide adequate coverage in a sound financial basis for employees. Since then we have an aging population and use of increased services and he said such changes bring difficult decisions to be made in order to continue to keep a viable Plan and the covenant.

Mr. Feezor said the Task Force should look at such things as the 8-11% cost of care increase in a long range view. He spoke of incentives to make coverage more affordable for families, considering the cost of premiums versus similar costs to corporate employees. He also urged consideration of governance and the trend of costs rising more than gross domestic product.

From the viewpoint of the current Chairman of the Board of Trustees, Steve Beam said the Board has done a report concerning oversight and the role of the Trustees. (SEE ATTACHMENT: State Health Plan Board Structure.) He said members may have to look at private health care plans and realize that these members of the SHP may have to pay for coverage.

Ms. Adcock is interested in lower administrative costs, increasing younger members in the Plan and disease prevention considerations.

Commissioner Goodwin is most concerned with the coverage, solvency and the oversight and governance of the Plan.

Senator Garrou also wants a longer view taken of the operation of the Plan.

Representative Folwell primarily wants a change to a calendar year. He believes the Plan punishes younger people and should have more attention paid to older members with chronic conditions. His term is a focus on 'health and not health care'.

Co-Chair Representative Holliman announced the next meeting of the Task Force for December 2.

The meeting adjourned at 10:25 am.

GENERAL ASSEMBLY OF NORTH CAROLINA SESSION 2009

SESSION LAW 2009-16 SENATE BILL 287

AN ACT TO APPROPRIATE FUNDS FOR THE STATE HEALTH PLAN FOR TEACHERS AND STATE EMPLOYEES AND TO MAKE OTHER CHANGES RELATED TO THE STATE HEALTH PLAN.

Whereas, the General Assembly must act quickly and prudently to maintain a financially stable State Health Plan to ensure that all members of the Plan have affordable access to medically necessary health benefits and services within available resources; and

Whereas, in order to meet current fiscal obligations, the General Assembly must appropriate \$250,000,000 for the 2008-2009 fiscal year to cover the current year shortfall in funds; and

Whereas, estimates indicate that a substantially larger appropriation will be necessary to maintain the fiscal integrity of the Plan in the next and ensuing fiscal periods; and

Whereas, in order to ensure continued access to medically necessary health care to Plan members, the Plan must implement measures to contain costs through premium increases, benefit changes, and healthy lifestyle programs that not only reduce costs but improve member health; and

Whereas, the Plan estimates that over 70,000 Plan members use tobacco, resulting in a cost to the Plan of \$2,000 per member per year more than the cost of providing coverage for nonusers of tobacco; and

Whereas, cessation of tobacco use has been demonstrated to result in improved member health and substantial savings in health care costs making it fiscally prudent to implement smoking cessation incentives and initiatives with mechanisms to verify member compliance with smoking cessation requirements; and

Whereas, over 60% of North Carolina adults are obese or overweight; and

Whereas, obesity is linked to an over 37% increase in health care spending at a cost of \$2,445 per member per year; and

Whereas, weight management and cessation of tobacco use have been demonstrated to result in improved member health and substantial savings in health care costs making it fiscally prudent to implement smoking cessation and weight management incentives and initiatives with mechanisms to verify member compliance with smoking cessation and weight management requirements; Now, therefore,

The General Assembly of North Carolina enacts:

PART ONE: APPROPRIATIONS, DEFINITIONS, AND SCOPE.

SECTION 1.(a) Appropriation for 2008-2009 Fiscal Year. – There is appropriated from the Savings Reserve Account established in G.S. 143C-4-2 to the Health Benefit Reserve Fund established in G.S. 135-44.5 the sum of two hundred fifty million dollars (\$250,000,000) for the 2008-2009 fiscal year. These funds shall be used to address the shortfall in funds available for the payment of health care and administrative costs under the State Health Plan for Teachers and State Employees ("Plan") for the 2008-2009 fiscal year.

SECTION 1.(b) General Fund Appropriation for 2009-2011 Fiscal Biennium. – Notwithstanding G.S. 143C-5-2, there is appropriated from the General Fund to the Reserve for the State Health Plan in the Office of State Budget and Management the sum of one hundred thirty-two million two hundred fourteen thousand seven hundred fifty-two dollars (\$132,214,752) for the 2009-2010 fiscal year and the sum of two hundred seventy-six million one hundred seventy-nine thousand seven hundred nine dollars (\$276,179,709) for the 2010-2011 fiscal year. These funds shall be used to cover health care and administrative costs to the Plan in the 2009-2011 fiscal biennium.

SECTION 1.(c) Highway Fund Appropriation for the 2009-2011 Fiscal Biennium. – Notwithstanding G.S. 143C-5-2, there is appropriated from the Highway Fund to the Reserve for the State Health Plan in the Office of State Budget and Management the sum of six million one hundred seventy thousand twenty-two dollars (\$6,170,022) for the 2009-2010 fiscal year and the sum of twelve million eight hundred eighty-eight thousand three hundred eighty-six dollars (\$12,888,386) for the 2010-2011 fiscal year. These funds shall be used to cover health care and administrative costs to the Plan in the 2009-2011 fiscal biennium.

SECTION 1.(d) All other agency funds required to fund the premium increase enacted in this act, other than funds appropriated in subsections (b) and (c) of this section, are appropriated for the 2009-2011 fiscal biennium.

SECTION 1.(e) Definitions. – As used in this act unless the context clearly requires otherwise:

(1) "Plan." – The State Health Plan for Teachers and State Employees.

"Basic Plan." – The Plan's PPO option providing for 70/30 in-network coverage after deductibles and co-payments.

(3) "Smoking" or "Smoking cessation." - Includes cessation of the use of all

tobacco products.

(4) "Standard Plan." – The Plan's PPO option providing for 80/20 in-network coverage after deductibles and co-payments.

SECTION 1.(f) Scope. – In the event of a conflict between the provisions of this act and Article 3A of Chapter 135 of the General Statutes, this act prevails.

PART TWO: HEALTH BENEFIT CHANGES.

SECTION 2.(a) Eliminate PPO Plus Option. – Effective July 1, 2009, the PPO Plus option (90/10 in-network coverage) under the State Health Plan for Teachers and State Employees ("Plan") is eliminated. The Executive Administrator shall provide notice to all members of the Plan that this option will no longer be available as of July 1, 2009. Employees enrolled in the Plan's Plus option shall have the choice of enrolling in the Basic or Standard Plan options for the 2009-2010 benefit year.

SECTION 2.(b) Implement Comprehensive Wellness Initiative.

- (1) Program development. The Plan shall develop a Comprehensive Wellness Initiative that includes a focus on smoking cessation and weight management and that is designed to be implemented effective July 1, 2010, for smoking cessation and July 1, 2011, for weight management. Benefit levels shall be determined by the Plan based upon tobacco use or the inability of the member to meet national, evidence-based healthy weight clinical guidelines. For purposes of the Comprehensive Wellness Initiative, "member" includes all State Health Plan primary subscribers and their covered dependents. The Plan shall develop a process whereby a Plan member may appeal the Plan's basis for action it takes due to the member's failure or refusal to comply with the Plan's smoking cessation or weight management requirements.
- (2) Smoking cessation. – Effective July 1, 2010, all members of the Plan who do not have Medicare as their primary coverage shall be enrolled in the Basic Plan under the Plan's PPO unless the subscriber can attest that the subscriber or any qualifying dependent does not smoke or otherwise use tobacco products. The Plan shall develop a mechanism for verifying that the member does not smoke or use other tobacco products. Tobacco use will be reassessed annually at the time of Plan enrollment. All subscribers who have attested that neither they nor their dependents use tobacco, or whose physician certifies in writing that the member is participating in a smoking cessation program, shall have the choice of remaining in the Basic Plan option or enrolling in the Standard Plan option. For purposes of the smoking cessation initiative, "member" includes all members covered under the Plan. As used in this section, "smoking cessation program" means active participation in a Plan-approved cessation program to include counseling or use of tobacco cessation medications.
- (3) Weight management. Effective July 1, 2011, all members of the Plan who do not have Medicare as their primary coverage shall be enrolled in the Basic Plan under the Plan's PPO Plan unless the subscriber attests that the

weight and height ratio of the member is within a range determined by the Plan based on evidence-based healthy weight clinical guidelines, or unless the member's physician certifies in writing that the member has a medical condition that prevents the attainment of the specified weight range or that the member is actively participating in a Plan-approved weight management program. In either case, the member shall have the option to enroll in the Basic or Standard Plan.

Not later than October 1, 2009, the Executive Administrator shall inform Plan members of the healthy lifestyle initiatives, requirements for compliance, and consequences of noncompliance. The Executive Administrator shall provide to members education and training to assist members in complying with healthy lifestyle initiatives. The Executive Administrator may implement incentive initiatives to further encourage member achievement in smoking cessation, weight management, and other integrated health management programs.

The Executive Administrator shall report to the Committee on Employee Hospital and Medical Benefits recommendations the Plan may have for additional sanctions that may be imposed when the Executive Administrator finds that a member intentionally makes a false

statement on a Plan document.

SECTION 2.(c) Prescription Drug Co-Payments. – G.S. 135-45.6(b) reads as rewritten:

"(b) Prescription Drugs. – The Plan's allowable charges for prescription legend drugs to be used outside of a hospital or skilled nursing facility shall be as determined by the Plan's Executive Administrator and Board of Trustees, which determinations are not subject to appeal under Article 3 of Chapter 150B of the General Statutes. Co-payments and other allowable

charges or coverage for prescription drugs shall be as follows:

(1) The Plan will pay allowable charges for each outpatient prescription drug less a copayment to be paid by each covered individual equal to the following amounts: pharmacy charges up to ten dollars (\$10.00) for each generic prescription, thirty dollars (\$30.00) thirty-five dollars (\$35.00) for each preferred branded prescription without a generic equivalent, and forty dollars (\$40.00) for each preferred branded prescription with a generic equivalent drug, and fifty dollars (\$50.00) fifty-five dollars (\$55.00) for each nonpreferred branded or generic prescription. For each branded prescription drug with a generic equivalent drug, the member shall pay the generic co-payment plus the difference between the Plan's gross allowed cost for the generic prescription and the Plan's cost for the branded prescription drug.

- The Plan shall provide coverage of nonacute specialty medications, excluding cancer medications, under the Plan's pharmacy benefit through a specialty pharmacy vendor under contract with the Plan. The Plan may transfer coverage of specified specialty disease medications covered under the Plan's medical benefit to the contracted specialty pharmacy vendor. Specialty medications are covered biotech medications and other medications designated and classified by the Plan as specialty medications that are significantly more expensive than alternative drugs or therapies. Medications classified by the Plan as specialty medications shall meet all of the following conditions:
 - a. Have unique uses for the treatment of complex diseases.

<u>b.</u> Require special dosing or administration.

c. Require special handling.

d. Are typically prescribed by a specialist provider.

e. Exceed four hundred dollars (\$400.00) cost to the Plan per prescription.

The Plan shall impose a co-payment in the amount of twenty-five percent (25%) of the Plan's gross allowed cost of the specialty drug not to exceed any hundred dellars (\$100.00) per prescription per 30 day symply

one hundred dollars (\$100.00) per prescription per 30-day supply.

The Plan may exclude coverage of drugs that have therapeutic equivalents, as defined by the U.S. Food and Drug Administration, that are available over the counter. Before excluding coverage under this subdivision, the Plan shall consult with the Plan's Pharmacy and Therapeutics Committee.

These co-paymentsapply to all optional alternative plans available under the Plan.

Allowable charges shall not be greater than a pharmacy's usual and customary charge to the general public for a particular prescription. Prescriptions shall be for no more than a 34-day 30-day supply for the purposes of the copayments paid by each covered individual. By accepting the copayments and any remaining allowable charges provided by this subsection, pharmacies shall not balance bill an individual covered by the Plan. A prescription legend drug is defined as an article the label of which, under the Federal Food, Drug, and Cosmetic Act, is required to bear the legend: "Caution: Federal Law Prohibits Dispensing Without Prescription." Such articles may not be sold to or purchased by the public without a prescription order. Benefits are provided for insulin even though a prescription is not required. The Plan may use a pharmacy benefit manager to help manage the Plan's outpatient prescription drug coverage. In managing the Plan's outpatient prescription drug benefits, the Plan and its pharmacy benefit manager shall not provide coverage for sexual dysfunction, growth hormone, antiwrinkle, weight loss, and hair growth drugs unless such coverage is medically necessary to the health of the member. The Plan and its pharmacy benefit manager shall not provide coverage for growth hormone and weight loss drugs and antifungal drugs for the treatment of nail fungus and botulinium toxin without approval in advance by the pharmacy benefit manager. The Plan may adopt utilization management procedures for certain drugs, but in no event shall the Plan provide coverage for sexual dysfunction or hair growth drugs or nonmedically necessary drugs used for cosmetic purposes. Any formulary used by the Plan's Executive Administrator and pharmacy benefit manager shall be an open formulary. Plan members shall not be assessed more than two thousand five hundred dollars (\$2,500) per person per fiscal year in copayments required by this subsection. The Plan's Pharmacy Benefit Manager, or any pharmacy or vendor participating in the Plan shall charge the Plan for any prescription legend drug dispensed under the Plan's pharmacy benefit based upon the original National Drug Code (NDC) as established by the manufacturer of the prescription legend drug and published by the United States Food and Drug Administration.

Co-payments and other allowable charges under this subsection shall be the lesser of the Plan's discounted cost of the drug or the co-payment amount or allowable charge and apply to

all optional alternative plans available under the Plan."

SECTION 2.(d) Routine Eye Examinations Not Covered. – Effective January 1, 2010, G.S. 135-45.8(13) reads as rewritten:

"§ 135-45.8. General limitations and exclusions.

<u>(4)</u>

The following shall in no event be considered covered expenses nor will benefits described in G.S. 135-45.6 through G.S. 135-45.11 be payable for:

(13) Charges for <u>routine eye examinations</u>, eyeglasses or other corrective lenses (except for cataract lenses certified as medically necessary for aphakia persons) and hearing aids or examinations for the prescription or fitting thereof."

SECTION 2.(e) Deductible and Co-Payment Changes. – Effective July 1, 2009, the Executive Administrator shall make the following changes to deductibles, coinsurance maximums, and co-payments under the Basic and Standard PPO Plans:

(1) Basic plan (70/30):

a. Increase the in-network annual deductible to eight hundred dollars (\$800.00) for member-only coverage and to one thousand six hundred dollars (\$1,600) for the out-of-network annual deductible for member-only coverage.

The aggregate maximum annual deductible for employee-child and employee-family coverage shall be three times the member-only annual deductibles.

b. Increase the in-network coinsurance maximum to three thousand two hundred fifty dollars (\$3,250) for member-only coverage and to six

- thousand five hundred dollars (\$6,500) for member-only out-of-network maximum coinsurance. The aggregate maximum coinsurance for employee-child and employee-family coverage shall be three times the member-only coinsurance maximums.
- c. Increase the in-network primary care co-payment to thirty dollars (\$30.00) per covered individual.
- d. Increase the in-network specialist co-payment to seventy dollars (\$70.00) per covered individual, except that for mental health and substance abuse services, chiropractic services, and physical therapy, occupational therapy, and speech therapy services, the in-network specialist co-payment shall be fifty-five dollars (\$55.00) per covered individual.
- e. Increase the in-network and out-of-network inpatient co-payment to two hundred fifty dollars (\$250.00) per covered individual.
- f. Increase prescription drug co-pays as required under G.S. 135-45.6(b) as enacted by this act.
- g. Except as otherwise provided in this act, co-payments and coinsurance for coverage not otherwise listed in this subdivision shall remain as applicable in the 2008-2009 benefit year.

(2) Standard Plan (80/20):

- a. Increase the in-network annual deductible to six hundred dollars (\$600.00) for member-only coverage and to one thousand two hundred dollars (\$1,200) for the member-only out-of-network annual deductible.
 - The aggregate maximum annual deductible for employee-child and employee-family coverage shall be three times the member-only annual deductibles.
- b. Increase the in-network coinsurance maximum to two thousand seven hundred fifty dollars (\$2,750) for member-only coverage and to five thousand five hundred dollars (\$5,500) for member-only out-of-network maximum coinsurance. The aggregate maximum coinsurance for employee-child and employee-family coverage shall be three times the member-only coinsurance maximums.
- c. Increase the in-network urgent care co-payment to seventy-five dollars (\$75.00) per covered individual.
- d. Increase the in-network primary care co-payment to twenty-five dollars (\$25.00) per covered individual.
- e. Increase the in-network specialist co-payment to sixty dollars (\$60.00) per covered individual, except that for mental health and substance abuse services, chiropractic services, and physical therapy, occupational therapy, and speech therapy services, the in-network specialist co-payment shall be forty-five dollars (\$45.00) per covered individual.
- f. Increase the in-network and out-of-network inpatient co-payment to two hundred dollars (\$200.00) per covered individual.
- g. Increase prescription drug co-pays as required under G.S. 135-45.6(b) as enacted by this act.
- h. Except as otherwise provided in this act, co-payments and coinsurance for coverage not otherwise listed in this subdivision shall remain as applicable in the 2008-2009 benefit year.

SECTION 2.(f) Limitation on Authority to Change Benefits. – G.S. 135-45(g) reads as rewritten:

"(g) The Executive Administrator and Board of Trustees shall not change the Plan's comprehensive health benefit coverage, co-payments, deductibles, out-of-pocket expenditures, and lifetime maximums in effect on July 1, 2008, July 1, 2009, or a later act of the General Assembly, that would result in a net increased cost to the Plan or in a reduction in benefits to Plan members as a whole unless and until the proposed changes are directed to be made in an act of the General Assembly."

SECTION 2.(g) Premium Increases. – Premium rates for contributory coverage established in accordance with G.S. 135-44.6 shall be increased to eight and nine-tenths percent (8.9%) for contributory coverage for the 2009-2010 fiscal year and shall be increased by an additional eight and nine-tenths percent (8.9%) over the premium rate for contributory coverage for the 2010-2011 fiscal year.

SECTION 2.(h) Pharmacy Benefit Savings. – The Plan shall direct its pharmacy benefit manager (PBM), within the terms of the Plan's PBM contract, to achieve the sum of eighteen million dollars (\$18,000,000) in savings in pharmacy benefit costs in the 2009-2010 fiscal year, and the sum of twenty million dollars (\$20,000,000) in savings in pharmacy benefit costs in the 2010-2011 fiscal year through reduced reimbursements paid to pharmacies for prescription drugs. If the savings achieved in each six-month period of the fiscal year do not exceed one hundred five percent (105%) of the savings amount specified in this section for that fiscal year, there shall be no further adjustment to reimbursements paid to pharmacies for that six-month period. If the total savings achieved, by fiscal year, exceeds one hundred five percent (105%) of the specified savings amount in each six-month period of the fiscal year, the Plan shall adjust pharmacy reimbursement reductions accordingly. The Plan shall review savings achieved twice annually to ensure compliance with this section. The Plan shall calculate the savings to be achieved based on Plan enrollment and estimated cost and utilization trends incorporated in the Plan's Financial Projections as of March 20, 2009. The total savings by fiscal year achieved in this section may be increased or decreased without adjustment based on a change in total enrollment provided that the rate of savings achieved on a per-member permonth basis remains constant. Not later than 60 days immediately following each six-month period, the Plan shall report the amount of savings achieved and any adjustments made for that period to the Committee on Employee Hospital and Medical Benefits.

PART THREE: ELIGIBILITY CLARIFICATION.

SECTION 3.(a) Dependent Child Clarifications. – G.S. 135-45.1(10) reads as rewritten:

Dependent child. - A natural, legally adopted, or foster child or children of "(10) the employee and or spouse, unmarried, up to the first of the month following his or her 19th birthday, whether or not the child is living with the employee, as long as the employee is legally responsible for such child's maintenance and support. Dependent child also includes a stepchild of the member who is married to the stepchild's natural parent. To be eligible, the stepchild must have his or her primary residence with the member. Dependent child shall also include any child under age 19 who has reached his or her 18th birthday, provided the employee was legally responsible for such child's maintenance and support on his or her 18th birthday. Dependent children of firefighters, rescue squad workers, and members of the national guard are subject to the same terms and conditions as are other dependent children covered by this subdivision. Eligibility of dependent children is subject to the requirements of G.S. 135-45.2(d). The Plan may require documentation from the member confirming a child's eligibility to be covered as the member's dependent."

SECTION 3.(b) Eligibility of Full-Time Students. – G.S. 135-45.2(d) reads as rewritten:

"(d) A foster child is covered as a dependent child (i) if living in a regular parent-child relationship with the expectation that the employee will continue to rear the child into adulthood, (ii) if at the time of enrollment, or at the time a foster child relationship is established, whichever occurs first, the employee applies for coverage for such child and submits evidence of a bona fide foster child relationship, identifying the foster child by name and setting forth all relevant aspects of the relationship, (iii) if the claims processor accepts the foster child as a participant through a separate written document identifying the foster child by name and specifically recognizing the foster child relationship, and (iv) if at the time a claim is incurred, the foster child relationship, as identified by the employee, continues to exist. Children placed in a home by a welfare agency which obtains control of, and provides for maintenance of the child, are not eligible participants.

Coverage of a dependent child may be extended beyond the 19th birthday under the following conditions:

Page 6 Session Law 2009-16 Senate Bill 287

- (1) If the dependent is a full-time student, aged 19 years and one month through the end of the month following the student's 26th birthday, birthday. As used in this section, a full-time student is a student who is pursuing a course of study that represents at least the normal workload of a full-time student at a school or college accredited by the state of jurisdiction. In accordance with applicable federal law, coverage of a full-time student that loses full-time status due to illness may be extended for one year from the effective date of the loss of full-time status provided that the student was enrolled at the time of the onset of the illness.
- (2) The dependent is physically or mentally incapacitated to the extent that he or she is incapable of earning a living and (i) such handicap developed or began to develop before the dependent's 19th birthday, or (ii) such handicap developed or began to develop before the dependent's 26th birthday if the dependent was covered by the Plan in accordance with G.S. 135-45.2(5)a."

SECTION 3.(c) Waiting Periods Subject to Federal Law. – G.S. 135-45.3(b) reads as rewritten:

"(b) Newly—Except as otherwise required by applicable federal law, newly acquired dependents (spouse/child) enrolled within 30 days of becoming an eligible dependent will not be subject to the 12-month waiting period for preexisting conditions. A dependent can become qualified due to marriage, adoption, entering a foster child relationship, due to the divorce of a dependent child or the death of the spouse of a dependent child, and at the beginning of each legislative session (applies only to enrolled legislators). Effective date for newly acquired dependents if application was made within the 30 days can be the first day of the following month. Effective date for an adopted child can be date of adoption, or date of placement in the adoptive parents' home, or the first of the month following the date of adoption or placement. Firefighters, rescue squad workers, and members of the national guard, and their eligible dependents, are subject to the same terms and conditions as are new employees and their dependents covered by this subdivision. Enrollments in these circumstances must occur within 30 days of eligibility to enroll."

SECTION 3.(d) G.S. 135-45.4(b)(5) reads as rewritten:

"(5) To administer the 12-month waiting period for preexisting conditions under this that Article, the Plan must give credit against the 12-month period for the time a person was covered under a previous plan if the previous plan's coverage was continuous to a date not more than 63 days before the effective date of coverage. As used in this subdivision, a "previous plan" means any policy, certificate, contract, or any other arrangement provided by any accident and health insurer, any hospital or medical service corporation, any health maintenance organization, any preferred provider organization, any multiple employer welfare arrangement, any self-insured health benefit arrangement, any governmental health benefit or health care plan or program, or any other health benefit arrangement. Waiting periods for preexisting conditions administered under this Article are subject to applicable federal law."

SECTION 3.(e) Eligibility Audit. – The Executive Administrator shall provide for an audit of dependent eligibility under the Plan. The audit shall be designed to determine whether all dependents currently covered under the Plan are eligible for coverage under current law. Upon identification of an individual who is enrolled as a dependent but not eligible, the Plan shall disenroll the ineligible dependent effective within 10 days of sending written termination notice to the employee. The notice shall state the date upon which disenrollment will become effective and the basis on which the determination of dependent ineligibility is made. Notwithstanding any other provision of law, the Executive Administrator may waive requirements to collect from the member reimbursement for claims paid for the ineligible covered individual.

SECTION 3.(f) Cessation of Coverage of Ineligible Individuals. – G.S. 135-45.12 is amended by adding the following new subdivision to read:

The last day of the month in which a covered individual is found to be ineligible for coverage."

SECTION 3.(g) Documentation of Dependent Eligibility. – G.S. 135-45.3 is amended by adding the following new subsection to read:

"(c) When an eligible or enrolled member applies to enroll the member's eligible dependent child or spouse, the member shall provide the documentation required by the Plan to verify the dependent's eligibility for coverage."

PART FOUR: NC HEALTH CHOICE CHANGES.

SECTION 4.(a) Over-the-Counter Medications. – Coverage of over-the-counter medication authorized under G.S. 108A-70.21(d) for the NC Health Choice Program shall become effective on the later of July 1, 2010, or the date upon which the Department of Health and Human Services assumes full responsibility for administration and processing of claims under the NC Health Choice Program.

SECTION 4.(b) Subrogation. – For the period authorized under subsection (a) of this section, the right of subrogation under G.S. 108A-57 applies to the State Health Plan for payments made by the Plan under the NC Health Choice Program. This subsection expires on the later of July 1, 2010, or the date upon which the Department of Health and Human Services assumes full responsibility for administration, processing, and payment of claims under the NC Health Choice Program.

SECTION 4.(c) DHHS Subrogation Under NC Health Choice. – G.S. 108A-57 is

amended by adding the following new subsection to read:

"(c) This section applies to the administration of and claims payments made by the Department of Health and Human Services under the NC Health Choice Program established under Part 8 of this Article."

SECTION 4.(d) G.S. 108A-70.21(g) reads as rewritten:

"(g) Purchase of Extended Coverage. – An enrollee in the Program who loses eligibility due to an increase in family income above two hundred fifty percent (250%)percent (200%) of the federal poverty level and up to and including two hundred seventy five percent (275%) twenty-five percent (225%) of the federal poverty level may purchase at full premium cost continued coverage under the Program for a period not to exceed one year beginning on the date the enrollee becomes ineligible under the income requirements for the Program. The benefits, copayments, and other conditions of enrollment under the Program applicable to extended coverage purchased under this subsection shall be the same as those applicable to an NC Kids' Care enrollee whose family income equals two hundred fifty percent (250%) percent (200%) of the federal poverty level."

PART FIVE: OTHER CHANGES.

SECTION 5.(a) G.S. 135-45.4(b)(2) reads as rewritten:

"(2) Employees not enrolling or not adding dependents when first eligible may enroll later on the first of any following month, but will be subject to a twelve-month waiting period for preexisting conditions except as provided in subdivision (a)(3) of this section. The waiting period under this subdivision is subject to applicable federal law."

SECTION 5.(b) Powers and Duties of Executive Administrator. – G.S. 135-44.4 is

amended by adding the following new subdivisions to read:

- "(13a) The Plan and its pharmacy benefit manager may implement and administer pharmacy and medical utilization management programs and programs to detect and address utilization abuse of benefits.
- (29) For transplant and bariatric medical procedures, the Plan may restrict coverage to certain in-network providers that are designated by the Plan's Claims Processing Contractor.
- (30) The Executive Administrator shall ensure provisions in contracts between the Plan and the Plan's Claims Processing Contractor that call for the Plan to contract with an independent auditor, selected by the Plan, to review the Claims Processing Contractor's administrative costs and services to the Plan by the Claim's Processing Contractor.
- (31) The Plan shall conduct a monthly review of Plan costs as compared to the same month in the immediately preceding year and a comparison of projected costs and savings to actual costs and savings. The Plan shall report the results of the review to the Committee on Employee Hospital and Medical Benefits and the State Health Plan Blue Ribbon Task Force at least semiannually."

SECTION 5.(c) G.S. 135-44.1(b) reads as rewritten:

"(b) Six-A majority of the members of the Board of Trustees in office shall constitute a quorum. Decisions of the Board of Trustees shall be made by a majority vote of the Trustees present, except as otherwise provided in this Part."

SECTION 5.(d) G.S. 135-45.9(b) reads as rewritten:

- "(b) Notwithstanding any other provision of this Part, the following necessary services for the care and treatment of chemical dependency and mental illness shall be covered as provided in this section: allowable institutional and professional charges for inpatient care, outpatient care, intensive outpatient program services, partial hospitalization treatment, and residential care and treatment:
 - (1) For mental illness treatment:
 - Licensed psychiatric hospitals;

 hospitals or State psychiatric hospitals accredited by the Joint Commission on the Accreditation of Healthcare Organizations;

b. Licensed psychiatric beds in licensed general hospitals;

- c. Licensed residential treatment facilities that have 24-hour on-site care provided by a registered nurse who is physically located at the facility at all times and that hold current accreditation by a national accrediting body approved by the Plan's mental health case manager;
- d. Area Mental Health, Developmental Disabilities, and Substance Abuse Authorities or County Programs in accordance with G.S. 122C-141;
- e. Licensed intensive outpatient treatment programs; and

f. Licensed partial hospitalization programs.

(2) For chemical dependency treatment:

- a. Licensed chemical dependency units in licensed psychiatric hospitals; hospitals or in State psychiatric hospitals accredited by the Joint Commission on the Accreditation of Healthcare Organizations;
- b. Licensed chemical dependency hospitals;

c. Licensed chemical dependency treatment facilities;

- d. Area Mental Health, Developmental Disabilities, and Substance Abuse Authorities or County Programs in accordance with G.S. 122C-141;
- e. Licensed intensive outpatient treatment programs;
- f. Licensed partial hospitalization programs; and

g. Medical detoxification facilities or units."

SECTION 5.(e) Section 28.22A(k) of S.L. 2007-323 reads as rewritten:

"SECTION 28.22A.(k) Subsection (j) of this section expires June 30, 2009. June 30, 2011."

SECTION 5.(f) G.S. 135-43(b) reads as rewritten:

"(b) Notwithstanding the provisions of this Article, the Executive Administrator and Board of Trustees of the State Health Plan for Teachers and State Employees may contract with providers of institutional and professional medical care and services to establish preferred provider networks.

The terms pertaining to reimbursement rates or other terms of consideration of any contract between hospitals, hospital authorities, doctors, or other medical providers, or a pharmacy benefit manager and the Plan, or contracts pertaining to the provision of any medical benefit offered under the Plan, including its optional alternative comprehensive benefit plans, and programs available under the optional alternative plans, shall not be a public record under Chapter 132 of the General Statutes for a period of 30 months after the date of the expiration of the contract. The terms of a contract between the Plan and its third party administrator or between the Plan and its pharmacy benefit manager are a public record except that the terms in those contracts that contain trade secrets or proprietary or competitive information are not a public record under Chapter 132 of the General Statutes, and any such proprietary or competitive information and trade secrets contained in the contract shall be redacted by the Plan prior to making it available to the public. Provided, however, nothing in this subsection shall be deemed to This subsection shall not be construed to prevent or restrict the release of any information made not a public record under this subsection to the State Auditor, the Attorney General, the Director of the State Budget, the Plan's Executive Administrator, the Department of Health and Human Services solely for the purpose of implementing the transition of NC

Health Choice from the Plan to the Department of Health and Human Services, and the Committee on Employee Hospital and Medical Benefits solely and exclusively for their use in the furtherance of their duties and responsibilities responsibilities, and to the Department of Health and Human Services solely for the purpose of implementing the transition of NC Health Choice from the Plan to the Department of Health and Human Services. The design, adoption, and implementation of the preferred provider contracts, networks, and optional alternative comprehensive health benefit plans, and programs available under the optional alternative plans, as authorized under G.S. 135-45 are not subject to the requirements of Article 3 of Chapter 143 of the General Statutes. The Executive Administrator and Board of Trustees shall make reports as requested to the President of the Senate, the President Pro Tempore of the Senate, the Speaker of the House of Representatives, and the Committee on Employee Hospital and Medical Benefits."

SECTION 5.(g) The Executive Administrator of the Plan shall include in the development of its Request for Proposal (RFP) for an independent audit of the Plan, an audit of claims paid by the State Health Plan for Teachers and State Employees. One purpose of the audit is to determine whether savings to the Plan and to Plan members could be achieved if claims payments and processing were more efficiently and effectively administered. The audit shall encompass Plan years beginning in 2005, or earlier, through 2008 and shall look at claims administration and payment under the former Indemnity Plan as compared to the present PPO Plan. In developing the RFP, the Executive Administrator shall consult with the Fiscal Research Division staff and the Director of the Program Evaluation Division of the General Assembly to ensure that all of the following are addressed by the independent audit.

(1) Estimated or actual savings that could be achieved if changes recommended by the independent auditor were enacted by the General Assembly, and how those savings should be allocated to the benefit of Plan members.

(2) The governance structure of the Plan and whether it should be under the

supervision and oversight of the Governor or a State agency.

(3) The extent to which the failure or inability to share confidential or otherwise protected information with the Board of Directors and the General Assembly contributes to financial weaknesses in the Plan, and how such data sharing should be strengthened.

(4) The role of the Board of Directors of the Plan and whether the role should be

strengthened or otherwise changed.

- (5) Past, present, and potential areas of overpayments, overutilization, underutilization, or abuse that contributes to increasing costs of Plan benefits, including deductibles, co-payments, dependent premiums, and co-insurance maximums.
- (6) Safeguards to ensure the prompt reporting of claims data and trends to the actuaries under contract with the Plan and the General Assembly.
- (7) Any other matters the Executive Administrator, Fiscal Research Division Staff, the Director of the Program Evaluation Division, or the contracting entity believe would be useful in helping to strengthen the financial integrity of the Plan and Plan benefits.

It is the intent of the General Assembly that savings identified by the independent audit and realized through enactment by the General Assembly, and overpayments identified by the audit or by the Plan, will be allocated by the General Assembly to minimize benefit reductions and maintain affordable contributions, deductibles, and co-payments by Plan members and to maintain the fiscal integrity of the Plan itself.

The Executive Administrator shall provide the RFP developed in accordance with this section to the Division of Purchase and Contract not later than July 1, 2009. A copy of the audit report submitted to the Plan by the contracting entity shall be provided to the Committee on Employee Hospital and Medical Benefits.

SECTION 5.(h) G.S. 135-45(d) reads as rewritten:

"(d) The Plan benefits shall be provided under contracts between the Plan and the claims processors selected by the Plan. The Executive Administrator may contract with a pharmacy benefits manager to administer pharmacy benefits under the Plan. Such contracts shall include the applicable provisions of G.S. 135-45.1 through G.S. 135-45.15 and the description of the Plan in the request for proposal, and shall be administered by the respective claims processor or Pharmacy Benefits Manager, which will determine benefits and other questions arising

thereunder. The contracts necessarily will conform to applicable State law. If any of the provisions of G.S. 135-45.1 through G.S. 135-45.15 and the request for proposals must be modified for inclusion in the contract because of State law, such modification shall be made. The Executive Administrator shall ensure that the terms of the contract between the Plan and the Plan's Claims Processing Contractor, the Pharmacy Benefit Manager, and the Disease Management Contractor require the contractor to provide the following:

Detailed billing by each entity showing itemized cost information, including

individual administrative services provided;

Transactional data; and

(<u>2</u>) (<u>3</u>) The cost to the Plan for each administrative function performed by the contractor."

PART SIX: SALARY-RELATED CONTRIBUTIONS.

SECTION 6.(a) Effective for the 2009-2011 fiscal biennium, required employer salary-related contributions for employees whose salaries are paid from department, office, institution, or agency receipts shall be paid from the same source as the source of the employees' salary. If an employee's salary is paid in part from the General Fund or Highway Fund and in part from department, office, institution, or agency receipts, required employer salary-related contributions may be paid from the General Fund or Highway Fund only to the extent of the proportionate part paid from the General Fund or Highway Fund in support of the salary of the employee, and the remainder of the employer's requirements shall be paid from the source that supplies the remainder of the employee's salary. The requirements of this section as to source of payment are also applicable to payments on behalf of the employee for hospital-medical benefits, longevity pay, unemployment compensation, accumulated leave, workers' compensation, severance pay, separation allowances, and applicable disability income benefits.

Notwithstanding any other provision of law, an employing unit that is subject to Part 3A of Article 3A of Chapter 135 of the General Statutes and that hires or has hired as an employee a retiree that is in receipt of monthly retirement benefits from any retirement system supported in whole or in part by contributions of the State shall enroll the retiree in the active group and pay the cost for the hospital-medical benefits if that retiree is employed in a position that would require the employer to pay hospital-medical benefits if the individual had not been retired.

SECTION 6.(b) Effective July 1, 2009, the State's employer contribution rates budgeted for retirement and related benefits as percentage of covered salaries for the 2009-2010 fiscal year are: (i) eight and fifty-four hundredths percent (8.54%) - Teachers and State Employees; (ii) thirteen and fifty-four hundredths percent (13.54%) - State Law Enforcement Officers; (iii) eleven and eighty-six hundredths percent (11.86%) – University Employees' Optional Retirement System; (iv) eleven and eighty-six hundredths percent (11.86%) -Community College Optional Retirement Program; (v) seventeen and seventy-one hundredths percent (17.71%) - Consolidated Judicial Retirement System; and (vi) four and fifty hundredth's percent (4.50%) - Legislative Retirement System. Each of the foregoing contribution rates includes four and fifty hundredths percent (4.50%) for hospital and medical The rate for Teachers and State Employees, State Law Enforcement Officers, Community College Optional Retirement Program, and for the University Employees' Optional Retirement Program includes fifty-two hundredths percent (0.52%) for the Disability Income Plan. The rates for Teachers and State Employees and State Law Enforcement Officers include sixteen-hundredths percent (0.16%) for the Death Benefits Plan. The rate for State Law Enforcement Officers includes five percent (5%) for Supplemental Retirement Income.

SECTION 6.(c) Effective July 1, 2010, the State's employer contribution rates budgeted for retirement and related benefits as percentage of covered salaries for the 2010-2011 fiscal year are: (i) eight and ninety-four hundredths percent (8.94%) – Teachers and State Employees; (ii) thirteen and ninety-four hundredths percent (13.94%) – State Law Enforcement Officers; (iii) twelve and twenty-six hundredths percent (12.26%) – University Employees' Optional Retirement System; (iv) twelve and twenty-six hundredths percent (12.26%) -Community College Optional Retirement Program; (v) eighteen and eleven hundredths percent (18.11%) - Consolidated Judicial Retirement System; and (vi) four and ninety hundredths percent (4.90%) - Legislative Retirement System. Each of the foregoing contribution rates includes four and ninety hundredths percent (4.90%) for hospital and medical benefits. The rate for Teachers and State Employees, State Law Enforcement Officers, Community College Optional Retirement Program, and for the University Employees' Optional Retirement Program includes fifty-two hundredths percent (0.52%) for the Disability Income Plan. The rates for Teachers and State Employees and State Law Enforcement Officers include sixteen-hundredths percent (0.16%) for the Death Benefits Plan. The rate for State Law Enforcement Officers includes five percent (5%) for Supplemental Retirement Income.

SECTION 6.(d) Effective July 1, 2009, the maximum annual employer contributions, payable monthly, by the State for each covered employee or retiree for the 2009-2010 fiscal year to the State Health Plan for Teachers and State Employees are: (i) Medicare-eligible employees and retirees – three thousand four hundred forty-seven dollars (\$3,447) and (ii) non-Medicare-eligible employees and retirees – four thousand five hundred twenty-seven dollars (\$4,527).

SECTION 6.(e) Effective July 1, 2010, the maximum annual employer contributions, payable monthly, by the State for each covered employee or retiree for the 2010-2011 fiscal year to the State Health Plan for Teachers and State Employees are: (i) Medicare-eligible employees and retirees – three thousand seven hundred fifty-three dollars (\$3,753) and (ii) non-Medicare-eligible employees and retirees – four thousand nine hundred twenty-nine dollars (\$4,929).

PART SEVEN: STATE HEALTH PLAN BLUE RIBBON TASK FORCE.

SECTION 7.(a) State Health Plan Blue Ribbon Task Force. — There is established the Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees (Task Force). The purpose of the Task Force is to review the governance of the State Health Plan for Teachers and State Employees (Plan) and to make recommendations for changes that will ensure the ongoing financial stability of the Plan, increase and maintain high participation rates for dependent coverage under the Plan, study and compare coverage and costs of the Plan to coverage and costs of other State health plans in the region, and address issues of cost, quality, and access to health care coverage under the Plan. In conducting its review of the Plan the Task Force shall consider all of the following:

- (1) The feasibility of transferring the ongoing day-to-day oversight of the Plan to an independent board or to a State agency.
- (2) Tiered premium rates for member-only coverage for employees and future retirees based on income or ability to pay.
- (3) Ways to increase participation in dependent coverage including supplements from the State or other methods for reducing dependent premiums.
- (4) The benefits of implementing a closed prescription drug formulary.
- (5) Whether it is advisable to move the Plan to a calendar year, the costs involved in the move, and the benefits that accrue to the Plan and the members as a result of moving to a calendar year.
- (6) Any other matters the Task Force considers relevant to its purpose.

SECTION 7.(b) The Task Force shall consist of 15 members, appointed as follows:

- (1) Six members by the General Assembly upon the recommendation of the Speaker of the House of Representatives, three of whom shall be members of the House of Representatives, one shall be a public schoolteacher, one shall be a State or covered local government retiree other than a retired public schoolteacher, and one at-large. Of the three legislators appointed to the Task Force, one shall be a member of the minority party.
- (2) Six members by the General Assembly upon the recommendation of the President Pro Tempore of the Senate, three of whom shall be members of the Senate, one shall be a State employee who is not a public schoolteacher, one shall be a retired State public school employee, and one at-large. Of the three legislators appointed to the Task Force, one shall be a member of the minority party.
- One member by the Governor with expertise in the business of health insurance or in administering health care services other than an insurance company or third-party administrator or contractor of the Plan.
- (4) The chair of the Board of Directors of the State Health Plan.
- (5) The Commissioner of Insurance or the Commissioner's designee.

SECTION 7.(c) The cochairs of the Task Force shall convene the first meeting as soon as possible after appointments have been made. The Task Force may engage the services

of a consultant to provide independent analysis of Plan costs and recommendations on how to strengthen the Plan's financial stability, benefit structure and coverage, and the most effective and efficient location for Plan administration.

SECTION 7.(d) Upon the convening of each session of the General Assembly, the Task Force shall report its findings and recommendations to the General Assembly, the Governor, and the Committee on Employee Hospital and Medical Benefits.

SECTION 7.(e) A majority of the Task Force members shall constitute a quorum for the transaction of business. The Speaker of the House of Representatives and the President Pro Tempore of the Senate shall each appoint one Task Force member as chair. Appointments shall be made as soon as possible after this act becomes law. Task Force members shall receive no compensation for their service but shall be paid per diem, subsistence, and travel expenses in accordance with G.S. 120-3.1, G.S. 138-5, and G.S. 138-6, as applicable.

SECTION 7.(f) The Legislative Services Officer shall allocate from a portion of the funds appropriated to the General Assembly for each fiscal year for expenses of the Task Force.

PART EIGHT: EFFECTIVE DATE.

SECTION 8. Sections 1(b), 1(c), 1(d), 2(c), 2(f), 2(h) of this act become effective July 1, 2009. Section 4(d) of this act applies to applications for the purchase of extended coverage made on and after July 1, 2008. The remainder of this act is effective when it becomes law.

In the General Assembly read three times and ratified this the 22nd day of April, 2009.

- s/ Walter H. Dalton President of the Senate
- s/ William L. Wainwright
 Speaker Pro Tempore of the House of Representatives
- s/ Beverly E. Perdue Governor

Approved 8:17 a.m. this 23rd day of April, 2009

HEALTH BENEFITS

BILL NUMBER:

Senate Bill 287 (Ratified Bill)

SHORT TITLE:

State Health Plan\$/Good Health Initiatives.

SPONSOR(S):

SYSTEM OR PROGRAM AFFECTED: State Health Plan for Teachers and State Employees (Plan).

FUNDS AFFECTED: State General Fund, State Highway Fund, other State employer receipts; premium payments for dependents of active employees and retired employees of State agencies and universities, local public schools and local community colleges; premium payments for coverages selected by eligible former employees; premium payments for coverages selected by firefighters, rescue squad workers, members of the National Guard, and certain authorized local governments.

BILL SUMMARY: Senate Bill 287 (Ratified) appropriates funds from various sources, authorizes annual premium rate increases, makes various benefit and provider related changes to achieve financial savings, and directs other various changes to the Plan. The bill also generally establishes a Blue Ribbon Task Force to conduct a comprehensive review of the Plan

EFFECTIVE DATE: Sections 1(b), 1(c), 1(d), 2(c), 2(f), 2(h) become effective July 1, 2009. Section 4(d) (as relates to NC Health Choice) applies to applications for the purchase of extended coverage made on and after July 1, 2008. The remainder of the act is effective when it becomes law or as specified in a particular section of the act.

ESTIMATED IMPACT ON STATE:

Current FY 2008-2009

Appropriated Funds

Section 1(a) appropriates the sum of \$250 million from the Savings Reserve Account ("Rainy Day Fund") of the General Fund for the 2008-09 fiscal year. These funds are to be used to finance a shortfall in funds available to pay health care benefits, administrative costs, and adequately fund the Plan's beginning cash balance on July 1, 2009.

2009-2011 Biennium

Increased Premium Contributions

Appropriated Funds

Sections 1(b), (c), and (d) appropriate the estimated required funds to support increased employer contributions to continue non-contributory benefit coverage for eligible employees and retired employees enrolled in the Plan for the 2009-2011 Biennium. These appropriations correspond to an annual 8.9%

premium increase in <u>non-contributory</u> premium rates for the fiscal year beginning July 1, 2009, and an additional annual premium increase of 8.9% for the fiscal year beginning July 1, 2010. Historically, the Plan has applied a premium increase in October of the first fiscal year of a biennium; however, the premium increases in the bill change that methodology to an annual increase at the beginning of each fiscal year of a biennium. The table below reflects the allocation of appropriated funds by fund source:

Additional Employer Contributions Appropriated Funds				
Fund Source	FY 2009-10	FY 2010-11	Biennium	
General Fund	\$132,214,752	\$276,179,709	\$408,394,461	
Highway Fund	\$6,170,022	\$12,888,386	\$19,058,408	
Other Funds	\$27,276,062	\$56,976,206	\$84,252,268	
Total	\$165,660,836	\$346,044,301	\$511,705,137	

Employee Funds

Section 2(g) of the bill authorizes an annual 8.9% premium increase in contributory premium rates for the fiscal year beginning July 1, 2009, and an additional annual premium increase of 8.9% for the fiscal year beginning July 1, 2010. The estimated additional premium contributions from this change are listed below:

Additional Employee Contributions For Contributory Dependent Coverage				
Fund Source	FY 2009-10	FY 2010-11	Biennium	
Employee Contributions	\$33,915,132	\$70,844,373	\$104,759,505	

Total Increased Premium Contributions From Appropriated and Employee Funds

The table below reflects the total additional premium contributions projected to be received by the Plan over the 2009-2011 Biennium as a result of the authorized premium rate increase:

Total Additonal Premium Contributions From Appropriated and Employee Funds				
Fund Source	FY 2009-10	FY 2010-11	Biennium	
Appropriated General Fund	\$132,214,752	\$276,179,709	\$408,394,461	
Highway Fund Other Funds	\$6,170,022 \$27,276,062	\$12,888,386 \$56,976,206	\$19,058,408 \$84,252,268	
Sub-total Sub-total	\$165,660,836	\$346,044,301	\$511,705,137	
Employee Contributions	\$33,915,132	\$70,844,373	\$104,759,505	
Total	\$199,575,968	\$416,888,674	\$616,464,642	

Financial Savings for the 2009 Biennium

Per the requirements of Senate Rule 42.2, House Rule 36.2, and G.S. 120-114 actuarial analyses have been prepared with respect to the bill's authorized benefit and other changes that are estimated to affect the financial condition of the Plan. A summary of the authorized changes are described below including the estimated actuarial impact of these changes.

Sections 2(c), (d), and (e) of the bill authorizes various benefit changes to include increased annual deductibles, annual co-insurance maximums, increased office visit co-pays, increased outpatient prescription drug co-pays, a new mid-tier co-pay for chiropractor, mental health, substance abuse and physical, occupational, and speech therapies, a new specialty drug co-pay and utilization of a specialty drug vendor. Effective January 1, 2010, the bill also eliminates the current in-network routine eye examination benefit offered under the Plan.

A summary of the out-of-pocket changes for medical benefit related services are summarized in the table below:

Medical Benefits	PPO	Basic	PPO S	Standard
Plan Member Co-pays (per visit)	Current	New Co-pay	Current	New Co-pay
Primary Care	\$25	\$30	\$20	\$25
Specialty Care	\$50	\$70	\$40	\$60
Urgent Care	\$75	\$75	\$50	\$75
Inpatient Hospital	\$200	\$250	\$150	\$200
New mid-tier Co-pay for Chiropractor, Physical-Occupational-Speech Therapy, and Mental Health/Substance Abuse	\$50	\$55	\$40	\$45
Annual Deductible In-network Out-of-network	\$600 \$1,200	\$800 \$1,600	\$300 \$600	\$600 \$1,200
Coinsurance Maximum In-network Out-of-network	\$2,500 \$5,000	\$3,250 \$6,500	\$1,750 \$3,500	\$2,750 \$5,500

For acute and maintenance prescription drugs, the co-pay for brand drugs increases from \$30 per script to \$35 per script, brand drugs with a generic equivalent from \$40 per script to \$10 plus the difference in the Plan's gross allowed cost of the brand drug and the Plan's cost of the generic equivalent drug, and from \$50 per script to \$55 per script for non-preferred brand drugs.

The bill authorizes a new co-pay tier for specialty prescription drugs determined to be "biotech" medications or other select costly medications that cost the Plan in excess of \$400 per prescription. The new per script co-pay will be equal to 25% of the Plan's cost for the drug or a maximum of \$100. The current co-pays for specialty drugs range from \$30 to \$50 per script. The bill also authorizes the Plan to contract with a specialty drug vendor through which to channel plan member purchases of specialty drugs on an outpatient basis or in a professional office or institution setting.

Aon Consulting, the consulting actuary for the State Health Plan for Teachers and State Employees, estimates that implementation of the benefit changes included in the bill will yield the following projected savings:

Aon Consulting Projected Financial Savings Benefit and Provider Related Changes						
Category FY 2009-10 FY 2010-11 Bienni						
Medical Benefits	\$110,464,129	\$129,971,359	\$240,435,488			
Outpatient Prescription Drugs (acute drugs)	\$22,162,147	\$24,092,234	\$46,254,381			
Specialty Drugs	\$3,086,315	\$3,396,887	\$6,483,202			
Total	\$135,712,591	\$157,460,480	\$293,173,071			

<u>Hartman & Associates</u>, the consulting actuary for the General Assembly's Fiscal Research Division, estimates that implementation of the benefit changes included in the bill will yield the following projected savings:

Hartman & Associates Projected Financial Savings Benefit and Provider Related Changes						
Category FY 2009-10 FY 2010-11 Bienni						
Medical Benefits	\$111,266,000	\$135,041,000	\$246,307,000			
Outpatient Prescription Drugs (acute drugs) \$24,015,000 \$24,225,000 \$48,240,00 Specialty Drugs \$3,026,000 \$3,292,000 \$6,318,00						
						Total

Provided below is a comparison table reflecting the specific results of each consulting actuary by the type of benefit and provider change included in the bill:

Projected Financial Savings by Type							
	Aon Consulting (Plan)			Hartman & Assoc. (General Assembly)			
Category	FY 2009-10	FY 2010-11	Biennium	FY 2009-10	FY 2010-11	Biennium

Grand Total	\$135,712,591	\$157.460.480	\$293,173,071	\$138,307,000	\$162,558,000	\$300,865,000	

Other Changes Affecting the Plan

Section 2(a) of the bill eliminates the PPO Plus benefit alternative for plan members effective July 1, 2009. Employees currently in this plan will be provided the option to enroll in the remaining PPO Basic or PPO Standard plans. The PPO Plus alternative currently offers 90/10 coverage for an additional premium charge paid by the plan member.

Section 2(b) of the bill implements a "Comprehensive Wellness Initiative" to focus on smoking cessation and weight management efforts.

The <u>smoking cessation</u> program will commence July 1, 2010 and will require all non-Medicare plan members to be enrolled in the PPO Basic plan unless the subscribing employee or retired employee can attest that they or any enrolled dependent do not smoke or otherwise use tobacco products. For eligible employees or retired employees who have attested that neither they nor their enrolled dependents use tobacco products, or if their medical provider certifies that a plan member is in a smoking cessation program, they will have the option to enroll in the PPO Standard plan.

Aon Consulting, consulting actuary for the Plan, estimates the smoking cessation program will save approximately \$3.4 million in claims cost for the FY 2010-11. However, the administrative costs to begin implementation are estimated by Aon to offset any first year savings. Aon consulting noted that until further administrative costs and program implementation issues are determined, estimating future savings to the Plan is not possible at this time. Hartman and Associates, consulting actuary for the General Assembly's Fiscal Research Division, does not project any financial impact to the Plan from the smoking cessation program. According to Hartman and Associates, the lack of program parameters and specific administrative costs prevents any reasonable analysis to be conducted.

The <u>weight management</u> program authorized in the bill will begin effective July 1, 2011. Under this program all non-Medicare plan members will be enrolled in the PPO Basic plan unless the subscribing employee or retired employee attests that the ratio of weight and height of the employee or retired employee, or for any of their enrolled dependents, meets certain evidence-based healthy weight clinical

guidelines. A plan member who cannot meet the Plan's weight and height ratio guidelines will remain in the PPO Basic plan unless a medical provider certifies the plan member has a medical condition that prevents them from attaining a specified ration of weight and height, or if the member is actively participating in a Plan-approved weight management program.

Neither the Plan's consulting actuary, Aon Consulting, nor the General Assembly's consulting actuary, Hartman and Associates, have estimated any financial impact due to the weight management program. The July 1, 2011 implementation date and yet to be developed administrative costs and program implementation requirements do not allow for any reliable financial projection at this time.

Section 2(h) of the bill directs the Plan to achieve a reduction of \$18 million in FY 2009-10 and \$20 million in FY 2010-11 in pharmacy provider costs through its existing contract authority with the Plan's Pharmacy Benefit Manager. These savings are based on the Plan's actuarial projection dated March 20, 2009 which makes specific assumptions about enrollment, estimated costs and utilization trends. Total savings under this authority may increase or decrease without adjustment based on a change in total enrollment provided that the rate of savings achieved on a per member per month basis remains constant. Adjustments to total savings may be made within 60-days after each six-month period of a fiscal year if savings exceed 105% of the specified savings.

Reconciliation of Plan's Financial Requirements

According to available information from the Executive Administrator of the Plan, the Plan needs an immediate appropriation of \$250 million for the current 2008-2009 fiscal year to operate through June 30, 2009, and to provide for an adequate beginning cash balance to begin operations for the new fiscal year commencing July 1, 2009. In addition, for the new biennium beginning July 1, 2009 the Plan is estimated to require over \$1.2 billion in additional financial support to remain solvent and maintain minimum claim stabilization reserves for the 2009-2011 biennium. If the Plan were to maintain current benefit levels and assuming a 9% per capita claims trend, the Plan would require an estimated 30.8% premium increase for the biennium (effective October 1, 2009).

The bill addresses the projected shortfall by authorizing the following changes:

- 1. Authorizing a 8.9% annual premium increase on July 1 of each fiscal year of the biennium for non-contributory and contributory premium rates; this change moves the historical date to increase premium rates from October 1 in the first year of a biennium, and moves to an annual premium increase;
- 2. Eliminating the current PPO Plus option benefit alternative;
- 3. Increase plan member out-of-pocket requirements for certain medical and prescription drug benefits; and
- 4. Directing the Plan to achieve a reduction of \$18 million in FY 2009-10 and \$20 million in FY 2010-11 in pharmacy provider costs through its existing contract authority with the Plan's Pharmacy Benefit Manager.

A financial summary table provided below provides a projected reconciliation of the financial related changes authorized under the bill assuming the Plan's consulting actuary's estimate of projected financial need for the 2009-2011 biennium, their projected financial savings due to benefit and other provider related changes, and their estimate of additional premium contributions:

10) Balance	ψυυ. τ	(\$5)			

Note: The \$2.0 balance remaining at the end of the biennium is a product of rounding error and a difference in projected ending cash balances between financial projections estimating total financial requirements and final requirements after the authorized premium increases, benefit changes, and other program changes. This difference is not expected to have an adverse effect on the Plan's finances.

ASSUMPTIONS AND METHODOLOGY:

The actuarial analyses used by each respective consulting actuary are on file with the Fiscal Research Division. Copies of each respective consulting actuary's analysis, including assumptions, are also attached to the original copy of this Legislative Actuarial note.

Summary Information and Data about the Plan

The Plan administers health benefit coverage for active employees from employing units of State agencies and departments, universities, local public schools, and local community colleges. Eligible retired employees of authorized employing units may also access health benefit coverage under the Plan. Eligible dependents of active and retired employees are authorized to participate in the Plan provided they meet certain requirements. Employees and retired employees of selected local governments may also participate in the Plan under certain conditions. Members of fire, rescue squads, and the National Guard may also obtain coverage under the Plan provided they meet certain eligibility criteria.

As of July 1, 2008, the State finances the Plan on a self-funded basis and administers benefit coverage under a Preferred Provider Option (PPO) arrangement. The Plan's receipts are derived through premium contributions, investment earnings and other receipts. Premiums for health benefit coverage are paid by (1) employing agencies for active employees, (2) the Retiree Health Benefit Fund for retired employees, and (3) employees and retirees who elect dependent coverage. Total requirements for the Plan are estimated to be \$2.6 billion for FY 2008-09. The Plan's PPO benefit design includes three alternative benefit levels offered to plan members. The three alternative benefit levels include the following:

- 1) The "Basic" 70/30 plan that offers higher out-of pocket requirements in return for lower fully contributory dependent premiums;
- 2) The "Standard" 80/20 plan; and
- 3) The "Plus" 90/10 plan with enhanced benefits via lower out-of pocket requirements as compared to the other PPO plan alternatives offered.

Employees and retired employees electing coverage under the Plus alternative must make a partially contributory premium contribution for their own coverage. The Basic and Standard plans offer coverage to employees and retired employees on a noncontributory basis. Coverage for dependents under all plans is offered on a fully contributory basis.

Financial Condition

Financial Projection (Revised) for FY 2008-09 — For the fiscal year beginning July 1, 2008, the Plan began its operations with a beginning cash balance of \$139.8 million. Receipts for the year are projected to be \$2.3 billion from premium collections, \$53.9 million from Medicare Part D subsidies, and \$2.7 million from investment earnings, for a total of slightly over \$2.3 billion in receipt income for the year. Projected disbursements from the Plan are expected to be \$2.4 billion in claim-payment expenses and \$168.7 million in administration and claims-processing expenses for projected total expenses of nearly \$2.6 billion for FY 2008-09. The Plan's net operating loss is projected to be approximately \$264.4 million for the fiscal year, assuming a 9% annual claims growth trend.

Projected operating losses are expected to deplete the Plan's cash balance of \$139.8 million and leave it without sufficient operating resources to continue operations for the fiscal year. It is currently estimated by the Plan's Executive Administrator that the Plan will not be able to pay claims on a timely basis by March 31, 2009.

Consequently, the reforecast of Plan finances now indicates that the Plan will require up to \$300 million in additional resources to operate for the balance of the 2008-09 fiscal year. This amount represents the estimated funds necessary to pay claims and administrative expenses through June 30, 2009, plus funding a minimum stabilization reserve equal to 7.5% of projected claims, and assuming a future premium rate increase effective October 1, 2009.

Other Information

Additional assumptions include Medicare benefit "carve-outs," cost containment strategies including prior approval for certain medical services, utilization of the "Blue Options" provider network, case and disease management for selected medical conditions, mental health case management, coordination of benefits with other payers, a prescription drug benefit manager with manufacturer rebates from formularies, and fraud detection, and other authorized actions by the Executive Administrator and Board of Trustees to manage the Plan to maintain and improve the Plan's operation and financial condition where possible. Claim cost trends are expected to increase at a rate of 9% annually according to the Plan's consulting actuary. Investment earnings are based upon a 4.5% return on available cash balances.

Blue Ribbon Task Force on the Teachers and State Employees **NC General Assembly** State Health Plan for

Overview of the State Health Plan

November 2009

Authorization

- Authorized under Article 3A of Chapter 135 of the General Statutes as the State Health Plan for **Teachers and State Employees**
- Began in October 1982 as a self-funded Indemnity plan; currently utilizes a self-funded Preferred Provider Option (PPO) benefit design
- members in all 100 counties of the State, most other health benefit coverage for nearly 661,000 plan Currently provides employer sponsored group U.S. states and some foreign locales

PPO Benefit Design

The Plan's PPO benefit design includes two benefit alternatives: a "Basic" 70/30 plan that offers higher out-of-pocket requirements in return for lower fully contributory dependent premium rates; and

of pocket requirements for plan members but higher A "Standard" 80/20 plan which provides lower outdependent premium rates

Administration

The Plan operates as a receipt supported "enterprise" type agency

Based on its governmental status and purpose, the Plan is not subject to federal ERISA oversight Plan medical claims are administered through a thirdparty administrator (BCBSNC) and pharmacy claims through a pharmacy benefit manager (Medco)

Premium Contribution Design

Employing agencies pay 100% of the premium cost for eligible active employees Retirement Systems Division of the Department of State Treasurer pays 100% of the premium cost for eligible retired employees

Active Employees and Retired Employees pay 100% of the premium cost to cover eligible family members (dependents)

Notes

- 1) If your employment contract is for less than 12 months, contact your Health Benefits Representative or benefits office for monthly rates.
- 2) If you are actively employed and you or your dependent(s) are Medicare eligible, the State Health Plan is the primary insurer and the Non-Medicare rates apply. An exception to this would be if you or your dependent(s) are Medicare eligible due to end stage renal disease (ESRD).

Primary Groups Eligible for Coverage

State Employees: Eligible active employees from employing units of State agencies, departments and universities Local Education Employees: Eligible active employees of local public school systems and local community college institutions

commencement of retirement benefits from a State administered Retired Employees: Eligible former state and local education employees eligible to participate in the Plan based upon retirement system

Dependents: Family members of active and retired employees are authorized to participate in the Plan provided they meet certain eligibility requirements

General Eligibility Requirements

State paid non-contributory coverage:

Active Employees - permanent employees working at least 30 hours per week

Retired Employees – with five years of contributory State service

Employee paid full contributory coverage:

Active Employees – permanent employees working between 20 and 30 hours per week Dependents – spouses and unmarried children of Active and Retired Employees

General Eligibility Exception

2006, eligibility for State paid benefit coverage as a For Employees first hired on or after October 1, retired employee is as follows:

Years of Service	State Contribution
20 or more years of service	100%
10 up to 20 years of service	20%
5 to 10 years of service	%0
Less than 5 years of service	Ineligible

- Brand drugs with a generic equivalent increased from \$40 per script to \$10 plus the difference in the Plan's gross allowed cost of the brand drug and the Plan's cost of the generic equivalent drug
- Non-preferred drugs increased from \$50 per script to \$55 per script
- Specialty Drugs increased from \$50 per script to a new co-pay equal to 25% of the Plan's cost for the drug or a maximum of \$100.
- Authorized the Plan to contract with a specialty drug vendor through which to channel most plan member purchases of specialty drugs

^{1.} In-network hospital owned or operated practices may be subject to deductible and coincurance. Please call your physician or see the Provider Directory to determine if your physician's practice is hospital owned or operated.

2 The following preventive care benefits are available both in and out-of-network: gynecological exams, cervical cancer screenings, ovarian cancer screening, screening mammograms, colorectal screening and prostate specific antigen tests.

^{3.} Routine eye exams as of January 1, 2010 will no longer be covered. Check with your Health Benefits Representative about your benefit options for vision.

^{4.} All non-acute specialty drugs, excluding cancer medications, must be obtained through the Accredo specialty pharmacy.

^{5.} For a single copay, insulin dependent members will receive the test strips and non-insulin dependent members receive 50 test strips per 30 day supply. Adustional test strips needed are covered under the medical supply benefit.

SHP-788, Array.

All benefits are subject to medical necessity. Amounts shown reflect what the members pay.

Notes:

- 1) If your employment contract is for less than 12 months, contact your Health Benefits Representative or benefits office for monthly rates.
- 2) If you are actively employed and you or your dependent(s) are Medicare eligible, the State Health Plan is the primary insurer and the Non-Medicare rates apply. An exception to this would be if you or your dependent(s) are Medicare eligible due to end stage renal disease (ESRD).

Comments:

- a. The delinquent receivables totaled \$1,014,297.50 as of September 30, 2009.
- b. The average weekly medical claims cost net of claims refunds was \$32,607,110.75 for the four weekly claim disbursements.

(27,182,338)

(10,952,769)

(18,886,225)

146,846,396

43.054.653 (18,886,225)

43,054,653

- c. Pharmacy claims include three bi-weekly invoice cycles and averaged \$16,738,980.34 per cycle.
- Because these receipts are budgeted in FY 2009-10, the \$52 million prepayment will contribute to both the revenue and net income/(loss) variances throughout the fiscal year. e Approximately \$52 million in member premiums for the month of July were paid by the Retirement System in June 2009.

Consolidated Current Year v Prior Year

September 2009

a. Minor differences compared to other reports due to rounding
 b. Approximately \$52 million in member premiums for the month of July were paid by the Retirement System in June 2009.
 Because these receipts are budgeted in FY 2009-10, the \$52 million prepayment will contribute to both the revenue and net income/(loss) variances throughout the fiscal year.

MINUTES

BLUE RIBBON TASK FORCE ON THE STATE HEALTH PLAN FOR TEACHERS AND STATE EMPLOYEES Wednesday, December 2, 2009

9:00 a.m.

Legislative Building, Room 1228/1327

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met Wednesday, December 2 at 9 a.m. in Room 1228/1327 of the Legislative Building

Representative Hugh Holliman, Co-Chairman presided. Upon motion of Senator Apodaca and second by Ms. Adcock the minutes of the meeting of November 18, 2009 were approved. (ATTACHMENT: MEMBERS PRESENT.) Representative Holliman called attention to the summary of priorities developed from members' comments made at the November 18th meeting. Representative Folwell suggested some attention should be paid to fraudulent use of the State Health Plan. There was no immediate indication of where that might fall in the Task Force work, but the idea was taken under advisement.

PRESENTATIONS

Prioritizing the Work of the Task Force

Theresa Matula of the Legislative Research Division explained the priorities list was developed from the discussion as mentioned above. At that previous meeting, Gann Watson of the Research Staff presented an explanation of the legislation which created the Task Force and the areas the Task Force could consider, from oversight to benefits etc. Research Staff grouped the points made during the discussion into broad categories and sub-groups. The prioritizing was done by the Co-Chair, Representative Holliman. (ATTACHMENT: PRIORITIZING THE WORK OF THE BLUE RIBBON TASK FORCE.)

Representative Braxton was concerned that the list would 'handcuff' the Task

Force. Representative Holliman said items could be added based on the will of the group.

Chuck Stone said based on discussions with state employees, he would like to see
a comparative analysis with other state health plans and review of best practices in health
insurance.

Ms. Adcock would like to see early intervention considered. The Co-Chairman was amenable to the members' suggestions.

Wellness and Disease Prevention Promotion Efforts

Dr. Jack Walker, Executive Administrator for the State Health Plan began his presentation with a brief history of the Plan as created and the goals of the Plan. (ATTACHMENT: STATE HEALTH PLAN OVERVIEW.)

He said the two major causes of preventable deaths in North Carolina were tobacco use and lack of diet/physical activity. Yet, he pointed out, automobile accident deaths occupied more attention from media.

He provided demographic data concerning plan membership, type of plan, average of members etc. Membership by gender shows nearly 70% of the members are women.

Approximately 50% of the members of the plan have some sort of chronic condition. Responding to Mr. Stone's question of chronic versus acute/catastrophic, Walker said an acute condition lasts less than a year while chronic was ongoing and catastrophic was an acute condition with either ultimate improvement or death.

Mr. Walker explained that some of data in his report was provided from the Behavioral Risk Factor Surveillance Survey. Ms. Adcock asked how the figures might match up with data from the Centers for Disease Control. Casey Herget with the State Health Plan explained that the data provided here was specific to North Carolina and the State Health Plan.

Over 2004 and 2005 the State Health Plan began working to slow down the increased costs for members with chronic disease. The vehicle for this is called Health Smart run by a company called Health Dialog. The program involves coaching through contact with members to see if they will change their behavior thus change their risk scores thereby costing the Plan less money. Dr. Walker provided anecdotal information about the program. Representative Braxton asked the cost for the Plan to use Health Dialog and the extent of the company's work. Health Dialog is paid @ \$28 million per year. The Plan clears expenses and receives @ \$18 million on top of that. Dr. Walker, said an incentive program will be started through the HealthSmart in January to encourage members to be involved in case management with gift cards for those who complete the program.

In response to a question from Mr. Stone, Dr. Walker said less than 5% of the Plan members had completed a health risk assessment.

This was followed by statistics concerning the rationale for choosing tobacco use and weight issues as the target of the wellness initiative.

Mr. Stone asked about cost factors if only the smoker in a family was assigned to the 70/30 plan and not the entire family. Dr. Walker said he had no figure, but he said the challenge that would be faced, if a tier system such as Mr. Stone suggested, would involve changing the various payroll systems used in state government. He estimated it could take as long as five years to adjust payroll withholding etc. across the various agencies. Dr. Walker noted that while claims systems were based individually, the enrollment system with premiums is based on the enrolled unit and collected through the variety of payroll operations.

In another service provided by Health Dialog, data is developed to analyze lifestyle factors and sociodemographic profiles to allow messages to be tailored to various member-segments of the adult population. During this part of the presentation, Dr Walker

urged the group to remember the importance of keeping the healthy members in the Plan at a healthy level. And as he put it, "if one member gains a pound, then another member better lose a pound" so that the level does not climb overall. Keeping the people who are at the low level of weight at that low level will save health care costs. Dr. Walker said keeping healthy people in a healthy state would save more in costs than trying to "bend" the lifestyles of other members.

Dr. Walker explained further sections of the data showing such factors as emergency room use, in-patient use, socioeconomic status, education and clinical factors.

The State Health Plan smoking cessation begins July 1, 2010 with all members on the 70/30 plan, unless they check the application as a non-user of tobacco or are enrolled in a smoking cessation plan. The weight control initiative begins in 2011 with the target of a body mass index of 40. The Session law requires verification of the tobacco usage restrictions, but no verification on weight.

Mr. Stone expressed concern that many low income members did not have access to computers so that they could participate in the Health Risk Assessment to allow the Plan to address their needs. He suggested that all members should be required to take the assessment.

Representative Braxton asked what programs would be offered to members who were affected by the weight management component.

(At this point, Senator Apodaca needed to attend another meeting. He left saying the State Health Plan did a great job identifying where the money goes, but needed to do a better job in bringing money in, specifically younger members in the plan.)

To that end, Dr. Walker said to get dependent coverage increased would require the Plan to subsidize the coverage by 70% to %75 to bring in "nearly all the people on the Plan that you would desire to have on the Plan."

Dr. Walker said some agencies have work site health capability to work with wellness programs and other facets of employee health.

In the tobacco cessation program, he said participants would be given free nicotine patches, there would be access to the Quitline and FDA approved smoking cessation medications are covered by the Plan.

Ms. Adcock raised the point of cost of cessation drugs. She said providing free drugs to those who wish to stop using tobacco would bring savings that would outweigh the costs. Dr. Walker said the Plan would look at that.

Concerning weight-loss drugs such as Meridia and Xenical, Dr. Walker said people tend not to stay on them because they are not a long-term fix. He said they are effective, but difficult to tolerate. Ms. Adcock suggested increasing the nutrition visits per year for people who are obese and wish to lose weight.

In further discussion, Dr. Walker said there were some state agencies which showed they do a poor job encouraging healthy lifestyles for employees because those workers have very high health care costs. He suggested that the Department of Correction was in this category. He wants to set up a community clinic in the Butner area because the members there don't go to the doctor unless it is absolutely necessary and then it is emergency room or urgent care offices.

Mr. Stone compared State Health Plan with general population saying that higher educational levels usually meant better health conditions.

Representative Braxton asked if the state could hire a physician for some areas. Dr. Walker said that state law prohibits competition with private business. So he said the Plan has approached the provider community with the idea of contracting personnel and services.

Ms. Ransome brought up the Community Care Network as providing some of the support. Dr. Walker said the major barrier was the cost of the co-pays with the State Health Plan.

Ms Adcock said that providing services on-site or closer to members was a point to consider. Further she said if state law prohibited competition with private enterprise preventing the hiring of a physician then perhaps the law should be changed.

Dr. Walker provided insight into various wellness programs and sites that members could use. He said the challenge is getting members to engage in the programs. His opinion is that the mechanism must be brought to the work place. Dr. Walker said that the State Health Plan could only provide the various wellness services, other than the upcoming tobacco cessation and weight loss initiatives, to state agencies. The agencies can decide not to participate in some programs.

He also spoke of the question of various incentives for participation, i. e. should the Plan use more incentives such as t-shirts, tote bags and the like? He said such a decision would need guidance from the legislature.

In summary, Dr. Walker said the overall effort is aimed at saving money for members and taxpayers, strengthening the Plan through optimal health for members and lower out of pocket costs.

Representative Folwell asked about a previously referenced statistic that 35% of members did not take medications as prescribed. Tracy Stephenson from the State Health Plan explained that the figure related to chronic disease patients who tended not to adhere to the prescription protocol longer than six months. She noted that there had been some lowering of co-pays and the Plan was starting a pilot program to improve the adherence rate.

Representative Folwell also asked about the discovery that in one state agency 18% of the males above a certain age suffered from chronic conditions such as diabetes, pre-diabetes, hypertension—but had not been diagnosed. Dr. Walker said the discovery came during a health fair when a "shocking number" of males above a certain age did indeed have those previously undiagnosed conditions.

Representative Folwell said he was concerned with the future of primary care physicians as a part of the health care picture. He also said there should be some sort of consequence for members who used the Plan fraudulently.

Mr. Feezor said the various parts of government needed to be re-engaged with the Plan and take a more involved role. He suggested that units of government could use employee profiles to make the unit aware of the per-member cost of the agency.

Mr. Feezor also asked about feedback that might come after a health coach deals with a patient. Dr. Walker said the feedback is given to the primary care provider about what the coach is doing, but there was not a Current Procedure Terminology (CPT) code to allow a physician to charge for the service. In some instances, he said this means that the patient himself is the manager of his own health care, not a physician. He said there were motions toward better compensation for primary care physicians in these instances.

Dr. Walker said he believes there should be better availability for acute care at the work site and the use of nurse practitioners in place of the primary care physician who is not being compensated financially. He told the members that while better health would produce savings that the major benefit would be from greater productivity from a healthier work force.

Mr. Feezor asked if the Plan could provide agencies with risk factor assessment information. Dr. Walker said that information could be provided. Mr. Feezor went on to say that agency heads could see how their employees fit in the health scheme of things and thus into productivity. Ms. Adcock said departments should embrace the idea of work-site health opportunities as a measurable way to gain productivity.

Ms. Simmons who teaches in the Guilford County Schools spoke of two cases of teacher assistants, one of whom has a gross monthly just over \$1000, is paying \$500 per month for her husband's coverage that he has not used, the other assistant continued to work despite an ankle injury because she couldn't afford to take a day off to seek medical attention. Ms. Simmons referred to these women as the people who are behind the numbers that may be associated with the Plan.

Mr. Stone asked if there was comparative data to match North Carolina with another state plan with similar demographics. He said that when the benefits are calculated, who the plan members are must also be factored. Dr. Walker said the information for 48 states is available on line. Co-Chair Representative Holliman asked if a set of comparative date could be made available.

Mr. Stone said that often state employees with low incomes would be leaving one job each day and going directly to another with little food choice other than fast food with the inherent contribution to obesity. He believes a multi-faceted approach including nutrition is necessary. He also wanted to know if food preparation and actual food preparation demonstrations would be provided. Dr. Walker said he would have to look into that. He went further to say that the State Health Plan can't solve these issues by itself, that agency buy-in is necessary.

Representative Braxton asked Mr. Stone if SEANC was doing things to make members aware of health issues. Mr. Stone said that Health Plan articles were made available in news letters and presentations. He said the problem is how to structure the wellness initiative so that the programs (tobacco cessation and weight loss) are not punitive and considered to better for the individual's own health.

Representative Folwell asked for clarification on the exodus from the plan of young, healthy families. Dr. Walker cautioned that the exodus could not be considered necessarily as 'young' families, since he did not have that information. He did say that the Plan was insuring fewer people due in part to lay-offs, etc. He said the number of people seeking COBRA coverage had doubled. (Consolidated Omnibus Budget Reconciliation Act allows employees who are laid off to purchase group rate coverage for certain periods of time.) He said he would get further demographic information about the members who have been leaving the Plan.

Dr. Walker went on to say that a member could be healthy at 60 or not so healthy at 60 and that the goal was to make people healthy at any age. He said the need was to ingrain the idea of good health into peoples' lives. He added that schools needed to be involved in the goal of good health.

After Dr. Walker's presentation, Representative Folwell praised the information as putting a face on the problem. He reiterated his support for putting the Plan on a calendar year basis. He said his experience had been that those members who have been leaving the Plan are young, healthy families. Part of the problem he said is that members do not know how much their coverage will cost until the General Assembly passes the budget. As he put it, "We have no opportunity to compete for the business." Co-Chair Representative Holliman said that issue would be addressed.

Representative Holliman said the Task Force would meet again in January.

The Committee adjourned at 10:33 a.m.

Representative Hugh Holliman

Co-Chair, Presiding.

Carol Bowers, Commission Clerk

Ted Harrison, Minutes

State Health Plan and CWI **Overview**

Blue Ribbon Task Force

December 2, 2009

Objectives

- To provide key health statistics and background information about the State Health Plan membership
- Wellness Initiative (CWI) and describe how it To clarify the goals of the Comprehensive works
- To provide information on healthy living resources and benefits
- To answer questions and address concerns about the initiative

National Statistics

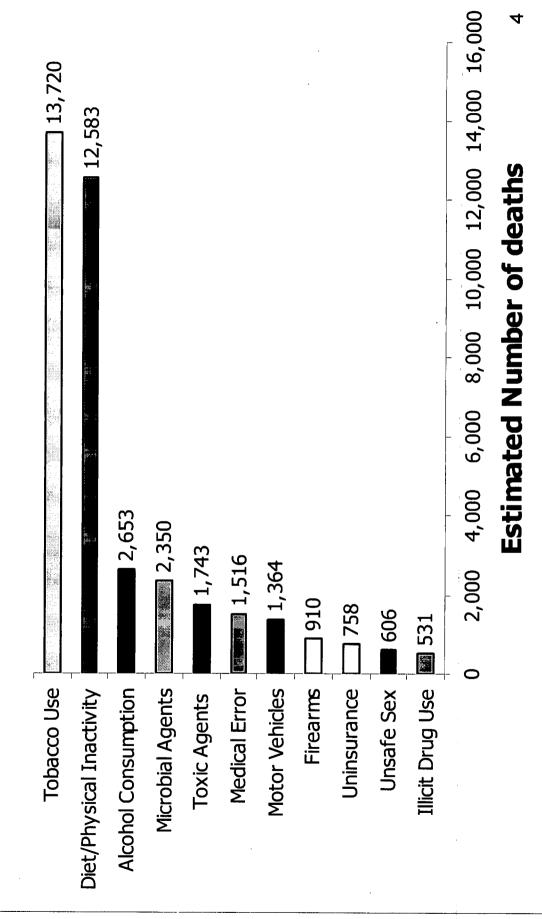

70% of deaths in the U.S. are related to chronic disease*

accounts for 75% of health care spending** Treating patients with chronic diseases

* http://www.cdc.gov/nccdphp

**http://www.fightchronicdisease.org

Preventable Causes of Death in North Carolina (2007)

S

Snapshot of State Health Plan Membership:

- 661,000 members
- Average age is 46.41 years
- 79.1% Enroll in Employee Only
- 80/20 Plan Predominant
- Employee/Children Plan: Children per
- Employee = 1.74
- Family Plan: Dependents per Employee = 2.84

Actives, Non-Medicare Retirees and Dependents Snapshot of Membership

Demographics

Health/Wellness Stats

- 69% female
- 13.2% under 30
- 18.3% 30 to 39
- 68.5% 40 or over

- 12% use tobacco*
- 32% are obese**
- 50% have a chronic or catastrophic illness***

Dr. Eric Finkelstein, Research Triangle Institute Obesity Cost Calculator, BRFSS - State Health Plan has ~12% of members who use tobacco 2009

Aon: Clinical risk analysis, Dec 2008

Plan Statistics

- management programs show results: NC Health Smart chronic disease
- Slowed down the rise in cost among members with chronic disease*
 - \$18 million saved in 2007*
- 2:1 return on investment to date**
- Plan continues to focus on wellness, disease management and prevention

^{*} State of Member Health Report 2009

^{**}Aon: Clinical risk analysis, Dec 2008

Why Tobacco and Weight?

- inactivity are leading causes of preventable Tobacco use and unhealthy diet/physical deaths in North Carolina.*
- Plan estimates 54,000 67,000 members use tobacco products**
- Plan estimates 25,000 members have a Body Mass Index of 40 or more ***
- North Carolina State Center for Health Statistics, 2002; NC Medical Journal, July/August 2002, Vol. 63, #4, Makdad, 2004 & NC Mortality 2006
- ** Behavioral Risk Factor Surveillance Survey (BRFSS) (2008)--State Health Plan has 12% -15% of members who use tobacco
- *** Dr. Eric Finkelstein, Research Triangle Institute Obesity Cost Calculator, 2009

Costs

- Plan estimates an average excess cost of
- \$2,660 per member/year for those using tobacco
- \$1,000 per member/year for those with a Body Mass Index (BMI) of 35 or more.
- Plan Actuary estimates that CWI will save the Plan \$13 million in 2010/2011 through increased cost sharing related to tobacco use
- Tobacco users in the 70/30 plan will pay on average \$40 per month more in cost sharing than they would have in the 80/20 plan

Body Mass Index (BMI)

Examples:

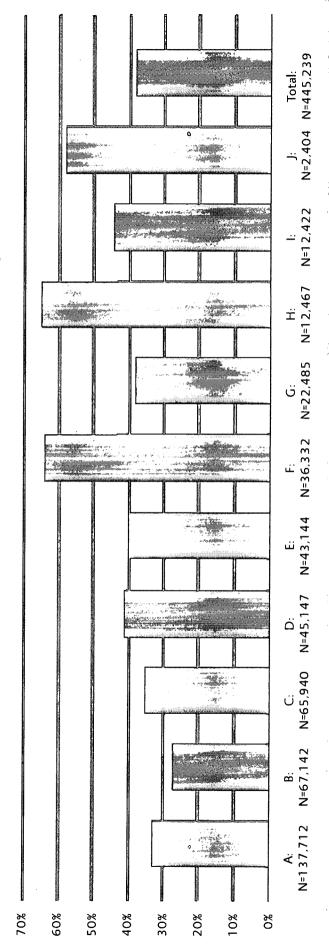

- a person who is 5'5" tall and weighs
- 145 lbs has a BMI of 24.1
- 175 lbs has a BMI of 29.1
- 225 lbs has a BMI of 37.4
- 250 lbs has a BMI of 41.6
- a person who is 6'2" tall and weighs
- 175 lbs has a BMI of 22.5
- 225 lbs has a BMI of 28.9
- 300 lbs has a BMI of 38.5
- 325 lbs has a BMI of 41.7

Comprehensive Wellness Initiative

- State Health Plan will implement the CWI as legislated by Senate Bill 287 (Session Law 2009-16)*
- Developed to help members succeed in quitting tobacco use, achieve and maintain a healthy weight and to lower the costs associated with the treatment of health conditions caused or complicated by smoking and obesity
- ➤ Tobacco cessation component starts July 1, 2010
- Weight management component starts July 1, 2011 (with BMI value of 40 or greater)

CWI does not include members who have Medicare as primary coverage

^{*}http://www.ncleg.net/Sessions/2009/Bills/Senate/PDF/S287v8.pdf

Comprehensive Wellness Initiative

- All members will be enrolled in the 70/30 Plan
- Members can qualify for the 80/20 Plan if they and their dependents for Plan years beginning in 2010 and going forward:
- ▼ Don't use tobacco
- Are actively trying to quit tobacco and

for Plan years beginning in 2011:

- Have a healthy weight, as defined by BMI
- Are actively trying to lose weight
- Have a medical condition that prevents them from attaining the specified weight range as certified by their physician
- apply for 80/20 Plan. Session law requires a verification process for Members must self-report during annual enrollment if they want to tobacco use.

Important Points

- Legislature because State employees do not contribute Premium discounting was not an option for the to their premium
- tobacco cessation and/or weight management activities All members, regardless of their tobacco use and BMI status may access the 80/20 Plan by engaging in
- 70/30 Plan will pay about 9% more than members on the 80/20 Plan. Dependent premiums are lower, but On average, Plan members who are enrolled in the copays and deductibles are higher

Employee Privacy

- Member privacy is an important focus for the Plan.
- Office have reviewed and addressed the federal and The Plan and the North Carolina Attorney General's state laws applicable to the CWI.
- The Plan's CWI complies with all state and federal laws and does not discriminate.
- The Plan has ensured that all CWI processes and procedures are HIPAA-compliant.

CWI Benefits & Supports

- **Tobacco Cessation**
- ➤ NC Tobacco Use Quitline
- Coaching & free patches
- ➤ Provider Counseling & Medications
- Weight Management Benefits
- NC HealthSmart Health Coaches
- NC Health Smart Personal Health Portal
- Blue 365 Discounts
- Worksite Wellness

Tobacco Cessation Supports

NC Tobacco Use Quitline - 1-800-QUIT-NOW

Partners: NC Division of Public Health & Health and Wellness Trust Fund (HWTF) Open 8:00 am - 3:00 am, 7 days a week in English/Spanish

- ➤ Telephonic tobacco cessation program
- Combining counseling & medication increases quit success.
- tobacco products set goals, understand medication, etc. Quit Coaches® help members who smoke or use other
- Plan covers two 8-wk multiple call programs/member/lifetime
- Free over the counter, generic nicotine replacement patches (NRP) available January 2010
- NEW: Members can have 4 months of patches per Plan year for a max of 2 years without a prescription
- Coach determines dosage; those with medical conditions need physician permission; NRP mailed to home

Tobacco Cessation Medical & Pharmacy Benefits

- Tobacco cessation counseling by a primary care or behavioral health provider is covered.
- FDA-approved tobacco cessation medications are already covered, including:
- ➤ Bupropion (generic for Zyban)
- Nicotrol Nasal Spray
- ➤ Nicotrol Inhaler
- ➤ Varenicline (Chantix)
- ➤ Nicotine Patches with prescription:
- \$10 generic copay
- \$5 over the counter generic copay
- Pharmacy Tier (\$55) to Non-preferred Tier (\$35) January 1. Branded medications will move from the Preferred

Weight Management Medical & Pharmacy Benefits

- All Plan members and dependents will receive 4 covered nutrition visits at a primary care copay per Plan benefit year.
- covered nutrition visits at zero copay. This benefit will not change. Previously, only members with a diagnosis of diabetes received 6
- will remove prior authorization from the following weight-loss medications: FDA-approved weight-loss medications are a covered pharmacy benefit currently with prior authorization. Beginning January 1, 2010 the Plan

benzphetamine (Didrex®)

diethylpropion (Tenuate®; Tenuate Dospan®)

phendimetrazine (Bontril®; Various)

phentermine (*lonamin*®; *Various*)

sibutramine (Meridia®)

orlistat (Xenical®)

Brand name weight-loss medications Meridia and Xenical, have moved from the Preferred Pharmacy Tier (\$55) to Non-preferred Tier (\$35)

CWI Supports for Members

NC HealthSmart Health Coaches

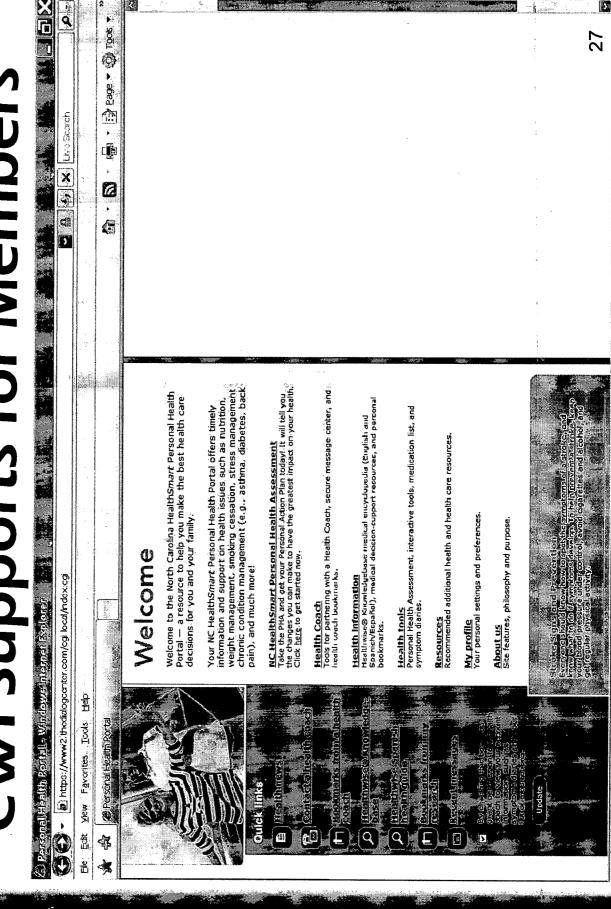

- nurses, respiratory therapists or dietitians, who are available to answer questions concerning Specially trained professionals, such as the health of members or their family.
- Health Coaches are available at no cost, 24 hours a day, 7 days a week.
- support and guidance in making important They provide members with education, decisions about their health.

CWI Supports for Members

NC Health Smart Personal Health Portal

- Offers timely information and support on lifestyle issues such as nutrition, weight management, smoking cessation, and stress management.
- (e.g., asthma, diabetes, back pain), and other health Provides support for chronic condition management
- positive and negative, and are provided strategies for Includes a Personal Health Assessment (PHA) and a understanding of factors influencing their health, both Personal Action Plan: members gain a better improvement.

MINUTES

BLUE RIBBON TASK FORCE ON THE STATE HEALTH PLAN FOR TEACHERS AND STATE EMPLOYEES

Thursday, January 21, 2010 9:00 a.m. Room 1228/1327 Legislative Building

The Blue Ribbon Task on the State Health Plan for Teachers and State Employees met Thursday, January 21, 2010 at 9 a.m. in room 1228/1327 of the Legislative Building. Co-Chair Representative Hugh Holliman presided. On motion of Senator Garrou the minutes of the December 2, 2009 meeting were approved.

PRESENTATIONS

Testing for Tobacco Use by Plan Members

Dr. Jack Walker, Executive Administrator for the State Health Plan introduced, Ann Rogers, Director of Integrated Health Management for the SHP who is in charge of testing.

Ms. Rogers said the request for proposal is being developed for a testing vendor. The vendor will be administering the statewide testing and collecting the physician verification for members who are in smoking cessation programs. The RFP seeks a vendor to provide testing at sites within 15 miles or 30 minutes travel time of the member's home. Members of the SHP had been concerned about earlier consideration for testing at the work site, so the SHP staff opted for testing away from the work place. The RFP will be released in February with the contract to be let in April.

The sample will consist of members and spouses not covered by Medicare selected after enrollment. There will be a saliva test for the presence of cotinine, and a secondary test will be offered at that time if the test is positive for the substance. (Cotinine is a metabolite of nicotine and is an anagram of nicotine.)

Once the vendor is in place members will be provided information about the testing process.

Senator Garrou asked how many members could be considered as tobacco users. Ms. Rogers said the Plan was using a figure of 15% of the membership based on the Behavioral Risk Factor Surveillance Survey of the membership. The overall statewide percentage of users is about 20%. Ms. Rogers said the lower membership figure could be due to the large number of public school teachers and others who work in smoke-free schools.

Co-Chair Representative Holliman asked what would happen if there was no testing. Ms. Rogers said Indiana does testing and has found that members were not necessarily truthful about their testing. Indiana has increased its testing and implemented

consequences for those who falsified their status. Indiana found twice as many tobacco users after they increase their testing. Co-Chair Holliman asked about the effects of a member's positive test on the rest of the family covered by the SHP. Ms. Rogers said that since the SHP uses a unit enrollment system the subscriber's tobacco use status drives the plan qualification. At initial enrollment all non-Medicare members will be enrolled in the 70/30 plan unless they attest to qualifying for the 80/20 plan. If a member/family is moved to the 70/30 plan due to failing the tobacco test that change would be in effect for the remainder of the benefit year and the next benefit year. Ms. Rogers said that while some states terminate employees who falsify their status, North Carolina opted for a more moderate consequence. She said that the minimum testing would involve 2400 members, but that the RFP is seeking cost estimates for as high as 10,000 tests. The 2400 number is about ½ of 1% of the SHP membership.

Mr. Stone asked if the off-site testing would be considered work time. Ms. Rogers said this issue was discussed in a meeting with state agency Human Resource directors. The SHP would like to get a sense of what the various employing agencies feel about this.

Lacey Barnes, Deputy Executive Director of the SHP said that the Office of State Personnel position is that the testing could be done on state time insofar as members who are covered under that Office. However she noted that teachers who fall under the various school systems do not come under the OSP. Mr. Stone also asked what the total cost would be after adding employee time, travel and testing expenses. Ms. Barnes said that since the SHP would not be paying for time and travel there was not way to calculate the total cost as he asked. Ms. Rogers said that testing hours could be from 5 a.m. until 10 p.m. Actual site mileage will be refined. Member addresses on files are home addresses and not work addresses so the current 15 mile radius is based on those the home locations.

Representative Braxton asked how long a person would have to stop smoking ahead of time so as to pass the test. Ms. Rogers said she would hesitate to answer lest people would try to beat the test. She said the SHP was looking for the most reliable most sensitive test. There will also be a secondary test available.

Ms. Simmons asked a similar question about the time between smoking and testing. She also asked that the SHP website be updated. Ms. Rogers said there was a deadline to get the testing information corrected on the website. Again Ms. Rogers stressed that the testing would be for SHP members and covered spouses. The attestation forms for non-smokers will be part of the information in the spring enrollment package. The test has varying levels of sensitivity; the SHP test will be set for a regular smoker which would eliminate second hand smoke as a factor.

Dr. Walker said if someone stopped smoking on or by June 30, 2010 and was tested in August; the person would register as a non-smoker.

Senator Garrou asked how the cost evaluation would be made. Dr. Walker said the first year anticipated cost is less than a half million dollars, and the total savings are estimated to be \$13 million, net of the testing cost.

Mr. Stone asked about smokers who enter smoking cessation programs and quit, but start again. Ms. Rogers said the attestation program will allow non-smokers and those in a smoking cessation program to report that status. The testing pool will be those who attest to being a non-user of tobacco.

Ms. Simmons asked if the test was for any other substances. Ms. Rogers said the nicotine derivative cotinine is the only substance being measured. The test will be certified by CLIA (Clinical Laboratory Improvement Amendment.) Ms. Rogers said she could see no problems if those tested wished to take the used swabs with them after the test.

Representative Braxton asked about the SHP financial support for the smoking cessation programs. Ms. Rogers said the Plan would pay for the programs for members. In addition various support information will be available: the SHP will work with the smoking QUITLINE, provide free nicotine cessation patches over the counter and reduced co-pays for tobacco cessation drugs.

Mr. Stone asked if the member didn't pass the first test and took the blood test and did not pass what the appeal process might be. He also asked about samples being maintained. Ms. Rogers said that the appeal process would be explained at time of testing. NOTE: A follow-up test can be either a blood test or another saliva test.

Co-Chairman Holliman asked what would be the process for the weight management initiative. Ms. Rogers said there was no testing planned, but a sample taken of members who say they are in management programs. Representative Holliman asked about the appearance that the stand on smoking was stronger than that on weight control. Ms. Rogers said there were some legal questions concerning weight testing and that the Plan's intention was to support a healthy life style. Dr. Walker said that that the law concerning the wellness initiative did not require testing in the weight portion.

Five Year Financial Requirements for the State Health Plan

Dr. Jack Walker, Plan Executive Administrator said the Plan was preparing an overview of the Plan that is being called Health Plan 101. The idea was to provide a comprehensive look at the entire structure and activity of the State Health Plan. Such a "course" could be ready as early as March. Senator Garrou said such a presentation would be a good idea.

Prior to beginning the explanation of the 5-Year Plan, Representative Braxton said he hope that current benefit levels would not be the basis. He said he felt the Task Force should be moving to make the plan financially sound and that might not mean current benefit levels for five years. Dr. Walker said he hoped his presentation would provide information that would answer Representative Braxton's questions. (SEE ATTACHMENT: State Health Plan Strategy 2011 and Beyond.)

Dr. Walker began by saying that maintaining current benefits through the next two biennia, with premiums increasing at the current 8% to 9%, the Plan would need almost two billion dollars in general fund revenue. He said that this was one of the reasons the Task Force was created as Representative Braxton had said. Co-Chair Holliman asked about the premium increase percentages. Dr. Walker said for large employers it was between 8 and 10 percent and for small employers there were double digit increases.

Currently the Plan collects about \$2.4 billion annually from agencies and members. That is expected to be about \$3.8 billion by 2015.

Dr. Walker said he expects the health cost and utilization to increase at least 9% per year and most likely 9.5 per cent.

Ms. Ransome asked about efforts to detect and prevent fraud. Dr. Walker said the providers were involved already in audit procedures. The Plan has recently hired someone to investigate member abuse. The Plan is looking for such things as high number of emergency room visits, use of several different hospitals to obtain drugs, use of multiple pharmacies and using more time on member review.

Mr. Stone asked about the percentage of premiums provided by members and what is paid by the state. Dr. Walker said that information was in the Health Plan 101, but could not recall it right now. Mark Trogdon of the Fiscal Research Staff provided information that in the current year employees paid \$381 million in premiums or about 17% of the total. In response to a question about seeking more federal money, Mr. Trogdon said most of the federal stimulus money which came to the state came to the Medicaid program with a small amount to COBRA. There was no direct money to programs per se.

Co-Chair Holliman said there was a potential for federal money if a national health plan is passed, but that is a big question mark.

Ms Ransome and Mr. Trogdon discussed the point that when there is a state position that is fund by a combination of state and other funds, the benefit costs are also shared on the same ratio.

Dr. Walker told the Task Force there are no significant incentives to participate in anything. In terms of cost sharing the level is between 20% and 30% per employee, or the member is paying that percentage out of pocket. He believes that getting into the 30% area means that people will forego medical services. He said that even at the 20% level some lower income people will pick and choose which services they choose to get. He termed the idea of future increases in cost sharing as "treacherous".

Mr. Feezor said that the provider delivery side doesn't should be included. He said that keeping provider institutions on point and having them improve has to be part of any solution.

Mrs. Adcock asked if the Plan could tell the members what to do, but if Blue Cross was the only one who negotiated with the providers. Dr. Walker said that was the case. Mr. Feezor said that Blue Cross Blue Shield was some plans in the works that could even provide its own provider network.

Dr. Walker said that the percentage of healthy members had been decreasing among active members, dependents and non-Medicare retirees. The projection is that this decrease will continue. The percentage of healthy members varies greatly from agency to agency. The principle health problems in some of the agencies with fewer healthy members: 1. diabetes, 2. hypertension.

The plan wants to lower the cost trend by increasing participation in healthy behavior management, lower barriers to health care at the primary care level and subsidizing dependent premiums. Dr. Walker said the first point in the strategy to lower costs was to keep the low risk members at low risk. To change the trend of doing the same thing repeatedly would require incentives for healthy people to remain healthy.

Members should have a personal health assessment. Dr. Walker stressed the need for leadership within agencies to do those things which the Plan can not do to reduce costs. Mr. Feezor said that agency cost accounting should reflect the link of expense of unhealthy employees. He went further to say that perhaps agencies should present such information to Appropriations Committees. Co-Chair Holliman agreed.

Dr. Walker noted that 82% of members during a year survey period had a primary care visit. Even so a Health Fair provided information that a large group of the population surveyed, mostly males between 41 and 50 were hypertensive or prehypertensive and over 50% pre-diabetic, undiagnosed diabetic or diabetic.

Dr. Walker said there is very little coordination being done in health today. A member visits a physician for a specific situation, is treated and very little is available for other health concerns. Case management under the SHP is aimed at coordinating and integrating the health care needs.

Ms. Adcock asked how savings were recognized in case management. Dr. Walker said it was primarily in proper medications and future hospitalizations. She also asked how to determine the difference in participation in case management and partial participation. Full participation is when a member completes the full case management protocol. Partial participation is when a member who starts a management protocol does not complete it.

Representative Braxton asked how case management was carried out. Ms. Rogers said the primary method was by telephone, but that method was not always the best. A request for proposals is being prepared for a more integrated approach involving case management, disease management and the medical home. Dr. Walker said the move was to use the telephone plus patient and provider face to face.

Using the example of lower co-pay for a generic lipid-reducing medication, Dr. Walker said purchases increased. He said, "Dollars change behavior." He said there would be further tracking to see if the members continued to take the generic medication.

Dr. Walker said the Plan would discuss incentives with the Legislature-"Without incentives, without provider participation, we are not going to bend the (cost) curve."

Senator Garrou asked if members who got flu shots had been tracked. Ms. Rogers said that this year had not been tracked. There is the ability to compare this year with last year.

Select Follow-up Items Requested by Task Force Members

Lacey Barnes, Deputy Executive Administrator of the State Health Plan provided the members with information on:

A. Reduce Cost Savings if individual member is moved to the 70/30 plan rather than all family members

The plan estimates that the savings reduction would be minimal, about 10%. The family is enrolled as a unit and payroll systems withhold premiums per the plan the member has selected. Claims are figured on the unit. The SHP would have to would have revamp costs in and of itself. Also, the matter of customizing the various payroll systems within state agencies is a large task, further complicated by the systems of school systems etc.

Responding to questions, Ms. Barnes said the Plan knew of no state or other large system that followed such a split out. Ms. Rogers said many other states that have a similar premium situation for employees are imposing a surcharge.

B. "Exodus" of Dependents

The Plan examined reasons for termination from the Plan of dependent coverage between June and September. Spouses in the under 55 group changed due to the employee leaving employment or a change to other insurance. Those over 55 changed due to retirement, change in marital status, or enrolled in Medicare.

The under 18 members left primarily because the member left employment.

Thus reduction in force due to budget problems and the pending eligibility audit for dependents seem to the main reason for the departure of over three thousand members during the period.

Co-Chairman Holliman asked the status of the dependent eligibility audit. Ms. Barnes said the vendor has been chosen. The audit will be not be started until after annual enrollment.

(SEE ATTACHMENT: Blue Ribbon Task Force Follow Up Items.)

Mr. Stone asked what if an attestation form from a Medicare eligible member is lost in the mail. Ms. Barnes said that Medicare primary members would not be moved at all.

Ms. Barnes said if a member attests to being a non-smoker and then fails the test and is moved to the 70/30 plan all deductibles paid to that time will be lost and the deductibles will be re-set to zero. When Co-Chair Holliman asked why this was the case, Ms. Barnes said that during the creation of the statute legislative members thought the consequences should be significant. Ms. Barnes said the Executive Administrator (Dr. Walker) chose to be guided the input of the legislators concerning any variance in the consequences.

State Health Plan Actuarial Studies

Carol Durrell, Director of Product Development for the State Health Plan provided the outline of studies which will be performed by Aon Consulting. (SEE ATTACHMENT: 2010 Planned Actuarial Studies.) The studies are being done to support requests of the Task Force, respond to questions from the Legislative Oversight Committee and constituents, and reflect needs of the Plan.

The Cost Comparison will look at Georgia, Virginia and Tennessee which have various benefit options. That study will be available in mid February. The schedule for the remaining studies is on the provided handout.

Mr. Feezor asked about including examination of length of employment in the first study with the other three states. Ms. Durrell agreed to take note of that.

On the 4th study concerning Other Post-Employment Benefits, Mr. Feezor asked if the liability for retiree benefits was a liability for the Plan for the State. It was agreed that the liability was to the state.

Ms. Simmons asked the feasibility of adding South Carolina to the state by state comparison. Ms. Durrell said that South Carolina was a smaller state and that the population of Georgia was much closer to that of North Carolina and made a better fit. Aon already has access to existing data for the 3 states designated.

Mr. Stone asked if public school teachers in Virginia were covered under that state's health plan. Ms. Durrell said she thought the teachers were not covered, but would provide the answer.

Co-Chair Holliman said the studies would be shared with the Task Force as the studies became available.

Rep. Preventative Folwell asked the overall cost of the studies. Ms. Durrell said the range was between \$190 thousand and \$220 thousand for all. The cost per study will be provided to the members.

Co-Chair Holliman announced the next three meeting dates:

February 25

March 25

April 22

Mr. Feezor asked if the projected cost increase was higher than historic data was due to the "unhealthy" condition of members of the Plan. Dr. Walker said previous trends included cost sharing and the projections reflected a freeze in cost sharing. Ms. Adcock asked for a goal the Plan would like to see. Dr. Walker said the goal is 6%. He said the projection was a decade of work.

Mr. Feezor said that as the work of the Task Force went forward toward recommendations that attention should be paid to premium costs, cost to the state, cost to employees, cost to dependants and underlying health care costs as a way of "stratifying" the approach.

Dr. Myers divided issues facing the Task Force into three categories:

- 1. Costs that can be controlled
- 2. Costs that can be controlled partially
- 3. Costs that can not be controlled.

Co-Chair Holliman said if and when there is a national health plan there will be a presentation of how that impacts the State Health Plan.

Ms. Simmons advised that a Guilford County school employee's family, members of the State Health Plan, would be featured in the television program Extreme Home Makeover on January 31st.

Representative Hugh Holliman, Co-Chair Presiding.

Ted Harrison, Minutes

Carol Bowers, Committee Clerk

State Health Plan Financing Current

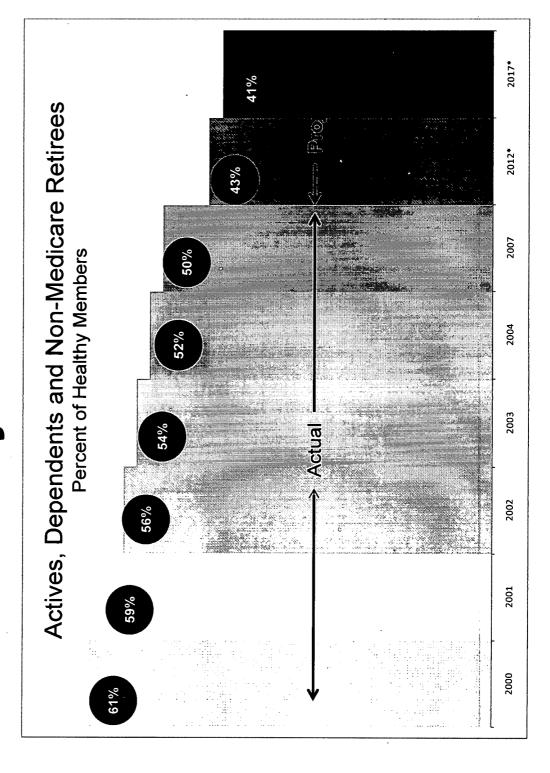

*Cost Sharing is represented by payments of deductible, coinsurance and copayments. There are some limitations set by state regulations.

Cost Increase Current

- Raise premiums
- Raise cost sharing
- Requirements related to tobacco usage and weight
- for disease or case management, selection of a primary completion of a health risk assessment, or development care physician, adherence to prescribed drug therapy, No significant incentives or participation requirements of a health improvement plan

_

NC HealthSmart Projection of **Healthy Members***

* With NO incentives or participation requirements

from projected 9.0 – 9.5% per year trend Objective: Lower health care cost trend

Maximize participation in healthy behavior engagement

- Weight management, smoking cessation, moderation of alcohol usage and safe driving habits
- Completion of a personal health assessment, creation of a health improvement work plan and adherence to that plan
- Participation in Plan programs for disease and case management ന :

Lower barriers to health care access at the primary care level <u>а</u>

- Consider cost sharing related to income
- Worksite acute care centers at minimal cost sharing

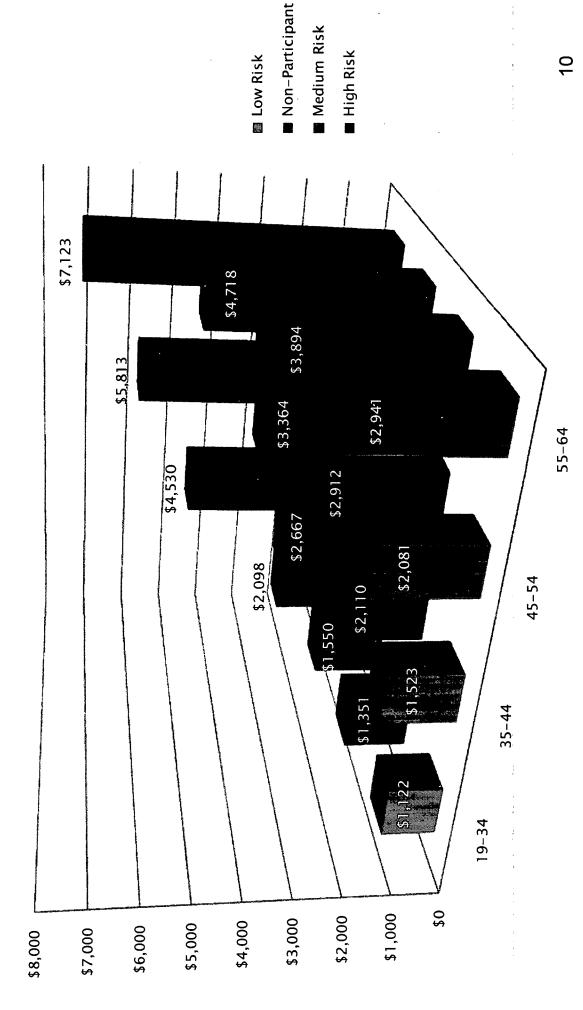

Subsidize dependent premiums to minimize current adverse selection

Strategy

- Focus on maintaining low risk members at low risk. Ċ
- Encourage medium and high risk members participation in case management and disease management. Δ.
- Promote worksite wellness, personal health assessments and medical homes. Improve access to appropriate health care. Ċ
- D. Lower barriers to appropriate health care.
- I. Worksite acute health care delivery (pending review)
- 2. Lower cost sharing for lower income employees
- E. Promote employer leadership¹

State Health Plan Financing **Future**

* Possible federal limitation on employee and retiree share of total health premium ** Possible federal minimum employer share of total health premium for dependents (House)

*** Employers will be limited to a percentage of cost sharing

Cost Increase Future*

Limited ability to increase cost sharing

Focus on member health engagement with participation incentives and requirements**

Employee Costs

1. Wages and productivity

2. Absenteeism

3. Worker's Compensation

4. STD & LTD

5. Health care Costs

Blue Ribbon Task Force Follow Up Items 1/21/2010 Lacey Barnes

The Plan was asked to respond to two of the issues that were raised by committee members in the last BRTF meeting in December.

The first question has to do with ineligibility for the 80/20 plan if one member of the family uses tobacco or has a BMI of 40 or more. You will recall that the Comprehensive Wellness Initiative goes into effect in July of this year. All non-Medicare members will be moved to the 70/30 Plan, and can then select the 80/20 Plan if they qualify. As the Plan enrolls families in units, with the employee as the subscriber and family members enrolled as dependents, if one member of the family cannot qualify for the 80/20 Plan, that is they cannot attest that no one smokes or they are unwilling to participate in a cessation plan, certified by their medical provider, then the family unit will remain in the 70/30 plan. Some felt that it may be unfair to enroll all family members in the Basic Plan when only one family member was obese or a tobacco user. The Plan was asked to estimate the impact on projected savings from the Comprehensive Wellness Initiative if family members could separately enroll in the plan for which each of them was eligible.

- The Plan estimates that the savings reduction if we did not move the family together would be minimal, about 10%. The decision to move families as units was driven by systems issues more than by savings for each individual in the family unit.
- The limiting factor remains financial, however, in terms of the costs to customize systems to accommodate individual status. As I said before, the Plan is offered to employees and their eligible dependents. Payroll systems withhold premium contributions based on plan selection and type of dependent coverage. Claims systems accumulate out of pocket maximums for the family based on the family unit. All of these systems are built around the subscriber/dependent model. To revamp that process would be complex and unique to the Plan. The State would incur costs to reprogram and retool the membership accounting, eligibility, coordination of benefits and a long list of other sub-programs associated with claims processing. Likewise, payroll systems used by state agencies, schools and other participating groups would need to change to capture this information and adjust the premium collection processes.
- As you probably know, there are a variety of laws and statutes that regulate the health insurance industry as well as tax laws that apply to the deduction of premium payments etc. While these laws do not specifically prohibit such a change, they do tie many requirements to the subscriber/dependent relationship. The Plan would need to conduct detailed analysis to ensure that by altering these relationships and uncoupling these dependencies, it did not inadvertently create a legal or regulatory problem for the state or for our members.

For all these reasons, the Plan cannot advise adjusting this provision of the CWI implementation plan.

Questions?

Exodus of dependents

In addition, the Plan was asked to provide information about the loss or "exodus" of dependents from the Plan in recent months. The concern is that the Plan's younger, healthier members were leaving due to the increased cost sharing provisions in the current benefit structure. The Plan has conducted analysis of the reasons for terminations that occurred between June and September 2009. The changes in dependent enrollment appear to be driven, in large part, by the changes in employees.

Spouses

The primary reasons for changing enrollment in the under 55 years dependent spouse group were:

- The employee left employment
- The spouse moved to other insurance

For the over 55 years group they were:

- Employee retired
- Change in marital status
- Became enrolled in Medicare

Dependent Children

The primary reasons for changing in the under 18 group:

• Employee left employment—by far the largest proportion

Over age 18 group:

- Dependent is over age and/or no longer a student
- Employee left employment and/or retired

So, in summary, there was a net change of 3,430 dependents between June and September 2009. The data indicates that most of these enrollment changes can be linked to 2 significant events: reductions in force due to budgetary constraints and the announcement prior to annual enrollment of the dependent eligibility audit. That having been said, some of these changes may have been related to the premium and benefit changes, but that does not appear to have been the primary driver.

State Health Plan - Comprehensive Wellness Initiative (CWI) Verification Process

A third party vendor will be hired by the State Health Plan to conduct the tobacco verification process, the exemption certification process and appeals. The CWI tobacco program starts July 1, 2010.

Tobacco Use Verification

Senate Bill 287 (session Law 2009-16) requires the State Health Plan to verify if members who attest to not using tobacco are eligible for the 80/20 plan. A sample of members will be selected using a stratified random methodology for tobacco use testing.

- 1. An initial saliva test will be used to determine tobacco use.
- 2. A secondary test will be offered immediately if test results are positive.
- 3. Testing will not be conducted at the worksite to reduce member privacy concerns.
- 4. Non-Medicare primary subscribers and their spouses may be selected for tobacco testing.
- 5. Testing sites will be within 15 miles and 30 minutes drive time from the member's home.

Tobacco Program Certification Process

Members may qualify for the 80/20 plan if they are actively trying to quit using tobacco. A random sample of members who attest to participating in a cessation program may be required to submit a physician signed form certifying that the member is enrolled in a cessation program.

Consequences of Non-Compliance for 2010/2011

Members who refuse testing, test positive for tobacco use or fail to submit a physician certification form within the required timeframe and their covered dependents will be moved from the 80/20 plan to the 70/30 plan for the remainder of the 2010/2011 benefit year. Members will forfeit any coinsurance and deductibles already paid under the 80/20 Plan during the 2010/2011 benefit year. Members and their covered dependents will be eligible to enroll **only** in the 70/30 plan for the 2011/2012 benefit year.

Appeals

Members may appeal testing results and administrative errors. Members who refuse testing may not appeal.

*Effective July 1, 2011, the weight management component of the CWI will start. The process around Body Mass Index (BMI) verification has not been determined, however, the certification process, including consequences and appeals, does apply. A random sample of members who attest to being in a weight management program or to having a medical condition that prevents the attainment of the specific weight range may be required to submit a physician certification form.

Other State Program Examples:

Indiana Tobacco

- Members sign a waiver at enrollment
- \$20/month/premium discount for non-users
- Test employees with saliva test
- Number of employees reporting tobacco use increased as penalties became more severe
- 2010 Penalty: Termination of Job

Alabama Weight

- Members sign a waiver at enrollment
- \$25/month surcharge
- Members in wellness program, at low risk, under physician care or engaging in selfmanagement may receive \$25/m discount
- Must participate in annual health screening
- Penalty is surcharge

2010 Planned Actuarial Studies

		Due Date
1	Limited State by State Benefit Comparison/Cost	2/15/10
1.	This study will compare the North Carolina State Health Plan's	2/13/10
	Membership demographics, premium structure, benefits and loss ratios	
	to those of three key southeastern states (Georgia, Virginia and Tennessee)	
	that offer multiple benefit options.	
	that offer maniple benefit options.	
2	Consumer Directed Health Care	4/30/10
2.	Consumer Directed Health Care (also referred to as "Consumer-Focused Health Care")	4/30/10
	Study will review the potential for Health Reimbursement Account	
	(HRAs) or Health Savings Account (HSAs) arrangements.	
,	(TICAS) of Treatur Savings Account (TISAS) arrangements.	
3	Medicare Products and Strategy	
٠,٠	This study will review how the current PPO plans work in relation	5/14/10
	to Medicare, and study other types of plans currently available to	
	employer groups and individual Medicare recipients, such as	
	Medicare Advantage and Medicare Supplement type plans.	
4.	OPEB or "Other Post-Employment Benefits" Reduction Strategy	6/30/10
	This study will be conducted in tandem with the Medicare Strategy	
	Study. It involves the development of a strategy to reduce state liability	
٠	for retiree health benefits. Accounting rules require the state to report	
٠,	the liability annually in its financial statement.	
ش	n i calification and a second	9/24/10
5.	Dependent Subsidy, including Salary Based Premium Structure	9/24/10
•	This study will look at the current dependent population and the level of subsidy needed to increase the number of dependents in the Plan;	
	it will also review the potential for a salary-based premium structure.	
	it will also review the potential for a salary-based premium structure.	

NORTH CAROLINA GENERAL ASSEMBLY

LEGISLATIVE BUILDING RALEIGH NC 27601

February 5, 2010

MEMORANDUM

TO:

Members of the State Health Plan Blue Ribbon Task

Force Committee

FROM:

Rep. Hugh Holliman, Co-Chair

Sen. Dan Blue Co-Chair

SUBJECT:

Meeting Notice

The State Health Plan Blue Ribbon Task Force Committee will meet on the following date:

DAY:

Thursday

DATE:

February 25, 2010

TIME:

9:00 am

LOCATION:

Room 1228 Legislative Building

If you have any questions concerning this meeting or can not attend, please contact Carol Bowers at 919-715-0873 or Hollimanla@ncleg.net

AGENDA

Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees

Thursday, February 25, 2010 9:00 a.m. Legislative Building, Room 1228/1327

I. Welcome, Introductions, and Remarks

Representative Hugh Holliman, Co-Chair Senator Dan Blue, Co-Chair

- II. Approval of Minutes
- III. State Health Plan as Compared to Other State-Operated Governmental Health Benefit Plans in Georgia, Tennessee & Virginia
 - Carol Durrell, Director of Product Development
 State Health Plan for Teachers and State Employees

IV. Select Follow-up Items Requested by Task Force Members

Cost-sharing and other policy issues related to plan member access to nutritional visits and weight-loss drugs under the Comprehensive Wellness Initiative

Ann Rogers, Director of Integrated Health Management, State Health Plan for Teachers and State Employees

Dr. Derek Prentice, Consulting Medical Director State Health Plan for Teachers and State Employees

V. Closing Remarks & Adjournment

next mitg Mar. 25

MINUTES

BLUE RIBBON TASK FORCE ON THE STATE HEALTH PLAN FOR TEACHERS AND STATE EMPLOYEES

Thursday, February 25, 2010 9:00 a.m. Legislative Building Room 1228/1327

The Blue Ribbon Task for on the State Health Plan for Teachers and State Employees met Thursday, February 25, 2010 at 9 a.m. in Room 1228/1327 of the Legislative Building. Co-Chair Representative Holliman presided. (SEE ATTACHMENT: Members and Guests Present.) On motion of Ms. Adcock the minutes were approved as presented.

The meeting was devoted to providing Task Force Members with information requested during previous meetings.

Presentations

Carol Durrell, Director of Product Development for the State Health Plan presented the SHP in Comparison with several other states. (SEE ATTACHMENT: Comparative Study to Georgia, Virginia and Tennessee State Health Plans.)

Senate Bill 287 directs the SHP to make such a comparison which was conducted for the Plan by Aon Consulting. Ms. Durrell said that the average insurance coverage time in large industries was 6 to 7 years, while state government employees tended to work for the state throughout their work career and be covered after retirement. Many industries do not offer retiree coverage at all.

Only North Carolina covers community college and university employees. Virginia also excludes coverage for public school employees. North Carolina does not contribute to dependent coverage, whereas the other three states do make such contributions. North Carolina members tend no to opt for dependent coverage if there is only one dependent.

The highest cost members are the non-Medicare retirees. For Medicare retirees the SHP is the secondary plan.

In a comparison which takes the North Carolina demographics and normalizes the costs, North Carolina's cost is lowest among the four states. When considering the average claims cost per member per month the North Carolina cost is lower perhaps because of:

- 1. better contracted rates
- 2. more in network utilization
- 3. better health risk
- 4. better health management.

The plan options for active employee/ non Medicare retiree members vary among the four states with North Carolina having the two: basic and standard, while there are

four options in Georgia and three in both Virginia and Tennessee. Thus the other states must contract with more separate administrators.

In North Carolina, the state funds a little more than 41% of the family coverage. While other states pay between 77% and 89% of the family coverage.

Ms. Durrell said that if there members were charged a premium it could prompt younger, healthier members to the plan which might prevent reductions in benefits.

In addition to some of the earlier notations, there were these conclusions:

- N. C. is the only one with free coverage for retiree only and employee only
- Va., Tenn. And Ga. have employee-only premiums to subsidize dependent coverage
- Only Tenn. has two-tier premiums for actives and retirees

In the discussion, Representative Braxton asked how the family coverage rates were derived. Ms. Durrell said experience, age, sex and trends in overall costs go into the formula. SHP Plan Administrator, Dr. Jack Walker said to arrive at a future rate, the current family rate is multiplied by the same factor as the single member rate then take that total premium and subtract the total member rate at a 100%, what is left over is the dependent rate. Representative Braxton then asked if North Carolina was using the dependent rate to subsidize the active coverage. Dr. Walker said that actually employee coverage was being used as a slight subsidy for dependent coverage. The margin on employee only coverage is slightly larger than employee cost and a little bit of that margin is being used for dependent coverage. Further, Dr. Walker said the Plan loses money on employee/spouse coverage. He said younger people with younger children are cheaper for the plan that "people my age."

Co-Chair Representative Holliman asked if other states which charge for employee coverage use those funds to subsidize dependent coverage. Dr. Walker said if a state charged \$100/month per member if would raise a lot of revenue to provide dependent coverage.

In response to a question from Representative Braxton about other state experience with high risk case management, Ms. Durrell said Georgia does, but she was not sure of other states.

Mr. Feezor asked if there was a comparison of cost of care with other states. Ms. Durrell said that was not part of this study. Responding to another of Mr. Feezor's questions, Ms. Durrell said the community college and university employees tended to be healthier, therefore less expensive for the Plan. Mr. Feezor also asked if there was a way to anticipate what the new, younger State employees might be looking for in a plan. And he asked how the factor that State employees tended to stay employed longer with the state figured. Dr. Walker said the average age a member in the SHP was 9 years older than the average private sector worker. Mr. Feezor said the worker competition for the State tended to be the private sector rather than other states.

Mr. Stone asked if there were any figures to see what the SHP might have to do to subsidize dependent coverage like other states do. Ms. Durrell said that is under review. and that will be considered as the Plan focuses directly on dependent coverage. She said

that the review would consider what the dollar amounts an employee might pay to provide dependent coverage.

Representative Folwell asked if any of the \$140 million in federal Medicare money that came to Sate would wind up in the SHP. Tracy Stephenson, SHP Director of Pharmacy said the Plan was not eligible to receive any of these Medicare Part D subsidy funds. Ms. Ransome noted that the fund credit received reflected some stimulus money and part of a fallback in the Medicaid program.

Representative Folwell said the treasurer's audit noted some errors concerning employee premiums, he asked if that was caused by people who were incorrectly covered by the Plan. Ms. Durrell said that information would be provided.

Representative Folwell asked what incentive there is for a 58-year old retiree to be on any plan other than the 80/20 plan. Ms. Durrell said there was no such incentive. Representative Folwell also asked if the Medicare enrollment age was changed to 66 would the state be accountable for the additional year's coverage. The answer was yes, and a cost estimate would be provided.

Representative Folwell asked if other Medicare supplement information would require a shift to the calendar year for the SHP to match up. Dr.Walker said that shift would not be necessary.

Representative Folwell asked if the SHP had any answer to the question of why the largest purchaser of health care coverage in North Carolina could no provide that coverage better and cheaper. Ms. Durrell said the point raised a good question. Further she said that was the reason for the Blue Ribbon Task Force. Co-Chair Holliman asked for a clarification on the term "better and cheaper", if that mean in comparison with other states. Representative Folwell said he doubted that the average prison employee or school teacher could interpret some of the terms in the report. He said those employees want to know why they can't afford family health coverage through their employer. Ms. Durrell said the report would suggest one approach could be to charge an employee premium to subsidize dependent coverage. Representative Folwell said the conclusion could be drawn that the plan is having financial troubles and is structured to force away the younger healthier potential members who could boost the Plan efficiency. When he asked what the Plan, via Ms. Durrell, could suggest, she said that the report points to subsidizing dependent coverage as a way of increasing the membership base.

Senator Garrou said she wondered if Representative Folwell had an idea of what should be done. The Representative responded saying that he could not go to his state employee constituents and explain why the largest purchaser of the health care insurance in the State can not provide coverage better and cheaper than anyone else. He said the SHP does not have an answer, either. He said all we've got is "data and reports, not one solution." He said he would love to have a solution. Senator Garrou said that she thought that was what the Task Force was to do: gather information and come up with a solution. The Senator said that Task Force was to come up with recommendations to the General Assembly, but Representative Folwell said that could not happen until 2012 or 2013.

Mr. Feezor said Representative Folwell was on target that the Plan was able to purchase care at a cheaper rate, but that was offset by the accumulated risk of an older membership. He said the failure to recruit younger healthier members was an historical situation that would not be changed "anytime soon." Noting his own work experience, he said that pursuing lower costs without being cognizant of risks was not a good way of doing business.

Mr. Stone said the issue of provider reimbursement rate has not been addressed and what plans there were to address that. Ms. Durrell said the allowed costs were a part of the reimbursement rates. Further Mr. Stone said that provider reimbursement rates were a major part of the nationwide debate on rising health care costs.

Ms. Simmons said the fact that health care insurance is provided free to individual employees and retirees is considered as a benefit to some and as insurance to some. Her view is that it is a benefit. So she asked how it was viewed by the members. Co-Chair Holliman said it is a benefit, just as in the private market. Ms. Adcock said she considered it as a part of the total compensation package.

Ms. Adcock continued by saying the Task Force needed all the information available to grasp the entire issue/ She said there is a difference between what is being paid for coverage and what that coverage costs. She said she felt that we were not doing the best job to get the best product. She said the administrative part needed to be examined.

Representative Braxton asked if the family coverage price was lowered would the Plan be able to attract many more of the state employees in the \$30,000 to \$40,000 per year salary range, if the dependent coverage was not subsidized. His opinion was "no". Dr. Walker said unless the cost was less than \$200 those employees would not. He said further the subsidy for dependent coverage had to be at least 80% of the premium to make dependent coverage attractive. Mr. Stone said the idea of the total compensation package involves affordability and the North Carolina employee salary ranges compared to other states.

Ms. Adcock asked if health care costs in the other three states compare with the experience in North Carolina. Ms. Durrell said she would revisit that.

Mr. Feezor asked if the state is making a contribution for the Governmental Accounting Standards Board (GASB) retired employee obligation. (The Board directs government to treat all post-retirement benefits be accounted for on an annual basis, not pay as you go.) Mark Trogdon, Fiscal Research, said the current unfunded liability for the retired employee costs is \$28 billion projected over the 30-year period. That is funded from percentages of the contributions from the various state agencies. The money is held in a trust fund by the State Treasurer, the premium for a current retiree comes from that trust fund. No prefunding is being done. The trust is approximately \$500 million now. Representative Folwell noted that as the cost for retirees goes up and the number of retirees also increases there will be a convergence which would require an annual appropriation to the Plan of approximately \$1.4 billion per year. Mr. Trogdon responded to Co-Chair Representative Holliman's question about state who are prefunding this obligation say that two states were pre-funding others are considering reduced benefits or bonds.

Ms. Simmons noted a teacher assistant who pays \$603 per month in Plan coverage for her husband with a gross salary of \$575 per month. Ms. Simmons said she did not want to go back to tell the woman that not only was the Plan going up 8.9%, but that there maybe another \$100/month increase. Ms. Durrell said such an increase would not

necessarily be the case, since employee premiums was an item of discussion, but not a foregone conclusion. Co-Chair Representative Holliman said such an increase would come to pass if health care costs are going to be higher-the question was who pays it.

Representative Folwell, who sponsored a bill which requires the Office of State Personnel to provide workers with a present value of future obligations that each worker, asked the Plan had been contacted by any agencies about such information. Dr. Walker said "no".

Ann Rogers, Director of Integrated Health Management said the nutritional visit benefit had been extended to all members. Previously this benefit had been available only to diabetic members. She said since other plans did not see much member involvement even with zero dollars co-pay. The SHP has contracted for participation in the Eat Smart, Move More, Weigh Less program. (SEE ATTACHMENT: February 2010 Update.) She presented testimonial videos for the members to view.

Dr. Derek Prentice, Consulting Medical Director for the State Health Plan discussed medication for weight loss programs for members. (SEE ATTACHMENT: Weight Loss Medication Coverage Recommendations.) He said the history is that members tend to stay on weight loss drugs only 71 days on average. One of the drugs Meridia is no longer offered in Europe and the US requires a notice that it is contraindicated for patients with cardio-vascular disease. The recommendation is for the drugs continue for coverage by the Plan, but the co-pays should not be lowered. Mr. Stone asked if the SHP would be watching for correlations between people who did take these drugs and any adverse side effects-particularly coronary problems. Ms. Rogers said that some anomalies would be noted, but this was intended to take the barriers away, but not to recommend the medications. Dr. Prentice noted that the SHP was not a provider of the medications. Mr. .Stone said he was asking that the Plan have an awareness of any instances of serious adverse effects cause by the drugs. Dr. Prentice said the pharmacies have programs in place, but the first point of awareness came when the prescription was written. Mr. Stone said his primary concern was for coronary incidents that could result from the drugs.

The meeting adjourned at 10:32 a.m.

necessarily be the case, since employee premiums was an item of discussion, but not a foregone conclusion. Co-Chair Representative Holliman said such an increase would come to pass if health care costs are going to be higher-the question was who pays it.

¹FY 2009

²Adjusted for age, gender and benefits of North Carolina

Observation on Claims Cost

- North Carolina had the lowest average allowed claims cost PMPM for active employees and non-Medicare retirees
- North Carolina's average allowed claims cost PMPM is lower than all other states when normalized for NC's age/sex risk and plan design
- ◆ This could be a result of a combination of factors including:
- better contracted rates
- more in-network utilization
- better health risk
- better health management

Active Employees and Non-Medicare Retirees

- → Non-Medicare retirees are eligible for the same plans as active employees in all 4 states
- contributions as active employees in all 4 states ■ Non-Medicare retirees pay the same

Active Employee/Non-Medicare Retiree Plan Options for 2009

- 3 PPO plans (Basic, Standard and Plus)

★ Georgia

- OWH -
- PPO
- HDHP(HSA) with Employee owned portable account
- CDHP(HRA) with Employer owned account
- Kaiser HMO (fully-insured)

- Base HMO plan with buy-up options (including OON coverage, Expanded Dental, Vision & Hearing)
- HDHP
- Kaiser HMO (fully-insured)

→ Tennessee

- PPO
- POS
- HMO

Active Employee/Non-Medicare Retiree Plan Options for 2010

- North Carolina
- 2 PPO plans
 - Georgia
- HMO
- PPO
- HDHP(HSA) with Employee owned portable account
- CDHP(HRA) with Employer owned account
- Base HMO plan with buy-up options (including OON coverage, Expanded Dental, Vision & Hearing)
- HDHP .
- Kaiser HMO plan (fully-insured)
- **★** Tennessee
- PPO
- Pos
- HMO plans

Dominant Plans - based on Membership

★ North Carolina

- 80% of all members were in the Standard plan in 2009

★ Georgia

81% of all members were split almost evenly between the HMO and PPO plans in 2009

85% of all members were in the HMO/PPO plan in 2009

★ Tennessee

46% of all members were in the POS plan in 2009 with the remaining members split between other plans

2010 Employer Funding for Dominant Active Employee/Non-Medicare Retiree Plans

North Carolina	Total	Employer Contribution	Employer % Paid	Employee Contribution	Employee % Paid
Employee Only Family	\$377.16 \$910.10	\$377.16	100.0%	\$0.00 \$532.94	0.0%

Medicare Retirees

→ Medicare retiree plans differ in each of the 4 states

Medicare Retiree Plan Options for 2010

- ◆ North Carolina
- Same 2 PPO plans offered to active employees and non-Medicare retirees
- **★** Georgia
- 2 Medicare Advantage + Part D plans
- ▼ Virginia
- Medicare coordinating medical plan with buy-up to include an enhanced Part D plan
- **→** Tennessee
- Medicare Supplement (Medigap Plan D) for medical and no coverage for RX

North Carolina Retirees

- Medicare retirees are eligible for the same PPO plans as active employees
- Medicare with "carveout" coordination of benefits For medical benefits, SHP is secondary payer to (COB) - example on following page
- For pharmacy benefits, SHP is primary payer
- ➡ Retiree Drug Subsidy is received by SHP for Medicareeligible Rx coverage
- ► Retiree pays 100% contribution for dependent coverage
- ➡ Retiree pays 0% contribution for retiree coverage if hired prior to 10/1/2006
- ► Retiree pays 50%-100% of retiree coverage with less than 20 years of service if hired on or after 10/1/06

Carveout Coordination of Benefits (COB) Example

\$15,000 Hospital Bill (20 days) to Medicare

- \$1,100 (Part A Deductible)

\$13,900 Paid by Medicare

\$1,100 to SHP

\$600 (Individual Deductible paid by Retiree)

- \$200 (Inpatient Copay paid by Retiree)

\$300

× 0.8

x 0.2

\$300

\$240 Paid by SHP

\$60 Paid by Retiree

\$860 Paid by Retiree (\$15,000 - \$13,900 - \$240) OR

\$860 = (\$600 Deductible + \$200 Inpatient Copay + \$60 (20%))

Georgia Retirees

► Starting 2010, Medicare Retirees are eligible for 2 Medicare Advantage (Med) + Part D (Rx) plans

 ★ Retiree pays contribution

Virginia Retirees

- Medicare retirees are eligible for a retiree plan designed minimal cost sharing with an option to buy-up a Part D to pay medical amounts not paid by Medicare with (Rx) plan
- Retiree pays full premium less annown...
 more than 15 years of service (\$4 per year of service)

 | Application | A Retiree pays full premium less amounts credited for

Tennessee Retirees

- Medicare Supplement plan (Medigap Plan D) with no Rx ■ Medicare retirees are eligible for a self-insured Group coverage
- more than 15 years of service (on a sliding scale up to ► Retiree pays full premium less amounts credited for 41% subsidized)

Employee Only Family

Key Observations

- North Carolina is the only state (of the four states) that covers Universities and Community Colleges.
- provides employee-only and retiree-only coverage free North Carolina is the only state (of the four states) that of charge.
- for employee-only and retiree-only coverage, and in turn, Virginia, Tennessee and Georgia all charge a premium directly subsidize dependent coverage.
- Tennessee is the only state that offers a two-tier premium structure for both actives and retirees.

Key Observations, Cont'd

- 1.385. The member/contract ratios in the other three states range North Carolina has the lowest overall member/contract ratio at from 1.753 in Tennessee to 1.982 in Georgia.
- North Carolina has the highest percentage of employee-only coverage (74.7%) in its active population with only 25.3% of contracts including dependent coverage.
- Active contracts that include dependent coverage in the other three states represent a much higher percentage ranging from 46.1% in Tennessee to 58.2% in Virginia.
- ratios for both the Employee&Child(ren) and Family tiers. This may indicate employees are less inclined to purchase dependent coverage through SHP if they only have one child.

Key Observations, Cont'd

- North Carolina has the highest percentage of females (across all categories) than in the other three states.
- North Carolina had the lowest average allowed claims costs PMPM and plan design. This could be a result of a combination of factors cost is lower than other states when normalized for NC's age/sex for active employees and non-Medicare retirees, and the PMPM including:
- Better contracted rates
- More in-network utilization
- Better health risk
- Better health management
- contribution, the only alternative to address increased costs is to cost shift Because North Carolina does not charge the employee a premium to members who utilize the Plan. Ĵ

Summary

- determine where North Carolina membership and costs ■ The purpose of this presentation has been to take a more detailed look at key southeastern states to are in relation to those states.
- This information will lay the foundation for more detailed discussion on potential approaches to plan design and premium strategy going forward

Types of Health Plans—PPO Exhibit G

- network of preferred credentialed providers who accept a plan's payment based on a negotiated discount, but ◆ PPO's or Preferred Provider Organizations offer a these types of plans also allow members to seek services out of network.
- Members pay less out of pocket if they seek services in-network.
- Virginia's out of network option is similar to a PPO NC, Georgia, and Tennessee all offer PPO plans; plan.

Types of Health Plans—HMO's Exhibit H

- HMO's or Health Maintenance Organizations offer services through an exclusive network that its membership is required to utilize.
- An integral part of an HMO is to manage patient care through the required to select a primary care provider (PCP) under these patient's primary care provider, and typically, the member is products
- Although there are many different HMO models, there are two distinctive types of HMO's
- specialty services through his or her PCP, and a referral to a A Gatekeeper HMO typically requires a member to seek any specialist is required.
- services rendered by a participating provider. However, they In an open-access HMO, members are still restricted to may access specialty services without a referral.

Types of Health Plans—POS Exhibit 1

- side-by-side with PPO's because they are so similar. PPO's. Some companies no longer offer these plans POS or Point of Service plans, often look a lot like
- specialists in-network at a much lower rate, or seek product was an HMO; under this model, members services out of network without the same referral could go through their PCP to obtain referrals to In the past, the in-network component of a POS requirements, but higher cost-sharing.
- With the advent of 'open access' to specialists, many PPO and POS products look virtually the same.

Types of Health Plans—HDHP (HSA) **Exhibit J**

- deductible Health Savings Account (HSA) are plans with limits defined by law (e.g. \$1,200 deductible for 2010) ◆ High Deductible Health Plans (HDHPs) with a tax
- Both employers and employees can contribute to the HSA
- The HSA can be used to pay deductibles, coinsurances or other eligible expenses
- The concept is that if most services require a percentage of costsharing rather than copays, members will become more effective shoppers for their own health care services.
- incentives, low cost annual physicals, and very strong disease This type of plan can also be integrated with strong wellness and case management programs
- The HSA is the employee's account, and it goes with the employee if they should leave employment

Types of Health Plans—CDHP (HRA) Exhibit K

- ◆ A Consumer Driven Health Plan (CDHP) with a Health employer in a manner similar to funding other benefits techniques as an HDHP, but design is not limited to federal requirements, and the HRA is funded by the Reimbursement Account (HRA) employs the same
- The money doesn't have to be 'set aside' in a reimbursements out of the health plan fund. separate account; employers can provide
- employer if the member should leave employment. Any dollars provided via an HRA stays with the

Eat Smart, Move More, Weigh Less for NC Teachers and State Employees

February 2010 Update

Eat Smart, Move More, Weigh Less (ESMM WL) is a 15-week weight management program that uses strategies proven to work for weight loss/maintenance. The NC State Health Plan entered into a 2-1/2 year contract (July 2009 – December 2011) with NC Cooperative Extension and NC Division of Public Health. The contract provides funding to hire instructors to offer ESMM WL to state employees at their worksites in the five counties, i.e. Guilford, Mecklenburg, Orange, Pitt, and Wake, with a the high concentration of state employees.

A minimum of 250 classes will be offered between July 2009 and June 2011 at state worksites including public schools. Cost to the Plan, per participant, is \$160 for an average class size of 20 employees.

The protocol for the contract dictates participants pay a \$30 entry. Participants who complete at least 10 of the 15 sessions receive a \$25 refund.

Summary of progress made since July 2009:

- Hired two 0.5 FTE program coordinators to manage all contract activities
- Completed a statewide survey of existing instructors to assess their interest in working with state worksites
- Hired and trained eight program instructors
- Hired a lead instructor with primary responsibility of teaching classes as well as observing other instructors and providing performance appraisals
- Convened an evaluation team retreat and updated the evaluation instrument
- Developed on-line training modules and webinar presentation for training new instructors on an ongoing schedule
- Revised curriculum and program magazine to include new physical activity guidelines and other content updates
- Completed 22 classes during August 2009 December 2009
- Enrolled 440 participants in the 2009 series. Nearly 70% completed the program and achieved an average weight loss of 6 lbs.
- Forty-seven (47) classes in progress for January 2010 April 2010 increasing the total number of participants to 860.
- Developed and launched program Website www.ESMMWeighLess.com
- Encouraging use of the Worksite Wellness ToolKit training modules for ongoing participant support

<u>Current Formulary Status</u> – As of January 1, 2010, the Plan in consultation with the Pharmacy and Therapeutics committee, removed access barriers to weight loss drugs by moving brand products to the Preferred copay tier and removing the prior authorization requirements.

2009	2010
Generics (Phentermine, Diethylproprion, Phendimetrazine, Benzphetamine) - \$10	Generics - \$10
Non-Preferred Brands (Meridia®, Xenical®) - \$55	Preferred Brands (Meridia®, Xenical®) - \$35
Prior authorization required for all generic and brand weight loss medications initial prescriptions and renewals.	No prior authorization required for any weight loss medication initial prescriptions or renewals.

2009 Utilization statistics:

Total prescription users – 1,267 (56% generic users and 44% Brand users)

Total prescriptions – 3,060 (57% generics and 43% Brands)

Average Days supply per user - 71

Weight Loss Medication Clinical Information:

- Primary Care guidelines on the management of obesity recommend that pharmacologic therapy can be offered to obese patients who have failed to achieve their weight loss goals through diet and exercise alone. However, there needs to be a doctor-patient discussion of the drugs' side effects, the lack of long-term safety data, and the temporary nature of the weight loss achieved with medications before initiating therapy.
- All of the medications have side effects.
- Long-term safety and efficacy (>12 months) data are not available.
- The amount of extra weight loss attributable to weight loss medications is modest (< 10 lbs at 1 year).
- On January 21, the FDA requested the manufacturer of Meridia to add a new contraindication for the package labeling stating that Meridia is not to be used in patients with a history of cardiovascular disease. In Europe, Meridia has been recommended for withdrawal from the market due to the increased risk of cardiovascular events seen in clinical studies.
- Since 1997, 5 drugs have been removed from the US and International markets because of efficacy and safety concerns.
- There is no data to determine whether one drug is more efficacious than another, and there is no evidence for increased weight loss with combination therapy.
- There is no data about weight regain after medications are withdrawn, highlighting the need for sustained lifestyle and behavioral modifications.

Recommendation:

Because of the Comprehensive Wellness Initiative it is appropriate to remove authorization and large financial obstacles for these medications; however, the Plan should not lower copays any further for weight loss medications and promote these products due to safety and efficacy concerns.

NORTH CAROLINA GENERAL ASSEMBLY

16 West Jones Street LEGISLATIVE BUILDING RALEIGH NC 27601

MEMORANDUM

TO:

Members, State Health Plan Blue Ribbon Task Force

FROM:

Rep. Hugh Holliman, Co-Chair

Sen. Dan Blue, Co-Chair

SUBJECT:

Committee Meeting Notice

The State Health Plan Blue Ribbon Task Force Committee will meet on the following date:

DAY:

Thursday

DATE:

March 25, 2010

TIME:

9:00 am

LOCATION: Room 1228 Legislative Building

If you have any questions concerning this meeting or you cannot attend, please contact Carol Bowers, Committee Clerk at 919-715-0873 or Hollimanla@ncleg.net.

Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees

Thursday, March 25, 2010 9:00 a.m. Legislative Building, Room 1228/1327

I. Welcome, Introductions, and Remarks

Representative Hugh Holliman, Co-Chair Senator Dan Blue, Co-Chair

II. Approval of Minutes see Sharnese Ransome's Note

MINUTES

Blue Ribbon Task Force on the State Health Plan For Teachers and State Employees

Thursday, March 25, 2010 9:00 a.m. Legislative Building, Room 1228/1327

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met Thursday, March 25, 2010 at 9:00 a.m. in Room 1228/1327 of the Legislative Building. Co-Chair Representative Hugh Holliman presided. (SEE ATTACHMENT: Members and Guests Attending.)

Presentations

The early part of the meeting was given over to information regarding wellness programs. Co-Chair Holliman introduced Chris Shoffner, Managing Partner of the White Bear Group, an employee benefit consulting firm. (SEE ATTACHMENT: "Creating the Environment for Success etc.)

Mr. Shoffner's opening premise was that the only way to reduce the cost of the SHP was to get members healthier by modifying their behavior.

The example the Asheville Project; which employs value based benefit design. He promised to provide members of the Task Force with a paper which will be presented in Washington, D. C. on March 30, 2010 to a group convening to examine health care costs and benefits.

Mr. Shoffner quoted from the SHPS State Health Practices Study of 2007, "companies that spend less on healthcare focus on improving the health of their employees, while those that spend more, focus on the administrative aspects of healthcare, such as procurement." The SHPS study shows that best practice employers manage the care of their chronically ill employees, providing cash incentives to be healthier, along with a consistent communication objective.

Mr. Shoffner offered examples of several companies which have instituted health plans following these principles and experienced deep reductions in health care costs. Ordnance Systems Inc. and Safeway both used health reimbursement accounts.

In another portion of the presentation, using an excerpt from the American Academy of Actuaries, Mr. Shoffner pointed out that CIGNA used a consumer driven health care approach and classified nearly 250 drugs as preventive drugs and thus free under the CIGNA plan.

The Asheville Project approach to preventive health began in the mid 1990s with the idea of working with diabetic employees working for the City of Asheville. The startup began with the UNC School of Pharmacy and the North Carolina Association of Pharmacists. The diabetic patients received all the care associated with diabetes free. Out of this experience came the Ten City Challenge funded by Glaxo Smith Kline to try the approach on a larger scale and with a greater geographic spread. The model continued to produce the same results: lower health care costs, increased productivity, etc. Now the model has been expanded into other health problem areas: COPD, asthma, depression etc.

The City of Fayetteville has just completed the first year using this model. The results have been better than average.

To move the Asheville Project today Mr. Shoffner said requires four keys:

- Identify those with needs via Health Fairs etc.
- Engage beyond the chronically ill; remove barriers

- Educate through face to face coaching
- Communicate at all steps to allow all to get information

Mr. Shoffner believes the plan can make primary care profitable.

In the discussion that followed, Senator Apodaca asked how active primary care physicians were in the Asheville Project. Mr. Shoffner said a primary care physician and a pharmacist were required in the collaboration.

Representative Braxton asked how the results could be known, guaranteed in effect to prevent certain health problems. Mr. Shoffner said there was ten years of clinical information on the N. C. Pharmacists website. Representative Braxton also wanted to know if any entire states had tried this approach. Mr. Shoffner said he did not know if any states had implemented the plan on a full scale. He said a pilot had been done in Louisiana and the City of Rocky Mount had implemented it—but the results had been the same where ever it was used.

Dr. Myers said the data seemed to show the most benefits in the first year, but wondered about the savings beyond that time. Mr. Shoffner again referred to the N. C. Pharmacists website. He said the CIGNA figures showed the same savings the second year of the plan as the first. He also said that the report to be made in Washington on March 30th would quantify the results.

Mr. Feezor asked how Health Savings Accounts and Health Reimbursement Accounts figured into such a model as the Asheville Project. Mr. Shoffner said he favored the HRA because they offered more flexibility.

Mr. Stone asked if there was data regarding Medicare eligible participants. Mr. Shoffner said the Community Care Network and Medicaid has been running a hybrid of the model. Since the care is already free there is a lack of an incentive, but that an incentive could be laid over the model: with a gas card, phone card or some other type of cash value for the member.

Mr. Shoffner said that the coaching method used in the Asheville project was one on one. He did say that his primary care physician's opinion was that the introductory message for diabetics, for example, could be given to a group-after that whether the coaching was one on one or in a group would depend on preference.

When asked about using the Asheville Project as a pilot in the State Health Plan community, Mr. Shoffner said since there was ten years of data available why not implement the plan across the entire membership.

Mr. Feezor noted that the Community Care Network working in New Hanover County had used the group education method in its work.

Senator Apadoca asked the average age in the Asheville Project and if retirees were participating. Mr. Shoffner said retirees did participate in the Fayetteville and said the average employee age in the Asheville Project was about 40. Retirees' participation in other locations varied.

Representative Braxton asked the percentage of first year costs increased for the Asheville Project. Mr. Shoffner said he could not give a percentage, but the first cost for the Asheville Project was \$600 per member.

Mr. Stone asked if the analytical tool used to assess the membership was based on 30 cents per member per month across the board and the personal health record cost of 85 cents per member per month was based on those participants who were involved in the coaching aspects. Mr. Shoffner concurred.

Co-Chair Representative Holliman introduced Mark Ruby, Vice President for Business Development for BioSignia, a healthcare risk assessment company located in the Research Triangle Park. (SEE ATTACHMENT: Promoting Healthier Lives and Saving etc.)

Again the approach is to focus on disease prevention rather than "treating the sick". The company proposes health screening to 300,000 State Health Plan members twice each year

during a five year period. BioSignia believes this will have an impact on 70,000 plus diabetic and pre-diabetic SHP members. The company figures a \$124 million saving in health costs over the 5-year period.

BioSignia uses a system called Know Your Number which develops a confidential profile of the participant which identifies potential diseases and then an individual health plan which maps out the steps to improvement.

BioSignia has worked with the State Health Plan on various grant-funded projects and with several North Carolina agencies. The company is beginning to work with the N. C. Department of Correction and Kerr Drug in a coaching type situation like the Asheville Project.

The Know Your Number mechanism is such that the potential disease burden can be projected. For instance, the mechanism can project that the State Health Plan will have over 11,000 new cases of Type II diabetes in the next five years. As it stands now, that 5 years could bring the SHP 7500 new cases of heart disease and 5000 case of stroke. The Centers for Disease Control believes that 80% of heart disease, stroke and Type II diabetes is preventable. Theoretically, the SHP is facing \$600 million dollars in costs for new cases of heart disease, stroke and Type II diabetes over the next 5 years; people who have not shown up yet as having those risks.

According to Mr. Ruby, the current wellness approach involves old technology. The Know Your Number system shows the individual the knowledge to lower the risks and how to obtain that knowledge and use it in the individual cases.

In the discussion, Mr. Ruby told Mr. Stone that the Know Your Number system had not been applied to a group of Medicare eligible individuals. Also any face to face discussion of the health risk assessment would be up to the coaching group. The SHP has the informational breakdown of the pilot projects done with the state agencies using the KYN system.

While Mr. Ruby offered to do an assessment for members of the Task Force, but Dr. Walker, Executive Administrato of the SHP reminded the group that the members should not receive a gift from a vendor.

Ms. Simmons and Representative Folwell had requested time to speak to their fellow Task Force members.

Ms. Simmons provided a handout of including redacted pay slips for several employees from the Guilford County School system. (SEE ATTACHMENT: Guilford County Schools etc.) She termed this as "awareness time" in terms of costs to various members of the SHP and the needs of these members. Representative Braxton asked Ms Simmons if she had any feedback from people she spoke with concerning possible cost to members of approximately \$100 per month for themselves and \$250 per month to obtain coverage for families. She said the people believe that the SHP was a promise of affordable health coverage and these people believe that promise is for the employee's health care be paid for. She remembered the Task Force's first meeting when there was discussion of the impact of members paying \$10 per month, at another meeting the figure was \$25 per month and now the example was \$100 per month. She wondered if that figure would be \$200/month at the next meeting. As she said, "Where will it end?"

Dr. Harrison asked the percentage of SHP members who have member only coverage. Dr. Walker said that was 80%.

Mr. Stone said that employees and retirees had said to him that the State made a promise to provide employee coverage at no cost. Co-Chair Representative Holliman asked where the promise came from. Mr. Stone said this was contained in information provided at the time of employment. It is not clear if this is a promise in perpetuity.

Mr. Feezor asked Ms. Simmons if a member contribution was based on salary would be more suitable to the people she has spoken with. She said the effect of percentage increases did have a great impact and that a contribution based on salary would be better.

Although the term "promise" was used in further discussion there was no source or statute cited, only that the practice of employer-paid coverage for the employee had been in place for some time.

Next, Representative Folwell spoke to the Task Force regarding a change for the SHP to a calendar year. (SEE ATTCHMENT: House Bill 348 etc.) The bill to make that change, sponsored by Representative Folwell, Co-Chair Representative Holliman, Representative Blackwel! and Senator Blue (when he was a member of the House) is in the House Appropriations Subcommittee on Health and Human Services. Representative Folwell said the bill has been endorsed by the North Carolina Association of Educators, the State Employees Association, the North Carolina Retired Governmental Employees Association and the North Carolina Retired School Personnel Association. In addition, he said that 24 states use the calendar year for their respective health plans.

He asked the Task Force to endorse the change. Ms. Adcock said the idea seemed so logical and she wondered about opposition. Representative Folwell said the change would cost approximately \$25 million. Such a change, he said would mean no ability to increase premiums for six months. He pointed out that the state agencies were the largest payer of premiums, not the individuals.

Mr. Stone reiterated the support for the change by the SEANC. He also pointed out that every other year when the General Assembly was considering the budget, SHP members were being asked to sign the open enrollment forms without knowing what the premiums or benefits would be until the budget was passed. He said the change would also benefit Medicare recipients and members planning health savings account. He predicted that federal health care reform plans would be on a calendar year.

The meeting was adjourned at 11:56 a.m.

Creating the Environment for Success

- Define Value Based Benefit Design
- Explain Financial Impact of Best Practices
- Explore Three Specific Examples
- Asheville 2010

Value Based Benefit Design

- Value-based insurance design is a strategy that minimizes or eliminates out-of-pocket costs for highvalue services in defined patient populations.
- High value services are identified through evidencebased analysis.
- The more clinically beneficial and cost-effective the therapy is for a patient group, the lower the out-ofpocket costs.

SHPS Heath Practices What Every Self-Insured Employer Should Know Study

2007 SHPS Health Practices Study What Every Self-Insured Employer Should Know

Introduction from Rishabh Mehrotra SHPS President & CEO

What can we learn about healthcare from a steel company, or a bank, or a soft-drink bottler? Quite a bit as it turns out.

For all practical purposes, every self-insured employer manages its own unique health plan. It underwrites the cost of healthcare and owns the financial risk associated with the health of their employees. Yet, not all employers are equally adept at managing their health plan. Several recent studies by leading health actuarial firms have noted the same observation: there is a widening gap in the cost of healthcare between employers that cannot be explained by differences in workforce demographics, location or coverage. Some employers have experienced double-digit increases in healthcare costs for several years in a row. But there are also employers who are effectively administering many of the most-efficient health plans that exist in our nation today.

The premise behind the 2007 SHPS Health Practices Study is to understand why some employers are so much more efficient in delivering health benefits to their employees than others. Which strategies and tactics work? Do some benefits policies lead to higher costs? At the most basic level, the study revealed an interesting dichotomy – companies that spend less on healthcare focus on improving the health of their employees, while those that spend more focus on the administrative aspects of healthcare, such as procurement.

The results of the 2007 SHPS Health Practices Study offer clear direction for self-insured employers. To manage healthcare costs, employers need to take a sharply focused, outcome-oriented and relentless approach to measuring and managing the prevalent clinical risks within their covered population. Employers need objective health analytics combined with administrative, clinical and financial programs that support a culture of health. Sometimes, this means confronting employees directly with the need to change personal habits and health behaviors. However, the results of our study show that employers already navigating this path have reaped an enormous competitive advantage through improved health and productivity at lower cost. In companies where employee health is valued, the employer and employee both benefit.

Not all of the study findings reflect well on our industry. Some challenge traditional benefits practices, some make good intuitive sense and others go against the grain of conventional thinking.

I hope you will find the results of our inaugural health practices study illuminating – and worthy of discussion on how we can create a better, more practical financial model to deliver healthcare – for all involved.

Wishing you good health,

Rishabh Mehrotra

Why Do Some Companies Pay More For Health Benefits Than Others?

The 2007 SHPS Health Practices Study began with a simple observation. While most employers experience year-over-year increases in healthcare costs averaging three to five times the rate of inflation, SHPS observed that a handful of its clients consistently managed their healthcare costs down to the rate of inflation without cutting health coverage or shifting costs.

What made this observation especially puzzling was that none of the clients appeared to have much in common. They represent diverse industries, possess distinctive workforce demographics and corporate cultures, offer dissimilar health plans, and are located in different parts of the country. For unexplained reasons, they consistently outperform other employers in managing healthcare costs. An informal investigation of these clients revealed a framework for effective healthcare practices. This framework is documented in our 2006 publication titled Making Consumerism Work: A Practical Guide for Transforming Healthcare.

So, why do some self-insured employers pay more for healthcare than others? SHPS designed the study to answer this question. One hundred and fifteen companies representing almost four million covered lives completed a 230-item survey.

Classic benefits benchmark studies focus on forecasting actuarial trends and allow companies to compare health benefits against their peers. In contrast, this unique survey considered a much broader range of practices – health benefits strategies, plan design, vendor procurement, health analytics, care management programs, provider quality, network discounts, administration and communication. After factoring out differences in location and workforce composition, SHPS then correlated these practices with total healthcare

expenditures per employee. This study is not designed to specifically report on the health practices in use by employers, but instead focuses on which practices have a positive or negative impact on healthcare costs.

A National Trend

Recent studies by leading health consultants noted substantial differences in per employee healthcare costs – on the order of \$1,200 to \$2,500 or more per benefit-eligible employee per year. For a company with 20,000 employees, this cost differential could yield an enormous competitive advantage – \$24 million to \$50 million per year in discretionary dollars that could be invested elsewhere or passed on to shareholders.

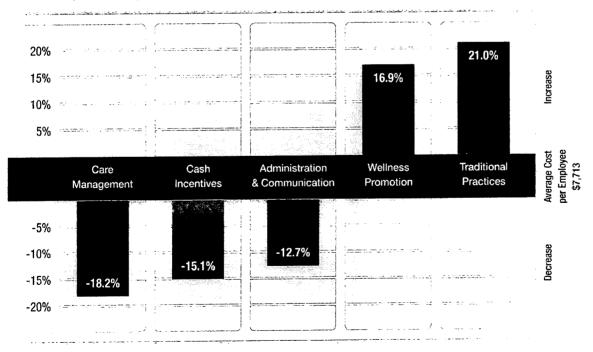

The results of the 2007 SHPS Health Practices Study challenge many traditional practices. Based on the survey data collected, the average employer spent \$7,713 in healthcare costs per benefit-eligible employee. The study shows that the use of certain practices in healthcare management could explain enormous differences in per employee costs – as much as 30 to 50 percent between two otherwise comparable employers (see Exhibit 1). The charts on the following pages summarize the findings.

It is important to note that best practice employers did not achieve their healthcare cost savings overnight. The best practices identified in this study typically require several years to reach their full potential. Employers who are only now starting to develop effective health practices will need patience and perseverance to achieve parity with companies who have had programs in place for at least three years.

Study Methodology

SHPS' study findings are based upon a statistical regression model and do not prove strict causality. However, they do demonstrate that certain employer health practices have a strong positive or negative correlation to the cost of healthcare. In reality, these practices will co-exist rather than stand alone as reported in this study. The model estimates the savings (or increases) in healthcare cost per benefit-eligible employee that would result for a typical company who adopted that practice. Actual savings (or increases) will vary based upon employer-specific factors and would be observed over a multi-year period. Some practices described in this study might not be appropriate for all employers. SHPS recommends that employers obtain guidance from an independent, third-party health benefits professional to determine the right approach for their company.

Exhibit 1: Impact on employer annual healthcare cost*

^{*} Impact on annual healthcare costs is based on a regression analysis of the correlation of specific benefits practices with total healthcare costs. The study did not factor in the length of time practices had been in place. It is important to note that impact will vary by employer.

Emerging Data on Consumer-Driven Health Plans

May 2009

American Academy of Actuaries

Consumer-Driven Health Plans Work Group

American Academy of Actuaries

Because exact values could not be established from some of the studies, it is difficult to definitively state the absolute cost savings for CDH product introductions. However, the evidence from the various studies suggests that first-year cost savings expected from traditional actuarial models is being realized to varying degrees. The magnitude of results in some studies may actually be somewhat greater than what we would expect. However, some of this difference may be due to differences in plan design, health risk, or other factors that may not be entirely evident from the limited data and description available in the studies.

The savings in the first year of adopting a CDH plan ranged from a year-over-year reduction in costs of 4 percent (Cigna) to as much as a 10 to 15 percent reduction in costs (Aetna, Uniprise). These results are before comparison to the traditional plan trend, which may be an increase in costs of as much as 7 percent to 9 percent (Uniprise, Cigna). When the relative costs are compared, the total cost savings for members moving to a CDH plan could range from a 12 percent reduction in cost (Cigna) to as much as a 17 to 21 percent reduction in cost (Aetna, Uniprise) in the first year of experience. These results are summarized in Table 1 below.

Table 1: Summary of First-Year CDH versus Traditional Plan Trend Results

Study	CDH Trend	Traditional Trend	% Difference (1)
CIGNA	-4%	9%	-12%
Aetna	-10%	8%	-17%
Uniprise	-15%	7%	-21%
Reden & Anders	N/A	N/A	N/A

(1): % Difference is calculated as [(1 + CDH trend)/(1 + traditional trend) - 1] x 100%

Results for continuing cost-savings experience with CDH designs are often difficult to interpret, but the studies do seem to indicate that there may be a favorable effect on ongoing cost trends as well. Some studies have combined multiple years of results together and indicated that the overall trend over a two-year period has been less than the corresponding traditional product trend over the same time period. The Cigna study specifically identified the trend for the second year of CDH plan experience and compared it to the corresponding traditional plan trend. It found that the second-year trend in the CDH plan was nearly 5 percent lower than the traditional plan trend. The Uniprise study measured trend savings over a four-year period and suggests that the trend for the CDH plan is about 3 percent lower per year on average over the four-year period.

If this favorable trend effect can be further established as significant (e.g., 3 percent to 4 percent or more per year) and persistent over a multiyear period, this would be a strong argument for the further adoption of these plans. There are few other alternatives available to employers that demonstrate this degree of ongoing savings and trend reduction. It is possible that the favorable trend effects currently being observed are merely due to residual risk-selection effects or other factors that may cause this apparent trend to erode or disappear over time as larger data sets become available. It is also possible that this apparent trend-dampening feature of higher cost-sharing plans is a consistent element of all plans (similar to the first-year effect which has been well-measured), but one that has not been measured historically because the differences in cost-sharing levels for traditional plans is relatively small.

In summary, while there continues to be difficulty in establishing a consensus value for the cost-savings impact of CDH designs, there is much evidence that the plans do offer some degree of savings compared to traditional plan options over both the short- and longer-term time horizons. As more data becomes available for these plan designs, we hope that carriers would continue to publish and present their findings so that more accurate conclusions might be drawn in the future.

Preventive Drug List

Preventive care benefits are an integral part of a comprehensive health care plan that includes preventive drug therapies. Under some plans, you may not be required to pay a copayment, coinsurance and/or deductible for preventive medications.

Preventive medications are those prescribed to prevent the occurrence of a disease or condition for those individuals with risk factors, or to prevent the recurrence of a disease or condition for those who have recovered, and do not include drugs used to treat an existing illness, injury or condition.

Preventive medications are those used for the prevention of conditions such as high blood pressure, high cholesterol, diabetes, asthma, osteoporosis, heart attack and stroke, and prenatal nutrient deficiency.

Below is a list of brand-name preventive medications with their generic equivalents (where available). You can also check the Drug List on myCIGNA.com for more information and new updates to this list. Preventive medications on the Drug List are indicated with a "PM" after the drug name. Refer to your plan materials to determine if your plan includes a preventive medication benefit feature.

It's the System That Needs Care

- Over half of all healthcare via managed care
- Largest increase in 6 years in costs
- * It's evolution not revolution
- * Giving patients the resources to be well
- Buy <u>VALUE</u>
- ★ Taiwanese healthcare system

UN-Managing Care

- * "Kaiser physicians know what things need to be done for diabetic patients, but due to the constraints of modern medical practice they seldom have the time to do them...."
 - Managed Care News 1999 Apr.
- * "Ultimately, all care is managed by patients."

 Dan Garrett, Exec. Dir. NCAP

Diabetes-Related Comorbidities

- ♣ 2–4 times greater risk of heart disease
- ★ 60–65% have hypertension
- * 2-4 times greater risk of stroke
- 60–70% have some degree of nervous system damage
- * Leading cause of adult blindness
- * Leading cause of ESRD (40% new cases)
- * >50% lower limb amputations

In the Beginning

- * "Partnering" with hospital system, NCAPh, NCCPC, UNC School of Pharmacy
- Invitation to all pharmacists in community
- * Responses of independents vs. chains
- * Two weekends (32 hours) of training by physicians and diabetes educators
- **★ Compensation after results**
- ★ Fee schedule
- * \$2,400 first year, ongoing average of \$48.02 per monthly visit through 2002.

Diabetes-Related Indirect Costs

- 8.3 sick-leave days annually
- ★ 1.7 sick-leave days for employees without diabetes
- \$47 billion in productivity forgone due to disability, absence, and premature mortality

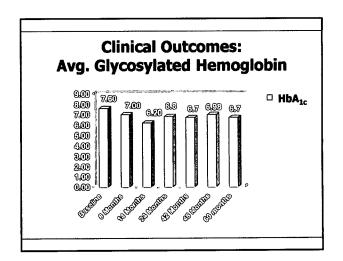

Patient Incentives and Care Model

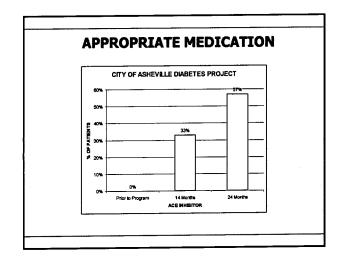

- Patient education Mission + St. Joseph's Diabetes Center
- Matching patients to pharmacists
- Incentives:
 - · PBM co-pay waivers
 - Labs without co-pays
 - · Glucose meters
- The operative word in pharmaceutical care is "care" (Madge testimonial)

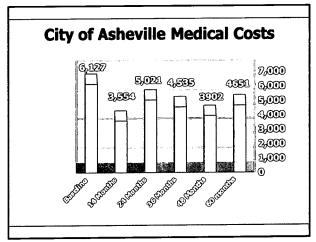

How They Do It

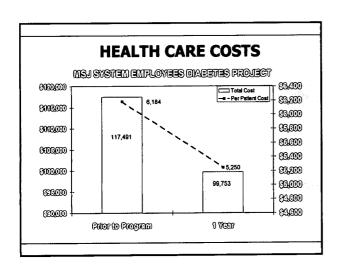

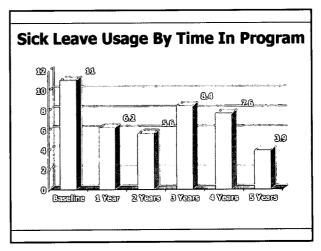

"Patient making better food choice. Blood glucose much improved. $2 \times 1.5 cm$ wound RLE. Referred to physician for evaluation and therapy."

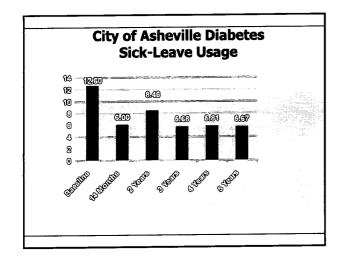

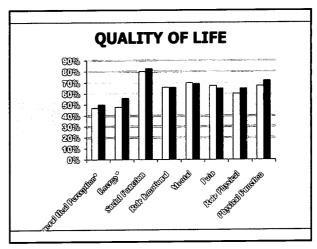

Conclusions

- Pharmacists have had the opportunity to serve on the frontline of patient care, and have made a difference.
- * Physicians with patients in the program have recognized the positive impact on care.
- ★ Collaboration plus innovation leads to reduced healthcare costs.
- Employers benefit by lowering or eliminating barriers to care.

Promoting Healthier Lives And Saving \$Millions For North Carolina March 25, 2010

BioSignia, Inc.

North Carolina Based

Profile/Technologies

- Science driven company focused on providing "embedded" predictive solutions to the health care and life insurance industries.
- Know Your Number® a personalized disease specific risk assessment that provides a roadmap outlining ways to reduce risk and improve health
- Know Your Number® is used in employer wellness & medical management ١

Examples of National Clients

- Abbott Laboratories (Albertsons, Toyal, China, Latin America)
- Life Line Screening (1.5 million people screened/year)
- GE Healthcare (Centricity EMR)
- NBC Biggest Loser Show (BL KYN consumer home kit version)

Examples of North Carolina Clients

- NC State Health Plan
- Doctors Direct Healthcare (50 self-funded employers, Cape Fear Valley, PepsiCo Bottling)
- Kerr Drug
- ECU & UNC Chapel Hill
- Duke University (Academic collaborations)

State Health Plan/BioSignia Collaborations

Future (Summer 2010)

- Fayetteville State University
- Fayetteville Technical Community College

Current (March, 2010 start)

- Department of Corrections (Men's & Women's Central Prison Employees)
- With Kerr Drug, using the Ashville Project Health Coaching approach

<u>Past</u>

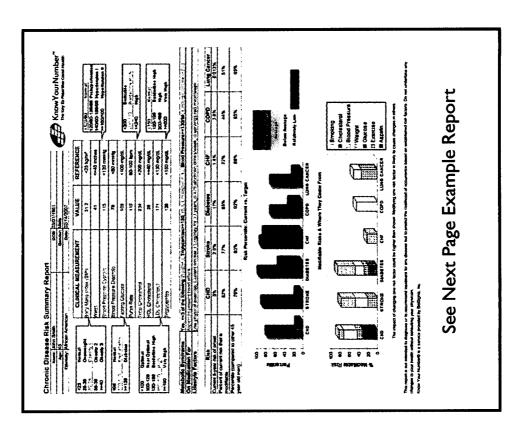

- State Health Plan's own employees screened with KYN in February 2009
- Teachers (Stars)
- 14% reduction in aggregate disease risk
- 13% decrease in projected 5-year disease cost burden
- · Cumberland County Wellness Pilot
- State data on Cumberland County Wellness Pilot shows that KYN can save up to \$500/person/year in program
- State Highway Patrol
 - NCDOT

Know Your Number Disease Risk Report

Each screened employee will receive a Know Your Number® report (confidential) that tells them their risk by disease, engages "window into their internal health", and provides a personalized "roadmap" outlining what changes they can make in their lives to improve their health.

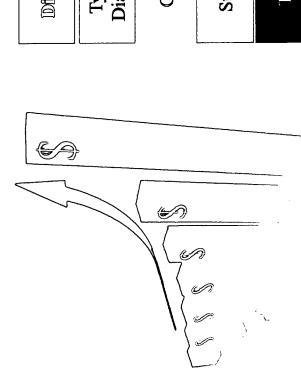

The Underlying Problem

State Health Plan Costs

(Incidence in 300,000 active state government/teacher employees) Estimated Five-Year Future New Disease Load

Disease	New Cases	Avoidable Cases	New Cost	Avoidable Coxt
Type 2 Diabetes	11,398	9,411	\$283 Million	\$234 Million
CHID	7,554	5,132	\$185 Million	\$125 Million
Stroke	4,975	3,586	\$141 Million	\$101 Million
Total	23,927	18,129	\$609 Million	\$460 Million

 \circ According to the CDC, approximately 80% of heart disease, stroke, and type 2 diabetes is preventable

Beneath the Problem

(As an example)

A Diabetes Pandemic In The Making

Health Plan Employee Members

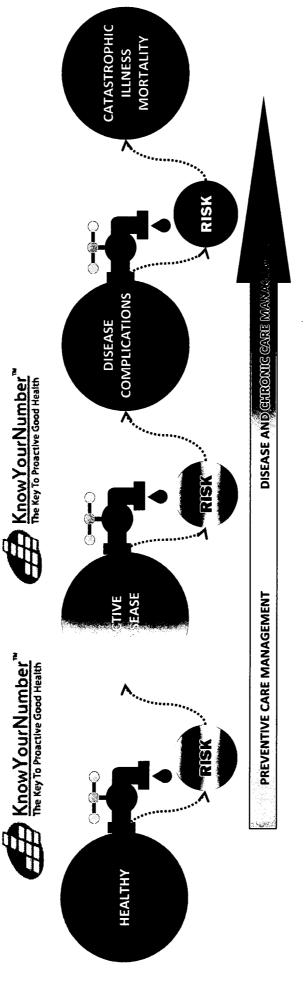

- 24% of employee members are in a diabetic or pre-diabetic state
- 50,000+ employee members are pre-diabetic
 - Pre-diabetic population drives 48% of future 5-year disease burden for diabetes, CHD & stroke (\$294 million)
 - Group represent 48% of employees who have obesity (BMI > 30)

The Solution is Pro-active Prevention

The Continuous Flow of Preventable Disease

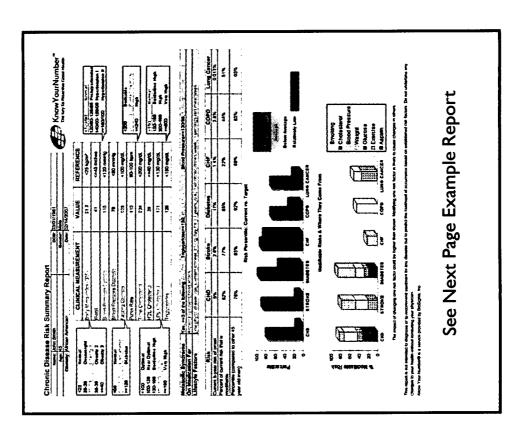

Screen with BioSignia's Know Your Number® "next generation" disease risk assessment to:

- •Build **awareness** of disease risk , approximately 40% of adults don't have a primary physician of record
- Gain engagement and motivation, provides personalized roadmap on how to reduce health risks
- Produce results and document outcomes to monitor success of wellness program

Know Your Number Disease Risk Report

Each screened employee will receive a Know Your Number® report (confidential) that tells them their risk by disease, engages "window into their internal health", and provides a personalized "roadmap" outlining what changes they can make in their lives to improve their health.

Risk Comparison for a 45 male participant Risk of Onset, Modifiable Risk and

He has an 36% chance of developing type 2 diabetes in the next 5 years

Risk Factors with the Most Impact to Reduce Disease Risk

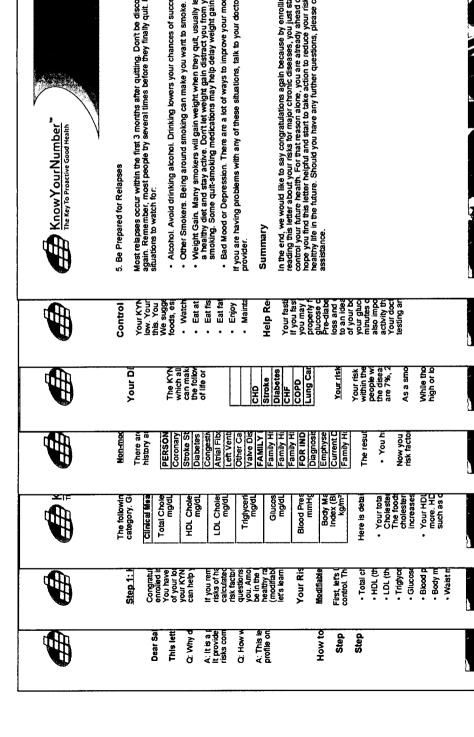

Smoking is a major risk factor that is contributing a majority of his disease risk. By modifying just this one risk factor, he would decrease his risk of onset for several conditions significantly.

Provides the participant with an Action Plan!

KYN Individualized Participant Letter

Most relapses occur within the first 3 months after quitting. Don't be discouraged if you start smoking again. Remember, most people try several times before they finally quit. Here are some difficult situations to watch for:

- Alcohol. Avoid drinking alcohol. Drinking lowers your chances of success.
- Weight Gain. Many smokers will gain weight when they quit, usually less than 10 pounds. Eat
 a heality diet and stay active. Don't iet weight gain distract you from your main goal-quitting
 smoking. Some quit-smoking medications may help delay weight gain.
 - Bad Mood or Depression. There are a lot of ways to improve your mood other than smoking. If you are having problems with any of these situations, talk to your doctor or other health care

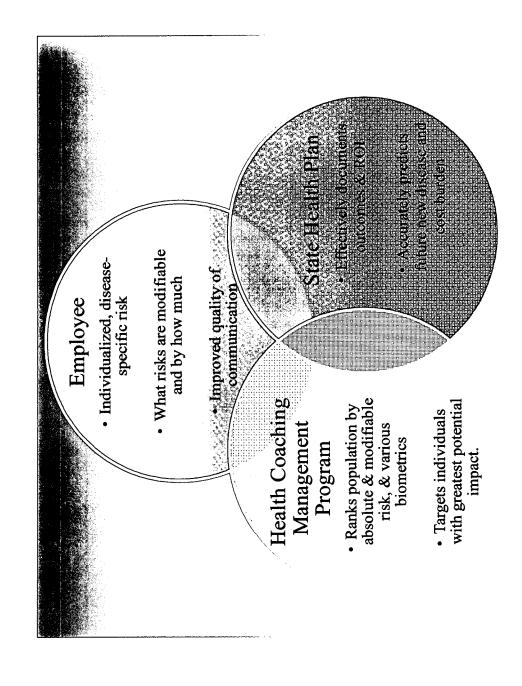

In the end, we would like to say congratulations again because by enrolling in the KYN program and reading this letter about your insis for major chronic diseases, you lust starting a journey to better control your future health. For that reason abone, you are ahready ahread of most Americans. We hope you find this letter helpful and start to take action to reduce your risks so that you can enjoy a healthly life in the future. Should you have any further questions, please contact your doctor for more assistance.

Know Your NumberTM- Provides "Richer and Actionable Knowledge" to all stakeholders

Next Steps

includes disease risk assessment, biometric screening and Provide long-term funding to support a comprehensive disease prevention program for state employees that wellness coaching components

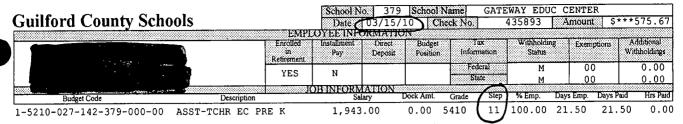

What BioSignia is Proposing:

- A unique 5-year program that offers a proven health coaching program "Asheville diabetes management, co-morbidities, and disease Aligns with national focus on disease prevention versus Project" focused on prevention screening. "just treating the sick"
- 5-year period and will touch and impact 70% of the estimated 70,000+ diabetic Health screening will be offered to the 300,000 employee members twice during and pre-diabetic State Health Plan employee members with education programs
- Complimentary to the health plan obesity and smoking initiatives
- 5-year ROI goal is 3.5 to 1 and will save \$124 million in health costs (screening, Know Your Number and health coaching costs \$36 million)

State Health Plan Blue Ribbon Task Force Begins Work

Vicki Simmons was appointed to the Blue Ribbon Task Force on the State Health Plan by NC Speaker of the House Joe Hackney this year. Simmons, a proud NCAE member, is a Physical Education Teacher (NBCT) at Gateway Education Center in Greensboro.

When the <u>Blue Ribbon Task Force on the State Health Plan for Teachers & State Employees</u> convened last week for its inaugural meeting, committee member Vicki Simmons said she understood that she was at the table <u>on behalf of public school employees</u>, including 65,000 NCAE members, who are depending on her.

She said she hears her colleagues' concerns about a State Health Plan that has gotten more expensive, punitive, and less accountable to those it insures. While Simmons concedes she doesn't have all the answers to the State Health Plan's problems, she knows the current structure needs to be redesigned and it needs to maintain its promise of being a 100% employer-paid health care plan.

Reform Is Needed

"We have to bring younger, healthier people into the State Health Plan," said Simmons. "To do that, we must lower the monthly contribution rate for spouses, children, and families."

Simmons says <u>lower premiums</u> not only enhance the quality of life and benefits package for educators and state employees, <u>stelowers health care costs to the taxpayer</u>. "We need more people, not less, paying premiums into the State Health Plan," she explained. "Most young people are healthy, use less health care, and therefore subsidize employees who need more care."

It is universally accepted at the General Assembly that the State Health Plan is largely comprised of state employees and their less healthy dependents. Healthy dependents are likely to buy coverage outside the more costly State Health Plan at a fraction of the cost, mainly through Blue Cross Blue Shield's Blue Advantage program. Consequently, Blue Cross Blue Shield's management of the State Health Plan has raised the eyebrows of many educators.

"Under the current system, healthy spouses and children of public school employees are usually covered elsewhere," said Simmons. "But if a chronic diagnosis is made, those dependents are often enrolled on the State Health Plan during the enrollment period. It's become a plan of last resort and it's costing the taxpayers millions."

This past legislative session, the General Assembly committed over \$944 million to stabilize the State Health Plan over the biennium.

Concerns About Comprehensive Wellness Initiative

This out-of-balance State Health Plan membership led the General Assembly to begin a Comprehensive Wellness Initiative, a controversial program that pushes smokers and those with a body mass index of 40 points or more to the State Health Plan's 70/30 program (as opposed to the 80/20). Simmons says she supports programs that reward good health, but she is concerned that CWI is a punitive program and should be redesigned to be an incentive program?

NCAE Government Relations Research Specialist/Lobbyist Marge Foreman, who takes the lead on State Health Plan matters for NCAE, is working with Simmons as she learns the intricacies of the State Health Plan, its complex contractual relationships, and those who oversee it. Foreman, who has known Simmons for all of her 25 years at NCAE, says that the Guilford special education teacher is the perfect NCAE member to help the state reform its State Health Plan.

"Vicki understands that the current system is unsustainable under its current model," Foreman said. "She will give this committee a teacher, teacher assistant, and custodian perspective that will translate into positive change for State Health Plan members."

The Blue Ribbon Task Force is scheduled to meet again on December 2 at 9 a.m. in room 1228 at the Legislative Building in Raleigh.

MINUTES

BLUE RIBBON TASK FORCE ON THE STATE HEALTH PLAN FOR TEACHERS AND STATE EMPLOYEES Thursday, April 22, 2010 10:00 AM

Room 1228/1327 Legislative Building.

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met Thursday, April 22, 2010 at 10 a.m. Co-Chair Representative Holliman presided. On motion of Dr. Myers and second by Mr. Stone, the minutes for the March 25 meeting were approved.

Presentation

Co-Chair Holliman introduced Dr. Jack Walker, Executive Administrator of the State Health Plan for a review of recent federal health care reform vis a vis the State Health Plan. (SEE ATTACHMENT: 2010 Federal Health Care Reform.) Dr. Walker said that the presentation would be available on the SHP website on April 23, 2010. He pointed out that the comments refer to the State Health Plan without dealing with Medicaid or Medicare, or the effect on the provider community. He also cautioned that the examination of the effect on the SHP required that this be a work in progress since many rules had not been formalized.

Dr. Walker said the first key to his assessment was that health insurance would be "extended" to 95% of Americans, but that it does not require you to buy health insurance, but you will be taxed if you don't. He believes that younger, healthier people will pay more for insurance and by 2014 the State Health Plan may look more attractive. This would be a reverse of the recent trend for the Plan. He said it is possible that with the new eligibility requirements for Medicaid, some lower paid state employees may qualify for Medicaid coverage. Changes to the Medicare Part D provisions may cause the SHP to examine the coverage for state employment retirees.

In the current assessments of the federal health plan, there are time lines that affect the SHP. In June 2010, there will be re-insurance available for a narrow age group of early retirees. (Age 55-64). This could bring some revenue to the plan, but the rules have not been written.

As of January 1, 1011 employers will be required to provide IRS information for the value of the health benefits. This will be on W-2 forms. Dr. Walker stressed that the term employer did not refer to the SHP, but to the actual entity paying the employee, i.e. The Charlotte-Mecklenburg School System, the N. C. Department of Correction, etc. This information will be added by the accounting system of the agencies and will increase administrative costs. There are other potential administrative costs possible for payroll deductions for long-term care insurance.

In July of 2011, a provision begins which requires coverage on parental plans for any dependent who is "not eligible for other group coverage" until age 26. This could cost the SHP between \$11 million and 27 million per year.

Starting in July of 2012, there will be a tax on Plan enrollment for "Quality Research". The first year the tax is \$1/member, \$2/member the second year. The tax sunsets in 2019.

In July, 2013 employers of more than 200 employees must disclose all options to all employees and automatic enrollment starts for new employees.

Dr. Walker said the big changes come in 2014. The employers with more than 50 workers will offer coverage or pay a penalty. There is also a system to cover employees who make less than 400% of the poverty level. It is in this time frame that the Health Insurance Exchange is established. (The HIE is a market for health insurance for people who are not able to afford of other insurance coverage. It is also a method for small businesses to purchase insurance for employees.) A chart tracking the earning qualifications for a family of four is contained on page 9 of the attachment.

Dr. Walker said he could see as much as half of the SHP enrollment shifting to the HIE because the coverage will be cheaper. Then there is the potential for these people to shift back to the Plan as retirees and the per member/ per month cost will go up.

The state may offer large group coverage through a Health Insurance Exchange beginning in 2017.

In summary, Dr. Walker expects higher administrative costs for employers; in the case of state employees, the agencies, school districts, universities etc. Determining the family income levels will be one of those costs. Another new cost is the value of insurance coverage which must be shown on employee W-2s. Since the reform affects employers, Dr. Walker pointed out that a number of payroll/accounting systems in state government will be involved.

Due to exemptions as a "grandfathered plan" the SHP will not be affected by such provisions as prevention services, limits on cost sharing etc.

Co-Chair Representative Holliman asked who would run the HIEs. Rose Williams from the Department of Insurance said that decision was left up to the states to decide how to operate an HIE. The federal government could operate the HIE in some instances and there could be regional HIEs, too. If the state does not create a qualifying HIE, then the federal government will take over the responsibility.

He said that health care providers will be receiving lower Medicare payments, but there will be a higher demand. He also said there is a question of how employers will react to mandatory health insurance coverage.

During the discussion, Representative Braxton asked if the coverage for the SHP and the federal plan relating to lower income members would be cost neutral. Dr. Walker said that was the case, but there was actually a gain for the employer.

Co-Chair Holliman asked the most costly age range for the Plan, those between 55 and 64. Dr. Walker said the average cost per member in the range is about nine thousand dollars per year. Thus the other insurance is cheaper for the younger people, who cost the Plan less so; they leave the Plan and then come back to the Plan at a later age, when the cost to the Plan is higher.

Dr. Walker said there is no information about how fast someone might be able to switch into one plan from another, or then move back.

Representative Braxton asked if Dr. Walker thought states might eliminate the premium plans, such as 90/10, or 80/20 in order to push covered members to move to the federal plans. Dr. Walker said he had not heard of this happening, but there were still a lot of variables to be considered. He said he could foresee some small employers giving workers a raise and telling them to use it to buy insurance from the HIE.

Mr. Feezor said that he had been with some CEOs of North Carolina companies who had indeed decided to pay the \$2,000 per work tax, and provide the extra pay to purchase the HIE coverage.

In response to a question from Representative Folwell, Dr. Walker guessed HIEs would operate on a calendar year.

In another question, Representative Folwell asked how the federal reform impacted the state's GASB obligation. Dr. Walker said it did not reduce that obligation, but it did give employers incentives to stop offering retired employee coverage.

In further discussion relating to an earlier meeting, Representative Folwell inquired about projected costs to the Plan. Dr. Walker had projected that between 2012 and 2015 the projected increase is \$1.8 billion and Dr. Walker reiterated that this was additional cost to the plan. As Representative Folwell said the additional was \$500 million per year. The current cost for the Plan is approximately \$1.7 billion per year.

At this point, Co-Chair Holliman recognized the pending retirement of Gann Watson, Staff Attorney in Bill Drafting. The Co-Chair praised and thanked her for service to the Task Force.

Theresa Matula, Legislative Research Analyst presented the Task Force final report. (SEE ATTACHMENT: Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees.) The findings note that reports are expected on Consumer Directed Health Care, Medicate Product and Strategy, Dependent Subsidy, including Salary Based Premium Structure and an Audit of the State Health Plane.

The Task Force recommends that the General Assembly continue to deal with issues concerning the Plan during the short session, beginning May 12, 2010 and that the Task Force resume work after that Session and develop a report to the 2011 General Assembly.

Mr. Stone asked if discussion on dependent coverage was precluded based on the report. Mr. Mark Trogdon, of the Fiscal Research staff noted that currently dependents are covered by the Plan up to age 26, if they maintain student status. He said members can make additional recommendations, and said the dependent coverage issue is being studied by both the Plan and the Legislative staff. He said the cost of such coverage is unknown, but one reason the staff is studying the issue was the possibility that a member of the General Assembly would introduce a bill dealing with the calendar year issue in the upcoming Session.

Mr. Stone raised the issue of calendar year conversion of the plan. Mr. Trogdon said that issue will be studied as part of the report on Consumer Directed Health Care. He

did say it could be addressed separately, too. He also said that costs could be different based on the yet-to-be formed rules of the HIEs.

Mr. Feezor moved adoption of the report and Representative Braxton seconded the motion. The motion carried.

Representative Folwell asked if Dr. Walker felt the federal health reform plan was good for the employees of North Carolina. Dr. Walker said it was too early to tell.

Representative Folwell asked if Dr. Walker felt the federal health reform plan was good for the taxpayers. Again, Dr. Walker said it was too early to tell. He said the rules and regulations were yet to be written.

Representative Folwell asked Dr. Walker if he supported the federal health plan bill, based on what Dr, Walker knew now. Dr. Walker said he had no comment.

Representative Folwell said a disappointment for him in the Task Force was there had not been enough time figuring how to cut costs; how to come up with the future additional \$500 million per year appropriations. Further, he asked if a member of the health plan, who received a bill, could have the bill "scrubbed." He said, in the interest of cutting costs, could the member who considered errors in a bill check to see if the bill is correct. Dr. Walker said the member could call the SHP. The caller would have to be either the member, or authorized to speak for the member and the information would be provided.

In terms of cutting costs, Dr. Walker said the best way was to have people stay healthy. He said the percentage of people who are active has dropped and these people have picked up chronic diseases---due more to life style than age. Representative Folwell said he did not find those mutually exclusive: that you either focus on wellness and people's lifestyle or you focus on cutting costs. He asked what one suggestion Dr. Walker had for the committee that could substantially cut costs in the SHP. Dr. Walker said promote wellness and promote prevention. He said if he went to providers and asked them to cut their costs, the provider network would shrink. He said he felt that coverage was being bought about as cheap as it could be bought. He said he did not think provider costs could be cut any more; the federal government already does that. Representative Folwell said he had not said that. Co-Chair Holliman said that as far as costs were concerned, the Task Force would continue to study that.

Representative Folwell asked Dr. Walker if he felt the federal health reform would exacerbate the adverse selection of the SHP. Dr. Walker said would make it better, "it certainly won't make it worse," he said.

Representative Folwell asked if Dr. Walker favored conversion of the SHP to a calendar year. Dr. Walker said that was a legislative decision. Co-Chair Holliman said he believed the consensus of the Task Force was to make that conversion.

Ms. Simmons said Guilford County schools served tossed salads, but did not have salad bars. She had found the answer: the Health Department regulations prevented the salad bars, since food had to be destroyed at the end of the day etc. She said the Guilford County system said the food served met all state and federal guidelines for fat content etc.

The meeting adjourned at 11:15 a.m.

Representative Hugh Holliman, Co-Chair Presiding	Carol Bowers, Committee Clerk

Federal Health Care

Reform

M The following comments are Work-in-progress, Many details about the administration of

these laws have yet to be

Written.

Key Focus Areas of Health Care Reform

Extends insurance coverage to 95% of Americans (an additional 31-36 million Establishes individual mandate and employer mandates to employers orall V > 50Offers reinsurance for employers covering pre-Medicare retirees ages 55-64 Extends dependent age to 26 with no student requirement Creates regional/statewide insurance exchanges Establishes national high risk pool until 2014 Eliminates pre-existing condition exclusions Eliminates annual and lifetime limits employees, with certain exceptions Americans) over the next 10 years Provides free preventive care A A Insurance Reform

Demonstration projects to improve care delivery Expands eligibility to 133% of FPL Medicare Advantage rate cuts Д A A Expansion Medicaid Medicare

Allows for providers in Accountable Care Organizations to "share" savings with CMS Medicare Part D changes

Qwallty Improvements

Establishes an Innovation Center to reduce expenditures and improve quality Various provisions to establish comparative effective and quality research A A

Care Timeline for Health Reform Federal

Timeline as it Impacts the NC State Health Plan

Date	Change	State Health Plan Cost
June 23, 2010	Temporary re-insurance program for early retirees	Possible revenue to Plan; It is a temporary opportunity but regulations for use are not written
January 1, 2011	Employers required to disclose value of health benefits on W-2 IRS forms for calendar year 2011	Programming and administrative costs are uncertain. The value definition is uncertain.
	Large group plans must spend at least 85% of premiums on medical claims or provide a rebate. This provision may only apply to "insured" plans.	Not applicable
	Class Act: Will require a payroll deduction line for long term care insurance	Administrative costs uncertain; consider rescinding SHP requirement to offer Long Term Care
July 1, 2011	Bans pre-existing conditions exclusions for dependents under age 19	Negligible
	Prohibits lifetime maximums	None
	Mandates that dependents who are "not eligible for other group coverage" can stay on or join parents' policies up to age 26	An early estimate indicates that dependent premiums would need to be increased to recover added net
	Note: An employer is NOT required to offer dependent coverage	claims exposure of \$11-27 million per year. The cost of this coverage is free of federal tax but is a question for states.

_					· · · · · · · · · · · · · · · · · ·	
	State Health Plan Cost	Administrative cost uncertain	The tax is \$1/yr/member for FY 2013 and then \$2/yr/member. This tax sunsets in 2019. The Plan currently has 661,000 members.	None	Administrative cost uncertain	Uncertain
	Change	New standards for the description of covered benefits to become effective	There is a tax on all Plan enrollment for "Quality Research"	Caps contribution to Flexible Spending Account (FSA) at \$2,500 a year	Employers of 200 or more employees must provide disclosure of all options to all employees and make enrollment for new employees only automatic.	 Requirements to Provide Coverage Employers of 50 or more will be required to offer coverage to employees or pay a penalty. In addition, employers will either be required to pay a penalty per affected employee if certain affordability criteria are not met, or provide a "free choice voucher." (see below) \$3,000 Penalty The law requires an employer who offers coverage to pay a penalty on behalf of employees whose family income is no more than 400% of the Federal Poverty Level (FPL) and 1) employee premium contributions exceed 9.5% of family income, or 2) the plan's actuarial value is less than 60%. If the above affordability test is not met, then the employee can go to the Health Insurance Exchange (HIE), be qualified and receive a premium subsidy. The employer then pays 1/12 of \$3,000 every month for every full-time employee who is receiving a subsidy. The legislation defines a "full-time employee" as one working 30 hours per week. (Employers need to look carefully at their seasonal and contracting employees; there may be an impact).
	Date	March 23, 2012	July 1, 2012	January 1, 2013	July 1, 2013	July 1, 2014

Bans pre-existing conditions exclusions for all individuals	Negligible
Bans waiting periods greater than 90 days	None (the existing period for the State Health Plan is less than 90 days)
Members of Congress and staff have coverage only through plans offered through an HIE	None

Uncertain

A "free choice voucher" must be equal to the contribution the employer

would have paid on behalf of the employee for the employer plan in

The employee uses the "free choice voucher" to purchase coverage in

the plan purchased at the Health Insurance Exchange is given back to the HIE. It appears any amount in excess of the premium amount for

the employee as wage income.

Plan coverage is greater than or equal to 60% of the actuarial value

Employee premium contributions are between 8% and 9.5% of

family income, and

employees whose family income is no more than 400% of poverty level

The law requires an employer who offers coverage to provide

Free Choice Voucher

actuarial value.

a "free choice voucher" if both of the following conditions apply:

State Health Plan Cost

Note: The employer may compare the difference between paying the monthly 1/12 of \$3,000 penalty for all affected employees, or paying

January 1, 2014 Or July 1, 2014,

cont.

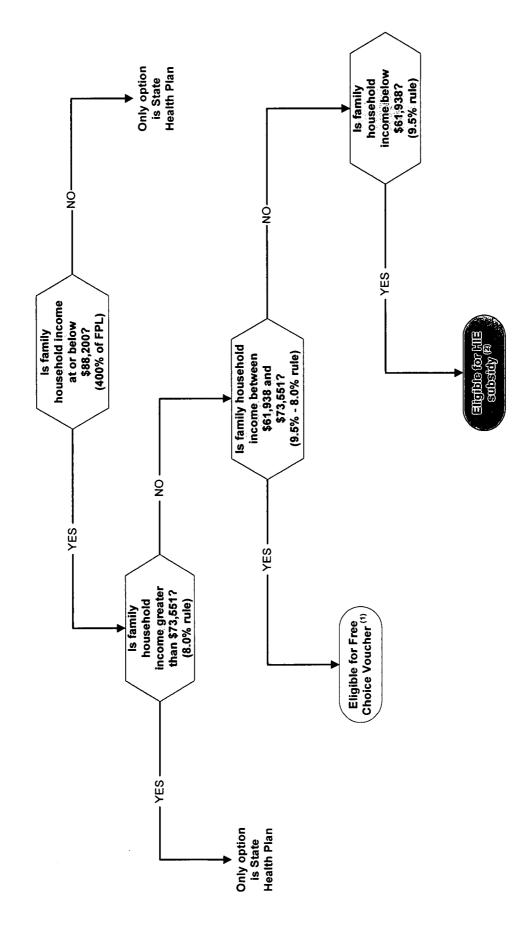

1/12 of \$750 for every full-time employee, and pay whichever is less.

As of today, both State Health Plan offerings exceed 60% of the

State Health Plan Cost	Negligible and effective 7/1/2014 for State Health Plan	None	None	None	Uncertain	None (Plan costs are projected to be below these limits)
<u>Ghange</u>	The age 26 rule will drop the requirement for "grandfathered" plans of eligibility for other group plans.	Employers permitted to offer employees penalties/rewards up to 30 % of the cost of the healthcare program for participation in health programs (current law: 20%)	Establishes state-based Insurance Exchanges	Requires individuals to obtain health care coverage	States are allowed to offer large group coverage through the HIE.	Imposes a 40% excise tax on high cost health plans that exceed \$10,200 for individual and \$27,500 for family coverage
Date	January 1, 2014 Or July 1, 2014,				January 1, 2017	January 1, 2018 or July 1, 2018

Health Care Reform Employee – Family of Four (4) 2010 Data

(1) Employer pays HIE \$410.80 for each month for each employee enrolled in HIE

(2) Employer pays HIE 1/12 of \$3,000 for each month for each employee enrolled in HIE

Background

- Health Care Reform was passed through a combination of the Senate Bill (H.R. 3590), entitled "Patient Protection and Affordable Care Act," and the Reconciliation Bill (H.R. 4872), entitled, "Health Care and Education Affordability Act of 2010."
- Generally speaking, health care reform is not effective until 2014. However, there are a number of reforms effective plan years beginning on or after six months following enactment of the laws. For the State Health Plan, those requirements will become effective no later than July 1, 2011.
- The State Health Plan is exempt as a "grandfathered plan" from many of the legislative requirements. Some examples of requirements not applicable to grandfathered plans include:
- Prevention services
- ▼ Limits on cost sharing
- Appeals process
- Selection of doctors and referral requirements
- Coverage of routine costs of clinical trials for qualified individual
- dependents does not result in a plan losing its grandfather status. New types of plans would probably be According to the legislation, group renewal, initiation of benefit changes, and adding new subscribers or subject to all requirements and not be given "grandfather status."

Individual Mandate

- Citizens and legal immigrants will be required to pay penalty if they do not have qualified health insurance.
- ▶ Hardship waiver if health insurance is unaffordable
- If one doesn't enroll, then one pays a tax penalty
- Must pay the greater of: \$95/person or 1% taxable income (2014); \$325 or 2% (2015); or \$695 or 2.5% (2016), increased by cost-of-living adjustment;

For example, if household income is \$50,000 the penalty would be: \$500 (2014); \$1,000 (2015) and \$1,250 (2016) subject to the number of uninsured in the household and other limitations.

- Required to report health insurance coverage to the IRS
- Exemption/Affordability defined:
- Some of the exemptions include individuals who are not required to file taxes and those for whom the lowest cost plan exceeds 8% of an individual's income.
- Individuals not required to change coverage under group plan or individual policy that person enrolled in as of March 23, 2010.
- Individuals can enroll in qualified health plans in or outside the Health Insurance Exchange (HIE)
- Individuals with income between 100% and 400% of the FPL will be eligible for premium assistance tax credits in the HIE

Health Insurance Exchange

- States may:
- ➤ Contract with state Medicaid agencies to determine eligibility for subsidy.
- Allow agents or brokers to enroll people into plans and assist people in qualifying for subsidy.
- If states do not create qualifying HIE, then federal government will assume these responsibilities.

Coverage Penalty and Other Considerations

Coverage Penalty

\$2,000/EE penalty for not offering coverage. Many expect this penalty to increase over time.

Other Considerations

expenditure will not apply to this reinsurance.) State Health Plan needs to plan can use the money; may need to create an age-specific non-Medicare apply on or about June 23 and get a Plan Sponsor ID; funding is limited to \$5 billion; no rules created to manage this benefit; also unclear is how a \$15,000 and \$90,000 per year for retirees 55 to <65 without Medicare The Plan will have reinsurance for 80% of the cost of claims between coverage. (Note: The Plan has retirees below age 55 whose claims retiree tier.

decrease over time. As such, it is looking at other options such as an EGWP plan. will be closed by 2020. The State Health Plan may see its subsidy (\$50 million/yr It is anticipated that the Medicare Part D (pharmacy benefit) donut hole

- EGWP Actuarial Equivalence is easier to meet
- EGWPs may offer the ability to take advantage of the 50% discount on brands in the gap from Pharma
- EGWP subsidy will increase over time

Employers will have little federal assistance to lower health costs.

Prevention and Wellness

- Worksite Wellness initiatives:
- CDC to provide technical assistance
- Employers can have wellness programs that include requirements that enrollees satisfy health status factors (i.e. tobacco cessation or weight) if the financial consequences (reward or penalty) do not exceed 30% of the cost of employee-only coverage (or 30% of family coverage if dependents participate). A

15

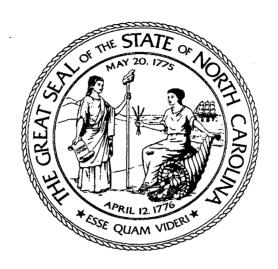

Other Factors

How will providers react to lower Medicare reimbursement and higher demand for services because of expanded coverage (Medicaid and Health Exchanges)?

How will employers react to mandatory employee health insurance coverage (smaller employers may revise coverage for dependents and retirees)? What will be the impact to the State Health Plan of the 12 year patent protection for biologics; the tax of medical devices and the 50% brand discount for Medicare beneficiaries in the "donut" hole?

TASK FORCE PROCEEDINGS

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met six times from November 11, 2009 until April 22, 2010. The Task Force heard from the individuals listed below during the specified meeting dates. Detailed minutes and copies of handouts from each meeting are on file in the Legislative Library.

November 18, 2009

- Gann Watson, staff attorney, presented to the Task Force a summary of Session Law 2009-16 (SB 287), which made significant changes to the laws governing the operation of the State Health Plan for Teachers and State Employees (State Health Plan). Ms. Watson's presentation covered the key components of the enacted legislation including additional funding appropriated to the State Health Plan, annual premium increases authorized over the 2009-11 biennium, benefit changes affecting out-of-pocket requirements for Plan members, the establishment of a Comprehensive Wellness Initiative, a directive for an operational audit of the State Health Plan's medical and drug claims processing vendors, and the authorizing language for the Blue Ribbon Task Force on the State Health Plan.
- Mark Trogdon, staff fiscal analyst, made a presentation to the Task Force entitled "Overview of the State Health Plan." Mr. Trogdon's presentation covered the State Health Plan's statutory authorization and creation, its size based on enrollment, total claims, and total revenues, benefit design, funding basis, administrative structure, Plan member eligibility guidelines, enrollment demographics, etc. His presentation also provided a financial summary of the State Health Plan including the financial impact of Session Law 2009-16, a historical summary of the State Health Plan's claims growth over time, and the State Health Plan's per capita medical costs by age bands and the percent of Plan members in each of those bands.

<u>December 2, 2009</u>

- Theresa Matula, staff legislative analyst, presented a document listing priorities developed from input provided by Task Force members during the November 18, 2009 meeting.
- Dr. Jack Walker, Executive Administrator, State Health Plan, presented an overview of the State Health Plan and the Comprehensive Wellness Initiative. The presentation included demographic data on Plan membership, statistics concerning the rationale for choosing tobacco use and body mass index (BMI) as targets for the Wellness Initiative, and information on the Comprehensive Wellness Initiative. Comprehensive Wellness Initiative information covered the following topics: employee privacy, employee benefits and support, and desired outcomes for the State Health Plan.

January 21, 2010

- Ann Rogers, Director of Integrated Health Management, State Health Plan, provided information on tobacco use testing for Plan members. Her presentation included information on the development of the Request for Proposal for a vendor to administer off-site tobacco use testing to members and to verify members' enrollment in smoking cessation programs. Ms. Rogers also reviewed the testing process, explained how members' attestation to tobacco use status will drive initial State Health Plan qualifications, and reviewed member consequences for falsifying tobacco use status.
- Dr. Jack Walker, Executive Administrator, State Health Plan, reviewed the financial requirements for the State Health Plan for the next five years. He presented information on current and projected State Health Plan revenues, member cost-sharing, projected annual increases in health costs and utilization, and State Health Plan efforts to detect and prevent fraudulent claims. Dr. Walker's presentation emphasized the importance of improving the health status of active Plan members through behavior management, case management, and disease management, in order to achieve savings and lower the cost trend.
- Lacey Barnes, Deputy Executive Administrator, State Health Plan, provided follow-up information on select inquiries by Task Force Members which included the reduction in cost savings if individual members, rather than entire family units, are moved to the 70/30 State Health Plan; and reasons Plan members are electing to terminate dependent coverage under the State Health Plan.
- Carol Durrell, Director of Product Development, State Health Plan, provided an outline, timeline, and costs for planned actuarial studies to be performed by Aon Consulting in 2010 to address Task Force requests, responses to questions from the Legislative Oversight Committee and constituents, and State Health Plan requirements. Ms. Durrell discussed the Cost Comparison study of State Health Plan benefit options in Georgia, Virginia and Tennessee (which should be available in mid February) and the study concerning Other Post-Employment Benefits like retiree benefits.

February 25, 2010

- Carol Durrell, Director of Product Development, State Health Plan, presented details of our State Health Plan in comparison to the state health plans of Georgia, Virginia, and Tennessee. Ms. Durrell highlighted differences and similarities in state health plan benefits, premium costs, subsidization of dependent care premiums, and other aspects of operations.
- Ann Rogers, Director of Integrated Health Management, State Health Plan, discussed
 the extension of a nutritional visit benefit to all Plan members (previously available only
 to Plan members with diabetes). She noted that for provision of this benefit the State
 Health Plan has contracted for participation in the Eat Smart, Move More, Weigh Less
 program.
- Dr. Derek Prentice, Consulting Medical Director, State Health Plan, discussed a range of
 issues related to medications prescribed to members participating in State Health Plan
 weight loss programs.

March 25, 2010

- Chris Schoffner, Managing Partner, White Bear Group, an employee benefit consulting firm, discussed methods of changing member behavior to create savings for the State Health Plan. Mr. Schoffner presented information on the success of the Ashville Project. In the Ashville Project, diabetic employees received support and guidance from counselors, physicians, and pharmacists all working together, and employees received preventive care without any out-of-pocket costs. Mr. Schoffner recommended the following main steps:
 - 1. Identify employees with needs via Health Fairs.
 - 2. Engage beyond the chronically ill; remove barriers to treatment.
 - 3. Educate through face to face coaching.
 - 4. Communicate at all steps to allow all to get information.
- Mark Ruby, Vice President for Business Development, BioSignia, a healthcare risk assessment company located in Research Triangle Park., presented information on BioSignia's "Know You Number" product. BioSignia uses data analysis of large populations and individual test results to help participants better understand their personal health risks. According to Mr. Ruby, the State Health Plan could save \$124 million over five years by screening 300,000 Plan members twice a year for five years.
- Victoria Simmons, Task Force member, provided copies of pay slips for several Guilford County School employees and discussed the importance of the "promise" of affordable health care from the State to its employees. The Task Force discussed the "promise" of health care at no cost and whether employees would be willing to pay a member contribution based on a percentage of their salaries.
- Representative Folwell, Task Force member, advocated the use of a calendar year, rather than State's fiscal year, for the State Health Plan. He cited broad support for the change among various State employee organizations and the use of a calendar year by 24 other states. Although there would be a one-time cost of \$25 millions and a six month moratorium on rate increases, Rep. Folwell requested that the Task Force endorse the idea in order to facilitate health insurance planning by families with non-State Health Plan options.

April 22, 2010

- Jack Walker, Executive Administrator, State Health Plan, presented information concerning the impact on the State Health Plan of the following federal health reform Acts: Patient Protection and Affordable Care Act (HR 3590), and the Health Care and Education Affordability Act of 2010 (HR 4872).
- The Task Force received a draft report to be presented to the 2010 General Assembly, the Governor, and the Committee on Employee Hospital and Medical Benefits and took action on the report.

FINDINGS AND RECOMMENDATIONS

FINDINGS:

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met six times prior to the convening of the 2010 short session. During these meetings Task Force members received an overview of the State Health Plan, the State Health Plan's Comprehensive Wellness Initiative, and information on issues that will impact the State Health Plan in the future. Members were also apprised of the study issues identified in the legislation creating the Task Force and prioritized the study of these issues. The Task Force explored a number of concerns regarding the State Health Plan and found there is a good bit of information that, although not immediately available, will be forthcoming during the tenure of the Task Force and following adjournment of the 2010 short session. In the coming months, the Task Force anticipates receiving the following reports: Consumer Directed Health Care, Medicare Products and Strategy, Dependent Subsidy including Salary Based Premium Structure, and an Audit of the State Health Plan.

RECOMMENDATION:

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees recommends that the General Assembly continue addressing State Health Plan issues during the 2010 Session and that the Task Force resume its work after adjournment of the 2010 Session and develop a report to the 2011 General Assembly.

MEMORANDUM

TO:

Members, State Health Plan Blue Ribbon Task Force

FROM:

Rep. Hugh Holliman, Co-Chair

Sen. Dan Blue, Co-Chair

SUBJECT:

Committee Meeting Notice

The State Health Plan Blue Ribbon Task Force Committee will meet on the following date:

DAY:

Thursday

DATE:

August 12, 2010

TIME:

10:00 am

LOCATION: Room 1228 Legislative Building

If you have any questions concerning this meeting or you cannot attend, please contact Carol Bowers, Committee Clerk at 919-715-0873 or Hollimanla@ncleg.net.

MINUTES

BLUE RIBBON TASK FORCE STATE HEALTH PLAN

Thursday, August 12, 2010 10:00 a.m. Room 1227 State Legislative Building

The Blue Ribbon Task Force on the State Health Plan met August 12, 2010, at 10:00 a.m. in Room 1227 of the Building. Co-Chair, Representative Hugh Holliman presided. (SEE ATTACHMENT: Members and Guests Present.) On motion of Insurance Commissioner, Wayne Goodwin and second by Ms. Adcock the last meeting's minutes were approved.

PRESENTATIONS

Navigant Report Recommendations

Paula Douglass, Director of Navigant Consulting, the project coordinator for the audit on SHP Performance and Efficiency said the Governance issue was part of the overall performance audit which was presented to the Oversight Committee in May. The Governance issue is one of 12 areas of the SHP which were reviewed. Ms. Douglass introduced Celina Knippling. Senior Associate of MGT of America who was responsible for the audit area of Governance review. (SEE ATTACHMENT: Navigant Consulting Audit.) The first finding was that North Carolina's governance structure was unique. The SHP is an independent agency responsible to the General Assembly. The management on the day to day basis comes from the Executive Administrator. Plan oversight includes a legislative committee: Committee on Employee Hospital and Medical Benefits, the Board of Trustees of the SHP and the SHP Administrative Commission.

Ms. Knippling said that in the 16 states that were reviewed, the health plan was responsible to an independent governing board or an executive branch department or agency. None of the other plans came under administration by the legislative branch. All 16 states had boards of some type, either governing or advisory. Most were governing boards.

The report said that the North Carolina Legislative Committee lacked the capacity to manage the Plan, while the Board of Trustees lacks the authority of govern the Plan. Further, the reports notes little oversight is provided by other state agencies.

The report recommends:

- o The SHP should be an independent agency reporting to a governing board attached to the Governor's Office
- o Elimination of the current of Board of Trustees in favor of a new governing board with authority to manage the SHP operations.
- o Parameters be set up for balance on the Governing Board.

In the discussion, Representative Folwell asked who had the authority to hire or fire the executive director of the North Carolina SHP. The response was that the SHP Administrative Commission held such authority. Ultimately that responsibility lies with the Co-Chairs of the Task Force. (SEE PAGE 6 Re: The Commission.)

In response to questions from Representative Braxton concerning the make up of other boards, Ms. Knippling said some of the boards were appointed others were elected and there was a variety throughout the systems. She said there was not a strong indication of qualifications for membership. Navigant's proposal would create a 9-member board with knowledge and experience of the mission of the Plan and would represent segments of the membership: state employees, teachers and retirees. Those guidelines would be followed by the Governor's three appointees, plus the addition six members appointed by the Senate President Pro Tem and the Speaker of the House, according to the Navigant recommendation.

In response to questions from Ms. Adcock, Ms Knippling said that those states which elect the members of the governing board, some elections are done by members of the plan others are votes cast in general elections. She said California elects the members of its board in a general election and that there have been charges of conflict of interest on the part of some members of that board. Drawing on his experience in California, Mr. Feezor said the election of board members for CALPERS cost about a million and a half dollars.

Mr. Feezor said it should be determined if North Carolina's SHP was a multiple employer plan or a single employer plan. Ms Knippling said the audit took the position that it was a single employer plan, even though the various constituent groups: state employees, teachers, state employees, etc might not have the same interests. He asked who held the fiduciary responsibility in the SHP and was told that comes under the role of the executive administrator. Mr. Feezor said such responsibility in the hands of one person seemed to lack enough checks and balances, no matter who the person might be.

Responding to questions from Dr. Myers, Ms. Knippling did not have specifics about how many of the 16 plans examined were set up as separate agencies or fell under an executive agency. She promised to follow up with that information.

Mr. Stone asked for clarification and verification that the Administrative Commission mentioned above was in line with the General Statutes. Ms Knippling responded to another question from Mr. Stone saying that some of the other boards did include members of the legislature. Further she said the Navigant proposal would appoint people other than legislators to allow for experience and expertise and to save further draws on legislators' time. Concerning any change in roles caused by the new federal health plan, she said the attention to oversight did recognize that Medicaid was administered by the Department of Health and Human Services. She said, "You wouldn't want the legislative branch overseeing an executive branch function such as the health plan." At the same time the recommendations did not take the legislature out of the process since the 9-member board proposal used 3 members appointed by the House and 3 by the Senate. The legislature has the final oversight in the form of the budget. The day to day operation of the plan would be the function of the governing board in the Navigant recommendation.

In discussion with Dr. Myers, Ms. Knippling said there would need to be new legislation to set up qualifications for board members. She said some boards, not necessarily health plan boards require testing of knowledge of the particular field being governed and some included oral interviews with members of the legislative bodies.

In answer to questions from Mr. Feezor on relationship of a board to the broader benefits offered by a state, Ms. Knippling the governance area focused on who is making the decisions and their qualifications and experience more than how such benefits would tie-in with other parts of an employee's overall benefit package.

Board of Trustees' Recommendations

Dr. John Hammond, member of the SHP Board of Trustees provided Task Force Members with the idea from a sub-committee of that Board. (SEE ATTACHMENT: Report on SHP Governance Structure. Adopted, May19, 2009 by the Board. The presentation began with page 11 of the report.)

The report found several approaches to Health Plan Governance in other states:

- o 25 states have the Health Plan in an executive agency
- o 15 states have the Plan in an executive agency with a governing board.
- o 8 states have independent agencies with governing boards.
- o 2 states did not have an identifiable structure.

The Trustees alternatives included:

- Administer the SHP within an executive agency adding responsibilities to the board, such as:
 - 1. The executive agency would have day to day responsibility for the Plan
 - 2. The board would help with health plan policies
 - 3. The agency would have decision and rule-making authority
 - 4. The secretary of agency would be responsible for hiring and evaluating the performance of the Executive Administrator

The Trustees favored this alternative noting that the executive agency would have the fiscal responsibility for the Health Plan.

The second alternative from the Trustees would maintain the SHP independence, but vest the Trustees with true fiduciary and oversight responsibility. Thus the Trustees would set plans and policies and evaluation of the Executive Administrator. Trustees believe this would take more than a volunteer board and would require members with the needed business skills to oversee the operation. Those Board members would need to be compensated appropriately.

The Trustees third alternative would maintain the status quo, but remove "fiduciary" from the statues and reduce Trustee input to the more critical areas facing the SHP. Mr. Hammond said, "We hope you don't do this."

Co-Chair Blue noted that the third alternative was really not an alternative and Mr. Hammond agreed. He asked if the Board of Trustees would still do final agency reviews if the first alternative was followed. Mr. Hammond agreed, but added the Board did not have the expertise to figure the responsibilities of the Board vis a vis the agency where the Plan might be housed. Noting that he felt the co-pays were "out of whack", he

said he would like to see the Board of Trustees taken seriously. Senator Blue asked if the Advisory Board outlined in the Navigant Report given a set amount of money could wrestle with co-pays etc., but did not bind ultimately the Plan, could that work be done by outside experts. Mr. Hammond agreed this could be done. He said if a board consisted of people who were knowledgeable in health insurance, health care, hospital administration and the like could provide insight into such issues as co-pays. Thus specialist co-pays would not be so high that members did not seek that care and later became patients who needed the higher price specialist care, when earlier intervention might have keep the management within the scope of a generalist. Mr. Hammond said that if the future board should have the responsibility of hiring an executive director, then members of that board should be a part of any search committee formed for such hiring.

Ms. Ransome asked where such health plans were located in the study that Mr. Hammond did. He said most of them were in the Department of Human Resources., but there variations. Ms. Knippling said some plans were in the financing agency, and others were in the department of insurance. Ms. Ransome said she felt that a board with the kind of knowledge and expertise being mentioned would need to be a full time board, and if so how would this board be paid. Ms. Knippling said some boards were fulltime and budgeted for that, others were paid a stipend for meetings. She said there was some indication that full-time boards could bring saving benefits to offset the cost of the board.

Mr. Stone asked how the new federal health insurance appeal process to the Department of Insurance might fit with an appeal process to the Board of Trustees. Representative Holliman said that had yet to be decided. Mr. Feezor said he understood that the appeal process dealt with new plans that came into existence. Commissioner Goodwin said members of his staff were meeting with other state insurance departments to create an operating system.

Representative Folwell asked how much the Navigant audit cost. Mark Trogdon from fiscal research put that figure at \$1.2 million. The SHP had submitted a request for bids and awarded the contract on that basis. Representative Folwell followed by asking about the enrollment audit to determine fraud and did that include fraud investigation. Mr. Hammond said that the operation was handled through Blue Cross Blue Shield. Executive Administrator Jack Walker said there was a division within BCBS to deal with provider fraud. He said he believed that the State Retirement System would handle removing the names of deceased members from the roles. The enrollment is handled by each agency. In answer to another question from the Representative, Dr. Walker said he did not know of any cases of provider fraud in the millions of transactions handled by the SHP.

Ms. Simmons asked about the existence of any fraud hotlines. She was told there was such a hotline in both the State Auditor and Commissioner of Insurance offices. She said those should be publicized better.

Representative Braxton asked if there were new innovative ideas to make the administration of a health plan better coming from the boards that were surveyed. Neither Mr. Hammond not Ms. Knippling knew of any such innovations. She noted that the Navigant report dealt with governance rather than operations.

Representative Folwell said that most of the members had heard of cases of fraudulent practices and that there should be better knowledge about how such cases can

be reported. Commissioner Goodwin agreed every tool should be used. He noted there were direct links on the DOI website to make such reports. He said DOI had seen an increase in fraud cases in the current economic situation, but he said most of those cases dealt with embezzlement and the like and he did not see that many cases involving the SHP. Mr. Feezor said that DHHS had been working to deal with both provider and member fraud and that Governor Perdue had made such work a priority.

Governance Discussion

Ms. Ransome asked if the process would proceed with the Task Force making recommendations that would need to be worked into new legislation. Co-Chairman Holliman said that was the process and would also include input from the Governor's office on the issue.

Representative Braxton said he felt the Task Force could handle various issues that would face aboard, except perhaps accountability. He suggested that this group could deal with various issues such as HRAs, HSAs and could look for good ideas on all matters including costs and make recommendations to the General Assembly.

Dr. Myers said he could see an impendent agency located in an executive branch department headed by a person with specific expertise and experience. He said a board should also have a level of expertise in the various issues, but it should not be a full-time board. Dr. Myers said speaking as a two-term member of the Board of Trustees that what ever evolves from this Task Force would be based on the resolution of the governance issue.

Mr. Stone said he felt that presentations should be made to the Task Force on the pros and cons of placement of the health plan. Co-Chair Holliman asked staff to set up such presentations.

Mr. Feezor said returned to the issue of whether the SHP is a single employer plan or a multiple employer plan, given the various pay structures for the elements of the Plan beneficiaries: teachers, National Guard members, etc. with the various salary structures. He said the health plan should also be considered with other benefits such as retirement. Based on his experience with in California with CALPERS, he said a voluntary board would be preferable with sufficient staff to gather the various good ideas. The board should be paid a stipend and the executive director should report to that board and there should be transparency. He likened such a board to the Unities Commission. The board would need representation of the various constituencies, knowledge of the health of the population and performance of providers.

Representative Folwell said he had sponsored a bill that would provide employee benefit statements that would show state employees the value in real dollars. He said that bill had not been implemented. He said employees had not been made aware of the value of the Plan or of the situation the Plan faces.

Commissioner Goodwin said locating such an agency within the Department of Insurance would be a conflict of interest since the Department is charged with regulating the insurance industry.

Ms. Adcock agreed with Dr. Myers that the board should have the expertise and broad representation for issues and constituencies. She said the board should have autonomy and responsibility for decisions to be made.

Co-Chair Blue said that given the benefits of a state employee lie in three areas: state personnel regarding salary, retirement in the Treasurer's office and the SHP with the Legislature, shouldn't these all be in the same place. He addressed the question to Mr. Feezor. Mr. Feezor said they did not need to be tied into the same place. He said he was concerned about replacing the 40% of the state work force that was due to retire in the next 5 years. The health plan and the pension had been attractive to various employees. He said that there should be the ability to look at the total workforce and what the future would hold. Co-Chair Blue said there were no bargaining units, but the responsibility needs to be the placed in someone who reports directly to the Governor.

He said the aim was to come up with a SHP that was:

- o Affordable
- o Efficient
- o Provide the best care to employees for the money

Ms. Simmons wanted to know how conflict of interest matters would figure for board members. Co-Chair Holliman said that depends on the way the Task Force defines the board.

Representative Folwell asked Dr. Walker who was he accountable to. Dr. Walker said the ultimate responsibility lies with the Co-Chairs of the Task Force. The administrative commission would make recommendations to the two co-chairs. Representative Folwell also asked about a new position in the SHP as director of state plans and operations. Dr. Walker said the person would oversee the contracts that come under the SHP, but there was not time enough at the meeting to explain the entire rationale for this position. He said that would be provided.

Co-Chair Blue asked Representative Folwell if it was his position that there was gross mismanagement going on at this time in the SHP. Representative Folwell said it was his opinion that "no one really knows what is going on in the SHP."

Mr. Stone noted that there were two bills introduced in the past session on governance, but neither had passed. He asked about how new legislation might proceed. Co-Chair Holliman said the recommendations from the Task Force would be presented in a bill.

Commissioner Goodwin said that drafts that had been seen vested the Office of the Commissioner of Insurance with certain responsibilities, but that those had been ended as of 2008.

Co-Chair Holliman said the House appointments to the Administrative Commission were Lewis Pate and Martha Adams. The Senate appointee's name was not available, but would be provided. The first term of the Commission provided two members appointed by the House and one by the Senate. The next term there would be two appointed by the Senate and one by the House.

Review of Task Force Work Plan

Ben Popkin of the Research Staff provided members with a handout covering the Work Plan as previously identified by the Task Force. (SEE ATTACHMENT: Prioritizing the Work etc.) He said this is the product of earlier meetings and the priorities set by the Task Force.

Mr. Stone said the Office of State Personnel had not provided information about the role of the SHP in the overall benefits package. He felt that was an important issue to be considered in recruiting and retaining the work force for the State. He also said he had not heard any presentations about charging premiums to state employees. He asked how much money was provided by the federal government for benefits to state employees. Mark Trogdon from Fiscal Research said that about 16% of the cost comes from other sources: federal funds, receipt-paid agencies and the highway fund.

Ms. Adcock said she did not see cost-sharing on the work plan. Co-Chair Holliman said the Task Force had mentioned that and it would be considered.

Prior to adjournment, Co-Chair Holliman reminded staff about presentations on the pros and cons of placing health plan governance within various places in state government.

The meeting adjourned at 11:45 a.m.

North Carolina State Health Plan for Teachers and State Employees

Performance/Efficiency Audit Governance Structure

Presentation to

North Carolina Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees

August 12, 2010

NAVIGANT

Overview of Presentation

- Performance and Efficiency Audit Background
- Governance Structure Background
- Audit Tasks
- Findings
- Recommendations

Performance and Efficiency Audit Background

- Reason for Audit: Concerns raised by State Legislature and others regarding SHP's performance and operation
- Review Areas:
- ➤ SHP's Governance
- > SHP's Administrative Services Agreement with BCBSNC, the administrative services contractor for the SHP's medical benefits
- ➤ Performance in 9 functional areas by BCBSNC
- ➤ Performance by Medco, the SHP's pharmacy benefit management contractor
- Audit Period: state fiscal years (FYs) 2006, 2007 and 2008

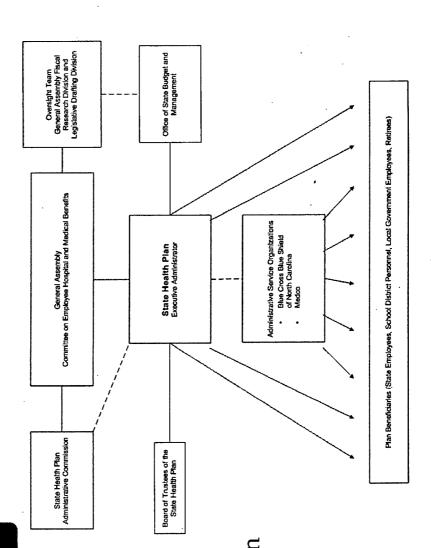

Governance Area Audit Tasks

- Evaluate the SHP's governance and oversight structure.
- Compare the SHP's reporting and governance structure with peer organizations.
- Identify governance and oversight elements that should be strengthened, changed, or eliminated.
- Follow-up on issues identified by the October 2008 and April 2009 State Auditor's reports.
- Evaluate the SHP's Board's recommendations for modifying the governance structure and oversight.
- Assess the impacts of limitations related to communication and confidentiality of information and contracts.
- Determine the appropriate placement of the SHP in state government.
- Develop recommendations to ensure prompt reporting of claims data and trends to actuaries.

North Carolina SHP's Current Governance Structure

Background

- The SHP operates as an independent agency under the jurisdiction of the Legislative branch of state government
- Day-to-day management is assigned to the SHP's Executive Administrator
- Several entities are involved in Plan oversight
- •General Assembly Committee on Employee Hospital and Medical Benefits
- Board of Trustees of the SHP
- SHP Administrative Commission

NC SHP's Governance Structure is Unique

- governance did not identify other states or programs with a structure similar to that used in North Carolina Our review of other state health plans' oversight and
- Oversight for other state plans generally is performed by an independent governing board or an executive branch department or agency (in 12 of the 16 states reviewed)
- ►No other state had a plan under legislative branch administration
- All 16 states had oversight boards
- ▶13 of the 16 states had "governing" boards; 3 of the 16 states had "advisory" boards

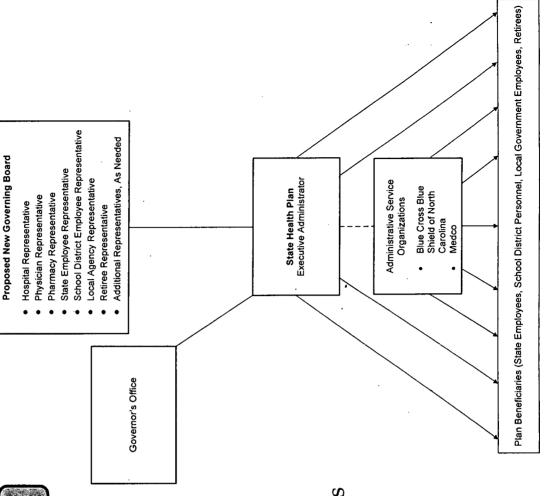

The Current Governance Structure is Not Adequate

- The current governance structure does not ensure adequate oversight and monitoring of the SHP
- ➤ The Oversight Committee lacks the capacity to manage the
- The Board of Trustees lacks the authority to govern the plan.
- >Other State agencies have provided little oversight of the
- raised concerns about the SHP's governance structure Previous audits and reviews dating back to 1994 have

Governance Recommendations

Recommendations

- The State should make the SHP an independent agency that reports functionally to an independent governing board and organizationally to the Governor's Office
- The State should discontinue the operations of the current Board of Trustees and establish a new governing board, tasked with the direct authority to manage the SHP's operations
- The State should develop parameters to allow for an appropriate balance of representation on the Governing Board

Governance Recommendations

Recommendations

- The new governing board should establish a formal charter and a set of guiding principles, including definition of:
- **∀**Mission
- ➤ Goals and objectives
- ➤ Board responsibilities
- > Board positions and organization
- ▶ Board protocol
- Frequency, timing and format of meetings

Governing Board Recommendations

- The State should develop a formal selection process to ensure an appropriate level of competence among governing board members
- Executive Administrator to establish a formal reporting and communications structure to allow for effective The Governing Board should work with the SHP oversight
- strategy for periodically communicating its financial and The SHP should develop a formal communications operational status with the General Assembly and Governor's Office

Report on State Health Plan Governance Structure

by

The Subcommittee of the Board of Trustees
on the Oversight of the State Health Plan
Pam Silberman*
John Hammond
Neppie Stevens*
Linda Sutton*

Adopted by the Board of Trustees on May 19, 2009 *Past Board Members

Introduction

- reexamine their oversight role in relation to the State In 2008, the Board of Trustees (BOT)began to Health Plan.
- In 2009, the BOT appointed a subcommittee to study the Plan's governance and structure and to make recommendations for improvement.
- boards in other states and made recommendations The subcommittee studied the current oversight structure, reviewed the structure of health plan for improvement.
- The Board adopted the report on May 19, 2009.

Study Process

This presentation highlights the information in the full Board Report, including:

- A review of the current roles and responsibilities of the Executive Administrator and Board of Trustees.
- A summary of the current oversight structure.
- A discussion of "Fiduciary" as it applies to Health Plans.
- Performance Report findings and recommendations A summary of the 2008 and 2009 State Auditor's regarding oversight.
- Options for improving oversight of the State Health Plan.
- Next steps.

Executive Administrator and Board of Trustees Current Roles and Responsibilities of NCGS § 135-45

- The Board generally has joint, but limited, responsibilities with the EA to administer the Plan.
- The EA has the power, duty, right and responsibility to act after consulting with the Board.
- Board must approve or otherwise agree with the EA actions. The EA consulting with the Board does not mean that the The EA only has the duty to consult.
- The Board has exclusive responsibility for:
- ➤ Electing officers.
- > Making final agency decisions on Administrative Appeals.

Committee on Employee Hospital and Medical Benefits (Legislative Oversight Committee)

- Has the broadest responsibility.
- Must meet at least quarterly to review actions of the EA and the Board.
- Assembly when and in such manner as the Legislative Oversight Committee and shall report to the General The EA and Board are accountable to the Legislative Oversight Committee designates.

Oversight Team

- Office and Office of State Budget and Management. Comprised of employees of the Legislative Services
- Purpose is to assist the Oversight Committee in monitoring the EA and Board.
- Entitled to have access to all records of the Plan and to attend Board Meetings.
- The EA and Board are accountable to the Oversight

The Committee on Actuarial Valuation of Retired **Employees' Health Benefits**

- Charged with collecting data and reviewing assumptions for the "sole purpose of conducting required actuarial valuation of the State supported retired employees' health benefits."
- Provides an annual calendar-year actuarial valuation of retired employees health benefits.
- The EA is a member of this Committee

State Health Plan Administrative Commission

- Administratively exercises all of its duties independent of the Commissioner of Insurance who serves as the Commission Secretary.
- Commission is responsible for appointing, setting the egislative Oversight Committee, the three member Upon the advice of an executive committee of the salary of, and removing the EA.
- appointed, but the Commission has never met. Some members of this Commission have been
- Created after the termination of the previous EA.

a

Discussion of Fiduciary Responsibility

- The General Statute requires the Board and EA to carry out their duties and responsibilities as fiduciaries for the Plan.
- "Fiduciary responsibilities" is a heightened standard of care that must be employed while carrying out the fiduciary's duties.
- authority or responsibility in the administration of a health plan. To be a fiduciary, one must be vested with discretionary
- An example of such fiduciary duty would the ability to hire and fire the EA, which clearly is not a responsibility of the Board by the General Statute.
- The Board believes that it does not have fiduciary authority and the term "fiduciary" should be removed from the General

10

Plan Accountability and the Auditor's Reports

The State Auditor has periodically reviewed performance of the Plan generally when a crisis involving the SHP has occurred. In numerous audits, the Auditor has found:

- Oversight of the SHP was "inadequate and ineffective."
- The lack of authority of the Board limits the Board's ability to provide effective oversight of the Plan's administration.
- The Plan does not function as a traditional state agency with clear, direct and ongoing accountability.
- branch agency to ensure proper operational and financial oversight." consider legislation to place the SHP under authority of an executive The auditor has recommended that "the General Assembly should

The Board of Trustees agrees with the State Auditor's assessment.

Other States and NC State Agencies

Other states approach to SHP organization

- In 25 states, the SHP is placed within an executive agency.
- In 15 states, the SHP is within an executive agency and has governing advisory board.
- In 8 states, there are independent agencies with their governing boards; CALPERS is the largest.
- In 2 states, we could not determine their approach to managing a SHP.

In other NC State Agencies there is no direct parallel of the administrative arrangement of the SHP.

Alternatives for Improving Oversight of the State Health Plan

Alternative 1: Place the administration of the State Health Plan within an executive agency; invest the Board with additional responsibilities.

Alternative 2: Maintain the independence of the SHP but invest the Board with real fiduciary and oversight responsibilities.

oversight, remove "fiduciary" from the statute and pare down the areas of Board oversight and advice to the Alternative 3: Maintain the status quo in terms of areas where Board input is most critical.

Plan within another executive agency; invest the Board with Alternative 1: Place the Administration of the State Health additional responsibilities (Recommended by Board)

- Governor would be ultimately responsible for the day-to-day Under this scenario, the executive agency, reporting to the performance of the SHP.
- The Board would help shape health plan policies.
- Continue final agency decision and rule making.
- The Secretary of the executive agency would be responsible for hiring, reviewing the performance of and firing the Executive Administrator.
- The major strength of this approach is that the executive agency would have ultimate responsibility for the fiscal oversight of the SHP.

Alternative 2: Maintain the Independence of the SHP but invest the Board with Real Fiduciary and Oversight Responsibilities.

- policies, make final agency decisions and oversight of the oversight of the Plan's finances and contracts, set plan The Board would have the responsibility for ongoing EA, including hiring and termination.
- Total replacement of the volunteer Board would be required.
- Board composition would change to individuals with appropriate business skills to oversee such an organization.
- market value for the responsibilities that they assume Board member would need to be compensated at fair a Board member.

pare down the areas of Board oversight and advice oversight, remove "fiduciary" from the statute and Alternative 3: Maintain the status quo in terms of to the areas where Board input is most critical.

SHP Board Recommendation

- At the time of the Subcommittee's work on restructuring the governance of the SHP the consensus was to move the SHP into an executive agency.
- substantially but I believe that recommendation one remains the best option and has been supported numerous times by At the present time the Board membership has changed the State Auditor and a recent Navigant study.
- "fiduciary" will generate the same oversight problems that we Option 3 which is remaining the same without the term have experienced in the past.
- The Board believes it is time to fix the organizational structure of the SHP.

Thank you for your time and consideration

Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees

Wednesday, September 21, 2010 10:00 a.m.

Legislative Building, Room 1228/1327

I. Welcome

Representative Hugh Holliman, Co-Chair Senator Dan Blue, Co-Chair

- II. Continued Discussion of State Health Plan Governance Options
- III. Adjournment

MINUTES

BLUE RIBBON TASK FORCE ON THE STATE HEALTH PLAN

Tuesday, September 21, 2010 10:00 a.m. Legislative Building, Room 1228/1327

The Blue Ribbon Task Force on the State Health Plan met Tuesday, September 21, 2010 in Room 1228/1327 of the Legislative Building. Co-Chair Senator Dan Blue Presided. (SEE ATTACHMENT: Members and Guests Present.)

Co-Chair Blue informed the Members that the meeting would be devoted to the Governance Issue for the State Health Plan. The minutes of the August 12, 2010 meeting were approved as written.

Governance Discussion

Co-Chair Blue invited Mark Trogdon of the Fiscal Research Division to provide an overview of the outline of the various parts of the issue of changing the governance of a State Agency. (SEE ATTACHMENT: Governance Discussion.) The document was prepared by the staff at the direction of the Co-Chairs of the Task Force. Mr. Trogdon said that Navigant Consulting, which had recommended the SHP be moved under the Governor's Office had provided a supporting material that cites the various reasons Navigant believes the SHP would not fit within any other North Carolina agency. (SEE ATTACHMENT: Follow-up to Presentation.)

Locating the SHP in the Executive Branch of Government could be handled in several ways, Mr. Trogdon pointed out. The location under the Governor's Office directly could be something such as the Office of Management and Budget. Cabinet Office could make the SHP part of some existing Cabinet Office. Under the placement of the SHP within a Council of State department, the Plan would fall under the direction of an elected officer, such as Department of Labor, etc. The SHP Board of Trustees recommended the Plan be placed under an executive branch office, but there was no specific idea that this be a Cabinet or Council of State office. In the fourth option, the SHP would be set up in some other arrangement. Mr. Trogdon pointed out that the N. C. Constitution limits the number of state agencies and that number is complete, so if the SHP were declared a state agency, another existing agency would have to be shifted in some other manner.

In terms of the Appointment/ Removal of the Plan's Executive Administrator, the power there depends on how the SHP is located. In the Governor's Office or as a part of a Cabinet agency or Council of State program the action is again reasonably straightforward. In other instances, there could be an appointed governing board with such power, or a shared responsibility: i.e. Governor's appointment with advice and consent of a governing board.

The List of duties presented in the Third Part of the document is a broad summary of the key elements of the structure and does not attempt to cover specific points that would be required in the legislation that would carry out the governance move. Mr. Trogdon said the powers and duties would have to be vested with the administrator or with a governing board that would delegate the actual duties for the day-to-day operation. If the governance were placed with a Cabinet agency, the Cabinet Secretary to whom executive administrator of the Plan reports would delegate the powers, the same if the governance fell within the province of a Council of State department. In another scenario, a governing board would assign the powers and duties. He said the Governor was not specifically mentioned in this section, since the Governor would be the ultimate power in an agency in the executive branch. However, he noted that it would not be feasible for the Governor to attempt to manage the Plan on a day-to-day basis, thus the power would have to be vested in another manner.

Discussion

Representative Braxton asked for a refresher on the governance of the SHP at this time. Mr. Trogdon said it was established as a part of the Executive Branch, but it sits out by itself, not as a part of any other agency. The existing Board of Trustees has very little power or authority. The powers and duties were vested in the Executive Administrator. The Trustees major responsibility is to handle appeals on medical claims.

Co-Chair Blue then directed the Task Force to consider the pros and cons of the options. He noted that the Navigant recommendation to place the SHP in the Governor's office did not specify how that fit would be accomplished. Mr. Trogdon said that the Navigant recommendation was because the SHP does not seem to fit in any other place. The additional information from Navigant did not cover all state agencies, but did give a rationale for those that might have a possible fit. The Co-Chair noted that Insurance Commission Goodwin had said the Department of Insurance would not be the proper place since the Department regulates the insurance companies, and thus there would be a conflict of interest.

Co-Chair Blue asked the Insurance Commissioner to serve as a proxy to speak for other Council of State members since he is the only COS member on the Task Force. The Commissioner reiterated that his office could not operate with insurance companies and then regulate them. He was reluctant to single out any specific Council of State office noting that wherever the SHP was place there would need to be additional staff with the expertise to operate the system. He said there were agencies that deal with the fiscal matters already, but the new Plan would be different. Shifting to Cabinet Offices, he mentioned the Department of Health and Human Services. Co-Chair Blue said there were no legislators on the Task Force who feel that the authority should remain within the General Assembly, which is the de facto authority placement at this time.

The Commissioner continued to note some places the Plan would not fit:

- o Superintendent f Public Instruction
- o Department of Agriculture

He pointed out that he had not consulted with the various offices: such as the Treasurer's Office, Attorney General's Office, Auditor's Office, and Dept. of Labor.

Co-Chair Blue said that excluding the Department of Insurance, the Commissioner felt that the SHP might fit in either:

- o The Auditor's Office
- Department of Labor
- State Treasurer

The Co-Chair considered this a plausible argument, still considering the Health Plan as a stand-alone entity. In the end, the argument still favored putting the Plan under the Governor's Office in some fashion.

Mr. Stone said that the SHP had been located in the Treasurer's Office in the late 1970s. He asked how that might fit in today's environment of federal health insurance etc. Mr. Trogdon said the Treasurer's Office had included the Retirement system, which meant there was an employee service group similar to that of the SHP. The retirement system administers a defined benefit that is not as volatile as the SHP. He also said there had been not discussion with the Treasurer's Office about any such governance issue. Mr. Trogdon said moving the Plan into the Treasurer's Office would mean moving a \$2 ½ billion program with all its complexities into that Office. He said the administration of the SHP would be much more complex that the Retirment system. Co-Chair Blue asked Mr. Stone what had been the reason for the move out of the Treasurer's Office. Mr. Stone deferred to Mr. Feezor.

Mr. Feezor said the earlier governance with the SHP under the retirement system did bring with complexities as noted. He said that there seems to have been a feeling at that time that there was no an active management of the Health Plan in that placement and not a clear oversight. Further, he said there was the perception that the tilt was in favor of the retirees and not the full complement of employees.

Ms. Adcock asked what the downside would be to place the SHP in the Office of the Governor. Ms. Ransome said if the decision was made to place the Plan in the Governor's Office then there should be a strong board of trustees with the powers to keep the SHP from becoming a political animal. Co-Chair Blue asked if there was no one who felt the Plan should go to an existing Cabinet Office. He said the State Treasurer might use the same conflict of interest arguments once she (Janet Cowell, State Treasurer) learned of the discussion. Further, the Co-Chair asked for anyone who felt the Plan should go into a Cabinet agency. Ms. Adcock said the Governor's Office seemed to avoid any sort of "force-fit". She continued that the governing board should set the policy and the executive administrator should carry it out.

Using the example of the Office of Controller, Ms. Ransome suggested a mechanism of appointment with Legislative confirmation for the Executive Administrator. Co-Chair Blue said the Controller's term overlapped that of the Governor.

In summary, Co-Chair Blue said it seemed no one on the Task Force seemed inclined to put the SHP governance within a Cabinet Office. He said that did not rule out a Cabinet agency except for the purposes of discussion at this meeting, and to provide the Staff with a "boundary" to work with. Further, he said that without making a hard and fast decision, the Council of State offices of Auditor, Labor and Treasurer were still viable for discussion.

Representative Braxton said he felt that no agency would want the SHP to come under that agency's jurisdiction. He continued that this would be a new direction and the

need for staffing. He took issue with the position from the Insurance Department that there would be a conflict of interest, saying that the same argument might come from the Auditor or the Treasurer. He argued that making the SHP a stand-alone part of an agency would be of benefit. He maintained that the knowledge of the Department of Insurance made a good place for the Plan. He agreed that Treasurer's Office placement was a good consideration, but was not sanguine about the Auditor's office. The Representative said it would be too political to put the Plan in the Governor's office. His best support was for the Treasurer's Office because of the retirement plan being there, although he did think the Insurance Department should remain in consideration.

Co-Chair Blue asked Representative Braxton if he felt the Treasurer might be able to use SHP funds for short-term gains. The Representative said that was possible. He noted that several years ago, the General Assembly was preparing to adjourn and the rumor was the SHP would have a \$17 million dollar surplus, then the real picture showed the Plan had a \$250 million deficit and the Legislature adjourned without any action. He argued that the Treasurer's office would have had a better track of the money.

Representative Folwell said he could not imagine any state office wanting to turn aside the opportunity to administer the Plan in order to show how that office could perform. He said it was more an opportunity than a problem. He said he was neutral on placing the Plan in the Cabinet level office. He said that if the Plan was a stand-alone office it would be taken over by regulators based on financial practices. He said the governance issue was standing in the way of real reform in the SHP. Co-Chair Blue asked if Representative Folwell felt that the Blue Ribbon Task Force possessed the sufficient expertise to get control of the rates and the other "burning issues" in the Health Plan. Representative Folwell said, yes and categorized the people "in this room" as knowledgeable consumers and knowledgeable people to provide the transparency and accountability, and to take advantage of the size of the SHP to benefit taxpayers, members and retirees.

Insofar as the State Treasurer's office was concerned, Representative Folwell recalled he asked at an earlier meeting, "How does the SHP know when a member has died?" He said he thought the answer was the notification came from the pension plan. He said the Task Force could better handle the administration of the SHP.

Responding to Co-Chair Blue's question that governance was an important issue facing the Task Force, Representative Folwell said governance was not the most important issue. He said the rising cost of care was eating away at what he called the legacy costs of the future.

Mr. Feezor asked about the percentage of SHP beneficiaries, not dependents, who were state employees. Dr. Jack Walker said the largest percentage were teaches. Mr. Feezor said teachers were paid by the state, but employed by the schools. He continued saying the SHP was a multi-employer purchasing program. Then he wondered about the purpose of the SHP: retention of employees, fulfilling a legislative responsibility, or a prudent use of taxpayer money. He agreed with Representative Folwell said the governance was important, but that the long-range issues facing the Plan over the next four years would be the ability of handle approximately 35% of the health care expenditures in North Carolina.

Co-Chair Blue said that given Mr. Feezor's observations what would be his ideas on the governance issue. Mr. Feezor said he leaned toward locating the Plan somewhere within the Council of State, with the reservation that the Plan be able to avoid the political forces, since the difficult decision would have to be made within the framework of stability and predictability. He said there should be a purchasing council that is independent with the expertise to render the decisions. That governing board should be independent and able to make the decisions that benefit both the taxpayers and the members. Further, more, he said that state between now and 2014 (the effective date of the full-force of the federal health care reform.) the state should develop this purchasing council to address all the various health care issues and wellness issues. He said the state had the opportunity to move now.

In the dialog, the Co-Chair and Mr. Feezor did mention the TENN-CARE system, which is the Tennessee Medicaid Managed Care Model. Further, Co-Chair Blue asked the importance Mr. Feezor placed on Governance. Mr. Feezor said the governance issue was part of the need he sees to consider the long-term issues. Co-Chair Blue offered the opinion that in the end the least qualified people to make all these decisions would be the Legislature.

Mr. Stone said the regular member state employee would like to see the SHP out of the realm of politics. He said that since the Governor's budget proposals were the ideas the General Assembly worked with toward the final budget, that the Governor's position should be a major discussion point.

Representative Braxton said his current position favored the State Treasurer's office for the powers of administration. He continued saying the governing board should have varied experience and expertise to set the policy of the Plan. He said placement of the Plan administration in the Governor's office would put politics into play since the membership represented a huge block of voters. An autonomous board with policy power would be a key. Co-Chair Blue said the Governor's office was not clamoring to have the Plan within this jurisdiction. He said he agreed with the point from Representative Folwell that there was an opportunity for whoever took over the governance. He also noted that the SHP dollars was only about 10% of the total budget for which the Governor is responsible. He said that he did not want to give the impression that just because the Governor is elected that the Task Force felt the Governor would be insensitive to the needs of the Plan, in terms of employee benefits etc.

Ms Adcock asked where 40 or so other states housed their health plan. She continued saying that valid points had been raised, including the premise that in the private sector the Plan would be taken over by regulators. Commissioner Goodwin said that the Department of Insurance only became involved with an insurance company when that company was being liquidated. He said if the Plan was up and running with full funding the rates would not be lowered due to the high standards of the Department. He said he did not know of any other state where the health plan was located in the Department of Insurance.

To Ms. Adcock's point, Mr. Trogdon referred to information provided with the Health Plan's Board of Trustees, which said 25 states placed the health plan in the Governor's office, 15 placed the plan in the governor's office with a strong policy board, and there was no information about eight states. He said New Jersey's plan was in the

treasurer's office, In Georgia the plan is in the Department of Community Health. He said there were a variety of locations, including Nevada and West Virginia where there are strong policy boards in place. He continued reminding the Task Force that most of the benefit dollars went to local school employees, community college employees etc.

Co-Chair Blue said the benefits, terms and conditions of employment, which are usually parts of a collective bargaining process. Since North Carolina is one of only a few states that do not allow such a bargaining agreement; thus, North Carolina's position was unique since the other states health plans could come about through bargaining. Mr. Trogdon said some states did indeed arrive at the benefits level through bargaining. He said Minnesota came to mind immediately.

Mr. Stone asked if Mr. Feezor could draw a link between the operation of a health plan system under the governor's office and the ways that might be constructed. Mr. Feezor said some states have a purchasing council, either combined and voluntary, or dealing with health care such as Florida and Washington. Speaking from previous experience dealing with the North Carolina Health Plan when it was located under the Department of Insurance, Mr. Feezor agreed with Commission Goodwin: that purchasing health benefits and regulating those who supply those benefits poses a direct conflict of interest.

Ms. Adcock asked if various Cabinet and Council of State Offices could come to the Task Force to present the pros and cons of citing the SHP in those offices. Mr. Stone said there is reluctance for agencies to take the SHP under their wing, but he said that the issue needed to move along. Co-Chair Blue assured the Task Force that come the 2011 Legislative Session there would be legislation that would lay out the "WHERE, HOW AND WHAT" of the State Health Plan. He said there would need to be budget plans developed, etc. Speaking as the Co-Chair, he said that wherever the SHP is located, the powers needed to be decided by late November or early December to allow for drafting.

Representative Braxton said he hoped the Task Force would go further and have recommendations on health care policy, how to hold the line on Plan costs, or find better ways to give better care within that framework. He said he would like to see the Task Force develop a plan that is a model for other states.

Representative Folwell expanded on his earlier remarks by saying he looked for the Task Force as a way to reward health and not health care. He said he felt there should be a focus on promoting healthy behavior. He said we have to start talking to taxpayers and participants about what has really been going on in the SHP.

Ms. Adcock said this would segue into the powers and duties discussion: will be the power of what the entity would be and the power to create health care policy. She said she considered the power of an independent, expert board was more important than the placement.

Mr. Feezor said the duties and powers should include the ability to work to engage the employing units and their representative parts in the active management of their own health care.

Mr. Trogdon said the outline the document was a broad picture, but that implementation in drafting legislation would be a very detailed and specific fit in existing and new legislation. He said that some powers were already in the statutes, but that others would be additional, and tailored to go to the place such powers should be assigned.

Co-Chair Blue asked if there were powers and duties in the document's outline that members felt a board or administrator should not have. Mr. Stone said the federal health care reform placed the adjudication of appeals within the various Departments of Insurance. Staff of the Department of Insurance said the SHP was covered in Chapter 58 of the General Statutes for external review. Dr. Walker pointed out that the process of appeal began in the SHP, but proceeded into other stages as necessary. Those stages could include the Office of Administrative Hearings, or to Superior Court.

Representative Folwell asked if there was anything to prevent an educational unit from withdrawing from the SHP. Mr. Trogdon said his first thought would be that the money that was appropriated from the state to that educational unit for health care would be for the purchase of health care through the SHP. Mr. Trogdon said there was a recent issue when the University system wanted to pull the active employees out of the SHP, but would leave the health coverage for retirees still in the SHP. Representative Folwell followed up by saying that someone within the system facing rising costs would seek to do that in the future. Rep. Braxton said that his District reflected the opposite: small towns etc. seeking to be covered by the SHP. He said that groups should be allowed to opt out of the SHP, but if they decided later to opt in, there would be no requirement that they be allowed to return to coverage. Mr. Feezor said the experience in California was that some groups could opt out, but that active and retired members would have to be part of the new offshoot. He suggested that the powers and duties be written to allow a range of contributions and coverage.

Mr. Trogdon said the first part of the list of powers and duties covered who would be granted those delegated powers. Since the early 1980s, he said the coverage portion of the Plan had been set by the General Assembly. The contributions and deductibles had fallen by default to the General Assembly. Usually gubernatorial budgets have been sent to the General Assembly without allowing enough money for the SHP's needs, thus the General Assembly had to set the co-pays, deductibles and co-insurance. The outline presented to the Task Force is leading to a Board that would set those limits based on the amount of money allocated to the SHP. The whole issue of governance was been set in the direction of removing the General Assembly from the role of setting those co-pays, deductibles and co-insurance levels.

Co-Chair Blue asked for any additional powers and duties that needed to be added. Mr. Feezor asked that the governing board be allowed to participate in other purchasing plans. Further, the Co-Chair took notice of Mr. Trogdon's point that the Task Force decision should be made on whether these powers would lie with an administrator or a governing board.

Ms. Adcock said she was not sure how specific the powers and duties needed to be and asked for comments from Mr. Trogdon. He said he wished to provide context for the Task Force to decide whether the powers and duties should be delegated to an administrator, a governing board, or a combination of the two. He said once that was decided then the discussions would come as how detailed the powers and duties should be. He said the placement of the Plan would then lead to the decision of who possesses the powers and duties and who carries those out.

Mr. Stone said there was a need to consider the plan as "health insurance" and not "sickness insurance." Ms Adcock said the move to create health policy would be a broad

step. Co-Chair Blue said such a policy would also cut across many departments and agencies in state government. He said the points he drew from Mr. Feezor's observations was consideration of taking various member bases: Medicare base, Medicaid base and SHP and combine that to provide purchasing strength. Mr. Feezor said the approach would be to create a way to have performance improvements, cost effectiveness and at this time, it is good to look at the greater opportunities of using the various component parts. Co-Chair Blue said he took the view that Mr. Feezor was pointing out the opportunity to look more broadly than just the SHP and include DHHS, the Industrial Commission and the like as part of the health care issue. Both agreed that some discussion and decisions needed to be made in the context of something more than just the SHP.

Ms. Adcock said the collaboration needed to be considered beyond purchasing, but to making employees healthier. She said she felt the governing board should have the power of decision-making and the administrator the person to carry out the decisions.

Co-Chair Blue then moved to discussing the appointment process and that the outline provided by the staff did not include legislative participation in the appointment process.

The discussion turned to a governing board that was a stand- alone entity with the ultimate responsibility to the General Assembly. Co-Chair Blue said a stand-alone board within the Governor's office could have gubernatorial appointments and co-appointment responsibility. He said the board could have certain points of view and expertise representative in the various members.

Mr. Stone said some independent boards are elected by the members themselves.

Mr. Feezor said he felt the appointment and removal of the executive administrator should be the responsibility of the independent governing board. He also said the credibility of the SHP and the eroded confidence in the SHP would not be fixed in a year's time and particularly in a year's time with limited resources. He said it would take time involving all parties to create a model plan.

Co-Chair Blue asked the Task Force to consider who should be ultimately responsible for the actions.

Ms. Simmons asked the SHP staff where they could see the Plan placement and responsibility. Dr. Walker said he favored placing the Plan under the governor, with the power of the governor behind it, headed by an independent board. He did not have an opinion on how the board should be picked. He said he did not see the Plan working under any particular agency.

Co-Chair Blue asked Mr. Trogdon for his sense of what the Task Force wanted. Mr. Trogdon summarized the Plan should have an independent board with power and teeth. He said there seemed to be no consensus on where the Plan should be located within state government. He said also, there was no clear view of the powers and duties and the appointment/removal of an administrator.

Co-Chair Blue said the location would fall into place after the governing board and accountability issues are established.

Co-Chair Blue said the next meeting would be likely the first or second week in November.

The meeting adjourned at 12:16.

Blue Ribbon Task Force on the State Health Plan Governance Discussion September 21, 2010

This document provides a high-level outline of the primary decision elements that would need to be addressed by the Task Force in order to formulate a recommendation to change the current organizational location and governance of the State Health Plan. The outline is divided into three parts that address the most basic elements of changing the governance of a State entity: the location of the Plan within the Executive Branch of State government; the appointment/removal of the Executive Administrator of the Plan; and the powers and duties of the Executive Administrator, governing board or presiding chief executive (e.g., the Governor) over the Executive Administrator.

Part I - Location within Executive Branch of State Government

Potential options for changing the organizational location of the State Health Plan within the Executive Branch of State government:

Option 1: Office of the Governor (Navigant Recommendation)

Option 2: Cabinet Agency

Option 3: Council of State Agency¹

Option 4: Other

Part II - Appointment/Removal of the Plan's Executive Administrator

List of potential authorities to appoint or remove the Executive Administrator of the State Plan:

Option 1: The Governor

Option 2: Appointed Cabinet Secretary or Elected Council of State Officer

Option 3: An Appointed Governing Board

Option 4: Shared Appointment/Removal Process

¹ The Plan's Board of Trustees recommended to the Task Force to locate the Plan with in an "Executive Agency", but did define executive agency to be limited to either a Cabinet or Council of State agency.

Part III - Powers and Duties

Powers and Duties provide the fundamental authority for individuals operating and/or overseeing an entity to perform key functions related to the entity's mission. Below is a list of high-level powers and duties required for the Plan to meet its charge to provide health benefit coverage to Teachers and State Employees. This list is a summary list for explanatory purposes and does not represent very specific powers and duties that are required in statute to implement these broad categories of authority.

High-level Powers and Duties (Summary List)

- Enhance or reduce benefits offered under the Plan
- Set co-pay, annual deductible and co-insurance maximum amounts
- Set annual premium contribution rates
- Negotiate and enter into contracts on behalf of the Plan
- · Provision of independent rule-making authority
- Fiduciary responsibility
- Adjudication of plan member appeals
- Conduct strategic planning
- Create and implement Medical policy

Assignment of Powers and Duties

The assignment of powers and duties can be provided to a single officer, shared or distributed among different officers, shared with a governing board, or provided to a governing board. Powers and Duties also may be delegated as in the example of a governing board delegating certain functions to a managing executive officer. For the State Health Plan, depending on the decisions made in Part I, the potential officers and/or entity that may have all or part of the basic powers and duties to operate the Plan are as follows:

- 1) The Executive Administrator of the Plan
- 2) A Cabinet Secretary or Elected Council of State officer
- 3) A governing board

North Carolina Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees Follow-up to Presentation of Governance Structure Report of Performance/Efficiency Audit to North Carolina State Health Plan for Teachers and State Employees

Assessment of Compatibility of Selected State Departments, Agencies and Entities with the State Health Plan (SHP)

nent about the Move SHP to This Department Oppartment Oppartment	ON	No	°Z	OZ
Review Team's Assessment about the Compatibility of this Department, Agency or Entity with the SHP	 Lacks specific knowledge of employee benefits or health insurance requirements. Is already overseeing 23 offices and commissions with diverse functional areas. Appears to lack resources to properly oversee the SHP. 	Office of the State Auditor cannot accept oversight of the SHP as it would lose its independence and ability to conduct audits of the SHP.	• Functional areas do not include oversight or data related to provision of health care, insurance services, or employee benefits.	• Functional areas do not include oversight or data related to provision of health care, insurance services, or employee benefits.
Department, Agency or Entity Mission and/or Responsibilities	 Acts as the business manager for NC state government. Currently oversees a variety of government operations, including procurement. Tends to be the "catch-all" agency for offices or departments that don't fit in other agencies. 	 Has skilled auditors and analysts who could conduct in-depth reviews and audits of the SHP. 	 Responsible for economic, community, and workforce development. Provides data, statistics, information, and reports for state government and agencies that regulate commerce. 	• Responsible for helping employers find staff they need to carry out their business and serves as a career resource center for workers at all skill levels and age groups.
State Department Agency or Entity	Department of Administration	Office of State Auditor	Department of Commerce	Employment Security Commission

Move SHP to This Department, Agency or Entity? No	Yes
Compatibility of this Department Gompatibility of this Department Gompatibility of this Department Committee does not meet frequently enough to provide adequate oversight. Committee members are legislators with competing demands on their time. Oversight process is too susceptible to lobbying efforts. The oversight of an executive branch function is being conducted by the legislative branch.	 Has jurisdiction over state employees, retirees, and teachers. Can provide an organizational reporting structure while allowing the SHP to report functionally to an independent governing board with decision making autonomy. May still inject "politics" into the process by placing demands on the executive administrator or board to act (can be ameliorated through proper safeguards and controls).
Department Agency or Entity Mission and/or Responsibilities • Currently has functional oversight over the SHP via the Committee on Employee Hospital and Medical Benefits.	• Head of the Executive branch of state government.
State Department, Agency General Assembly	Office of the Governor

. ..

Move SHP to This Department, Agency or	οχ	°Z	O _Z
Review Team's Assessment about the Compatibility of this Department, Agency or Entity with the SHP	 Would need significant increases in staff and resources to be able to oversee the SHP appropriately. Department's new information management system can process provider claims and member enrollment, but would need additional functionality to handle SHP members. Lacks the provider networks that an outside group (such as Blue Cross Blue Shield of North Carolina) can provide. Has major role in state's health care reform implementation that requires significant management attention. 	Having responsibility for administration and oversight of the SHP would represent a conflict of interest with the Department's role as regulator of the insurance industry.	 Functional area is in providing assistance to health plan enrollees with managed care programs rather than the current PPO model employed by the state. Does not serve in an oversight functional role (serves an advisory role).
Department, Agency or Entity Mission and/or Responsibilities	 Large agency that has oversight over Medicaid, Mental Health and other health and human services programs, administrative, and support functions. Has already taken responsibility for the state Children's Health Insurance Program (SCHIP). Is implementing a large information technology system that could be used for billing providers and enrolling state employees. 	 Responsible for regulating the insurance industry, licensing insurance professionals, and educating consumer about insurance products. 	• Provides advocates for patients and offers advice to North Carolina health care consumers with health insurance questions.
State Department, Agency or Entity	Department of Health and Human Services	Department of Insurance	Department of Justice – Managed Care Assistance Section

Move SHP to This Department, Agency or	No	ON	OZ	° Z	°Z
Review Team's Assessment about the Compatibility of this Department, Agency or Entity with the SHP	• Functional area revolves around overseeing labor laws rather than insurance or employee benefits.	 Does not have experience in operating an agency or providing services. Serves more as an advisory body than as an oversight body. 	 Lacks jurisdiction over segments of the SHP's membership, e.g., county workers and retirees. Is not currently responsible for overseeing benefits provided to state employees, such as health care or pension. 	• Lacks experience with the provision or oversight of health insurance benefits.	• Lacks experience with the provision or oversight of health insurance benefits.
Department, Agency or Entity Mission and/or Responsibilities	 Responsible for promoting the health, safety, and general well-being of the state's workforce. 	 Provides statewide budgetary, management, and information services. Responsible for providing information to agencies and the Legislature to ensure the most effective use of public resources in compliance with laws and regulations. 	• Provides human resources services for state agencies and universities.	 Responsible for administering the tax laws and collecting taxes due to the state. 	 Provides essential fiscal services to support and assist State agencies in complying with state and federal fiscal laws, rules, regulations, and generally accepted accounting principles. Has staff with the knowledge and abilities to conduct detailed fiscal analyses.
State Department, Agency or Entity	Department of Labor	Office of State Budget and Management	Office of State Personnel	Department of Revenue	Office of the State Controller

Move SHP to This Department Agency.or	No					°Z					
Review Team's Assessment about the Move SHP to This Compatibility of this Department Agency or Entity with the SHP	 Lacks experience with the provision or oversight of health insurance benefits 					• Similar to the General Assembly,	members have competing demands on	their time and attention.	 Could cause a conflict of interest for the 	State Auditor and the Insurance	Commissioner.
Department, Agency or Entity Mission and/or Responsibilities	 The Treasurer serves as the state's banker and chief investment officer. 	 Includes oversight of the state's retirement plan, including the teachers' 	and state employees' retirement system	and the local governmental employees'	retirement system.	 Oversight would include members of 	several organizations that could	provide resources or input into the	process (including the Treasurer's office	and the Insurance Commissioner).

MINUTES

BLUE RIBBON TASK FORCE ON THE TEACHERS AND STATE EMPLOYEES HEALTH PLAN

Tuesday, November 16, 2010 10:00 a.m. Room 1228, Legislative Building

The Blue Ribbon Task Force on the Teachers and State Employees Health Plan met November 16, 2010 in Room 1228 of the Legislative Building. Co-Chair Representative Hugh Holliman presided. (SEE ATTACHMENTS: Agenda and Members and Guests.)

Ryan Blackledge from Bill Drafting presented the draft of the Task Force report to the 2011 Session of the General Assembly. (SEE ATTACHMENT: Draft Report.) He said the Chairs of the Task Force had asked staff to review the meetings and summarize the discussions for the draft. Mr. Blackledge said a review of the meetings boiled down to the Task Force's belief that the Plan needed a stronger governing board with powers to carry out the Plan operation. The Board would have various responsibilities and would take over a number of decisions currently made by the General Assembly.

The findings reflected this consensus from the Task Force. The findings included the lack of a logical fit for the Plan within any existing state agencies. Indeed, the Task Force has received letters from agencies which reflected the same position (SEE ATTACHMENTS: Letter from State Treasurer, Letter from Secretary of Labor.) The findings provided an outline for composition of such a governing board. The governing board would have various responsibilities currently divided among several entities. The findings noted the complex nature of operating the SHP.

The ultimate recommendation was a strong, independent board with broad policy making authority and clarification of the power to hire and remove an executive administrator of the SHP.

Mr. Blackledge noted that Insurance Commissioner Goodwin, a member of the Task Force, had stated his objections to locating the SHP within that department on the belief that would be a conflict of interest. A similar position has been reflected by the State Auditor and a letter is expected to that effect. Commissioner Goodwin also offered to present his position in writing.

In the discussion, Mr. Stone said he was disturbed a copy of the draft had not been provided earlier. He said that political interference from the General Assembly is detrimental to the SHP and that operation of the Plan had to be moved to the Executive Branch. Furthermore, Mr. Stone said the recommendation should include placement of the Plan operation within the Executive Branch. He proceeded to enumerate other points, such as creating a governing board patterned after the health plan board for the Commonwealth of Pennsylvania. He said the board could be structured like the health exchange which Mr. Feezor chairs. Mr. Stone expressed the need to create a board which

would be consumer oriented. He said the report did not provide recommendations on issues such as obesity, tobacco use, etc.

Ms. Simmons provided the Task Force with charts taken from the SHP website concerning body mass index, including information from the Centers For Disease Control. (SEE ATTACHMENT: Body Mass Index Table.) She said that BMI should not be used as the only measure in considering weight and wellness.

Mr. Feezor thanked the Co-Chair for the work the Task Force had done. He termed the report as a big, important step. He agreed with Mr. Stone that the recommendation should be to locate the Plan within the Executive Branch and he moved to have that change made in the draft. In composition, the new governing board should include people with expertise in quality of health care prevention and promotion. He also asked that the draft reference to the federal health care laws, be broadened to include ALL federal laws. Co-Chair Holliman asked Mr. Feezor to confer with staff to make these suggestions into the form of a motion.

Dr. Myers, who has served on the Board of Trustees for the SHP said that same board had studied the governance issue and had recommended to the Task Force the Plan should reside in an existing branch of government. However, after further consideration he agreed that oversight by the Executive Branch would be preferable. He agreed with the changes suggested by Mr. Feezor. In the current financial situation facing health care, Dr. Myers said, what can be done for patients and what these patients need is more than the system can provide.

Ms. Adcock said the section concerning the makeup of the governing board has a permissive "may include", she suggested that be changed to "shall include". Ms. Adcock also said that the health benefits to state employees should be considered a part of the overall compensation package and as such should be a philosophy of the governing board. Ms. Adcock said she appreciated Ms. Simmons' comments about the body mass index, but that the purpose of the Task Force was not to "diddle" with the rules. She said the governing board could become involved in such matters.

Mr. Stone said that "may" should be replaced with "shall" in other places in the draft. Co-Chair Holliman noted that the purpose at hand was not to write the legislation, but to make recommendations. Mr. Stone said the decision on hiring and firing of the executive administrator should be done by either the new governing board or the Governor. Co-Chair Holliman said that issue should be left to the 2011 Legislature.

Responding to a question from Representative Folwell, it was noted that neither the SHP Executive Administrator nor any SHP staff members were present at the meeting. Further, Representative Folwell said he was disappointed that the recommendations did not include moving the SHP to a calendar year. Co-Chair Holliman said there was no objection to considering a motion to include that recommendation. Representative Folwell provided members with an evaluation of the State Retirement System by Aon Consulting. This evaluation, sent to the State Budget Director, said over \$3 billion dollars is necessary each year to fulfill health benefits for retiree medical benefits. (SEE ATTACHMENTS: Aon Consulting to Charles Perusse.)

Co-Chair Holliman asked Theresa Matula from the Research Division to review the recommendations made to that point. Representative Folwell and Mr. Blackledge agreed on a finding with reference to the calendar year recommendation. That finding per

Representative Folwell was that the SHP should reward members for focusing on their health, rather than their health care.

The various recommendations were combined into one amendment for consideration by the Task Force. Mr. Stone asked for explanation on several points. Dr. Myers was unclear about the section which referred to clarification of the role of the executive director. Co-Chair Holliman said the exact wording would come in the proposed legislation. Dr. Myers moved to amend the amendment to say that the appointment and removal of the executive board be a responsibility of the governing board. Ms. Matula worded the perfecting amendment. The motion passed with Representative Braxton dissenting.

Co-Chair Holliman then put the full amendment before the members. Mr. Stone continued to propose that the function of the Plan lie with the Executive Branch and that the report omit a negative reference to the General Assembly's role. He made that into a motion. Ms. Matula expressed the clarification that action is made by the governing board in conjunction with the Governor. Ms. Adcock said she felt the recommendation got the position Mr. Stone wanted, since one of the findings was that the General Assembly should not have broad oversight of the SHP. Mr. Stone moved that the section put the responsibility with the Executive Branch and the governing board. Commissioner Goodwin acknowledged the intent of the motion and asked about the funding role of the General Assembly, i.e. should that role be included. Mr. Stone said he had no objection to that wording. Co-Chair Holliman said the General Assembly would always have a role in the operation of the Plan. Mr. Feezor opposed the amendment saying the finding concerning the General Assembly's role was strong enough. A vote on the Stone amendment failed.

Then the motion to adopt the amended report passed, with Mr. Stone abstaining. (SEE ATTACHMENT: Blue Ribbon Task Force report to the 2011 Session of the General Assembly.)

The Task Force adjourned at 10:45 a.m.

TASK FORCE PROCEEDINGS

The Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees met three times from August 12, 2010 until November 16, 2010. The information below provides an overview of presentations received and issues discussed by the Task Force. Detailed minutes and copies of handouts from each meeting are on file in the Legislative Library or are available for a period of time at the Task Force website: http://www.ncleg.net/gascripts/DocumentSites/browseDocSite.asp?nID=114.

August 12, 2010

The Task Force was presented recommendations on changing the governance of the State Health Plan by two separate entities with a relationship to the Plan.

First, Navigant Consulting, a consulting firm to the State Health Plan, presented recommendations regarding the State Health Plan's governance arrangement. Navigant evaluated the Plan's governance and claims processing function under a General Assembly mandated audit. Representatives for Navigant Consulting recommended that the Plan be organizationally located under the Governor, but functionally responsible to an independent board. This independent board should be tasked with the direct authority to manage the Plan's operations. Representatives of Navigant Consulting noted that in most states, an independent board or executive branch agency or department houses the function of a public employer health benefit plan.

The second recommendation was from the State Health Plan's Board of Trustees. Dr. John Hammond, a member of the State Health Plan's current Board of Trustees, presented a recommendation to require that oversight of the Plan's day-to-day operations and appointment of the Plan's Executive Administrator fall under the responsibility of an executive agency with a reporting relationship to the Governor. The Board of Trustees also recommended that the Plan's Board of Trustees be given the responsibility to formulate policies implemented by the Plan, to conduct rule-making, and to make final agency decisions.

The balance of the meeting was devoted to discussion about the information presented to Task Force members regarding State Health Plan governance changes and ways to move forward with developing a Task Force recommendation.

September 21, 2010

At the request of the co-chairs in an effort to guide the Task Force discussion on governance options, Mark Trogdon, staff fiscal analyst, presented a broad overview of issues related to governance of the State Health Plan. Mr. Trogdon mentioned the following three primary areas the Task Force might wish to consider as they discuss governance options: organizational location within an Executive Branch of State

Government; the authority to appoint and remove the Plan's Executive Administrator; and the distribution of powers and duties relative to the Plan.

Mr. Trogdon reviewed the following location options for organizational placement of the State Health Plan: Office of the Governor, Cabinet agency, Council of State agency, or other location. Mr. Trogdon pointed out that Navigant Consulting, Inc. had provided the Task Force an Assessment of Compatibility of Selected State Departments, Agencies and Entities with the State Health Plan which recommended placement of the State Health Plan in the Office of the Governor. Mr. Trogdon also reminded the Task Force that during their prior meeting they received a report from the Board of Trustees recommending placement of the State Health Plan in an executive agency, but not specifying whether it should be a Cabinet or Council of State agency.

Next Mr. Trogdon reviewed a list of potential authorities to appoint or remove the Executive Administrator of the State Health Plan. The list of authorities included: the Governor; an appointed Cabinet Secretary for elected Council of State officer; an appointed governing board; or a shared appointment/removal process.

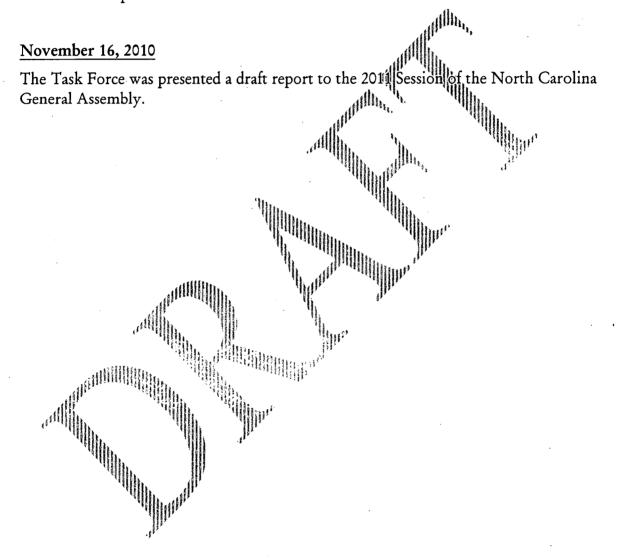

The third area suggested for consideration by the Task Force was the powers and duties that provide the fundamental authority for operation and oversight. This summary list included the authority to enhance or reduce benefit options; set co-pay, annual deductible and co-insurance maximum amounts; set premiums and contribution rates; negotiate and enter into contracts; fiduciary responsibility; and other broad elements key to the Plan's mission of providing health benefits to State employees and teachers. Mr. Trogdon pointed out that to operate the Plan on a daily basis, the assignment of those powers and duties must be given directly to an executive administrator, to an agency head that carries out the power and duties or delegates them, or to a governing board or authority that carries out the power and duties or delegates them.

The Task Force asked for a reminder of the State Health Plan's current organizational placement. Mr. Trogdon explained that the State Health Plan is currently placed under the executive branch but operates as an independent entity. The Plan does have a Board of Trustees vested with some powers and duties and limited governing authority. Currently, most of the powers and duties are assigned to the Plan's Executive Administrator.

Upon request, Mr. Trogdon reported that research for prior reports received by the Task Force noted that 25 states place the health plan within an executive agency, 15 states place the health plan within an executive agency with a governing advisory board, there are 8 states where the health plan operates as an independent agency with a governing board, and a couple of states where they were not able to determine placement. It was noted that a decision on organizational placement of North Carolina's State Health Plan is complex because the Plan covers employees of both Cabinet and Council of State agency employees, legislative and judicial branch employees, employees of local school systems, employees of community colleges, and

university employees. Since the Task Force had heard from the Commissioner of Insurance, the Task Force suggested that the Auditor, Commissioner of Labor, and Treasurer be asked to comment on organizational placement of the State Health Plan under their agency.

The balance of the meeting was devoted to Task Force discussion of the organizational location of the State Health Plan within an Executive Branch of State Government; the authority to appoint and remove the Plan's Executive Administrator; and the distribution of powers and duties relative to the Plan.

FINDINGS AND RECOMMENDATIONS

FINDINGS:

During the 2010 Interim, the Blue Ribbon Task Force on the State Health Plan for Teachers and State Employees examined issues related to governance of the State Health Plan. Discussions of the Task Force yielded the observations below.

- Responsibility for broad oversight of the State Health Plan should not primarily reside with the General Assembly.
- Compatibility with the mission of existing State agencies and the range of employees covered by the State Health Plan present challenges in finding a logical organizational fit of the State Health Plan within an existing State agency.
- A strong governing board may be a logical entity to provide oversight of the State Health Plan. Membership of a strong governing board may include persons with experience in, but not limited to: health benefit in ancing, managing large group employer-sponsored health benefits plans, and utilization management. The governing board may also included representation from employee and retiree groups.
- The operation of the State Health Planingludes the following:
 - o Authority to enhance or reduce benefits
 - Authority to set co-pays, deductibles, and co-insurance maximums
 - Authority to set premiums
 - Authority to "
 - fiduciaries to the Plan
 - Authority to adjudicate members' appeals

 - Authority to conduct strategic planning
 Authority to create and implement Medical policy
- The current appointment and removal process for the Plan's Executive Administrator is unclear.

The Task Force acknowledges that oversight of the State Health Plan is complex because coverage includes: executive, judicial, and legislative branch employees; local school system employees; community college employees; and university employees. Additionally, similar to most health insurance providers, the State Health Plan must respond to the challenges of an older and less physically active population, increasing health care costs, and compliance with Federal health care law. The Task Force finds that governance of the State Health Plan is a serious and substantial undertaking and must be clarified in order to effectively meet current challenges.

RECOMMENDATION:

The Task Force recommends that oversight of the State Health Plan be provided by a strong and independent governing board with broad policy making authority and also recommends that appointment and removal of the Executive Administrator be clarified.

Cherie K. Berry Commissioner

November 12, 2010

The Honorable Dan Blue, Member N.C. Senate Room 314, Legislative Office Building Raleigh, N.C. 27603

The Honorable Hugh Holliman, Member N.C. House of Representatives Room 2301, Legislative Building Raleigh, N.C. 27601

Chairmen of the Blue Ribbon Task Force on the State Health Plan,

My office was recently contacted by Theresa Matula, Staff to the Blue Ribbon Task Force on the State Health Plan. She asked that I respond to you in writing regarding a proposal that the operation of the State Health Plan be shifted to the N.C. Department of Labor.

I do not believe that it would be appropriate to situate the State Health Plan within this agency. The core mission of the N.C. Department of Labor is to promote the health, safety, and general well-being of the state's workforce. Taking on the responsibility of the State Health Plan would be a significant departure from this mission and would not represent the best use of our manpower and resources. Furthermore, according to an August 25, 2010 report by Navigant Consulting, Inc. and MGT of America, Inc., this agency is not a reasonable location for the State Health Plan because our "functional area revolves around overseeing labor laws rather than insurance or employee benefits." I agree with that assessment and I hope that it is seriously considered as discussions about the placement of the State Health Plan continue.

Thank you for the opportunity to respond to this suggestion.

Respectfully,

Cherie K. Berry Commissioner

cc: Theresa Matula, Staff to the Blue Ribbon Task Force on the State Health Plan

OFFICE OF THE TREASURER

JANET COWELL, TREASURER

November 15, 2010

The Honorable L. Hugh Holliman Representative – 81st District 2301 Legislative Building Raleigh, NC 27601

Dear Representative Holliman:

We recently received an email from Ms. Theresa Matula of the General Assembly's Research Division inquiring whether the Department of State Treasurer has an interest to oversee the operations of the State Health Plan.

Although we appreciate the confidence you have expressed in our office, we do not believe it makes sense for the Department of State Treasurer to run the State Health Plan. First, the Treasurer's Office has no experience in running a health plan on a day-to-day basis. Second, the Department of State Treasurer has little expertise in either health care or insurance issues,

However, the State Treasurer can play a role as a member of an oversight board for the State Health Plan because the unfunded liability of the plan can impact our bond rating. (The State Treasurer is one of the primary contacts for the rating agencies, along with the budget director and state controller.) Additionally, State health care policy can impact pension fund liability, since decisions on the pension fund often include calculations on health care availability and cost.

As you are aware, the Department currently has the responsibility for managing the State's pension system, investing over \$70 billion in State funds, conducting the State's daily banking operations, issuing and overseeing State debt, assisting local government units through the State and Local Government Finance Commission and operating and overseeing the Escheats Fund. The Department of State Treasurer has focused its last two years to improve both the quality of services we deliver to North Carolina's citizens and the effectiveness and efficiency of our operations. At this point, it would be unwise for this office to take on a new and equally complex and demanding program.

I applaud the Blue Ribbon Task Force for its hard work on this important issue and am confident the Task Force will ultimately find a good home for the State Health Plan.

Best wishes.

Janet Cowell

Comprehensive Wellness Initiative -- Weight Management Component

Weight Management Component Begins July 1, 2011

Members will continue to follow the tobacco cessation guidelines and as of July 2011, will also enroll based on the weight management guidelines. Subscribers will be eligible to enroll in the 80/20 Standard Plan if they declare on the Attestation Form that the subscriber and their covered dependent(s) do not use tobacco product (AND)

- the subscriber and their covered dependent(s) have a Body Mass Index (BMI) less than 40 kg/m² (OR)
- the subscriber and their covered dependent(s) qualify for exemption due to participation in a weight management and/or tobacco cessation program (or) have a physician-certified medical condition that prevents the attainment of the required BMI. (See "Exemptions" below for details.)

Verification of Weight Management Status

To calculate Body Mass Index, click here enclosed

1. Subscribers who attest that they and their covered dependents meet the weight and tobacco use requirements for the 80/20 Standard Plan will also be attesting that they understand they may be randomly selected to participate in a tobacco use/weight management verification test at their worksite. Height and weight measurements will be collected to determine BMI status. Members must have a BMI less than 40 kg/m2 to pass the test.

- 2. The Physician Certification Form will permit members to claim an exemption for member participation in a weight management program and/or for a medical condition that prevents members from attaining the required BMI, in addition to the tobacco cessation program exemption. If applicable, both the weight management related exemptions and the tobacco cessation exemption information must be included for enrollment in the 80/20 Standard Plan.
- Beginning on July 1, 2012, members must have a BMI of less than 35 kg/m2 to enroll in the 80/20 Standard Plan (All other program requirements and processes will remain the same.

Frequently Asked Questions: Verification Testing for the Comprehensive Wellness Initiative

Have you taker

HBRs and Wellne:

1. How will the Plan verify tobacco use and BMI?

PHA? Click here

2. Who will be tested for tobacco use?

Wellness Suppor

4. Will the Plan only be testing for tobacco? What confirmation or assurances will

3. Will members be made aware of testing for tobacco use ahead of time?

members have that other tests will not be conducted?

Member Feedbac

5. What happens if a member chooses not to participate in verification testing?

1.) How will the Plan verify tobacco use and BMI?

A third party vendor, not yet selected by the Plan, will conduct the tobacco use validation tests on a sample of members who are enrolled in the 80/20 plan. Tobacco use will be verified using a saliva test that is non-invasive, accurate and provides the results at the time of testing.

The process around BMI verification has not been determined at this time.

2.) Who will be tested for tobacco use?

Initially, active employees will be selected for testing. However, the Plan reserves the right to test any non-Medicare primary Plan member who is eligible for the Comprehensive Wellness Initiative and enrolled in the 80/20 plan.

- 3.) Will members be made aware of testing for tobacco use ahead of time? The Plan has not yet determined the details of the testing process for tobacco use. Once a testing vendor has been confirmed - and prior to annual enrollment in spring 2010 -additional information will be provided regarding the testing process.
- 4.) Will the Plan only be testing for tobacco? What confirmation or assurances will members have that other tests will not be conducted?

The Plan will arrange for verification testing to address tobacco use during the first year of the Comprehensive Wellness Initiative. Members will not be tested for substances other than cotinine, a derivation of nicotine in the body. The testing vendor will adhere to all state and federal laws around testing, privacy and confidentiality.

5.) What happens if a member chooses not to participate in verification testing? Members who are offered the verification testing, and refuse to take the tobacco verification

Adult BMI Calculator

(english bmi calculator/bmi calculator.html)

Body Mass Index (BMI) is a number calculated from a person's weight and height. BMI is a fairly reliable indicator of body fatness for most people. BMI does not measure body fat directly, but research has shown that BMI correlates to direct measures of body fat, such as

underwater weighing and dual energy x-ray absorptiometry (DXA). BMI can be considered an alternative for direct measures of body fat. Additionally, BMI is an inexpensive and easy-to-perform method of screening for weight categories that may lead to health problems.

BMI is used as a screening tool to identify possible weight problems for adults. However, BMI is not a diagnostic tool. For example, a person may have a high BMI. However, to determine if excess weight is a health risk, a healthcare provider would need to perform further assessments. These assessments might include skinfold thickness measurements, evaluations of diet, physical activity, family history, and other appropriate health screenings.

Calculating BMI is one of the best methods for population assessment of overweight and obesity. Because calculation requires only height and weight, it is inexpensive and easy to use for clinicians and for the general public. The use of BMI allows people to compare their own weight status to that of the general population.

To see the formula based on either kilograms and meters or pounds and inches, visit How is BMI calculated and interpreted (#Interpreted)?

Other methods to measure body fatness include skinfold thickness measurements (with calipers), underwater weighing, bioelectrical impedance, dual-energy x-ray absorptiometry (DXA), and isotope dilution. However, these methods are not always readily available, and they are either expensive or need highly trained personnel. Furthermore, many of these methods can be difficult to standardize across observers or machines, complicating comparisons across studies and time periods.

Calculation of BMI

BMI is calculated the same way for both adults and children. The calculation is based on the following formulas:

Measurement Units	Formula and Calculation
Kilograms and meters	Formula: weight (kg) / [height (m)] ²
(or centimeters)	With the metric system, the formula for BMI is weight in kilograms divided by height in meters squared. Since height is commonly measured in centimeters, divide height in centimeters by 100 to obtain height in meters.
	Example: Weight = 68 kg, Height = 165 cm (1.65 m) Calculation: $68 \div (1.65)^2 = 24.98$
Pounds and inches	Formula: weight (lb) / [height (in)] ² x 703
	Calculate BMI by dividing weight in pounds (lbs) by height in inches (in) squared and multiplying by a conversion factor of 703.
	Example: Weight = 150 lbs, Height = 5'5" (65") Calculation: $[150 \div (65)^2] \times 703 = 24.96$

Interpretation of BMI for adults

For adults 20 years old and older, BMI is interpreted using standard weight status categories that are the same for all ages and for both men and women. For children and teens, on the other hand, the interpretation of BMI is both age- and sex-specific. For more information about interpretation for children and teens, visit Child and Teen BMI Calculator (http://apps.nccd.cdc.gov/dnpabmi).

The standard weight status categories associated with BMI ranges for adults are shown in the following table.

BMI	Weight Status
Below 18.5	Underweight
18.5 – 24.9	Normal
25.0 – 29.9	Overweight
30.0 and Above	Obese

For example, here are the weight ranges, the corresponding BMI ranges, and the weight status categories for a sample height.

Height	Weight Range	ВМІ	Weight Status
5' 9"	124 lbs or less	Below 18.5	Underweight
	125 lbs to 168 lbs	18.5 to 24.9	Normal
	169 lbs to 202 lbs	25.0 to 29.9	Overweight
	203 lbs or more	30 or higher	Obese

The correlation between the BMI number and body fatness is fairly strong; however the correlation varies by sex, race, and age. These variations include the following examples: 3,4

At the same BMI, women tend to have more body fat than men.

At the same BMI, older people, on average, tend to have more body fat than younger adults.

Highly trained athletes may have a high BMI because of increased muscularity rather than increased body fatness.

It is also important to remember that BMI is only one factor related to risk for disease. For assessing someone's likelihood of developing overweight- or obesity-related diseases, the National Heart, Lung, and Blood Institute guidelines recommend looking at two other predictors:

The individual's waist circumference (because abdominal fat is a predictor of risk for obesity-related diseases).

Other risk factors the individual has for diseases and conditions associated with obesity (for example, high blood pressure or physical

For more information about the assessment of health risk for developing overweight- and obesity-related diseases, visit the following Web pages from the National Heart, Lung, and Blood Institute:

Assessing Your Risk (http://www.nhlbi.nih.gov/health/public/heart/obesity/lose_wt/risk.htm)

Body Mass Index Table (http://www.nhlbi.nih.gov/guidelines/obesity/bmi tbl.htm) - En close

Clinical Guidelines on the Identification, Evaluation, and Treatment of Overweight and Obesity in Adults (http://www.nhlbi.nih.gov/guidelines/obesity/ob_home.htm) - practical Builde pages enclosed

According to the BMI weight status categories (anyone) with a BMI over 25 would be classified as overweight and anyone) with a BMI over

30 would be classified as obese.

It is important to remember, however, that BMI is not a direct measure of body fatness and that BMI is calculated from an individual's weight which includes both muscle and fat. As a result, some individuals may have a high BMI but not have a high percentage of body fat. For example, highly trained athletes may have a high BMI because of increased muscularity rather than increased body fatness. Although some people with a BMI in the overweight range (from 25.0 to 29.9) may not have excess body fatness, most people with a BMI in the obese range (equal to or greater than 30) will have increased levels of body fatness.

It is also important to remember that weight is only one factor related to risk for disease. If you have questions or concerns about the appropriateness of your weight, you should discuss them with your healthcare provider.

The BMI ranges are based on the relationship between body weight and disease and death. Overweight and obese individuals are at increased risk for many diseases and health conditions, including the following: 6

Healthy Weight: Assessing Your Weight: BMI: About Adult B... Page 3 of 3

· Hypertension

· Dyslipidemia (for example, high LDL cholesterol, low HDL cholesterol, or high levels of triglycerides)

- Stroke
- Gallbladder disease
- Osteoarthritis
- · Sleep apnea and respiratory problems
- · Some cancers (endometrial, breast, and colon)

For more information about these and other health problems associated with overweight and obesity, visit <u>Clinical Guidelines on the Identification</u>, Evaluation, and Treatment of Overweight and Obesity in Adults (http://www.nhlbi.nih.gov/guidelines/obesity/ob_home.htm).

Although the BMI number is calculated the same way for children and adults, the criteria used to interpret the meaning of the BMI number for children and teens are different from those used for adults. For children and teens, BMI age- and sex-specific percentiles are used for two reasons:

The amount of body fat changes with age.

The amount of body fat differs between girls and boys.

Because of these factors, the interpretation of BMI is both age- and sex-specific for children and teens. The CDC BMI-for-age growth charts take into account these differences and allow translation of a BMI number into a percentile for a child's sex and age.

For adults, on the other hand, BMI is interpreted through categories that are not dependent on sex or age.

Ten Steps to Treating Overweight and Obesity in the Primary Care Setting

Measure height and weight so that you can estimate your patient's BMI from the table in Appendix A. See p. 18 (over)

Measure waist circumference as described on page 9.

Assess comorbidities as described on pages 11–12 in the section on "Assessment of Risk Status."

Should your patient be treated? Take the information you have gathered above and use Figure 4, the Treatment Algorithm, on pages 16–17 to decide. Pay particular attention to Box 7 and the accompanying explanatory text. If the answer is "yes" to treatment, decide which treatment is best using Table 3 on page 25.

Is the patient ready and motivated to lose weight? Evaluation of readiness should include the following: (1) reasons and motivation for weight loss, (2) previous attempts at weight loss, (3) support expected from family and friends. (4) understanding of risks and benefits, (5) attitudes toward physical activity, (6) time availability, and (7) potential barriers to the patient's adoption of change.

Which diet should you recommend?

In general, diets containing 1,000 to 1,200 kcal/day should be selected for most women; a diet between 1,200 kcal/day and 1,600 kcal/day should be chosen for men and may be appropriate for women who weigh 165 pounds or more, or who exercise regularly. If

the patient can stick with the 1,600 kcal/day diet but does not lose weight you may want to try the 1,200 kcal/day diet. If a patient on either diet is hungry, you may want to increase the calories by 100 to 200 per day. Included in Appendix D are samples of both a 1,200 and 1,600 calorie diet.

Discuss a physical activity goal with the patient using the Guide to Physical Activity (see Appendix H). Emphasize the importance of physical activity for weight maintenance and risk reduction.

Review the Weekly Food and Activity
Diary (see Appendix K) with the patient.
Remind the patient that record-keeping has been shown to be one of the most successful behavioral techniques for weight loss and maintenance. Write down the diet, physical activity, and behavioral goals you have agreed on at the bottom.

Give the patient copies of the dietary information (see Appendices B–G), the Guide to Physical Activity (see Appendix H), the Guide to Behavior Change (see Appendix I), and the Weekly Food and Activity Diary (see Appendix K).

Enter the patient's information and the goals you have agreed on in the Weight and Goal Record (see Appendix J). It is important to keep track of the goals you have set and to ask the patient about them at the next visit to maximize compliance. Have the patient schedule an appointment to see you or your staff for followup in 2 to 4 weeks.

1 Patient encounter

Any interaction between a health care practitioner (generally a physician, nurse practitioner, or physician's assistant) and a patient that provides the opportunity to assess a patient's weight status and provide advice, counseling, or treatment.

2 History of overweight or recorded BMI ≥ 25

Seek to determine whether the patient has ever been overweight. A simple question such as "Have you ever been overweight?" may accomplish this goal. Questions directed toward weight history, dietary habits, physical activities, and medications may provide useful information about the origins of obesity in particular patients.

3 BMI measured in past 2 years

For those who have not been overweight, a 2-year interval is appropriate for the reassessment of BML Although this timespan is not evidence-based, it is a reasonable compromise between the need to identify weight gain at an early stage and the need to limit the time, effort, and cost of repeated measurements.

Measure weight, height, waist circumference; calculate BMI

Weight must be measured so BMI can be calculated. Most charts are based on weights obtained with the patient wearing undergarments and no shoes.

5 BMI ≥ 25 OR waist circumference > 35 in (88 cm) (women) or > 40 in (102 cm) (men)

These cutoff values divide overweight from normal weight and are consistent with other national and international guidelines. The relationship between weight and mortality is J-shaped, and evidence suggests that the right side of the "J" begins to rise at a BMI of 25. Waist circumference is incorporated as an "or" factor because some patients with a BMI lower than 25 will have a disproportionate amount of abdominal fat, which increases their cardiovascular risk despite their low BMI (see pages 9-10). These abdominal circumference values are not necessary for patients with a BMI \geq 35 kg/m2.

6 Assess risk factors

Risk assessment for CVD and diabetes in a person with evident obesity will include special considerations for the medical history, physical examination, and laboratory examination. Detection of existing CVD or end-organ

damage presents the greatest urgency. Because the major risk of obesity is indirect (obesity elicits or aggravates hypertension, dyslipidemias, and type 2 diabetes; each of these leads to cardiovascular complications), the management of obesity should be implemented in the context of these other risk factors. Although there is no direct evidence that addressing risk factors increases weight loss, treating the risk factors through weight loss is a recommended strategy. The risk factors that should be considered are provided on pages 11–13. A nutrition assessment will also help to assess the diet and physical activity habits of overweight patients.

BMI ≥ 30 OR ([BMI 25 to 29.9 OR waist circumference > 35 in (88 cm) (women) or > 40 in (102 cm) (men)] AND ≥ 2 risk factors)

The panel recommends that all patients who meet these criteria should attempt to lose weight. However, it is important to ask the patient whether or not he or she wants to lose weight. Those with a BMI between 25 and 29.9 kg/m² and who have one or no risk factors should work on maintaining their current weight rather than embark on a weight reduction program. The panel recognizes that the decision to lose weight must be made in the context of other risk factors (e.g., quitting smoking is more important than losing weight) and patient preferences.

At A Glance

Who's Covered?

The State Health Plan provides health care coverage to more than 665,000 teachers, state employees, retirees, current and former lawmakers, state university and community college personnel, state hospital staff and their dependents. A breakdown of that total includes:

- More than 483,000 active employees and dependents. (Dependents include spouses and unmarried children under age 19-or under age 26 if full-time students.)
- More than 3,900 COBRA participants and their dependents.
- More than 178,000 retirees and their dependents.

State Health Plan Options

The State Health Plan offers two PPO plans, using the Blue OptionsSM network.

Click to compare plans.

Funding and Compliance

The State Health Plan is self-insured and exempt from ERISA as a government-sponsored plan.

North Carolina HealthSmart

North Carolina HealthSmart is a healthy living initiative that aims to:

- empower healthy members to stay healthy
- help those with chronic disease or disease risk factors better manage their health
- offer integrated, cutting-edge resources and programs to members at work, at home, and through their health care providers

Enroll in the State Health Plan

Who is eligible to enroll in a benefit plan with the State Health Plan?

- State employees with permanent employment working at least 30 hours per week for nine or more months per calendar year. For these employees, the state pays 100% of the cost of the coverage.
- u Permanent state employees working 20 or more hours but less than 30 per week. These employees may enroll, but they must pay the full cost of coverage.
 - Retired state employees and teachers.
 - Dependents' coverage, paid by the employee alone, is available at group rates. Dependents that are eligible for coverage include the following:
 - Legal spouse;
 - Unmarried children under age 19, including natural, legally adopted, or foster children of the employee or employee's spouse, as long as the employee is legally responsible for such child's maintenance and support:
 - Unmarried stepchildren of the employee when the employee is married to the stepchildren's natural parent and the stepchildren's primary residence is with the employee;
 - Unmarried children, from age 19 to 26, who are full-time students at a school or college accredited by the state of jurisdiction; and
 - Unmarried children who are physically or mentally incapacitated, to the extent that they are incapable of earning a living, and such handicap developed or began to develop before the dependent's 19th birthday (or 26th birthday, if a full-time student).

New employees who enroll themselves and dependents within 30 days of employment are not subject to a waiting period for pre-existing conditions.

To enroll in a plan, follow these simple steps:

- 1. Verify with your Health Benefit Representative/benefits office, if your enrollment is done through an electronic enrollment system or by completing a paper application.
 - Employees that enroll through the BEACON system, click here for instructions.
 - Employees that enroll through eBenefitsNow, click here for instructions.
 - Retirees, click here for instructions on enrolling through eBenefitsNow.
 - To enroll by paper, Enrollment Applications can be obtained from your New Employee Enrollment Kit, your Health Benefit Representative/benefits office or you can download the Enrollment Application below and follow the instructions included on the application.

■ Enrollment Application (PDF, 95KB)

- Enrollment Application (PDF, 75KB)
 For National Guard, Fire Department, Rescue Squad and Emergency Medical Services Members.
- 2. Complete any necessary forms for your dependents
 - <u>Certification of Dependent Eligibility</u> (PDF, 117KB)
 If you have a child whose last name is different from yours, you will need to complete this form.
 - Coverage Request for Incapacitated Dependent (PDF, 62.65KB)
 If you have a child over age 19 who is eligible as a mentally or physically incapacitated dependent, complete this form.
- 3. Indicate if you were covered under a previous plan
 - Prior Health Coverage Information (PDF, 183KB)
 If you had coverage under a previous plan, you can apply to receive credit against the waiting period for pre-existing conditions.

Please print out the appropriate forms above and give the completed forms to your Health Benefits Representative/benefits office for processing.
