Joint Appropriations Subcommittee Health and Human Services

**Thursday, February 22, 2001
8:00 A.M.
Room 424, Legislative Office Building**

The Joint Appropriations Subcommittee on Health and Human Services met on Thursday, February 22, 2001 in room 424 of the Legislative Office Building. Members present were Representative Edd Nye, Co-Chair, Representative Lanier Cansler, Representative Theresa Esposito, and Representative Verla Insko. There were five senators present.

Representative Nye presided. He called the meeting to order and introduced the Pages that assisted the Committee. He then explained that Representative Beverly Earle, Co-Chair was unable to attend the meeting due to a death in the family. Senator Martin, Co-Chair, was recognized to make a few remarks. He stated the Committee would be seeking to learn what wasn't working and try to eliminate it. Some things that are working may have to be prioritized.

Representative Nye asked the members to introduce themselves. After introducing the Legislative Assistants, the Sergeant-At-Arms staff that was assisting was introduced. Carmen Hooker Buell, Secretary of Health and Human Resources, and other members of the Department that were present introduced themselves.

Karen Hammonds-Blank, Fiscal Research Staff, was introduced to speak to the Committee. Ms. Hammonds-Blanks presented the members with a handout titled Appropriations Committee Process. (See Attachment I) She introduced Susan Morgan, Carol Shaw, and Lisa Hollowell who are the other three staff members that make up the Health and Human Service team. She stated that they were waiting for Governor Easley's budget. They will be using the zero based modified version approach in looking at possible areas of reductions and adjustments. They believe the Committee will have six to eight weeks to go through the continuation budget, but the Appropriations Chairs will give the Committee a schedule to follow. She briefly reviewed the handout.

Senator Forrester stated he knew what a zero based budget was, but wanted an explanation of a modified zero based budget. Representative Nye responded that a zero based budget goes back five years and the Committee will do more than that. Senator

Martin added that with a full zero based budget, they would be looking at everything. There is a list of about 17 or 18 areas that will be focused on that probably need more attention, but they will be considering other aspects as well. Representative Nye noted that nonprofits were one of the areas that they would zero in on. One large program is Smart Start that has been going on for several years and they plan to have an extensive review of that program.

Susan Morgan, Analyst with the Fiscal Research Division, reviewed her area of responsibility from a handout explaining their team assignments. (See Attachment II) There are two analyst assigned for each division. There is a lead analyst and a backup analyst. She is lead analyst for the Division of Aging, and a portion of Social Services.

Carol Shaw, Analyst with Fiscal Research, explained that she is lead analyst for Division of Medical Assistance, Division of Facility Services, Division of Vocational Rehabilitation Services, Division of Services for the Blind, and Division of Services for the Deaf and Hard of Hearing.

Lisa Hollowell, Analyst with Fiscal Research, reviewed the areas that she covers, which are Division of Early Intervention and Education, Division of Public Health, and Office of Rural Health.

Ms. Hammonds-Blanks explained the areas she is responsible for are Division of Mental Health, Division of Social Services, and the Division of Child Development.

Representative Nye stated the Committee would meet from 8:30 A.M. to 10:00 A.M. on Tuesday, Wednesday, and Thursday. He then asked for suggestions from the Committee members for staff to put on their list. Representative Cansler noted it was going to be a very difficult Session. A lot of community services are being eliminated. He expressed concern that the State not balance the budget on the backs of the hospitals.

Senator Purcell noted he is concerned about the area of dental care for children, which is a major health care problem for children in North Carolina that keeps being ignored. He hopes the Committee will keep that in mind in whatever they do. Senator Kerr asked if the state had lobbyist in Washington and noted someone wasn't doing a very good job.

Representative Nye informed the Committee there had been some concerns raised about SB10 and the implication it has for an industry. He stated they would zero in on this Bill and see if it did what it was intended to do. He met with a group from Sampson County and they are very concerned with their Medicaid budget. He wants to challenge staff and the Department to tell the Committee how Medicaid can be controlled.

The meeting was adjourned at 10:00 A.M.

APPROPRIATIONS COMMITTEE PROCESS

Joint Appropriations Subcommittee on Health and Human Services

GOAL: TO PREPARE THE HEALTH AND HUMAN SERVICES (HHS) BUDGET AS DEVELOPED THROUGH THE SUBCOMMITTEE PROCESS FOR PRESENTATION TO FULL APPROPRIATIONS AND THE GENERAL ASSEMBLY.

Continuation Budget:

The Continuation Budget is the recommended funding plan to continue the current operations at the level previously appropriated by the General Assembly.

- Subcommittee reviews the continuation budget of the Department of Health and Human Services (by division) for possible reductions/adjustments or changes in policy.
- Subcommittee reviews the programs and services administered and/or provided by the Department of Health and Human Services (by division).
- Continuation budget process lasts approximately 6 to 8 weeks (the 2001 schedule to be determined).

Expansion Budget:

The Expansion Budget includes various recommended increases in existing programs; permanent funding for pilots or programs funded with non-recurring funds and the creation of new programs. Expansion items usually include members' bills or suggestions; mandatory items that are the result of federal requirements or legal action; and the Governor's recommendations

- Subcommittee (historically) reviews the expansion budget after the continuation budget.

Block Grants:

Each year the General Assembly, through its Joint Subcommittee on Health & Human Services, appropriates \$650M in various federal block grants. These block grants provide funding for various health and human services areas such as child care, public and mental health, and social services.

- Subcommittee reviews block grants at the end of the expansion budget process.
- Subcommittee holds public hearings as required by federal law.
- Subcommittee appropriates funds at the end of the expansion process.

Other :

- **Budget Targets** are usually provided to each Subcommittee by the Full Appropriations Chairpersons. Traditionally, the target is inclusive of continuation and expansion requirements.
- **Flagging** is a process used by the Subcommittee to identify budget and policy items for further information, review or action. *Since votes on budget reductions or increases are generally not taken until later in the process, all items flagged for potential action will be tracked by fiscal staff. Items flagged for additional information will be tracked by fiscal staff and coordinated with DHHS staff for response to members.*
- **Special Provisions** provide legislative direction and policy guidance on the use of certain funds. As program and budget issues arise members may suggest special language to direct certain policy actions or specifies the use of certain funds. Legislative staff, in consultation with members, will facilitate the development of these special provisions.

Role of Legislative and Departmental Staff

Joint Appropriations Subcommittee on Health and Human Services

GOAL: TO PREPARE THE HEALTH AND HUMAN SERVICES (HHS) BUDGET AS DEVELOPED THROUGH THE SUBCOMMITTEE PROCESS FOR PRESENTATION TO FULL APPROPRIATIONS AND THE GENERAL ASSEMBLY.

Role of Legislative and Departmental Staff:

- **Fiscal Research Division** staff review, analyze, and present information on the continuation and expansion budgets for each division within DHHS. In addition, with direction from subcommittee chairs, fiscal staff coordinate subcommittee meetings and agendas; track flagged items and coordinate information requests; upon request, prepare fiscal notes; assist legislative counsel in the development of special provisions and prepare the Subcommittee report to Full Appropriations.
- **Bill Drafting Division** staff draft legislation; assist members with legal research; and the development of special provisions. Bill drafting staff usually attend subcommittee meetings.
- **Department of Health and Human Services** staff attend subcommittee meetings and work with legislative staff to answer members' questions and obtain additional information if needed. Departmental staff may also make presentations on various budget issues and reports mandated by the General Assembly.
- **Office of State Budget, Planning and Management (OSBPM)** staff attend subcommittee meetings and assist in the development of special provisions, budget/program information, and policy matters as needed.

Approach for the Review of the
Department of Health and Human Services
Session 2001

Division of Early Intervention and Education

- Enrollment at the Schools for the Deaf
- Academic scores at the Schools - ABCs program
- Pre-school programs
- Developmental Evaluation Centers

Division of Public Health

- Health indicators and programs
- Regional Offices
- Oral Health Section – provision of direct services
- Women and Children’s Health Section – new programs and programs that serve less than half of counties
- Epidemiology – AIDS Drug Assistance Program (ADAP)
- Chronic Disease Control and Prevention – Task Forces
- Fees

Division of Aging

- Reauthorization of the Older Americans Act
- Family Caregiver Funding
- Inter-Agency Collaborations
- Senior Centers
- Area Agencies on Aging
- Adult Day/Health Center
- Progress of the new Adult Day Care/Adult Day Health facilities (\$250,000) appropriated in 2000.
- Community-Based Services
- Waiting Lists

Division of Social Services

- Work First and TANF Block Grant
- Maintenance of Effort provision
- Effectiveness of child support operations
- Use of consultants
- Regional offices/staff
- Optional programs & services
- Intensive Family Preservation Services
- Child and Adult Services
- Performance Measurements
- Turnover rates for local staff
- Foster Care
- Trend data
- Independent Living

Fiscal Research Division
Approach for the Review of the
Department of Health and Human Services
Session 2001

- Adoption Services
- Comparisons of N.C. to other states
- State/County Special Assistance for Adults
- Special Assistance Demonstration Project
- Resident Evaluation Services
- Adult Care Homes
- Utilization Rates
- Maternity Home Fund - Inflation
- State Abortion Fund

**Division of Mental Health/Developmental Disabilities/
Substance Abuse Services**

- Recent organizational changes
- Mental Health Oversight Reform Initiative
- MH/DD/SAS Facilities
- Overview of Area Programs & issues impacting them
- Update on CAP-MR/DD Program

Division of Child Development

- Division Administration (management & direct services staff)
- Optional programs and services
- Child Care Subsidy waiting list

North Carolina Partnership for Children (Smart Start)

- Administration
- Carryforward
- Contracts
- Mandatory 30% allocation for child care subsidy
- Local Partnerships

Office of the Secretary

- Newly created positions, offices & programs
- Optional services provided to local governments (such as personnel)
- Optional Offices/Services (such as public relations, etc.)

Minutes

The Health and Human Services Appropriation Subcommittee met Tuesday, February 27, 2001 in Room 422 of the Legislative Office Building. Senator Bill Martin, Chair, called the meeting to order and introduced the pages. Representative Beverly Earle was recognized to give opening statements. Members of the Department Health and Human Services Budget Analysis Staff were also introduced.

Sen. Martin stated that this meeting is a prelude to the next meeting when the Secretary will give the state of the department and discuss where we go from here. In reviewing the agenda, he said that this meeting is an opportunity to discuss areas that the committee feels the need to look at more closely. Fiscal staff will lead the discussion of the review process. The Chair stated that the department is currently conducting an in-depth review of all the programs. He stated that there is the tremendous task before the committee is to look closely at what savings can be made, how well everything is working and where we need to go from here in a way that does not harm the citizens of North Carolina.

Carol Shaw was recognized to begin the overview of the review process. She began by giving a general overview of items to be reviewed in each division and of the approach the Fiscal Health and Human Service Team will take for the review of the budget of the Department of Health and Human Services. She referenced the handout (Attachment 1). The first section referred to the items for all divisions that will be reviewed. A division overview consisting of a background of what that division is doing, the content of their budget and strategies used to provide services or perform tasks they are responsible for, as well as indicators of how well they are doing those tasks. She stated that layers of management will be review to determine the need for any organizational changes, are there duplication of services, the possibility of streamlining administrative functions. Potential reorganization with regard to possible consolidation and combination of programs to better deliver services to the public and effectuate cost savings at the same time. She said that the Appropriations Leadership have identified items to be reviewed as well as the modified zero base budgeting such as vacant positions, contracts, non-profits, travel and training and cellular phone use.

The Division of Medical Assistance is a division with unique areas. She said that because it is an entitlement program, it is different from some of the other divisions. An established amount cannot be appropriated, because it is an entitlement program, if people are eligible, services have to be rendered and costs for medical and/or long-term care

services will have to be paid. The forecast is one of the most important things related to Medicaid. There will be a review of the forecast methodology to ensure that the increases are appropriate. A report from the Lewlyn Group, of the limitations on services is due May 1, 2001. This report should be helpful to the Committee process.

During committee discussion, the following questions were asked:

Regarding the NC Health Choice, because it is not an entitlement, when the money is utilized, do we stop paying? Why do we need a reserve fund? Can the reserve fund be used to draw down and match for more children?

If the amount of the reserve were used as suggested, the issue becomes what happens in terms of the budget in the odd years if it were used to increase the enrollment, what would the overall cost be for the next two to four years? Dr. Walker of the State Employees Plan will address the issue of reserve later in the session.

What percent is the state's share of Medicaid. Does federal law mandate counties to participate? How many states require county participation?

How many prescriptions are allowed under Medicaid?

When we look at some of the rural counties, about 7 percent of the budget goes to Medicaid and other counties only 1.2 percent. It appears that the poorer counties are penalized.

Is there a formula for prescription drug coverage under Medicaid, and if so, who establishes that formula?

Lisa Hollowell was recognized to review the Divisions of Early Intervention and Education and Public Health. She began by giving a brief history of the Division of Early Intervention and Education, which was created last year. The three schools for the Deaf are in this division. The three schools are located in the eastern part of the state, the western part of the state and also one in Greensboro. The enrollment is at an all time low. The academic scores of the schools, which were put under the ABC's program last year, will also be examined. A review of services targeted to 0 to 5 years old individuals who are at-risk for developmental disabilities and the developmental evaluation centers will also be done. The enrollment for the preschool program for hearing impaired children will also be examined.

Regarding the Division of Public Health, the health indicators, programs designed to address them, such as the Infant Mortality Rate, teen pregnancy rates and mortality rates across the state, the programs in place as well as the impact of these programs will also be

reviewed. The Regional offices of the Division of Public Health and the number of positions located at each office and what they do, services provided to public health department, and vacant positions will also be assessed.

The possibility of fees offsetting the cost of programs will be discussed. This could be a potential reduction in budget.

To what extent is there duplication of the various prevention programs and how could some of those efforts be combined.

The Committee requested a breakdown of the Million Dollar drug program.

The Smart Start Reports includes funding through Smart Start for Public Health. The committee agreed that there is a need to get a handle on what Smart Start is doing for Public Health Departments.

Regarding early intervention, why was the ABC Program instituted in these schools? The schools were not academically focused and were placed in the ABC Program so there would be more of an education program at the schools. At the same time the performance will have to be taken under consideration of federal guidelines and regulations.

It was also suggested that the committee examine task forces, regarding dollars actually reaching the people as opposed to salaries.

Susan Morgan was recognized to give an overview of the Division of Aging, and the Division of Social Services. Among the areas of concern reauthorization and recent changes of the Older American's Act; interagency collaboration; Senior Centers - rural verses urban locations, allocation of resource, populations served and also outreach funds provided by the state to area agencies on aging for outreach of Senior Centers. In reviewing area agencies on aging, organizational changes and funding and also expenditure trends for the seventeen area agencies on aging.

In the area of adult day care and health centers, cost data, utilization rates, progress of allocated funds (\$250,000 last year) for start-up grant will be reviewed. She stated that waiting list for in-home and personal services will also be addressed.

Karen Hammonds-Blanks was recognized for an overview of the Division of Mental Health, Developmental Disabilities and Substance Abuse Services, which includes the institutions and facilities within this Division as well as recent organizational changes at the State Level. She will also give an update of Mental Health Reform Legislation, and the area programs and issues impacting them, including the waiver programs for Developmentally Disabled Individuals. She stated that the new programs and new issues impacting the reform efforts would also be discussed.

The Division of Child Development is a very small program when the Smart Start section is removed. Primarily the administration, optional services, regulatory and child subsidy programs, the subsidy waiting list will be discussed. An update on the Leandro Law suit and the impact this budget. The policy, spending and contracts at the local level of North Carolina Partnership for Children (Smart Start) will be reviewed.

In response to the question of how much is presently being spent in Smart Start, Karen stated that approximately \$231 million, which includes administration at the state and local levels.

Carol Shaw stated that the increase in Medicaid of approximately \$370 million is the result of a combination of increased eligibility, prescription amounts, increased prescription costs and increased services provided. However the greatest difference now than in previous years is the significant increase in the utilization of services.

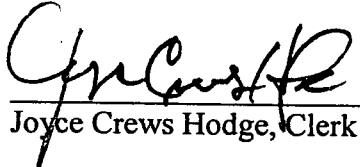

The Office of the Secretary is a very large office, which provides services generally to support other Divisions within the Department, including the budget unit, office of construction, office of public relations or consumer of affairs will also be reviewed.

The Committee requested a list of contracts the department has for outside services with a summary of the services to be provided.

The meeting was adjourned at 9:55 a.m.

Joint Appropriations Subcommittee On Health and Human Services

**Wednesday, February 28, 2001
8:30 A.M.**

Room 424, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Wednesday, February 28, 2001, at 8:30 A.M. in Room 424 of the Legislative Office Building. Members present were Representative Edd Nye, Presiding Chairman, Representative Beverly Earle, Co-Chairman, Representative Lanier Cansler, Representative Walter Church, and Representative Verla Insko. There were six senators present.

Representative Nye chaired the meeting and began by recognizing the Pages. He then recognized Carmen Hooker Buell, Secretary of Health and Human Services. Secretary Buell stated she would give the Committee an overview of the Department and information/discussion about how they are meeting their needs with the present budget. (See Attachment I) She had recently attended the Governors Association meeting in Washington with Governor Easley and said every state is facing a huge problem with their Medicaid budget. The Department is charged with making sure the state has high quality daycare, caring for the mentally ill, and taking care of the people with developmental disabilities.

Secretary Buell reviewed the Departments mission, goals, organization, and key budget and personnel facts. Their mission is to enable individuals, families, and communities to be healthy and secure, and to achieve social and economic well-being. The goals of the Department is to support family development and independence, promote safety and health of children, improve quality of life for adults, improve quality of life for individuals with physical and mental disabilities, promote optimum health, and to provide quality education for DHHS students.

The Secretary continued with her presentation by reviewing the handout. Eighty four percent of the money they receive goes to programs and benefits. A lot of the budget is for direct institutional care. Ninety percent goes to direct care of the people they serve. Department growth has increased by 587% since the early 1980's and the number of

clients has increased by 288% with staff increasing by 9%. Three fourths of their employees make 35,000 per year or less.

Senator Purcell questioned what qualifies as a client. He was referring to the statement that 5.6 million people were being served. He pointed out there are only 6 million people living in the State. Jim Edgerton, Deputy Secretary with the Department, responded that it is the clients that each division serves including Medicaid, Area Mental Health, Child Care clients, and the blind. Secretary Buell pointed out that of all the babies born in North Carolina, 44% are Medicaid. Senator Forrester noted there has to be some duplication of clients from the different divisions. He asked for the number of employees in the Department and was told there were just under 20 thousand employees. Senator Forrester asked for the number of vacant positions and Mr. Edgerton responded there are just over one thousand and most of those are direct care positions.

Representative Church expressed interest in centralizing and combining management where possible to avoid redundancy. Mr. Edgerton explained they had been required to submit a report and it was somewhere with the Senate. There are 300 million dollars worth of repairs in the next five years to be address, so he doesn't suggest cutting maintenance, just maybe eliminating some supervisors.

Senator Dannelly asked concerning procedures if the Department could bring their recommended cuts to the Committee and then the Committee could make cuts. Representative Nye responded that the Committee's staff had been making notes since January 24th, and they are very much on target. Secretary Buell responded to Senator Dannelly by stating they would be working with the Committee's staff on targeted cuts.

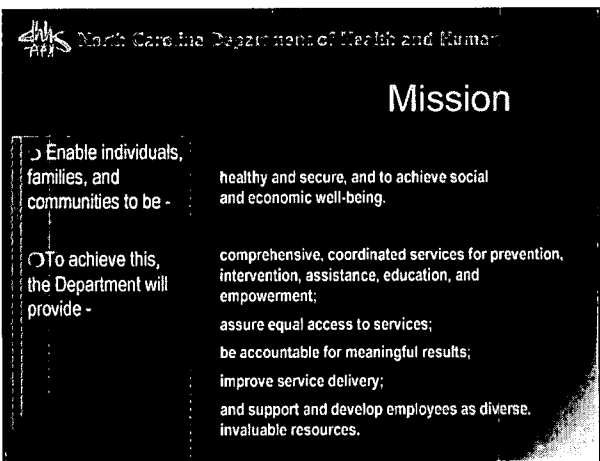

Secretary Buell continued with her presentation by presenting an overview of what the Department had done concerning this years budget. She reviewed the requirements of the Department that are in place to respond to this year's budget, and gave a brief explanation of the Medicaid shortfall. The current estimate shortfall for the year is 108 million. The major factor has been that the non-long-term care expenditures exceeded projections. It was anticipated there would be revenues in Social Services of 7.6 million. That amount was not realized primarily because of a drop in FANF caseloads. There was a discussion concerning bad checks that the Department receives and also the Department having to have reserve on hand due to having to pay out to counties before funding is received from federal government. Representative Cansler stated it wasn't the counties fault, and the State can't keep going to the ones who provide services to resolve the budget problems. Senator Martin mentioned truth in budgeting. It is much better to resolve the problems where they are than come up with a quick fix and deferring until next time.

Senator Moore asked for clarification concerning the \$20.0 million budgeting additional federal resources available on a one-time basis. Mr. Edgerton explained that \$10.0 million was TANF money, \$4.9 million is Mental Health Block Grant money, \$3.5 million is Child Care Development, \$1.6 million is money received back from federal government, and \$.5 million is for Low Income Energy Assistance.

Overview

Overview

 North Carolina Department of Health and Human Services

Goals

The Goals of the Department of Health and Human Services are...

- Support Family Development & Independence
- Promote Safety & Health of Children at Risk
- Improve Quality of Life for Adults
- Improve Quality of Life for Individuals with Physical & Mental Disabilities
- Promote Optimum Health
- Provide Quality Education for DMH Students

 North Carolina Department of Health and Human Services

OFFICE OF THE SECRETARY, EXECUTIVE STAFF

- Assistant Secretary for Budget, Management and Planning
- Assistant Secretary for Human Services and Education Policy
- Assistant Secretary for Health/State Health Director
- Assistant Secretary for Human Resources and Community Relations

 North Carolina Department of Health and Human Services

CENTRAL MANAGEMENT AND SUPPORT

- Council on Developmental Disabilities
- Division of Budget, Planning and Analysis
- Division of Human Resources
- Division of Information Resource Management
- Division of Property and Construction
- Office of the Controller
- Office of Economic Opportunity
- Office of Intergovernmental Relations
- Office of Internal Audit
- Office of Legal Affairs
- Office of Public Affairs
- Office of Research, Demonstrations, and Rural Health Development

Overview

Overview

 North Carolina Department of Health and Human Services

Identified Budget Issues For The Department Total \$218.1 Million

Goal Was to Identify Funding Without:

- Reducing Allocation to Local Service Providers
- Carrying Invoices (including Medicaid Claims) Into 2001-02.

 North Carolina Department of Health and Human Services

Budget Issues Fall Into Seven Major Groupings

- Medicaid Shortfall
- Budget Issues Unaddressed in Prior Budget Submissions
- Budget Issues Passed by 2000 Legislative Session
- Budget Issues Arising During the Year
- Miscellaneous Operational Requirements
- Need to Protect Cash Flow Funding
- Required Reversion of \$21 Million

Overview

 North Carolina Department of Health and Human Services

Medicaid Shortfall

Current Estimated Shortfall is \$108 Million (State Appropriations).

Non-Long Term Care Expenditures Exceeded Projections.

More Complete Explanation in A Subsequent Presentation.

 North Carolina Department of Health and Human Services

Budget Issues Unaddressed in Prior Budget Submissions

Total Operational Shortfalls of \$18.6 Million Were Known Prior to July, 2000.

Include Over Budgeted Revenues in Social Services of \$7.6 Million.

Include Under Budgeted Needs for DIRM Operations of \$5.4 Million and ITS Fees of \$5.6 Million.

 North Carolina Department of Health and Human Services

Budget Issues Passed by the 2000 Legislative Session

Budgeting Of Prior Year Earned Revenue - \$13 Million.

Recurring Receipts To Be Identified By Department - \$3.0 Million.

Elimination of 29 Positions Which Did Not Equate to \$2.1 Million.

Overview

 North Carolina Department of Health and Human Services

Budget Issues Arising During the Year

Five Items Requiring \$13.0 Million

- Automation Efforts Related to HIPPA (Federally Required And Firm Due Dates)
- Settlement of Denied Child Inpatient Days (Medicaid Settlement with DMH/DD/SAS)
- Patient Receipts Shortfall In Institutions
- Bad Checks Related to Child Support Enforcement
- Expenses To Move Two Offices On Which Leases Expired

 North Carolina Department of Health and Human Services

Need to Protect Cash Flow Funding

Funding Required Due To Timing Differences Of Expenditure and Federal Revenue Being Received.

Amount Established Based on Last Year's Actual Amount of \$37.6 Million.

 North Carolina Department of Health and Human Services

Miscellaneous Operational Requirements

Miscellaneous Items Total \$2.2 Million.

These Items Include:

- Medical Malpractice Insurance Premiums;
- Increased Cost of Enrolling VR Clients in Community colleges;
- Equipment for Hearing Screenings for Children;
- Purchasing Special Formulas for Infants.

Overview

 North Carolina Department of Health and Human Services

Required Reversion of \$21 Million

Target For DHHS of \$21 Million
Established by OSBPM;
DHHS Participation in General Revenue
Shortfall.

 North Carolina Department of Health and Human Services

Funding For These Items Required ALL Department Resources PLUS More.

Medicaid Deficit Funded By:

- \$85.0 Million Anticipated DSH Contributions From Public Hospitals
- Use of Remaining Medicaid Trust Fund Balance of \$5.6 Million.
- Use of Interest Realized by DMA on Claims Payments.
- Transfers from Other DHHS Divisions of \$17.0 Million.

 North Carolina Department of Health and Human Services

All Other Budget Issues (Including the Transfer of \$17.0 Million to Medicaid) Are Funded By The Following Resources:

- Departmental Lapsed Salaries and Related Fringes of \$10.0 Million;
- Prior Year Earned Revenues of \$29.9 Million;
- Indirect Costs of \$2.8 Million;
- Refunds From Prior Year Operations \$6.5 Million;
- Over-Realized Receipts of \$2.0 Million;
- Entitlements and Other Operational Projections Under Spending By \$32.6 Million;
- Budgeting Additional Federal Resources Available on a one-time Basis \$20.0 Million;
- Interest and Reserve Funds Available to DHHS - \$17.7 Million; and,
- Other Miscellaneous Receipts of \$2.5 Million.

Overview

 North Carolina Department of Health and Human Services

In Summary

The Current DHHS Budget Plan is
Balanced

New Budget Issues Or Shortfall in
Available Funding Will Be Most
Challenging, Especially as we get
Closer to the end of the Fiscal Year

***HOUSE APPROPRIATIONS SUBCOMMITTEE ON
HEALTH AND HUMAN SERVICES***

**MINUTES
MARCH 1, 2001
8:30 a.m.**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Thursday, March 1, 2001, at 8:30 a.m. in Room 643 of the Legislative Office Building.

House Co-Chair, Representative Beverly Earle presided. Other House members present were:

**Representative Edd Nye, Co-Chair
Representative Lanier Cansler
Representative Walter Church
Representative Theresa Esposito
Representative Verla Insko
Representative Thomas Wright**

Six Senate members were present.

Representative Beverly Earle called the meeting to order at 8:35 a.m. Pages were introduced and the meeting began with Secretary Carmen Hooker Buell continuing her presentation on the Medicaid Shortfall.

Medicaid Shortfall Presentation

Secretary Buell stated that the Department was doing very well in December 1999, but in June 2000 we were over budget between 25 and 35 million dollars. As of October 2000, the problem has grown to 108 million dollars.
(See Attachment II)

Mr. Dave McCoy from the State's Budget Office, presented to the Subcommittee information pertaining to the Medicaid shortfall. Mr. McCoy explained how the state was too optimistic with the forecast for Medicaid. They reviewed the numbers, and believed the forecast was valid and reliable. Ultimately the numbers were not reliable. We are now in a situation that we otherwise would not be in, if we would have been more flexible. The numbers have proved that the State's

Budget Office was too optimistic. Robert Powell, also from the State's Budget Office was available for questions.

Secretary Buell continued with the presentation. She listed the factors driving the Medicaid budget:

Number of services used

-Non long-term care services increased in 5 major areas

Increased payment for services

-Expenditures increased 17.6%

-Cost per eligible increased by 11.8%

Increased number of eligible

-5.1% increase over last year

Prescription drugs also played a major role with the increase in Medicaid. Drug expenditures went up 22.2% or \$92.5 million. The number of prescriptions increased by 11%, and the average cost per prescription increased by 10%.

Inpatient hospital admissions and expenditures continue to increase also. Hospital expenditures are up \$42.1 million, or 11%. The average admissions increased by 5%, and the average cost per admission increased by 6%.

Hospital Emergency Room expenditures were held at about 60 million for SFY's 97, 98 and 99. Emergency Room costs are now back at a high rate of growth. For three years, a HCFA approved policy was in place, which paid ER full cost only for true emergencies. From July to January of last year compared to the same time period this year, ER expenditures are up \$10.3 million, or 26.4%. The use of the ER is up 17.5% and cost per average visit is up 8%.

Physician services are seeing more patients and are providing more services. From July to January of last year compared to the same time period this year, physician services expenditures are up \$55.0 million, or 24.3%. Physician services units have increased by 15%, with the average cost per recipient is up 15%. The average number of recipients is up 8%.

Mental health increases reflect a demand for mental health services, a change in policy that placed the state match for these services in the Medicaid budget. From July to January of last fiscal year compared to the same time period

this fiscal year, mental health expenditures are up \$18.2 million. Average monthly recipients increased 10%, and an average cost per recipient increased by 8%.

An overall cost has increased because of services and increased cost of services mean higher cost per eligible per member/per month. Cost have increased for most service population categories which include: **Aged, Blind Disabled, AFDC <21, AFDC > 21, Infants and Children, Pregnant Women, Other Children, and Aliens.** (See Attachment II)

This concluded the Medicaid presentation from Secretary Hooker Buell.

Questions and comments were made from the committee members.

Prescription Drug Rebate

Mr. Gamble discussed in detail how the rebate program is working. Through January the state has collected 95 million dollars in drug rebate. Approximately 1/3 of that amount would have been put back in the budget to support the Medicaid program based on the Appropriation Act of last year. Approximately 50 million dollars goes back to the budget this year. The 50 million dollars include Federal, State, and County. The money is disproportioned, which means that approximately 62% goes back to the Federal Government, 5 1/2 % goes to the County and the balance goes to the State.

A presentation on the Disproportion Share Hospital Payment Program was given. This program allows the hospital, when it serves a disproportion number of uninsured persons, receives additional payments. In 1991-1992 state hospitals were made a total payment of 56 million dollars. The Federal share of this amount was 37 million. In September of this year, a total payment was made of 175 million dollars. This is the estimated cost from the hospital of uninsured patients that they served. To sum up the presentation, since 1991-92, the state has benefited, with no state appropriations, two billion, four hundred, eighty nine million dollars. Of that amount one billion, one hundred and ninety dollars have been returned to the general fund, as a non-tax revenue deposit. These funds have been appropriated by the General Assembly.

Questions and comments were made at this time from the committee.

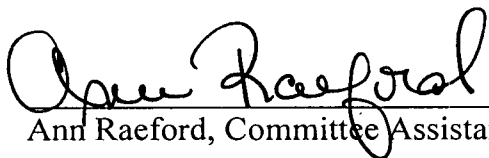

This concluded all presentations, and the meeting was adjourned.

North Carolina is Not Alone

Many states are facing Medicaid shortfalls

- Kentucky - \$24 Million
- Indiana - \$71 Million
- North Carolina - \$108 Million
- Georgia - \$160 Million
- Ohio - \$249 Million
- Florida - \$271 Million
- Texas - \$602 Million

March 7, 2001

North Carolina Department of Health and Human Services

History of Policy Initiatives Impacting Medicaid Spending

Policy Initiative		Prompted By
AABD eligibility increased to 100% FPL. Exercised option under federal law to extend full Medicaid benefits to aged, blind and disabled (AABD) adults up to 100% FPL. Prior to this change, state law limited eligibility to roughly 75% FPL (SSI level). This change moved approximately 35,000 adults from limited coverage (paying only Medicare premium and deductible) to full Medicaid coverage (drugs, DME, hospital in-patient, etc.).	01/01/99	State Legislative Initiative
12 Months Continuous Eligibility added for Children. Exercised option under federal law to maintain a child's eligibility for Medicaid without regard to change in income/finances. Previously, children were terminated immediately if their family's income exceeded allowable income and earning levels.	02/01/99	State Legislative Initiative
Transitional Medicaid Extended to 24 Months. Exercised option under federal law to provide an additional 12 months of Medicaid for families who leave <i>Work First</i> for work. Previously, families were eligible for up to 12 months of coverage. More families now receive Medicaid and for longer periods of time.	11/01/99	State Legislative Initiative
Adult Care Homes reimbursed for new Personal Care Services. Provided additional reimbursement to ACH's for Medication Supervision and assistance with locomotion. Also included additional funding for increased time to administer medication (to help reduce medication error rates).	01/01/00	Department Initiative with Legislative Approval

March 1, 2001

North Carolina Department of Health and Human Services

History of Policy Initiatives Impacting Medicaid Spending

Policy Initiative		Prompted By
Psychiatric Residential Treatment Facility (PRTF). A mandate from the General Assembly and threatened court action by Legal Services required the State to cover "psychiatric residential treatment facilities" as part of the EPSDT mandate. This is a longer-duration, in-patient service (below hospital level) that includes costs for both treatment and room-and-board. Estimated cost: \$8.8M (Total), \$2.8M (State)	10/01/00	Department Initiative to Avoid Potential Litigation
High Risk Intervention (HRI). Many children are eligible for HRI services but are not receiving them. DHHS is implementing a program to better identify children needing behavioral health services and directly enrolling HRI providers in the Medicaid program. These actions will increase HRI expenditures for this year and into the biennium. Estimated cost: \$23.7M (Total), \$7.6M (State)	10/01/00	Department Initiative
TANF Redeterminations. Requires the State to restate thousands of <i>Work First</i> recipients to verify that their eligibility for Medicaid was determined correctly when they left the cash welfare rolls. Each of these recipients will be provided up to 3 months of Medicaid eligibility while a local DSS worker determines their eligibility for on-going benefits. Estimated cost: \$17.3M (Total), \$7.9M (State)	01/01/01	Federal Policy
Emergency Room Policy Change (EMTALA). Requires the State to comply with the federal "emergency room policy." HICFA determined that NC's policy of permitting a nurse to triage a Medicaid recipient for non-emergency visits is out of compliance with federal policy. Now, triage no longer occurs and all costs (for both emergency and non-emergency care) are covered by Medicaid - which will result in higher ER costs. Estimated cost: \$4.7M (Total), \$1.5M (State)	01/01/01	Federal Policy

March 1, 2001

Growth in Medicaid Checkwrites

Factors Driving the Medicaid Budget

- **Number of services used**
 - Non long-term care services increased in 5 major areas
- **Increased payment for services**
 - Expenditures increased 17.6%
 - Cost per eligible increased by 11.8%
- **Increased number of eligibles**
 - 5.1% increase over last year
 - The State Employee's Health Plan and North Carolina Health Choice report about the same increase*

March 1, 2001

Increased Use of Services

- **Increase in non-long term care services caused growth in expenditures**
- **Non long-term care cost per eligible is up 11.8% over last fiscal year**
- **Long-term care costs are rising 4%**

March 1, 2001

Non Long-Term Care Services

■ **Costs increased substantially in:**

- Prescription Drugs
- Inpatient Hospital
- Hospital Emergency Room
- Physician Services
- Mental Health

March 1, 2001

Prescription Drugs

■ **From July - January of last year compared to the same time period this year:**

- Drug expenditures up 22.2% or \$92.5 million
- Number of prescriptions increased by 11%
- Average cost per prescription increased by 10%.

March 1, 2001

Prescription Drugs - 2

■ **Drug expenditures are difficult to control**

- Heavy drug marketing
- Newer, more expensive drugs
- States cannot control drug pricing
- Physician prescribing patterns hard to change

March 1, 2001

Prescription Drugs - 3

- Medicaid policies to help control drug costs:
 - Six prescription per month limit;
 - Mandatory generic substitution unless physician specifies in writing;
 - No dispensing fees for refills in same month;
 - Prospective drug utilization review to insure drug being prescribed is appropriate;
 - Drug retrospective review of providers prescribing patterns and recipient use patterns;
 - Drug education programs based on prescriber profiles;
 - Co-pay of \$1.00 for non-pregnant adults; and,
 - Use of one pharmacy each month.

March 1, 2001

Inpatient Hospital

Admissions and expenditures continue to increase

- For 7/99-1/00 compared to 7/00-1/01
 - Hospital expenditures are up \$42.1M, or 11%
 - Average admissions increased 5%
 - Average cost per admission increased 6%
- Hospital inpatient expenditures went down in SFY's 97-98 and 98-99, then increased by 7.3% last year

March 1, 2001

Hospital Emergency Room

- With strong controls, Hospital Emergency Room (ER) expenditures were held at about \$60 million for SFYs 97, 98 and 99. ER costs are now back at a high rate of growth.
- For three years, a HCFA approved policy was in place which paid ER full costs only for true emergencies. In SFY 1999-00, HCFA informed DHHS that NC's policy was no longer in compliance with a new federal law.
- From July to January of last year compared to the same time period this year:
 - ER expenditures are up \$10.3 million, or 26.4%;
 - Use of the ER is up 17.5%; and
 - Cost per average visit is up 8%.

March 1, 2001

Physician Services

- Physicians are seeing more patients and are providing more services.
- From July to January of last year compared to the same time period this year:
 - Physician services expenditures are up \$55.0M, or 24.3%;
 - Physician services units have increased 15%;
 - Average cost per recipient is up 15%;
 - Average number of recipients is up 8%.

March 1, 2001

Mental Health

- Increases reflect:
 - A pent-up demand for mental health services
 - A change in policy that placed the state match for these services in the Medicaid budget
- From July to January of last fiscal year compared to the same time period this fiscal year:
 - Mental Health expenditures up \$18.2M (18.9%)
 - Average monthly recipients increased 10%;
 - Average cost per recipient increased by 8%.

March 1, 2001

And our costs have increased

- Increased use of services & increased cost of services mean higher cost per eligible
 - Per Member/Per Month cost have increased for most service population categories
 - Aged
 - Blind
 - Disabled
 - AFDC < 21
 - AFDC > 21
 - Infants and Childrens
 - Pregnant Women
 - Other Children
 - Aliens

- Electronic Benefit Transfer (EBT)
- Medicaid Improvements

HELPING CHILDREN AND YOUTH

In the past eight years, we've made great strides in improving the lives of North Carolina's children. Today North Carolina's children are more likely to have health insurance and up-to-date immunizations. They're also more likely to receive quality child care. But, we continue to work for the future. Although we've provided health insurance coverage for many North Carolina children through our Medicaid and NC Health Choice for Children programs, there's still more work to be done. Our best guess is that 30,000 children who are eligible for the state's programs remain uninsured.

NC Health Choice for Children

- The program began enrolling children on October 1, 1998. Today more than 71,000 children are enrolled. It is a stand alone state program modeled upon the benefits of dependents of the State Employees and Teachers Health Plan plus vision, dental and hearing benefits and special needs care.
- In its first two years the program paid for over 120,000 doctor's visits, 20,000 pairs of glasses and a variety of care ranging from general preventive care to a heart and lung transplant.
- Most importantly, the program helped to reduce the numbers of uninsured children – both through its direct enrollments and through the children it helped bring into Medicaid. Locally driven outreach efforts were conducted in all 100 counties.
- Generally considered to be one of the best programs in the country, NC Health Choice has been frequently cited as a model program by HCFA administrator Tim Westmoreland.

Health Check—Medicaid for Children

- The Division of Medical Assistance collaborated with the Division of Public Health to create the NC Health Check program. This program includes local Health Check coordinators to work within the public health departments to encourage Medicaid patients to receive their Health Check screenings and follow-up on children who are delinquent in their screenings.
- In February 1999, North Carolina elected to adopt a federal Medicaid option for children known as "continuous eligibility". Under this provision, a child who meets the Medicaid requirements is certified for benefits for 12 consecutive months without regard to any changes in family finances during the 12-month period. There is a scheduled eligibility re-determination every 12 months. This procedure provides more consistent and predictable health insurance coverage than had been possible when any change in family income jeopardized the child's Medicaid status.
- Many adopted children with special medical and rehabilitative needs do not qualify for a type of federal adoption assistance that includes medical coverage through Medicaid. In October 1994, North Carolina began covering medical costs for these special needs adoptive children through age 18. Prior to the change, the adoptive parents' income had to be counted in determining the child's Medicaid eligibility. In most instances the child did not qualify, imposing a financial barrier for potential adoptive families. Federal law gives states the option to provide Medicaid to these children without counting the adoptive parents' income.

Immunizing Children

- North Carolina implemented the Universal Childhood Vaccine Distribution Program (UCVDP) in 1994. The UCVDP offers vaccine at no charge to health care providers. This eliminates financial barriers to immunizations and allows children to receive immunizations in their medical home.

- For the 1999-2000 school year, 99.4 percent of "school-aged" children were immunized. According to the National Immunization Survey sponsored by the Centers for Disease Control and Prevention, 81 percent of North Carolina children are "age-appropriately" immunized.
- The North Carolina Immunization Registry (NCIR) is a computerized database containing children's immunization records. Currently, the NCIR is a component of the Health Services Information System (HSIS) which is utilized only by county health departments. Once the NCIR is fully operational, it will provide patients, parents, health-care providers, school and child-care facilities timely access to accurate immunization data.
- Since 1995, North Carolina's Sixth Grade School Site Hepatitis B Immunization Initiative has experienced great success. During the last five years, 92 percent-95 percent of all children vaccinated through the program completed all the shots recommended.

Reducing Infant Mortality

- North Carolina's 1999 infant mortality rate was 9.1 deaths per 1,000 live births - the lowest in state history. This is down slightly from the 1998 rate of 9.3 deaths per 1,000 live births and the previous state low of 9.2 that was set in 1995 and equaled in 1996 and 1997.
- 1999 also saw a significant closing of the gap between the infant mortality rates of minorities and whites. In 1999, the infant mortality rate for minorities was 14.8 deaths for every 1,000 live births compared to the 1998 rate of 16.3 - a decline of almost 9 percent. The infant mortality rate for whites rose slightly from the 6.4 deaths per 1,000 live births in 1998 to 6.8 in 1999.

Expanded Newborn Screening for Potential Genetic Problems

- In 1999, the NC State Laboratory of Public Health became the first state laboratory in the nation to offer an expanded array of newborn screening tests. This new technology offers at least 30 additional conditions for which newborns can be screened and treated if an aberrant condition is detected. Since its inception, about 65 additional cases of metabolic disorders have been detected. This technology is highly sophisticated and has served as a national model for other laboratories.
- Universal Sickle Cell screening of North Carolina newborns - In 1994, the NC State Laboratory began universal screening for sickle cell in newborns. Prior to this time, only babies whose race was listed as African American or black were tested. This universal screening reduced the numbers of babies who would not be tested due to incorrect or incomplete demographic data.

Reducing Teen Pregnancy

- Our efforts are making an impact. From 1992 to 1999, the pregnancy rate for girls ages 15-19 dropped almost 20 percent, and it dropped almost 30 percent for girls ages 10-14. The teenage pregnancy rate in North Carolina is at its lowest level in more than twenty years.
- In 1998, \$2 million in federal Temporary Assistance to Needy Families (TANF) funds were allocated to expand adolescent pregnancy prevention programs, and a statewide media campaign was launched to urge parents to talk with their children about responsible sex.
- The Adolescent Pregnancy Prevention Program operates in 24 counties to help younger teens avoid first-time pregnancies.
- The Adolescent Parenting Program operates in 31 counties to help teens that have had one child to prevent a second pregnancy. Among other support services, the program counsels teens on abstinence and the importance of staying in school.

Leading the Country in Child Care Innovation

- Recipient of 1998 Innovations in American Government Award from the Ford Foundation and the John F. Kennedy School of Government at Harvard University for Smart Start.
- In 1999, received Innovation in Government Award from the Council of State Governments for Smart Start.
- Selected by *Working Mother* magazine in November 2000 as one of the top six states for child care.
- Spotlighted as innovative state by the Southern Institute on Children and Families for innovative subsidy policy.
- Frequent advisor to other states on child care licensing and subsidy policies and systems.
- SB 929 established a new five-level star rated license for child care facilities based on achieving higher voluntary levels of program standards, staff education, and compliance history.
- One in three children are enrolled in centers meeting higher than minimum standards, vs. one in five in 1993.
- Child care subsidy reimbursement rates were tied to the star ratings in 1999, giving providers higher reimbursements to support higher quality.

Increased Child Care Availability:

- Over 100 child care facilities have received low-interest loans totaling almost \$5 million through federal funds DCD provides to the Self-Help Credit Union for a revolving loan fund. A special loan-to-grant program was created for providers impacted by Hurricane Floyd, with 14 loans approved to date totaling \$1.4 million.
- The number of regulated child care facilities has increased 43 percent from 6,595 in 1993 to 9,433 in 2000.
- The number of children enrolled in regulated child care facilities has increased 31 percent from 163,401 children in 1993 to 214,870 in 2000.

Subsidized Child Care Services:

- The income eligibility limits for subsidized child care have increased from approximately 43 percent to 75 percent of state median income, helping to keep more families working and off of welfare.
- About 44 percent of children currently in regulated care in NC benefit from the state's subsidized child care program, with 80 percent of those families earning less than \$20,000 annually.
- Created a single application and uniform eligibility criteria by consolidating multiple funding streams in 1996, making it easier for families to apply for and continue receiving services.
- Increased funding available to support subsidized child care, from approximately \$100 million in 1993 serving 88,766 children, to over \$305 million in 2000 serving over 183,000 children.

Smart Start:

- Expanded Smart Start from 12 pilot partnerships in 1993 to 83 partnerships in all 100 counties.
- An evaluation of Smart Start showed that children attending child care centers participating in Smart Start activities had better cognitive and language skills when they entered kindergarten.

- Since Smart Start began, 48,655 new child care spaces have been created; 132,493 children have received child care subsidies so their parents can work; 297,236 children have received early intervention and preventive health screenings; 294,653 children have received higher quality care thanks to Smart Start quality improvements; and 158,102 parents have received parent and health education through a variety of Smart Start-supported activities.

Education of Child Care Teachers and Directors:

- Expanded T.E.A.C.H. (Teacher Education and Compensation Helps) Scholarship Fund to make education available to all child care teachers and directors. Over 13,000 individuals have received these scholarships since 1993.
- Teacher turnover has been reduced from 42 percent to 31 percent due to higher education of staff.

Working to Reduce Teen Tobacco Use.

- Teens are finding it much harder to buy cigarettes these days. Thanks to increased merchant education and enforcement efforts, more youths under 18 are turned away by store clerks when trying to buy tobacco products. Substance abuse officials report a significant reduction in illegal youth tobacco sales in the past year. The rate of vending machine sales dropped dramatically from 38 percent to 11 percent and over-the-counter sales dropped from 24 percent to 20 percent.
- The state has increased its efforts to help teens avoid tobacco. The program has included a number of teen empowerment projects. Late last year, we introduced a new web site for this project, <http://www.StepUpNC.com/>.

Establishing and Supporting the Child Fatality Prevention Task Force and the Child Fatality Prevention Team.

- The Office of the Chief Medical Examiner was crucial to this effort, which helps to reduce child fatalities by learning from past child fatalities. It has also facilitated local efforts in each county for child fatality prevention plans and in seeing that those plans were initially executed and are now institutionalized.

Preventing Dental Decay in Preschool Children

- The Oral Health Section collaborated with the UNC-CH Schools of Public Health and Dentistry to create and pilot test an innovative approach for preventing dental decay in preschool children. This approach uses dental public health professionals as trainers, working with medical providers who will deliver a preventive package of services to children between the ages of 9 months and 3 years. Services are targeted to children who are 'at risk' for tooth decay. The package includes conducting an oral screening, providing dental health/nutritional counseling and providing fluoride varnishes
- The North Carolina Seal the State in '98 was a community-based program designed to increase the use of dental sealants through local sealant programs in all 100 counties during February 1998. All 100 counties participated in the program, even those counties where there are no privately practicing dentists. During the promotion, a total of 39,387 sealants were placed on 8,828 children at no charge. The sealant educational campaign reached 195,300 North Carolinians.
- A statewide outreach campaign to encourage dentists to participate in the program and actively provide dental care for all Medicaid Eligibles has been ongoing for the past three years. Dental services for children have increased from 19 percent to 40 percent over the last fiscal year.

- Since Feb. 1, 2000, an oral screening preventive package of services to be provided by physicians' offices to the very young child from birth to age three has been covered statewide. The package consists of three components: a dental screening, dietary/oral hygiene counseling to caregivers and the application of dental varnish to the child's teeth. These services will allow early childhood caries to be reduced by 42-50 percent.

Early Intervention

- North Carolina implemented a comprehensive interagency agreement to assure that early intervention services are available to all eligible children. The agreement coordinates efforts of twelve state agencies and organizations. The agreement has been cited as a national example of best practices. As a result of the agreement, these agencies collaboratively funded 3.2 million in joint projects.
- Over the past 7 years, the number of children under 3 years of age with or at risk for disabilities who receive early intervention services has increased from 5,000 to 8,000
- Children are referred to early intervention services 6 months earlier, enabling them to obtain services during the most critical formative years.
- The percentage of children who are deaf, hard of hearing or visually impaired served in their homes or in settings with non disabled children has increased.
- The percentage of children served by their local education agency by 4 years of age has increased.
- As a result of early intervention services, deaf, hard of hearing and visually impaired students have made greater gains as evidenced by an increase of goals mastered in the Individualized Family Service Plan or Individualized Education Plan.

Newborn Hearing Screenings

- To ensure more opportunities for those with hearing impairments, we must identify their needs as soon as possible. So in 1999, we successfully pushed for legislation requiring all newborns to receive hearing screenings.
- Infants born in North Carolina's 93 birthing hospitals are now screened before they are discharged. Those who show possible problems are screened a second time and, if necessary, receive an audiological examination.
- It is estimated that 400-600 hearing-impaired infants will be identified each year by the newborn hearing screenings — and that they'll get the services they need to develop appropriately.

Residential Schools for Children Who are Deaf and Blind

- North Carolina's accountability standards have been implemented, raising the expectations of staff and families
- School wide assessment of student achievement has been implemented
- Students in each school have demonstrated progress on North Carolina's Standard Course of Study, as evidenced by the results on End of Grade testing
- Governor Morehead School was recognized as being one of North Carolina's Exemplary Schools by the Department of Public Instruction

Emergency Medical Services for Children

- Developed and distributed locally and nationally Pediatric Emergency Care Course for all levels of emergency care providers. More than 1,000 clinicians, primarily paramedics and emergency nurses, have been trained in this program in NC alone.
- Developed, implemented and evaluated an educational emergency preparedness program that links pediatric primary care providers with the EMS system, helping to assure that these providers have access to pediatric emergency equipment and life saving procedures in the office based setting.
- North Carolina is known as the "color-coded" state for pediatric emergency care. We are the national model in development and implementation and evaluation of standardized emergency care treatment, using the Broselow System. This system is designed to reduce medical error and increase clinician comfort in the emergency care of children throughout the health care system.
- North Carolina was honored with the 1999 National Heroes Award for State Achievement for its efforts to enhance emergency medical services so that the right amount of medications and the right-sized equipment are readily available for different sized children in emergency rooms.

Ensuring That Children Have Safe Permanent Homes

- Hundreds more foster children found permanent homes in North Carolina last year than in previous year. In state fiscal year 1999-2000, 1,231 children found permanent homes, up from 895 the previous year.
- DSS has incorporated new methods to recruit families to adopt foster children. An adoption web site, linked with national adoption web site, features children needing adoption. DSS is using a toll-free number, media campaigns, and advocates to reach prospective adoptive parents. Through an agreement with the General Baptist State Convention, 4,000 Baptist pastors are recruiting parents in their congregations to adopt children from foster care.
- Families for Kids began in 1995 in 8 counties with a grant from the Kellogg Foundation. Families for Kids is now totally state supported in 16 counties, providing a new model for how a county DSS provides child welfare services. Goals are to provide community support for families, which can make the difference in whether a child enters foster care, or helps make that foster care stay short, coordinate the assessment process for families, keep the child with a single caseworker, a single stable foster care placement for each child, and work to make sure each child is in a permanent home within a year of entering foster care.
- In the last few years, DSS has placed 460 more child protection workers in counties so that all county departments of social services can meet state child welfare staffing standards. It appears this is working to protect children. More reports of abuse are being investigated, while for the first time in years, the number of children reported as abused and neglected in 2000, and the number substantiated (that is, found to actually have been abused or neglected) actually decreased.
- INSYNC: (Information Network for the Success of the Young in North Carolina) INSYNC is the new child welfare information system which is scheduled to be put in place this winter. INSYNC greatly increases the amount of information collected and amount that will be available about the children served. From now on social workers themselves (rather than data entry clerks) will be able to use the state's information system, using the world wide web. INSYNC means more information for social workers about the children they serve and more readily available information on which to make case decisions, which will translate into better decisions for children.

Increasing Child Support

- Child Support Enforcement Program Collections have increased steadily from just under \$200 million in 1993 to \$428 million in 2000.
- In 1994, Child Support Enforcement implemented the Omnibus Budget Reconciliation Act (OBRA). OBRA mandated that states develop and put into place a hospital-based paternity establishment procedure in all federally licensed birthing hospitals. This process allows parents to acknowledge paternity at the time of the child's birth in the hospital. The Program was required to pursue establishment of a medical support order for a child receiving Medicaid when a supporting parent is absent from the child's home.
- ACTS: In 1997, DSS implemented a single statewide comprehensive child support enforcement automated system, known as ACTS, for Automated Collection and Tracking System. This is a case management and financial management system that is helping the state collect more child support, locate more absent parents and establish more child support orders. This system receives and shares data with more than 30 state, federal and private agencies. ACTS was designated the State Case Registry, the official repository of records of all child support orders. Records of all ordered child support cases, including those enforced by clerks of court and private orders, were added to ACTS in 1998. These cases are incorporated into a national Federal Case Registry of all child support cases nationwide.
- New Hires Reporting. In 1997, DHHS provided for the development and installation of a New Hires Reporting function for employers, for the purpose of speeding child support collections and locating absent parents. Employers must report to the New Hire Operation Center the hiring or rehiring of employees within twenty days of the date of hire.
- Centralized Collection of Child Support. In 1999, Child Support Enforcement implemented the Central Collection Operation. Payments on all Child Support Enforcement Program cases and on all clerk-of-court cases are mailed to one location for disbursement. While start-up problems created headaches and bad press, the system has been functioning well for a year now and is highly accurate.
- Child Support Enforcement put in place the Financial Institution Data Match and the Multi-State Financial Institution Data Match programs. Financial institutions are required to identify delinquent obligors' assets and upon receipt of a lien or levy to pay out those assets to pay off delinquent child support accounts.
- Finding absent parents. The Federal Parent Locator Service (FPLS) expanded its capabilities. Information is automatically forwarded to states when there is a National New Hire match, and the FCR includes quarterly wage data, unemployment insurance payments and location information on matched cases. Income withholding documents are generated automatically generated on New Hire hits.
- Child Support Customer Services Center. DHHS is building a new child support customer service center, due to open Spring 2001, that will give parents seeking or paying child support easy access to information on their cases and child support checks. An aging phone system now handles thousands of calls every day from parents checking on the status of their child support. The current technology can only handle a minimum number of calls at one time and has limited capacity to put calls on hold. More than 900,000 parents call Child Support Enforcement to find out details of their case, including whether an absent parent has been located, the status of a child support order, whether an absent parent paid support, if a check was received, to verify their arrears or to verify a payment due date.

HELPING POOR PEOPLE RECEIVE MEDICAL CARE

We've made great strides in helping North Carolina's poor families receive medical care. North Carolina's Medicaid program is a national leader in this area. We must continue our efforts to improve Medicaid; one great challenge is finding dentists who are able to care for Medicaid patients.

- **Carolina ACCESS Statewide Expansion.** Since January 1999, Medicaid patients are able to select a primary care provider upon certification or re-certification in the Medicaid program in all counties across the state. The Carolina ACCESS program has recruited physicians to serve as medical homes for the Medicaid patients enrolled in this 1915b waived program. As of November 2000, more than 565,000 Medicaid patients have been linked with a primary care provider.
- **ACCESS II & III.** In July 1998, DMA, along with the Office of Research, Demonstrations and Rural Health, started the ACCESS II & III program. This program works with the larger Carolina ACCESS providers to create local community networks that enable providers to implement disease management and care management processes. There are nine demonstration sites across the state.
- **HealthCare Connection.** In 1996, DMA along with the Mecklenburg County Department of Social Services began offering HMO options to the Medicaid patients in Mecklenburg County. This is the only mandatory HMO county in the state and some 36,000 patients are enrolled with three HMO options.
- **Automatic Enrollment Of SSI Recipients.** On Jan. 1, 1995, North Carolina instituted automatic Medicaid coverage for SSI recipients. This change allowed all SSI recipients to receive Medicaid and eliminated the need to go to the county social services' office to file an application. As of November 1, 2000, more than 155,000 elderly and disabled SSI recipients receive health coverage because of this expansion. Before, SSI recipients had to file a separate Medicaid application and have a separate eligibility determination. Many elderly and disabled who received both SSI and Social Security payments had to spend down to receive Medicaid.
- **Aged, Blind And Disabled Income Limit Increased To 100 percent FPL.** Building on the earlier expansion to cover SSI recipients, North Carolina implemented a further extension of medical coverage to the elderly and disabled in January 1998. At that time the income limit was increased from the SSI standard – 75 percent of the federal poverty level) – to 100 percent of the federal poverty level. This allowed many elderly and disabled with incomes slightly higher than SSI to receive health coverage through the Medicaid program. Following the implementation of higher income limits, full Medicaid coverage became available, including prescription drugs. Many of these persons were Medicare recipients receiving Medicaid help with their Medicare premiums, deductibles, and coinsurance but were unable to afford prescription drugs on their limited income.
- **Extended Medicaid Benefits For Working Families.** North Carolina received federal approval to provide an additional 12 months of uninterrupted Medicaid benefits for Work First families losing cash benefits due to increased earnings. This new coverage extends a family's health care benefits to a maximum of 24 months following employment and serves to provide a medical safety net for newly working parents. This benefit was first offered in November 1999.
- **In November 1999, Medicaid began covering Diabetes Outpatient Self-Management training.** The training program provides patient education in the successful management of diabetes. It includes education about self-monitoring of blood glucose, diet and exercise, specifically developed insulin treatment plan for insulin dependent patients and motivations for patients to use the skills for self-management. The goal of self-management is to reduce the number of physician contact and costly hospital stays.

HELPING NORTH CAROLINA'S AGING POPULATION

In the past eight years, we've improved the lives of North Carolina's aging population. We've taken steps to improve rest home care, provide a small amount of prescription drug coverage, involve seniors in the legislature and protect seniors from consumer fraud.

But, there's still more to be done. Prescription drugs are a big problem for the state's seniors, and, other than Medicaid, there is currently no statewide prescription drug assistance program. Senior issues are becoming more important. Nearly a third of our state's population was born in the baby boom years between 1946 and 1964. The first wave of those boomers will turn 65 by the end of this decade, stressing services for seniors.

Rest Home Improvements

- In 1995, the N.C. General Assembly passed legislation that changed the way licensed adult care homes are paid for, providing care to residents who are eligible for Special Assistance through DSS and Medicaid. This resulted in new Medicaid coverage with the creation of our Adult Care Home Services program. Over the past four years, the program has phased in: (1) reimbursing ACHs for providing personal care services; (2) developed three *enhanced* care services for those residents needing extensive assistance with eating, toileting, and the combination of eating and toileting; (3) requiring ACH providers to have prior authorization from a DSS case manager before being reimbursed for enhanced care services rendered; and (4) adding "ambulation/locomotion" as an enhanced care service.
- Following the passage of SB 864 in the 1995 session of the General Assembly, state money was freed up when federal Medicaid funds were made available to cover personal care needs of residents. The following improvements were made in rest homes: mandated training of up to 75 hours for aides; additional staff to insure that the state can monitor rest homes before they are licensed; case managers who coordinate care and ensure that residents who need enhanced care obtain those services; requirements for greater accountability by providers - most of whom now have to submit audited cost reports. Also required: personal care aide training, performance of resident assessments, development of resident care plans, resident case management services and licensed health professional support (quarterly visits by registered nurses if residents have certain conditions or health care needs).
- The Department of Health and Human Services' Long-term Care Safety Initiative became the basis for new (1999) legislation and rules. New requirements included
 - Competency evaluation of staff administering medications,
 - Behavioral intervention training of aides and supervisors
 - Staffing and qualifications of supervisors of personal care aides
 - Aide staffing
 - Due process and appeal rights for resident discharge/transfer
 - DFS checks compliance history of providers before licenses are initially given or before they are renewed to ensure that 'bad actors' don't continue to be able to expand or operate.
 - Requirements for Alzheimer's and mental health special care units in adult care homes that advertise special care units
 - Time limited provisional licenses
 - Time limits for investigation of complaints
 - Additional and stronger requirements for medication administration and resident assessment.

- The Division of Facility Services has greatly strengthened its oversight of county departments of social services who have the primary responsibility to do the routine monitoring of adult care homes. The division has thoroughly revised its procedure manual, has provided extensive training of adult care home staff and conducts quarterly conferences to determine county compliance with state guidelines for monitoring.
- The Licensure and Certification Section added 15 new complaint investigator positions in 1999. This enabled the section to reduce the time that complaints against nursing homes are investigated from five to six months to 30-45 days.
- Creation of the Health Care Personnel Registry (1996) for reporting of cases of abuse, neglect, diversion of drugs, fraud and misappropriation of property by personal care aides and their direct supervisors.
- Expansion of the Health Care Personnel Registry Section to include Mental Health facilities (1997).
- Requiring all health care facilities to check Registry prior to hiring unlicensed health care workers. (1999)
- Statutory requirement for criminal history record checks of all unlicensed health care workers in nursing homes, adult care homes and home care agencies.
- Expanded Health Care Personnel Registry investigative staff from two to 16 from 1995 through 1999, adding four from state in 1996, two in 1997 and four in 1999. The other four were provided through federal resources in 1995, 1996 and 1997.
- Created the Health Care Personnel Registry Web page, <http://www.ncnar.org/>, which allows public searches of the Health Care Personnel Registry over the Internet. Inaugurated on Jan. 11, 2000. More than 38,000 hits thus far.
- General Assembly implemented a state tax credit of 15 percent up to a maximum of \$350 for long-term care insurance paid in tax years 1999-2003.
- General Assembly created optional group long-term care insurance for state, retired employees and families.
- New definitions incorporated into law to describe assisted living in N.C. (licensed adult care homes and registered multi-unit assisted housing with services) and limitations on admissions and residents who can be served in these facilities based on physical/health conditions. (1995)
- Administrative penalties increased for rest home rule violations threatening the health and safety of residents and daily penalties set for failure to correct violations as established in corrective action plans. (1997)
- Third-shift staffing ratio revised from 1/50 to 1/30. (1998)
- Statutory requirements established for the certification of adult care home administrators.
- The Division of Facility Services has received national attention regarding the support it has given the Eden Alternative program in both nursing homes and adult care homes. The Eden Alternative is a process where institutional facilities use pets, plants, children and staff empowerment and team building to transform facilities into human habitats. DFS formed the first Eden Alternative Coalition in the country and was the first to use its federal nursing home fine money to provide start-up grants to nursing homes to implement the process and greatly improve the lives of their residents. Two years ago, \$195,000 in grants were awarded to 13 nursing homes. This year, approximately \$150,000 will be available for grants.

- DFS and the NC Health Care Facilities Association formed a multi-agency task force on restraint use. The group consisted of advocates, providers, representatives from three universities and other associations in long-term care. Medical Review of North Carolina carried out a restraint minimization project in 22 facilities geared to physicians, administrators and directors of nursing. This, along with other targeted efforts, resulted in a statewide reduction in restraint use from more than 30 percent to 8 percent.

Resident Assessment Instrument for Home Care:

- DSS is piloting a resident assessment instrument for the aging and disabled in rest homes. This will evaluate the level of care needed by the elderly and disabled, and what it would take to stay in their own home. The goal is to prevent people from being institutionalized prematurely.
- Eligible individuals who need adult care home level of care will be able to live at home with the aid of the Special Assistance income supplement, in-home services, and family/informal support. The demonstration project will operate through June 2001 and is limited to 400 individuals living in the 22 counties participating in the project.
- County DSS agencies began taking applications in September 2000. Case managers for the assessment and service planning components of this project are using a new, comprehensive assessment instrument, known as the Resident Assessment Instrument for Home Care. The assessment instrument is automated and used on a laptop computer, which requires less time and makes the process more efficient for the client and case manager while gathering the right kinds of information needed to develop a useful and workable service plan with the client.

Prescription Drug Assistance

- The 1999 session of the North Carolina General Assembly appropriated \$500,000 for the 1999-2000 fiscal year and \$500,000 for the 2000-2001 fiscal year to pay the cost of outpatient prescription drugs for the treatment of cardiovascular disease or diabetes for persons who are 65+, not eligible for full Medicaid benefits, and whose income is not more than 150 percent of the federal poverty level. For 2000, these funds were targeted to older adults in counties in eastern North Carolina impacted by Hurricane Floyd.

Senior Tar Heel Legislature

- In 1993 the state General Assembly created the North Carolina Senior Tar Heel Legislature to help it assess the legislative needs of older adults. The Division staffs the Senior Tar Heel Legislature, which has proven to be a very effective body.
- Senior Tar Heel legislative successes include appropriations for in-home and community based services as well as money for senior centers.

Division of Aging Pilot Programs and Projects

- In 1994, the Division received foundation funds to support a "single portal of entry" demonstration in Alamance and Pitt Counties, to see how best to help frail seniors to get the services they need.
- In 1995, based on a successful pilot project in Northampton County, the Division began promoting the Senior Education Corps (SEC) statewide. As a cooperative effort between the North Carolina Division of Aging and the Department of Public Instruction, the SEC is an intergenerational program that connects the needs of North Carolina school children with the talent, expertise and experience of our older adults. The Senior Education Corps is now active in 27 counties, and is in development in 30 more.
- In 1998, the Division worked with the Attorney General's Office and AARP to establish a North Carolina Senior Consumer Fraud Task Force to protect older adults from unscrupulous telemarketing practices and other scams.
- In 1999, The Division of Aging received two federal competitive grants: one to start the Senior Medicare Patrol Project in North Carolina to address health care waste, fraud and abuse in Medicare and Medicaid; and the second to pilot Outcome Performance Measures with home and community services. The Division's application for the Senior Medicare Patrol Project was scored the highest among the federal reviewers and that included the applications from the original 12 states that had been in operation for three years.

HELPING NORTH CAROLINIANS WITH DISABILITIES

We've worked to improve the lives of North Carolinians with disabilities during the past eight years. We've improved mental health regulations, and expanded opportunities for North Carolinians who are deaf, blind or physically impaired. Much remains to be done, especially with the state's mental health system.

Helping People with Mental Illness

- The state's mentally ill and mentally retarded citizens benefit from changes in caregiver regulations enacted last summer. The legislation impacts more than 10,000 people in 3,400 group homes, day treatment and outpatient programs and 328 intermediate care facilities for the mentally retarded.
- The changes authorize the state Mental Health Commission to set personnel staffing requirements for mental health facilities; to adopt rules for qualifications of mental health facility administrators; to implement death reporting requirements and requirements for patient advocates as a condition of licensure. In addition, facilities are now required to notify DHHS of all allegations against their health care personnel related to abuse, neglect, taking of property, fraud and diversion of patient drugs. Results of investigators are to be reported to the state Health Care Personnel Registry. Facilities also are more accountable to the state regarding death reporting and they are subjected to fines of up to \$10,000.
- Temporary rules became effective January 1, 2001 for personnel staffing requirements, qualifications of mental health facility administrators, and death reporting. The rules will help implement the recently enacted legislation described above.
- NC was one of only nine states to receive federal funds to participate in a demonstration project to serve homeless adults with mental illness. The ACCESS project, funded at approximately \$9 million over five years, helped demonstrate that assertive outreach to this population can lead to engagement in services and treatment that result in overall decreases in high cost inpatient services.
- Expanded the special fund to pay for newer atypical antipsychotic medications for community clients with very limited incomes who are not Medicaid eligible. These newer drugs are exponentially more expensive than conventional drugs but have been shown to have fewer side effects resulting in a higher rate of medication compliance. The use of these drugs facilitated the discharge of a number of patients who had been long term residents of the state hospitals.
- Expanded housing opportunities for adults with mental illness. The Adult Mental Health obtained seven Shelter Plus Care grants from HUD that provide rental assistance to approximately 400 homeless persons with mental illness served by the area programs. Additionally, the Division developed a cross disability housing plan which resulted in the establishment of a nonprofit Housing Intermediary that provides technical assistance to local programs and their affiliates in the financing, development and management of supportive housing.
- Increased the level of mental health services to people who are incarcerated in local jails. Currently 10 area programs are receiving special funds to provide mental health treatment to mentally ill adults who wind up in the local jail.

Helping People With Developmental Disabilities

- The Division of Mental Health's Disabilities' Section has increased community service resources for persons with developmental disabilities in the past seven years by 81 percent. The national average is 54 percent. The American Association on Mental Retardation called North Carolina "a leader in expansion of community services".

- The Section has implemented local Single Portal of Entry/Exit which requires active participation of consumers and families, includes the development of a Person Centered Plan for every consumer and coordinates efforts through an interagency council, including private providers and other key agencies.
- Developmental Disabilities has developed an automated process for the accurate determination of those persons in need of services for whom services were unavailable. This data resulted in accurate local and statewide planning, leading to an increase in Medicaid and state appropriations that removed over 3,000 persons from the waiting list by providing the services they need.
- The Developmental Disabilities Section has developed the North Carolina Support Needs Assessment Profile, which is administered to all persons with developmental disabilities by certified individuals to determine level of intensity of service need. This will result in a more responsive, accountable and cost effective system of services.
- The Developmental Disabilities Section has initiated and expanded First in Families, a direct family support program. North Carolina is among the top ten states in the nation for the amount of funding provided directly to family support.
- Developmental Disabilities has directed a carefully planned, successfully implemented reduction of the residential census in our Mental Retardation Centers for the past ten years with a reduction in census supported at a daily cost below the national average.
- North Carolina has significantly increased expert and cost effective training, technical assistance, specialized clinics, outpatient services and consultation provided by the Mental Retardation Center staff. These services are largely unavailable elsewhere in our state.
- The Developmental Disabilities Section initiated the development of community programs for very medically involved children in collaboration with university hospitals to allow children who will need long term treatment to live outside of the hospital, but receive all medical services necessary. These programs are teaching sites for physicians and allied health personnel.
- North Carolina is among the top five states in the nation in the funding for and provision of assistive technology for persons with developmental disabilities.

Helping People Who are Deaf, Hard of Hearing, Blind or Visually Impaired

- Increased assistance to the blind and visually impaired through the Business Enterprises Program. Gross sales increased from \$7,824,740 in FY 1992 to \$11,753,390 in FY 2000, net proceeds paid to operators increased from \$1,413,422 in FY 1992 to \$2,843,778 in FY 2000, and average operator income increased from \$22,014 in FY 1992 to \$31,795 in FY 2000.
- Creation of the Tech-Ed Center in partnership with Carteret Community College through a Kate B. Reynolds Grant which provides technology demonstrations and training to blind and visually impaired individuals in Carteret and three surrounding counties.
- Receipt of an AmeriCorps Grant through which 12 AmeriCorps members will provide computer training to 300 blind and visually impaired individuals per year in 19 predominantly rural counties.
- Established cooperative programs with five school systems that bring specialized vocational rehabilitation transition services to blind and visually impaired high school students, increasing their opportunities for employment after high school.
- Piloted NewsLine for the blind, a service through which individuals who are blind in Mecklenburg and seven surrounding counties can access the Charlotte Observer and three national newspapers through a touch-tone telephone, in partnership with the National Federation of the Blind of North Carolina.
- Advocated for and supported the establishment and operation of a teacher training program in the field of blindness and visual impairment at North Carolina Central University.

- 1996-2000, the Division for Services to Deaf and Hard of Hearing established telecommunications relay service, with the added innovation of an ongoing video relay service component. This video relay service is one of the first of its kind in the world and has drawn international attention.
- Adult Mental Health has developed a comprehensive system of services for people who are deaf. Over the past six years DMH/DD/SAS has (1) developed a 17-bed inpatient unit for the deaf at Dix Hospital; (2) established nine regional mental health service sites staffed by mental health professionals who are skilled in American Sign Language and familiar with deaf culture; (3) established a Deaf Mental Health Advisory Council; (4) developed a contract with the ECU School of Social Work to develop a specialty track for graduate social work students who are interested in working with the deaf; (5) established two residential programs for persons who are deaf; and (6) established a fund to pay for interpreters for persons who are deaf.
- In 1992-93 the state implemented a program for all deaf and hard of hearing substance abusers in the state. In 1997, five regional coordinators were hired to provide deaf and hard of hearing services throughout the state. There is also a fund for interpreter services at AA/NA meetings.

Helping People Through Vocational Rehabilitation

- The Division of Vocational Rehabilitation has been successful in its mission to assist North Carolina citizens with disabilities through effective provision of services resulting in the accomplishment of those citizens achieving their employment goals. Number of citizens served has increased from 59,820 in 1993 to 66,037 in 2000, with the number of successful employment outcomes increasing from 8,448 to 9,424.
- Developed four new transitional employment programs designed to assist individuals with significant mental illness in maintaining employment over extended periods of time.
- 29,461 individuals were or are being served through DVR's independent living program with a total of 8,815 successful outcomes.
- DVR has worked to prevent folks from entering nursing homes and to move folks from nursing homes to community based settings. In 1998, 232 individuals were kept out of institutions and 37 were relocated to community-based settings. In 1999, 420 individuals were kept out of institutions and 46 were moved to community based settings.
- Opened new Assistive Technology Center in rural NC Mountains jointly funded by NCATP & Women's and Children's Health.
- Over 5,000 Assistive Technology equipment loans provided this year through NCATP centers and staff.
- Expanded the Check-It-Out equipment loan program during 2000 with over 6,247 equipment loans provided by the 32 participating statewide organizations.

Helping People Who are Substance Abusers

- Developed and implemented a multimedia prevention campaign, *The Partnership for a Drug-Free North Carolina (PDFNC)*.
- Developed over 70 recovery homes under the umbrella of Oxford House, Inc. These houses have a minimum of six beds. Participation in a memorandum with states in the southeast that resulted in standards for Narcotic Addiction Treatment.
- Developed a statewide Perinatal/Maternal Substance Abuse Initiative that was expanded from six programs in 1992 to 23 specialized programs in 2000. The program provides gender specific services to substance abusing pregnant women, women with dependent children, or pregnant adolescents and their infants. SAS continues to maintain a Substance Abuse professional on the 1-800 referral line that makes referrals to prenatal care and substance abuse service.

- Since 1998, the Substance Abuse Services Section has promoted and supported increased participation in research to practice initiatives sponsored by federal institutes and agencies. These initiatives blend well with the State's desire to promote the adoption of research-based, best practice models by programs receiving state-support. The State was the second to be awarded the National Institutes of Alcohol Abuse and Alcoholism (NIAAA) "Research in Residence Program." The section has sponsored the development of a North Carolina Practice Research Consortium. The goals of this consortium are to improve the quality and effectiveness of substance abuse service delivery in the State of North Carolina.
- The Substance Abuse Section, along with 19 other states, have formed a National Recovery Network. The state affiliate is VOICES for Addiction Recovery North Carolina. VOICES is a statewide grassroots organization made up of people in recovery, their families and friends who have suffered the consequences of addiction and alcoholism. The organization is formed to celebrate, support, and advocate for recovery. This initiative sponsored by the Center for Substance Abuse Treatment, U.S. Department of Health and Human Services, has included representatives from VOICES in several national forums designed to encourage other states to establish such networks.

HELPING PEOPLE LEAVE WELFARE FOR WORK

We've made great strides in helping North Carolinians leave welfare for work. Today's welfare rolls have been reduced by 60 percent. We must continue to build on these efforts. Some economic signs point to a slowing economy in the coming years. Workers who have recently left the welfare system to receive paychecks stand to be dramatically affected by an economic downturn. We must continue our efforts to support these newly independent families and make sure they don't return to welfare.

- North Carolina reformed welfare in a massive shift that changed an entrenched entitlement program to a temporary benefits and employment program. Beginning statewide in 1995, Work First has helped tens of thousands of families on welfare to build stronger families and lead more productive lives. These are the families who left welfare for work, or were diverted from entering welfare, because of Work First's short-term cash assistance, job training, job search help, child care services, transportation and other support services. Eighty-thousand families have left welfare and welfare rolls have tumbled 60 percent.
- Millions of dollars previously spent for welfare cash assistance are being reinvested to help low income working families stay in the work force and protect children from abuse or neglect. Some uses of this money include working to prevent teen pregnancy, helping low-income fathers find jobs to pay child support and reconnect with their children, helping substance abusers on welfare kick the habit so they can become better parents and become self sufficient, operating a call-back center to help Work First graduates resolve issues that may push them back on welfare (this 6-county pilot program is operating from Edgecombe County) and granting funds to community organizations, faith groups, and nonprofits to design creative community programs that help families. The federal portion of Work First funding (which is part of the county block grant) has also been used to hire more child protective services staff and to pay the cost of placing children in foster care.
- In an effort to involve the business community in welfare reform, the Governor's Work First Business Council, a group of 31 business leaders from across the state, was formed in April 1998. Council members represent various industries and come from businesses large and small. The Governor's Work First Business Council works with businesses to find jobs for Work First participants and advises government on strategies to help citizens achieve self-sufficiency.
- To help Work First participants get to jobs, DSS is working with the Department of Transportation to pilot a rural vanpool program in six counties and on various other initiatives to encourage solutions to transportation barriers.
- The Work First Substance Abuse Initiative began in 1998, with the goal of providing early identification of Work First Participants who have substance abuse problems severe enough to impact their ability to secure and maintain employment. Data from May 1998 through June 2000 shows that 3,756 of the people who were referred to treatment, went on to be admitted.

HELPING PEOPLE WITH HIV/AIDS AND PREVENTING HIV/AIDS AND OTHER STDS

We've made great strides in helping prevent HIV/AIDS, as well as helping people who have HIV/AIDS, but we must continue our efforts in this area. Some national data shows that people may be letting their guard down and forgetting about the dangers of contracting HIV/AIDS.

- HIV case management was established as a Medicaid reimbursable service in April 1994. A waiver to permit the implementation of the Medicaid "Community Alternatives Program" (CAP) for persons living with AIDS (PLWA) was obtained, and CAP AIDS services begun, in July 1995.
- The existence of HIV Care Consortia was expanded to cover all 100 counties, thus assuring access to Ryan White-supported services statewide. Eight primary medical and/or dental care programs were funded with federal Ryan White Program resources as a means of expanding access to care for PLWA/HIV across the state.
- The HIV Medications Program (or AIDS Drug Assistance Program or ADAP) grew from a \$200,000 program providing 1 drug to PLWA/HIV who had incomes less than 85 percent of the federal poverty level to a \$14+ million program providing 50 drugs to PLWA/HIV with incomes at or below 125 percent of the federal poverty level.
- HIV/AIDS prevention activities within the African-American Faith Community for the Healing of AIDS were expanded locally and statewide in 1996. In 1997, a similar Native American Faith Initiative was begun.
- An HIV/STD Prevention and Community Planning Academy, designed to provide training opportunities and certification for community participants in the basics of community-based planning and organizational management was implemented.
- Funding decisions for new community-based prevention programs were made based on priorities established within the Community Planning process. This included funding programs to conduct social marketing and training initiatives for the African-American and "Men who have Sex with Men" communities.
- Special events (e.g., the CBO Summit, a statewide STD Conference) were developed and sponsored to strengthen linkages between organizations involved in HIV prevention and related activities. This included co-sponsoring a Youth Summit (1996) to provide education and a forum for adolescent participants to share concerns and issues regarding HIV/AIDS with others involved in community prevention efforts.
- Worked closely with and provided training to Department of Correction staff to improve coordination of prevention and care-related activities and services for those inmates released from State correctional institutions.
- In an effort to eliminate barriers to HIV prevention services, non-traditional HIV counseling and testing sites were established. These sites are located in easily accessible community settings, offer services at "nontraditional hours," and include special outreach and behavioral skills building efforts. They also foster improved relationships between community-based organizations, local public health departments and other human/social service agencies. These sites have helped to reach, counsel and test individuals who, as a group, are slightly different than those who are served at more traditional sites.
- The number of AIDS cases declined during the period 1993 – 2000; from 1,284 to a projected 686 for 2000 (a decline of 46 percent). AIDS related deaths declined among 15-44 year olds by 48 percent between 1992 and 1999, with the advent of highly active antiretroviral therapies (HAART) most frequently credited as the reason for this reduction.

- Perinatal HIV infection (mother to baby transmission) decreased by 71 percent from 1992/93 (75 HIV/AIDS cases) through 1998/99 (22 HIV/AIDS cases). Only three HIV infection reports and two AIDS case reports for children less than five years of age have been filed during the first three-quarter of 2000.
- Initiated a Syphilis Elimination Program to address the extremely high rates of the disease in eight NC counties and statewide. Efforts included funding to these eight high-morbidity counties, a statewide promotional/educational campaign and rapid ethnographic community assessments in seven counties, which allows the tailoring of the programs to the specific community.
- NC's syphilis morbidity has been reduced by 73 percent since 1992; from 4,340 cases to a projected 1,168 cases for 2000. Gonorrhea cases experienced a decline as well; from 26,367 cases in 1992 to 22,469 cases projected for 2000.
- Significantly expanded screening for chlamydia in STD and Family Planning clinics in local public health departments, and significantly increased the awareness of the prevalence and dangers of the disease.
- Beginning in 1994, the State expanded laboratory services available at no charge to local public health departments or their clients to include the testing for "helper T lymphocytes" (T-cells, CD-4 count).

IMPROVING SERVICES THROUGH TECHNOLOGY

In recent years, the Department of Health and Human Services (DHHS) has responded to challenges of historic proportions. Sweeping changes in federal and state social policy, federal changes in funding methods, procurement reform and citizen demands for easier, more convenient access to services have created an environment of constant and accelerating change. The most significant policy changes have been in welfare reform, managed care reform and health insurance reform. DHHS has responded to these challenges by developing a vision that places the individual citizen and family at the center of a seamlessly delivered array of services that result in economic self-sufficiency and optimum health.

Current technology systems often impede this goal and result in inconvenience and inefficiency for both citizens and service delivery professionals. The new vision seeks to have the greatest positive impact in serving citizen needs, while having the least negative impact on citizen convenience. It envisions that a citizen or family will enter the DHHS network of services at any point and receive services required to meet his or her needs without finding it necessary to understand the DHHS organizational structure, visit numerous physical locations with long lines or need to provide the same personal, confidential information repeatedly to different employees. It also uses taxpayer funds effectively and efficiently.

The vision encompasses the entire enterprise of DHHS—the official local and state organizations and the profit and not-for-profit partners and stakeholders required to deliver such an extensive family of services. Processes are to be integrated and information shared across organizational boundaries. Barriers to this integration and sharing must be reduced or eliminated, while vigorously preserving all appropriate privacy.

Business Process Reengineering Project:

- The process through which North Carolina families access services and benefits locally has not changed significantly for over 20 years. To address this critical issue, the Business Process Reengineering Project began in the fall of 1999 an effort to apply updated business models and innovative e-government strategies to the local human service delivery system.
- In an unprecedented cooperative effort, partner agencies, including the Divisions of Social Services, Information and Resource Management, Child Development, and Medical Assistance as well as representatives of six local departments of social services developed the new business model during an intensive 12-week effort. The on-going management team for implementation is now formed and implementation is fast approaching with a statewide comprehensive case management system as one of the very first projects.
- Expected results are simplified administration of programs, the ability to serve families with a unified service delivery process for all programs, connections of all 100 counties connected through the internet, use of new web technologies for timely exchange of data, and better public access to information and services.
- The project has already resulted in some noticeable improvements. Manuals used by local DSS, like Medicaid documents, have been created electronically and can be easily accessed via the Internet. The NC Department of Social Services has developed a new web site, <http://www.dhhs.state.nc.us/dss/>. The Division of Child Development has developed a new site to help parents find quality child care, <http://www.ncchildcare.net/search.asp>.

Data Warehouse

- As federal and state regulations and reporting requirements continue to increase, become more complex and change at an ever increasing frequency, DHHS has a need for access to program information on a more timely and consistent manner.
- The data warehouse project currently under way provides a single source for information across the agency, the base for future growth without modification to existing systems and considerable user flexibility. Data are extracted from current systems and loaded into the data warehouse.
- Users have easy access to data and can combine data from many programs to provide a complete picture of assistance. It is also a valuable tool for measuring the effectiveness of programs and policy.
- This will also mean that counties have much improved access to data. Information currently available includes EIS data, EPIS data, FSIS data, and Food Stamp EBT data. There are plans to add SIS data, Employment data, Child Welfare data, Child Day Care data, Child Support data, Adult Services data, Epics data, and FSIS Authorized Rep data.

Electronic Funds Transfer/Direct Deposit

- DHHS is currently phasing in electronic funds transfer technology as a payment method for child support employer wage withholdings. With electronic funds transfer (EFT), companies remit child support wage withholdings directly to the bank accounts of custodial parents. EFT saves employers time and is more accurate. Parents can also pay or receive payments electronically, saving time and improving accuracy.

Electronic Benefit Transfer (EBT)

- North Carolina began using EBT to replace paper food stamps in 1997. EBT is an electronic system that allows a recipient to authorize transfer of their government benefits from a Federal account to a retailer account to pay for products received. EBT eliminates the cumbersome processes required by the paper food stamp system. By eliminating paper coupons that may be lost, sold or stolen, EBT may help cut back on food stamp fraud. Recipients like the convenience and security of EBT. Retailers and bankers like EBT because it offers simplicity of accounting and reduces labor costs because there are no coupons to sort, count, and bundle. All the accounting is done automatically.

Medicaid Improvements

- DRIVE. In February 1999, the NC Medicaid data warehouse (DRIVE) became fully operational. It contains three years of Medicaid claims and eligibility data with associated reference files such as provider files, rate files, diagnosis and procedure files, etc. Prior to having this data warehouse, Medicaid data had to be pulled from a multitude of flat files. This was very time consuming and expensive. A major advantage of the DRIVE warehouse is that it is a relational database and can return responses to queries in a matter of minutes. In addition, ad hoc queries can be built quickly to provide responses to specific questions asked by management and/or the legislature.
- ITME. Identification, Tracking, Measurement Enhancement (ITME) is a major enhancement to the NC Medicaid claims processing system (MMIS). This has added more flexibility, modularity, and table driven processes to the system. Waiver programs within Medicaid can be more clearly identified for better tracking and measurement of program effectiveness. It also allows multiple financial payers to use the same claims processing system while still maintaining the integrity each payer's claims. Individual financial payers and population groups can make their own decisions about such things as fees, edits and audits to apply to claims, who are eligible providers, and what services will be paid. In addition, it can assure that multiple payers do not pay the same claim. This will allow the Medicaid

program to contract with managed care entities on an at-risk basis while still processing the claims through a centralized system. Also, other state payers such as Mental Health can use this same claims processing system for their claims payment. This gives medical providers a single place to send claims for payment. This enhancement will be fully operational in February 2001.

- N'ABLE. NC Access Browser Lookup Environment (N'ABLE) is another major enhancement to the NC Medicaid claims processing system (MMIS) and became operation in October 2000. It contains a web-enabled user interface to Medicaid information. The N'ABLE project will facilitate enhanced provider services, improved Third Party Recovery and Program Integrity recoveries, and will allow user-friendly access to various kinds of Medicaid-related information via the user's desktop.
- Fraud and Abuse Detection System. DMA has installed FraudSpotlight – a sophisticated Medicaid fraud and abuse detection software. This system includes a browser-based user interface tool called Fraud Spotlight. The software runs off our claims data warehouse. It has a web browser tool that allows staff real time access to claim detail, provider enrollment, and recipient eligibility data to investigate cases, manipulate data, drill-to-detail level of information, and then export that data to spreadsheets. We currently have 24 working fraud detection filters and three modeling techniques. There are four new filters and two new models in process. Those new models include a spike detection model and a model that identifies providers not practicing like anyone else.
- Enhanced Automation. In 1998, DMA installed a PC-LAN system. This was the stepping stone for our move to a data warehouse and a fraud and abuse detection system. We have the capability to import and export data to spreadsheet recovery charts, use mass mailings, share information faster and, most importantly, move that information to the investigative recovery source faster.
- Claim imaging. DMA now uses a claim imaging process as opposed to microfiche copying. All Medicaid staff can pull up a claim for investigation in seconds at their desktop PC. Having a copy of the provider's claim available online makes investigation faster and eliminates clerical effort to pull this information manually. As a by-product, this readily available information helps improve customer service by making claim research faster for all DMA staff. It simplified work processes by replacing manual search and storage efforts with real time online availability.
- Browser-Based Claim System. We converted our MMIS system claim information screens to a browser-based system. This system delivers tremendous time and cost saving benefits throughout our agency. For the investigator, the ability to drill to claim detail makes investigations move in minutes verses days and weeks. Our new system with a browser based system and the addition of a claim detail database, staff will have a faster and easier to use system. The browser has code-to-English hypertext link translations, mouse-over explanations, and other features that will make it easier for new employees to adapt. The ability to drill to detail will mean less paper use, savings of at least a week to nine days to all agency staff and the ability to answer provider complaints more quickly.
- Enhanced Investigations and Customer Service. Report2Web Software – permits a report to be placed on web access where the data can be manipulated and exported for use. Remittance Advice and Status Reports and "Paid - Full" reports will be loaded initially followed by cost report summaries for the Audit Section. This eliminates pulling microfiche manually.
- Provider Call Tracking System. Calls to our fiscal agent and DMA are logged into a Provider Call Tracking database where information is stored about the caller and the resolution. Frequently asked questions get catalogued to assure a same response and cut down on answer shopping. FAQ's also become part of future training. In-house staff can conclude work started by other employees without having to re-research the same issues or problems. Investigation staff will benefit from knowing if a provider was provided incorrect information or ever contacted the agency of fiscal agent.
- Online research and reference material. CPT, ICD-9, Provider manuals and other reference information are available for online research by all staff. This ensures accurate and timely distribution of information and saves time and clerical work of maintaining paper manuals and materials.

- Modifiers. In June 1999, Medicaid began processing claims using modifiers. Modifiers are two digit identifiers billed with procedure codes to convey specific information regarding the procedure or service to which it is appended. Using Modifiers enables Medicaid to adopt many of Medicare's policies, and allow providers to bill more uniformly between carriers. Providers may bill using up to three Modifiers per detail. Modifiers allow providers to indicate that a service rendered to a patient has been altered by some special circumstances while the code description remains the same.
- Developed and implemented HEARTS, Healthcare Enterprise and Accounts Receivables Tracking System. HEARTS is the primary health care information system used in the state mental health institutions. HEARTS handles the collection of patient specific information, patient charges and billing for those charges.

AGENDA

Joint Appropriations Subcommittee on Health and Human Services

Legislative Office Building – Room 643

Tuesday, March 6th, 2001

8:30 a.m.

Opening Remarks

*Senator Bill Martin, Co-Chair
Representative Beverly Earle, Co-Chair
Representative Edd Nye, Co-Chair*

Department of Health and Human Services Overview –

*Jim Edgerton
Assistant Secretary, DHHS*

NC Health Choice –

*Carol Shaw
Fiscal Research Division Staff*

*Dr. Jack Walker
Executive Director
State Employees' Health Plan*

Committee Discussion

Next Meeting

Adjourn

**JOINT APPROPRIATIONS SUBCOMMITTEE
ON
HEALTH AND HUMAN SERVICES**

Room 424, Legislative Office Building
Tuesday, March 6, 2001
8:30 a. m
Minutes

The Joint Appropriations Subcommittee on Health and Human Services met Tuesday, March 6, 2001 in Room 643 of the Legislative Office Building, with Senator Bill Martin presiding. Three Senate members and six House members were present. After opening remarks and introductions the Chair, Jim Edgerton, assistant Secretary of Department of Health and Human Services was recognized to give an overview of the Department. A copy of his presentation (DHHS Initiatives 1993-2000) is included as Attachment 1). He stated that there has been an increase in the Vocational Rehab services and vast improvements have been made in the area of Mental Health. Regarding Welfare Reform, he stated that action has been taken to reduce welfare role by 60 per cent. The department needs to do more in the area of technology. A summary of accomplishments is included in the handout.

The Chair asked committee members to review the handout within the next few days to get additional information. During Committee discussion, it suggested during the effort address things to change; there should be a review of more than the past five years. A suggestion of eight to ten years was made. The Chair sated that the Committee will not be restricted by the five-year request from the Co-chairs.

During discussion of the Call Centers, an update of the Martin County Center was given. It is scheduled to open mid May the delay is due to construction of the facility.

Carol Shaw was recognized to give an update on Health Choices. An outline of her presentation in included in the minutes as Attachment #2. Regarding the program budget, Carol stated that enrollment fees could not be used to match federal funds. The issue of the possibility to shift some of these dollars to younger and older children over the next ten years was discussed. The Committee agreed that there is a need to address adolescent health care needs and requested information of the State's share of these dollars over the next ten years.

The meeting was adjourned at 9:48 to continue this afternoon at 1:30.

William N. Martin, Chair

Joyce Crews Hodge, Clerk

NC Health Choice Projections SFY 2000-01 Through SFY 2006-07
Under Current Federal Law
(Dollar Amounts in Millions)

Estimated Expenditures	\$0.00	\$31.12	\$82.89	\$106.29	\$126.29	\$142.17	\$158.15	\$176.05	\$196.09	\$218.55
Federal Share	\$0.00	\$23.08	\$61.21	\$78.37	\$92.85	\$104.27	\$115.75	\$128.53	\$142.81	\$156.92
State Share	\$0.00	\$8.04	\$21.68	\$27.92	\$33.44	\$37.90	\$42.40	\$47.52	\$53.28	\$61.63
State Continuation Appropriations	\$0.00	\$8.04	\$21.68	\$25.46	\$25.46	\$25.46	\$25.46	\$25.46	\$25.46	\$25.46
Additional State Appropriations	\$0.00	\$0.00	\$0.00	(\$2.46)	(\$7.98)	(\$12.44)	(\$16.94)	(\$22.06)	(\$27.82)	(\$36.17)
Federal Carry Forward	\$59.63	\$115.76	\$141.23	\$183.95	\$181.62	\$247.93	\$120.31	\$85.89	\$42.73	\$2.98

Notes:
Assumes enrollment will reopen effective 07/01/01 and remain open until average monthly enrollment reaches 82,000. Assumes children on the waiting list enter the program on 07/01/01.
Based on current estimates from the SEHP actuary, assumes the annual premium for SFY 2000-01 will remain constant for SFY 2001-02. In subsequent years, annual premiums will grow 12% per year.

Afternoon meeting, March 6, 2001

**JOINT APPROPRIATIONS SUBCOMMITTEE
ON HEALTH AND HUMAN SERVICES**

Room 424, Legislative Office Building

Tuesday, March 6, 2001

1:30 p. m

Minutes

After introductions of the pages, the Chair, Sen. Bill Martin, stated that some of the members have a conflict with the redistricting meeting and will possibly come in before this meeting is completed. He said that this meeting would deal with substance abuse, and recognized Karen Hammonds-Blanks to begin the overview of substance abuse. She began with Section 3 of the attached handout (Substances Abuse Services attachment #3, Page 73), which highlighted the problems of our state. There is an estimated 784,000 individuals in our state that need some type of substance abuse services. The national household survey is conducted every two years provides information on reported use of substances such as alcohol, tobacco, etc. The most recent report, 1999, indicated that approximately 15 million Americans use illegal drugs. She stated that this is a large program in the nation as well as the state. Approximately 67 million Americans reported that they use tobacco and an estimated 105 million consume alcohol. She also gave an analysis of the number of incarcerated individuals requiring substance abuse services. There is a reported increase in alcohol and drug use in North Carolina High Schools, which the drug of choice is marijuana. There is a decrease in alcohol use and an increase in marijuana use throughout the North Carolina middle school students. North Carolina rates high (#5) for use of tobacco by children ages 12 to 17. However, North Carolina does not have that same distinction for illegal drug use. She stated that there is an increase in the use of "club drugs". On page 74, she pointed out that during 1998, 72% of the 42,000 drug related arrests that occurred were juveniles less than eighteen years of age.

Karen also emphasized that the problems from health or medical care standpoint is also significant. She identified significant areas where untreated substance abuse can be found in state government as well as other areas and the associated costs.

"Changing the Conversation," a document put forth by the Federal Government through the Substance Abuse Mental Health Services Administration, through the Center for Substance Abuse Treatment (CSAT) advocates that there is a no wrong door policy. Access to treatment should occur regardless of the point of entry and that standards of care should be in place as well. The Department is using this philosophy as it relates to the child residential mental health treatment initiative.

The following questions were asked:

What is the source of the estimated 47% needing comprehensive substance abuse treatment shown on page 73.

The information is specific to North Carolina. Information was compiled from a phone survey by the State several years ago. This is not the most recent information.

What would be considered or defined as comprehensive treatment?

The committee agreed that there is no ideal substance abuse treatment situation in any part of the state, however some parts of the state are worse than others.

Before reviewing the responsibilities of the divisions, Karen Hammonds-Blanks stated that North Carolina ranked 38 in a study that was done several years ago in spending for substance abuse services. The amount of funds supporting this area has not grown significantly since that time. She gave the budget summary for this particular area; for this fiscal year the budget is approximately \$96 million.

The Mission of the Substance Abuse Section within the Division is to provide leadership, developmental organization to support to oversee the operation of the three alcohol and drug treatment centers as well as the local community program of system of services available at the local level. Specific areas within that section include institutional services, community services, regulatory unit, DWI Unit, Employee Assistance Program and some prevention initiative services. Karen gave an overview of the responsibilities of each unit.

The pie chart on page 81 of the handout is a budget summary for this particular area. This fiscal year's budget is approximately \$96 million. On page 82 is a comparison of how substance abuse compares to the two other disabilities service areas in State and federal appropriations. An explanation of the use of dollars for services is given on page 83. North Carolina spends very little on prevention however the substance abuse block grant is largely funded.

Among the questions and comments from the committee members are:

In addition to not being able to maintain a waiting list for requested substance abuse services, often there is small window of opportunity. If the services are not available when requested by the citizens then that is a lost opportunity therefore that compounds the problem further.

The Committee agreed that detoxification and follow-up services definitely need more attention. This is a crucial area.

Karen identified three specific initiatives for the committee's attention: 1) The Treatment Alternative Crime Task Program which is a model used across the country to target offenders who criminal behavior is directly related to drug use. It is based on a model that includes, among other things, frequent drug testing and a continuum of sanctioned treatment. It does not directly provide services, however it is a way of managing the system. There are twenty-three programs serving forty-three judicial districts in the state.

2) The NC Costa Works for Families Residential Initiative is a new initiative that the Legislature appropriated funds for during last Session. \$5 Million was appropriated from the TANF Block Grant last Session. The target population included Work-first Women and their children and it involves a comprehensive treatment strategy. Services include treatment, case management, employment and retention, childcare, safe housing and child mental health intervention.

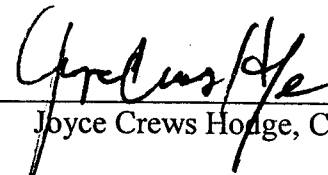

3) Managing Access for Juvenile Offenders Resources and Services (MAJORS) targets the population of 12 to 17 year old juvenile offenders that are at-risk for placement through residential treatment or juvenile detention or training schools. These are individuals returning to the community after having been in out of home placement and received clinical assessment. Currently there are twelve area programs covering 22 counties and the funding is a combination of dollars, most of which comes from TANF Block Grants. The majority of these funds are being recommended for elimination.

During committee discussion, the Chair stated that the Committee is definitely interested in the reasons for elimination of the funds for the MAJORS program. The Secretary stated that the stress of the TANF funds is caused by the increased and anticipated increased requirement for the cash assistance.

The meeting was adjourned.

William N. Martin, Chair

DIVISION OF MENTAL HEALTH/DEVELOPMENTAL
DISABILITIES/SUBSTANCE ABUSE SERVICES

BUDGET/PROGRAM OVERVIEW

Section II.

Fiscal Research Division

March 2001

Division of Mental Health/Developmental Disabilities/Substance Abuse Services

OLMSTEAD v. L.C.

What is Olmstead?

- 1999 U.S. Supreme Court Decision
- Originated in Georgia
- Claimed Discrimination Under the Federal Americans With Disabilities Act (ADA)
- Court Found that Placements Should be in Community Settings:
(1) Treatment Needs Dictate, (2) Individual Choice, and (3) Community Placement Contingent Upon State's Available Resources for Others with Disabilities
- Addressed Individuals with Mental Disabilities
- Reasonableness Standard
- Implications of Olmstead are Unclear

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

OLMSTEAD v. L.C.

How is North Carolina Responding to Olmstead?

"Development of the Olmstead Plan"

Components of North Carolina's Plan:

1. Outreach
2. Assessment and Identification
3. Transition Plans
4. Waiting Lists
5. Inventory of Existing Resources and Supports
6. Identification of Needed Community Resources to Support Integration
7. Monitoring and Quality Assurance

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

OLMSTEAD v. L.C.

How is North Carolina Responding to Olmstead?

NC's Olmstead Plan Includes Individuals Residing In:

- Nursing Facilities
- State & Private ICF/MR's
- State Psychiatric Hospitals
- State Child Residential Treatment Facilities
- NC Special Care Center
- Individuals At-Risk of Institutionalization

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

**DEVELOPMENTAL DISABILITIES
SERVICES**

DEVELOPMENTAL DISABILITIES SERVICES

The purpose of the Developmental Disabilities Section is to direct, manage and facilitate services and supports for individuals with developmental disabilities and their families. Services for persons with developmental disabilities are administered by the Division and operated by the thirty-nine (39) Area Programs or their contract agencies and the five state operated mental retardation centers.

What is a Developmental Disability?

A severe, chronic disability of a person which:

- is attributable to a mental /physical impairment or combination,
- is manifested before the age of 22 , unless the disability is caused by a traumatic head injury after age 22;

DEVELOPMENTAL DISABILITIES SERVICES

DEVELOPMENTAL DISABILITIES

- Results in substantial functional limitations in 3 or more of the following:
 - self-care
 - self-direction & self sufficiency
 - receptive & expressive language
 - mobility
 - capacity for independent living
 - learning, and
- Reflects the person's need for a combination or sequence of interdisciplinary or generic care, treatment, or other services which are of a lifelong or extended duration and are individually planned and coordinated; or
- When applied to children from birth through four years of age, may be evidenced as a developmental delay.

CONDITIONS WHICH CAN LEAD TO A DEVELOPMENTAL DISABILITY:

- Autism
- Cerebral Palsy
- Polio
- Spinal Cord Injury
- Severe Head Injury
- Severe Learning Disabilities
- Spina Bifida
- Congenital Heart Disease
- Sickle Cell Anemia
- Epilepsy
- Blindness
- Mental Retardation

DEVELOPMENTAL DISABILITIES SERVICES

SERVICES FOR PERSONS WITH DEVELOPMENTAL DISABILITIES

ARRAY OF SERVICE OPTIONS

Early Intervention Services

- Early Identification & Screening
- Multidisciplinary Assessment
- Services Include Respite, Speech Therapy, Other Special Therapies

Case Management

Day Services

- Community Inclusion
- Parent Training

Case Management

Vocational/Employment Services & Supports

- Supported Employment
- Sheltered Workshops

SERVICES TO MULTIPLY DIAGNOSED ADULTS

Services to Multiply Diagnosed Individuals (Mental Retardation & Mental Illness (Former Thomas S Court Mandated Program))

- ◆ FY99/00 Expenditures: \$92M
- ◆ Clients Served: 1,370
- ◆ 37% of Clients Cost in Excess of \$100K Per Year

HB 1840, Section 11.22 "Services to Multiply-Diagnosed Adults"

1. Medical Necessity
2. Utilization Review
3. Eliminate "Thomas S" Administrative Infrastructure
4. Implement Cost Reduction Strategies:
 - Preauthorization & State Review of Service Plans

DEVELOPMENTAL DISABILITIES SERVICES

Partners in Autism Treatment & Habitation Program (PATH)

- ▶ \$1.5M Appropriated During 2000 Session
- ▶ 8-Bed Residential Unit (2 Respite Beds) located at Murdoch Center in Butner
- ▶ 4-Bed Group Home in Oxford (Opens May 2001)
- ▶ Services to Children 6-16 Years Old

- ▶ Services Available: Array of Professional Services
- ▶ Treatment Model: Individualized Behavior Intervention
- ▶ Referrals: Mental Health Agencies Across the State
- ▶ Admission: InterAgency Council/Single Portal Committee
- ▶ Length of Stay: Short Term (Maximum 2 Years)

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

1. Organization & Staffing of Developmental Disabilities Section
2. Compliance With HB 1840, Section 11.22

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

1. Organization & Staffing of Developmental Disabilities Section
 - ▶ Section Staff Increased by 37 FTE's Since FY99/00
 - ▶ Section Maintains Functional Responsibilities (Centralized for Program/Service Sections)

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

2. Compliance With HB 1840, Section 11.22
 - ▶ Identify Savings Realized From Elimination of Program Administration and Infrastructure:
 - 1999 Special Provision Originally Mandated
 - 2000 Special Provision Mandated
 - No Progress To Date
 - ▶ State Review of (1) Individualized Service Plans for All Adults Served to Ensure that Service Plans Focus on Delivery of Appropriate Services Rather than Optimal Treatment and Habilitation Plans, and (2) Staffing Patterns of Residential Services:
 - State Review & Approval of Plans in Excess of \$100K
 - State Monitors a Sample of Other Plans

Joint Appropriations Subcommittee On Health and Human Services

Wednesday, March 7, 2001

8:30 A.M.

Room 643, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Wednesday, March 7, 2001, at 8:30 A.M. in Room 643 of the Legislative Office Building. Members present were Representative Edd Nye, presiding Chairman, Representative Beverly Earle, Co-Chairman, Representative Lanier Cansler, Representative Theresa Esposito, Representative Verla Insko, and Representative Thomas Wright. There were six senators present.

Representative Nye asked Carol Shaw with the Fiscal Research Division to continue her presentation from the handout of the last meeting, NC Health Choice Budget Overview. She started with page 16 of the handout, program eligibility and enrollment for children. To participate in this program a child has to be under the age of 19, ineligible for Medicaid, Medicare or other health care insurance, be a resident of the State, and be in a family with income at or below 200% of federal poverty level. Children of State employees are allowed to participate. Continuous eligibility is for a year. She reviewed other eligibility requirements. She explained how the enrollment cap works. Representative Esposito asked if the parent doesn't reenroll their child, does the child have to start again on the waiting list. Carol explained that was correct, they have to re-enroll each year to see if they are still eligible. A Department representative stated they sent out letters to all enrollees and explained the freeze, and what they have to do. Each card they have shows a date to re-enroll. Representative Esposito noted that was something they need to pay close attention to. Children who cannot participate are ones who have graduated from Medicaid and special needs children. Senator Martin asked for the number of children this included and Carol responded that were seven thousand children on a waiting list. They do not have a breakdown of these numbers. Senator Forrester asked for the ages of these children. A Department spokesman responded they do not.

Ms. Shaw continued by discussing the benefit package these children receive. It is equivalent to coverage provided to dependents of state employees. A program was set up for special needs children where money could be spent for services not normally covered under the State Employee Health Plan. Very little of this money has been spent because the State Employees Health Plan covers almost all the needs of these children. There are three benefits provided to children in NC Health Choice that are not provided under regular State Employee Health Package. These are dental care, vision care, and hearing services. She reviewed the benefits for special needs children. She pointed out that there

were concerns when the program first started that the program would not meet the needs of special needs children, but it is doing a very good job. Senator Martin referred to page 25 and asked what the long-term services referenced. She explained that long-term needs children would be covered under Medicaid or Medicare because they would look only at the child's income and not the parent's income. Senator Martin asked for a breakdown of the children on the waiting list by age, and graduation from Medicaid status, and special needs. Someone from the Department responded they would get the information. Representative Esposito asked if the list on page 22 included all the benefits for dependents under the North Carolina Health Choice. Ms. Shaw responded it did not include all the benefits. Representative Esposito asked for a list that includes all the benefits. Jack Walker, Director of State Health Plan, explained to Representative Esposito that he could furnish her a list, but it was in State statute under section 135.

Ms. Shaw discussed program issues. She highlighted the difference in regulations concerning families with incomes at or below 150% of federal poverty level, and families with incomes above 150% of the federal poverty level. She explained that under cost sharing under NC Health Choice, co-payments are paid directly to the service provider and reduce the cost of claims. Enrollment fees are paid directly to the county Department of Social Services and offset the cost of enrolling children. They overestimated how much would be collected from these fees because they thought 50% of the children would be above the 150% poverty level. The split has been about 70/30% meaning there is less money being collected for that purpose. Some counties are electing not to collect the money and still enroll children. The counties just lose that cost. Senator Martin expressed interest in the amount of the co-pay that goes for administrative cost. Representative Insko asked about enrollment date and Ms. Shaw explained that it was the date they sign up.

Senator Dannelly asked what the federal poverty level was. Ms. Shaw said it is a calculation that is done annually looking at what it cost for a family varying in size from one to eight to live. Page 19 shows the breakdown by family size for the present year. Senator Dannelly also wanted to know what was involved in enrolling a child each year. Ms. Shaw responded that there is a simple form to fill out to provide basic information on the family and income. This form has been simplified to what it used to be. The form is submitted by mail. Once the child is determined to be eligible, the enrollment fee has to be paid. At that time, a card will be issued.

Representative Cansler mentioned that when the program was started, the reason for the enrollment fee was to give the parents the opportunity to participate and feel a part of helping to pay for their children's health insurance. Ms. Shaw added there was concern about how to collect the money, so they decided to let the counties collect the money and use it to offset their cost.

Ms. Shaw continued on page 30 of the handout, and stated there was very high usage of the emergency room. This is much higher than children on the State Employee Health Plan, and higher even in some cases than Medicaid. This is due, in part, to parents not being used to having insurance, and being accustomed to going to the emergency room

prior to having the insurance. At least one third of use of the emergency room is for non-emergency use. Representative Insko asked about a primary care physician for these children. Ms. Shaw noted they are not assigned a primary care physician. Representative Wright requested information showing the breakout of the times and types of cases for these enrollees that are going to the emergency room, to determine if it is after 5:00 P.M. or before. He expressed there is a need to look at the situation and see if health departments or community health centers should stay open later hours. The cost would be lower than going to the emergency room. Staff responded that they would get that information for him. Senator Dannelly agreed with Representative Wright, and further stated that families at that income level could not afford to leave work during the day to take care of things during working hours. Representative Cansler wanted to know if the program was seeing an increase in emergency room visits. Mr. Walker explained that out of every 1000 children enrolled that pays the co-pay, 339 will visit the emergency room that year. This compares to 146 children out of 1000 in the State Employees Health Plan. The enrollee pays a \$20.00 co-pay, and the hospital charges the State, on average, \$459.00 for the visit.

Senator Purcell said Carolina Access was a good program because it assigns a primary physician and the patient has to call them before going to the emergency room. He stated this program is a good model for North Carolina Health Choice. Senator Kerr noted there were not enough primary care physicians. He suggested working with the private emergency care groups. Representative Insko asked for the number of patients per thousand that use the emergency for Medicaid. Ms. Shaw responded she would get that information. Representative Earle noted she thought they needed to redirect the mindset of these people that are going to the emergency room with situations that could probably wait until the next day. The Committee needs to look at this issue and maybe attach a charge.

Representative Nye adjourned the meeting at 10:00 A.M.

Joint Appropriations Subcommittee On Health and Human Services

Wednesday, March 14, 2001

8:30 A.M.

Room 643, Legislative Office Building

The Joint Appropriations subcommittee on Health and Human Services met on Wednesday, March 14, 2001, at 8:30 A.M. in Room 643 of the Legislative Office Building. Member present were Representative Edd Nye, Presiding Chairman, Representative Beverly Earle, Co-Chairman, Representative Lanier Cansler, Representative Verla Insko, and Representative Thomas Wright. Representative Theresa Esposito had an excused absence. There were six senators present.

Representative Nye introduced the Pages assisting with the meeting and then recognized Ms. Carol Shaw, Legislative Fiscal Research Division, to continue her presentation from the last meeting concerning North Carolina Health Choice. She continued speaking from the handout, NC Health Choice Budget Overviews, and began with page 32. She reviewed the advantages and disadvantages of cost sharing by counties.

She discussed the Enrollment Cap issue on page 34. North Carolina Health Choice program was established during the 1998 Special Session. The federal government had projected that just over 71,000 children would be eligible for the program. Approximately 130,000 children were identified, but it was believed that 60,000 of those were eligible for Medicaid. The Current Population Data, CPD, has not been a good data source, which is why there has been a higher enrollment, but that is what the federal government decided to use. Based on that data, the cost projections assumed that 90% of the children, about 64,000, would enroll in the program. Enrollment exceeded 64,000 in July of 2000 and was growing by 1500 to 2000 children per month. This shows that the projected 71,000 was too low, and that it could be as high as 100,000. Enrollment was frozen effective January 1, 2001 because the Department had to decide what to do, because the legislature would not allow them to spend any more money than was already appropriated.

Representative Cansler asked if there were children insured under other programs that were switching over to North Carolina Health Choice. Ms. Shaw referred him to page 21, program enrollment chart. There was a six months waiting period when the program was created, but it was changed to two months. Ms. June Milby, with the Department of Health and Human Resources, responded that the Schepps center did a survey of

enrollees. There were questions asking whether the children had previously had health insurance, what kind, and for how long. The estimate from the survey for a three-month period was .2% had dropped other insurance within the two-month period to go into the program.

Ms. Shaw stated many members had asked her what is needed to lift the enrollment freeze. There is a long waiting list of children that would like to participate in the program. Additional state appropriations will be required. An important question is "how much will lifting the enrollment freeze cost." The following factors affect the program: number of children enrolled; availability of state appropriations; annual, per child, premium cost; and availability of federal funds. She discussed the premium rates and also availability of federal funds, which are not controlled by the State. Senator Martin asked for the current number of enrollees. Ms. Shaw stated the enrollment as of March 1st was 68,520. It will drop monthly as families fail to enroll, or are no longer eligible. In comparison to other states, North Carolina has a high number of uninsured children and families at or below 200% of poverty.

Senator Martin asked how much additional appropriation in up coming fiscal year and 2002-2003 would the State have to make in order to draw down the maximum allotment. Ms. Shaw stated they were not close to spending the allotment. Senator Kerr noted Greene County's Medicaid cost sharing is going up from \$852,000 to \$1,300,000.

Ms. Shaw continued her presentation from page 44 of the handout. Based on projections, the NC Health Choice Program can serve 82,000 children annually through 2006-2007. She ended her discussion with reallocations and allotments. If there were more time to spend reallocations, money wouldn't be lost in allotments. After some discussion by members of the committee, Ms. Shaw ended her presentation.

Dr. Jack Walker, Executive Director State Employees' Health Plan, was introduced to address the effect of provider reimbursement changes to NC Health Choice of Children. (See Attachment I). Senator Martin asked Dr. Walker was there a state-by-state comparison in reference to the dispensing fee. A survey of what managed care companies are paying is that it is between \$1.50 and \$2.50. Senator Martin asked for a copy of the survey for the committee members. Senator Purcell asked for figures showing amount pharmacies need from dispensing fees to make their business viable comparing small pharmacies to chain pharmacies. Is \$1.50 a reasonable amount? The contractors being used have guaranteed the fee will be \$1.50. The courts will not allow the State to pay a higher fee to small pharmacies than it does to larger chain pharmacies. Representative Insko noted the big chains are more prevalent in more populated areas and independent pharmacies are located more in the rural areas. She expressed concern that if the independents have to close, how would people in the rural areas of the State get access to prescriptions. There was a discussion concerning the increase in the fee schedule.

The meeting was adjourned at 10:00 A.M.

DATE: March 7, 2001

SUBJECT: Effect of Provider Reimbursement Changes
to NC Health Choice for Children (CHIP)

For the next biennium (FY 2001-2003), health care provider reimbursement for CHIP could be reduced within the following range: \$9.15 million to \$20.34 million. The components of this reduction are:

	<u>Low Estimate</u>	<u>High Estimate</u>
In-patient Hospital	\$ 0.00 million	\$ 1.39 million
Out-patient Hospital	\$ 4.25	\$ 7.08
Physician	\$ 3.83	\$ 8.62
Vision Services	\$ 0.60	\$ 0.95
Mental Health Professional Services	\$ 0.29	\$ 0.53
Chiropractic Services	\$ 0.18	\$ 0.24
Dental Services	<u>\$ 0.00</u>	<u>\$ 1.53</u>
	\$ 9.15 million	\$20.34 million

In addition, pharmacy expenses could be reduced by lowering the pharmacy dispensing fee. Currently the Program pays for 300,000 prescriptions per year. Hence, if the fee were reduced from \$6/prescription to \$4/prescription, the two-year savings would be \$1.2 million, and if the fee were reduced to \$2, the savings would be \$2.4 million.

Should you wish to discuss this further, I will be happy to meet with you both.

cc: Sam Byrd

Estimated Medicaid cost for 2002 increases significantly

By J. HARRIS
Staff Writer

Although Medicaid costs for Greene County have risen significantly since 1995, the news the county received Friday was stunning.

"We are flabbergasted," said Greene County Manager Greg Martin. "We can't believe it."

Greene County received a recent memo from the North Carolina Department of Health and Human Services regarding the rate increase.

According to Martin, the estimated Medicaid cost to the county will increase from approximately \$852,000 for the current fiscal year, 2001, to \$1,249,052 for fiscal year 2002. That is approximately a \$400,000, or roughly a 46 percent, increase.

Martin did say that there had been significant increases in the past couple of years, but nothing like the increase for 2002.

"We have had significant increases over the years," said Martin, "but nothing like this." Martin provided a list of the county's Medicaid cost over the past seven years: 1995-\$458,754; 1996-\$516,410; 1997 \$623,265; 1998 \$647,512; 1999 \$680,385; 2000-\$829,732; 2001 \$852,000. Over this seven year period, the county's Medicaid cost also increased by roughly \$400,000.

What was approximately a \$400,000 increase over seven years has become a \$400,000 increase over one year.

While a spokesperson with the Greene County Department of Social Services was hesitant to give a specific reason for the dramatic increase, it was agreed that lower eligibility requirements to receive Medicaid benefits, which has meant more people enrolled and increased health-care costs have been the

Medicaid

Continued From Page 1

main contributors.

However, some specific information about the impact to Greene County was given by Martin.

According to Martin, the Medicaid increase would equate to over 6.5¢ increase on the property tax rate, given the penny generates approximately \$60,000 in county revenue. In other words it would take an extra \$0.065 to cover the increase. The county currently operates on a .85¢ per \$100 property tax.

Theoretically, the increase could be covered by an increase

in the property tax rate, but since the information is so new, the commissioners haven't had time to discuss any options.

Add to the problem Governor Easley's proposal to cancel Greene County's (and others) April 30 inventory tax payment, which would equate to approximately 2.5¢ of the property tax for this fiscal year, and the budget begins to tighten and wallets may begin to lighten.

In any case, there has not been enough time to discuss the new Medicaid increase or to pose possible solutions for the 2002 fiscal year, but one thing is almost a certainty: The money will have to be paid, and the money will come from someone's pocket.

Joint Appropriations Subcommittee On Health and Human Services

Wednesday, March 14, 2001

4:30 P.M.

Room 643, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Wednesday afternoon at 4:30 P.M. in Room 643 of the Legislative Office Building. Members present were Representative Edd Nye, presiding Chairman, Representative Beverly Earle, Co-Chairman, Representative Verla Insko, and Representative Thomas Wright. Representative Theresa Esposito had an excused absence. There were three senators present.

Representative Nye began the meeting by stating there was concern with the funding pattern of Dorothea Dix and asked Dr. Terry Stelle, Director of Dorothea Dix, to address the committee. Dr. Stelle discussed the death of a patient at Dorothea Dix. He gave an overview of how he thinks they have developed a failsafe system to prevent overdoses in the future. They have established a continuous quality medical improvement team to look into every aspect of medication administration from beginning to end to determine what some of their problems are. Up to fifty percent of patients that come into state hospitals have medical problems. He sees a problem with middle management in the hospital and the inability to move out some of them and replace them with more qualified managers at the same time. The current biggest problem continues to be nursing vacancies. Five hundred psychiatric beds have been lost in the State in the last year.

Senator Forrester noted medical errors have been overlooked and there needs to be a better way for them to be picked up. He also expressed concern with how they get by with such a low staffing pattern especially on weekends. The answer to the problem of getting and keeping nurses is to increase the salaries significantly to attract people to work there. Dr. Stelle explained they have a pool of nurses that they can draw upon when needed.

Rep. Nye asked if the pharmacist reports directly to Dr. Stelle. He was told the pharmacist reports directly to the clinical director who is a physician.

Senator Martin asked what triggers the use of outside consultants and is it on a contractual basis. Dr. Stelle explained they sometimes send people to UNC Memorial to get a consult.

Representative Nye asked if bed closings have had an impact on admissions at Dix. Dr. Stelle stated it is difficult to see a direct relationship. There has been a 35% increase in admissions over the last decade. In 1998-1999 there were 3,969 admissions and in 1999-2000 there were 5,184 admissions. That rate of increase is continuing which means at some point they will not be able to handle the increase.

Representative Insko asked if they could handle some of the vacancies within the existing budget if they had more flexibility from state personnel regulations. Dr. Stelle stated that the problem is on weekends and if they had the flexibility to do as hospitals are doing, they could fill a number of the vacancies. They can't compete at the present time.

Senator Martin asked what impact could the vacancies have on the operations of the facility such as accreditation and negative impact upon patients. Are the problems that result from nurse vacancies only on weekends or is it a problem in general. Dr. Stelle explained it is more pronounced on the weekends. That is where coverage is more difficult to find. Yes, they are concerned with accreditation.

Representative Nye ended the meeting by stating they would look at flexibility in the budget for Dorothea Dix because they had allowed some others to have it.

The meeting was adjourned at 5:35 PM.

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

**MINUTES
MARCH 15, 2001
8:30 A.M.**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Thursday, March 15, 2001, at 8:30 a.m. in Room 643 of the Legislative Office Building.

House Co-Chair, Representative Beverly Earle presided. Other House members present were:

**Representative Edd Nye, Co-Chair
Representative Lanier Cansler
Representative Verla Insko
Representative Thomas Wright**

Six Senate members were present.

Representative Beverly Earle, Co-Chair, opened the meeting by introducing the Pages, and introducing Karen Hammonds-Blank to discuss Child Development. She began by stating that the Smart Start Program is including in the Child Development Division, but that program will be covered at a later meeting.

The Division of Child Development

The Mission of the Division is **“To build a stronger and economic future for North Carolina by promoting high quality early childhood experiences.”** The mission is being accomplished by ensuring the health and safety of child care; providing child care assistance; improving the quality and availability of child care; coordinating head start collaboration; and parent outreach.

The Division of Child Development began in 1992, when the Governor and the Department decided to pull together all the different functions related to childcare.

To view the budget summary for the Division of Child Development as 12/31/00 for the FY 00/01 see page 3 of Attachment I.

Ms. Hammonds-Blank spoke briefly on the Regulatory Commissions for Child Care and for Social Services. (See Attachment I)

The Division of Child Care Development began major improvements with Senate Bill 929. This bill was titled "**An Act to Enhance and Improve Child Care in North Carolina.**"

The main purpose of this bill was to improve **quality**. It also began with the Star Rating System, which began on a limited basis in 1999.

Ms Hammonds-Blanks spoke in depth on the Child Care Subsidy Program. This program which provides financial assistance that meet the income eligibility. Last year, about 305 million dollars in state and federal funds were used for this program. It is state supervised by the Department of Social Services. See Attachment I for families that are eligible for child care subsidy.

The trends in children served in child care has grown tremendously. In 1992, 34,355 children were served spending 37 million dollars. In 2000, 183,532 children were served spending 305 million dollars. (See Attachment I) The waiting list has increased 100% from January 2000 to January 2001.

A question and answer session began at this time.

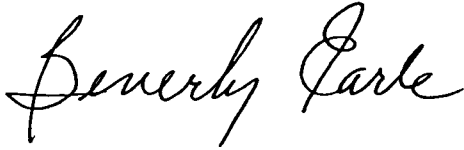

Senator Moore asked if there are guidelines as to who is chosen to participate in the program. Ms. Ball answer by stating that the county determines who is chosen. It is based on a priority list, it is not based on income. Child protective service and child welfare are high priority children. These children are placed first.

Senator Dannelly wanted to know the reason for the decline in numbers served in the last year with more money being funded. Ms. Hammonds-Blanks answered by the stating that the reason the number is showing a decrease is because a lot of children are being counted twice.

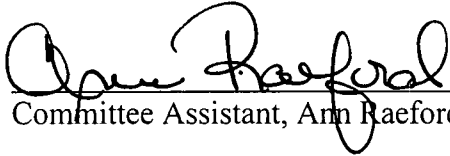

Representative Wright wanted to know if a better accounting system can be implemented to count the children once. He also wanted to know the reason for the drastic increase in the number of children served. Ms. Hammonds-Blanks replied by saying more are in the system because of Smart Start funding, and more money from the federal government. (TANF Block Grants)

Part two of this presentation entitled **Regulation/Licensure "Stare Rated Licenses"** will be continued at the next meeting. The meeting adjourned at 9:30 a.m.

Respectfully Submitted,

Presiding Co-Chair, Representative Beverly Earle

Committee Assistant, Ann Raeford

When Does Child Care Require Regulation ?

G.S. 110-91 Requires Regulation:

- When 3 or More (unrelated) Children are in Care for More Than 4 Hours Per Day (at least once a week)

Exemptions:

- Recreational Programs of < 4 consecutive months
- Specialized Activities Such as Athletics, Dance, or Organized Clubs for Children such as Boy Scouts, 4-H Groups or Boys and Girls Clubs

G.S. 110-106 Religious Sponsored

Programs:

- Religious Sponsored Programs Can Choose to Operate with a Notice of Compliance (no licensure)
- Certain Cooperative Arrangements Among Parents
- Public Schools
- Others

DIVISION OF CHILD DEVELOPMENT

LICENSURE/REGULATORY SERVICES

Facilities/Centers:

- Child Care Homes – Maximum of 5 Preschool Children (or up to 8 if 3 are school age children)
- Child Care Centers – More than 5 Preschool (the number is based upon various factors such as square footage)

Licensure:

- Non-expiring licenses (no annual renewal)
- Annual local inspections (if necessary)
- Compliance visits (annually for centers; random for homes)
- Unannounced visits to investigate complaints; monitor corrective action

Regulated Facilities/Centers: 9,425 (January 2001)

- Child Care Homes 5,490 (59%)
- Child Care Centers 3,935

HISTORY OF MARKET RATES & FUTURE IMPLICATIONS

- 1994 Market Rate Study  •Implemented Increase November 1994
- 1996 NO STUDY  •Implemented Increase October 1996
- 1997 Market Rate Study  •Implemented Increase October 1997
- 1999 NO STUDY  •Implemented Increase October 1999
•Implemented Quality Bonuses 1999
•Implemented Interim Increase
September 2000
- 2001 Market Rate Study  •Mandatory Rate Increase 2001
- MANDATORY STUDY**  •Mandatory Rate Increase 2002
•Mandatory Rate Increase 2003
•Mandatory Rate Increase 2005

DIVISION OF CHILD DEVELOPMENT

MANDATORY MARKET RATE INCREASE ISSUES

(G.S. 110-109)

- **Market Rate Increases Directly Impact Waiting Lists**
- **G.S. 110-109 Impacts General Assembly's Decision Making Regarding Increases**
- **Mandatory Increases Are Not the Norm in the DHHS Budget**

DIVISION OF CHILD DEVELOPMENT

LEANDRO QUESTIONS & ISSUES

WHAT IS LEANDRO ANYWAY?

- 2000 Ruling From NC Supreme Court Regarding Equity in Public School Education
- Raised the Issue of Pre-Kindergarten for Certain Children
- Final Ruling Pending

WHAT ARE THE IMPLICATIONS FOR N.C.?

- Potential Creation of Pre-Kindergarten Program for At-Risk 4 Year Olds
- Additional Resources Will Be Needed
- Unknown Impact on Public Schools
- Child Care Providers Will be Impacted

POLICY ISSUES

1. At-Risk Definition
2. Curriculum
3. Philosophical Debate (Development vs. Education)

DIVISION OF CHILD DEVELOPMENT

***SHOULD THE STATE IMPOSE LICENSURE
FEES ON CHILD CARE PROVIDERS?***

1. Licensure Costs
2. Many Providers are For-Profits
3. Demand Will Continue
4. Other States Charge Fees

**JOINT APPROPRIATIONS SUBCOMMITTEE
ON
HEALTH AND HUMAN SERVICES**

Room 643, LOB
Tuesday, March 20, 2001
3:30 p.m.
Minutes

The Joint Appropriations Subcommittee on Health and Human Services met Tuesday, March 20, 2001 at 8:30 a.m. in Room 424, Legislative Office Building. Five Senate Members and six House Members were present. Representative Esposito requested and excused absence. After introductions of Pages, and giving an update to the Committee schedule, Senator Bill Martin, presiding Chair called the meeting to order.

He recognized Carol Shaw to speak to the Division of Child Development. She spoke from the attached Division of Facility Services Handout (Attachment #1). She stated that this Division is the primary regulatory agency for the Department of Health and Human Resources. Regarding the budget, she stated that the authorized budget as of December 31, 2000 was just over \$30 million. \$13 million comes from receipts and \$17 million is the net appropriations. The final figures for 2002 and 2003 have not been obtained. The total staff is 406. State appropriations are nearly 56% of the budget, federal funds are 42.4% and that fees are a small portion of the budget. The fees for the Certificate of Need Program are deposited directly into the General Fund. Almost 71% of the budget goes to the regulation of facilities. The next largest amount is 15.7% for the Emergency Medical Service Program; Medical Facilities Management includes the Certificate of Need Program and State Health Facility Management. 7.7% of the budget goes to management and support of the Division. Included in the handout is a brief description of each of the programs, as well as basic information about the health care facilities. In summary the legislative highlights include several new positions have been authorized for this division, the poison control center received permanent funding and two programs have been transferred to other divisions of state government. The Mental Health Licensure and Certification Section was not included in the 1999 budget. New positions were created and transferred because of the generated interest.

During Committee discussion, several areas and issues of concern were expressed. On page 24 of the handout, regarding travel, would it be wise to have some people to work in other areas, the highly populated areas. Even if that is true, the idea of reducing travel might have to be addressed.

The fire protection revolving loan fund was created to provide assistance to owners of adult care homes, group homes and nursing homes with the purchase and installation of fire protection system. Generators were added to this program during last year because of the Hurricane Floyd power outages. To date nine facilities have requested and

received loans for installation of fire protection systems. At this time there is just over \$195,000 left in this fund. The Committee discussed the repayment process. North Carolina doesn't charge any fees to offset the cost of licensure and the regulation of the health and social care facilities. Fees are charged related to the Certificate of Need Program.

Any fees proposed by the Committee for this Division would require a separate bill because fee legislation cannot be included in the Appropriations Bill, it could be included in an independent separate fee bill. Because of this process any reduction resulting in state appropriations would be contingent upon the fee legislation becoming law.

The CON fees that go into regular General Fund was just over \$1.2 million last year and as been as high as \$1.7 million. It varies annually, depending on the applications. The fees are closely tracked and have always succeeded the cost of the program.

On page 16, substantiation of complaints increased from one third to one half in 2000, the committee inquired as to how many actual complaints do the nursing homes have and how many staff do they have looking at that. Linda McDaniel stated that there are 28 staff conducting complaint investigations. Five are located in the western part of the state (Black Mountain) the others are in Raleigh. There are some people from the Health Care Personnel registry located in Charlotte working out of their homes who would investigate complaints for the nurse aides. The Health Care Personnel Registry has 35 people and one major responsibility is to investigate complaints against nurse aides in all type health care facilities including nursing homes. The committee requested staff to get the number of complaints received during the past year.

Linda McDaniel stated that 1,916 complaints were received last year and 1,607 were received during the first nine months of this year. She stated that they are required to investigate all complaints. The committee suggested that there should be a screening process put in place before the state inspection teams come in to save dollars.

The Division of Facility Services travels 3.4 million miles annually and \$600 monthly per person. The committee asked if it would be more beneficial to have people working in the eastern part of the state. Linda McDaniel stated that there is a survey team located in the Charlotte area. The complication is because they work as teams and would need a single spot to complete reports and get together to travel to the facilities. They are willing to explore improvement of coverage across the state.

The committee requested information on possibilities that could reduce some of the travel, even if it is in conjunction of the programs in place, please think about ways that reduction of travel can be accomplished.

Representative Nye, Co-Chair, flagged the following areas:

- Fees;

- EMS Services breakdown as to the amount of grants and also where the money is going;

Carolina Medical Center of Poison Control;
Mental Health Licensure - check to see why the Governor needed to
increase the amount that the Legislature had included;
Duplication of inspections;

Senator Martin stated that the revolving fire protection loan fund has been in effect since 1996. Are there any pending applications?

Regarding the Emergency Medical Services Grants, Senator Martin requested discussion on the purpose for developing the regional system and to what extent that purpose has been fulfilled therefore suggesting whether or not it should be continue or modified.

Drexel Pratt, Chief of Office of Emergency Medical Services, stated that the regional grant program was established in 1980, which was developmental in purpose. The federal monies have since dropped and there is now \$544,000. That is used for local projects. One region developed information systems for call reporting for a five county system. For the most part it supplements positions and minor projects across the state. It does allow rural areas to purchase equipment however for the most part it is supplementing positions and minor projects. The original purpose was to fund equipment, personnel and communications. At that time there was a huge amount of federal money going into the fund that has now subsided.

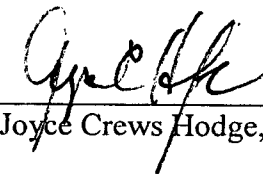

Carol Shaw stated that she would get the repayment process of the fire protection revolving loan.

Regarding the licensure fees, Senator martin asked would any fees paid be added back to the rate structure therefore canceling out the impact to the fees in the long run. Would the facilities seek reimbursement as a part of the rate structure? Carol Shaw stated that licensure fees would be included in indirect costs.

After giving a schedule update, the Chair adjourned the meeting at 5:15 p.m.

William N. Martin, Chair

Joyce Crews Hodge, Clerk

DEPARTMENT OF HEALTH AND HUMAN SERVICES

**DIVISION OF FACILITY SERVICES
BUDGET OVERVIEW**

**FISCAL RESEARCH DIVISION
MARCH 2001**

03/20/2001

DIVISION OF FACILITY SERVICES

MISSION

Provide for the health, safety, and well-being of individuals through effective regulatory and remedial activities including appropriate consultation and training opportunities and by improving access to health care delivery systems through the rational allocation of needed facilities and services.

DIVISION OF FACILITY SERVICES

2001-03 CONTINUATION BUDGET

Description	1999-00 Actual	2000-01 Authorized	2001-02 Recommended	2002-03 Recommended
Total Requirements	\$26,278,826	\$30,362,266		
Estimated Receipts	(\$12,106,748)	(\$13,232,509)		
Net Appropriation	\$14,843,026	\$17,129,757		
Total Number of Positions	403.7	406.3		

*Does not include CON fees that are deposited directly into the General Fund.

DIVISION OF FACILITY SERVICES

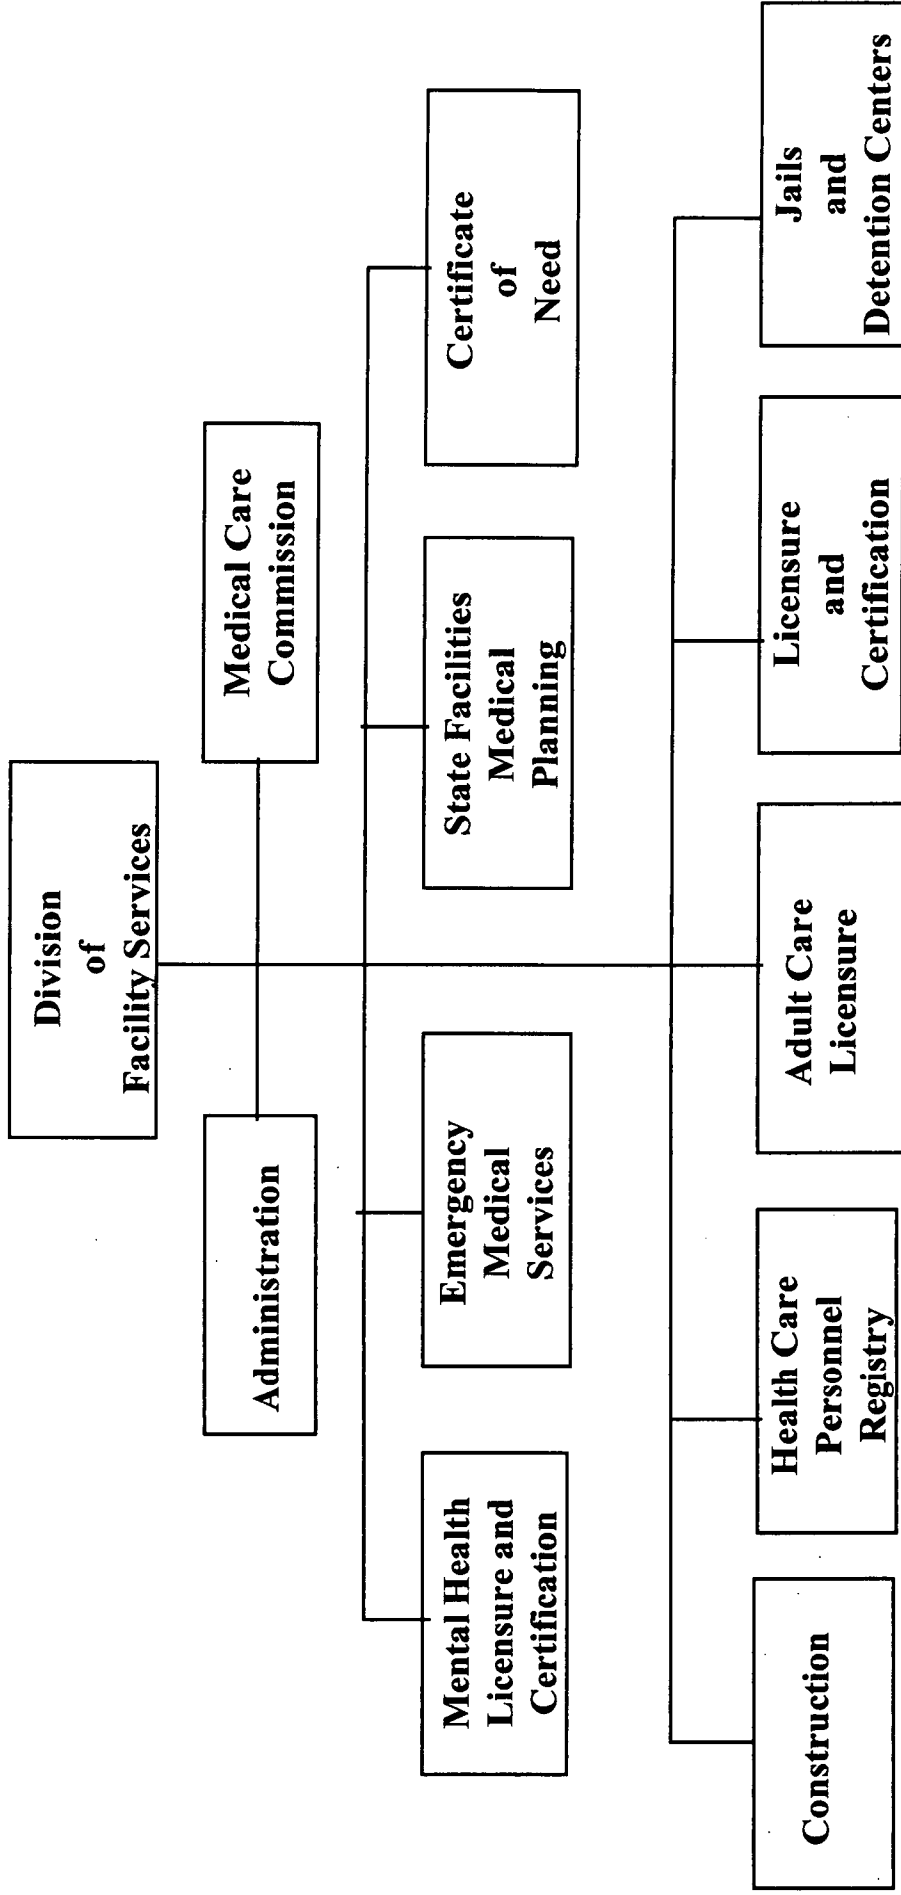

EXPENDITURES BY PURPOSE

2000-01 Authorized Budget

DIVISION OF FACILITY SERVICES

ORGANIZATION

Total Positions: 406.25

DIVISION OF FACILITY SERVICES

MAJOR PROGRAMS

State Medical Facilities Planning Section: Determines the degree of unmet need for health facilities throughout the state.

Certificate of Need Section: Restricts unnecessary increases in health care costs and limits unnecessary services and facilities based on geographic, demographic, and economic considerations.

Construction Section: Reviews plans and specifications, makes inspections, and provides consultation to ensure a safe environment in those facilities wishing to be licensed, certified or receive financial assistance.

Health Care Personnel Registry Section: Maintains a registry of nurse aides and other health care personnel and investigates alleged abuse, neglect, or misappropriation of resident's property in health and social care facilities.

Jail and Detention Section: Ensures compliance with NC statutes and administrative rules through inspection of all jails in North Carolina.

DIVISION OF FACILITY SERVICES

MAJOR PROGRAMS

Adult Care Licensure Section: Licenses and regulates adult care homes and provides supervision, consultation, training, and technical assistance to county departments of social services staff who regularly monitor the compliance status of the facilities in terms of rules and quality of services.

Licensure and Certification Section: Conducts surveys and complaint investigations in health care facilities. Manages and directs administrative services and quality assurance to ensure compliance with federal regulations for Medicare/Medicaid certification.

Medical Care Commission: Issues tax-exempt revenue bonds to nonprofit and public health care facilities for construction, renovation and expansion of facilities.

Emergency Medical Services Sections: Ensures all citizens have access to quality emergency medical care by providing technical assistance and regulatory oversight to all local EMS systems.

Mental Health Licensure and Certification Section: Inspects and licenses psychiatric hospitals and psychiatric units of acute care hospitals, intermediate care facilities for mental retarded (ICF-MR), and all other mental health group homes and treatment facilities.

DIVISION OF FACILITY SERVICES

MEDICAL CARE COMMISSION

- G. S. 143B-165
- 17 members appointed by the Governor
- 4-year Terms
- Quarterly meetings (minimum)
- Receives per diem, travel, and subsistence
- Administrative support provided by the Division of Facility Services
- Primary responsibilities include:
 - ✓ *Required* Promulgating rules and regulations for various health and social care facilities, and
 - ✓ Issuing bonds for the construction of health care facilities.

DIVISION OF FACILITY SERVICES

TOTAL	406.25	197.6	208.65

DIVISION OF FACILITY SERVICES

STAFFING LEVELS

Since 1999, the Division of Facility Services has gained 75.6 full time equivalent positions:

- 39 positions authorized by the General Assembly
 - ✓ 15 positions for Licensure and Certification
 - ✓ 15 positions for Mental Health Licensure
 - ✓ 7 positions for Adult Care Home Licensure
 - ✓ 2 positions for the Health Care Personnel Registry

- 31 positions authorized by the Executive Branch for the Governor's Mental Health Initiative:
 - ✓ 24 positions for Mental Health Licensure
 - ✓ 5 positions for Construction
 - ✓ 2 positions for Health Care Personnel Registry

DIVISION OF FACILITY SERVICES

STAFFING LEVELS

- 10.1 positions funded from increased federal funds:
 - ✓ 9.1 positions for Licensure and Certification
 - ✓ 1 position for Health Care Personnel Registry

- ³4.5 positions abolished or transferred to other departments;
 - ✓ 1.5 positions abolished in Licensure and Certification
 - ✓ 1 position abolished in Adult Care Home Licensure
 - ✓ 1 position transferred to the Department of Crime Control and Public Safety (Bingo Program)

DIVISION OF FACILITY SERVICES

ISSUES

- **Benefits of Staffing Increases**
- **Travel**
- **Cost Allocation**
- **Emergency Medical Services Grants**
- **Fire Protection Fund**
- **Fees**

DIVISION OF FACILITY SERVICES

BENEFITS OF STAFFING INCREASES

- Licensure and Certification Section:
 - ✓ All serious complaints are investigated within 10 days.
 - ✓ All life threatening complaints are investigated within 2 days.
 - ✓ Average number of days from complaint intake to investigation has been reduced from 60 days in 1999 to 29 days in 2000.
 - ✓ Complaint substantiation has increased from 32% in 1998 to 48% in 2000.

- Mental Health Licensure Section:
 - ✓ Projected 2,200 initial and routine inspections of facilities for SFY 2001.
 - ✓ Projected 340 complaint investigations for SFY 2001.

- Construction Section:
 - ✓ Plan review time has been reduced by one half (9 to 12 weeks).
 - ✓ Routine on-site physical plant investigations have increased from 50 in SFY 1999 to 955 projected in SFY 2001.

DIVISION OF FACILITY SERVICES

TRAVEL EXPENDITURES

Travel expenditures for SFY 2000-01 are over \$2,000,000 -- 6.6% of the Division's total budget.

- 275 regulatory staff who routinely travel -- 68% of the total positions in the Division.
 - ✓ Travel costs average \$600 per month per employee
 - ✓ Employees travel over 3,400,000 miles per year in NC
 - ✓ Extensive use of State vehicles (120 cars)
- Regulatory staff are primarily located in Raleigh or Black Mountain. Seven staff in the Health Care Personnel Registry Section work out of their homes.

DIVISION OF FACILITY SERVICES

COST ALLOCATION PROCESS

- Cost allocation is the process of charging a portion of the cost of positions to federal programs that derive a benefit from the activities of state funded positions.
- The federal programs charged by the Division of Facility Services include: *charge*
 - ✓ Medicare
 - ✓ Medicaid
 - ✓ Clinical Laboratory Inspection Act
 - ✓ Social Services Block Grant
- The federal government benefits from the regulatory activities of the Division of Facility Services because it protects the health and safety of Medicare and Medicaid beneficiaries living in or receiving services from health and social care facilities.

DIVISION OF FACILITY SERVICES

BENEFITS OF COST ALLOCATION

- The cost allocation process has the following benefits:
 - ✓ The need for state appropriation is reduced.
 - ✓ State appropriations can be used to draw down federal funds and increase the number of total positions in a program.
- The Division of Facility Services is already using cost allocation to cover the cost of 335 regulatory and administrative positions -- 82.5% of all its positions.
- The Governor's proposed budget recommends additional cost allocation in the Mental Health Licensure Section resulting in a cost savings of \$250,000.

DIVISION OF FACILITY SERVICES

EMERGENCY MEDICAL SERVICES GRANTS

- Since 1980, the Office of Emergency Medical Services (OEMS) has provided grant funds for the development of regional EMS systems statewide.
 - ✓ Funding level: \$544,937 State appropriations
 - ✓ Funding formula: 30% population, 15% total area, 15% total land area, and 40% number of counties in region
 - ✓ 18 Lead Regional Organizations receive the grants
 - ✓ Grants range from \$18,798 to \$63,875 for SFY 2000-01
- Use of regional grant funds is determined by Regional EMS Councils with oversight from OEMS. Funding is used as follows:
 - ✓ Purchase patient care equipment
 - ✓ Provide training programs for local EMS providers
 - ✓ Part-time EMS Planner positions
 - ✓ Compensation for Regional EMS Medical Director
 - ✓ Administrative support for Regional EMS Councils

DIVISION OF FACILITY SERVICES

FIRE PROTECTION REVOLVING LOAN FUND

- Provides assistance to owners of adult care homes, group homes for developmentally disabled adults, and nursing homes with the purchase and installation of fire protection systems and generators in existing and new facilities.
 - ✓ Established and funded in 1996
 - ✓ Original funding level \$1,000,000
 - ✓ Maximum loans ranged \$1.75 to \$6.00 per square foot
 - ✓ Interest rates ranged 3% to 6%
 - ✓ 9 facilities have received loans totaling \$591,842.
- \$200,000 was cut from the fund during 1999 Session *at Budget Cuts*
- Current fund balance is \$195,271.

DIVISION OF FACILITY SERVICES

LICENSURE FEES

How Does NC Compare To Other States?

- North Carolina does not charge any fees to offset the cost of licensure of health and social care facilities.
- North Carolina does charge fees for the Certificate of Need (CON) application process. While CON fees are deposited into the General Fund, the fees collected have exceeded the cost of the CON process since SFY 1995-96.
- At least ^{of 38} 34 states charge a licensure fee for one or more type of health care facility. Facilities charged licensure fees include hospitals, nursing homes, home care agencies, ambulatory surgical care facilities, hospice, and abortion clinics.

DIVISION OF FACILITY SERVICES

LICENSURE FEES

How Does DFS Compare to Other State Programs?

Many State programs charge licensure or regulatory fees to offset the cost of licensing and regulation:

- Structural Pest Control • Environmental Permitting
- Industry
 - Air Quality
- Plant Industry
 - Water Quality
- Elevator and Amusement
 - Marine Fisheries
- Device Inspection
 - Solid Waste
- Boiler Inspection
 - Radiation Protection
- Insurance Industry
 - Environmental Health
- Regulation

DIVISION OF FACILITY SERVICES

LICENSURE FEES

Implementation Issues

- What percentage of State appropriations for the Division of Facility Services should be offset by fees?
- How should fees be allocated among the various health and social care facilities licensed and regulated by the Division of Facility Services?
- How should the fee schedule be calculated?
- What administrative overhead is needed to collect fees?
- How much will the fee collection process cost?
- What will be the effective date for fee collection?

DIVISION OF FACILITY SERVICES

LICENSURE FEES

Legislative Issues

Licensure and regulatory fees for the Division of Facility Services will require legislation.

- Requires a separate bill because fee legislation cannot be included in the main Appropriation Bill.
- Authorizing legislation can be included in an omnibus fee bill that includes fees from various state agencies.
- Reduction in State appropriations are contingent upon the fee legislation becoming law.

JOINT APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

Wednesday, March 21, 2001

8:30 AM

Room 643 Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Wednesday, March 21, 2001, at 8:30 AM in Room 643 of the Legislative Office Building. Members present were Representative Edd Nye, Presiding Chairman, Representative Beverly Earle, Co-Chairman, Representative Lanier Cansler, Representative Debbie Clary, Representative Verla Insko, and Representative Thomas Wright. Representative Theresa Esposito had an excused absence. There were six senators present.

Representative Nye began the meeting by introducing the Pages assisting in the meeting. He then asked Susan Morgan, Fiscal Research Division Staff, to present information to the committee concerning the Division of Aging. (See Attachment I) The Division was established in 1977 by state law. The Division focuses on supporting services that will enable older adults in North Carolina to maintain their independence. They are responsible for administering, planning, and evaluating those programs established by the Older Americans Act, and also those programs that have been funded by the General Assembly.

The Division is broken up into four sections including Planning and Information, Service Operations Section, Elder Rights Section, and Budget and Information Systems Section. Based on 1999-2000 actual receipts the Division's budget is approximately \$67,312,848. Ninety-four percent of the budget is used for Community Based Services. She reviewed the new programs and initiatives listed on page seven of the handout. There are 17 Area Agencies on Aging located within the regional Councils of Government.

Senator Moore expressed concern that there are 116 sites in 64 counties with an average of 30 people per site and asked how many people are working at the sites to provide the care. Ms. Morgan explained the requirements are one staff member per six clients for Adult Day Care and for Adult Day Health Care it is one staff member for five clients.

Ms. Morgan continued by reviewing current issues and initiatives on page 27 of the handout. There are 6,637 people waiting for services. Senator Martin asked for the eligibility requirements. He was told an assessment is made as to if they need these services. There are percentages they look at listed on page 19 for eligibility. They are

not allowed to ask for assets or charge fees. They are allowed to ask to asked recipients to cost share and contribute to their services. Most everyone contributes something.

Representative Nye told the committee they could flag any issue they would like to come back to for more discussion later. The Committee then had a question and answer discussion concerning the presentation.

Ms. Morgan then reviewed the six current contracts listed on the handout titled "Current List of Contracts". (See Attachment II).

Representative Nye adjourned the meeting.

MINUTES

JOINT APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

MARCH 21, 2001

4:30 P.M.

The Joint Appropriations Subcommittee on Health and Human Services met on March 21, 2001 in the afternoon in Room 643 of the Legislative Office Building. Members present were Representative Edd Nye presiding Chairman, Representative Beverly Earle, Co-Chairman, Representative Billy Creech, and Representative Verla Insko. Representative Theresa Esposito had requested an excused absence. There were five senators present.

Representative Nye began the meeting by stating a flag would be put on AAA Funding and also for administrative cost. Karen Hammonds-Blanks, Fiscal Research Staff, was asked to continue with her presentation of Early Childhood Development from a previous meeting. Representative Insko asked why some counties have no waiting list while others have a fairly large waiting list. Ms. Hammonds-Blanks explained that one factor has to do with the size of the county and the number of children. The second factor has to do with Smart Start and the local Partnership's decision to put money in. Some do not want waiting list.

Ms. Hammonds-Blanks then reviewed licensure and regulation. She gave an overview of when a provider or facility has to have some regulation involved. Statute GS110-91 requires that if a facility or program has more than three children cared for at least four hours once a week, then regulation is required. The other area that the law speaks to is the religious sponsored programs. They can operate with a notice of compliance, which doesn't require the same kinds of permits. As of January of this year, there were 9,425 facilities regulated by the State. The majority are childcare homes. There are 4,000 childcare centers.

The presentation continued with a review of the star rated license. It is a voluntary system with a financial incentive. It is based on three areas; program standards, staff education level, and compliance history.

Ms. Hammonds-Blanks then discussed the TEACH Program. The purpose of this program is to increase the education levels of the childcare directors and teachers, and to encourage a better-trained and quality workforce. The ultimate goal is to reduce staff turnover. For this fiscal year the budget includes 2.8 million dollars. It operates by providing scholarships to individuals so they can increase their education. For fiscal year 1999-2000 a total of 4,400 scholarships were awarded to individuals. Representative Nye asked about the health insurance subsidy. Ms. Hammonds-Blanks responded that was also a program under TEACH and it provides that the state pay one third, the provider pay one third, and the employee pay one third of their health insurance premiums.

Representative Nye asked that the mandatory rate increase issue be flagged. Senator Kerr asked who is responsible for doing the rate study. Ms. Hammonds-Blanks stated it was done within the Department. Mr. Peter Leousis with the Department of Human Resources stated that last year they contracted with the Center for Urban Affairs and Community Services at NC State University to help with the market rate survey. They have compiled the results and are currently analyzing those and will produce the report that they are required to produce under the law later in the month. He is aware of some of the problems and will be coming back to the Committee with recommendations as to how they can adjust the problems.

Concerning the At Risk Pre K Program, Ms. Hammonds-Blanks noted there are three areas that need to be addressed. One is that the term itself is too broad. The Committee will need to better define what it means. The issue of the curriculum needs to be addressed. Also, another issue is the philosophical debate over what is educational and what is development. In childcare subsidy, there is over 40 million dollars being spent now on four year olds now. Representative Nye asked if the Department has discussed fees for the providers. Ms. Hammonds-Blanks responded that they have done some research, but wasn't sure how serious they have been in pursuing it. Representative Nye stated that they needed to make a determination to asked staff to come up with a fee schedule for licensed daycare providers. He stated the consensus seemed to be to asked staff to develop a fee schedule for the providers.

The meeting was then adjourned.

Division of Aging

Mission

The Division of Aging works to achieve successful aging for North Carolina's older population by providing a system of services, opportunities, and protective supports that include:

- *Supporting* home and community services to promote independence and self-sufficiency;
- *Promoting* opportunities for citizen involvement to allow seniors to contribute in civic affairs and public policymaking, and through volunteerism;
- *Ensuring* the rights and protections of older people for their social, health, and economic well-being; and
- *Preparing* younger generations to enjoy meaningful lives in their later years.

Division of Aging

Senior Tar Heel Legislature

- **Created by the General Assembly in 1993 for the purpose of:**
 - *Providing* information to older adults on the legislative process;
 - *Promoting* citizen involvement and advocacy concerning aging issues; and
 - *Assessing* the legislative needs of older citizens by convening a forum modeled after the N.C. General Assembly.

- **The Division of Aging budgeted \$14,000 for the Senior Tarheel Legislature in FY 00-01.**

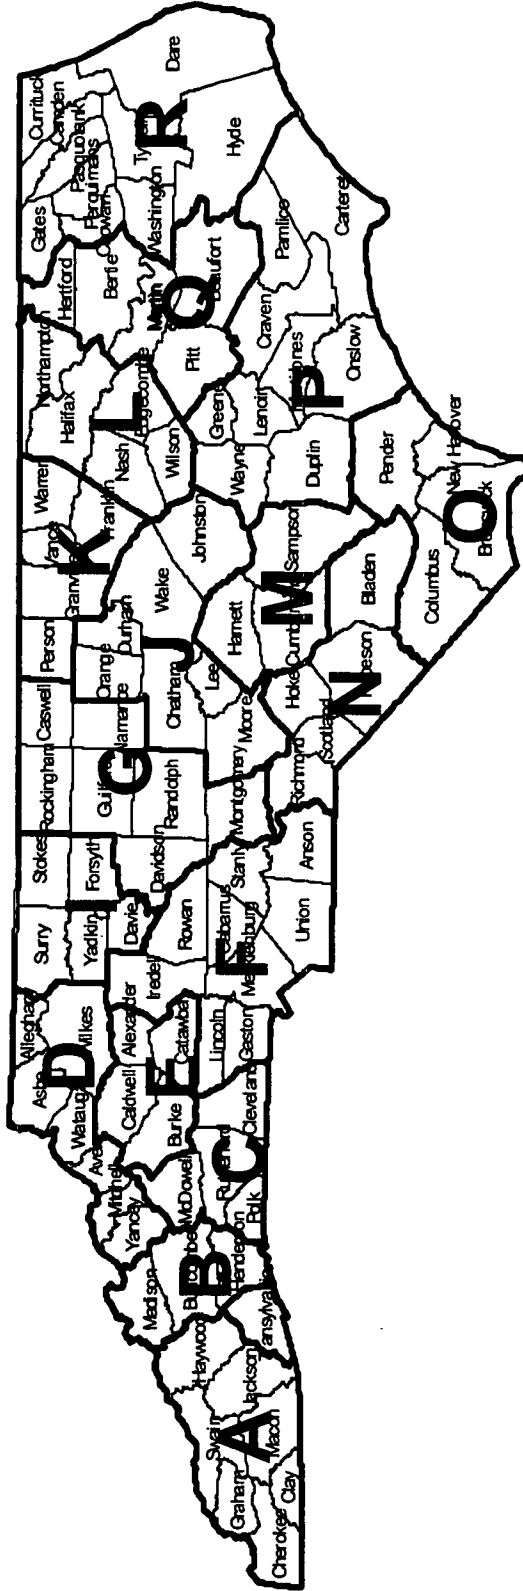

Division of Aging

Area Agencies on Aging (AAAs)

- North Carolina currently has 17 AAAs located within the regional Councils of Government.
- Established through the Older Americans Act amendments in 1973.
- Purpose: To facilitate and support the development of programs to address the needs of older adults within defined geographic regions.

Division of Aging

Regional Area Agencies on Aging

Division of Aging

AAA Planning and Administrative Funding

- Planning and Administrative (P+A) funds equal \$3,673,724 for FY 00-01 (consists of federal, state and local funding);
- In 1998 the General Assembly increased P+A funding to \$1.2 million – a recurring increase of \$900,000;
 - Expanded funding was to be used for enhancement of services, and to better meet the technical assistance and data needs of providers, local planning committees, and local governments.

Division of Aging

Division of Aging

Home and Community Care Block Grant (HCCBG)

- Implemented in 1992 for the purpose of improving the planning, management and coordination of in-home and community-based services for older North Carolinians.
- Combined state and federal funding previously allocated separately.
- County commissioners must designate a lead agency to develop a block grant funding plan.

Division of Aging

HCCBG Funding Plan

- The funding plan must identify services to be provided, the funding levels for services, unit costs, and the agencies designated to provide or purchase services on behalf of the county.
- The plan must be approved by the county commissioners, and a public hearing must be held.
- Upon approval, the plan is sent to the Division and AAAs for funding.

Division of Aging

Intra-state Funding Formula

- HCCBG funds are allocated to counties through the intrastate funding formula;
 - 60+ population (50%)
 - 60+ population in poverty (30%)
 - 60+ minority population (10%)
 - 60+ rural population (10%)
- Each county's funds are calculated and awarded through AAAs.
- A 10% local match is required.

Division of Aging

HCCBG Expenditures

Service Type	99-00 Expenditures	00-01 Allocations
Adult Day Services	\$ 2,844,834	\$ 2,982,470
Care Management	957,950	994,804

HCCBG Client Demographics

- 66,253 clients received services in 99-00;
- 63% were over age 75 (1 out of 5 were >age 85);
- 52% had incomes at or below 100% of the federal poverty level;
- 72% were female;
- 67% were Caucasian, 31% were African-American and 2% were other races;
- 16% were very frail; and
- 27% received more than one service

Division of Aging

Adult Day Services

- **Adult Day Care** – In a community group setting, an organized program of services are provided to support the personal independence of older adults and promote their social, physical, and emotional well-being.
- **Adult Day Health Care** – Provides the same services as Adult Day Care and provides additional health care services.

Division of Aging

Adult Day Services

- Currently, 116 centers are located in 64 counties.
 - 57 centers provide adult day care only;
 - 57 centers provide both adult day and adult day health services; and
 - 2 centers provide adult day health services only.
- 461 slots are subsidized through the State Adult Day Care Fund.
 - Cost per Adult Day Care slot = \$6,780/year (*Average annual cost per client = \$2,428/yr.*)
 - Cost per Adult Day Health slot = \$8,580/year (*Average annual cost per client = \$2,672/yr.*)

Division of Aging

Adult Day Services Funding

- Fiscal Year 00-01
 - State Funds = \$2,812,143
 - Federal Funds = \$2,760,499
 - Local Funds = \$710,869

11%

Total Funding = \$6,283,511

Division of Aging

Adult Day Services Participation Rates

September 2000, Survey Results:

Certified Capacity	Total = 1,662 slots	Range: Minimum = 6 Maximum = 72
Average Daily Participation	1,014 slots	Range: Minimum = 5 Maximum = 50
Occupancy Rate	Average = 61% Maximum Efficiency = 80%*	Range: Minimum = 18% Maximum = 100%

*North Carolina Adult Day Services Association recommended maximum efficiency rate.

Division of Aging

Family Caregiver Funds

- Established through the Reauthorization of the Older Americans Act in November, 2000.
- North Carolina received \$2,916,628 to develop a support system for family caregivers.
 - ✓ 5% can be used for State Administration;
 - ✓ Funds are to supplement, not supplant, existing services;
 - ✓ Up to 10% can be used to provide support services to grandparents and older individuals who are relative caregivers; and
 - ✓ The required non-Federal share is 25% (cash or in-kind).

Division of Aging

Plans for Family Caregiver Funds

- Work in partnership with AAAs with AAAs (AAAs will receive funds varying between \$65,614 to \$417,745);
- Build capacity within each AAA region to support the program (1 new position per AAA and 1 new position at the Division of Aging);
- Give priority to older adults with the greatest social and economic need, and older individuals caring for children with developmental disabilities; and
- Support caregivers through some combination of: information about services, assistance with access to service, individual counseling, organization of support groups and caregiving training, respite care, and supplemental services.

Division of Aging

Family Caregiver Program Goals:

- For the first three years of the program the Division has set the following statewide goals:
 - Establish adequate infrastructure at the AAA and State level to support the program;
 - Every region will have an Information and Assistance system;
 - Family caregivers in every county will have access to respite care, counseling and training;
 - AAAs and the Division will know the unmet needs of caregivers for planning and program development purposes; and
 - AAAs and the Division will have contributed significantly to helping the State implement recommendations of the IOM Task Force on Long-Term Care, including promotion of the availability of core services and the strengthening of local planning for aging and long term care.

HOUSE APPROPRIATIONS SUBCOMMITTEE N HEALTH AND HUMAN SERVICES

**Minutes
March 22, 2001
8:30 A.M.**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Thursday, March 22, 2001, in Room 643 of the Legislative Office Building.

House Co-Chair, Representative Edd Nye opened the meeting. Representative Beverly Earle, Co-Chair joined the meeting later and presided. Other members present were:

**Representative Beverly Earle, Co-Chair
Representative Lanier Cansler
Representative Debbie Clary
Representative Verla Insko
Representative Thomas Wright**

Six Senate members were present.

Pages were introduced and Lisa Hollowell, from the Fiscal Research Division. Ms Hollowell's presentation focused on **The Division of Public Health**. Her presentation will focus on the Mission of the division, a budget overview, the State Health Director's office, organization of the division and women and children's health. (Attachment II)

The Mission of the Public Health system is to **"Provide and contribute to the highest level of health possible for the people of North Carolina."** The essential health service under the Division of Public Health is health support, environmental health, and personal health.

The State Health Director is appointed by the Secretary of the Department of Health and Human Services to perform duties and exercise the authority assigned by the Secretary of the Department of Health and Human Services.

The Commission for Health Services develops rules and standards governing the nature and scope of public health services rendered by local health departments.

(To view budget information see page 10 of Attachment II.)

Ms. Hollowell continued her presentation which focused on Women's and Children's Health Services. The purpose is to promote and protect the health and development of families with an emphasis on women of childbearing age, infants, children and youth, and to focus on immunizations and nutrition services.

Women's and Children's Health Section Children & Youth Branch

Susan Morgan, Fiscal Research Division stated that the mission and purpose of the Women's and Children's Health Immunization Branch is to promote public health by reducing the spread of or eliminating vaccine-preventable diseases. The branch is responsible for management and control of vaccine-preventable diseases and disease outbreaks. (See Attachment I) The Division also has a supplemental nutrition program for women, infants and children. The purpose is to provide nutritious foods to eligible women, infants and children through coupons.

Infant Mortality

"What is the state doing to prevent infant mortality?"

There are several programs in place to help prevent infant mortality. Listed programs: Baby Love, Baby Love Plus, Certified Nurse Midwifery, High Risk Maternity Clinic and Perinatal Outreach and Education Training. Infant mortality is declining each year.

Intensive Home Visitation

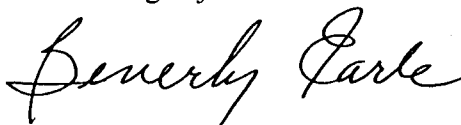

Intensive Home Visitation program is a series of home visits provided to pregnant women, mothers, and children to prevent problems before they occur. The objective is to reduce morbidity and mortality resulting from child abuse and neglect, to improve perinatal outcomes, enhance child and family development and prevent physical and mental health problems. The first year the program enrolled 435 families, through attrition...153 families remain in the program at the two-year point for families.

Adolescent Pregnancy Prevention Programs

North Carolina ranked 37th of all states in teen pregnancy rates (with one being the lowest). Adolescent pregnancy prevention programs received \$4,548, 678 in grant funds to local organizations for programs, which exist in 56 counties.

Question and comments were made at this time.

The meeting adjourned.

Presiding Co-Chair, Representative Beverly Earle

Ann Raeford, Committee Assistant

Highlights from last year...

- **“Prevention of Birth Defects” non-recurring funding appropriated in the 2000 session for the education and awareness activities on the importance of folate consumption preceding pregnancy to effectively prevent neural tube birth defects and infant mortality.**
\$150,000 – not included in the governor's budget
- **Birth Defects Monitoring Program was funded \$200,000 annually.**

Women's and Children's Health Section

Intensive Home Visitation –series of home visits provided to pregnant women, mothers, and children to prevent problems before they occur.

Eligibility:

- **Low-income, pregnant women and/or first time mothers and their families**

Objectives:

- **Reduce Morbidity and mortality resulting from child abuse and neglect**
- **Improve perinatal outcomes**
- **Enhance child and family development**
- **Prevent physical and mental health problems**

Women's and Children's Health Section

Intensive Home Visitation

1997 – General Assembly appropriated \$825,000 for Maternal Outreach Worker Program

1998 – Seven projects began the Intensive Home Visitation Program

1999 – Seven additional projects began IHV through Office of Juvenile Justice funding

1999 – General Assembly allowed \$945,000 to be used to match federal funds for the IHV program

2000 – General Assembly decided not to use Medicaid funds to expand program

Total Budget = \$1,425,000 annually – HHS and Office of Juvenile Justice funding

Women's and Children's Health Section

Intensive Home Visitation

First year program enrolled 435 families, through attrition... 153 families remain in the program at the two year point for families.

No output information since families may or may not complete the interview/survey administered at the beginning and upon leaving the program.

Total families served: 872 (Report 2001)

298 families left program = 582 families (Report 2001)

➤ Approximately \$1,000,000 has been spent on the evaluation of this program to date, over a four year period.

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

**MINUTES
MARCH 26, 2001
3:00 P.M.**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations subcommittee on Monday, March 26, 2001, in Room 643 of the Legislative Office Building. The following members were present: **Representative Edd Nye, Co-Chair, Representative Verla Insko, and Representative Therease Esposito.**

Three Senate members present.

House Co-Chair, Representative Beverly Earle opened the meeting by introducing the Pages and Lisa Hollowell to finish her presentation from the Division of Public Health.

Ms. Hollowell begin her presentation with an overview of the total budget for 2000.

Human Ecology and Epidemiology – 16%

Health Promotion and Disease Prevention – 11%

Oral Health – 1%

Local Health Services – 2%

Women's and Children's Health Section – 70%

200M is for nutritional services which is voucher payment to recipients.

(See Attachment II)

Health Promotion and Disease Prevention

The Mission for Health Promotion and Disease Prevention is to develop and implement effective strategies to prevent, detect and control chronic diseased, cancer and diabetes. Some of the activities that are preformed under the Health Promotion and Disease Prevention Section include: Professional and public education to improve the ability of communities to prevent, detect or control chronic disease, to provide funding for communities to conduct chronic disease screening, diagnosis and treatment services, collaborate with communities to foster chronic disease control through advisory councils and coalitions, and to promote partnerships to deliver high quality chronic disease services.

Diabetes Branch

The purpose is to reduce the burden of diabetes through education, clinical interventions and surveillance activities through contractual arrangements with ECU School of Medicine, Commission on Indian Affairs, Community Colleges, Health Centers and others.

Cancer Control Branch

Breast and Cervical Cancer control program is to screen and follow-up service for the early detection of breast and cervical cancer. The funds are provided to local health departments.

Health Promotion Branch

To provide physical and nutrition (by 2003) to increase to 30% the proportion of adults 18 and older who consume at least five servings of fruits and vegetables and who engage in moderate physical activity for 30 minutes daily.

Tobacco Prevention

To prevent initiation of smoking, eliminate exposure to 2nd hand smoke, quit smoking among adults, and eliminate race disparities of smokers.

Forensic Test for Alcohol Branch

To reduce death, injuries and health care cost by drunken drivers.

Older Adults Branch

The purpose is to promote the health and quality of life of North Carolina's older adults through encouraging healthy behaviors, reducing, the risk of chronic diseases, maintain and improve the function among impaired older adults.

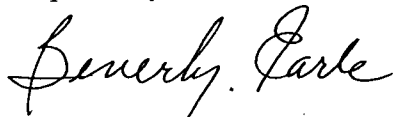

Office of Minority Health

Their purpose is to bridge the health status gap between minorities and the general population by advocating for policies and programs that improve access to public health services for racial/ethnic populations in the state. A budget overview can be viewed on page 35 of Attachment II.

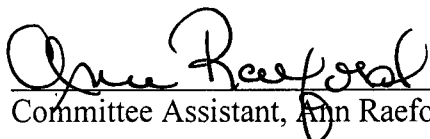

Question and comments were discussed at this time.

The meeting adjourned.

Respectfully submitted,

Presiding Co-Chair, Representative Beverly Earle

Committee Assistant, Ann Raeford

**JOINT APPROPRIATIONS SUBCOMMITTEE
ON
HEALTH AND HUMAN SERVICES**

Room 643, LOB
Tuesday, March 27, 2001
8:30 a.m.
Minutes

The Joint Appropriations Subcommittee on Health and Human Services met Tuesday, March 27, 2001 in Room 643 of the Legislative Office Building. After introduction of the pages, Senator Bill Martin called the meeting to order and recognized Lisa Hollowell to complete the presentation on the Division of Public Health.

She reviewed the mission and purpose of each branch of the division and continued with an overview of the budget information beginning on page 2, the section for Human Ecology and Epidemiology, which makes up approximately 16% of the total budget for the Division of Public Health. Listed on page 3 is the number of employees for each section as well as the budget. Women and children's health has the largest budget however due to the fact that 65% of the budget is the Women Infant and Children Supplemental (WIC) Program it does not have the largest number of employees.

The actual budget information for year 2000 and the authorized information for 2000-2001 information as of December 30, 2000 and the proposed amount included in the Governor's budget was discussed. The total number of employees for the proposed budget included (1025) is an approximate number. The exact information can be obtained from the division.

Regarding the section for Human Ecology and Epidemiology the total budget is \$72 million and a total of 532 employees or FTEs. They work to understand the causes and effect of contagious diseases in a community. Forty-five percent of the funding is state funding. Three branches, the Office of Medical Examiner, the State Lab and the Center for Informatics and Statistics were added this year. Fifty-four percent of the budget goes to the HIV/STD Control branch, the largest branch.

The proposed budget for 2002 for the General Communicable Disease Control Branch is \$7 million plus. Approximately \$4 million goes out to local health departments to aid in the control of the spread of communicable disease at the local level.

As of December 1999, there are approximately 10 to 12 thousand individuals living with Aids. The HIV/STD Prevention and care branch has a proposed budget of \$39 million. There is also a grant program for non-traditional counseling, testing and referrals after hours. Since 1984, to date there have been 19,000 cases of aids; 6,000 individuals have died from aids. Since 1996, there appears to be a decrease in the number of cases reported annually. However, due to confidentiality in reporting and testing, this number maybe skewed. The Center for Disease Control estimates that approximately two thirds of individuals living with Aids have been confidentially tested, which means that the prevalence of Aids in North Carolina could be higher than what is shown.

During committee discussion, the following questions were asked:

What reporting criteria are used for confidentiality testing for and reporting of individuals with HIV/STDs. Even though the State requires labs to report confidential testing, people are often tested in other states. The Center for Disease Control identifies two-thirds of the individuals tested are tested, as confidentially, therefore those cases are not included in the reports.

Dr. Dennis McBride, State Health Director, stated that even though confidential testing requires labs to report to the state, Sexually Transmitted Diseases are under reported.

There was discussion regarding the policy for HIV testing of pregnant women in the state. The committee requested the number of HIV pregnancy cases in the state.

Regarding the figures on page 14, the committee asked how many persons are actually included in the 65.1%. That is 65.1 cases per 100,000 general population; 72% of all new cases being reported. Those are the rates, per 100,000 general populations. Over fifty percent of all cases are minorities.

The eligibility to participate in the AIDS/Drug Assistance program is one must meet the federal poverty level of 125 per cent. That is the lowest nation. Surrounding states have higher eligibility criteria than North Carolina. 2,600 individuals were authorized participants for this program in FY 2000. Of that number approximately 70 per cent actually utilized the program (1,800 individuals). The cost per client in FY 2000 was approximately \$1,100 per month per client and \$14,000 annually. The total amount spent for the program for FY 2000 was over \$9 million. The program took a \$3 million non-recurring budget cut for FY 2001. That was partly due to the increase of federal funds received and also under utilization of the program, however the level of under utilization is decreasing.

In reference to the cost per client, and the total amount being spent for the Fiscal year, the Committee requested information on how North Carolina compares to other states. Staff will get that information as well as an assessment of whether we are doing better or worse than comparable states and also in terms of persons covered. The Committee also requested comparative information on bordering and similar states. The Chair stated that the Committee should look at the annualized cost rather than the start-up.

Regarding incarcerated persons, the Department of Corrections facility provides medication and health care. Testing is informed consent and individuals are encouraged to utilize the testing process, however they have to agree to the testing. It would be a violation of NC law to mandate testing for incarcerated individuals.

At the request of the Committee, Dr. McBride gave a brief scientific background and pathos-physiological description of the disease.

Dr. McBride also stated that the state lab has a very important function in public health. Information regarding new emerging conditions is shared from the state lab.

The meeting recessed until 3:30 this afternoon.

Afternoon meeting

Tuesday, March 27, 2001

3:50 p.m.

Minutes

The Joint Appropriations Subcommittee on Health and Human Services met in Rom 643 of the Legislative Office Building Tuesday, March 27 at 3:50 p.m. Senator Martin called the meeting to order and stated that the Oral Health would be discussed during this meeting. He recognized Lisa Hollowell to continue with Oral Health and Local Health Services. These two sections comprise approximately three per cent of the entire budget for the Division Public Health. Beginning on page 4, she continued with the attached handout.

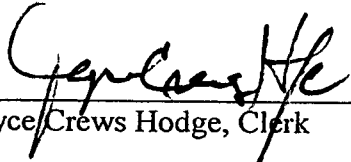

She stated that there are approximately fifty dental hygienists that provide education and primary prevention services to school aged children. They work primarily with kindergarteners and fifth graders in screening as well as providing the education. The hygienists are regionally located throughout the state.

Regarding the office of Rural Health, there is a loan repayment program for physicians and dentists. During the year 2000, two hundred forty-three physicians and dentists were placed of which thirty-five are dentists and one dental hygienist. This is a four-year commitment and the average loan repayment program for dentists is approximately \$32,000. The loan repayment program seems to be more workable that scholarships in getting dental care in the targeted areas.

The superintendents and principals in the county are consulted regarding the optional mouth wash (SWISH) program. Kindergarten students do not participate in the fluoride wash program. The programs include students in grades 1 through 6. Eighty-nine per cent of the water systems are currently being fluorinated.

After committee discussion, the meeting was adjourned.

\$409M

Division of Public Health

Oral Health

2002 Proposed Budget	\$5,711,567
Receipts	\$579,651
State Appropriations	\$5,131,916

The goal of Oral Health is to promote conditions in which all North Carolina citizens can achieve optimal oral health. Oral Health is working towards a decay-free generation of North Carolina children.

Oral Health Staff

- 6 Dentist Supervisors
- 4 Field Dentists
- 54 Hygienists
- Administrative Staff

Oral Health

What is the state doing to improve oral health in North Carolina?

- State Dental Hygienists
 - Smart Smiles Demonstration Effort
 - Office of Rural Health - Loan repayment programs for physicians and dentists – FY2000-2001– 243 total placements of which 35 are dentists and 1 dental hygienist. *4 year commitment pay after service*
- Typically, this is four year commitment. Average loan repayment is \$32,000 for dentists.

Oral Health – Services Branch – Client Count

Education of children and adults	274,058	Oral health assessment, referrals & follow-up; education, promotion & fluoride mouthrinse.
Assessments and Screenings	214,545	
Flouride Mouthrinse	256,346	
Sealants	1,662 (about 4 each)	Provided by Hygienists and supervised by Field Clinical Dentists

Oral Health Opportunities

- Four Dentist Positions

Local Health Services

Total Requirements	\$7,347,551
Receipts	\$580,083
Net Appropriation	\$6,767,468
***Aid to Counties	\$5M

***Chief of Local Health Services is contract position

Local Public Health Services GS 130A

- County must provide public health services either directly through a county health department, participate in a district health department, or contract with the state for provision of these services
- Governed by a local Board of Health
- 86 Health Departments
- 7 District and 79 single-county departments.

Local Health Services

Local Health Departments - Service Availability

- Approx. 51% of counties report operating more than 40 hours/week
- Seven counties offer weekend services
- 81% provide vision and hearing screenings
- 70% provide dental screening and referral
- 45% provide sealant applications
- 38% provide dental treatment

Local Health Services

Activities

- Administrative Consultation Services
- Support Healthy Carolinians
- Architectural Consultation Services for local health departments

Local Health Services

Healthy Carolinians

- 80 counties - \$10,000 grants – (\$800,000 of \$1M nonrecurring funds)
- Mini-grant program for local Healthy Carolinians to address health disparities among minorities.
- Other Funding for some Healthy Carolinians programs
 - Approximately 6 Office of Minority Health mini-grant (\$5,000 - \$10,000) programs were through the local Healthy Carolinians effort.
 - Mini grants (\$5,000) for local fitness councils may also be part of Healthy Carolinians (12 sites)

Local Health Services

Office of Public Health Nursing Professional Development

- \$1M budget
- Net appropriation approx. \$814,000
- Staff of 12 individuals
 - 1 Director
 - 4 Nurse Consultants
 - 4 Administrative Consultants
 - 3 other administrative positions
- Nursing staff provide consultation and technical assistance on nursing practice and standards and policies and procedures which cross programmatic boundaries
- Administrative Consultants provide general administrative consultation, advise on policy development and assist with the board relations.

Local Health Services Contract

- UNC – Ch School of Public Health, Institute for Public Health
- \$437,239 – Total
 - Base Amount \$33,380
 - \$199,809 – Public Health Training and Information Network
 - \$149,050 Enhanced Role Nurse Education
 - \$25,000 Introduction Course - Public Health
 - \$30,000 Leadership Institute – assures 10 seats

Local Health Services
Issues/Opportunities

Joint Appropriations Subcommittee On Health and Human Services

Wednesday, March 28, 2001

8:30 A.M.

Room 643, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Wednesday, March 28, 2001 at 8:30 A.M. in Room 643 of the Legislative Office Building. Members present were: Representative Edd Nye, presiding Chairman, Representative Beverly Earle, Co-Chairman, Representative Lanier Cansler, Representative Walter Church, Representative Theresa Esposito, Representative Verla Insko, and Representative Thomas Wright. There were six senators present.

Representative Nye began the meeting by introducing the Pages assisting with the meeting. Karen Hammonds-Blanks was asked to discuss the Mental Health report. See Handout titled Division of Mental Health/Developmental Disabilities/Substance Abuse Services). This is a budget and program overview. The Mental Health Division is the largest department within Health and Human Services in terms of employees and is the third largest in terms of its budget. The majority of dollars are allocated for institutional purposes at 53% of the budget. The community programs are 42% of the budget, and administration is almost 5%. Highlights of legislative/budget actions were reviewed. Representative Wright asked for a flag to be placed for future discussion concerning substance abuse. Senator Kerr expressed concern that brain injury clients were being served and asked that Traumatic Brain Injury be flagged for future discussion.

Ms. Hammonds-Blanks reviewed the four state psychiatric hospitals listed on pages 25 and 26 of the handout. Senator Martin asked if there is information showing increase of persons served in community settings. Mike Watson, Area Mental Health Director, responded that across the State, over the last two or three years, they have closed local psychiatric beds due to lack for money for indigent care. Representative Insko stated it would be helpful to know the amount of money being put into institutional care versus amount being put into community care. Representative Nye stated that it cost \$120,000 per patient, per year for institutional care. The cost for community care varies because it depends on which services are being used. Senator Moore asked for a better understanding of NC Special Care Facility and also where does Western Carolina Center budget fall within the entire department. Senator Moore asked staff to get him more information concerning NC Special Care Facility. The Committee had further discussion concerning institutions and community programs.

The meeting was adjourned at 9:45 A.M.

Edd Nye
Representative Edd Nye, Co-Chairman

Jo Bobbitt
Jo Bobbitt, Committee Assistant

Minutes

Joint Appropriations Subcommittee On Health and Human Services

Wednesday, March 28, 2001

4:50 P.M.

Room 643, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Wednesday, March 28, 2001 at 4:50 P.M. in Room 643 of the Legislative Office Building. Members present were: Representative Edd Nye, Co- Chairman. There were six senators present.

Senator Bill Martin, Co-Chairman, presided. The Committee had a discussion concerning the budget cuts they were going to be required to make. There was concern about the length of time it was taking. Senator Martin stated the co-chairs would get with staff and look into working things out without a full overview.

Karen Hammonds-Blanks, Fiscal Research Staff, continued her presentation on page 30 of the handout of the morning meeting. The NC Special Care Facility in Wilson provides nursing level care to former state psychiatric hospital patients. Pages 31 and 32 show a brief overview of the schools for children. The Whitaker School is for emotionally disturbed youth that are referred from Area Mental Health Programs. The Wright School provides residential treatment to behaviorally and emotionally disturbed youth from six to 13 years old.

Ms. Hammonds-Blanks then did a presentation on Child and Family Mental Health Services, (See Attachment). One in five children and adolescents have serious unmet mental health needs in the United States. There are five percent, or approximately 173-208 thousand children under 18 years with serious emotional disturbances in North Carolina. She stated that there had been a lack of priority given to target populations mandated in 2000 session law, Section 11.19, for children who are deaf, sexually aggressive youth, and substance abusers. She recommended the Department give some direction to follow through with the law. She recommended to the Committee to require the Department to conduct a "need" assessment to see how services at Wright and Whitaker Schools can best be met, whether in the community or the facility in Greensboro. Some planning time is necessary.

Representative Nye referred to Page 41, item number two. He expressed concern with why the 8 million that was appropriated for this wasn't used. The Department stated they had not gotten to do it. Representative Nye expressed his concern that the Department had not done as the legislature had requested. Senator Kerr expressed his concern as well. Representative Nye asked that the issue be flagged.

The meeting was adjourned at 6:00 P.M.

Senator Bill Martin, Presiding Chairman

Jo Bobbitt
Jo Bobbitt, Committee Assistant

BUDGET/PROGRAM OVERVIEW

Fiscal Research Division

March 2001

Division of Mental Health/Developmental Disabilities/Substance Abuse Services

Mission

The Mission of the Division of Mental Health, Developmental Disabilities and Substance Abuse Services is...to enable North Carolina's most vulnerable and disabled persons with mental, developmental and substance abuse problems to exercise their rights and responsibilities as citizens.

§ Policy (G.S. Section 122C-2)

The policy of the State is to assist individuals with mental illness, developmental disabilities, and substance abuse problems in ways consistent with the dignity, rights, and responsibilities of all North Carolina citizens. Within available resources, it is the obligation of the State and local government to provide services to eliminate, reduce, or prevent the disabling effects of mental illness, developmental disabilities, and substance abuse through a service delivery system designed to meet the needs of clients in the least restrictive available setting, if the least restrictive setting is therapeutically most appropriate, and to maximize their quality of life.

MENTAL HEALTH SERVICES

MISSION:

To promote the development of services for adults with severe and persistent mental illness and seriously emotionally disturbed minors through supervision of state mental health institutions, policy guidance, special grant initiatives and advocacy within the Division, the Department of Health and Human Services and other departments and offices of state government.

What Is Mental Illness and Who Is Disabled?

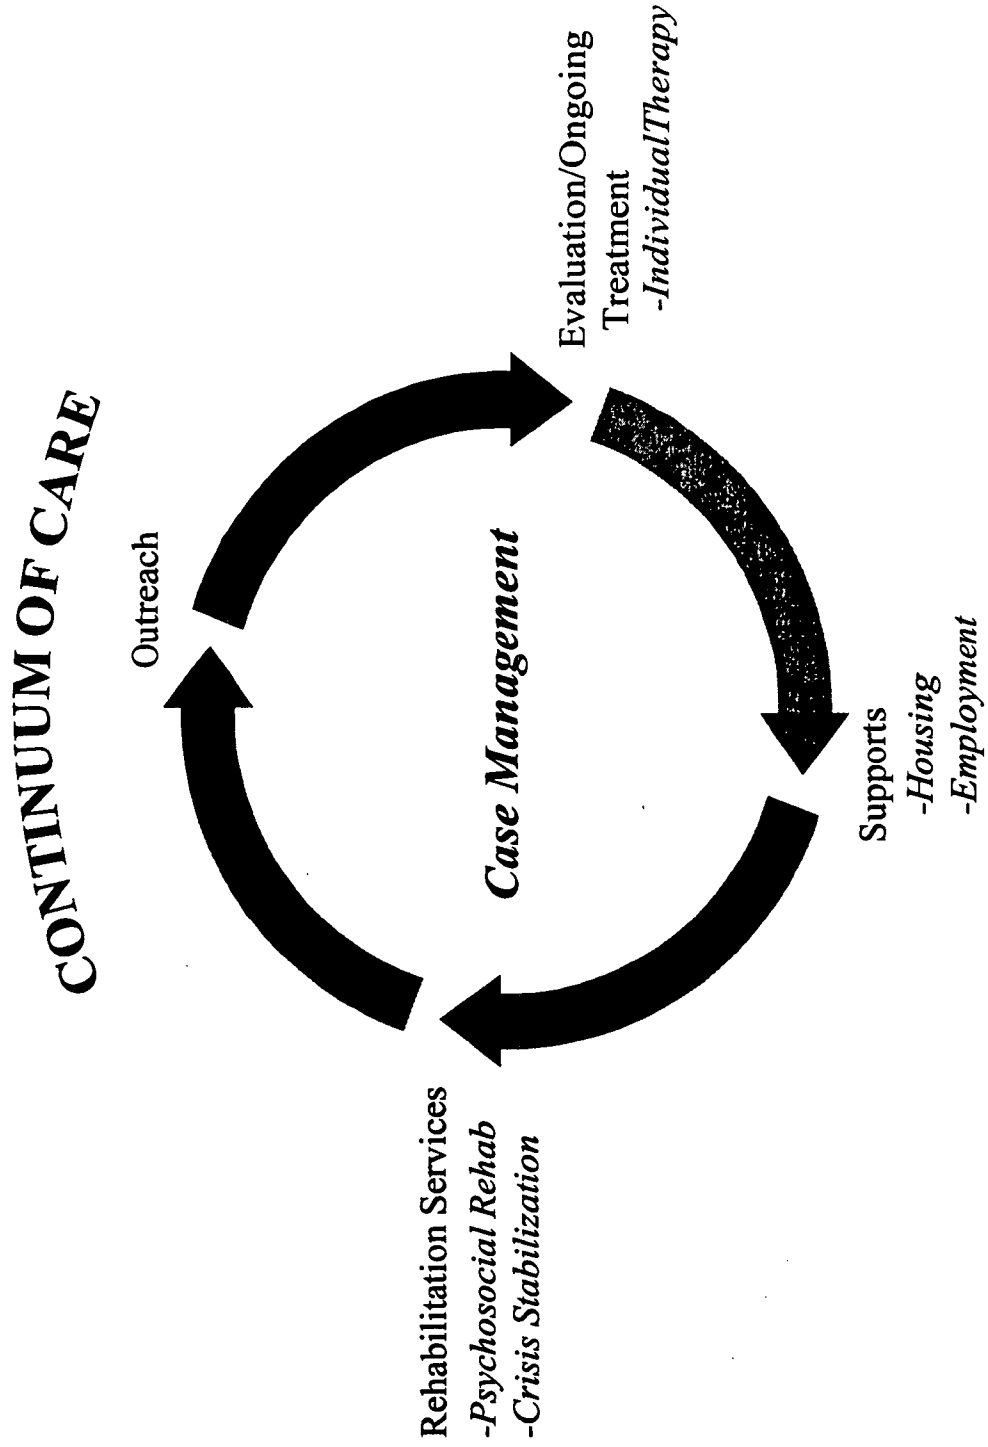

In adults, the most disabling forms of Mental Illness are *Schizophrenia, Clinical Depression And Manic-Depressive Disease*

Subpopulations Exist With Special and Different Needs - *Homeless, Dually Diagnosed, Children, Young Adults and Elderly*

Characteristics of Serious & Chronic Mental Illness:

- difficulty with tasks of daily living;
- recurrent problems in meeting basic survival needs;
- extreme vulnerability to stress;
- tendency toward episodes of "acting out";
- lack of ability to develop personal social networks; and
- lack of ability to seek help from others.

 Whitaker School - Butner, NC
 Wright School - Durham, NC
 NC Special Care Center - Wilson, NC

MENTAL HEALTH SERVICES

OTHER INSTITUTIONAL SERVICES

N.C. Special Care Facility

- Opened in 1978
- Provides Nursing Level Care to Former State Psychiatric Hospital Patients
- Service Region Statewide
- Referrals From State Psychiatric Hospitals
- Bed Capacity of 208
- Persons Served FY99/00: 302 Average Daily Population: 198
- FY00/01 Operating Budget: \$16.6M (State Appropriations \$4.1M)
- 351 Staff

Client Profile:

- 62% Require Intermediate Care Nursing
- 54% White
- 71% 65+ Years

MENTAL HEALTH SERVICES

OTHER INSTITUTIONAL SERVICES

Whitaker School

- Opened in 1978
- Adolescent Re-educational Model
- Providing Secure, Residential Treatment to Behaviorally and Emotionally Disturbed Youth
- Service Region Statewide
- Referrals From Area Mental Health Programs
- Bed Capacity of 38
- Persons Served FY99/00: 96
- FY00/01 Operating Budget: \$2.2M
- 51 Staff

Client Profile:

- 64% Male
- 50% Non-White
- Average Age: 15 Years
- Average Stay: 10 Months

MENTAL HEALTH SERVICES

OTHER INSTITUTIONAL SERVICES

Wright School

- Providing Residential Treatment to Behaviorally and Emotionally Disturbed Youth 6-13 Years Old
- Service Region Statewide
- Referrals From Area Mental Health Programs
- Bed Capacity of 24 (1 Respite Bed)
- Persons Served FY99/00: 76
- FY00/01 Operating Budget: \$1.9M
- 37.36 Staff

Client Profile:

- 97% Male
- 56% Non-White
- Average Age: 11 Years
- Average Stay: Approximately 6 Months

**CHILD & FAMILY MENTAL
HEALTH SERVICES**

MENTAL HEALTH SERVICES

How Many Children Need Mental Health Services?

BACKGROUND:

- "1 in 5 Children & Adolescents Have Serious UNMET Mental Health Needs in the U.S."
- "The Great Smoky Mountain Study" - longitudinal study of NC's children with emotional and behavioral disorders & their use of mental health services
- 5% or approximately 173K- 208K Children < 18 Years with Serious Emotional Disturbances (SED)

PROBLEM:

- School Dropout
- Drug or Alcohol Abuse
- Involvement With the Judicial System/Institutionalization
- School Expulsion
- Unplanned Teen Pregnancy

MENTAL HEALTH SERVICES

How Has North Carolina Responded to the Need?

- ✓ Approximately \$86M for Child Mental Health
- ✓ 78,185 Children Were Served by Area Programs (FY99)
- ✓ 1,271 Children Were Served in State Psychiatric Hospitals (FY00)
- ✓ 172 Children Were Served in State Residential Programs (FY00)
- ✓ Since FY94, a 300% Increase in the Number of SED Children Served
- ✓ *Expanded Use of \$50M for Former "Willie M" Program*
- ✓ *\$8M Appropriation & Establishment of Residential Treatment Initiative*
- ✓ *Expansion of System of Care Approach to Service Delivery*

MENTAL HEALTH SERVICES

At-Risk Children's (ARC) Program

- Legislature Mandated the Transition of a "Closed System" to a System Open to ALL Children in Need of Services to Prevent Institutionalization
- Maximizes Use of Funds for Former Willie M Program & \$8M for Residential Treatment Program
- Mandatory Clinically Appropriate & Medically Necessary Services
- Mandatory Priority Populations (former class members & children at risk of out-of-home placement/institutionalization)
- One Appeals Process
- Screening & Assessment of Social Services & Juvenile Justice Children
- Memorandum of Agreement at State & Local Levels

MENTAL HEALTH SERVICES

At-Risk Children's (ARC) Program

- Psychiatric Residential Treatment Facility (PRTF) Service Created (Effective 10/1/00)
 - 7 Providers (131 Beds)
- \$8M Appropriation (2000 Legislative Session)
 - \$3M Transferred to Medicaid for Match
 - \$750,000 Reserved for Room & Board for Federal Match
 - \$3,950,000 Allocated to Area Programs 3/1/01 for Residential Services
- 2,140 Eligible Children for ARC (22% Increase from FY00)
- 1,826 Received Non-Residential Services & 946 Residential

MENTAL HEALTH SERVICES

At-Risk Children's (ARC) Program

- Children Have Complex Needs
 - 2-3 Diagnoses Are Most Common (ADHD, Other Disruptive Behavior & Conduct Disorder)
 - 86% of Children Had 2 or More Diagnoses
 - Larger Numbers of Children with Substance Abuse
- Systems Are Still Fragmented in Delivery Systems to the SAME Child (Social Services, Juvenile Justice, Mental Health, Public Health, Schools and Others)
- Continued Overemphasis on Expensive Out-of-Home Residential Services

**MENTAL HEALTH SERVICES
CHILD AND FAMILY SERVICES**

"The System of Care as a Promising Solution"

What is a System of Care?

A Comprehensive Spectrum of Mental Health and Other Necessary Services and Supports Organized Into Coordinated Networks With the Following Components:

1. Broad & Flexible Array of Services and Supports
2. Child and Family Teams
3. Collaborative Management, Support & Accountability

**MENTAL HEALTH SERVICES
CHILD AND FAMILY SERVICES**

"The System of Care as a Promising Solution"

- North Carolina's Initiative Began in 1993
- Previously & Currently Funded with Federal Grant Funds
- Currently Being Implemented in 22 Counties
- Approach is Being Used to Change the Way Services are Delivered to Children & Families & to Implement the New ARC Program
- Early Evaluation Results Indicate Improved School Attendance & Performance, Reductions in Hospital & Out-of-Home Placements, Improved Behavior & Functioning and Reduction in Violations of the Law

MENTAL HEALTH SERVICES
CHILD AND FAMILY SERVICES

Policy Issues

1. Emphasis on Expensive Residential Care
2. Lack of Priority Given to Target Populations Mandated in 2000 Session Law, Section 11.19(Deaf, Sexually Aggressive Youth, and Substance Abusers)
3. Legislative Support for System of Care Approach
4. \$4.3 NR Funds for At-Risk Program
5. Future of Wright & Whitaker Schools

**MENTAL HEALTH SERVICES
CHILD AND FAMILY SERVICES**

Policy Issues

5. Future of Wright & Whitaker Schools

-Lack of Data/Needs Assessment

-Planning Time & Resources Needed

-Potential for Inappropriate Use of the Central School Facility
(Greensboro, NC)

OLMSTEAD v. L.C.

How is North Carolina Responding to Olmstead?

"Development of the Olmstead Plan"

Components of North Carolina's Plan:

1. Outreach
2. Assessment and Identification
3. Transition Plans
4. Waiting Lists
5. Inventory of Existing Resources and Supports
6. Identification of Needed Community Resources to Support Integration
7. Monitoring and Quality Assurance

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

OLMSTEAD v. L.C.

How is North Carolina Responding to Olmstead?

NC's Olmstead Plan Includes Individuals Residing In:

- Nursing Facilities
- State & Private ICF/MR's
- State Psychiatric Hospitals
- State Child Residential Treatment Facilities
- NC Special Care Center
- Individuals At-Risk of Institutionalization

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

**DEVELOPMENTAL DISABILITIES
SERVICES**

DEVELOPMENTAL DISABILITIES SERVICES

The purpose of the Developmental Disabilities Section is to direct, manage and facilitate services and supports for individuals with developmental disabilities and their families. Services for persons with developmental disabilities are administered by the Division and operated by the thirty-nine (39) Area Programs or their contract agencies and the five state operated mental retardation centers.

What is a Developmental Disability?

A severe, chronic disability of a person which:

- is attributable to a mental /physical impairment or combination,
- is manifested before the age of 22 , unless the disability is caused by a traumatic head injury after age 22;

DEVELOPMENTAL DISABILITIES SERVICES

DEVELOPMENTAL DISABILITIES

- Results in substantial functional limitations in 3 or more of the following:
 - self-care
 - self-direction & self sufficiency
 - receptive & expressive language
 - mobility
 - capacity for independent living
 - learning, and
- Reflects the person's need for a combination or sequence of interdisciplinary or generic care, treatment, or other services which are of a lifelong or extended duration and are individually planned and coordinated; or
- When applied to children from birth through four years of age, may be evidenced as a developmental delay.

CONDITIONS WHICH CAN LEAD TO A DEVELOPMENTAL DISABILITY:

- Autism
- Cerebral Palsy
- Polio
- Spinal Cord Injury
- Severe Head Injury
- Severe Learning Disabilities
- Spina Bifida
- Congenital Heart Disease
- Sickle Cell Anemia
- Epilepsy
- Blindness
- Mental Retardation

DEVELOPMENTAL DISABILITIES SERVICES

SERVICES TO MULTIPLY DIAGNOSED ADULTS

Services to Multiply Diagnosed Individuals (Mental Retardation & Mental Illness (Former Thomas S Court Mandated Program)

- ◆ FY99/00 Expenditures: \$92M
- ◆ Clients Served: 1,370
- ◆ 37% of Clients Cost in Excess of \$100K Per Year

HB 1840, Section 11.22 "Services to Multiply-Diagnosed Adults"

1. Medical Necessity
2. Utilization Review
3. Eliminate "Thomas S" Administrative Infrastructure
4. Implement Cost Reduction Strategies:
 - Preauthorization & State Review of Service Plans

DEVELOPMENTAL DISABILITIES SERVICES

Partners in Autism Treatment & Habitation Program (PATH)

- ▶ \$1.5M Appropriated During 2000 Session
- ▶ 8-Bed Residential Unit (2 Respite Beds) located at Murdoch Center in Butner
- ▶ 4-Bed Group Home in Oxford (Opens May 2001)
- ▶ Services to Children 6-16 Years Old

- ▶ Services Available: Array of Professional Services
- ▶ Treatment Model: Individualized Behavior Intervention
- ▶ Referrals: Mental Health Agencies Across the State
- ▶ Admission: InterAgency Council/Single Portal Committee
- ▶ Length of Stay: Short Term (Maximum 2 Years)

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

1. Organization & Staffing of Developmental Disabilities
Section
2. Compliance With HB 1840, Section 11.22

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

1. Organization & Staffing of Developmental Disabilities Section
 - ▶ Section Staff Increased by 37 FTE's Since FY99/00
 - ▶ Section Maintains Functional Responsibilities (Centralized for Program/Service Sections)

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

2. Compliance With HB 1840, Section 11.22
 - ▶ Identify Savings Realized From Elimination of Program Administration and Infrastructure:
 - 1999 Special Provision Originally Mandated
 - 2000 Special Provision Mandated
 - No Progress To Date
 - ▶ State Review of (1) Individualized Service Plans for All Adults Served to Ensure that Service Plans Focus on Delivery of Appropriate Services Rather than Optimal Treatment and Habilitation Plans, and (2) Staffing Patterns of Residential Services:
 - State Review & Approval of Plans in Excess of \$100K
 - State Monitors a Sample of Other Plans

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

**MINUTES
MARCH 29, 2001
8:30 am**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Thursday, March 29, 2001 in Room 424 of the Legislative Office Building. The following members were present:

**Representative Beverly Earle, Co-Chair
Representative Edd Nye, Co-Chair
Representative Lanier Cansler
Representative Theresa Esposito
Representative Verla Insko
Representative Thomas Wright**

Six Senate members were present.

The meeting was opened by Rep. Edd Nye, in the absence of Rep. Beverly Earle. Rep. Beverly Earle joined the meeting later. Pages were introduced and Karen Hammonds-Blank was instructed by the Co-Chair to continued with her presentation from the Division of Mental Health/Developmental Disabilities/Substance Abuse Services. She spoke on the Budget/Program Overview which she labeled as Section II.

She began with how the Olmstead was formed. In 1999 the U.S. Supreme Court issued a ruling on a case that originate out of Georgia. The lawsuit claimed discrimination under the Federal Americans With Disabilities Act, known as ADA. The court ruled in favor of the plaintiff stating that they should be in community settings with treatment needs should be dictated by a professional, individual choice, and community placement contingent upon state's available resources for other with disabilities. One of the things that the case did was to address individual with mental disabilities, also based their ruling on a reasonable standard, and it must be noted that the implications of Olmstead are very much unclear at this point. (See Attachment II)

Ms. Hammonds-Blank presented to the committee how North Carolina is responding to Olmstead, and presented the seven components of the state's plan.

- (1) Outreach – Informed choices
- (2) Assessment and Identification – Process of going through and trying to identify the potential candidates are that may benefit from moving them out of institutions.
- (3) Transition Plan – Transition for individual to be moved out of institutions to the communities

- (4) Waiting List – Individuals on a waiting list must be working to be moved at a reasonable pace.
- (5) Inventory of Existing Resources and Supports – Busy trying to determine where resources exist and how to best use them.
- (6) Identification of Needed Community Resources to Support Integration –
- (7) Monitoring and Quality Assurance – Assurance that they would be moved out of the institutions and out into the communities.

The plan will target individuals in nursing facilities, state and private ICF/MR's , state psychiatric hospital, state child residential treatment facilities, special care centers, and individuals at-risk of institutionalization.

Developmental Disabilities Services

The purpose of the Developmental Disabilities Section is to direct, manage and facilitate services and supports for individuals with developmental disabilities and their families. Services for persons with developmental disabilities are administered by the Division and operated by the thirty-nine (39) Area Programs or their contract agencies and the five state operated mental retardation centers. Developmental disability is a severe, chronic disability of a person which is attributable to a mental/physical impairment or combination and is manifested before the age of 22, unless the disability is caused by a traumatic head injury after age 22.

There are an array of service options for persons with developmental disabilities. (See Attachment II) Institutions account for 55.7% of the budget, which is \$245,543,324, Community Programs is 43.0%, which is \$189,516,950 and 1.4% is for administration.

There are 2,298 clients served in state mental retardation centers.

57% Male	43% Female
71% White	29% Non-White
66% Age 25-54	68% Average Length of Stay is 21 years

The majority of the clients are severely/profoundly impaired. Other impairments other than mental retardation is cerebral palsy, autism, epilepsy, language impairment and alzheimer's disease.

**Community Alternatives Program For The Mentally Retarded of
Developmentally Disabled (CAP-MR/DD)**

The program began in 1983, to serve individuals who would otherwise require care in an intermediate care facility for people with mental retardation or developmental disabilities. (ICF-MR) The five most used CAP_MR/DD services are Case Management, Community Inclusion, Respite (community based), Supported Living, and Medical Supplies. The expenditure growth has increased from 6 million in 1990, to 182 million in 2000.

Questions and comments were made at this time

The meeting adjourned.

Respectfully submitted,

Presiding Co-Chair, Representative Beverly Earle

Committee Assistant, Ann Raeferd

FISCAL RESEARCH DIVISION MARCH 2001

DEVELOPMENTAL DISABILITIES SERVICES

MENTAL RETARDATION CENTERS

Mental Retardation Centers

- Western Carolina Center - Morganton, NC
- O'Berry Center - Goldsboro, NC
- Murdoch Center - Butner, NC
- Caswell Center - Kinston, NC
- Black Mountain Center - Black Mountain, NC

DEVELOPMENTAL DISABILITIES SERVICES

MENTAL RETARDATION CENTERS

Black Mountain Center

- Opened in 1937
- Serves Western NC
- Bed Capacity of 190 (Ave. Daily Population Regular Beds: 76)
- FY00/01 Operating Budget: \$19M
- Persons Served FY99/00: 310
- 443 Staff
- Special Units: 71-Bed Alzheimer Unit

Caswell Center

- Authorized by General Assembly in 1911 (NC's First MR Center)
- Serves Central NC
- Bed Capacity of 829 (Ave. Daily Population: 549)
- FY00/01 Operating Budget: \$72M
- Persons Served FY99/00: 645 Average Daily Population: 595
- 1,715 Staff

DEVELOPMENTAL DISABILITIES SERVICES

MENTAL RETARDATION CENTERS

Murdoch Center

- Began 1948
- Serves Central NC
- Bed Capacity of 660 (Ave. Daily Population: 549)
- FY00/01 Operating Budget: \$67M
- Persons Served FY99/00: 610
- 1,678 Staff
- Special Units: BART & Autistic Children)

O'Berry Center

- Opened in 1957
- Serves Eastern NC
- Bed Capacity of 485 (Ave. Daily Population: 340)
- FY00/01 Operating Budget: \$42M
- Persons Served FY99/00: 376
- 1,015.5 Staff

DEVELOPMENTAL DISABILITIES SERVICES

MENTAL RETARDATION CENTERS

Western Carolina Center

- Began 1948
- Serves Western NC
- Bed Capacity of 493 (Ave. Daily Population: 352)

DEVELOPMENTAL DISABILITIES SERVICES

SERVICES TO MULTIPLY DIAGNOSED ADULTS

Services to Multiply Diagnosed Individuals (Mental Retardation & Mental Illness (Former Thomas S Court Mandated Program)

- ◆ FY99/00 Expenditures: \$92M
- ◆ Clients Served: 1,370
- ◆ 37% of Clients Cost in Excess of \$100K Per Year

HB 1840, Section 11.22 "Services to Multiply-Diagnosed Adults"

1. Medical Necessity
2. Utilization Review
3. Eliminate "Thomas S" Administrative Infrastructure
4. Implement Cost Reduction Strategies:
 - Preauthorization & State Review of Service Plans

DEVELOPMENTAL DISABILITIES SERVICES

Partners in Autism Treatment & Habitation Program (PATH)

- ▶ \$1.5M Appropriated During 2000 Session
- ▶ 8-Bed Residential Unit (2 Respite Beds) located at Murdoch Center in Butner
- ▶ 4-Bed Group Home in Oxford (Opens May 2001)
- ▶ Services to Children 6-16 Years Old

- ▶ Services Available: Array of Professional Services
- ▶ Treatment Model: Individualized Behavior Intervention
- ▶ Referrals: Mental Health Agencies Across the State
- ▶ Admission: InterAgency Council/Single Portal Committee
- ▶ Length of Stay: Short Term (Maximum 2 Years)

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

1. Organization & Staffing of Developmental Disabilities
Section
2. Compliance With HB 1840, Section 11.22

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

1. Organization & Staffing of Developmental Disabilities Section
 - ▶ Section Staff Increased by 37 FTE's Since FY99/00
 - ▶ Section Maintains Functional Responsibilities (Centralized for Program/Service Sections)

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

2. Compliance With HB 1840, Section 11.22
 - ▶ Identify Savings Realized From Elimination of Program Administration and Infrastructure:
 - 1999 Special Provision Originally Mandated
 - 2000 Special Provision Mandated
 - No Progress To Date
 - ▶ State Review of (1) Individualized Service Plans for All Adults Served to Ensure that Service Plans Focus on Delivery of Appropriate Services Rather than Optimal Treatment and Habilitation Plans, and (2) Staffing Patterns of Residential Services:
 - State Review & Approval of Plans in Excess of \$100K
 - State Monitors a Sample of Other Plans

Lovaas Treatment

- Developed by Dr. Ovor Lovass (UCLA)
- Intensive Behavioral Intervention for Young Autistic Children
- Instruction is One-on-One (principally in the home)
- Education, therapy, and speech language services
- Direct Involvement of Parents Stressed
- Non-Aversive Treatment system of rewards for positive behavior
- Benefits:
 - increased communication
 - increased self help and learning skills
 - seems to reduce high levels of aggression, self-injury & lethargy

Minutes

Joint Appropriations Subcommittee On Health and Human Services

**Monday, April 2, 2001
4:00 P.M.**

Room 424 Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Monday, April 2, 2001 at 4:00 P.M. in the Legislative Office Building. Members present were; Representative Edd Nye, Co-Chairman, Representative Beverly Earle, Co-Chairman, Representative Walter Church, and Representative Theresa Esposito. There were four senators present.

Representative Nye, presiding chairman, began the meeting by asking Dr. Steve Cline, Chief of the Epidemiology and Communicable Disease Section with the Division of Public Health, to begin his presentation on AIDS Drug Assistance Program (See Attachment).

Dr. Cline presented the report to the Committee in accordance with the requirements of Session Law 2000-67, Section 11.35. The report includes information on HIV/AIDS cases reported in North Carolina; eligibility, utilization and cost data from the program; and other information related to the operation and status of the program. The Committee asked Dr. Cline a number of questions concerning the program.

Ms. Lisa Hollowell, Fiscal Research Staff, was next to address the Committee. She reported to the Committee on the Division of Public Health Contracts (See Attachment). This report included both direct and non-direct service contracts, but contracts with local health departments are not included. The Committee had many questions concerning the contracts, including how the Division keeps track of all of them and how they are entered into. Senator Dannelly asked why there were so many contracts and asked if it was more cost effective. Mr. Allen Guffy, Department of Health and Human Services, replied that they get better expertise sometimes by contracting. Representative Earle noted that there were a lot more contracts with UNC Chapel Hill than with other Universities.

Senator Purcell had questions concerning Healthy Start on page ten of the handout. He noted there were federal dollars but no state money listed. Representative Nye asked the Department representative to get the Committee a breakdown on Healthy Start to see where the contracts are coming from and information concerning the match. Senator Martin asked what are the obstacles that exist for having a centralized control system for the contracts. Representative Nye asked that contracts be flagged. Senator Martin asked

Mr. Guffy to get back with the Committee to clarify the Departments definition of direct and indirect contracts to help them better understand the difference between the two.

The Committee members questioned many of the contracts. Representative Nye asked that all contracts with state money be flagged. He asked Dr. McBride to prepare for the Committee an explanation of the state and federal match for each contract.

The meeting was adjourned.

Edd Nye

Dear Senator Martin:

In accordance with the requirements of Session Law 2000-67, Section 11.35 – AIDS Drug Assistance Program, following is the final report of the Department of Health and Human Services. This report includes information on HIV/AIDS cases reported in North Carolina; eligibility, utilization and cost data from the program; and other information related to the operation and status of the program.

If you have any questions or need additional information, please contact Dr. J. Steven Cline, Chief of the Epidemiology and Communicable Disease Section, Division of Public Health. He can be reached at (919) 715-6733.

Sincerely yours,

Carmen Hooker Buell

THE AIDS DRUG ASSISTANCE PROGRAM (ADAP)

A final report submitted by the Department of Health and Human Services to:

*The House of Representatives,
Appropriations Subcommittee on Health and Human Services*

and

The Senate Appropriations Committee on Human Resources

in fulfillment of the requirements of Special Provision – Section 11.35 – 2000 Session

April 1, 2001

For further information contact:

J. Steven Cline, DDS, MPH
Chief, Section of Human Ecology and Epidemiology
Division of Public Health, DHHS
(919) 715-6733

Introduction

The North Carolina AIDS Drug Assistance Program (ADAP; also known as the HIV Medications Program), uses a combination of State and Federal funds to provide low-income residents with assistance in purchasing medications to fight HIV/AIDS and the opportunistic infections which often accompany the disease. As part of the State Budget for FY 2000 – 2001, the General Assembly requested an Interim Report (submitted on September 29, 2000), and a Final Report (to be submitted on April 1, 2001), and specified particular data and information that should be included.

This Final Report, submitted in response to Special Provision 11.35 (below), updates the Interim Report and provides the specified data and other information to the extent possible.

Special Provision - 11.35 – 2000 Session

Requested by: Representatives Earle, Nye, Easterling, Redwine, Wright, Senators Martin of Guilford, Plyler, Perdue, Odom

AIDS DRUG ASSISTANCE PROGRAM (ADAP)

Section 11.35.(a) Subsections (d) and (e) of Section 11.55 of S.L. 1999-237 read as rewritten:

“Section 11.55.(d) The Department shall also develop a comprehensive information management system on AIDS/HIV clients receiving services from the State. The Department may use up to fifty thousand dollars (\$50,000) of the funds appropriated under this act to implement this information management system. This information management system shall be patterned after the information management system used by the Elderly Drug Assistance Program, shall provide instantaneous internal access to information, and this system shall include information on the following:

- (1) Program usage patterns of ADAP participants, including, but not limited to, frequency of prescription purchases, and types of medications prescribed, and the cost of prescribed medications on a monthly basis.
- (2) Demographics of participants in the program, including the age, gender, race, ethnicity, and county of residence of participants.

The Department shall also develop a plan for promoting patient adherence to physician treatment recommendations. In developing the plan, the Department shall identify ways of obtaining information without interfering with physician-patient confidentiality. The Department shall report on this plan to the members of the House of Representatives Appropriations Subcommittee on Health and Human Services, the Senate Appropriations Committee on Human Resources, and the Fiscal Research Division not later than May 15, 2000.

Section 11.55.(e) For the 1999-2000 fiscal year, and for the 2000-2001 fiscal year, HIV-positive individuals with incomes at or below one hundred twenty-five percent (125%) of the federal poverty level are eligible for participation in ADAP. Notwithstanding any other provision of law, eligibility for participation in ADAP during the 1999-2000 fiscal year shall not be extended to individuals with incomes above one hundred twenty-five percent (125%) of the federal poverty level. Eligibility for participation in ADAP during the 2000-2001 fiscal year may be extended to individuals with incomes up to one hundred fifty percent (150%) of the federal poverty level only after the Office of State Budget and Management certifies in writing that the Department has developed an information management system pursuant to subsection (d) of this section. Until the Office of State Budget and Management makes this certification, eligibility for participation in ADAP during the 2000-2001 fiscal year shall not be extended to individuals with incomes above one hundred twenty-five percent (125%) of the federal poverty level. All individuals who are eligible for participation in ADAP shall be served by the Department of Health and Human

Services. If sufficient funds are not available from funds allocated to ADAP, the Department of Health and Human Services shall transfer available funds from other programs within the Department to meet the funding needs of ADAP.”

Section 11.35.(b) The Department of Health and Human Services shall make an interim report by October 1, 2000, and a final report by April 1, 2001, to the Senate Appropriations Committee on Human Resources, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on ADAP. The reports shall include the following:

- (1) Monthly data on total cumulative AIDS/HIV cases reported in North Carolina.
- (2) Monthly data on the estimated number of individuals eligible to participate in ADAP and the actual number of participants in ADAP.
- (3) Monthly data on the number of individuals who have applied to participate in ADAP that have been determined to be ineligible.
- (4) Monthly data on the income level of participants in ADAP and of individuals who have applied to participate in ADAP that have been determined to be ineligible.
- (5) Monthly data on fiscal-year-to-date expenditures of ADAP. The interim report shall contain monthly data on the calendar-year-to-date expenditures of ADAP.
- (6) Monthly data on the actual line-item budget of ADAP.
- (7) Monthly data on funding sources of ADAP expenditures.
- (8) Monthly data on ADAP funds that are applied to a Medicaid spend-down.
- (9) An update on the status of the information management system.
- (10) Monthly data on ADAP usage patterns and demographics of participants in ADAP.
- (11) Estimated participation rates and costs if eligibility for participation in ADAP were raised to one hundred seventy-five percent (175%) of the federal poverty level or to two hundred percent (200%) of the federal poverty level.

ITEM #1 – Table 1: Total Cumulative AIDS/HIV Cases Reported in North Carolina – 1996 to Present

HIV Disease ⁽¹⁾		
Calendar Year	# of Cases Reported	Rate
1996	1651	22.6 ⁽²⁾
1997	1664	22.4 ⁽²⁾
1998	1488	19.7 ⁽²⁾
1999	1557	20.4 ⁽²⁾
2000	1477	19.0 ⁽³⁾

(1) This Table includes reports of both HIV and AIDS, categorized by the date of first report

(2) Per 100,000 population based on estimates available from the U. S. Census

(3) Per 100,000 population based on projection (simple linear) using 1995-98 U. S. Census estimates

NOTE: These data are presented on an annual basis in order to provide the reader with the most useful and frequently presented format. HIV/AIDS incidence rates, one of the more comparable and significant indicators, are only calculated and reported annually. Since the incidence and reporting of HIV/AIDS are not seasonally-related events, monthly reports and rates do not provide any additional insight and/or value for epidemiological and planning/evaluation purposes. Presentation of annual data also eliminates the potential variation that reporting can have on monthly data, and allows the variation observed in numbers and rates between years to more accurately reflect trends and differences in the incidence of new cases.

It is important to note that the number of new HIV cases reported over the past few years has remained fairly constant. Thus, although it has been well documented and widely reported that the number of new cases of and mortality from AIDS has declined, primarily due to the effectiveness of the new medications and therapeutic regimens, the rate of transmission and newly-diagnosed and reported cases of HIV have not significantly decreased.

It should also be noted that not all racial and ethnic groups are impacted equally by the disease. In 2000 in North Carolina, almost 78% of the newly diagnosed and reported cases of HIV infection were among the non-white population, with African Americans representing about 72% of the new cases. The rate for African Americans (62.9/100,000 population) was more than 10 times the rate for whites (5.8/100,000), and the rate for Latinos/Hispanics (25.2/100,000) was almost 4.2 times the rate for whites.

This information points to at least two areas of need in very dramatic fashion. First, efforts devoted to both primary and secondary prevention of HIV disease must be increased and enhanced for all North Carolinians. Within this context, an increased focus on the role and responsibility of the HIV-infected individual in preventing the further spread of the disease is likely to occur at both the state and federal levels. The second area of concentration must be that the disparities between racial and ethnic groups are openly acknowledged and declared "unacceptable." This, in term, demands that a serious commitment to eliminating these racial disparities must be adopted by the State Program, all that work within the public and private health and medical care communities and all who serve the people of the state.

It has also been widely and repeatedly suggested that the number of cases that are reported to and by the State, and appear above and in other official publications, significantly understate the actual number of individuals living with HIV disease in North Carolina. The reasons for this are complex, but the most often cited include: (1) individuals (frequently former residents of the state who were living elsewhere) who have previously been diagnosed and reported as HIV+ in other states (and who are, therefore, not included in the reports of new cases for North Carolina), returning home to North Carolina to be with family; (2) individuals being diagnosed in NC but, for whatever set of reasons, not being reported to the State; and, (3) individuals who are HIV+ but who have not yet been tested (i.e., they do not even know that they are infected). Virtually all providers of significant amounts of medical care to persons with HIV disease have stated, without reservation, that they are serving more HIV+ individuals than are reported for their geographic areas by the official State reports. It is frequently suggested that the number of HIV+ cases reported and showing up in official figures represent anywhere from 50% to 75% of the actual number of persons living with HIV/AIDS.

ITEMS #2 AND #5 – Table 2: NC ADAP Program – # Authorized and Served and \$ Expended – by Month – FY 1999 – 2000 (and 1st 8 months of FY 2000 – 2001)

Month	# Authorized	# Served ⁽¹⁾	\$ Expended ⁽²⁾	\$ Expended per Client Served

FY 2001 to date	na	na	8,599,976	1,224 ⁽⁶⁾

(1) # of clients for whom a pharmacy claim was paid that month

(2) \$ paid out for claims paid during that month

(3) April is the start of the new Program year; all clients must reapply and be reauthorized to participate after April 1

(4) this total = the unduplicated total of individuals authorized by the Program during FY 1999 - 2000; not the sum of clients authorized in each month as indicated in this table. These data are not yet available for FY 2001.

(5) this total = the unduplicated total of individuals served by the Program during FY 1999 - 2000; not the sum of clients served in each month as indicated in this table. These data are not yet available for FY 2001.

(6) this figure = the average of each month's \$ expended/clients served; not total expended by total served. It is presented for FY 2000 and the 1st 8 months of FY 2001. The average expended/client served during the 1999-2000 fiscal year = \$5,230.

ITEM #3 – Table 3: People that Applied to ADAP and were Determined by the Office of Purchase of Care to be Ineligible – January 1999 – December 2000 ⁽¹⁾

Reason for Being Determined Ineligible for ADAP	#
Applicant is Medicaid eligible	307
Applicant does not meet financial eligibility criterion	110
Applicant has insurance (other than Medicaid)	20
Additional information has been requested – may be reconsidered	140
Applicant does not meet NC residency requirement	4
Applicant does not meet Program eligibility requirements (unspecified)	14
Applicant requested non-covered service (e.g., physician visits, more than 1-month supply of medications, approved to other provider)	18
Application was submitted too late to be approved	2
TOTAL	615

(1) This table reports data on the number of individuals that applied to the ADAP Program and who were determined to be ineligible or for whom additional information was requested by the Office of Purchase of Care once their applications were sent to and reviewed in Raleigh. This number represents only a fraction of the number of individuals, the total of which is unknown and unavailable, who apply to the Program and are determined not to be eligible for coverage at the time of application.

Applicants begin the process of applying to the ADAP Program by working with a “facilitator” somewhere in a local community. This is consistent with the way in which many of North Carolina’s Purchase of Care-based programs operate. These facilitators may work for local health departments or hospitals or social service agencies, for HIV care consortia or case management agencies or medical offices or clinics, or for other community based organizations. Most of the people who serve as facilitators in the ADAP application process are very familiar with the rules and requirements of the Program. When the facilitator and the applicant sit together to complete the financial and medical applications, it is usually immediately apparent to the facilitator whether the individual will qualify financially for ADAP; medical eligibility is not usually the problem. In the event that the applicant is believed to be eligible, or even if it is questionable in the mind of the facilitator, the completed application is sent to the Office of Purchase of Care for “official determination and notification of eligibility.” In the event that the applicant is clearly not financially eligible for the Program – because of excess income, Medicaid or other insurance – the application is usually not even sent to POC. And while POC does, in fact, deny a small number of applicants for the above reasons (as reflected in Table 3, above), the majority of individuals who are “determined to be ineligible” are so determined at the local level. POC generally does not have access to these “denied applications.” There is thus no record within POC of the number who may have applied and been locally determined not to qualify, or of the reason for them not qualifying. There are also no data related to these individuals’ financial or insurance status available, nor of the month of their application (and denial). The data presented in the above Table 3 represents a limited set of individuals determined to be ineligible at the time of application by POC and the reasons for their not qualifying for the Program. Some of these individuals eventually do qualify for ADAP (e.g., upon the submission of additional information, once their Medicaid eligibility ends, etc.). It is the opinion of the Program and POC that these individuals and the data reported above are not representative of the universe of those who seek enrollment in the Program and are determined not to qualify, and should not be considered as a valid or reliable indicator of those who apply and are denied coverage. These data are presented primarily for “context,” and to document some of the most common reasons for denial at the state level.

ITEM #6 – Table 4: NC ADAP Program Budget and Source of Funds - FY 2000 – 2001

Source of Funds	Budget Line Item	Amount Available	Time Available
State	1461-5574-0001	\$4,855,195 ⁽¹⁾	7/1/2000 – 6/30/2001
State (Prior Year)	1461-5574-0000	\$520,000	
Federal (Ryan White)	1461-5574-1251	\$6,688,398 ⁽²⁾	7/1/2000 – 3/31/2001
Federal (RW – PY)	1461-5574-1250	\$1,049,000	
Manufacturers' Rebates	1461-5574-9407	\$1,140,000 ⁽³⁾	Received quarterly, based on actual expenditures for which rebates are requested
Man. Rebates (PY)	1992-5574-9407	\$634,926	
TOTAL		\$14,887,519 ⁽⁴⁾	

- (1) This figure reflects a "one-time" reduction of \$3 million implemented by the General Assembly during the last "short session"
- (2) NC had available \$6,688,398 in Federal Ryan White Medication funds for the period July 1, 2000 – March 31, 2001. As of February 28, 2001, that entire total had been expended.
- (3) This total represents an estimate of what NC is likely to receive from pharmaceutical manufacturers' rebates, during the year based on spending all of the state and federal funds available. Since the rebates must be filed for quarterly, a significant portion of the total does not arrive in NC until after the close of the SFY. Thus, the estimated rebate figure is judged to be "reasonable," but the exact total to be received and the date of availability of any particular amount is not absolutely predictable.
- (4) Based on the discussion in #3, this is also an estimated total.

NOTE: These data are presented for the state fiscal year 2000 – 2001, and are as of February 14, 2001. Once the actual annual "budget figure" for each line item available to the Program is known and included within the budget, it does not generally change from month to month unless a budget revision is done. The amounts expended and unexpended will change monthly, based on which line items funds are taken from and used to make the payments that month. Those data are available within the budget system, and reflect what has happened from the start of the fiscal year to February 28, 2001.

ITEM #7 - Table 5: ADAP Expenditures by Funding Source (State Appropriated, Federal Ryan White or Rebate funds) - FY 1999 through February 2001

MONTH	State \$			Federal (Ryan White) \$		Rebates
	(7/98 - 6/99)	(7/99 - 6/00)	(7/00 - 6/01)	(4/99 - 3/00)	(4/00 - 3/01)	
	Jul-99	\$ 468,109.47				
Aug	\$ 488,732.12	\$ 486,824.72				
Sept	\$ 41,977.84			\$ 507,054.47		
Oct	\$ 43,878.45			\$ 684,620.35		
Nov	\$ 53,192.84			\$ 474,544.84		
Dec	\$ 74,343.31	\$ (1,996.36)		\$ 922,063.85

YTD		\$ 34,586.58	\$ 651,406.97	\$ 1,160,719.50	\$ 6,753,264.38	

ITEM #9 - Current Status of the "Information Management System"

In accordance with Section 11.35 (a), the Department is pursuing a modification of the administration of the AIDS Drug Assistance Program (ADAP) in order to improve the timeliness of information available to the Program. Up to \$50,000 of State funds was authorized for development of this enhanced information system for ADAP. In doing so, the Department is modeling administration of the ADAP Program after that which is in place for the Prescription Drug Assistance Program (for the Elderly – PDAP). There are some important differences between these two programs, necessitating that the ADAP model has some characteristics and components not present in the PDAP and adding to the complexity of accomplishing this transfer from administration/management by the Office of Purchase of Care to a Benefits Management firm. However, the intended outcome of the process is to have the same type and timeliness of information available to the ADAP Program that is available to the PDAP Program.

The ADAP Program developed and submitted a DRAFT Request for Proposal (RFP) for the administration/management of the Program that was very consistent with the RFP that was developed for the PDAP. The draft ADAP RFP was reviewed and approved within the Department. The Department then suggested that, based on the limited number of responses (i.e., one) received to the PDAP RFP, the ADAP Program might be able to be awarded as a "sole source" contract. Most of the electronic data sharing and processing details have been worked out with Department's Division of Information Resources Management and the potential contractor, and the proposed contract has been forwarded to the Department for processing. Without significant delays, this should enable the contract to be in place, and administration of the Program by a Pharmacy Benefits Management (PBM) firm to begin its "testing and phase-in period," by April 2001.

Once the Program has entered into a contract with the PBM, the appropriate information will be forwarded to the Office of State Budget and Management for their review. Upon demonstration of success and certification by OSBM, the financial eligibility for ADAP will be raised to 150% of the Federal Poverty Level.

ITEM # 10 – Table 6a: Distribution by Race of Authorized HIV Patients and Patients for Whom a Claim was Paid – CY 2000 – (Figures Represent Unduplicated Counts)

	Authorized to receive services		Claims were paid for		% of authorized for whom a claim was paid
	Number	Percentage	Number	Percentage	
White	1,066	31.0	734	33.7	68.9
African-American	2,173	63.1	1,327	61.0	61.1
Native American	49	1.42	28	1.29	57.1
Hispanic	132	3.83	72	3.31	54.5
Asian/Pacific Islander	8	0.23	7	0.32	87.5
Other Minority	16	0.46	7	0.32	43.9
Totals	3,444	100	2,175	100	63.2

ITEM #10 - Table 6b: Distribution by Gender of Authorized HIV Patients and Patients for Whom a Claim was Paid – CY 2000 – (Figures Represent Unduplicated Counts)

	Authorized to receive services		Claims were paid for		% of authorized for whom a claim was paid
	Number	Percentage	Number	Percentage	
Male	2,461	71.5	1,571	72.2	63.8
Female	783	28.5	604	27.8	61.4
Totals	3,444	100	2,175	100	63.2

All but 4 of the 2,175 individuals served by ADAP in CY 2000 were 20 years old or older.

NOTE: These data are presented for the most current year in order to provide total unduplicated enrollment and utilization information. Monthly data includes significant duplication, and would not be as meaningful in presenting an overview of who has been enrolled in and used the Program during the specified time period (CY 2000).

Data on utilization by race indicate some disparities among identified groups. The Division of Public Health is committed to assuring that all HIV+ individuals and providers of services across the state are aware of the services that are available through the AIDS Care Programs – especially ADAP, and know who to contact and how to access those services. In previous reports the Division has proposed a unit that would be responsible for “...following up on individuals who are enrolled in the ADAP Program, and who either cease to use the Program after using it for a period of time, or never use it despite being eligible for and authorized to receive services.” This unit would insure that important programmatic information is available in locations, manners and languages such that all North Carolinians know what they, their family members or their clients are eligible for and how to access the services. This unit would also be an integral part of the framework and implementation of the “...plan for promoting patient adherence to physician treatment recommendations,” as stipulated in the Special Provision. It is strongly believed that follow-up activities are important to the overall success of the ADAP Program, both in facilitating HIV+ individuals to maintain and improve their health status and in assuring the optimal utilization of available resources and effectiveness of the ADAP Program.

ITEM #11 – Estimated participation rates and costs if eligibility were raised to 175% or 200% of the Federal Poverty Level (FPL)

In approaching the issue of increasing the financial eligibility for the ADAP Program, it is critical to recognize that North Carolina's current ADAP financial eligibility criterion of 125% of the FPL is the lowest in the country (see Appendix 1). Raising the financial eligibility criterion is something that is not only seen as critical by the Program and within the state's HIV/AIDS community, but also strongly supported by HRSA, the federal funding agency for the Ryan White Program (see Appendix 2).

Item #11 requested estimates of the participation and costs if the financial eligibility criterion of the Program were raised to 175% or 200% of the Federal Poverty Level. Based on available data, the program has estimated that raising the eligibility to 200% of the Federal Poverty Level would result in an increase in enrollment of approximately 400 additional persons, with an increase in actual utilization (based on ~50% utilization) of approximately 200. This is in addition to the normal increases in Program enrollment based on newly-diagnosed cases and other patients starting on HIV medications. Overall, this would result in an estimated increased cost to the Program of approximately \$3.8 million annually

Data are not available to do an independent analysis of the potential impact on utilization and cost if the Program's financial eligibility were raised to 175%. The only way to provide these estimates is through interpolation, (i.e., by estimating the relative increase in utilization and cost between the real situation in 1999 – 2000 and the projected increase to 200% cited above. (The same is true for estimates provided at 300% of the FPL). By this approach, it is estimated that raising the financial eligibility level to 175% of the Federal Poverty Level would result in approximately 270 new enrollees, approximately 135 additional clients served (at the 50% utilization rate), and an increased cost of approximately \$2.55 million.

The projected budget available for FY 2001 – 2002, assuming that the \$3 million "one-time reduction" is restored by the General Assembly, would equal approximately \$16.5 million. At the current rate of expenditure (i.e., slightly over \$1 million per month), and at the current 125% of the Federal Poverty Level, the Program is expected to spend approximately \$13 million this state fiscal year. When one takes into account the limited time period that prior year carry forward funds may be used and when manufacturers' rebates are actually received, budgeted and available for use, this is very close to the amount that is actually available during this year (~\$13.5 - \$14 million). Raising the financial eligibility criterion to 200%, as described in the first paragraph above, would add an estimated \$3.8 million to the anticipated Program expenditures. This, again, is very close to the anticipated FY 2001 budget. Thus, it appears that raising the financial eligibility to at least 200% is a reasonable objective and able to be accomplished within the budget expected to be available. First year and annualized costs, at each eligibility level, and given a gradual enrollment of clients, are shown included in Table 7, below.

Table 7: Estimated Enrollment, Utilization and Cost for ADAP at Increased Financial Eligibility

Financial Eligibility Level (re: FPL)	Estimated Additional Annual Enrollment	Estimated Utilization	Estimated 1 st Year Expense	Estimated Additional Annualized Expense	Estimated Total Annualized Budget Requirement
125%	0	50%	0	0	\$13.2 million
150%	135	50%	\$870,000	\$1.3 million	\$14.5 million
175%	270	50%	\$1.71 million	\$2.55 million	\$15.8 million
200%	400	50%	\$2.55 million	\$3.8 million	\$17.0 million
250%	600	50%	\$3.02 million	\$4.5 million	\$17.8 million
300%	900	50%	\$4.82 million	\$7.2 million	\$20.5 million

Additional Information

Responses to Items # 4 and # 8 can not be provided at this time. Item # 4 requests data related to “the income levels of participants in ADAP and of individuals who have applied to participate but have been determined to be ineligible.” As explained in the discussion on page 7 related to Item #3, data on those determined to be ineligible are not available, except for the limited data previously presented. There is no record of the financial situation of those determined to be ineligible to report. With regard to those who are participants, the only solid and reliable piece of data is that all participants have a net family income at or below 125% of the federal poverty level.

Item # 8 requests data related to “ADAP funds that are applied to a Medicaid spenddown.” Again these data are not captured within the context of the POC determination of eligibility and payment of claims. POC does check Medicaid status at the time of receipt of an application, upon each request for payment of a claim, and several months retrospective to paying a claim, in order to assure that ADAP funds are not being used if the individual is Medicaid eligible. However, POC does not have the ability to track and maintain data related to an individual being in “spenddown” status. The individual is either eligible for Medicaid or not, and POC approves eligibility and/or pays claims accordingly.

It should be noted that the data that are currently unavailable to respond to Items # 4 and #8 will continue to be unavailable within the context of the proposed “improved data management system.” While providing access to “real-time” expenditure, service and utilization data, the new system will not capture additional data related to “non-participants.”

Appendix #1 –

List of Financial Eligibility Criteria for ADAP Among all States – March 2000

State-by-State ADAP Financial Eligibility Criteria

State	Financial Eligibility Criteria (% of Federal Poverty Level) FY 2000	Financial Eligibility Criteria (% of Federal Poverty Level) FY 1999

**JOINT APPROPRIATIONS SUBCOMMITTEE
ON
HEALTH AND HUMAN SERVICES**

Room 424, Legislative Office Building
Tuesday, April 3, 2001
8:30 a.m.
Minutes

The Health and Human Services Appropriation Subcommittee met Tuesday, April 3, 2001 in Room 422 of the Legislative Office Building, all Senators and Representatives Earle, Nye, Church, Clary, Insko and Wright present. Senator Bill Martin, Chair, called the meeting to order and introduced the pages. Representative Beverly Earle was recognized to give opening statements.

The Chair stated that the committee would continue with the Division of Mental Health Developmental Disabilities and Substance Abuse Services and recognized Karen Hammonds-Blanks to continue her presentation from the attached handout (Attachment #1 – Section 2). She stated that today's discussion would be an overview of what the programs provide in the community.

She began on page 60 of the handout, the Community Alternatives Programs, which is known as the CAP/MRDD program. This program is a very popular program that is very much in demand. Unlike the other funds in the developmental disabilities area, these funds are actually in the budget for the Division of Medical Assistance. This program is aimed specifically at serving individuals whose income and resources are not dependent upon the parents but on the individual. It is also aimed at those individuals whose disability is the major determination of their eligibility as opposed to financial.

The top five most utilized services under the CAP waiver are Case Management, Community Inclusion based on individual basis, Respite Services, Supported Living and Medical Supplies.

Questions and discussion from the committee included:

Does the area mental programs provide all case managements.

Community inclusion is a service provided to allow individuals who have substantial disabilities to participate in community activities. As well as learn to be independent in the community in the areas of transportation, use and exchange of money and the things normally done in daily community interaction.

What is the rate for community inclusion per hour, is it \$21 or \$20?

During the last Session there was a Special Provision direction to transition the former court mandated program known as Thomas S into program services called Multiple Diagnosed Adults. Karen review Section 11.22 of HB 1880, which was a Special

Provision to continue the efforts of 1999 in which the Department was directed basically transition both the Willie M and the Thomas S Programs into the broader disability areas of Mental Health and Developmental Disabilities. This Provision is a continuation of that initiative from 1999 and was intended to terminate the port-mandated programs and to initiate broader program that serves basically the same population. The Special Provision provides very specific instructions to the Division.

As a result of legislative action last Session, a new program has been implemented. \$1.5 million was appropriated to begin a program to provide residential services to children with Autism. The program has been created and given the name Partners in Autism Treatment and Habilitation (PATH). The two components of this initiative were to provide an eight-bed residential program located at the Murdoch Center in Butner, and to purchase a home to provide a four-bed group home that is scheduled to open in May. The goal is to serve children between ages six thru sixteen and to provide a broad array of services to these children.

Karen also addressed two specific policy issues.

- 1) Organization and staffing of the section that oversees Developmental Disabilities and
- 2) The Special Provision.

She stated that the Special Provision was very broad and was intended to address the various areas of concern regarding the costs of the individual programs and individuals within the former court mandated programs. There are two areas that the committee might want to give direction. At the local level there were individuals only working with Thomas S class members. It is the intent of the Division to address that issue which was raised in 1999 and again last session in Special Provisions. A pilot program is presently in place to deal with some of the administration at the local level as opposed to dealing with those across the board. The legislature was very generous as opposed to taking those as reductions, said that the money could be invested back into services. However, after two special provisions, it is necessary to identify as an issue to give more direction to the Division rather than doing a pilot at the local level.

The second area is the state review of individualized service plans for all adults. The intent of that language was to address each individual in the service plan, not only the individuals that were \$100,000 and above. The response of the Division to the Provision is their plan was to only look at those at the local level with the local employees. The instructions from the provision are that the state should conduct the review because the locals are the individuals who assisted with the initial plans. The intent was that over time, not within six months or the first year, that the Division review each individual service plan to insure that it was meeting all of the areas of the special provision. The February report indicated that only some of the individuals would be addressed in terms of the high cost areas. A sample review of the plans was not in compliance with the direction of the committee or the legislature when the budget was adopted.

During committee discussion, the intent of the provision was clarified to the extent that all administration at both the local and state levels would be eliminated specific to Thomas S, specific to the flag. The division has not been able to implement that because of a variety of reasons. The intent was to use the Duplin-Sampson program as a pilot to determine how to best accomplish that. The committee was reminded that the Thomas S legal action (law suit) was dismissed in January 1998. The Division was given one year to complete the transition.

Regarding information from other states, whereas the cases are unique from one state to another, the Chair noted that North Carolina is model in terms of comparison. The Developmental Disabilities Services serves over 30,000 persons.

The Chair reminded the committee that this area is flagged and will be reviewed in more detail to determine the effectiveness, as well as various special provisions that relates to the Division.

With regard to the issue of rate, Karen Hammonds-Blanks stated that it is a very complicated area. It is not just the money in the Division's budget, the Medicaid rate cutting over the last several years got entangled with trying to bring certain rates in line with what costs were verses the area of the entire state allocations for Thomas S. It didn't occur over a short span of time, it occurred over several years.

Attachment 3 is a document provided by the Division, which includes a waiting list for Developmental Disabilities Services as of January 2001. The information is provided according to the types of services, by the age group and the total.

The meeting adjourned until 1:30 p.m.

William N. Martin, Chair

Joyce Crews Hodge, Clerk

BUDGET/PROGRAM OVERVIEW

Section II.

Fiscal Research Division

March 2001

0403 2001

Division of Mental Health/Developmental Disabilities/Substance Abuse Services

OLMSTEAD v. L.C.

What is Olmstead?

- 1999 U.S. Supreme Court Decision
- Originated in Georgia
- Claimed Discrimination Under the Federal Americans With Disabilities Act (ADA)
- Court Found that Placements Should be in Community Settings:
(1) Treatment Needs Dictate, (2) Individual Choice, and (3) Community Placement Contingent Upon State's Available Resources for Others with Disabilities
- Addressed Individuals with Mental Disabilities
- Reasonableness Standard
- Implications of Olmstead are Unclear

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

OLMSTEAD v. L.C.

How is North Carolina Responding to Olmstead?

"Development of the Olmstead Plan"

Components of North Carolina's Plan:

1. Outreach
2. Assessment and Identification
3. Transition Plans
4. Waiting Lists
5. Inventory of Existing Resources and Supports
6. Identification of Needed Community Resources to Support Integration
7. Monitoring and Quality Assurance

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

OLMSTEAD v. L.C.

How is North Carolina Responding to Olmstead?

NC's Olmstead Plan Includes Individuals Residing In:

- Nursing Facilities
- State & Private ICF/MR's
- State Psychiatric Hospitals
- State Child Residential Treatment Facilities
- NC Special Care Center
- Individuals At-Risk of Institutionalization

**Division of Mental Health/Developmental
Disabilities/Substance Abuse Services**

**DEVELOPMENTAL DISABILITIES
SERVICES**

DEVELOPMENTAL DISABILITIES SERVICES

The purpose of the Developmental Disabilities Section is to direct, manage and facilitate services and supports for individuals with developmental disabilities and their families. Services for persons with developmental disabilities are administered by the Division and operated by the thirty-nine (39) Area Programs or their contract agencies and the five state operated mental retardation centers.

What is a Developmental Disability?

A severe, chronic disability of a person which:

- is attributable to a mental /physical impairment or combination,
- is manifested before the age of 22 , unless the disability is caused by a traumatic head injury after age 22;

DEVELOPMENTAL DISABILITIES SERVICES

DEVELOPMENTAL DISABILITIES

- Results in substantial functional limitations in 3 or more of the following:
 - self-care
 - receptive & expressive language
 - capacity for independent living
 - self-direction & self sufficiency
 - mobility
 - learning, and
- Reflects the person's need for a combination or sequence of interdisciplinary or generic care, treatment, or other services which are of a lifelong or extended duration and are individually planned and coordinated; or
- When applied to children from birth through four years of age, may be evidenced as a developmental delay.

CONDITIONS WHICH CAN LEAD TO A DEVELOPMENTAL DISABILITY:

- Autism
- Cerebral Palsy
- Polio
- Spinal Cord Injury
- Severe Head Injury
- Severe Learning Disabilities
- Spina Bifida
- Congenital Heart Disease
- Sickle Cell Anemia
- Epilepsy
- Blindness
- Mental Retardation

2. Compliance With HB 1840, Section 11.22

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

1. Organization & Staffing of Developmental Disabilities Section
 - ▶ Section Staff Increased by 37 FTE's Since FY99/00
 - ▶ Section Maintains Functional Responsibilities
(Centralized for Program/Service Sections)

DEVELOPMENTAL DISABILITIES SERVICES

POLICY ISSUES

2. Compliance With HB 1840, Section 11.22
 - ▶ Identify Savings Realized From Elimination of Program Administration and Infrastructure:
 - 1999 Special Provision Originally Mandated
 - 2000 Special Provision Mandated
 - No Progress To Date
 - ▶ State Review of (1) Individualized Service Plans for All Adults Served to Ensure that Service Plans Focus on Delivery of Appropriate Services Rather than Optimal Treatment and Habilitation Plans, and (2) Staffing Patterns of Residential Services:
 - State Review & Approval of Plans in Excess of \$100K
 - State Monitors a Sample of Other Plans

4. State review of individualized service plans for all children served to ensure that service plans focus on delivery of appropriate services rather than optimal treatment and habilitation plans.
- (4) Collaborate with other affected State agencies such as the Office of Juvenile Justice and the Administrative Office of the Courts, and with local departments of social services and area mental health programs to eliminate cost-shifting and facilitate cost-sharing among these governmental agencies with respect to the treatment and placement services.

Section 11.21.(b) The Department shall submit a progress report on implementation of this section not later than February 1, 2001, and a final report not later than May 1, 2002, to the House of Representatives Appropriations Subcommittee on Health and Human Services, the Senate Appropriations Committee on Human Resources, and the Fiscal Research Division.

Section 11.21.(c) G.S. 122C-3(13a) is repealed.

Section 11.21.(d) G.S. 122C-112(14) is repealed.

Section 11.21.(e) Part 7 of Article 4 of Chapter 122C of the General Statutes is repealed. This subsection applies to petitions for contested case review filed on and after the effective date of this act.

Requested by: Representatives Earle, Nye, Easterling, Redwine, Senators Martin of Guilford, Plyler, Perdue, Odom

SERVICES TO MULTIPLY-DIAGNOSED ADULTS

Section 11.22.(a) In order to ensure that multiply-diagnosed adults are appropriately served by the mental health, developmental disabilities, and substance abuse services system, the Department of Health and Human Services, Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, shall do the following with respect to services provided to these adults:

- ✓ (1) Provide only those treatment services that are medically necessary.
- ✓ (2) Implement utilization review of services provided.
- ✓ (3) Effective immediately:
 - a. Eliminate formerly court-mandated Thomas S. Program administration, infrastructure, and categorical funding designation at the local level, while continuing to provide services to former Thomas S. clients and other multiply-diagnosed adults;
 - b. Identify savings realized from elimination of Program administration and infrastructure;
 - c. Adopt the following guiding principles for the provision of services:
 1. Service delivery system must be outcome oriented and evaluation based.
 2. Services should be delivered as close as possible to the consumer's home.
 3. Services selected should be those that are most efficient in terms of cost and effectiveness.
 4. Services should not be provided solely for the convenience of the provider or the client.
 5. Families and consumers should be involved in decision-making throughout treatment planning and delivery; and
 - d. Implement all of the following cost reduction strategies:

1. Preauthorization for all services except emergency services.
2. Criteria for determining medical necessity.
3. Clinically appropriate services.
4. State review of (i) individualized service plans for all adults served to ensure that service plans focus on delivery of appropriate services rather than optimal treatment and habilitation plans, and (ii) staffing patterns of residential services.

Section 11.22.(b) No State funds shall be used for the purchase of single-family or other residential dwellings to house multiply-diagnosed adults.

Section 11.22.(c) The Department shall submit a progress report on implementation of this section not later than February 1, 2001, and a final report not later than May 1, 2002, to the House of Representatives Appropriations Subcommittee on Health and Human Services, the Senate Appropriations Committee on Human Resources, and the Fiscal Research Division.

Requested by: Representatives Earle, Nye, Easterling, Redwine, Senators Martin of Guilford, Phillips, Plyler, Perdue, Odom

FUNDS FOR MENTAL HEALTH, DEVELOPMENTAL DISABILITIES, AND SUBSTANCE ABUSE SERVICES OVERSIGHT COMMITTEE

Section 11.23.(a) Of the funds appropriated in this act to the Department of Health and Human Services, the Department shall transfer the sum of three hundred fifty thousand dollars (\$350,000) to the General Assembly, Legislative Services Office, for the 2000-2001 fiscal year. These funds shall be used for the mental health, developmental disabilities, and substance abuse services system reform initiative proposed in Senate Bill 1217 and House Bill 1519, 1999 General Assembly, Regular Session 2000. The funds shall be used specifically for a comprehensive study of developmental disabilities services and administration and to hire professional staff to assist the Legislative Oversight Committee on Mental Health, Developmental Disabilities, and Substance Abuse Services. These funds may be transferred for these purposes if and only if Senate Bill 1217 or House Bill 1519, 1999 General Assembly, becomes law.

Section 11.23.(b) The Department shall study whether a new division of developmental disabilities should be established in the Department. Not later than January 1, 2001, the Department shall report its findings and recommendations to the House of Representatives Appropriations Subcommittee on Health and Human Services and the Senate Appropriations Committee on Human Resources.

Section 11.23.(c) The Department of Health and Human Services shall proceed with plans for the construction of a new State psychiatric hospital to replace Dorothea Dix hospital. Not later than October 1, 2000, the Department shall report the status of the plans including identification of potential sites for the new facility. The report shall be made to the Joint Legislative Oversight Committee on Mental Health, Developmental Disabilities, and Substance Abuse Services, to the Senate Appropriations Committee on Human Resources, and the House of Representatives Appropriations Subcommittee on Health and Human Services.

Requested by: Representatives Earle, Nye, Easterling, Redwine, Senators Martin of Guilford, Plyler, Perdue, Odom

Minutes

Afternoon Meeting

The Joint Appropriations Subcommittee on Health and Human Services met Tuesday, April 3, 2001 in Room 424 of the Legislative Office Building with Senator Bill Martin presiding. After calling the meeting to order and introduction of the pages. He stated that several members were not present due to the concurrent Redistricting meeting.

Karen Hammonds-Blanks was recognized to give the Substance Abuse presentation. Attachment #3, Substance Abuse Services, is included with these minutes. She began by highlighting the problem in North Carolina. She noted on 73 of the attachment there is an estimate of 784,000 individuals in the state that need some kind of substance abuse services. The National Household Survey, which is conducted every other year, provides information regarding the individual that report their use of substances such as alcohol, tobacco, etc. The last available report, 1999, indicated approximately 15 million Americans use illegal drugs; approximately 6.67 million Americans report use of tobacco and 105 million consume alcohol. Public Health implications are that there is an estimated 16,000 I V drug users as it relates to HIVs and STDs. There is an estimated 16,000 incarcerated individuals that need some type of substance abuse services. She said that there is a reported increase in alcohol and drug abuse in our state's high schools. There is a decrease in the use of alcohol in the middle schools however there is an increase in marijuana use for middle school children. North Carolina ranks number five for children ages 12 to 17 who actually use tobacco. There is an increase in the use of "CLUB Drugs."

"Changing the Conversation" is a document sent forth by the Federal Government through the Substance Abuse and Mental Health Services Administration through the Center for Substance Treatment. The philosophy is that they are advocating for in this initiative is a "no wrong door" policy –that is- access to treatment should occur regardless of the point of entry and that standards of care should be in place as well.

In reference to the estimated 47% needing comprehensive substance abuse treatment, the committee wanted to know the source of the data. This information was compiled from a phone survey done by the state. This information is specific to North Carolina.

Karen continued her presentation on page 78, regarding what is occurring in the Department of Health and Human Services, Division of Mental Health Development Disabilities and Substance Abuse Services. Several years ago, a study revealed that North Carolina then ranked 38th in its spending for substance abuse services. The amount of funds supporting this area has not significantly grown since that time. She reviewed the mission and responsibilities of the substance abuse section in the Division. Flo Stine was available to answer questions from the committee members.

During discussion, the committee agreed that there is no area of the state that provides adequate services in this area and that the area of Substance Abuse needs more attention. The state spends very little funds on prevention.

The meeting adjourned at 2:45 p.m.

William N. Martin, Chair

Joyce Crews Hodge, Clerk

THE PROBLEM IN NORTH CAROLINA

- ◆ Estimated 784,000 North Carolinians Need Substance Abuse Services
- Estimated 47% (or 370,005) Need Comprehensive Substance Abuse Treatment (≥ 18 years)
- Of These, Approximately 24% Report No Health Insurance

- ◆ Estimated 16,048 IV Drug Users

- ◆ Estimated 16K FY99/00 Prison Admissions Need Services

- ◆ Estimated 70% (or 22,140) of Inmates in State Prisons Need Substance Abuse Services

- ◆ Increase in High Schoolers Reporting Alcohol & Drug Use

- ◆ Decrease in Middle Schoolers Reporting Alcohol Use & Increase for Drug Use

SUBSTANCE ABUSE SERVICES

THE PROBLEM

- ◆ 42,131 Drug Related Arrests During 1998
-7% Were Juveniles Less Than 18 Years Old
- ◆ 63,788 DWI's (1998 - 5% Increase from 1995)
- ◆ 28,208 Filings (10% of total filings) in Superior Court for
Controlled Substances (FY98) - Up 5% From FY96
- ◆ 17% of Rapes Included Offenders Under the Influence of
Alcohol/Drugs (1998)
- ◆ 4,445 Drug Arrests < 18 Years Old
-66% for Marijuana
-18% for Heroin & Cocaine

SUBSTANCE ABUSE SERVICES

THE PROBLEM

- ◆ Estimated 7,400 Infants Born Exposed to Illicit Drugs
(1998, NC State Center for Health Statistics)
- ◆ 13,704 Crashes Involving Alcohol *(1994, National Highway Traffic Safety Administration)*
- ◆ 35.6% of All Crash Deaths Attributed to Alcohol
(1994, National Highway Traffic Safety Administration)
- ◆ \$27.6M in Medicaid Payments for Substance Abuse Services (FY98)
- ◆ 7.4% (or 2,842) of Pregnant Women in the Sample Tested Positive for Illicit Drug Use *(1999, NC State Center for Health Statistics)*

SUBSTANCE ABUSE SERVICES

Mission: to provide leadership in the planning, development and organization of a statewide system of alcohol and other drug services; to coordinate and communicate policies and strategies that educate, encourage, and respond proactively to alcohol and other drug prevention, intervention, and treatment issues.

The Division Supports This Mission Through:

- ◆ Institutional Services
- ◆ Community Services
- ◆ Regulatory Unit
- ◆ DWI/Criminal Justice
- ◆ Employee Assistance Program
- ◆ Prevention Services

SUBSTANCE ABUSE SERVICES

- ◆ Institutional Services
 - Provides inpatient services through the State Alcohol and Drug Abuse Treatment Centers (ADATC).
- ◆ Community Services
 - Provide support to 39 Area Programs in the implementation of substance abuse plans; 2) Coordinate and develop programs to reduce HIV/AIDS; 3) Coordinate and develop programs and services to women, including TANF recipients and their families; and 4) Provide leadership and support for the development of a comprehensive system of prevention and treatment services for children and youth.
- ◆ Regulatory Unit
 - Prevents controlled substances into illicit markets

SUBSTANCE ABUSE SERVICES

- ◆ **DWI/Criminal Justice**
 - Provide leadership and support for services targeted at clients involved with the criminal justice system (e.g., Treatment Alternatives to Street Crime - TASC).
- ◆ **Employee Assistance Program**
 - Assist employees impaired by stress, substance abuse or other personal concerns; Develop of Enhance EAP to private employers and TANF recipients; provide technical assistance to Area Programs; and provides guidance for DHHS's Alcohol & Drug-Free Workplace Initiative.
- ◆ **Prevention Services**
 - Develop and coordinate prevention efforts statewide including the infusion of science-based prevention strategies into existing prevention programs.

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

Minutes
April 4, 2001
8:30 A.M.

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Wednesday, April 4, 2001 in Room 424 of the Legislative Office Building.

House Co-Chair , Representative Beverly Earle opened the meeting. Pages were introduced with the following members were present:

Representative Edd Nye, Co-Chair
Representative Lanier Cansler
Representative Theresa Esposito
Representative Thomas Wright

Six Senate members were present.

The meeting began with a presentation from Karen Hammonds-Blanks, from the Fiscal Research Division. Ms. Hammonds-Blank continued her presentation from a previous meeting held on Tuesday, April 3, 2001. The topic of discussion was **Area Mental Health Programs – Section IV**. (See Attachment II). She began with a structure of the system. The program consist of 15-25 members, a Director, program staff and contracts for services.

The provision of mental health in North Carolina is a cooperative effort of the state and local governments. Public mental health services are coordinated and delivered primarily on the local level by Area Mental Health Authorities/Programs. Area Programs provide services directly or under contract with other service providers. All funds appropriated by the General Assembly for the purpose of providing these services are administered by the Division of Mental Health, Developmental Disabilities and Substance Abuse Services. North Carolina Policy is that the state and local governments shall develop and maintain a unified system of services centered in area programs. The public service system will strive to provide a continuum of services for clients while considering the availability of services in the private sector. The services to implement the policy of this section requires the cooperation and financial assistance of counties, the state, and the federal government.

What is an Area Mental Health Program?

It is a local political subdivision of the state, which was created in the early 70's. Unlike counties, it has no taxing authority. There are 41 area mental health programs which are governed by an area boards.

What roles do area programs play in the system of services?

They are the provider of services, purchasers of services, coordinators with other human services areas, the gatekeepers, and monitors. They provide substance abuse services, developmental disabilities services, mental health services, and the coordination/integration with other human services areas. In 1993 there were 225,167 clients served, with a 45% increase. Since then, the number of clients served in 1999 is 325,081. The growth in state appropriations went from 236 million in 1994 to 325 million in 2000. Financial stability of are programs are direct billing of Medicaid, direct billing of Non-Medicaid services and continual erosion of funding for administration.

To review highlights of mental health, developmental disabilities and substance abuse services reform, see page 110 of attachment II.

Questions and comments were discussed at this time.

Karen Hammonds-Blank presented to the committee options for consideration. They were as followed:

- (1). Reduce State Appropriations for Area Program Administration TBD
- (2). Reduce State Appropriations for State ICF/MR's TBD
- (3). Eliminate MR/MI Transition Unit in DD Section TBD
- (4). Reduce Layers of Management
 - 2.0 Assistant Division Directors
 - 1.0 Deputy division Director
- (5). Eliminate Director of Child Research/Grants Program Development \$99K
- (6). Eliminate Hospital Services Section
 - 2.0 FTE's

NORTH CAROLINA AREA MENTAL HEALTH PROGRAMS

NORTH CAROLINA'S PUBLIC SYSTEM OF SERVICE DELIVERY

AREA MENTAL HEALTH PROGRAMS

The provision of mental health in North Carolina is a cooperative effort of the state and local governments. Public mental health services are coordinated and delivered primarily on the local level by Area Mental Health Authorities/Programs. Area Programs provide services directly or under contract with other service providers. All funds appropriated by the General Assembly for the purpose of providing these services are administered by the Division of Mental Health, Developmental Disabilities and Substance Abuse Services.

§ G.S. 122C-2. North Carolina Policy

State and local governments shall develop and maintain a unified system of services centered in area programs. The public service system will strive to provide a continuum of services for clients while considering the availability of services in the private sector. The furnishing of services to implement the policy of this section requires the cooperation and financial assistance of counties, the State, and the federal government.

AREA MENTAL HEALTH AUTHORITIES/PROGRAMS

N.C. STATUTORY AUTHORITY

§ G.S. 122C-115. Powers and duties of counties and cities.
(d) Counties shall not reduce county appropriations and expenditures for area authorities because of the availability of State allocated funds, fees, capitation amounts, or fund balance to the area authority.

§ G.S. 143-10.1A. Budget required to include State cost of local programs -- Continuation and expansion costs.
(d) Effective July 1, 1991, the Office of Budget and Management and the Director of the Budget, with advice of the Advisory Budget Commission, shall prepare the State Budget in a format that adequately and fairly reflects the continuation costs for the State's share of locally operated programs established by statute or State appropriation.

Joint Appropriations Subcommittee On Health and Human Services

Thursday, April 5, 2001

8:30 A.M.

Room 643, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Thursday, April 5, 2001, at 8:30 A.M. in Room 643 of the Legislative Office Building. Members present were; Representative Edd Nye and Representative Beverly Earle, Co-Chairs, Representative Lanier Cansler, Representative Theresa Esposito, and Representative Thomas Wright. There were six senators present.

Representative Nye began the meeting by introducing the Pages that were assisting with the meeting. He stated the Committee would begin hearing about Block Grants with this meeting.

Mr. E. C. Modlin, Director of Social Services, gave an overview of the Division of Social Services Block Grant (See Attachment). This Block Grant is intended to provide federal funds which support helping individuals achieve or maintain a greater degree of economic self-support or self-sufficiency, preventing abuse or exploitation of children and adults who are unable to protect their own interests, and preventing inappropriate institutional care or obtaining appropriate institutional care when other forms of care are not available. The primary providers of these services are the one hundred county departments of social services. These funds are mostly being used for mandated services such as foster care services for adults and children, protective services for adults and children, and adoption services. Other uses of these funds include childcare for child welfare cases, community-based services for elderly and disabled adults, mental health services, and other human services programs.

Mr. Modlin explained that there were three changes being made this year. There are two adjustments and one elimination. The state administration, item number nine of the handout, was decreased this year by \$177,374 and because of the slight increase that is expected this coming year, they are restoring \$90,611. This will offset some of the cost allocation that would replace what would have been state dollars. Adolescent Pregnancy Prevention, item number 22 of the handout, currently funded at \$239,261 through TANF dollars will be replaced with SSBG dollars because of the slight increase. Enhanced employee assistance program is not being refunded this year. The million dollars that was proposed this year is not being recommended because of the shortfall of TANF dollars.

Ms. Peggy Ball, Division of Child Development, was next to address the Committee. She gave an overview of the Block Grants for the Child Care and Development Fund.

This Block Grant is to provide subsidy to families to help pay for childcare. Almost all of the money goes directly to the counties, which use it to support the families. Over 86% of the families that are being supported with these subsidies are low-income working families, including 80% that earn twenty thousand dollars or less per year. Senator Forrester questioned the increase in administrative expenses listed on the last page of the handout. He asked that it be flagged for review in more detail later. Representative Nye questioned item number one on the last page of the handout, childcare subsidies and asked how much money was included for DIRM. He asked Ms. Ball to get that information for the Committee. There was a discussion concerning the affordability of childcare. Senator Forrester stated they needed to be able to review the last two or three years and not just the last year. Representative Nye asked for a breakdown on the health insurance program and also the wages program. Representative Cansler noted they had done a good job of improving daycare by putting more education into it, but the five-star system has made childcare more expensive. Senator Moore asked if parents share in the payment of childcare. Ms. Ball responded that parents pay seven, eight, or nine percent of their gross income as a portion of their child's care. Last year they paid sixty million dollars for their portions of the care.

Senator Forrester asked if there was any program that allowed mothers to stay at home with their child for the first couple of years. Representative Nye responded that there is a program in Stanley County. Senator Forrester asked Ms. Ball to get some information on concerning this program. Senator Purcell stated that he thinks the star-rating program serves a good purpose and should not be discontinued. Senator Kerr pointed out that the increase in care was causing parents to place their children in black-market home daycares.

Ms. Bonnie Morrill with the Division of Mental Health, Developmental Disabilities and Substance Abuse Services, provided a presentation on the Mental Health Block Grant (See Attachment). This money is to provide community based services for adults with serious mental illness and for children with serious emotional disturbance. The Committee focused a lot of questions concerning how funds are allocated.

Representative Espostio asked for a point of personal privilege to recognize Representative Cansler and noted that he is leaving the legislature to begin working as Deputy Secretary of Department of Health and Human Services. Representative Cansler addressed the Committee and Senators Moore and Dannelly asked that his words be included in the minutes and sent to all members of the legislature. (See Attached)

The meeting was then adjourned.

**REPRESENTATIVE LANIER CANSLER COMMENTS TO
APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES
APRIL 5, 2001**

I am looking forward to working with the Secretary, all the fine folks behind me from the Department and with you. It has been a pleasure over the last few years working with Representative Esposito. She is the one who got me into the Health and Human Services arena and working with all of you in trying to find ways to help meet the needs of the folks in our state with respect to Health and Human Services. I appreciate the great job that our chairs have done and my opportunity to co-chair with Senator Martin a few years ago. I thank the staff because you have always been very helpful to me and, hopefully, we can continue to have the same relationship.

One thing I have already learned by attending some Department meetings is that as hard as we work here and all the reports here, we kind of see the surface of the lake. When you get down in the lake, there is a lot of stuff there, and we have to be extremely careful. We, as a member of the General Assembly, over the past years have cut a lot out of the Department. We have put money back in doing new things, but we are trying to do more and more for less and less. No doubt we could find some inefficiencies and some things to do, but where we have done radical surgery in the past, we are going to have to be careful to do microscopic surgery in the future because the flexibility is gone. If we are not careful in the way that we cut the budget, we are going to have major damaging impact on some of the things that we do. That makes it tough. I know the word comes down from the mountain about what we have to cut, but we as a General Assembly are going to have to make a decision whether we want to provide quality care for services and access, or whether we just want to provide some level to say that we are doing it.

I look forward to working with the Secretary and others to help find the ways that we can do better, but I will also be working as hard as I can to convince you in the future that if you put up the dollars necessary to make sure that the programs are important, we can do well.

Thanks.

SOCIAL SERVICES BLOCK GRANT (SSBG) FOR SFY 2001-02

The amount of Social Services Block Grant (SSBG) Funds available for SFY 2001-02 is based on the actual SSBG Funds appropriated for Federal Fiscal Year 2001. The anticipated total federal funds in SFY 2001-02 is \$53,888,298 including \$47,888,298 in SSBG and \$6,000,000 in funds transferred from the Temporary Assistance for Needy Families (TANF) Block Grant.

GENERAL DESCRIPTION

The Social Services Block Grant is intended to provide federal funds which support helping individuals achieve or maintain a greater degree of economic self-support or self-sufficiency, preventing abuse or exploitation of children and adults who are unable to protect their own interests, and preventing inappropriate institutional care or securing appropriate institutional care when other forms of care are not appropriate.

The primary providers of these services are the one hundred county departments of social services. These funds are mostly being used for mandated services such as foster care services for adults and children, protective services for adults and children, and adoption services. Other uses of these funds include child care for child welfare cases, community-based services for elderly and disabled adults (such as in-home aid services, adult day care, and preparation of meals), mental health services, and other human services programs.

RECOMMENDATIONS

- | | | |
|----|--|---------------|
| 1. | Allocation to the 100 county departments of social services for basic/mandatory services. Includes <u>Transfer from Temporary Assistance for Needy Families (TANF) Block Grant of \$4,500,000.</u> | \$ 27,395,663 |
| 2. | Allocation for in-home services provided by county departments of social services. | \$ 2,101,113 |
| 3. | Allocation to the Division of Mental Health, Developmental Disabilities and Substance Abuse Services for residential treatment, day treatment, adult day activity program, developmental day care services, and Community Living Skills Program. | \$ 3,234,601 |

4.	Allocation to the Division of Services for the Blind for case management, chore and independent living services.	\$	3,105,711
5.	Allocation to the Division of Facility Services for Adult Care Home licensure staff to conduct pre-licensure inspections, providing consultation and technical assistance, conducting complaint investigations, and documenting case findings.	\$	426,836
6.	Allocation to the Division of Aging for the Home and Community Care Block Grant for persons age 60 and older, for training and education, and for respite care services.	\$	1,840,234

**DIVISION OF CHILD DEVELOPMENT
CHILD CARE AND DEVELOPMENT FUND PLAN FOR SFY 01-02**

GENERAL DESCRIPTION

For State Fiscal Year 2001-02, federal and state funds available through the Child Care and Development Fund (CCDF) for appropriation are projected to be \$232,439,958. In addition, the NC Department of Health and Human Services is proposing to transfer \$76,675,000 in federal Temporary Assistance for Needy Families (TANF) funds to the Child Care and Development Fund. The US Department of Health and Human Services has not yet released its estimates for Federal Fiscal Year 2001-02 CCDF grant awards. The estimate shown here is based on the continuation of CCDF funding of that North Carolina received in FFY 2000-01.

The purpose of the Child Care and Development Fund is to improve the availability, quality, and affordability of child care. The CCDF is comprised of three funding streams: Mandatory, Matching, and Discretionary. The federal legislation requires that a preponderance of the Mandatory and Matching funds be used to provide child care assistance to families that are receiving public assistance, families that are attempting through work activities to transition off of such assistance, and families that are at risk of becoming dependent on such assistance. A substantial portion of the Discretionary funds must also be used to provide assistance to low-income working families.

The Personal Responsibility and Work Opportunity Reconciliation Act (PRWORA) of 1996 limits administrative costs (as defined by the Federal Administration for Children and Families) to a maximum of 5% of the total CCDF allocation. The NC Division of Child Development plans to set aside 5% of the federal CCDF funds for administrative costs at the state and local level. Funding not used for administration will be used for child care subsidies.

Also a requirement of the PRWORA, the Division plans to reserve at least 4% of the total CCDF allocation for quality and availability initiatives.

Child Care Services

North Carolina uses CCDF "Services" funding to provide subsidies to low-income working families and to support effective implementation of the Subsidized Child Care Program. Families are eligible for CCDF-funded child care based on income and pay a fee of 7-9% of their income.

Welfare reform, known as Work First in North Carolina, requires able-bodied welfare recipients to work, resulting in a high demand for child care subsidies. The Division of Child Development is charged with administering all subsidized child care programs, including the provision of child care to Work First participants.

In SFY 99-00, the Subsidized Child Care Program (funded primarily through the Child Care and Development Fund) supported families in their transition off public assistance by:

- Providing subsidized care to over 167,000 children of which 31,911 were children in families receiving Work First benefits;
- Enabling families that moved off Work First to continue to receive subsidized child care as they worked to stabilize their family budgets.

DIVISION OF CHILD DEVELOPMENT
CHILD CARE AND DEVELOPMENT FUND PLAN FOR SFY 01-02

Under the current eligibility policy, the Subsidized Child Care Program also reduced the need for Work First and other public assistance in the first place. At the local level, subsidized child care has been used to divert families from going on Work First and other forms of public assistance.

To meet the demand for subsidized child care from Work First and other low-income working families, DHHS is proposing to continue to transfer TANF funds to CCDF. Transferred funds will supplement the Discretionary funding stream reserved for low-income working families. Coordination between the Division of Child Development and Division of Social Services will continue as Work First continues to be implemented.

In addition to general child care subsidies, CCDF Services funding is used to provide Head Start Wrap Around care -- child care that "wraps around" partial-day Head Start programs to enable parents to work, search for work, or participate in education or training. Wrap Around care is now accessed by families through the same local offices that provide vouchers to low-income families for subsidized child care -- in many cases, the local department of social services.

Child Care and Development Fund Services funding supports the quality as well as the affordability and availability of child care. Additional funding from CCDF for child care rate increases is disbursed in a such a manner to compensate for quality child care services identified through the rated license system. Interim market rates set for each of the five star rated license levels allow for higher quality subsidized child care to be reimbursed at higher rates. These rates will be replaced with new market rates pending the results of a new market rate survey that will be completed by April 2001.

Quality and Availability Initiatives

The need for quality care is critical. Studies released in recent years have highlighted the potential for extensive brain development in the first three years of life and identified the importance of a safe and nurturing environment for healthy brain development. Study findings published during 1999 support existing research on the *long-term* benefits of high-quality early childhood experiences, as well as showing that the quality of early childhood experiences might have an especially large impact on children who are traditionally at risk of not doing well in school. Based upon the findings from the growing body of research on child development and child care, it is important to promote high-quality child care practices and increase the availability of high-quality care.

Since 1991 (through the Child Care and Development Fund and its precursor, the Child Care and Development Block Grant), North Carolina has supported initiatives that improve the quality and availability of child care. Examples of ongoing initiatives include: child care resource and referral services; school-age child care; efforts to support inclusion of children with special needs in mainstream child care programs; and the Child Care Revolving Loan Fund.

Other newer initiatives that the Division of Child Development plans to continue in State Fiscal Year 2001-02 include: NC Cares (health insurance and wage supplements for child care staff who invest in their own education); efforts to rebuild the availability of quality care in flood-affected areas through the Child Care Disaster Recovery Fund; child care health consultation targeted to

**DIVISION OF CHILD DEVELOPMENT
CHILD CARE AND DEVELOPMENT FUND PLAN FOR SFY 01-02**

providers of infant and toddler care; and assistance to child care providers through implementation of North Carolina's Five Star Rated License.

All regulated child care facilities serving preschool-aged children were switched over to the new Five-Star Rated License system in September 2000. Implementation of the five-star license has now begun for providers of school-age care. Parent outreach will also continue to be a major focus, with special emphasis on making parents aware of the components of quality child care through the rated license.

Additional Division staff were hired last year in order to meet state and federal mandates related to monitoring the use of child care subsidy funds and compliance with licensing requirements and investigation of child abuse and neglect reports in child care settings. This allowed more licensing staff to visit new and existing child care centers and homes to assure compliance with licensing standards. In SFY 01-02, three additional staff are needed. Subsidy program staff are needed to process rate information in a timely manner to ensure that providers are reimbursed at the appropriate rates for the different rated license levels. Due to a 50% increase in the size of the Division, an additional human resources position is needed to provide personnel and administrative support to the new positions. In addition, more workforce staff are needed to support the increasing number of criminal records checks that must be completed according to G.S. 110-90.2.

As funding allows and new needs and opportunities present themselves, the Division of Child Development may also develop additional initiatives that support the goals outlined in the current FFY 1999-2001 CCDF plan, and those that are anticipated to be included in the FFY 2001-2003 CCDF plan prepared by the North Carolina Department of Health and Human Services.

DIVISION OF CHILD DEVELOPMENT CHILD CARE AND DEVELOPMENT FUND PLAN FOR SFY 01-02

CCDF RECOMMENDATIONS	ALLOCATION
1. Allocate funds to local agencies for services support and the provision of child care subsidies for low income working and other needy families. This includes funds for automation to support subsidy reimbursement.	\$146,286,164
2. Federal law requires states to reserve at least 4% of their CCDF allotment for activities to improve the quality and increase the availability of child care. In addition, specific funding amounts of the CCDF have been earmarked for quality activities. These funds will provide for the continuation of existing projects, as well as support new initiatives to enhance the quality of child care in North Carolina. Anticipated projects include increasing the availability of care for school-age children and children with special needs, expanding resource and referral services and parent outreach, promoting provider education and training, improving the monitoring of child care facilities, and providing funding for the T.E.A.C.H. Early Childhood Health Insurance Program and Child Care WAGES through NC Cares. Three additional positions are needed for subsidy, workforce, and personnel units to support increased work levels.	\$17,259,661
3. Limit administrative costs of lead agency and local agencies which administer the child care subsidy program to 5% of the total CCDF allocation.	\$8,607,675
4. Transfer funding from TANF to CCDF. The majority of the TANF funds will be used for child care subsidy and support. The transferred funds are subject to the same requirements that apply to CCDF (minimum 4% for quality improvement; 5% cap on administration).	\$76,675,000
5. Designate state funds to maximize available federal funds for child care services and activities.	\$60,286,458
TOTAL REQUIREMENTS	\$309,114,958

Mental Health Block Grant (MHBG)

SFY 2001-2002

FUNDING LEVEL

Federal funding available to North Carolina is \$9,855,277 for FFY 2001 and an estimated amount of \$9,855,277 for FFY 2002. The proposed MHBG plan utilizes the estimated remaining FFY 2001 amount of \$5,137,322 plus an estimated amount of \$4,717,955 from the anticipated FFY 2002 award.

GENERAL DESCRIPTION

The MHBG provides federal financial assistance to states for the provision of community-based services for people with mental illness. Services provided through the use of the block grant must be those described in the State's Plan in accordance with Federal P.L. 102-321. These services include outpatient, day treatment, psychosocial rehabilitation, emergency services, residential services, etc. for adults and children. The funds may also be used for evaluating programs and services carried out under the plan and planning, administration, and educational activities related to providing services under the State Plan.

SIGNIFICANT FEDERAL REQUIREMENTS

The primary Federal requirements related to the MHBG are that funds must be used as specified within the States' Plan for Comprehensive Community Mental Health Services in accordance with P.L. 102-321, including community based services for adults with serious mental illness and children with serious emotional disturbance; for planning and, evaluating programs and services carried out under the plan; for educational activities related to providing services under the plan; and for administration.

The State must maintain the level of State funds expenditures for mental health services at a level not less than the average of the preceding two year period and must expend an amount equal to the amount expended by the State for fiscal year, 1994 for a system of services for children.

The State must establish and maintain a State Mental Health Planning Council to advise the State regarding the plan.

	PROPOSED MHBG PLAN for SFY 02	ALLOCATION
1.	Adult Mental Health Plan	
	Allocate funds to local programs to provide community-based services for adults with severe and persistent mental illness in accordance with the NC Community Mental Health Services Plan and Block Grant Application. Community-based programs provide an array of services, including	\$5,192,826

	crisis stabilization and other services designed to divert individuals from institutional admission; liaison, case management and other services which facilitate the discharge of individuals from the state's psychiatric hospitals; special programs for the hearing impaired; and training activities.	
2.	Child Mental Health Plan	
	Continuation of Child Mental Health services in accordance with the NC Community Mental Health Services Plan and Block Grant Application such as programs for mental health services in schools, adolescent sex offenders, respite services, family preservation programs, group homes, specialized foster care, therapeutic homes, professional parenting programs, training, and special initiatives to develop systems of care for serving children with serious emotional disturbance and their families.	\$2,378,540
3.	Child Residential Treatment Services	
	Continuation of child mental health residential treatment/services program in order to provide appropriate residential treatment alternatives for children at-risk of institutionalization or other out-of-home placement.	\$1,500,000
4.	Administration	
	Monitoring, data collection, budgeting, payments, and accounting for providers receiving block grant funds. Continue developing contracts for non-administrative activities and to provide technical assistance to service providers.	\$783,911
	TOTAL REQUIREMENTS	\$9,855,277
	Source of Funds (Estimated)	
	MHBG FFY 01	\$5,137,322
	MHBG FFY 02	\$4,717,955

Joint Appropriations Subcommittee On Health and Human Services

Monday, April 9, 2001

4:00 P.M.

Room 643, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Monday, April 9, 2001, at 4:00 P.M. in Room 643 of the Legislative Office Building. Members present were; Representative Edd Nye, Co-Chairman, Representative Beverly Earle, Co-Chairman, Representative Walter Church, Representative Theresa Esposito, and Representative Verla Insko. There were four senators present.

Representative Nye presided over the meeting. Dr. Dennis McBride with the Department of Health and Human Services provided a presentation overview on the Maternal and Child Health Block Grant and Preventive Health Services Block Grant (See Attached). Maternal and Child Health Block Grant is to assist states in assuring that mothers and children, particularly those with low income or limited availability to health services, have access to quality maternal and child health services. These services are aimed at reducing maternal and infant mortality, reducing the incidence of preventable disease and disabling conditions among children, promoting the health of mothers and children, and maximizing the health status of children with disabilities. The Committee members had questions concerning the presentation.

Ms. Flo Stein with the Department of Health and Human Services was next to address the Committee. Ms. Stein gave a review of the Substance Abuse and Prevention/Treatment Program Block Grant. The words Performance Partnership were added to the Block Grant this year. This is important because it is highly earmarked with lots of "sat asides" in it. The Children's Health Act of 2000 reauthorized programs within the jurisdiction of the Substance Abuse and Mental Health Services Administration to improve substance abuse services for children and adolescents and to implement proposals to use block grant funds with accountability based on performance. This program provides funds to states for the provision of prevention and treatment services for children and adults. There are a number of requirements directly related to public health issues. Greater flexibility for use of the funds is enhanced by the repeal of the requirement that the state spend 35 percent of the allotment on drug related activities and 35 percent on alcohol related activities. This section also creates authority for the Secretary of Health and Human Services to waive certain requirement for states that met established performance criteria. Those criteria will be established in regulation after consultation with states, providers and

consumers. There was a discussion concerning Certificate of Need (CON) law. Senator Dannelly asked what could be done to get more beds available. Representative Nye asked that that issue be flagged for further discussion.

The next item on the agenda was Department of Health and Human Services Contracts. Dennis Streets, Deputy Director for Division of Aging, talked to the Committee about the Division of Aging contracts. There are seven this year. He gave a brief review of each of them. Two of them have to do with Alzheimer's Chapters. There are 58 thousand North Carolinians who suffer from some form of dementia and that number is expected to increase to ninety four thousand five hundred by 2020. Since 1989 they have continued a contract with The Center For Aging Research and Education (CARES), located at the School of Social Work at the University of Chapel Hill. They have been a great resource to the Division. They have aided with planning, training, research, and program evaluation. They have allowed the Division to be one of only three states to be able to study baby boomers. Senator Martin noted that Duke was one of the primary centers in the nation for Alzheimer's research. Representative Nye asked to flag the Duke Aging Center Family Support Program. He asked for more information on the program.

The last item on the agenda was Division of Facility Services contracts. Jackie Shepard with the Division gave a presentation on these contracts (See Attached). Their contracts are grouped into three categories; Training, Grant-In-Aid, and Purchase of Services. Senator Purcell noted the contract for Statewide Poison Control Center at Carolinas Medical Center is one of the best investments the States makes. Representative Nye questioned the increase in funding since it had been moved from Duke. The Committee had questions and remarks concerning the contracts.

The meeting was then adjourned.

Edd Nye
Representative Edd Nye, Co-Chairman

Jo Bobbitt, Committee Assistant

**DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF PUBLIC HEALTH
MATERNAL AND CHILD HEALTH BLOCK GRANT**

MCH Block Grant funding for State Fiscal Year 2001-02 is projected at \$16,928,823. This amount is the same as that received in State Fiscal Year 2000-01.

GENERAL DESCRIPTION

The purpose of the Maternal and Child Health Block Grant is to assist states in assuring that mothers and children, particularly those with low income or limited availability to health services, have access to quality maternal and child health services. These services are aimed at (1) reducing maternal and infant mortality; (2) reducing the incidence of preventable disease and disabling conditions among children; (3) promoting the health of mothers and children; and (4) maximizing the health status of children with disabilities. The MCH Block Grant consolidated five programs for which the state received categorical funding. The five programs were (1) Maternal and Child Health, (2) Children's Special Health Services, (3) Supplemental Security Income for Disabled Children, (4) Sudden Infant Death Syndrome, and (5) Lead Based Paint Poisoning Prevention.

RECOMMENDATIONS

ALLOCATIONS

- | | |
|---|---------------------------|
| <ol style="list-style-type: none"> 1. Allocate \$9,838,074 in Healthy Mothers/Health Children Block Grants to local health departments. The proposed allocation is equal to the amount allocated in FY 2000-01. Under this funding concept, local health departments have responsibility for deciding how to use maternal and child health funds to best meet local needs. County and district health departments may use Healthy Mothers/Healthy Children Block Grants to provide prenatal care, preventive and primary care services for children and preventive health services for women of childbearing age. None of the proposed Healthy Mothers/Healthy Children Block Grant allocation is used for state administrative costs. | <p>\$9,838,074</p> |
| <ol style="list-style-type: none"> 2. Designate \$2,012,102 in funds for services and activities that are intended to prevent maternal and infant mortality, prevent disease and disabling conditions among children, and promote the health of mothers and children. Of this total, approximately \$1,842,102 will support technical assistance and best practices grants to local health departments, fetal and infant mortality reviews, high-risk maternity clinics, perinatal education and training, newborn screenings, childhood injury prevention, lead screenings, and asthma control efforts. The Department proposes to use approximately \$170,000 for state administrative costs. This amount includes the salary and fringe benefits of business office and computer network support staff within the Division of Public Health, and indirect cost charges. The proposed amount designated for these activities is equal to the amount in FY 2000-01. | <p>\$2,012,102</p> |

3. Designate \$5,078,647 for medical and health support services to children with chronic illnesses, disabilities or genetic disorders. From these funds, the Department proposes to use approximately \$175,000 for state administrative costs. This amount will support indirect cost charges. The proposed allocation is equal to the amount allocated in FY 2000-01. **\$5,078,647**

**Preventive Health Services Block Grant
State Fiscal Year 2001-2002 Plan**

GENERAL DESCRIPTION

The Preventive Health Services Block Grant (PHSBG) is a formula-based grant from the Centers for Disease Control and Prevention that provides support for services which reduce preventable injury, illness and early death and which improve the quality of life of North Carolina's residents through better health.

The State Plan period of July 1, 2001-June 30, 2002 includes 25% of the FFY 01 award and 75% of the FFY 02 award. The PHSBG Plan is based upon anticipated federal financial assistance of \$4,759,990 for Federal Fiscal Year (FFY) 2000-2001. It is assumed that funding will remain at this level for FFY 2001-2002. The award for FFY 2000-2001 represents a reduction of \$99,194 from the Federal Fiscal Year 1999-2000 award and of \$560,977 from the FFY 1998-99 award.

In addition, funding from the Social Services Block Grant is anticipated to be transferred to the PHSBG for SFY 01-02 in the amount of \$280,067. The same amount was transferred from SSBG in SFY 00-01.

The State of North Carolina plans to budget this grant in the State Fiscal Year beginning July 1, 2001 as follows:

FFY 00-01 Preventive Health Services Block Grant	\$1,189,997
FFY 01-02 Preventive Health Services Block Grant	\$3,569,993
Transfers from Social Services Block Grant	<u>\$ 280,067</u>
TOTAL SFY 2001-02 FUNDS	\$5,040,057

The PHSBG award is divided into 3 components:

1. **The Sexual Assault/Rape Victims Services Program** has an estimated funding level of \$190,134 and is set at the federal level consistent with a set aside provision in the PHSBG legislation.
2. **The Rape Prevention and Education Program** which is authorized under the Violence Against Women Act (Crime Bill) which amended the PHSBG authorizing legislation in 1996. The funding level for this component of the plan is estimated at \$1,139,869.
3. **The Basic Award**, which provides funding for the following programs, covers the balance of the award, and is estimated to be funded at \$3,429,987. This part of the award funds the Statewide Health Promotion Program of the Health Promotion Branch of the Division of Public

Health, the Community Fluoridation Program of the Oral Health Section of the Division of Public Health, and staff support for the Minority Health Council. The basic award also includes an administrative cost of \$108,546, which supports 1.17 FTE administrative positions and operating costs. The \$108,546 includes the salary and fringe benefits for the 1.17 positions (i.e., a Computing Systems Coordinator and a portion of a Public Health Manager position who administers the grant) that provide support for the programs and staff that carry out the grant-supported programs.

The PHSBG state plan also includes transfers from the Social Services Block Grant to support two programs. The plan assumes the transfer amount from the SSBG will be \$280,067. Of the SSBG transfer, \$213,128 will provide support for the Division of Facility Services, Emergency Medical Services program and \$ 66,939 will be used to support HIV/AIDS Education, Testing, and Counseling Services through the Division of Public Health.

Plans for each component proposed to receive Preventive Health Services Block Grant funding are described in the following sections.

Preventive Health Services Block Grant Program Plan, State Fiscal Year 2001-2002

Program Title: Rape Crisis/Victims Services Program

Healthy People 2000 Health Status Objective 7.7 is to reduce rape and attempted rape of women aged 12 and older to no more than 108 per 100,000 women. (Baseline: 120 per 100,000 in 1986)

Health Problem Addressed: Rape and sexual assault are widespread problems that primarily affect women. Approximately one in eight women have been raped at least once, and nearly six in 10 women have been victims of sexual assault. Perpetrators are mostly male, and about 85% are known by the victim. The risk is highest among adolescents and young adults. Preliminary North Carolina data indicates that the problem is widespread in this state. In a study of women enrolled in the N.C. Community College System, 17 percent reported being raped, and 4 percent reported being victims of attempted rape at least once since the age of 14. In the 1997 Behavioral Risk Factor Survey (BRFS), 13.5 percent of adult women reported being raped at least once in their lifetime. Rape and sexual assaults are crimes.

Program Description: Funds allocated to this program will be provided to the Department of Administration, Council for Women to contract with community-based organizations to provide services.

- Activity Objectives:**
1. Provide funds to local rape crisis centers for rape crisis response services, including crisis counseling and operating hotlines.
 2. Assist 5,000 victims of rape and sexual assault to return to work sooner.
 3. Provide rape crisis response, self-defense and educational programs to 6,000 victims.
 4. Provide community education programs to reach 90,000 people.

Funding: \$190,134

FTE Positions: 0

Preventive Health Services Block Grant Program Plan, State Fiscal Year 2001-2002

Program Title: Rape Prevention and Education Program

Healthy People 2000 Health Status Objective 7.7 is to reduce rape and attempted rape of women aged 12 and older to no more than 108 per 100,000 women. (Baseline: 120 per 100,000 in 1986)

Health Problem Addressed: Rape and sexual assault are widespread problems that primarily affect women. Approximately one in eight women have been raped at least once, and nearly six in 10 women have been victims of sexual assault. Perpetrators are mostly male, and about 85% are known by the victim. The risk is highest among adolescents and young adults. Preliminary North Carolina data indicates that the problem is widespread in this state. In a study of women enrolled in the N.C. Community College System, 17 percent reported being raped, and 4 percent reported being victims of attempted rape at least once since the age of 14. In the 1997 Behavioral Risk Factor Survey (BRFS), 13.5 percent of adult women reported being raped at least once in their lifetime. Rape and sexual assaults are crimes.

Program Description: Most of the funds allocated to this program will be provided to the Department of Administration, Council for Women to contract with community-based organizations to provide services. A portion will be used by the Division of Public Health to support 0.2 FTE of an administrative position.

- Activity Objectives:**
1. Conduct strategic planning with the Council for Women, N.C. Coalition Against Sexual Assault (NC CASA) and the N.C. Department of Health and Human Services, including assessing rape prevention education activities and staff resources.
 2. Assist local rape crisis centers in designing and carrying out collaborative projects.
 3. Develop standardized surveys for use in local programs.
 4. Carry out campus rape prevention projects, which will establish regional campus rape prevention consortia, assess the state of rape prevention on college campuses, obtain the support of the UNC Board of Trustees and Board of Governors, provide training to colleges for comprehensive rape prevention programs, develop male-oriented campus rape prevention programs.
 5. Set up at least two training programs for local rape prevention educators on one or more of following areas: "best practice" in rape prevention; tailoring rape prevention for different audiences; program evaluation; marketing and media relations; involving males in rape prevention. Develop guidelines for comprehensive rape prevention programming.
 6. Provide training and tools to rape prevention professionals for working with different ethnic groups and minority communities, including training in culturally-appropriate outreach skills; providing access to culturally appropriate materials; coordinating services and training for professionals who serve special populations.
 7. Provide training for community professionals, including law

enforcement, health-care, district attorneys and school personnel. Provide regional Sexual Assault Nurse Examiner (SANE) training and increase the number of Sexual Assault Response Team (SART) programs in the state.

8. Help establish 10 new or expanded rape crisis and rape prevention programs in counties without them; provide incentives for new or expanded rape prevention programs and identify additional resources for establishing new rape crisis centers.

9. Establish a rape prevention resource clearinghouse and annotated guide of recommended rape prevention curricula and materials and public awareness campaign materials.

10. Begin development of a rape and sexual assault data collection system: activities to include hiring an epidemiologist; establishing consistent definitions; analyzing current data sources; developing a data collection plan; improving Council for Women reporting procedures.

11. Provide funds to local rape crisis centers for rape prevention education activities for adolescents in schools and other settings.

12. Carry out statewide social marketing programs aimed at adolescent males: current activities include formative research on adolescents and selecting and testing messages.

13. With the endorsement of the North Carolina Department of Public Instruction and local school boards, select, adapt or adopt and distribute curricula for middle schools and high schools. Provide training to health teachers to use the curricula.

Funding: \$1,139,869

FTE Positions: 0.2

Preventive Health Services Block Grant Program Plan, State Fiscal Year 2001-2002

Program Title: **Statewide Health Promotion Program**

Healthy People 2000 Health Status Objective 15.1 is to reduce coronary heart disease deaths to no more than 100 per 100,000 people.

Health Problem Addressed: Heart disease and stroke are the first and third leading causes of death, killing 19,441 and 5,434 North Carolinians, respectively in 1998. Risk factors are widespread. CVD is preventable when individuals and communities work together to reduce the major risk factors for these diseases, such as smoking, hypertension, obesity, sedentary lifestyle, dyslipidemia, and uncontrolled diabetes.

Program Description: Funds are allocated to local health departments in each county through the state public health consolidated contract to carry out preventive health services for the target population. In addition, health departments engage in a variety of community based activities focusing on the major cardiovascular risk factors. Some funds are allocated in the Division of Public Health for program support staff and operations, including positions for the Statewide Health Promotion Program, the Older Adult Health Promotion Program, and Local Health Services.

- Activity Objectives:**
1. Through contractual agreements, continue funding to 87 local health departments to support the delivery of effective community based, multilevel interventions directed at population based strategies which create physical and social environments that promote good cardiovascular health.
 2. Provide training and consultation to local health departments and through state/local partnering ensure that all local health departments develop a long- range health promotion plan and yearly annual action plans.
 3. Integrate activities of the StateWide Health Promotion Program with the Statewide Cardiovascular Health Initiative, Start With Your Heart.
 4. Refine reporting, evaluation and surveillance systems to include community level indicators and improved measurements for collection of process, impact, and outcome data

Funding: **\$3,061,182**

FTE Positions: **7.96**

Preventive Health Services Block Grant Program Plan, State Fiscal Year 2001-2002

Program Title: Preventive Dental Services/Fluoridation

Healthy People 2000 Health Status Objective 13.1 is to reduce dental caries so that the proportion of children with one or more caries in permanent teeth is no more than 35% among children aged 6-8 and no more than 60% among adolescents aged 15.

Health Problem Addressed: Dental disease is widespread in children and is a leading cause of absenteeism as well as pain and disability among adults and older people. Most dental problems can be prevented by relatively simple, inexpensive services for children and young people. In 1997-1998 in North Carolina, at least one out of four fifth grade children had a history of dental disease and about 5,000 fifth grade children had obvious untreated caries.

Program Description: Funds are allocated to the Oral Health Section to assist towns and schools to provide technical assistance and train local personnel in the development of fluoridated water systems, and to support basic preventive dental activities.

Activity Objectives:

1. Provide grants to 2 communities to maintain or increase the number of citizens receiving the decay-reducing benefits of systemic fluoride.
2. Defray the cost of providing sodium fluoride rinse for 225,000 schoolchildren.
3. Defray the cost of the annual surveillance technique used to gather data on 85,000 fifth grade children.
4. Defray the costs of providing analysis on the fluoride levels in community water systems and home wells for 12,000 water samples.
5. Defray the cost of 12 educational/promotional exhibits on preventive topics such as fluorides and sealants for statewide use with an estimated 5,000 health professionals, educators and the general public.

Funding: \$ 100,800

FTE Positions: 0

Preventive Health Services Block Grant Program Plan, State Fiscal Year 2001-2002

Program Title: Office of Minority Health

Healthy People 2000 Health Status Objectives: Many of the health objectives for the nation address disparities between minorities and non-minorities in terms of adverse conditions and outcomes, and have established targets for improvement which reflect these disparities.

Health Problem Addressed: The Office of Minority Health does not focus its efforts on a single health problem; however it has recognized that for a number of conditions and risk factors, persons from various minority groups suffer from both acute and chronic health problems to a greater degree than non-minorities.

Program Description: Funds are allocated to the Office of Minority Health to work with the state and local public health system, university and research centers, human services agencies, community groups and organizations with a special focus on minority community based health interventions. Positions supported with these funds include the Director and Assistant Director of the Office, and a clerical employee.

- Activity Objectives:**
1. Promote state level and statewide coordination and collaboration of information, resources and services.
 2. Disseminate the needs assessment reports focusing on three minority groups, Blacks, Native American and Hispanics.
 3. Make recommendations for improving the delivery of and access to health services to the Minority Health Advisory council, public health system and community groups.
 4. Disseminate minority health information via channels such as media interviews, fact sheets, public services announcements, forums, conferences, and reports.
 5. Provide technical assistance to agencies and groups on effective strategies for reaching and serving minorities, potential funding sources and improving grant writing skills.
 6. Work with groups and agencies to improve methods for collecting and reporting minority health data and to establish and implement a surveillance system to measure progress towards improving the health status of minorities.
 7. Work with groups and agencies to provide cultural diversity training for providers and administrators and to work with groups and agencies to increase the availability of culturally-based and linguistically-appropriate programs and services.

Funding: \$ 159,459

FTE Positions: 2.93

Preventive Health Services Block Grant Program Plan, State Fiscal Year 2001-2002

Transfers from Social Service Block Grant

1. Division of Facilities Services/Emergency Medical Services

Program Description

Each year, funds from Social Services Block Grant (SSBG) are transferred to the Preventive Health Services Block Grant for distribution to the Office of Emergency Medical Services (OEMS) in the Division of Facility Services (DFS). In SFY 2001, this amount was \$213,128 for the fiscal year. For SFY 2002, the anticipated transfer is also \$213,128. As in the past, the funds will be used by the OEMS in DFS to support federally funded staff positions, the statewide Ambulance Call Reporting (ACR) system and the statewide Trauma Registry. A total of five full time clerical positions in the Division of Facility Services are funded using SSBG money. Salaries and fringe benefits for these positions total \$132,171 for SFY 2002. One of these positions serves as the primary agency receptionist processes incoming and outgoing mail and serves as the secretary for the Grants Specialist/Disaster Specialist position. One position serves as the secretary to support the statewide trauma program and assists with our certification program. One is the secretary for our statewide certification process and another is the primary processor of EMS certifications statewide. The final position serves as the only secretary to support our Eastern Regional Office in Greenville.

The remainder of SSBG funds in the Division of Facility Services is used, along with state funds, to support the ACR system through printing of forms for distribution to EMS providers and to support the contract for the Central Data Collection Agency for the Trauma Registry.

Approximately, \$75,000 will be used to support the Trauma Registry and the remaining \$5,957 is used for printing ACR forms that are provided free of charge to EMS agencies using the ACR system.

Budget Summary

Clerical Staff Positions (5 FTE) in the Division of Facility Services	\$132,171
Ambulance Call Report System (printing ACR Forms/software)/DFS	\$ 5,957
Central Data Collection Agency for Trauma Registry/DFS	\$75,000
TOTAL – Division of Facility Services	\$213,128

FTE Positions: 5.0

2. Division of Public Health/HIV Prevention

Program Description

This transfer will allocate funds to local health departments to support personnel and programs for HIV/AIDS education, counseling, and testing. The local health departments emphasize AIDS education and testing efforts targeted at persons at highest risk to ensure that these efforts are maximally effective in controlling the epidemic.

TOTAL – Division of Public Health	\$66,939

***Substance Abuse Prevention & Treatment Performance Partnership Block
Grant
SFY 2001-2002***

FUNDING LEVEL

The annual Federal Substance Abuse Prevention and Treatment Performance Partnership Block Grant (SAPTPPBG) award is currently \$33,680,936. Funding for the SFY 02 Plan is based on an estimated balance of \$19,795,584 from the FFY 01 award and \$16,660,017 from the FFY 02 award.

GENERAL DESCRIPTION

The Children's Health Act of 2000 reauthorized programs within the jurisdiction of the Substance Abuse and Mental Health Services Administration (SAMHSA), to improve substance abuse services for children and adolescents and to implement proposals to use block grant funds with accountability based on performance.

Section 3303— Substance Abuse Prevention and Treatment Performance Partnership Block Grant. This program provides funds to states for the provision of prevention and treatment services for children and adults. There are a number of requirements directly related to public health issues. Greater flexibility for use of the funds is enhanced by the repeal of the requirement that the state spend 35 percent of the allotment on drug related activities and 35 percent on alcohol related activities. This section also creates authority for the Secretary of HHS to waive certain requirement for states that met established performance criteria. Those criteria will be established in regulation after consultation with States, providers and consumers.

SIGNIFICANT FEDERAL REQUIREMENTS

1. States are required to maintain financial support for substance abuse prevention and treatment services at the average of what it spent over the past two years. This Section includes a provision that would exempt from maintenance of effort requirement any one-time infusion of funds, which are for a singular purpose.

2. States are required to use 20% of their allotment for primary prevention.
3. States are required to maintain financial commitment to services for pregnant addicts and women with children and to give preferential treatment to pregnant addicts.
4. States are required to provide treatment for intravenous drug abusers within 14 days of the individual requesting treatment and requires treatment facilities to inform the State when they are a 90% capacity.
5. States are required to ensure that facilities receiving Federal funds provide tuberculosis services.
6. States are required to enact and enforce State laws prohibiting the sale and distribution of tobacco products to minors. States are required to carry out activities to reduce the availability of tobacco products to minors including random unannounced inspections of outlets. This Section requires the Secretary of HHS to penalize the State up to 40% of their allotment for failure to comply.
7. States are required to conduct needs assessments.

PROPOSED EXPENDITURE PLAN**ALLOCATION**

- 1. Adult Substance Abuse**

Continuation of community and ADATC based alcohol and drug services including prevention, intervention, treatment, rehabilitation, and detoxification. Funding to support intervention and treatment services for offenders who remain in the community. Funds will be used to provide treatment services for offenders with substance abuse problems in community punishment programs. Continue support for group homes for recovering substance abusers. Tuberculosis services will be provided to all program participants. Special services for the deaf will be provided at the ADATC in Greenville, NC, with outpatient services for the deaf established in each region. Programs will be required to screen clients for TB and other infectious diseases.

\$14,501,711

- 2. Women's Substance Abuse**

Continuation of services for pregnant women and women with dependent children. Specialized services will be provided at the ADATCs for women. Continue to develop specialized services for TANF participants whose substance abuse is a barrier to self-sufficiency.

\$6,007,303

- 3. Intravenous (IV) Drug**

Continuation of services to IV drug abusers and others at risk for HIV disease. Special services for IV drug users will be provided at the ADATCs.

\$5,209,934

- 4. Child Substance Abuse**

Continue services to children and adolescent including prevention, high-risk intervention and regional residential services. Services will include treatment

\$6,839,190

for children in detention and training schools. Prevention activities will include strategies to discourage use of alcoholic beverages and tobacco products by individuals to whom it is unlawful to sell or distribute such products. Services will be delivered in accordance with the 1993 Mental Health Study Commission Child and Adolescent Alcohol and Other Drug Abuse Plan, including school-based health clinics to provide prevention, early intervention and treatment services and services for youth in the juvenile justice system.

- | | | |
|----|---|-------------|
| 5. | Substance Abuse Focus on Families
Prevention and treatment services will be provided for children who are impacted by parental addiction. | \$774,414 |
| 6. | Child SA Residential Treatment
Establish Child Residential Treatment Services Program. | \$500,000 |
| 7. | Administration
Planning, Quality Assurance, Development of new treatment and prevention services and training for providers receiving Block Grant funds. Continue the development of a performance management system based on outcomes, support the design of an improved behavioral health system and monitor prescription drug diversion. | \$2,623,049 |

ON
HEALTH AND HUMAN SERVICES**

Room 424, Legislative Office Building
Tuesday, April 10, 2001
3:30 p.m.

Minutes

The Joint Appropriations Subcommittee on Health and Human Services met Tuesday, April 10, 2001 in Room 424 of the Legislative office Building. The full Senate Membership and Representatives Earle and Nye were present. After the introduction of the Pages, Senator Bill Martin, Presiding Chair, called the meeting to order. He stated that the meeting would continue from the morning's meeting with the discussion of the Division of Social Services.

Susan Morgan was recognized to continue the presentation of the Division of Social Services focusing on Services for Adults and Families. She began on page 38 of the attached handout (Attachment #2). This section provides a variety of services including guardianship services, case management services, problem pregnancy services as well as many other areas. Her presentation included adult protective services, placement services and state county special assistance. Also included in her presentation is a report from the State Auditor's Office on the cost reporting systems for adult care programs.

Following the overview and explanation of adult protective services, questions and discussion from the committee were received. There are three types of special assistance, assistance for the aged, assistance for the disabled and assistance for children of disabled. Eligibility requirements include, a resident of the state of North Carolina, a citizen of the United States and income eligibility for the program is determined by local DSS agencies. Two factors currently determine cost of providing special assistance, the size of payments made to eligible recipients and the number of recipients. This number continues to increase as the population ages and life expectancy increases.

In 1997, DHHS was directed to study alternate ways to provide assistance. In 1998 the Department requested from the General Assembly to conduct a pilot project providing special assistance to 400 persons who are not residing in an adult care home. The final report of this pilot project is due to the General Assembly in 2001.

The committee requested information regarding phase one of the resident evaluation service. John Tanner, Chief of Adult and Family Services, Division of Social Services was present to assist with questions and offer comments. He stated that there is a mix of elderly residents with younger adults and in some situations the younger residents mistreat the older residents. Phase one of the assessment is done at the county level. The Division of Mental Health Services assists with the assessment process. There is very positive reaction from the local employees to this program.

Regarding the summary of the report on Adult Care from the State Auditor, the Chair suggested that a special meeting be held to review and discuss that report. Susan Morgan gave an overview of the report. The objectives of the report were broken down into four

objective areas including program statistics, laws policies and procedures, financial information and occupancy rate impact. The summary of the findings of the report include under program statistics, that the number of adult care beds have continued to increase since the 1997 statewide moratorium. Approximately 22,000 new beds have been added since that time. The department is not maintaining records on the status of exempted beds.

Findings for laws policies and procedures -- the department is inconsistently enforcing the laws governing adult care home care cost reporting. The department has limited means for assuring the quality of care in adult care homes.

Findings for financial information -- that the department is not reviewing the cost report audit procedures. The department does not allow electronic submission of cost report and cost reports do not require disclosure of related party or conflict of interest relationships or transactions. Adult care homes audit procedures need to be strengthened.

Findings for occupancy rate impact -- the current methodology recognizes occupancy rate. Detailed financial data needed to evaluate the percentile used is not required by the state. The Department has consistently applied the methodology approved by the General Assembly.

Recommendations that correlate to each of the findings were also reviewed. Recommendations included are: the General Assembly should carefully review the number of beds approved under each exemption category. The Department should develop procedures to periodically determine the status of exempted adult care home beds and these records should be maintained and made available for review by the General Assembly.

During committee discussion the definition for exempted adult care was clarified to when the moratorium was passed certain exemptions were allowed for facilities who were currently in the process of increasing bed size or in situations in which the county commissioners determined that there was an immediate need for the bed. Occupancy rate issue as it relates to change in format; currently the rates are set at 75th percentile based on the rate cost with the direct care cost and 60th percentile based indirect cost. The Chair stated that perhaps the formula should be looked at in terms of the level of complexity to determine if the form could be improved.

Mr. Gary Fuquay, State Controller's office was also available to answer questions.

The meeting was adjourned at 4:45 p.m.

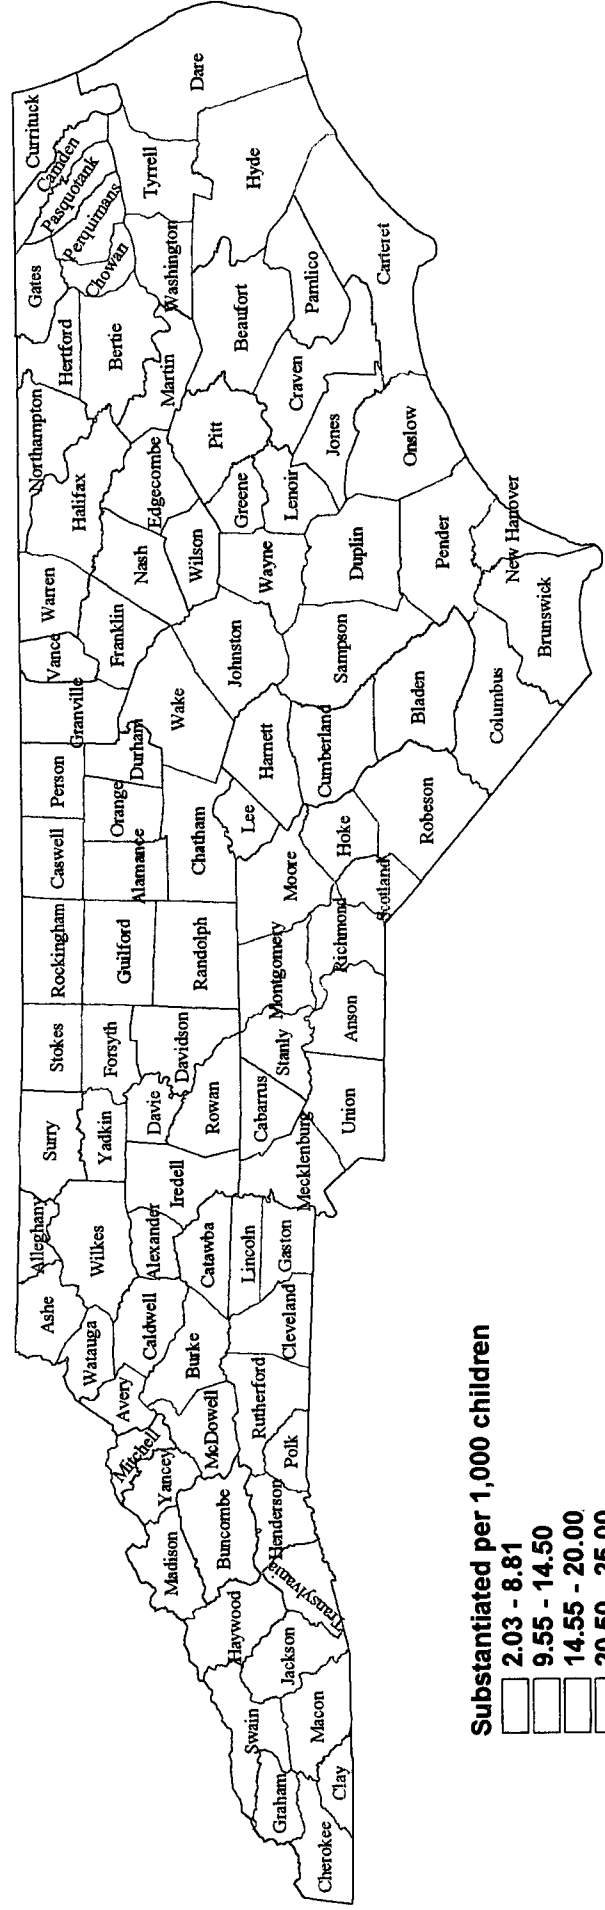

William N. Martin, Chair

Joyce Crews Hodge, Clerk

Division of Social Services

Child Protective Services

The overall goal of Child Protective Services (CPS) is to protect children from abuse, neglect and dependency, while attempting to preserve the family unit.

Specific Activities Include:

- **Investigating suspected cases of abuse and neglect;**
- **Assisting the family in diagnosing the problem;**
- **Providing in-home counseling and supportive services to help children stay at home with their families;**
- **Coordinating community and agency services for the family;**
- **Petitioning the court for removal of the child, if necessary; and**
- **Providing public information about child abuse, neglect, and dependency.**

Division of Social Services

Child Protective Services

- CPS is the portal of entry into the Child Welfare system of services.
- Local Departments of Social Services are mandated to accept and investigate reports of abuse, neglect and dependency.
- G.S. 7B-302 requires local staff to initiate an investigation immediately, but no later than 24 hours when physical or sexual abuse is alleged and an investigation within 72 hours for reports of neglect or dependency.

Division of Social Services Child Protective Services Funding

Total Funding for FY 99/00= \$85,156,119*

*Provider funding (<1%) included in the total funds, is not reflected in the chart.

Division of Social Services

Child Protective Services

- 100,682 Children were subjects of an Investigative Assessment in FY 99/00.
 - Substantiated Cases = 31,828 children (31.6%)

*age 0-6
36% 7-12
Snellen 13-18*

Division of Social Services

Intensive Family Preservation Services

What is it?

The goal of Intensive Family Preservation Services (IFPS) is to prevent the unnecessary placement of children away from their families by providing intensive, in-home services that result in long-term improvements in parents' abilities to care for and protect their children.

Division of Social Services

Intensive Family Preservation Services

Program Design:

- Targets families with children at imminent risk of out-of-home placement.
- Time-limited services (not to exceed 6 weeks).
- At least 50% of the contact hours are in the family's home.
- 24 hour access to family preservation caseworker.
- Caseloads no greater than four families at any given time.

Division of Social Services

Intensive Family Preservation Services

Populations Served

Division of Social Services

Intensive Family Preservation Services

During FY 99/00 862 children were identified as at-risk of out-of-home placement. Of the 862 children identified, 57 children were placed in out-of-home settings, or were no longer living at home. IFPS diverted placement of 805 children(93%).

Division of Social Services

Child Placement Services

Child Placement Services are provided to children who need a temporary home and include:

- Providing temporary homes for children in DSS custody
- Supervising children in foster care;
- Providing ongoing counseling and support services to help families and children reunite and stay together;
- Providing extra counseling and support for families and foster parents of children who are ill, disabled or delinquent;
- Petitioning the court for legal termination of parental rights;
- Making recommendations for adoption for children unable to return home;
- Recruit, screen, and train potential foster care and adoption parents, and perform home studies and local criminal background checks of potential parents to ensure the safety of children.

Division of Social Services

Foster Care

- In FY 99/00, 10,774 children were in DSS custody.
- Over 3,000 foster care children are currently in need of adoption.
 - 847 children are *available* for adoption.
 - 1,231 foster care children were adopted last year.
 - On average, children stay in foster care 20 months.

Special Children Adoption Fund

- Established by the General Assembly in 1997.
 - Original fund amount = \$911,687
 - FY 2000 fund amount = \$3,911,687
- The number of children served through this funding has increased since FY 97/98.
 - 156 children served in FY97/98
 - 178 children served in FY98/99
 - 385 children served in FY99/00

Division of Social Services

Special Needs Adoptions Incentive Fund

Established by the General Assembly in 2000.

- Provided \$500,000 for selected licensed foster families to adopt children with very special needs.
- 24 counties have expressed an interest in participating.
- Fund can only be used to support adoptions that occurred on or after January 1, 2001.
- No funds have been expended to date.
- Anticipating the adoption of 50 – 60 foster care children with these resources.

*Monthly Rate Established by the General Assembly

Division of Social Services

Policy Issues/Options

- Investigate options/strategies for obtaining a waiver for federal dollars to cost-share in the adoption of children with special needs.
- Degree of variation across the State in substantiated cases of child maltreatment.
- Evaluate the number of children adopted through private agencies vs. the number of children adopted through public agencies, and the cost per placement for future adoption program planning.
- Racial disparity continues to be an issue in Child Services. A disproportionate amount of African American children continue to be placed in out-of- home arrangements

Division of Social Services

Adult Protective Services

County departments of social services receive and evaluate reports to determine whether disabled adults are in need of protective services and what services are needed.

Activities include:

- Receiving reports of possible abuse;
- Evaluating the circumstances and need for protective services;
- Planning and counseling with the disabled adult, the family or caregiver to identify, remedy, and prevent problems which result in abuse, neglect, or exploitation;
- Reporting evidence of mistreatment to the District Attorney and various regulatory agencies when appropriate;
- Initiating court action as necessary to protect the adult; and
- Mobilizing essential services on behalf of the disabled adult.

Division of Social Services

Adult Placement Services

Adult Placement Services help aging or disabled adults find appropriate living and healthcare arrangements when their health, safety, and well-being can no longer be maintained at home. Placement arrangements are made in adult care homes, nursing homes, other substitute homes, residential health care settings, or institutions.

Division of Social Services

State/County Special Assistance for Adults

State County Special Assistance (SA) provides a cash supplement to aged and disabled persons with special needs. Payments are made to individuals living in an adult day care home, whose personal income does not cover the cost of care in the facility.

There are three types of SA:

- *Assistance for the Aged*
- *Assistance for the Disabled*
- *Assistance for the Certain Disabled*

Division of Social Services

State/County Special Assistance for Adults

Eligibility:

- Must be a resident of the State of North Carolina;
- A citizen of the United States;
- Local DSS Agencies determine ^{income} eligibility of applicants.

Division of Social Services

State/County Special Assistance for Adults

- Two Factors currently determine the costs of providing SA:
 - The size of the payments made to eligible recipients; and
 - The number of recipients.

Division of Social Services

State/County Special Assistance for Adults

- **Size of payments**
 - SA Payment = “countable income” – (monthly rate + Personal Needs Allowance)
 - Monthly rate is currently at \$1,062
 - Personal Needs Allowance is currently at \$36/month
 - The average monthly SA payment for FY 99/00 was \$434.
- **Number of Recipients**
 - Continues to increase as the population ages and life expectancy increases.

Division of Social Services

Special Assistance Demonstration Project

1999 Legislation approved DHHS to conduct a pilot project to provide SA to up to 400 eligibles living at home. The final report is due to the General Assembly in 2001.

Division of Social Services

Status of New Resident Evaluation Services

- Established by the General Assembly in 1999 to provide Resident Evaluation Services (RES) to applicants and recipients of SA.
- Implementation of Phase I of RES began in March, 2000.
- Phase II is scheduled to begin with an eight-month pilot, starting July 1, 2001 and operating through February 28, 2002.
- Statewide implementation is scheduled to begin in May, 2002.

Division of Social Services

Resident Evaluation Services

- Resident Evaluators provide the following functions:
 - Assess SA applicants and recipients for level-of-care requirements.
 - Assess SA applicants and recipients for mental health service needs and refer them to area mental health programs or other qualified professionals.
 - Assess SA applicants and recipients to identify those who need community based services and refer them to appropriate services.
 - Provide technical assistance to facilities on resident assessment and care planning using the new assessment instrument.

Division of Social Services

Expenditure Growth in Adult Care Homes

Total Expenditures in 1994/95 = \$123,781,835

Total Expenditures in 1999/00 = \$203,960,202

Total Certified Budget for 00/01 = \$252,872,124

There has been a 104% increase in expenditures over the last 7 years. Total expenditures have more than doubled.

Division of Social Services

Performance Audit

Summary of Findings

Program Statistics

- The number of Adult Care Beds has continued to increase since the 1997 statewide moratorium.
- The Department is not maintaining records on the status of exempted beds.
- The State is developing a comprehensive plan for long-term care that includes the provision of Adult Care Home Services.

Laws, Policies and Procedures

- The Department is inconsistently enforcing the Law governing Adult Care Homes Cost Reporting.
- The Department has limited means for assuring the quality of care in Adult Care Homes.

Division of Social Services

Performance Audit *Summary of Findings*

Financial Information

- The Department is not reviewing the cost report audit procedures.
- The Department does not allow electronic submission of cost reports.
- Cost reports do not require disclosure of related party or conflict of interest relationships or transactions.
- Adult Care Homes audit procedures need to be strengthened.

Occupancy Rates Impact

- The current methodology recognizes occupancy rates.
- Detailed financial data needed to evaluate the percentiles used is not required by the State.
- The Department has consistently applied the methodology approved by the General Assembly.

Division of Social Services

Performance Audit

Summary of Recommendations

Program Statistics

- The General Assembly should carefully review the number of beds approved under each exemption category.
- The Department should develop procedures to periodically determine the status of exempted adult care home beds. These records should be maintained and be available for the General Assembly to review.
- The Department should continue efforts to address the provision of adult care home services as part of the continuum of long-term care, provisions should address the growth of the industry, the cost of providing services, as well as quality of care issues.

Division of Social Services

Performance Audit

Summary of Recommendations

Laws, Policies and Procedures

- The Division of Facility Services should immediately implement a process to suspend admission of those facilities not in compliance with GA 131-D-4.2. Facility Services should develop and implement clear, step-by-step procedures to follow when a facility does not submit the required cost reports. Further, the Division should maintain adequate records to monitor current status of reporting facilities. The Department of the Controller's Office should revise delinquency notification to reflect current law and set clear instructions and time limits for performing functions. Finally, the two Divisions should work together more closely to ensure compliance and resolve issues regarding questioned facilities.
- Support the Department's initiative in exploring alternative payment procedures that could have a more direct affect on quality of care. The Department should communicate payment options to the General Assembly for consideration.

Division of Social Services

Performance Audit

Summary of Recommendations

Financial Information

- The Department Controller's Office and the Internal Auditor should determine which Division should perform a detailed review of the submitted cost report audit procedures.
- The Controller's Office should develop a plan to phase in electronic filing of adult care homes cost reports.
- The Department should begin requiring conflict of interest and related party disclosure in the cost report.
- The Department Office of Internal Auditor should modify the audit procedures to include procedures designed to insure that all related party transactions identified are reasonable and necessary to the operation of the facility. Also, procedures should be developed and implemented to verify the indirect or overhead costs passed down from the corporate office.

Division of Social Services

Performance Audit

Summary of Recommendations

Occupancy Rates

- The General Assembly needs to determine whether costs associated with revising the methodology provide sufficient increased benefits to the residents to mandate the change. Requiring the additional financial information would necessitate amending the General Statutes.
- The Department should continue to provide the General Assembly with options based on differing vacancy percentages for consideration in the rate approval process. These options should show the projected dollar impact associated with different levels. The General Assembly should consider establishing the monthly rate for a two-year inflation factor or a one-year inflation factor.

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

**Minutes
April 11, 2001
8:30 A.M.**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Wednesday, April 11, 2001, in Room 424 of the Legislative Office Building.

House Co-Chair, Representative Beverly Earle opened the meeting by introducing the Pages. She thanked them for taking time to join the General Assembly for this week. The following members were present:

**Representative Edd Nye, Co-Chair
Representative Debbie Clary
Representative Theresa Esposito
Representative Verla Insko
Representative Thomas Wright**

Six Senate members were present.

Division of Social Services

Karen Hammonds-Blank continued the presentation from the previous meeting. She stated that the Division of Social Services is a very large division and she will focus only on "**Child Support Enforcement Program**". (See Attachment II) The Mission is to help children in absent parent families obtain financial support.

Child support enforcement services are available to anyone who wants or needs help in collecting child support through a network of state and locally operated offices across the state. Local child support offices, many of which are located in county departments of social services, serve each county in the state.

Child Support Enforcement

The creation of a nationwide system of child support was in response from Congress to reduce public expenditures on welfare. This was established in 1975, and the child support enforcement program is a federal/state/local partnership. The Federal government's cost share is 66% and state/counties share is 34%.

Services are available to anyone responsible for a child, regardless of income. Any family receiving temporary assistance for needy families (TANF) are required to Appropriations Subcommittee on Health and Human Services

Minutes
April 11, 2001
Page 2

participate in the program. A child support order may be established for children up to age 18 (20 if the child is still in high school). Enforcement of support obligations are:

- Income Withholding by Employers
- Filing Court Action
- Credit Bureau Reporting of Child Support Obligations Handled by CSE
- Interception of State & Federal Tax Returns
- Liens of Real or Personal Property

Future funding for the child support enforcement in \$1.9 million in new appropriations which is required to continue and complete the child support enhancements.

Questions and comments were made at this time, answered by staff and the meeting was adjourned.

Respectfully submitted,

Presiding Co-Chair, Representative Beverly Earle

Committee Assistant, Ann Raeford

Joint Appropriations Subcommittee On Health and Human Services

Thursday, April 12, 2001

8:30 A.M.

Room 424, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Thurs, April 12, 2001, at 8:30 A.M. in Room 424 of the Legislative Office Building. Members present were: Representative Edd Nye and Representative Beverly Earle, Co-Chairs; Representative Theresa Esposito, Representative Verla Insko, Representative Thomas Wright, and Representative Mark Crawford. There were six senators present.

Representative Nye presided over the meeting. He introduced Representative Mark Crawford, who replaced former Representative Lanier Cansler.

Karen Hammonds-Blanks, fiscal research staff, provided a presentation overview of the economic independence section of the Division of Social Services (See Attachment). There are three broad areas in this section. "Work First Program" helps to move welfare families to self-sufficiency, Food Stamps help low-income families pay for food, and Program Integrity helps low-income households that are in crisis. Due to time constraints, she only discussed the Work First Program. She reviewed the history of the reform in welfare in the State. In August 1996, Congress and the President enacted Federal Welfare Reform (Personal Responsibility and Work Opportunities Reconciliation Act). This replaced the old entitlement program known as the Aid to Families with Dependent Children (AFDC). The purpose of the Work First Program is to provide eligible families with short-term assistance to facilitate their movement to self-sufficiency through gainful employment, not the mere reduction of welfare rolls. The ultimate goal is the gradual elimination of generational poverty. The Work First Program provides an array of services and supports: cash assistance, short-term training, childcare assistance, transportation to work or training, job readiness, parenting education, financial planning, and other services to help families become self-sufficient.

The Committee had questions concerning the presentation and information listed in the handout. Representative Insko asked how the amount of the block grant gets set. Ms. Hammonds-Blanks responded that there are two components; the continuation budget state funds and Temporary Assistance for Needy Families (TANF).

Ms. Hammonds-Blanks gave an overview of how the Work First Program is doing after five years. Maximus, Inc. contracted to Evaluate Work First Program and former welfare programs. There were three key findings: The length of stay on welfare is shorter under

Work First, welfare payments were less for Work First, and little difference was found in employment and earnings. There is an executive summary that details the findings.

The Temporary Assistance For Needy Families Block Grant was reviewed. There are four goals; to end welfare dependence, to encourage the formation and maintenance of two-parent families, to reduce the incidence of out-of-wedlock births, and to provide assistance to needy families so children may be cared for in their own homes. Senator Forrester asked if these goals are being met. Each county is measured on these issues. The Department will get information for him. Senator Kerr expressed concern with the number of babies born to single parents. Representative Esposito pointed out there may be a downturn in the economy and was concerned with how it will affect the program. Ms. Hammonds-Blanks answered other Committee members' questions.

The meeting was then adjourned.

DIVISION OF SOCIAL SERVICES

WORK FIRST

What is Work First?

An Array of Services and Supports:

- Cash Assistance
- Short-term Training
- Childcare Assistance
- Transportation to Work or Training
- Job Readiness
- Parenting Education
- Financial Planning
- Other Services to Help Families Become Self-Sufficient

**DIVISION OF SOCIAL SERVICES
WORK FIRST**

Who May Receive Cash Assistance?

Three Types of Cash Assistance Cases:

**Regular - Low-to-No Income, Single Parent
With a Dependent Child**

**Child Only - Dependent Child Usually
Residing With a Family Member**

**2-Parent - Low-to-No Income Families with
Dependent Children**

DIVISION OF SOCIAL SERVICES

WORK FIRST

Who May Receive Cash Assistance?

Work First Cash Assistance:

- Income Eligible Families with Children Through Age 17 (biological, adoptive parents, stepparents and other relatives may apply for assistance);
- Teen Parents Under Age 18 Must Live at Home (or in an Approved Adult-Supervised Arrangement and Remain in School;
- Legal Immigrants (If Eligible, Living in the United States on or Before August 22, 1996)

DIVISION OF SOCIAL SERVICES

WORK FIRST

What Are the Requirements to Receive Cash Assistance?

- Within 12 Weeks of Being Found Eligible for Temporary Assistance, Adults Should be Working and/or Engaged in Work Activities for at Least 35 Hours Per Week;
- Single Parent of a Child Less Than One is Not Required to Comply With Work Requirements;
- Signed Mutual Responsibility Agreement that Describes Steps the Family Will Take to Become Self-Sufficient and Support Services the County Will Provide;
- Cumulative Total of 24 Months of Cash Assistance (After 24 Cumulative Months Families Must Wait 36 Months Before They May Reapply;
- Cumulative Lifetime Total of 60 Months or 5 Years for Assistance

DIVISION OF SOCIAL SERVICES

How Can At-Risk Families Stay Off Welfare?

Work First's Three Strategies:

1. ***Diversion:*** Keeping Families Off Welfare by Helping Them Cope With Unexpected Emergencies or Setbacks. Families May Get Up to Three Months:
 - ✓ Diversion Assistance
 - ✓ Childcare
 - ✓ Food Stamps, and
 - ✓ Medicaid
2. ***Work:*** Shortening the Length of Time Families are on Welfare by Making Work Mandatory and by Limiting How Long a Family can Receive Cash Assistance. To Receive Work First Benefits:
 - ✓ Parents Must Register With the First Stop Employment Assistance Program
 - ✓ Sign a Mutual Responsibility Agreement
3. ***Retention:*** Helping families Stay off Welfare by Encouraging Them to Save and by Helping to Them Stay Employed

**DIVISION OF SOCIAL SERVICES
WORK FIRST**

Who May Receive Non-Cash Assistance?

SUPPORT SERVICES:

- ✓ Emphasis on Keeping Former Welfare Families Working
- ✓ Prevent At-Risk Families From Going on Public Assistance
- ✓ Families up to 200% of the Federal Poverty Level
- ✓ Services May Include Employment Related Services, Transportation to/from Work, Post-Employment Short-Term Skills Training, Child and Family Enrichment Services
- ✓ Optional Employment Related Services Maybe Provided to Non-Custodial Parents

Joint Appropriations Subcommittee On Health and Human Services

Monday, April 16, 2001

4:15 P.M.

Room 424, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Monday, April 16, 2001, at 4:15 P.M. in the Legislative Office Building. Committee members present were: Representative Edd Nye and Representative Beverly Earle, Co-Chairs, Representative Debbie Clary, Representative Theresa Esposito, Representative Verla Insko, Representative Thomas Wright, and Representative Mark Crawford. There were three senators present.

Representative Nye chaired the meeting. He asked Karen Hammonds-Blanks, Fiscal Research staff, to continue with her report from the last meeting. She began on page 55 of the report titled, Economic Independence. This relates to TANF funded items. The first item is named Work Central, which is an electronic self-sufficiency call center located in Edgecombe County and serves six counties.

Representative John Hall and Representative Joe Tolson were visiting the meeting and were recognized to discuss the Work Central Program. Representative Tolson stated the program has been very effective for Edgecombe County. It is doing a good job of helping people find jobs and would like for it to continue. Representative Esposito asked the Chairman how the participating counties were selected. Mr. Peter Leousis with the Department, responded that the counties selected themselves. They came up with the idea. The State provides a lot of the funding for the program, but the counties match the State funding. This match isn't matched dollar for dollar. These six counties realized their circumstances were such that they needed the program. They visited the State of Washington to see a similar program.

Representative Nye asked what Rural Economic Development does. Ms. Hammonds-Blanks responded some money was filtered down through them to Faith Based Initiative Programs. Representative Nye asked the Department to provide a list with accountability and whom they directly report to. One million went to the Saint Paul Initiative to purchase computers for job training. Primarily, most is used for mentoring and transportation services. They report directly to staff at Rural Economic Development Center. Senator Martin asked if there were any valid results of impact and how effective it has been. The Department spokesperson responded there is an evaluation program that measures the results and they partnership with other agencies.

Ms. Carol Shaw, Fiscal Research Staff was the next presenter. She began on Page 55 of the handout. There were questions and discussion concerning TANF funds.

Ms. Hammonds-Blanks again addressed the Committee concerning policy issues listed on Page 57; success for Work First Families Initiative. There was a discussion concerning how this is different from the Job Link Program.

Ms. Susan Morgan, Fiscal Research Staff, was the last presenter and she gave an overview of the Division of Social Services options (See Attachment). She reviewed layers of management and non-critical positions. Contracts they recommend reducing are training and consulting contracts, contracts for database creation and management, and Maximus contract.

The meeting was then adjourned.

JOINT APPROPRIATIONS SUBCOMMITTEE

ON

HEALTH AND HUMAN SERVICES

Room 424, Legislative Office Building

Tuesday, April 17, 2001 8:30 a.m.

Minutes

The Joint Appropriations Subcommittee on Health and Human Services met Tuesday, April 17, 8:30 a.m. in Room 424 of the Legislative Office Building. After introduction of the pages, the presiding Chair, Senator Bill Martin called the meeting to order with three Senate members and Representatives Earle, Nye, Esposito, Insko, Wright and Crawford present. Senator Martin announced that the committee would not be meet in the afternoons because of the crossover deadlines. He stated that a response the question regarding work first eligibility will be distributed to the members. That response is included with these minutes as Attachment #1.

He stated that Chip Modlin, Director of Social services would begin today's meeting with a presentation on the TANF Block Grant. A copy of his presentation is included as Attachment #2 and the proposed block grant, Attachment #3. He began his presentation with a summary of the history of the TANF Block Grant. It is five-year block grant previously authorized as AFDC -- jobs, eligibility determination; AFDC emergency assistance, which includes certain child welfare services. He stated that there is strong support for the TANF Block Grant and the achievements that have occurred during the past five years. Preparations are in progress for the actual reauthorization process next year. The southern states have been working to pull together, in addition to the base grant, the supplemental grant, which is approximately \$30 million in North Carolina. He stated that the base amount \$302,240,000 is not changed.

The Performance bonus of last year was \$8.2 million. Compared to last year's available funds of \$425 million, this year is \$357 million. Significant reductions required in the budget forced many good programs to be reduced or eliminated. The core services such as child placement, readiness, retention services, keeping children in their own homes or placement with relatives and giving families stability and solidarity, have been discussed in depth in Washington.

Mr. Modlin stated that cash assistance is one of the primary starting points in Work First. During the last six months payments there is been a slight decrease. Cash assistance should be maintained at three percent above what it was for the first six months of this fiscal year. Attachment #4 shows the programs that are proposed for funding and also programs that had to be cut or eliminated.

During questions and committee discussion, Senator Martin questioned the time frame for the 85% job retention rate, is that after six months or twelve months. Pheon Beal stated that the retention rate has been tracked since 1995 and the 85 to 90 percent is usually after six months and the retention rate for twelve months is about 70%.

Did the \$116 million figure take into account the possibility of an increase in demand for cash assistance due to the economic conditions, or is that figure based on projections or existing trends. Mr. Modlin stated that the first six months of the fiscal year were reviewed and increased by three per cent.

The committee requested a review of the percentage increase in the numbers under the circumstances of the more serious economic down turns in the past 10 to 15 years, apply that percentage to the current projections and maybe that would give the worst-case scenario.

Regarding the Temporary Assistance for Needy Families block grant, Senator Forrester asked is the only way funds can be obtained to pay for heating is through the cash assistance program, which is increased by only three per cent.

Each of the proposed cuts were reviewed and discussed by the committee. There is a transfer of Office of Juvenile Justice to Department of Juvenile Justice. The funds will be shown in the Department of Juvenile Justice as receipts.

Flow Stein review the MAJORS program. This is the first full year of funding and one of the particular programs that experience much difficulty is the Durham area. They had problems hiring and retaining staff and therefore children were not seen. The problem was exaggerated in Durham County because the drug courts are finding large numbers of children that need treatment. There are ten other MAJORS programs and approximately 250 children enrolled and being supervised. All of the programs except Durham are doing well.

The committee discussed areas of concern for the funding sources of the MAJORS program. Flow Stein will provide the funding history of the program for the committee.

Senator Forrester requested a summary of all programs related teen-age prevention such as educational programs. Kevin Rhyne stated that there is more appearance of duplication rather than actual duplication. He stated that staff is working on the proposed changes in the language. The adolescent pregnancy prevention project usually serves 30 to 50 young women and men in any given county.

Regarding the responsible fatherhood initiative, Chip Modlin stated that the main reason it is being cut is because of the budget shortfall. While the program is of great value, most of the initiatives were one-time efforts, due to funding.

Rep. Nye requested a copy of the contract for items 8 and 9. Pheon Beal stated that there are two contracts with the Jordan Institute for families School of Social Work, UNC-CH for 709,000 and a contract, which supports the Maximus Contract, to establish the administrative data base which tracks everyone who on cash assistance in North Carolina since January 1995.

Rep. Insko requested a list of the number of persons and hours of training for item #19. Senator Martin requested a breakdown as to what is included in the \$2 million for the child welfare training for counties.

Regarding the areas of foster care and adoption, Rep. Wright asked about the number of families that have relinquished parental their rights and hoe many have come back into the system.

North Carolina has the best performance in terms of re-entry in foster care of any state in the United States. That includes disillusion of adoption and also children returning home and

having to go into foster care a second time. The rate of re-entry is at six per cent. The state that has the second lowest is approximately 15 per cent.

Senator Dannelly requested that the committee revisit #13, which funds the staff in the areas of foster care and adoption. That has been continued funding to the county staff to provide those services.

Regarding the Residential Substance Abuse Services for women, #7, the Chair asked to what extent would the full amount be utilized if it were allocated and what is the effect of the reduction.

The Chair expressed concerns about the transfer of the First Step Assistance program to the ESC. He asked if this is a function of ESC anyway. He also asked how much was allocated and actually utilized last year for item # 12. The Department later will make that information available.

Regarding item # 20, Child Protective Services the committee asked if the amount adequate to cover the projected case load and how was that figure derived.

The Committee also requested the following:

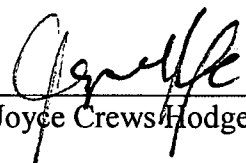

- A history of item # 11.
- Documentation for funding item # 20.
- Additional information other working families included in #3, Child Care Subsidies.
- In view of the Leandros decision, the after school program should be reviewed again.
- The work First Pilot, item # 34, what is the status of the feedback in terms of which pilots resulted in exemplary ideas that should be incorporated in the activities.

The Secretary was recognized to introduce Secanna DeBerry, General Council, HHS Department.

The meeting was adjourned at 10:00.

Senator William N. Martin, Chair

Joyce Crews Hodge, Clerk

**DEPARTMENT OF HEALTH AND HUMAN SERVICES
DIVISION OF SOCIAL SERVICES**

TEMPORARY ASSISTANCE FOR NEEDY FAMILIES BLOCK GRANT

The Temporary Assistance for Needy Families (TANF) Block Grant is a grant from the Federal government created by the Personal Responsibility and Work Opportunity Reconciliation Act of 1996 (P.L. 104-193). The grant was created by combining several former entitlement programs into one capped grant: Aid To Families With Dependent Children (AFDC), Job Opportunities and Basic Skills (JOBS), AFDC Emergency Assistance cash and services (AFDC-EA), and AFDC state and county administration. Amounts provided to states are based on FFY 1995 expenditures for the programs combined into the TANF grant, with supplemental funds provided to states, including North Carolina, which have above-average population growth and below-average cash benefit levels.

The TANF Block Grant is authorized for five years with Federal Fiscal Year 2002 being the final year before reauthorization. However, the supplemental grant ends in Federal Fiscal Year 2001. This results in a significant decrease in TANF funds available for State fiscal year 2002. The TANF funds available will include the base grant of \$302,240,000, plus supplemental funds for the final quarter of Federal Fiscal Year 2001 and federal funds carried forward from the previous year.

GENERAL DESCRIPTION

The TANF program provides flexibility for funding a wide variety of employment and training activities, supportive services, child welfare services, and benefits that will enable clients to get a job, keep a job, and otherwise improve their circumstances while at the same time, striving to keep children safe. States are encouraged to design programs that help meet local needs to help families achieve and maintain a greater degree of economic self-sufficiency, through a combination of cash assistance; case management, employment and training services; system automation and administrative expenses in support of service delivery; and other activities intended to reduce and prevent welfare dependency and promote self-sufficiency.

TANF funds must be spent on one of the purposes outlined in the federal legislation. They are: (1) provide assistance to needy families so that children may be cared for in their own homes or in the homes of relatives; (2) end the dependence of needy parents on government benefits by promoting job preparation, work, and marriage; (3) prevent and reduce the incidence of out-of-wedlock pregnancies and establish annual numerical goals for preventing and reducing the incidence of these pregnancies; and (4) encourage the formation and maintenance of two-parent families.

In addition, because the former Title IV-A Emergency Assistance (EA) funds are included as part of the TANF Block Grant, we are permitted to use TANF for the activities that were authorized in our approved Title IV-A State Plan in September 1995. As a result, the TANF Block Grant funds a significant portion of North Carolina's child welfare system. For SFY 2002, TANF will continue to provide a means of supporting child welfare staff in county departments of social services and to ensure that local child welfare staff are adequately trained.

While the base TANF grant remained constant, for SFY 2002, several factors combined to result in a reduction in the total amount of TANF Block Grant available. Factors include: (1) end of the supplemental grant (received only the final quarter of Federal Fiscal Year 2001); (2) higher than anticipated cash assistance costs; and (3) much lower carry-forward from 2001 than in previous years.

North Carolina's welfare reform efforts have been successful. We remain committed to helping families become self-sufficient through employment-related services and other support services to help families improve their overall circumstances. Therefore, considering the reduced TANF funds available, the goals of this proposed plan are to:

- (1) continue to fund core services and benefits for children and families, such as: employment, training, and job retention services, cash assistance payments to support families, child care to support employment and training, substance abuse assessment and treatment, child welfare initiatives, including Intensive Family Preservation Services, to help meet growing needs of children and families, out-of-wedlock pregnancy prevention services, and domestic violence prevention; and,
- (2) support the provision of these services by providing for necessary training for child welfare and other workers, funding child welfare workers in county departments of social services, providing for continuing evaluation of welfare reform efforts, and providing for state and local administrative costs.

Federal law governing the TANF grant allows states to transfer up to a total of 30% of the grant per year to the Child Care Development Fund and to the Social Services Block Grant. Of this 30% total, 10% may be transferred to SSBG. We propose TANF transfer to these other block grants, as detailed in the following recommendations.

RECOMMENDATIONS:

- | | | |
|-----|---|----------------|
| 1. | Allocation to the state Division of Social Services for partial payment of cash assistance benefit payments to Work First families. Balance of funds needed will come from State funds. | \$ 115,664,078 |
| 1a. | Allocation to the state Division of Social Services to serve as a contingency fund for cash assistance payments in case the Work First caseload increases. If funds are not needed for cash assistance, the Department will use them to enhance family-centered service delivery, to improve effectiveness of case management, and to improve data accuracy, usefulness and accessibility to support case management, accountability and decision-making at all levels. | 5,012,000 |

2.	Allocation to county Departments of Social Services as partial funding for block grants. Within flexible, locally developed plans, counties will use funds to provide for program eligibility determination and case management services, emergency assistance cash and services, employment, training, and job retention/career advancement services, child welfare services, and administration of the program. Balance of county block grant funding to come from State and county funds.	\$ 92,018,855
3.	Transfer to the Child Care Development Fund (CCDF) for child care subsidies for former Work First recipients and other working families.	57,957,188
4.	Allocation to Division of Child Development for child care subsidies for Work First recipients.	26,621,241
5.	Transfer to the Child Care Development Fund (CCDF) for child care rate increases.	18,717,812
6.	Allocation to the Division of Mental Health/Development Disabilities/Substance Abuse Services for substance abuse treatment, testing, and counseling services for Work First participants who require such treatment in order to achieve and maintain employment.	3,500,000
7.	Allocation to the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services for the Family Drug Treatment demonstration.	4,128,055
8.	Allocation to the State Division of Social Services to provide funds to contract for a short-term and long-range evaluation of North Carolina's implementation of federal welfare reform requirements and the Work First program.	1,500,000
9.	Allocation to the State Division of Social Services to provide funds to train state and county staff on operational changes as a result of Work First and federal welfare reform.	500,000
10.	Allocation to the Division of Social Services for the special children's adoption fund	2,300,000
11.	Transfer to the Employment Security Commission for the First Stop program.	300,000
12.	Allocation to the Division of Women's and Children's Health for prevention of teen pregnancies.	1,600,000

13.	Allocation to the Division of Social Services for county child protective services, foster care, and adoption workers.	\$ 2,727,550
14.	Allocation to the Division of Social Services for Intensive Family Preservation Program.	2,000,000
15.	Transfer to the Social Services Block Grant (SSBG) for county departments of social services for children's services.	4,500,000
16.	Allocation to the Division of Social Services for domestic violence services for Work First families.	2,000,000
17.	Allocation to the Division of Social Services for monitoring and administrative support of TANF and the Work First Program.	500,000
18.	Allocation to the Division of Social Services for child welfare workers for local departments of social services.	7,260,000
19.	Allocation to the Division of Social Services to partially fund county departments of social services child welfare training initiatives.	2,000,000
20.	Allocation to the Work First Business Council for Work First job retention strategies.	100,000
21.	Transfer to SSBG for Child Caring Agencies	1,500,000
22.	OJJ-Expand Support Our Students	1,290,590
23.	Job Retention and Follow-up	1,400,000
24.	Reduction of Out-Of-Wedlock Birth	1,500,000
25.	Work First Housing Initiative	1,000,000
	Total Planned Expenditures	\$ 357,597,369
	Carryforward federal fund availability to SFY 2003 as permitted by federal legislation	0

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

**MINUTES
APRIL 18, 2002
8:30 A.M.**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Wednesday, April 18, 2002, in Room 424 of the Legislative Office Building. The following members were present:

**Representative Edd Nye, Co-Chair
Representative Beverly Earle, Co-Chair
Representative Debbie Clary
Representative Theresa Esposito
Representative Verla Insko
Representative Thomas Wright
Representative Mark Crawford**

Six Senate members were present.

The meeting was opened by Representative Beverly Earle at 8:35 am. The opening presentation was given by Lisa Hollowell, Fiscal Staff. Ms. Hollowell's presentation focused on the "**Division of Early Intervention and Education.**" (See Attachment II) Ms Hollowell began her presentation by giving a little history of how this division was formed.

House Bill 1477 was passed in 1977. The purpose of the program is to improve the quality of the education and safety in the state residential schools, to implement the ABC's program in the residential schools and to require the development of a three-year plan to address the capital needs of the Governor Morehead School and the three schools for the deaf. The goal is to reduce administrative/management positions by 50%.

House Bill 168, which was passed in 1999, was the establishment of the Division of Education Services/Review of Disability Services. The purpose was to create the new division to manage the Governor Morehead School for the Blind and the three residential schools for the deaf focusing management and resources on:

- Improving student post-secondary outcomes
- Increasing staff development and training
- Administrative consistency and access to expert support services across campuses
- Collaborating with local education agencies and the State Board of Education
- Consistency with the 1999 Education and Disability Organization Study

Residential Schools for the Deaf

All deaf and hard of hearing children have unlimited potential. The North Carolina schools for the deaf provide a challenging learning environment, which prepares each child for a meaningful and productive life in a changing world.

Governor Morehead School

The Governor's Morehead School is to educate successfully North Carolina's children and youth with visual impairments to be productive, independent, confident citizens and life-long learners.

FY2002 Proposed Budget

Residential Schools	\$38,680,575
Other	\$812,952
Early Intervention Services	\$44,915,372
Central Administration	\$3,693,234
Total	\$88,102,133

Enrollment by Race of all Residential Students

Asian	2%
Hispanic	8%
Black	29%
White	61%

ABC's Program

The ABC Program is to form a comprehensive plan to improve public schools that is based on three goals of strong accountability: emphasis on the basics, high educational standards, and the local control of schools. This entails testing students in grades 3-8 and follow-up in the 10th grade. House Bill 1477 (1997) placed the residential schools under the ABC's Program and the students were tested in 1999 for the first time.

There are two questions that remain to be answered.

How can deaf and blind children best be served in North Carolina (residential schools of the LEAs)?

What should be the purpose of the residential schools (educational)?

The state is constantly working on answers to these questions.

Appropriations Subcommittee on Health and Human Services
Minutes

North Carolina School for the Deaf in Morganton

- Opened in 1894 with an enrollment of 104 students
- Service Delivery Models: K-12 residential and day placements, preschool (including satellites) birth-age 5
- Residential Bed Capacity of 245 (42% occupancy rate)
- Students attending school: 142 (102 residential and 40 day as of January 2001)
- Student Profile – 127 identified as hearing-impaired, 6 identified as deaf/blind and 9 identified as multi-handicapped. 31 students in elementary school, 51 in middle school and 60 in high school.
- Number of Staff - 260 (includes vacant positions, FY2000)
- 47 Teachers
- FY02 Proposed Budget: \$12,027,033
- Cost per student: \$84,697

Division of Early Intervention and Education

Eastern North Carolina School for the Deaf

- Opened in 1964 with 72 children 5-10 years old.
- Service Delivery Models: K-12 residential and day placements, preschool (including satellites) birth-age 5
- Residential Bed Capacity 210 (54% occupancy rate, as of January 2001)
- Students attending school – 170 (113 residential and 57 day as of January 2001)
- Student Profile – 141 identified as hearing-impaired, 5 identified as deaf/blind and 18 identified as multi-handicapped, 1 autistic and 4 developmentally disabled. 48 students in elementary school, 57 in middle school and 65 in high school.
- Number of employees – 284 (includes temporary & approx. 50 vacant positions)
- 53 Teachers (as of February 2001)
- FY02 Proposed Budget: \$12,520,357
- Cost per student: \$73,649 Fiscal Research Division April 2001

Division of Early Intervention and Education

Central North Carolina School for the Deaf

- The General Assembly appropriated \$4.9M to build the school and opened in 1975 with 185 students.
- Service Delivery Models: K-8 residential and day placements, preschool (including satellites) birth-age 5
- Residential Bed Capacity 200 (9% occupancy rate as of January 2001)
- Students attending school – 29 (18 residential and 11 day as of January 2001)
- Student Profile – 29 identified as hearing-impaired
- Number of employees – 105 (includes approx. 30 vacant positions)
- 13 Teachers (as of February 2001)
- FY02 Proposed Budget is \$6,116,594
- Cost per student is \$210,917

Division of Early Intervention and Education

Governor Morehead School

- Opened in 1845 (8th school for the blind in the United States)
- Service Delivery Models: K-12 residential and day placements, preschool (including satellites) birth-age 5, long and short-term placements. Partner with NC Central University in training professionals in the vision field.
- Residential Bed Capacity of 100 (61% occupancy rate)
- Students attending school = 81 (61 residential and 20 day students) as of January 2001
- Student Profile – 69 identified as visually impaired and 12 identified as multi-handicapped (approximate as of January 2001)
- Number of Staff - 160 (includes vacant positions)
- 42 Teachers
- FY02 Proposed Budget: \$8,106,591
- Cost per student: \$100,081

Services Provided to Children Who are Hearing Impaired/Deaf or Visually Impaired

115 of the 117 LEAs have students classified as Hearing Impaired (1,753)

104 of the 117 LEAs have students classified as Visually Impaired (578)

Division of Early Intervention and Education

- \$2,600 per child allocation to LEAs to educate children with disabilities.
- DPI has a reserve amount of \$3.4M established for LEAs which need additional assistance serving children with disabilities. As of April 2001, \$1.9M remains in the reserve.

Division of Early Intervention and Education

- The NC Central School for the Deaf will be closing in May
- There are contracts in place for FY2001 to provide \$24,000 per student to the LEA that the student has transferred to. The Department's plan is to have this continue through the 8th grade
- The counties/LEAs that received payment for the entire 2001 school year (2 semesters) included

Durham	1	\$24,000
Guilford	6	\$144,000
Alamance	5	\$120,000
Forsyth	2	\$48,000
Randolph	4	\$96,000

Division of Early Intervention and Education

- An additional five students transitioned to public schools in January 2001, which resulted in payment of \$12,000 per student to the LEA (one dropped out from the first semester)

Guilford	2	\$24,000
Scotland	2	\$24,000

- Total paid out to LEAs for FY2001 = \$480,000
- Anticipated payments for FY2002 = 21 students transitioning to public school. The total is estimated to be \$504,000.
- Since this payment is annually and will continue through the student's eight grade year, the overall total for next year is estimated at approximately \$1M

Division of Early Intervention and Education

- ABCs Program – comprehensive plan to improve public schools that is based on three goals of strong accountability: emphasis on the basics, high educational standards, and the local control of schools. This entails testing students in grades 3-8 and a follow-up in the 10th grade.
- HB 1477 (1997) placed the residential schools under the ABCs Program and the students were tested in 1999 for the first time.
- 2000 - GMS – Exemplary
- NCSD, ENCS and CNCSD – Low Performing

Division of Early Intervention and Education Issues

- \$24,000 being paid to LEAs for the transfer of children out of the Central School to public schools
 - Policy – equity issue
 - What is the \$24,000 based upon?
- Staffing levels at the schools
- Transportation Costs (\$637,000 proposed for FY02)

Division of Early Intervention and Education

- How can deaf and blind children best be served in North Carolina (residential schools or the LEAs)?
- What should be the purpose of the residential schools (educational)?

Joint Appropriations Subcommittee On Health and Human Services

Thursday, April 19, 2001

8:30 A.M.

Room 424, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Thursday, April 19, 2001, in Room 424 of the Legislative Office Building. Members present were: Representative Edd Nye and Representative Beverly Earle, Co-Chairs; Representative Debby Clary, Representative Theresa Esposito, Representative Verla Insko, Representative Thomas Wright, and Representative Mark Crawford. There were six senators present.

Representative Nye chaired the meeting. Ms. Lisa Hollowell, Fiscal Research Staff, was asked to begin her presentation.

Ms. Hollowell began by continuing her presentation from the previous meeting on Page 29 of the handout. There had been a discussion concerning \$24,000 that was paid to the local education agencies for the transfer out of the central school to the public schools. She presented a chart with more information concerning this issue (See Attachment). Mr. Philip Price, Fiscal Research Staff, was in attendance to review the chart with the Committee. He explained that the chart shows that each child does not receive the same amount of money for low wealth funding. There was a discussion focused on this issue.

Representative Nye asked who authorized the \$24,000 bonus per year and if a contract was signed. Peter Leousis, Department of Health and Human Resources, responded that they did have contract. Representative Nye stated he would like for it to be made available. Ms. Hollowell noted that there is a reserve account of about two million dollars for LEA's that need additional funding. Senator Dannelly noted that the \$24,000 seemed to create a lot of discussion, but it is a bargain.

Ms. Hollowell next reviewed the handout titled Part II of the Division of Early Intervention and Education (See Attached). Representative Nye noted that HB 168 did not call for a division to be formed, but for education service and review of disability services. It has grown into what it is now as shown on the chart on page 34. Senator Kerr questioned the number of employees per student. Senator Forrester asked how long it would be before they could see the outcome in quality of education. He would like to see a report on this. Ms. Hollowell responded that they make a report available every year on how the students are performing on the ABC's Program. They are now tracking students after they leave the schools to see how well they are doing. She will provide him a recent report. Representative Nye asked for a breakdown of how the Division got 1200 people.

Ms. Hollowell next reviewed Page 35, Preschool Programs. The Committee members had questions concerning the State operated preschool programs. Ms. Hollowell reviewed the governing language for the Individuals with Disabilities Education Act on Page 45 of the handout.

Representative Nye reported that there would be a public hearing at 4:00 P.M. on Monday afternoon.

The meeting was then adjourned.

Division of Early Intervention and Education

Early Intervention

- Professionals working with families of a child with special needs to help the child develop the knowledge and skills necessary to reach their potential. It builds upon the strengths of families. Special needs areas include:
 - Motor Development
 - Cognitive Development
 - Communication Development
 - Social or Emotional Development
 - Adaptive Development
- **Developmental Evaluation Centers provide screenings for developmental disabilities and delays (0-5 year olds)**
- **Infant-Toddler Program (0 – 3 year olds)**

Division of Early Intervention and Education

Early Intervention Services

Individuals with Disabilities Education Act (IDEA)

- Assessment and Program Development
 - Multidisciplinary assessment of the unique strengths and needs of infants and toddlers and the identification of services appropriate to meet such needs
 - Family-directed assessment of resources, priorities and concerns of the family and identification of the supports and services necessary to enhance the family's capacity to meet the developmental needs of the infant or toddler
 - Individualized family service plan (IFSP) developed by a multidisciplinary team
- To the extent possible, services are to be provided in natural environments, including the home and community settings in which children without disabilities participate.
- Evaluation provided within 45 days of referral
- Services to begin within 30 days of evaluation/IFSP (state requirement)
 - Approximately 681 children's evaluation did not meet the 45 day referral (FY2000)
 - Approximately 600 children are waiting for services outside of 30 days

Division of Early Intervention and Education

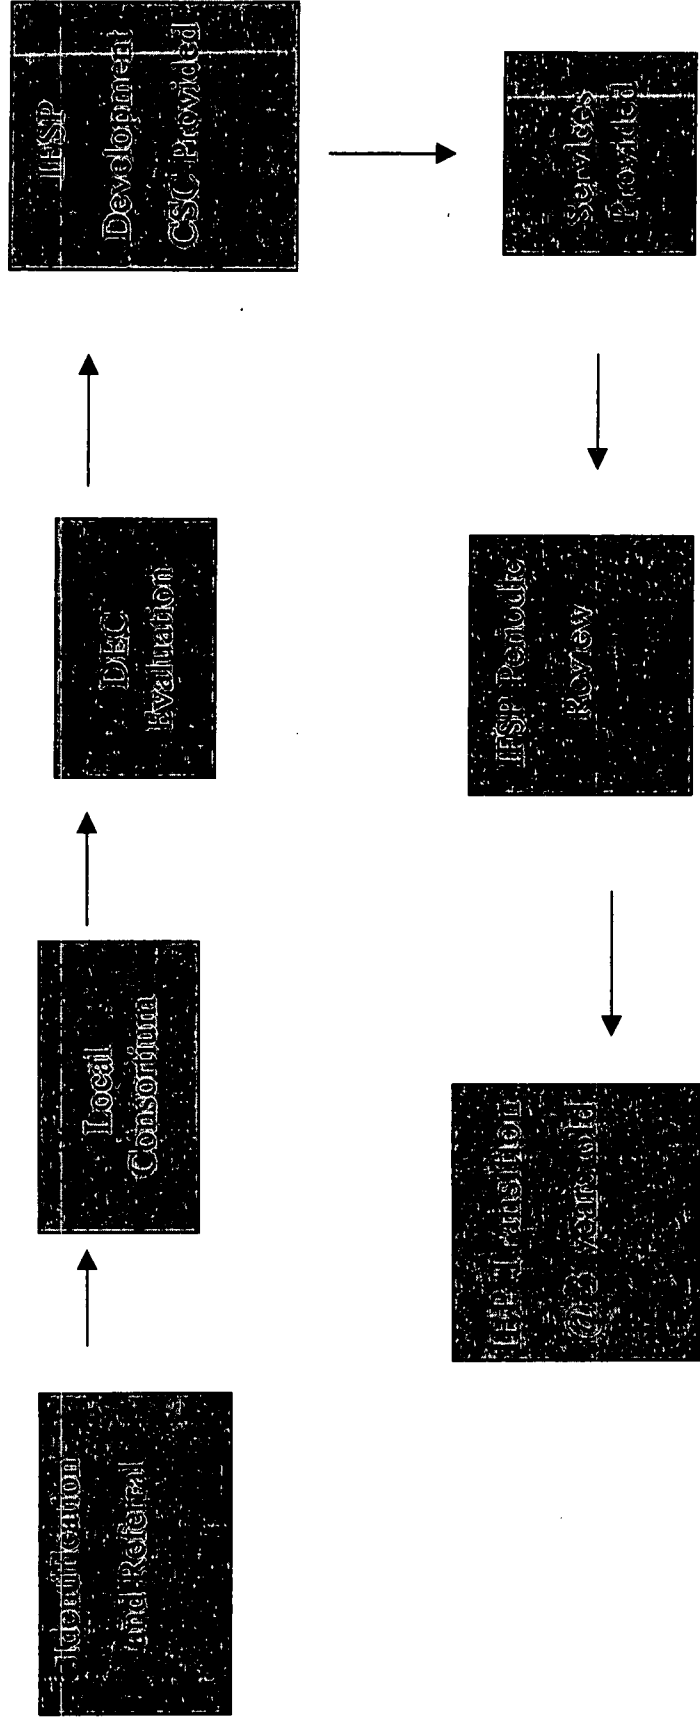

- Interagency Coordinating Council (Division of Child Development)
 - Advise and assist the Lead Agency in carrying out responsibilities of IDEA, preparation of applications, and prepare and submit an annual report to the Governor and Secretary of HHS on the status of early intervention programs for infants and toddlers with disabilities and their families operated within the state.
 - Requirement in order to receive funding under IDEA
 - Council is appointed by the Governor and chairperson is designated by the Governor
 - 20% Parents
 - 20% Service Providers
 - State Legislator
 - State Agency Representation (one member from each agency)

Division of Early Intervention and Education

- Infant/Toddler Program was transferred from Division of Mental Health/Developmental Disabilities/Substance Abuse Services
- Local Consortium: There are 91 local consortia which provide the guidance for evaluation services for children referred to Early Intervention and assist in the development of the Individual Family Services Plan
- Agencies on the local consortium include the Area Mental Health Program, Local Public Health Department, DEC and sometimes DSS

Joint Appropriations Subcommittee On Health and Human Services

Monday, April 23, 2001

4:00 P.M.

Room 643, Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services held a public hearing on Monday, April 23, 2001, at 4:00 P.M. in Room 643 of the Legislative Office Building. Members present were: Representative Edd Nye and Representative Beverly Earle, Co-Chairs; and Representative Mark Crawford. There was one senator present.

Representative Nye presided over the meeting. The first presenter was Mr. Lawrence Wilson, with the Department of Health and Human Services Office of Economic Opportunity. He spoke concerning Community Services Block Grant and presented the Committee members a handout (See Attached). This Block Grant has been administered by the State since 1981. Its primary purpose is to assist low-income families to achieve economic self-sufficiency. There are wide ranges of activities to be carried out under this block grant. These activities are carried out by thirty-six Community Action Agencies in the State that serve ninety-one counties. Some of the agencies serve one county, but many serve multicounty. These agencies, in addition to receiving funds from this block grant, manage funds from many other sources, including Head Start, Workforce Investment Act Programs, Weatherization Assistance Program, and Section eight Rental Assistance Program. The Community Services Block Grant accounts for approximately 15% of the funds they receive. The North Carolina Community Services Block Grant Program serves over twenty-five thousand low-income individuals annually. He concluded his presentation. Representative Nye questioned the current years administrative cost and asked the number of people they employ. Mr. Wilson responded that they employ nine people. Their purpose is to use some of the money to mount some initiatives that would benefit the Community Action Agencies directly and not to add additional staff. This includes training activities. Representative Nye asked the audience if anyone had any questions for Mr. Wilson. There were none.

The next presenter was Mr. Wilbert Morris, Branch Head of Economic Services in the Economic Independence section of the Division of Social Services. He reviewed information concerning the Low Income Home Energy Assistance Program Block Grant (See Attached). This program is funded by the Federal Department of Health and Human Services and the funds are provided to assist low-income families that pay a high portion of their income for home energy. The funds are used primarily to help families meet their immediate energy needs. After Mr. Morris reviewed the handout, Representative Nye asked for questions from the Committee. Representative Nye wanted to know where they obtain their list for payout to low income energy. Mr. Morris responded they take applications at the county level usually in November of each year. This is a two-week application period in which persons can apply, that is announced to the public. Food

stamp recipients are automatically referred to the energy system. The average payment per household for the last year was about \$70.00. This goes directly to the participant and they can apply it however they choose. Representative Nye asked if anyone in the audience wanted to participate.

Ms. Roberta Spenser asked to speak concerning Community Services Block Grant(See Attached). She spoke concerning the Low Income Energy Assistance Program. They are providers of the Weatherization services and the recipients of this funding. Heating Appliance Repair Replacement Program (HARRP) is a special part of the Weatherization Assistance Program. The Health and Human Service Committee implemented it five years ago. It allows them to evaluate, repair, and replace faulty heating. Through the program they identify homes with significant levels of carbon monoxide and nitrogen dioxide. Both gases are dangerous. They have been told that increased weatherization funds will appear in the 2002 federal budget. She stated that they should to examine the way they administer the direct payment system to the individuals receiving the cash payments. They feel that electronic transfer to vendors, direct deposits to fuel vendors crediting each consumer at the local level would increase the dollars that actually reach the clients. It should be a more vender-driven program for cash assistance returning to its original format of two-party checks made payable to both fuel vender and the consumer. Last, they need to follow other states and purchase fuel in bulk fuel purchasing to obtain fuel for clients at summer fuel prices thereby capturing significant energy savings.

Representative Nye asked if there were any other questions or anyone wanting to speak. He then announced that the public hearing was closed.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES
OFFICE OF ECONOMIC OPPORTUNITY
COMMUNITY SERVICES BLOCK GRANT PLAN FOR SFY 2001-2002**

GENERAL DESCRIPTION

For State Fiscal Year 2001-2002, funds available through the Community Services Block Grant Program (CSBG) for appropriation are projected to be \$15,639,392. CSBG funds are projected to be available October 1, 2001.

Since 1981, the Community Services Block Grant Program has made federal funds available to states to provide a range of services designed to assist low-income persons attain the skills, knowledge, and motivation necessary to achieve self-sufficiency.

The primary providers of services under this grant, as required by federal law, are the thirty-six Community Action Agencies (CAAs) in the state. Other grantees are seven Limited Purpose Agencies (LPAs) who were recipients of similar funds prior to the inception of the Community Services Block Grant Program. CAAs operate programs under the Community Services Block Grant in coordination with other federal, state, and local programs such as the Head Start program, Workforce Investment Act (WIA) Programs, Weatherization Assistance Program, and Section 8 Rental Assistance Program.

In August 1995, the federal Community Services Block Grant Monitoring and Assessment Task Force produced a National Strategic Plan which endorsed a results-oriented management approach for the Community Service Network. The plan includes a set of six broadly stated umbrella national goals, with suggested measures to assess progress towards the goals. States and local agencies are required to address these goals and measures in their program planning and reporting.

The six national goals of the Community Services Network are:

- Goal 1. Low-income people become more self-sufficient.
- Goal 2. The conditions in which low-income people live are improved.
- Goal 3. Low-income people own a stake in their community.
- Goal 4. Partnerships among supporters and providers of services to low-income people are achieved.
- Goal 5. Agencies increase their capacity to achieve results.

**DEPARTMENT OF HEALTH AND HUMAN SERVICES
OFFICE OF ECONOMIC OPPORTUNITY
COMMUNITY SERVICES BLOCK GRANT PLAN FOR SFY 2001-2002**

Goal 6. Low-income people, especially vulnerable populations, achieve their potential by strengthening family and other support systems.

Community Services Block Grant funds are used to provide a wide variety of services in local communities to serve identified needs of poor families. Programs allowed under the Community Services Block Grant Act are those which provide activities designed to assist low-income participants including the elderly poor:

- to remove obstacles and solve problems which block the achievement of self-sufficiency;
- to secure and retain meaningful employment;
- to attain an adequate education;
- to make better use of available income;
- to obtain and maintain adequate housing and a suitable living environment;
- to obtain emergency assistance through loans, grants or other means to meet immediate and urgent family and individual family needs;
- to achieve greater participation in the affairs of the community; and
- to make more effective use of other programs related to promoting the well being of the low-income population.

The specific services operated in each local community are determined by the local agency as a result of an assessment of the needs of low-income individuals and families in their service area which is used to develop a multi-year plan for services.

As required by the Community Services Block Grant Act, ninety per cent of the funds received are distributed to the thirty-six Community Action Agencies (CAAs) located throughout the state. Five percent is the maximum allowed by federal law that may be used to administer the Program. The remainder is used to fund seven non-profit organizations known as Limited Purpose Agencies (LPAs).

Over twenty-five thousand low-income individuals are served annually by the North Carolina Community Services Block Grant Program.

LOW INCOME HOME ENERGY ASSISTANCE PROGRAM BLOCK
GRANT (LIHEAP) FOR SFY 2001-02

For State Fiscal Year 2001-2002, the total State Low Income Home Energy Assistance allocation is currently estimated to be \$20,093,896 based on current projection that the FFY 2002 award will be this amount. The Lumbee Regional Development Association (LRDA) will receive \$244,554 of this amount. **The total available for LIHEAP is \$19,849,342.**

GENERAL DESCRIPTION

The purpose of the Low Income Home Energy Assistance Program Block Grant is to provide funds to help low-income families cope with cost increases of heating fuel and to provide emergency assistance. The following are components:

1. Low Income Home Energy Assistance Payments – Funds are used to provide a one-time payment to eligible households to help pay heating bills.
2. Crisis Intervention Assistance – Funds are used to assist low-income people when a heating or cooling related crisis occurs. Allocations are provided to county departments of social services to make direct payments, vendor payments, or to provide in-kind services for eligible households.
3. Heating Air Repair and Replacement Program – Funds are used to provide assistance and repairs to home heating and cooling systems for low-income families. These funds are allocated to the Department of Health and Human Services, Office of Economic Opportunity and services are provided primarily through community action agencies.
4. Weatherization Assistance Program – Funds are transferred to the Department of Health and Human Services Office of Economic Opportunity for the purpose of making repairs to dwellings so families can have more energy-efficient homes.
5. Department of Administration, Commission on Indian Affairs – Funds are used to provide outreach and application taking activities for Low Income Energy Assistance Payments by the Coharie Intra-Tribal Council, the Haliwa-Saponi Tribe and the Waccamaw-Siouan Development Association.

 SFY 2001-02

Item Number	Title	Actual SFY 1999 00	Appropriated SFY 2000-2001 (HB 1840)	Recommended Amount SFY 2001-02	Appropriated/ Recommended Difference	Explanation of Difference
1	Low Income Energy Assistance Program (LIEAP) payments	\$12,995,982.11	\$8,092,113	\$11,843,457	\$3,751,344	The Energy Work Group comprised of State, county and private sector providers recommended increasing the Low Income Energy Assistance Program line item for SFY 2001-02 due to increased applications, and increased fuel costs. This change should increase the average Low Income Energy Assistance Program check to approximately \$70, up from an average payment of \$52 during SFY 1999-2000. The funding level for the Low Income Energy Assistance Program payments for SFY 2000-01 was increased by \$2.5M in contingency funds received in December 2000. This increase should result in average payments of around \$75 for SFY 2000-01.
2	Crisis Intervention Program (CIP)	12,147,990.14	5,825,526	2,044,482	(3,781,044)	Although there is a recommended reduction in the allocation to Crisis Intervention Program for SFY 2001-02, North Carolina received an additional \$19,512,799 above the original budgeted SFY 2000-01 Low Income Home Energy Assistance Program Block Grant. Of the additional funds received during SFY 2000-01, \$14.05 M was allocated to counties for 2001 Crisis Intervention Program payments. Should North Carolina receive additional emergency or contingency funds in SFY 2002, it is recommended that these funds be specifically allocated to the Crisis Intervention Program unless federal regulations dictate otherwise.
3	Heating Air Repair and Replacement Program (HARRP)	Note: HAARP expenditures included in Weatherization item	1,252,588	1,252,588	0	Not applicable
4	Weatherization Assistance Program	4,514,907.92	2,684,116	2,684,116	0	Not applicable
5	Outreach/application-taking by the Commission on Indian Affairs	3,636.13	39,765	39,765	0	Not applicable
6	Total Administration	3,519,713.20	1,988,234	1,984,934	(3,300)	The funding available for administration is capped at 10 percent of the Low Income Home Energy Assistance Program Block Grant.
	TOTAL	\$33,182,229.50	\$19,882,342	\$19,849,342	(\$33,000)	The State's base grant for SFY 2001-02 will be reduced by \$33,000 and provided to the Lumbee Regional Development Association (LRDA) to be used to equalize Low Income Energy Assistance Program payments to the projected average of \$70.

Modified Crisis Intervention Program Payments Administration Total \$12,669,998.59 \$65,952.90 \$12,735,951.49

4-23-01 Attachment III

COMMUNITY SERVICES BLOCK GRANT
PUBLIC HEARING COMMENTS
APRIL 23, 2001

ON BEHALF OF THE NORTH CAROLINA COMMUNITY ACTION ASSOCIATION,
THANK YOU FOR ALLOWING US THIS OPPORTUNITY TO COMMENT
ON THE COMMUNITY SERVICES BLOCK GRANT, ITS PROGRAMS AND
ACTIVITIES.

THIS HEARING TODAY IS DESIGNED TO MEET REQUIREMENTS TO ADDRESS THE
STATE'S ALLOCATION OF C.S.B.G., WHICH BY FEDERAL LAW IS ALLOCATED
SOLELY TO COMMUNITY ACTION AND LIMITED PURPOSE AGENCIES. 96 COUNTIES
WILL BE ALLOCATED \$14,951,780 IN FY 2001-02, AN INCREASE FROM LAST
YEAR'S ALLOCATION WHICH IS DESPERATELY NEEDED.

THESE AGENCIES SERVE OUR STATE'S LOW INCOME AND DISADVANTAGED
POPULATION, BUT MORE FREQUENTLY THE WORKING POOR AS WELL, ESPECIALLY
AS THEY TRANSITION FROM WELFARE TO WORK. IN ADDITION TO CSBG, OUR
AGENCIES OPERATE OTHER FEDERAL PROGRAMS SUCH AS HEAD START,
WEATHERIZATION, SENIOR SERVICES, ETC. AND MAY BE INVOLVED IN OPERATING
DAY CARE, HOUSING OR HOUSING SERVICES SUCH AS SECTION 8,
TRANSPORTATION AND SO ON DEPENDENT UPON THE AREA OF SERVICE, RURAL
OR URBAN.

A PREVIOUS GENERAL ACCOUNTING OFFICE (GAO) AUDIT FROM WASHINGTON DC ESTIMATED NEARLY SEVEN ADDITIONAL DOLLARS WERE LEVERAGED AT THE LOCAL OR COUNTY LEVEL FOR EACH DOLLAR OF CSBG. LAST YEAR, THE RATIO OF TOTAL DOLLARS MOBILIZED TO CSBG AVERAGED \$ 1.3 TO EACH \$ 1 OF CSBG.

EACH ENTITY IS A LOCAL (COUNTY BASED) NON-PROFIT GOVERNED BY ITS OWN BOARD OF DIRECTORS WITH EQUAL, YET OFTEN DIFFERENT PROGRAMS, POLICIES, AND PROCEDURES DICTATED BY LOCAL NEEDS ASSESSMENTS. THIS IS A TREMENDOUS FISCAL AND PROGRAMMATIC RESPONSIBILITY FOR BOTH THE AGENCIES, AND THE OFFICE OF ECONOMIC OPPORTUNITY WHO HAS OVERSIGHT ON CSBG. AS OF OCTOBER 1, 2000 THE OFFICE OF ECONOMIC OPPORTUNITY ALSO ASSUMED OVERSIGHT OF WEATHERIZATION SERVICES WHICH WAS RELOCATED FROM THE FORMER DIVISION OF ENERGY.

THE OFFICE OF ECONOMIC OPPORTUNITY AND ITS DIRECTOR LAWRENCE WILSON AND HIS STAFF ARE TO COMMENDED FOR THEIR EXEMPLARY SERVICE TO THE STATE (ESPECIALLY FOR TAKING ON THE PREVIOUS MANAGEMENT PROBLEMS WITHIN ENERGY). AS WE HAVE STATED BEFORE, THE OEO IS BOTH OUR WATCHDOG AND OUR PARTNER, AND ALSO AS WE HAVE STATED BEFORE IT IS EXTREMELY IMPORTANT THIS ARM OF OUR C.S.B.G. PROGRAM IS FULLY

FUNDED AT THE FEDERAL AUTHORIZATION LEVEL OF 10%. NORTH CAROLINA HAS MORE CAA'S AND LPA'S THAN MANY STATES IN THE NATION DUE TO NORTH CAROLINA'S PERCENTAGE OF THE POOR IN RELATION TO THE GENERAL POPULATION.

NORTH CAROLINA'S HUMAN SERVICE PROBLEMS ARE COMMUNITY ACTION'S PROBLEMS. IT IS TO COMMUNITY ACTION MANY TIMES THAT THE FIRST CALL IS MADE; SEEKING FLEXIBLE HOURS DAY CARE TO REMAIN OFF WELFARE; FOR ASSISTANCE WITH A LANDLORD PROBLEMS ON LACK OF HEAT, UNSANITARY CONDITIONS, EXCESSIVE RENT; FROM THOSE SEEKING SHELTER FROM DOMESTIC ABUSE, SEXUAL ABUSE OR THOSE JUST SEEKING SHELTER AND FOOD-TOO FREQUENTLY FAMILIES WITH YOUNG CHILDREN. REGARDING HOUSING-WE URGE ALL MEMBERS OF THIS COMMITTEE TO SUPORT ALL HOUSING BILLS-EVERYONE NEEDS A PLACE TO CALL HOME!! FROM MENTAL HEALTH TO DENTAL HEALTH WE ADDRESS THESE ISSUES WITH A "TOTAL CLIENT" APPROACH OR CASE MANAGEMENT AS ITS NOW REFERRED. ITS BEEN OUR WAY FOR 37 YEARS.

WE URGE YOU TO UTILIZE YOUR EXISTING C.S.B.G. DOLLARS IN NORTH NETWORK BY PARTNERING WHENEVER POSSIBLE WITH LOCAL COMMUNITY ACTION/LIMITED PURPOSE AGENCIES ON NEW AS WELL AS EXISTING INITIATIVES.

WE WISH TO THANK THIS COMMITTEE FOR ITS TIME, AND FOR

ITS SUPPORT OF OUR PROGRAMS AND SERVICES. THANK YOU FOR

THIS OPPORTUNITY TO APPEAR BEFORE YOU TODAY.

VISITORS: PLEASE SIGN IN BELOW AND RETURN TO COMMITTEE CLERK

Joint Appropriations Subcommittee On Health and Human Services

Monday, April 30, 2001

4:30 P.M.

Legislative Office Building

The Joint Appropriations Subcommittee on Health and Human Services met on Monday, April 30, 2001, in the Legislative Office Building. Members present were: Representative Edd Nye and Representative Beverly Earle, Co-Chairs; Representative Mark Crawford, and Representative Verla Insko. There were four senators present.

Representative Nye presided over the meeting. He stated the Department of Health and Human Services would review Division of Child Development and Division of Mental Health contracts.

Ms. Peggy Ball, Director of Child Development with the Department, spoke to the Committee concerning Division of Child Development contracts (See Attached). The handout is a listing of the contracts they have. The contracts are grouped according to their purpose. The first group is either direct services subsidy contracts or ones aligned to them. There are some licenses contracts, categorical funding that the federal government requires they spend for quality school age care, for resource and referral and children with special needs. Data evaluation and some miscellaneous contracts are listed last. After her presentation, Representative Nye asked for questions.

Representative Insko asked if these were to be decided in the next fiscal year. She observed a big difference in the present year and next year. Ms. Ball noted some contracts are on State fiscal year and some on federal year. The amounts are for one year of funding and the contracts for federal funding have some with undetermined amounts for the coming year. Representative Earle asked concerning pages 1 through 10, why were these programs in these counties singled out to get funding. They had asked for funding for early Head Start and the money is divided amount the programs. Senator Martin questioned number 88 of the handout, asking what portion was for consultation and what portion was for grant awards. Ms. Ball responded that out of the amount; about one million was for consultants working in 29 counties. About one million was provider grants over two year periods of time. Representative Insko questioned if the contracts were for one year. Most are continuing contracts. Resource and referral are on going. Senator Kerr asked if there was a better way to deliver and Ms. Ball responded they do look closely at what it cost per person.

The next presenter was Art Robarge, Acting Director for Division of Mental Health. He discussed contracts with the Division (See Attachment). Senator Dannelly asked how the DARE program is working. Flo Stein with the Department responded that the ten percent federal funding that goes to the DARE Foundation is distributed to schools.

Representative Crawford wanted to know if more funds would be put in or if funds would remain the same. Ms. Robarge replied they would remain the same. There was a discussion between Committee members and Department spokespersons, with questions and answers concerning the presentation.

The meeting was the adjourned.

Edd Nye
Representative Edd Nye, Co-Chairman

	Notes									
	* Contract is for longer than one SFY. Contract amount shown is for funds budgeted for SFY 2000-2001.									
	** Although contract overlapped for only a part of SFY 2000-2001, entire contract amount is shown.									
	*** Contract follows the Federal Fiscal Year. Instead of showing 2 years of FFY contracts in SFY 00-01, the FFY 00-01 contract is shown once.									
	**** Interagency Coordinating Council contract will be renewed next year but not necessarily with the same people.									
	Application Process - Many of the agency's service contracts are awarded through an application process. Not all applications are approved.									
	N.A. - Not Applicable (These are small personal services contracts).									
	TBD - To be determined; contract amounts are being developed now.

AGENDA

Joint Appropriations Subcommittee on Health and Human Services

Legislative Office Building – Room 424

Tuesday, May 1st, 2001

Opening Remarks

*Senator Bill Martin, Co-Chair
Representative Beverly Earle, Co-Chair
Representative Edd Nye, Co-Chair*

Division of Early Intervention and Education

*Lisa Hollowell
Fiscal Research Staff*

Division of Medical Assistance

*Carol Shaw
Fiscal Research Staff*

Committee Discussion

Next Meeting

Adjourn

Department of Health and Human Services

Division of Early Intervention and Education

Part II

Fiscal Research Division April 2001

1

05.01.2001 Page 46

Division of Early Intervention and Education

Part II

- Preschool Programs for the hearing and visually impaired children
 - State-Operated Preschools (costs and locations)
 - Itinerant Services
- Early Intervention
 - The Process of Identification and Receiving Services
 - Developmental Evaluation Centers
 - Infant-Toddler Program
- Issues

Division of Early Intervention and Education

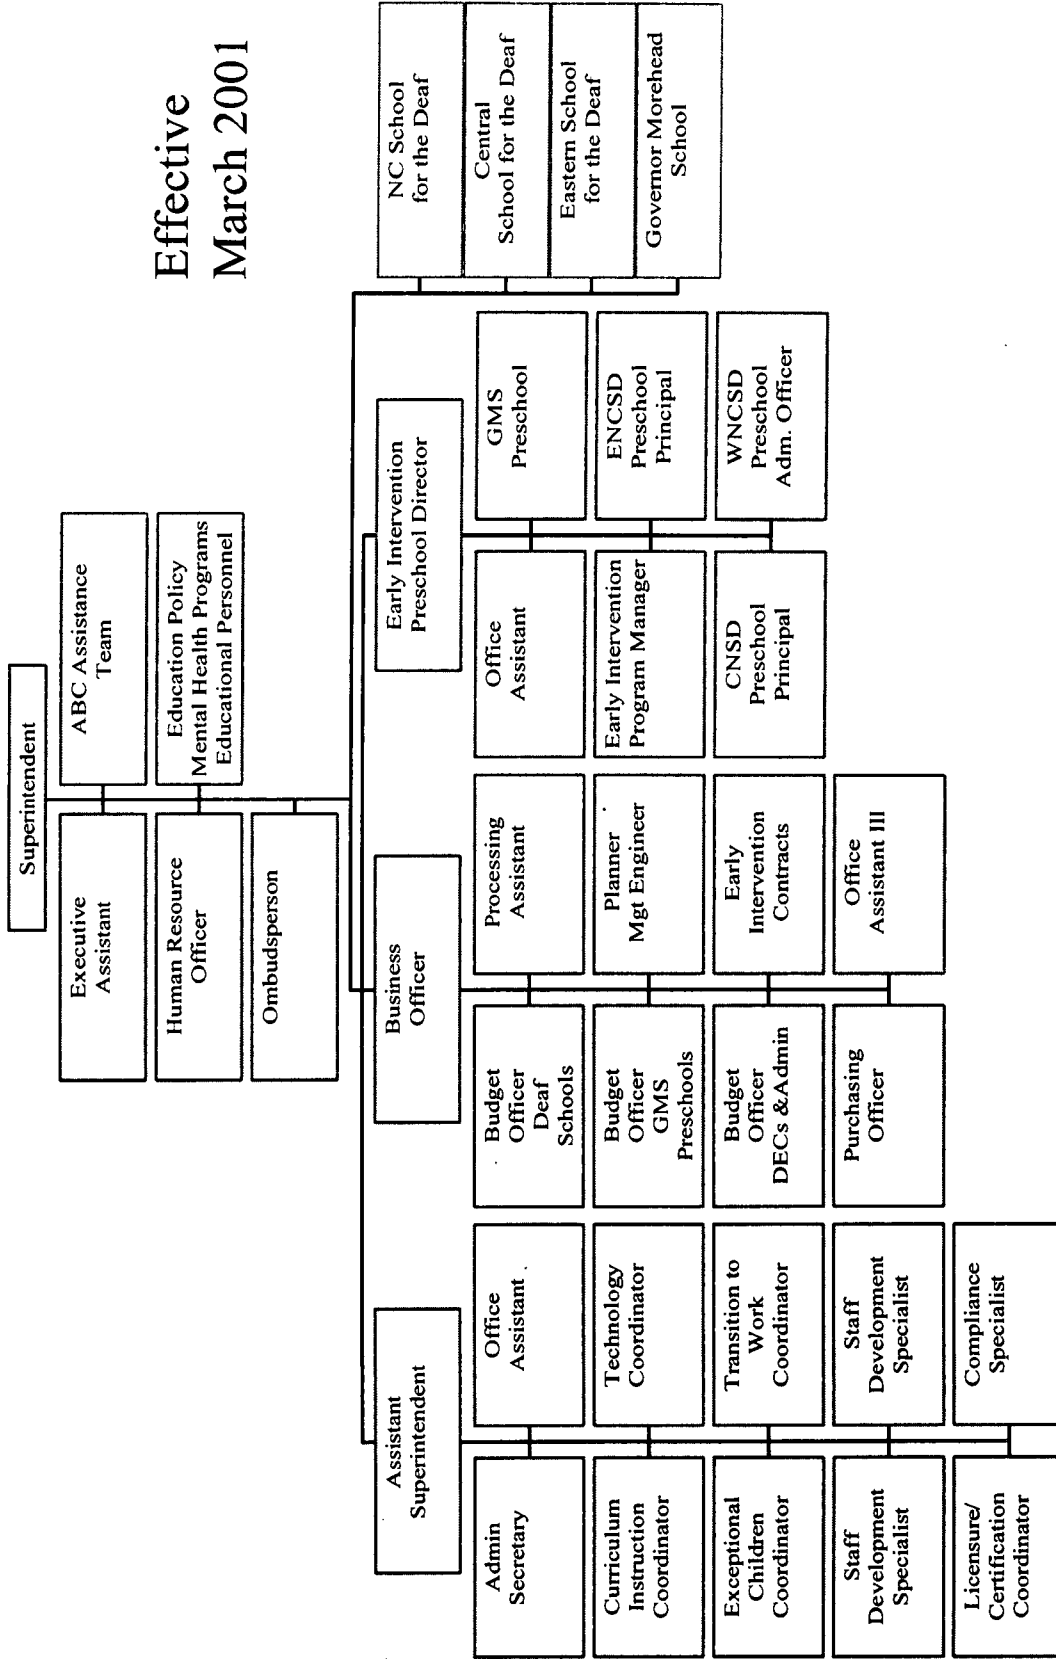

- House Bill 168 (1999) – Section 11.4 (a) Establishment of Division of Education Services/Review of Disability Services
- Purpose of creating the new division was to manage the Governor Morehead School for the Blind and the three residential schools for the deaf focusing management and resources on:
 - Improving student post-secondary outcomes
 - Increasing staff development and training
 - Administrative consistency and access to expert support services across campuses
 - Collaborating with local education agencies and the State Board of Education
 - Consistency with the 1999 Education and Disability Organization Study

Division of Early Intervention and Education

Division of Education Services
HB168 Directive

Division of Early Intervention and Education

Division of Early Intervention and Education

Preschool Programs

- Preschool is available to birth - 5 year olds who are hearing or visually impaired. The children may receive preschool education through one of the following: state-operated preschool sites, a preschool located on the campus of a residential school, in a childcare setting, or the student's home through itinerant teachers.

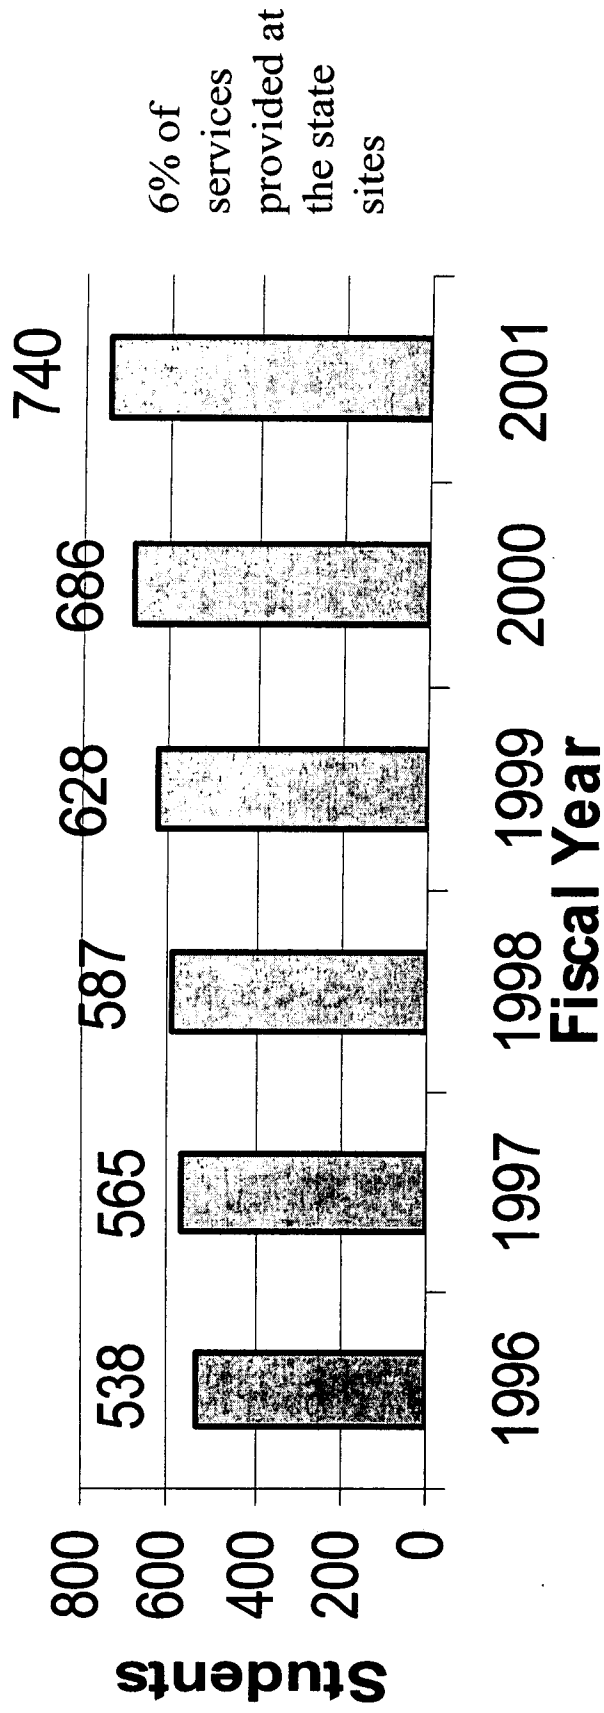

Division of Early Intervention and Education

Preschool Budget

Division of Early Intervention and Education

Preschool Enrollment All Sites

Division of Early Intervention and Education

Preschool Participants by Race

**This includes all preschool

Division of Early Intervention and Education

Enrollment in the Preschool Program at the Schools for the Deaf

Total - 248 for
FY2001

Fiscal Years ****Services are**
 provided at state
 operated preschool
 sites, private
 childcare settings,
 or in the home.

Division of Early Intervention and Education

Division of Early Intervention and Education

State Operated Preschool Programs

- Governor Morehead School
 - Class I/GMS
 - 5 children
 - 2 teachers and 2 assistants
 - Class II/GMS
 - 6 children
 - 1 teacher and 1 teaching assistant
 - Baby Group (once a week with teaching staff of class II)
 - 5 babies
 - Total Cost - \$398,180
 - Cost per Child - \$36,198
- Central Preschool
 - 3 children
 - 1 teacher and 1 assistant
 - Total Cost - \$91,807
 - Cost Per Child - \$30,602
- Western Preschool
 - 6 children
 - 2 teachers and 1 teaching assistant
 - Total Cost - \$163,934
 - Cost per Child - \$27,322

Division of Early Intervention and Education

State Operated

Preschool Programs

- Elkin
 - 3 children
 - 1 teacher and 2 assistants
 - Total Cost - \$112,383
 - Cost per child - \$37,461*
 - Cost per child – estimated with itinerant services - \$16,054 (4 additional children)
- Fayetteville
 - 5 children
 - 1 teacher and 1 assistant
 - Cost \$135,854
 - Cost per child - \$27,170
- Greenville
 - 5 children
 - 1 teacher and 1 assistant
 - Total Cost - \$92,416
 - Cost Per Child - \$18,483
- Jacksonville
 - 3 children
 - 1 teacher and 1 assistant
 - Total Cost - \$95,797
 - Cost per student - \$31,932*
 - Cost per child – estimated with itinerant services - \$13,685 (4 additional children)

* Itinerant services provided by teachers at these sites.

Division of Early Intervention and Education

State Operated Preschool Programs

- Wilson
 - 6 children
 - 1 teacher and 1 assistant
 - Total Cost - \$108,461
 - Cost per child - \$18,076
- Durham
 - 5 children
 - 1 teacher and 4 assistants
 - Cost \$234,379
 - Cost per child - \$46,875
- New Bern
 - 4 children
 - 1 teacher and 1 assistant
 - Total Cost - \$109,462
 - Cost per child - \$27,365

Division of Early Intervention and Education

Early Intervention

- Professionals working with families of a child with special needs to help the child develop the knowledge and skills necessary to reach their potential. It builds upon the strengths of families. Special needs areas include:
 - Motor Development
 - Cognitive Development
 - Communication Development
 - Social or Emotional Development
 - Adaptive Development
- **Developmental Evaluation Centers provide screenings for developmental disabilities and delays (0-5 year olds)**
- **Infant-Toddler Program (0 – 3 year olds)**

Division of Early Intervention and Education

Early Intervention Services

Individuals with Disabilities Education Act (IDEA)

- Assessment and Program Development
 - Multidisciplinary assessment of the unique strengths and needs of infants and toddlers and the identification of services appropriate to meet such needs
 - Family-directed assessment of resources, priorities and concerns of the family and identification of the supports and services necessary to enhance the family's capacity to meet the developmental needs of the infant or toddler
 - Individualized family service plan (IFSP) developed by a multidisciplinary team
- To the extent possible, services are to be provided in natural environments, including the home and community settings in which children without disabilities participate.
- Evaluation provided within 45 days of referral
- Services to begin within 30 days of evaluation/IFSP (state requirement)
 - Approximately 681 children's evaluation did not meet the 45 day referral (FY2000)
 - Approximately 600 children are waiting for services outside of 30 days

Division of Early Intervention and Education

- Interagency Coordinating Council (Division of Child Development)
 - Advise and assist the Lead Agency in carrying out responsibilities of IDEA, preparation of applications, and prepare and submit an annual report to the Governor and Secretary of HHS on the status of early intervention programs for infants and toddlers with disabilities and their families operated within the state.
 - Requirement in order to receive funding under IDEA
 - Council is appointed by the Governor and chairperson is designated by the Governor
 - 20% Parents
 - 20% Service Providers
 - State Legislator
 - State Agency Representation (one member from each agency)

Division of Early Intervention and Education

- Infant/Toddler Program was transferred from Division of Mental Health/Developmental Disabilities/Substance Abuse Services
- Local Consortium: There are 91 local consortia which provide the guidance for evaluation services for children referred to Early Intervention and assist in the development of the Individual Family Services Plan
- Agencies on the local consortium include the Area Mental Health Program, Local Public Health Department, DEC and sometimes DSS

Division of Early Intervention and Education

Early Intervention

Local Public Health
Departments, Area Mental
Health Agencies, DECs,
others

Division of Early Intervention and Education

Developmental Evaluation Centers

- Network of 18 regional centers with a team of specialists in pediatrics, social work, psychology, speech and language, audiology, physical/occupational therapy, special education, nursing and nutrition which provide the evaluations for infants and toddlers.
- 13 state operated DEC's and 5 contracted DEC's.
- Administration/Management was transferred from the Division of Public Health in FY2000.

Division of Early Intervention and Education Options

1. **Layers of Management (TBD)**
 - a. Assistant Superintendent
 - b. Early Intervention/Preschool Program Director
2. **Non-Critical Positions (TBD)**
 - a. Research & Professional Development Coordinator
 - b. Office Assistant IV
 - c. Staff Development Coordinator
 - d. Administration Specialist
 - e. HR Assistant Manager

05/01/2001 Lisa

Division of Early Intervention and Education Options

2. **Non-Critical Positions (TBD)**
 - f. Office Assistant
 - g. Employee Relations Specialist
 - h. Reduce Audiologists Positions & Evaluate Expansion
3. **Modified Zero-Based Budget Items:**
 - a. **Programs/Offices (See #6 – Reorganization/Consolidation)**
 - b. **Contracts (Pending)**
 - a. Eliminate the contracts for \$24,000 per child to LEAs - Develop a reserve account within HHS to assist local LEAs with expenses in educating these children. These funds will be administered in conjunction with the DPI reserve account.
 - c. **Commissions/Task Force & Committees (N/A)**

Division of Early Intervention and Education Options

4. **Governor's Reductions**
 - a. Close Central School for the Deaf (1,200,000)
 - b. Increased Receipts from the DEC's (\$457,271)

5. **Program Cost-Containment Measures**
 - a. Close State-Operated Preschools & Eliminate Corresponding Positions TBD
 - b. Maximize Third Party Receipts (Health Choice/Private Insurance/Medicaid) TBD for Early Intervention & DEC Services

6. **Reorganization/Consolidations**
 - a. Move DEC's Back to the Division of Public Health
 - b. Move Early Intervention Program to the Division of Public Health
 - c. (In Accordance With House Bill 168) Establish an Office of Education Within the Office of the Secretary

7. **Other Options (Pending)**

AGENDA

Joint Appropriations Subcommittee on Health and Human Services

Legislative Office Building – Room 643

Wednesday, May 2nd, 2001

8:30 a.m.

Opening Remarks

*Senator Bill Martin, Co-Chair
Representative Beverly Earle, Co-Chair
Representative Edd Nye, Co-Chair*

North Carolina Medicaid Benefit Study

*Charles J. Milligan, Vice President
The Lewin Group*

*John G. Brehm, MD
West Virginia Medical Institute*

Committee Discussion

Next Meeting

Adjourn

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

**MINUTES
MAY 2, 2002
8:30 A.M.**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met on Wednesday, May 2, 2002 in Room 424 of the Legislative Office Building. The following members were present:

**Representative Beverly Earle, Co-Chair
Representative Edd Nye, Co-Chair
Representative Verla Insko
Representative Mark Crawford**

The meeting was opened by Representative Beverly Earle, Co-Chair, by introducing the Pages for the meeting.

A presentation was presented to the committee by Mr. Charles J. Milligan, Vice President of the Lewin Group, and Mr. John G. Brehm, MD from the West Virginia Medical Institute.

The North Carolina Medicaid Benefit Study

The purpose of this study was to take a in-depth look at North Carolina's existing Medicaid benefit package. To review current benefits for "amount, sufficiency, duration, and scope of service. To look at the decision making process by which benefits are added or subtracted, and how benefit are implemented and managed. (See Attachment II)

Contractors

The Lewin Group is the Prime Contractor which has provided Medicaid consultation services in over 30 states.

The West Virginia Medical Institute is the Subcontractor which offers clinical expertise.

Methodologies

Methodologies used in the study was on-site interviews with state staff and employees, desk review of Medicaid program materials, interviews with Medicaid program subcontractors, analysis of specific claims data provide upon request, interviews and surveys of private insurers and state employee health plan staff in North Carolina, and review of national literature using standard sources of medical information such as the HCFA database, the Cochrane Collaboration, the National Library of Medicine, and others.

Key Findings

In many ways, Division of Medical Assistant (DMA) and the state have done a good job

- Division of Medical Assistant's utilization Management approach for certain benefits is well designed and well executed
- For other benefits, the utilization management approaches are not as exemplary
- Benefit policy-making needs better coordination
- Accessing federal funds drives many Medicaid benefit policy decisions
- North Carolina's general approach emphasizes access
- North Carolina's policies lead other states in certain areas
- Physical are reimbursed far better than neighboring states, at 100% of Medicare
- Behavioral health benefits do not have a level playing field
- Program integrity goals need support

Questions and comments were made at this time.

Representative Beverly Earle, Co-Chair, informed the committee that the presentation from Mr. Charles Milligan could not be completed at this time. A meeting scheduled for 4:00 pm will conclude his presentation.

The meeting was adjourned.

Respectfully submitted,

Presiding Co-Chair, Representative Beverly Earle

Committee Assistant, Ann Raeford

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

Minutes
May 2, 2002
4:00 p.m.

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met jointly with the Senate Appropriations Subcommittee on Wednesday, May 2, 2002 in Room 643 of the Legislative Office Building. The following members were present:

Representative Beverly Earle, Co-Chair
Representative Edd Nye, Co-Chair
Representative Walter Church
Representative Thomas Wright

Four Senate members were present.

The meeting was opened by Representative Beverly Earle, with an introduction of Pages. The committee then heard a continuation of a presentation from Dr. Brehm, MD from the West Virginia Medical Institute. (See Attachment II) He spoke on key recommendations.

Key Recommendations

- Increase management of the pharmacy benefit
- Create a level playing field in behavioral health
- Reduce the fragmentation in the Medicaid benefit policy-making process
- Reduce physician fees
- Improve the use of data and Medical literature in the decision-making process
- Re-evaluate coverage of certain optional benefits
- Improve coordination of care and utilization review processes
- Strengthen program integrity controls

Increase Management of the pharmacy benefit: North should implement a prior authorization program for at least eight drugs.

Create a level playing field in behavioral health: Consider eliminating preferential rules that favor public providers.

Reduce the fragmentation in the Medicaid benefit policy-making process: Continue to emphasize a more inform approach to benefit evaluation.

Reduce physician fees: North Carolina pays its Medicaid providers a higher percentage of Medicare allowable charges than any other state in the region.

Improve the use of data and medical literature in the decision-making process: Consistently evaluate the actual utilization trends, health outcomes, and data on new services 12 to 18 months after implementation.

Re-evaluate coverage of certain optional benefits: Re-evaluate whether to cover benefits not offered by at least 30 other state Medicaid programs.

Improve coordination of care and utilization review process: Evaluate how to better align utilization review contractor scopes of work to reduce coordination problems.

Strengthen program integrity controls: Do not implement a new benefit until either the claims payment system is ready or an alternate enforcement strategy is in place.

Conclusion

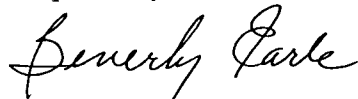

He stated that being the Monday morning quarterback is easy, but the policy-making is the hardest. In general Medicaid benefits in North Carolina are well designed, well managed, and crafted to serve beneficiaries needs. He said there is room for improvement, with outcomes that will help the state's beneficiaries and its budget.

Question and comments began at this time.

***Note: See Attachment II for full content of this report.**

The meeting was adjourned

Respectfully submitted,

Presiding Co-Chair, Representative Beverly Earle

Committee Assistant, Ann Raeford

**NORTH CAROLINA
MEDICAID BENEFIT STUDY**

Prepared for:
North Carolina General Assembly

With assistance from:
West Virginia Medical Institute

May 2, 2001

OVERVIEW

- ◆ **1. Purpose of the Study**
- ◆ **2. Contractors**
- ◆ **3. Methodologies**
- ◆ **4. Introduction**
- ◆ **5. Core Principles**
- ◆ **6. Key Findings**
- ◆ **7. Key Recommendations**

PURPOSE OF THE STUDY

PURPOSE & GOALS OF THE STUDY

- ◆ **To Look In-Depth At:**
 - **North Carolina’s Existing Medicaid Benefit Package**
 - Review current benefits for “Amount, Sufficiency, Duration, and Scope of Services”
 - **The Decision-Making Process by Which Benefits are Added or Subtracted**
 - **Benefit Implementation and Management**

CONTRACTORS

CONTRACTORS

- ◆ **The Lewin Group is the Prime Contractor**
 - **Has provided Medicaid consultation services in over 30 states**
 - **Project team experience includes work with over 15 state Medicaid programs**
- ◆ **West Virginia Medical Institute is the Subcontractor**
 - **Offers clinical expertise**
 - **Performs Medicaid utilization review in West Virginia and Virginia**
 - **Is a Medicare peer review organization**

METHODOLOGIES

METHODOLOGIES USED IN THE STUDY

- ◆ **On-site interviews with State Staff**
- ◆ **Desk Review of Medicaid program materials**
- ◆ **Interviews with Medicaid program subcontractors**
- ◆ **Analysis of specific claims data provided upon request**
- ◆ **Interviews and surveys of other State Medicaid Programs**
- ◆ **Interviews and surveys of Private Insurers and State Employee Health Plan Staff in North Carolina**
- ◆ **Review of national literature using standard sources of medical information such as the HCFA database, the Cochrane Collaboration, the National Library of Medicine, and others**

INTRODUCTION

INTRODUCTION

A. Medicaid Programs Try to Balance Access and Cost Containment

		Is Care Provided?	
		Yes	No
Is Care Medically Necessary?	Yes	Correct Outcome	Type I Error
	No	Type II Error	Correct Outcome
Type I Error:	Medically necessary care is not delivered. Access problem.		
Type II Error:	Medically unnecessary care is delivered. Cost containment/overutilization problem.		

INTRODUCTION (CONT'D)

B. A Crude Cost Containment Emphasis Overly Restricts Access

		Is Care Provided?	
		Yes	No
Is Care Medically Necessary?	Yes	Correct Outcome	Type I Error
	No	Type II Error	Correct Outcome

Type I Error: Medically necessary care is not delivered. Access problem.

Type II Error: Medically unnecessary care is delivered. Cost containment/overutilization problem.

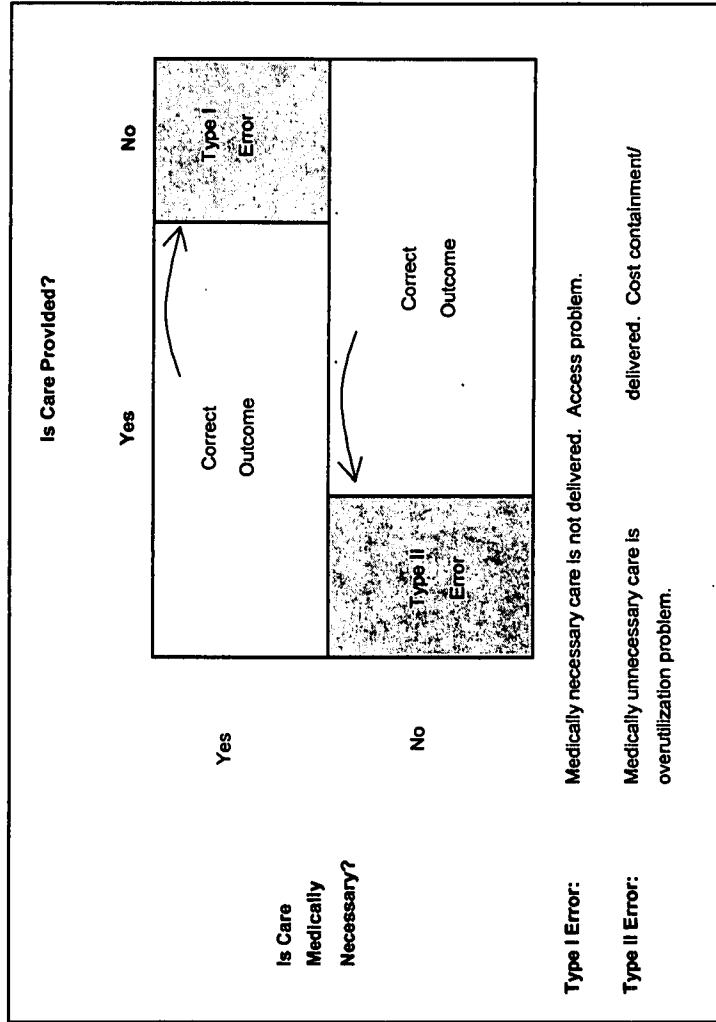

INTRODUCTION (CONT'D.)

C. Similarly, a Crude Access Emphasis Results in Unnecessary Expenditures

		Is Care Provided?	
		Yes	No
Is Care Medically Necessary?	Yes	Correct Outcome	Type I Error
	No	Type II Error	Correct Outcome
Type I Error:	Medically necessary care is not delivered. Access problem.		
Type II Error:	Medically unnecessary care is delivered. Cost containment/overutilization problem.		

INTRODUCTION (CONT'D)

D. To Advance Access and Cost Containment Policies Simultaneously, Careful Management is Needed

INTRODUCTION (CONT'D.)

E. Medicaid Benefits Are “Richer” Than Private Insurance In All States

- Federal mandates
- Poor and vulnerable population
- Decisions are made to access federal funds, to displace state and local funds. In North Carolina, the SFY 2002 breakdown of Medicaid financing is:

Federal	61.71%
State	32.54%
County	<u>5.75%</u>
	100.00%

CORE PRINCIPLES

CORE PRINCIPLES

- ◆ **Promote beneficiary access to services as the highest value, even if the result is expenditure increases**
- ◆ **Promote maximum provider participation, using reimbursement rates as one tool**
- ◆ **Further promote provider participation through utilization review “burdens” often below commercial insurance**
- ◆ **Maximize federal Medicaid funds to public providers and for otherwise state-only funded services**

KEY FINDINGS

KEY FINDINGS

1. In Many Ways, DMA and the State Have Done a Good

Job

- DMA evaluates new benefit policies before implementation
- DMA considers how to define services and how to manage utilization, on a service-by-service basis
- DMA is strongly motivated to serve beneficiaries of the Medicaid program
- DMA seeks to establish and maintain a high provider satisfaction levels

KEY FINDINGS (CONTD.)

2. **DMA's Utilization Management Approach For Certain Benefits Is Well Designed And Well Executed. For Example:**
 - Inpatient hospital
 - Nursing home

3. **For Other Benefits, The Utilization Management Approaches Are Not As Exemplary. For Example:**
 - Pharmacy -- utilization management is largely non-existent
 - Certain home health-related benefits -- the rules are difficult to enforce
 - DME -- utilization management is largely non-existent
 - Medicaid necessity definition based on "community standards" is outdated

"All medical services performed must be medically necessary and may not be experimental in nature. Medical necessity is determined by generally accepted North Carolina community practice standards as verified by independent Medicaid consultants.

10 NCAC 26C, 0105 MEDICAL SERVICES Effective March 1, 1990.

KEY FINDINGS (CONTD.)

3. For Other Benefits, The Utilization Management Approaches Are Not As Exemplary. For Example (Continued):

➤ Multiple contractors have overlapping roles:

EDS	Medical Review of NC	First Health	Value Options
<ul style="list-style-type: none"> ▪ Institutional level of care for the mentally retarded ▪ Pre-admission nursing facility level of care ▪ Certain adult outpatient mental health visits ▪ Durable medical equipment, hearing aids, eyeglasses ▪ Certain hospital inpatient and outpatient services ▪ Certain dental services ▪ Prior approval for certain services provided for Medicaid Pregnant Women 	<ul style="list-style-type: none"> ▪ Ongoing nursing home level of care ▪ Retrospective review of inpatient hospital claims ▪ Retrospective review of services provided under the CAP/DA program 	<ul style="list-style-type: none"> ▪ Inpatient psychiatric treatment ▪ Psychiatric Residential Treatment Facility services ▪ Nursing facility pre-admission screening ▪ Retrospective pharmacy utilization review 	<ul style="list-style-type: none"> ▪ Child outpatient mental health visits after the 26th visit ▪ Levels II-IV residential psychiatric treatment

KEY FINDINGS (CONTD.)

4. Benefit Policy-Making Needs Better Coordination

- **Across services within the Medical Policy Unit (DMA is addressing this issue)**
- **Across Units within DMA**

5. Accessing Federal Funds Drives Many Medicaid Benefit Policy Decisions

- **This is not unique to North Carolina**
- **Examples:**
 - Behavioral health
 - School-based special education

KEY FINDINGS (CONTD.)

6. North Carolina's General Approach Emphasizes Access

- Broad "amount, duration and scope" of services
- Adoption of more optional services than most other states
- High physician reimbursement rates

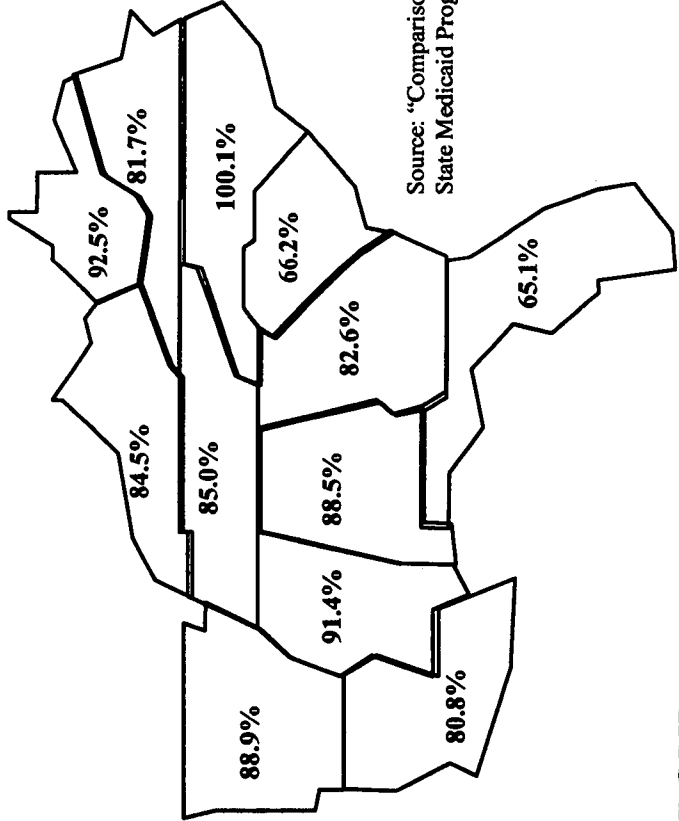

7. North Carolina's Policies Lead Other States In Certain Areas

- Carolina ACCESS II and III are closely watched and emulated
- North Carolina's response to Olmstead is exemplary

KEY FINDINGS (CONTD.)

8. Physicians Are Reimbursed Far Better Than Neighboring States, At 100% Of Medicare

➤ The next highest neighbor, Tennessee, is at 85% of Medicare

Source: "Comparison of Physician and Dental Fees Paid by State Medicaid Programs," Medi-Cal Policy Institute, 2001.

KEY FINDINGS (CONTD.)

- 9. Behavioral Health Benefits Do Not Have A Level Playing Field**
 - **Area Mental Health Authorities enjoy preferential policies, compared to private providers**
- 10. Program Integrity Goals Need Support**
 - **Policies must connect to enforcement strategies**
 - **Resources are needed by DMA**

KEY RECOMMENDATIONS

KEY RECOMMENDATIONS

1. Increase Management of the Pharmacy Benefit

- Prior authorization programs are common in other states and with private insurers in North Carolina; North Carolina should implement a prior authorization program for at least eight drugs:

Drug Name	Total Expense 2000 ¹	Projected Potential Expense Reduction ²
Prilosec	\$ 36,282,850	\$ 25,500,000
Prevacid	\$ 23,481,230	\$ 13,800,000
Aciphex	\$2,562,802	\$1,500,000
Ranitidine 150mg	\$6,371,835	(\$ 2,000,000)
Pepcid	\$5,366,912	(\$ 1,700,000)
Axid	\$2,308,959	(\$ 700,000)
Celebrex	\$ 15,036,600	\$ 11,200,000
Vioxx	\$ 10,010,600	\$ 7,750,000
"other branded NSAIDs"		neutral
Total		\$55,350,000
Potential State Savings		\$16.3 million

KEY RECOMMENDATIONS (CONTD.)

1. Increase Management of the Pharmacy Benefit (Cont'd.)

- Replace the six prescription per month limit, which is a barrier to a seventh prescription that may deny access, with a more rigorous prior authorization program to ensure that cost decisions are made based on clinical guidelines

Distribution of Beneficiaries by Number of Prescriptions Per Month, CY2000

KEY RECOMMENDATIONS (CONTD.)

1. Increase Management of the Pharmacy Benefit (Cont'd.)

- Evaluate other incentives to encourage the use of generic drugs, such as differential dispensing fees or differential copayments
- Actively manage physician prescribing practices through provider profiling
- Eliminate blanket 100-day pharmacy supply, and replace with shorter or tiered approaches (e.g., no more than 34 days for first fill, longer supplies only based on clinical considerations)

Days Supply	Number of Prescriptions	Percentage of Prescriptions
0-30	13,032,909	81.4%
31-60	2,529,799	15.8%
61-100	438,414	2.7%
Total	16,001,122	100%

Source: DMA

KEY RECOMMENDATIONS (CONTD.)

2. Create A Level Playing Field in Behavioral Health

➤ Consider eliminating preferential rules that favor public providers:

- Area Programs review and approve Levels 1 and 2 residential stays without input from ValueOptions, thus influencing those private residential providers to work with Area Programs;
- Area Programs retain the sole utilization management role for non-Medicaid enrolled private residential providers, meaning private providers must contract with Area Programs to avoid scrutiny by DMA's utilization management contractor;
- Only Area Programs authorize admissions to independent residential providers, even from a private doctor to a private residential provider, again locking in their role and requiring private providers (who are *competing* with Area Programs) to secure favorable relationships with Area Programs; and
- Outpatient visits at Area Programs are not subject to annual limits, while outpatient visits to private providers are.

➤ Maximizing federal revenue to the public providers may inappropriately discourage private provider participation in delivering these benefits

KEY RECOMMENDATIONS (CONTD.)

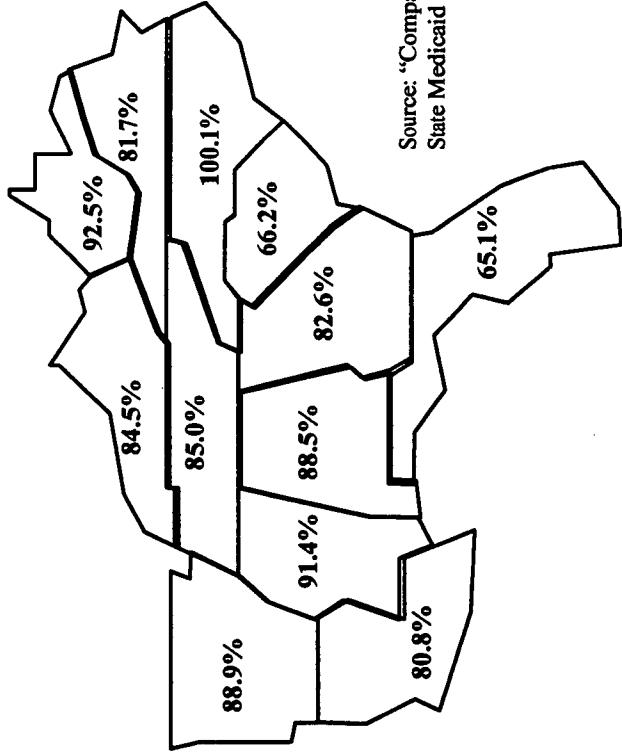

3. Reduce The Fragmentation in the Medicaid Benefit Policy-Making Process

- **Continue to emphasize a more uniform approach to benefit evaluation**
- **Continue to ensure that input from other DMA units is appropriately communicated to the Medical Policy Unit benefit managers**
- **Formally include in the policy development process an evaluation of whether the claims payment system will enforce the benefit or whether another strategy (e.g., post-payment review, medical record review) should be used to support program integrity**
- **Designate internal resources to systematically review coverage policies**

KEY RECOMMENDATIONS (CONTD.)

4. Reduce Physician Fees

- North Carolina pays its Medicaid providers a higher percentage of Medicare allowable charges than any other state in the region

Source: "Comparison of Physician and Dental Fees Paid by State Medicaid Programs," Medi-Cal Policy Institute, 2001.

KEY RECOMMENDATIONS (CONTD.)

4. Reduce Physician Fees (Cont'd)

- Could reduce Medicaid physician fees to 91 percent of Medicare rates without harming access. Savings = \$50.85 million total (\$16.5 million state)
- Evaluate whether access would be compromised by a further reduction to 85 percent of Medicare rates (percentage paid by the highest neighboring state). Savings = \$84.75 million total (\$27.6 million state)

KEY RECOMMENDATIONS (CONTD.)

5. Improve The Use of Data and Medical Literature in the Decision-Making Process

- Consistently evaluate the actual utilization trends, health outcomes, and data on new services 12 to 18 months after implementation
- Compare information on the projected utilization and actual utilization of existing benefits to refine beneficiary and provider behavioral modeling techniques and refine future forecasts
- Adopt a definition of “medical necessity” that is consistent with current references to national standards of care
- Use expert and community sources of input to identify and evaluate new benefits or changes

KEY RECOMMENDATIONS (CONTD.)

6. Re-Evaluate Coverage of Certain Optional Benefits

- **Re-evaluate whether to cover benefits not offered by at least 30 other state Medicaid programs:**
 - Lengthy therapeutic leave (paying for empty beds) of 60 days per year
 - Chiropractic care
 - Private duty nursing
- **Do not add benefits simply to maximize federal funds to governmental providers; only add next benefits when clinical data suggests improvements in health care**

KEY RECOMMENDATIONS (CONTD.)

7. Improve Coordination of Care and Utilization Review Processes

- Evaluate how to better align utilization review contractor scopes of work to reduce coordination problems
- Currently, four different organizations are responsible for reviewing and prior authorizing different elements of the behavioral health service package:
 - Area Programs: prior authorization for Levels II-IV residential treatment for children
 - EDS: prior authorization for private practitioner outpatient visits for adults after the second visit, prior authorization for placement in an intermediate care facility for the mentally retarded (ICF/MR)
 - First Health: prior authorization for Psychiatric Residential Treatment Facility (PRTF) placement for children
 - Value Options: prior authorization for outpatient visits for children after the 26th visit
- Require communication between school-based providers and a child's primary care provider regarding all school-based services
- Coordinate the process for determining eligibility for institutional care and enrolling in a Community Alternatives Program

KEY RECOMMENDATIONS (CONTD.)

8. Strengthen Program Integrity Controls

- Do not implement a new benefit until either the claims payment system is ready or an alternate enforcement strategy is in place
- Pursue developing new administrative resources that are necessary to administer and manage the Medicaid benefits:
 - Two hearing officers: Process nursing home level of care appeals
 - Ten staff in program integrity: To monitor fraud and abuse for Medicaid benefits not easily controlled by automated claims processing system coding
 - Two home care nurse reviewers: To evaluate home care plans of care
 - Administrative costs to implement Rx utilization management system
 - Part-time consulting physician support

CONCLUSION

1. **Monday Morning Quarterbacking Is Easy, Policy-Making Is Hard**
2. **In General, Medicaid Benefits In North Carolina Are Well Designed, Well Managed, and Crafted To Serve Beneficiaries' Needs**
3. **There Is Room For Improvement, With Outcomes That Will Help The States' Beneficiaries And Its Budget. Some Require Hard Decisions:**
 - **Pharmacy reforms**
 - **Physician fee reductions**
 - **Leveling the playing field regarding public providers**
 - **Implementing reforms that require administrative investments**
 - **Eliminating benefits not offered by other states**
4. **Administrative Cost Containment Can be Detrimental to Program Cost Containment**

Committee Discussion

Adjourn

HOUSE APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

**Minutes
June 6, 2001
8:30 AM**

The North Carolina General Assembly House Appropriations Subcommittee on Health and Human Services met on Wednesday, June 6, 2001 in Room 424 of the Legislative Office Building. The following members were present:

Representative Beverly Earle, Co-Chair
Representative Edd Nye, Co-Chair
Representative Debbie Clary
Representative Verla Insko
Representative Theresa Esposito
Representative Thomas Wright
Representative Mark Crawford

The meeting was opened by Representative Beverly Earle, Co-Chair, at 8:30 am. Pages were introduced. The purpose of this meeting is to explain the Senate Budget SB 1005 by the Fiscal Research Division. The Money Report was presented and this time and the Special Provisions will be presented at a later meeting. Members were asked to hold all questions and comments until the designated time.

Karen Hammonds-Blanks began the presentation by presenting to the committee the Department of Health and Human Services position reduction. (See Attachment II for all division reductions)

<u>Divisions</u>	<u>Positions</u>	<u>State Appropriations</u>
Central Administration	49.0	\$2,686,931
Aging	5.0	\$68,914
Child Development	15.0	\$540,531
MH/DD/SAS	81.5	\$2,076,953
Medical Assistance	10.0	\$200,147
Facility Services	6.0	\$322,870
Services for the Blind	1.0	\$29,313
Deaf and Hard of Hearing	1.0	\$59,131
Voc. Rehabilitative Ser.	3.0	\$58,770
Early Intervention & Ed.	46.0	\$2,208,978
Public Health	16.59	\$1,033,536
Social Services	<u>27.0</u>	<u>\$861,273</u>
Total	261.09	\$10,147,847

Appropriations Subcommittee on Health and Human Services
Minutes
June 6, 2001
Page 2

	<u>FY 2001-02</u>	<u>FY 2002-03</u>
Total Legislative Changes	(\$72,929,080) R	(\$77,393,981)R
Total Position Changes	-261.09	-347.09
Revised Budget	\$3,398,801,563	\$3,647,910,478

The closing of the Whitaker School was discussed in depth. The department has been asked to close the Whitaker School, effective July 1, 2002. The department has to prepare transition plans for each of the 36 children and to conduct a needs assessment to determine the number and type of residential treatment beds needed across the state. Carmen Hooker Buell, Secretary of the Department of Health and Human Services, stated the department will not start the closure process until the department has the funding. If the funding is not there, she anticipate a lot of lawsuits.

All members of the committee had concerns about the reduction of positions. There concerns were that the reduction would have an impact on the services provided to citizens of North Carolina.

The Special Provisions will be discussed at the June 7th meeting scheduled at 8:30 am.

The meeting was adjourned.

Respectfully submitted,

Presiding Co-Chair, Representative Beverly Earle

Committee Assistant, Ann Raeford

PART XXI. DEPARTMENT OF HEALTH AND HUMAN SERVICES

SUBPART 1. CENTRAL ADMINISTRATION

New

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
DHHS REGIONAL OFFICES

SECTION 21.1.(a) ~~The Department of Health and Human Services shall~~ consolidate and reduce its regional, district, field, and satellite offices located throughout the State. The Department shall implement these consolidations and reductions no later than June 30, 2002. The Department shall provide the following information:

- (1) An inventory of all its regional, district, field, and satellite offices located throughout the State before the consolidation required in this section. This inventory shall include the purpose of the office (direct services or central location for field staff), the number of staff assigned to the office, the cost of operating the office, and information on whether the office is co-located or located near another regional, district, field, or satellite office;
- (2) An inventory of all its regional, district, field, and satellite offices located throughout the State after the consolidation required in this section is completed. This inventory shall include the purpose of the office (direct services or central location for field staff), the number of staff assigned to the office, the cost of operating the office, and information on whether the office is co-located or located near another regional, district, field, or satellite office;
- (3) A report on the anticipated impact of the consolidation required by this section on the delivery of services;
- (4) A report on the use of technology to comply with the consolidation required under this section to increase the number of staff working from their homes or other locations; and
- (5) A report on the anticipated cost savings, efficiencies in the use of State staff and resources, and improved delivery of services resulting from the consolidation required under this section.

SECTION 21.1.(b) The Department of Health and Human Services shall provide an interim report on the activities required under this section by January 1, 2002, and a final report by July 1, 2002. The interim and final reports shall be provided to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

New

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
CENTRALIZE CRIMINAL RECORD CHECK FUNCTIONS

SECTION 21.2. The Department of Health and Human Services shall centralize all activities throughout the Department relating to the coordination and processing of criminal record checks required by law. The centralization shall include the transfer of positions, corresponding State appropriations, federal funds, and other funds. The Department shall report on the centralization of criminal record check activities to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division not later than January 1, 2002.

New

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
PRESCRIPTION DRUG ASSISTANCE PROGRAM MANAGEMENT

Medicaid Program - Drug Program for the elderly

SECTION 21.3.(a) The Department of Health and Human Services shall implement the following recommendations of the "North Carolina Medicaid Benefit Study", May 1, 2001, to improve the management of prescription drug assistance programs operated by the Department, including programs in the Divisions of Public Health, Mental Health, Developmental Disabilities, and Substance Abuse Services, Services for the Blind, and Vocational Rehabilitation:

- (1) Dispensing of generic drugs: Notwithstanding G.S. 90-85.27 through G.S. 90-85.31, under all prescription drug assistance programs operated by the Department of Health and Human Services, a prescription order for a drug designated by a trade or brand name, except an atypical antipsychotic drug or a drug listed in the narrow therapeutic index, shall be considered to be an order for the drug by its established or generic name, except when the prescriber has determined, at the time the drug is prescribed, that the brand name drug is medically necessary and has written on the prescription order the phrase "medically necessary". Generic drugs, when available in the pharmacy, shall be dispensed at a lower cost to the Medical Assistance Program rather than trade or brand name drugs. As used in this subdivision, 'brand name' means the proprietary name the manufacturer places upon a drug product or on its container, label, or wrapping at the time of packaging, and 'established name' has the same meaning as in section 502(e)(3) of the Federal Food, Drug, and Cosmetic Act as amended, 21 U.S.C. § 352(e)(3).
- (2) Decrease the supplies of prescription drugs to 34-day supplies for some or all drugs.

SECTION 21.3.(b) The Department shall consider other drug utilization management activities for all prescription drug assistance programs operated by the Department, as follows:

- (1) Prior authorization program to manage costly name brand drugs.
- (2) Maximum allowable pricing.
- (3) Step therapy.
- (4) Contracting with a pharmacy benefits manager to implement more extensive prospective drug utilization review.

SECTION 21.3.(c) The Department shall report on the activities conducted under this section to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division no later than January 1, 2002.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

New

TOLL-FREE PHONE LINE INVENTORY AND CONSOLIDATION

SECTION 21.5.(a) The Department of Health and Human Services shall determine the feasibility of combining all Department-operated and contracted toll-free (1-8xx) phone lines to create efficiencies. An inventory of all resource telephone lines throughout Divisions of the Department shall be conducted and an evaluation completed of potential savings in combining these phone lines. In conducting the inventory, the Department shall identify the following:

- (1) Title and purpose of the phone line. *1-800# across the state*
- (2) Type of information provided to callers.
- (3) Budget of the operations.
- (4) Number of staff (phone agents, other).
- (5) Number of calls received annually to each phone line.
- (6) Contracts.

The Department shall project costs for the new combined phone line and prepare a comprehensive cost-benefit analysis on the new consolidated plan compared with current services.

SECTION 21.5.(b) The Department shall submit a progress report on the feasibility study to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, the Senate Appropriations Committee on Information Technology, and the House of Representatives Appropriations Subcommittee on Information Technology no later than October 1, 2001, and a final report by April 1, 2002.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
COORDINATION OF ACCESS TO PHARMACEUTICAL COMPANY PRESCRIPTION DRUG PROGRAMS

SECTION 21.6.(a) Of the funds appropriated in this act to the Department of Health and Human Services, the sum of two hundred thousand dollars (\$200,000) for the 2001-2002 fiscal year and the sum of two hundred thousand dollars (\$200,000) for the 2002-2003 fiscal year shall be used to assist eligible individuals in obtaining prescription drugs at no cost or for a nominal fee through pharmaceutical company programs or initiatives. Coordination of access shall be provided through a central location that maintains documentation of an individual's eligibility provided by the individual and prescription orders from the individual's physician to facilitate the provision of no-cost or nominal cost drugs under the pharmaceutical company program. The coordination of access shall be implemented in a way that encourages physician, patient, and pharmacy participation by reducing time-consuming procedural requirements. The Department may contract with a private nonprofit organization to coordinate access as provided under this section.

SECTION 21.6.(b) The Department shall report on the implementation of this section on October 1, 2001, April 1, 2002, and October 1, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
ADULT CARE HOME REIMBURSEMENT RATES IMPLEMENTATION PLAN

SECTION 21.7.(a) The Department of Health and Human Services shall implement all of the recommendations in the March 2001 performance audit report, "Adult Care Home Reimbursement Rates", conducted by the Department of State Auditor, except for the recommendation pertaining to review of the rate methodology for adult care homes. The Department shall implement the recommendations not later than July 1, 2002.

SECTION 21.7.(b) The Fiscal Research Division, through the Legislative Services Office, in consultation with the Department of Health and Human Services, shall issue a Request For Proposal (RFP) and contract for an independent consultant with extensive expertise in rate-setting for public and private entities to develop a new rate methodology for establishing reimbursements for adult care homes. The final report of the independent consultant shall be presented to the General Assembly not later than June 1, 2002.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
LONG-TERM CARE CONTINUUM OF CARE *From Current session*

SECTION 21.9.(a) The Department of Health and Human Services shall, in cooperation with other appropriate State and local agencies and representatives of consumer and provider organizations, develop a system that provides a continuum of

long-term care for elderly and disabled individuals and their families. The Department shall define the system of long-term care services to include:

- (1) A structure and means for screening, assessment, and care management across settings of care;
- (2) A process to determine outcome measures for care;
- (3) An integrated data system to track expenditures, consumer characteristics, and consumer outcomes;
- (4) Relationships between the Department and the State's universities to provide policy analysis and program evaluation support for the development of long-term care system reforms;
- (5) An implementation plan that addresses testing of models, reviewing existing models, evaluation of components, and steps needed to achieve development of a coordinated system; and
- (6) Provision for consumer, provider, and agency input into the system design and implementation development.

SECTION 21.9.(b) Notwithstanding Section 11.7A(a) of S.L. 1999-237, as amended by Section 11.4(b) of S.L. 2000-67, if non-State funds from within the Department can be identified, the Department may, with the approval of the Office of State Budget and Management, proceed to:

- (1) Implement the initial phase of a comprehensive data system that tracks long-term care expenditures, services, consumer profiles, and consumer preferences; and
- (2) Develop a system of statewide long-term care services coordination and case management to minimize administrative costs, improve access to services, and minimize obstacles to the delivery of long-term care services to people in need.

SECTION 21.9.(c) Not later than April 15, 2002, the Department shall submit a progress report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the North Carolina Study Commission on Aging, on the development of the system required under this section.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

RECODIFICATION OF ADMINISTRATIVE RULES

SECTION 21.10. The Codifier of Rules may continue the process of reorganizing Titles 10 and 15A of the North Carolina Administrative Code to reflect the recent reorganization of the Department of Health and Human Services and the Department of Environment and Natural Resources. The reorganization of the Code may include replacing Title 10 with a new Title 10A if desirable for clarity. The Codifier of Rules may make changes in the text of the affected rules to reflect changes in organizational structure of the Department of Health and Human Services and the Department of Environment and Natural Resources. So long as the changes in text do not change the substance of the rules, the reorganization by the Codifier is exempt from the requirements of Chapter 150B of the General Statutes and does not require the review or approval of the Rules Review Commission.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

TRANSFER OF CERTAIN FUNDS AUTHORIZED

SECTION 21.11. Article 1 of Chapter 143 of the General Statutes is amended by adding the following new section to read:

"§ 143-23.3. Transfer of certain funds authorized.

In order to assure maximum utilization of funds in county departments of social services, county or district health agencies, and area mental health, developmental disabilities, and substance abuse services authorities, the Director of the Budget may

transfer excess funds appropriated to a specific service, program, or fund, whether specified service in a block grant plan or General Fund appropriation, into another service, program, or fund for local services within the budget of the respective State agency."

PHYSICIAN SERVICES

SECTION 21.12. With the approval of the Office of State Budget and Management, the Department of Health and Human Services may use funds appropriated in this act for across-the-board salary increases and performance pay to offset similar increases in the costs of contracting with private and independent universities for the provision of physician services to clients in facilities operated by the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services. This offsetting shall be done in the same manner as is currently done with constituent institutions of The University of North Carolina.

ELIMINATE JOINT LEGISLATIVE PUBLIC ASSISTANCE COMMISSION

SECTION 21.13.(a) G.S. 120-225 is repealed. *JLPAC Eliminate*

SECTION 21.13.(b) G.S. 108A-27.2(12) reads as rewritten:

"§ 108A-27.2. General duties of the Department.

The Department shall have the following general duties with respect to the Work First Program:

- (12) Report to the ~~Joint Legislative Public Assistance Commission and the members of the Senate Appropriations Committee on Health and Human Resources Services and the House of Representatives Appropriations Subcommittee on Health and Human Resources Services~~ the counties which have requested Electing status; provide copies of the proposed Electing County Plans to the ~~Joint Legislative Public Assistance Commission and the members of the Senate Appropriations Committee on Health and Human Resources Services and the House of Representatives Appropriations Subcommittee on Health and Human Resources Services; and make recommendations to the Joint Legislative Public Assistance Commission, the members of the Senate Appropriations Committee on Health and Human Resources Services and the House of Representatives Appropriations Subcommittee on Health and Human Resources, and the General Assembly~~ Services on which of the proposed Electing County Plans ensure compliance with federal and State laws, rules, and regulations and are consistent with the overall purposes and goals for the Work First Program; and".

SECTION 21.13.(c) G.S. 108A-27.9(d) reads as rewritten:

"(d) The section of the State Plan proposing the terms of the Work First Program in Electing Counties shall be based upon the aggregate of the Electing County Plans and shall include the following:

- (1) Allocations of federal and State funds for Electing Counties in the Work First Program including block grants to counties and the allocation of funding for administration not to exceed the federally established limitations on the use of federal TANF funds and the limits imposed under this Article;
- (2) Maintenance of effort and levels of State and county funding for Electing Counties in the Work First Program;

- (3) Federal eligibility requirements and a description of the eligibility requirements and benefit calculation in each Electing County; and
- (4) A description of the federal, State, and each Electing County's financial participation in the Work First Program.

The Department may modify the section in the State Plan regarding Electing Counties once a biennium or except as necessary to reflect any modifications made by an Electing County. Any changes to the section of the State Plan regarding Electing Counties shall be reported to the ~~Joint Legislative Public Assistance Commission at the next meeting of the Commission following the changes and to the General Assembly during the next session~~ Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division within one month following the changes."

SECTION 21.13.(d) G.S. 108A-29(r) reads as rewritten:

"(r) Each county's Job Service Employer Committee or Workforce Development Board shall continue the study of the working poor, titled "NC WORKS", in their respective counties and shall include the following in the study:

- (1) Determination of the extent to which current labor market participation enables individuals and families to earn the amount of disposable income necessary to meet their basic needs;
- (2) Determination of how many North Carolinians work and earn wages below one hundred fifty percent (150%) of the Federal Poverty Guideline and study trends in the size and demographic profiles of this underemployed group within the respective county;
- (3) Examination of job market factors that contribute to any changes in the composition and numbers of the working poor including, but not limited to, shifts from manufacturing to service, from full-time to part-time work, from permanent to temporary or their contingent employment;
- (4) Consideration and determination of the respective responsibilities of the public and private sectors in ensuring that working families and individuals have disposable income adequate to meet their basic needs;
- (5) Evaluation of the effectiveness of the unemployment insurance system in meeting the needs of low-wage workers when they become unemployed;
- (6) Examination of the efficacy of a State-earned income tax credit that would enable working families to meet the requirements of the basic needs budget;
- (7) Examination of the wages, benefits, and protections available to part-time and temporary workers, leased employees, independent contractors, and other contingent workers as compared to regular full-time workers;
- (8) Solicitation, receipt, and acceptance of grants or other funds from any person or entity and enter into agreements with respect to these grants or other funds regarding the undertaking of studies or plans necessary to carry out the purposes of the committee; and
- (9) A request of any necessary data from either public or private entities that relate to the needs of the committee or board.

Each committee or board shall prepare and submit a report on the finding for the county which it represents by May 1 of each year to the ~~Joint Legislative Public Assistance Commission, the Senate Appropriations Committee on Health and Human Resources, Services, the House of Representatives Appropriations Subcommittee on Health and Human Resources, Services,~~ the Senate Appropriations Committee on

Natural and Economic Resources, and the House of Representatives Appropriations Subcommittee on Natural and Economic Resources."

SECTION 21.13.(e) Unless specifically amended by another subsection of this section, the phrase "Joint Legislative Public Assistance Commission" is deleted and replaced by the phrase "Senate Appropriations Committee on Health and Human Services and the House of Representatives Appropriations Subcommittee on Health and Human Services" whenever it occurs in each of the following sections of the General Statutes:

G.S. 108A-27	Authorization and description of Work First Program; Work First Program changes; designation of Electing and Standard Program Counties.
G.S. 108A-27.2	General Duties of the Department.
G.S. 108A-27.9	State Plan.
G.S. 108A-29	First Stop Employment Assistance; priority for employment services.
G.S. 114-40	Inspector General.

ESTABLISH OFFICE OF POLICY AND PLANNING

SECTION 21.14.(a) It is the intent of the General Assembly that the Department of Health and Human Services provide coordinated policy development and strategic planning for the State's health and human services systems. The Department is directed to establish an Office of Policy and Planning within the Office of the Secretary from existing resources across the Department. The Director of the Office of Policy and Planning shall report directly to the Secretary and shall have the following responsibilities:

- (1) Development of departmental policies, plans, and rules, in consultation with the Divisions of the Department.
- (2) Development of a departmental process for the development and implementation of new policies, plans, and rules.
- (3) Development of a departmental process for the review of existing policies, plans, and rules to ensure that departmental policies, plans, and rules are relevant.
- (4) Coordination and review of all departmental policies before dissemination to ensure that all policies are well-coordinated within and across all programs.
- (5) Implementation of ongoing strategic planning that integrates budget, personnel, and resources with the mission and operational goals of the Department.
- (6) Review, disseminate, monitor, and evaluate best practice models.

SECTION 21.14.(b) Under the direction of the Secretary of Health and Human Services, the Director of the Office of Policy and Planning shall have the authority to direct Divisions, offices, and programs within the Department to conduct periodic reviews of policies, plans, and rules and shall have the authority to modify, amend, and repeal departmental policies, plans, and rules. All policy and management positions within the Office of Policy and Planning are exempt positions as that term is defined in G.S. 126-5.

SECTION 21.14.(c) The Department shall report on the establishment of the Office of Policy and Planning to the members of the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division by January 1, 2002.

Item 44
G.S.
Insto

TRANSFER POWER AND DUTIES OF THE CHILD CARE COMMISSION TO THE SOCIAL SERVICES COMMISSION AND ABOLISH THE CHILD CARE COMMISSION ~~§ Item~~

SECTION 21.15.(a) The powers and duties of the Child Care Commission are transferred to the Social Services Commission. All rules heretofore adopted by the Child Care Commission or the Child Day-Care Licensing Commission remain in full force until repealed or superseded by action of the Social Services Commission.

SECTION 21.15.(b) G.S. 143B-168.3 is repealed.

SECTION 21.15.(c) G.S. 143B-168.4 is repealed.

SECTION 21.15.(d) G.S. 143B-168.5 is recodified as G.S. 110-110 and reads as rewritten:

"§ 110-110. ~~Child Care—special unit.~~ Special unit to investigate abuse and neglect violations.

There is established within the Department of Health and Human Services a special unit to deal primarily with violations involving child abuse and neglect in child care arrangements. The ~~Child Care Commission~~ shall make rules for the investigation of reports of child abuse or neglect and for administrative action when child abuse or neglect is substantiated, pursuant to G.S. 110-88(6a), 110-105, and 110-105.2."

SECTION 21.15.(e) G.S. 110-86(1) reads as rewritten:

"§ 110-86. Definitions.

Unless the context or subject matter otherwise requires, the terms or phrases used in this Article shall be defined as follows:

(1) Commission. – The ~~Child Care Commission created under this Article.~~ Social Services Commission."

SECTION 21.15.(f) G.S. 110-91(4) reads as rewritten:

"§ 110-91. Mandatory standards for a license.

All child care facilities shall comply with all State laws and federal laws and local ordinances that pertain to child health, safety, and welfare. Except as otherwise provided in this Article, the standards in this section shall be complied with by all child care facilities. However, none of the standards in this section apply to the school-age children of the operator of a child care facility but do apply to the preschool-age children of the operator. Children 13 years of age or older may receive child care on a voluntary basis provided all applicable required standards are met. The standards in this section, along with any other applicable State laws and federal laws or local ordinances, shall be the required standards for the issuance of a license by the Secretary under the policies and procedures of the Commission except that the Commission may, in its discretion, adopt less stringent standards for the licensing of facilities which provide care on a temporary, part-time, drop-in, seasonal, after-school or other than a full-time basis.

(4) Building. – Each child care facility shall be located in a building which meets the appropriate requirements of the North Carolina Building Code under standards which shall be developed by the Building Code Council, subject to adoption by the Commission specifically for child care facilities, including facilities operated in a private residence. These standards shall be consistent with the provisions of this Article. A local building code enforcement officer shall approve any proposed alternate material, design, or method of construction, provided the building code enforcement officer finds that the alternate, for the purpose intended, is at least the equivalent of that prescribed in the technical building codes in quality, strength, effectiveness, fire resistance, durability, or safety. A local building code enforcement officer shall require that sufficient evidence or proof be submitted to substantiate any claim made regarding the alternate. The ~~Child Care~~

Commission may request changes to the Building Code to suit the special needs of preschool children. Satisfactorily written reports from representatives of building inspection agencies shall be required prior to the issuance of a license and whenever renovations are made to a child care center, or when the operator requests licensure of space not previously approved for child care."

SECTION 21.15.(g) G.S. 120-123(44) is repealed.

SECTION 21.15.(h) G.S. 143B-153(2) is amended by adding a new sub-subdivision to read:

"(2) The Social Services Commission shall have the power and duty to establish standards and adopt rules and regulations:

...
f. For child care facilities as provided in G.S. 110-88."

COUNTY HEALTH AND HUMAN SERVICES BUDGET GUIDANCE

SECTION 21.16. G.S. 108A-88 reads as rewritten:

"§ 108A-88. Determination of State and county financial participation.

Before February 15 of each year, the Secretary shall notify the county board of commissioners, the county manager, the director of social services—services, and the director of public health of each county of the amount of State and federal moneys estimated to be available, as best can be determined, to that county for programs of public assistance, social services—services, public health, and related administrative costs, as well as the percentage of county participation expected to be required for the budget for the succeeding fiscal year. In odd-numbered years, in making such notification, the Secretary shall notify the counties of any changes in funding levels, formulas, or programs relating to public assistance and public health proposed by the Governor to the General Assembly in the proposed budget and budget report submitted under the Executive Budget Act. Counties shall be notified of additional changes in the proposed budget of the Governor and the Advisory Budget Commission that are made by the General Assembly or the United States Congress subsequent to the February 15 estimates."

INTERVENTION SERVICES UNIT

SECTION 21.18A. There is created in the Department of Health and Human Services the Intervention Services Unit in the Office of the Secretary. The Unit shall be responsible for planning, research, monitoring, data analysis, and enhancing coordination of programs and activities related to early intervention services, mental health, developmental disabilities, and substance abuse services, social services, preschool education services, and Smart Start services. The Unit shall work closely and collaboratively with the divisions through which such programs and activities operate.

SUBPART 2. MEDICAL ASSISTANCE

Revised

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
MEDICAID PROGRAM

SECTION 21.19.(a) Funds appropriated in this act for services provided in accordance with Title XIX of the Social Security Act (Medicaid) are for both the categorically needy and the medically needy. Funds appropriated for these services shall be expended in accordance with the following schedule of services and payment bases. All services and payments are subject to the language at the end of this subsection.

Services and payment bases:

- (1) Hospital-Inpatient – Payment for hospital inpatient services will be prescribed in the State Plan as established by the Department of Health and Human Services.
- (2) Hospital-Outpatient – Eighty percent (80%) of allowable costs or a prospective reimbursement plan as established by the Department of Health and Human Services.
- (3) Nursing Facilities – Payment for nursing facility services will be prescribed in the State Plan as established by the Department of Health and Human Services. Nursing facilities providing services to Medicaid recipients who also qualify for Medicare must be enrolled in the Medicare program as a condition of participation in the Medicaid program. State facilities are not subject to the requirement to enroll in the Medicare program.
- (4) Intermediate Care Facilities for the Mentally Retarded – As prescribed in the State Plan as established by the Department of Health and Human Services.
- (5) Drugs – Drug costs as allowed by federal regulations plus a professional services fee per month excluding refills for the same drug or generic equivalent during the same month. Reimbursement shall be available for up to six prescriptions per recipient, per month, including refills. Payments for drugs are subject to the provisions of subsection (h) of this section and to the provisions at the end of subsection (a) of this section, or in accordance with the State Plan adopted by the Department of Health and Human Services consistent with federal reimbursement regulations. Payment of the professional services fee shall be made in accordance with the State Plan adopted by the Department of Health and Human Services, consistent with federal reimbursement regulations. The professional services fee shall be four dollars (\$4.00) per prescription. Adjustments to the professional services fee shall be established by the General Assembly.
- (6) Physicians, Chiropractors, Podiatrists, Optometrists, Dentists, Certified Nurse Midwife Services, Nurse Practitioners. – Fee schedules as developed by the Department of Health and Human Services. Payments for dental services are subject to the provisions of subsection (g) of this section.

#31
G4

- (7) Community Alternative Program, EPSDT Screens – Payment to be made in accordance with rate schedule developed by the Department of Health and Human Services.
- (8) Home Health and Related Services, Private Duty Nursing, Clinic Services, Prepaid Health Plans, Durable Medical Equipment – Payment to be made according to reimbursement plans developed by the Department of Health and Human Services.
- (9) Medicare Buy-In – Social Security Administration premium.
- (10) Ambulance Services – Uniform fee schedules as developed by the Department of Health and Human Services. Public ambulance providers will be reimbursed at cost.
- (11) Hearing Aids – Actual cost plus a dispensing fee.
- (12) Rural Health Clinic Services – Provider-based, reasonable cost; nonprovider-based, single-cost reimbursement rate per clinic visit.
- (13) Family Planning – Negotiated rate for local health departments. For other providers - see specific services, for instance, hospitals, physicians.
- (14) Independent Laboratory and X-Ray Services – Uniform fee schedules as developed by the Department of Health and Human Services.
- (15) Optical Supplies – One hundred percent (100%) of reasonable wholesale cost of materials.
- (16) Ambulatory Surgical Centers – Payment as prescribed in the reimbursement plan established by the Department of Health and Human Services.
- (17) Medicare Crossover Claims – An amount up to the actual coinsurance or deductible or both, in accordance with the State Plan, as approved by the Department of Health and Human Services.
- (18) Physical Therapy and Speech Therapy – Services limited to EPSDT eligible children. Payments are to be made only to qualified providers at rates negotiated by the Department of Health and Human Services. Physical therapy (including occupational therapy) and speech therapy services are subject to prior approval and utilization review.
- (19) Personal Care Services – Payment in accordance with the State Plan approved by the Department of Health and Human Services.
- (20) Case Management Services – Reimbursement in accordance with the availability of funds to be transferred within the Department of Health and Human Services.
- (21) Hospice – Services may be provided in accordance with the State Plan developed by the Department of Health and Human Services.
- (22) Other Mental Health Services – Unless otherwise covered by this section, coverage is limited to:
 - a. Agencies meeting the requirements of the rules established by the Commission for Mental Health, Developmental Disabilities, and Substance Abuse Services, and reimbursement is made in accordance with a State Plan developed by the Department of Health and Human Services not to exceed the upper limits established in federal regulations, and
 - b. For children eligible for EPSDT services:
 1. Licensed or certified psychologists, licensed clinical social workers, certified clinical nurse specialists in psychiatric mental health advanced practice, and nurse practitioners certified as clinical nurse specialists in psychiatric mental health advanced practice, when Medicaid-eligible children are referred by the Carolina

- ACCESS primary care physician or the area mental health program, and
2. Institutional providers of residential services for children and Psychiatric Residential Treatment Facility services that meet federal and State requirements as defined by the Department.

The Department of Health and Human Services may adopt temporary rules in accordance with Chapter 150B of the General Statutes further defining the qualifications of providers and referral procedures in order to implement this subdivision.

- (23) Medically Necessary Prosthetics or Orthotics for EPSDT Eligible Children – Reimbursement in accordance with the State Plan approved by the Department of Health and Human Services.
- (24) Health Insurance Premiums – Payments to be made in accordance with the State Plan adopted by the Department of Health and Human Services consistent with federal regulations.
- (25) Medical Care/Other Remedial Care – Services not covered elsewhere in this section include related services in schools; health professional services provided outside the clinic setting to meet maternal and infant health goals; and services to meet federal EPSDT mandates. Services addressed by this paragraph are limited to those prescribed in the State Plan as established by the Department of Health and Human Services.
- (26) Pregnancy Related Services – Covered services for pregnant women shall include nutritional counseling, psychosocial counseling, and predelivery and postpartum home visits by maternity care coordinators and public health nurses.

Services and payment bases may be changed with the approval of the Director of the Budget.

Reimbursement is available for up to 24 visits per recipient per year to any one or combination of the following: physicians, clinics, hospital outpatient, optometrists, chiropractors, and podiatrists. Prenatal services, all EPSDT children, emergency rooms, and mental health services subject to independent utilization review are exempt from the visit limitations contained in this paragraph. Exceptions may be authorized by the Department of Health and Human Services where the life of the patient would be threatened without such additional care. Any person who is determined by the Department to be exempt from the 24-visit limitation may also be exempt from the six-prescription limitation.

SECTION 21.19.(b) Allocation of Nonfederal Cost of Medicaid. – The State shall pay eighty-five percent (85%); the county shall pay fifteen percent (15%) of the nonfederal costs of all applicable services listed in this section.

SECTION 21.19.(c) Copayment for Medicaid Services. – The Department of Health and Human Services may establish copayment up to the maximum permitted by federal law and regulation.

SECTION 21.19.(d) Medicaid and Work First Family Assistance, Income Eligibility Standards. – The maximum net family annual income eligibility standards for Medicaid and Work First Family Assistance and the Standard of Need for Work First Family Assistance shall be as follows:

<u>Family Size</u>	<u>Categorically Needy</u>	<u>Medically Needy</u>	
	<u>WFFA*</u>	<u>Families and Children Income Level</u>	<u>AA, AB, AD*</u>
1	\$4,344	\$2,172	\$2,900

2	5,664	2,832	3,800
3	6,528	3,264	4,400
4	7,128	3,564	4,800
5	7,776	3,888	5,200
6	8,376	4,188	5,600
7	8,952	4,476	6,000
8	9,256	4,680	6,300

*Work First Family Assistance (WFFA); Aid to the Aged (AA); Aid to the Blind (AB); and Aid to the Disabled (AD).

The payment level for Work First Family Assistance shall be fifty percent (50%) of the standard of need.

These standards may be changed with the approval of the Director of the Budget with the advice of the Advisory Budget Commission.

SECTION 21.19.(e) The Department of Health and Human Services, Division of Medical Assistance, shall provide Medicaid coverage to all elderly, blind, and disabled people who have incomes equal to or less than one hundred percent (100%) of the federal poverty guidelines, as revised each April 1.

SECTION 21.19.(f) ICF and ICF/MR Work Incentive Allowances. – The Department of Health and Human Services may provide an incentive allowance to Medicaid-eligible recipients of ICF and ICF/MR facilities who are regularly engaged in work activities as part of their developmental plan and for whom retention of additional income contributes to their achievement of independence. The State funds required to match the federal funds that are required by these allowances shall be provided from savings within the Medicaid budget or from other unbudgeted funds available to the Department. The incentive allowances may be as follows:

<u>Monthly Net Wages</u>	<u>Monthly Incentive Allowance</u>
\$1.00 to \$100.99	Up to \$50.00
\$101.00 to \$200.99	\$80.00
\$201.00 to \$300.99	\$130.00
\$301.00 and greater	\$212.00.

SECTION 21.19.(g) Dental Coverage Limits. – Dental services shall be provided on a restricted basis in accordance with rules adopted by the Department to implement this subsection.

SECTION 21.19.(h) Dispensing of Generic Drugs. – Notwithstanding G.S. 90-85.27 through G.S. 90-85.31, or any other law to the contrary, under the Medical Assistance Program (Title XIX of the Social Security Act) a prescription order for a drug designated by a trade or brand name, except a drug listed in the narrow therapeutic drug index, shall be considered to be an order for the drug by its established or generic name, except when the prescriber has determined, at the time the drug is prescribed, that the brand name drug is medically necessary and has written on the prescription order the phrase "medically necessary". Generic drugs, when available in the pharmacy, shall be dispensed at a lower cost to the Medical Assistance Program rather than trade or brand name drugs. As used in this subsection, "brand name" means the proprietary name the manufacturer places upon a drug product or on its container, label, or wrapping at the time of packaging; and "established name" has the same meaning as in section 502(e)(3) of the Federal Food, Drug, and Cosmetic Act as amended, 21 U.S.C. § 352(e)(3).

SECTION 21.19.(i) Exceptions to Service Limitations, Eligibility Requirements, and Payments. – Service limitations, eligibility requirements, and payments bases in this section may be waived by the Department of Health and Human Services, with the approval of the Director of the Budget, to allow the Department to carry out pilot programs for prepaid health plans, managed care plans, or community-based services programs in accordance with plans approved by the United

G3
H24

States Department of Health and Human Services, or when the Department determines that such a waiver will result in a reduction in the total Medicaid costs for the recipient. The Department of Health and Human Services may proceed with planning and development work on the Program of All-Inclusive Care for the Elderly.

SECTION 21.19.(j) Volume Purchase Plans and Single Source Procurement. – The Department of Health and Human Services, Division of Medical Assistance, may, subject to the approval of a change in the State Medicaid Plan, contract for services, medical equipment, supplies, and appliances by implementation of volume purchase plans, single source procurement, or other similar processes in order to improve cost containment.

SECTION 21.19.(k) Cost-Containment Programs. – The Department of Health and Human Services, Division of Medical Assistance, may undertake cost containment programs, including preadmissions to hospitals and prior approval for certain outpatient surgeries before they may be performed in an inpatient setting.

SECTION 21.19.(l) For all Medicaid eligibility classifications for which the federal poverty level is used as an income limit for eligibility determination, the income limits will be updated each April 1 immediately following publication of federal poverty guidelines.

SECTION 21.19.(m) The Department of Health and Human Services shall provide Medicaid to 19-, 20-, and 21-year olds in accordance with federal rules and regulations.

SECTION 21.19.(n) The Department of Health and Human Services shall provide coverage to pregnant women and to children according to the following schedule:

- (1) Pregnant women with incomes equal to or less than one hundred eighty-five percent (185%) of the federal poverty guidelines as revised each April 1 shall be covered for Medicaid benefits.
- (2) Infants under the age of 1 with family incomes equal to or less than one hundred eighty-five percent (185%) of the federal poverty guidelines as revised each April 1 shall be covered for Medicaid benefits.
- (3) Children aged 1 through 5 with family incomes equal to or less than one hundred thirty-three percent (133%) of the federal poverty guidelines as revised each April 1 shall be covered for Medicaid benefits.
- (4) Children aged 6 through 18 with family incomes equal to or less than the federal poverty guidelines as revised each April 1 shall be covered for Medicaid benefits.
- (5) The Department of Health and Human Services shall provide Medicaid coverage for adoptive children with special or rehabilitative needs regardless of the adoptive family's income.

Services to pregnant women eligible under this subsection continue throughout the pregnancy but include only those related to pregnancy and to those other conditions determined by the Department as conditions that may complicate pregnancy. In order to reduce county administrative costs and to expedite the provision of medical services to pregnant women, to infants, and to children described in subdivisions (3) and (4) of this subsection, no resources test shall be applied.

SECTION 21.19.(o) Medicaid enrollment of categorically needy families with children shall be continuous for one year without regard to changes in income or assets.

SECTION 21.19.(p) The Department shall disregard earned income for recipients who would otherwise lose Medicaid eligibility under section 1931 of Title XIX of the Social Security Act due to earnings. This disregard shall be applied for a maximum of 12 consecutive months.

SECTION 21.19.(q) The Department of Health and Human Services shall submit a quarterly status report on expenditures for acute care and long-term care services to the Fiscal Research Division and to the Office of State Budget and Management. This report shall include an analysis of budgeted versus actual expenditures for eligibles by category and for long-term care beds. In addition, the Department shall revise the program's projected spending for the current fiscal year and the estimated spending for the subsequent fiscal year on a quarterly basis. The quarterly expenditure report and the revised forecast shall be forwarded to the Fiscal Research Division and to the Office of State Budget and Management no later than the third Thursday of the month following the end of each quarter.

SECTION 21.19.(r) The Division of Medical Assistance, Department of Health and Human Services, may provide incentives to counties that successfully recover fraudulently spent Medicaid funds by sharing State savings with counties responsible for the recovery of the fraudulently spent funds.

SECTION 21.19.(s) If first approved by the Office of State Budget and Management, the Division of Medical Assistance, Department of Health and Human Services, may use funds that are identified to support the cost of development and acquisition of equipment and software through contractual means to improve and enhance information systems that provide management information and claims processing.

SECTION 21.19.(t) The Department of Health and Human Services may adopt temporary rules according to the procedures established in G.S. 150B-21.1 when it finds that these rules are necessary to maximize receipt of federal funds, to reduce Medicaid expenditures, and to reduce fraud and abuse. Prior to the filing of these temporary rules with the Office of Administrative Hearings, the Department shall consult with the Office of State Budget and Management on the possible fiscal impact of the temporary rule and its effect on State appropriations and local governments.

SECTION 21.19.(u) The Department shall report to the Fiscal Research Division of the Legislative Services Office and to the House of Representatives Appropriations Subcommittee on Health and Human Services and the Senate Appropriations Committee on Health and Human Services or the Joint Legislative Health Care Oversight Committee on any change it anticipates making in the Medicaid program that impacts the type or level of service, reimbursement methods, or waivers, any of which require a change in the State Plan or other approval by the Health Care Financing Administration. The reports shall be provided at the same time they are submitted to HCFA for approval.

SECTION 21.19.(v) Upon approval of a demonstration waiver by the Health Care Financing Administration, the Department of Health and Human Services may provide Medicaid coverage for family planning services to men and women of child-bearing age with family incomes equal to or less than one hundred eighty-five percent (185%) of the federal poverty level. Coverage shall be contingent upon federal approval of the waiver and shall begin no earlier than January 1, 2001.

SECTION 21.19.(w) The Department of Health and Human Services, Division of Medical Assistance, shall implement a new code for providers currently reimbursed for "Y" code services. The new code shall be implemented when standards required by the Health Insurance Portability and Accountability Act of 1996, as amended, are adopted by the Health Care Financing Administration and have become effective. *New Code system*

**MEDICAID DEFINITION OF MEDICAL NECESSITY EXEMPT FROM
RULE-MAKING UNDER APA; DETERMINATION OF MEDICAL
NECESSITY**

By Lewin Group

SECTION 21.20.(a) The Department of Health and Human Services shall adopt a definition and application of "medical necessity" for the State Medicaid Program that is consistent with current references to national standards of care. In order to promote consistency among providers and ensure that medical necessity criteria are uniformly applied to beneficiaries throughout the State, the determination of "medical necessity" shall be made by Department staff or other utilization review contractors. Adoption of and amendments to the definition and application of "medical necessity" under the State Medicaid Program are exempt from rule-making requirements of Chapter 150B of the General Statutes.

SECTION 21.20.(b) G.S. 150B-1(d) reads as rewritten:

"(d) Exemptions from Rule Making. – Article 2A of this Chapter does not apply to the following:

- (1) The Commission.
- (2) Repealed by Session Laws 2000-189, s. 14, effective July 1, 2000.
- (3) The North Carolina Hazardous Waste Management Commission in administering the provisions of G.S. 130B-13 and G.S. 130B-14.
- (4) The Department of Revenue, with respect to the notice and hearing requirements contained in Part 2 of Article 2A.
- (5) The North Carolina Global TransPark Authority with respect to the acquisition, construction, operation, or use, including fees or charges, of any portion of a cargo airport complex.
- (6) The Department of Correction, with respect to matters relating solely to persons in its custody or under its supervision, including prisoners, probationers, and parolees.
- (7) The North Carolina Teachers' and State Employees' Comprehensive Major Medical Plan in administering the provisions of Parts 2 and 3 of Article 3 of Chapter 135 of the General Statutes.
- (8) The Department of Health and Human Services in defining and applying 'medical necessity' under the State Medicaid Program."

MEDICAID COST CONTAINMENT AND GROWTH REDUCTION

SECTION 21.24.(a) The Department of Health and Human Services, Division of Medical Assistance, shall contain Medicaid Program costs by reducing the rate of growth of the Medicaid Program, except for the rate of growth in the number of persons eligible for Medicaid. The Department shall develop and implement a plan to reduce the rate of growth in total expenditures for payments for medical services for fiscal year 2002-2003 to eight percent (8%) or less of the total expenditures for the 2001-2002 fiscal year, excluding the rate of growth associated with eligibles.

SECTION 21.24.(b) In addition to findings and recommendations in the "North Carolina Medicaid Benefit Study", May 1, 2001, the Department of Health and Human Services may also consider the following actions to reduce the rate of growth in the Medicaid Program:

- (1) Changes in methods of reimbursement;
- (2) Changes in the method of determining or limiting inflation factors, or both;
- (3) Recalibration of existing methods of reimbursement; and
- (4) Contracting for services.

SECTION 21.24.(c) The Department shall report on its plans to reduce the rate of growth in the State Medicaid Program not later than October 1, 2001. The Department shall submit the report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

SECTION 21.24.(d) The Department shall not change medical policy affecting the amount, sufficiency, duration, and scope of health care services and who may provide services until the Division of Medical Assistance has prepared a five-year fiscal analysis documenting the cost of the proposed change in medical policy and submitted it for Departmental review. If the fiscal impact indicated by the fiscal analysis for any proposed medical policy change exceeds three million dollars (\$3,000,000) in total requirements for a given fiscal year, then the Department shall submit the proposed policy change with the fiscal analysis to the Office of State Budget and Management and the Fiscal Research Division.

MEDICAID COST CONTAINMENT RESERVE

SECTION 21.25. Of the funds appropriated in this act to the Department of Health and Human Services for the 2001-2003 fiscal biennium, the sum of two million dollars (\$2,000,000) for each year of the 2001-2003 fiscal biennium shall be placed in a Reserve for Medicaid Cost Containment. Funds in the Reserve shall be used to support activities that will contain the cost of the Medicaid Program including contracting for services or hiring additional staff. Medicaid cost-containment activities may include prospective reimbursement methods, incentive-based reimbursement methods, service

69
#82

limits, prior authorization of services, periodic medical necessity reviews, revised medical necessity criteria, service provision in the least costly settings, and other cost containment related activities. Funds shall not be expended from the Reserve until the Office of State Budget and Management has approved a proposal for the expenditure submitted by the Department. Proposals for expenditures from the Reserve shall include the cost of implementing the cost-containment activity and documentation on the amount of savings expected to be realized from the cost-containment activity. The Department shall submit a copy of proposals for expenditures from the Reserve to the Fiscal Research Division.

MEDICAID PROGRAM MANAGEMENT

Lewis Study
SECTION 21.26.(a) The Department of Health and Human Services shall consider the findings and recommendations in the "North Carolina Medicaid Benefit Study", May 1, 2001, and shall target the following in considering whether and to what extent to implement recommendations:

Make changes w/o legislative changes

- (1) Reduction in the fragmentation in the medical benefit policy-making process.
- (2) Improvement in the use of data and medical literature in the decision-making process.
- (3) Improvement in the coordination of care and utilization review process.
- (4) Strengthening of program integrity controls.

SECTION 21.26.(b) The Department shall implement the following recommendations of the "North Carolina Medicaid Benefit Study" to improve management of the Medicaid pharmacy benefit:

- (1) Implement a meaningful prior authorization program to manage utilization of costly brand name drugs including at a minimum the drugs listed in the "North Carolina Medicaid Benefits Study". In determining additional drugs to be included in the prior authorization program, the Department shall consider whether inclusion of these drugs in the prior authorization program is likely to:
 - a. Increase utilization of more expensive services, such as emergency room visits, inpatient care, and nursing home care.
 - b. Reduce quality of treatment or increase nonadherence by the patient to appropriate medication regimens.
 - c. Create barriers that lead to a lower level of compliance by patients with appropriate drug therapy or delay in utilization of newly approved innovative drugs that offer clear medical benefits that exceed the benefits of standard therapy.
 - d. Have a differential impact upon racial and ethnic minorities and the elderly.
 - e. Increase cost of implementation and administration.

The Department shall conduct a review at least annually of the drugs included in the prior authorization program to determine whether any of the factors in sub-paragraphs a. through e. of this subdivision or other factors with similar results have occurred.

- (2) Decrease supplies of prescription drugs to 34-day supplies for some or all drugs.
- (3) Actively manage physician prescribing practices through provider profiling.
- (4) Limit access to certain drugs to patients that present with a specific diagnosis.

63
#246

- (5) Evaluate other incentives to encourage use of generic drugs, such as differential dispensing fees or differential copayments.

SECTION 21.26.(c) The Department shall consider other drug utilization management activities as follows:

- (1) Using maximum allowable pricing.
- (2) Using step therapy.
- (3) Contracting with a pharmacy benefits manager to implement more extensive prospective drug utilization review.
- (4) Study the impact of eliminating the six prescription drug monthly limit combined with a more rigorous prior authorization program to ensure cost decisions are made based on evidenced-based clinical guidelines.

SECTION 21.26.(d) The Department shall report on all of the activities conducted under this section to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division not later than January 1, 2002.

Report what they do

CAROLINA ACCESS PROGRAM IMPROVEMENTS

SECTION 21.27. The Department of Health and Human Services shall improve efficiencies and effectiveness in the Carolina ACCESS program by redesigning program operations to reflect the program goals of the ACCESS II and ACCESS III programs. Strategies for improving efficiencies and effectiveness may include such activities as:

- (1) Accelerating conversion of ACCESS I to ACCESS II and III.
- (2) Establishing cost-reduction targets for ACCESS II and III partnerships.
- (3) Considering reimbursement mechanisms that will enable providers to share in the savings realized by exceeding cost-reduction targets.
- (4) Enhancing automatic linkages between patients and their primary care providers during Medicaid eligibility determination.
- (5) Improving the referral process to prevent abuse or inappropriate use of primary care provider's authorization number.

SPECIAL ASSISTANCE DEMONSTRATION PROJECT

SECTION 21.29. Section 11.21 of S.L. 1999-237, as amended by Section 11.13 of S.L. 2000-67, reads as rewritten:

"Section 11.21. The Department of Health and Human Services may use funds from the existing State/County Special Assistance for Adults budget to provide Special Assistance payments to eligible individuals in in-home living arrangements. These payments may be made for up to 400 individuals. These payments may be made for up to a two-year period beginning July 1, 2000, and ending June 30, 2002. An individual enrolled in the Special Assistance demonstration on June 30, 2002, who remains continuously eligible may receive payments through June 30, 2003. To the maximum extent possible, the Department shall consider geographic balance in the dispersion of payments to individuals across the State. The Department shall make an interim report to the cochairs of the House of Representatives Appropriations Committee, the cochairs of the House of Representatives Appropriations Subcommittee on Health and Human Services and the cochairs of the Senate Appropriations Committee, the Chair of the Senate Appropriations Committee on Human Resources by June 30, 2001, and a final report by October 1, 2002. This report shall include the following information:

- (1) A description of cost savings that could occur by allowing individuals eligible for State/County Special Assistance the option of remaining in the home.
- (2) Which activities of daily living or other need criteria are reliable indicators for identifying individuals with the greatest need for income supplements for in-home living arrangements.
- (3) How much case management is needed and which types of individuals are most in need of case management.
- (4) The geographic location of individuals receiving payments under this section.
- (5) A description of the services purchased with these payments.
- (6) A description of the income levels of individuals who receive payments under this section and the impact on the Medicaid program.
- (7) Findings and recommendations as to the feasibility of continuing or expanding the demonstration program."

SENIOR CENTER OUTREACH

SECTION 21.30.(a) Funds appropriated to the Department of Health and Human Services, Division of Aging, for the 2001-2003 fiscal biennium shall be used by the Division of Aging to enhance senior center programs as follows:

- (1) To expand the outreach capacity of senior centers to reach unserved or underserved areas; or
- (2) To provide start-up funds for new senior centers.

All of these funds shall be allocated by October 1 of each fiscal year.

SECTION 21.30.(b) Prior to funds being allocated pursuant to this section for start-up funds for a new senior center, the board of commissioners of the county in which the new center will be located shall:

- (1) Formally endorse the need for a center;
- (2) Formally agree on the sponsoring agency for the center; and
- (3) Make a formal commitment to use local funds to support the ongoing operation of the center.

SECTION 21.30.(c) State funding shall not exceed ninety percent (90%) of reimbursable costs.

AREA AGENCIES ON AGING COST SAVINGS STUDY; REDUCTION IN NUMBER OF AGENCIES; FUNDS

SECTION 21.32.(a) The Department of Health and Human Services shall conduct a study to determine cost savings to be realized and increased efficiencies to be gained by reducing the number of Area Agencies on Aging from 17 to not more than 13 and not fewer than 10. In conducting the study, the Department shall collect data to determine the amount of the reduction in administrative costs, direct costs, and indirect costs, and shall calculate the reduction based on maintaining the amount and quality of services provided. The Department shall do a cost-benefit analysis of each option for the reduction in the number of agencies, e.g., analysis for reducing to 13, analysis for reducing to 12, etc. The Department shall report the results of its study to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division not later than March 1, 2002.

SECTION 21.32.(b) Of the funds appropriated in this act to the Department of Health and Human Services, the sum of seven hundred thousand dollars (\$700,000) for the 2001-2002 fiscal year shall be allocated equally among each of the Area Agencies on Aging. These funds shall be used for planning, coordination, and operational activities that enhance each agency's ability to provide services, information, and education to consumers, and to better meet the data and technical assistance needs of providers, local planning committees, and local governments.

EXTEND ADULT CARE HOME MORATORIUM

SECTION 21.34. Section 11.69(b) of S.L. 1997-443, as amended by Section 12.16C(a) of S.L. 1998-212, and as amended by Section 1 of S.L. 1999-135, and as further amended by Section 11.9(a) of S.L. 2000-67, reads as rewritten:

"(b) Effective until ~~September 30, 2001, June 30, 2002~~, the Department of Health and Human Services shall not approve the addition of any adult care home beds for any type home or facility in the State, except as follows:

- (1) Plans submitted for approval prior to May 18, 1997, may continue to be processed for approval;
- (2) Plans submitted for approval subsequent to May 18, 1997, may be processed for approval if the individual or organization submitting the plan demonstrates to the Department that on or before August 25, 1997, the individual or organization purchased real property, entered into a contract to purchase or obtain an option to purchase real property, entered into a binding real property lease arrangement, or has otherwise made a binding financial commitment for the purpose of establishing or expanding an adult care home facility. An owner of real property who entered into a contract prior to August 25, 1997, for the sale of an existing building together with land zoned for the development of not more than 50 adult care home beds with a proposed purchaser who failed to consummate the transaction may, after August 25, 1997, sell the property to another purchaser and the Department may process and approve plans submitted by the purchaser for the development of not more than 50 adult care home beds. It shall be the responsibility of the applicant to establish, to the satisfaction of the Department, that any of these conditions have been met;
- (3) Adult care home beds in facilities for the developmentally disabled with six beds or less which are or would be licensed under G.S. 131D or G.S. 122C may continue to be approved;
- (4) *Delete* ~~If the Department determines that the vacancy rate of available adult care home beds in a county is fifteen percent (15%) or less of the total number of available beds in the county as of August 26, 1997, and no new beds have been approved or licensed in the county or plans submitted for approval in accordance with subdivision (1) or (2) of this section which would raise the vacancy rate above fifteen percent (15%) in the county, then the Department may accept and approve the addition of beds in that county; or~~
- (5) *Delete* ~~If a county board of commissioners determines that a substantial need exists for the addition of adult care home beds in that county, the board of commissioners may request that a specified number of additional beds be licensed for development in their county. In making their determination, the board of commissioners shall give consideration to meeting the needs of Special Assistance clients. The Department may approve licensure of the additional beds from the first facility that files for licensure and subsequently meets the licensure requirements."~~

ADULT CARE HOME RESIDENT ASSESSMENT SERVICES

SECTION 21.35. Funds appropriated in this act to the Department of Health and Human Services, Division of Social Services, for adult care home positions in the Department and in county departments of social services shall be used for personnel trained in the medical and social needs of older adults and disabled persons in adult care homes to evaluate individuals requesting State/County Special Assistance to pay for care in adult care homes. One of the functions of these personnel shall be to develop and collect data on the appropriate level of care and placement in the long-term care system, including identifying individuals who pose a risk to other residents and who may need further mental health assessment and treatment. These personnel shall also provide technical assistance to adult care homes on how to conduct functional

assessments and develop care plans and shall assist in monitoring the Special Assistance Demonstration Project.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

QUALITY CRITERIA FOR LONG-TERM CARE

SECTION 21.36. The Department of Health and Human Services, in conjunction with the North Carolina Institute of Medicine, shall continue a special work group to develop criterion-based indicators for the monitoring of quality of care in North Carolina nursing homes, adult care homes, assisted living facilities, and home health care programs. The Institute of Medicine and the Department of Health and Human Services shall work together to implement these criteria for the monitoring of long-term care in the State and pursue options for the use of these criteria in lieu of current HCFA-mandated standards for surveying North Carolina nursing homes under the federal Medicaid and Medicare programs.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

CHILD PROTECTIVE SERVICES

SECTION 21.37.(a) The funds appropriated in this act to the Department of Health and Human Services, Division of Social Services, for the 2001-2003 fiscal biennium for Child Protective Services shall be allocated to county departments of social services based upon a formula which takes into consideration the number of Child Protective Services cases and the number of Child Protective Services workers and supervisors necessary to meet recommended standards adopted by the North Carolina Association of County Directors of Social Services.

SECTION 21.37.(b) Funds allocated under subsection (a) of this section shall be used by county departments of social services for carrying out investigative assessments of child abuse or neglect or for providing protective or preventive services in cases in which the department confirms abuse, neglect, or dependency.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

LIMITATIONS ON STATE ABORTION FUND

SECTION 21.38. The limitations on funding of the performance of abortion established in Section 23.27 of Chapter 324 of the 1995 Session Laws, as amended by Section 23.8A of Chapter 507 of the 1995 Session Laws, apply to the 2001-2002 and 2002-2003 fiscal years.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

SECTION 21.39. The Division of Social Services, Department of Health and Human Services, shall report to the members of the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on the activities of the State Child Fatality Review Team including recommendations for changes in the statewide child protection system no later than October 1 of each year.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

SPECIAL CHILDREN ADOPTION FUND

SECTION 21.40.(a) Of the funds appropriated to the Department of Health and Human Services in this act, the sum of one million one hundred thousand dollars (\$1,100,000) shall be used to support the Special Children Adoption Fund for each year of the 2001-2003 fiscal biennium. The Division of Social Services, in consultation with the North Carolina Association of County Directors of Social Services and representatives of licensed private adoption agencies, shall develop guidelines for the

awarding of funds to licensed public and private adoption agencies upon the adoption of children described in G.S. 108A-50 and in foster care. Payments received from the Special Children Adoption Fund by participating agencies shall be used exclusively to enhance the adoption services. No local match shall be required as a condition for receipt of these funds. In accordance with State rules for allowable costs, the Special Children Adoption Fund may be used for post-adoption services for families whose incomes exceed two hundred percent (200%) of the federal poverty level.

SECTION 21.40.(b) Of the total funds appropriated for the Special Children Adoption Fund, each year one million dollars (\$1,000,000) shall be reserved for payment to participating private adoption agencies. *from 400,000 to 1,000,000*

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
FOSTER CARE AND ADOPTION ASSISTANCE PAYMENTS

SECTION 21.41.(a) The maximum rates for State participation in the foster care assistance program are established on a graduated scale as follows:

- (1) \$315.00 per child per month for children aged birth through 5;
- (2) \$365.00 per child per month for children aged 6 through 12; and
- (3) \$415.00 per child per month for children aged 13 through 18.

Of these amounts, fifteen dollars (\$15.00) is a special needs allowance for the child.

SECTION 21.41.(b) The maximum rates for State participation in the adoption assistance program are established on a graduated scale as follows:

- (1) \$315.00 per child per month for children aged birth through 5;
- (2) \$365.00 per child per month for children aged 6 through 12; and
- (3) \$415.00 per child per month for children aged 13 through 18.

SECTION 21.41.(c) In addition to providing board payments to foster and adoptive families of HIV-infected children, as prescribed in Section 23.28 of Chapter 324 of the 1995 Session Laws, any additional funds remaining that were appropriated for this purpose shall be used to provide medical training in avoiding HIV transmission in the home.

SECTION 21.41.(d) The maximum rates for State participation in HIV foster care and adoption assistance are established on a graduated scale as follows:

- (1) \$800.00 per month per child with indeterminate HIV status;
- (2) \$1,000 per month per child confirmed HIV-infected, asymptomatic;
- (3) \$1,200 per month per child confirmed HIV-infected, symptomatic; and
- (4) \$1,600 per month per child terminally ill with complex care needs.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
SPECIAL NEEDS ADOPTIONS INCENTIVE FUND

SECTION 21.42.(a) There is created a Special Needs Adoptions Incentive Fund to provide financial assistance to facilitate the adoption of certain children residing in licensed foster care homes, effective January 1, 2001. These funds shall be used to remove financial barriers to the adoption of these children and shall be available to foster care families who adopt children with special needs as defined by the Social Services Commission. These funds shall be matched by county funds.

SECTION 21.42.(b) This program shall not constitute an entitlement and is subject to the availability of funds.

SECTION 21.42.(c) The Social Services Commission shall adopt rules to implement the provisions of this section.

SECTION 21.42.(d) The Department of Health and Human Services shall report on the use of these funds no later than April 1, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

STATE MATERNITY HOME FUND

SECTION 21.45. The Divisions of Social Services and Public Health in the Department of Health and Human Services, in consultation with local departments of social services, health departments, and other health and human services programs such as faith-based organizations and domestic violence programs, shall assess alternative local resources available to women receiving services through the State Maternity Home Fund. The Department shall determine the services that are provided by each of the maternity homes through the State Maternity Home Fund and those services that are otherwise available, and shall provide a cost comparison of the services.

Repeat

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
CHILD WELFARE SYSTEM PILOTS

SECTION 21.46.(a) The Department of Health and Human Services, Division of Social Services, shall develop a plan, working with local departments of social services, to implement an alternative response system of child protection in no fewer than two and no more than 10 demonstration areas in this State. The plan should provide for the pilots to implement an alternative response system in which local departments of social services utilize family assessment tools and family support principles when responding to selected reports of suspected child neglect.

SECTION 21.46.(b) The Department of Health and Human Services shall develop data collection processes that would enable the General Assembly to assess the impact of these pilots on the following:

- (1) Child safety.
- (2) Timeliness of response.
- (3) Timeliness of service.
- (4) Coordination of local human services.

- (5) Cost-effectiveness.
- (6) Any other related issues.

SECTION 21.46.(c) The Department of Health and Human Services may proceed to implement this pilot program if non-State funds are identified for this purpose.

STATE ADULT DAY CARE FUND

Maximize current funding

Creech
SECTION 21.47. The Department of Health and Human Services, Division of Aging, shall implement changes in its methodology currently used for allocating slots. The new allocation shall be implemented January 1, 2002, and shall ensure the Fund will serve new clients. Not later than January 1, 2002, the Department of Health and Human Services, Division of Aging, shall report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division the new allocation methodology. The report shall include all of the changes made in the new allocation and an estimate of the number of new clients served. The allocation of all slots paid for with State Adult Day Care Funds shall be distributed equitably among service providers and shall eliminate the funding of unused slots.

FAMILY RESOURCE CENTERS

SECTION 21.48.(a) The Department of Health and Human Services shall evaluate the use of all State and federal funds allocated to Family Resource Centers. The evaluation shall incorporate data collected from all programs receiving these funds and shall assess the effectiveness of each program in achieving established program goals including the following:

- (1) Enhancing children's development and ability to attain academic and social success.
- (2) Ensuring a successful transition from early childhood education programs and child care to public schools.
- (3) Assisting families in achieving economic independence and self-sufficiency.
- (4) Mobilizing public and private community resources to help children and families in need.
- (5) Ensuring that plans are designed and implemented to provide families with services in a holistic family centered manner.

SECTION 21.48.(b) The Department shall establish performance measurement protocol, based on national standards or best practice models, to determine the effectiveness of services provided by all family resource centers.

SECTION 21.48.(c) The Department shall ensure that all programs have similar core services and the same goals while eliminating duplication of effort at the local level. The Department shall redirect the funds for Family Resource Centers to focus on those core services that have a direct impact on strengthening family support.

SECTION 21.48.(d) The Department shall not allocate funds to Family Resource Centers that have not demonstrated that they have developed and implemented local Memoranda of Understanding that delineate specific roles and responsibilities to ensure effectiveness and efficiency in the operation of Family Resource Centers.

SECTION 21.48.(e) The Department shall report on activities under this section. This report is due to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on June 30, 2002.

REORGANIZATION OF DIVISION OF SOCIAL SERVICES

SECTION 21.49. The Department of Health and Human Services, Division of Social Services shall reduce layers of management and streamline operations in accordance with the following:

#23

- (1) Consolidate the Resource and Information Management Section and Budget Operations Section including the elimination of one section chief position. The Division of Social Services shall further consolidate to address low staff-to-supervisor ratios. All positions and corresponding State appropriations, federal funds, and other funds in these two sections shall be consolidated.
- (2) Consolidate the Program Integrity, Economic Independence Services, and Local Support Branches into one branch within the Economic Independence Section. The Division of Social Services shall further consolidate to address low staff-to-supervisor ratios. All positions and corresponding State appropriations, federal funds, and other funds shall be consolidated.
- (3) Eliminate the Local Support Section including all positions and corresponding State appropriations, federal funds, and other funds.
- (4) Eliminate the Program Development Branch including the corresponding position and State appropriations, federal funds, and other funds.

INTENSIVE FAMILY PRESERVATION SERVICES FUNDING AND PERFORMANCE ENHANCEMENTS

SECTION 21.50.(a) The Department of Health and Human Services shall review the Intensive Family Preservation Services Program to enhance and implement initiatives which focus on increasing the sustainability and effectiveness of the Program.

SECTION 21.50.(b) The Department of Health and Human Services shall require that any program or entity that receives State, federal, or other funding for the purpose of Intensive Family Preservation Services shall provide the following information on an annual basis:

- (1) An established follow-up system with a minimum of 12 months of follow-up services.
- (2) Detailed information on the specific interventions applied including utilization indicators and performance measurement.
- (3) Cost-benefit data.
- (4) Data on long-term benefits associated with Intensive Family Preservation Services. This data shall be obtained by tracking families through the intervention process.
- (5) The number of families remaining intact due to associated interventions beyond 12 months. *Used to be 6 months*
- (6) The number and percentage of minority race children who received Intensive Family Preservation Services at a ratio essentially equivalent to the ratio of their distribution in the general population exposed to Child Protective Services involvement based on the CPS risk ratings.

SECTION 21.50.(c) The Department shall establish performance-based funding protocol and shall only provide funding to those counties providing the required information specified in subsection (b) of this section. The amount of funding shall be based on the individual performance of each program.

SECTION 21.50.(d) The Department of Health and Human Services shall prepare an interim report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and

Human Services, and the Fiscal Research Division on the implementation of these changes by January 1, 2002, and shall provide a final report no later than May 30, 2002.

APPROVE TANF STATE PLAN

SECTION 21.51.(a) The General Assembly approves the plan titled "North Carolina Temporary Assistance for Needy Families State Plan FY 2001-2003", prepared by the Department of Health and Human Services and presented to the General Assembly on May 15, 2001. The North Carolina Temporary Assistance for Needy Families State Plan covers the period October 1, 2001, through September 30, 2003. The Department shall submit the State Plan to the United States Department of Health and Human Services as amended by this act or any other act of the 2001 General Assembly.

SECTION 21.51.(b) The counties approved as Electing Counties in North Carolina's Temporary Assistance for Needy Families State Plan FY 2001-2003 as approved by this section are: Caldwell, Caswell, Davie, Henderson, Iredell, Lenoir, Lincoln, Macon, McDowell, Randolph, Sampson, Surry, and Wilkes. *15.5% of Case Load*

CHILD SUPPORT PILOT PROGRAM/ENHANCED STANDARDS

SECTION 21.53.(a) It is the intent of the General Assembly that the Department of Health and Human Services increase the productivity and enhance the performance of its child support enforcement central office as well as its local offices statewide.

SECTION 21.53.(b) The Department of Health and Human Services, Office of the Controller, and the Division of Social Services shall immediately develop and implement performance enhancement strategies focusing on improved efficiency and effectiveness across the State and shall develop and implement at least one privatization pilot which tests the feasibility of privatizing State-operated local child support enforcement operations.

SECTION 21.53.(c) The Department of Health and Human Services shall develop and implement performance standards for each of the State and local child support enforcement offices across the State. In development of these performance standards, the Department of Health and Human Services shall evaluate other private and public child support models and national standards as well as other successful collections models. These performance standards shall include the following:

- (1) Cost per collections.
- (2) Consumer satisfaction.
- (3) Paternity establishments.
- (4) Administrative costs.
- (5) Orders established.
- (6) Collections on arrearages.
- (7) Location of absent parents.
- (8) Other related performance measures.

The Department of Health and Human Services shall monitor the performance of each office and shall implement a system of reporting which allows each local office to review its performance as well as the performance of other local offices. The Department of Health and Human Services shall publish an annual performance report that shall include the statewide and local office performance of each child support office.

SECTION 21.53.(d) The Department of Health and Human Services shall develop and implement a program to reward its child support enforcement offices for exemplary performance.

SECTION 21.53.(e) The Department of Health and Human Services shall report on its progress in complying with the provisions of this section to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division. The Department shall make interim reports no later than September 1, 2001, and January 15, 2002, and a final report no later than May 1, 2002.

ADULT CARE HOME MODEL FOR COMMUNITY-BASED SERVICES

SECTION 21.54.(a) In keeping with the United States Supreme Court Decision in Olmstead vs. L.C. & E.W. and with State policy to provide appropriate services to clients in the least restrictive and most appropriate environment, the Department of Health and Human Services shall develop a model project for delivering community-based mental health, developmental disabilities, and substance abuse housing and services through adult care homes that have excess capacity. The model shall be designed for implementation on a pilot basis and shall address the following:

- (1) Services that will be provided by the facility or under contract with the facility, including assistance with daily medication.
- (2) Access of clients to mental health, developmental disabilities, and substance abuse services provided in the community, including transportation to services outside of the client's residence in the adult care home facility.
- (3) Physical plant additions or changes necessary to provide for independent living of residents.
- (4) Methods for assuring quality of services, resident safety, and cost-effectiveness.
- (5) Consistency with the Department's Olmstead plan, other policies on community-integration, and disability plans adopted by the State.

SECTION 21.54.(b) The Department shall submit a progress report on the development of the model to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on or before January 1, 2002, and a final report on March 1, 2002. The report shall address the following:

- (1) The proposed time and location for implementation of the pilot.
- (2) Proposed number of residents to be placed and services to be provided directly by the facility or under contract with the facility.
- (3) Method for evaluating the pilot, including services provided, on a regular basis.
- (4) A description of the living environment for each resident and a comparison of how the living environment compares to that of other residents in the adult care home.
- (5) Changes to State law necessary to implement the pilot.
- (6) Projected cost to the State for pilot and statewide implementation.

of cases and emphasize the establishment of paternities and the location of absent parents.

SUBPART 5. MENTAL HEALTH, DEVELOPMENTAL DISABILITIES, AND SUBSTANCE ABUSE SERVICES

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
LIABILITY INSURANCE

SECTION 21.55. The Secretary of the Department of Health and Human Services, the Secretary of the Department of Environment and Natural Resources, and the Secretary of the Department of Correction may provide medical liability coverage not to exceed one million dollars (\$1,000,000) per incident on behalf of employees of the Departments licensed to practice medicine or dentistry, all licensed physicians who are faculty members of The University of North Carolina who work on contract for the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services for incidents that occur in Division programs, and on behalf of physicians in all residency training programs from The University of North Carolina who are in training at institutions operated by the Department of Health and Human Services. This coverage may include commercial insurance or self-insurance and shall cover these individuals for their acts or omissions only while they are engaged in providing medical and dental services pursuant to their State employment or training.

The coverage provided under this section shall not cover any individual for any act or omission that the individual knows or reasonably should know constitutes a violation of the applicable criminal laws of any state or the United States, or that arises out of any sexual, fraudulent, criminal, or malicious act, or out of any act amounting to willful or wanton negligence.

The coverage provided pursuant to this section shall not require any additional appropriations and shall not apply to any individual providing contractual service to the Department of Health and Human Services, the Department of Environment and Natural Resources, or the Department of Correction, with the exception that coverage may include physicians in all residency training programs from The University of North Carolina who are in training at institutions operated by the Department of Health and Human Services and licensed physicians who are faculty members of The University of North Carolina who work for the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services.

PRIVATE AGENCY UNIFORM COST-FINDING REQUIREMENT

SECTION 21.56. To ensure uniformity in rates charged to area programs and funded with State-allocated resources, the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services of the Department of Health and Human Services may require a private agency that provides services under contract with two or more area programs, except for hospital services that have an established Medicaid rate, to complete an agency-wide uniform cost finding in accordance with G.S. 122C-143.2(a) and G.S. 122C-147.2. The resulting cost shall be the maximum included for the private agency in the contracting area program's unit cost finding.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee, Gulley, Lucas
BUTNER COMMUNITY LAND RESERVATION

SECTION 21.57. The Department of Health and Human Services shall reserve and dedicate the following described land for the construction of a Community Building and related facilities to serve the Butner Reservation:

"Approximately 2 acres, on the east side it borders Central Avenue with a line running along the Wallace Bradshur property on the north back to the tree line next to

the ADATC. From there it follows the tree line south and west to and including the softball field. From the softball field it turns east to the State Employees Credit Union and follows the Credit Union property on the south side back to Central Avenue."

This land shall be reserved and dedicated for the project which shall be funded with contributions from Granville County, contributions from the residents of the Butner Reservation, the use of cablevision franchise rebate funds received by the Department of Health and Human Services on behalf of the Butner Reservation, and other public and private sources.

MENTAL HEALTH, DEVELOPMENTAL DISABILITIES, AND SUBSTANCE ABUSE SERVICES RESERVE FOR SYSTEM REFORM AND OLMSTEAD DECISION.

SECTION 21.58.(a) There is created in the Office of State Budget and Management the Mental Health, Developmental Disabilities, and Substance Abuse Services Reserve for System Reform and Olmstead. The purposes of the Reserve are to:

- (1) Provide start-up funds for programs and services that provide community alternatives for individuals currently residing in the State's mental health, developmental disabilities, and substance abuse services institutions.
- (2) Facilitate the State's compliance with the United States Supreme Court decision in Olmstead vs. L.C. and E.W.
- (3) Facilitate reform of the mental health, developmental disabilities, and substance abuse services system.

SECTION 21.58.(b) Funds appropriated to the Reserve created in subsection (a) of this section shall be used to:

- (1) Pay one-time expenditures that will not impose additional financial obligations on the State, and
- (2) Establish or expand community-based services if sufficient recurring funds can be identified within the Department from funds currently budgeted for mental health, developmental disabilities, and substance abuse services, area mental health programs, or local government.

SECTION 21.58.(c) Before allocating funds from the Reserve, the Director of the Budget shall certify that the planned uses of the funds are in compliance with this section and do not constitute or will not create an ongoing financial obligation to the State.

SECTION 21.58.(d) Funds in the Mental Health, Developmental Disabilities, and Substance Abuse Services Reserve for System Reform and Olmstead shall not revert to the General Fund but shall remain in the Reserve to be used as authorized in this section.

SECTION 21.58.(e) The Department of Health and Human Services shall report prior to the allocation of these funds to the Joint Legislative Oversight Committee on Mental Health, Developmental Disabilities, and Substance Abuse Services, the Joint Legislative Commission on Governmental Operations, and the Fiscal Research Division on any actions taken under this section.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

NONMEDICAID REIMBURSEMENT CHANGES

SECTION 21.59. Providers of medical services under the various State programs, other than Medicaid, offering medical care to citizens of the State shall be reimbursed at rates no more than those under the North Carolina Medical Assistance Program.

Repeat

The Department of Health and Human Services may reimburse hospitals at the full prospective per diem rates without regard to the Medical Assistance Program's annual limits on hospital days. When the Medical Assistance Program's per diem rates for inpatient services and its interim rates for outpatient services are used to reimburse providers in non-Medicaid medical service programs, retroactive adjustments to claims already paid shall not be required.

Notwithstanding the provisions of paragraph one, the Department of Health and Human Services may negotiate with providers of medical services under the various Department of Health and Human Services programs, other than Medicaid, for rates as close as possible to Medicaid rates for the following purposes: contracts or agreements for medical services and purchases of medical equipment and other medical supplies. These negotiated rates are allowable only to meet the medical needs of its non-Medicaid eligible patients, residents, and clients who require such services which cannot be provided when limited to the Medicaid rate.

Maximum net family annual income eligibility standards for services in these programs shall be as follows:

<u>Family Size</u>	<u>Medical Eye Care Adults</u>	<u>All Rehabilitation</u>	<u>Other</u>
1	\$4,860	\$8,364	\$4,200
2	5,940	10,944	5,300
3	6,204	13,500	6,400
4	7,284	16,092	7,500
5	7,821	18,648	7,900
6	8,220	21,228	8,300
7	8,772	21,708	8,800
8	9,312	22,220	9,300

The eligibility level for children in the Medical Eye Care Program in the Division of Services for the Blind shall be one hundred percent (100%) of the federal poverty guidelines, as revised annually by the United States Department of Health and Human Services and in effect on July 1 of each fiscal year. The eligibility level for adults in the Atypical Antipsychotic Medication Program in the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services shall be one hundred fifty percent (150%) of the federal poverty guidelines, as revised annually by the United States Department of Health and Human Services and in effect on July 1 of each fiscal year. Additionally, those adults enrolled in the Atypical Antipsychotic Medication Program who become gainfully employed may continue to be eligible to receive State support, in decreasing amounts for the purchase of atypical antipsychotic medication and related services up to three hundred percent (300%) of the poverty level.

State financial participation in the Atypical Antipsychotic Medication Program for those enrollees who become gainfully employed is as follows:

<u>Income (% of poverty)</u>	<u>State Participation</u>	<u>Client Participation</u>
0-150%	100%	0%
151-200%	75%	25%
201-250%	50%	50%
251-300%	25%	75%
300% and over	0%	100%

The Department of Health and Human Services shall contract at, or as close as possible to, Medicaid rates for medical services provided to residents of State facilities of the Department.

COMPREHENSIVE TREATMENT SERVICES PROGRAM

SECTION 21.60.(a) The Department of Health and Human Services shall establish the Comprehensive Treatment Services Program for children at risk for institutionalization or other out-of-home placement. The Program shall be implemented by the Department in consultation with the Department of Juvenile Justice and Delinquency Prevention, the Department of Public Instruction, and other affected State agencies. The purpose of the Program is to provide appropriate and medically necessary residential and nonresidential treatment alternatives for children at risk of institutionalization or other out-of-home placement. Program funds shall be targeted for non-Medicaid eligible children. Program funds may also be used to expand a child mental health system-of-care approach statewide. The program shall include the following:

- (1) Behavioral health screening for all children at risk of institutionalization or other out-of-home placement.
- (2) Appropriate and medically necessary residential and nonresidential services for deaf children.
- (3) Appropriate and medically necessary residential and nonresidential treatment services including placements for sexually aggressive youth.
- (4) Appropriate and medically necessary residential and nonresidential treatment services including placements for youths needing substance abuse treatment services and children with serious emotional disturbances.
- (5) Multidisciplinary case management services, as needed.
- (6) A system of utilization review specific to the nature and design of the Program.
- (7) Mechanisms to ensure that children are not placed in department of social services custody for the purpose of obtaining mental health residential treatment services.
- (8) Mechanisms to maximize current State and local funds and to expand use of Medicaid funds to accomplish the intent of this Program.
- (9) Other appropriate components to accomplish the Program's purpose.
- (10) The Secretary of the Department of Health and Human Services may enter into contracts with residential service providers.

SECTION 21.60.(b) In order to ensure that children at risk for institutionalization or other out-of-home placement are appropriately served by the mental health, developmental disabilities, and substance abuse services system, the Department of Health and Human Services, Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, shall do the following with respect to services provided to these children:

- (1) Provide only those treatment services that are medically necessary.
- (2) Implement utilization review of services provided.
- (3) Adopt the following guiding principles for the provision of services:
 - a. Service delivery system must be outcome-oriented and evaluation-based.
 - b. Services should be delivered as close as possible to the child's home.
 - c. Services selected should be those that are most efficient in terms of cost and effectiveness.
 - d. Services should not be provided solely for the convenience of the provider or the client.
 - e. Families and consumers should be involved in decision making throughout treatment planning and delivery.

- (4) Implement all of the following cost-reduction strategies:
- a. Preauthorization for all services except emergency services.
 - b. Levels of care to assist in the development of treatment plans.
 - c. Clinically appropriate services.
 - d. State review of individualized service plans not later than May 1, 2002, for all children served to ensure that service plans focus on delivery of appropriate services rather than optimal treatment and habilitation plans. *Willie M Class members*

SECTION 21.60.(c) The Department shall collaborate with other affected State agencies such as the Department of Juvenile Justice and Delinquency Prevention, the Department of Public Instruction, the Administrative Office of the Courts, and with local departments of social services, area mental health programs, and local education agencies to eliminate cost shifting and facilitate cost sharing among these governmental agencies with respect to the treatment and placement services.

SECTION 21.60.(d) The Department shall not allocate funds appropriated for Program services until a Memorandum of Agreement has been executed between the Department of Health and Human Services, the Department of Public Instruction, and other affected State agencies. The Memorandum of Agreement shall address specifically the roles and responsibilities of the various departmental divisions and affected State agencies involved in the administration, financing, care, and placement of children at risk of institutionalization or other out-of-home placement. The Department shall not allocate funds appropriated in this act for the Program until Memoranda of Agreement between local departments of social services, area mental health programs, local education agencies, and the Administrative Office of the Courts and the Department of Juvenile Justice and Delinquency Prevention, as appropriate, are executed to effectuate the purpose of the Program. The Memoranda of Agreement shall address issues pertinent to local implementation of the Program.

SECTION 21.60.(e) Notwithstanding any other provision of law to the contrary, services under the Comprehensive Treatment Services Program are not an entitlement for non-Medicaid eligible children served by the Program.

SECTION 21.60.(f) The Department of Health and Human Services, in conjunction with the Department of Juvenile Justice and Delinquency Prevention, the Department of Public Instruction, and other affected agencies, shall report on the following Program information:

- (1) The number and other demographic information of children served.
- (2) The amount and source of funds expended to implement the Program.
- (3) Information regarding the number of children screened, specific placement of children, and treatment needs of children served.
- (4) The average length of stay in residential treatment, transition, and return to home.
- (5) The number of children diverted from institutions or other out-of-home placements such as training schools and State psychiatric hospitals and a description of the services provided.
- (6) Recommendations on other areas of the Program that need to be improved.
- (7) Other information relevant to successful implementation of the Program.

SECTION 21.60.(g) The Department shall submit an interim report on December 1, 2001, on the implementation of this section and a final report not later than April 1, 2002, to the House of Representatives Appropriations Subcommittee on Health and Human Services, the Senate Appropriations Committee on Health and Human Services, and the Fiscal Research Division.

WHITAKER SCHOOL

SECTION 21.61.(a) Effective July 1, 2002, the Whitaker School is closed. The Department of Health and Human Services shall work with families and guardians, the Department of Public Instruction, the Department of Juvenile Justice and Delinquency Prevention, and appropriate local education agencies, area mental health, developmental disabilities, and substance abuse programs, and local departments of social services to develop a plan for the closure of Whitaker School on July 1, 2002. The Plan shall include assessment of placement and treatment needs of children receiving services from Whitaker School on or before the effective date of closure of the school. The Department shall ensure appropriate and safe placement for those children who, in accordance with the assessment, need an institutional setting. If the appropriate institutional setting is not available, the Department shall report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division. The report shall be submitted not later than December 1, 2001, and shall include a plan for making an appropriate and safe institutional setting available by July 1, 2002. The Plan shall also include transition plans that facilitate and support children living in their natural environments and utilizing existing resources and natural supports. The Department shall report on the needs assessment not later than September 1, 2001, and shall report on the complete transition plan not later than March 1, 2002. The report shall be submitted to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, the Joint Legislative Commission on Governmental Operations, and the Fiscal Research Division.

SECTION 21.61.(b) The Department of Health and Human Services shall contract for a comprehensive residential services needs assessment for children at risk of institutionalization or other out-of-home placement. Notwithstanding any other provision of law to the contrary, the Department shall use funds from the Reserve for Mental Health System Reform for the needs assessment required under this subsection. The Department shall report on the needs assessment to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division not later than December 1, 2001.

MENTAL RETARDATION CENTER CLOSURE

SECTION 21.62.(a) In keeping with the United States Supreme Court Decision in Olmstead vs. L.C. & E.W. and State policy to provide appropriate services to clients in the least restrictive and most appropriate environment, the Department of Health and Human Services shall develop a plan for closing of at least one State mental retardation center. The closure shall be effective July 1, 2002. The Department shall also develop a transition plan for moving each resident of the mental retardation center to appropriate community-based services and supports. The transition plan shall be developed in consultation with the resident and the resident's family or guardian.

SECTION 21.62.(b) The Department may use funds from the Reserve for Mental Health Reform to facilitate closure of the mental retardation center and the transition of clients of the closed mental retardation center into alternative community-based services. Savings realized from closure of a mental retardation center pursuant to this section shall be deposited to the Reserve for Mental Health Reform to be used for community services.

SECTION 21.62.(c) On or before February 1, 2002, and again on or before May 1, 2002, the Department shall report to the Joint Legislative Commission on Governmental Operations, the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and

DOROTHEA DIX HOSPITAL Closure

SECTION 21.63.(a) In keeping with the United States Supreme Court decision in Olmstead vs. L.C. & E.W. and State policy to provide appropriate services to clients in the least restrictive and most appropriate environment, the Department of Health and Human Services shall develop a plan for the closure of Dorothea Dix Hospital. Dorothea Dix Hospital shall be closed effective ~~July~~ ^{February} 1, 2003. The goal of the State Hospital Closure Plan is to develop mechanisms and identify resources needed to enable current patients and their families to continue to receive the necessary services and supports based on the following guiding principles:

- (1) Individuals shall be provided acute psychiatric care in non-State facilities when appropriate.
- (2) Individuals shall be provided acute psychiatric care in State facilities only when non-State facilities are unavailable.
- (3) Individuals shall receive evidenced-based psychiatric services and care that are cost-efficient.
- (4) The State shall minimize cost shifting to other State and local facilities or institutions.

SECTION 21.63.(b) The Department of Health and Human Services shall develop and implement an individual transition plan for each patient in the hospital. The State shall ensure that transition plans for placement of and services to individuals who are patients of Dix at the time of closure take into consideration the availability of appropriate alternative placements based on the needs of the patient and within resources available for the mental health, developmental disabilities, and substance abuse services system. In developing each plan, the Department shall consult with the patient and the patient's family or other legal representative.

SECTION 21.63.(b1) In accordance with the plan established in subsections (a) and (b) of this section, any savings in State appropriations that result from reductions in beds or services shall be placed in the Reserve for Mental Health System Reform. These funds shall be used to facilitate the closing of the facility and the transition of clients into appropriate community-based services and supports in accordance with Section 21.58 of this act.

SECTION 21.63.(c) The Department of Health and Human Services shall submit reports on the status of implementation of this section to the Joint Legislative Commission on Governmental Operations, the Senate Appropriations Committee on Health and Human Services, the House Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division. These reports shall be submitted on October 1, 2001, February 1, 2002, and May 1, 2002.

REDUCE ADMINISTRATIVE COSTS OF AREA MENTAL HEALTH, DEVELOPMENTAL DISABILITIES, AND SUBSTANCE ABUSE AUTHORITIES

Insko

SECTION 21.65.(a) Area mental health, developmental disabilities, and substance abuse authorities or counties administering mental health, developmental disabilities, and substance abuse services shall develop and implement plans to reduce local administrative costs. The plans shall be developed in accordance with guidelines adopted by the Secretary, in consultation with the Local Government Commission and the North Carolina Association of County Commissioners, and in accordance with the following:

- (1) For the 2001-2002 fiscal year, administrative costs for:
 - a. Area mental health, developmental disabilities, and substance abuse services programs shall not exceed fifteen percent (15%).
 - b. Counties administering mental health, developmental disabilities, and substance abuse services through a county program shall not exceed fifteen percent (15%).
- (2) For the 2002-2003 fiscal year, administrative costs for:
 - a. Area mental health, developmental disabilities, and substance abuse services programs shall not exceed twelve percent (12%).
 - b. Counties administering mental health, developmental disabilities, and substance abuse services through a county program shall not exceed twelve percent (12%).

SECTION 21.65.(b) The Department of Health and Human Services shall report its progress in complying with this section not later than October 1, 2001, January 1, 2002, and April 15, 2002. The reports shall be submitted to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division, and shall include:

- (1) A description of the process used and the participants involved in complying with subsection (a) of this section.

- (2) The guidelines developed under subsection (a) of this section.
- (3) A description of local compliance initiatives and efforts including program or function consolidation.
- (4) A list of area programs at or below the targeted twelve percent (12%) for the 2000-2001 fiscal year.
- (5) Projected savings in administrative costs as a result of implementation of the targeted limits required under this section.

SERVICES TO MULTIPLY DIAGNOSED ADULTS

SECTION 21.66.(a) In order to ensure that multiply diagnosed adults are appropriately served by the mental health, developmental disabilities, and substance abuse services system, the Department of Health and Human Services, Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, shall do the following with respect to services provided to these adults: *Thomas 3*

- (1) Implement the following guiding principles for the provision of services:
 - a. Service delivery system must be outcome oriented and evaluation based.
 - b. Services should be delivered as close as possible to the consumer's home.
 - c. Services selected should be those that are most efficient in terms of cost and effectiveness.
 - d. Services should not be provided solely for the convenience of the provider or the client.
 - e. Families and consumers should be involved in decision making throughout treatment planning and delivery; and
- (2) Provide those treatment services that are medically necessary.
- (3) Implement utilization review of services provided.

SECTION 21.66.(b) The Department of Health and Human Services shall implement all of the following cost-reduction strategies:

- (1) Preauthorization for all services except emergency services.
- (2) Criteria for determining medical necessity.
- (3) Clinically appropriate services.
- (4) Not later than May 1, 2002, conduct a State review of (i) individualized service plans for adults served to ensure that service plans focus on delivery of appropriate services rather than optimal treatment and habilitation plans, and (ii) staffing patterns of residential services.

SECTION 21.66.(c) No State funds shall be used for the purchase of single-family or other residential dwellings to house multiply diagnosed adults.

SECTION 21.66.(d) The Department shall submit a progress report on implementation of this section not later than February 1, 2001, and a final report not later than May 1, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

DOWNSIZING OF MENTAL RETARDATION CENTERS

SECTION 21.67.(a) In accordance with the Department of Health and Human Services' plan for downsizing the State's regional mental retardation facilities by four percent (4%) each year, the Department shall implement cost-containment and reduction strategies to ensure the corresponding financial and staff downsizing of each facility. The Department shall manage the client population of the mental retardation

Repeat

#8

New

centers in order to ensure that placements for ICF/MR level of care shall be made in non-State facilities. Admissions to State ICF/MR facilities are permitted only as a last resort and only upon approval of the Department. The corresponding budgets for each of the State mental retardation centers shall be reduced, and positions shall be eliminated as the census of each facility decreases. At no time shall mental retardation center positions be transferred to other units within a facility or assigned nondirect care activities such as outreach.

SECTION 21.67.(a1) Any savings in State appropriations that result from reductions in beds or services shall be placed in the Reserve for Mental Health System Reform. These funds shall be used to facilitate the closing of the facility and the transition of clients into appropriate community-based services and supports in accordance with Section 21.58 of this act.

SECTION 21.67.(b) Of the funds appropriated in this act to the Department of Health and Human Services for the 2002-2003 fiscal year for the operation of the State's Intermediate Care Facilities for the Mentally Retarded (ICF/MR), savings in excess of four million dollars (\$4,000,000) resulting from downsizing activities shall be identified and placed in the Reserve for Mental Health Reform.

SECTION 21.67.(c) The Department of Health and Human Services shall report on its progress in complying with this section to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division. Progress reports shall be submitted no later than September 1, 2001, and January 15, 2002, and a final report submitted not later than May 1, 2002.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
PLAN FOR CONSTRUCTION OF REGIONAL PSYCHIATRIC HOSPITAL

SECTION 21.68.(a) The Secretary of the Department of Health and Human Services shall, in consultation with the Department of Administration, plan for the construction of a regional psychiatric hospital to provide acute psychiatric treatment services for citizens of the State.

SECTION 21.68.(b) In developing this plan, the Secretary, in consultation with the Office of the State Treasurer and the Department of Administration, shall identify and recommend the most cost-effective means to finance construction of the new State hospital. The Department shall also take into consideration the findings and recommendations of the Government Performance Audit Committee (GPAC), December 1992, MGT America Report of 1998, and the Report of the Office of the State Auditor, April 1, 2000.

SECTION 21.68.(c) The Department of Health and Human Services shall provide a progress report on December 1, 2001, and a final report not later than April 1, 2002, to the Joint Legislative Commission on Governmental Operations, the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

SECTION 21.68.(d) The Department shall identify alternative locations for the new hospital. The Department shall identify those alternative locations that maximize existing State funds, access by clients, and efficiencies in service and administration.

SUBPART 6. CHILD DEVELOPMENT

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
CHILD CARE ALLOCATION FORMULA

SECTION 21.69.(a) The Department of Health and Human Services shall allocate child care subsidy funds to pay the costs of necessary child care for minor

New
Espasito

Polished
Trsko

children of needy families. The mandatory thirty percent (30%) Smart Start subsidy allocation under G.S. 143B-168.15(g) shall constitute the base amount for each county's child care subsidy allocation. The Department of Health and Human Services shall apply the following formula to all federal and State child care funds:

- (1) One-third of budgeted funds shall be distributed according to the county's population in relation to the total population of the State.
- (2) One-third of budgeted funds shall be distributed according to the number of children under 6 years of age in a county who are living in families whose income is below the State poverty level in relation to the total number of children under 6 years of age in the State in families whose income is below the poverty level.
- (3) One-third of budgeted funds shall be distributed according to the number of working mothers with children under 6 years of age whose family income is below seventy-five percent (75%) of State median income in a county in relation to the total number of working mothers with children under 6 years of age whose family income is below seventy-five percent (75%) of State median income in the State.

SECTION 21.69.(b) After the application of the formula in subsection (a) of this section, the Department shall identify counties whose allocations exceed the prior year expenditures for child care subsidies from all sources and shall apply the formula in subsection (a) to allocate excess child care subsidy funds to counties based on need.

SECTION 21.69.(c) The Department of Health and Human Services may reallocate unused child care subsidy funds in order to meet the child care needs of low-income families.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

CHILD CARE FUNDS MATCHING REQUIREMENT

Boiler plate

SECTION 21.70. No local matching funds may be required by the Department of Health and Human Services as a condition of any locality's receiving any State child care funds appropriated by this act unless federal law requires such a match. This shall not prohibit any locality from spending local funds for child care services.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

CHILD CARE REVOLVING LOAN

SECTION 21.71. Notwithstanding any law to the contrary, funds budgeted for the Child Care Revolving Loan Fund may be transferred to and invested by the financial institution contracted to operate the Fund. The principal and any income to the Fund may be used to make loans, reduce loan interest to borrowers, serve as collateral for borrowers, pay the contractor's cost of operating the Fund, or to pay the Department's cost of administering the program.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

EARLY CHILDHOOD EDUCATION AND DEVELOPMENT INITIATIVES

Local

SECTION 21.72.(a) Administrative costs of the North Carolina Partnership for Children, Inc., shall be equivalent to, on an average statewide basis for all local partnerships, not more than eight percent (8%) of the total statewide allocation to all local partnerships. What counts as administrative costs shall be as defined in the Smart Start Performance Audit.

Partnership

SECTION 21.72.(b) The North Carolina Partnership for Children, Inc., and all local partnerships shall use competitive bidding practices in contracting for goods and services on contract amounts as follows:

- (1) For amounts of five thousand dollars (\$5,000) or less, the procedures specified by a written policy to be developed by the Board of Directors of the North Carolina Partnership for Children, Inc.;

Repeat

Repeat

Revised

Insko

- (2) For amounts greater than five thousand dollars (\$5,000) but less than fifteen thousand dollars (\$15,000), three written quotes;
- (3) For amounts of fifteen thousand dollars (\$15,000) or more but less than forty thousand dollars (\$40,000), a request for proposal process; and
- (4) For amounts of forty thousand dollars (\$40,000) or more, request for proposal process and advertising in a major newspaper.

SECTION 21.72.(c) The North Carolina Partnership for Children, Inc., and all local partnerships shall, in the aggregate, be required to match no less than fifty percent (50%) of the total amount budgeted for the Program in each fiscal year of the biennium as follows: contributions of cash equal to at least fifteen percent (15%) and in-kind donated resources equal to no more than five percent (5%) for a total match requirement of twenty percent (20%) for each fiscal year. The North Carolina Partnership for Children, Inc., may carryforward any amount in excess of the required match for a fiscal year in order to meet the match requirement of the succeeding fiscal year. Only in-kind contributions that are quantifiable shall be applied to the in-kind match requirement. Volunteer services may be treated as an in-kind contribution for the purpose of the match requirement of this subsection. Volunteer services that qualify as professional services shall be valued at the fair market value of those services. All other volunteer service hours shall be valued at the statewide average wage rate as calculated from data compiled by the Employment Security Commission in the Employment and Wages in North Carolina Annual Report for the most recent period for which data are available. Expenses, including both those paid by cash and in-kind contributions, incurred by other participating non-State entities contracting with the North Carolina Partnership for Children, Inc., or the local partnerships, also may be considered resources available to meet the required private match. In order to qualify to meet the required private match, the expenses shall:

- (1) Be verifiable from the contractor's records;
- (2) If in-kind, other than volunteer services, be quantifiable in accordance with generally accepted accounting principles for nonprofit organizations;
- (3) Not include expenses funded by State funds;
- (4) Be supplemental to and not supplant preexisting resources for related program activities;
- (5) Be incurred as a direct result of the Early Childhood Initiatives Program and be necessary and reasonable for the proper and efficient accomplishment of the Program's objectives;
- (6) Be otherwise allowable under federal or State law;
- (7) Be required and described in the contractual agreements approved by the North Carolina Partnership for Children, Inc., or the local partnership; and
- (8) Be reported to the North Carolina Partnership for Children, Inc., or the local partnership by the contractor in the same manner as reimbursable expenses.

The North Carolina Partnership for Children, Inc., shall establish uniform guidelines and reporting format for local partnerships to document the qualifying expenses occurring at the contractor level. Local partnerships shall monitor qualifying expenses to ensure they have occurred and meet the requirements prescribed in this subsection.

Failure to obtain a twenty percent (20%) match by June 30 of each fiscal year shall result in a dollar-for-dollar reduction in the appropriation for the Program for a subsequent fiscal year. The North Carolina Partnership for Children, Inc., shall be responsible for compiling information on the private cash and in-kind contributions into a report that is submitted to the Joint Legislative Commission on Governmental

Operations in a format that allows verification by the Department of Revenue. The same match requirements shall apply to any expansion funds appropriated by the General Assembly.

SECTION 21.72.(d) Counties participating in the Program may use the county's allocation of State and federal child care funds to subsidize child care according to the county's Early Childhood Education and Development Initiatives Plan as approved by the North Carolina Partnership for Children, Inc. The use of federal funds shall be consistent with the appropriate federal regulations. Child care providers shall, at a minimum, comply with the applicable requirements for State licensure pursuant to Article 7 of Chapter 110 of the General Statutes, with other applicable requirements of State law or rule, including rules adopted for nonlicensed child care by the Social Services Commission, and with applicable federal regulations.

SECTION 21.72.(e) The Department of Health and Human Services shall continue to implement the performance-based evaluation system.

Revised

CHILD CARE SUBSIDY RATES

SECTION 21.73.(a) G.S. 110-109 is repealed. *Rate increased no money*

SECTION 21.73.(b) Subsection (d) of Section 11.27 of S.L. 2000-67 is repealed.

SECTION 21.73.(c) The maximum gross annual income for initial eligibility, adjusted biennially, for subsidized child care services shall be seventy-five percent (75%) of the State median income, adjusted for family size.

SECTION 21.73.(d) Fees for families who are required to share in the cost of care shall be established based on a percent of gross family income and adjusted for family size. Effective October 1, 2001, fees shall be determined as follows:

FAMILY SIZE	PERCENT OF GROSS FAMILY INCOME	
1-3	10%	<i>1 point less Increase by 1% pt.</i>
4-5	9%	
6 or more	8%	

SECTION 21.73.(e) On or before September 30, 2001, payments for the purchase of child care services for low-income children shall be the same as would have resulted under Section 11.27 of S.L. 2000-67. Effective October 1, 2001, payments for the purchase of child care services for low-income children shall be in accordance with the following requirements:

- (1) Religious-sponsored child care facilities operating pursuant to G.S. 110-106 and licensed child care centers and homes that meet the minimum licensing standards that are participating in the subsidized child care program shall be paid the one-star county market rate or the rate they charge privately paying parents, whichever is lower.
- (2) Religious-sponsored child care facilities operating pursuant to G.S. 110-106 and licensed child care centers and homes that are receiving a higher rate than the market rates that will be implemented with this provision shall continue to receive that higher rate until September 30, 2002.
- (3) Licensed child care centers and homes with two or more stars shall receive the market rate for that rated license level for that age group or the rate they charge privately paying parents, whichever is lower.
- (4) Nonlicensed homes shall receive fifty percent (50%) of the county market rate or the rate they charge privately paying parents, whichever is lower.
- (5) Maximum payment rates shall also be calculated periodically by the Division of Child Development for transportation to and from child care provided by the child care provider, individual transporter, or

transportation agency, and for fees charged by providers to parents. These payment rates shall be based upon information collected by market rate surveys.

SECTION 21.73.(f) Provision of payment rates for child care providers in counties who do not have at least 75 children in each age group for center-based and home-based care are as follows:

- (1) Payment rates shall be set at the statewide market rate for licensed child care centers and homes.
- (2) If it can be demonstrated that the application of the statewide market rate to a county with fewer than 75 children in each age group is lower than the county market rate and would inhibit the ability of the county to purchase child care for low-income children, then the county market rate may be applied.

SECTION 21.73.(g) A market rate shall be calculated for child care centers and homes at each rated license level for each county and for each age group or age category of enrollees and shall be representative of fees charged to unsubsidized privately paying parents for each age group of enrollees within the county. The Division of Child Development shall also calculate a statewide market rate for each rated license level for each age category. The Division of Child Development may also calculate regional market rates for each rated license level for each age group and age category.

SECTION 21.73.(h) Facilities licensed pursuant to Article 7 of Chapter 110 of the General Statutes and facilities operated pursuant to G.S. 110-106 may participate in the program that provides for the purchase of care in child care facilities for minor children of needy families. No separate licensing requirements shall be used to select facilities to participate. In addition, child care facilities shall be required to meet any additional applicable requirements of federal law or regulations. Child care arrangements exempt from State regulation pursuant to Article 7 of Chapter 110 of the General Statutes shall meet the requirements established by other State law and by the Social Services Commission.

County departments of social services or other local contracting agencies shall not use a provider's failure to comply with requirements in addition to those specified in this subsection as a condition for reducing the provider's subsidized child care rate.

SECTION 21.73.(i) Payment for subsidized child care services provided with Work First Block Grant funds shall comply with all regulations and policies issued by the Division of Child Development for the subsidized child care program.

SECTION 21.73.(j) Noncitizen families who reside in this State legally shall be eligible for child care subsidies if all other conditions of eligibility are met. If all other conditions of eligibility are met, noncitizen families who reside in this State illegally shall be eligible for child care subsidies only if at least one of the following conditions is met:

- (1) The child for whom a child care subsidy is sought is receiving child protective services or foster care services.
- (2) The child for whom a child care subsidy is sought is developmentally delayed or at risk of being developmentally delayed.
- (3) The child for whom a child care subsidy is sought is a citizen of the United States.

**EARLY CHILDHOOD EDUCATION AND DEVELOPMENT INITIATIVES
 ENHANCEMENTS**

SECTION 21.75.(a) The North Carolina Partnership for Children, Inc., and the Department of Health and Human Services shall immediately develop and implement the following:

- (1) Policies to ensure Early Childhood Education and Development Initiatives funds are allocated to child care programs, providers, and services that serve low-income children.
- (2) Policies to ensure the allocation of all State and federal funds to the neediest child care providers with priority given from the lowest licensure rating to the highest.
- (3) Policies to ensure the elimination of local duplication and increased efficiency in the administration of child care subsidy funds, including the following:
 - a. The Department and the Partnership shall ensure that only one administrative entity per local partnership administers child care subsidy funds.
 - b. The Department, in consultation with the local partnerships and counties, shall contract with the most efficient and effective entity to administer subsidy funds.
 - c. At no time shall the Department and a local partnership allow the duplicative administration of State and federal child care subsidy funds through subcontracts.
- (4) Policies and procedures to ensure the unduplicated compilation of children served through State and federal child care subsidy funds.
- (5) Policies and procedures to ensure the timely, accurate, and consistent reporting of information on local child care subsidy waiting lists statewide.

SECTION 21.75.(b) In consultation with the Department of Public Instruction and the North Carolina Partnership for Children, Inc., the Department of Health and Human Services shall develop and implement policies and procedures to ensure that local partnerships that allocate funds to child care providers receiving State and federal child care funds plan and coordinate with their local education agencies the following: *Lee Andrew Lew Suit*

- (1) Preschool curriculum development and selection.
- (2) Kindergarten transition activities.
- (3) Other activities needed to ensure that children transitioning from child care settings to kindergarten enter school ready to succeed.

SECTION 21.75.(c) The Department of Health and Human Services, in consultation with North Carolina Partnership for Children, Inc., and the Office of State Budget and Management, shall develop a separate NCPC, Early Childhood Education

Insko
A-3

Insko

and Development Initiative Program budget, within the Division of Child Development fund code for the purpose of segregating all expenditures related to the administration and operation of the statewide Smart Start program.

SECTION 21.75.(d) The Department of Health and Human Services and the North Carolina Partnership for Children, Inc., shall ensure that the allocation of funds for Early Childhood Education and Development Initiatives for State fiscal year 2001-2002 shall be administered and distributed in the following manner:

- Reductions*
- (1) Effective for fiscal year 2001-2002, each Local Partnership's total allocation shall be reduced as follows:
 - a. For local partnerships first funded in 1993-94 fiscal year, the allocation shall be reduced by five percent (5%).
 - b. For local partnerships first funded in 1994-95 fiscal year, the allocation shall be reduced by three and one-half percent (3.5%).
 - c. For local partnerships first funded in 1996-97 fiscal year, the allocation shall be reduced by three and one-half percent (3.5%).
 - d. For local partnerships first funded in 1997-98 fiscal year, the allocation shall be reduced by three and one-half percent (3.5%).
 - e. For local partnerships first funded in 1998-99 fiscal year, the allocation shall be reduced in accordance with a policy to be developed by the North Carolina Partnership for Children, Inc., in conjunction with the Department of Health and Human Services.
 - (2) North Carolina Partnership for Children, Inc., administration shall be reduced by fifteen percent (15%) from the 2000-2001 fiscal year level.
 - (3) Department of Health and Human Services, Division of Child Development, Smart Start administration shall be reduced by ten percent (10%) from the 2000-2001 fiscal year level.
 - (4) Capital expenditures and equipment expenditures are prohibited for fiscal year 2001-2002. For the purposes of this section, "capital expenditures" means expenditures for capital improvements as defined in G.S. 143-34.40.

SECTION 21.75.(e) The allocation of fiscal year 2000-2001 State carryforward funds is prohibited, and all fiscal year 2000-2001 unspent funds shall revert to the General Fund.

SECTION 21.75.(f) With the exception of child care subsidy funds, at no time shall the North Carolina Partnership for Children, Inc., approve local partnership plans which allocate State funds to child care providers, programs, or services in the following circumstances:

- Insko*
- (1) Child care facilities with licensure of four or five stars, unless the expenditure of funds is to expand capacity for low-income children.
 - (2) Child care facilities that do not accept child care subsidy funds.
 - (3) Child care facilities that previously received quality improvement grants whose quality initiatives failed to increase licensure.

SECTION 21.75.(g) G.S. 143B-168.15(f) is repealed.

SECTION 21.75.(h) G.S. 143B-168.12(a)(9) is repealed. *yearly not quarterly*

CLOSURE OF CENTRAL NORTH CAROLINA SCHOOL FOR THE DEAF AT GREENSBORO

SECTION 21.81.(a) The Department of Health and Human Services shall immediately close the Central North Carolina School for the Deaf at Greensboro. The Department of Administration shall develop a plan to dispose of the property used by the Central North Carolina School for the Deaf and shall report on this plan by October 1, 2001, to the Joint Legislative Commission on Governmental Operations and the Fiscal Research Division.

SECTION 21.81.(b) G.S. 143B-146.21(b) and (c) read as rewritten:

"(b) The Secretary of Health and Human Services shall adopt policies and offer training opportunities to ensure that personnel who provide direct services to children in the ~~three~~ State schools for the deaf become proficient in sign language within two years of their initial date of employment or within two years of the effective date of this act, whichever occurs later. This subsection shall not apply to preschool personnel in any oral, auditory, or cued speech preschool.

(c) The Department of Public Instruction, the Board of Governors of The University of North Carolina, and the State Board of Community Colleges shall offer and communicate the availability of professional development opportunities, including

Proposed

those to improve sign language skills, to the personnel assigned to the State's residential schools, particularly the Governor Morehead School and the ~~three~~ schools for the deaf."

SECTION 21.81.(c) G.S. 143B-216.40 reads as rewritten:

"§ 143B-216.40. Establishment; operations.

There are established, and there shall be maintained, the following schools for the deaf: the Eastern North Carolina School for the Deaf at Wilson (~~K-12~~); ~~the Central North Carolina School for the Deaf at Greensboro (K-8), (K-12)~~ and the North Carolina School for the Deaf at Morganton (K-12). The Department of Health and Human Services shall be responsible for the operation and maintenance of the schools.

The Board of Directors of the North Carolina Schools for the Deaf shall advise the Department and shall adopt rules and regulations concerning the schools as provided in G.S. 115C-124 and 143B-173."

SECTION 21.81.(d) G.S. 143B-146.2(a) reads as rewritten:

"(a) The Governor Morehead School and the ~~three~~ schools for the deaf shall participate in the ABC's Program. The Secretary, in consultation with the General Assembly and the State Board, may designate other residential schools that must participate in the ABC's Program. The primary goal of the ABC's Program is to improve student performance. The Program is based upon an accountability, recognition, assistance, and intervention process in order to hold each participating school, its superintendent, and the instructional personnel accountable for improved student performance in that school."

SECTION 21.81.(e) G.S. 143B-216.32(a) reads as rewritten:

"(a) The Council for the Deaf and the Hard of Hearing shall consist of 23 members. Fifteen members shall be members appointed by the Governor. Three members appointed by the Governor shall be persons who are deaf and three members shall be persons who are hard of hearing. One appointment shall be an educator who trains deaf education teachers and one appointment shall be an audiologist licensed under Article 22 of Chapter 90 of the General Statutes. Three appointments shall be parents of deaf or hard of hearing children including one parent of a student in a residential school; one parent of a student in a preschool program; and one parent of a student in a mainstream education program, with ~~each~~ at least one parent coming from a ~~different~~ each region of the ~~three~~ North Carolina schools for the deaf regions. One member appointed by the Governor shall be recommended by the President of the North Carolina Association of the Deaf; one member shall be recommended by the President of the North Carolina Pediatric Society; one member shall be recommended by the President of the North Carolina Registry of Interpreters for the Deaf; and one member shall be nominated by the Superintendent of Public Instruction. One member shall be appointed from the House of Representatives by the Speaker of the House of Representatives and one member shall be appointed from the Senate by the President Pro Tempore of the Senate. The Secretary of Health and Human Services shall appoint six members as follows: one from the Division of Vocational Rehabilitation, one from the Division of Aging, one from the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, one from the Division of Social Services, one from a North Carolina Chapter of SHHH (Self Help for the Hard of Hearing), and one from SPEAK (Statewide Parents' Education and Advocacy for Kids)."

SECTION 21.82.(b) The Department of Health and Human Services and the Department of Public Instruction shall plan for the closure of the two schools for the deaf during the 2001-2002 State fiscal year. The Department of Health and Human Services, in consultation with the Department of Public Instruction, the appropriate local education agencies, and the families of the affected students, shall develop a transition plan to mainstream all students into the appropriate local school effective for the 2003-2004 school year. The Department shall report on this plan to the Joint Legislative Commission on Governmental Operations not later than February 1, 2002.

SECTION 21.82.(c) The Department of Health and Human Services, Office of Education Services and Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, shall develop a transition plan for those deaf students who are seriously emotionally disturbed for placing them in an appropriate setting.

SECTION 21.82.(c1) The Department shall determine which children, if any, cannot reasonably and appropriately be served in their local school systems. To the extent those cases exist, in conjunction with the affected school systems and with the parents or guardians of those children, the Department shall prepare a plan by which those children can receive reasonable and appropriate services. To the extent that a plan cannot be developed through which any of these children can be reasonably and appropriately served within their local school systems, the Department shall present a detailed proposal for serving these children. The report shall be submitted not later than February 1, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

SECTION 21.82.(d) The Department of Administration shall develop a plan for disposing of the property used by the schools for the deaf.

SECTION 21.82.(e) Effective July 1, 2003, Part 30 of Article 3 of Chapter 143B of the General Statutes is repealed.

SECTION 21.82.(f) Effective July 1, 2003, G.S. 143B-146.2(a), as amended by Section 21.81(d) of this act, reads as rewritten:

"(a) The Governor Morehead School ~~and the schools for the deaf~~ shall participate in the ABC's Program. The Secretary, in consultation with the General Assembly and the State Board, may designate other residential schools that must participate in the ABC's Program. The primary goal of the ABC's Program is to improve student performance. The Program is based upon an accountability, recognition, assistance, and intervention process in order to hold each participating school, its superintendent, and the instructional personnel accountable for improved student performance in that school."

SECTION 21.82.(g) Effective July 1, 2003, G.S. 143B-216.32(a), as amended by Section 21.81(e) of this act, reads as rewritten:

"(a) The Council for the Deaf and the Hard of Hearing shall consist of 23 members. Fifteen members shall be members appointed by the Governor. Three members appointed by the Governor shall be persons who are deaf and three members shall be persons who are hard of hearing. One appointment shall be an educator who trains deaf education teachers and one appointment shall be an audiologist licensed under Article 22 of Chapter 90 of the General Statutes. Three appointments shall be parents of deaf or hard of hearing children ~~including one parent of a student in a residential school; one parent of a student in a preschool program; and one parent of a student in a mainstream education program, with at least one parent coming from each region of the North Carolina schools for the deaf regions children.~~ One member appointed by the Governor shall be recommended by the President of the North Carolina Association of the Deaf; one member shall be recommended by the President of the North Carolina Pediatric Society; one member shall be recommended by the President of the North Carolina Registry of Interpreters for the Deaf; and one member shall be nominated by the Superintendent of Public Instruction. One member shall be

appointed from the House of Representatives by the Speaker of the House of Representatives and one member shall be appointed from the Senate by the President Pro Tempore of the Senate. The Secretary of Health and Human Services shall appoint six members as follows: one from the Division of Vocational Rehabilitation, one from the Division of Aging, one from the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, one from the Division of Social Services, one from a North Carolina Chapter of SHHH (Self Help for the Hard of Hearing), and one from SPEAK (Statewide Parents' Education and Advocacy for Kids)."

SECTION 21.82.(h) Effective July 1, 2003, G.S. 114-4.2F reads as rewritten:

"§ 114-4.2F. **Designation of attorney specializing in the law of the handicapped.**

The Attorney General is authorized to designate from his staff an attorney to specialize in the law of the handicapped. The attorney so designated shall act as advisor to the Division of Vocational Rehabilitation, the Division of Services for the Deaf and the Hard of Hearing, ~~the North Carolina School for the Deaf and the Governor Morehead School.~~"

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

CLOSING OF PRESCHOOL PROGRAMS FOR THE DEAF

SECTION 21.83. Effective October 1, 2001, the Department of Health and Human Services shall close the State-operated preschool programs for the deaf. The Department of Health and Human Services, the Division of Public Health, the Office of Education Services, the Division of Child Development, and the Department of Public Instruction shall develop a transition plan for the appropriate placement of the children located at these preschool sites. The transition plan shall include an assessment of the available resources to meet the needs of the children. *35 student*

EARLY INTERVENTION PILOTS

SECTION 21.84.(a) The Department of Health and Human Services, Division of Public Health shall not expand the Student Information Management System pilot program statewide during the 2001-2002 fiscal year. The Department shall maintain, evaluate, and improve the three pilot projects implemented in the 2000-2001 fiscal year, and provide a report on the status of the system to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division by October 1, 2001. The report shall include the status of the operations of the database, a plan for statewide expansion, and the costs associated with the expansion.

SECTION 21.84.(b) The Department of Health and Human Services shall not expand the regional interdisciplinary pilots during the 2001-2002 fiscal year.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

EVALUATION OF EARLY INTERVENTION SYSTEM

SECTION 21.85.(a) The Department of Health and Human Services, Division of Public Health, shall determine the reasons why children are waiting for evaluation services provided by the Developmental Evaluation Centers. The Division shall develop an action plan to reduce the waiting period for evaluation services.

SECTION 21.85.(b) The Department of Health and Human Services, Division of Public Health, shall determine the reasons why children and their families are waiting for services that follow the evaluation process. The Division shall identify the specific services that children are waiting for and develop a plan to address the waiting period.

SECTION 21.85.(c) The Department of Health and Human Services, Division of Public Health, shall assess ways in which to create efficiencies among the

therapies that are provided within the Early Intervention Program, Children With Special Health Services program, and other programs. The Division shall also evaluate ways to combine early intervention services provided by the Developmental Evaluation Centers, regional therapists, local health departments, and area mental health, developmental disabilities, and substance abuse authorities to gain efficiencies.

SECTION 21.85.(d) Not later than December 1, 2001, the Department of Health and Human Services shall report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on the assessment and plans of action for all of the above.

SUBPART 10. PUBLIC HEALTH

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

IMMUNIZATION PROGRAM RESTITUTION POLICY

SECTION 21.86. Part 2 of Article 6 of Chapter 130A of the General Statutes is amended by adding the following new section to read:

"§ 130A-158. Restitution required when vaccine spoiled due to provider negligence.

Immunization program providers shall be liable for restitution to the State for the cost of replacement vaccine when vaccine in the provider's inventory has become spoiled or unstable due to the provider's negligence and unreasonable failure to properly handle or store the vaccine."

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

IMMUNIZATION PROGRAM FUNDING

SECTION 21.87.(a) Of the funds appropriated in this act to the Department of Health and Human Services for childhood immunization programs for positions, operating support, equipment, and pharmaceuticals, the sum of up to one million dollars (\$1,000,000) for the 2001-2002 fiscal year and the sum of one million dollars (\$1,000,000) for the 2002-2003 fiscal year may be used for projects and activities that are also designed to increase childhood immunization rates in North Carolina. These projects and activities shall include the following:

- (1) Outreach efforts at the State and local levels to improve service delivery of vaccines. Outreach efforts may include educational seminars, media advertising, support services to parents to enable children to be transported to clinics, longer operating hours for clinics, and mobile vaccine units; and
- (2) Continued development of an automated immunization registry.

SECTION 21.87.(b) Funds authorized to be used for immunization efforts under subsection (a) of this section shall not be used to fund additional State positions or contracts in the Department of Health and Human Services.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee, Rand

PRESCRIPTION DRUG ASSISTANCE PROGRAM

SECTION 21.88. Of the funds appropriated in this act to the Department of Health and Human Services, the sum of five hundred thousand dollars (\$500,000) for the 2001-2002 fiscal year and the sum of five hundred thousand dollars (\$500,000) for the 2002-2003 fiscal year shall be used to pay the cost of outpatient prescription drugs for persons:

- (1) Over the age of 65 years and not eligible for full Medicaid benefits;
- (2) Whose income is not more than one hundred fifty percent (150%) of the federal poverty level; and
- (3) Who have been diagnosed with cardiovascular disease or diabetes.

These funds shall be used to pay the cost of outpatient prescription drugs for the treatment of cardiovascular disease or diabetes. Payment shall be not more than the Medicaid cost including rebates. The Department shall develop criteria to maximize the efficient and effective distribution of these drugs.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee, Dannelly

ADOLESCENT PREGNANCY PREVENTION INITIATIVES

SECTION 21.89.(a) The title of Part 6 of Article 5 of Chapter 130A of the General Statutes reads as rewritten:

~~"Part 6. Adolescent Teen Pregnancy Prevention Projects-Prevention."~~

SECTION 21.89.(b) G.S. 130A-131.15 is repealed.

SECTION 21.89.(c) Part 6 of Article 5 of Chapter 130A of the General Statutes is amended by adding a new section to read:

"§ 130A-131.15A. Department to establish program.

(a) The Department shall establish and administer Teen Pregnancy Prevention Initiatives. The Department shall establish initiatives for primary prevention, secondary prevention, and special projects.

(b) The Commission shall adopt rules necessary to implement this section. The rules shall include a maximum annual funding level for initiatives and a requirement for local match.

(c) Initiatives shall be funded in accordance with selection criteria established by the Commission. The Department shall make funding recommendations to the Commission. The Commission shall make the final determination of which initiatives are to be funded.

(d) Initiatives shall be funded on a four-year funding cycle. At the end of four years of funding, a local initiative shall be eligible to reapply for funding.

(e) Administrative costs in implementing this section shall not exceed ten percent (10%) of the total funds administered pursuant to this section.

(f) The Department shall evaluate funded initiatives on a two-year cycle and shall report its finding to the Commission, the Joint Legislative Commission on Government Operations, and the House of Representatives and Senate Chairs of the Appropriations Subcommittees on Health and Human Services by April 1 of odd-numbered years. The evaluation shall be conducted by a firm or individual external to the Department. The evaluation shall include a study of the effectiveness of the initiative in reducing the pregnancy rate in the target population."

SECTION 21.89.(d) The Department of Health and Human Services shall administer the Adolescent Pregnancy Prevention Program, the Adolescent Parenting Program, and the TANF-funded pregnancy prevention projects pursuant to the provisions of G.S. 130A-131.15A.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

AIDS DRUG ASSISTANCE PROGRAM(ADAP)

SECTION 21.90.(a) The Department shall develop a comprehensive information management system on AIDS/HIV clients receiving services from the State. The Department may use up to fifty thousand dollars (\$50,000) of the funds appropriated in this act to implement this information management system. This information management system shall be patterned after the information management system used by the Elderly Drug Assistance Program, shall provide instantaneous internal access to information, and shall include information on the following:

- (1) Program usage patterns of ADAP participants, including, but not limited to, frequency of prescription purchases, types of medications prescribed, and the cost of prescribed medications on a monthly basis.
- (2) Demographics of participants in the program, including the age, gender, race, ethnicity, and county of residence of participants.

The Department shall also develop a plan for promoting patient adherence to physician treatment recommendations. In developing the plan, the Department shall identify ways of obtaining information without interfering with physician-patient confidentiality. The Department shall report on this plan to the members of the House of Representatives Appropriations Subcommittee on Health and Human Services, the Senate Appropriations Committee on Health and Human Services, and the Fiscal Research Division not later than May 1, 2002.

SECTION 21.90.(b) For the 2001-2002 fiscal year and for the 2002-2003 fiscal year, HIV-positive individuals with incomes at or below one hundred twenty-five percent (125%) of the federal poverty level are eligible for participation in ADAP. Eligibility for participation in ADAP during the 2001-2003 fiscal biennium may be extended to individuals with incomes up to one hundred fifty percent (150%) of the federal poverty level only after the Office of State Budget and Management certifies in writing that the Department has developed an information management system pursuant to subsection (a) of this section. Until the Office of State Budget and Management makes this certification, eligibility for participation in ADAP during the 2001-2003 fiscal biennium shall not be extended to individuals with incomes above one hundred twenty-five percent (125%) of the federal poverty level. All individuals who are eligible for participation in ADAP shall be served by the Department of Health and Human Services. If sufficient funds are not available from funds allocated to ADAP, the Department of Health and Human Services shall transfer available funds from other programs within the Department to meet the funding needs of ADAP.

SECTION 21.90.(c) The Department of Health and Human Services shall make an interim report by January 1, 2002, and a final report by April 30, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on ADAP. The reports shall include the following:

- (1) Monthly data on total cumulative AIDS/HIV cases reported in North Carolina.
- (2) Monthly data on the number of individuals who have applied to participate in ADAP that have been determined to be ineligible.
- (3) Monthly data on the income level of participants in ADAP and of individuals who have applied to participate in ADAP who have been determined to be ineligible.
- (4) Monthly data on fiscal year-to-date expenditures of ADAP. The interim report shall contain monthly data on the calendar year-to-date expenditures of ADAP.
- (5) An update on the status of the information management system.
- (6) Monthly data on ADAP usage patterns and demographics of participants in ADAP.
- (7) Estimated participation rates and costs if eligibility for participation in ADAP were raised to one hundred seventy-five percent (175%) of the federal poverty level or to two hundred percent (200%) of the federal poverty level.
- (8) Fiscal year-to-date budget information.

SECTION 21.90.(d) The Department of Health and Human Services shall revise its policy regarding determination of eligibility to require all applications for participation in ADAP to be reviewed for eligibility determination by the Purchase of Medical Care Unit of the Program Benefits and Payment Section of the Office of the State Controller. The Department shall track all applications for participation in ADAP in order to make the reports required under subsection (c) of this section. This policy applies to all applications made in physician offices or other settings.

New

DIVISION OF PUBLIC HEALTH REORGANIZATION

SECTION 21.91.(a) The Department of Health and Human Services shall reduce layers of management and streamline operations as follows:

Insko
Crawford

66
#49

- (1) Create a Section of Financial Management and Support. The Department shall consolidate all budgeting, purchasing, contract oversight, and computer networking personnel into this section. The Department shall transfer all positions, corresponding State appropriations, federal funds, and other related funds into this section. At no time shall the Department allow the Division of Public Health to maintain nonprogram positions within the other sections of the Division.
- (2) Eliminate the Oral Health Section, effective July 1, 2001. All positions, corresponding State appropriations, federal funds, and other related funds shall be transferred to the Women and Children's Health Section. *No services will be lost*
 - a. The Division shall evaluate the services currently provided by staff and identify opportunities for efficiencies by combining any of the educational functions of staff with the school health program within the Women's and Children's Health Section.
 - b. The Division shall identify ways to maximize Dentist I positions by looking at ways to provide direct children's services through these dentists, or redirecting these funds to develop demonstration efforts that will provide additional dental services for individuals.
- (3) Consolidate all nurse consultant positions across the Division of Public Health sections into the Local Health Services Section. The Department shall transfer corresponding State appropriations, federal funds, and any other related funds into the Local Health Services Section. The Department shall further combine activities among nurse consultants to ensure that positions will function as generalists for the provision of services to local health departments.
- (4) Consolidate and transfer all health educator positions across Division of Public Health sections into an existing section. The Department shall transfer corresponding State appropriations, federal funds, and any other related funds into that section. The Department shall ensure that these positions will function as generalists for the provision of educational services for the State and local health departments.

SECTION 21.91.(b) All functions of the Oral Health Section shall be continued unless contrary to sound health policy. The Public Health Division shall maintain at least the same levels of visibility and viability for oral health functions as under the Oral Health Section. The elimination of the Oral Health Section shall not impair the Public Health Division's ability to access and participate in federal contracts.

SECTION 21.91.(c) The Department shall establish a new permanent full-time position in the Division of Public Health for Local Health Services section chief. The Department shall not contract for this position.

SECTION 21.91.(d) Not later than October 1, 2001, the Department shall report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on the reorganization activities required under this section.

New

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
STATE LABORATORY

SECTION 21.92.(a) The Department of Health and Human Services, Office of the State Controller, shall develop a five-year equipment replacement schedule for the State Laboratory. The purpose of the schedule is to have an objective plan for medical laboratory equipment replacement to plan for current and future year's budget requirements.

SECTION 21.92.(b) The Department shall assess the various services that the State Laboratory provides and address the feasibility of contracting for additional services. The Department shall prepare a cost-benefit analysis of providing services in-house versus contracting out for services.

SECTION 21.92.(c) The Department shall assess the current fees and fee methodology for laboratory services to determine if fees are set at the appropriate levels. The Department shall identify new ways to set fees that incorporate the fully allocated cost of laboratory equipment and the full costs of operations. The Department may implement a revised fee schedule to reflect the full cost of operations including equipment replacement.

SECTION 21.92.(d) Not later than March 1, 2002, the Department of Health and Human Services shall report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on the implementation of this section.

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee

ENHANCEMENT OF STATE CENTER FOR HEALTH STATISTICS

SECTION 21.93.(a) The State Center for Health Statistics is transferred to the Office of the Secretary of the Department of Health and Human Services and is renamed the "Center for Health and Human Services Statistics and Information." The purpose of the Center is to provide primary statistical analyses and information for the Department, members of the public, and support of all of the Divisions of the Department. The Center shall collect, compile, manage, and report data for the public and the Department. The Secretary shall transfer all information management, database management, and other related positions from throughout the divisions, except for the Division of Information Resource Management and other systems management personnel, and shall transfer corresponding State appropriations, federal funds, and other funds to establish and expand the Center. The Department shall do the following:

- (1) Determine the feasibility of transferring existing database contracts to the Center. All future statistical analyses and information projects will be first made available to the Center for the right of first refusal.
- (2) Determine the feasibility of creating a unit in the Center to more efficiently and effectively manage database and information contracts for the entire Department.
- (3) Consult with the Center in planning any management information systems.
- (4) Evaluate the feasibility of operating the center as an internal service fund budget.

The Department shall submit a progress report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on the implementation of this section no later than October 1, 2001, and a final report on March 1, 2002. The report shall include an assessment of the current statistical analysis functions for each Division and determine the resources (staff and appropriations) that would be suitable for transfer into the Center. The inventory shall include an assessment of all current contracts for database management, data collection, and analyses, and shall determine the total amount of funds currently involved with these efforts. The final

report shall include an implementation plan for carrying out the provisions of this section.

SECTION 21.93.(b) Article 15 of Chapter 130A of the General Statutes reads as rewritten:

"Article 15.

~~"State-Center for Health Statistics and Human Services Statistics and Information.~~
"§ 130A-371. State-Center for Health and Human Services Statistics and Information established.

~~A State-The Center for Health and Human Services Statistics and Information is established within the Department. The purpose of the Center for Health and Human Services Statistics and Information is to provide primary statistical analysis and information for health and human services, members of the public, and support for all Divisions of the Department.~~

"§ 130A-372. Definitions.

The following definitions shall apply throughout this Article:

- (1) 'Health data' means information relating to the health status of individuals, the availability of health resources and services, and the use and cost of these resources and services. The term shall not include vital records registered under the provisions of Article 4 of this Chapter.
- (2) 'Medical records' means health data relating to the diagnosis or treatment of physical or mental ailments of individuals. "

"§ 130A-373. Authority and duties.

(a) ~~The State-Center for Health and Human Services Statistics and Information is authorized to:~~

- (1) Collect, maintain and analyze health data on:
 - a. The extent, nature and impact of illness and disability on the population of the State;
 - b. The determinants of health and health hazards;
 - c. Health resources, including the extent of available work power and resources;
 - d. Utilization of health care;
 - e. Health care costs and financing; and
 - f. Other health or health-related matters; and
- (2) Undertake and support research, demonstrations and evaluations respecting new or improved methods for obtaining data.

(b) ~~The State-Center for Health and Human Services Statistics and Information may collect health data on behalf of other governmental or nonprofit organizations.~~

(c) ~~The State-Center for Health and Human Services Statistics and Information shall collect data only on a voluntary basis except when there is specific legal authority to compel mandatory reporting of the health data. In collecting health data on a voluntary basis, the State-Center for Health and Human Services Statistics and Information shall give the person a statement in writing:~~

- (1) That the data is being collected on a voluntary basis and that the person is not required to respond; and
- (2) The purposes for which the health data is being collected.

(d) ~~Subject to the provisions of G.S. 130A-374, the State-Center for Health and Human Services Statistics and Information may share health data with other persons, agencies and organizations.~~

(e) ~~The State-Center for Health and Human Services Statistics and Information shall:~~

- (1) Take necessary action to assure that statistics developed under this Article are of high quality, timely and comprehensive, as well as specific and adequately analyzed and indexed; and

(2) Publish, make available and disseminate statistics on as wide a basis as practical.

(f) The State-Center for Health and Human Services Statistics and Information shall coordinate health data activities within the State in order to eliminate unnecessary duplication of data collection and to maximize the usefulness of data collected by:

- (1) Participating with State and local agencies in the design and implementation of a cooperative system for producing comparable and uniform health information and statistics at the State and local levels; and
- (2) Undertaking and supporting research, development, demonstration and evaluation respecting the cooperative system.

"§ 130A-374. Security of health data.

(a) Medical records of individual patients shall be confidential and shall not be public records open to inspection. The State-Center for Health and Human Services Statistics and Information may disclose medical records of individual patients which identify the individual described in the record only if:

- (1) The individual described in the medical record has authorized the disclosure; or
- (2) The disclosure is for bona fide research purposes. The Commission shall adopt rules providing for the use of the medical records for research purposes.

(b) The State-Center for Health and Human Services Statistics and Information shall take appropriate measures to protect the security of health data collected by the Center, including:

- (1) Limiting the access to health data to authorized individuals who have received training in the handling of this data;
- (2) Designating a person to be responsible for physical security; and
- (3) Developing and implementing a system for monitoring security."

SECTION 21.93.(c) The Secretary shall review the requirements of the medical records privacy regulations under the Health Insurance Portability and Accountability Act of 1996 (HIPAA) to avoid duplication of effort in complying with that Act and this section.

PUBLIC HEALTH PREVENTION ACTIVITIES REPORT *Reporting Requirement*

SECTION 21.94. The Department of Health and Human Services, Division of Public Health, shall conduct an inventory of its activities in the prevention of infant mortality and birth defects. The Department shall conduct a comprehensive assessment of these activities to identify all in-house activities and contracted activities and shall include the following:

- (1) Program or service title and description;
- (2) Number of clients served, if applicable;
- (3) State appropriations, federal funds, and other funds involved with the program or service; and
- (4) To the extent possible include Smart Start health programs and services, and identify other nonprofit organizations' activities.

The Department shall report on the information required under this section to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division by March 1, 2002.

HEART DISEASE AND STROKE PREVENTION TASK FORCE

SECTION 21.95. The Heart Disease and Stroke Prevention Task Force, created in subsection (l) of Section 26.9 of Chapter 507 of the 1995 Session Laws, as amended, shall submit to the Governor and the General Assembly a sixth interim report within the first week of the convening of the 2001 General Assembly, 2002 Regular Session, and a seventh interim report within the first week of the convening of the 2003 General Assembly. Notwithstanding Section 11.57 of S.L. 1999-237, the Task Force shall submit a final report by June 30, 2003, and, upon submission of its final report to the Governor and the General Assembly, the Task Force shall expire.

NEWBORN HEARING SCREENING PROGRAM REPORT

SECTION 21.96. The Department of Health and Human Services shall report the following information on the newborn hearing screening program:

- (1) Unduplicated number of infants screened.
- (2) Number of infants who failed the second hearing screening.
- (3) Number of infants receiving the diagnostic evaluation.
- (4) Number and types of services provided.
- (5) Number and types of follow-up services provided to children.

The Department shall submit the report not later than May 1, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

INTENSIVE HOME VISITING

SECTION 21.97.(a) The Department of Health and Human Services, Division of Public Health, shall not contract for evaluation, technical assistance, or any other activity for the Intensive Home Visiting Program during the 2001-2002 fiscal year. The Division shall continue to collect and manage data collected by nurses and visitors on program activities. The Division shall collect the necessary information on participants to allow future tracking of these participants and facilitate a future longitudinal study for the purposes of determining program effectiveness.

SECTION 21.97.(b) The Division shall require in-home visitors to collect data on program participants as a condition of participation. This requirement shall include six-month periodic assessments and completion of the questionnaires. The Department shall ensure that the collection, maintenance, use, and disclosure of data complies with applicable State and federal law protecting privacy of health and other individual information. By April 1, 2002, the Division shall report to the Senate Appropriations Committee on Health and Human Services and the House of Representatives Appropriations Subcommittee on Health and Human Services on the following items:

- (1) Number of clients/families enrolled per county.
- (2) Attrition and reasons why families leave the program.
- (3) Average number of home visits per month.
- (4) Average time involved per home visit.
- (5) Baseline family characteristics.
- (6) Health behaviors.
- (7) Perinatal and birth outcomes.
- (8) Other relevant outcome information.

All program information shall include the identification of the model used in order to compare these models in the future.

ACCESS TO ORAL HEALTH CARE

SECTION 21.98. Of the funds appropriated in this act to the Department of Health and Human Services, Division of Medical Assistance, the sum of seven million five hundred thousand dollars (\$7,500,000) for the 2001-2002 fiscal year and the sum of seven million five hundred thousand dollars (\$7,500,000) for the 2002-2003 fiscal year shall be used to provide enhanced reimbursement to dentists whose practice consists of a significant number of Medicaid-eligible children or Medicaid-eligible elderly or disabled adults, or who provide outreach services to underserved Medicaid-eligible populations as follows:

- (1) Dentists who can demonstrate one or more of the following shall be reimbursed at one hundred percent (100%) of the eightieth percentile of charges as determined by the National Dental Advisory Service (NDAS) for Medicaid-covered services:
 - a. An increase in Medicaid-covered dental services provided by the dentist to Medicaid-eligible children or Medicaid-eligible adults as of fiscal year 2000-2001 as compared to the average of the Medicaid services provided by that dentist during fiscal years 1998-99 and 1999-2000.
 - b. The number of Medicaid-eligible children or Medicaid-eligible adult patients served by the dentist during fiscal year 2000-2001 is at least 20.
 - c. Dental services are provided to indigent persons or Medicaid-eligible patients who are residents, inmates, or clients of an adult care home, hospital long-term care unit, a State facility listed in G.S. 122C-181, a State correctional facility, a local health department, a nonprofit community health center, a school-based health center, or an indigent health care clinic, regardless of the number of Medicaid patients served in previous fiscal years.
 - d. The dentist continuously utilizes a system of care coordination for Medicaid-eligible patients. The dentist must demonstrate that the care coordination system is effective in educating and assisting Medicaid-eligible patients to engage in preventive oral health care and to keep dental appointments. The care coordination may be a function of the dentist's internal operations or may be provided through a contract provider.
- (2) Medicaid-covered services provided by a dentist to Medicaid-eligible children or Medicaid-eligible elderly or disabled adults from a mobile dental unit in any of the locations listed in sub-subdivision (1)c. of this subsection shall be reimbursed at one hundred percent (100%) of the eighty-fifth percentile of charges as determined by the National Dental Advisory Service (NDAS).

DHHS FACILITY SERVICES FEES

SECTION 35.5.(a) G.S. 131D-2(b)(1) reads as rewritten:

"(b) Licensure; inspections. -

(1) The Department of Health and Human Services shall inspect and license, under rules adopted by the Medical Care Commission, all adult care homes for persons who are aged or mentally or physically disabled except those exempt in subsection (c) of this section. Licenses issued under the authority of this section shall be valid for one year from the date of issuance unless revoked earlier by the Secretary for failure to comply with any part of this section or any rules adopted hereunder adult care. Licenses shall be renewed annually upon filing and the Department's approval of the renewal application. The Department shall charge the adult care home a nonrefundable annual license fee in the amount of ten dollars (\$10.00) per licensed bed. A license shall not be renewed if outstanding fines and penalties imposed by the State against the home have not been paid. Fines and penalties for which an appeal is pending are exempt from consideration. The renewal application shall contain all necessary and reasonable information that the Department may by rule require. Except as otherwise provided in this subdivision, the Department may amend a license by reducing it from a full license to a provisional license for a period of not more than 90 days whenever the Department finds that:

- a. The licensee has substantially failed to comply with the provisions of Articles 1 and 3 of Chapter 131D of the General Statutes and the rules adopted pursuant to these Articles;
- b. There is a reasonable probability that the licensee can remedy the licensure deficiencies within a reasonable length of time; and
- c. There is a reasonable probability that the licensee will be able thereafter to remain in compliance with the licensure rules for the foreseeable future.

The Department may extend a provisional license for not more than one additional 90-day period upon finding that the licensee has made substantial progress toward remedying the licensure deficiencies that caused the license to be reduced to provisional status.

The Department may revoke a license whenever:

- a. The Department finds that:
 - 1. The licensee has substantially failed to comply with the provisions of Articles 1 and 3 of Chapter 131D of the General Statutes and the rules adopted pursuant to these Articles; and
 - 2. It is not reasonably probable that the licensee can remedy the licensure deficiencies within a reasonable length of time; or
- b. The Department finds that:
 - 1. The licensee has substantially failed to comply with the provisions of Articles 1 and 3 of Chapter 131D of the General Statutes and the rules adopted pursuant to these Articles; and

Creech

All New Fees

2. Although the licensee may be able to remedy the deficiencies within a reasonable time, it is not reasonably probable that the licensee will be able to remain in compliance with licensure rules for the foreseeable future; or
- c. The Department finds that the licensee has failed to comply with the provisions of Articles 1 and 3 of Chapter 131D of the General Statutes and the rules adopted pursuant to these Articles, and the failure to comply endangered the health, safety, or welfare of the patients in the facility.

The Department may also issue a provisional license to a facility, pursuant to rules adopted by the Medical Care Commission, for substantial failure to comply with the provisions of this section or rules adopted pursuant to this section. Any facility wishing to contest the issuance of a provisional license shall be entitled to an administrative hearing as provided in the Administrative Procedure Act, Chapter 150B of the General Statutes. A petition for a contested case shall be filed within 30 days after the Department mails written notice of the issuance of the provisional license."

SECTION 35.5.(b) G.S. 131E-77(d) reads as rewritten:

"(d) Upon receipt of an application for a license, the Department shall issue a license if it finds that the applicant complies with the provisions of this Article and the rules of the Commission. The Department shall renew each license in accordance with the rules of the Commission. The Department shall charge the applicant a nonrefundable annual license fee in the amount of ten dollars (\$10.00) per licensed bed."

SECTION 35.5.(c) G.S. 131E-102(b) reads as rewritten:

"(b) Applications shall be available from the Department, and each application filed with the Department shall contain all necessary and reasonable information that the Department may by rule require. A license shall be granted to the applicant upon a determination by the Department that the applicant has complied with the provisions of this Part and the rules promulgated under this Part. The Department shall charge the applicant a nonrefundable annual license fee in the amount of ten dollars (\$10.00) per licensed bed."

SECTION 35.5.(d) G.S. 131E-138(c) reads as rewritten:

"(c) An application for a license shall be available from the Department, and each application filed with the Department shall contain all information requested by the Department. A license shall be granted to the applicant upon a determination by the Department that the applicant has complied with the provisions of this Part and the rules promulgated by the Commission under this Part. The Department shall charge the applicant a nonrefundable annual license fee in the amount of one hundred dollars (\$100.00)."

SECTION 35.5.(e) G.S. 131E-147(b) reads as rewritten:

"(b) Applications shall be available from the Department, and each application filed with the Department shall contain all necessary and reasonable information that the Department may by rule require. A license shall be granted to the applicant upon a determination by the Department that the applicant has complied with the provisions of this Part and the rules promulgated by the Commission under this Part. The Department shall charge the applicant a nonrefundable annual license fee in the amount of ten dollars (\$10.00) per licensed bed."

SECTION 35.5.(f) G.S. 131E-167(a) reads as rewritten:

"(a) Applications for certification shall be available from the Department, and each application filed with the Department shall contain all necessary and reasonable information that the Department may by rule require. A certificate shall be granted to the applicant for a period not to exceed two years upon a determination by the Department that the applicant has substantially complied with the provisions of this Article and the rules promulgated by the Department under this Article. The Department shall charge the applicant a nonrefundable annual certification fee in the amount of four hundred dollars (\$400.00)."

SECTION 35.5.(g) G.S. 131E-202(b) reads as rewritten:

"(b) The Department shall provide applications for hospice licensure. Each application filed with the Department shall contain all information requested therein. A license shall be granted to the applicant upon determination by the Department that the applicant has complied with the provisions of this Article and with the rules adopted by the Commission thereunder. Each license shall be issued only for the premises and persons named therein, shall not be transferable or assignable except with the written approval of the Department, and shall be posted in a conspicuous place on the licensed premises. The Department shall charge the applicant a nonrefundable annual license fee in the amount of ten dollars (\$10.00) per licensed bed."

SECTION 35.5.(h) G.S. 14-45.1(a) reads as rewritten:

"(a) Notwithstanding any of the provisions of G.S. 14-44 and 14-45, it shall not be unlawful, during the first 20 weeks of a woman's pregnancy, to advise, procure, or cause a miscarriage or abortion when the procedure is performed by a physician licensed to practice medicine in North Carolina in a hospital or clinic certified by the Department of Health and Human Services to be a suitable facility for the performance of abortions. The Department of Health and Human Services shall charge the facility a nonrefundable annual certification fee in the amount of four hundred dollars (\$400.00)."

SECTION 35.5.(i) Part A of Article 6 of Chapter 131E of the General Statutes is amended by adding the following new section to read:

"§ 131E-115. Annual fee for licensure of skilled nursing beds in continuing care retirement communities.

The Department of Health and Human Services shall charge continuing care retirement communities licensed pursuant to Article 64 of Chapter 58 of the General Statutes a nonrefundable annual licensure fee in the amount of ten dollars (\$10.00) per licensed skilled nursing bed."

SECTION 35.5.(j) Article 1 of Chapter 131D of the General Statutes is amended by adding the following new section to read:

"§ 131D-10. Annual fee for licensure of adult care home beds in continuing care retirement communities.

The Department shall charge continuing care retirement communities licensed pursuant to Article 64 of Chapter 58 of the General Statutes a nonrefundable annual licensure fee in the amount of ten dollars (\$10.00) per licensed adult care home bed."

SECTION 35.5.(k) G.S. 122C-23 is amended by adding the following new subsection to read:

"(h) The Secretary shall charge all facilities licensed under this Chapter that have licensed beds a nonrefundable annual licensure fee in the amount of ten dollars (\$10.00) per licensed bed."

SECTION 35.5.(l) This section becomes effective October 1, 2001.

Revised

PART V. BLOCK GRANTS

Requested by: Senators Martin of Guilford, Plyler, Odom, Lee
DHHS BLOCK GRANTS

SECTION 5.1.(a) Appropriations from federal block grant funds are made for the fiscal year ending June 30, 2002, according to the following schedule:

08.	Administrative Costs	108,546
TOTAL PREVENTIVE HEALTH SERVICES BLOCK GRANT		\$5,040,057

SECTION 5.1.(b) Decreases in Federal Fund Availability. – If the United States Congress reduces federal fund availability in the Social Services Block Grant below the amounts appropriated in this section, then the Department of Health and Human Services shall allocate these decreases giving priority first to those direct services mandated by State or federal law, then to those programs providing direct services that have demonstrated effectiveness in meeting the federally and State-mandated services goals established for the Social Services Block Grant. The Department shall not include transfers from TANF for specified purposes in any calculations of reductions to the Social Services Block Grant.

If the United States Congress reduces the amount of TANF funds below the amounts appropriated in this section after the effective date of this act, then the Department shall allocate the decrease in funds after considering any underutilization of the budget and the effectiveness of the current level of services. Any TANF Block Grant fund changes shall be reported to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

Decreases in federal fund availability shall be allocated for the Maternal and Child Health and Preventive Health Services federal block grants by the Department of Health and Human Services after considering the effectiveness of the current level of services.

SECTION 5.1.(c) Increases in Federal Fund Availability. – Any block grant funds appropriated by the United States Congress in addition to the funds specified in this act shall be expended by the Department of Health and Human Services, with the approval of the Office of State Budget and Management, provided the resultant increases are in accordance with federal block grant requirements and are within the scope of the block grant plan approved by the General Assembly.

SECTION 5.1.(d) Changes to the budgeted allocations to the block grants appropriated in this act shall be reported immediately to the Senate Appropriations Committee on Health and Human Services, the House of Representatives

Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

SECTION 5.1.(e) Limitations on Preventive Health Services Block Grant Funds. – Twenty-five percent (25%) of funds allocated for Rape Prevention and Rape Education shall be allocated as grants to nonprofit organizations to provide rape prevention and education programs targeted for middle, junior high, and high school students.

If federal funds are received under the Maternal and Child Health Block Grant for abstinence education, pursuant to section 912 of Public Law 104-193 (42 U.S.C. § 710), for the 2001-2002 fiscal year, then those funds shall be transferred to the State Board of Education to be administered by the Department of Public Instruction. The Department of Public Instruction shall use the funds to establish an Abstinence Until Marriage Education Program and shall delegate to one or more persons the responsibility of implementing the program and G.S. 115C-81(e1)(4). The Department of Public Instruction shall carefully and strictly follow federal guidelines in implementing and administering the abstinence education grant funds.

SECTION 5.1.(f) The Department of Health and Human Services, Division of Social Services, shall do the following:

- (1) Continue the current evaluation of the Work First Program to assess former recipients' earnings, barriers to advancement to economic self-sufficiency, utilization of community support services, and other longitudinal employment data. Assessment periods shall include six and 18 months following closure of the case.
- (2) Continue the current evaluation of the Work First Program to profile the State's child-only caseload to include indicators of economic and social well-being, academic and behavioral performance, demographic data, description of living arrangements including length of placement out of the home, social and other human services provided to families, and other information needed to assess the needs of the child-only Work First Family Assistance clients and families.
- (3) Continue the current evaluation to profile clients and families exempted from federal and State work participation requirements. The evaluation shall include an assessment of the client and family needs including why clients and families have been exempted.

The Department of Health and Human Services shall make a report on its progress in complying with this subsection to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division no later than September 30, 2001, and shall make a final report no later than September 30, 2002.

SECTION 5.1.(g) The sum of two million eight hundred eleven thousand six hundred eighty-seven dollars (\$2,811,687) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services, Special Children Adoption Fund, for the 2001-2002 fiscal year shall be used to implement this subsection. The Division of Social Services, in consultation with the North Carolina Association of County Directors of Social Services and representatives of licensed private adoption agencies, shall develop guidelines for the awarding of funds to licensed public and private adoption agencies upon the adoption of children described in G.S. 108A-50 and in foster care. Payments received from the Special Children Adoption Fund by participating agencies shall be used exclusively to enhance the adoption services program. No local match shall be required as a condition for receipt of these funds.

SECTION 5.1.(h) The sum of one million five hundred thousand dollars (\$1,500,000) appropriated in this act in the TANF Block Grant and transferred to the

Social Services Block Grant to the Department of Health and Human Services, Division of Social Services, for child caring agencies for the 2001-2002 fiscal year shall be allocated to the State Private Child Caring Agencies Fund. These funds shall be combined with all other funds allocated to the State Private Child Caring Agencies Fund for the reimbursement of the State's portion of the cost of care for the placement of certain children by the county departments of social services who are not eligible for federal IV-E funds. These funds shall not be used to match other federal funds.

SECTION 5.1.(i) The sum of two million dollars (\$2,000,000) appropriated in this act in the TANF Block Grant to the Department of Health and Human Services, Division of Social Services, for the 2001-2002 fiscal year for the Intensive Family Preservation Services (IFPS) Program shall be used by the Division in accordance with the provisions of this subsection.

The Department of Health and Human Services shall review the Intensive Family Preservation Services Program to enhance and implement initiatives which focus on increasing the sustainability and effectiveness of the Program.

The Department of Health and Human Services shall require that any program or entity that receives State, federal, or other funding for the purpose of Intensive Family Preservation Services shall provide the following information on an annual basis:

- (1) An established follow-up system with a minimum of 12 months of follow-up services.
- (2) Detailed information on the specific interventions applied including utilization indicators and performance measurement.
- (3) Cost-benefit data.
- (4) Data on long-term benefits associated with Intensive Family Preservation Services. This data shall be obtained by tracking families through the intervention process.
- (5) The number of families remaining intact due to associated interventions beyond 12 months.
- (6) The number and percentage of minority race children who received Intensive Family Preservation Services at a ratio essentially equivalent to the ratio of their distribution in the general population exposed to Child Protective Services involvement based on the CPS risk ratings.

The Department shall establish performance-based funding protocol and shall only provide funding to those counties providing the required information specified in subsection (b) of this section. The amount of funding shall be based on the individual performance of each program.

The Department of Health and Human Services shall prepare an interim report to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division on the implementation of these changes by January 1, 2002, and shall provide a final report no later than May 30, 2002.

SECTION 5.1.(j) The sum of three hundred thousand dollars (\$300,000) appropriated in this section to the Department of Health and Human Services in the Child Care and Development Fund Block Grant shall be used to develop and implement a Medical Child Care Pilot.

SECTION 5.1.(k) The sum of one million dollars (\$1,000,000) appropriated in this section to the Department of Health and Human Services in the TANF Block Grant for Boys and Girls Clubs shall be used to make grants for approved programs. The Department of Health and Human Services, in accordance with federal regulations for the use of TANF Block Grant funds, shall administer a grant program to award funds to the Boys and Girls Clubs across the State in order to implement programs that improve the motivation, performance, and self-esteem of youths and to implement other initiatives that would be expected to reduce school dropout and teen pregnancy rates.

69
#91

The Department shall encourage and facilitate collaboration between the Boys and Girls Clubs and Support Our Students, Communities in Schools, and similar programs to submit joint applications for the funds if appropriate. The Department shall report on its progress in complying with this subsection to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division no later than April 1, 2002.

SECTION 5.1.(l) Payment for subsidized child care services provided with federal TANF funds shall comply with all regulations and policies issued by the Division of Child Development for the subsidized child care program.

SECTION 5.1.(m) The sum of three million dollars (\$3,000,000) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services, Division of Social Services, for the Work First Housing Initiative shall be used to expand direct housing support to Work First clients and families. Direct housing support includes using funds for rental assistance, loans, moving expenses, and other financial assistance. No more than ten percent (10%) of these funds may be used for administration. These funds may be used for counseling or similar services only if it is demonstrated that those services are not otherwise available in the community.

SECTION 5.1.(n) The sum of five hundred thousand dollars (\$500,000) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services, Division of Social Services, for the 2001-2002 fiscal year shall be used to support administration of TANF-funded programs.

SECTION 5.1.(o) The sum of five million dollars (\$5,000,000) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services, Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, for the 2001-2002 fiscal year shall be used to provide regional residential substance abuse treatment and services for women with children. The Department of Health and Human Services, the Division of Social Services, and the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, in consultation with local departments of social services, area mental health programs, and other State and local agencies or organizations, shall coordinate this effort in order to facilitate the expansion of regionally based substance abuse services for women with children. These services shall be culturally appropriate and designed for the unique needs of TANF women with children.

In order to expedite the expansion of these services, the Secretary of the Department of Health and Human Services may enter into contracts with service providers.

The Department of Health and Human Services, the Division of Social Services, and the Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, shall report on their progress in complying with this subsection no later than October 1, 2001, and March 1, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division. These reports shall include all of the following:

- (1) The number and location of additional beds created.
- (2) The types of facilities established.
- (3) The delineation of roles and responsibilities at the State and local levels.
- (4) Demographics of the women served, the number of women served, and the cost per client.
- (5) Demographics of the children served, the number of children served, and the services provided.
- (6) Job placement services provided to women.

- (7) A plan for follow-up and evaluation of services provided with an emphasis on outcomes.
- (8) Barriers identified to the successful implementation of the expansion.
- (9) Identification of other resources needed to appropriately and efficiently provide services to Work First recipients.
- (10) Other information as requested.

SECTION 5.1.(p) The sum of two million seven hundred fifty thousand six hundred seventy-four dollars (\$2,750,674) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services and transferred to the Department of Juvenile Justice and Delinquency Prevention for the 2001-2002 fiscal year shall be used to support the existing Support Our Students Program and to expand the Program statewide, focusing on low-income communities in unserved areas. These funds shall not be used for administration of the program.

SECTION 5.1.(q) The sum of two million dollars (\$2,000,000) appropriated under this section in the TANF Block Grant to the Department of Health and Human Services, Division of Social Services, for the 2001-2002 fiscal year shall be used to provide domestic violence services to Work First recipients. The Division of Social Services, in consultation with the Council for Women and local departments of social services, shall develop and implement a mechanism by which these funds may be used to facilitate delivery of domestic violence counseling, support, and other direct services to clients. These funds shall not be used to establish new domestic violence shelters, for State administration, or to facilitate lobbying efforts. The Department of Health and Human Services and the Council for Women shall report on the uses of these funds no later than February 1, 2002, to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division.

SECTION 5.1.(r) The sum of two million two hundred thirty-nine thousand two hundred sixty-one dollars (\$2,239,261) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services, Division of Public Health, for the 2001-2002 fiscal year for adolescent pregnancy prevention shall be used in accordance with this subsection.

The Department of Health and Human Services shall administer the adolescent pregnancy prevention programs and the adolescent parenting programs pursuant to the provisions of this subsection.

The programs shall include primary prevention efforts, secondary prevention efforts, and special initiatives.

The Commission for Health Services may adopt rules necessary to implement the programs.

State-level administrative costs for programs shall not exceed ten percent (10%) of the total funds.

In awarding grants, the Department of Health and Human Services shall target counties with the highest teen pregnancy rates, increasingly higher rates, high rates within demographic subgroups, or greatest need for parenting programs. Grants will be awarded on an annual basis.

Programs are not required to provide a cash match for these funds; however, the Department may require an in-kind match.

Local adolescent pregnancy prevention councils are encouraged but not required for program funding. State funds shall not be used for these activities.

The Department shall maintain the adolescent pregnancy prevention and adolescent parenting program database created for the program via contract and shall not continue to contract for database management, development, or analysis. Of the funds appropriated to the Department in this act, the Department shall not spend more than twenty-five thousand dollars (\$25,000) to transition the database from the contractor to the Department. The Department shall continue to collect and manage

program data in order to conduct longitudinal studies in the future. Notwithstanding any other provision of law, the Department shall not continue to have the behavioral/attitudinal evaluation completed annually for all programs.

Of funds appropriated to the Department of Health and Human Services, the Department shall not spend more than twenty-five thousand dollars (\$25,000) to complete the longitudinal adolescent parenting program evaluation. The Department shall not contract for additional evaluations or assessments of the adolescent pregnancy prevention program or the adolescent parenting program during the 2001-2002 fiscal year.

The Department of Health and Human Services shall plan an outcome-based evaluation of the adolescent pregnancy prevention programs. In doing so, the Department shall address how to properly evaluate all programs and may issue a request for proposals to select an organization that has expertise in this area to assist with this evaluation.

The Department shall report on activities conducted pursuant to this subsection to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Appropriations Subcommittee on Health and Human Services, and the Fiscal Research Division by March 1, 2002.

SECTION 5.1.(s) The sum of two million dollars (\$2,000,000) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services, Division of Social Services, shall be used to expand after-school programs and services for at-risk children. The Department shall develop and implement a grant program to award grants to community-based programs that demonstrate the ability to reach children at risk of teen pregnancy and school dropout. The Department shall award grants to community-based organizations that demonstrate the ability to develop and implement linkages with local departments of social services, area mental health programs, schools, and other human services programs in order to provide support services and assistance to the child and family. These funds may be used to establish one position within the Division of Social Services to coordinate at-risk after-school programs and shall not be used for other State administration. The Department shall report no later than March 1, 2002, on its progress in complying with this section to the Senate Appropriations Committee on Health and Human Services, the House of Representatives Subcommittee on Health and Human Services, and the Fiscal Research Division.

SECTION 5.1.(t) The sum of seven million two hundred sixty thousand dollars (\$7,260,000) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services, Division of Social Services, for the 2001-2002 fiscal year for Child Welfare Improvements shall be allocated to the county departments of social services for hiring or contracting additional staff on or after July 1, 2001, to investigate and provide services in Child Protective Services cases; to provide foster care and support services; to recruit, train, license, and support prospective foster and adoptive families; and to provide interstate and post-adoption services for eligible families.

SECTION 5.1.(u) The sum of one million five hundred thousand dollars (\$1,500,000) appropriated in this section in the Mental Health Block Grant to the Department of Health and Human Services, Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, for the 2001-2002 fiscal year and the sum of one million dollars (\$1,000,000) appropriated in this section in the Substance Abuse Prevention and Treatment Block Grant to the Department of Health and Human Services, Division of Mental Health, Developmental Disabilities, and Substance Abuse Services, for the 2001-2002 fiscal year shall be used to continue a Comprehensive Treatment Services Program in accordance with Section 21.60 of this act.

SECTION 5.1.(v) The sum of two million dollars (\$2,000,000) appropriated in this section in the TANF Block Grant to the Department of Health and Human

Services, Division of Social Services, for fiscal year 2001-2002 shall be used to support various child welfare training projects as follows:

- (1) The sum of three hundred fifty thousand dollars (\$350,000) shall be used to establish a regional training center in southeastern North Carolina.
- (2) The sum of seven hundred fifty thousand dollars (\$750,000) shall be used to support the Masters Degree in Social Work/Baccalaureate Degree in Social Work Collaborative.
- (3) The sum of one hundred eighty thousand dollars (\$180,000) to provide training for residential child care facilities.
- (4) The sum of seven hundred twenty thousand dollars (\$720,000) to provide for various other child welfare training initiatives.

Requested by: Senators Martin of Pitt, Weinstein, Plyler, Odom, Lee

NER BLOCK GRANT FUNDS

SECTION 5.2.(a) Appropriations from federal block grant funds are made for the fiscal year ending June 30, 2002, according to the following schedule:

COMMUNITY DEVELOPMENT BLOCK GRANT

01.	State Administration	\$1,000,000
02.	Urgent Needs and Contingency	1,000,000
03.	Scattered Site Housing	13,200,000
04.	Economic Development	8,710,000
05.	Community Revitalization	13,500,000
06.	State Technical Assistance	450,000
07.	Housing Development	2,000,000
08.	Infrastructure	5,140,000

TOTAL COMMUNITY DEVELOPMENT BLOCK GRANT - 2002 Program Year \$45,000,000

SECTION 5.2.(b) Decreases in Federal Fund Availability. – Decreases in federal fund availability for the Community Development Block Grants. – If federal funds are reduced below the amounts specified above after the effective date of this act, then every program in each of these federal block grants shall be reduced by the same percentage as the reduction in federal funds.

SECTION 5.2.(c) Increases in Federal Fund Availability for Community Development Block Grant. – Any block grant funds appropriated by the Congress of the United States in addition to the funds specified in this section shall be expended as follows: Each program category under the Community Development Block Grant shall be increased by the same percentage as the increase in federal funds.

SECTION 5.2.(d) Limitations on Community Development Block Grant Funds. – Of the funds appropriated in this section for the Community Development Block Grant, the following shall be allocated in each category for each program year: up to one million dollars (\$1,000,000) may be used for State administration; up to one million dollars (\$1,000,000) may be used for Urgent Needs and Contingency; up to

Committee Discussion

**JOINT APPROPRIATIONS SUBCOMMITTEE ON
HEALTH AND HUMAN SERVICES**

February 27, 2002, 10:00 a.m.
Room 643 LOB
Minutes

The Joint Appropriations Subcommittee on Health and Human Services met Wednesday, February 27, 2002 at 10:00 a.m. in Room 643 of the Legislative Office Building. The presiding Chair, Senator Bill Martin called the meeting to order with eleven members present. He stated that the purpose of this meeting is to discuss issues relating to Medicaid and other critical issues the committee will be dealing with and to get some insight and overview as to where we are going; what the Department is thinking and what type of circumstances we can expect to deal with during the upcoming Session. The freeze of the CAP Program is one of the issues impacted the decision to meeting before the Interim. The funds are not available to life the freeze, however there are other issues, relative to the shortfall, which require our attention. He said that realistically, it is not a pretty picture. It appears that there will be little success in terms of increased revenue, which means more than likely there will be more cuts. Realistically the burden tends to fall in the area of Health and Human Services.

Senator Martin stated that the leadership of both Chambers agreed that the Appropriation Subcommittees would begin meeting the middle of April for one to one and one half days weekly until the beginning of the Short Session. This will enable the development of a proposed budget bill, which originates in the Senate, and having it ready very soon after the beginning of the Session.

The Chair stated that every effort will be made to hear comments from the public and recognized Charles Peruse, Deputy State Budget Officer, State Budget Office, to give an update/overview of the state budget. Charles spoke from the attached handout (Attachment #1), Office of State Budget and Management, Update on Budget Shortfall for the Fiscal Year of 2000-2001. The anticipated shortfall may exceed \$900 million. He gave a brief update as to how we got where we are for Fiscal Year 01-02 as well as outlined the options that the Governor has put in place to ensure a balanced budget for the year ending June 30, 2002. He stated that it is important to understand that when the General Assembly passed the budget last September and at the time of the signing by the Governor, it was balanced. The project shortfall for FY 01-02 mainly stems from a downturn of the economy and shortfalls seen in our revenue projections and what is actually being collected. He stated that the Governor declared an emergency on February 1, 2002 by executive order ensured that we would have a balanced budget for this fiscal year.

The Governor's plan outlines \$1.3 billion in funds that could be used to help balance the budget for this Fiscal Year. He reviewed the listed items affected to arrive at the \$1.3 billion. The "Rainy Day" fund proposed to be used for the shortfall would deplete the entire savings reserve account for the state.

During committee discussion, the following points were raised. Regarding the last resort efforts, want other items, other than the Mental Health Trust Fund and the local revenue sharing, would be treated as a last resort.

The Governor specifically referred to the Local Government Revenue Sharing and the Mental Health Trust Fund. The other items are not listed in any priority order, but it is anticipated that some or all of the listed options may be utilized to ensure a balanced budget at the end of the year.

What would be the impact on the Health and Human Services Budget in terms of the Governor's proposals. For example, the way things are looking now in terms of agency reversions, what would be the impact on Health and Human Services for #5, as well as in terms of the special and trust funds.

The agency reversions for the Department of Health and Humans Services, Medicaid have been put to the side and more will be said about that later. As far as the other budgets and pieces of the Health and Human Services area, at this point the reversion target for this Fiscal Year totals 6 ½ percent which equates to approximately \$92 million in reversions for the Department. Charles stated that he would get the list of special and trust funds to the Committee.

Regarding #7, HIPA, in terms of federal consequences, what will be the impact of not moving forward as planned. The HIPA program is required to provide a report due at the end of February, which will outline the implementation plan for ensuring that the federal regulations are met. Specifically a cash flow analysis in implementing HIPA will be included in the report.

Is it misleading to say that the classrooms are held harmless and would it better to take an upfront look at education rather than put such a burden on Health and Human Services.

The Governor has reiterated his support of and request that the report of the county commissioners in not harming the classrooms this fiscal year. The education agencies are contributing to the \$356 million reversion plan. The University System is contributing approximately \$65 million, Community College System \$19 million and Public School System \$60 million to the shortfall.

In a short explanation/definition of the rate change, Charles stated that the Highway Trust Fund transfers \$170 million to the General Fund. For the past twelve years, those dollars have remained stagnate. This year the General assembly put some inflationary adjustments for that transfer. Looking at that \$170 million and what inflation has been over the last twelve years that equated to the \$80 million transfer. The inflationary adjustment was implemented this biennium by the General Assembly.

There were several things outside the list that were discussed. The non-profit agencies are also subject to similar reversion targets. There was no easy decision, currently the disaster relief fund has approximately \$362 million that is potentially available and the Governor is hopeful that those funds will remain in place.

Secretary Hooker Odom was recognized to lead the discussion of the Department of Health and Human Services. She gave a general overview. She stated that we are facing enormous challenges and it is an extremely painful task. She assured the Committee that every possible option that the Department has control over is being thoroughly analyzed and reviewed in an effort to meet the Medicaid budget shortfall. Nothing will be taken off the table before it is thoroughly analyzed. She also pledged to work to closely with the General Assembly to protect vital services so that no harm will come to the people that are being served. The non-Medicaid portion of the budget was given a seven per cent reduction. The reversion target is \$92 million, which does not include critical internal needs of the Department.

During committee discussion, the following issues were noted.

- The total target for this year includes \$77 million, Medicaid; \$92 million, non-Medicaid; \$36 million, internal critical needs. There will be an additional target of the non-Medicaid portion of the budget over and above what is being done this year.
- There is a possibility that some federal short assistance to the State on Medicaid will be coming forth. This will not be the long-term solution to the Medicaid situation.
- Regarding faith-based alternatives there are very strong programs, both in the Social Services Division and the Public Health Division, that are yielding very positive results. That commitment will continue.
- *Carol Shaw will provide the committee with the number of states that share the responsibility with the local counties or actually require county participation.*

Deputy Secretary Lanier Cansler came before the committee to give a budget overview. She spoke from Attachment #2, NC Health and Human Services Budget Overview. After a brief summary of the Health Choice program, he stated that it is not the intent of the department to cap that program. The size as well as related services will be reduced by 8.5%; another \$37 million will need to be located to meet internal needs. Total expenditures will need to be reduced by approximately 12%.

One example of the many items being reviewed during this process is the vital records section. This section will be reviewed to develop ways to become more efficient and effective. He stated that as the department moves forward, the possibility of eliminating and reducing some long-standing programs. The department is reviewing contracts and contractors as well as the contract process. A centralized contract process is being established. He concluded his presentation by re-emphasizing the Secretary's statement that every possible option will be thoroughly reviewed. He stated that the health care system of the state is somewhat delicate and if this is not carefully dealt with, it could be disruptive.

Although there are no easy decisions, three options are:

1. To get the Federal Government to pay a larger piece of the bill. This can be done several ways. One is to increase the federal match.
2. The General Assembly makes the decision to find ways to provide funds.
3. Change services and eligibility requirements – mandatory and optional.

The Chair thanked Deputy Secretary Cansler and stated that this type of information is what needs to be brought forth and put on the table.

The Chair stated that even if new monies are not available, elimination of services and adjustments in terms of eligibles will have to be made and requested more detail information spelling what happens if this is done for each specified service and eligible.

Nina Yeager, Division of Medicaid, was recognized to provide more detail information regarding the forecast. She spoke from the attached handout. She reviewed what has been done this year to contain the program. Many of the containment actions now under way were directed by the General Assembly. She also reviewed items being considered. She said that the Division is in the process of contracting with actuarial firm for assistance in deciding how to modify the payment basis for a number of programs. To

date, no decisions have been made. No promises are made for the savings that will be achieved. She stated that the Division of Medicaid is very busy, working hard to provide alternatives that keep the provider community, who help make the Medicaid program as successful as it is, viable. Growth rate and the cost of the program are also being explored. It is not the intent of the Department, in any of these efforts, to limit patient access to care or quality care.

Alan Gamble, Division of Medical Assistance, stated that they are working with the provider community when there is a change in the method of payment. One opportunity is instead of having cost drive the budget of the Medicaid program, is to give an incentive to providers that provide appropriate care in an efficient method, to profit better than under the current system. Quality care and provider involvement must be assured.

The following areas, they are being reviewed thoroughly, and recommendations will be given during the Short Session.

- Prior approval for expensive tests
- Control Emergency Room Visits
- Over the Counter Drugs
- Step Therapy treatment

The impact of prior authorization, on patients as well as doctors, in other states is being researched and will be provided to the committee at the next meeting.

During the next meeting, the Division will give an update on how to obtain input from consumers and how to measure the quality of care to ensure that care is not compromised in an effort to save money. In the case of the pharmacy program, an evaluation of the prior approval program, which is scheduled for implementation in March, will be done to determine the cost effectiveness and whether it interferes with the quality of care. The University of North Carolina-Chapel Hill will be assisting with that evaluation.

The Division has met with drug companies individually and with two exceptions, the meetings have not had to do with particular proposals from them. Hopefully, in the weeks ahead proposals from the drug companies will be received. There are two proposals submitted, one verbally and a request has been made for the proposal in writing. The other proposal is one that should be considered in light of some other management tools; it involves the use of over the counter drugs. That decision needs to be made on a wholesale basis rather than on that proposal alone. Nina stated that they are in the process of sorting how to best handle those proposals with some other tools being used.

The committee request the following information regarding the contracts for hospital services, in terms of determining that there will be a minimal impact upon the hospitals, is there an estimate as to what percentage of the hospitals would be involved under the contract and as for those that would not be involved would there be impact upon those.

The Division is looking at another way to reimburse hospitals rather than the current cost-base operation. Nina stated that they are working to develop alternatives that would provide information regarding the impact on hospitals if a particular plan of action is put in place.

Alan Gamble stated that there is no intent to select one particular hospital in a county or area to provide services. Efforts are underway to work with the hospital community, and there is nothing binding, to develop a different more efficient way of getting money to them. It could possibly be a change in rate process rather than a contract with Medicaid. There is no desire to decrease the number of participating hospitals, the goal is to decrease the cost of doing business with Medicaid.

The committee requested the assumptions used in the five year forecast.

Nina Yeager continued her presentation from the handout, Community Alternative Programs for Disabled Adults (CAP/DA program). This is a waiver program that provides a package of services for disabled adults including the non-traditional medical care services. The program is statewide and serves approximately 13,000 persons and the purpose is to provide care in the home as an alternative to nursing care. It is a less costly program than the nursing facility. She stated that the certified budget for this year was \$187,000 lower than what was spent last year. She reviewed the expenditure history of the program; this year's certified budget and the certified budget for 2003. With great regret, a freeze on the program was instituted in September, and the number of persons served at that time was approximately 9,500. As of January 2002, there are approximately 1,000 fewer persons being served by the program. However the cost continues to be over budget. There is not a commiserate reduction in spending.

The CAP MR/DD program was implemented in 1983 and is also operated by waiver. It is an effort to keep persons who might be in intermediate care facilities in their homes with the idea that they can be served at a lower cost. The expenditure history is included in the handout. The freeze is expected to continue.

The committee expressed concern regarding the variation in services throughout the state. Nina stated that wide variation is seen, however there is no tool to evaluate a person's level of care need in the case of community care. Therefore it is hard to determine if the variation is a product of a person's need or if it is an overly generous plan of care that is being provided. The Division is exploring ways to better deal with this issue.

The committee asked about the possibility of reducing the amount of each slot. If a patient does not utilize all of his or her allotment it cannot be transferred to someone else.

Pharmacy was the next item to be discussed by Nina (attachment # 7). She gave a brief overview of the pharmacy expenditure growth for the Medicaid Program. The following actions have been taken:

- Limit prescriptions to 34 day supply
- Increased the co-pay for recipients to \$3.00 for brand name drugs
- Decreased the pharmacy dispensing fee for brand name drugs to \$4.00, Generic remains at \$5.60
- Implemented a maximum allowable cost list effective December
- A prior approval requirement will be implemented March 4, 2002. The drugs that will be on prior approval are the high cost drugs for which limited dosage or appropriate use standards are available.
- An early refill edit is being explored for installation as well as a method by which overrides can be considered.
- The six-prescription drug limit is also being reviewed
- Development of a preferred drug list
- Exploring the legal and federal requirements for supplemental rebates

During discussion of the prior approval process Committee members expressed the following concerns a:

- *Will there be collaboration with the State Health Plan or will there be an entirely different list. The Division will look at the possibility of a reasonably uniform system.*
- *Were certain areas in the Special Provision considered prior to making a decision regarding the drugs, were they documented and how were the decisions made. A extensive demographic review was conducted. The Division will provide re-assurance that the conditions of the Special Provision have been met.*
- *Step Therapy is strongly discouraged and opposed by the Committee.*
- *A list of persons that served on the pharmacy and therapeutic committee will be provided to the Committee*
- *Why is the acceleration of the implementation of the prior authorization process, and were the pharmaceutical companies and other provider groups in bringing this initiative together. The Department did not feel that it was necessary or appropriate for them to be included. Efforts are made to bring the manufacturers into the process in terms of allowing public input from them.*
- *The Committee requested reconsideration by the Department before moving forward with prior authorization.*
- *The Department was encouraged to build a more openness process.*

In her response to the concerns about the inclusiveness of the process, the Secretary stated that there is a difference between a difference of opinion and a certain group not liking what is being done, verses the fact that whether they have been included or asked to give information. Everybody has been asked for ideas in every area of Medicaid. This is a first step, and the rounds re being made.

Child Care Subsidy and Smart Start Funding was next on the Agenda and Peggy Ball, Director, was recognized to lead that discussion. She began her presentation from the attached handouts. She gave a brief review of the funding process. She stated that the parent co-pay has increased by approximately \$7 million. There was also an overview of the number of children being served. Most of the families supported earn less than \$20,000 annually and also contribute.

The meeting was open for comments from the public. The Chair stated that he would go down the list as long as time permitted and others were asked to speak tomorrow. A copy of the list and comments are attached to these minutes.

The meeting was adjourned until 9:00 a.m. February 28, 2002.

Medicaid Cost Containment
N.C. Department of Health and Human Services
March, 2002

Cost Containment Actions Now Underway

The North Carolina Department of Health and Human Services (DHHS) has taken a number of important steps to contain Medicaid costs, for savings totaling an estimated \$ 44.5 million in state appropriations. These steps include:

- Adjusting rates at Intermediate Care Facilities for the Mentally Retarded (ICF/MR to reflect actual costs; effective July, 2001 **(\$2.6 million in savings)**)
- Adjusting reimbursement rates for physicians to 95 percent of Medicare as of September, 2001 **(\$5.9 million)**
- Adjusting reimbursement to 95 percent of Medicare a second time following a federal Medicare rate adjustment; effective January, 2002 **(\$1.7 million)**
- Increase copayments for Medicaid clients for brand name drugs; effective October, 2001 **(\$3.1 million)**
- Reduce dispensing fees for pharmacies for brand name drugs; effective December, 2001 **(\$3.4 million)**
- Reduce outpatient crossover payments for Dual Eligibles to 95 percent of Medicare; effective October, 2001 **(\$6.5 million)**
- Change policies regarding client assets; effective October, 2001 **(\$2 million)**
- Limit Personal Care Services to 3.5 hours per day; effective October, 2001 **(\$2.5 million)**
- Implement Maximum Allowable Cost list for generic drugs; effective December, 2001 **(\$5.6 million)**
- Contract with a pharmacy benefits manager and creation of a prior approval system for some drugs; effective March, 2001 **(\$11.1 million)**
- Freeze Community Alternatives Program for Disabled Adults and Mentally Retarded (CAP/DA and CAP/MR) to ensure FY 2002 expenditures remain within budget; effective October, 2001

Cost Containment Actions Under Consideration

The Department is also contemplating a number of other changes to contain Medicaid costs. Estimated savings from these actions – assuming all are implemented – is \$65 million in SFY 2003. The actions under consideration include:

- Contracting for hospital service
- Defining and contracting with efficient providers for nursing facilities, intermediate care facilities for the mentally retarded as well as adult care homes
- Establishing daily prospective rates for home care and personal care services based on levels of need
- Reduce payments for drugs from 90 percent to 85 percent of Average Wholesale Price
- Contract for prescription drugs for residents of nursing facilities and adult care homes.

NORTH CAROLINA MEDICAID PROGRAM MANDATORY AND OPTIONAL SERVICES AND ELIGIBLES

SERVICES	
MANDATORY SERVICES	OPTIONAL SERVICES
Hospital Inpatient Hospital Outpatient Other laboratory and X-Ray Nursing Facility Physician Home Health Health Check Family Planning Durable Medical Equipment Nurse Midwife and Nurse Practitioner Hearing Aid Medical Transportation Federally Qualified Health Centers and Rural Health Centers	Intermediate Care Facilities for the Mentally Retarded Personal Care Services Prescription Drugs Dental Eye Care Mental Health Chiropractor Podiatrist Hospice Private Duty Nursing Case Management Clinics (Note: All optional services are mandatory for children under 21)

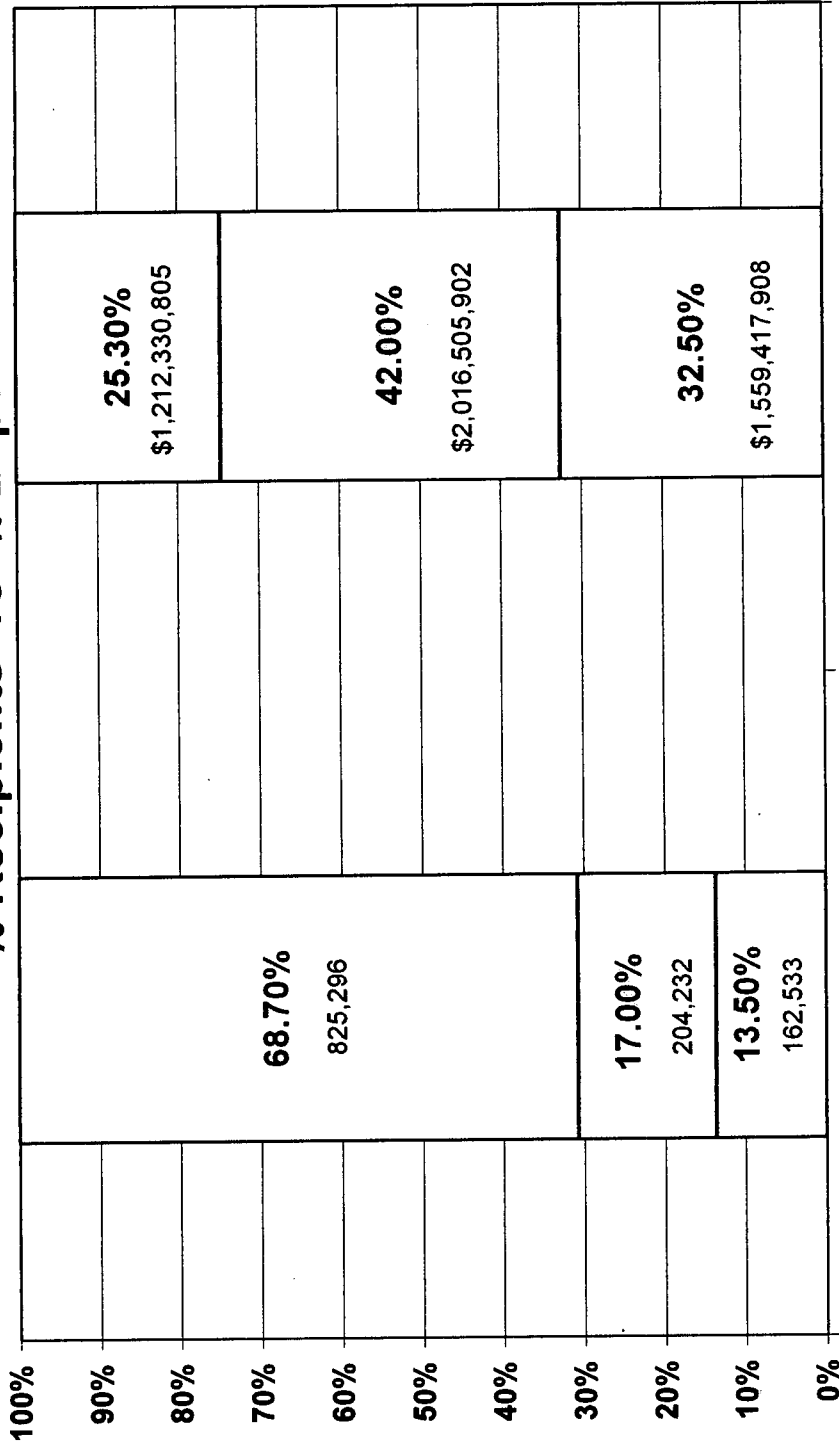

ELIGIBLES	
MANDATORY ELIGIBLES	OPTIONAL ELIGIBLES
Children Ages 1 through 5 with Family Incomes Up to 133% of Federal Poverty Level	
Children Ages 6 through 18 with Family Incomes Up to 100% of Federal Poverty Level	Children Ages 19 and 20 with Family Incomes Up to 100% of Federal Poverty Level
Foster Children and Adoptive Children Under Title IV-E	Non-IV-E Foster Children and/or Adoptive Children with Special Needs
Families with Children under Age 19 who would have been Eligible for AFDC on July 1996	Parents in Families not Eligible under AFDC rules in July 1996 (Medically Needy)
Pregnant Women and Infants under Age 1 with Family Incomes up to 133% of Federal Poverty Level	Pregnant Women and Infants under Age 1 with Family Incomes up to 185% of Federal Poverty Level
Aged, Blind, and Disabled Receiving SSI	Aged, Blind and Disabled not Receiving SSI, Including Adult Care Home Residents, 100% of Federal Poverty Level Eligibles, and Medically Needy
Medicare Beneficiaries with Incomes up to 100% of Federal Poverty Level Qualifying for Medicare Cost Sharing	
Medicare Beneficiaries with Incomes between 101% and 120% of Federal Poverty Level Qualify for Payment of Part B Premium

Long Term Cost Containment Options

	Title	Effective Date	Actions Necessary	Adverse Impact	SFY 2003 State Funds
1	Contract for Hospital Service	01-Oct-02	Review 120 cost reports; develop Payment levels; prepare federal waiver/state plan changes; cancel current agreements; enter into contract	Minimal impact upon hospitals. Provider costs are expected to decrease by amount of payment reduction.	\$20,810,909
2	Define efficient Provider for Nursing Facilities, Intermediate Care Facilities for Mentally Retarded and Adult Care Home - Personal care Services	01-Oct-02	Select contractor; correlate 800 cost reports to patient needs assessments; prepare State Plan and APA changes; determine excessive costs from low occupancy and rent payments	Significant change in payment method. Significant potential for some providers to go out of business. Must assure patient welfare safeguarded.	\$20,074,190
3	Establish daily prospective rates for Home Care Services and Personal Care Services based on levels of need	Various	Obtain Contractor support to correlate cost reports to patient needs assessments; prepare State Plan and APA changes	Significant change in payment method. Significant potential for some providers to go out of business. Must assure patient welfare safeguarded.	\$3,589,472
4	Reduce payments for drugs from 90% to 85% of Average Wholesale Price	1st. of month after decision	Prepare State Plan and APA changes	Will reduce payments to providers. Some providers may elect to discontinue participation in Medicaid.	\$16,382,660
5	Contract for Prescription Drugs for residents of Nursing Facilities and Adult Care Homes	01-Jul-02	Prepare RFPs; obtain bids, enter into contract.	Competitive service. Will limit participation to providers who enter into contracts.	\$4,212,622
	TOTAL				\$65,069,853

CAP-MR/DD

Program Description and History

The Community Alternatives Program for Persons with Mental Retardation/Developmental Disabilities (CAP-MR/DD) is a special Medicaid home and community-based "waiver" program. It was implemented in 1983 to serve individuals who would otherwise qualify for care in an intermediate care facility for the mentally retarded (ICF-MR). The Medicaid cost for community care must be cost effective in comparison to the cost of ICF/MR care. The Division of Mental Health, Developmental Disabilities and Substance Abuse Services manages the daily operation of the program under an agreement with DMA. The program is available statewide through local area mental health, developmental disabilities and substance abuse programs. CAP-MR/DD served approximately 6,442 people in SFY 2001 at an average monthly cost per recipient that was approximately 44% of the average cost of ICF-MR care.

CAP/DA

Program Description and History

The Community Alternatives Program for Disabled Adults (CAP/DA) is a cost-effective home and community care "waiver" program which provides an alternative to institutionalization. The CAP/DA program provides a package of services to allow adults, age 18 and older, who qualify for nursing facility care, to remain in their private residences. The most heavily used service is personal care services. Other services include adult day health care, home modifications, delivered meals and case management. CAP/DA has experienced significant growth for many years as DMA pushed its expansion into all counties and fostered the growth of existing county programs. CAP/DA went statewide in January 1996. The program served approximately 12,901 people in SFY 2001 at less cost than nursing facility care. The average monthly cost per recipient of CAP/DA services was approximately 75% of that of care at a Medicaid nursing facility.

Prescription Drug Cost Management Plan

The purpose of the prescription drug cost management plan is to be sure Medicaid consumers are being provided prescription drugs that are efficacious and cost effective.

Current Situation

The Medicaid budget for pharmacy for SFY 2002 is \$1.1 billion and represents 17.7% of all expenditures. It is the largest single line item in the Medicaid budget.

Over the last three state fiscal years, Medicaid prescription drug costs have increased 22.5%, 35.3% and 22.9%. As of December 2001, the current FY rate of growth is 20.8%.

Through December 2001, pharmacy cost increases accounted for 20.9% of all expenditure growth in the Medicaid program over the previous year.

The budget adopted by the General Assembly for SFY 2001-02 requires a reduction of \$17.7 million in state expenditures (\$54.5 million in total funds) for prescription drugs and the establishment of a pharmacy management plan (SB 1005, Sec. 21.26b).

Summary of Actions to Date

Action	Date Implemented
Limit prescriptions to a 34-day supply . Provide a method by which overrides may be considered.	July 1, 2001
Increase the co-pay to \$3.00 per brand name drug. Generic drugs will remain at \$1.00.	October 1, 2001
Decrease the pharmacy dispensing fee per brand name drug to \$4.00. Generic drugs will remain \$5.60.	October 1, 2001
Maximum allowable cost (MAC) pricing implemented for select generic drugs. MAC prices relate to true acquisition costs much better than the pricing methodology of AWP – 10% used for most drugs.	December 1, 2001

Action	Date Implemented
Implement a <i>prior approval</i> requirement for high cost drugs for which limited dosage or appropriate usage standards are available and insure that prescribers, dispensers and users are aware of and stay within the standards.	March 4, 2002
Install an <i>early refill</i> edit to deny a prescription before the existing prescription has been used. Provide a method by which overrides may be considered.	Planned
Tighten up the existing <i>six prescription limit</i> override to assure that exemptions are provided only to those people who meet criteria as defined in the Appropriations ACT	Planned
Implement a <i>preferred drug list</i> consisting of the most cost effective drugs within a class of drugs. Prior approval will be required of drugs in the class that are not on the preferred drug list.	Under consideration
<i>Supplemental rebates</i> will be permitted from drug manufacturers in order to make their products more cost effective so they may be included on the preferred drug list	Under consideration

Process for Prior Approval/Preferred Drug List

Prior approval is used to enforce drug therapy protocols the manufacturer recommends or that are based on clinical evidence for effectiveness and safety. Steps in developing a prior approval program for NC Medicaid are:

- Contractor secured via an RFP. ACS awarded the contract on December 12, 2001.
- At the request of the department, the Chairman of the Physician Advisory Group of the Medical Society identified several clinical professionals to advise the Division on the clinical aspects of the drug management plan. These clinical advisors include practicing physicians and pharmacists and academic physicians and pharmacists.
- After research of clinical evidence and practices in other state Medicaid programs, ACS proposed an initial list of drugs that might be candidates for prior approval. ACS also proposed suggested criteria for approval.

- Clinical advisors reviewed the initial list and proposed changes to the list. DMA made the final decisions about which drugs to prior approve and the criteria to use based on advice from both ACS and PAG.
- Drug manufacturers were informed of the plans for prior approval at a meeting held on February 15, 2002.
- Training for prescribers and dispensers is set for the week of February 27 at 6 Locations across the state.
- Implementation date is March 4, 2002.

DMA is considering the adoption of a preferred drug list that includes drugs that are both clinically effective and cost effective. Drugs that are not on the preferred drug list will continue to be paid when justified by the prescriber and approved by the DMA's agent, ACS. Steps in developing the preferred drug list are:

- Each class of drugs will be looked at separately, beginning with the classes with the largest Medicaid expenditure.
- Clinical advisors will review the list and either concur or advise DMA to revise the list.
- DMA will determine the net cost to DMA of the clinically effective drugs within the class.
- Clinically effective and cost effective drugs will be placed on the preferred drug list.
- Drugs within the class that are not on the preferred drug list will be subject to prior approval. The prescriber must justify why the more costly drug is necessary in a particular case.
- Drugs can be added to the preferred drug list at any time at the discretion of DMA if it is clinically effective and cost effective.

SFY 2001-02 Child Care Services Funding

Total Non-Smart Start **\$303.7M**
Total Smart Start* **\$ 55.6M**
Total Allocated to Counties **\$359.3M**

CCCDF Funds

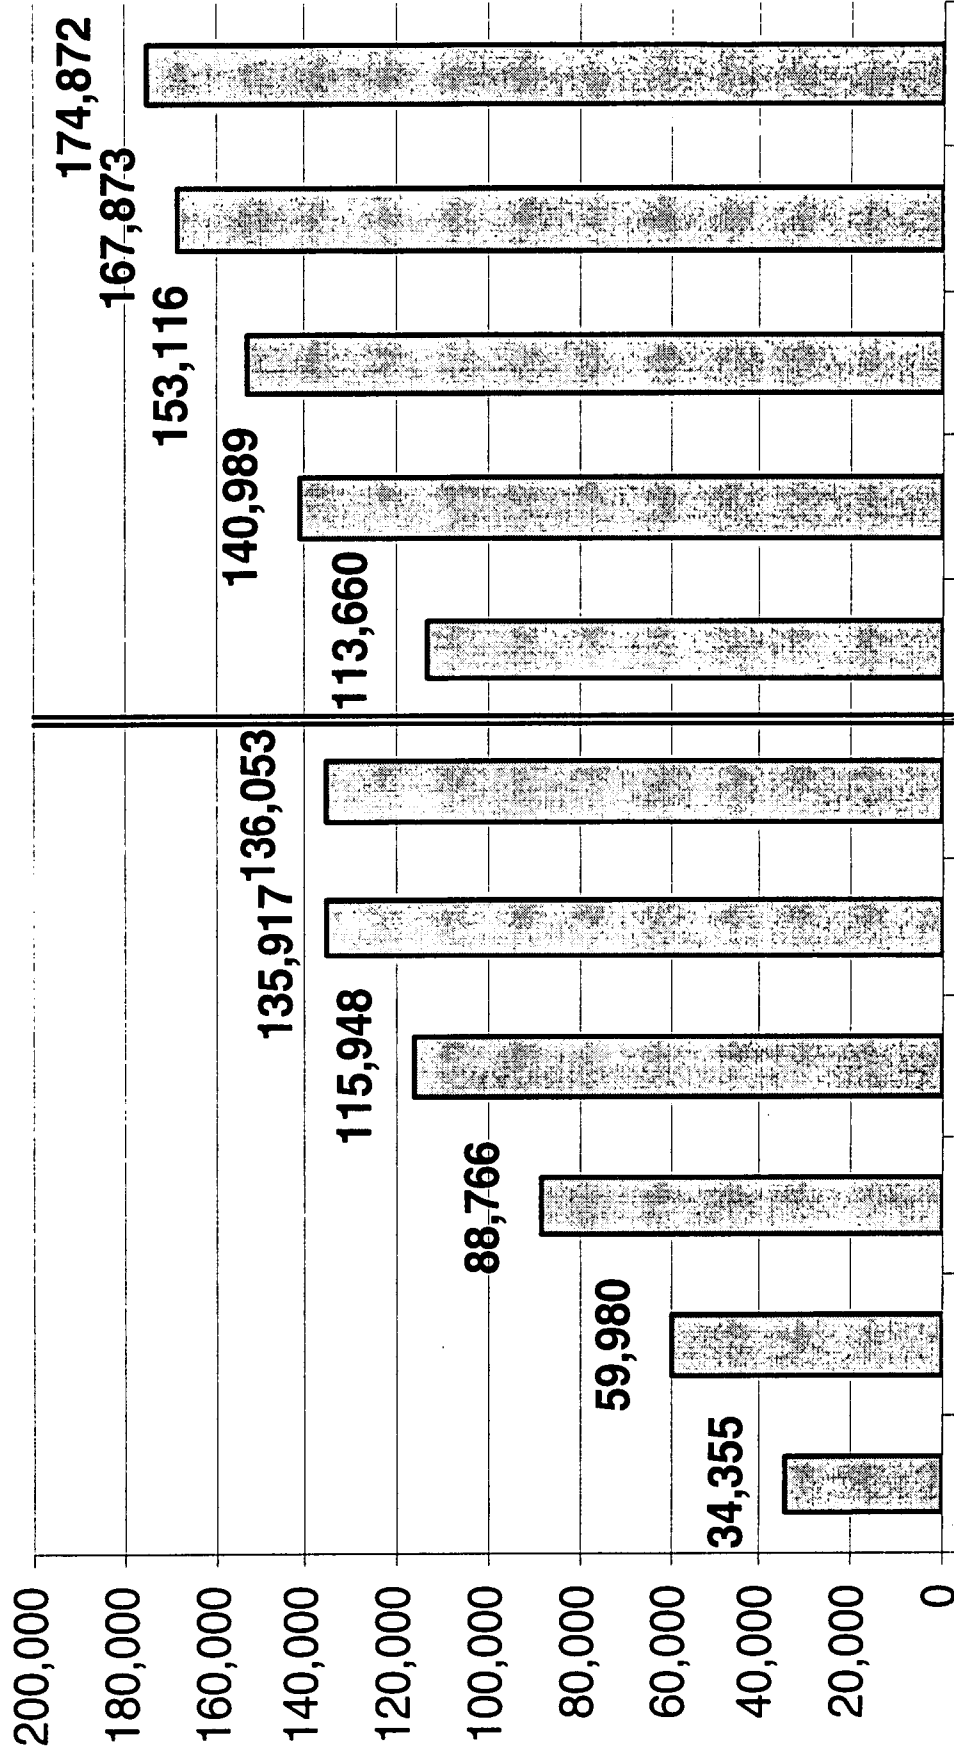

State Smart Start*

16% - \$58.2M 15% - \$55.6M 39% - \$139.2M

* Reflects Smart Start subsidy funds administered through DCD; an additional \$23.7 million administered outside of DCD as of 1-31-02 (for a total of approx. 43% of services funding). 90% of Smart Start subsidy expenditures are used for CCDF match and TANF MOE.

Number of Children in Child Care Subsidy June 1990 through June 2001

90-91 91-92 92-93 93-94 94-95 95-96 96-97 97-98 98-99 99-00 00-01

Double line indicates point in time at which DCD able to unduplicate count of children across funding sources. Does not mean that fewer children were served after SFY 95-96.

Children Receiving Subsidized Child Care Services by Need Category - December 2001

Number of Families Served with Subsidized Child Care by Family Income December, 2001

Annual Family Income

- \$0 - \$19,999
- \$20,000+

Note: Parents pay 8-10% of gross monthly income in parent fees. This will generate an estimated \$70.7 million in SFY 01-02, an increase in \$7.1 million from last year.

Number of Children Receiving Subsidized Child Care Services vs. Number of Children Waiting For Services SFY 96-97 to SFY 00-02*

Subsidy Funds Allocated by SFY \$171.9 M SFY 96-97 \$229.3 M SFY 97-98 \$270.2 M SFY 98-99 \$317.8 M SFY 99-00 \$365.1 M SFY 00-01 \$359.3 M SFY 01-02 (Year-to-date)

□ Children Served ■ Waiting List

* Number of children served SFY 01-02 is a YTD total as of 1-31-02. Waiting list numbers reflect children waiting for services in November of each-SFY. As of 12-31-01, there were 23,212 children waiting for services statewide.

	Mitchell/Yancey	400,053	40,005		440,058

Note: The 2000-01 Services Base allocation for Year 1-3 counties was reduced up to 10%; Year 4s remained the same and Year 5 counties were increased up to 10% not to exceed 50% of their need. If the county's base allocation is already above 50% of the need, no additional funds were allocated. If the Services base allocation is greater than 100% of the need, reduce the allocation to 100% of need. If the percentage of the reduction is greater than 10% but less than 30%, spread the reduction over 2 years.

**Testimony by Jonathan Hill before the North Carolina General Assembly,
Senate/House Joint Appropriations Committee – Room 643 LOB
Regarding the North Carolina Medicaid Budget
Wednesday, February 27, 2002**

“Thank you Mr. Chairman and other committee members:

My name is Jonathan Hill. I am State Director of North Carolina Citizens for a Sound Economy. We are a grassroots organization representing taxpayers and Citizens with over 30,000 members and supporters across North Carolina.

We believe we must look at the long-term effects on the economy and jobs. We believe that “Prior Authorization” and “Supplemental Rebates” are hidden taxes on manufacturing and that consumers will ultimately pay the price through reduction of services, the lack of availability of life saving drugs, and increase costs.

We don't have to look far to understand the importance of pharmaceutical manufacturing in North Carolina. Senator Purcell, I was in Laurinburg last week at one of our meetings with 250 people. Their number one concern was the loss of hundreds of pharmaceutical jobs in Scotland County. Representative Wright is exactly right about the importance of manufacturing jobs in North Carolina--- 42,000 jobs.

A study by Columbia University economist Frank Lichtenberg found that every \$1 in prescription drug spending saved \$4 in hospital care. This is because prescription drugs are often used for preventive care, to prevent more debilitating- not to mention more expensive- medical conditions. While a \$600 annual prescription for cholesterol-reducing drugs Zocar and Lipitor may seem expensive, if they can avert a \$300,000 hospital stay and bypass surgery, they are more than worth the investment.

If the State of North Carolina decides to cover the cost of drugs, but caps the price that drug manufacturers may charge for them, the cost savings will come at the expense of pharmaceutical research. And by the way, when was the last time a new drug was developed in Canada? We all understand the importance of research and development for new life-saving drugs.

We believe “Prior Authorization” and “Supplemental Rebates” will have negative long-term consequences for public health, our state budget, and consumers.

Thank you Mr. Chairman.”

Re: Public Comment, MEDICAID
Ronald Burns, D.O.

Introduction:

I am board certified in family practice and have an active private practice in Orlando, Florida. I became familiar with the health index and socioeconomic challenges of the Medicaid beneficiaries as chief resident at Florida Hospital East Orlando 12 years ago, then as a clinical preceptor and later as an interim co-director of medical education for the family practice residency program.

In 1999 I was appointed by the president of the Florida Senate to serve on the Medicaid Formulary Study Panel (9 member panel chaired by the AHCA) and published a 138 page final report to the Governor and Legislature on March 3, 2000. The Panel supported the option to maintain an open formulary for Medicaid prescribed medicines, and to enhance disease management initiatives to control prescription drug expenditures. The Panel's findings were based on its evaluation of reports, Medicaid program data, and information provided by experts and public testimony.

Unfortunately budget drives policy and the legislature created a pharmacy and therapeutics committee. In 2000 I was appointed by the Speaker of The House, state of Florida to serve on the Medicaid Pharmacy and Therapeutics Committee 2000-2001 and served during implementation of the 4-brand edit and voluntary preferred drug designation program.

As a licensed physician with clinical experience working with a vulnerable population, I have the fiduciary responsibility to present information that may be of benefit in your policy and budgetary deliberations.

Medicaid patients are unlike HMO patients. The Medicaid population has the worst health index in terms of severity of illness but also prevalence of co-morbidities and have both higher treatment failures and complications. This vulnerable population of society requires humility and does not survive well with "Step Therapy" failures simply to allow access to a drug treatment that the licensed physician believes is medically necessary. This "Gatekeeper" approach is the application of a cost based access model for drug therapy, which will lead to increase in other costs as well as administrative costs for all involved.

Focus on appropriate utilization of drugs, and services to promote cost effectiveness. Think of health care as a balloon; if you squeeze in one area you will have a bulge in another. It is vital when focusing on utilization, to also have the ability to evaluate the effects of underutilization. To lower overall costs in the Medicaid program, aggressive disease management and continuity of care should be primary goals. Unfortunately, budget drives policy development, and the question: How do we reduce line item spending in pharmaceuticals, is the incorrect question. The correct question to

ask ourselves is: Does our rising investment in pharmaceuticals reduce spending in other areas by having appropriate disease management and overall cost reduction?

In Florida there are 16,000 to 18,000 calls to ACS per month, 90% approved with less than 25% alternative choices. From August 1, 2000 to January 2001, there were 117,000 calls, (incoming and outgoing) with 3,000 abandoned calls. According to the University of Florida, Florida Center for Medicaid issues, an internal audit conducted by ACS a sample of 1,002 patients with a claim denied in December of 2000 for a PA to request override to a 4-brand edit found 20% no drug dispensed for chronic disease, 6% no drug dispensed for an acute disease, 34% received denied drug within 30 days, 19% received denied drug within the same day, 13% received a generic drug, and only 3% were coded as duplicate/unnecessary.

Opponent positions:

1. Are pharmacists at ACS licensed to practice pharmacy in North Carolina? Accountability is important in the therapeutic consultative process.
2. Increases total patient costs and other services.
3. Increases the states administrative costs.
4. Increases administrative burden and liability on physicians and will have an effect on reducing number of participating physicians in the Medicaid program.
5. Impacts on medical education training programs by reducing patient volume with administrative burden and modifies the learning experience with the implications of step edit therapy.
6. Differential in co-pays between brand vs. generics will create ethnic and economic treatment disparity in the likelihood of sub populations being treated to national guidelines.
7. Variation in dispensing fee can be a violation of Stark as well as a violation of the pharmacy and physician practice acts if therapy is modified on request of involved parties based on incentive difference.
8. Reduces federal manufacture rebates.
9. Results in poor social outcomes.
10. Not a system wide approach; does not have a total cost of care focus.

Senate Bill 792 established in Florida statutes the requirement to not only add to the P & T committee membership a consumer member, but also a representative for the manufactures.

Finally, please refer to page 9 of the attached report regarding the products in Florida with the highest denial rates. The proposal by your state department to prior authorize COX-2 agents may result in a low percentage of provider requests for overrides relative to the total number of claim denials in a population with disease that will be biased for severity of untoward effects including increased hospitalizations for gastrointestinal bleed and mortality.

Thank you for the opportunity to provide public testimony that will affect patient care.

Florida Center for Medicaid Issues

Florida Medicaid Prescribed Drug Program: Four Brand Prescription Limit Policy

**Final Report – Phase I
June 2001**

Report Prepared by
Mary Kay Owens, R.Ph.,C.Ph., Earlene Lipowski, Ph.D., and Renee Dubault, M.A.

9-10-1998 11:20AM FROM

June 29, 2001

Mr. Bob Sharpe
Deputy Director of Medicaid
Agency for Health Care Administration

Dear Mr. Sharpe

The Florida Center for Medicaid Issues (FCMI) at the University of Florida contracted with the Florida Agency for Health Care Administration (AHCA) to conduct an independent evaluation of prescribed drug spending control policies implemented in FY 2000-01. This report represents the completion of Phase I of the evaluation. The intent of this initial phase was to collect and evaluate data on prescription drug claims and denials occurring in the first several months after implementation of the new prescribed drug policies as well as conduct a survey of providers affected by the new policies and provide analysis of the survey results. As additional data is made available for the months of February - June 2001, continued evaluation of the denials, provider interactions and correspondence results can be summarized and modified as needed.

In July 2001, FCMI will begin Phase II of the evaluation. The second phase will include an aggregate analysis of pharmacy claims to target particular sub-groups that may have been disproportionately affected by the policy to determine whether any experienced complications due to changes in drug therapies, a medical review of these cases will be conducted, and a survey of Medicaid clients to assess client interaction and experiences with the program. Prospectively, the second phase of the project will address changes affected by new policies to be implemented, such as removal of the exemption to the four-brand policy for nursing home patients and the adoption of the formulary.

If you or your staff have any questions about this report, please call me at (352) 392-0675.

Sincerely,

Robert G. Frank, Ph.D.
Director, Florida Center for Medicaid Issues
College of Health Professions
University of Florida

P. 5

Executive Summary

The design and implementation of policies to inhibit the growth of spending on the prescription drug component of the Medicaid program has been a complex and continually changing process. The affects of the prescription drug spending control program are still being discovered by patients and physicians who participate in Medicaid. As this project is being completed, Medicaid is on the verge on implementing a true formulary in place of the Voluntary Preferred Drug List adopted in the previous fiscal year. This change will undoubtedly produce additional effects not addressed in this evaluation or report.

During the implementation and transition to the new policies, it is evident that many physicians and patients have experienced some frustration in adapting their drug regimens and practice patterns. In the first six months of the program (August 2000-January 2001) 61,492 requests for prior authorization to exceed the four-brand limit were attempted. This represents approximately 40 percent of the denials for exceeding the four-brand limit during the same time period. In analyzing claims in which no prior authorization was requested in response to a denial, it was determined that 20 percent of the sample population did not have a drug dispensed to treat a chronic condition. Although our provider survey indicated that some physicians temporarily alleviated these situations by providing samples to patients, it would be appropriate to target this population for in-depth medical review in Phase II of the project. In analyzing the claims denied by therapeutic class, it was determined that the top three classes accounted for 23 percent of the total denials. These classes were lipid agents used to treat high cholesterol, H2's and PPI's used to treat gastrointestinal conditions, and NSAID's and Cox-2 agents used to treat arthritis. Within these classes, a small number of brand-name drugs accounted for the majority of the denials. Over 56 percent of denials for lipid-lowering agents were for the high potency agents, Zocor and Lipitor, and 85 percent of denials in the NSAID/Cox-2 class were for the two Cox-2 agents, Celebrex and Vioxx. Since these drugs are not currently available in generic form and did not have therapeutic equivalents on the voluntary preferred drug list, patients using these drugs represent another target population for further review.

In analyzing the results from the provider survey, physicians noted concern for patients with chronic conditions, such as diabetes and asthma, and the elderly in general who also have difficulties because of co-morbid conditions. Many physicians pointed out that these types of patients often required adjustments to medications mid-month in order to maintain control their conditions and were often on a number of drug therapies to address other conditions. The four-brand limit caused particular difficulties for these patients as the adjusted prescriptions were rejected for being over the limit or the patient ran our before the supply limit. These patients would be another population that should be targeted for in-depth medical review.

Despite the acknowledgement that some policy is needed to control rising drug cost, 70 percent of physicians maintained that the four-brand limit policy requires significant modifications. In reviewing the specific comments made by physicians, a common suggestion was that the limit should be raised to six-brand name drugs.

Background

Over the past several years, the state of Florida has experienced double-digit rate increases annually in spending on prescription drugs in the Medicaid program. In 1999, the state estimated that expenditures on prescription drugs in the Medicaid program would increase from \$846 million for FY 1998-99 to over \$1 billion for FY 1999-00, an increase of 16.9 percent (Social Services

9-10-1998 11:21AM FROM

P. 6

Estimating Conference, November 1999). During the same period, the Medicaid program was also experiencing budget deficits.

In order to address the budget deficits and increasing expenditures for prescription drugs, the 2000 Florida legislature directed the Agency for Health Care Administration to implement a four-brand monthly prescription limit policy for FY 2000-01 as part of several pharmacy budget cost containment initiatives related to the Medicaid program. When implemented in August 2000, the policy stated that all Medicaid recipients age 21 and older who are not residing in a long term care facility or other institution are limited to receiving four brand prescriptions each month. Generic drugs, insulin, diabetic supplies, contraceptives, mental health drugs (antidepressants and anti-psychotics) and anti-retroviral drugs used to treat HIV infection are exempt from the limit. The four-brand monthly prescription limit was implemented in Broward, Dade, Monroe, and Palm Beach Counties on August 1, 2000. The remainder of the counties statewide were initiated into the program on September 1, 2000.

The Florida Medicaid program contracted with Consultec, Inc, the Medicaid fiscal agent, to develop and operate a program to administer the new policies. As a result, the Therapeutic Consultation Program (TCP) was established to address requests from providers to exceed the four-brand limit. The TCP is a call center located in Atlanta, Georgia staffed by licensed pharmacists and pharmacy technicians. The center is designed to review patients' drug therapies and conditions and suggest alternatives and changes to drug regimens when appropriate or provide authorization to exceed the limit for one to 12 months if a previous therapy has failed or no alternative therapy is available.

The Prescription Drug Spending Control Program continues to evolve under legislative direction. The 2001 Florida legislature passed several initiatives aimed at realizing continued and increasing cost-savings from the program. These initiatives include implementation of a closed formulary, repeal of the negative formulary, and repeal of the exemption for nursing home residents from the four-brand limit. These initiatives have implications for the evaluation activities of FCMI and will be considered in future evaluations.

Report Analyses

Monthly Statistics of Claims Denied Four Brand Limit (Edlt 650) Report

A report covering the period from August 1, 2000 through January 2001 documents 311,605 denials for claims exceeding the four brand limit, an average of 52,000 claim denials per month. It should be noted that total claim denials are not necessarily unique claims. Pharmacies often re-submit a claim a second time when first confronted with an unexpected claim denial. Thus, we conservatively estimate 52,000 denials may represent approximately 26,000 unique denials.

The number of provider requests for Prior Authorization (PA) overrides of these denials reached a high of 18,800 in September 2000 (statewide implementation month) and decreased from November 2000 through January 2001 to an average of 8,300 PA requests per month. If one estimates that unique claims account for approximately one half (155,802) of the 311,605 denials reported for the 6 month period, then overall, providers requested PA's for only 40 percent of denied claims. However, these numbers represent rough estimates because the number of provider calls does not correlate with the number of PA's requested since providers can request multiple PA's in a single call to the TCP center. Of all the override requests for the four-brand limit, 77 percent were approved and 23 percent denied.

9-10-1998 11:22AM FROM

P. 7

Consultec Internal Audit Findings Report on Denied Claims

An internal audit was conducted by Consultec to determine what occurred in those cases when no PA was requested in response to the claim denial. Consultec sampled 1,002 patients with a claim denied in December 2000 without a PA request to override the four brand limit. The results of their review are shown in **Table 1**.

Table 1

Denied Brand Name Drug Claims with No PA Override Request		
# of Patients	% of Patients	Result after Denial
336	34%	Received denied brand name drug W/I 30 days
195	19%	Received denied brand name drug same day
128	13%	Received generic alternative
48	5%	Referred to review program for compliance issues
28	3%	Prescribed brand name was duplicate/unnecessary
202	20%	No drug dispensed (for chronic treatment)
65	6%	No drug dispensed (for acute treatment)

One aspect that clearly warrants investigation is the clinical effect on the 20 percent of patients who did not receive the drug prescribed for a chronic illness and the six percent who did not receive a drug prescribed for an acute condition. It would benefit Medicaid to know if these 267 (202 + 65) patients, 27 percent of the total claim denials, incurred ER, physician and hospital expenses due to lack of drug therapy. This population should be targeted for in-depth medical review.

Additionally, it is perplexing that 336 patients received the rejected brand drug within 30 days of the denial. One explanation is that the pharmacy reversed a previously filled brand prescription to allow a claim to be entered for an additional brand drug. It seems unlikely that a pharmacy would reverse a paid claim for an expensive brand drug and not receive payment for the drug that had been dispensed. However, it was noted in our survey results that patients sometimes paid for a limited supply of a brand name drug to "get by" until a claim could be processed for the drug in a new month.

A possible scenario is that the pharmacy reversed the claim at the time of the denial, resubmitted it within the 30-day study period and thus received payment for the claim at the later time. Alternatively, a claim might be resubmitted for a two-month quantity to cover both the claim for a drug dispensed but reversed and the quantity needed for the current month's claim. Although there is a "days supply limit" of 34 days, there are very few drugs in the drug reference file that have a maximum payment quantity entered in the edit field. Therefore, a pharmacist or physician could claim a "34 days supply" while dispensing/prescribing a supply for 60 days or more. If there is evidence that this is occurring, loopholes in the claims processing system should be identified and corrected.

It is plausible that 195 patients received the denied brand claim on same day by having a claim reversed for another brand drug that had not yet been given to the patient. Also, a patient could have received a generic alternative in place of the brand drug upon consultation between the pharmacy and the physician and there would be no override request to the TCP in this case. An unknown percentage group of 531 patients that received the denied brand drug may not have received a replacement for any brand drug claims that were reversed or not dispensed.

9-10-1998 11:22AM FROM

P. 8

Monthly Statistics on Prior Approvals Granted by Reason Code

This report specifies 17 codes that are used to classify the reasons for granting prescribers' requests for an override, leaving 16 percent of the cases not specifically classified. An override is granted for the length of the prescription (from 30 days to 12 months) when the request is coded as "failure on previous therapy" and "alternate therapy not available." For other codes the length of approval is 34 days and includes reasons such as "ER/Urgent care," "MD unavailable," "physician changes previous drug," and "physician refuses to change." For all prescriptions that are changed to a product on the voluntary preferred drug list, an approval is granted for the length of the prescription, which is usually 12 months for a chronic condition.

The breakdown of the reasons for granting an override, based on Consultec reports, is shown in **Table 2**.

Table 2

Summary of PA Reason Codes August 2000-January 2001	
% of Authorizations	Authorization Reason
24%	Changed to "Preferred" Brand Drug
20%	Alternate Therapy Not Available
19%	Physician Refused to Change Therapy
16%	Other (undefined)
10%	Brand Changed to Generic Alternative
8%	Patient Failed on Previous Drug Therapy
3%	ER/Urgent Care and Physician Unavailable

There are model letters that correspond with the different codes to inform prescribers of required changes in drug therapies. Provider feedback indicates that physicians initially are not aware that overrides are only granted for 34 days for non-preferred brand drugs (unless there is no alternative or patient has failed on other drugs). Physicians are also not aware that they must complete the response forms included with the correspondence in addition to calling the TCP center to prevent the claim from being denied again the following month.

Pharmacy providers report that there is a significant breakdown in the communication between the physician and the pharmacy once the physician has called the TCP center and changed the patient's therapy. Physicians incorrectly assume that a verbal consultation with the TCP center pharmacist to change a therapy authorizes a change to the prescription at the dispensing pharmacy. In other words, the physician may assume that the TCP consultation generates a legal verbal prescription order. Consequently there are instances when patients did not get the denied drug even after a PA has been granted because the prescribing physicians did not contact the dispensing pharmacy to legally issue a new prescription order. In their defense, physicians argue they have no knowledge of which pharmacy the patient is using so a legal prescription order can not be issued.

Monthly Call Center Interaction Performance Statistics Summary Report

Forty-eight pharmacists and additional technical support staff handle calls to the TCP center for PA requests to the four-brand limit. The logs show over 117,000 total calls (incoming and outgoing) from August 1, 2000 through January 2001. Pharmacists handled approximately 83 percent of the calls during that period. The average time to answer a call was 14 seconds and the average length of a call was three minutes and five seconds. There were 3,000 calls abandoned during the period but 53 percent (1600) of the abandoned calls occurred in September during statewide implementation of the program.

9-10-1998 11:23AM FROM

P. 9

Monthly Provider Correspondence Statistics by Letter Code

As a follow-up to calls to the TCP, Consultec developed a set of form letters that are sent to physicians. **Table 3** summarizes the 34,592 letters of correspondence sent in response to TCP inquiries for the period August 2000 through January 2001.

Table 3

TCP Provider Correspondence Summary August 2000-January 2001		
Letter Type	Message	% of Correspondence
A	Physician Refuses to Change Drug Therapy	26%
B	Opportunities for Therapy Change Identified	64%
C	Physician Changes Previously Dispensed Drug	9%
D	Physician Unavailable	1%

Preliminary analyses based on responses received only for the months of December 2000 and January 2001, record an average physician response rate of ten percent. It should be noted that this response rate does not reflect responses that were received after the report was compiled and may be lower than the actual response rate given a reasonable lag time for responses. Of the limited data reviewed for the responses received for the two-month period, physicians refused to change therapy, on average, in 65 percent of the cases, and agreed to change therapy, on average, 36 percent of the time when they receive a six-month patient prescription record along with a list of suggested changes. Letters are generated as follow up to a TCP PA call request or at the discretion of the TCP pharmacist conducting an independent review of patient records.

High Volume TCP Interaction Providers (August 2000-January 2001)

A high volume TCP interaction provider is defined as a provider that has called the center five times or more during the period to request an override to the four brand limit. There were 8,743 different providers who had at least one TCP interaction and 1,156 (13 percent) of them logged five or more interactions in the 6-month time frame. The number of interactions with high volume providers ranged from 5 to 225 contacts for an average of 17 interactions per high volume provider. Of the 1,156 high volume providers, primary care physicians accounted for 70 percent and specialists for 30 percent of the 20,000 total interactions.

Graph 1 TCP Contacts by Physician Type

9-10-1998 11:23AM FROM

P. 10

The 378 high volume interaction specialty physicians (30 percent) were further broken down in **Graph 2**.

Graph 2 Specialty Physician Contacts

A detailed examination revealed one very high volume provider in each specialty that skewed the average number of interactions for anesthesiologists, ophthalmologists, general surgeons, allergy and infectious disease specialists. The analysis also identified 25 of the top contact providers (15 specialists and ten primary care providers) to be extreme outliers. Additional profiling of these outlying physicians by case mix, disease area and therapeutic class could shed light on underlying characteristics of their practices and appropriateness of their prescribing patterns.

Claim Denials by Therapeutic Drug Class (August 2000-January 2001)

Claims denied due to the four-brand limit were analyzed and ranked by therapeutic class. The greatest numbers of claim denials were for drugs used to treat gastrointestinal (GI) conditions (H2s and PPIs), high cholesterol (lipid agents) and arthritic pain (NSAIDs and Cox-2 agents). These data show only the claim denials received by the pharmacy transmitting the claim and do not reflect the classes of the drugs that resulted in the physician contact to the TCP call center with requests for overrides. The top therapeutic classes denied at the pharmacy represent 72,701 (23 percent) of all the denials for the period. This information is summarized in **Table 4**.

Table 4

Denied Claims by Therapeutic Class		
Rank	Therapeutic Class	Denied Claims
1	Lipid Agents	10,518
2	GI Agents (H2s and PPIs)	10,306
3	NSAIDs and Cox-2	10,130
4	Narcotics/Pain Medications	8,481
5	Quinolone Antibiotics	7,577
6	Antihistamines (1st Gen & Non-Sed)	7,065
7	Calcium Channel Blockers	6,348
8	ACE Inhibitors	6,266
9	Anti-diabetic Agents	6,010

9-10-1998 11:24AM FROM

P. 11

Product Denials for Top Nine Therapeutic Classes (October 2000-February 2001)

A preliminary analysis noted that the drugs with the highest denial rates are agents that are often appropriate for use by patients with multiple illnesses, and persons who are medically complex and at high risk from adverse effects of drug therapy or inadequate treatment of their disease. Over 56 percent of the denials for lipid-lowering drugs were for high strengths of the high potency agents, Zocor and Lipitor. These are the only drugs that generally achieve a reduction of 40 percent or more in low density lipids (LDL) levels among patients with the highest lipid levels. Two COX-2 agents, Vioxx and Celebrex, generated 85 percent of the denials in the NSAID/Cox-2 class. COX-2 agents are often prescribed for patients who are at high risk for gastrointestinal (GI) bleeding because the rate of GI bleeding is purported to be lower for COX-2 drugs than for other NSAIDs. The analysis found a relatively low percentage of provider requests for overrides relative to the total number of claim denials for these particular products.

In addition, the products with highest denial rates (Zocor, Lipitor, Vioxx and Celebrex) have no therapeutic equivalents on the voluntary preferred drug list. The provider who requests an override for one of these drugs likely is encouraged to consider an NSAID or low potency lipid agent in its place to promote the Agency's policy of enforcing the preferred drug list. Further follow-up will be conducted to determine the appropriateness of these denials and to assess any changes in the clinical status of these patients that could be attributed to substitution with the recommended agents.

Sample Patient Profile Review

This review focused on a small sample of 42 patients who use multiple physicians and pharmacies. The review revealed denied claims for ophthalmic preparations, hormone replacement therapy, topical products and vaccines, none of which have generic or therapeutic alternatives. The high denial rates for ophthalmic products may explain the unusual number of ophthalmologists among provider specialists who frequently contact the TCP. It is reasonable to consider excluding these drugs from the four-brand limit. A larger sample of profiles should be reviewed on a periodic basis to continue monitoring the efficiency of the program.

Survey Results and Analysis

FCMI contracted with Bureau of Economic and Business Research at the University of Florida to conduct a survey of Medicaid providers between the dates of April 16, 2001 and May 21, 2001. Trained interviewers telephoned 1450 physicians whose names were provided by Consultec on one of two reports. The first report was a list of 1,155 physicians who contacted the Therapeutic Consultation Program (TCP) on five or more occasions between August 2000 and January 2001 to request an exemption to the four-brand limit. The number of calls logged for individual physicians ranged from 5 to 225; the median number of calls per individual on this list was fourteen. The second report was a list of 295 physicians who did not log a call to the TCP during the month January 2001 despite the fact that their patients reached the four brand limit nine or more times. A summary of survey outcomes is detailed in *Table 5*.

9-10-1998 11:24AM FROM

P. 12

Table 5

Summary of Survey Outcomes		
Outcome	#	%
Completed Survey	361	25%
Refusal/ No Medicaid Patients*	59	4%
Answering Machine or Callback Request	366	25%
Respondent Unavailable	122	8%
Incorrect Telephone Number	542	37%
TOTAL	1450	

*Only 12 respondents refused to complete the survey. The remaining 47 did not complete the survey because they stated that they did not treat any Medicaid patients in their practice. It is likely that providers who stated that they did not have any Medicaid patients are treating some patients who are dually eligible for Medicare and Medicaid and the provider was unaware of the secondary coverage by Medicaid.

The survey requested respondents to estimate the percentage of their practice devoted to Medicaid clients. The estimates ranged from 1-100 percent and had the distribution summarized in *Graph 3*.

Graph 3 Distribution of Practice Devoted to Medicaid

Patient Care Issues

- Nearly 60 percent of the respondents reported that a significant number of their Medicaid patients do not get all the brand name medication that the physician believes they need. Overall, most of the physicians estimated that one-half of their Medicaid patients are not getting the brand name prescriptions that they need.
- Over 84 percent of those contacted reported that they had changed a patient's drug therapy due to the four-brand limit; 46 percent reported they had cases where the change resulted in a negative clinical outcome for the patient, such as a loss of control in blood glucose, blood pressure or intra-ocular pressure.

- Patients mentioned as being most likely to experience problems with the brand limit are: those with conditions that require frequent dose adjustments such as diabetes or hypertension (27); persons with multiple chronic diseases (18); those who find it necessary to travel away from home (13); and persons whose condition is stabilized on an existing regimen (7).
- Over one-half of those interviewed said that they "always" or "usually" have difficulty setting priorities when a Medicaid patient needs more than four-brand name prescription drugs.
- Respondents explained that patients and their caregivers are confused because they mistakenly believe that a denial is final rather than a situation that may be resolved by consultation. In other cases confusion arises when complex medication regimens are altered or a patient believes the denied medication is the better product.
- As a result of policy restriction, 22 mentioned that patients either go without their medicine temporarily or pay out of pocket for a limited supply until the matter is resolved. Four physicians complained that patients must make multiple trips to the pharmacy and four more cited cases where patients sought emergency care when they could not obtain their prescription.
- Among the problems stated by the respondents,
 - 77 percent found that the policy creates problems with the coordination of care;
 - 67 percent believe that the policy creates problems for patients who are newly discharged from a hospital;
 - 77 percent said that the policy leads to prescription changes that confuse patients.
- 54 physicians also mentioned that the early refill limit is a significant problem in their offices and for their patients.

Therapeutic Classes Most Affected

A number of therapeutic classes were cited as being most often effected by the four-brand limit policy. These classes are summarized in *Table 6*.

Table 6

Reported Classes Most Effected by Policy	
Therapeutic Class	%
Cholesterol Lowering Agents	23%
Cardiovascular Drugs other than Cholesterol Lowering Agents	20%
Antibiotics	15%
New Products for Arthritis (COX-2 Agents)	11%
All of the above	5%
Other	26%

Of the 26% who reported "other" classes, *Table 7* summarizes the most frequent responses.

Table 7

Other Classes Reported	
Therapeutic Class	%
Diabetic Medications	10%
Pain Medications	6%
Anti-Hypertensives	6%
Inhalers and Other Respiratory Drugs	5%
Gastrointestinal Agents	3%
Glaucoma Medications	3%
Any Class without Generic Options	2%

Denials and Therapeutic Consultation Program (TCP) Contacts

- Less than five percent of those interviewed said that their requests for and exemption to the policy are "never" granted whereas almost 20 percent replied that exemptions are "always" granted. The remainder was divided over whether requests are granted "occasionally" (43 percent) or "usually" (34 percent).
- When physicians experienced a denial for an exemption to the policy (N=307), 30 percent said that the suggested alternatives were "usually" acceptable; 39 percent found that the suggested alternatives are "occasionally" acceptable; and 15 percent claimed that suggested alternatives are "never" acceptable.
- 203 of the 307 physicians who experienced a denial for an exemption (66 percent) recalled prompt correspondence from the Therapeutic Consultation Program (TCP) regarding their request. Of these, over 90 percent said this information was clear and almost three-fourths found the information useful in resolving the issues with their patient's drug therapy.
- Some respondents described how they handle problematic cases. Seven said they provide samples for limited time periods; five have increased the quantity prescribed for medication that may require dose adjustments; and one uses injectable medication in the office as a substitute when possible.

There were 54 respondents who offered an explanation for why they did not find it necessary to call the TCP even though Medicaid records indicated that there were cases in which their patients reached the four-brand limit. The responses are summarized in **Table 8**.

Table 7

Explanation for not contacting TCP after a denial	
Explanation	#
Doctor adjusted medication regimen to meet the limit	20
Medicaid was contacted by phone or mail	7
A pharmacist handled the matter	7
Patient was given sample medication	4
Doctor was not informed of a problem	3
The patient went without the medication	2
Actions differ depending upon patient case	2
Stopped accepting Medicaid patients	1

P. 15

Overall Policy Assessment

Despite the acknowledgement that some policy is needed to control rising drug cost, 70 percent of physicians maintained that the four-brand limit policy requires significant modifications.

Among complaints voiced during the interview, 37 persons said that dealing with the policy was too time consuming. Not only is the exception process a burden, but there is significant communication necessary among providers and patients in order to avoid problems. Thirty-four individuals believed that Medicaid needs to improve communications to providers about policy changes and five said that the policies change too frequently. Seventeen viewed the four-brand limit as just one more set of hurdles and hassles associated with Medicaid. Six persons requested that the preferred drug list be expanded and five more would prefer an explicit formulary. Nine respondents said that a monetary limit would be preferable to a brand name limit.

Twenty-one of those interviewed noted that exceptions to the policy are essential and the process must be efficient. Three individuals emphasized the need for pharmacists or physicians to staff the TCP phone lines. However, ten said that they had gotten unsatisfactory or unsympathetic responses from TCP staff. Seven said that the exception process generates too much paper and too many mailings. Four requested a longer exemption period and three thought there should be provisions for a trial or short course of therapy. Three complained that community pharmacists do not understand the policy and do not always provide a short-term supply of medication as required.

Over 60 physicians asked that the limit be raised to at least six-brand name products or that the limit be linked to the number of chronic diseases. A dozen other individuals recommended that more patient groups be exempt from the policy, specifically the elderly (7), transplant candidates and transplant recipients (5), and hospice patients (2).

Finally, a number of respondents offered alternative ways to reduce Medicaid prescription expenditures: fourteen recommended forcing the pharmaceutical manufacturers to lower their prices; twelve suggested that Medicaid should more aggressively promote the use of generics; seven would focus more on fraud and abuse; four want Medicaid to stop paying for Viagra; one wanted more reliance on peer review; and one person advised an elimination of foreign aid. Six physicians mentioned that they are planning to drop from the Medicaid program or reduce the number of Medicaid patients in their practice.

Recommendations

- Consider modifications to the claims processing system if a significant problem is identified with pharmacies dispensing greater than a 34 days supply. Add maximum quantities for as many high volume drugs as possible to prevent abuse of the policy.
- Consider exemption for topical products such as eye drops and inhalers as it is difficult to determine the amount necessary for 34 days and exact measured doses. Physicians noted that necessary refills of these types of products before the allotted time period was problematic.
- Inform physicians at the time of the TCP consultation exactly what length of time is covered for each PA approval. Inform physicians that they may be receiving a form by mail that must to be completed for continued therapy approvals. This may cause the physician to modify prescribing and prevent future callbacks and hassle for the

9-10-1998 11:26AM FROM

P. 16

physicians and patients involved. Physicians do not seem to understand the entire process at the point of initial contact.

- Explore ways to increase the response rate to provider correspondence and increase provider knowledge of the policy.
- Identify drugs or drug classes that generate a large volume of PA requests by applying a data query to override approvals and denials to evaluate the need for additional exemptions from the four-brand limit policy. Use this information to determine whether additional drugs warrant exclusion from the limit in order to improve clinical outcomes and improve the efficiency of program operations.
- Design and implement a provider profiling program to routinely assess practice patterns of providers who are outliers with regard to the number of TCP contacts or the highest number of claim denials. Make periodic modifications to the program operations, procedures and policies.
- Conduct pharmacist and patient surveys to ensure that PA requests obtained by physicians are communicated to them. Assess patient experiences with the program and outcomes not necessarily reported back to physicians and pharmacists.
- Have clinicians review a sample of profiles for patients with claim and override denials. Target medical reviews to sub-populations identified through the provider survey and aggregate claims analyses.

Appendix 1

Scope and Methodology

Analyses have been conducted on the following listing of Standard and ad-hoc reports provided by Consultec. We have also reviewed the Program Materials provided on the Therapeutic Consultation Program. In order to complete our evaluation we have requested the reports and data listed as "pending". Additional requested may be made as necessary.

Standard Therapeutic Consultation Program (TCP) Reports

- Monthly Statistics of Claims Denied Four Brand Limit (Edit 650)
- Consultec Internal Audit Report on Denials for Sample Month December 2000
- Monthly Statistics of Prior Approvals Granted by Reason Code
- Monthly Call Center Interaction Performance Statistics Summary Report
- Monthly Provider Correspondence Statistics by Letter Code

Ad-hoc Therapeutic Consultation Program (TCP) Reports

- High Volume TCP Interaction Providers (August 2000-January 2001)
- Claim Denials by Therapeutic Drug Class (August 2000-January 2001)
- Denials for Top Nine Therapeutic Classes (October 2000-February 2001)
- Sample report of providers with edit affected patients and no TCP interaction Product

TCP Program Materials

- Sample of affected patients' drug therapy profiles
- Provider correspondence sample letters
- TCP reason code summary descriptions

Reports and Data Requests Pending

- Prescribed drug utilizers and expenditures by eligibility group and by area/county
- Monthly summaries of total unique patients and providers affected by four brand edit

Appendix 2

Provider Survey

What percentage of your practice is dedicated to Medicaid clients?

0-100

Would you say that nearly all of your Medicaid patients get the brand name prescriptions that they need, or would you say that a significant number of your Medicaid patients do NOT get the brand name prescriptions that they need?

1. Nearly all do get what they need
2. A significant number do not get what they need

[If 2]

Of your Medicaid patients, roughly what percentage do you think are not getting what they need?

0-100

Have you had difficulty in prioritizing the brand name prescriptions that your Medicaid patients get when they need more than 4?

1. Yes
2. No

For those Medicaid patients that do not get the brand names that they need due to the cap placed on the number Medicaid will pay for, which of the following statements best describes the cause:

1. The patient requires more than four brand name prescriptions from me.
2. The patient has one or more other doctors who have prescribed brand name drugs that I am not aware of.

[All doctors]

You have called the help desk to inquire about a Medicaid patient and their need for more than 4 brand name prescriptions. When you have made calls, how often would you say your call was not answered due to a busy signal or a ring with no answer?

1. Almost never
2. Some of the time
3. Most of the time

How often have you been placed on hold?

1. Almost never
2. Some of the time
3. Most of the time

Appendix 2 continued

Have any of your calls to the help desk been prematurely terminated?

1. Yes
2. No

How would you describe the ease of use of the automated answering system. Is it more difficult than you would expect, about what you would expect or easier than you expected?

1. More difficult than I would expect
2. About what I would expect
3. Easier than I would expect

Do you ever have difficulty connecting with a real person?

1. Yes
2. No

Do you feel that the personnel that assist you on the phone are less competent and knowledgeable than you would expect, about as competent and knowledgeable as you would expect or less competent and knowledgeable than you would expect?

1. Less competent and knowledgeable
2. About as competent and knowledgeable
3. More competent and knowledgeable

Overall do you feel that the prior authorization forms are more difficult to complete than you expected, about as difficult to complete as you expected or easier to completed than you expected?

1. More difficult
2. About as difficult
3. Easier to complete

Have you received any acknowledgement, such as a fax or phone call, from Medicaid indicating that they have received your prior authorization documents?

1. Yes
2. No

Based on your experience, about how often are exemptions to the 4 brand name limit granted?

1. All of the time
2. Usually
3. Occasionally
4. Never

When your requests are denied, do you think the reasons are legitimate?

1. All of the time
2. Usually
3. Occasionally
4. Never

Appendix 2 continued

Do you feel that you receive adequate advance notice of policy changes in a timely fashion?

1. Yes
2. No

Do you receive adequate information about 4-brand policy alternatives?

1. Yes
2. No

Do you think the new policy creates problems with continuity of care if the patient uses multiple prescribers and clients?

1. Yes
2. No

Do you think the new policy creates problems with continuity of care if the patient transfers between types of care, such as inpatient to outpatient, or acute to ambulatory or long-term care?

1. Yes
2. No

Do you think the new policy contributes to any problems such as confusion over which drugs are in the current regimen?

1. Yes
2. No

Do you have reports of any problems with early refill limits?

1. Yes
2. No

Do you have any comments about the new policy that have not been covered by these questions?

1. Yes (record answer)
2. No

Ronald Burns, M.D., Florida Medicaid P&T Committee:

- Medicaid patients are socially and economically challenged and have the worse health index. They re also the most venerable segment of society that need to have these early intervention and aggressive treatment of their disease and do not survive step edit therapies very well.
- Diseases management is preferable to continuity of care to reduce health care spending because
- Problems with access to pharmaceuticals will create gaps in care and opportunities for medical errors.
- Step Therapy violates most Physicians Practice Act because it empowers physicians to discuss risk alternatives and benefits of treatments with patients and it is always appropriate to prescribe what is best for the patient rather than follow bureaucratic process.
- The real question is does our rising investment in pharmaceuticals reduce spending in other areas such as ER visits, hospitalization and nursing homes admissions. If aggressive disease management and continuity of care is applied, the answer is yes.
- It is important to embrace the local pharmacists because they are accountable. If the pharmacies are not licensed to practice in North Carolina, there is no accountability as to what will happen to the citizens.
- The seventy-two hour emergency supply reduces the state administrative cost.
- In the resident training program, at least ten encounters daily are lost to provide resources to patients in need because of the prior authorization process.

**TESTIMONY OF MS. MARY MARTIN
CHAIRMAN OF THE BOARD
& EXECUTIVE DIRECTOR
THE SENIORS COALITION**

*February 27, 2002
Joint Sub-Committee on Health and Human
Services
Appropriations
Raleigh, North Carolina*

**IN OPPOSITION TO
PROPOSED DRUG PRIOR AUTHORIZATION
TARGETING NORTH CAROLINA'S
NEEDIEST SENIORS**

Good afternoon. My name is Mary Martin and I come to you as the Chairman of the Board and Executive Director of The Seniors Coalition, a non-profit, non-partisan advocacy group promoting a higher quality of life for seniors across the country and right here in North Carolina.

Today I speak for 47,898 supporters of The Seniors Coalition in this state who share deep concerns about a proposed prior authorization program targeting North Carolina's neediest seniors.

Please bear in mind that I also speak from over 34 years' experience in designing and implementing public health policy at the U.S. Department of Health and Human Services. In my time at the Department, I faced many of the same issues you are confronting now. I sat beside four consecutive HHS Secretaries as they wrestled to find answers to this country's most perplexing healthcare quandaries. Regrettably, there were times when, sitting at that table, we consciously neglected the "Human" in Health and Human Services. It was precisely during those times when we moved ahead too quickly and too rashly with policies that would, we discovered, wreak havoc in the American healthcare system – policies that damaged the lives of the very patients we were entrusted to protect. Worse yet, we found that the task of undoing a policy, once implemented, was far more difficult than putting it into practice. Sadly, some of our most perilous ideas from even three decades ago remain tangled in the system, hurting American patients day by day.

I have followed the recent prior authorization craze with a fierce closeness, watching in dismay as it has swept through state legislatures throughout the nation. Never did I imagine that this short-sighted notion would come to North Carolina, a state whose "greatest strength," according to your Governor, lies in your ability "to reach out to all people." Prior authorization undermines this beautiful statement. It *retracts* that reach, consciously neglecting the "Human" in Health and Human Services. I urge you to reject the proposed prior authorization plan under discussion today for the sake of the North Carolinian patients who will otherwise suffer for years to come.

Let me first remind all of us here that drug prior authorization programs such as the one before us today subvert the fundamental purpose of the Medicaid program – that is, to allow the poorest among us fair and equal access to quality healthcare. In many if not most cases, good citizens find themselves dependent on Medicaid services because they have been stricken with a debilitating illness and have no other means by which to receive treatment. Medicaid at its core is a rehabilitation program that has helped millions of Americans get back on their feet. Prior authorization, by contrast, kicks people when they're down.

Still worse, prior authorization is a dangerous first step toward the destruction of what is the bedrock of American healthcare: The patient-physician relationship.

The relationship between a patient and physician is a relationship of trust, confidence, respect, and concern. It is one of the most sensitive of all human relationships. When patients put their trust in physicians, they are entrusting their health and lives to these professionals. Physicians know what treatment will work best for their patients. That's what they're trained to do and have dedicated their lives to doing. And because of this and the trust that exists between patient and physician, no one and nothing should interfere in the patient-physician relationship. Regardless of the healthcare program or provider—Medicaid, Medicare, or private plans—the sanctity of the patient-physician relationship must be respected and preserved.

Let me reemphasize: Patients and physicians together should decide which medicine will work best, not state bureaucrats. Doctors shouldn't have to justify or defend their drug treatment recommendations to people without medical training, whether they are state bureaucrats or employees of pharmacy benefit companies.

We've learned a lot about medicine over the last several years. And one thing we've learned for sure is that there are significant differences between patients, even between men and women. Our knowledge of the aging process and the physiological complexities that accompany it is limited; we do know, however, that seniors are at a much higher risk for drug-drug interactions and similar complications that render "one-size-fits-all" preferred drug lists impractical at best and life-threatening at worst.

Personal experience probably tells you that a certain drug may give one patient only mild relief from a particular condition, while the same drug can work wonders for another patient. Your teenage daughter may wonder why a smack-dab of Clearasil takes care of her best friend's complexion, while her own responds only to daily doses of Accutane. You see, even with the simplest of conditions, an individual's particular physiological traits play a huge role in determining a treatment's efficacy.

What I find most alarming, perhaps, is that the list of drugs set to be prior authorized in North Carolina include treatments for some of the most complex and disabling conditions, including cancer, chronic renal failure, and rheumatoid arthritis. This, my friends, is a tragedy in the making.

Governor Easley's homepage tells the world that in North Carolina, "Every citizen is important." I urge you to retain the integrity of this message here today by rejecting drug prior authorization for North Carolina's neediest. Thank you very much.

Feb. 27, 2002

Roz Sewitt
NC Child Care Coalition

Two Comments -

1. First: child care subsidy - a program that is critical to North Carolina families. A NC study conducted in the 1990's showed a direct correlation between availability of child care subsidy and fewer families applying for public assistance. The subsidy program will also have a role to play in the "More Than Four" Program
2. Smart Start -

Smart Start has enthusiastically supported early childhood programs designed to improve the development of young children who might need some extra assistance.

As mentioned, S.S. dollars play a significant role in the child care subsidy program, both by providing direct help to families, and by serving as the match for federal block grant money and TANF ^{child care} mof

Because of budget cuts in last year's budget & the current ^{additional} round of cuts, the Smart Start pie is now smaller. That could affect the amount of S.S. dollars going to child care subsidy.

Also, quite a few of the local

"More At Four" pilot projects are being administered by local S.S. partnership out of their existing local S.S. allocations. There are costs to administering a program and when dollars are spent on that, then something else does not get done.

**FACT SHEET: The North Carolina HIV Medications Program (ADAP)
North Carolina Division of Public Health – HIV/STD Prevention and Care Branch**

What is the North Carolina HIV Medications Program?

The North Carolina HIV Medications Program, also referred to as the AIDS Drug Assistance Program (ADAP), uses a combination of State and federal funds to provide low-income residents of the State with assistance in purchasing medications to fight HIV/AIDS and the opportunistic infections which often accompany the disease.

Who is eligible to participate in the Program?

In order for someone to be eligible for ADAP, the individual must:

- Be HIV+ (have HIV disease or AIDS);
- Reside in North Carolina;
- Have a net family income that is at or below 125% of the federal poverty level (see the back of this page for the current FPL for various family sizes);
- Not have any other third-party coverage (e.g., private insurance or Medicaid) that pays for medications; and,
- Have a (or several) prescription(s) for medications that are included in the ADAP formulary (list of drugs that the Program will pay for) – (The medications provided under this Program are limited to those specifically related to the diagnosis and treatment of HIV disease/AIDS - see the back of this page for the current ADAP formulary)

How does someone apply to and get into the Program?

An individual who wants to apply for ADAP coverage should talk to their clinician or the person in the office who deals with bills and/or insurance, their HIV case manager, or someone at one of NC's 14 HIV Care Consortia, at any local/public health department, or at an AIDS service organization/agency. The applicant, with the assistance of these individuals, will complete two forms; one to establish that the individual qualifies financially for the Program, and one to document their HIV+ status and their need for medications provided under this Program. The forms are then sent to the Program for a final determination of eligibility. If the individual is determined to be eligible, they will receive a Program ID card that will enable them to go to their pharmacy and get the medications prescribed for them by their medical care provider that are on the Program formulary.

Is there any cost to the individual?

There is no cost to the individual covered under this Program for the drugs that are on the Program's formulary. The individual is responsible for the cost of any other drugs that they receive which are not covered by the Program.

How does someone get more information about the HIV Medications Program?

For more information about the HIV Medications Program, you may call:

- Arthur Okrent – Manager, AIDS Care Unit, HIV/STD Prevention and Care Branch – (919) 715-3118
- Jenny Seykora – Head, Authorization Unit, Office of Purchase of Medical Care Services – (919) 733-6298

Pharmacies that have questions about the ADAP Program may also call:

- Andy Barrett – Pharmacy Network National Corporation (PNNC) – (919) 876-4642 or 1 (800) 331-7108

[Please see the other side of this page for additional information]

Note: As of November 2001, NC's ADAP eligibility is at or below 125% of the FPL

HIV MEDICATIONS PROGRAM
Listing of Covered Medications
As of November, 2001

antiretrovirals (FDA approved):

stavudine (d4T) - Zerit	zidovudine (AZT) - Retrovir
lamivudine (3TC) - Epivir	didanosine (ddI) - Videx
zalcitbine (ddC) - Hivid	saquinavir - Invirase, Fortovase
ritonavir - Norvir	indinavir - Crixivan
nevirapine - Viramune	nelfinavir - Viracept
delavirdine - Rescriptor	zidovudine and lamivudine - Combivir
efavirenz - Sustiva	abacavir - Ziagen
amprenavir - Agenerase	lopinavir/ritonavir - Kaletra
zidovudine, lamivudine and abacavir - Trizivir	tenofovir - Viread

other medications:

acyclovir - Zovirax	atovaquone - Mepron	azithromycin - Zithromax
clarithromycin - Biaxin	clindamycin - Cleocin	dapsone (DDS) - Dapsone
ethambutol - Myambutol	fluconazole - Diflucan	ganciclovir (DHPG) - Cytovene
hydroxyurea	itraconazole - Sporanox	ketoconazole - Nizoral
leucovorin	nystatin - Mycostatin, Nilstat	paromomycin - Humatin
pentamidine - NebuPent	pyramethamine - Daraprim	rifabutin - Mycobutin
sulfadiazine	omeprazole - Prilosec	lansoprazole - Prevacid
ondansetron hydrochloride - Zofran	Compazine	Phenergan
loperamide	Amitriptyline	Nortriptyline
pancrelipase - Pancreas MT-20	famciclovir - Famvir	valcyclovir - Valtrex
ciproflaxacin hydrochloride - CIPRO	diphenoxylate hydrochloride with atropine sulfate - Lomotil	
sulfamethoxazole/trimethoprim (smx/tmp; tmp-smx) - Bactrim, Septra, Cotrim, Sulfatrim		
valganciclovir hydrochloride - Valcyte		

Decisions about what medications are included within the Program formulary are guided by an HIV Clinical/Medications Advisory Committee. Members of this Committee (clinicians, case managers, HIV program administrators, consumers and others), provide their expertise and perspectives primarily on issues related to the efficacy and importance of new medications. However, they also provide advice on activities related to the operation and effectiveness of the Program. Their perspectives and best thinking on these issues are integrated with considerations about budgetary status and Program/policy regulations and priorities. While final decisions with regard to all of these matters rest with the State agency responsible for administering the Program (i.e., the HIV/STD Prevention and Care Branch of the Division of Public Health, Department of Health and Human Services), the HIV Clinical/Medications Advisory Committee plays an invaluable role in assuring that "real world" experience and expertise are incorporated into the decisions made by and operation of the Program.

[Please see the other side of this page for additional information]

AIDS Drug Assistance Program (ADAP)

- Administered by the HIV/STD Prevention and Care Branch, Epidemiology Section, Division of Public Health
- Eligibility is 125% of the Federal Poverty Level - North Carolina has the lowest eligibility requirement of any state
- 3,401 Individuals authorized for the program in FY2001
- 2,443 Individuals Served by the program during FY2001 – 72% of those authorized
- Cost per Client FY2001 - \$1,247 per month per client
- \$13,819,394 Expended for FY2001

ADAP - Family Income Eligibility

Family Size	100% FPL	125% FPL	150% FPL	175% FPL	200% FPL

Total Expend	\$6,304,771	\$6,877,047	\$9,910,148	\$13,819,394
Authorized	1,776	2,315	2,630	3,401
Served	1,381	1,578	1,895	2,443

Projected ADAP Expenditures

	2000-01	2001-02 (Projected)	2001-02 (July-Dec) Expended	2001-02 (Revised Projected)
State Approp	\$5,375,195	\$6,855,195	\$2,040,216	\$6,855,195
Federal Budget	\$7,526,327	\$9,866,900	\$9,309,396 (includes rebates)	\$11,266,491
Rebates	\$1,299,335	\$1,672,210		\$2,000,000
Total Expend	\$13,819,394	\$18,394,305	\$11,349,612	\$20,121,686

ADAP Increased Utilization

Reasons Suggested by ADAP Staff and Providers

- Economic recession resulting in increased demand for public assistance programs (Nationally ~14 states have had to close or cap ADAP programs)
- 30% Increase in AIDS cases reported in 2001
- Improved HIV medication options resulting in more patients living longer and using medications longer
- Some new treatment protocols require more frequent patient visits
- Improved medications adherence

RE: PRIOR DRUG AUTHORIZATION

TO WHOM IT MAY CONCERN:

In my opinion, obtaining a prior authorization for certain drugs would limit my access to these medicines and also too time consuming. I also feel that specialists should have been consulted in making the decision for prior authorization.

Sincerely,

KI-BONG UM, MD

North Carolina General Assembly

FROM: Senator Ken Moore

DATE: February 27, 2002

SUBJECT: Constituent Letter On Medicaid

I share the attached letter from Valerie Biddix, Certified Pharmacy Technician, Bakersville, NC (Mitchell County).

Her "concerns" are shared and felt by many across my district, and I am sure, across the state.

Thank you.

A handwritten signature, likely of Senator Ken Moore, consisting of a stylized, cursive letter 'K'.

659 Henredon Plant Road
Spruce Pine, North Carolina 28777
January 10, 2002

N.C. Senator Ken Moore
Room 1419, Legislative Building
Raleigh, North Carolina 27601

Dear Senator Moore

I am writing to tell you about a very special lady named Dianne who lives in Spruce Pine. Dianne has been battling cancer for several years and is once again facing major surgery in her struggle. Dianne is in her early 50's, owns her own home, and has been determined to be ineligible for Medicaid assistance. She is unwilling to give up her fight with this disease and therefore is not eligible for Hospice care. Her medication bills are staggering.

I work as a Certified Pharmacy Technician at the drug store Dianne uses. Every day I see Medicaid recipients much healthier than Dianne come by to pick up their diet medications, "nerve" medicines, and other non-life saving prescriptions. Most of these people live in government housing and seem to have resources for cell phones and new model cars.

WHAT IS WRONG WITH THIS PICTURE?

The State Legislature must look at our current Medicaid System. There has to be some way to eliminate the waste and provide assistance to all the "Diannes". Taxpayers have a right to expect that their money is being spent for worthwhile causes.

Thank you in advance for your attention to this matter.

Sincerely,

Valerie Biddix

Valerie Biddix

**DIVISION OF CHILD DEVELOPMENT
PROPOSAL TO BUDGET INCREASE IN CCDF FUNDS**

North Carolina's share of the increase in Child Care and Development Fund (CCDF) Block Grant Discretionary Funds for FFY 2002 is \$2,865,155. We are requesting to budget 75% of the increase for the purposes described below for the current state fiscal year. The remaining 25% will be included in the block grant plan for SFY 2003.

Budget New CCDF Funds:

Purpose	Total Increase Available	75% for SFY 2002
Child Care Subsidies	\$2,550,188	\$1,912,641
Quality Initiatives	\$ 171,709	\$ 128,782
Administration	\$ 143,258	\$ 107,443
Totals	\$2,865,155	\$2,148,866

Child care subsidy funds will be allocated to the county departments of social services using the existing child care subsidy allocation formula.

The CCDF requires that at least 4% of the total grant be spent on activities which improve the quality of child development programs. In addition, the grant includes specific quality allocations for designated populations. Of the \$171,709 additional funds which must be spent on quality activities, approximately \$77,000 are increases to the designated allocations for improvements to infant/toddler care, school-age care and resource and referral funding. The remaining \$94,000 is the increase needed to meet the 4% requirement.

CCDF administration funds are capped at 5% of total grant expenditures. These funds are shared by local departments of social services that administer the child care subsidy program and the Division of Child Development. County DSS's may use 4% of their subsidy allocation to support the costs of managing the program, therefore, an increase in their subsidy allocations may result in an increase in administrative costs.

Federal regulations prohibit the use of new CCDF funds to supplant state funds.

**DHHS RECOMMENDED ALLOCATION
CHILD CARE AND DEVELOPMENT FUND (BLOCK GRANT) DISCRETIONARY FUNDS**

DEPARTMENT OF HEALTH AND HUMAN SERVICES
RECOMMENDATIONS FOR THE UTILIZATION OF ADDITIONAL LOW INCOME
HOME ENERGY ASSISTANCE BLOCK GRANT PROGRAM FUNDS

January 25, 2002

The original 2002 Low Income Home Energy Assistance Program (LIHEAP) Block Grant approved by the General Assembly was based on instructions from the U.S. Department of Health and Human Services (DHHS) to use \$19,849,341 as the amount for North Carolina's block grant. Subsequent to legislative approval of the 2002 LIHEAP Block Grant, US DHHS notified North Carolina that funding for the current year would be \$25,608,809, an increase of \$5,759,468 above the original funding level. The Department developed an allocation plan for the additional funds, which was approved by the Joint Legislative Commission on Governmental Operations on January 16, 2002. On January 17, 2002 notification was received from federal DHHS that as a result of additional funding provided by the Administration for LIHEAP, the approved federal funding level for North Carolina's 2002 LIHEAP Block Grant would be \$31,257,245, an increase of \$5,648,436 above the previous amount of \$25,608,809.

The Department of Health and Human Services recommends that the additional funds be allocated to the Crisis Intervention Program (\$4,173,436); Weatherization Program (700,000); Heating Air Repair and Replacement Program (\$300,000); and for administrative costs (\$475,000) associated with automating Crisis Intervention Program data and administering the Weatherization Program at the state and local levels. This recommendation is for activities that are within the scope of the block grant plan approved by the General Assembly.

CRISIS INTERVENTION PROGRAM

To date a total of \$7,472,380 has been earmarked for CIP funding, with \$5,795,825 approved by the General Assembly in the original block grant allocations and \$1,676,555 approved by the Joint Legislative Commission on Governmental Operations on January 16, 2002. The \$1,676,555 and \$4,173,436 of additional funds will enable the State to meet the needs of counties for additional CIP funding. The Department completed a survey of counties in January 2002 to determine the need for additional funding to support requests for crisis assistance by families. Through the January survey, counties requested more than \$8.5 million dollars above the initial allocation to support the CIP Program at the local level. The recent snow and cold temperatures, as well as job losses caused by the economic downturn, are placing increasing demands on counties for crisis assistance, and in many counties the demands are greater than available resources. These additional funds will support approximately 50 percent of the funding needs identified by counties and bring the CIP funding total for SFY 2002 to \$11,645,816.

WEATHERIZATION

The Department recommends an additional \$700,000 for the Weatherization Program. Currently funded by LIHEAP at \$2,984,116 (which represents \$2,684,116 from the original plan and \$300,000 approved the Joint Legislative Commission on Governmental Operations on January 16, 2002), the increase brings the new recommended budget to \$3,684,116. At an average cost of \$2500 per unit, the program estimates the increase of \$700,000 in funds for weatherization activities will allow an additional 280 units to be weatherized. Weatherizing the homes of the state's elderly, disabled and families with children creates both immediate and ongoing savings to the affected households.

HOME AIR REPAIR AND REPLACEMENT PROGRAM

An estimated 136 heating/air systems of low income families will be repaired or replaced with the additional \$300,000 recommended by the Department for the Home Air Repair and Replacement Program. The HARRP is a companion to the Weatherization Program in that in crisis situations it

provides funds to repair or replace heating/air systems in homes that have been weatherized. HARRP was originally funded at \$1,252,588 and received no additional funding with the January 16, 2002 adjustment.

ADMINISTRATION

The DHHS Plan recommends \$475,000 for administrative costs of the LIHEAP Block Grant programs. Of this total, the Department recommends that \$375,000 be used to automate the CIP Program which is currently not automated. Currently, manual surveys of counties must be conducted in order to get timely information regarding program expenditures and balances. In addition, all reporting of families served through the CIP Program is done manually by counties at the end of the year in order to comply with federal reporting requirements. An automated CIP system will provide greater integrity to the program and enable the Department to track expenditures and balances in a more timely manner, as well as respond timely to legislative inquiries regarding families served and the completion of federal reports. The remaining \$100,000 recommended for administrative cost will support state and local administration of the Weatherization Program.

The federal government allows up to ten percent of the LIHEAP funds to be used to offset administrative costs associated with administering the LIHEAP Block Grant. (Therefore, up to \$564,843 of the additional \$5,648,436 is eligible be used to support administrative costs.) The Department recommendation allocates less than the total allowable for administration while funding critical administrative needs and allocating the balance to direct service programs.

FACT SHEET: The North Carolina HIV Medications Program (ADAP)
North Carolina Division of Public Health – HIV/STD Prevention and Care Branch

What is the North Carolina HIV Medications Program?

The North Carolina HIV Medications Program, also referred to as the AIDS Drug Assistance Program (ADAP), uses a combination of State and federal funds to provide low-income residents of the State with assistance in purchasing medications to fight HIV/AIDS and the opportunistic infections which often accompany the disease.

Who is eligible to participate in the Program?

In order for someone to be eligible for ADAP, the individual must:

- Be HIV+ (have HIV disease or AIDS);
- Reside in North Carolina;
- Have a net family income that is at or below 125% of the federal poverty level (see the back of this page for the current FPL for various family sizes);
- Not have any other third-party coverage (e.g., private insurance or Medicaid) that pays for medications; and,
- Have a (or several) prescription(s) for medications that are included in the ADAP formulary (list of drugs that the Program will pay for) – (The medications provided under this Program are limited to those specifically related to the diagnosis and treatment of HIV disease/AIDS - see the back of this page for the current ADAP formulary)

How does someone apply to and get into the Program?

An individual who wants to apply for ADAP coverage should talk to their clinician or the person in the office who deals with bills and/or insurance, their HIV case manager, or someone at one of NC's 14 HIV Care Consortia, at any local/public health department, or at an AIDS service organization/agency. The applicant, with the assistance of these individuals, will complete two forms; one to establish that the individual qualifies financially for the Program, and one to document their HIV+ status and their need for medications provided under this Program. The forms are then sent to the Program for a final determination of eligibility. If the individual is determined to be eligible, they will receive a Program ID card that will enable them to go to their pharmacy and get the medications prescribed for them by their medical care provider that are on the Program formulary.

Is there any cost to the individual?

There is no cost to the individual covered under this Program for the drugs that are on the Program's formulary. The individual is responsible for the cost of any other drugs that they receive which are not covered by the Program.

How does someone get more information about the HIV Medications Program?

For more information about the HIV Medications Program, you may call:

- Arthur Okrent – Manager, AIDS Care Unit, HIV/STD Prevention and Care Branch – (919) 715-3118
- Jenny Seykora – Head, Authorization Unit, Office of Purchase of Medical Care Services – (919) 733-6298

Pharmacies that have questions about the ADAP Program may also call:

- Andy Barrett – Pharmacy Network National Corporation (PNNC) – (919) 876-4642 or 1 (800) 331-7108

[Please see the other side of this page for additional information]

HIV MEDICATIONS PROGRAM
Listing of Covered Medications
As of November, 2001

antiretrovirals (FDA approved):

stavudine (d4T) - Zerit	zidovudine (AZT) - Retrovir
lamivudine (3TC) - Epivir	didanosine (ddI) - Videx
zalcitbine (ddC) - Hivid	saquinavir - Invirase, Fortovase
ritonavir - Norvir	indinavir - Crixivan
nevirapine - Viramune	nelfinavir - Viracept
delavirdine - Rescriptor	zidovudine and lamivudine - Combivir
efavirenz - Sustiva	abacavir - Ziagen
amprenavir - Agenerase	lopinavir/ritonavir - Kaletra
zidovudine, lamivudine and abacavir - Trizivir	tenofovir - Viread

other medications:

acyclovir - Zovirax	atovaquone - Mepron	azithromycin - Zithromax
clarithromycin - Biaxin	clindamycin - Cleocin	dapsone (DDS) - Dapsone
ethambutol - Myambutol	fluconazole - Diflucan	ganciclovir (DHPG) - Cytovene
hydroxyurea	itraconazole - Sporanox	ketoconazole - Nizoral
leucovorin	nystatin - Mycostatin, Nilstat	paromomycin - Humatin
pentamidine - NebuPent	pyramethamine - Daraprim	rifabutin - Mycobutin
sulfadiazine	omeprazole - Prilosec	lansoprazole - Prevacid
ondansetron hydrochloride - Zofran	Compazine	Phenergan
loperamide	Amitriptyline	Nortriptyline
pancrelipase - Pancreas MT-20	famciclovir - Famvir	valcyclovir - Valtrex
ciproflaxacin hydrochloride - CIPRO	diphenoxylate hydrochloride with atropine sulfate - Lomotil	
sulfamethoxazole/trimethoprim (smx/tmp; tmp-smx) - Bactrim, Septra, Cotrim, Sulfatrim		
valganciclovir hydrochloride - Valcyte		

Decisions about what medications are included within the Program formulary are guided by an HIV Clinical/Medications Advisory Committee. Members of this Committee (clinicians, case managers, HIV program administrators, consumers and others), provide their expertise and perspectives primarily on issues related to the efficacy and importance of new medications. However, they also provide advice on activities related to the operation and effectiveness of the Program. Their perspectives and best thinking on these issues are integrated with considerations about budgetary status and Program/policy regulations and priorities. While final decisions with regard to all of these matters rest with the State agency responsible for administering the Program (i.e., the HIV/STD Prevention and Care Branch of the Division of Public Health, Department of Health and Human Services), the HIV Clinical/Medications Advisory Committee plays an invaluable role in assuring that "real world" experience and expertise are incorporated into the decisions made by and operation of the Program.

[Please see the other side of this page for additional information]

AIDS Drug Assistance Program (ADAP)

- Administered by the HIV/STD Prevention and Care Branch, Epidemiology Section, Division of Public Health
- Eligibility is 125% of the Federal Poverty Level - North Carolina has the lowest eligibility requirement of any state
- 3,401 Individuals authorized for the program in FY2001
- 2,443 Individuals Served by the program during FY2001 – 72% of those authorized
- Cost per Client FY2001 - \$1,247 per month per client
- \$13,819,394 Expended for FY2001

Rebates	\$1,299,335	\$1,672,210		\$2,000,000
Total Expend	\$13,819,394	\$18,394,305	\$11,349,612	\$20,121,686

ADAP Increased Utilization

Reasons Suggested by ADAP Staff and Providers

- Economic recession resulting in increased demand for public assistance programs (Nationally ~14 states have had to close or cap ADAP programs)
- 30% Increase in AIDS cases reported in 2001
- Improved HIV medication options resulting in more patients living longer and using medications longer
- Some new treatment protocols require more frequent patient visits
- Improved medications adherence

Note: Areas shaded in gray are final figures for the respective month.

S.L. 2001-424 (S-1005), Section 5.1 (v)---TANF CASH ASSISTANCE RESERVE

SECTION 5.1.(v) The sum of nine million one hundred forty-seven thousand six hundred thirty-one dollars (\$9,147,631) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services for a Cash Assistance Reserve may only be used for cash assistance payment if the funds appropriated in this act for cash assistance payments are not sufficient to pay Work First cash assistance in the 2001-2002 fiscal year. Prior to the use of these funds, the Office of State Budget and Management shall review all proposals for expenditure of these funds in order to ensure compliance with this subsection.

The sum of two million five hundred twenty-eight thousand nine hundred ninety-three dollars (\$2,528,993) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services for a Cash Assistance Reserve shall be held in the Cash Assistance Reserve until the Department of Health and Human Services and the Office of State Budget and Management can certify that these funds are not needed to ensure the continuation of the Work First Family Assistance payments to recipients during the 2001-2002 fiscal year. These funds may be used only for the payment of Work First Family Assistance and the allocations listed in this subsection.

If the Department of Health and Human Services and the Office of State Budget and Management certify that these funds are not needed to ensure the continuation of Work First Family Assistance payments, the Department may make the following transfers from the Cash Assistance Reserve:

(1)	Reduction of out-of-wedlock births.	\$160,000
(2)	Work First Job Retention - Rural Center (\$30,000) Work Central Career Center (\$20,000)	\$50,000
(3)	Teen Pregnancy Prevention	\$223,926
(4)	Work First Housing Initiative	\$300,000
(5)	Domestic Violence Prevention and Awareness	\$100,000
(6)	Intensive Family Preservation Program	\$200,000
(7)	Work First Boys and Girls Clubs	\$100,000
(8)	Support Our Students	\$275,674
(9)	Residential Substance Abuse Services for Women with Children	\$500,000
(10)	Domestic Violence Services for Work First Families	\$200,000
(11)	After School Services for At-Risk Children	\$300,000
(12)	Individual Development Accounts	\$20,000

S.L. 2001-513 (H-231) Section 33 --- **CASH ASSISTANCE PAYMENTS**

SECTION 33. Section 5.1 of S.L. 2001-424 is amended by adding a new subsection to read:

"SECTION 5.1.(bb) If the Department of Health and Human Services determines that sufficient funds are not available within the Work First Cash Assistance Program and the Cash Assistance Reserve to provide cash assistance payments to all eligible families in the 2001-2002 fiscal year, the Department may reduce the allocations under the TANF Block Grant in this section to non cash assistance programs and services in order to ensure that cash assistance payments to all eligible families continue throughout the 2001-2002 fiscal year."

Bridge Financing

This document provides a narrative description of the attached spreadsheet summarizing the process of moving from state facility based services to community-based supports, services, care and treatment. The Bridge concept includes two necessary and key funding mechanisms -- the MH/DD/SA Trust Fund, and Realignment/Community Capacity Reinvestment.

The principles of these components of the overall finance strategy necessary for the implementation of the Secretary's State Plan are:

- One-time, short term start-up efforts necessary for community capacity building.
- Ongoing resource support tied to movement of consumers to the communities from the state-operated facilities. This activity is referred to as realignment of funding.
- Creation of services as needed for those consumers who are identified and ready for community placement.
- Establishment of services and expansion of community capacity to divert admissions to state facilities.
- Utilization of initial and ongoing local business plans which are critical in determining the amount of unmet need and community demand that will be financed through both increased efficiencies by the LMEs (and their service providers) and realignment of funding/community capacity reinvestment (state facilities resources to community).
- Flexible and bridge type funding is necessary in order to support individual service plans as outlined through best practices, and emerging best practices, and which include support and recovery models of service delivery.

Expansion of community capacity and client movement from state facilities will be reported as part of the quarterly reports submitted to Legislative Oversight Committee in order to demonstrate parts of the system reform and accountability for use of the trust fund.

Realignment of Funds/Mental Health, Developmental Disabilities and Substance Abuse Services Community Capacity Reinvestment

In the process of moving from state operated facility based services to a comprehensive community based system of supports, services, care and treatment, the realignment of resources will be necessary. This realignment of resources becomes a community capacity reinvestment. Simply stated, as individuals exit state facilities, the financing of their community needs will come directly from the resources that become available as a result of the bed reduction and overall facility downsizing. These funds will then be realigned in a planned effort support the individual as needed in the community and to respond to unmet community need and general community demand (e.g. as a response to

target population and priority service needs). This development equates to community capacity building which is essential to ensure the maintenance of community efforts to provide supports and services to the current and expanding targeted service population.

Each fiscal year, a projection of the financing available for funding realignment will be developed. In conjunction with review and comment from the Coalition, developed criteria will be used for realignment efforts. The criteria will minimally consider 1) estimates of target population as related to service rates through out the state; 2) empirically based information related to population and service needs; and 3) efforts to move forward with regard to local funding fairness considerations. The criteria would be distributed to LMEs as opportunities to request funding. The Coalition will be partners in review and will make recommendations to the Division of MH/DD/SAS Director, who is in turn responsible for the final decision. It also should be noted that the performance of the LME would be considered in any realignment efforts; however, any LME-identified performance problems will not be a hindrance for serving the target population.

Each year, a small portion of the realignment funds will be applied as one-time transition funding. These will be used only if there are no trust funds available. After one time use, these funds will be considered as base realignment funds and will be subject to the same allocation process as described above.

In line with the expressed purpose of the Trust Fund, there is a significant need for bridge funding in the community in order to transition individuals from state facilities to community-based services. Bridge funding will be needed for the full range of services for all ages and disabilities. Bridge funding will be short-term in nature and, in general, recurring funds to support ongoing services will be derived from savings in state institutions, additional Medicaid earnings, potential utilization of CAP slots, and realignment of resources which may occur as a result of eliminating funding disparities in accordance with G.S. 122C-102 from the Reform Bill.

Examples for needs to be addressed by bridge funding include: (a) meaningful employment and supported employment, (b) crisis and emergency services, (c) equipment purchases, (d) rental deposits, (e) specialized adaptive and medical equipment, (f) assessments, (g) short-term inpatient care, (h) day treatment or partial hospitalization, (i) system of care, (j) family and consumer support development, (k) First in Families, and (l) outpatient services.

MH/DD/SA Trust Fund

The expected accomplishments from the use of this trust fund and implementation of this plan as it supports the State Plan are as follows:

- **Child and Family Institutions.** During FY 03, the 36 beds currently in operation at Whitaker School will be closed. As a result, two 18 bed regional facilities will be developed utilizing the Re-Education philosophy. \$1,200,000 in one-time funding from the Trust Fund is requested in SFY 02 to

provide \$600,000 start-up funding for each of the proposed two 18 bed regional facilities. \$44,000 in Trust funds is also requested in SFY 02 to accomplish community service planning for children currently at Whitaker School in preparation for community transition and those on the waiting list. Subsequent years of operation utilize realignment of funds.

II. Adult Mental Health Institutions

- By July 1, 2002, a total of 63 nursing beds at Broughton, Cherry and Umstead hospitals will be eliminated. Movement of these individuals will be to existing private nursing home beds or N.C. Special Care Center. No additional funding requested in SFY 02, as individuals would move into existing but vacant nursing beds.
- 39 beds will be closed at the Wright Building, Dix Hospital by July 1, 2002. Transition plans have been received from the area programs (LMEs) in the South Central Region. Allocations will be made to the region within 90 days from date of approved plans but no later than June 30, 2002, in order to meet the July 1, 2002 timeline for the closure of the Wright Building. \$1,500,000 requested from the Trust in SFY 02 only for bridge funding to develop community resources prior to realizing savings beginning in SFY 03.
- During FY 03, an additional 162 adult and child beds will be eliminated in the state hospitals and community capacity expanded. The bed reductions will include 50 gero-psychiatric beds, 62 adult long-term care beds, 40 nursing beds, and 10 child beds. These bed reductions will result in realignment of funding for community services with no funds required from the Trust.

III. Mental Retardation Centers

- In SFY 03, additional MRC downsizing will occur with an estimated 144 individuals moving from the MRC's into community placements. Individuals leaving the Mental Retardation Centers will be given priority for the CAP-MR/DD program. Cost of serving these individuals in the community will be addressed by the realignment of State facility funds into community services and resources from the Trust Fund are not requested.
- Realignment of Black Mountain Center to a nursing facility in SFY 03 for people with developmental disabilities will require movement of some of the existing residents (12) to the community and limited internal movement of individuals among Mental Retardation Centers. This allows for lower per day cost than current ICF-MR rates received in the MR centers. No trust funds are requested for this change and the cost of community services will be addressed by the realignment of funds from Black Mountain Center to the community.

- MRC Satellite Homes: Start-up and short-term operational funds for the development of satellite housing, initially operated by the Division out of the MRC's. Homes would be implemented by the Division to meet needs of hard-to-serve individuals and would eventually be turned over to other providers to operate. Recurring resources for program operations would be generated via savings from State institutions as a result of downsizing and eligibility for Medicaid and other resources. \$2,000,000 is requested from Trust in SFY 02 as start-up funding for 40 community based 5-bed residential facilities (\$50,000 per facility for van, equipment and other one-time start-up costs.). These facilities would allow for the transition of individuals from the MR Centers to community placements, with 200 such placements beginning in SFY 03.

Realignment Funding Investments

- IV. Substance Abuse Institutions – ADATC's - Reinvestment - \$1,900,000 from Trust for renovation and start-up to establish 3 acute detoxification units in the 3 ADATC facilities (estimated \$633,333 per unit).**

Design, renovation and equipment funds to establish 88 acute detoxification and crisis beds in the three state alcohol and drug abuse treatment centers. Establishment of these beds is for the expressed purpose of reducing and diverting 3,700 substance abuse admissions to the state hospitals.

- V. Transition Plan - Reinvestment - \$1,794,891 from Trust in SFY 02**

1. One-time resources to support cost modeling and related technical assistance for service implementation, LME function, family/consumer education under the new State Plan and Reform Bill.
2. One-time resources for non-recurring area program and county model conversion costs associated with updating billing and client reporting in accordance with the DHHS/DMHDDSAS Integrated Payment and Reporting System (IPRS). IPRS allows for tracking of individual client budgets as well as clear delineation of accountability by funding source. It further establishes coordination of funding sources between Medicaid and state/federal allocations thus eliminating duplication of payments.
3. Renovation to NC Special Care Facility allows for the creation of a locked unit so approximately 20 patients can be transferred from the state psychiatric hospital. This change helps address the downsizing of the state hospitals, and identified target populations for the North Carolina Special Care and state hospitals.

VI. Community Capacity Reinvestment

Community Housing - \$3,952,077 in SFY 02 (\$3,563,373 from Trust and \$388,704 from Realigned Funding).

Decent, affordable and adequate community-based housing options continue to be one of the greatest unmet needs throughout the state. Without housing, the structure of community-based services falters and individuals become homeless, enter state facilities or increase stress for family members and support systems. Housing options are also a prerequisite for the movement of individuals into community settings in compliance with the Olmstead decision. With an increase in the supply of community housing options, a number of individuals who reside in more restrictive residential settings could be stepped down to other arrangements, while freeing up the more housing for individuals with needs for greater residential supports. The following benchmarks have been established for implementation:

- Approximately 1,000 people currently residing in the state hospitals have been identified through Olmstead assessments for community placements.
- 100 people currently residing in the MR Centers have been identified through Olmstead assessments for community placements.

In order to accomplish movement and diversion from state facilities, housing investment options include the following. All options require demonstration capacity of appropriate service and/or supports for clients with mh/dd/sa challenges.

- Revolving Loans: In order to develop community living situations, resources must be made available to providers as a facilitating incentive. Start-up costs, leasing, and purchasing make it difficult unless appropriate upfront resources are available. The Trust Fund could be utilized to establish a revolving loan fund, to be paid back by providers desiring to develop community residential options. Loans could be paid back at low interest rates, while the state retains an ownership interest during the repayment period. This would allow development of residential options for individuals waiting for such a community opportunity. These funding options support the development and expansion of inclusive housing options for people with disabilities. The Fund would be revolving and self-sustaining by funds paid back to the state against the initial loan.
- Leveraged Option: An allocation of one-time funding from the Trust Fund could provide for a partnership with the North Carolina Housing Finance Agency to leverage a portion of their Housing Trust Fund or Federal HOME allocation to develop a model for this purpose. Ongoing operating subsidies would be pursued through project based rental assistance, bridge funding until

tenants could access tenant based assistance, etc. Housing Works, Inc., a non-profit entity under contract with the Division, could also serve as a Division partner and intermediary in building housing capacity across disabilities and working with the North Carolina Housing Finance Agency. Housing Works, Inc., has the housing expertise to represent the Division's interest in various business and partner relationships to leverage other Federal, State or private housing resources.

- Grants: Limited funding for relatively minor renovations or repairs which would enable an individual to remain in an independent living situation rather than requiring a more costly out-of-home placement. Small grants of this nature may also be utilized for minor renovation and remodeling to perhaps add one or two beds to an existing residential resource.

Transportation – Separate funds not requested specifically for transportation; funding integrated with overall community services.

Transportation continues to be another highly visible identified unmet need from consumers, family members and service providers. Transportation is a key support to enable individuals to access community-based services and remain in the community. A national problem, transportation must be viewed in terms of overall community need and build the community, not establish isolated transportation options. Options include:

1. Grants: Resources directed to service providers for the one-time purchase of vehicles to improve transportation and service access. This may include vans for group homes, day treatment facilities, developmental day centers, etc.
2. Leveraged Option: Potential for grants to Local Interagency Transportation Councils specifically for the purpose for increasing service access for individuals served in the MHDDSAS system. Funds through local Councils could be leveraged to secure matching grants from Federal and other funding sources.

JOINT SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES APPROPRIATIONS

Wednesday & Thursday
February 27-28, 2002
Legislative Office Building, Room 643

February 28, 2002
9:00 am – 12:00 pm

Updates on DHHS Programs:

JOINT APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

FEBRUARY 28, 2002

9:00 AM

ROOM 643, LOB

The Joint Appropriations Subcommittee on Health and Human Services met February 28, 2002 at 9:00 AM in Room 643 of the Legislative Office Building. Members present were: Representatives Nye and Earle, Co-Chairs, Representatives Church, Esposito, and Insko. There were four senators present.

Representative Nye presided and called the meeting to order. The first presenter was Pheon Beal, Director, Division of Social Services. She discussed the Temporary Assistance for Needy Families (TANF) Block Grant. (See Attachment 1, Work First Caseload Report). She reviewed Work First Cash Assistance Program. She gave a brief background. The basic components of the block grant are cash assistance, support services, which are primarily employment program services, and child welfare. The General Assembly has a responsibility of annually allocating the TANF Block Grant funds. The majority of the funds are allocated for cash assistance, county block grants, childcare assistance, and child welfare related items. The state is required, as a condition of receiving 302 million dollar per year Base Block Grant along with the Supplemental Block Grant, to match that with "Maintenance of Effort Requirement" in non-federal funding of approximately 164 million dollars. The funds are used primarily to provide cash assistance for eligible families, childcare, welfare services, and to fund county block grants. A large portion of the county block grants are used to cover many of the services formally funded through DAFDC emergency assistance program, which is basically child welfare and support services for families.

Ms. Beal continued by stating the Work First Program began in 1995. The state has experienced a 62% cash assistance caseload decline. This decline has allowed funding opportunities for other TANF related initiatives, such as after school programs, housing, faith-based services, and fatherhood and family formation programs. However the new North Carolina reality is that cash assistance caseloads have increased by more than 7%. More families coming in to apply for cash assistance and fewer families leaving cash assistance caseload, due to a slower economy, is the cause of the increase. North Carolina has successfully piloted a TANF Child Welfare Collaborative. Childcare is a critical element in moving families from cash assistance to employment.

Representative Nye noted that there were 114,000 when Work First started and now there are 45,000. This means the program is an overwhelming success. Ms. Beal stated that was correct, and it is due in large part to the counties. He asked Ms. Beal what factors she attributes this to. She attributes it to first and foremost a shift in the program. This isn't something that is a handout, but something to move people toward self-sufficiency.

They have over an 80% retention rate in the workforce so far in Work First. The biggest problem is helping them move up in their job.

Senator Moore asked for a listing of the current faith-based programs and the activities that are taking place in them, and also the number of dollars that are allocated to them. Ms. Beal stated she would provide that information to him. She noted there are a couple of contracts they have with Catholic Social Ministries that primarily targets Hispanic /Latino families. They have also worked with the General Baptist State Convention. They have expended a little over \$3.3 million in TANF funding for faith-based initiatives. Senator Moore asked for that in writing.

The next presenter was Dr. Leah Devlin, Director, Division of Public Health. She reviewed the handout titled ADAP Increased Utilization, which is the AIDS Drug Assistance Program (See Attachment 2). She noted that, in North Carolina, HIV is eleven times more predominate in the African American Community. It occurs twice as frequently in the American Indian population. It occurs four times more frequently in the growing Hispanic population. Currently over 70% of HIV/AIDS occurs in African Americans. There are over 15,000 people living with HIV/AIDS in the state. Last year the caseload was increased by 30%. The AIDS Drug Assistance Program pays for HIV/AIDS drugs. Representative Esposito stated she read an article in the paper concerning HIV. People are living much longer now because of the medications and medical care they are receiving. She asked how rates compare with other states and also the cost differentiation between what the state is now experiencing because of the longer life of the patient due to the medications they receive. Ms. Devlin stated she would refer that question to Dr. Steve Cline with the Department.

Representative Nye reported to the committee that there were some counties on Work First that are entitled to some blue ribbons; Alamance, Clay, Dare, Granville, Pamlico, Person, Rutherford, Sampson, Stanly, Stokes, and Surrey.

Dr. Steve Cline, with the Department of Public Health, addressed the committee. He responded to Representative Esposito's question and stated he could not answer her question specifically. It is true that people with HIV are living longer with the disease. They are able to stay in the workforce longer, being productive members and off the program longer, but it doesn't lower the demand for the lower income patients that are currently eligible. They know that when the program is open, they enroll 90 to 100 new patients each month, but they haven't been able to do that since December 15th when they capped the enrollment based on current budget availability.

He continued explaining the handout detailing the program. Eligibility is 125% of the Federal Poverty Level. North Carolina has the lowest eligibility requirement of any state. The legislature authorized raising eligibility level to 150% and then to 175%, however they haven't been able to due to limited resources. They implemented a new information management system that was part of a special provision during the last legislative session. As a result of that, they now have a contract with a pharmacy benefits manager. This gives all enrolled clients a pharmacy card that allows them to take the card to almost

any pharmacy in the state and receive benefits. The advantage to the department is that it is part of an automated electronic system so they can know that day when the program expenditure occurred.

He reviewed the history of expenditures. They participate in the federal rebate programs so they are able to get some money back from the pharmacy manufacturers based on actual expenditures in the state. Senator Forrester asked how many patients there are with AIDS in North Carolina. They estimate about 12,000 patients are living with HIV disease. Senator Forrester asked how many of them are Medicaid patients. Dr. Cline stated he doesn't have that information, because HIV disease is reportable, but it doesn't make a patient eligible for ADAP until they become AIDS disabled. AIDS is an eligibility category for Medicaid. They estimate about one third are Medicaid eligible. He asked if the patients get a three-month supply of medication to reduce dispensing cost. Dr. Cline responded they get a one-month supply because it helps them keep up with it better.

Representative Earle stated she will be attending the National STD Conference and asked if there was something significant about what North Carolina was doing. Dr. Cline responded that North Carolina is one of CDC's Syphilis elimination states. While it isn't directly related to the ADAP program, a patient with Syphilis is five to seven times more likely to contract HIV disease if they are exposed. They are trying to eliminate Syphilis in the state in hopes that it will bring down the HIV rate. They have data that shows when Syphilis goes up, about a year later, HIV goes up in the communities.

Representative Nye asked if the PBM Program was on a contract basis or was a consultant asked to do the work. Dr. Cline responded it was a contract they put on bid and is the same contractor vendor that the Pharmacy Assistance Program uses for the elderly. It has been a very good experience working with them. The eligibility application is sent to the Purchase of Medical Care Unit in the Controllers office and they determine eligibility. They let the Pharmacy Benefits Manager know whether or not the client is eligible. They keep a current list of who is eligible.

Dr. Richard Visingardi, Director of the Division of Mental Health, Developmental Disabled, and Substance Abuse Services (MH/DD/SAS), was recognized to address the Committee concerning the Mental Health Trust Fund. (See Attachments 3 and 4) He gave a brief history of the fund and talked also about the general direction of moving from state facility based services to community-based supports, services, care and treatment. The Bridge concept includes two necessary and key funding mechanisms—the MH/DD/SA Trust Fund, and Realignment/Community Capacity Reinvestment.

Representative Nye asked if there were any questions for Dr. Visingardi and stated he had a question concerning Whitaker School. He pointed out that they were planning to close the school because of the building and it appears to him that when there are thirty-five students coming from training schools, group homes, psychiatric hospitals, one coming out of the community, and four from private hospitals, it would be better to add an area to the training school for these students than to build a new facility. Dr.

Visingardi's response was that in the future the students might be coming from other areas.

Representative Insko asked Dr. Visingardi if he had been in his job as director long enough to make an assessment of bridge money needed over the next few years to accomplish what they want to accomplish. He said he doesn't feel qualified in making an assessment now, but the key thing is to stay focused so that those funds that are currently being expended in state based programs will transfer with people into the community. Some states have made errors by looking at pure cost saving measures. It is moving dollars into the community because the long-range benefit is there will not be the front door demand and communities will learn how to support people with disabilities. The second thing that he needs to study more and understand is what the current provider systems and area programs are doing so he can look at what models of practice they are applying to see what the volume and cost is to help with better efficiency to produce a better return. Dr. Visingardi ended his presentation.

Rep. Nye stated the members had a handout of block grant changes to take home to read and it would not be on the program.

Rep. Nye stated the committee was ready to hear public comments and asked if anyone wanted to make a public comment concerning anything discussed in the meeting or in the meeting on the preceding day.

Ms. Louise Fisher, advocate for the mentally ill, stated that is sounded good to hear that the money would follow patients from the facilities to the community, but she wanted to see it happen. Her concern is that there are people in community that are not getting adequate services now, so what will happen to the ones coming from state institutions.

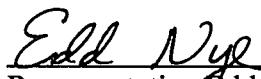

Ms. Melissa Bishop Murphy, Pfizer Drug Company, addressed the committee concerning the Medicaid Prior Approval process to be implemented March 4, 2002. She stated the state of Georgia had tried this process and did not have good results. They spent over one million dollars on the prior approval request and 90% of the requests were approved. They were not saving any money with prior authorization in Georgia. She stated clearly the Medicaid had a serious task to reduce the Medicaid budget. Pfizer stands ready to help save money without impacting on patient care. There are two opportunities that Pfizer is supportive of to help with this. One is disease management and the other is health literacy. They are asking for a postponement of the March 4, 2002 implementation of the prior approval process to give the industry and Pfizer time to meet with the Department to come up with other alternatives to save money. Rep. Nye asked that she provide a copy of what they have done in disease management and health literacy in other states to the Department. She stated she was planning to meet with the Department and would give them that information. She stated that prior approval could be of benefit in certain situations such as when there is a real problem with a particular drug. In Georgia currently they do have prior approval but it is for a very small list of drugs and was developed with local pharmacist, physicians, and the industry. Rep. Nye asked Ms. Bishop-Murphy if Pfizer had a low income, senior citizen program as some other

companies have. Ms. Bishop-Murphy stated Pfizer has a program coming out March 1st. called the Pfizer Share Card. This allows them to receive their prescription for \$15.00. This money goes for the dispensing fee. Representative Earle noted there are about five or six other drug companies that have similar programs.

Senator Moore asked for staff direction concerning the Step Treatment Program discussed the previous day. He said it seems that the Patients Bill of Rights for private insurance prohibits this and yet the Department seems to be including it for Medicaid. He expressed confusion and would like staff analysis concerning this. Rep. Nye stated he would ask Ms. Linda Attarian, staff attorney, to look into this. Senator Moore told the members he handed out to each of them a copy of a letter he received from a Certified Pharmacy Technician concerning Medicaid recipients. He asked if staff could further analyze whether or not there could be local flexibility in the Medicaid program at the local level for determining whether or not someone should or should not qualify for treatments. He stated that in talking to his local departments of Social Services, pharmacists, and others that if there could be some input, there could be some better priority setting at the local level. He requested that there be discussion between staff and the Department to see if this is permissible. Rep. Nye asked if he had shared the letter with the Department and stated he would ask staff to look into it.

Mr. George Erving, Taskforce Chairman for the Pharmaceutical Manufacturers in North Carolina, stated that for the record he wanted to say that all of the participating Pharmaceutical Companies in the Taskforce have patient assistance programs that are unparalleled in both their dollar and prescription effort levels to citizens in the state. Rep. Nye responded that he would furnish him a copy of the letter Senator Moore gave to the Committee so he could ask his association to review it to see if the person written about in the letter might be eligible for some of the free drugs.

The meeting was adjourned at 10:45 A.M.

Representative Edd Nye, Co-Chair

Jo Bobbitt, Committee Assistant

S.L. 2001-424 (S-1005), Section 5.1 (v)---TANF CASH ASSISTANCE RESERVE

SECTION 5.1.(v) The sum of nine million one hundred forty-seven thousand six hundred thirty-one dollars (\$9,147,631) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services for a Cash Assistance Reserve may only be used for cash assistance payment if the funds appropriated in this act for cash assistance payments are not sufficient to pay Work First cash assistance in the 2001-2002 fiscal year. Prior to the use of these funds, the Office of State Budget and Management shall review all proposals for expenditure of these funds in order to ensure compliance with this subsection.

The sum of two million five hundred twenty-eight thousand nine hundred ninety-three dollars (\$2,528,993) appropriated in this section in the TANF Block Grant to the Department of Health and Human Services for a Cash Assistance Reserve shall be held in the Cash Assistance Reserve until the Department of Health and Human Services and the Office of State Budget and Management can certify that these funds are not needed to ensure the continuation of the Work First Family Assistance payments to recipients during the 2001-2002 fiscal year. These funds may be used only for the payment of Work First Family Assistance and the allocations listed in this subsection.

If the Department of Health and Human Services and the Office of State Budget and Management certify that these funds are not needed to ensure the continuation of Work First Family Assistance payments, the Department may make the following transfers from the Cash Assistance Reserve:

(1)	Reduction of out-of-wedlock births.	\$160,000
(2)	Work First Job Retention - Rural Center (\$30,000) Work Central Career Center (\$20,000)	\$50,000
(3)	Teen Pregnancy Prevention	\$223,926
(4)	Work First Housing Initiative	\$300,000
(5)	Domestic Violence Prevention and Awareness	\$100,000
(6)	Intensive Family Preservation Program	\$200,000
(7)	Work First Boys and Girls Clubs	\$100,000
(8)	Support Our Students	\$275,674
(9)	Residential Substance Abuse Services for Women with Children	\$500,000
(10)	Domestic Violence Services for Work First Families	\$200,000
(11)	After School Services for At-Risk Children	\$300,000
(12)	Individual Development Accounts	\$20,000

S.L. 2001-513 (H-231) Section 33 --- **CASH ASSISTANCE PAYMENTS**

SECTION 33. Section 5.1 of S.L. 2001-424 is amended by adding a new subsection to read:

"SECTION 5.1.(bb) If the Department of Health and Human Services determines that sufficient funds are not available within the Work First Cash Assistance Program and the Cash Assistance Reserve to provide cash assistance payments to all eligible families in the 2001-2002 fiscal year, the Department may reduce the allocations under the TANF Block Grant in this section to non cash assistance programs and services in order to ensure that cash assistance payments to all eligible families continue throughout the 2001-2002 fiscal year."

**TEMPORARY ASSISTANCE TO NEEDY FAMILIES (TANF) BLOCK GRANT FUNDED
ITEMS NOT ALLOCATED
2/25/2002**

Line Item	Amount
Allocation for Work First Housing Initiative for New Programs	900,000
After School Services for At-Risk Programs for New Programs	2,100,000
Individual Development Accounts	180,000
Total	\$3,180,000

ADAP Increased Utilization

Reasons Suggested by ADAP Staff and Providers

- Economic recession resulting in increased demand for public assistance programs (Nationally ~14 states have had to close or cap ADAP programs)
- 30% Increase in AIDS cases reported in 2001
- Improved HIV medication options resulting in more patients living longer and using medications longer
- Some new treatment protocols require more frequent patient visits
- Improved medications adherence

Projected ADAP Expenditures

	2000-01	2001-02 (Projected)	2001-02 (July-Dec) Expended	2001-02 (Revised Projected)

ADAP Information Management System

- Operational in July 2001
- Patterned after the Prescription Drug Assistance Program for the Elderly
- Contract for automated claims processing with pharmacy benefits management company
- Utilization data available upon demand
- Utilization data integrated with Purchase of Medical Care demographic data through periodic report generation
- State Budget certification of ADAP Information Management System received 1/25/02

ADAP - Family Income Eligibility

AIDS Drug Assistance Program (ADAP)

- Administered by the HIV/STD Prevention and Care Branch, Epidemiology Section, Division of Public Health
- Eligibility is 125% of the Federal Poverty Level - North Carolina has the lowest eligibility requirement of any state
- 3,401 Individuals authorized for the program in FY2001
- 2,443 Individuals Served by the program during FY2001 -- 72% of those authorized
- Cost per Client FY2001 - \$1,247 per month per client
- \$13,819,394 Expended for FY2001

FACT SHEET: The North Carolina HIV Medications Program (ADAP)
North Carolina Division of Public Health – HIV/STD Prevention and Care Branch

What is the North Carolina HIV Medications Program?

The North Carolina HIV Medications Program, also referred to as the AIDS Drug Assistance Program (ADAP), uses a combination of State and federal funds to provide low-income residents of the State with assistance in purchasing medications to fight HIV/AIDS and the opportunistic infections which often accompany the disease.

Who is eligible to participate in the Program?

In order for someone to be eligible for ADAP, the individual must:

- Be HIV+ (have HIV disease or AIDS);
- Reside in North Carolina;
- Have a net family income that is at or below 125% of the federal poverty level (see the back of this page for the current FPL for various family sizes);
- Not have any other third-party coverage (e.g., private insurance or Medicaid) that pays for medications; and,
- Have a (or several) prescription(s) for medications that are included in the ADAP formulary (list of drugs that the Program will pay for) – (The medications provided under this Program are limited to those specifically related to the diagnosis and treatment of HIV disease/AIDS - see the back of this page for the current ADAP formulary)

How does someone apply to and get into the Program?

An individual who wants to apply for ADAP coverage should talk to their clinician or the person in the office who deals with bills and/or insurance, their HIV case manager, or someone at one of NC's 14 HIV Care Consortia, at any local/public health department, or at an AIDS service organization/agency. The applicant, with the assistance of these individuals, will complete two forms; one to establish that the individual qualifies financially for the Program, and one to document their HIV+ status and their need for medications provided under this Program. The forms are then sent to the Program for a final determination of eligibility. If the individual is determined to be eligible, they will receive a Program ID card that will enable them to go to their pharmacy and get the medications prescribed for them by their medical care provider that are on the Program formulary.

Is there any cost to the individual?

There is no cost to the individual covered under this Program for the drugs that are on the Program's formulary. The individual is responsible for the cost of any other drugs that they receive which are not covered by the Program.

How does someone get more information about the HIV Medications Program?

For more information about the HIV Medications Program, you may call:

- Arthur Okrent – Manager, AIDS Care Unit, HIV/STD Prevention and Care Branch – (919) 715-3118
- Jenny Seykora – Head, Authorization Unit, Office of Purchase of Medical Care Services – (919) 733-6298

Pharmacies that have questions about the ADAP Program may also call:

- Andy Barrett – Pharmacy Network National Corporation (PNNC) – (919) 876-4642 or 1 (800) 331-7108

[Please see the other side of this page for additional information]

HIV MEDICATIONS PROGRAM
Listing of Covered Medications
As of November, 2001

antiretrovirals (FDA approved):

stavudine (d4T) - Zerit	zidovudine (AZT) - Retrovir
lamivudine (3TC) - Epivir	didanosine (ddI) - Videx
zalcitbine (ddC) - Hivid	saquinivir - Invirase, Fortovase
ritonavir - Norvir	indinavir - Crixivan
nevirapine - Viramune	nelfinavir - Viracept
delavirdine - Rescriptor	zidovudine and lamivudine - Combivir
efavirenz - Sustiva	abacavir - Ziagen
amprenavir - Agenerase	lopinavir/ritonavir - Kaletra
zidovudine, lamivudine and abacavir - Trizivir	tenofovir - Viread

other medications:

acyclovir - Zovirax	atovaquone - Mepron	azithromycin - Zithromax
clarithromycin - Biaxin	clindamycin - Cleocin	dapsone (DDS) - Dapsone
ethambutol - Myambutol	fluconazole - Diflucan	ganciclovir (DHPG) - Cytovene
hydroxyurea	itraconazole - Sporanox	ketoconazole - Nizoral
leucovorin	nystatin - Mycostatin, Nilstat	paromomycin - Humatin
pentamidine - NebuPent	pyramethamine - Daraprim	rifabutin - Mycobutin
sulfadiazine	omeprazole - Prilosec	lansoprazole - Prevacid
ondansetron hydrochloride - Zofran	Compazine	Phenergan
loperamide	Amitriptyline	Nortriptyline
pancrelipase - Pancreas MT-20	famciclovir - Famvir	valcyclovir - Valtrex
ciproflaxacin hydrochloride - CIPRO	diphenoxylate hydrochloride with atropine sulfate - Lomotil	
sulfamethoxazole/trimethoprim (smx/tmp; tmp-smx) - Bactrim, Septra, Cotrim, Sulfatrim		
valganciclovir hydrochloride - Valcyte		

Decisions about what medications are included within the Program formulary are guided by an HIV Clinical/Medications Advisory Committee. Members of this Committee (clinicians, case managers, HIV program administrators, consumers and others), provide their expertise and perspectives primarily on issues related to the efficacy and importance of new medications. However, they also provide advice on activities related to the operation and effectiveness of the Program. Their perspectives and best thinking on these issues are integrated with considerations about budgetary status and Program/policy regulations and priorities. While final decisions with regard to all of these matters rest with the State agency responsible for administering the Program (i.e., the HIV/STD Prevention and Care Branch of the Division of Public Health, Department of Health and Human Services), the HIV Clinical/Medications Advisory Committee plays an invaluable role in assuring that "real world" experience and expertise are incorporated into the decisions made by and operation of the Program.

Mental Health, Developmental Disabilities, Substance Abuse Services

Bridge Financing

This document provides a narrative description of the attached spreadsheet summarizing the process of moving from state facility based services to community-based supports, services, care and treatment. The Bridge concept includes two necessary and key funding mechanisms -- the MH/DD/SA Trust Fund, and Realignment/Community Capacity Reinvestment.

The principles of these components of the overall finance strategy necessary for the implementation of the Secretary's State Plan are:

- One-time, short term start-up efforts necessary for community capacity building.
- Ongoing resource support tied to movement of consumers to the communities from the state-operated facilities. This activity is referred to as realignment of funding.
- Creation of services as needed for those consumers who are identified and ready for community placement.
- Establishment of services and expansion of community capacity to divert admissions to state facilities.
- Utilization of initial and ongoing local business plans which are critical in determining the amount of unmet need and community demand that will be financed through both increased efficiencies by the LMEs (and their service providers) and realignment of funding/community capacity reinvestment (state facilities resources to community).
- Flexible and bridge type funding is necessary in order to support individual service plans as outlined through best practices, and emerging best practices, and which include support and recovery models of service delivery.

Expansion of community capacity and client movement from state facilities will be reported as part of the quarterly reports submitted to Legislative Oversight Committee in order to demonstrate parts of the system reform and accountability for use of the trust fund.

Realignment of Funds/Mental Health, Developmental Disabilities and Substance Abuse Services Community Capacity Reinvestment

In the process of moving from state operated facility based services to a comprehensive community based system of supports, services, care and treatment, the realignment of resources will be necessary. This realignment of resources becomes a community capacity reinvestment. Simply stated, as individuals exit state facilities, the financing of their community needs will come directly from the resources that become available as a result of the bed reduction and overall facility downsizing. These funds will then be realigned in a planned effort support the individual as needed in the community and to respond to unmet community need and general community demand (e.g. as a response to

target population and priority service needs). This development equates to community capacity building which is essential to ensure the maintenance of community efforts to provide supports and services to the current and expanding targeted service population.

Each fiscal year, a projection of the financing available for funding realignment will be developed. In conjunction with review and comment from the Coalition, developed criteria will be used for realignment efforts. The criteria will minimally consider 1) estimates of target population as related to service rates through out the state; 2) empirically based information related to population and service needs; and 3) efforts to move forward with regard to local funding fairness considerations. The criteria would be distributed to LMEs as opportunities to request funding. The Coalition will be partners in review and will make recommendations to the Division of MH/DD/SAS Director, who is in turn responsible for the final decision. It also should be noted that the performance of the LME would be considered in any realignment efforts; however, any LME-identified performance problems will not be a hindrance for serving the target population.

Each year, a small portion of the realignment funds will be applied as one-time transition funding. These will be used only if there are no trust funds available. After one time use, these funds will be considered as base realignment funds and will be subject to the same allocation process as described above.

In line with the expressed purpose of the Trust Fund, there is a significant need for bridge funding in the community in order to transition individuals from state facilities to community-based services. Bridge funding will be needed for the full range of services for all ages and disabilities. Bridge funding will be short-term in nature and, in general, recurring funds to support ongoing services will be derived from savings in state institutions, additional Medicaid earnings, potential utilization of CAP slots, and realignment of resources which may occur as a result of eliminating funding disparities in accordance with G.S. 122C-102 from the Reform Bill.

Examples for needs to be addressed by bridge funding include: (a) meaningful employment and supported employment, (b) crisis and emergency services, (c) equipment purchases, (d) rental deposits, (e) specialized adaptive and medical equipment, (f) assessments, (g) short-term inpatient care, (h) day treatment or partial hospitalization, (i) system of care, (j) family and consumer support development, (k) First in Families, and (l) outpatient services.

MH/DD/SA Trust Fund

The expected accomplishments from the use of this trust fund and implementation of this plan as it supports the State Plan are as follows:

- **Child and Family Institutions.** During FY 03, the 36 beds currently in operation at Whitaker School will be closed. As a result, two 18 bed regional facilities will be developed utilizing the Re-Education philosophy. \$1,200,000 in one-time funding from the Trust Fund is requested in SFY 02 to

provide \$600,000 start-up funding for each of the proposed two 18 bed regional facilities. \$44,000 in Trust funds is also requested in SFY 02 to accomplish community service planning for children currently at Whitaker School in preparation for community transition and those on the waiting list. Subsequent years of operation utilize realignment of funds.

II. Adult Mental Health Institutions

- By July 1, 2002, a total of 63 nursing beds at Broughton, Cherry and Umstead hospitals will be eliminated. Movement of these individuals will be to existing private nursing home beds or N.C. Special Care Center. No additional funding requested in SFY 02, as individuals would move into existing but vacant nursing beds.
- 39 beds will be closed at the Wright Building, Dix Hospital by July 1, 2002. Transition plans have been received from the area programs (LMEs) in the South Central Region. Allocations will be made to the region within 90 days from date of approved plans but no later than June 30, 2002, in order to meet the July 1, 2002 timeline for the closure of the Wright Building. \$1,500,000 requested from the Trust in SFY 02 only for bridge funding to develop community resources prior to realizing savings beginning in SFY 03.
- During FY 03, an additional 162 adult and child beds will be eliminated in the state hospitals and community capacity expanded. The bed reductions will include 50 gero-psychiatric beds, 62 adult long-term care beds, 40 nursing beds, and 10 child beds. These bed reductions will result in realignment of funding for community services with no funds required from the Trust.

III. Mental Retardation Centers

- In SFY 03, additional MRC downsizing will occur with an estimated 144 individuals moving from the MRC's into community placements. Individuals leaving the Mental Retardation Centers will be given priority for the CAP-MR/DD program. Cost of serving these individuals in the community will be addressed by the realignment of State facility funds into community services and resources from the Trust Fund are not requested.
- Realignment of Black Mountain Center to a nursing facility in SFY 03 for people with developmental disabilities will require movement of some of the existing residents (12) to the community and limited internal movement of individuals among Mental Retardation Centers. This allows for lower per day cost than current ICF-MR rates received in the MR centers. No trust funds are requested for this change and the cost of community services will be addressed by the realignment of funds from Black Mountain Center to the community.

- **MRC Satellite Homes:** Start-up and short-term operational funds for the development of satellite housing, initially operated by the Division out of the MRC's. Homes would be implemented by the Division to meet needs of hard-to-serve individuals and would eventually be turned over to other providers to operate. Recurring resources for program operations would be generated via savings from State institutions as a result of downsizing and eligibility for Medicaid and other resources. \$2,000,000 is requested from Trust in SFY 02 as start-up funding for 40 community based 5-bed residential facilities (\$50,000 per facility for van, equipment and other one-time start-up costs.). These facilities would allow for the transition of individuals from the MR Centers to community placements, with 200 such placements beginning in SFY 03.

Realignment Funding Investments

- IV. Substance Abuse Institutions – ADATC's - Reinvestment - \$1,900,000 from Trust for renovation and start-up to establish 3 acute detoxification units in the 3 ADATC facilities (estimated \$633,333 per unit).**

Design, renovation and equipment funds to establish 88 acute detoxification and crisis beds in the three state alcohol and drug abuse treatment centers. Establishment of these beds is for the expressed purpose of reducing and diverting 3,700 substance abuse admissions to the state hospitals.

- V. Transition Plan - Reinvestment - \$1,794,891 from Trust in SFY 02**

1. One-time resources to support cost modeling and related technical assistance for service implementation, LME function, family/consumer education under the new State Plan and Reform Bill.
2. One-time resources for non-recurring area program and county model conversion costs associated with updating billing and client reporting in accordance with the DHHS/DMHDDSAS Integrated Payment and Reporting System (IPRS). IPRS allows for tracking of individual client budgets as well as clear delineation of accountability by funding source. It further establishes coordination of funding sources between Medicaid and state/federal allocations thus eliminating duplication of payments.
3. Renovation to NC Special Care Facility allows for the creation of a locked unit so approximately 20 patients can be transferred from the state psychiatric hospital. This change helps address the downsizing of the state hospitals, and identified target populations for the North Carolina Special Care and state hospitals.

VI. Community Capacity Reinvestment

Community Housing - \$3,952,077 in SFY 02 (\$3,563,373 from Trust and \$388,704 from Realigned Funding).

Decent, affordable and adequate community-based housing options continue to be one of the greatest unmet needs throughout the state. Without housing, the structure of community-based services falters and individuals become homeless, enter state facilities or increase stress for family members and support systems. Housing options are also a prerequisite for the movement of individuals into community settings in compliance with the Olmstead decision. With an increase in the supply of community housing options, a number of individuals who reside in more restrictive residential settings could be stepped down to other arrangements, while freeing up the more housing for individuals with needs for greater residential supports. The following benchmarks have been established for implementation:

- Approximately 1,000 people currently residing in the state hospitals have been identified through Olmstead assessments for community placements.
- 100 people currently residing in the MR Centers have been identified through Olmstead assessments for community placements.

In order to accomplish movement and diversion from state facilities, housing investment options include the following. All options require demonstration capacity of appropriate service and/or supports for clients with mh/dd/sa challenges.

- Revolving Loans: In order to develop community living situations, resources must be made available to providers as a facilitating incentive. Start-up costs, leasing, and purchasing make it difficult unless appropriate upfront resources are available. The Trust Fund could be utilized to establish a revolving loan fund, to be paid back by providers desiring to develop community residential options. Loans could be paid back at low interest rates, while the state retains an ownership interest during the repayment period. This would allow development of residential options for individuals waiting for such a community opportunity. These funding options support the development and expansion of inclusive housing options for people with disabilities. The Fund would be revolving and self-sustaining by funds paid back to the state against the initial loan.
- Leveraged Option: An allocation of one-time funding from the Trust Fund could provide for a partnership with the North Carolina Housing Finance Agency to leverage a portion of their Housing Trust Fund or Federal HOME allocation to develop a model for this purpose. Ongoing operating subsidies would be pursued through project based rental assistance, bridge funding until

tenants could access tenant based assistance, etc. Housing Works, Inc., a non-profit entity under contract with the Division, could also serve as a Division partner and intermediary in building housing capacity across disabilities and working with the North Carolina Housing Finance Agency. Housing Works, Inc., has the housing expertise to represent the Division's interest in various business and partner relationships to leverage other Federal, State or private housing resources.

- Grants: Limited funding for relatively minor renovations or repairs which would enable an individual to remain in an independent living situation rather than requiring a more costly out-of-home placement. Small grants of this nature may also be utilized for minor renovation and remodeling to perhaps add one or two beds to an existing residential resource.

Transportation – Separate funds not requested specifically for transportation; funding integrated with overall community services.

Transportation continues to be another highly visible identified unmet need from consumers, family members and service providers. Transportation is a key support to enable individuals to access community-based services and remain in the community. A national problem, transportation must be viewed in terms of overall community need and build the community, not establish isolated transportation options. Options include:

1. Grants: Resources directed to service providers for the one-time purchase of vehicles to improve transportation and service access. This may include vans for group homes, day treatment facilities, developmental day centers, etc.
2. Leveraged Option: Potential for grants to Local Interagency Transportation Councils specifically for the purpose for increasing service access for individuals served in the MHDDSAS system. Funds through local Councils could be leveraged to secure matching grants from Federal and other funding sources.

**DIVISION OF CHILD DEVELOPMENT
PROPOSAL TO BUDGET INCREASE IN CCDF FUNDS**

North Carolina's share of the increase in Child Care and Development Fund (CCDF) Block Grant Discretionary Funds for FFY 2002 is \$2,865,155. We are requesting to budget 75% of the increase for the purposes described below for the current state fiscal year. The remaining 25% will be included in the block grant plan for SFY 2003.

Budget New CCDF Funds:

Purpose	Total Increase Available	75% for SFY 2002
Child Care Subsidies	\$2,550,188	\$1,912,641
Quality Initiatives	\$ 171,709	\$ 128,782
Administration	\$ 143,258	\$ 107,443
Totals	\$2,865,155	\$2,148,866

Child care subsidy funds will be allocated to the county departments of social services using the existing child care subsidy allocation formula.

The CCDF requires that at least 4% of the total grant be spent on activities which improve the quality of child development programs. In addition, the grant includes specific quality allocations for designated populations. Of the \$171,709 additional funds which must be spent on quality activities, approximately \$77,000 are increases to the designated allocations for improvements to infant/toddler care, school-age care and resource and referral funding. The remaining \$94,000 is the increase needed to meet the 4% requirement.

CCDF administration funds are capped at 5% of total grant expenditures. These funds are shared by local departments of social services that administer the child care subsidy program and the Division of Child Development. County DSS's may use 4% of their subsidy allocation to support the costs of managing the program, therefore, an increase in their subsidy allocations may result in an increase in administrative costs.

Federal regulations prohibit the use of new CCDF funds to supplant state funds.

**DHHS RECOMMENDED ALLOCATION
CHILD CARE AND DEVELOPMENT FUND (BLOCK GRANT) DISCRETIONARY FUNDS**

FROM: Senator Ken Moore

DATE: February 27, 2002

SUBJECT: Constituent Letter On Medicaid

I share the attached letter from Valerie Biddix, Certified Pharmacy Technician, Bakersville, NC (Mitchell County).

Her "concerns" are shared and felt by many across my district, and I am sure, across the state.

Thank you.

659 Henredon Plant Road
Spruce Pine, North Carolina 28777
January 10, 2002

N.C. Senator Ken Moore
Room 1419, Legislative Building
Raleigh, North Carolina 27601

Dear Senator Moore

I am writing to tell you about a very special lady named Dianne who lives in Spruce Pine. Dianne has been battling cancer for several years and is once again facing major surgery in her struggle. Dianne is in her early 50's, owns her own home, and has been determined to be ineligible for Medicaid assistance. She is unwilling to give up her fight with this disease and therefore is not eligible for Hospice care. Her medication bills are staggering.

I work as a Certified Pharmacy Technician at the drug store Dianne uses. Every day I see Medicaid recipients much healthier than Dianne come by to pick up their diet medications, "nerve" medicines, and other non-life saving prescriptions. Most of these people live in government housing and seem to have resources for cell phones and new model cars.

WHAT IS WRONG WITH THIS PICTURE?

The State Legislature must look at our current Medicaid System. There has to be some way to eliminate the waste and provide assistance to all the "Diannes". Taxpayers have a right to expect that their money is being spent for worthwhile causes.

Thank you in advance for your attention to this matter.

Sincerely,

Valerie Biddix

Respectfully,

Representatives Rep. Beverly Earle
Representative Edd Nye
Co-chairs

I hereby certify this notice was filed by the committee clerk at the following offices at **11:00 am** on **Wednesday, April 17, 2002**.

___ Principal Clerk
___ Reading Clerk - House Chamber

Ann Raeford and Jo Bobbitt (Committee Assistants)

MINUTES

JOINT APPROPRIATIONS SUBCOMMITTEE ON HEALTH AND HUMAN SERVICES

Wednesday, April 24, 2002

8:30 A.M.

Room 643, Legislative Office Building

The Appropriations subcommittee on Health and Human Services met on Wednesday, April 24, 2002 at 8:30 A.M. in Room 643 of the Legislative Office Building. Members present were Representative Edd Nye, Representative Beverly Earle, Co-Chairs; Representatives Mark Crawford, Walter Church, Debbie Clary, Billy Creech, Theresa Esposito, Verla Insko, and Thomas Wright. There were five senators present.

Representative Nye called the meeting to order and welcomed committee members and visitors. Attached is the Visitor Registration Sheet that is made a part of the minutes (See Attachment No. 1).

Carmen Hooker Odom, Secretary of Health and Human Resources, was introduced speak to the Committee. Secretary Odom stated she and Lanier Cansler, Deputy Secretary of Health and Human Resources would be presenting a slide presentation representing the mission to reduce the Health and Human Service budget by 330 million dollars. A copy of this presentation is included with the minutes (See Attachment No. 2). She makes clear these are the Governor's options, not the Departments, and that they will seriously impact the Department.

Carol Shaw with Fiscal Research Staff, was recognized to explain to the members of the Committee about the notebooks provided to them. They show the different options available. A notebook titled BUDGET REDUCTIONS 2002-2003 is made a part of these minutes.

Deputy Secretary Cansler addressed the Committee and stated their purpose would be to go through each of the major divisions in the Department one by one and list the options that are being presented. They presented the 11% option, which is the high end of the scale.

He pointed out that the directors of the divisions were in attendance and were available to answer any questions the members might have during the presentation.

The members asked questions and expressed concern with many of the proposed reductions during the presentation.

The meeting was adjourned at 12:00 noon.

North Carolina Department of Health and Human Services

Presentation to the Joint Subcommittees on
Health and Human Services

APRIL 24, 2002

BUDGET REDUCTION OPTIONS

THE BUDGET REDUCTION OPTIONS SET FORTH IN THIS PRESENTATION ARE OPTIONS PRESENTED AT THE REQUEST OF THE GOVERNOR TO ASSIST IN DEALING WITH THE STATE'S BUDGET CRISIS. THESE OPTIONS ARE NOT TO BE CONSIDERED RECOMMENDATIONS BY THE DEPARTMENT AS THESE REDUCTIONS WOULD IMPACT THE ABILITY OF THE DEPARTMENT TO MANAGE OR CONTINUE MANY IMPORTANT SERVICES FOR NORTH CAROLINA'S MOST VULNERABLE CITIZENS. THE GOVERNOR HAS MADE NO RECOMMENDATIONS WITH RESPECT TO ANY OF THE OPTIONS IN THIS PRESENTATION.

North Carolina Department of Health and Human Services

Fiscal Year 2001-02 Budget Adjustments	\$ 77,681,618
Office of the Secretary / Central Administration	\$ 45,649,860
“More at Four”	0
Division of Aging	29,825,449
Division of Child Development	349,713,681
Office of Education Services	77,290,419
Division of Facility Services	16,584,502
Health Choice	24,987,142
Division of Mental Health, Developmental Disabilities, and Substance Abuse Services	583,127,626
Division of Public Health	112,142,547
Divisions of Services for the Blind / Deaf and Hard of Hearing	10,344,149
Division of Social Services	192,948,114
Division of Vocational Rehabilitation	41,827,726
Division of Medical Assistance	1,987,547,863

BUDGET REDUCTION OPTIONS

The Department of Health and Human Services was instructed to identify recurring budget reduction options ranging from 7% to 11% of Fiscal Year 2002-03 Appropriations.

The options set forth in this presentation represent 11% reductions for non-Medicaid appropriations and over 5% reductions for Medicaid appropriations.

BUDGET REDUCTION OPTIONS

In developing these budget reduction options, the departmental divisions were instructed to consider the following:

- The Core / Critical Mission of the Division**
- Federal Maintenance of Effort (MOE) Requirements**
- The Impact on Local Governments**

BUDGET REDUCTION OPTIONS

If the options set forth in this presentation are implemented, the reductions will . . .

- **Impact the overall provision of services and the ability of the Department to achieve its mission**
- **Increase the burden on counties to provide services**
- **Increase exposure to the potential for lawsuits**
- **Endanger the State's compliance with Federal Maintenance of Effort (MOE) requirements**
- **Severely impact the State's efforts in mental health reform**

BUDGET REDUCTION OPTIONS

You will see that these budget reduction options will impact . . .

- **Adoption Assistance Programs**
- **Child Care Subsidies for Children in Protective Custody**
- **Area Mental Health Programs**
- **Developmental Evaluation Centers**
- **Home and Community Block Grant services for elderly**
- **Purchase of Care Programs for Cancer, Epilepsy, Early Intervention, Children with Special Needs, and Others**

DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Office of the Secretary

Title of Recommendation: North Carolina Council on the Holocaust

Recommendation 1 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Proposed reduction is for elimination of recurring funding in the Office of the Secretary's budget for Holocaust education in the public school system and other related activities approved by the Council. The funding of such activities is not critical to the mission of the Department.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

No major program impact to the Department.

There is no local government impact.

Budgetary Information:

DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Controller's Office

Title of Recommendation: Elimination of Two Positions

Recommendation 2 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? _X_7% _X_8% _X_9% _X_10% _X_11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The Controller's Office will have a reduction of two positions. The first position is an Accounting Clerk IV (PG 59). It is believed that with the reorganization of DEIE and the transfer of the DEC's back to Public Health, we can realign and distribute the remaining workload among the remaining staff in order to give up one position. The second position to be given up was responsible for managing the Food Stamp EBT and EFT Projects for the department. It is believed that this work can be combined with the Child Support Central Collection Operations (CCO) work and can be managed by one position, allowing the additional position to be given up.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

It is believed that with the reorganizations and stabilization of programs, we will be able to handle the reduction of staff with a minimal impact on the operations of the Controller's Office.

Budgetary Information:

Title of Recommendation: Reduce Administration Costs RCC 5100 2XXX-5XXX

Recommendation 3 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Proposed reduction is to the administrative costs of the Office. Reductions will primarily be in equipment and travel. It is hoped that some of the reductions may be replaced through federal grants. Although we have historically received grants for this purpose, all of them are competitive and cannot be assured. We will continue our efforts at identifying potential federal grant funds to maximize the Office's operation.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The impact is minimized if federal grant funds continue to be available to offset budget reductions. If federal grant funds are unavailable, then administrative costs will have to be curtailed. This will occur primarily in equipment and travel.

There is no local government impact.

Title of Recommendation: Reduce Administration Costs RCC 5114 2XXX-5XXX

Recommendation 4 **of** 11 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Proposed reduction is to the administrative costs of the Office related to medical placement activities. Reductions will primarily be in travel. It is hoped that some of the reductions may be replaced through federal grants. Although we have historically received grants for this purpose, all of them are competitive and cannot be assured. We will continue our efforts at identifying potential federal grant funds to maximize the Office's operation.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The impact is minimized if federal grant funds continue to be available to offset budget reductions. If federal grant funds are unavailable, then administrative costs will have to be curtailed. The largest cost in this area is recruitment candidate travel to potential sites. We have made some adjustments to our candidate travel guidelines by limiting the total amount reimbursable and limiting visits to the neediest of sites.

There is no local government impact.

- Does this request require additional resources/reduced resources to another state agency? Yes No If yes, name the agency and the funds required/reduced.
- Does this request relate to a capital improvement project? Yes No If yes, what is the title of the capital improvement project and the projected completion date?

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Office of Research, Demonstrations, and Rural Health Development

Title of Recommendation: Reduce Administration Costs RCC 5114 2XXX-5XXX

Recommendation 4 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Proposed reduction is to the administrative costs of the Office related to medical placement activities. Reductions will primarily be in travel. It is hoped that some of the reductions may be replaced through federal grants. Although we have historically received grants for this purpose, all of them are competitive and cannot be assured. We will continue our efforts at identifying potential federal grant funds to maximize the Office's operation

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The impact is minimized if federal grant funds continue to be available to offset budget reductions. If federal grant funds are unavailable, then administrative costs will have to be curtailed. The largest cost in this area is recruitment candidate travel to potential sites. We have made some adjustments to our candidate travel guidelines by limiting the total amount reimbursable and limiting visits to the neediest of sites.

There is no local government impact.

DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Office of Research, Demonstrations, and Rural Health Development

Title of Recommendation: Eliminate Community Primary Care Grant Program (RCC 5100)

Recommendation 6 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

We are proposing elimination of the Community Primary Care Grant Program. This program was established to provide limited grant funding to develop systems for the provision of after-hours primary health care to Medicaid recipients. In the early years of this program, grantees were solicited from across the state to submit proposals. Funding typically went to non-profit free clinics, hospitals, health departments, and rural health centers. In the more recent years, funds have been used to assist ACCESS II sites and to provide targeted operational support to clinics providing expanded after-hours care to Medicaid recipients.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Over the past 8 years, the Community Primary Care Grant Program has provided funding to 57 grantees across the State. For the current fiscal year, we have not allocated any of this funding. Although the elimination of \$160,000 in grant funding will have an impact on rural Medicaid after-hours access, we believe that we can target other funding to those areas of greatest need by utilizing our existing base of rural health centers.

There is no local government impact.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Office of Research, Demonstrations, and Rural Health Development

Title of Recommendation: Reduce Loan Repayment Incentive Funds

Recommendation 7 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

We are proposing a reduction in the provider incentive funds that provide loan repayment and service bonus incentives to primary medical and dental providers locating in rural and underserved communities. Providers may receive incentive funds if they agree to practice in an eligible site for a period of two to four years. Eligible sites are limited to State and Federally funded centers (dentists) or State and Federally funded centers located in Health Professional Shortage Areas (physicians).

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

In fiscal year 2001, the incentive program provided contracts to 42 medical providers averaging \$58,723 per contract. Thus far in 2002, we have contracted with 39 providers averaging \$56,235 per contract. The two-year average contract is \$57,525. Therefore, this reduction will result in the loss of 7.7 provider incentive contracts. We will attempt to lessen the impact by increasing our efforts to improve scores of the designated Health Professional Shortage Areas to enhance the candidate's chances of receiving federal loan repayment.

There is no local government impact.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Office of Research, Demonstrations, and Rural Health Development

Title of Recommendation: Reduce Loan Repayment Incentive Funds

Recommendation 7 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

We are proposing a reduction in the provider incentive funds that provide loan repayment and service bonus incentives to primary medical and dental providers locating in rural and underserved communities. Providers may receive incentive funds if they agree to practice in an eligible site for a period of two to four years. Eligible sites are limited to State and Federally funded centers (dentists) or State and Federally funded centers located in Health Professional Shortage Areas (physicians).

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

In fiscal year 2001, the incentive program provided contracts to 42 medical providers averaging \$58,723 per contract. Thus far in 2002, we have contracted with 39 providers averaging \$56,235 per contract. The two-year average contract is \$57,525. Therefore, this reduction will result in the loss of 14.1 provider incentive contracts. We will attempt to lessen the impact by increasing our efforts to improve scores of the designated Health Professional Shortage Areas to enhance the candidate's chances of receiving federal loan repayment.

There is no local government impact.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Office of Research, Demonstrations, and Rural Health Development

Title of Recommendation: Reduce Aid for Clinic Construction (RCC 5111)

Recommendation 8 **of** 11 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% **X** 10% **X** 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The proposed reduction is to the Aid for Clinic Construction program. This program has enabled the Office to assist community efforts at building and equipping primary medical practices throughout underserved rural areas. Grantees are exclusively state-designated rural and community health centers providing primary medical and/or dental care to all persons regardless of their ability to pay for the services. Over the years, the Office has used this funding to supplement locally raised funds. Although the budget total represented a large sum of construction money in the late 1970's, we have had to be much more creative as the size, scope, and cost of the projects has increased since that time. Matching funds from private foundations and loans from the Farmers' Home Administration have been used to supplement State funds, which are inadequate to fund a complete project.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Over the past two years, 17 grants have been issued at an average of \$52,316 per grant. The proposed reduction of \$75,000 represents approximately 1.4 grants (roughly 16% of the average annual total grants). Working with private foundations such as the Duke Endowment and the Kate B. Reynolds Charitable Trust, we hope to stretch our funds farther by participating in cooperative ventures. Although these organizations have recently experienced reduced funds for grants, they have been great partners with the Office in our joint effort to assure adequate medical and dental facilities and equipment in the rural areas.

There is no local government impact.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: CMS/Office of Research, Demonstrations, and Rural Health Development

Title of Recommendation: Reduce Rural Health Center Operational Funding (RCC 5111)

Recommendation 9 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The proposed reduction is to the Rural Health Clinic Operational Subsidy program. Through this program, the Office has established 81 rural health centers across the State. The Office provides funding to offset operational losses of the rural health centers as "funder of last resort". Funds are used to provide care to medically indigent patients who have no other form of insurance as well as to cover operational losses that are due to inherent inefficiencies of operating a small rural health center.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Over the past two years, 38 grants have been issued at an average of \$154,804 per grant. The proposed reduction of \$150,000 represents approximately 1 grant (roughly 5% of the average annual total grants). Through efforts that began in earnest four years ago, the operational efficiency of the rural health centers has increased dramatically. We anticipate that through increased efficiency and offsetting some of the loss through competitive federal grant funding, rural clinics will not suffer undue hardship due to this reduction at a time when they are experiencing greater demand for their services. The provision of medical care to uninsured indigent patients is the major complicating factor. Our centers have seen an increase in this area this year. The loss of \$150,000 makes it more difficult to meet this increased need, even if we are successful in obtaining federal funds or further increasing our operational efficiency.

There is no local government impact.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: CMS/DIRM (Division of Information Resource Management)

Title of Recommendation: Eliminate 11 Vacant Positions

Recommendation 10 **of** 11 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Proposed is the elimination of 11 vacant positions.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The proposed elimination of 11 vacant positions will reduce the support available to DHHS systems and IT functions. The targeted positions support network operations across the state, provide response to system problems for large, mission-critical systems, and work on projects to improve efficiencies, such as financial tracking and telephony replacement. Loss of the positions will compromise DIRM's capacity to support DHHS operations.

Of the budgeted salary and fringe benefit amounts, thirty one percent is federal money. The loss of vacant positions would limit DIRM's option to supplant costly contractors with permanent state staff. At least two of the positions identified for reduction were vacated by retirements, with contractors performing the job duties.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: CMS/DIRM (Division of Information Resource Management)

Title of Recommendation: Convenience Contract Reductions (supplemental staffing)

Recommendation 11 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Proposed is the elimination of supplemental staffing contractors.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The reductions proposed in contractor costs would significantly reduce the support capacity for critical applications and IT functions. Contract staff are key in the maintenance and operation of critical DHHS systems. Reducing the support available will result in delayed response to system request changes, and slower response time to operational problems. No work other than minimal operations support could be accomplished.

Contractual services are partially supported by federal funds. The proposed reductions would result in a loss of thirty one percent federal match.

Name of Division/Institution: Aging

Title of Recommendation: Home & Community Care Block Grant Services

Recommendation 1 **of** 5 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Reduction in state funding for HCCBG for home and community based aging services.

In-Home services include skilled home care, in-home aide levels 1-4, and home delivered meals and some respite services to relieve the caregiver. Access services include care management, information and assistance, and transportation. Community services include adult day care and day health, group respite, and congregate nutrition. Home delivered meals (often called meals on wheels,) are for the frail elderly who cannot obtain and/or cook a meal for themselves. It is often the only decent meal they get all day. Congregate meals are an attempt to both ensure a nutritious meal and provide socialization for the elderly. The meal site also offers nutrition counseling and other health and wellness activities.

Although all seniors over 60 are technically eligible for these services, they are targeted to the frail elderly and the near poor. Minority and rural populations also are targeted with the formula used in North Carolina. The purpose of these programs is to allow seniors to age in place in their homes with the supports they need to maintain independence.

Counties make the decision about HCCBG funds to allocate them among 18 possible services.

Program Impact if Reduction is Approved

<u>Services Reduced</u>	<u>Amount of Reductions</u>	<u>Units Lost</u>	<u>Clients Lost</u>
In-Home Aide	235,694	18,931	109
Access	99,582	25,933	236
Congregate Meals	31,398	8,509	104
Home Delivered Meals	<u>49,059</u>	<u>15,624</u>	<u>103</u>
	415,733	68,997	552

	<u>Current Funding</u>	<u>Reduction</u>	<u>Revised</u>
Total Funding	50,399,227	415,733 (0.8%)	49,983,494
Revenue	25,163,136	-41,573 (0.2%)	25,121,563
Appropriation	25,236,091	374,160 (1.5%)	24,861,931

Note: No impact on MOE, nor loss of federal funds. Revenue reduction reflects reduced local match requirement. It should also be noted, an increase in federal funding could have resulted in an increase of \$166,000 in State Administration, but due to lack of state matching funds, the division will allocate as service dollars.

Budgetary Information:

Although all seniors over 60 are technically eligible for these services, they are targeted to the frail elderly and the near poor. Minority and rural populations also are targeted with the formula used in North Carolina. The purpose of these programs is to allow seniors to age in place in their homes with the supports they need to maintain independence.

Counties make the decision about HCCBG funds to allocate them among 18 possible services.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

<u>Services Reduced</u>	<u>Amount of Reductions</u>	<u>Units Lost</u>	<u>Clients Lost</u>
In-Home	421,724	33,873	196
Access	178,181	46,401	422
Congregate Meals	56,181	15,225	186
Home Delivered Meals	<u>87,780</u>	<u>27,955</u>	<u>185</u>
	743,866	123,454	989

	<u>Current Funding</u>	<u>Reduction</u>	<u>Revised</u>
Total Funding	50,399,227	743,866 (1.5%)	49,655,361
Revenue	25,163,136	74,387 (0.3%)	25,088,749
Appropriation	25,236,091	669,479 (2.6%)	24,566,612

Note: No impact on MOE, nor loss of federal funds. Revenue reduction reflects reduced local match requirement. It should also be noted, an increase in federal funding could have resulted in an increase of \$166,000 in State Administration, but due to lack of state matching funds, the division will allocate as service dollars.

DETAIL WORKSHEETS**

Name of Division/Institution: Aging

Title of Recommendation: Home & Community Care Block Grant Services

Recommendation 1 of 5 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction in state funding for HCCBG for home and community based aging services.

In-Home services include skilled home care, in-home aide levels 1-4, and home delivered meals and some respite services to relieve the caregiver. Access services include care management, information and assistance, and transportation. Community services include adult day care and day health, group respite, and congregate nutrition. Home delivered meals (often called meals on wheels,) are for the frail elderly who cannot obtain and/or cook a meal for themselves. It is often the only decent meal they get all day. Congregate meals are an attempt to both ensure a nutritious meal and provide socialization for the elderly. The meal site also offers nutrition counseling and other health and wellness activities.

Although all seniors over 60 are technically eligible for these services, they are targeted to the frail elderly and the near poor. Minority and rural populations also are targeted with the formula used in North Carolina. The purpose of these programs is to allow seniors to age in place in their homes with the supports they need to maintain independence.

Counties make the decision about HCCBG funds to allocate them among 18 possible services.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Division of Aging

Title of Recommendation: Senior Center Programs

Recommendation 2 **of** 5 **for SFY** 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The Division funds two state programs with state funds. Senior Center Outreach is currently funded at \$365,316 and the appropriation for the Senior Center General Purpose Fund is currently \$1,000,000. Elimination of Division appropriations in the amount of 15% will require the elimination of state funding for senior centers.

Senior Center Outreach funding allows senior centers to provide services and activities at the center or in a remote location to unserved and under served elderly. For SFY 01-02, 106 senior centers are receiving awards ranging from \$1,129 to \$8,648, including local match. The Division projects that approximately 220,000 seniors will be served through these centers.

Senior Center General Purpose funding provides existing and developing senior centers with funding to meet operational needs ranging from building maintenance and improvements to salaries for program coordinators and activities directors. Currently, funding is provided to 160 senior centers. The Division has established a certification program that recognizes centers of "excellence" and "merit". Centers achieving these rankings have taken prescribed measures to develop and improve services in their centers. The general purpose funding has provided an incentive for centers obtain certification. Centers of excellence receive \$12,626, centers of merit receive \$9,470 and all other centers receive \$6,313, including local match. Of the 160 centers, 15 are certified as centers of excellence and 8 are certified as centers of merit.

Program Impact if Reduction is Approved:

The elimination of state funding for senior centers would most likely not cause any centers to close. However, many centers would have to reduce the variety of activities offered, reduce outreach to elderly in remote areas, dismiss program staff, and delay needed maintenance and repairs to facilities. There will also be pressure at the local level to fill in the gaps in programs and services.

Budgetary Information:

Fund Number(s)	Fund Title(s)	Account Number	Account Title	Recommended Reduction 2002-03
		1XXX	Personal Services	
			Less Severance Costs	
		21XX	Contracted Services	
		22XX-5XXX	Operating Expenses

Title of Recommendation: North Carolina Senior Games

Recommendation 3 of 5 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Elimination of state support for North Carolina Senior Games, Inc. This program is the primary organization that provides health promotion and wellness activities for seniors on a state-wide basis.

Program Impact if Reduction is Approved:

Without this state funding, support for local programs will be drastically reduced which will probably result in some local programs being discontinued. There are 52 local Senior Games programs across the state. In addition, state activities, including the annual Senior Games State Finals, may be severely diminished or eliminated entirely. 45,419 persons participated in Senior Games activities at the local and state levels last year. These are very popular programs, and an integral part of health and wellness programs at the local level.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Division of Aging

Title of Recommendation: Senior Tar Heel Legislature (STHL)

Recommendation 4 **of** 5 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? X 7% X 8% X 9% X 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction of funding for the Senior Tar Heel Legislature to enable them to meet one time per year as established by general statute. The Senior Tar Heel Legislature was established by the NC General Assembly in July, 1993 (G.S. 143B-188.55) to serve as a vehicle for:

- Promoting citizen involvement and advocacy concerning aging issues before the General Assembly;
- Educating older adults to the legislative process; and
- Communicating the needs of older adults to the General Assembly

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

By state statute, the Senior Tar Heel Legislature is to meet in March of each year. The Division of Aging is charged by statute with coordinating the STHL. The Senior Tar Heel Legislature has found that to be most effective, it needs to meet three times per year. Each county sends a delegate to the meetings. Budgeted appropriations provide for the printing of materials, other support cost incurred by the Division and one meal function at each meeting. Delegates are responsible for their own expenses; however, the Division has traditionally provided the one meal.

The Senior Tar Heel Legislature identifies 3 to 5 issues each to recommend to the General Assembly for action. Delegates and alternates educate themselves on the issues and place great emphasis on educating the public and members of the General Assembly about these issues. The STHL has been instrumental in the passage of most of the significant legislation in the past nine years that has benefited older adults. This legislation includes:

- Requirements for criminal background checks of unlicensed applicants for employment in adult care homes, nursing homes and home care agencies;
- Expanding Medicaid to all those eligible for SSI and increasing the Medicaid income eligibility level to 100% of poverty for older and disabled adults;
- Requirements to reform the long-term care industry to improve quality of care, increase protection of residents and strengthen regulatory oversight of industry practices;
- Development of the first prescription drug assistance program for seniors;
- Expansion of the Homestead Property Tax Exemption for low income elderly and disabled adults; and
- Increases of \$15.1 million for community based services and \$1 million for senior centers in recurring funding since 1994.

Name of Division/Institution: Division of Aging

Title of Recommendation: Governor's Advisory Council on Aging

Recommendation 5 **of** 5 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Reduce support for the Governor's Advisory Council from \$8,000 to \$4,000. The Governor's Advisory Council on Aging is authorized by G.S. 143B-180 to make recommendations to the Governor and Secretary of the Department of Health and Human Services on how to improve the quality of life and human services for older North Carolinians.

Program Impact if Reduction is Approved:

The Council is comprised of 33 members. The General Statute requires that the Council meet at least quarterly and that members receive per diem and necessary travel and subsistence reimbursement in accordance with state rates. The Division has the delegated responsibility to provide administrative support to the Council. We are proposing that the statute be amended to reduce the number of required meetings from four to two annually.

Budgetary Information:

Recommendation 1 **of** 15 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduce child care subsidy funding used for CCDF state match by \$500,000.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

It is anticipated that Smart Start subsidy expenditures will provide enough eligible expenditures to prevent the loss of federal funds. If not, maximum federal dollars lost would be \$813,537 (at FFP rate for FY 2002). Not spending the \$500K will mean a reduction in services to approximately 278 children. Loss of federal funds would reduce services to an additional 450 children. Total potential impact: lose funding for subsidy for approximately 728 children.

Budgetary Information:

Name of Division/Institution: Child Development

Title of Recommendation: CCDF Matching Funds (Child Care Subsidy)

Recommendation 1 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduce child care subsidy funding used for CCDF state match by \$600,000.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

It is anticipated that Smart Start subsidy expenditures will provide enough eligible expenditures to prevent the loss of federal funds. If not, maximum federal dollars lost would be \$976,245 (at FFP rate for FY 2002). Not spending the \$600K will mean a reduction in services to approximately 333 children. Loss of federal funds would reduce services to an additional 540 children. Total potential impact: lose funding for subsidy for approximately 873 children.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce State Child Care Subsidy Funds for Children Ineligible for Fed. Funding
Recommendation 2 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduce state subsidy funds used for children ineligible for federal CCDF and TANF child care funding. This includes all children receiving subsidy assistance for some reason other than to support the employment, education or training of the parents. Children needing this assistance include those in child care because they are also receiving child protective services, other child welfare services, are in foster care and need child care for some reason other than the foster parents' employment, or are developmentally delayed or at risk of delay.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Reduction of these funds will not impact access to federal funds, however, these funds and the \$3 million in federal Social Services Block Grant (SSBG) funds that the Division receives are the only resources available to these families. This proposed reduction will mean the loss of services to approximately 845 children.

DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Eliminate Remaining Early Start Funds

Recommendation 3 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The 2001 Session of the General Assembly eliminated the majority of the Division's funding for Early Head Start programs, leaving \$56,286 in this account. Because the intent of the legislation was that the Division would not continue to contract with Early Head Start centers, the remaining funds cannot be used for the original purpose.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

None

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce Funding for T.E.A.C.H.

Recommendation 4 **of** 15 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The T.E.A.C.H. (Teacher Education and Compensation Helps) Program pays for scholarships for child care teachers and center administrators to take classes at community colleges in order to meet the educational requirements for a child care license. The proven effect of the T.E.A.C.H. program is a significant reduction in turnover of staff in child care centers. Lower staff turnover means a larger pool of trained staff for child care plus fewer adjustments for children enrolled in child care. The T.E.A.C.H. program also helps centers achieve higher levels of licensing (more stars), creating better quality child care without increasing the cost of care to parents. The average cost to the T.E.A.C.H. program to assist a child care worker to meet his or her educational goal is \$519.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Eliminating the \$2.6 million currently budgeted for T.E.A.C.H. will essentially shut down this program in N.C. This means that approximately 5000 child care workers will lose access to funding that helps them achieve the education they need to meet licensing requirements and to provide good quality child care. The cost of meeting the licensing requirements must then be borne by the child care provider, thus increasing the cost of care to parents and to the state's subsidized child care program. In other words, this recommendation ultimately will result in no savings at all. In the short run, \$2.6 million will provide subsidized child care for approximately 1,400 children.

This recommendation would not be supported by child advocates or by certain members of the General Assembly who have supported annual appropriations for T.E.A.C.H. This would be a good program for the Community Colleges to fund for a period of two to three years or until the state revenue situation improves.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Eliminate Funding for Touching the Lives of Children

Recommendation 5 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Touching the Lives of Children, Inc. is a private, nonprofit agency that trains volunteers to visit homes, schools and child care programs to provide one-on-one learning assistance to children who have been identified as being at risk of failing in school. TLC also buys the materials that the volunteers use to work with the children. The provider indicates that their service cost is about \$40 per child. Eliminating all state funding for this program would reduce the contractor's funding to about one-third of its current resources. During SFY 2000-2001, the program served more than 4,836 children in 91 sites in 74 counties. It is not known how many of the children are served with DCD's funding as opposed to other funding sources available to the program.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Although the program provides services at a low cost per child, \$300,000 would provide subsidized child care services to approximately 165 children.

This would be a good program for the State University Schools of Education to fund for a period of two to three years or until the state revenue situation improves.

Budgetary Information:

	Fund Number (s)	Fund Title(s)	Account Number	Account Title	Current Funding	Reduction Option	% of Reductn Option	Revised Funding

Title of Recommendation: Reduce Funding for Legal Services

Recommendation 6 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Eliminate funding for paralegal position funded with criminal record check (CRC) appropriation. Position was in process of being transferred from Attorney General's Office to DCD to be reclassified from paralegal to administrative support position for the CRC process. This transfer was recommended by OSBM following study of DCD's CRC process.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

DCD continues to have delays in processing requests for criminal record checks of child care employees. Delays are caused by volume of requests and lack of DCD resources to process them in a timely manner.

Budgetary Information:

Title of Recommendation: Reduce Funding for National Criminal Record Checks

Recommendation 7 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The General Assembly appropriated \$110,000 to DCD to reimburse the State Bureau of Investigation (SBI) for the cost of obtaining national record checks on child care employees who have lived outside North Carolina within the last five years. The current charge for these checks is \$24 each. DCD's average annual reimbursement to the SBI for this service has been a little over \$97,000 per year.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

None - unless the charge for this service increases.

Name of Division/Institution: Child Development

Title of Recommendation: Reduce DCD Administration Funds (Non-Smart Start Admin Funds)

Recommendation 8 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Decrease general administration funds by \$50,000 and eliminate 8.5 positions for a total reduction of \$467,707.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Division will be less able to provide administrative support to field staff or respond to requests from providers and other customers in a timely manner. At this level the Division will have to reduce the number of subsidy program field consultants. Less technical assistance and monitoring of subsidy administration agencies creates more opportunity for noncompliance and audit exceptions.

Budgetary Information:

DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce DCD Administration Funds (Non-Smart Start Admin Funds)
Recommendation 8 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Decrease general administration funds by \$50,000 and eliminate 9.3 positions for a total reduction of \$514,481.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Division will be less able to provide administrative support to field staff or respond to requests from providers and other customers in a timely manner. The Division will also have to reduce the number of subsidy program field consultants. Less technical assistance and monitoring of subsidy administration agencies creates more opportunity for noncompliance and audit exceptions. At the 11% level, the Division will have to reduce the number of licensing staff. The result will be higher licensing caseloads and less timely responses to complaints and requests from providers for licensing changes.

DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Increase Receipts by Charging Licensing Fees

Recommendation 9 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Charge an annual child care licensing fee to all child care centers. The amount of the fee would be based on the center's approved capacity as follows: Up to 12 children -- \$35; 13-50 children--\$125; 51-100 children--\$250; and 101-200 children - \$400. There may be an additional fee for centers whose capacity exceeds 200 children. The average charge per center would be approximately \$2.50 per child slot. The amounts are comparable to what other southeastern states charge. Some of the revenue from the fees would be needed to pay the costs of administering the new requirement. Legislation will be required to implement this proposal. There are currently over 4000 centers that would be subject to the licensing fee. The proposal would exempt centers operated by public schools and state universities or community colleges.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Pros: Could generate up to \$851,000 per year in new revenue (it is unlikely that the full amount would be realized in the first year.) The revenue generated could be used to off set DCD operating costs or programs.

Cons: Providers may pass cost onto parent (although increase per child would be small). State has not increased subsidy payment rates since SFY 2000 which some providers view as a lack of support for offering higher quality care. Some municipalities charge a fee for building or fire inspections. DENR is currently drafting a statewide fee for annual sanitation inspections. The proposed charge would be \$25 for residential based centers licensed for 13 or fewer children and \$50 for all other centers. Therefore, there would be two new fees for centers that currently pay none..

Budgetary Information:

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce DCD Smart Start Administration Funds

Recommendation 10 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Decrease DCD funding for administration of Smart Start by \$31,500

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The 2001 General Assembly reduced DCD's funding for Smart Start administration by 10% from \$500,000 to \$450,000. The \$500K was significantly less than the Division spends for its responsibilities related to Smart Start activities. This reduction, which will include one-half of one position, means that the Division will continue to pay a bigger portion of the costs associated with Smart Start from other sources.

This position count needs to be added to the Division's non-Smart Start position reduction count in order to see the full impact.

Budgetary Information:

Title of Recommendation: Reduce Funding for DCD Automation

Recommendation 11 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduce funding for DIRM and ITS costs to support DCD automated systems that support Smart Start activities. The systems affected would be the child care subsidy reimbursement system and the Child Care Facilities Search Website. The website is used by parents, county agencies, and child care providers needing information about specific child care facilities.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

DIRM's existing budget shortfall would be exacerbated.

DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce Smart Start Professional Development funds

Recommendation 12 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Smart Start professional development funds are used in a variety of ways to help child care employees improve their educational qualifications without increasing the cost of child care. This reduction would cut the funding for professional development by \$14,000. These funds were already reduced from \$240,000 to \$200,000 by the 2001 Session of the General Assembly.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Professional development activities were reduced this year to assist with the budget shortfall. These funds may be cut without adverse effect on existing activities. The loss of these funds will prevent future efforts to improve the quality of child care staff.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce Funding for Smart Start Evaluation

Recommendation 13 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Smart Start legislation requires the Frank Porter Graham Child Development Center at UNC-CH to perform an annual evaluation of Smart Start funded activities. This reduction will cut the Smart Start evaluation contract with the Frank Porter Graham Center by an additional \$35,000. The funding for this contract was already reduced by \$565,000 in the last session of the General Assembly.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The probable impact would be to reduce the number of children used to assess the impact of child care of varying quality. This reduces the power of the study to detect differences that are related to child care centers' participation in Smart Start funded activities.

Budgetary Information:

	Fund Number(s)	Fund Title(s)	Account Number	Account Title	Current Funding	Reduction Option	% of Reductn Option	Revised Funding

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce Funding for Smart Start Evaluation

Recommendation 13 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Smart Start legislation requires the Frank Porter Graham Child Development Center at UNC-CH to perform an annual evaluation of Smart Start funded activities. This reduction will cut the Smart Start evaluation contract with the Frank Porter Graham Center by an additional \$40,000. The funding for this contract was already reduced by \$565,000 in the last session of the General Assembly.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The probable impact would be twofold. First, reduce the number of children used to assess the impact of child care of varying quality. This reduces the power of the study to detect differences that are related to child care centers' participation in Smart Start funded activities. Second, the printing budget for final study reports would be reduced. Results would be promulgated via a website instead of printed documents.

Title of Recommendation: Reduce Funding for NCPC Administration

Recommendation 14 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction would reduce funding for the North Carolina Partnership for Children (NCPC) by 7% of their current budget. NCPC's administration budget was cut by 10% in the last legislative session.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

NCPC is legislatively mandated to ensure fiscal accountability of the \$200+ million of state funds allocated to the local partnerships. In order to provide accountability and ensure fiscal and programmatic integrity of Smart Start, NCPC must perform annual programmatic and financial monitoring of the local partnerships, provide technical assistance and training and review and approve all local partnership service activities. Additional cuts to NCPC's budget will seriously jeopardize its ability to provide effective oversight and ensure accountability of state funds.

Title of Recommendation: Reduce Funding for NCPC Administration

Recommendation 14 of 15 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction would reduce funding for the North Carolina Partnership for Children (NCPC) by 8% of their current budget. NCPC's administration budget was cut by 10% in the last legislative session.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

NCPC is legislatively mandated to ensure fiscal accountability of the \$200+ million of state funds allocated to the local partnerships. **SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Child Development

Title of Recommendation: Reduce Smart Start Funding for Local Partnerships

Recommendation 15 **of** 15 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This option represents a 7% reduction to funding allocated to local partnerships.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Smart Start does not allocate or account for funds on a per child basis. Therefore, it is not possible to calculate the exact number of children or families impacted by a 7% reduction in funding. The reduction to the current year appropriations has already impacted the ability of local partnerships to adequately meet the needs of children and families in their counties. Any additional reductions will result in: (1) approximately 1000 children receiving subsidy assistance for full-time care would be added to the waiting list; (2) the number of child care centers participating in quality enhancement projects will be reduced, potentially resulting in fewer star ratings and lower quality of care; (3) the number of teachers participating in college professional development courses will be reduced, preventing child care centers from having staff who meet the educational requirements for higher star ratings; (4) the number of children receiving speech/language and developmental screenings will be reduced, resulting in fewer children being identified and receiving early intervention services critical to their kindergarten success; and (5) the number of families receiving in-home services or other parent education will be reduced, resulting in more children being at risk of child abuse or neglect.

Also, Smart Start subsidy expenditures are used for CCDF state match and counted toward the TANF MOE requirements. Any significant reduction in local partnership funds allocated for child care subsidy would seriously impact the state's ability to access federal CCDF Matching funds and could affect the state's ability to meet TANF MOE requirements. To avoid this, legislation could be proposed to require that no less than \$58 million in Smart Start funding (or some other amount determined to be necessary to meet federal requirements) be allocated for child care subsidy payments to approved vendors reporting expenditures through the DCD child care subsidy information system.

DETAIL WORKSHEETS**

Name of Division/Institution: Office of Education Services

Title of Recommendation: Eliminate Auditory Learning Program

Recommendation 1 **of** 13 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The Auditory Learning Center is a non-profit organization that provides staff development and training to teachers, early interventionists, and other professionals serving children with hearing loss and their families. The Center also provides direct speech and languages services to approximately four children and their families each week. (Appropriations in the amount of \$200,000 pass through OES to the center.)

Program Impact if Reduction is Approved: (No impact on local governments.)

The Auditory Learning Center's staff development services can be absorbed by existing staff within the Office of Education Services. The limited direct services provided by the ALC can be provided through OES or local school districts. This will not adversely affect any services to children.

Title of Recommendation: IEP/IFSP contracts

Recommendation 2 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Operating Budget for Contractual Services across all programs/schools (\$100,000) These are personal service contracts designed to provide related services as required by student's IEPs and IFSPs. As we reduce site-based services and increase itinerant services, the child's home LEA will provide for these related services. We will also look at ways to combine costs through RFPs.

Program Impact if Reduction is Approved: (No impact on Local Government)

No impact is anticipated from this reduction. RFPs and increase in public schools provision of related services should cover any decrease.

Budgetary Information:

Title of Recommendation: Abolish CNCSD Maintenance Staff and Operating Budget

Recommendation 3 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The Central School for the Deaf closed in June 2001. We have continued to maintain the property and some office spaces on the campus since July 1, 2001. Beginning July 1, 2002 we will no longer need the office space on the campus. The four remaining positions and operating budget needs to be eliminated.

Program Impact if Reduction is Approved: (No impact on Local Governments.)

NC Central School of the Deaf Campus will no longer provide office space or functional use to the Office of Education Services after July 1, 2002. This will not cause any impact on services to children. The Department intends to sell this property so continued maintenance will not be necessary.

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction will target a small percentage of operating budgets in both the residential schools and the pre-school programs. We are specifically targeting the Equipment and Supplies lines. Because of the supplies and equipment we were able to salvage in the closure of CNCSD last year, we will not need refurbishment and replacement at the same rate previously funded.

Program Impact if Reduction is Approved: (No Impact on Local Government)

We should be able to manage reasonably without replacements for the next 2-3 years.

Recommendation 7 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? X7% X8% X9% X10% X11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction will eliminate nine Central pre-school program staff and some of the operating budget. Seven of these positions are teacher vacancies, which we no longer need as a result of the transition of pre-school 3-5 year old services for deaf and hard of hearing to the LEAs. The 2 filled positions are administrative support, which will not be needed if we no longer have an established office on the campus of CNCSD.

Program Impact if Reduction is Approved: (No impact on Local Governments)

After reducing the Central Pre-School staff and operating budget we will be still be able to establish home based and itinerant services through remaining positions. The functions of the two administrative positions will be reallocated to other staff.

This reduction in seven teaching positions will impact the ability to serve children ages 3-5years. The local education agencies (LEA) draw down local, state and federal dollars to serve these children. Currently, we provide educational services free to the public schools as our resources allow. During the past year we have transitioned all of the 3-5 year old hearing impaired services in the Central part of the state to the public schools, so that they no longer need our support. Should they need support in the future, it would be possible to contract with us for services.

Name of Division/Institution:

Title of Recommendation: Abolish Residential Life and reduce WNCSD Positions and Operations

Recommendation 8 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? X7% X8% X9% X10% X11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The positions listed for reduction are primarily vacant positions that were originally allocated based on larger numbers of students to be served on our campuses. We no longer need to staff for 200 or more children because we have maintained the campuses with an average of 140 students each for more than 5 years. We also have several residential positions, which are no longer needed based on the closing of two buildings and the opening of a new residential building.

Program Impact if Reduction is Approved: (No impact on Local Governments)

Position reductions will impact the number of students who can be educated residentially at the NCSD in Morganton. The campus will reduce dorm staff, educational staff and support staff. Some staff will be reallocated to serve as part of an Outreach Service to provide support to students who return to their home LEA, other residential staff will not be needed based on movement to a new dorm.

DETAIL WORKSHEETS**

Name of Division/Institution:

Title of Recommendation: Reduce GMS Preschool Staff for the 3-5 Student Population

Recommendation 9 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? X7% X 8% X 9% X 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction will impact Governor Morehead School Pre-School positions (10) and operating costs. It will not directly impact the GMS Preschool program for Birth-2 years. Because of changes in state and federal law, our obligation to provide services for the 3-5 year old population has changed. We are no longer able to draw federal funds for these programs and need to work towards transitioning students to their home LEAs.

GMS Preschool 3-5 yr	3,836,948	365,669	10%	3,471,279
----------------------	-----------	---------	-----	-----------

Program Impact if Reduction is Approved: (No impact on Local Governments)

This reduction in staff will impact the ability to serve children ages 3-5years. The local education agencies (LEA) draw down local, state and federal dollars to serve these children.

Currently, we provide educational services free to these public school systems. If LEAs want this support, they could possibly contract with us for this service.

The Governor Morehead Preschool Program reduction in services to students ages 3-5years will also result in a program operating reduction. This will not impact students that the LEAs are responsible for serving, but may have a small impact on the site based full inclusion pre-school program on campus.

Recommendation 10 ___ of ___13___ for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? ___7% ___8% ___9% **X**10% ___X11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Governor Morehead Preschool Operating Reductions (\$276, 094)

Program Impact if Reduction is Approved: (No impact on Local Governments)

This reduction in staff will impact the ability to serve children ages 3-5years. The local education agencies (LEA) draw down local, state and federal dollars to serve these children. Currently, we provide educational services free to these public school systems. We are proposing the development of contracts with the LEAs to provide funding for the continuation of these positions in order for services to continue.

The Governor Morehead Preschool Program reduction in services to students ages 3-5years will also result in a program operating reduction. This will not impact students that the LEAs are responsible for serving.

Title of Recommendation: Abolish GMS Residential Life Positions

Recommendation 11 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction is for Governor Morehead School positions. These positions were created to staff a residential program of more than 100 students. We currently have 68 students and do not project any increase in our residential program needs.

Program Impact if Reduction is Approved: (No impact on Local Governments)

The Governor Morehead School positions identified for reductions are currently vacant. Program growth will be in the direction of Outreach and will not include a need for any of these position.

Budgetary Information:

Title of Recommendation: Abolish Additional Governor Morehead School Positions

Recommendation 12 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Governor Morehead School positions in the amount of \$230, 115 is the proposed reduction. These positions are currently vacant. Originally these positions were created to serve a larger population of students campus. These positions are not needed in order to continue quality programs for current students.

Program Impact if Reduction is Approved: (No impact on Local Government.)

This will impact our ability to increase the number of students served in the residential program at Governor Morehead School. If population does not increase, there will be no direct impact to students and services on campus.

Budgetary Information:

	Fund Number(s)	Fund Title(s)	Account Number	Account Title	Recommended Reduction 2002-03

Title of Recommendation: Abolish Additional eastern school Positions

Recommendation 13 of 13 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The majority of these positions were created to serve a larger population at ENCSD. We no longer need these positions for services to students. The filled positions we are reducing include middle management and additional residential staff that will not be needed when we combine dorms on campus.

Program Impact if Reduction is Approved: (No impact on Local Government.)

We will be operating with the minimum number of staff appropriate for serving 160 students in a residential placement. However, our population has not been above 144 all year – with only 100 students staying on campus. We do not anticipate an increase in the number of students to be served next year.

Name of Division/Institution: Division of Facility Services (DFS)

Title of Recommendation: Contract: Solucient

Recommendation 1 **of** 11 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Eliminate current funding in Fund 1711, Account 536900 to Solucient, Inc.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

This reduction could prevent the Department of Health and Human Services – both DFS and the State Center for Health Statistics – from directly obtaining any of the discharge data from hospitals and ambulatory surgical facilities. Hospitals and ambulatory surgical facilities would still be required to submit data to Solucient. Without the data, DFS would not be able to use it in planning and CON applications and the Center for Health Statistics would not be able to utilize it for any of their research or reports.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION OPTIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Division of Facility Services (DFS)

Title of Recommendation: Contract: Poison Control Center

Recommendation 3 **of** 11 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This will reduce current funding in Fund 1511, Account 536900 to the Statewide Poison Control Center – located in the Carolinas Medical Center, Charlotte, NC.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

This reduction represents approximately 60% of the overall state appropriations of \$1,236,492. The total budget for the Statewide Poison Control Center (SPC) is \$2,123,492 – of which includes \$887,000 in support from the Carolinas Medical Center (CMC).

Until an expansion of \$1,000,000 in state appropriations was approved in SFY 99-00, the state provided only about 15% to the overall cost of maintaining this statewide program. The remainder of funding was provided by CMC. If this program is reduced, the ability of the Statewide Poison Control Center to continue to serve the same number of clients each year (approximately 85,000 calls) will be directly proportional to the willingness of CMC to provide the funds eliminated by this reduction.

The Poison Control Center received a three-year “stabilization grant” from the federal government. They are currently in the second year of funding. Thus far, they have received \$818,310.

Of their total budget of \$2.1M, approximately \$1,200,000 (57%) covers the salaries of 22 positions – including poison information specialists, toxicologists and a medical director. We have no way of determining at what level in funding reductions that CMC would decide that it could no longer maintain a statewide center – thereby eliminating this resource to the larger, statewide medical community and the general public.

Recommendation 3 **of** 11 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This will reduce current funding in Fund 1511, Account 536900 to the Statewide Poison Control Center – located in the Carolinas Medical Center, Charlotte, NC.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

This reduction represents approximately 92% of the overall state appropriations of \$1,236,492. The total budget for the Statewide Poison Control Center (SPC) is \$2,123,492 – of which includes \$887,000 in support from the Carolinas Medical Center (CMC).

Until an expansion of \$1,000,000 in state appropriations was approved in SFY 99-00, the state provided only about 15% to the overall cost of maintaining this statewide program. The remainder of funding was provided by CMC. If this program is reduced, the ability of the Statewide Poison Control Center to continue to serve the same number of clients each year (approximately 85,000 calls) will be directly proportional to the willingness of CMC to provide the funds eliminated by this reduction.

The Poison Control Center received a three-year “stabilization grant” from the federal government. They are currently in the second year of funding. Thus far, they have received \$818,310.

Of their total budget of \$2.1M, approximately \$1,200,000 (57%) covers the salaries of 22 positions – including poison information specialists, toxicologists and a medical director. We have no way of determining at what level in funding reductions that CMC would decide that it could no longer maintain a statewide center – thereby eliminating this resource to the larger, statewide medical community and the general public.

Title of Recommendation: Contract: DOJ – Eliminate one Paralegal Position

Recommendation 4 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? XX 7% XX 8% XX 9% XX 10% XX 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This will reduce funding for one Paralegal Position in Fund 1711, Account 532110 that supports a contract with the NC DOJ. The position is currently filled.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Elimination of this position would impact both the supervising attorney and the other two support positions as they will have to absorb the duties currently assigned to this position. The bulk of work would be divided among the support positions.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Division of Facility Services (DFS)

Title of Recommendation: Staff: Eliminate 2.0 Vacant and 1.0 Filled Positions

Recommendation 8 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? XX 7% XX 8% XX 9% XX 10% XX 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction includes the elimination of two vacant positions – one each in our Construction and Mental Health Licensure & Certification sections – and one filled position in the Office of Emergency Medical Services. This reduction would total 3.0 FTE's.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced; block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Construction: The vacant position reviews and inspects new and existing mental health facilities for compliance with licensure and safety requirements related to building systems and construction. The Division receives and completes approximately 80 new projects each month that are serving residents who are moving from institutional programs into a residential setting. The Division must also investigate complaints of existing facilities (approximately 3,500 mental health facilities) concerning fire safety and other building issues. Services to mental health providers and clients will be delayed as well as investigation of complaints if this position is not filled and lost. This position has an annual salary of \$ 53,809 which is supported by 100% state appropriations. No severance costs would be incurred with the elimination of this position.

Mental Health Licensure & Certification: The impact of eliminating this vacant position will be two-fold: (1) The section currently licenses 60-80 new mental health providers each month. With diminished capacity to perform initial licensure activities, providers seeking licensure will experience delays in obtaining licenses which could affect placement of individuals with mental illness, development disabilities or substance abuse needs that are in need of treatment or habilitation. This could affect the implementation of the State Mental Health Plan since one of the plan's primary focuses is to expand community services and rely less on state-operated institutions; (2) investigations of mental health complaints would not be conducted in a timely manner and the agency's ability to conduct routine surveys of mental health providers will be reduced due to diminished manpower to perform inspections which are done by Facility Survey Consultant I staff. This position has an annual salary of \$38,710 which is supported by 81% state appropriations and 19% Medicaid funds. No severance costs would be incurred with the elimination of this position.

Office of Emergency Medical Services: This position writes specifications for state ambulance contracts and inspects all vehicles purchased under contract. Each year, approximately 50 EMS providers purchase ambulances under state contract. Technical assistance is also provided to local governments on the procurement of ambulances – including the development of custom specifications to meet their individual needs. Loss of this position will eliminate our ability to provide technical expertise and assist local governments with these purchases. This position has an annual salary of \$39,722 which is supported by 100% state appropriations. A severance package of \$32,987 would be incurred with the elimination of this position.

Budgetary Information:

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Division of Facility Services (DFS)

Title of Recommendation: Staff: Eliminate 3.0 Filled Positions
Recommendation 9 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This reduction includes the elimination of three filled positions – all located in the Office of Emergency Medical Services. This reduction would total 3.0 FTE's.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Position A: Elimination of this position would hamper the day-to-day administration of the certification/recertification process for all EMS certification levels. This task includes the development of the certification examination (both written and practical) consultation with local teaching institutions, maintenance of the certification databank and analysis of EMS examination results. This position has an annual salary of \$47,842 which is supported by 100% state appropriations, A severance package of \$23,921 would be incurred with the elimination of this position.

Position B: The elimination of this position would reduce the level of secretarial support to the EMS Communications Director and an EMS Specialist. This position has an annual salary of \$32,149 which is supported by 100% state appropriations, A severance package of \$2,874 would be incurred with the elimination of this position.

Position C: This position serves as contract manager for several Section contracts. It also coordinates the agency's response as part of the State Emergency Response Team (SERT) when the Governor declares a state of emergency, and serves as a liaison with the NAREMS for the statewide First Aid competition. This position has an annual salary of \$37,022 which is supported by 100% state appropriations, A severance package of \$12,341 would be incurred with the elimination of this position.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: Division of Facility Services (DFS)

Title of Recommendation: Revenue: Licensure and Inspection Fees
Recommendation 11 of 11 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? XX 7% XX 8% XX 9% XX 10% XX 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

This is not a proposed reduction. Rather, it is a proposal to implement licensure and inspection fees. Certain health care facilities (excluding Hospice agencies) would be required to pay fees for initial licensure and at annual renewals. Also included in this proposal is an inspection fee for emergency medical vehicles.

A detailed chart depicting the number of facilities/beds and the proposed revenue that would be generated is attached to this detail sheet. This chart notes the exclusion of a licensure fee for 74 Hospice agencies, but includes an entry for an inspection fee for emergency medical vehicles.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

See narrative under "Other Considerations."

NO. OF POSITIONS					

Other Considerations

- Are statutory changes or special provisions required to implement? XX Yes ___ No If yes, provide additional information.

A special provision would be necessary to amend the applicable licensure statutes for each facility/program subject to these new fees. A special provision or rule(s) regarding cost-settling may also be necessary for DMA as licensure fees may not be included as an allowable non-direct care expense.

- Does this request require additional resources/reduced resources to another state agency? Yes No If yes, name the agency and the funds required/reduced.

A large number of the facilities subject to this licensure fee proposal receive reimbursement through the State's Medicaid program. As such, a portion of this fee should be reported in a facility's annual cost report (as a non-direct charge) and, thus, be reimbursed by Medicaid. The amount of reimbursement will be driven by two factors: (1) any applicable cap on non-direct care charges; and (2) the percentage of Medicaid-eligible residents in a given facility. Any rate increase would be supported by a mix of federal dollars and the required match.

Example: the average adult care home (with 7 or more beds) has its non-direct care expenditures capped at 60%, and has two-thirds of its population as Medicaid-eligible. Therefore, reimbursement for an average, annual licensure fee of \$820 (total revenue divided by total, impacted facilities) would be first capped at 60% and then two-thirds – yielding a maximum Medicaid reimbursement of \$328 back to the facility through an increased per diem, monthly rate, etc. This would be paid by Medicaid at the current FMAP of \$204 (federal), \$108 (state) and \$16 (county).

While these fees would generate additional revenue, they would however increase costs to our Medicaid program. The amount of cost to DMA would be driven by the portion of the licensure fees that would be reimbursed to facilities. For the adult care home example cited above, the total increased cost to DMA would be \$328 – of which the non-federal share would be \$124. The difference of \$696 (\$820 less \$124) would now be available to free-up an existing source of state funds.

A very preliminary estimate of the offset to the \$2.998M in new licensure revenue indicates that \$1,194,384 would be returned to the impact facilities as a Medicaid-allowable reimbursement. This amount is comprised of \$398,088 (state) and \$59,719 (county). At a minimum, DMA would need \$398K to cover its increase in facility reimbursement. A more accurate analysis of these projections should be undertaken by the Rate Setting Unit at DMA to determine the actual amount of reimbursement and state funds needed.

We would recommend that the licensure fees generated under this proposal be deposited into a General Fund/Non-Tax Revenue account. Depositing the funds in DFS' budget code could create cash flow problems as licensure fees will not arrive on any predictable schedule. This recommendation is similar to our current arrangement for CON application fees.

The Controller's Office would probably need additional staff to handle the increased number of deposits. We estimate that, on average, their office would process 7,043 additional deposits each year – for an average of 30 each day. This function could easily be handled by an Administrative Assistant I, pay grade 63, with a mid-point salary of \$29,059.

- Does this request relate to a capital improvement project? Yes No If yes, what is the title of the capital improvement project and the projected completion date?

NOTES

Column (5) ADDTL FEE is the additional fee that will be based on the number of beds, offices or rooms as shown in Column (6).

OTHER HOSPITALS excludes all State-owned facilities which are exempt from licensure.

TOTAL # FACILITIES does not include emergency medical vehicles.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: MH/DD/SAS

Title of Recommendation: Child & Family State Facility Reductions

Recommendation 1 **of** 7 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Repairs to building will be reduced as part of the operating budget for 03....EATP

\$1,399 Eliminate student temporary wages

\$8,198 Salary Reserve and fringe...Wright School

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Repairs to building will be reduced by 25%.....EATP

We have not used the student temporary wages in several years; the loss of salary reserve removes the potential to use our own funds to upgrade position for proposed Medicaid transition...Wright School

Loss of salary reserve will hurt the ability to hire into vacant positions and to make salary adjustments for retention and internal staffing needs.

Impact on Local Governments: None.

Budgetary Information:

	Fund Number(s)	Fund Title(s)	Account Number	Account Title	Recommended Reduction 2002-03
	1280	Wright School	1XXX	Personal Services	(9,597)
				Less Severance Costs	
			21XX	Contracted Services	
	1217	Eastern Adolescent Tx. Ctr.	22XX-5XXX	Operating Expenses	(5,938)
			6XXX	Aid and Public Assistance	
			7XXX	Reserves	
			8XXX	Transfers	
REQUIREMENTS					(15,535)
RECEIPTS					0
APPROPRIATIONS					(15,535)
NO. OF POSITIONS					0

Category	Current Funding	Reduction	% Reduction	Revised Funding
Total Funding	3,937,612	(15,535)	(.3945%)	3,922,077
Receipts	838,070	0	0%	838,070
Appropriation	3,099,542	(15,535)	(.5012%)	3,084,007

Based on BD-701 run 3/6/02 thru 3/31/02 – authorized budget. Current funding includes fund codes 1217 and 1280. Fund code 1216 (Whitaker School) omitted since it is planned for closure during SFY 03 per approved Trust Plan.

Other Considerations

- Are statutory changes or special provisions required to implement? ___ Yes __X__ No If yes, provide additional information.
- Does this request require additional resources/reduced resources to another state agency? ___ Yes __X__ No If yes, name the agency and the funds required/reduced.
- Does this request relate to a capital improvement project? ___ Yes __X__ No If yes, what is the title of the capital improvement project and the projected completion date?

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: MH/DD/SAS

Title of Recommendation: Adult Mental Health State Facility Reductions

Recommendation 2 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? X 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Close 5 bed TB unit at Cherry
Reduce education/training, staff development
Eliminate 13.5 vacant positions (of which 8 are direct care and 5.5 are non-direct care positions)
Reduce supplies, printing, travel, maintenance, equipment, etc.

Program Impact if Reduction is Approved:

Facilities will not be able to replace outdated or broken equipment including hospital beds.
Loss of staff will decrease the flexibility of the hospitals to meet patient nutritional needs as well as reduce the operating efficiency of the facilities in the areas of maintenance, staff development, and administration.
Community alternatives would need to be found to house and supervise the one or two non-compliant TB patients who are housed on the TB unit. The lack of such alternatives could threaten public health.

Impact on Local Governments: Community alternatives would need to be found to house and supervise the 1 or 2 non-compliant TB patients who are housed on the TB unit.

Budgetary Information:

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: MH/DD/SAS

Title of Recommendation: Adult Mental Health State Facility Reductions

Recommendation 2 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7 % 8 % 9 % 10 % 11 %

Description of Proposed Reduction:

- Eliminate 21 positionsn (of which 11 are direct care and 10 are non-direct care positions).
- Reduce education/training, staff development.
- Close 5 bed TB unit.
- Reduce supplies, printing, travel, equipment, maintenance, etc..

Program Impact if Reduction is Approved:

- Facilities will not be able to replace outdated or broken equipment such as hospital beds and motorized vehicles.
- Loss of staff will impact the ability of the facilities to meet patient nutritional needs as well as reduce the operating efficiency of the facilities in the areas of maintenance, staff development, and administration.
- Community alternatives would need to be found to house and supervise the one or two non-compliant TB patients who are served on the TB unit. The lack of such alternatives could threaten public health.
- Elimination of the teaching positions could negatively impact the academic achievement of the students/patients.

Impact on Local Governments: Community alternatives would need to be found to house and supervise the 1 or 2 non-compliant TB patients who are housed on the TB unit. Would begin to impede the ability to transfer resources to the community when individuals scheduled for transfer as a result of Olmstead planning and other downsizing activities.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: MH/DD/SAS

Title of Recommendation: Adult Mental Health State Facility Reductions

Recommendation 2 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% 11%

Description of Proposed Reduction:

- Eliminate 48 positions (of which 33 are direct care and 15 are non-direct care positions).
- Reduce education/training, staff development.
- Close 5 bed TB unit.
- Reduce supplies and printing
- Reduce equipment budget.
- Close CPI outpatient clinic at JUH.

Program Impact if Reduction is Approved:

- Facilities will not be able to replace outdated or broken equipment such as hospital beds, motorized vehicles, and medical equipment.
- Loss of staff will impact the ability of the facilities to meet patient nutritional and treatment needs. Operating efficiency of the facilities will decline in the areas of maintenance, grounds upkeep, staff development, and administration.
- Community alternatives would need to be found to house and supervise the one or two non-compliant TB patients who are served on the TB unit. The lack of such alternatives could threaten public health.
- Closure of CPI outpatient clinic would result in the loss of outpatient services to approximately 180 children and their families. The clinic also serves as a primary training resource for Duke University Medical School.
- Reduction in direct care positions will jeopardize continued certification/accreditation for the facilities.
- Seriously impede the ability to transfer resources to the community when individuals scheduled for transfer as a result of Olmstead planning and other downsizing activities.

Impact on Local Government: Community alternatives would need to be found to house and supervise the 1 or 2 non-compliant TB patients who are housed on the TB unit. Seriously impede the ability to transfer resources to the community when individuals scheduled for transfer as a result of Olmstead planning and other downsizing activities. Community would lose hospital resources related to child outpatient services at Umstead. All of these actions would place a greater demand on community services which would also be facing reductions in State appropriation.

Budgetary Information:

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: MH/DD/SAS

Title of Recommendation: Adult Mental Health State Facility Reductions

Recommendation 2 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% X 11%

Description of Proposed Reduction:

- Eliminate 69 positions (of which 46 are direct care and 23 are non-direct care positions).
- Reduce education/training, staff development.
- Close 5 bed TB unit.
- Reduce supplies and printing
- Reduce equipment budget.
- Close CPI outpatient clinic at JUH.
- Eliminate 10 psychiatric rehabilitation beds at Cherry Hospital with no community resource transfer.

Program Impact if Reduction is Approved:

- Facilities will not be able to replace outdated or broken equipment such as hospital beds, motorized vehicles, and medical equipment.
- Loss of staff will impact the ability of the facilities to meet patient nutritional and treatment needs. Operating efficiency of the facilities will decline in the areas of maintenance, grounds upkeep, staff development, and administration.
- Community alternatives would need to be found to house and supervise the one or two non-compliant TB patients who are served on the TB unit. The lack of such alternatives could threaten public health.
- Closure of CPI outpatient clinic would result in the loss of outpatient services to approximately 180 children and their families. The clinic also serves as a primary training resource for Duke University Medical School.
- Reduction in direct care positions will jeopardize continued certification/accreditation for the facilities.
- Patients to staff ratios will increase in the facilities which will help lead to higher number of incidents as well as longer lengths of stay.
- Additional community capacity will be needed to absorb the patients who would have been served in the 10 rehabilitation beds.
- Seriously impede the ability to transfer resources to the community when individuals scheduled for transfer as a result of Olmstead planning and other downsizing activities.

Impact on Local Governments: Community alternatives would need to be found to house and supervise the 1 or 2 non-compliant TB patients who are housed on the TB unit. Community would lose hospital resources related to psychiatric beds and child outpatient services at Umstead. All of these actions would place a greater demand on community services which would also be facing reductions in State appropriation. Seriously impede the ability to transfer resources to the community when individuals scheduled for transfer as a result of Olmstead planning and other downsizing activities.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: MH/DD/SAS

Title of Recommendation: Mental Retardation State Facility Reductions

Recommendation 3 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? X 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction of salary reserve balances.

Reduction of 1.0 position.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Elimination of the position would result in the need to redistribute support service activities such as housekeeping, maintenance, etc., among other staff.

Reduction of salary reserve reduces ability to support pending issues including range revisions for pharmacists and MIA adjustments for nurses. It effects the ability to hire, promote and retain employees, promotions, raises, competitive salary will be negatively effected.

Impact on Local Governments: None

Budgetary Information:

	Fund Number(s)	Fund Title(s)	Account Number	Account Title	Recommended Reduction 2002-03

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction of salary reserve balances.

Reduction of 1.0 positions.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Reducing available salary reserve balances will adversely effect our ability to hire hard-to-recruit persons above minimum of the salary grade. It will limit the ability to award salary adjustments, salary range revisions and special entry rates. It will delay or eliminate funds for employee promotions and negatively effect employee retention.

Elimination of the position would result in the need to redistribute support service activities such as housekeeping, maintenance, etc., among other staff.

Impact on Local Governments: None

Title of Recommendation: Mental Retardation State Facility Reductions

Recommendation 3 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% X 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction of salary reserve balances.

Reduction of 3.0 positions.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

At the 9% reduction level, two positions would be eliminated that would effect community support services provided in catchment areas, in addition to elimination of one position would result in the need to redistribute support service activities such as housekeeping, maintenance, etc., among other staff.

Reducing available salary reserve balances will adversely effect our ability to hire hard-to-recruit persons above minimum of the salary grade. It will limit the ability to award salary adjustments, salary range revisions and special entry rates. It will delay or eliminate funds for employee promotions and negatively effect employee retention.

Impact on Local Governments: None

Title of Recommendation: Mental Retardation State Facility Reductions

Recommendation 3 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction of salary reserve balance.

Reduction of 4.5 positions.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

The loss of positions at this level of reduction could result in an increased requirement for contract funds to continue some essential maintenance, repair or administrative functions required for the provision of services to residents and in the need to redistribute support service activities such as housekeeping, maintenance, etc., among other staff.

Reducing available salary reserve balances will adversely effect our ability to hire hard-to-recruit persons above minimum of the salary grade. It will limit the ability to award salary adjustments, salary range revisions and special entry rates. It will delay or eliminate funds for employee promotions and negatively effect employee retention.

Impact on Local Governments: None

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: MH/DD/SAS

Title of Recommendation: Mental Retardation State Facility Reductions

Recommendation 3 **of** 7 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% X_11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction of salary reserve balance.

Reduction of 6.5 positions.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Reducing an additional 2.0 positions, bringing the total position reduction in this program to 6.5, will sharply reduce regional outreach and community support programs as well as professional active treatment services to residents. In addition, reduction of the other 4.5 positions could result in an increased requirement for contract funds to continue some essential maintenance, repair or administrative functions required for the provision of services to residents and in the need to redistribute support service activities such as housekeeping, maintenance, etc., among other staff.

Reducing available salary reserve balances will adversely effect our ability to hire hard-to-recruit persons above minimum of the salary grade. It will limit the ability to award salary adjustments, salary range revisions and special entry rates. It will delay or eliminate funds for employee promotions and negatively effect employee retention.

Impact on Local Governments: Will impact the ability of the MRC's to provide community outreach and assistance to help local programs with individuals in the community that have special and often complex treatment needs.

Title of Recommendation: Substance Abuse State Facility Reduction

Recommendation 4 **of** 7 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% X 8% 9% 10% 11%

Description of Proposed Reduction:

Eliminate vacant Healthcare Technician position with 75% going to the reduction. Remainder of salary (25%) to be utilized to partially fund Physician Director II-B position which is currently vacant.

Reduce Healthcare Technician II budgeted salary by \$3,686 creating salary reserve.

Reduce Social Worker II budgeted salary by \$10,171 creating salary reserve.

Reduce operating accounts such as travel, supplies, maintenance, equipment, etc. by \$28,919

Program Impact if Reduction is Approved:

Healthcare Technician I – reduction of direct care services to provide nursing assisted.

Some level of difficulty encountered in recruiting qualified social worker unless additional salary reserve can be generated.

Diminished ability to provide training/education to staff at a time when more training is needed to prepare staff for detox patients.

Less ability to purchase/repair equipment and ordering needed basic supplies for Center operations.

Impact on Local Governments: None

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction

Eliminate vacant Healthcare Technician position with 75% going to the reduction. Remainder of salary (25%) to be utilized to partially fund Physician Director II-B position which is currently vacant.

Reduce Social Worker II budgeted salary by \$10,171 creating salary reserve.

Abolish Healthcare Technician I position, currently vacant and budgeted at 18,900.

Reduce budgeted level of pharmacist position creating salary reserve.

Reduce operating accounts such as travel, supplies, maintenance, equipment, etc. by \$28,919

Program Impact if Reduction is Approved:

Healthcare Technician I – loss of direct care services to provide nursing assisted duties.

Some level of difficulty encountered in recruiting qualified social worker and pharmacist unless additional salary reserve can be generated.

Diminished ability to provide training/education to staff at a time when more training is needed to prepare staff for detox patients.

Less ability to purchase/repair equipment and ordering needed basic supplies for Center operations.

Impact on Local Governments: None

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: DMHDDSAS

Title of Recommendation: Substance Abuse State Facility Reduction

Recommendation 4 **of** 7 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% X 10% 11%

Description of Proposed Reduction

- * Eliminate vacant Healthcare Technician position with 75% going to the reduction. Remainder of salary (25%) to be utilized to partially fund Physician Director II-B position which is currently vacant.
- * Abolish Healthcare Technician I position, currently vacant and budgeted at 18,900.
- * Reduce Social Worker II budgeted salary by \$10,171 creating salary reserve.
- * Downgrade Police Officer III position currently vacant to Police Officer I creating \$5,480 salary reserve
- * Reduce budgeted level of pharmacist position creating salary reserve.
- * RIF twelve dietary positions (12 FTE's) at: \$405,338 (328,840 salaries + fringe)
- Contract out dietary services at: 336,577
- Savings: 68,761

(Note: Contract service is based on all units being open under the State Plan to bring up additional acute/crisis capacity.)

- * Reduce operating accounts such as travel, supplies, maintenance, equipment, etc. by \$28,919

Program Impact if Reduction is Approved:

- * Healthcare Technician I – loss of direct care services to provide nursing assisted duties.
- * Positive impact of improved dietary services for patients.
- * Some level of difficulty encountered in recruiting qualified social worker, pharmacist and police officer unless additional salary reserve can be generated.
- * Diminished ability to provide training/education to staff at a time when more training is needed to prepare staff for detox patients.
- * Less ability to purchase/repair equipment and ordering needed basic supplies for Center operations.

DETAIL WORKSHEETS**

Name of Division/Institution: DMHDDSAS

Title of Recommendation: Increase Receipts in State Facilities

Recommendation 5 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% x 11%

Description of Proposed Reduction:

Budget additional receipts which are anticipated to be received in SFY 03 on a recurring basis. Projections are based on SFY 02 actual collections through January 31, 2002.

Program Impact if Reduction is Approved:

No negative impact. This is simply increasing receipts and decreasing State appropriation with no change in budgeted requirements.

Impact on Local Governments: None.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: DMHDDSAS

Title of Recommendation: Central Office Administrative Reductions

Recommendation 6 **of** 7 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? x 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction at this level would be \$30,220 and would be focused on reductions in travel, equipment and supply funds, with some possible reduction in contract dollars. At this level, it is anticipated that some cost shifting to Federal funding would occur to help mitigate the impact. Prior to any specific contract reductions, the Division would undertake a comparative "value-received to cost incurred" assessment of contract products to determine functions which could be reduced with the least negative impact on the Division's new way of doing business under the State Plan.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

In light of the State budget situation, this level of reduction could probably be sustained without creating any MOE compliance issues or doing serious harm to overall Division operations.

Impact on Local Governments: None

Budgetary Information:

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: DMHDDSAS

Title of Recommendation: Central Office Administrative Reductions

Recommendation 6 **of** 7 **for SFY 02-03**

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% X 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Reduction at this level would be \$162,013 and would be focused on reductions in travel, equipment and supply funds, with a reduction in contract dollars. At this level, it is anticipated that some cost shifting to Federal funding would occur to help mitigate the impact. Prior to any specific contract reductions, the Division would undertake a comparative "value-received to cost incurred" assessment of contract products to determine functions which could be reduced with the least negative impact on the Division's new way of doing business under the State Plan.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

In light of the State budget situation, the majority of this reduction could probably be sustained without creating any MOE compliance issues or doing serious harm to overall Division day to day operations. At this level and above, the Division begins to move into more contractual reductions in order to retain basic infrastructure support for IT functions, phone service, required travel related to monitoring and compliance functions, and overall State Plan implementation functions.

Impact on Local Governments: At this reduction level, could begin to compromise the Division's ability to provide the full range of compliance and monitoring activities, thereby losing a certain ability to assist with activities which help to minimize the possibility of audit exceptions.

- Based on BD-701 run 3/6/02 thru 3/31/02 - authorized budget. Current funding includes fund codes 1110, 1210, 1212, 1310 and 1410. Excludes \$4.6m related to IPRS in both requirements and receipts and \$576k for malpractice insurance since these are not recurring resources in the Central Office administrative budget.

Other Considerations

- Are statutory changes or special provisions required to implement? ___ Yes No If yes, provide additional information.
- Does this request require additional resources/reduced resources to another state agency? ___ Yes No If yes, name the agency and the funds required/reduced.
- Does this request relate to a capital improvement project? ___ Yes No If yes, what is the title of the capital improvement project and the projected completion date?

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION RECOMMENDATIONS
DETAIL WORKSHEETS**

Name of Division/Institution: DMHDDSAS

Title of Recommendation: Area Program Reductions

Recommendation 7 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction

Reductions at this level would constitute a \$38,368,082 decrease in State funding to area programs for community based services. This reduction would impact all 38 area programs and most, if not all, of their contractors.

Program Impact if Reduction is Approved:

Based on an across the board SFY 01 average per person cost (\$2,722) served in area programs and through their contracts, this reduction would equate to the total loss of services for approximately 14,096 individuals. The number of individuals impacted would be greater if community reductions resulted in decreases in volume of services provided rather than individuals being terminated from services completely. The Division would allocate this reduction amount to area programs, with certain prohibited reductions associated with extremely critical functions and Federal or State requirements, and the area programs would be responsible for submitting reduction plans to the Division for approval. Direction to area programs for reductions would also include (a) corresponding reductions in administrative costs, (b) necessary service reductions/terminations would be primarily directed to those with lower need levels, generally being seen on a periodic outpatient basis and for a short period of time, and (c) those individuals with the highest level of need are to be negatively impacted the least. Such plans would more specifically identify the types of services to be reduced, number of individuals by disability category that would be impacted, and the impact on consumers and family members. Regardless of where reductions are taken, the Division would anticipate an increased level of demand on State facilities who, at the same time, would be facing (a) general budget reductions, (b) probable Federal Civil Rights for Institutionalized Persons Act (CRIPA) compliance issues and (c) downsizing efforts associated with Olmstead and implementation of the State Plan, with the corresponding transfer of resources from institutions to communities. While Medicaid has grown in the community over the last 10 years, these revenues support Medicaid eligible individuals and Medicaid reimbursable services. Reductions in State funds most directly impact the non-insured indigent population and leaves the community services in danger of becoming a two-tiered system – with enriched Medicaid services and a lower level of care for the non-Medicaid indigent population.

Reductions of this magnitude, depending upon the disability areas eventually impacted, could create non-compliance with MOE requirements for the Mental Health and Substance Abuse block grants.

Impact on Local Governments: Will probably result in the loss of an unknown number of positions, depending upon reductions which are taken in programs operated by area programs compared to the amount of contract service reductions. Will also decrease expenditures in the local communities and negatively impact the collection of various sales and income taxes.

Title of Recommendation: Child & Family State Facility Reductions

Recommendation 1 of 7 for SFY 02-03

Recommendation Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

Repairs to building will be reduced as part of the operating budget for 03.EATP

Eliminate student temporary wages @ \$1,399

\$3,838 Salary Reserve and fringe.....Wright School

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

Repairs to building will be reduced by 15%....EATP

We have not used the summer position in several years; the loss of salary reserve removes the potential to use our own funds to upgrade position for proposed Medicaid transition....Wright School

Loss of salary reserve will hurt the ability to hire into vacant positions and to make salary adjustments for retention and internal staffing needs.

Impact on Local Governments: None.

DETAIL WORKSHEETS**

Name of Division/Institution: Division of Public Health - Epidemiology - HIV/STD Prevention & Care

Title of Option: Revenue Enhancement - HIV/STD Prevention & Care Contracts

Option 1 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Switches funding to utilize federal funds in lieu of state funding equal to 8% of the total state appropriations used on HIV/STD Prevention & Care contracts with community-based organizations.

Program Impact if Reduction is Approved:

Personnel performing HIV counseling, testing and referral functions in North Carolina must be trained to do so in accordance with current CDC guidelines. The HIV/STD Prevention & Care Branch has contracted with Whetstone Consultations to provide this training to employees of the Branch, local health departments and community-based organizations. This is an allowable expense for federal funds and they will be used to fund the contract in lieu of state appropriations.

Because an overmatch currently exists for the Ryan White Title II grant, this reduction will have no impact on the grant. There is no impact on local governments.

Budgetary Information:

RevEn__SCHS

Name of Division/Institution: Division of Public Health/State Center for Health Statistics

Title of Option: Revenue Enhancement - State Center for Health Statistics

Option 5 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction : The NCHS – Vital Statistics Cooperative Program Contract receipts are generated from federally mandated vital statistics data transfers to the National Center for Health Statistics in accordance with the terms of their Vital Statistics Cooperative Program Contract with North Carolina. Under the current contract the maximum VSCP receipts possible for four quarters is \$406,528. The current total receipts OSB has allowed to be budgeted under this contract is \$303,338 or about 75% of the possible maximum receipts.

The receipts in the Behavioral Risk Factor Surveillance System are generated on the questions other agencies, private non-profit organizations and other sections within the Division of Public Health request to be surveyed. The questions are of importance to public health, and produces county-specific estimates for the ten largest counties in the state. The increase in receipts to replace state appropriations is predicated on the assumption of increased receipts for increased questions requested from the above groups.

Program Impact if Reduction is Approved

Replace state appropriations with receipts generated in the NCHS – Vital Statistics Cooperative Program Contract and the Behavioral Risk Factor Surveillance System Receipt areas of the State Center.

There is no impact on local governments.

Title of Option: Revenue Enhancement - Women and Children's Health (POET)

Recommendation 6 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: Perinatal Outreach and Education Training Program (POET) – Reduce State Appropriations by \$281,257 and replace with Medicaid FFP.

The NC Perinatal Outreach and Education Training Program (POET) is a statewide program consisting of Nurse Specialists with advanced training and experience in intensive maternal, fetal, and neonatal care. The vision of the POET program is to facilitate a seamless system of care that promotes the use of "Best Practices" by all health care providers i.e. local health departments, tertiary and community hospitals, community health centers, and private health providers. The mission of the program is to enhance the knowledge, attitudes, and skills of healthcare providers/communities serving women of childbearing age, infants through the first year of life, and their families.

In FY01, 9,400 professionals were reached through educational and outreach efforts. A total of 517 programs were provided which totaled 71,872 learning hours. Individuals from 98 counties participated in program activities in FY01. Clinical areas of concentration include high risk perinatal and preconceptional care, care of HIV infected pregnant women and their infants, fetal monitoring and infant resuscitation, management of gestational diabetes, care of substance abusing pregnant women and their infants, care and management of tobacco addicted women and intrapartum assessment and management using the "Intrapartum Assessment and Management Modules" and care of low birth weight/preterm infants.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

No impact to services due to change in funding source.

 DETAIL WORKSHEETS

RevEn - Oral Health

Name of Division/Institution: Division of Public Health. Oral Health Section

Title of Option: Revenue Enhancement - Oral Health Section

Option 7 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

The Division of Public Health proposes to increase receipts (Medicaid FFP) in the Oral Health Services Program. The fifty-three (53) Dental Hygienists serve Medicaid eligible children, but the Division has not been drawing Medicaid funds. Approximately 37% of the children served are Medicaid eligible; therefore, receipts can be increased to the level shown below to replace state appropriations.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

There will be no impact on current levels of service or the clientele served; however, as the rates for drawing federal funds changes as a result of ongoing negotiations between the Division of Public Health and the Division of Medical Assistance, the total receipts may increase or decrease over time, and could affect negatively the number of children served.

Title of Option: Revenue Enhancement - Hepatitis B Vaccine School Site Initiative

Option 9 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Replace state vaccine appropriations with federal vaccine funds, if sufficient; eliminate the Initiative altogether if insufficient federal funds.

Program Impact if Reduction is Approved: Since 1995, >70% of sixth graders have received hepatitis B vaccine in the school setting. This initiative, scheduled to conclude in school year 04-05, assures that a high percentage of adolescents are protected against the hepatitis B virus prior to the time of highest risk. Because adolescents are seldom seen in their medical home, few sixth graders will be vaccinated if this initiative is discontinued. Although this is a valuable initiative, the decision to reduce state funding by 15% lead to the determination that this was less critical than other aspects of the program.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION OPTIONS RevEnLab-Newborn scrng
DETAIL WORKSHEETS**

Name of Division/Institution: Division of Public Health/Epidemiology Section/State Laboratory of Public Health

Title of Option: Revenue Enhancement – State Lab - Newborn Screening

Option 10 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction

New receipts will be generated in the Newborn Screening/Clinical Chemistry Programs in the NC State Laboratory of Public Health (NCSLPH). Presently, Newborn Screening/Clinical Chemistry Programs requirements total \$2,236,498, funded by \$1,000,000 in Appropriations and \$1,236,498 in Receipts (DMA Medicaid Title XIX, account 538375). This proposal charges hospital and other health care providers a fee for each specimen submitted for testing. The fees will generate \$1,000,000 in new receipts (100,000 specimens @ \$10.00 per specimen), thus making these programs 100% receipt funded.

Total requirements do not include unfunded replacement equipment costs and anticipated technology upgrades. Consequently, program requirements will increase in out years, necessitating future cost shifting to these hospitals and other health care providers.

Impact on local governments is minimal since most requests for newborn screening are submitted by hospitals and birthing centers.

Program Impact if Reduction is Approved:

The State Lab's Newborn Screening/Clinical Chemistry Programs support every child born in the State with testing for 32 life threatening metabolic health conditions and works intimately with the State's Women's and Children's Genetics Care Program. Because these programs will become 100% receipt funded, future programmatic increases will require an equal increase in fees, which may result in health care providers seeking alternative testing venues and the connectivity with other State Health Agencies, may be severely hampered.

DETAIL WORKSHEETS**

Name of Division/Institution: Division of Public Health - Epidemiology - HIV/STD Prevention & Care

Title of Option: Contracts - Terminate Lab Corps Contract for CD4 Testing

Option 11 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

To terminate the contract with LabCorp for the provision of CD4 testing.

Program Impact if Reduction is Approved:

The CD4 (T-cell) count in a client's blood is indicative of the strength of the client's immune system and is used to gauge the progress of the HIV disease. The contract in question provides CD4 testing to local health departments; approximately 25 of the 87 departments utilize the service (with two counties accounting for 56% of the cost), while the remainder use alternative testing options. Terminating this contract may result in a delay for providers/clients in obtaining test results. Clients will have to be referred to a local HIV Primary Care, HRSA Title III or hospital infectious disease clinic.

Because an overmatch currently exists for the Ryan White Title II grant, this reduction will have no impact on the grant.

**SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION OPTIONS Contr_Dyspl
DETAIL WORKSHEETS**

Name of Division/Institution: Public Health Division/Health Promotion Disease Prevention Section

Title of Option: Contracts - Terminate Dysplasia Clinic Contracts

Option 12 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7 % 8 % 9 % 10% 11%

Description of Proposed Reduction:

Closure of the dysplasia clinic program is recommended. NCGS 130A-205 and NCGS 130A-206 authorize the cancer control program for diagnostic and treatment services including, but not limited to, support for dysplasia clinics. Administrative rule 15A NCAC 24A.0303 (a) states that reimbursement for services for payment programs, including cancer control, is subject to availability of funds.

Reimbursable cancer services are defined in 15A NCAC 16A.1104 (a) as diagnostic or treatment services for cancer or a condition suggestive of cancer. Dysplasia of the cervix is considered a pre-cancerous condition. To be financially eligible for the cancer control program, gross family income must be at or below 115% of the federal poverty level. To be medically eligible, clients must have a 25% or greater chance of five year survival.

In FY02 six clinics, dispersed across the state, will provide dysplasia services for approximately 700 women at a budgeted cost of \$334,700. An estimated 730 women could be served at the \$350,000 funding level for FY03.

Program Impact if Reduction is Approved:

The cancer control program is 100% state-supported. At its FY02 revised appropriation level of \$334,700, the cancer control dysplasia clinic program will serve 700 clients. It is expected that the women who have been subsidized by the dysplasia clinic program will continue to receive services from the tertiary care center dysplasia clinics. Given their training and education mission, the regional tertiary care centers should continue to enroll and treat referred dysplasia patients irrespective of patient ability to pay and independent of state subsidy.

DETAIL WORKSHEETS**

Name of Division/Institution: Division of Public Health, Women's and Children Health Section, Developmental Evaluation Centers.

Title of Option: Contract – Terminate Wake Forest University - Infant Follow-up

Option 13 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description Of Reduction:

This reduction will impact the provision of follow up monitoring of Intensive Care Nursing (INC) and NICU infants; Provision of medical follow up and other professional services when indicated; Clinical and technical assistance to Division programs on statewide infant follow up activities; Collection of data about the health and development of infants after discharge from neonatal intensive care. This terminate will result in a loss of services to 25 children.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

No statutory provisions required to implement. Loss of this funding may put North Carolina out of compliance with the state maintenance of effort (MOE) requirement for the IDEA Part C federal grant received by the state for early intervention services.

SFY 2002-03 BUDGET REDUCTIONS - DHHS DIVISION OPTIONS Contr_C&Y Prev.
DETAIL WORKSHEETS

Name of Division/Institution: Division of Public Health; WCH Section; Children and Youth Branch

Title of Option: Contract Reduction in Children & Youth Branch

Option 15 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% x 10% x 11%

Description of Proposed Reduction: (If the reduction impacts the 21XX contracts accounts or 6XXX aid and public assistance accounts, elaborate on the contractors, contracts or programs that will be affected by the reduction.)

- (1) 4.3 % cut (\$67,000) in state appropriation for Comprehensive Adolescent Health Care Projects (CAHCP). One project has been discontinued which would normally have made it possible to redirect funds to establish a new Adolescent Health Center in FY 02-03. Rather than reallocate these funds (\$67,000), a cut is being proposed in CAHCP funding. These Projects provide adolescents with an array of comprehensive health services, including acute care, management of chronic illnesses, mental health and substance abuse counseling, and preventive services, such as health education, physical exams and nutrition services.
- (2) Cuts (\$584,911) in unencumbered fund in the Contract Accounts 1535/5351/536929 (\$109,911) and 1535/5351/536989 (\$475,000) for service contracts, planning grants and evaluation projects earmarked for Child Health and School Health Programs. This reduction will eliminate service contracts with the UNC School of Public Health's Office of Continuing Education and AHECs to provide the following health promotion/training/evaluation activities: Annual School Nurse Conference; School Nurse Mentoring Project; Local Child Fatality Prevention Teams Training (regional and statewide conference); Parenting Workshops - "Nurturing Parent Curriculum"; Comprehensive Adolescent Health Care Projects Evaluation; School Health On-line Data Reporting - "Clinical Fusion" - Training; School and Mental Health Workshops; statewide training on new Developmental Screening Recommendations (first level developmental screening and referrals); Planning Grants for new School Health Centers; and Asthma Summit.

Program Impact if Reduction is Approved: (Include here any impacts to state maintenance of effort (MOE), lost federal funds if state matching funds are reduced, block grant plans changes needed if reduction approved, as well as key program outcomes or critical services and populations served that will be impacted.)

After careful review of the Child Health budget, reductions of 20% in state appropriations are proposed which would include services for child and adolescent health, parenting, Child Fatality Prevention Teams, and asthma. A large percentage of the reductions (\$584,911) will be taken in unencumbered funds that previously were focused on service contracts to provide health promotion, training and program evaluation activities. This proposed cut would eliminate all contracts focusing on training activities, planning grants, and evaluation efforts. Training and education for childhood initiatives included parenting, developmental screening, preventive care, school health, asthma and causative factors in child deaths. Promotion activities will be eliminated in order to avoid even more severe cuts in core child health services.

The 4.3% reduction (\$67,000) in the state appropriation for Comprehensive Adolescent Health Care Projects will impact services to adolescents who have lower rates of health care utilization than any other age group. The Projects provide accessible services to adolescents who are often without any other source of primary medical care. These Centers serve thousands of students annually, and caseloads are growing. Last fiscal year, 22 state funded centers served more than 26,980 students. For many students, the school health center is the most efficient and effective (sometimes the only way) to receive care. This cut will eliminate funding for a new school health center; however, the currently funded Projects will be held harmless.

Closure - Dusty Trades

Name of Division/Institution: Division of Public Health - Epidemiology - Occupational and Environmental Epi.

Title of Option: Eliminate Dusty Trades Program

Option 17 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction: The elimination of the Dusty Trades Program and the subsequent reorganization of the Industrial Hygiene Consultation Unit are recommended. The Dusty Trades Program includes four FTE (1 medical records clerk and 3 Industrial Hygienists).

There is one contract within the Dusty Trades Program. This is a personal service contract with Dr. Andrew Ghio. Dr. Ghio is responsible for screening chest x-rays for the presence of occupational lung diseases (asbestosis and silicosis). Companies submit x-rays and are charged a flat rate of \$8 for Dr. Ghio's review. Eliminating this contract would also eliminate the receipts associated with it; therefore no additional state funds would be generated.

Program Impact if Reduction is Approved:

The Dusty Trades Program was established in 1935 by the North Carolina Legislature as part of the Workers' Compensation Act, recognizing silicosis and asbestosis as occupationally-acquired compensable diseases. The total numbers of these reportable diseases have become less through the years. Employees' concerns will be addressed by Workers' Compensation and personal health insurance. There will be a need for statutory changes (G.S. 97 (60-76). There is no impact on local governments. A total of 4 FTE would be eliminated. All 4 of these positions are currently filled.

Budgetary Information:

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Closure of the prescription drug assistance program (PDAP) is recommended. 15A NCAC 16A.1300 provides for financial assistance to low income elderly to purchase prescription drugs for treatment of diabetes and cardiovascular disease. 15A NCAC 16A.1304 (2) states that enrollment of eligible clients and reimbursement to providers is subject to availability of funds.

Reimbursable medications include outpatient drugs for treatment of hypertension, angina, arrhythmia, heart failure and diabetes. Eligibility for PDAP is limited to elderly clients over the age of 65 who do not have medicaid or other insurance for the select drugs and whose income is not more than 150% of the federal poverty level. Approximately 1,800 clients will be served by PDAP in FY02 at an estimated cost of \$1,500,000.

State support for the prescription drug assistance program is budgeted at \$470,000 for FY03.

Program Impact if Reduction is Approved:

The prescription drug assistance program is 100% state-supported. The PDAP program reimburses a third party administrator who has arrangements with pharmacies for authorizing, dispensing, and claim processing of PDAP drugs. Given that the eligibility criteria for the PDAP program are more restrictive than the proposed new Senior Drug Program through the Health and Wellness Trust, it is anticipated that all current PDAP clients will be eligible for and enroll into the new program in summer of 2002. With establishment of the new Senior Drug Program, there will no longer be a need for the prescription drug assistance program; hence, the \$470,000 FY03 appropriation can be offered as a budget reduction.

DETAIL WORKSHEETS**

Name of Division/Institution: Public Health Division/Health Promotion Disease Prevention Section

Title of Option: Closure of Home Health Program

Option 19 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Closure of the home health purchase of care program is recommended. NCGS 130A-223 authorizes the home health program. The above statute is permissive regarding the expenditure of funds for the care and treatment of persons with diseases or disabilities, i.e., the state MAY provide care and treatment. Further, administrative rule 15A NCAC 16A.0203 (e) states that contracts with home health agencies for reimbursement are subject to availability of funds.

Reimbursable home health services are defined in 15A NCAC 16A.0202 as skilled nursing, home health aide, therapy, medical social services, ancillary medical supplies and durable medical equipment. Clients with a gross family income less than or equal to 125% of the Federal Poverty Guidelines are eligible for full coverage under the home health purchase of care program. Clients between 126% and 200% of the Federal Poverty Guidelines are eligible for partial coverage.

Eighty-six home health agencies have contracted with the state in FY02 to obtain reimbursement for the home health services they provide to low income citizens. Thirty-four of the contracted agencies are local health departments. The remaining 52 home health agencies are private. State support for the home health program is budgeted at \$2,761,630 for FY02. An estimated 2,640 clients will receive home health assistance through the purchase of care program in FY02. An estimated 3,100 clients would have received home health assistance at the FY03 funding level of \$3.2M.

Program Impact if Reduction is Approved:

The home health purchase of care program is 100% state-supported. The home health program reimburses contracted agencies for the home health care they provide to 2,600+ clients with family incomes less than 200% of Federal Poverty Guidelines. Closure of the home health purchase of care program will eliminate a direct subsidy for low income, home health clients. Elimination of the subsidy may impede access to needed home health services. To the extent the contracted home health agencies continue to provide care to the eligible population, the home health care will have to be financed by the individual client or from another subsidy source. One FTE would be eliminated. This position is currently filled.

Name of Division/Institution: Public Health Division/Health Promotion Disease Prevention Section

Title of Option: Closure of Epilepsy Purchase of Medical Care Program

Option 20 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Closure of the epilepsy program is recommended. NCGS 130A-223 authorizes the epilepsy program. The above statute is permissive regarding the expenditure of funds for the care and treatment of persons with diseases or disabilities, i.e., the state MAY provide care and treatment. Further, administrative rule 15A NCAC 16A.0505 (e) states that contracts for service reimbursement, e.g., epilepsy medications, are subject to availability of funds.

Reimbursable epilepsy services are described in 15A NCAC 16A.0505. Reimbursable services include clinical and educational interventions and medications. For clinical and educational services, the only eligibility criterion is medical referral. For assistance with epilepsy medications, the eligibility criteria are epilepsy diagnosis and net family income below the federal poverty level.

Five local health departments and two medical centers contracted with the state in FY02 to obtain reimbursement for epilepsy services. An estimated 2,100 clients will receive clinical and educational services and 120 will receive medication assistance in FY02. State support for the epilepsy program is budgeted at \$202,166 for FY03.

Program Impact if Reduction is Approved:

The epilepsy program is 100% state-supported. The epilepsy program reimburses contracted agencies for the epilepsy clinical and educational services they provide to 2,100 clients. Further, the epilepsy program reimburses contracted agencies for provision of medication assistance to epileptics with net family incomes less than 100% of Federal Poverty Guidelines. Closure of the epilepsy program will eliminate a direct subsidy for epilepsy medications for low income clients. As stated above, five local health departments receive assistance through the state's epilepsy program. Of the \$202,166 for FY 03, approximately \$70,000 would have been allocated to local health departments. Elimination of the subsidy may impede access to needed epilepsy services. To the extent the contracted epilepsy agencies continue to provide care to the eligible population, the epilepsy medications and/or clinical and educational interventions will have to be financed by the individual client or from another subsidy source.

Clos_Kidn

Name of Division/Institution: Division of Public Health, Health Promotion Disease Prevention Section

Title of Option: Closure of Chronic Renal Disease (Kidney) Purchase of Medical Care

Option 21 of 30 for SFY 02-03

Option Applies to Which Reduction Plan(s)? 7% 8% 9% 10% 11%

Description of Proposed Reduction:

Closure of the chronic renal disease (kidney) purchase of medical care services program is recommended. NCGS 130A-220 authorizes the chronic renal disease program. The above statute is permissive regarding the expenditure of funds for the diagnosis and treatment of persons with kidney disease, i.e., the program MAY include financial assistance for diagnosis and treatment. Further, administrative rule 15A NCAC 24A.0303 (a) states that payments for authorized services are subject to availability of funds.

Reimbursable chronic renal disease services are defined in 15A NCAC 16A.0306 as center dialysis, home dialysis, inpatient hospital dialysis, and pharmaceuticals and incidental supplies. Clients with a net annual family income less than or equal to \$6,400, adjusted for family size, are eligible for coverage under the chronic renal disease purchase of care program. The current financial eligibility standard is set at 60% of the Federal Poverty Guidelines.

Thirty-nine licensed renal dialysis centers have contracted with the state in FY02 to obtain reimbursement for services they provide to low income citizens. An estimated 2,400 clients will receive dialysis assistance through the purchase of care program in FY02. Approximately 4,300 clients are authorized to receive one or more of the kidney services. State support for the chronic renal disease purchase of care is budgeted at \$753,704 for FY03.

Program Impact if Reduction is Approved:

The chronic renal disease purchase of medical care program is 100% state-supported. The kidney program reimburses providers for transportation services, medications and dialysis services for clients with family incomes less than 60% of Federal Poverty Guidelines. Closure of the chronic renal disease purchase of care program will eliminate a direct subsidy for low income, dialysis patients. Elimination of the subsidy may impede access to needed dialysis services and medications. To the extent the dialysis centers continue to provide care to the eligible population, the dialysis services will have to be financed by the individual client or from another subsidy source.
