D. Substitute PSU Selections

In accordance with legislation, substitute PSUs for those PSUs which declined, were selected by DPI. The selection process started with an interest survey, followed by comparison of ADM of the interested PSUs to the ADM of those PSUs which had declined funding. PSUs were then selected based on the absolute value of the differential between their ADM and the ADM of PSUs which had declined funding.

The substitute PSUs were awarded a percentage of the substitute funds available, by sub-subdivision of the legislation, based on the PSU's quantity of school buses relative to the other substitute PSUs. Substitutes were awarded at the January 2023 State Board of Education meeting.

PSU No.	PSU Name	Sub-subdivision a.	Sub-subdivision b.
090	Bladen County Schools	\$ 305,217.00	\$ 91,395.00

790	Rockingham County Schools	\$ 573,438.00	\$ 171,711.00

PART II: EXECUTIVE SUMMARY

The Smart School Bus Safety Pilot project was created in SL 2021-180 Section 7.70 (the “Legislation”) using State Fiscal Recovery Funds (“SFRF”) and was designated a revenue replacement project by the NC Pandemic Recovery Office. The Department of Public Instruction (the “Department”) created an application for Public School Units (“PSUs”) to indicate their desire to participate or decline participation per the Legislation.

Nine PSUs declined funding and the Department selected replacement PSUs based on an interest survey and a comparison of the ADM of interested PSUs to the ADM of PSUs which declined funding. Nine new PSUs were awarded funding amounts from each sub-subdivision of the program based on their relative quantity of buses among other replacement PSUs.

The program runs until the end of calendar year 2024. All grant award notifications have been issued totaling awards of over \$18.1m. Of that, approximately \$2.9m was reported as expended as of May 31, 2023.

Program participants are moving cautiously to produce RFPs and award per the requirements of the fund source and the Legislation. Some program participants are changing software and hardware vendors entirely, while others are expanding the capabilities of their existing platforms. Each of those pathways comes with challenges and benefits.

Program participants are generally excited to be receiving additional funding to acquire these new capabilities and the necessary hardware and are also very pleased to be able to provide higher quality information and services to the parents and students they serve. Program participants who have expressed concerns, have done so about how they will sustain these new systems once the extra funding source from the pilot program has been exhausted. If successful, these new services will become expected by parents and students and difficult to discontinue.

PART III: IMPACT AND EFFECTIVENESS OF THE PROGRAM – PSU NUMBERS

Below are PSU-reported figures regarding the impact of the program so far. These primary numerical statistics reflect the number of school buses that were equipped with the technologies, and how many students are potentially impacted as they are assigned to use the various routes these buses travel.

PSU	Number of Buses Equipped (sub-subdiv a.)	Number of Students Assigned to these Buses	Number of Buses Equipped (sub-subdiv b.)	Number of Students Assigned to these Buses
