such as oxygen, acetylene, and propane. In a typical situation, barrels are leased by the barrel company to the chemical company, which fills them with chemicals that are then sold to the customer. The customer returns the barrel, which can then be reused. Under prior law, the chemical company (lessee) was required to pay sales tax to the barrel company (lessor) on the lease price of the barrel. If the barrels had been purchased by the chemical company and sold to the customer, however, they would have been tax exempt. The prior law was, therefore, a disincentive for recycling. The customer would likely discard a purchased barrel and buy a new one when buying more chemicals.

The act does not apply to railroad tank cars or to truck trailers because motor vehicles are not packaging. The act does not apply to railroad palettes because they do not enclose the property being delivered.

S.L. 1997-417 (House Bill 1231, Representative Miner)

AN ACT TO AUTHORIZE SUPPLEMENTAL SOURCES OF REVENUE FOR LOCAL GOVERNMENT TRANSIT FINANCING.

This act has four parts that provide local governments with revenue options to finance local public transportation systems, as follows:

I. It authorizes Mecklenburg County to levy a ½ cent local sales tax if approved by the voters of the county.

II. It authorizes most cities that have public transportation systems to levy an additional $5 motor vehicle tax.

III. It authorizes regional public transportation authorities to levy a gross receipts tax of up to 5% on short-term motor vehicle rentals.

IV. It authorizes the new Triad regional transportation authority to levy the same $5 vehicle registration tax that the existing Triangle regional public transportation authority levies. It also authorizes public transportation authorities organized under existing law and comprised of two or more counties to levy this same $5 vehicle registration tax.

Part I of the act authorizes Mecklenburg County to levy a ½ cent sales tax only if the tax is approved by the voters of the county. The tax does not apply to food. In other respects, it will be administered in the same way as the existing local sales and use taxes.

The proceeds of the tax must be used to finance, construct, operate, and maintain local public transportation systems. A public transportation system is defined broadly in the act to include any combination of real and personal property established for purposes of public transportation. It does not include, however, streets, roads, and highways not dedicated to public transportation or related parking.

Mecklenburg County may not levy the sales tax authorized by Part I of this act unless it has developed a financial plan for equitable allocation of the proceeds it receives based on the identified needs of local public transportation systems in the county and planned expansion of public transportation to unserved areas. The sales tax authorized for Mecklenburg County will be distributed between the county and other local government units in the county that operate local

public transportation systems, on a per capita basis. The county must allocate the tax proceeds it receives based on its financial plan.

Part II of the act authorizes most municipalities that operate public transportation systems to levy an additional $5 motor vehicle tax, to be used only to finance, construct, operate, and maintain local public transportation systems. Current law already authorizes municipalities to levy a $5 annual motor vehicle tax that may be used for any public purpose. Many municipalities already have local legislation authorizing them to levy an increased amount. This act adds an extra authorization for $5 more. If that $5 would cause the municipality's total local motor vehicle tax to exceed $30, however, the additional $5 tax may not be levied. The City of Charlotte and the Town of Matthews are authorized by local act to levy annual motor vehicle taxes of $30. These local units are the only ones that would currently be affected by the $30 limitation. The City of Durham and the cities and towns in Gaston County are specifically prohibited from levying this additional $5 for local transportation authorities.

Part III of the act authorizes a regional public transportation authority to levy a gross receipts tax of up to 5% on retailers within the region engaged in the business of renting private passenger motor vehicles and motorcycles. The tax applies only to short-term rentals, i.e., rentals for a period of less than one year. The tax will be collected by the authority but is otherwise administered in the same way as the optional highway use tax on gross receipts from vehicle rentals. This optional highway use tax is 8% on short-term rentals, so the combined tax within the jurisdiction of the authority would be 13%. Each authority may use the proceeds of the tax for its public transportation purposes. Before levying or increasing the tax, the authority must obtain approval from each county in the region.

A regional transportation authority is an entity created under either Article 26 or Article 27 of Chapter 160A of the General Statutes to provide a public transportation system for the region it represents. The authority created under Article 26, the Triangle Transit Authority for Wake, Durham, and Orange Counties, is governed by a board of trustees appointed by the counties creating the authority and larger cities within the counties. The 1997 General Assembly authorized the creation of a second regional transportation authority for the Triad region, in S.L. 1997-393. The Triad Transit Authority may be created by the four largest cities of the five counties served by the Authority in order to promote the development of sound transportation systems in the area served by the Authority. The Authority would be governed by a board of trustees consisting of the mayors of the four largest cities and the chair of each Metropolitan Planning Organization in the area. The counties served by the Authority would be Forsyth, Guilford, Randolph, Davidson, and Alamance. The four major cities involved in the creation of the Authority are Greensboro, High Point, Winston-Salem, and Burlington.

Part IV of the act authorize the proposed Triad regional transportation authority and any multi-county public transportation authorities organized under current law to levy a $5 vehicle registration tax identical to the tax already authorized for, and levied by, the existing Triangle Transit Authority. A public transportation authority is an entity created by one or more local government entities under Article 25 of Chapter 160A of the General Statutes to provide public transportation. There are three multi-county public transportation authorities. The Choanoke Public Transportation Authority consists of Bertie, Halifax, Hertford, and Northampton Counties. The Kerr Area Transportation Authority consists of Franklin, Granville, Person, Vance, and Warren Counties. The Inter-County Public Transportation Authority consists of Camden, Chowan, Currituck, Pasquotank, and Perquimans Counties.

An authority must obtain the approval of each county within its jurisdiction before it can levy the $5 vehicle registration tax. The Division of Motor Vehicles will collect the tax in counties that are entirely located within the authority's jurisdiction. If the authority's jurisdiction includes just a part of one or more counties, the authority will collect the registration tax in those parts of counties. The authority may contract with local governments to collect this tax. Authorization for authorities to levy this tax is organized into a new Article in Chapter 105 of the General Statutes; accordingly, the Triangle Transit Authority's tax is recodified from Chapter 160A to the new Article in Chapter 105.

S.L. 1997-423 (House Bill 35, Representative Capps)

AN ACT TO EXTEND THE TIME ALLOWED FOR CLAIMING SALES TAX REFUNDS, MOTOR FUEL TAX REFUNDS, AND ALTERNATIVE FUEL TAX REFUNDS, AND TO PROVIDE THAT A MOTOR FUEL TAX REFUND IS NET OF THE SALES TAX DUE ON THE FUEL.

This act extends the time for claiming sales tax refunds for certain nonprofit entities, certain governmental entities, and drugs purchased by hospitals. A late application for a sales tax refund may now be filed with the Department of Revenue after 30 days but within three years after the due date, subject to a 50% penalty. The penalty for a late filing within 30 days after the due date is 25%. The Secretary of Revenue has the authority to waive penalties for good cause, but once a refund is barred the Secretary may not revive it. Prior law required that the application for a refund filed after 30 days be filed within six months after the due date in order to receive a refund subject to the 50% penalty. The due date for nonprofit entities and certain hospitals is October 15 following the first six months of a calendar year and April 15 following the second six months. The due date for governmental entities is six months after the end of each fiscal year. The Department of Revenue had suggested to the Revenue Laws Study Committee that the statute of limitations for late filings of applications for sales tax refunds for these nonprofit entities, governmental entities, and hospitals be extended from six months to three years in order to bring them in line with the due date for applications for tax refunds for all other taxes, except those on property, as set out in G.S. 105-266 and G.S. 105-266.1. In past years, bills have been introduced for refunds for nonprofit entities and State agencies whose refunds have been barred because their applications were filed six months after the due date. The Department of Revenue informed the Revenue Laws Study Committee that by increasing the filing deadline to three years, most of the refund legislation could be eliminated. The extension of sales tax refunds for these nonprofit entities, governmental entities and hospitals is effective January 1, 1998. However, notwithstanding the three-year extension, the act provides that an application for a refund of sales taxes paid by a nonprofit entity or hospital is timely filed if it is filed within four years after the due date and before July 1, 1998. This one-time provision is effective immediately, but the Department of Revenue will not issue a sales tax refund for these nonprofit entities or hospitals until July 1, 1998.

The act also extends the time for filing an application for a refund on motor fuel taxes and alternative fuel taxes from six months to three years. The act further amends the tax laws affecting motor fuel and alternative fuel by assessing sales and use tax on (1) motor fuel for which a refund of the motor fuel tax is allowed because the motor fuel is accidentally mixed with some other type of fuel or the motor fuel is used in a boat, and (2) alternative fuel and motor fuel for which a

refund of the fuel tax is allowed for fuel used for other than to operate a licensed highway vehicle or for fuel used in certain vehicles with power attachments. Prior law exempted motor fuel and alternative fuel from sales tax, regardless of whether the fuel was taxed or a refund of the tax paid was allowed.

The act provides that any sales and use tax due on motor fuel used other than to operate a licensed highway vehicle or used in certain vehicles with power attachments, is to be subtracted from any refund a taxpayer receives on motor fuel tax paid on that fuel. Prior law allowed a refund on motor fuel tax paid on fuel used for off-highway purposes or in certain vehicles with power attachments and no sales tax was deducted or payable. This refund was for the flat cents per gallon rate less one cent. The one cent was retained to liquidate highway bonds. The act sets out a formula for determining the sales and use tax to be deducted from the motor fuel tax refund. This formula provides that the price of motor fuel subject to sales tax is the average of the wholesale prices used to determine the fuel tax rates in effect for the two six-month periods of the year for which the refund is claimed. The one cent holdback is eliminated by the act, because the highway bonds have been paid off. The changes to the tax laws effecting motor fuel and alternative fuel taxes become effective January 1, 1998, and apply to taxes paid on or after that date.

The maximum loss to the General Fund from extending the refund period from six months to three years is not expected to exceed $200,000 annually. The gain in General Fund revenues from changes made to the sales tax on motor fuels is estimated to be $797,525 annually. The net revenue loss to the Highway Fund from the elimination of the one-cent holdback is $200,000 annually.

S.L. 1997-439 (House Bill 1157, Rep. Morris)

AN ACT TO CLARIFY THE CORPORATE INCOME TAX ON CERTAIN TAX-EXEMPT OBLIGATIONS, TO DELETE THE CAP ON CORPORATE INCOME TAX DEDUCTIONS OF DIVIDENDS RECEIVED FROM REGULATED INVESTMENT COMPANIES, AND TO ALLOW THE DEPARTMENT OF REVENUE TO DEDUCT ITS COST OF ADMINISTERING THE DISTRIBUTION OF GROSS RECEIPTS TO CITIES.

This act makes the following three changes. The first two changes were recommended by the North Carolina Bar Association.

1. It adds to the corporate income tax statutes the tax exemption already provided in the bond statutes for interest on State or local obligations and obligations of nonprofit educational institutions organized or chartered in the State. to corporations, effective beginning with the 1997 tax year.

2. It conforms statutory law to the current practice of the Department of Revenue with regard to the taxability of dividend income received by corporations from regulated investment companies and real estate investment trusts, effective beginning with the 1997 tax year.

3. It provides that the State will deduct from its distributions to cities of shared franchise gross receipts taxes the State's cost of administering the sharing, effective August 28, 1997.

The bond laws exempts interest on State and local government obligations and on obligations of nonprofit educational institutions organized or chartered in the State from State income tax. The existing individual income tax statutes provide for this deduction but it was not mentioned in the corporate income tax statutes. Section 1 of the act made a conforming change in the corporate income tax statutes to specifically exempt interest on State and local government obligations and on obligations of nonprofit educational institutions organized or chartered in the State from State income tax.

Section 2 of the bill conforms the language of the corporate dividend statute to the existing practice of the Department of Revenue with regard to the taxability of income received by a corporation from regulated investment companies and real estate investment trusts. Corporations and individuals may invest income in a regulated investment company, commonly known as a mutual fund, and in a real estate investment trust. Under the Code, dividends paid by a regulated investment company or a real estate investment trust to its shareholders are treated as pass-through income, meaning that the character of the income remains the same after that income is passed to its shareholders. For example, interest on a State municipal bond is exempt if paid directly to a person. Under the Code, this income does not lose its tax-exempt status if the person receives it as a dividend from a regulated investment company or a real estate investment trust rather than directly from the tax-exempt source.

State corporate income tax law likewise provides that a corporation may deduct from State taxable income that portion of the dividends it receives from a regulated investment company or a real estate investment trust that it could deduct if it received the dividends directly, rather than through the regulated investment company or the real estate investment trust. The statute, however, appears to limit the amount a corporate investor may deduct under this pass-through treatment to $15,000. The Department of Revenue does not currently treat the cap as applicable to these types of pass-through income from federal, State, and local obligations. Arguably, this practice conflicts with the $15,000 statutory limitation. This section repeals the $15,000 cap.

The State shares part of the State gross receipts franchise taxes imposed on utilities to the cities. The franchise taxes that are distributed are the taxes on electricity, piped natural gas, and telephone service. The formula for these distributions were modified in S.L. 1997-118. Section 3 of this act provides that the State's costs of administering the distributions are deducted from the amounts distributed, so that cities rather than the State bear the cost of sharing part of the State's tax revenues with the cities.

S.L. 1997-443 (Senate Bill 352, Senator Plyler)

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

The Current Operations and Capital Improvements Appropriations Act of 1997 contains one tax law change. The act extends the sunset of the State ports income tax credit from February 28, 1998, to February 28, 2001, and increases the maximum cumulative credit from $1 million to

$2 million per taxpayer. This increase is effective for taxable years beginning on or after January 1, 1998. The act is expected to reduce General Fund revenues by $500,000 in 1998-99. The amount of the tax credit allowed is equal to the amount of charges paid to the North Carolina Ports Authority in the taxable year that exceeds the average amount of charges paid to the Authority for the past three years. The credit is limited to 50% of the tax imposed on the taxpayer for the taxable year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years.

The 1992 General Assembly enacted the State ports income tax credit to encourage exporters to use the two State-owned port terminals at Wilmington and Morehead City. When enacted, the credit applied to amounts paid by a taxpayer on any cargo exported at either port. In 1994, the General Assembly expanded the credit to include all amounts assessed on exported cargo, regardless of who paid the shipping costs. In 1995, the General Assembly expanded the credit to include some imports by allowing a credit for break-bulk cargo and container cargo imported at either Wilmington or Morehead City and for bulk cargo imported at Morehead City. It did not allow a credit for bulk cargo imported at Wilmington. The credit for bulk exports was also limited to bulk exports at only the Morehead City terminal. The 1996 General Assembly expanded the State ports income tax credit to include the importing and exporting at either terminal of one specific type of bulk cargo: forest products. All imports and exports of bulk cargo at the Morehead terminal were already covered, so the effect of this change was to allow a credit for forest product imports and exports at both terminals.

Bulk cargo is a type of commodity that is loose and usually stock-piled. Examples of this type of commodity include coal, grain, salt, and wood chips. Break-bulk cargo and container cargo are different methods used to ship the same type of commodity. Commodities that are packaged in a metal trailer box that can be locked onto a tractor-trailer chassis and then detached and put on a ship without any other handling are considered "container cargo". Commodities that are packaged and stored on pallets or in cases that must be handled and stacked onto a ship by hand, crane, etc., are considered break-bulk cargo. Break-bulk cargo also includes machinery.

S.L. 1997-463 (Senate Bill 730, Senator Ballance)

AN ACT TO AMEND THE LAW RELATING TO THE ISSUANCE OF BONDS BY INDUSTRIAL FACILITIES AND POLLUTION CONTROL FINANCING AUTHORITIES.

This act makes the following changes to the law authorizing county authorities to issue industrial revenue bonds to finance qualifying industrial or pollution control projects for private manufacturing firms:

1. It increases the maximum term of the bonds from 30 to 35 years, and provides that refunding bonds may have the same maximum term. (Sections 1 and 4)
2. It requires a county to hold a public hearing before asking the Secretary of Commerce to approve the issuance of bonds for a proposed project. Under current law, the Secretary of Commerce has discretion to request the county authority to hold a public hearing; by rule, the Secretary requires a public hearing to be held in every case. (Section 2)
3. It imposes a seven-day turn-around time on DEHNR's required certification that a

proposed industrial project will not have an adverse effect on the environment or that a proposed pollution control project will have a favorable impact on the environment or will prevent or diminish pollution. This certification is necessary before the Secretary of Commerce can approve bonds for a proposed project. (Section 2)

4. It provides that the Secretary of Commerce's certificate of approval, which is valid for one year, will remain valid for three years after bonds are first issued if bonds are issued during the initial one-year period of validity. This change will allow a company to get certification of a large project and then issue bonds over a three-year period. (Section 2)
5. It provides that if a proposed project is located in two or more counties, the county authority of any of those counties may issue the bonds if each affected county and county authority has consented. (Section 3)

Industrial Revenue Bonds offer companies engaged in manufacturing long-term debt financing at interest rates substantially below the current prime rate. There are three types of bonds: tax-exempt bonds for industrial projects, tax-exempt bonds for pollution control projects, and federally taxable bonds for industrial projects. Under the program, a county authority may enter into a financing agreement with a company to provide revenue bond proceeds to the company to be used to finance capital expenditures, such as fixed assets, land, buildings, and equipment. The amounts payable by the company to the authority under the financing agreement must be sufficient to pay all of the principal and interest on the bonds.

Before bonds can be issued, the proposed project must be approved by the Secretary of Commerce and the bonds must be approved by the Local Government Commission. Bond proceeds cannot be used to refinance existing debt or as venture capital. Nor can they be used for a project that will result in the closing of another facility in North Carolina. The proposed project must generate a number of jobs that is commensurate with the cost of the project and will have a measurable impact on the local economy.

Typical industrial projects are new or expanded product manufacturing facilities, distribution centers, and research and development facilities necessary to the manufacturing process. To qualify for bonds for an industrial project, the company must agree to pay its employees at least the average weekly manufacturing wage of the county or the State average weekly manufacturing wage plus 10%. This wage requirement may be waived if the project is to be located in an area of especially severe unemployment.

After a project has been approved by the Department of Commerce, there is no mechanism to follow up to make sure the standards for job creation and wage level are actually met. The Department of Commerce has not been provided the resources that would be necessary for this type of oversight and auditing.

The federal government designates the maximum amount of tax-exempt industrial revenue bonds each state may issue, based on population. The 1997 amount for North Carolina is $377 million. For a single project, tax-exempt bonds may be used to finance capital expenditures of no more than $10 million over a six-year period. In addition, a company may not have more than $40 million in tax-exempt bonds outstanding nationwide at any given time.

The following chart shows the history of Industrial Revenue Bonds, both taxable and tax-exempt:

Year	Projects	($Mil)

1987	11	44.05
1988	19	70.00
1989	45	265.25
1990	20	103.30
1991	18	223.40
1992	11	53.10
1993	7	88.00
1994	10	46.40
1995	29	380.60
1996	26	153.20
to date 1997	18	$110.73

S.L. 1997-475 (Senate Bill 727, Senator Miller)

AN ACT TO REDUCE THE STATE SALES TAX ON FOOD BY AN ADDITIONAL ONE CENT EFFECTIVE JULY 1, 1998, TO ESTABLISH THE PERCENTAGE RATES FOR THE INSURANCE REGULATORY CHARGE AND THE PUBLIC UTILITY REGULATORY FEE, TO CLARIFY THE BASIS OF THE PREMIUM TAX LIABILITY ON WHICH THE INSURANCE REGULATORY CHARGE IS LEVIED, TO INCREASE COURT FEES IN CRIMINAL CASES, TO INCREASE THE FEES FOR FILING CERTAIN DOCUMENTS, AND TO PROVIDE THAT ANNUAL REPORTS OF MOST BUSINESS CORPORATIONS SHALL BE FILED WITH THE DEPARTMENT OF REVENUE RATHER THAN THE SECRETARY OF STATE.

This act reduces the State sales tax on food, sets the insurance regulatory charge and the public utility regulatory fee, clarifies the basis for calculating the insurance regulatory charge, provides that most corporate annual reports will be filed with the Department of Revenue rather than the Secretary of State, and makes other changes not related to the tax law.

Part I of the act reduces the State sales tax on food from 3% to 2%, effective July 1, 1998, and is expected to reduce General Fund revenues by about $90 million a year. In 1996, the General Assembly reduced the State sales tax on food from 4% to 3%, effective January 1, 1997. This act does not repeal or reduce the local 2% sales tax on food. The reduced State sales tax rate applies to food that may be purchased with food stamps. Federal law determines what can be purchased with food stamps and, therefore, what food is subject to the reduced State sales tax.

Examples of food items that are subject to the reduced State sales tax rate are fruits, vegetables, bread, meat, fish, milk, snack foods such as candy, gum, soft drinks, and chips, distilled water, ice, tomato plants, fruit trees, and cold prepared food for home consumption. Items that are not considered food items under federal law and therefore remain subject to the 4% State sales tax include alcoholic beverages, tobacco products, pet food, prepared foods that are hot at the point of sale and are therefore ready for immediate consumption, such as a broiled chicken kept

in a heated display case, and food, such as a hamburger, a pastry, or soup, that is marketed to be heated on the premises of the retailer in a microwave oven or other heating device.

Part II of the act increases the insurance regulatory charge from 7.25% to 8.75% for the 1997 tax year and is expected to generate an additional $3 million in revenue. The insurance regulatory charge was first imposed in 1991 in order to make the Department of Insurance receipt-supported and thereby eliminate General Fund support of the Department. The regulatory charge is imposed on insurance companies that pay the gross premiums tax, other than service corporations such as Blue Cross/Blue Shield and Delta Dental Corporation. Health maintenance organizations do not pay the regulatory charge because they do not pay the gross premiums tax. The charge is a percentage of the insurance company's premiums tax liability.

In 1995, the General Assembly eliminated the insurance audit and examination fees for insurance companies, HMOs, medical corporations, and guaranty associations. The revenue generated by these audit fees was an estimated $4.5 million annually. Consequently, the costs of the audits is now paid for by the insurance regulatory charge as part of the costs of regulating the insurance industry. The increase in the regulatory charge proposed by this act will not fully compensate the General Fund for the 1995 change in the audit fee provisions. The regulatory charge will need to be increased another 0.35% to 9.10% in 1998-99 to fully fund the action taken by the General Assembly in 1995.

Part II of this act also clarifies that the premiums tax liability upon which the charge is levied is not reduced by any tax credits allowed a taxpayer for guaranty or solvency fund assessments. It also makes two technical changes. It deletes the reference to insurance companies regulated under Article 66 of Chapter 58 because no insurance company is regulated under that Article. That Article is the Hospital, Medical and Dental Service Corporation Readable Insurance Certificates Act. It also deletes references to tax paid under G.S. 97-100. Self-insurers pay premiums tax under Article 8B of Chapter 105 of the General Statutes.

Part III of this act decreases the public utility regulatory fee levied in G.S. 62-302 from 0.10% to 0.09% for the 1997 tax year and is expected to reduce the fee revenue by $870,000. The utility regulatory fee was imposed in 1989 in order to defray the State's cost in regulating public utilities. This act reduces the fee because the lower rate, combined with other available revenues, will generate sufficient funds for the estimated costs of operating the North Carolina Utilities Commission and the Public Staff. The regulatory fee is imposed on all utilities that are subject to regulation by the Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenue. In general, jurisdictional revenue is revenue derived from providing utility service in North Carolina.

Parts IV and V of this act make changes that are not related to the tax law. Part VI of this act provides that most business corporations will file their corporate annual report with the Department of Revenue at the same time that they file their corporate income and franchise tax returns, and raises the annual report filing fee from $10.00 to $20.00. Increasing the fee will generate an additional $1.25 million in revenue each year and transferring the corporate report filing to the Department of Revenue will increase the Department's operating costs by about $112,000 a year. Under prior law, the corporate annual reports were filed with the Secretary of State on the anniversary of the business' incorporation. This Part becomes effective January 1, 1998, but reports filed with either the Department of Revenue or the Secretary of State during the 1998 calendar year will be considered filed with the correct agency.

This Part of the act is one of the recommendations of the General Statutes Commission.

The change is designed to make filing annual reports easier for corporations, to set the due date for the annual report at the due date for filing tax returns (which is a more familiar deadline than the current due date), to allow corporations the benefit of making a single filing with one agency rather than multiple filings with different agencies, and to reduce inadvertent failures to file the annual report. Any amendments to annual reports will continue to be filed with the Secretary of State.

Insurance companies will continue to file their annual reports with the Secretary of State, but on a day set with reference to tax filing dates rather than on the anniversary of their incorporation. The Secretary of State and the Secretary of Revenue are required to prescribe a form jointly for annual reports. The contents of the annual report are being changed to delete the requirement that the names of directors be included in the report because this information is considered not useful to the public. This Part also authorizes a corporation to certify that there are no changes from the previous annual report in order to eliminate the burden of filling out repetitious reports.

S.L. 1997-490 (Senate Bill 39, Senator Larry Shaw)

AN ACT TO REVISE THE SETOFF DEBT COLLECTION ACT.

This act modifies the Setoff Debt Collection Act, Chapter 105A of the General Statutes. Under that Act, the Department of Revenue sends the income tax refund of an individual who owes money to a State agency to that agency in payment of the debt rather than to the individual. The debt the individual owes the agency is set off against the individual's income tax refund.

The Revenue Laws Study Committee recommended this act to the 1997 General Assembly. The modifications made to the Setoff Debt Collection Act apply to tax refunds determined on or after January 1, 2000. The act expands and streamlines the setoff program as follows:

1. It requires all State agencies not given a waiver by the State Controller to use the setoff program to collect debts owed the agency. Under existing law, the State agencies that are included in a list in the statute must use the setoff program to collect debts and those that are not listed cannot use the setoff program.
2. It extends the setoff program to local units of government and their agencies and establishes the procedures local units and their agencies must follow to use the setoff program. The act allows, but does not require, local entities to use the setoff program.
3. It streamlines the setoff program by eliminating several unnecessary notices between the Department of Revenue and the claimant agencies. It accomplishes this by allowing the Department to place refunds of debtors of State agencies in escrow while the State agency finalizes the setoff.
4. It shifts the cost of the program from the agencies whose debts are collected to the debtors who owe the debts, sets a $15.00 cap on the fee imposed for collection through setoff, and shifts the cost of collecting child support debts from all the State agencies that use the setoff program to an earmarking of income tax collections.
5. It clarifies and reorganizes some of the provisions in the Setoff Debt Collection Act.

Expansion to All State Agencies: The Setoff Debt Collection Act currently requires certain named State agencies to participate. Other State agencies may not participate, even on a voluntary basis. The act extends the mandatory State program to all State agencies, as recommended by the State Controller's Office, which administers the Statewide accounts receivable program pursuant to G.S. 147-86.22. If a State agency's use of the program would not be practical or cost effective in certain cases, the State Controller could waive the requirement.

Expansion to Local Governments: The idea to expand the setoff program to local entities originated with Senate Bill 761 of the 1995 Session, introduced by Senator Conder. The act authorizes local governments to submit their debts for collection by setoff only after providing the debtor with notice, an opportunity to be heard before the local government, and an appeal process pursuant to the Administrative Procedure Act. After completing this process, the agency can submit the debt through the League of Municipalities, the Association of County Commissioners, or another clearinghouse. Funneling the debts through a clearinghouse rather than having each local government submit its own debts will avoid placing an undue administrative burden on the Department of Revenue.

Streamlining of Program: Under existing law, the setoff process requires three notices to the Department by the claimant agency, two notices by the Department to the agency, and two notices to the taxpayer. The act eliminates two of the notices to the Department by claimant agencies and one of the notices by the Department to claimant agencies.

Before the effective date of this act, the procedure is as follows: A State agency notifies the Department of a debt. The Department checks to see if the debtor will be receiving a tax refund. If so, the Department notifies the agency that the debtor is entitled to a refund. The agency then sends the Department and the debtor a notice of intent to apply the refund to the debt. After any hearing requested by the debtor, the agency sends the Department a notice of certification of the debt. The Department then applies the tax refund to the debt and notifies the taxpayer and the agency of the setoff. If the debt is less than the refund, the Department sends the balance of the refund at the same time.

Under the act, a claimant agency sends the Department notice of the debt and the Department immediately sets off the debt against the refund and notifies the taxpayer and the claimant agency. A local agency cannot notify the Department of a debt until after the debt has been established through notice to the debtor and a hearing, if requested. A State agency can notify the Department of a debt, have the refund placed in an escrow for the agency, notify the debtor and hold any hearing requested, and then disburse the escrowed amount accordingly.

The act gives a debtor the same procedural and substantive rights as under existing law, including the right to interest on any part of the refund found not to be a valid debt. Under existing law, a debtor is notified of a potential setoff and the right to contest the setoff. The debtor receives the same notifications under this act. Also, under the act, if an agency fails to give the debtor the required notice, the agency must return the entire refund to the debtor even though a debt is owed.

Collection Assistance Fee Changes: Before the effective date of this act, the cost of administering the setoff debt collection program was paid by the State agencies whose debts were collected by setoff. Under both existing law and this act, each year, the Department of Revenue determines its costs of running the program and recovers these costs by charging a collection assistance fee as a percentage of each debt collected. The act caps this fee at no more than $15.00 per debt. The actual fee is expected to be less.

The act shifts the burden of paying the administrative costs of most setoffs from participating State agencies to the debtors. Under existing law, except in the case of child support debts, the Department of Revenue retained the collection assistance fee from each setoff and reduced the amount paid to the agency by the amount of the fee. The agency therefore absorbed the cost of collecting the debt by receiving less than the full amount of the debt. Under the act, the Department of Revenue still retains the collection assistance fee but the fee is added to the debt and paid by the debtor from the refund rather than subtracted from the amount payable to the agency. As a result, the debtor will pay the fee out of the tax refund that was set off. This change shifts approximately $270,000, which is the cost of collecting about 39,000 debts, from State agencies' budgets to debtors.

Under existing law, the Department of Human Resources and their county counterparts use the debt setoff program to collect child support arrearages pursuant to the federal Child Support Enforcement Program. Since January 1, 1996, rather than deducting its administrative costs from amounts collected for child support arrearages, the Department of Revenue has been required to spread among other State agencies the portion of the Department's administrative costs attributable to child support collections. That change shifted child support setoff administrative costs from child support collections to other setoff collections, resulting in an increase in the percentage deducted from those other collections. The act directs the administrative costs of collecting child support arrearages to be drawn from income tax collections rather than deducted from the amounts collected on behalf of other State agencies. The General Fund bears the cost in either case, but under the act the cost does not come from amounts appropriated to State agencies for other purposes.

S.L. 1997-499 (House Bill 537, Representative Grady)

AN ACT TO PROVIDE RELIEF FOR FEDERAL RETIREES AND THE SURVIVING SPOUSES OF FEDERAL RETIREES.

This act provides the following additional relief to federal retirees who paid unconstitutional North Carolina income tax on their federal retirement benefits in 1985, 1986, 1987, and 1988, but did not protest or request a refund within 30 days as required by law:

1. It allows federal retirees to carry forward for two years the unused portion of their tax credit for payment of these unconstitutional taxes if they cannot claim the entire credit because the credit exceeds their tax liability.
2. It allows the surviving spouse of a deceased federal retiree to claim the decedent's tax credit, including the two-year carryforward. If there is no surviving spouse, the decedent's estate may take the credit, but not the two-year carryforward.

The act is effective retroactively to the 1996 tax year. It requires the Secretary of Revenue to reimburse the General Fund for the costs of the additional tax relief by transferring $8 million of excess funds in a reserve account created in 1996.

In 1996, the General Assembly enacted legislation giving federal retirees income tax credits and partial refunds for the North Carolina income taxes they paid on their federal retirement benefits in 1985, 1986, 1987, and 1988. If a federal retiree paid these 1985-88 pension taxes under timely protest, the retiree already received a refund as required by existing law. The 1996 legislation, estimated to cost the General Fund $117 million over three years, provided relief to

nonprotesters, who were not legally entitled to a refund or credit.

The 1996 legislation allowed partial refunds and credits as follows: federal retirees who did not make a timely protest and who would owe North Carolina income tax were authorized to take a State income tax credit equal to the amount of pension taxes they paid. The tax credit was allowed in three equal, annual installments, one for the 1996 tax year, one for the 1997 tax year, and one for the 1998 tax year. For a taxpayer whose 1996 tax liability was less than 5% of the pension taxes the taxpayer paid during 1985-88, a one-time refund equal to 85% of the pension taxes was allowed in lieu of the credit. The taxpayer was required to claim this refund by April 1, 1997. The 1996 legislation provided that if a federal retiree who would otherwise be eligible for a credit or refund had died, the retiree's estate could claim the credit or refund.

After the 1996 legislation was enacted, legislators began receiving complaints that this legislation did not provide sufficient relief for surviving spouses or for retirees who did not have enough current tax liability to claim the entire credit. If a retiree eligible for the first installment of the credit for the 1996 tax year died in 1996 or thereafter, the surviving spouse could not claim any of the remaining installments of the credit. The 1996 legislation authorized the estate to claim the credit, but estates often have little or no tax liability against which a credit could be claimed. This act addresses this complaint by allowing surviving spouses to claim the credit. The other complaint received was from taxpayers who were ineligible for the 85% refund because their tax liability equaled 5% or more of the amount of pension taxes they paid for 1985-88. Those taxpayers might receive a credit equal to anywhere from 15% to 100% of the pension taxes, depending upon whether they had enough tax liability against which to claim the credit. The credit allowed is nonrefundable, i.e., to the extent it exceeds the taxpayer's tax liability, it is lost. Taxpayers with lower liability would receive credit for less than 100% of their pension taxes. This act addresses this complaint by allowing taxpayers to carry the unused portion of the credit forward to the following two tax years: 1999 and 2000.

The legislative history of the 1996 legislation indicates that the General Assembly intended that some taxpayers would not receive 100% credit, either because they died in 1996 or later or because their potential credit exceeded their tax liability against which it could be claimed. In the 1996 Second Extra Session, the Senate and the House of Representatives had different approaches to granting relief to nonprotesters for the taxes they paid on their federal pensions from 1985 through 1988. The House passed House Bill 30 (Rep. Grady), which would have provided a full refund of all taxes paid, through a refundable credit payable over four years. If the retiree died, the surviving spouse or estate was entitled to the refund. The estimated cost of the proposal was a total of $142.8 million. In contrast, the Senate passed a Senate Committee Substitute for House Bill 30 that provided only partial relief for an estimated total cost of $117.7 million. This version of the bill provided only nonrefundable credits and did not provide relief for surviving spouses of deceased retirees. The matter went to conference and the Senate plan prevailed. The two limitations now complained of are the reason the Senate plan cost less than the House plan in 1996.

S.L. 1997-503 (Senate Bill 853, Senator Conder)

AN ACT AUTHORIZING THE SECRETARY OF THE DEPARTMENT OF REVENUE TO APPOINT EMPLOYEES OF THE DEPARTMENT AS REVENUE LAW ENFORCEMENT AGENTS TO ENFORCE THE

EXCISE TAXES ON UNAUTHORIZED SUBSTANCES AND THE CRIMINAL PROVISIONS OF THE REVENUE LAWS.

This act authorizes the Secretary of Revenue to appoint employees of the Criminal Investigations Division and the Unauthorized Substances Tax Division as revenue law enforcement officers. An employee must be certified as a criminal justice officer under the N.C. Criminal Justice Education and Training Standards Commission to serve as a revenue law enforcement officer.

The Unauthorized Substances Tax Division officers will have subject-matter jurisdiction to enforce the excise tax on unauthorized substances. The Criminal Investigations Division officers will have subject-matter jurisdiction to enforce the felony tax violations in G.S. 105-236 and to enforce any of the following criminal offenses when they involve a tax imposed under Chapter 105 of the General Statutes: embezzlement of State property, embezzlement of funds, obtaining property by false pretenses, forgery, and uttering forged paper. A revenue law enforcement officer has Statewide jurisdiction within the officer's subject-matter jurisdiction. The officer may serve and execute notices, orders, warrants, or demands issued by the Secretary of Revenue or the courts, and may use the powers of arrest in executing these papers.

As law enforcement officers, these Department of Revenue employees will be entitled to increased pension benefits such as a 5% contribution to a 401(k) plan, early retirement, enhanced compensation for work-related disability, and a separation allowance that increases benefits for an officer who retires before becoming eligible for social security (the allowance ends when the officer begins receiving social security). The act requires the Department of Revenue to use $67,503 of its operating appropriations for the 1997-98 fiscal year to pay for the increased costs.

S.L. 1997-521 (House Bill 1057, Representative Grady)

AN ACT TO EXEMPT FROM SALES TAX AUDIOVISUAL MASTER TAPES USED IN THE MOTION PICTURE, TELEVISION, AND AUDIO PRODUCTION INDUSTRIES.

This act creates a new State and local sales and use tax exemption, effective October 1, 1997. The new exemption is for audiovisual masters. An audiovisual master is the film, tape, or other storage device that is made or used by a production company to make more copies of the film or tape. The act is expected to reduce State sales tax revenues by approximately $1 million in fiscal year 1997-98 and by approximately $1.59 million in fiscal year 1998-99. The act is expected to reduce local sales tax revenues by approximately $500,000 in fiscal year 1997-98 and by approximately $800,000 in fiscal year 1998-99.

Because it is levied on the retail price, the tax at issue in this act applies to the value of all production and post-production work that goes into creating a film, video, or commercial. Assume, for example, that a politician contracts with an advertising agency to have a political commercial made. The agency then films, or contracts with others to film the politician in action. When the filming is completed, the agency contracts with a company to edit the film and put it in a finished form with sound and any narration. When the finished product (the audiovisual master) is delivered by the agency to the politician, a sales tax applies to the sale of that finished product. The tax is computed on the value of all the services that went into the finished product, such as acting fees or other charges.

According to the North Carolina Film Office, most post-production work on films is done in California or New York but the post-production work on commercials and videos is done in many other places. South Carolina and Virginia do not tax audiovisual masters, so a lot of production companies choose to do post-production work on commercials and videos is done in those states. The exemption provided by this act should remove a disincentive for production companies to work in North Carolina.

S.L. 1997-525 (Senate Bill 1065, Senator Hoyle)

AN ACT TO EXPAND THE INCOME TAX EXCLUSION FOR SEVERANCE PAY TO INCLUDE SEVERANCE PAY DUE TO AN EMPLOYEE'S INVOLUNTARY TERMINATION THROUGH NO FAULT OF THE EMPLOYEE.

This act expands the income tax exclusion for severance pay received due to the closing of a manufacturing plant and modifies the cap on the exclusion, effective beginning with the 1998 tax year. It is expected to reduce General Fund revenues by a little more than $2 million in fiscal year 1998-99.

In 1996, the General Assembly enacted an income tax exemption for severance pay a taxpayer receives due to the permanent closure of a manufacturing or processing plant, not to exceed a maximum of $35,000 for the taxable year. The exemption was expected to reduce General Fund revenues by approximately $4 million a year. This act expands the tax exemption to include severance pay received due to any involuntary termination through no fault of the employee. The expanded exemption would include being fired without cause, being laid off due to a reduction in force, as well as being terminated due to a plant closure. It would not include voluntary early retirement or being fired for cause. The act also expands the tax exemption to cover any type of job in the private or public sector, not just a job at a manufacturing plant.

Some taxpayers were able to avoid the $35,000 cap by arranging to receive part of the severance pay in December and the rest in January. The act closes this loophole by clarifying that the $35,000 cap applies to the total amount paid to an employee by an employer for the same termination, regardless of when the taxpayer receives the money.

1996 Tax Law Changes

Prepared by Cindy Avrette, Sabra J. Faires, and Martha H. Harris

1996 Second Extra Session

Chapter 13, 1996 Second Extra Session (House Bill 18, Representative Gray)

AN ACT TO REDUCE TAXES FOR THE CITIZENS OF NORTH CAROLINA AND TO PROVIDE INCENTIVES FOR HIGH QUALITY JOBS AND BUSINESS EXPANSION IN NORTH CAROLINA.

This act is the William S. Lee Quality Jobs and Business Expansion Act. It represents the major tax reduction legislation passed in 1996 by the 1995 General Assembly. The act cuts taxes by $186.5 million in fiscal year 1997-98. This act, coupled with the 1995 tax cuts, reduce taxes by more than $624 million in fiscal year 1997-98. The act does many things: it reduces the sales tax on food, reduces the corporate income tax, provides tax credits for quality jobs and business expansion, phases out the excise tax on soft drinks, modifies the bundled transaction sales tax, reduces inheritance and gift taxes, creates a nonitemizer charitable contribution tax credit, excludes certain severance pay from income tax, and reduces the sales tax on farm and industry fuel. Other major tax cuts were made in Senate Bill 6, ratified as Chapter 14 of the 1996 Second Extra Session, in House Bill 30, ratified as Chapter 19 of the 1996 Second Extra Session, and in House Bill 53, ratified as Chapter 18 of the 1996 Second Extra Session.

Reduce Sales Tax on Food

Under current law, food stamp items that are purchased with food stamps are exempt from both State and local sales taxes, and food stamp items that are not purchased with food stamps are subject to both the State 4% sales tax and the local 2% sales tax. Effective January 1, 1997, this act reduces the State sales tax on food stamp items from 4% to 3% but does not repeal or reduce the local sales tax on these items. This part of the act reduces General Fund revenues by $36.7 million in fiscal year 1996-97 and by $87 million in fiscal year 1997-98.

Federal law determines what can be purchased with food stamps and, therefore, what would be exempt from State sales tax under this act. Food stamps can be used to purchase the following from a retailer that has decided to participate in the food stamp program: food for humans for home consumption, seeds and plants for use in gardens to produce food for human consumption, and certain meals served by meal delivery services and communal dining facilities.

Examples of food items that would be exempt are fruits, vegetables, bread, meat, fish, milk, snack foods such as candy, gum, soft drinks, and chips, distilled water, ice, tomato plants, fruit trees, and cold prepared food for home consumption. Items that are not considered food items under federal law and would therefore remain subject to tax include alcoholic beverages, tobacco products, pet food, prepared foods that are hot at the point of sale and are therefore ready for immediate consumption, such as a broiled chicken kept in a heated display case, and food,

such as a hamburger, a pastry, or soup, that is marketed to be heated on the premises of the retailer in a microwave oven or other heating device.

Food has been subject to sales tax in North Carolina since 1961. From the enactment of the sales tax in 1933 until 1961, either essential food items or food purchased for home consumption was exempt, except during the two years from 1935 to 1937.

Reduce Corporate Income Tax

Part II of the act reduces the corporate income tax rate from 7.75% to 6.9% over a four-year period, beginning with tax year 1997. This part of the act is expected to reduce General Fund revenues by $14.2 million in fiscal year 1996-97, $46.2 million in fiscal year 1997-98, $79 million in fiscal year 1998-99, $103.2 million in fiscal year 1999-2000, and $110.2 million in fiscal year 2000-01. The act also adjusts the percentage of corporate tax revenue that is automatically credited to the Public School Building Capital Fund to keep the amount of revenue that goes to this Fund at its current level.

Until 1987, North Carolina's corporate income tax rate was 6% of a corporation's State net income. In 1987, as part of a tax package that included repeal of the property tax on inventories, the corporate income tax was increased to 7%. One-half of the additional 1% was dedicated to public school capital needs. In 1991, as part of a legislative package that cut spending and raised revenues to make up a $1.2 billion shortfall, the corporate income tax rate was increased to 7.75% and a 4% surtax was enacted. The surtax was phased out over four years and expired January 1, 1995.

Quality Jobs and Business Expansion Tax Credits

The act establishes several tax incentives to encourage new and expanding businesses and a general business tax credit that will be more beneficial for small and existing businesses. With the exception of the worker training tax credit, the tax credits become effective for taxable years beginning on or after January 1, 1996, and apply to property placed in service and jobs created on or after August 1, 1996, and to research and development expenditures made on or after July 1, 1996. The worker training credit becomes effective January 1, 1997, and applies to training expenses made on or after July 1, 1997.

All of the credits are allowed against either the franchise tax or the income taxes; they may not exceed 50% of the tax against which they are claimed for the taxable year, and any unused credit may be carried forward for the succeeding five years. It is estimated that the credits will reduce General Fund revenues by more than $19 million in fiscal year 1997-98; this loss will increase to more than $72 million by fiscal year 2000-01. Reports will be submitted each year detailing the number of credits claimed, the number of new jobs created, the cost of tangible personal property with respect to which credits were claimed, and the costs to the General Fund of the credits claimed. The credits will expire January 1, 2002.

The tax incentives for new and expanding businesses were part of the Governor's proposals for economic development and were designed and recommended by the Governor's Economic Development Board. They include expansion of the current jobs tax credit and establishment of new tax credits for worker training expenses, for increasing research activities, and for investing in machinery and equipment. To be eligible for the credits, a taxpayer must engage in manufacturing or processing, warehousing or distributing, or data processing and the jobs must pay at least 10% above the average weekly wage in the county where the job is created.

The act expands the current jobs tax credit to include all 100 counties, to include data processing and warehousing and distribution jobs, to include employers with five or more employees, to apply to corporate franchise tax as well as corporate and individual income tax, and to significantly increase the amount of the credit for the most distressed counties. The current credit applies to 50 counties, is limited to manufacturing and processing jobs, is limited to employers with nine or more employees, is limited to corporate and individual income tax, and is a set amount ($2,800) in all 50 counties. The act divides the counties into five "enterprise tiers" based on their per capita income, unemployment rate, and population growth. The ten poorest counties are in tier one and the next fifteen counties are in tier two. The remaining seventy-five counties are divided evenly among tiers three, four, and five. The jobs tax credit is $12,500 for each eligible new job created in an enterprise tier one area, $4,000 in a tier two area, $3,000 in a tier three area, $1,000 in a tier four area, and $500 in a tier five area.

The worker training tax credit applies to expenses to train an employee for whom a jobs tax credit is allowed. The credit is 50% of the eligible training expenses, not to exceed $1,000 per worker in enterprise tier one counties and $500 per worker in other counties. The eligibility of training expenses is certified by the Community College system based on existing requirements for State-funded training for new and expanding industry.

The research and development tax credit uses the federal credit as its starting point. The credit is equal to 5% of eligible expenses incurred in North Carolina. Congress has reenacted the federal research and development credit for the period July 1, 1996, to June 30, 1997.

The credit for investment in machinery and equipment applies to property placed in service in this State and capitalized by the taxpayer for tax purposes under the Code. The credit is 7% of the cost of the taxpayer's net new investment that exceeds the county's threshold amount. The threshold amount varies depending on the county's enterprise tier, as indicated in the following table:

EnterpriseTier	Threshold
Tier One	- 0 -
Tier Two	100,000
Tier Three	200,000
Tier Four	500,000
Tier Five	$ 1,000,000

The credit must be taken in seven equal installments, beginning the year after the equipment is placed in service.

The act also provides a tax credit for investing in tangible personal property that is used by the taxpayer in connection with a business or for the production of income and is capitalized by the taxpayer for tax purposes under the Code. The amount of the credit is 4.5% of the cost of the property placed in service, not to exceed $4,500 per taxpayer per year. The credit must be taken in five equal installments beginning in the year the property is placed in service. This credit is less restricted than the credit for investment in machinery and equipment in that there is no minimum wage requirement, no minimum amount of investment requirement, and no type of business requirement.

The act provides several benefits for the ten poorest counties, which are in enterprise tier one. These counties will have access to a special Utility Account within the Industrial Development Fund of the Department of Commerce. The General Assembly appropriated $2 million to this account in the Current Operations Appropriations Act of 1996. The money in the Utility Account can be used for construction or improvements to new or existing water, sewer, gas, or electrical utility distribution lines or for existing, new, or proposed industrial buildings to be used in manufacturing and processing, warehousing and distribution, or data processing. Enterprise tier one counties will also be exempt from local match requirements for Industrial Development Fund grants and loans and Community Development Block Grants Economic Development grants and loans. To the extent practical, they will receive priority consideration for Community Development Block Grant Economic Development financing.

The act also expands the Industrial Development Fund program in all counties by increasing the maximum grant or loan from $2,400 per job to $4,000 per job, and from $250,000 per project to $400,000 per project. Finally, the act directs the Department of Commerce to annually review the level of development in each of the State's multi-county economic regions and to strive for balance and equality of development within each region.

Phase Out Soft Drink Tax

During the 1995 Regular Session, the General Assembly reduced the excise tax on soft drinks by 25%, effective July 1, 1996. This act continues the reduction started in 1995 by phasing out the tax over a three-year period, beginning July 1, 1997. This part of the act, when fully implemented in fiscal year 1999-2000, is expected to reduce General Fund revenues by $31.8 million.

The soft drink excise tax was enacted in 1969. The purpose of the tax is to provide an additional source of revenue to the General Fund. A soft drink is defined as a beverage that is not an alcoholic beverage. An alcoholic beverage is a beverage containing at least 0.5% alcohol.

Modify Bundled Transaction Sales Tax

This part of the act specifies how the amount of State and local sales and use tax due on a "bundled transaction" is to be calculated. Its primary application is in the taxation of cellular phones transferred at no cost or substantially below cost in conjunction with agreements to obtain cellular phone service for a specified minimum period of time. The provision becomes effective November 1, 1996, and is expected to reduce General Fund revenues by $6.7 million a year and local government revenues by $3.3 million a year.

As defined in the act, a "bundled transaction" is one in which an item, such as a cellular phone, is transferred without charge or below the seller's cost on condition that the purchaser enter into an agreement to purchase services for at least six months and to pay a cancellation fee if the purchaser cancels the service agreement before the end of the minimum period. Under current law, when an item is transferred in a bundled transaction, the seller is liable for use tax computed on the wholesale cost of the item. If, for example, a retailer gives a phone away in conjunction with a service agreement or sells a phone for $1 in conjunction with a service agreement and the wholesale cost of the phone to the retailer is $100, a tax of $6 (6% of $100) is due. To base the tax due on the amount charged for the item would produce the anomalous result that $6 use tax is due if the retailer gives the phone away but only 6¢ sales tax is due if the retailer "charges" $1 for the phone.

Under the act, tax is due on any price, such as $1, charged for the item when the transaction occurs and is due on the difference between the price charged and the normal retail price of the item only if the services the purchaser agrees to receive are not subject to a tax of at least 6%. If the services the purchaser agrees to receive are subject to a tax of at least 6%, no tax is due on the balance of the retail price of the item transferred unless the purchaser cancels the service agreement and is required to pay the cancellation fee. If this occurs, tax is due on the amount of the cancellation fee.

The effect of the act is to exclude part or all of the retail price of a cellular phone from sales and use tax when the phone is transferred in a bundled transaction. This would occur because telephone service is subject to a tax of at least 6% (State sales and use tax combined with State gross receipts franchise taxes). Cellular phones sold in transactions that are not bundled with service agreements would continue to be subject to State sales and use tax based on the retail price and the telephone service acquired to use the phone would also be taxed. Thus, under the act, if a person is charged $1 in a bundled transaction for a cellular phone that has a wholesale value of $100 and a retail value of $160, the person will pay tax of 6¢ (6% of $1). If that person buys the same phone in a transaction that is not bundled, the person will pay tax of $9.60 (6% of $160). Under current law, the person would pay $6 tax in the bundled transaction and $9.60 in the unbundled transaction.

Reduce Inheritance and Gift Taxes

This part of the act increases the Class A inheritance tax credit from $26,150 to $33,150, adopts the federal estate and gift tax provisions on qualified terminable interest trusts, prevents a double deduction for certain administrative expenses, and allows for the installment payment of inheritance taxes on closely held businesses and farms. The inheritance and gift tax changes become effective January 1, 1997, and apply to the estates of decedents dying on or after that date and to gifts made on or after that date. The changes are expected to reduce General Fund revenues by $3.5 million a year beginning in fiscal year 1997-98.

North Carolina inheritance and gift tax rates are based on the relationship of the person transferring the property to the person receiving the property. State law classifies beneficiaries into three classes, Class A, Class B, and Class C, and sets different tax rates for each class. A Class A beneficiary is a lineal ancestor, a lineal descendant, an adopted child, a step-child, or a son-in-law or daughter-in-law whose spouse is not entitled to any of the decedent's property; a Class B beneficiary is a sibling, a descendant of a sibling, or an aunt or uncle by blood; and a Class C beneficiary is anyone who is not a Class A or Class B beneficiary. Class A beneficiaries have the lowest tax rates, Class B beneficiaries have higher rates, and Class C beneficiaries have the highest rates. Thus, North Carolina's rate structure favors transfers to children and parents by giving these transfers the lowest rates and prefers transfers to other close family members over transfers to more distant relatives or to persons who are not related by giving these transfers the in-between rate.

North Carolina's inheritance and gift tax laws are in contrast to federal law, which has a single rate schedule for gifts and estates. As under federal law, however, all transfers to a spouse are exempt from State inheritance and gift taxes. The Revenue Laws Study Committee recommended to the 1996 General Assembly that the current inheritance tax be phased out over five years and that the federal "pick-up" tax, which is the federal state death tax credit, be retained as the State estate tax.

The 1996 General Assembly did not choose to phase out the tax, but it did increase the Class A beneficiary inheritance tax credit so that the amount exempted by the credit would be the same as the amount that is exempted from federal estate and gift taxes by application of the federal unified credit. The federal unified credit is $192,800, which exempts $600,000 of property from federal estate or gift taxes. The federal credit is unified in that it applies to both federal estate and gift taxes. Any part of the credit that is not used on gift taxes is applied to estate taxes.

The State Class A inheritance tax credit is not a unified credit. It does not apply to State gift taxes. State law provides a separate $100,000 lifetime exemption for gifts made to Class A beneficiaries. Under current law, therefore, the combination of the State gift tax lifetime exemption for Class A beneficiaries and the Class A inheritance tax credit exempts the same amount of property as the federal unified credit. Under this act, the increase in the Class A inheritance tax credit to $33,150 will exempt an additional $100,000 from inheritance tax. If a person fully uses both the State $100,000 gift tax lifetime exemption and the State Class A inheritance tax credit, the person can exempt more property from gift and inheritance taxes under State law than under federal law.

The act further conforms to federal law by exempting from State inheritance and gift tax property that is exempt from federal estate and gift taxes because it is considered qualified terminable interest property (QTIP property). Conforming to federal law on this topic will provide consistent treatment at the federal and State level. Also, because this type of property is more like an outright transfer to a spouse than it is like any other kind of transfer, this act intends to further the State's policy of exempting transfers to spouses from inheritance or gift tax by providing that no inheritance tax will be due until the spouse subsequently dies and passes the property on to the ultimate beneficiaries.

QTIP property is property placed in a trust in which a person's spouse has an income interest for life and the person's children or other designated beneficiaries have a remainder interest. Under federal law, a transfer of property that qualifies as QTIP property is not taxable when the transfer is made. Instead, it is taxed when the spouse who had the lifetime income interest in the property dies. At that time, the value of the QTIP property is included in the spouse's gross estate.

Under current North Carolina law, when property is transferred by means of a QTIP trust, two transfers are considered to have been made. One transfer is the transfer to the spouse of a life estate in the trust income. The transfer of the life estate to the spouse is not taxed because all property that passes to a spouse is exempt from State inheritance and gift taxes. The value of the spouse's life estate is the present value of the stream of income based on the life expectancy of the spouse. The other transfer is a transfer of the remainder interest in the trust property to the transferor's children or other designated beneficiaries. The transfer of the remainder interest is subject to inheritance or gift tax. The value of the remainder interest is its present value as of the date of death or date of the gift.

Under this act, the remainder interest in QTIP property would no longer be taxable under North Carolina law when the QTIP trust is established. Instead, it would be taxable when the spouse with the life estate in the income died and would be taxed on the basis of the value at the spouse's death. In some cases, taxes would be collected at a later time than under current law, but in other cases less tax would be collected than under current law. Further reductions in tax would occur if the value of the trust property declined over time. No tax would be collected at a later date if the spouse moved out of the State before death and the trust consisted of securities rather

than real property located in the State. By the same token, some tax would be collected that is not now collected if a spouse with a QTIP trust moves into the State.

A QTIP trust need not be established before a gift is made or the decedent dies. If the transfer is a gift, the trust can be established any time before the gift tax return is filed. If the transfer is a devise upon death, the trust can be established any time before the estate tax return is due if the will gives the personal representative the option of establishing a QTIP trust. The decision of whether or not to establish a QTIP trust is made after considering tax consequences and other factors.

Current law allows the costs of administering an estate to be deducted when determining the amount of inheritance tax payable on property in the estate. Costs of administration include attorney fees, accountant fees, and executor fees. The law, however, does not limit the inheritance tax deduction to costs that are not deducted on a fiduciary income tax return filed for the estate. If the same cost is deducted on both returns, the taxpayer receives an unintended double deduction for the same item.

A double deduction for the same item of cost is most likely to result when, because of the small size of an estate, no federal estate tax return is filed but a federal fiduciary income tax return is filed. In this instance, all costs will be deducted on the federal fiduciary income tax return.

North Carolina's income tax uses federal taxable income as the starting point in computing North Carolina taxable income. A result of this is that deductions taken on the federal return are automatically passed through on the North Carolina return. Thus, any item that is deducted on the federal fiduciary income tax return is also deducted on the State fiduciary income tax return. To prevent a double deduction, this act prohibits the deduction of an item on an inheritance tax return if the item was deducted on the federal fiduciary income tax return.

Finally, this part of the act allows for the installment payment of inheritance taxes on closely held businesses and farms if the personal representative of the estate elects under section 6166 of the Internal Revenue Code to make annual installment payments of federal estate tax. Payments are due at the same time and in the same proportion to the total tax due as payments due to the Internal Revenue Service under section 6166 of the Code. An acceleration of federal payments will also accelerate the North Carolina payments.

Nonitemizer Charitable Contribution Tax Credit

This part of the act creates an individual income tax credit for charitable contributions made by individuals who do not itemize their deductions. The credit is 2.75% of the amount of charitable contributions that exceed 2% of the individual's adjusted gross income. Two percent is the average percentage of income that North Carolinians contribute to nonprofits. By setting the floor at 2%, the act encourages and acknowledges giving that is above average. It is effective for taxable years beginning on or after January 1, 1997, and is expected to reduce General Fund revenues by approximately $5 million a year.

Under the federal Internal Revenue Code, an individual who itemizes deductions may deduct contributions to nonprofit charitable organizations. Individuals who elect the standard deduction, however, may not deduct charitable contributions. An individual's North Carolina's income tax is based on the federal calculation of taxable income, with some adjustments. The federal disallowance of charitable deductions for nonitemizers is "piggybacked" by North Carolina tax law, so there is no income tax incentive under federal or North Carolina law for nonitemizers to make charitable contributions. Legislation was introduced in Congress to allow nonitemizers to

deduct charitable contributions. If federal legislation were enacted, North Carolina could "piggyback" the federal tax incentive. However, the federal legislation did not pass.

Individuals who elect the standard deduction are those whose total itemized deductions (such as mortgage interest, State and local property and income taxes, medical expenses, and charitable contributions) do not exceed the standard deduction amount. The amount of the standard deduction varies depending upon the individual's filing status. The North Carolina standard deduction amounts for 1996 are $5,000 for a married couple filing a joint return; $4,400 for a head of household; $3,000 for single taxpayer; and $2,500 for a married taxpayer filing separately. Approximately 71% of North Carolina taxpayers elect the standard deduction.

This provision was one of the recommendations of the House of Representatives' Select Committee on Nonprofits; it is intended to increase charitable giving. The Committee studied the question of whether tax incentives make a difference in charitable giving and learned that federal tax incentives probably do but State tax incentives probably do not because the State income tax is so low compared to the federal income tax that it does little to influence individuals' economic decisions. The Committee believed, however, and the General Assembly agreed, that State incentives may affect perceptions, and thus behavior, even if the tax is too small to provide a significant economic incentive.

Exclude Certain Severance Pay from Income Tax

This part of the act exempts from State individual income tax severance pay a taxpayer receives due to the permanent closure of a manufacturing or processing plant, not to exceed a maximum of $35,000 for the taxable year. This part is effective for taxable years beginning on or after January 1, 1996. The exemption is expected to reduce General Fund revenues by approximately $4 million a year.

Reduce Sales Tax On Fuel Used By Farmers and Industry

This part of the act reduces the sales tax rate on electricity and piped natural gas used by farmers, manufacturers, laundries, and dry cleaners from 3% to 2.83%, effective August 1, 1996. This change affects General Fund revenue but not local revenue because no local sales tax applies to electricity and piped natural gas. It is expected to reduce General Fund revenue by over $5 million dollars a year.

Chapter 14, 1996 Second Extra Session (Senate Bill 6, Senator Kerr)

AN ACT TO PROVIDE TAX REFORM AND TAX RELIEF FOR THE CITIZENS OF NORTH CAROLINA BY REPEALING THE UNCONSTITUTIONAL CORPORATE TAX CREDIT FOR NORTH CAROLINA WINE, REPEALING THE UNCONSTITUTIONAL CORPORATE TAX DEDUCTION FOR NORTH CAROLINA DIVIDENDS, REPEALING THE UNCONSTITUTIONAL INDIVIDUAL INCOME TAX CREDIT FOR NORTH CAROLINA DIVIDENDS, REVISING THE UNCONSTITUTIONAL TAX CREDIT FOR QUALIFIED BUSINESS INVESTMENTS, CLARIFYING THE

TAX TREATMENT OF REFUNDS OF UNCONSTITUTIONAL TAXES, CLARIFYING THE SALES AND USE TAX TREATMENT OF ITEMS GIVEN AWAY BY MERCHANTS, PROVIDING THE SECRETARY OF REVENUE AUTHORITY TO IMPROVE USE TAX COLLECTION, EXEMPTING FROM SALES AND USE TAX INVENTORY THAT IS DONATED BY A MERCHANT TO A CHARITABLE NONPROFIT ORGANIZATION, AND REPEALING MOST STATE PRIVILEGE LICENSE TAXES.

This act contains several different provisions recommended to the 1995 General Assembly by the Revenue Laws Study Committee. It repeals or revises four North Carolina tax provisions that the Committee identified as having the same flaw as the intangibles tax stock deduction that was declared unconstitutional by the United States Supreme Court in the Fulton[1238] decision. In addition, it clarifies the tax treatment of refunds of unconstitutional taxes, extends the time a taxpayer has to challenge the unconstitutionality of a tax from 30 days to one year, enables the State to enter into agreements to accept voluntary payments of State and local use tax, directs the Department of Revenue to instruct mail-order companies to obtain the purchaser's county of residence for proper allocation of use tax revenue, clarifies the sales tax treatment of items given away by merchants, exempts from sales and use tax tangible personal property that is donated by a manufacturer or retailer to a nonprofit organization for a charitable purposes, and repeals most State privilege license taxes. The act results in a revenue gain for the General Fund of approximately $18.27 million in fiscal year 1996-97. After the privilege license repeal becomes effective in 1997, the act will increase General Fund revenues by only about $2 million a year.

Unconstitutional Tax Preferences

The tax preferences addressed in Part I of the act are:

1. The current $300 individual income tax credit for dividends received from North Carolina companies: Effective for the 1996 tax year, the act repeals this credit.
2. The $15,000 corporate income tax deduction for dividends received from North Carolina companies: Effective for the 1996 tax year, the act repeals this deduction.
3. The income tax credits for investing in North Carolina Enterprise Corporations and for qualified business investments in North Carolina companies: The act repeals the credit for investing in North Carolina Enterprise Corporations and the corporate income tax credit for qualified business investments, effective for investments made on or after January 1, 1997. It restricts the remaining tax credits for qualified business investments to those made by individuals or small partnerships directly in qualified businesses and removes the requirement that qualified businesses be headquartered and operating in North Carolina, effective for investments made on or after January 1, 1997. It also caps the credits at $6 million a year, effective for investments made on or after January 1, 1996.
4. The North Carolina income tax credit for distributing North Carolina wine: The act repeals this credit effective for the 1996 tax year.

[1238] Fulton Corp. v. Faulkner, 516 U.S. 325, 116 S. Ct. 848, 133 L. Ed. 2d 796 (1996).

There is no disagreement on whether these tax preferences are flawed. The Attorney General's Office advised the Department of Revenue that, if the General Assembly did not resolve the constitutional problems with these preferences, the Department of Revenue had the option of either denying the preferences to North Carolina companies or extending the preferences to all out-of-state companies. Enforcing the preferences as written on the books was not an option because of the risk of personal liability on the part of Department of Revenue personnel in enforcing provisions that were so clearly flawed in the wake of the Fulton decision.

One unconstitutional tax preference identified by the Revenue Laws Study Committee that is not addressed in this act is the 100% deduction allowed to North Carolina parent companies for subsidiary dividends received by them with no requirement that expenses be deducted from the tax-free income. Out-of-state parent companies are allowed an exclusion for subsidiary dividends but are required to adhere to the basic tax principle that expenses incurred to generate the tax-free dividend income cannot also be deducted. The Revenue Laws Study Committee recommended revising this preference to apply the basic tax principle to in-state parent companies. However, this provision is omitted from this act. Inaction on this item by the General Assembly will result in a revenue loss of approximately $3.5 million annually because the Department of Revenue will probably extend the current preference for in-state parents to out-of-state parents.

Part I of this act also extends the time a taxpayer has to challenge the unconstitutionality of most taxes from 30 days to one year, effective for taxes paid on or after November 1, 1996. The time limit remains at 30 days for excise taxes on alcoholic beverages, soft drinks, tobacco products, and controlled substances. In North Carolina, if a taxpayer believes a tax is unconstitutional, the taxpayer must pay the tax and contest the tax by requesting a refund within 30 days after paying the tax. This procedure is known as "paying under protest". The North Carolina Supreme Court has upheld the constitutionality of the State's 30-day rule and the United States Supreme Court, by deciding not to hear the case, upheld the State court's ruling.

States that require a taxpayer to contest a tax by paying under protest are called "postdeprivation remedy" states. Most postdeprivation remedy states have a statute of limitations that is longer than 30 days. The most common statute of limitations utilized by the postdeprivation remedy states is known as the "three-year/two-year" rule. Under this rule, in order for a taxpayer to recover a refund of money paid under a tax later declared to be illegal, the taxpayer must have filed for a refund within three years after the date that the taxpayer filed the return, or two years after the date the taxpayer paid the tax, whichever is later. South Carolina recently repealed its 30-day rule and replaced it with a three-year rule.

Finally, Part I of this act clarifies the tax treatment of refunds of unconstitutional taxes and other similar recoveries. Under Section 111 of the Code, if a taxpayer recovers an amount that the taxpayer had previously deducted, the taxpayer must add the amount of the recovery back to gross income. The typical example is a State income tax refund, which must be included in gross income if the taxpayer deducted it as an itemized deduction. The principle is that if the taxpayer received a tax benefit from deducting an expenditure, when the expenditure is refunded to or recovered by the taxpayer, the taxpayer should give back the corresponding tax benefit. This adjustment normally carries through from the Code to North Carolina income tax statutes because North Carolina piggybacks the Code. In some situations, such as the alternative minimum tax, however, North Carolina does not piggyback the Code. A refund or recovery might represent a tax benefit under the Code but not North Carolina law, or vice versa. This part of the act provides consistency in requiring State add-backs of only those refunds and recoveries that represent State tax benefits. It prevents situations in which a taxpayer would receive a double deduction or be

subject to double taxation because a refund (of an unconstitutional tax, for example) represented a tax benefit under the Code but not State law, or vice versa.

Sales and Use Tax

Part II of this act makes three changes to the State's sales and use tax laws, effective August 1, 1996:

1. It enhances compliance and enforcement of existing sales and use tax laws by authorizing the Department of Revenue to enter into agreements to accept voluntary payments of State and local use tax and by directing the Department of Revenue to instruct mail-order companies to obtain the purchaser's county of residence for proper allocation of use tax revenue.
2. It clarifies the sales tax treatment of items given away by merchants.
3. It exempts from sales and use tax tangible personal property that is donated by a manufacturer or retailer to a nonprofit organization for a charitable purpose.

The State cannot require a mail-order marketer to collect and remit the use tax owed this State on sales to North Carolina residents unless the marketer has a store in North Carolina or other ties sufficient to give the State jurisdiction over it. If the direct marketer does business with North Carolina residents only through telephone, mail, and freight transactions, it does not have "nexus" with this State and is not required to collect the tax. The United States Supreme Court has held that states' efforts to require these out-of-state marketers to collect sales or use tax on sales to residents violate the interstate commerce clause of the United States Constitution.

As a result of these constitutional restrictions, out-of-state direct marketers have a competitive advantage over in-state merchants, and states lose significant amounts of revenue. Some direct marketers collect and remit use taxes voluntarily as a convenience to their customers. The Direct Marketers Association, the Federation of Tax Administrators, and the Multi-state Tax Commission are currently negotiating a possible agreement under which more direct marketers would voluntarily collect use tax on behalf of customers in states in which the marketers do not have nexus. Under this agreement, tax collection would be simplified by using the same form and payment deadlines in every state. In addition, the direct marketers would collect at only one rate per state; non-uniform county and city rates would be disregarded. If these parties are able to design a system that would be acceptable to all involved, North Carolina would need authority to enter into such an agreement. The act would provide that authority and set out some of the parameters for the agreement. If the ongoing negotiations result in a viable multi-state program for collection of use taxes by direct marketers and North Carolina enters into agreements pursuant to the program, the Department of Revenue could potentially collect millions of dollars in use taxes that are owed under current law but are not being paid.

The act also clarifies the sales tax treatment of items given away by merchants. It provides that property given away or otherwise used by a merchant is not exempt from use tax, except in the case of restaurants and caterers that give free meals to employees or free bar food to patrons and in the case of retailers that give a free item of inventory to a customer on the condition that the customer purchase similar or related property. As under former law, free books of matches would not be subject to use tax if they are given away along with the sale of cigarettes; matches given away where cigarettes are not sold would remain subject to use tax.

A general sales and use tax principle is that a wholesale merchant or retailer who gives away products free of charge instead of selling them is liable for use tax on the products. The use

tax, first enacted in 1939, is the complement of the sales tax and applies to the storage, use, or consumption in this State of tangible personal property. A merchant is liable for the use tax on property it uses in its business, whether furniture, equipment, decor, or promotional giveaways. Items sold by a merchant, however, are not subject to use tax because sales tax will apply when the items are sold at retail.

There are some gray areas in determining whether a product is sold or is given away. For example, if a merchant has a "buy one, get one free" sale, both items are considered sold for the price of the first one. Although the second item appears to be given away, in fact both items are being sold at a discounted price. Another example is paper napkins, catsup, and other items that accompany and are consumed along with meals. These items are considered sold as part of the meal.

Until 1993, the following items were considered used, not sold, and thus subject to use tax: meals provided free to the merchant's employees, food given away to the merchant's patrons, and matches given away to patrons, other than matches given along with the sale of cigarettes. A group of restaurants appealed the assessment of this tax, claiming that in their case these items should be considered sold. The restaurants were selling meals to patrons and, at the same time, giving some of the food to employees as meals and some to patrons as "bar food" such as chips. In addition, free books of matches were provided to patrons for use in the restaurant.

The North Carolina Court of Appeals agreed with the restaurants that these items should be considered sold along with the food the restaurant sold as part of its business. In its opinion, the court reasoned that the cost of these items was recovered by the sale of other items. This rationale could arguably be applied in a very broad way to mean that the cost of all of a merchant's purchases should be exempt from sales and use tax because they are covered by the price of sold items; a merchant's profits from its sales generate the funds to purchase furniture, equipment, decorations, and other items. Thus, taken literally, the court ruling could be interpreted to eliminate the use tax altogether for merchants.

Finally, Part II of the act includes a new sales and use tax exemption for tangible personal property that is donated to a nonprofit organization by a retailer or a wholesale merchant. Under current law, medicine and certain food donated to a nonprofit organization to be used for a charitable purpose are exempt from sales and use tax. This act repeals these two exemptions since they become redundant in light of the new, and broader, exemption created by it.

Under current law, a wholesale merchant or retailer who donates products to a nonprofit organization instead of selling them is liable for the sales and use tax. A wholesale merchant or retailer does not pay sales or use taxes when purchasing the products or the ingredients used to manufacture the products because the products are to be resold. Sales and use taxes do not apply to property purchased for resale or ingredients purchased to manufacture products for resale. If the wholesale merchant or retailer chooses not to sell the goods, the wholesale merchant or retailer becomes liable for use tax on the goods because the resale exemption no longer applies. This is true no matter what the company chooses to do with the products. The act eliminates this liability for use tax by providing a specific exemption for tangible personal property purchased or manufactured by a wholesale merchant or retailer for resale and then withdrawn from inventory and donated to a nonprofit organization, contributions to which are deductible as charitable contributions for federal income tax purposes.

Repeal of Most Privilege License Taxes

Part III of this act repeals most of the State privilege license taxes imposed under Article 2 of Chapter 105 of the General Statutes, effective July 1, 1997. This Part is expected to reduce General Fund revenues by about $11 million a year. The only privilege taxes retained are the taxes imposed by G.S. 105-37.1 (amusements); 105-38 (circuses and similar shows); 105-41 (professionals); 105-83 (installment paper dealers); 105-88 (loan agencies or brokers); 105-102.3 (banks); and 105-102.6 (newsprint publications). The tax on professionals was retained because its repeal would reduce General Fund revenues by more than $3 million a year. The other taxes were retained because they have a gross receipts or other variable element (amusements, circuses, installment paper dealers, banks), are related to a tax that is retained (loan agencies), or were enacted for a regulatory purpose (newsprint publications).

The act preserves the status quo on privilege license taxation for cities and counties. Cities have general authority to impose privilege license taxes unless limited by Article 2; counties have no general authority to impose these taxes but are authorized by Article 2 to levy some specific taxes. The act provides that the current limitations and authorizations in Article 2 that apply to cities and counties will continue to apply. The act also preserves the itinerant merchant regulatory provisions but moves them to Chapter 66 of the General Statutes, Commerce and Business.

The Revenue Laws Study Committee found that the privilege license tax structure in Article 2 of Chapter 105 of the General Statutes is outmoded, inefficient, and not designed on proper principles of taxation such as tax fairness, ability to pay, responsiveness to growth, or administrative cost. There is no rationale for a tax on the privilege to work that applies only to a limited portion of businesses or the work force and that has a different and inconsistent tax rate for each different class of business. Because the tax is not indexed to any economic parameter, the cost to administer the tax has become increasingly high over time compared to the amount of tax collected. As a result, the tax has become more of a nuisance tax than a properly designed source of revenue for the State. The Revenue Laws Study Committee plans to study the elimination of the remaining State privilege license taxes and reform of the provisions governing local privilege license taxes.

Chapter 18, 1996 Second Extra Session (House Bill 53, Representative Holmes)

AN ACT TO MODIFY THE CONTINUATION BUDGET OPERATIONS APPROPRIATIONS ACT OF 1995, AND THE EXPANSION AND CAPITAL IMPROVEMENTS APPROPRIATIONS ACT OF 1995, AND TO MAKE OTHER CHANGES IN THE BUDGET OPERATION OF THE STATE.

The Current Operations Appropriations Act of 1996 contains five tax law changes. It increases the property tax homestead exemption, modifies the State ports tax incentive, exempts milk drinks from the excise tax on soft drinks, allows the University of North Carolina Hospitals at Chapel Hill an annual refund of sales and use tax paid, and makes permanent the quarterly distribution of a portion of the excise tax on wine to the North Carolina Grape Growers Council.

The act expands the homestead exemption amount from $15,000 to $20,000 and increases the income eligibility amount from $11,000 to $15,000, effective for taxes imposed for taxable years beginning on or after July 1, 1997. Under the act, the State will reimburse the counties and cities 50% of the loss they incur as a result of these tax law changes for two years. This reimbursement will cost the General Fund $3 million a year. The increase in the income eligibility amount will allow as many as 34,000 elderly and disabled homeowners to qualify for the homestead exemption who do not currently qualify. The increase in the homestead exemption amount will provide additional property tax relief to at least 155,000 elderly and disabled homeowners who currently qualify for the exemption.

The homestead exemption is a partial exemption from property taxes for the residence of a person who is either aged 65 or older or totally disabled and has an income of less than $11,000. The current exemption amount is $15,000. The exemption amount was last increased in 1993, when it was increased from $12,000 to $15,000. The income eligibility amount was last increased in 1987, when it was increased from $10,000 to $11,000. The income used to determine the income eligibility amount includes moneys received from every source other than gifts or inheritances received from a spouse, lineal ancestor, or lineal descendant. For married applicants residing with their spouses, the income of both spouses is included, whether or not the property is in both names.

The revenue loss associated with this act will be borne equally between the local governments and the State for the first two years. Prior to 1987, local governments absorbed most of the cost of the homestead exemption. From 1987 to 1991, the State reimbursed counties and cities for 50% of their losses from the homestead exemption. In 1991, the General Assembly froze the amount of reimbursements made to local governments to the amount each city and county was entitled to receive in 1991. That amount is approximately $7.9 million. No additional reimbursement was provided when the exemption amount was increased in 1993.

The act expands the State ports income tax credit to include the importing and exporting of forest products at the State-owned port terminal at Wilmington, effective for taxable years beginning on or after January 1, 1996. Forest products are a type of bulk cargo. Under current law, a taxpayer is not entitled to the income tax credit for bulk cargo imported or exported at the Wilmington terminal. This part of the act is expected to reduce General Fund revenues by $180,000 for fiscal year 1996-97.

Bulk cargo is a type of commodity that is loose and usually stock-piled. Examples of this type of commodity include coal, grain, salt, and wood chips. Break-bulk cargo and container cargo are different methods used to ship the same type of commodity. Commodities that are packaged in a metal trailer box that can be locked onto a tractor-trailer chassis and then detached and put on a ship without any other handling are considered "container cargo". Commodities that are packaged and stored on pallets or in cases that must be handled and stacked onto a ship by hand, crane, etc., are considered break-bulk cargo. Break-bulk cargo also includes machinery.

Under prior law, the income tax credit was available only for break-bulk cargo and container cargo imported or exported at the Wilmington terminal. The credit is available for bulk cargo, break-bulk cargo, and container cargo imported or exported at the Morehead City terminal. Since bulk cargo is generally imported and exported only at the Morehead City terminal, there has not been a need to extend the credit to this type of cargo at the Wilmington terminal. The credit is being narrowly extended to forest products because there is a customer at the Wilmington terminal who will be exporting wood chips and the Ports Authority believes all users of the

Wilmington terminal should be entitled to the credit. The act does not extend the credit to all bulk products because the Wilmington terminal does not want to be seen as competing unfairly with other terminals located in the Wilmington area that import or export other types of bulk products.

The amount of the tax credit allowed is equal to the amount of charges paid to the North Carolina Ports Authority in the taxable year that exceeds the average amount of charges paid to the Authority for the past three years. The credit is limited to 50% of the tax imposed on the taxpayer for the current year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years. The cumulative credit may not exceed one million dollars per taxpayer. The credit will expire in 1998.

The act also removes the requirement that a flavored milk drink must be registered with the Department of Revenue before it can be exempt from the excise tax on soft drinks and extends the exemption to cover all soft drinks that contain milk. This part of the act is effective retroactively to October 1, 1991. The act does not result in a significant revenue loss because:

1. Any assessments pending against a dairy that produces a flavored milk drink have not been paid and will not have to be paid under the provisions of this act.
2. Other registered flavored milk drinks are currently exempt and therefore are not paying any tax.

Under prior law, a flavored milk drink containing at least 35% milk was exempt from the excise tax on soft drinks if it was registered with the Department of Revenue. Natural liquid milk produced by a farmer or a dairy has always been exempt from tax without the necessity of registering the milk product. The Department of Revenue assessed tax on some dairies' chocolate milk products because they were not registered with the Department. The dairies contested the assessments.

As originally introduced, this provision would have exempted from the registration requirement chocolate flavored milk produced by a dairy. This approach raised some legal concerns, however, because it resulted in similarly situated taxpayers being treated differently. For example, one flavored milk drink registered with the Department is produced by three different people: a dairy in North Carolina, a dairy located outside the State, and a packer in North Carolina. Under the original provision, the two dairies would not have to register the milk drink to receive the tax exemption and the packer would. To avoid possible litigation, this provision was revised to exempt all milk products from the tax. Under Chapter 13 of the 1995 Session Laws, 1996 Second Extra Session, the excise tax on all drinks will be repealed effective July 1, 1999.

Fourthly, the Current Operations Appropriations Act of 1996 allows The University of North Carolina Hospitals at Chapel Hill to seek an annual refund of State and local sales and use tax they paid on direct purchases of tangible personal property. Sales and use tax liability indirectly incurred by the hospitals on building materials, supplies, fixtures, and equipment that become a part of or annexed to a building used by the hospitals is considered paid on a direct purchase by the hospitals. This part of the act becomes effective January 1, 1997, and applies to taxes paid on or after that date. It is expected to reduce General Fund revenues by $1.9 million in the 1997-98 fiscal year and about $4 million annually thereafter.

Under current law, nonprofit, private hospitals are allowed a semiannual refund of State and local sales and use taxes paid. For-profit hospitals are allowed a semiannual refund of State and local sales and use taxes paid on medicines and drugs. However, neither of these two refund provisions are applicable to hospitals owned or controlled by a governmental unit.

Under current law, local government agencies receive an annual refund of State and local sales taxes they pay but State agencies do not receive refunds of either State or local sales taxes. Local sales taxes paid by State agencies, including State-operated hospitals, are refunded quarterly to the General Fund rather than to the agency. State agencies do not receive refunds of State sales taxes because the appropriation of State funds for that agency includes the amount of sales tax payable by the agency.

As of the effective date of this act, the local sales taxes paid by the UNC hospitals will no longer be refunded to the General Fund and the State sales taxes paid by the UNC hospitals will no longer remain in the General Fund. These amounts will instead be paid directly to the UNC hospitals. Presumably, the appropriation to the UNC hospitals will be reduced to reflect this new refund.

This provision departs from the traditional policy that State sales taxes are not refunded to State-funded agencies. Refunding State sales taxes to agencies funded from the General Fund merely creates a loop of unnecessary administrative costs and paperwork as funds are paid into the General Fund as sales taxes then refunded by the Department of Revenue out of the General Fund. In all other cases, the same result is reached without the paperwork by including in the agency's General Fund appropriation an amount to cover the sales taxes paid into the General Fund. The latter approach saves the Department of Revenue and the State agency the administrative costs associated with periodic refunds.

This refund applies only to the UNC hospitals and not to other State hospitals and similar facilities. As well as the UNC hospitals, the State operates four psychiatric hospitals: Dorothea Dix Hospital, Broughton Hospital, Cherry Hospital, and John Umstead Hospital. In addition, the State operates various Alcohol and Drug Treatment Centers and Mental Retardation Centers around the State. These centers are in-patient facilities similar to hospitals. In the case of all State-operated hospitals and treatment centers other than the UNC hospitals, the General Assembly appropriates money from the General Fund to pay for sales taxes, rather than reducing the institution's appropriation and requiring the institution and the Department of Revenue to process refunds.

Lastly, the act makes permanent a quarterly distribution of a portion of the excise tax on wine to the North Carolina Grape Growers Council. Under G.S. 105-113.81A, 94% of the net proceeds of the excise tax collected on unfortified wine bottled in North Carolina during the previous quarter and 95% of the net proceeds of the excise tax collected on fortified wine bottled in North Carolina during the previous quarter is credited to the Department of Agriculture. The amount credited may not exceed $90,000 per fiscal year; any funds credited to the Department under this statute that are not expended during the fiscal year do not revert to the General Fund at the end of a fiscal year. The Department of Agriculture allocates these funds to the North Carolina Grape Growers Council to be used to promote the North Carolina grape and wine industry and to contract for research and development services to improve viticultural and enological practices in North Carolina.

This distribution has been in effect since 1987. Under the original legislation, the distribution would have terminated on June 30, 1997, and the funds would have been credited to the General Fund. This part of the act removes the sunset.

In 1973, the General Assembly enacted legislation providing that the tax on wine manufactured in North Carolina would be lower than the tax on other wines. In 1984, the United States Supreme Court decided in the Bacchus case that an unequal tax between in-state and

out-of-state wine violated the Commerce Clause of the United States Constitution. As a result of this decision, the State and the local governments, who receive a percentage of the excise tax on wine, realized a revenue increase. In 1987, the General Assembly decided that a portion of this increased revenue should be used to promote and improve the State's grape and wine industry. This part of the act continues this philosophy.

In 1985, the General Assembly enacted an income tax credit for distributing North Carolina wine. Chapter 14 of the 1996 Second Extra Session repealed this credit because it had the same flaw as the intangibles tax stock deduction that was declared unconstitutional by the United States Supreme Court in the Fulton decision. The United States Supreme Court ruled that the intangibles tax stock deduction violated the interstate commerce clause of the federal constitution.

Chapter 19, 1996 Second Extra Session (House Bill 30, Representative Grady)

AN ACT TO REFUND TO FEDERAL RETIREES THE UNCONSTITUTIONAL TAXES THEY PAID ON THEIR PENSIONS FOR TAX YEARS 1985 THROUGH 1988.

This act gives federal retirees income tax credits and partial refunds for the North Carolina income taxes they paid on their federal retirement benefits in 1985, 1986, 1987, and 1988. These credits and refunds will cost the General Fund more than $117 million over three years. The amount a federal retiree may claim as a credit or refund is reduced by any amounts previously credited or refunded to the federal retiree for the same pension taxes. If a federal retiree paid the 1985-88 pension taxes under timely protest, the retiree already received a refund as required by existing law. Under this act, federal retirees who did not make a timely protest and who pay North Carolina income tax may take a State income tax credit in three equal installments beginning with the 1996 tax year. For a taxpayer whose 1996 tax liability is less than 5% of the tax the taxpayer paid on federal retirement benefits during 1985-88, a one-time refund is allowed in lieu of a credit. The taxpayer must claim this refund by April 1, 1997. The refund allowed is the lesser of 85% of the amount claimed or a reduced amount. The reduced amount occurs when the total refunds claimed exceed the $25 million the General Assembly has set aside to pay for the refunds. If the $25 million cap is reached, then the refunds are prorated based on the amount each taxpayer claimed. If a federal retiree who would otherwise be eligible for a credit or refund has died, the retiree's estate may claim the credit or refund.

In 1990, the General Assembly gave to federal retirees who had not made a timely protest an income tax credit for the amount of tax paid on their federal retirement benefits in 1988. This tax credit was not refundable and was not allowed to deceased federal retirees; it was allowed in three installments. This credit was granted as a result of the 1989 United States Supreme Court decision in Davis v. Michigan, which held that the doctrine of intergovernmental tax immunity prohibits a state from taxing federal retirement income at a higher rate than State retirement income. Prior to 1989, North Carolina allowed a full income tax exclusion for State retirement income and a $3,000 annual exclusion for federal retirement income; there was no exclusion for private pension income. To comply with the Davis decision, the General Assembly in 1989

allowed all government retirees (state, local, and federal) a $4,000 annual exclusion. At the same time, it allowed private retirees a $2,000 annual exclusion.

The tax credit for 1988 taxes was enacted in 1990 to equalize the treatment of those who paid under protest for 1988 and those who did not. The Davis decision was issued on March 28, 1989, the middle of the income tax filing period for the 1988 tax year. Those taxpayers who learned about the Davis decision in time paid under protest within the 30-day time limit prescribed by law or refused to pay tax on their federal retirement benefits. Those who had paid their taxes early or did not become aware of the Davis decision until later were not able to make a timely protest.

The State currently faces similar constitutional challenges to several of its other taxes. The United States Supreme Court declared North Carolina's intangibles tax on stocks unconstitutional in the 1996 Fulton decision. Other taxes that were collected until their repeal in the 1996 tax year, such as the individual income tax credit for North Carolina dividends and the corporate income tax deduction for North Carolina dividends, have been identified by the Revenue Laws Study Committee as having the same constitutional flaw as the intangibles tax. Furthermore, State, local, and federal retirees are currently challenging the constitutionality of the income tax levied on their pensions for the tax years from 1989 to the present. Taxpayers who paid the intangibles tax and other unconstitutional taxes without filing a timely protest will likely seek legislation granting them refunds of three years' back taxes, relief similar to that granted federal retirees by this act. The cost of granting relief to other taxpayers in the same position as the federal retirees aided by this act could cost the General Fund hundreds of millions of dollars.

1996 Regular Session

1996 Chapter 560 (House Bill 1119, Rep. Shaw)

AN ACT TO DELETE THE REQUIREMENT THAT A COMPANY ADD BACK TO ITS NET WORTH FRANCHISE TAX BASE THE AMOUNT OF ITS LOANS THAT ARE PAYABLE TO AN UNRELATED COMPANY BUT ARE ENDORSED OR GUARANTEED BY A RELATED COMPANY, AS RECOMMENDED BY THE DEPARTMENT OF REVENUE.

This act deletes a provision in the corporate franchise tax laws that requires a parent, a subsidiary, or an affiliate of another corporation to include in its franchise tax base the amount of any debt that is owed by the corporation and is endorsed or guaranteed by one of its related corporations. The change is effective for taxable years beginning on or after October 1, 1996. The change is made at the recommendation of the Department of Revenue and is expected to have a revenue loss of no more than $10,000 a year.

Under current law, a corporation that is a parent, a subsidiary, or an affiliate of another corporation is required to add back to its net worth franchise tax base the amount of any debt it has that is payable to its parent, affiliate, or subsidiary or is endorsed or guaranteed by its parent, affiliate, or subsidiary. Debt that is not payable to a parent, affiliate, or subsidiary and is not guaranteed by one of these corporations is not required to be added back to the base. The act

deletes the requirement that debt endorsed or guaranteed by a related company be added back and retains the requirement that debt payable to a related company be added back.

The Department of Revenue recommended this change because of the difficulty of enforcing the endorsement provision and the lack of need for the requirement. The existence of endorsed or guaranteed debt is often not readily ascertainable from the financial statements of a corporation. When a corporation endorses or guarantees a debt, it makes no accounting entry, such as the creation of a liability, to acknowledge the endorsement or guarantee. If the amount of debt endorsed or guaranteed is significant, the existence of the debt will be reflected in a footnote of the financial statements.

The franchise tax is a tax on corporations for the right or privilege to exist as a corporate entity and, in the case of foreign corporations, the right or privilege to do business in a corporate capacity in North Carolina. The tax is levied on the assets of a corporation. The tax rate is $1.50 per $1,000 with a minimum of $35. The franchise tax base on which the tax is computed is the largest of the following:

1. Capital stock, surplus, and undivided profits.
2. 55% of appraised property tax value of all taxable tangible property in North Carolina plus all taxable intangible property.
3. The corporation's actual investment in tangible property in North Carolina.

The add-back requirement is imposed to prevent related companies from understating their net worth through means of transactions with each other. A corporation can make capital available to another corporation in several ways. For example, it can buy the corporation's stock or loan the corporation money. The stock purchase would be reflected in the net worth of the company but the debt would be a deduction in computing net worth. To establish the economic reality between the companies, the loan is required to be added back so that it is in effect treated the same as the stock purchase.

Under current law, endorsed or guaranteed debt is required to be added back also even though the corporation making the endorsement or guarantee did not decrease its capital to increase that of the corporation receiving the loan. Endorsed or guaranteed debt is more like third-party debt than a loan from one company to another.

A recommendation of the Revenue Laws Study Committee.

1996 Chapter 590 (House Bill 540, Rep. Connie Wilson)

AN ACT TO AUTHORIZE THE ISSUANCE OF NINE HUNDRED FIFTY MILLION DOLLARS GENERAL OBLIGATION BONDS OF THE STATE, SUBJECT TO A VOTE OF THE QUALIFIED VOTERS OF THE STATE, FOR THE CONSTRUCTION OF HIGHWAYS AND TO AMEND THE HIGHWAY TRUST FUND.

This act authorizes the issuance of $950 million of highway bonds if approved by the voters in November 1996. Of the $950 million, $500 million is for the urban loop projects of the Highway Trust Fund, $300 million is for the Intrastate System projects, and $150 million is for paving secondary roads in the State highway system. The bonds would be repaid from Highway

Trust Fund revenue allocated for the Trust Fund urban loops, the Intrastate system, and secondary road construction. The State last issued highway bonds in 1977; the amount of the bonds was $300 million. These bonds have been refinanced since 1977 but will be repaid at the end of 1997.

The bonds authorized by the act are State general obligation bonds. The State therefore pledges its taxing power to repay the bonds. The bonds must mature no later than December 1, 2013, the projected date for completion of all the Highway Trust Fund projects.

If issued, the revenue from the bonds would be appropriated to the Department of Transportation. $500 million would be used for urban loops around the following seven cities: Asheville, Charlotte, Durham, Greensboro, Raleigh, Wilmington, and Winston-Salem. $300 million would be used for the Intrastate System projects listed in G.S. 136-179. The remaining $150 million would be used to pave unpaved secondary roads on the basis of percentage of unpaved miles.

Revenue in the Highway Trust Fund is allocated as follows: 61.95% for Intrastate System Projects (these 32 projects are listed in the statutes); 25.05% for the seven designated urban loops; 6.5% for city streets; and 6.5%, plus $15.00 of the $35 title fee, for secondary roads. The $500 million in bonds for urban loops would be repaid from the 25.05% allocation for urban loops, the $300 million for Intrastate System projects would be repaid from the 61.95% allocation for these projects, and the $100 million in bonds for secondary roads would be repaid from the 6.5% allocation for secondary roads.

Additional funds could be applied to the Trust Fund urban loops without issuing bonds. Since the Trust Fund was established in October of 1989, the Department of Transportation has transferred $862.9 million from the Trust Fund to the Highway Fund for use on non-Trust Fund projects. This figure is 66.6% of the $1.29 billion Trust Fund revenue collected. If more revenue is applied to Trust Fund projects, less revenue would be applied to non-Trust Fund projects in the Transportation Improvement Program.

The Department of Transportation is almost exactly on schedule with the paving of secondary roads under the Trust Fund plan. Secondary roads are funded from both the Highway Fund and the Highway Trust Fund. An amount equal to 1 3/4 ¢ of the motor fuel tax is allocated for secondary roads from the Highway Fund and is distributed on the basis of the percentage of unpaved secondary roads in each county. Of the Trust Fund supplement, $68,670,000 is allocated annually on the basis of vehicular traffic and the rest on the percentage of unpaved secondary roads.

1996 Chapter 631 (House Bill 1100, Rep. Daughtry)

AN ACT TO IMPLEMENT THE RECOMMENDATION OF THE SCHOOL CAPITAL CONSTRUCTION STUDY COMMISSION TO AUTHORIZE THE ISSUANCE OF GENERAL OBLIGATION BONDS OF THE STATE, SUBJECT TO A VOTE OF THE QUALIFIED VOTERS OF THE STATE, TO PROVIDE FUNDS FOR GRANTS TO COUNTIES FOR PUBLIC SCHOOL CAPITAL OUTLAY PROJECTS, IN ORDER TO PROMOTE EQUITY IN LOCAL SCHOOL FACILITIES ACROSS THE

STATE AND TO ENABLE LOCAL GOVERNMENTS TO GIVE LOCAL PROPERTY TAX RELIEF, AND TO ENSURE THAT CERTAIN GRANTS FOR SCHOOL FACILITY NEEDS CONTINUE TO BE MADE IN ACCORDANCE WITH THE 1988 PRIORITY LIST.

This act authorizes the issuance of $1.8 billion of State public school bonds if approved by the voters in November 1996. It addresses the $6.2 billion backlog of school capital needs in this State that were identified by a needs assessment prepared for the General Assembly's School Capital Construction Study Commission. Of the $1.8 billion in bond proceeds, $30 million would be set aside for grants to small county school systems and the remaining $1.77 billion would be allocated on the basis of three different methods: 40% would be allocated to counties on the basis of average daily membership; 35% would be allocated on the basis of low wealth; and 25% would be allocated on the basis of high growth.

The State Board of Education would determine which of the small county school systems could receive a grant from the $30 million set aside for small school systems. A small county school system is one that was entitled to receive small school system supplemental funding under section 17.2 of Chapter 507 of the 1995 Session Laws, The Expansion and Capital Improvements Act of 1995. A county that receives a grant from the $30 million set aside does not have to match the allocation.

Counties would be required to match the allocations from the remaining $1.77 billion of bond revenue. The amount of the match is based on average daily membership and high growth. The required match is 3¢ times the county's 1995-96 ability to pay rank for each $1.00 of bond proceeds to be received under those allocations. This rank has been determined by the State Board of Education. Public school capital expenditures and the face amount of debt authorized or incurred for public school capital purposes since January 1, 1992, qualify for the match. With respect to debt authorized or incurred for public school facilities before January 1, 1992, amounts expended on or after January 1, 1992, for debt service for the debt qualify for the match. Any allocated funds that are not matched as required by January 1, 2003, will be redistributed among the counties that met the matching requirements.

The proceeds of the bonds must be used to construct or improve public school buildings, buy equipment needed for the newly constructed or improved school buildings, or buy land needed for the construction or improvement of the school buildings The facilitates financed by the proceeds must be used for instructional and related purposes and cannot be used for centralized administration facilities, maintenance facilities, trailers, relocatable classrooms, or mobile classrooms.

The bonds authorized by the act are State general obligation bonds. This means that the State pledges its taxing power in payment of the bonds. If issued, the debt service on the bonds would be one of the items to be paid by the State from its general revenues. The act prohibits the State Treasurer from issuing more than $450 million of the bonds in any twelve-month period. The debt service costs of State general obligation bonds, including the $1.8 billion of school bonds proposed by this act, will be less than 2.5% of General Fund revenues. The debt service payments incurred due to the issuance of bonds or notes under this act are removed from any applicable General Fund spending limit.

The act also dissolves The Commission on School Facility Needs, specifies that the last 11 local school administrative units on the priority list established in 1988 by the Commission shall

be funded from the Critical School Facility Needs Fund, and repeals the Fund 30 days after the last of those 11 projects are funded.

A recommendation of the School Capital Construction Study Committee.

1996 Chapter 646 (Senate Bill 1178, Sen. Cochrane)

AN ACT TO MAKE TECHNICAL AND CONFORMING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES AND TO ALLOW THE VOLUNTARY WITHHOLDING OF INCOME TAX FROM UNEMPLOYMENT COMPENSATION PAYMENTS.

This act makes numerous technical and clarifying changes to the revenue laws and related statutes. It also amends North Carolina's unemployment compensation law to allow the voluntary deducting and withholding of federal and State income taxes in accordance with federal law. The following table provides a section-by-section analysis of the proposed changes.

Section	Explanation
1.	Adds a caption to this subsection. The other subsections of this statute all have captions.
2.	Returns to the statute words that were inadvertently deleted in 1995.
3.	Repeals two obsolete statutes, imposing franchise taxes on pullman, sleeping, chair, and dining cars, and on express companies. Railroads pay general franchise and income taxes. There are no longer any express companies; if there were, they would pay the general franchise and income taxes.
4.	Returns the term "held" to the statute. In 1995, this sales tax exemption was revised to clarify that aquaculture is covered. The statute applies to animals or plants produced or held for commercial purposes; the 1995 rewrite accidentally removed "held".
5.	Repeals a provision that grants a sales tax exemption for works of art purchased pursuant to the art in State buildings program of Article 47A of Chapter 143B of the General Statutes. Because that program has been repealed, the sales tax exemption is no longer needed.
6.	Corrects an incorrect citation.
7-8.	Repeals obsolete administrative provisions in the gift tax provisions. These provisions have been superseded by Article 9 of Chapter 105 of the General Statutes. Article 9 of Chapter 105 contains the administrative provisions that apply to all taxes administered by the Secretary under that Chapter.
9.	Repeals the penalty of $10 a day for failure to file a privilege license tax return or franchise tax return, which is obsolete and redundant. The general penalties that apply to all taxes already apply to these taxes.
10.	Allows the Secretary of Revenue to assess a negligence penalty for reporting improper adjustments to federal taxable income to the same extent as for understating gross income or overstating deductions. In cases of substantial

income tax deficiencies, a 25% penalty is assessed if the deficiency was caused by understating gross income or by overstating deductions, both of which are determined on the federal return. The penalty provisions do not address deficiencies caused by improper adjustments to federal taxable income: adjustments that are made at the State level to determine North Carolina taxable income. This section provides that the same penalty applies whether the deficiency resulted from understating gross income, overstating deductions, or misstating adjustments. This section also repeals references to "this subchapter," which are obsolete. The term "tax" is now defined to include not only taxes under Subchapter I of Chapter 105 of the General Statutes but also taxes under Subchapters V and VIII and inspection taxes levied under Article 3 of Chapter 119 of the General Statutes. Finally, this section corrects spelling errors and modernizes the language of the statute.

11. Reinstates an extended period of time for making assessments for income tax due attributable to gains from involuntary conversions or from the sale of a principal residence parallel to federal law. The extension is necessary because the law allows the taxpayer a period of time to replace the converted property or the principal residence with similar property and thereby avoid recognition of the gain. If the taxpayer fails to replace the property, gain is recognized and the assessment may be made within three years after the Secretary is notified that the requirements for nonrecognition will not be met. Before 1989, North Carolina's individual income tax contained a similar provision; when the tax law was rewritten to "piggyback" the federal internal revenue code, that provision was inadvertently not picked up.

12. Corrects a citation. The federal statute to which this language refers has been renumbered.

13-14. Effective July 1, 1996, revises the split inventory tax reimbursement date from an August/April date to a September/April date and changes the 60%/40% split to a 50%/50% split. 1995-96 will be the only year in which the 60/40 August/April split reimbursement occurred. Because these sections become effective July 1, 1996, changing the 1995 languages does not affect the validity of what is being done in 1995-96.

15. Corrects an incorrect cross-reference.

16. Exempts certain property owners from filing annual applications for property tax exemptions. According to the Institute of Government, by administrative practice, annual applications are not required for exempt property of veterans' organizations, Masonic lodges and shrines, elks and similar fraternal organizations, or disabled veterans. In addition, the Institute of Government suggests that there is no reason to require annual applications for exemption of pollution control and recycling equipment because the exemption is automatic once the Department of Environment, Health, and Natural Resources determines that the equipment qualifies.

17. Corrects an inadvertent expansion of the use value law. Legislation enacted in 1995 codified existing interpretations of the use value law that allow a partner in a partnership or a member of a limited liability company to treat their share of land

owned by the entity as if they owned it directly. The legislation inadvertently included corporate-owned land under the same rule.

18. Removes redundant language that renders certain definitions circular. This section also modernizes the form in which the definitions are set out.

19. Restores omitted reference. Until 1995, funds in the Insurance Regulatory Fund could be used only to reimburse the General Fund for the Department of Insurance's expenses in regulating the insurance industry and other industries in this State. The statute was expanded in 1995 to include expenses of other State agencies in regulating the insurance industry and in carrying out certain duties under the Medical Care Data Act. The 1995 rewrite inadvertently omitted reference to other industries, in addition to insurance, that the Department of Insurance regulates. For example, the Department regulates bail bondsmen and collection agencies.

20. Removes an unnecessary reference to an effective date.

21. Existing law provides that certain local tax records are not public records; this section clarifies the corresponding provision under the Public Records Act.

22. Relocates a provision in the consolidated city-county act to the appropriate statute. The provision applies to all urban service districts but is currently located in a statute that applies only to certain urban service districts. A consolidated city-county is a county in which the largest municipality has been abolished and its powers, duties, rights, privileges, and immunities have been consolidated with those of the county. Other municipalities may also be abolished and consolidated with the county. A consolidated city-county may define urban service districts to finance services within the county at a higher level than in other areas of the county. These urban service districts may replace municipalities that have been abolished or may be created to serve areas that have population density, property valuation, and needs that justify a higher level of services than is provided in the county generally.

23. Amends existing local acts establishing beautification districts to clarify that the districts are special districts established under Article VII of the North Carolina Constitution and not special tax areas governed by Section 2(4) of Article V of the North Carolina Constitution. The constitution permits local acts establishing special tax districts but not local acts establishing special tax areas. The following local acts authorize beautification districts:

    1. Dare County, Duck District: SL83-991, SL93-610, and SL95-303.
    2. Dare County, Outer Banks District: SL89-363.
    3. Currituck County, Currituck Outer Banks District: SL89-400 and SL95-446. The former citation appears to be obsolete.
    4. Currituck County, Coinjock Canals District: SL89-703.
    5. Cabarrus County, Poplar Tent: SL91-685.

24. Clarifies the valuation date to be used for vehicles registered for property taxes under the annual system. In 1995, the General Assembly amended the law concerning the valuation of motor vehicles to eliminate the problem of the correct valuation date when an owner with a registration that expires December 31 renews

during the January grace period. In eliminating the problem for vehicles registered on a staggered system, the amendment created a problem for those registered on an annual system. In the latter case, it may result in the same valuation being used for two years. This act corrects this problem.

25. Amends North Carolina's unemployment compensation law to allow the voluntary deducting and withholding of federal and State income taxes in accordance with federal law. If an individual elects to have federal income tax withheld, then 15% of the payment will be withheld for federal income tax purposes. Fifteen percent is the lowest tax bracket at the federal level. If an individual elects to have State income tax withheld, then the individual may determine the amount to be withheld. This provision follows the general rule for voluntary withholdings of State individual income tax in G.S. 105-163.3(g). Although unemployment compensation has always been subject to income tax, the deducting and withholding of income tax from unemployment compensation payments has not been allowed because of the restrictive nature of the Unemployment Trust Fund. Congress enacted legislation to allow voluntary deducting and withholding of federal and state income taxes from the payments, effective for payments made on or after January 1, 1997.

26. Effective date.

1996 Chapter 647 (Senate Bill 1198, Sen. Kerr)

AN ACT TO CLARIFY THE REQUIREMENTS CONCERNING IMPORTS AND EXPORTS OF MOTOR FUEL UNDER THE "TAX AT THE RACK" LAWS AND TO MAKE OTHER ADJUSTMENTS TO THOSE LAWS.

This act adjusts the motor fuel tax collection system, known as "tax at the rack," that was enacted by the General Assembly in the 1995 Session and became effective January 1, 1996. To date, the 1995 legislation has increased motor fuel tax revenues as predicted. If collections continue at the same level for the remainder of the year, motor fuel tax revenue will increase by about $27 million dollars. The changes made by this act primarily clarify the tax treatment of exports, imports, blended fuel, and the inspection tax on kerosene and fill in gaps discovered in implementing the new law.

Imports: The act makes it clear that a separate importer license is not required if a person is licensed as a distributor and buys motor fuel for import only from an out-of-state supplier that collects the North Carolina tax. These tax-collecting suppliers are known as elective or permissive suppliers. Current law appears to require all importers to have an importer license regardless of other licenses they may have. The act also makes it clear that an importer that buys from an elective or permissive supplier is entitled to the same discount and "float" as if the fuel had been purchased inside the State.

Exports: The act makes it clear that an exporter is not required to have a license and treats licensed exporters differently than unlicensed exporters. An unlicensed exporter must pay tax to North Carolina at the North Carolina rate of tax and then apply for a refund when the fuel

is resold out-of-state. A licensed exporter can pay tax at the rate of the destination state of the fuel, thereby eliminating the need for a refund. If exported fuel is to be sold for an exempt use in the destination state, the licensed exporter can buy the fuel tax-free until July 1, 1997, when this privilege sunsets.

Blended Fuel: The act makes it clear that the tax due on fuel-grade ethanol is payable by the supplier of that fuel rather than by the person who buys it and makes the blend of ethanol and gasoline. This ensures that the tax is collected at the highest point in the distribution chain and parallels the collection of the tax on gasoline. The act also requires a blender to post a bond if the blender's average expected annual tax liability is at least $2,000. Prior law required a bond from blenders, so this change reinstates the requirement in a modified form.

Kerosene Inspection Tax: The act sets the due date for payment of the kerosene inspection tax at the date set for payment of motor fuel taxes and eliminates the need for most kerosene distributors to be licensed. It eliminates the need for a license for those distributors that buy kerosene only from in-State suppliers or from elective or permissive out-of-State suppliers. The license is not needed because the kerosene inspection tax is collected by suppliers at the rack along with the motor fuel tax. A kerosene distributor can choose to be licensed and get the payment deferral and float. The only kerosene distributors that must continue to be licensed are airlines that have spur pipelines for kerosene.

Other Changes: The act makes several other changes to the penalty and reporting provisions and adds a tax on unauthorized behind-the-rack transfers to parallel federal law. The penalty changes impose liability on a person who accepts delivery of motor fuel when the shipping document for the fuel shows a different destination state for the fuel. It adds as a Class 1 misdemeanor the failure of a supplier to give a distributor the deferred payment and float. It adds a civil penalty for refusing to allow a sample of motor fuel to be taken, for a terminal operator that has unaccounted for motor fuel losses, and for failure to file a motor fuel informational return.

A recommendation of the Revenue Laws Study Committee.

1996 Chapter 649 (Senate Bill 1239, Sen. Cooper)

AN ACT TO EXEMPT FROM SALES AND USE TAX FREE SAMPLES OF PRESCRIPTION DRUGS DISTRIBUTED BY THE MANUFACTURER.

This act creates a new sales and use tax exemption for prescription drugs that are distributed free of charge by the manufacturer. The sale of drugs bought with a prescription has been exempt from sales tax since 1937. The act defines the term "prescription drug" to be a drug that under federal law is required, prior to being dispensed or delivered, to be labeled with the following statement: "Caution: Federal law prohibits dispensing without prescription." This is the same definition used for the term in the Pharmacy Practice Act, G.S. 90-85.3. The act became effective upon ratification, June 21, 1996. The revenue loss to the General Fund is expected to be less than $400,000 a year.

Pharmaceutical companies often distribute free samples of prescription drugs to physicians to give to their patients. The prescription drugs that are distributed by free samples to the physicians are generally prescribed by them to their patients. Although the prescribed drugs are exempt from sales tax, the Department of Revenue has assessed use tax on the free samples.

The use tax, first enacted in 1939, is the complement of the State's sales tax and is imposed on the storage, use, or consumption in this State of tangible personal property. A pharmaceutical manufacturer is not liable for sales or use taxes when it purchases the ingredients used to manufacture the prescription drugs because the products are to be resold. However, when the manufacturer chooses to give the drug samples away rather than sell them, the Department has held the manufacturer liable for the use tax on the drugs.

Last year, Abana Pharmaceuticals, Inc. appealed an assessment of use tax on free samples of prescription drugs distributed to North Carolina physicians. The Tax Review Board reversed the decision of the Assistant Secretary for Legal and Administrative Services and concluded, based on the sales tax exemption for prescription drugs, that the free samples of prescription drugs distributed to physicians are exempt from use tax. The Department is appealing the Tax Review Board's decision. This act exempts the free samples from use tax prospectively. If the Court upholds the Board's decision, then the exemption will apply retroactively to Abana Pharmaceuticals, Inc., and arguably to all other similarly situated pharmaceutical companies.

The free distribution of prescription drugs by physicians is not subject to tax because the taxable use of the samples occurred prior to their distribution by the physician when the manufacturer provided the drugs to its salespersons. Hospitals and other purchasers of drugs without a prescription will still be subject to the sales and use tax. Nonprofit hospitals are entitled to a refund of any sales and use taxes paid under G.S. 105-164.14(b).

1996 Chapter 664 (House Bill 1147; Rep. Shubert)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS.

This act rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1995, to March 20, 1996. This change makes Code changes made during this period effective for any State taxes that are tied to the affected parts of the Code. The impact on the General Fund is expected to be insignificant.

Only four changes were made in the Code from January 1, 1995, until March 20, 1996. The first three of these were made in The Self-Employed Health Insurance Act (Public Law 104-7 (H.R. 831), enacted in 1995, and the last one was part of legislation enacted on March 20, 1996:

1. The individual income tax deduction for health insurance premiums paid by self-employed individuals was reinstated and made permanent. This includes premiums paid on behalf of the self-employed individual, a spouse, and dependents. The deduction is 30% of the qualifying premiums.
2. Code section 1033 was amended to make C corporations and certain partnerships ineligible to defer gain on an involuntary conversion under that section when replacement property is purchased from a related person. The change was effective for acquisitions after February 5, 1995.
3. Code section 1071 was repealed effective for sales or exchanges after January 16, 1995. That section allowed a taxpayer to treat the sale of a broadcast property as an

involuntary conversion if the sale was certified by the FCC as necessary to effectuate an FCC ownership and control policy.

4. The Code was amended to increase the amount of military pay that is exempt from income tax for certain commissioned officers serving in the peacekeeping efforts in Bosnia and Herzegovina, known as Operation Joint Endeavor, and to exclude exempt military pay from withholding requirements.

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code as it existed on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of bills like this. The answer to the question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law from year to year, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue losses. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, 2(1) of the Constitution provides in pertinent part that the "power of taxation... shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would... be invalidated as an unconstitutional delegation of legislative power."

A recommendation of the Revenue Laws Study Committee.

1996 Chapter 691 (Senate Bill 1179, Sen. Kerr)

AN ACT TO PROVIDE A GRACE PERIOD FOR MILITARY PERSONNEL TO LIST AND PAY PROPERTY TAXES AFTER DEPLOYMENT IN CONNECTION WITH OPERATION JOINT ENDEAVOR.

This act gives military personnel deployed in the peacekeeping effort in Bosnia and Herzegovina, known as Operation Joint Endeavor, 90 days after the end of their deployment to pay their 1995-96 or later property taxes without interest and to list property for the 1996-97 tax year or a later tax year. The act applies to those serving in or in support of the armed forces and armed forces reserves, including the national guard. Deployment of military personnel pursuant to Operation Joint Endeavor began December 4, 1995. Approximately two-thirds of the 25,000 military personnel deployed in Operation Joint Endeavor are from North Carolina bases.

Property taxes for the 1995-96 fiscal year would otherwise become delinquent if not paid by January 6, 1996, and interest would accrue at the rate of 2% for the first month and 3/4% each

month thereafter. The regular listing period for property taxes for the 1996-97 year ended on January 31, 1996. Failure to list is punishable as a misdemeanor and also subjects the owner of the property to a tax penalty equal to 10% of the tax due on the property. Automobiles are taxed on a staggered, year-round schedule, so the listing date and the date the taxes become delinquent may fall at any time during the year.

The act is effective retroactively as of December 4, 1995. Any interest and penalties assessed before it is enacted would be refunded.

G.S. 105-249.2 and G.S. 105-158 already provide income tax extensions for military personnel serving in a combat zone and income tax forgiveness for personnel who are killed while serving in a combat zone, to the same extent as federal law (sections 7508 and 692 of the Internal Revenue Code). Our Department of Revenue will automatically follow the federal law. Congress has enacted Public Law 104-117 providing that these sections of the Code apply to personnel deployed in connection with Operation Joint Endeavor.

A recommendation of the Revenue Laws Study Committee.

1996 Chapter 696 (House Bill 1094, Rep. Cansler)

AN ACT TO PROHIBIT THE IMPOSITION OF A FAILURE TO PAY PENALTY WHEN ADDITIONAL TAX DUE IS PAID AT THE TIME AN AMENDED RETURN IS FILED OR WITHIN THIRTY DAYS AFTER THE ADDITIONAL TAX WAS ASSESSED.

This act prohibits the imposition of a tax penalty for failure to pay in two circumstances. The first circumstance is when an additional tax is due with an amended return. The second circumstance is when a tax assessed by the Secretary of Revenue is paid within 30 days after it was assessed. The changes become effective for taxes due on or after January 1, 1997. The act should decrease General Fund revenues by no more than $100,000 a year.

The failure to pay penalty is 10% of the amount due, with a minimum penalty of $5.00. The Secretary of Revenue has the authority under G.S. 105-237 to waive the penalty. The decision of whether or not to waive a penalty is made on a case by case basis.

Currently, G.S. 105-236(4) requires the failure to pay penalty to be assessed whenever a tax is not paid when it was due. The due date for additional tax owed on an amended return is considered to be the date the original return was due. Consequently, any time a taxpayer files an amended return and pays additional tax with the return, the taxpayer is assessed the failure to pay penalty. Similarly, the due date for a tax assessed by the Secretary is considered to be the date the tax should have been paid without resort to an assessment. Consequently, any time a taxpayer is assessed for unpaid taxes, the taxpayer is also assessed the failure to pay penalty.

The changes made by this act make the "trigger" for the State failure to pay penalty the same as under federal law. A federal failure to pay penalty is not assessed when additional tax shown on an amended return is paid when the return is filed nor when a tax assessed by the Internal Revenue Service is paid within 10 days after the date on the notice of assessment and demand for payment. The penalty is not assessed under either federal or State law if a return is filed after an extension has been granted and the amount of tax paid when the extension was granted is at least 90% of the amount shown on the return.

In discussing this issue, the Revenue Laws Study Committee concluded that applying a failure to pay penalty to additional tax that is shown due on an amended return and is paid with the return discourages the filing of an amended return and does not make any allowance for reporting errors on tax reporting statements such as 1099 forms issued by banks and brokerage houses and W-2 forms issued by employers that result in the need for an amended return. The Committee further concluded that allowing a grace period after a tax is assessed before applying a failure to pay penalty would encourage prompt payment of the assessed taxes. Finally, the Committee concluded that applying a State failure to pay penalty in the circumstances described when no federal penalty applies is unnecessarily confusing and makes the State law on this topic harsher than the federal.

A recommendation of the Revenue Laws Study Committee.

1996 Chapter 741 (Senate Bill 1165, Sen. Kerr)

AN ACT TO ALLOW COUNTIES TO REMOVE VEHICLE REGISTRATION TAX BLOCK UPON FULL PAYMENT OF PROPERTY TAXES.

Since 1993, counties have collected property taxes on motor vehicles that are registered with the Division of Motor Vehicles on a revolving year-round basis. If the taxes are not paid within four months after the date they are due, the tax collector must send a list of the delinquent taxpayers and their vehicle identification number to the Division. The Division must refuse to renew the vehicle's registration until the taxpayer presents it with a paid tax receipt. This act will allow a county to remove the "block" when the delinquent taxes are paid, rather than require the taxpayer to present a paid tax receipt to the Division at the time the vehicle registration is renewed. To remove the "block", the county tax collector must certify to the Division that the delinquent taxes have been paid. The certification must be in the form and contain the information required by the Division.

This change was requested by the Division of Motor Vehicles. There are about four and one-half months between the time the "block" is electronically put on the vehicle's registration and the time the vehicle registration must be renewed. Taxpayers who pay the property tax within this window of time do not always remember to bring a paid tax receipt with them when they go to renew their vehicle registration. This situation upsets taxpayers who have paid their property taxes but cannot renew their vehicle registration until they find, or obtain a copy of, their paid tax receipt. This act will ease the burden on these taxpayers by allowing the county to remove the "block" at the time the tax is paid. The Division will decide what form the certification must take. The act does not require the counties to submit this certification to the Division because not all of the counties have the capacity to electronically communicate with the Division.

A recommendation of the Joint Transportation Oversight Study Committee.

1996 Chapter 747 (House Bill 1096, Rep. Cansler)

AN ACT TO TRANSFER RESPONSIBILITY FOR COLLECTING THE REMAINDER OF THE GROSS PREMIUMS TAX FROM THE

DEPARTMENT OF INSURANCE TO THE DEPARTMENT OF REVENUE AND TO CLARIFY RELATED STATUTES.

This act completes a transfer of responsibility from the Insurance Department to the Department of Revenue that was begun in 1995. The transfer that is completed is the responsibility of collecting the various insurance gross premiums taxes. The act becomes effective January 1, 1997. The act also makes technical and clarifying changes to the affected statutes.

The insurance gross premiums taxes are taxes based on the amount of insurance premiums that are paid or, for certain self-insurers, would have been paid during the year. They consist of a 1.9% premiums tax on for-profit insurance companies, a 0.5% tax on nonprofit companies, such as Blue Cross/ Blue Shield and Delta Dental, that provide hospital, medical, and dental coverage, a 2.5% tax on workers' compensation premiums and workers' compensation self-insurers, a 1.33% additional fire and lightning tax on property premiums for coverage of property other than motor vehicles and boats, and another 0.5% fire and lightning tax on all property premiums on business inside a municipality.

The 1995 General Assembly, in Chapter 360 of the 1995 Session Laws, transferred the responsibility of collecting the following gross premiums taxes from the Department of Insurance to the Department of Revenue: the general, for-profit 1.9% tax, the 2.5% tax on workers' compensation premiums but not on workers' compensation self-insurers, and the non-profit 0.5% tax. It did not transfer collection of the 2.5% tax on workers' compensation self-insurers or either of the additional fire and lightning taxes. This act transfers collection of those three taxes effective January 1, 1997. The Department of Revenue is already collecting the additional 1.33% fire and lightning tax pursuant to an agreement with the Department of Insurance.

A workers' compensation self-insurer is an employer that carries its own workers' compensation risk or pools its risk with other employers that belong to the same trade or professional association as the employer. The 2.25% gross premiums tax applies to the amount of premiums the employer would be charged if the employer acquired workers' compensation insurance from an insurance company. Two Department of Insurance employees currently administer collection of this tax based on payroll information supplied by employers. The act transfers one position from the Department of Insurance to the Department of Revenue.

Twenty-five percent of the additional 1.33% fire and lightning tax and all of the additional 0.5% fire and lightning tax are used for special purposes. The rest of the gross premiums taxes are credited to the General Fund. Twenty-five percent of the 1.33% fire and lightning tax is credited to the Volunteer Fire Department Fund in the Department of Insurance. The 0.5% fire and lightning tax is credited to the Department of Insurance and is disbursed to local fire fighters' relief funds.

This act does not affect the collection of three special taxes on insurance companies. The three taxes are: a tax on surplus lines insurance, a tax on risk retention by a company chartered in another state, and a tax on unlicensed insurers.

Surplus lines insurance is a market of last resort for commercial property and liability risks. The tax is collected not from insurance companies but from the brokers who place the coverage. The tax is based on information sent in by these brokers, who are called surplus lines licensees, and must be reconciled based on the surplus lines market and other technical factors. The tax is levied on a quarterly basis and is not similar in administration, calculation, or collection to the gross premiums tax.

For risk retention groups chartered in other states, there is a quarterly tax similar to the surplus lines tax. There are only about 35 risk retention groups chartered in other states; their total tax represents less than $250,000 a year. Existing law requires any State-chartered risk retention group to be licensed as an insurance company; it would, therefore, be covered by the general gross premiums tax collected by the Department of Revenue. In addition, insurers of purchasing groups already pay the gross premiums tax to the Department of Revenue like any other insurance company. If a purchasing group purchases coverage from a surplus lines insurer, however, the surplus lines tax applies to the premiums.

Unlicensed insurers are a special category of insurers, allowed to provide coverage only if the insured makes an affidavit that the insured could not obtain insurance from licensed insurers after diligent search. A detailed report and this affidavit must be filed by the person who procures the insurance within 30 days after the insurance is procured and the tax is due at that time. This tax is closely tied to regulation of the insurers and its collection is not similar to the gross premiums tax.

1996 First Extra Session

Chapter 1, 1996 First Extra Session (Senate Bill 2, Sen. Kerr)

AN ACT TO IMPLEMENT A ZERO UNEMPLOYMENT INSURANCE TAX RATE FOR 1996 FOR ALL EMPLOYERS WITH A POSITIVE EXPERIENCE RATING, ALLOW EMPLOYERS WITH A NEGATIVE RATING TO QUALIFY FOR THE ZERO RATE BY PREPAYING TAXES, REDUCE THE RATE FOR NEW EMPLOYERS FROM ONE AND EIGHT-TENTHS PERCENT TO ONE AND TWO-TENTHS PERCENT, ALLOW NEW EMPLOYERS TO QUALIFY SOONER FOR REDUCED RATES, AND AUTHORIZE A LEGISLATIVE RESEARCH COMMISSION STUDY.

This act continues the General Assembly's past efforts to reduce the amount of money in the Unemployment Insurance Fund and to avoid taxing for a surplus. The act reduces unemployment taxes in three ways and benefits almost every employer:

1. POSITIVE RATED EMPLOYERS. -- Assigns a one-year zero unemployment insurance tax rate for all positive rated employers. Approximately 115,000 employers have positive rated accounts. The tax reduction enacted in 1995 allowed approximately 15% of these employers to earn a zero tax rate. This act gives the remaining 85% of positive rated employers a zero tax rate for 1996, saving them $135 million. In the absence of any change in circumstances, an employer will resume paying unemployment taxes in 1997 at the same rate the employer would have paid taxes in 1996 if the act had not enacted.
2. NEGATIVE RATED EMPLOYERS. -- Gives overdrawn employers additional time to make contributions to their accounts so that they may qualify for the zero tax rate in 1996. An employer may make voluntary contributions in order to have a lower tax

rate the following year. Generally, voluntary contributions must be made before July 31. It is estimated that 1/2 of the 7,000 employers with a negative rating may contribute $18 million and receive $41 million in tax relief, for a net savings of $23.5 million.

3. NEW EMPLOYERS. -- Permanently reduces the tax rate for new employers from 1.8% to 1.2%. Nationally, the most common tax rate for new employers is 2.7%. This act also reduces the period of time required for new employers to achieve lower rates from 3 years to 2 years. This would save an estimated 24,000 employers who are not rated $5 million for 1996. The rate was last reduced in 1994 from 2.25% to 1.8%.

The Employment Security Commission estimates that the unemployment tax reduction in this act will save employers between $140 million and $163.5 million for 1996. The act became effective January 1, 1996.

The act authorizes the Legislative Research Commission to study issues relating to the State's Employment Security Law. The Commission did not report to the 1996 Session of the General Assembly. The act directs the Commission to report to the 1997 General Assembly. The act also made a change in the State law so that it conforms with the federal law. Under State law, an employer could not move to a lower rate unless it had a chargeable account for more than 13 consecutive months immediately preceding the date for calculating the employer's tax rate. The act changed the requirement of "13 consecutive months" to "at least 12 calendar months". The latter requirement focuses attention on cumulative employment rather than consecutive quarters. The change removed a technical barrier that would have kept a handful of employers from moving from the standard rate to a reduced rate.

The General Assembly cut the unemployment tax rate in 1993, 1994, and 1995. Despite these cuts, the North Carolina Trust Fund in Washington, from which unemployment benefits are paid, was slightly more than $1.5 billion. It is estimated that this act would reduce the State Unemployment Insurance Trust Fund balance from about $1.5 billion to $1.29 billion in 1996. Without the act, the Trust Fund balance was expected to be reduced to only $1.43 billion in 1996. The 1996 balance in the fund is far more than needed to meet the State's unemployment compensation obligations. North Carolina has the fifth highest Trust Fund balance of any state in the nation relative to the amount of benefits paid out of the Trust Fund in prior years.

In 1995, the General Assembly reduced unemployment insurance taxes by an average of 23% for rated employers with a positive credit balance, set a zero tax rate for employers with credit ratios of 5.0 or over, and reduced from 60% to 50% the percentage of annual average wages used to calculate the taxable wage base. In 1994, the General Assembly reduced unemployment insurance taxes by an average of 38% for rated employers with a positive credit balance and by 20% for employers who are not yet rated. In 1993, the General Assembly enacted legislation that reduced the unemployment insurance tax rate by 30% for rated employers with a credit balance in their unemployment insurance tax account for any calendar year in which the balance in the Unemployment Insurance Trust Fund equals or exceeds $800,000,000 as of the preceding August 1. The 1994 tax cut legislation increased this percentage reduction to 50%. In 1992, the General Assembly suspended an additional unemployment tax collected from employers and credited to the Employment Security Commission Reserve Fund, which bolsters the State Unemployment Insurance Trust Fund.

In 1994, the General Assembly also increased benefits payable to claimants by restoring the pre-1983 formulas for computing unemployment benefits. The North Carolina average weekly

benefit amount paid to claimants for unemployment benefits is the highest in the southeast at $188.00. North Carolina also pays the highest maximum weekly benefit amount in the southeast at $297.00. Compared to the 11 largest states in the United States, North Carolina's average benefit ranks 7th and its maximum benefit ranks 4th.

Unemployment tax contributions are paid by employers on a quarterly basis and deposited into the State Unemployment Insurance Trust Fund. After deducting any refunds payable from the Fund pursuant to G.S. 96-10(f), the money is deposited with the secretary of the treasury of the United States to the credit of this State's account in the Unemployment Trust Fund. Funds in the State's account earn interest that is also credited to the account. As money in the State's account is needed to pay benefits, it is transferred to the State and credited to the benefits account of the State's Unemployment Insurance Fund to be used to pay benefits to people who lose their job through no fault of their own. Federal law prohibits transfer of or payment of refunds from money in the Trust Fund.

1995 Tax Law Changes

Prepared by Cynthia Avrette, Sabra J. Faires, and Martha H. Harris

1995 Chapter 4 (Senate Bill 13, Sen. Kerr)

AN ACT TO FURTHER REDUCE EMPLOYERS' UNEMPLOYMENT INSURANCE TAXES.

This act reduces unemployment insurance taxes, effective January 1, 1995, in the following ways:

1. It lowers the taxable wage base for the tax by changing the formula used to compute the base. It reduces from 60% to 50% the percentage of annual average wages used to calculate the taxable wage base. This change reduces the 1995 wage base from 13,500 to 12,300. This tax reduction benefits all employers and will save existing employers as well as new businesses an estimated $36 to $40 million a year.
2. It reduces the tax rates that apply to rated employers with a positive unemployment insurance account balance. This reduction is estimated to save employers about $15 million a year.
3. It sets a zero tax rate for employers with credit ratios of 5.0 or over. Under current law, the lowest rate is 0.01%. This change is estimated to save employers about $130,000 a year.

Taken together, the changes cut unemployment insurance taxes by about 23% and save employers more than $51 million a year. Unemployment tax contributions are paid by employers on a quarterly basis and deposited into the State Unemployment Insurance Trust Fund. After deducting any refunds payable from the Fund pursuant to G.S. 96-10(f), the money is deposited with the secretary of the treasury of the United States to the credit of this State's account in the Unemployment Trust Fund. Funds in the State's account earn interest that is also credited to the account. As money in the State's account is needed to pay benefits, it is transferred to the State and credited to the benefits account of the State's Unemployment Insurance Fund to be used to pay benefits to people who lose their job through no fault of their own. Federal law prohibits transfer of or payment of refunds from money in the Trust Fund.

The General Assembly has reduced unemployment insurance taxes several times in recent years. In 1994, the General Assembly reduced the taxes by an average of 38% for rated employers with a positive credit balance and by 20% for employers who are not yet rated. A rated employer is an employer who has had a chargeable account for more than 13 consecutive months immediately preceding the date for calculating the employer's tax rate.

In 1993, the General Assembly enacted legislation that reduced the unemployment tax rate by 30% for rated employers with a credit balance in their unemployment insurance tax account for any calendar year in which the balance in the Unemployment Insurance Trust Fund equals or exceeds $800,000,000 as of the preceding August 1. This percentage reduction in the tax rate was increased to 50% in the 1994 legislation as part of the tax rate reduction for employers who have a credit balance in their unemployment insurance tax account. In 1992, the General Assembly suspended an additional unemployment tax collected from employers and credited to the

Employment Security Commission Reserve Fund, which bolsters the State Unemployment Insurance Trust Fund. Despite these cuts, the North Carolina Trust Fund in Washington, from which unemployment benefits are paid, is close to $1.5 billion.

Before enactment of the 1994 legislation, North Carolina's average unemployment tax rate, 0.5%, was already the 45th lowest in the nation. Since the enactment of the 1995 act, North Carolina's average unemployment tax rate is the lowest in the nation. The 1.8% starting rate for new employers is now the second lowest rate in the nation. The North Carolina average weekly benefit amount paid to claimants for unemployment benefits is the highest in the southeast at $171.41. North Carolina also pays the highest maximum weekly benefit amount in the southeast at $289.00.

1995 Chapter 7 (House Bill 80, Rep. Tallent)

AN ACT TO REPEAL THE SPECIAL USE TAX ON CONSTRUCTION EQUIPMENT BROUGHT INTO THE STATE.

This act repeals the special use tax that was levied in 1957 on vehicles, machinery, tools, and other equipment brought into North Carolina for use in construction. The repeal became effective July 1, 1995. This act was recommended by the Revenue Laws Study Committee. The Department of Revenue suggested this issue as a study topic for the committee because the tax generated little revenue, was difficult for taxpayers to understand and comply with, was difficult to administer, and no longer served its original purpose of protecting North Carolina contractors from out-of-state competition. The repeal is expected to result in a General Fund revenue loss of no more than $20,000 a year.

The special use tax applied to contractors who do work in more than one state, purchase equipment in a state other than North Carolina for use in the other state, and then bring the equipment to this State for use in construction. The regular sales and use tax would not apply to this equipment because the equipment was not purchased in this State and was not purchased for use in this State. The special use tax rate for an item other than a motor vehicle was the regular use tax rate of 4% State and 2% local. The special use tax rate on a motor vehicle was the same as the highway use tax rate, which is 3% subject to the applicable maximums.

To compute the special use tax due on an item of equipment, a contractor had to multiply the sales price of the equipment by the percentage of the equipment's useful life that was expected to be spent in North Carolina. The contractor then had to apply the applicable special use tax rate and subtract as a credit the proportional amount of sales and use tax paid on the equipment in another state. When filing a return, the contractor had to list each piece of equipment separately, along with the equipment's original purchase price, the amount of sales and use tax paid when the equipment was purchased, the state to which the tax was paid, the equipment's estimated useful life, and the period of time the equipment is expected to be in North Carolina.

Until 1989, the special use tax did not allow a credit for taxes paid in another state; accordingly, the tax operated as a protectionist measure to give North Carolina construction companies a competitive advantage over companies from other states. In 1989, the Revenue Laws Study Committee determined that without a credit for taxes paid in another state, the special use tax probably violated the federal constitution's interstate commerce clause. In addition, the committee found that retaliatory laws in neighboring states created a burden on North Carolina companies seeking to do construction business in those states. In accordance with the committee's

recommendation, the 1989 General Assembly enacted the special use tax credit for regular sales and use taxes paid to other states and to local governments in other states.

Of our neighboring states, Virginia, South Carolina, and Tennessee have similar special use taxes on construction equipment brought into the state. Georgia does not have a similar tax. The border states that have a similar special use tax allow a credit for regular sales and use taxes paid in another state. Repeal of North Carolina's special use tax will therefore not affect North Carolina companies doing business in the border states; the companies will continue to receive credit for North Carolina sales and use taxes paid.

1995 Chapter 17 (Senate Bill 104, Sen. Cochrane)

AN ACT TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

This act makes a number of unrelated technical and clarifying changes to various revenue statutes. The changes are described below by section:

Section	Explanation
1.	Adds a missing period in the phrase "G.S".
2.	Deletes a duplicate word.
3-4.	Clarifies that a taxpayer's federal taxable income, used as a starting point for North Carolina corporate and individual income tax, is to be determined in accordance with the Internal Revenue Code.
5.	Requires a taxpayer to add to State taxable income the amount of any federal estate tax paid on an item of income in respect of a decedent that is included in federal taxable income. Under current law, taxpayers are allowed an income tax deduction for both State inheritance tax paid on an item of income in respect of a decedent and federal estate tax paid on the same item of income in respect of a decedent. Allowing a State deduction for a federal tax is contrary to the tax structure of the State and is the result of an oversight. This proposal corrects this oversight by repealing the deduction for federal estate tax but retaining the deduction for State inheritance tax paid on an item of income in respect of a decedent. Income in respect of a decedent is income to which a person was entitled when the person died. An example of an item of income in respect of a decedent is the gain from an installment sale made by the decedent before death. This income is subject to inheritance tax upon the death of the decedent as part of the decedent's property. An income tax deduction is allowed for the inheritance tax paid on an item of income in respect of a decedent to prevent double taxation.
6.	Changes the word "section" to "subsection."
7.	Makes a conforming change to the use tax statutes. In 1993, upon recommendation of the Revenue Laws Study Committee, the General Assembly enacted legislation providing that a retailer's sales tax license becomes void if, for a period of 18 months, the retailer does not file any returns showing taxable sales. This section makes the same change to the corresponding retail use tax license.

8. Corrects two incorrect cross-references and reorganizes and modernizes the current law allowing certain entities refunds of sales and use taxes.

9. Rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1994, to January 1, 1995. Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State tax law previously tracked federal law. This update has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law. The franchise tax, gift tax, highway use tax, inheritance tax, insurance company premiums tax, and intangibles tax also determine some exemptions based on the provisions of the Code. This year, because the federal government has not enacted any changes to the Code that affect our statutes, the update has no substantive effect and is merely a technical change.

10. Restores the correct time period for filing a petition for administrative review with the tax review board. This time period was inadvertently shortened in a rewrite of the statute enacted in 1993.

11. Adds three new exceptions to the prohibition against disclosing confidential tax information. The State's Tax Secrecy Act, G.S. 105-259, prohibits the disclosure of a taxpayer's tax information except in specified circumstances. The act fails to provide that the Department of Revenue may share a copy of a tax return with the taxpayer who filed it. This section corrects this problem in three ways: it allows the Department to provide a copy of a tax return (1) to the taxpayer who filed it, (2) to the legal representative of the estate of the taxpayer if the taxpayer is incompetent or deceased, or (3), in the case of a return filed by a partnership, a corporation, an estate, or a trust, to a "person having a material interest" as determined under the Code. A person having a material interest would be, for example, a partner in the partnership that filed the return, a corporate agent designated by the corporation's board of directors or CEO, a corporate shareholder with more than 1% of the outstanding stock, a shareholder in a Subchapter S corporation, the executor of an estate, or the trustee of a trust.

11.1 Gives a person who files an amended return after receiving a federal determination the same amount of time to ask for a refund that the Department of Revenue has to assess additional taxes. A federal determination is a change or correction made by the IRS to a federal tax that affects the person's liability for State income, gift, or withholding taxes. Last session, the General Assembly (in Chapter 582) revised and consolidated the provisions concerning assessments of tax following a federal determination and did not make a corresponding change to the statute of limitations for refunds.

11.2 Makes a conforming change to correspond to the change made by Section 11.1. The section deletes language in the statute that describes the procedure for claiming a refund that conflicts with the statute of limitations set in G.S. 105-266(c).

12. Adds a missing hyphen.

13. Restores a missing portion of a cross-reference.

13.1 Makes it clear that a motor carrier that operates in interstate, as opposed to intrastate, commerce must file a road tax report for each quarter whether or not the carrier drove in North Carolina during the quarter for which the report is due. The Department now requires these carriers to file quarterly reports but the statute can be construed as requiring them to file a report only if they drove in North Carolina during that quarter. When a motor carrier registers with the Department, the carrier must state on the application whether the carrier is an intrastate or an interstate carrier.

14-16. Consolidates, codifies, and conforms various local acts that authorize certain counties to acquire and improve public school property on behalf of their local school boards. These existing local acts authorize the named counties to finance school construction projects through lease-purchase. This section eliminates the confusion of having numerous similar local acts scattered throughout the Session Laws and provides that clarifying language that was included only in some of the more recent local acts will apply equally to all affected counties.

17. Chapter 681 of the 1993 Session Laws revised the State Ports Tax Credit. Because that tax credit expires for tax years ending after 2/28/96, the revisions to the credit need to expire at the same time.

18. Repeals a Session Law that duplicates another Session Law; both laws revised G.S. 105-241.1(e).

19-22. Clarifies that refunds of local meals taxes must be made only to certain nonprofit and government entities to the same extent as State sales tax refunds. The following local governments are currently authorized to levy a meals tax: Charlotte/Mecklenburg County, Dare County, Wake County, Cumberland County, and the Town of Hillsborough.

23. Repeals two 1971 acts that gave Nash County and Edgecombe County a special 1‰¢ local option sales tax as an alternative to the 1‰¢ local option sales tax enacted for all counties. These local acts provided that each county could levy or repeal the tax only if the other took the same action. These alternate local options were never exercised and are no longer viable because of subsequent changes in the State and local sales tax laws.

24. Provides that the sections of the act are effective upon ratification unless otherwise specified. Section 1 became effective July 1, 1995; Sections 5 and 9 became effective for taxable years beginning on or after January 1, 1995; and Section 11.1 and Section 18 became effective January 1, 1995. All other sections became effective March 23, 1995, the date of ratification.

Recommended by the Revenue Laws Study Committee.

1995 Chapter 21 (Senate Bill 220, Sen. Martin of Pitt)

AN ACT TO PROVIDE COUNTIES WITH INFORMATION TO ENABLE THEM TO VERIFY CLAIMS FOR REFUNDS OF THEIR LOCAL SALES AND USE TAX.

This act gives counties access to information regarding local sales tax refunds paid to nonprofit corporations and governmental entities, beginning July 1, 1995. Under prior law, counties did not have access to this information because the local sales tax is collected by the State and the tax secrecy statute prevents the Department of Revenue from disclosing information about individual taxpayers. Without information about local sales tax refunds, counties were not able to audit claims for refunds against them. The counties had to rely on the Department of Revenue to audit the claims, but the Department does not have enough resources to provide the level of audit some counties wished to provide for themselves.

Under G.S. 105-164.14, nonprofit corporations and certain governmental entities may seek a refund of State and local sales taxes they pay on their purchases. To do so, these entities must file a written request for refund with the Department of Revenue and name the counties where the purchases were made. The Secretary of Revenue deducts the claimed refunds of local sales taxes from tax revenue distributed to the counties. Errors in identifying the correct county in refund claims occur because the local sales tax applies to the county in which the retailer is located, not the county in which the purchaser is located. Some counties believe that entities located in one county who pay sales tax to another county are claiming the refund against the county in which they are located, rather than against the county in which they made the purchase.

To obtain information concerning local sale tax refunds under this act, a county must request the information in writing from the Secretary of Revenue. The Secretary has 30 days to provide the chair of the board of county commissioners with a list of each nonprofit corporation or governmental entity that received a refund of at least $1,000 of that county's local taxes within the last 12 months. The county can then use this list to identify entities whose refund claims the county may wish to audit. Upon the written request of the county, this act requires an entity that has received a refund to provide the county with a copy of the request for refund, along with supporting documentation requested by the county to verify the request. If an entity determines that a refund it has received has been charged to the wrong county, it must file an amended return for the refund. The amended return will enable the Department to make the appropriate adjustments in the subsequent quarterly distribution of local sales tax revenue.

This act specifies that the information disclosed to the county is not a public record and may not be disclosed except in accordance with G.S. 153A-148.1, which governs the disclosure of local tax records. Section 2 of the act amends the tax secrecy statute to allow the Department to furnish the county with the required tax refund information.

During the first year the act is in effect, the Department of Revenue will have 90 rather than 30 days to provide a county the requested information. This extra time is allowed because the Department will have to compile the information manually. After the first year, it is anticipated that the new Integrated Tax Administration System will enable the Department to compile the information electronically.

1995 Chapter 41 (Senate Bill 8, Sen. Kerr)

AN ACT TO REPEAL THE INTANGIBLES TAX AND TO REIMBURSE LOCAL GOVERNMENTS FOR THEIR RESULTING REVENUE LOSS.

This act repeals the intangibles tax on stock, bonds, mutual funds, and accounts receivable effective for the 1995 tax year (taxes due April 15, 1996). The repeal will result in a tax reduction of $124 million a year for individuals and corporations. This act dedicates $93 million in recurring General Fund revenue for distribution to local governments annually to reimburse them for their revenue loss due to the repeal of the tax. A total of $95 million of State funds will be distributed to local governments for the intangibles tax because $2 million that was formerly deducted from the tax to pay for the Local Government Commission and similar local cost items will instead be deducted from local sales taxes distributed to local governments.

The intangibles tax was a State-levied property tax of 25¢ per $100 of value of stocks, bonds, notes, mutual funds, certain accounts receivable, and interests in foreign trusts. Accounts with investment brokers and securities dealers were exempt from the tax on accounts receivable. Until 1985, the tax applied also to cash on hand, money on deposit, and accounts with investment brokers and securities dealers. These portions of the tax were repealed in 1985; at that time, the General Assembly dedicated recurring General Fund revenues for distribution to local governments to reimburse them for their revenue loss due to the repeal. The amount of the reimbursement was indexed to grow automatically at the same rate as State personal income.

Before 1937, the intangibles tax was levied by local governments. It was converted in 1937 to a State-levied tax with 50% of the revenue to be shared with local governments. The local share was increased to 75% in 1941 and to 100% in 1957. In 1991, in order to balance the State budget, the Governor cut local governments' share of the tax and their reimbursement for the parts of the tax repealed in 1985. Later that year, the General Assembly restored this cut but froze the distribution and reimbursement amounts, so that the State would share in the tax revenue as it grew above the frozen amount. In 1993, the General Assembly enacted legislation that would have frozen the State's share of the tax and restored future growth to local governments beginning in 1995. That legislation never went into effect, however, because the tax was repealed by this act.

By 1995, the State's share was approximately $31 million and the local share was approximately $93 million. By dedicating State revenue to reimburse local governments for their share in future years, this act requires the State to absorb the entire $124 million loss from the General Fund. Because the reimbursement to local governments is frozen and will not grow, local governments must absorb the loss of expected revenue growth that would have been restored to them in 1995 had the tax not been repealed.

The reimbursements enacted in 1985 and the new reimbursement provided in this act are allocated among the counties in proportion to the amount of tax collected in each county in the last year the tax that is being reimbursed was in effect. The amounts allocated are then divided among the county and its municipalities in proportion to the total amount of ad valorem taxes levied by each during the fiscal year preceding the distribution. The distributions will be made each August, beginning in 1995.

The repeal of the intangibles tax by this act was precipitated by litigation challenging the constitutionality of the tax on stocks and stock mutual funds. The stock tax statute exempted a proportion of corporate stock equal to the percentage of the corporation's business that is conducted in North Carolina. Thus, stock of a corporation that did 100% of its business in North Carolina was 100% exempt from the intangibles tax. This exemption was known as the "taxable percentage" deduction. In 1993, in Fulton Corp. v. Justus, the North Carolina Court of Appeals

ruled that the taxable percentage deduction violates the interstate commerce clause of the federal constitution. The court invalidated the deduction effective for the 1994 tax year but, before the decision could go into effect, it was overturned by the North Carolina Supreme Court in December 1994. The North Carolina Supreme Court agreed with the State's argument that the stock tax and the taxable percentage deduction are both constitutional. The case is now on appeal in the United States Supreme Court. The plaintiffs are arguing that the entire stock tax is unconstitutional and should be invalidated by the court. If the 1995 General Assembly had not repealed the tax, taxpayers, the State, and local governments would have remained uncertain as to whether the court's decision would prohibit collection of the stock tax for the 1995 tax year, authorize collection of the tax but prohibit allowance of the taxable percentage deduction for the 1995 tax year, or leave the entire stock tax structure in place.

1995 Chapter 42 (House Bill 2, Rep. Daughtry)

AN ACT TO REDUCE INCOME TAXES FOR THE LOWER AND MIDDLE-INCOME PEOPLE OF NORTH CAROLINA BY INCREASING THE PERSONAL EXEMPTION DEDUCTION BY FIVE HUNDRED DOLLARS AND BY ALLOWING A TAX CREDIT OF SIXTY DOLLARS PER DEPENDENT CHILD.

This act, as amended by Chapter 370 of the 1995 Session Laws, provides income tax relief only to low and middle income taxpayers. The act will reduce the number of taxpayers by between 260,000 and 280,000 people. The tax relief provided by the act will result in a General Fund revenue loss of $235 million in fiscal year 1995-96 and $244.1 million in fiscal year 1996-97. The act makes the following changes in State individual income taxes:

1. Increases each personal exemption the taxpayer may claim by $250 for the 1995 taxable year if the taxpayer has an adjusted gross income less than the applicable amount listed below:

Married filing jointly	$100,000
Head of Household	80,000
Single	60,000
Married filing separately	50,000

2. Increases each personal exemption the taxpayers may claim by an additional $250 for the 1996 taxable year if the taxpayer has an adjusted gross income of less than the applicable amount stated above.
3. Allows a tax credit of $60 per dependent child for taxpayers with adjusted gross incomes of less than the applicable amount stated above.

Increase in personal exemptions

Prior to this act, the State personal exemption amount of $2,000 had not been changed since 1989, when North Carolina began using federal taxable income as the starting point in calculating North Carolina taxable income. The State personal exemption is not indexed for inflation, as is the federal personal exemption. Therefore, to calculate North Carolina taxable

income, a taxpayer must add back to federal taxable income the difference between the lower North Carolina personal exemption amount and the higher federal personal exemption amount.

The effect of this act is to require a lower amount to be added back each year for taxpayers whose adjusted gross income is less than the stated amounts. For the 1995 taxable year, the amount to be added back is $250 less than under the current law. For example, the federal personal exemption amount for the 1995 taxable year is $2,500. Under this act, the State personal exemption amount will be $2,250, rather than $2,000, for taxpayers whose adjusted gross income is less than the stated amounts. For taxpayers whose adjusted gross income is equal to or more than the stated amounts, the State personal exemption amount will remain at $2,000. For the 1996 taxable year and subsequent taxable years, the amount to be added back is $500 less than under the current law for taxpayers whose adjusted gross income is less than the stated amounts.

Credit for dependent children

The $60 tax credit for dependent children also applies only to taxpayers whose adjusted gross incomes are less than the stated amounts. The credit is in addition to the federal and state tax credits or exclusions for child care expenses. The new credit is allowed for each dependent child for whom the eligible taxpayer could take a federal personal exemption under section 151(c)(1)(B) of the Internal Revenue Code. That Code section allows an exemption for each dependent child who either is less than 19 years old at the end of the taxable year or is a student and is less than 24 years old at the end of the taxable year. A child is a son, stepson, daughter, or stepdaughter. A dependent child is a child over half of whose support was provided by the taxpayer.

1995 Chapter 46 (Senate Bill 120, Sen. Kerr)

AN ACT TO PROVIDE UNIFORM TAX TREATMENT OF NORTH CAROLINA OBLIGATIONS AND FEDERAL OBLIGATIONS.

This act provides that capital gains from the transfer of all State, local, and federal bonds will be subject to uniform State income tax treatment; it does this by repealing special State tax exemptions for capital gains from transfers of certain State and local bonds. The act becomes effective July 1, 1995, and applies to bonds issued on or after that date. It does not affect the tax treatment of capital gains on bonds issued before July 1, 1995.

This act was recommended by the Revenue Laws Study Committee to address an inconsistency in the State income tax treatment of capital gains from various bonds. The interest earned on federal bonds is exempt from State income tax, as is the interest earned on North Carolina State and local bonds. If the holder of a bond transfers it, there may be a capital gain. Gain from the transfer of federal bonds is subject to State income tax. Gain from the transfer of most North Carolina State and local bonds is also subject to State income tax. There are some State and local bonds, however, for which the bond law provides a State income tax exemption for gain from their transfer.

The Attorney General's Office notified the Department of Revenue, the State Treasurer, and the Revenue Laws Study Committee that allowing a tax exemption for gain from some North Carolina bonds but not for gain from federal bonds may violate the federal constitutional doctrine of intergovernmental tax immunity. In order to avoid constitutional problems, the State must treat federal and North Carolina bonds alike. To achieve uniform tax treatment for bonds, the General

Assembly had the choice of either repealing the special capital gains exemption for a limited number of bonds or granting a tax exemption for capital gains from all federal bonds and all North Carolina State and local bonds. The Revenue Laws Study Recommended the former option. Repealing the special exemption is expected to cause only a small revenue increase, for three reasons: (1) there are relatively few bonds affected, (2) North Carolina bonds are not generally traded for capital gains, and (3) some bondholders are probably not aware of the tax exemption and are not currently claiming it. The other option, exempting the capital gain from all bonds, would have caused a General Fund revenue loss that was expected to be of greater magnitude because it would involve a much larger group of State and local bonds as well as all federal bonds. The amount of the potential loss to the General Fund was unknown due to a lack of data.

In addition to repealing the special capital gains exemption for a select group of State and local bonds, this act makes other two changes. First, it clarifies that bonds are not exempt from franchise tax or inheritance and gift tax; some bond statutes are ambiguous on this point, but the statutes have not been interpreted as granting a special exemption from these taxes. Second, in Section 1, it repeals a 1955 law authorizing the creation of business development corporations and allowing them to issue bonds. This law has never been used and is now obsolete.

This act is not expected to affect the marketability of State or local bonds, whether outstanding or issued in the future. The tax changes in the act do not apply to any bonds issued before July 1, 1995. Future issues of State and local bonds in the following categories will be subject to the same capital gains tax treatment as other bonds:

- Bonds of the Global TransPark Authority, a State agency
- Bonds of the Nash-Edgecombe merged school administrative unit
- Revenue bonds of the Higher Education Facilities Finance Agency, a State agency
- Revenue bonds of The University of North Carolina system
- Revenue bonds of the State Education Assistance Authority, a State agency
- Bonds of the N.C. Housing Finance Agency, a State agency
- Bonds of the N.C. Agricultural Finance Authority, a State agency
- Bonds of the N.C. Medical Care Commission, a State agency
- Revenue bonds of public hospital authorities created by local governments
- Refunding bonds issued by the State
- Bonds of the N.C. State Ports Authority, a State agency
- Bonds of local government housing authorities
- Bonds issued by municipalities or joint municipal power agencies to finance electrical power projects
- Special obligation bonds issued for solid waste capital projects by local governments or by the N.C. Solid Waste Management Capital Projects Agency, a State agency
- Bonds issued by local government housing agencies

1995 Chapter 50 (House Bill 122, Rep. Arnold)

AN ACT TO EXPAND THE ALLOWABLE USES OF TRANSPORTER PLATES, TO ALLOW OWNERS OF SALVAGE VEHICLES TO RETAIN TITLE TO THE VEHICLES, AND TO EXEMPT OUT-OF-STATE UTILITY VEHICLES THAT ARE USED IN CERTAIN EMERGENCY OPERATIONS FROM THE VEHICLE REGISTRATION AND ROAD TAX REQUIREMENTS.

This act makes several unrelated changes to the laws concerning motor vehicles. The changes expanding the allowable uses of transporter plates only for special mobile equipment and providing a highway use tax exemption and a reduced title fee for the transfer of a salvage vehicle when the transfer was from an insurance company to the person who owned the vehicle when it became a salvage vehicle were recommended by the Revenue Laws Study Committee. The changes made by this act are expected to reduce the Highway Trust Fund by approximately $171,600 a year and the Highway Fund by approximately $32,400 a year.

Transporter plate changes

The act allows transporter plates to be used on vehicles in two new circumstances. The first circumstance is to drive special mobile equipment from the manufacturer of the equipment to the facility of the special mobile equipment dealer, from one facility of the dealer to another, or from the dealer to the buyer of the equipment. The second circumstance is to move a motor vehicle that is owned by a business and is a replaced vehicle offered for sale; under current law only a utility may obtain a transporter plate to move a replaced motor vehicle. The changes are effective upon ratification.

A transporter plate is a type of commercial license plate. A transporter plate is issued on a calendar-year basis, can only be used for a purpose that is listed in the statutes, and can be transferred from one vehicle to another during the year as long as the vehicle to which it is transferred is driven for one of the authorized business purposes. It differs from a dealer plate in its restrictions on use. A vehicle bearing a dealer plate can be driven for any purpose as long as the driver is an officer or an employee of the dealer. The fee for a transporter plate is $10.

Under the law prior to the enactment of this act, a special mobile equipment dealer had to use a dealer plate to drive special mobile equipment on the highway. The number of dealer plates available to a dealer is based on the dealer's sales volume. A dealer in special mobile equipment might sell fewer than 12 pieces of special mobile equipment in a year, and based on that sales volume, may be entitled to only one dealer plate. This part of the act alleviates this problem by allowing the special mobile equipment dealer to use either transporter plates or dealer plates for the three limited transport purposes.

Special mobile equipment is a class of vehicles; the class consists of vehicles that have permanently attached special equipment whose purpose is to perform off-road work. Truck cranes and well-drilling rigs are two types of special mobile equipment. Special mobile equipment is driven on the roads only to get to off-road jobs. It is subject to sales tax rather than highway use tax and pays a flat annual registration fee of $20 rather than a fee based on weight.

Salvage vehicle changes

The act eliminates the double title transfer now required when a vehicle is wrecked to the extent it is a salvage vehicle and the owner wants to keep the vehicle. Under the prior law, the owner had to transfer the vehicle to the insurer and the insurer had to then transfer the vehicle back to the owner. A salvage vehicle is one on which a claim has been paid that exceeds 75% of the fair market value of the vehicle, as determined by the National Automobile Dealers' Association Pricing Guide Book or another pricing guide approved by the Commissioner of Motor Vehicles. In place of the double transfer, the act requires the owner of the salvage vehicle to sign a form acknowledging the status of the vehicle as a salvage vehicle. This change became effective July 1, 1995.

For those salvage vehicles retained by their owners, eliminating the double title transfer means that the insurer will not have to pay the $10.00 fee that applies to transfers of salvage vehicles to an insurer and that the owner will not have to pay the highway use tax and $35 title fee that applies to transfers of titles in general. The insurer and the owner will not have to pay these fees because there will be no title transfer that triggers their payment.

Utility vehicles

The act exempts utility vehicles that are licensed in another state and are used in this State in an emergency to restore utility service from two different registration requirements. The two requirements from which the vehicles are exempt are (i) the requirement to register with the Division of Motor Vehicles and pay an apportioned license fee and (ii) the requirement to register with the Department of Revenue and pay a road tax based on the number of miles driven in the State. These changes were recommended to the 1994 General Assembly by the Joint Legislative Utility Review Committee. They passed the House of Representatives during the 1994 biennium as part of a larger bill, but the larger bill did not pass the Senate. These changes become effective October 1, 1995.

1995 Chapter 89 (Senate Bill 245, Sen. Hartsell)

AN ACT TO AUTHORIZE THE OPENING OF EMPTY LOCK BOXES OF DECEDENTS OUTSIDE THE PRESENCE OF THE CLERK OF SUPERIOR COURT, AS RECOMMENDED BY THE GENERAL STATUTES COMMISSION.

This act, which was recommended by the General Statutes Commission, establishes a procedure to allow a decedent's safe deposit box to be opened outside the presence of the Clerk of Superior Court if the box is empty. Under current law, financial institutions managing safety deposit lock boxes may not open a box after the death of the box holder unless someone from the clerk of court's office is present. When the box is opened, the clerk makes an inventory of its contents and furnishes a copy to the Secretary of Revenue for inheritance tax purposes. This requirement serves no purpose in cases in which the box is empty.

Under this act, if the personal representative of an estate believes the box may be empty, the representative may request the clerk of court to authorize the box to be opened outside the presence of an employee of the clerk of court. With this permission, the box may be opened in the presence of a representative of the financial institution, who must certify that the box is empty. No notice is sent to the Department of Revenue. If the box is not empty, the box must be closed

immediately and reopened only in the presence of the clerk. This act becomes effective October 1, 1995, and applies to the estates of decedents dying on or after that date.

1995 Chapter 109 (House Bill 213, Rep. Bowie)

AN ACT CONCERNING THE COLLECTION OF DELINQUENT TRUCK PENALTIES AND ASSESSED TAXES AND THE CONSOLIDATION OF THE VARIOUS PROVISIONS CONCERNING OVERWEIGHT VEHICLES.

This act clarifies the law concerning the authority of a law enforcement officer of the Division of Motor Vehicles (DMV) to detain a truck until any delinquent penalties or taxes previously assessed against the truck's owner for motor carrier vehicle violations or motor carrier taxes have been paid. It also consolidates the various provisions concerning the weighing of trucks and eliminates inconsistencies in these provisions. The act becomes effective October 1, 1995. It is one of the recommendations of the Joint Legislative Transportation Oversight Committee to the 1995 General Assembly.

G.S. 20-96 authorizes the detention of a truck "with an overload as described in this section or which is equipped with improper registration plates, or the owner of which is liable for any overload penalties or assessments applicable to the vehicle and due and unpaid for more than 30 days." This language can be construed to mean that a vehicle can be detained only when it has an overload, has improper registration plates, or has an overdue overweight penalty assessed against that particular truck. However, in practice, a DMV law enforcement officer can detain a truck when the officer finds that the truck's owner has previously been assessed a penalty for a motor carrier vehicle violation and payment of the penalty is overdue. Penalties are due upon assessment and become delinquent 30 days after the date of assessment. Motor carrier vehicle violations include registration, equipment, and overweight violations. A DMV officer can also detain a truck when the officer finds that the trucks' owner is delinquent in paying motor carrier road taxes due under Article 36B of Chapter 105 of the General Statutes. This act rewrites G.S. 20-96 to make it clear that the authority applies to all motor carrier vehicle violations and to delinquent motor carrier taxes.

The act also consolidates the statutory provisions on the weighing of trucks and eliminates inconsistencies in those provisions. Currently, G.S. 20-96 has several inconsistencies. First, it states that overweights are subject only to axle-group penalties, and not single-axle or tandem-axle weight limit penalties. Second, it states that overweights on light-traffic roads are subject only to single-axle or tandem-axle penalties, and not axle-group penalties. Both of those statements conflict with G.S. 20-118. Third, it refers to a tax that was repealed years ago.

1995 Chapter 329 (Senate Bill 496, Sen. Blackmon)

AN ACT TO ALLOW LOCAL GOVERNMENTS TO FORGO COLLECTION OF AD VALOREM TAX BILLS WHEN THE ORIGINAL PRINCIPAL AMOUNT DUE IS UNDER FIVE DOLLARS.

This act gives the governing body of a taxing unit that collects its own taxes the authority to adopt a resolution directing the tax collector not to collect property taxes when the amount of tax due is less than the amount set in the resolution. The amount set may not exceed $5.00 and should be the amount it would cost the taxing unit to send a tax bill. All of the taxes and fees due on a tax receipt or on a motor vehicle property tax notice, including those taxes and fees of other units for which it collects taxes, are included in determining whether the amount due is less than the threshold set by the taxing unit.

Under current law, the governing body of a taxing unit may permit its tax collector to treat small underpayments of taxes as fully paid and to not refund small overpayments of taxes unless the taxpayer requests a refund. The statute defines "small" as $1.00 or less. This act expands that concept, by allowing taxing units to eliminate billing and collection of minimal taxes up to $5.00. As with small underpayments and small overpayments, the tax collector must keep a record of the taxes by taxpayer and amount and must report the amount of taxes to the governing body as part of the settlement for the year.

The act is effective July 1, 1995, which is the beginning of the 1995-96 tax year. To authorize the tax collector not to collect minimal taxes for a tax year, the governing body must adopt a resolution to that effect by June 15 preceding the first day of the tax year (July 1). The resolution remains in effect for subsequent tax years until amended or repealed by another resolution of the taxing unit. Because this act was ratified June 26, 1995, it gives taxing units an extension until June 30, 1995, to adopt a resolution for the 1995-96 tax year.

The General Assembly had earlier ratified as Chapter 24 of the 1995 Session Laws an act that allowed counties not to bill for motor vehicle property taxes when the amount due on the tax bill is less than the cost of preparing and sending the bill. That act was repealed by this act because this act will cover motor vehicle property taxes as well as all other property taxes. If a county adopted a resolution under Chapter 24 before its repeal, the resolution will be effective under this act.

1995 Chapter 340 (House Bill 123, Rep. Arnold)

AN ACT TO REVISE THE CONTROLLED SUBSTANCE EXCISE TAX.

This act revises the State excise stamp tax on controlled substances to bring it in line with a 1994 decision of the United States Supreme Court. The act becomes effective October 1, 1995, and is expected to have a minimal negative impact on excise stamp tax collections.

On June 6, 1994, the United States Supreme Court ruled that Montana's tax on illegal drugs was unconstitutional. In Montana v. Kurth Ranch, 114 S.Ct. 1937 (1994), the court held that the tax was in fact a punishment, not a true tax, and thus violated the Fifth Amendment's double jeopardy clause that protects against multiple punishments for the same offense. The court acknowledged that a tax is not necessarily a punishment if it is at a high rate and is designed to deter unlawful conduct; the court also acknowledged that an unlawful activity may be taxed. The court found that Montana's tax crossed the line from a tax to a punishment because, in addition

to being on an illegal activity, at a high rate, and designed to deter undesirable behavior, the tax was conditioned on the commission of a crime and was exacted only after the taxpayer was arrested and the taxed drugs were no longer in the taxpayer's possession. The court based its decision on its finding that under Montana law, a taxpayer has no obligation to file a return or pay tax unless and until the taxpayer is arrested for illegal possession of the drugs. Four Justices dissented from the court's decision.

North Carolina levies an excise stamp tax on the possession of illegal drugs. The tax is at the rates of $3.50 for each gram of marijuana, $200 for each gram of any other drug sold by weight, and $400 for each 10 dosage units of any drug not sold by weight. Seventy-five percent (75%) of the tax proceeds received due to an assessment of the tax are distributed to the law enforcement agency that conducted the investigation leading to the assessment; the remaining tax proceeds are credited to the General Fund.

The Attorney General's Office reviewed the opinion in Montana v. Kurth Ranch and concluded that North Carolina's drug tax law is not unconstitutional because it differs from the Montana law in one key respect: the North Carolina law applies whether or not a person is arrested for a drug violation. North Carolina law requires a person who acquires more than a minimum amount of illegal drugs to pay the tax within 48 hours and place stamps on the drugs to show that the tax has been paid. In other respects the North Carolina law is similar to Montana's: it is at similar rates, it is designed to deter undesirable behavior, and it applies only to drugs possessed in violation of the criminal law.

The act makes the following changes to North Carolina's drug tax law to remove any aspects of the tax that could indicate that the tax is a punishment rather than a true tax designed to raise revenue; these changes were recommended by the Revenue Laws Study Committee on the advice of the Attorney General's Office and the Controlled Substance Tax Division of the Department of Revenue.

1. It clarifies that the purpose of the tax is to raise revenue for law enforcement and for the General Fund rather than to provide a second punishment.
2. It revises the tax rates so that they do not, in general, exceed the market value of the various illegal drugs. The act imposes a lower tax rate on low-street-value drugs, which include steroids, depressants, stimulants, and hallucinogenic substances. It also imposes a lower tax rate on stems and stalks of marijuana that have been separated from other parts of the plant. Separated stems and stalks are usually the debris left over from harvesting marijuana and are of much less value in this form. The failure of Montana's drug tax to provide lower tax rates for lower value drugs was a key factor in the court decision finding the tax unconstitutional.
3. It provides that the tax applies to any actual or constructive possession of drugs, with an exemption for a person who is authorized by law to possess the drugs. Currently, the tax applies to anyone who possesses drugs in violation of criminal drug statutes.
4. It repeals the special law that makes failure to pay the drug tax a felony. Other tax laws are covered by the general tax penalty provisions of G.S. 105-236, which criminalize only intentional conduct. Under the act, the drug tax is subject to the same penalty provisions as other tax laws.
5. It reduces the civil penalty for failure to pay the drug tax from 100% of the tax due to 50% of the tax due, so it will be the same as the penalty for failure to pay the tobacco

tax. The 100% drug tax penalty has been imposed but, as a practical matter, is virtually never collectible.

6. It repeals the tax on counterfeit controlled substances, which do not have the same value as true controlled substances.
7. It clarifies that the proceeds of the tax may be distributed more frequently than quarterly.

1995 Chapter 349 (House Bill 768, Rep. Sexton)

AN ACT TO PROVIDE THAT THE HIGHWAY USE TAX TRADE-IN ALLOWANCE APPLIES WHEN TWO CARS ARE EXCHANGED FOR ONE ANOTHER.

This act specifies in the statutes that an exchange of motor vehicles between two parties is a sale under the highway use tax. An exchange between two parties has always been considered a sale under the highway use tax, so the act does not change the law on this subject. The act became effective July 1, 1995. Because the act does not change the law, the act has no fiscal impact.

The definition of "sale" in G.S. 105-164.3(15) that applies to the highway use tax specifically includes an exchange of property. The Division of Motor Vehicles, which administers the tax, has followed this definition and treated exchanges as sales.

If a transaction is a sale under the highway use tax, the amount on which the highway use tax is computed is reduced by the amount of any trade-in allowance. The amount on which highway use tax is computed is the market value of the vehicle. If a seller of a vehicle is not a car dealer, the market value of the vehicle is presumed to be the wholesale book value of the vehicle. The amount allowed as a trade-in allowance, however, is not based on market value. The amount allowed as a trade-in allowance is the amount determined by the seller to be the value of the vehicle.

The effect, therefore, of treating a two-party exchange of vehicles as two sales is to allow a trade-in allowance to be applied to each sale, thereby reducing the amount on which highway use tax is computed. If each seller gives a trade-in allowance equal to the market value (wholesale book value) of the vehicle owned by the seller at the time of the exchange, no highway use tax will be due because the market value of the vehicle less the trade-in allowance will be zero.

The highway use tax was enacted in 1989 to provide revenue for the Highway Trust Fund. It replaces the former sales tax on motor vehicles. The highway use tax is 3% of the retail value of a motor vehicle, subject to both a minimum tax that applies until July 1, 1996, and to a maximum tax. The minimum tax, which is repealed effective July 1, 1996, is $40.00. The maximum tax is $1,500 for automobiles and other vehicles that weigh no more than 26,000 pounds and is $1,000 for vehicles that weigh more than 26,000 pounds. The highway use tax is payable when a certificate of title is issued for a motor vehicle. The tax is in addition to the $35.00 fee that is charged for the issuance of a title and the $10.00 or $20.00 fee that is charged for the transfer or issuance of a license plate.

1995 Chapter 350 (House Bill 1058, Rep. McComas)

AN ACT TO MAKE CONFORMING CHANGES TO THE TAX LAW IN LIGHT OF FEDERAL LAW PREEMPTING STATE REGULATION OF MOST MOTOR FREIGHT CARRIERS.

This act amends the property tax laws and the corporate income tax laws to preserve the existing property tax and income tax treatment of for-hire motor carriers of property. Because of changes in federal law, these motor carriers did not fit the statutory definitions that applied prior to the effective date of this act. This act became effective June 29, 1995. The act is not expected to have a fiscal impact.

A federal act passed in the fall of 1994 prohibits federal or state regulation of rates, routes, and service of trucking companies, other than those that carry household goods. Until this prohibition, the North Carolina Utilities Commission regulated intrastate trucking companies and the Interstate Commerce Commission (ICC) regulated interstate trucking companies. The North Carolina Utilities Commission can no longer regulate these intrastate trucking companies, and the ICC's regulation of interstate trucking companies has been greatly reduced.

The state property tax and income tax definitions of trucking companies that were in effect when the 1994 federal act became effective referred to trucking companies as being regulated by the Utilities Commission or the ICC. Because of the change in the scope of regulation, these definitions no longer applied. The act therefore modifies the definitions to ensure that the change in regulation does not inadvertently cause a change in the way the trucking companies pay property and income taxes.

Under the State property tax laws, the "rolling stock" (vehicles) of all intrastate trucking companies that have two or more terminals in the State and of all interstate trucking companies that do business in the State is valued by the Department of Revenue rather than by the county assessor of the counties in which the company's terminals are located. The value of the vehicles is then allocated among the counties in which the terminals are located in proportion to the percentage (tonnage) of freight handled at each terminal during the preceding year. This method of taxation avoids the problem of multiple counties trying to tax the same property.

If the trucking company does business outside the State, the Department of Revenue must determine the share of the company's property that is taxable in this State and will therefore be allocated among the counties. This determination is made on the basis of mileage in this State. Similarly, under the corporate income tax, the income of a trucking company that does business in more than one state is allocated among those states based on the number of vehicle miles traveled in each State.

1995 Chapter 360 (House Bill 994, House Appropriations Committee)

AN ACT TO IMPLEMENT THE RECOMMENDATIONS OF THE COMMITTEE ON APPROPRIATIONS BY CHANGING VARIOUS REVENUE STATUTES.

This act contains a variety of changes that concern either insurance taxes and fees or the payment of administrative costs under the Setoff Debt Collection Act. The changes were

recommended by the House and Senate Appropriations Committees as part of the biennial State budget and were revised by the House and Senate Finance Committees.

Section 1 of this act transfers the responsibility of collecting part of the premiums tax imposed on insurance companies from the Department of Insurance to the Department of Revenue, effective January 1, 1996. This responsibility will cost the Department about $100,000 a year, with additional one-time costs of about $200,000 in the 1995-96 fiscal year. These amounts were appropriated to the Department of Revenue in the expansion budget, Chapter 570 of the 1995 Session Laws.

Under G.S. 105-228.5, insurance companies pay taxes based on their gross premiums instead of paying corporate income and franchise taxes. In addition, employers that carry their own workers' compensation risk, known as self-insurers, and employers that pool their workers' compensation liabilities pay the gross premiums tax on premiums they pay or on the premiums that would be charged to cover the risk. The workers compensation premiums tax rate is 2.5% of gross premiums and the general premiums tax rate is 1.9% of gross premiums. The tax rate on receipts of nonprofit companies providing hospital, medical, and dental coverage is 0.5%. Insurers that provide fire and lightning coverage pay an additional tax at the rate of 1.33% of gross premiums for fire and lightning coverage provided on property other than vehicles and boats.

Section 1 of this act provides that collection of the 2.5% tax on workers' compensation self-insurers and the additional 1.33% tax on fire and lightning coverage remains with the Department of Insurance. Collection of the 2.5% tax on other workers' compensation premiums and of the rest of the premiums tax is transferred to the Department of Revenue. This section also reorganizes and modernizes the language of the gross premiums tax statutes, clarifies that interest on installment overpayments of gross premiums tax is calculated the same way as interest on installment overpayments of corporate income tax, and deletes from Article 2 of Chapter 97 of the General Statutes, the Workers' Compensation Act, redundant and inaccurate provisions about the collection of the tax on workers' compensation insurance.

Section 2 of this act eliminates the insurance audit and examination fees for insurance companies, HMOs, medical corporations, and guaranty associations, effective July 1, 1995. Under current law, when the Insurance Department audits an insurer or a rate organization, it charges the cost of the audit to the company as a fee. The act repeals these fees. Consequently, the costs of the audits will be paid for by the insurance regulatory charge as part of the costs of regulating the insurance industry. The Fiscal Research Division estimated that the amount of fee revenue that will be replaced by regulatory charge revenue is $4.5 million a year.

Section 3 of this act expands the purposes for which the insurance regulatory charge is to be used, effective July 1, 1995, to include costs incurred by other departments as well as by the Department of Insurance in regulating the insurance industry. The insurance regulatory charge, which is a percentage of gross premiums tax liability, was imposed on insurance companies in 1991 in order to make the Department of Insurance receipt-supported and thereby eliminate General Fund support of that department. Its use was limited to paying the cost to the Department of Insurance of regulating the insurance industry and other industries as well as the State's costs incidental to the Department of Insurance's costs. Section 3 removes the limitation that costs payable from the charge must be incurred by the Department of Insurance; this change is designed to include in the costs that are paid from the charge the costs of the Attorney General's Office in providing counsel on insurance matters. To reflect the broader application of the insurance regulatory charge, Section 3 also changes the name of the fund to which the charge is credited

from the Department of Insurance Fund to the Insurance Regulatory Fund and specifies that this fund is to be administered by the Office of State Budget and Management.

Section 4 of this act changes the administrative reimbursement under the Setoff Debt Collection Act by excluding child support collections from payment of the administrative costs, effective January 1, 1996. The Setoff Debt Collection Act is the law under which the Department of Revenue retains an income tax refund of an individual who owes money to a claimant agency and sends the refund to the claimant agency to be applied to the debt. The Department pays for this program by deducting its administrative costs from amounts collected on behalf of all claimant agencies. The Department of Human Resources and county agencies are claimant agencies that use the debt setoff program to collect child support arrearages pursuant to the federal Child Support Enforcement Program. This section provides that the Department of Revenue will no longer deduct its administrative costs from amounts collected for child support arrearages, but it will continue to receive the same amount of reimbursement as under the current law by spreading among other claimant agencies the portion of the Department's administrative costs now deducted from child support collections. Thus, a greater percentage of other debts collected will be deducted for administrative costs. The Fiscal Research Division has estimated that approximately $300,000 a year in child support setoff administrative costs will be shifted from child support collections to other setoff collections, resulting in an increase in the percentage deducted from those other collections from the current 7% to about 14% of the amount collected.

Section 5 of this act repeals a provision in the 1995 continuation budget that made certain budget reductions contingent on enactment of this act. Because this act has been enacted, the contingency language in the budget is not needed.

1995 Chapter 370 (House Bill 142, Rep. C. Wilson)

AN ACT TO MAKE TECHNICAL CHANGES RELATING TO THE REPEAL OF THE INTANGIBLES TAX AND TO OTHER TAX LAWS.

Sections 1 through 3 of this act make clarifying and technical changes to acts enacted during the 1995 session. Sections 4 through 6 make clarifying changes and technical corrections to laws enacted in previous sessions.

Sections 1 and 2 make changes to Senate Bill 8, Intangibles Repeal/Hold Harmless, enacted as Chapter 41 of the 1995 Session Laws. Section 1 inserts a cross-reference to the Department's costs of administering the intangibles tax reimbursement. The effect of the cross-reference is to maintain the Department's current authorization to deduct from local government revenues its costs of administering the intangibles tax distributions. Section 2 makes technical wording changes so that the various intangibles tax reimbursement allocations will read the same. These sections became effective July 1, 1995; the Fiscal Research Division reported that they have no fiscal impact.

Section 3 of this act makes a clarifying change to the personal exemption increase enacted by House Bill 2, Income Tax Cut/Child Care Credit as Chapter 42 of the 1995 Session Laws. The additional language added by the increased exemption was slightly ambiguous and might have been misconstrued to require an inflation adjustment only if the taxpayer's adjusted gross income was below the thresholds set in the act. The inflation adjustment—an addition to taxable

income—is required of all taxpayers, however. This section becomes effective for the current tax year and has no fiscal impact.

Section 4 of this act clarifies the amount of a deduction a corporation may take as a charitable contribution for donating land for conservation purposes when it also takes a credit for the donation under G.S. 105-130.34. That statute allows a credit of 25% of the value of the land, up to a maximum credit of $25,000. This section clarifies that a deduction is allowed for the excess value of the land over the value used in computing the credit, rather than the excess value over the amount of the credit itself. For example, if the value of the land is $120,000, the credit is 25% of that value, $30,000, capped at $25,000. Because the credit is based on the first $100,000 of land value, a deduction is allowed only for the remaining $20,000 of value. Before clarification by this section, the current provision could have been construed to allow a deduction in this circumstance for $95,000, which is the excess value of the land over the amount of the credit allowed. This section becomes effective for the current tax year and could result in a minor increase in General Fund tax revenue.

Sections 6 and 7 of this act correct errors in the jobs tax credit statutes that reverse the proper order of the county rankings based on population. The correct order is highest to lowest instead of lowest to highest. These sections are effective upon ratification and have no fiscal impact.

1995 Chapter 390 (Senate Bill 943, Sen. Kerr), as amended by Sections 32.1 and 32.2 of Chapter 523

AN ACT TO ADDRESS MOTOR FUEL TAX EVASION AND TO IMPROVE THE ADMINISTRATION OF THE MOTOR FUEL TAXES BY CHANGING THE POINT OF TAXATION OF GASOLINE AND DIESEL FUEL, TO REPEAL THE MINIMUM HIGHWAY USE TAX, AND TO STRENGTHEN THE ENFORCEMENT OF THE ROAD TAX PAID BY MOTOR CARRIERS.

This act makes several significant changes to the motor fuel tax laws and to the highway use tax laws. The changes become effective at various times as explained. The changes are expected to generate net annual additional Highway Trust Fund revenue of $10 million when all the changes have become effective.

First, the act establishes a uniform system for the collection of the per gallon motor fuel excise taxes on gasoline and clear diesel. Under the system, fuel is taxed when it is removed at a "rack" at a motor fuel terminal. Under current law, gasoline is taxed on its first sale after the rack and clear diesel is taxed when it is sold to a person who is going to either resell it at a service station to operate highway vehicles or store it for subsequent use in highway vehicles the person owns. Parts I, II, and III of the act make this change, effective January 1, 1996.

Second, the act repeals the $40 minimum highway use tax that is payable when the title to a vehicle is transferred, effective July 1, 1996. Part IV of the act makes this change.

Third, it establishes a minimum mileage presumption for motor carriers that drive in the State but do not report mileage to the State and imposes increased penalties for motor carriers

that understate mileage to the State by more than 25%. Part V of the act makes these changes, effective October 1, 1995.

Uniform System For Motor Fuel Tax Collection

Part I of the act repeals the current laws on the collection of motor fuel excise taxes and replaces them with new laws on this subject. The new laws move the point of collection for the per gallon motor fuel excise taxes to the terminal, thereby eliminating opportunities for tax evasion and making the system easier to administer. North Carolina is particularly vulnerable to motor fuel tax evasion because its motor fuel tax rate is 21.95¢ a gallon compared to 16¢ a gallon in South Carolina and 7.5¢ a gallon in Georgia.

The new system will eliminate opportunities for tax evasion by reducing the availability of non-tax-paid fuel purchased in this State and by having a large part of the tax on imported fuel collected by out-of-state suppliers. The proposed system will be easier to administer because it will parallel the federal system as well as South Carolina's and the number of taxpayers will be greatly reduced.

Part II of the act provides for transitional provisions to facilitate the change to the new system. Part III of the act makes conforming changes to various statutes that refer to motor fuel laws. The following outline summarizes the distinctions between the act and the current law:

Subject	Chapter 390	Current Law
Taxing Point	Removal from terminal	Gasoline—first sale Diesel—last sale before highway use
Taxpayer	Distributor; supplier is trustee and will collect tax from distributor and remit to state	Distributor, who pays directly to state
Tax Due Date	22nd of each month; licensed distributor can pay supplier the same date that supplier must pay state	Gasoline—20th Diesel—25th
'Tare' Allowance	Licensed distributor gets 1% on taxable gasoline and diesel plus quarterly hold-harmless	2% on first 150,000 1 ½% on next 100,000 1% on excess over 250,000 and tare applies to exempt government sales; Diesel distributor does not get tare
Supplier Allowance	1/10 of 1%, with $8,000 monthly maximum	None. Supplier does not collect from distributors and remit to the state
Tax on Imports	Reported and paid by distributor	Paid mainly by elective or permissive supplier;

Subject	Chapter 390	Current Law
		Paid in part by one of three types of importers: bonded, occasional, and tank wagon Import verification number required
Bond Amounts	$2,000,000 for refiner, supplier, terminal operator, and bonded importer. Two times monthly liability with minimum of $2,000 and maximum of $250,000 for distributor, occasional importer, tank wagon importer, blender	Gasoline: two times monthly liability with minimum of $2,000 and maximum of $125,000 Diesel: two times monthly liability with minimum of $500 and maximum of $125,000
Exemptions	Same as current law	Exports, sales to federal government, sales to state, sales to local boards of education
Refunds	Motor fuel delivery vehicle, accidental mixes, lost diesel fuel, and clear diesel bought by marinas; otherwise, the same	Exempt government sales, exports, cities and counties, a few nonprofits, taxis, cement mixers, garbage compactors, and a few other vehicles that have power equipment, and off-highway uses
Enforcement	Same shipping document plus import verification number	Destination state shipping document

Repeal of Minimum Highway Use Tax

Part IV of the act repeals the minimum $40 highway use tax, effective July 1, 1996. Section 30 of that Part repeals the tax. Sections 31, 32, and 33 are conforming changes to references to the minimum tax. Section 34 adjusts revenue between the Highway Fund and the Highway Trust Fund to ensure that the Highway Trust Fund does not lose revenue.

The highway use tax was enacted in 1989 as part of the Highway Trust Fund legislation to provide revenue for that Fund. The highway use tax replaces the former sales tax on motor vehicles. The highway use tax is 3% of the retail value of a motor vehicle, subject to both a minimum and a maximum tax. The minimum tax is $40.00. The maximum tax is $1,500 for automobiles and other vehicles that weigh no more than 26,000 pounds and is $1,000 for vehicles that weigh more than 26,000 pounds.

The highway use tax is payable when a certificate of title is issued for a motor vehicle. The tax is in addition to the $35.00 fee that is charged for the issuance of a title and the $10.00 or $20.00 fee that is charged for the transfer or issuance of a license plate. Thus, the minimum combined tax and fees payable when a certificate of title is transferred as the result of the sale of a motor vehicle is $85.00 if the new owner transfers a license plate to the vehicle and is $95.00 if

the new owner obtains a new license plate for the vehicle. These figures are the result of adding the $40.00 tax, the $35.00 title fee, and either the $10.00 or $20.00 fee for a license plate.

The $40.00 minimum tax is regressive and does not distinguish between motor vehicles valued at less than $1,300. The transfer of a boat trailer, for example, that has a value of $150 triggers the payment of at least $85.00 in taxes and fees while the transfer of a car valued at $1,300 triggers payment of the very same amount of taxes and fees.

Since the enactment of the tax, the Revenue Laws Study Committee and the Division of Motor Vehicles of the Department of Transportation have received numerous complaints about the high minimum amount that must be paid to transfer a certificate of title. According to the Director of Vehicle Registration of that Division, the high minimum tax on utility trailers and other low-value vehicles is the number one complaint from the public about the highway use tax. Part IV of this act responds to these complaints by repealing the minimum tax.

Motor Carrier Enforcement Changes

Part V of the act makes changes to the road tax that are designed to increase compliance with that tax. It establishes a minimum mileage presumption for motor carriers that drive in the State, as evidenced by records of the Division of Motor Vehicles, but either do not report mileage to the State or underreport mileage. The presumption is 10 trips of 450 miles each for each of the carrier's vehicles.

The act also imposes an increased penalty on motor carriers that understate their mileage to the State by more than 25%. Under current law, the penalty for negligently understating the amount of tax owed is 10% of the deficiency. This act increases the penalty for motor carriers that understate their mileage by more than 25% to an amount equal to two times the amount of the deficiency. This Part becomes effective October 1, 1995.

The purpose of the road tax is to tax motor carriers who drive in the State using fuel purchased in another State. The road tax on motor carriers is set at the same rate as the per gallon excise tax and a credit is given for any State per gallon excise taxes paid. The number of miles a motor carrier drives in North Carolina in a reporting period and the total amount of fuel consumed by the motor carrier in that reporting period determine the motor carrier's road tax liability.

1995 Chapter 404 (Senate Bill 293, Sen. Rand)

AN ACT TO PERMIT THE IMPORTATION AND BOTTLING OF SPIRITUOUS LIQUOR WITHIN FOREIGN TRADE ZONES LOCATED AT THE WILMINGTON AND MOREHEAD CITY PORTS.

This act creates a new type of commercial ABC permit known as a liquor importer/bottler permit. The application fee for this permit is $250.00. The fee is collected by the ABC Commission and remitted to the State Treasurer for the General Fund. The permit is valid for one year, from May 1 to April 30. G.S. 18B-903 provides that the renewal fee is 25% of the original application fee: $62.50. The holder of a liquor importer/bottler permit would also need to obtain a State license. The annual tax for this license is $250.00. The act became effective upon ratification, July 11, 1995, and will generate a small amount of revenue for the General Fund.

A liquor importer/bottler permit will allow the holder of the permit to import liquor in closed containers into the foreign trade zone at either of the State Ports via ships that dock at the

Ports. The imported liquor can be bottled, packaged, or labeled or it can be stored and shipped to State or local ABC warehouses and, where permitted by other jurisdictions, to public and private agencies in those jurisdictions. The liquor can also be transported from the State Ports for purposes related to bottling, packaging, labeling, sale, or storage.

Prior to the enactment of this new permit, State law did not provide a way for liquor to be imported into North Carolina. For imported liquor to be sold in this State, it had to be imported into another State and then be sold to this State. This act will allow a person to purchase liquor in bulk, import it into the State, bottle it, and send it to a warehouse. The permit is similar to the bottler permit the State currently provides for malt beverages, unfortified wine, and fortified wine and to the distillery permit, which allows the holder to import ingredients used in the distillation of spirituous liquor.

1995 Chapter 410 (House Bill 504, Rep. G. Robinson)

AN ACT TO SUBTRACT ANY TRADE-IN ALLOWANCE IN CALCULATING THE ALTERNATIVE HIGHWAY USE TAX ON LEASED VEHICLES.

This act excludes a trade-in allowance from the amount on which the alternate highway use tax on leased vehicles is calculated. The change becomes effective October 1, 1995. The change is expected to reduce Highway Trust Fund revenue by $1 million to $1.5 million a year.

Until October 1, 1995, the highway use tax on leased vehicles will apply to the gross receipts from the lease or rental of the vehicle with no deduction for the value of a trade-in allowance. If, for example, a person leases a vehicle for $250 a month and at the same time trades in a vehicle worth $5,000, highway use tax is due on the monthly payment and on the trade-in allowance of $5,000.

This is in contrast to the way highway use tax is calculated on the sale of a motor vehicle. The sales price of a motor vehicle is reduced by the amount of any allowance given by the seller for a motor vehicle taken in trade as a partial payment for the purchased motor vehicle. If, for example, a person buys a car worth $20,000 and at the same time trades in a vehicle worth $5,000, highway use tax is due on $15,000.

The difference in treatment between sales and leases stems from differences in the highway use tax and the sales tax. As part of the 1989 Highway Trust Fund legislation, motor vehicles were exempted from sales tax and made subject to highway use tax. When vehicles were subject to sales tax, the sales price was not reduced by the amount of a trade-in allowance. The new highway use tax specifically allows a reduction in sales price for the value of a trade-in but does not allow a reduction in the lease price. The highway use tax legislation provides that highway use tax due on the lease of a motor vehicle is to be administered as if it were a sales tax on the motor vehicle. Consequently, the general sales tax rule that the lease price is not reduced by a trade-in allowance applies to the collection of highway use tax on leased vehicles.

The highway use tax is 3% of the retail value of a motor vehicle, subject to both a minimum and a maximum tax. The minimum tax is $40 until July 1, 1996. Beginning July 1, 1996, the minimum tax is repealed. The maximum tax is $1,500 for automobiles and other vehicles that weigh no more than 26,000 pounds and is $1,000 for vehicles that weigh more than 26,000 pounds. When a lessor of vehicles buys a vehicle to be leased, the lessor has the option of either paying

highway use tax when the lessor obtains a certificate of title for the vehicle or paying a tax on the gross receipts of the vehicle. If the lessor elects to pay on the gross receipts, the lessor must pay the alternate tax to the Department of Revenue. The alternate tax is 3% on the gross receipts from long term leases and rentals and 8% on the gross receipts from short term leases and rentals. The 8% tax goes to the General Fund and the 3% tax goes to the Highway Trust Fund.

1995 Chapter 443 (Senate Bill 229, Sen. Odom)

AN ACT TO REMOVE IMPEDIMENTS AND DISINCENTIVES TO DONATING CONSERVATION LAND OR PRESERVATION STRUCTURES OR SITES.

This act removes disincentives for donations of conservation or preservation land or property in three ways:

1. It recognizes and ratifies conservation and preservation agreements with the federal government.
2. It amends the Marketable Title Act to prevent conservation and preservation agreements from expiring if not rerecorded.
3. It eliminates the requirement that back property taxes be paid when use value property is donated for conservation or preservation purposes.

Section 1 of this act adds the federal government as a recognized holder of a conservation or preservation agreement under Article 4 of Chapter 121 of the General Statutes, the Conservation and Historic Preservation Agreements Act. That Article permits an owner of real property to include restrictions on property interests transferred to a governmental entity or nonprofit corporation to retain land and water in their natural, scenic, or open condition or in agricultural, horticultural, farming, or forest use. The Article also authorizes restrictions on transferred historical structures to preserve their historically significant architecture, archaeology, or historical associations. This section became effective upon ratification, July 18, 1995, and Section 2 extends it retroactively to June 1, 1979, thereby ratifying conservation and preservation agreements entered into with the federal government since that date.

Section 3 of this act adds an additional exception to the Marketable Title Act for conservation and preservation agreements entered into pursuant to the Conservation and Historic Preservation Agreements Act. The purpose of the Marketable Title Act is to simplify chains of title to real property by extinguishing certain claims against property if the claims are more than 30 years old, unless the claimed interest is rerecorded within the 30-year period. Because of concerns that the renewal dates for conservation and preservation agreements could be overlooked by the government or nonprofit corporation that holds the property interest and because these agreements serve a public purpose, this act provides that they will not be allowed to expire or be terminated as a matter of law by the Marketable Title Act.

Section 4 of this act eliminates the rollback of deferred taxes on transferred use value property if the property is donated to a governmental unit or is donated to a nonprofit organization for use as a protected natural area or for nonprofit historic preservation purposes. Property tax law provides that all property is to be taxed at its market value. A special use value law makes an exception for agricultural land, horticultural land, and forestland: it can be taxed at

its value in its current use. The taxes that would otherwise have been due are deferred and become a lien on the land, however. If the property is transferred or otherwise becomes ineligible for use value taxation, three years of these deferred taxes become due and payable to the local government taxing units. This section provides an exception for land the owner donates to governmental units or donates to nonprofits for conservation or preservation. This section, which became effective January 1, 1995, will cause a revenue loss to local governments. The amount of the loss cannot be determined because one cannot predict how much property will be donated each year.

1995 Chapter 451 (House Bill 360, Rep. Black)

AN ACT TO EXEMPT RAILROADS FROM PAYMENT OF SALES TAX ON DIESEL FUEL USED BY LOCOMOTIVES AND RAILROAD CARS.

This act exempts railroad companies from paying the 6% State and local sales tax on diesel fuel used to operate railroad locomotives and railroad cars. Railroad companies do not pay motor fuel tax on diesel fuel used to operate railroad locomotives and railroad cars because the fuel is not used to operate a vehicle on the highways. The motor fuel tax on diesel fuel is 21.95¢ per gallon. This act, introduced on behalf of the Department of Transportation, exempts railroad companies from paying either sales tax or motor fuel tax on diesel fuel. The act is effective September 1, 1995, and is expected to reduce General Fund tax revenues by about $1.5 million a year.

There are many exemptions from the sales and use tax in the current law. An existing exemption, similar to the railroad diesel exemption added by this act, is the sale of fuel used by ocean-going vessels engaged in interstate commerce.

1995 Chapter 454 (Senate Bill 237, Sen. Speed)

AN ACT TO CLARIFY THE USE VALUE TAX LAW, TO UPDATE THE LAW TO CONFORM TO MODERN FAMILY PROPERTY TRANSACTIONS, AND TO EXPAND THE CATEGORY OF PERSONS WHO MAY QUALIFY FOR USE VALUE PROPERTY TRANSFERS.

This act makes several changes to the special property tax classification for farm property taxed at its use value rather than its market value. It clarifies the kinds of individual owners who can qualify for this classification, allows farmland owned by a partnership, a trust, or a limited liability company to qualify for use value tax treatment to the same extent as a corporation, allows farmland owned by certain trusts to qualify for use value tax treatment, and expands the definition of "relative" used to determine qualification for use value tax treatment. The changes became effective January 1, 1995, and apply to tax years beginning with the 1995-96 tax year. The changes are not expected to have a significant impact on local property tax revenues, but will reduce revenue to a slight extent.

Property tax law provides that unless property is exempted or classified for special tax treatment, it is to be taxed at its market value. Agricultural land, horticultural land, and forestland are classified and are taxed at their value in their present use as agricultural land, horticultural land, or forestland. The difference between the taxes due on the present use value treatment and the

taxes that would have been payable in the absence of this special treatment, together with any interest, penalties, or costs, are a lien on the property. The difference in taxes is carried forward in the records of the taxing unit as deferred taxes. The deferred taxes for the preceding three years become payable whenever the property is sold or whenever the property loses its eligibility for the benefit of the special use value law.

To qualify for use value taxation, the property must meet minimum size requirements, must be in actual production, must be owned by an individual or by a corporation whose principal business is cultivating the land and whose shareholders are all either actively engaged in this business or are relatives of a member who is actively engaged in this business. Agricultural land and horticultural land must also produce gross income that meets minimum thresholds.

Before the enactment of this act, the term "individually owned" had been interpreted administratively to include an individual who is a beneficiary of a trust, a partner in a partnership, or a member of a limited liability company. Under this interpretation, these individuals could qualify their share of the land as if they owned it directly. The act codifies this interpretation of the law by modifying the definition of "individually owned" to specifically include these individuals and to clarify how an undivided interest is identified.

The act expands the special use value law to allow partnerships and limited liability companies to qualify their property for use value if they meet the conditions set for corporations. These conditions are that the principal business of the entity is cultivating the land, that the partners or members are all actively engaged in this business or are relatives of someone who is actively engaged in this business, and that the entity or a partner or member of the entity owned the land for the previous four years.

The act further expands the special use value law to allow three types of trusts to qualify. The first type is a trust that is created by an individual and whose beneficiaries are all either the creator of the trust or a relative of the creator. The second type is an extension of the first type; it is a trust that is created by an individual and whose beneficiary is a trust whose beneficiaries are all either the creator of the initial trust or a relative of the creator. The third type is a testamentary trust created by an individual who owned land that was taxed at its use value, transferred the land to the trust upon death, had no relatives at the time of death, and designated that all trust income be used exclusively for nonprofit purposes. For any of these trusts to qualify, the trust or the creator of the trust had to own the land for the previous four years.

Finally, the act expands the definition of "relative" to include nieces and nephews and their descendants, aunts and uncles, parents-in-law, stepchildren and their descendants, and the spouse of any of these relatives. The definition of "relative" in the current law does not include these relatives.

1995 Chapter 456 (House Bill 718, Rep. Gray)

AN ACT TO ESTABLISH A NORTH CAROLINA PARKS AND RECREATION AUTHORITY AND TO EARMARK FUNDS FOR THE

PARKS AND RECREATION TRUST FUND AND THE NATURAL HERITAGE TRUST FUND.

This act reallocates the State's share of the deed stamp tax to the Parks and Recreation Trust Fund and the Natural Heritage Trust Fund, modifies the purposes for which the Parks and Recreation Trust Fund may be used, and creates the North Carolina Parks and Recreation Authority to administer the Parks and Recreation Trust Fund. These changes become effective July 1, 1996.

Under current law, 15% of the State's share of the deed stamp tax ($3.1 million) each year is dedicated to the Natural Heritage Trust Fund created in G.S. 113-77.7 and the remaining 85% ($18 million) goes to the General Fund. Chapter 772 of the 1993 Session Laws declared that it was the intent of the General Assembly to dedicate 75% of the State's share of the deed stamp tax each year to the Parks and Recreation Trust Fund and an additional 10% to the Natural Heritage Trust Fund. Section 3 of this act fulfills that intent by dedicating 75% of the State's share ($15.9 million) to the Parks and Recreation Trust Fund and 25% ($5.3 million) to the Natural Heritage Trust Fund. These funds will be transferred on a quarterly basis each year beginning July 1, 1996. None of the State's share of the deed stamp tax will go to the General Fund after that date.

The deed stamp tax is an excise tax on instruments transferring real property. It is collected by the register of deeds of the county in which the property is located and is collected when the deed transferring the property is recorded. The tax rate is $1.00 for each $500.00 (0.2%) of the value of the property conveyed. Each county must remit one-half of the net proceeds of the tax to the Department of Revenue. The requirement that each county send one-half of the tax to the State was enacted in 1991 when the State doubled the tax rate from 50¢ to $1.00 for each $500.00 of value.

Section 2 of this act modifies the use of revenue in the Parks and Recreation Trust Fund. It decreases the amount of the Fund that is to be used for the State Parks system from 75% to 65% and increases the amount that is to be used for local matching grants for local parks and recreation from 20% to 30%. In addition, it allows the use of up to 3% of the Fund each year for operating expenses associated with managing capital improvements, acquiring land, and administering local grants.

The remainder of this act creates the North Carolina Parks and Recreation Authority within the Department of Environment, Health, and Natural Resources. The Authority will administer the Parks and Recreation Trust Fund and report annually to the General Assembly on allocations from that Trust Fund. The Authority will also advise the Secretary of Environment, Health, and Natural Resources. The existing Parks and Recreation Council, an advisory council within the Department of Environment, Health, and Natural Resources, is repealed. The Authority will have nine members; the Governor, the Speaker of the House of Representatives, and the President Pro Tempore of the Senate will each select three. Members will serve staggered two-year terms.

1995 Chapter 458 (Senate Bill 606, Sen. Sherron)

AN ACT TO PROVIDE FOR THE CREATION OF FACILITY AUTHORITIES AND TO ESTABLISH THE CENTENNIAL AUTHORITY.

This act provides the statutory framework for the General Assembly to create a "facility authority" and, in conjunction with that framework, establishes a Centennial Authority in Wake County. The purpose of a facility authority is to study, design, plan, construct, own, promote, finance, and operate a regional facility. A regional facility is a facility designed to attract major regional, national, and international sports and recreational events. The act became effective upon ratification.

A facility authority will have either eight or 13 members, depending on the territorial jurisdiction of the authority. The initial eight members are appointed by the General Assembly. The territorial jurisdiction of an authority is the county in which the regional facility is to be located. If the jurisdiction of an authority is a county where the main campus of a constituent institution of The University of North Carolina is located, then the authority will have 13 members. Of the additional five members, two are appointed by the board of county commissioners, two are appointed by the city council of the city with the largest population in the county, and the remaining member is appointed jointly by the mayors of all the cities in the county. A member may be removed by the appointing authority for cause and a vacancy occurring in the membership will be filled by the remaining members.

An authority has the power to issue bonds, approved by the Local Government Commission. The bonds may be secured by the revenues of the regional facility, by security interests in real or personal property, including a leasehold interest, acquired or improved with the proceeds of the bonds, and, with the approval of the county levying the tax, by the receipts of a room occupancy and prepared food and beverage tax levied by the county. A pledge of a county's room occupancy and prepared food and beverage tax does not restrict the county's right to repeal the tax. The faith and credit of the State or a political subdivision of the State may be pledged as security for bonds.

An authority has the power to contract with any public entity. Also, The University of North Carolina or any constituent institution of The University of North Carolina may enter into a contract with an authority if the function is one The University of North Carolina could undertake separately. If a regional facility is used to host an athletic event sponsored by a constituent institution of The University of North Carolina whose principal campus is located in the territorial jurisdiction of the authority, then at least 50% of the seats for the event must be made available to students at that institution and to members of the general public. The act also amends the ABC laws to allow the sale of beer and unfortified wine at a regional facility unless the events being hosted are high school or college functions.

After setting forth the statutory framework for facility authorities, the act specifically creates one in Wake County, to be known as the Centennial Authority. The act authorizes the Director of the Budget to allocate any funds which have been appropriated to the Centennial Authority, but not yet expended or obligated, to the Centennial Authority. The act also amends the Wake County room occupancy and prepared food and beverage tax law to require some distribution of revenue to the Centennial Authority.

Under the new distribution of tax proceeds, Wake County and the City of Raleigh must jointly transfer $11 million to the Centennial Authority by June 30, 1996, and an additional $11 million by June 30, 1997. This money may be used by the Authority only to fund all or part of the acquisition, construction, financing, and debt servicing of a regional facility to be located in the general vicinity of the Carter-Finley stadium. The act also directs Wake County and the City of Raleigh to transfer 7% of the total undesignated proceeds distributed to them to the Centennial Authority by July 1 of each year, beginning July 1, 1995. This money may be used only for enhancement of operating revenues of a regional facility and for planning, design, renovations, maintenance, and repairs to a regional facility. "Undesignated proceeds" are all tax proceeds distributed to Wake County and to Raleigh other than annual distributions to Raleigh of $680,000 of room tax proceeds and $680,000 of meals tax proceeds.

1995 Chapter 459 (Senate Bill 1055, Sen. Kerr)

AN ACT TO MODIFY THE EXCISE TAX ON NEWSPRINT.

This act amends the excise tax on newsprint that was enacted in 1991. The purpose of the tax is to encourage the use of recycled newsprint by imposing a privilege license tax on those who produce publications printed on newsprint and do not use a minimum amount of recycled paper. The tax became effective October 1, 1991, and is payable quarterly. The tax rate is $15.00 for each ton of newsprint that is consumed during a reporting period and has an average recycled content percentage that is less than the required minimum recycled content percentage. The proceeds of the tax are earmarked for the Solid Waste Management Trust Fund created under G.S. 130A-309.12.

Under the law, a publisher must pay the tax unless the recycled content percentage of the newsprint consumed by the publisher equals or exceeds stated percentages. Under the original legislation, the percentage of required recycled content of the newsprint consumed gradually increased from 12% in 1991 to 40% in 1997. This act eases the burden on publishers to meet these purchasing percentage goals in two ways:

1. It extends the period of time a publisher has to reach the goal of using newsprint with at least 40% recycled content. Under this act, the percentage increase from 25%, which is the current percentage rate, to 40% would be extended by 3 years to the year 2000.
2. It creates a credit that can be used towards the recycled content percentage goals, for publishers who develop and operate or contract for the operation of a newspaper recycling program. A publisher would receive one-half ton credit toward its total recycled content tonnage for each ton of recycling tonnage.

The act also makes a few less substantive changes:

1. It eliminates the need for filing a quarterly return and substitutes the use of an annual return. To conform with this change, the act directs the Secretary of Revenue to credit the tax proceeds to the Solid Waste Management Trust Fund on or before April 15 of each year.
2. It changes the term "producer" to "publisher".
3. It changes the basis for determining the recycled content percentage to gross tonnage of newsprint consumed, instead of net tonnage. The act also clarifies how this calculation is made.

The tax does not apply in a few circumstances. It does not apply to newsprint that is acquired by a publisher and then recycled by the publisher. It also does not apply if the publisher of a publication could not meet the required minimum recycled content standards for one or more of several reasons. The reasons are an inability to obtain newsprint made from recycled paper at a price or quality comparable to other newsprint, in an amount needed for a publication, or in a reasonable amount of time. A publisher who claims an exemption for one of these reasons must document the publisher's effort to obtain newsprint that contained the required minimum percentage of recycled paper.

1995 Chapter 461 (House Bill 1060, Rep. McComas)

AN ACT AMENDING THE GENERAL STATUTES RELATING TO THE CONSOLIDATION OF CITIES AND COUNTIES AND CONSOLIDATED CITY-COUNTY TAXATION AND FINANCE.

This act modifies the law relating to consolidated city-counties, effective July 19, 1995. Article 20 of Chapter 153A of the General Statutes provides a procedure for a city and a county to form a consolidation study commission to adopt a plan of consolidation and to hold a referendum on the consolidation. The consolidation of a city and a county must be enacted by the General Assembly, however, before it can become effective.

Chapter 160B of the General Statutes, the Consolidated City-County Act of 1973, governs consolidated city-counties. A consolidated city-county is a county in which the largest municipality has been abolished and its powers, duties, rights, privileges, and immunities have been consolidated with those of the county. Other municipalities may also be abolished and consolidated with the county. A consolidated city-county may define urban service districts to finance services within the county at a higher level than in other areas of the county. These urban service districts may replace municipalities that have been abolished or may be created to serve areas that have population density, property valuation, and needs that justify a higher level of services than is provided in the county generally. The consolidated city-county may levy property taxes, motor vehicle taxes, and privilege license taxes within an urban service district to finance additional services within the district.

Sections 1 and 2 of this act amend Chapter 160B of the General Statutes to clarify the powers and governance of a consolidated city-county. A consolidated city-county has the same powers, duties, rights, etc., as a county throughout its jurisdiction and as a city within its urban service districts. To the extent a city can exercise powers, duties, rights, etc., outside its boundaries, a consolidated city-county can exercise those powers, duties, rights, etc., outside the boundaries of its urban service districts. The powers, duties, rights, etc., of an urban service district are exercised by the governing body of the consolidated city-county and debts owed an urban service district are payable to the governing body of the consolidated city-county.

This act makes other miscellaneous changes relating to consolidated city-counties. Section 1 provides a procedure for a consolidated city-county to study dissolution and prepare a plan of dissolution. Section 2 provides that, before the effective date of a consolidation, an interim governing board of a proposed consolidated city-county may define an urban service district, which will take effect on the effective date of the consolidation. Sections 2 and 3 provide that a plan for consolidation may include proposed urban service districts and, if the planned consolidation goes into effect, no additional notice is required of the proposed district. Sections

6 - 18 make conforming and technical changes to various statutes relating to taxation, water sewer districts, solid waste, and local government fiscal control to clarify the status of a consolidated city-county.

Sections 4 and 5 make changes that apply only to New Hanover County. In order to comply with the State constitutional requirement in Section 4(1) of Article V that only general, not local, laws may be enacted relating to local government debt, these provisions are made applicable only to a class that includes counties with a population over 120,000 and a land area less than 200 square miles. New Hanover County is the only county in this class. Sections 4 and 5 provide that a consolidation cannot become effective unless the voters of the county have approved the assumption of the city's debt. These sections provide a procedure for the referendum, requirements for assumption of debt and notification, and limitations on actions to contest consolidations.

1995 Chapter 463 (Senate Bill 180, Senator Shaw)

AN ACT TO MODIFY THE PAYMENT AND REPORTING REQUIREMENTS AND THE COLLECTION PROCEDURES FOR UNEMPLOYMENT CONTRIBUTIONS AND TO PROVIDE FOR A REDUCTION IN THESE CONTRIBUTIONS IN CERTAIN CIRCUMSTANCES.

This act makes the following changes in the payment and collection of unemployment contributions:

1. It increases the minimum payment threshold from $1 to $5. A person is not required to make unemployment contributions if the amount owed is less than the minimum payment threshold. This change becomes effective September 30, 1995.
2. It increases the unemployment contribution refund threshold from $1 to $5. If a person overpays unemployment contributions by less than the refund threshold, the Employment Security Commission will refund the overpayment only if the person who made the overpayment asks for a refund in writing. This change becomes effective September 30, 1995.
3. It gives the Employment Security Commission the authority to allow certain small employers to file an annual report rather than quarterly reports and to file the annual report by telephone. The small employers that can be allowed to do this are those that have filed reports with the Commission for at least the past three years and have not been liable for quarterly contributions for the past year.

   For those allowed to make annual reports, the report is due by January 31 of each year. The authority to make an annual report is revoked if the employer becomes liable for contributions or if certain information on the employer's last report changes. To ensure that the Commission has timely employee and wage information, employers filing annual reports must report changes in employment status and wages to the Commission within 14 days and must respond to inquiries from the Commission within 14 days. This change becomes effective September 30, 1995.

4. It establishes another automatic reduction in unemployment contributions for employers with positive ratings in one circumstance. That circumstance is when the Unemployment Insurance Fund has a balance of at least $800,000,000 and the

Unemployment Insurance Fund ratio is at least 5%. The Unemployment Insurance Fund ratio is determined by dividing the amount in the Fund by the State taxable wage base. The current ratio is 4.6% and is not expected to reach or exceed 5% in the next five years. If the fund ratio does reach 5%, the taxes of employers with positive ratings will be reduced by 60% rather than 50%. This change becomes effective for quarters beginning on or after March 31, 1996.

5. It requires a representative of the Employment Security Commission to attempt to contact a person who owes less than $50 in delinquent unemployment contributions before the Commission obtains a judgment lien for the delinquent amount. This change becomes effective upon ratification.
6. It eliminates the imposition of a $5 late filing penalty for employers who file a return within 30 days after the due date and owe no tax with the return. This change becomes effective upon ratification.
7. It removes the current 24-month restriction on waiving penalties. This restriction prohibited the Commission from waiving penalties against the same employer more than once in a 24-month period. Under the act, there is no limit on the number of times a penalty can be waived against the same employer in any time period. This change also becomes effective upon ratification.

1995 Chapter 465 (Senate Bill 407, Sen. Perdue)

AN ACT TO EXEMPT TRAILERS FROM THE PAYMENT OF THE GLOBAL TRANSPARK TEMPORARY ZONE VEHICLE REGISTRATION TAX.

This act exempts trailers from the annual $5 vehicle registration tax imposed in the counties in the Global TransPark Development Zone. The counties in the TransPark Zone are Carteret, Craven, Duplin, Edgecombe, Greene, Jones, Lenoir, Nash, Onslow, Pamlico, Pitt, Wayne, and Wilson counties. The exemption becomes effective October 1, 1995. The exemption is expected to reduce annual revenue for the TransPark Zone by approximately $330,000.

The $5 tax is in addition to the regular vehicle registration fee. When the additional $5 tax was imposed on July 1, 1994, it applied to all trucks, all trailers except mobile homes, and all passenger vehicles registered in a county in the TransPark Zone. When this act becomes effective, the tax will no longer apply to trailers. The regular annual registration fee for a trailer is 10.00.

The vehicle registration tax levied by the Zone is a temporary tax that will expire 5 years after the effective date of the first tax levy, which was July 1, 1994. The Division of Motor Vehicles collects and administers the tax at the same time and in the same manner that it administers the annual vehicle registration fees.

The Commissioner of Motor Vehicles credits the proceeds of the $5.00 temporary Zone vehicle registration tax to a special account. The interest on the special account is credited quarterly to the Highway Fund to reimburse the Division for the cost of collecting and administering the tax. The Zone must place 15% of the tax proceeds distributed to it in a general funds account and the remaining 85% in an interest-bearing trust account. The Zone may not disburse the principal of the trust account except pursuant to a contract that provides that the Zone will recover or be repaid the amount disbursed within a reasonable period of time, not to exceed 20 years. Each

county that is a member of the Zone is the beneficial owner of a share of the principal of the trust account in proportion to the amount of tax proceeds collected in that county.

The enactment of this act makes the vehicle base for the Triangle Transit Authority different from the vehicle base for the Global TransPark. The $5 vehicle registration tax imposed by the Triangle Transit Authority applies to trailers.

1995 Chapter 468 (Senate Bill 121, Sen. Kerr)

AN ACT TO REVISE THE PROCEDURES FOR ASSESSMENTS OF INHERITANCE TAX FOLLOWING A FEDERAL DETERMINATION.

This act makes the time limits for assessing any inheritance tax due after a federal determination of the value of an estate the same as the time limits that apply to assessments of other state taxes following a federal determination. The act became effective August 1, 1995. The original bill, recommended by the Revenue Laws Study Committee, would also have reduced inheritance and gift taxes in a number of ways.

The act makes the same changes for inheritance tax that were made for gift tax, income tax, and withholding tax by Chapter 582 of the 1993 Session Laws: it revises the procedures for assessments of inheritance tax following a federal determination of federal estate tax to match those that apply to gift tax, income tax, and withholding tax. The revision makes the following substantive changes:

1. It extends from 30 days to two years the period of time in which a taxpayer must file an amended inheritance tax return following a federal determination.
2. It gives the State an additional one-year or three-year period to make an assessment of inheritance tax following a federal determination.
3. It reduces the penalty for failure to file an amended return following a federal determination from 25% of the amount of any additional tax due, with a minimum of $25 and a maximum of $500, to 5% of the amount of tax due, with an additional 5% for each month the tax is overdue.
4. It denies a refund that would otherwise be due if an amended return is not filed after a federal determination.

A federal determination is a report by the Internal Revenue Service (IRS) that a taxpayer has not filed a return or has filed an incorrect return and, therefore, either owes more taxes or is entitled to a refund. If a taxpayer did not file a return or understated the amount due on a return, the determination states the amount of tax the IRS finds is due and serves as the federal notice of assessment. The IRS eventually sends the appropriate state a copy of the federal determination. A delay between when a taxpayer receives a federal determination and when a state receives a copy of the determination occurs when the taxpayer is in the process of resolving with the IRS questions raised by the determination.

Under the State income, gift, and withholding tax laws, a taxpayer who receives a federal determination of federal income, gift, or withholding tax must, within two years, file the appropriate amended State return with the Department of Revenue reflecting the determination. Under these taxes, if a taxpayer files an amended return in response to a federal determination, the Department of Revenue has one year from the date it receives the return to make an

assessment of State income, gift, or withholding taxes. If a taxpayer does not file an amended return in response to a federal determination, the Department of Revenue has three years from the date it receives a copy of the determination from the IRS to make an assessment.

The general limitations period for an assessment of any State tax is three years after a return was filed or due to be filed. The one-year and three-year periods following a federal determination are in addition to the regular three-year period, which is set out in G.S. 105-241.1. An additional time period is necessary when a federal determination is made in order to allow the State adequate time to respond to the federal determination. The State might not receive an amended return following a federal determination or a notice of a federal determination from the IRS until near the end of or after the end of the general three-year period.

Unlike the income, gift, and withholding tax laws, the inheritance tax laws, prior to the enactment of this act, did not give the State any additional time to make an assessment following a federal determination. Therefore, for an assessment of inheritance tax, the State had to make an assessment within the general three-year time period for making assessments. When the State did not receive notice of a federal determination of estate taxes until near the end of or after the end of this three-year period, the State was foreclosed from making an assessment.

1995 Chapter 472 (House Bill 759, Rep. Gray)

AN ACT TO PROVIDE THAT A HOME FOR THE AGED, SICK, OR INFIRM WHOSE PROPERTY IS EXEMPT FROM PROPERTY TAX IS ALLOWED A REFUND OF STATE AND LOCAL SALES AND USE TAXES.

This act allows certain nonprofit homes for the aged, sick, or infirm to obtain semiannual refunds of State and local sales and use taxes paid by the homes. The act became effective upon ratification and applies retroactively to purchases made on or after January 1, 1995. The refunds are expected to reduce General Fund revenue by approximately $1.5 million a year and reduce local government revenues by approximately $.7 million a year.

The homes covered by the act are those whose property is exempt from property taxes under G.S. 105-275(32). That provision exempts the property of church-related and Masonic continuing care retirement homes from property tax. The homes that qualify are nonprofit self-contained communities that meet the following qualifications:

1. Are designed for elderly residents.
2. Operate a skilled nursing facility, an intermediate care facility, or a home for the aged.
3. Include residential dwelling units, recreational facilities, and service facilities.
4. Have a charter that provides that in the event of dissolution, the assets of the home will revert or be conveyed to a nonprofit entity.
5. Are managed by a church or other religious body or a Masonic group.
6. Have an active program to generate funds through one or more sources, such as gifts, grants, trusts, bequests, an endowment, or an annual giving program, to assist the home in serving persons who might not be able to reside at the home without financial assistance or subsidy.

In exempting these homes from sales and use taxes, the act resolves lingering issues from a 1984 property tax case. Before 1984, the Department of Revenue allowed sales and use tax refunds to these homes as nonprofit charitable or religious institutions. In 1984, the Court of Appeals upheld a decision of the Property Tax Commission denying a property tax exemption to Lutheran Home Ministries on the basis that it was not a charitable institution. The General Assembly responded to the court's ruling by granting these homes a property tax exemption in 1987 under G.S. 105-275(32).

The Department of Revenue applied the court's reasoning to sales and use taxes and denied sales and use tax refunds to some of these homes beginning in 1984. Because the 1987 legislation did not change the sales and use tax laws, the Department continued to deny refunds to some of these homes based upon the 1984 Court of Appeals decision. This act clarifies that homes that are exempt from property tax as charitable institutions are also entitled to a refund of sales and use taxes. The General Assembly ratified this act on July 25, 1995. Subsequently, on August 1, 1995, the Court of Appeals issued a decision finding that these homes are entitled to a refund of sales and use taxes. The case before the court concerned whether or not Southminster, Inc. and Davidson Retirement Community, Inc. were charitable organizations and as such were entitled to a semiannual refund of sales and use taxes. The court found that the two institutions were charitable organizations, based partially on the fact that they are considered charitable organizations for property tax purposes under G.S. 105-275(32).

1995 Chapter 474 (House Bill 223, Rep. Gray)

AN ACT TO REDUCE THE EXCISE TAX ON SOFT DRINKS.

This act reduces the State excise tax on soft drinks by 25% effective July 1, 1996. It does not phase out the soft drink tax, as did the original version of House Bill 223.

The act reduces the excise tax on bottled soft drinks from 1¢ a bottle to 3/4¢ a bottle, reduces the excise tax on liquid base products from $1.00 a gallon to 75¢ a gallon, and reduces the excise tax on dry base products from 1¢ an ounce to 3/4¢ an ounce. It preserves the current 1/2 rate of tax on the first 15,000 gross of bottled soft drinks sold each year by a distributor. The act is expected to reduce soft drink tax revenue by $9.6 million in fiscal year 1996-97 and $10.1 million in 1997-98.

The soft drink excise tax was enacted in 1969. The purpose of the tax is to provide an additional source of revenue to the General Fund. In fiscal year 1993-94, the soft drink excise tax accounted for $36,538,688 of the General Fund tax collections. A soft drink is defined as a beverage that is not an alcoholic beverage. The following items are exempt from the tax:

1. Natural liquid milk drink produced by a farmer or a dairy.
2. A bottled soft drink that contains at least 35% natural milk.
3. Natural juice.
4. Juice that would be natural if it did not contain sugar.
5. Natural water.
6. A base product used to make a bottled soft drink subject to tax under this Article.
7. Coffee or tea in any form.

8. A bottled soft drink or base product sold outside the State.
9. A bottled soft drink or base product sold to the federal government.
10. A base product for home use that either contains milk or requires milk to be added to make a soft drink.

The soft drink excise tax is payable by the person who is the first to bring the product into the State. The soft drink excise tax has a bifurcated tax rate system. The purpose of the bifurcated tax system is to tax the sale or distribution of the soft drink itself when practical, but to tax the sale or distribution of the ingredients of the soft drink when the taxation of the product itself is not practical.

1995 Chapter 477 (House Bill 55, Rep. Redwine)

AN ACT TO PROVIDE THAT SALES TAX PREFERENCES FOR AGRICULTURE APPLY TO AQUACULTURE.

This act clarifies the application of two sales and use tax agricultural preferences to farmers who raise fish or water plants and expands a current agricultural sales and use tax exemption to include this type of farmer. The act became effective August 1, 1995. The act is projected to reduce annual State sales and use tax collections by less than $50,000 and to reduce annual local sales and use tax collections by less than $25,000. The act was recommended by the Joint Legislative Commission on Seafood and Aquaculture.

A sales and use tax preference is the exemption of an item from sales and use tax or the taxation of an item at less than the regular 6% combined State and local rate. The two sales and use tax preferences the act clarifies are the taxation of certain items at the rate of 1% with an $80 cap and the exemption of certain items used in agriculture.

Section 1 of the act makes it clear that machines and machine parts sold to a farmer for use in raising an aquatic species are taxable at the State rate of 1% with an $80 cap rather than at the full State and local 6% rate. An aquatic species is any species of finfish, mollusk, crustacean, or other aquatic invertebrate, amphibian, reptile, or aquatic plant. The Department of Revenue has construed "farm crops" in this category to include aquatic species. The act therefore clarifies the application of this reduced rate to fish farmers rather than include them in the reduced rate for the first time.

Section 2 of the act makes it clear that the agricultural exemptions in G.S. 105-164.13(2) apply to aquatic species farmers and that all the exemptions in this subdivision, other than the one for seeds, are limited to commercial production. It does this by changing references to "livestock and poultry" to "animals," by changing references to "agriculture" to the "commercial production of plants or animals," and by inserting a statement that the items must be for commercial use. The exemptions are for medicine, litter material, feed, pesticides and similar products, defoliants, and plant growth regulators.

The Department of Revenue has construed "livestock" in the exemptions in G.S. 105-164.13(2) to include fish and has for many years interpreted the exemptions for all items in this subdivision, other than seeds, to apply to commercial use only. The act therefore clarifies these exemptions and their application to aquaculture.

In addition to clarifying these two sales and use tax preferences, the act expands the agricultural exemption in G.S. 105-164.13(4c) for certain kinds of facilities and equipment to include fish facilities and equipment. Prior law exempted facilities for commercial use in housing, raising, or feeding swine, livestock, or poultry, equipment used in these facilities, and building materials used to construct these facilities. "Livestock" under this exemption had not been interpreted to include fish. Section 3 of the act expands this exemption to include fish by deleting references to "swine, livestock, and poultry" and referring instead to "animals." This exemption applies to both State and local sales and use taxes

1995 Chapter 491 (Senate Bill 1049, Sen. Sherron)

AN ACT TO CLARIFY THE QUALIFIED BUSINESS TAX CREDIT TO ELIMINATE AN UNINTENDED LOOPHOLE THAT ALLOWS DOUBLE CREDITS FOR THE SAME INVESTMENT AND TO AUTHORIZE THE LEGISLATIVE RESEARCH COMMISSION TO STUDY THE QUALIFIED BUSINESS TAX CREDIT.

This act addresses a loophole in the Qualified Business Investment tax credit by prohibiting an investor from receiving two tax credits on the same investment. The act also authorizes the Legislative Research Commission to study the tax credit.

In 1987, the General Assembly enacted the Qualified Business Investment tax credit to allow tax credits to individuals and corporations that invest in qualified North Carolina businesses registered with the Secretary of State or in North Carolina Enterprise Corporations. The amount of the credit allowed is 25% of the amount invested, up to a maximum credit of $50,000 for individuals and $750,000 for corporations. If the allowable credit exceeds the taxpayer's tax liability, the excess may be carried forward for five years. The total amount of tax credits that can be granted in any tax year is capped at $12 million. The investors apply for the credit through an application filed with the Department of Revenue by April 15; the Department then determines whether the $12 million cap has been exceeded and, if so, proportionally reduces the amount of each credit applied for.

In 1993, the General Assembly enacted legislation to allow a pass-through entity to qualify for the credit and pass it on to the entity's owners. A pass-through entity is an entity, such as a partnership, a limited liability company, or a Subchapter S corporation, that is treated as owned by individuals or other entities under federal tax law and whose income, losses, and credits are reported by the owners on their State income tax returns.

The law allowing pass-through entities to qualify for this credit became effective with the 1994 tax year. A problem arose because an investor could invest money in a pass-through entity that is itself a qualified business. The investor would receive a 25% tax credit for this investment and, if the pass-through entity then invests in another qualified business, the original investor would receive a second 25% tax credit, via the pass-through entity, based upon the original financial investment. Section 1 of this act, recommended by the Secretary of State, eliminates this problem by prohibiting a pass-through entity that is also a qualified business from passing the tax credit through to its owners. Therefore, the investor's initial investment in the pass-through entity will qualify for the 25% tax credit but the entity's subsequent investment in another qualified business will not qualify for an additional tax credit for the original investor.

Section 1 will have an unknown effect on General Fund revenues. This section became effective beginning with the 1995 tax year; in order to protect investments made in reliance on the current law, it does not apply to investments and commitments to invest made before August 1, 1995.

Section 2 of the act authorizes the Legislative Research Commission to study the Qualified Business Investment tax credit, in particular to consider how the law can be modified to better encourage venture capital investment in North Carolina. The Commission may make an interim report to the 1996 Session and must make a final report to the 1997 General Assembly.

1995 Chapter 495 (House Bill 396, Rep. McComas)

AN ACT TO MODIFY THE STATE PORTS TAX CREDIT BY EXPANDING IT TO INCLUDE IMPORTS, BY EXTENDING THE SUNSET ON THE CREDIT, AND BY LIMITING THE CREDIT FOR BULK EXPORTS.

This act modifies the income tax credit allowed for amounts assessed by the State ports in three ways. The act was an agency bill requested by the State Ports Authority. The modifications, outlined below, became effective for taxable years beginning on or after January 1, 1995:

1. It expands the credit to include imports; the current credit applies only to exports. The act allows a credit for break-bulk cargo and container cargo imported at either Wilmington or Morehead City and for bulk cargo imported at Morehead City. The act does not allow a credit for bulk cargo imported at Wilmington.
2. It limits the credit for bulk exports to bulk exports at the Morehead City terminal. The current export credit applies to bulk exports at Wilmington as well as at Morehead City.
3. It extends the sunset on the credit for two years. Under prior law, the credit would have expired for taxable years ending on or before February 28, 1996. Under this act, the credit will expire for taxable years ending on or before February 28, 1998.

The State ports income tax credit was enacted in 1992 and expanded in 1994. It was enacted to encourage exporters to use the two State-owned port terminals, which are at Wilmington and Morehead City. When enacted, the credit applied to amounts paid by a taxpayer on cargo exported at either port. The General Assembly expanded the credit in 1994 to include all amounts assessed on exported cargo, regardless of who paid the shipping costs.

The amount of credit allowed is equal to the amount of charges assessed on a taxpayer's cargo that exceeds the average amount assessed on the taxpayer's cargo during the three-year period that includes the current taxable year and the previous two taxable years. The credit may not exceed 50% of the amount of income tax owed by the taxpayer for the taxable year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years. The cumulative credit allowed to the same taxpayer may not exceed $1 million.

1995 Chapter 510 (Senate Bill 693, Sen. Kerr)

AN ACT TO MAKE TECHNICAL AMENDMENTS TO IMPROVE THE ADMINISTRATION OF THE PROPERTY TAX ON MOTOR VEHICLES.

This act makes various technical changes to the statutes concerning the property tax on motor vehicles. The changes are effective for taxes imposed for taxable years beginning on or after July 1, 1995. The changes were suggested by a committee of assessors, collectors, and finance officers as amendments that would improve the administration of the tax. The act has no fiscal effect.

In 1991, the General Assembly created a new procedure for collecting property taxes on motor vehicles that are registered with the Division of Motor Vehicles. Under the system, the registration of a motor vehicle with the Division of Motor Vehicles is considered a listing of the vehicle for property tax purposes and the taxes payable on the vehicle are due four months after the registration is obtained or renewed. If the taxes are not paid within four months after they become due, the Division of Motor Vehicles will refuse to renew the vehicle's registration the following year unless the taxpayer obtains a receipt showing that the previous year's taxes have been paid.

The amendments to the motor vehicle property tax statutes are as follows:

Section	Explanation
1.	The changes in subsection (a) of G.S. 105-330.2 eliminate the problem of the correct evaluation date when an owner with a registration that expires December 31 renews during the January grace period. Under the amendment, the value of the vehicle is determined as of January 1 preceding the date the current registration expires. The ownership, situs, and taxability of the vehicle are determined on the actual day the current registration is renewed. The change in subsection (b) deletes taxability and situs from the requirement that appeals must be taken within 30 days of the date of the notice. Because of incorrect information in DMV records, many situs appeals must be handled more than 30 days after the date of the notice. Under the amended statutes, appeals of situs and taxability will be handled under G.S. 105-381, which allows a taxpayer to contest the situs and taxability within 6 months of the date of payment or within 5 years after the tax first became due, whichever is later.
2.	The change in subsection (a) of G.S. 105-330.4 establishes a new procedure for prorating taxes on vehicles registered under the annual system. Currently, when a vehicle is first registered under the annual system in a month other than December, no taxes are due on that vehicle until after the registration is renewed. This amendment makes prorated taxes due on that vehicle four months after it is registered. The change in subsection (b) postpones the accrual of interest when, for whatever reason, the tax notice is not prepared until some time after the tax due date for a vehicle. In such a case, the amendment provides that interest will begin to accrue on the first day of the second month following the date of the notice, rather than on the first day of the first month following the date the taxes were due.

3. A new subsection (a1) is created in G.S. 105-330.5 that establishes a formula for prorating taxes on vehicles registered under the annual system. For example, if a new registration is obtained in July, five months remain in the calendar year, so the taxes on that vehicle would be 5/12 of the full amount. These taxes would be due November 1, four months after the date the vehicle is registered.

   The amendment to subsection (b) requires a county to remit municipal and special district taxes at least once a month rather than the current 30 days after collection. It also requires the county to furnish municipalities and special districts located in it information that will enable them to account for the tax payments remitted to them.

   The amendment to subsection (d) changes the rule concerning the levy year in which a tax is to be included when the notice is prepared after the tax due date. For example, under the current law, if a tax is due June 1 but the notice is prepared in August, the tax must still be included in the previous fiscal year's levy. Under the amendment, the tax would be included in the levy for the current fiscal year.

4. The amendment to subsection (a) of G.S. 105-330.6 establishes a tax year for vehicles registered under the annual system that is based on a January 1 - December 31 calendar year. The addition of this tax year is needed to deal with prorated refunds and releases of prorated taxes due on annual system registrations.

   The amendment to subsection (c) increases the time a taxpayer has to request a refund or release of taxes after surrendering the vehicle's plates from 60 days to 120 days.

1995 Chapter 512 (House Bill 1001, Rep. Allred)

AN ACT TO PROVIDE THAT ANTIQUE AUTOMOBILES SHALL BE VALUED AT NO MORE THAN FIVE HUNDRED DOLLARS FOR PROPERTY TAX PURPOSES AND TO ELIMINATE DOUBLE TAXATION OF A MOTOR VEHICLE WHEN THE OWNER MOVES AWAY AND THEN RETURNS TO THE STATE WITHIN ONE YEAR.

This act combines two bills that were considered by the General Assembly this session. The original bill, House Bill 1001, reduces the amount of property tax collectors of antique vehicles must pay by limiting their value to no more than $500 for property tax purposes. The Senate amended the bill to include the contents of Senate Bill 170, which eliminates the highway use tax on a motor vehicle when the owner moves away and then returns to the State within one year. The first part of the act will result in an annual local government revenue loss of less than $700,000. The second part of the act will result in a maximum annual loss to the Highway Trust Fund of approximately $15,000.

Antique automobiles

Under this act, antique automobiles owned by collectors will be effectively exempt from property tax, effective for taxable years beginning on or after October 1, 1995. A vehicle qualifies for this exemption if it meets all of the following conditions:

1. It is registered with the Division of Motor Vehicles and has an historic vehicle special license plate. To qualify for an historic vehicle special license plate, a vehicle must be 35 years old from the date of manufacture. The annual license plate fee for an historic vehicle special license plate is the regular license fee plus an additional $10.00.
2. It is maintained for use in exhibitions, club activities, parades, and other functions of public interest.
3. It is used only occasionally for other purposes.
4. It is owned by an individual.
5. It is used by the owner for a purpose other than the production of income and is not used in connection with a business.

Motor vehicles are designated as a special class of property under G.S. 105-330.1. Vehicles that are registered with the Division of Motor Vehicles are taxed annually as of the day on which the current registration is renewed or the day on which a new registration is applied for. Under Chapter 329, ratified by the General Assembly this session, a local government may adopt a resolution directing the tax collector not to collect property taxes when the amount due is less than $5.00. Few, if any, taxing units have a property tax rate that exceeds $1.00 per $100 of value. Therefore, since the value of the car can not exceed $500 under this act, any unit that adopts a resolution allowing the tax collector to forego collection of property tax bills that are less than $5.00 will effectively eliminate property taxes on antique automobiles owned by collectors.

Personal property that is used by the owner of the property for a purpose other than the production of income and that is not used in connection with a business has been exempt from property taxes since 1987. Personal property includes household furnishing, clothing, pets, and lawn equipment. The term also includes collectibles such as antiques, coins, and paintings. However, the term does not include motor vehicles.

Eliminate double vehicle tax

Effective October 1, 1995, a motor vehicle owner will be allowed a credit against the highway use tax for the amount of highway use tax paid on the same vehicle within the past year. This credit is available only to a person who applies for a certificate of title for a motor vehicle that is titled in another state. The effect of the act is to relieve a person from paying the highway use tax if, within a single year, a person paid the highway use tax in this State, moved to a different state and titled the motor vehicle in that state, and then moved back to North Carolina and titled the vehicle in this State.

The highway use tax is a titling tax that is collected whenever a certificate of title is issued. A resident of North Carolina is required to have a certificate of title for each vehicle the resident owns that is operated on the highways. The highway use tax is 3% of the value of the vehicle, subject to a maximum tax of $1,500 and a minimum tax of $40 until July 1, 1996. Beginning July 1, 1996, the minimum tax is repealed.

Under current law, there are two provisions for motor vehicles brought into North Carolina from another state. Under G.S. 105-187.6, the maximum highway use tax that maybe imposed on a vehicle that has been titled in another state for at least 90 days is $150.00. Under G.S. 105-187.7, a person is allowed a credit against the highway use tax for the amount of a substantially equivalent tax imposed and paid to another state within 90 days before applying for a certificate of title.

1995 Chapter 533 (Senate Bill 710, Sen. Kincaid)

AN ACT TO INCREASE THE NORTH CAROLINA SELF-INSURANCE GUARANTY FUND AND TO ALLOW A CREDIT AGAINST THE GROSS PREMIUMS TAX FOR ASSESSMENTS PAID BY SELF-INSURERS TO THE GUARANTY FUND.

This act represents one part of a two-part plan to address the self-insured workers compensation market. At the present time, over 55% of the employees in the State have workers compensation coverage through either self-funded plans or pools. These plans or pools are currently unregulated by the Department of Insurance and several are skirting potential insolvency. This act seeks to put the Self-Insurance Guaranty Fund in a better position that it currently is to pay claims if insolvencies occur. The second part of the plan was embodied in Senate Bill 931, ratified as Chapter 471 of the 1995 Session Laws. Under that act, the Department of Insurance was given more regulatory oversight over the self-insured plans or pools. That part of the plan seeks to decrease the risk of insolvencies among this group of insurers.

Under this act, the Self-Insurance Guaranty Fund cap is raised from $1,000,000 to $5,000,000. The Fund is financed by assessments paid by self-insurers. These assessments represent .25% of the self-insurers premiums tax base. The assessment is credited toward the insurers premium tax liability. As such, any assessments paid by self-insurers are deducted from their tax payments and represent a loss to the General Fund. The act is expected to decrease General Fund revenues $1.8 million in fiscal years 1995-96 and 1996-97 and $400,000 in fiscal year 1997-98. It is assumed that the $5,000,000 cap will be reached within three years and that continued assessments beyond the third year will not be needed.

The assessments paid by self-insurers to the Self-Insurance Guaranty Fund differ from the assessments paid by private insurers in two respects:

1. The assessment is paid to the State. The amount assessed is "diverted" from gross premium tax revenue. With private insurers, the assessment is paid to the private Guaranty Fund. The premium tax liability is not affected. However, the General Assembly allows a credit against an insurer's premium tax liability equal to the amount paid by the insurer to the Guaranty Fund.
2. The amount paid as an assessment is determined by the State. Therefore, the amount of potential loss to the General Fund is more fixed.

1995 Chapter 543 (Senate Bill 202, Sen. Albertson)

AN ACT TO ENCOURAGE THE COMPOSTING OF POULTRY CARCASSES AND PROVIDE AN INCOME TAX CREDIT FOR POULTRY COMPOSTING FACILITIES.

This act creates a temporary income tax credit for constructing a facility in this State for the composting of poultry carcasses resulting from commercial poultry operations. The credit is available only to individuals and shareholders in Subchapter S corporations; it is not available to C corporations. The amount of the credit allowed is 25% of the installation, equipment, and materials cost of building the facility, not to exceed $1,000. The credit does not apply to costs paid

with funds provided to the taxpayer by a State or federal agency. The amount of the credit allowed cannot exceed the amount of tax imposed for the taxable year.

The credit is effective for taxable years beginning on or after January 1, 1995, and expires for taxable years beginning on or after January 1, 1998. The yearly General Fund revenue loss from the credit is not expected to exceed $350,000.

A poultry composting facility is a structure or an enclosure in which whole, unprocessed poultry carcasses are decomposed by a natural process into an organic, biologically safe by-product that can be used for plant food. Every person that is engaged in raising poultry for commercial purposes and has a flock of at least 200 fowl is required by G.S. 106-549.70 to dispose of the poultry carcasses in a pit, an incinerator, or a poultry composting facility that has been approved by the Department of Agriculture.

The purpose of the credit is to encourage people who raise turkey, chickens, or other poultry to compost the dead poultry rather than burn it or put it in a pit. By composting the poultry carcasses, the by-product can be converted into a useful product.

In the poultry business, the grower of a bird is often not the owner of the bird. The burden of disposing of poultry mortalities is usually on the grower of the bird.

Recommended by the Agriculture and Forestry Awareness Study Commission.

1994 Tax Law Changes

Prepared by Cynthia Avrette, Sabra J. Faires, and Martha H. Harris

1994 Chapter 10, 1994 Extra Session (Senate Bill 151, Sen. Daniel)

AN ACT TO REDUCE THE UNEMPLOYMENT INSURANCE TAX RATE.

During the 1994 Extra Session on crime, the General Assembly enacted this act, which reduces unemployment insurance taxes for employers. A related act, enacted during the subsequent 1994 Regular Session, increases unemployment benefits for workers. Because the unemployment insurance tax rate had been increased and benefits had been reduced in 1983, the reduction of the tax rate during the 1994 Extra Session was viewed as only the first part of a two-part package to restore both employees and employers to their pre-1983 status regarding both the tax and benefits. Together, the two acts provide relief to both workers and employers.

Tax Rate Reduction for Employers

This act reduces the standard beginning contribution rate for unemployment insurance tax from 2.25% to 1.8% of the employer's wages paid during a calendar year for employment occurring after December 31, 1993. Effective January 1, 1994, it also reduces the tax rates that apply to rated employers with a credit balance in their unemployment insurance tax account in two ways, by reducing the rates in the rate schedule applicable to these employers and by providing an additional reduction in years in which there is a specified minimum balance in the Unemployment Insurance Fund. In 1993, the General Assembly enacted legislation that reduced the unemployment tax contribution rate by 30% for rated employers with a credit balance in their unemployment insurance tax account for any calendar year in which the balance in the Unemployment Insurance Fund equals or exceeds $800,000,000 as of the preceding August 1. This act increases that reduction, providing these employers with a 50% reduction in their contribution rate for the 1994 calendar year and for any calendar year in which the balance in the Unemployment Insurance Fund equals or exceeds $800,000,000 as of the preceding August 1.

The act's changes in the rate schedule along with the conditional change of the rate reduction from 30% to 50% will combine to give rated employers with positive credit balances an average tax reduction of 38% (the actual reduction for an individual employer depends on the employer's experience rating). A rated employer is an employer who has had a chargeable account for more than 13 consecutive months immediately preceding the date for calculating the employer's tax rate. The act's change in the standard beginning tax rate will provide a 20% tax reduction for employers who are not yet rated. The Employment Security Commission projected that the act will reduce employer tax payments by more than $67 million in 1994 and more than $73 million in 1995. Most North Carolina employers will benefit from the act; only those rated employers who have taken out more in unemployment benefits than they have put in will not experience a rate reduction. The Employment Security Commission estimates that the remaining 95% of employers will save an average of $22.00 in taxes per worker employed.

Unemployment tax contributions are paid by employers on a quarterly basis and deposited into the State Unemployment Insurance Fund. After deducting any refunds payable from the Fund

pursuant to G.S. 96-10(f), the money is deposited with the secretary of the treasury of the United States to the credit of this State's account in the Unemployment Trust Fund. Funds in the State's account earn interest that is also credited to the account. As money in the State's account is needed to pay benefits, it is transferred to the State and credited to the benefits account of the State's Unemployment Insurance Fund to be used to pay benefits to people who lose their job through no fault of their own.

North Carolina's account in the federal trust fund is one of the most solvent accounts of any state in the country. In 1994, the State's account in the trust fund had a balance of $1.49 billion, the fifth largest account in the nation, despite the 1993 legislation providing a 30% cut in the rate for rated employers with a credit balance. North Carolina's account has continued to grow since the 1993 tax cut because it earns interest at a high rate, because new unemployment taxes were collected on the many new jobs created in North Carolina during the past year, and because claims for unemployment benefits to be paid from the account have been consistently low. Even after the 1994 tax cut, the account is expected to grow or remain static each year.

This act is the third unemployment tax reduction in three years. As noted above, in 1993 the General Assembly reduced the tax rate for rated employers by 30%. In 1992, the General Assembly was able to suspend an additional unemployment tax collected from employers and credited to the Employment Security Commission Reserve Fund. This Reserve Fund bolsters the State Unemployment Insurance Fund. Before enactment of the 1994 legislation, North Carolina's average unemployment tax rate, 0.5%, was already the 45th lowest in the nation. The 1.8% starting rate for new employers is now the second lowest rate in the nation. The three unemployment tax reductions enacted by the General Assembly in three years have provided substantial tax relief to North Carolina employers.

Benefit Increase for Workers

During the 1994 Regular Session, the General Assembly enacted a related bill to increase unemployment benefits. House Bill 1889, AN ACT TO RESTORE UNEMPLOYMENT BENEFITS TO THEIR PRE-1983 LEVEL, TO MAKE PARTICIPATION IN REEMPLOYMENT SERVICES A CONDITION OF RECEIVING CERTAIN BENEFITS, AND TO MAKE TECHNICAL CHANGES IN THE EMPLOYMENT SECURITY LAWS, was enacted as Chapter 680 of the 1993 Session Laws (1994 Regular Session). Chapter 680 restores the pre-1983 formulas for computing unemployment benefits, implements a federal requirement concerning worker profiling and participation in reemployment services, and deletes obsolete provisions from the unemployment law. The benefit changes became effective for benefits paid to claimants whose benefit year begins on or after August 1, 1994. The other changes became effective upon ratification.

The effect of the benefit changes is to increase unemployment benefits. The specific formula changes are:

(1) Use of an individual's high quarter wages in determining the weekly benefit for an individual who is totally or partially unemployed. Prior law used an average of the two highest quarter wages. The law had changed from high quarter wages to an average of the two highest quarter wages effective October 1, 1983. Chapter 680 therefore reinstates the pre-1983 law on this issue. Section 1 makes the change for total unemployment and Section 2 makes the change for partial unemployment.

(2) Use of a multiplier of 8 2/3 in determining an individual's total benefit amount. Prior law used a multiplier of 8. The law had changed from 8 2/3 to 8 effective October 1, 1983. Chapter 680 therefore reinstates the pre-1983 law on this issue. Section 3 makes this change.

The Employment Security Commission has estimated that these benefit changes will increase benefit costs payable from North Carolina's account in the federal Unemployment Trust Fund by approximately $30 million a year. These increased costs are expected to be offset by employer tax payments and interest earnings credited to the account.

Chapter 680 also implements the mandates of the federal Unemployment Compensation Amendments of 1993, Pub. L. 103-152. That law requires states to establish a worker profiling system that identifies claimants for unemployment benefits who need reemployment services to become employed and to impose participation in the needed reemployment services as a condition of receiving unemployment benefits. Sections 4 through 6 make these changes. Examples of reemployment services are assessments of skills, job search workshops, and providing information on jobs. Finally, Chapter 680 deletes obsolete provisions and language from the unemployment laws.

1994 Chapter 582 (House Bill 80, Rep. Gamble)

AN ACT TO REDUCE THE TIME ALLOWED THE DEPARTMENT OF REVENUE TO MAKE ASSESSMENTS OF TAXES FOLLOWING A FEDERAL DETERMINATION, TO REINSTATE AN INADVERTENTLY DELETED PROVISION RELATING TO ASSESSMENTS FOR EMPLOYER WITHHOLDING BASED ON FEDERAL DETERMINATIONS, AND TO CLARIFY THE ASSESSMENT STATUTES.

This act makes three substantive changes and several technical changes to the statutes concerning the assessment of certain State taxes by the North Carolina Department of Revenue after the federal Internal Revenue Service (IRS) has corrected or otherwise determined a taxpayer's liability for a federal tax that affects the amount of State tax owed. The changes become effective January 1, 1995, and apply to assessments of taxes for which the time period for making assessments has not yet expired. The act is expected to have no significant effect on State revenues.

The substantive changes affect the statute of limitations that applies to assessments of State income, gift, or withholding taxes following a federal determination. The changes reduce the period of time the Department of Revenue has to assess an underpayment of State income or gift taxes following a federal determination of federal income or gift taxes, give the Department of Revenue a longer time to make an assessment of State withholding taxes following a federal determination of withheld federal employment taxes, and give taxpayers a longer time to file an amended State gift tax return following a federal determination of federal gift tax liability.

The technical changes consolidate into G.S. 105-241.1(e) the various limitation periods on making assessments following a federal determination and make technical changes in the wording of G.S. 105-241.1(b), (i), and (j). The various limitation periods are moved to G.S. 105-241.1 from G.S. 105-230.20 (corporate income tax), G.S. 105-259 (individual income tax), G.S. 105-160.8

(estate and trust income tax), and G.S. 105-197.1 (gift tax) to avoid duplication in the statutes and to establish a uniform period for these taxes.

A federal determination is a report by the Internal Revenue Service (IRS) that a taxpayer has not filed a return or has filed an incorrect return and, consequently, either owes more taxes or is entitled to a refund. If a taxpayer did not file a return or understated the amount due on a return, the determination states the amount of tax the IRS finds is due and serves as the federal notice of assessment. The IRS eventually sends the appropriate state a copy of a federal determination. A delay between when a taxpayer receives a federal determination and when a state receives a copy of the determination occurs when the taxpayer is in the process of resolving with the IRS questions raised by the determination.

Under the State income tax laws, a taxpayer who receives a federal determination of federal income tax must, within two years, file an amended State income tax return with the Department of Revenue reflecting the determination. Under the State gift tax laws, a taxpayer who receives a federal determination of federal gift tax must, within 30 days, file an amended gift tax return reflecting the determination. This act extends from 30 days to two years the period of time in which a taxpayer must file an amended gift tax return following a federal determination. In making this change, the act establishes a uniform period for both income and gift taxes.

Until January 1, 1995, if a taxpayer files an amended State income or gift tax return in response to a federal determination, the Department of Revenue has three years from the time it receives the return to make an assessment of State income or gift tax. If a taxpayer does not file an amended return in response to a federal determination, the Department of Revenue has five years from the date it receives a copy of the determination from the IRS to make an assessment of State income or gift tax. This act shortens the additional three-year period to one year and shortens the additional five-year period to three years. Thus, under the act, the Department of Revenue has an additional one-year period to make an assessment of State income or gift tax when a taxpayer files an amended return within two years of receiving a federal determination, and the Department has an additional three-year period to make an assessment after receiving notice from the IRS of a federal determination when a taxpayer does not file the required amended return.

The general limitations period for an assessment of any State tax is three years after a return was filed or due to be filed. The one-year and three-year periods following a federal determination are in addition to the regular three-year period, which is set in G.S. 105-241.1. An additional time period is necessary when a federal determination is made to allow the State adequate time to respond to the federal determination. The State may not receive an amended return following a federal determination or a notice of a federal determination from the IRS until near the end of or after the end of the general three-year period.

Unlike the income tax laws, the withholding tax laws do not give the State any additional time to make an assessment following a federal determination. Therefore, for an assessment of withholding taxes, the State must make an assessment within the general three-year time period for making assessments. When the State does not receive notice of a federal determination of employment taxes until near the end of or after the end of this three-year period, the State is foreclosed from making an assessment.

This act gives the State the same additional one-year or three-year period to make an assessment of withholding taxes following a federal determination of federal employment taxes that it gives for assessments of income or gift taxes following a federal determination. In making this change, the act restores part of the 1990 law on assessments for withholding taxes. Until 1990,

the withholding tax laws gave the same additional time periods for making an assessment after a federal determination that the income tax and gift tax laws provide. In 1990, the withholding tax statutes were extensively rewritten to speed up payments of withheld taxes. As part of the changes, G.S. 105-163.17 was rewritten and the cross-reference to the additional time periods was inadvertently deleted. The act reinstates additional time periods following a federal determination but shortens the allowed additional time periods to either one year or three years as described for income and gift taxes.

Sections 1, 2, 3, and 6 of the act rewrite the individual income tax statute, the corporate income tax statute, the estate and trust income tax statute, and the gift tax statute, respectively, concerning federal determinations to delete the portions that are consolidated into rewritten G.S. 105-241.1(e) in Section 5 of the bill. Section 4 of the bill adds a statute that gives additional time periods for making an assessment of withholding taxes following a federal determination. Section 5 rewrites part of the assessment statute, G.S. 105-241.1, to consolidate the various time periods that apply to assessments and to make the statute easier to understand.

The act does not affect assessments of State inheritance tax following a federal determination of federal estate tax, nor does it affect when interest begins to accrue on an overpayment of State income, gift, or withholding tax. The act deletes language from several statutes that directs the Department of Revenue to refund overpayments of tax within 30 days because the language is unnecessary and confusing. The 30-day limit does not determine when interest begins to accrue on overpayments and has no practical effect. G.S. 105-266(a) requires the Department of Revenue to refund overpayments of any tax as soon as possible, and G.S. 105-266(b) states when interest begins to accrue on overpayments.

The act stems from a recommendation of the Revenue Laws Study Committee. The recommendation of the study committee covered only the additional periods for an assessment of State withholding taxes after a federal determination and the technical changes.

1994 Chapter 584 (Senate Bill 1045, Sen. Allran)

AN ACT TO BROADEN EXISTING INCOME TAX CREDITS FOR THE PRODUCTION AND INSTALLATION OF SOLAR AND PHOTOVOLTAIC EQUIPMENT BY INCREASING THE AMOUNTS OF THE CREDITS AND EXTENDING THE SOLAR EQUIPMENT CREDITS TO INCLUDE EQUIPMENT THAT GENERATES ELECTRICITY.

This act broadens two existing corporate and individual income tax credits concerning the installation of solar energy equipment and one existing corporate income tax credit concerning the production of photovoltaic equipment. Photovoltaic equipment is equipment that uses solar energy to produce electricity. The act is effective for taxable years beginning on or after January 1, 1994, and is expected to result in an annual decrease in General Fund revenues of between $127,500 and $178,500. The changes made by the act to each credit are described below.

Credits for Installing Residential Solar Energy Equipment

- Increases the costs for which a credit can be claimed from 25% to 40%.

- Increases the maximum credit per system from $1,000 to $1,500.
- Expands the credit to include photovoltaic equipment.
- Increases from 3 years to 5 years the number of years a credit can be carried forward.

Corporate Credit For Constructing Photovoltaic Equipment Facility

- Increases the costs for which a credit can be claimed from 20% to 25%.

Credits for Solar Equipment Used To Produce Heat in Certain Processes

- Increases the costs for which a credit can be claimed from 20% to 35%.
- Increases the maximum credit for an installation from $8,000 to $25,000.
- Expands the credit to include the production of electricity.

The corporate income tax credit for installing residential solar equipment is available to corporations that construct or install solar energy equipment in residential buildings used or sold by the corporation for commercial or business purposes. The credit is available to the corporation that owns or controls the use of the building when the equipment is installed or, in the case of a building constructed to be sold, to the owner who first occupies or leases the building for use. The credit taken may not exceed the amount of income taxes imposed on the person taking the credit and a credit is not allowed to the extent any of the cost of the equipment was provided by federal, State, or local grants. A similar individual income tax credit is allowed.

The photovoltaic corporate income tax credit is allowed to a corporation that constructs a facility in North Carolina for the production of photovoltaic equipment. The credit may not exceed the amount of income tax imposed on the corporation and it is not allowed to the extent that any of the costs were provided by governmental grants. Any excess credit may be carried forward for five years. There is no parallel individual income tax credit.

The credit for installing solar equipment to produce heat is allowed to a corporation or an individual for constructing or installing solar equipment to produce heat in the manufacturing or service processes of a business located in North Carolina. The credit may not exceed the amount of tax imposed on the corporation or individual and the credit is not allowed to the extent that any of the costs were provided by governmental grants.

1994 Chapter 600 (House Bill 1663, Rep. Black)

AN ACT TO EXEMPT ALL ANNUITIES AND FUNDING AGREEMENTS FROM PREMIUM TAXATION; TO CLARIFY THE AUTHORIZATION FOR THE ISSUANCE OF AND ESTABLISH STANDARDS FOR FUNDING AGREEMENTS; AND TO MAKE CONFORMING CHANGES IN LAWS ON PRIORITY OF DISTRIBUTION OF ASSETS OF INSOLVENT INSURERS AND ON SECURITIES.

This act changes the insurance laws by authorizing certain insurers to issue funding agreements in this State, subject to regulation by the Department of Insurance, and by changing

the priority of certain claims against the assets of an insolvent insurance company. The act changes the tax laws by exempting all annuities and the new funding agreements from the gross premiums tax levied on insurance companies and by making technical changes to the statute that imposes the gross premiums tax to make the statute easier to understand. These tax changes become effective January 1, 1995; the rest of the act became effective July 1, 1994.

A funding agreement is, in effect, a kind of annuity. It is an agreement between an insurer and another person for the person to provide funds to the insurer and for the insurer to pay the funds, in one or more payments, to a designated person at a future date based on contingencies other than death or disease. For example, a party responsible for cleanup of a hazardous waste site could use a funding agreement for the cleanup. The party could deposit funds with an insurer pursuant to a funding agreement that would establish a periodic payment schedule and the time period for the cleanup.

The act changes the priority in insurer insolvency proceedings of the portion of a benefit claim that exceeds $300,000. Under prior law, the portion above this amount had no priority and was in the same status as claims of general creditors. The act gives the portion of a benefit claim that exceeds $300,000 the same priority as the portion that does not exceed this amount and clarifies that claims under funding agreements are to be given the same priority as other claims for benefits.

As part of the goal of the act to remove obstacles to the issuance of funding agreements in this State, the act repeals the gross premiums tax on annuities. Prior law imposed a gross premiums tax of 1.9% on annuities. The tax was payable at the "back end" rather than the "front end," which means that the tax was paid when the annuity payments began rather than when money was deposited with the insurance company to fund the annuity. When payments on an annuity began, the tax was calculated as 1.9% of the present value of the stream of income to be received under the annuity. The insurer deducted the amount of the tax from the initial payments to be made under the annuity. North Carolina was one of about 13 states that imposed a premiums tax on annuities. Of these, about five either required or allowed the tax to be computed and paid at the "back end" rather than the "front end."

The exemption of annuities from the gross premiums tax has two fiscal effects. First, it decreases premiums tax revenue each fiscal year by approximately $1 million. Second, because it reduces the amount of premiums tax payable, it reduces by approximately $72,500 the amount collected each fiscal year from the insurance regulatory charge. That charge, which is imposed by G.S. 58-6-25, is set annually and, for the 1994 taxable year, is 7.25% of gross premiums tax liability.

The technical changes to the gross premiums tax statute, G.S. 105-228.5, break the statute into subsections, delete incorrect cross-references, clarify that the gross premiums tax is in lieu of only income and franchise taxes, and delete obsolete provisions. The act makes no substantive change to G.S. 105-228.5 other than to repeal the tax on annuities.

1994 Chapter 661 (Senate Bill 1377, Sen. Winner of Buncombe)

AN ACT TO CONFORM THE THRESHOLD FOR DETERMINING IF A PENALTY APPLIES TO AN UNDERPAYMENT OF WITHHELD STATE INCOME TAXES TO THAT USED UNDER THE INTERNAL

REVENUE CODE FOR DETERMINING IF A PENALTY APPLIES TO AN UNDERPAYMENT OF WITHHELD FEDERAL INCOME TAXES, AND TO CLARIFY THE TYPE OF INFORMATION A TAXPAYER MUST PROVIDE TO THE SECRETARY OF REVENUE.

This act makes one substantive change to the State law concerning payment to the Department of Revenue of withheld State income taxes plus two technical changes to this law and a clarifying change concerning the kinds of information the Secretary of Revenue can ask a person who is required to file any tax return or report to provide. Section 1 of the act makes the State withholding tax changes and Section 2 makes the clarifying change concerning tax information. The State withholding tax changes become effective January 1, 1995, and apply to payments of withheld State income taxes made on or after that date. The clarifying change concerning tax information became effective upon ratification. This act was recommended by the Revenue Laws Study Committee. The withholding tax change is expected to cause a minimal increase in General Fund revenues because it accelerates slightly the payment schedule for underpayments of withholding tax and lowers slightly the threshold for imposing penalties for underpayments of withholding tax.

The substantive change to the State withholding tax laws ties the State penalty provisions concerning payments by employers of withheld State individual income taxes to the federal penalty provisions that apply to payments to the Internal Revenue Service of federal employment taxes attributable to the same wages. The immediate effect of this change is twofold. First, it changes the amount of a shortfall in the remittance of withheld State income taxes that triggers the imposition of interest and penalties from the current State amount to the current federal amount. Second, it changes the time by which a shortfall must be remitted in order to avoid the imposition of penalties and interest. The continuing effect of the change is to adjust the State provisions for determining when an employer is subject to interest and penalties on a shortfall in withheld State income taxes automatically in accordance with changes in the corresponding federal provisions.

Under prior State law, an employer who did not remit the full amount of State income taxes withheld from wages by the date they were due was not liable for interest or penalties on the shortfall if the amount of the shortfall was less than 5% of the amount due and the employer included the amount of the shortfall in the next withholding tax return the employer filed. A return is due quarterly by the last day of the month following the end of the quarter.

Under current federal law, an employer who does not remit the full amount of federal employment taxes attributable to wages by the date they are due is not liable for interest or penalties on the shortfall if the amount of the shortfall does not exceed the greater of 2% of the amount due or $100 and the employer remits the shortfall by the shortfall make-up date. The shortfall make-up date for an employer who remits monthly is the due date of the quarterly return. The shortfall make-up date for an employer who remits on a semi-weekly basis is the first Wednesday or Friday that falls on or after the 15th day of the month following the month in which the remittance was required to be made. Federal employment taxes attributable to wages are withheld federal income taxes, withheld employee old age, survivor, and disability insurance taxes and hospital taxes, the employer's corresponding old age, survivor, and disability insurance taxes and hospital taxes, and certain amounts withheld under the backup withholding requirements.

Thus, the immediate effects of the act are to delete the 5% shortfall threshold and substitute a threshold that is the greater of 2% or $100, and to require employers who remit on a semi-weekly basis to remit a shortfall by approximately the 15th day of the month following the

month in which it occurred instead of at the time the employer files the next quarterly return. The result is that the shortfall threshold for determining whether a penalty applies and the due date of a shortfall will be the same for federal and State law; to avoid interest or a penalty on a shortfall of withheld State income taxes, an employer must remit more of the total amount payable by the due date and remit any shortfall within a shorter amount of time than was required under prior State law.

In addition to the substantive change, the act makes two technical changes to the State withholding tax laws. First, it changes the phrase "federal income taxes withheld from the same wages" to "federal employment taxes attributable to the same wages" because this latter phrase is more accurate. As noted above, federal income tax withheld from wages is only one of the kinds of taxes that are included under federal law in applying the test for determining when interest and penalties apply.

Second, it changes the phrase "within three banking days" to "semi-weekly" for the same reason; the former phrase is no longer accurate. Effective January 1, 1993, the Internal Revenue Service changed the designation of employers who are required to remit more frequently than on a monthly basis from a "within three-banking-day" employer to a "semi-weekly" employer to reflect changes in the payment schedule for employers. The Internal Revenue Service abandoned the eighth-monthly periods in favor of semi-weekly periods. Under the former law, an employer who accumulated $3,000 or more in employment taxes in any eighth-monthly period had to remit the taxes within three banking days after the end of that eighth-monthly period. Under the revised regulations, employers who paid at least $50,000 of employment taxes in the previous 12-month period ending June 30 must remit whatever amount of employment taxes they accumulate in a semi-weekly period. One semi-weekly period consists of Wednesday, Thursday, and Friday; employment taxes attributable to wages paid in this period are due on or before the following Wednesday. The other semi-weekly period consists of Saturday, Sunday, Monday, and Tuesday; employment taxes attributable to wages paid in this period are due on or before the following Friday.

The State withholding tax changes made by this act keep the penalty provisions concerning payments of withheld State income taxes consistent with the intent of the 1990 act of the General Assembly that revised the laws concerning payment of these taxes. Chapter 945 of the 1989 Session Laws (1990 Regular Session) revised the withholding tax provisions to require payment of the taxes on a faster basis. It did so by putting payment of the taxes by larger employers on the same schedule that applied under federal law. As part of the changes, that act set the penalty provisions to mirror the federal ones. The federal law changed in 1993, however, and a corresponding change was not made to State law.

Section 2 of the act makes a clarifying change concerning information provided by taxpayers. It updates the law that requires various entities to complete tax returns and answer questions submitted to them by the Secretary by incorporating the definitions of "person," "Secretary," and "taxpayer" that now apply to this law and by referring specifically to reports as well as returns. It also clarifies the type of information the Secretary can require a taxpayer to provide by enumerating the permissible kinds of information.

The changes concerning tax information were included in the act because, in reviewing the State withholding tax changes, the Revenue Laws Study Committee became concerned about the scope of information the Secretary could request. The State withholding tax law required a person who must file a withholding tax return to provide any information requested by the

Secretary. The Committee wanted to ensure that all information requested is related to a determination of tax liability. The requirement that a person provide any information requested by the Secretary appears throughout Chapter 105 of the General Statutes. To provide a uniform policy on tax information, the Committee therefore decided to amend the appropriate statute in Article 9 of Chapter 105 rather than make a change that applies only to information about withholding taxes. Article 9 of Chapter 105 contains the administrative provisions that apply to all taxes administered by the Secretary under that Chapter.

1994 Chapter 662 (Senate Bill 1619, Sen. Winner of Buncombe)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DETERMINING CERTAIN TAXABLE INCOME AND TAX EXEMPTIONS AND TO RESOLVE AN UNINTENDED CONFLICT BETWEEN THE STATUTE OF LIMITATIONS FOR CERTAIN TAX REFUNDS AND THE LAW ALLOWING DEDUCTIONS FOR CARRYBACKS, BAD DEBTS, AND WORTHLESS SECURITIES.

This act rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1993, to January 1, 1994, and revises the tax refund statute of limitations to eliminate an unintended conflict between that statute and the law allowing deductions for carrybacks, worthless debts, and worthless securities.

The act updates the Internal Revenue Code reference, thus making recent amendments to the Code applicable to the State to the extent that State tax law previously tracked federal law. This update has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law. The franchise tax, gift tax, highway use tax, inheritance tax, insurance company premiums tax, and intangibles tax also determine some exemptions based on the provisions of the Code. The federal Omnibus Budget Reconciliation Act of 1993 enacted a number of different changes that affect individual and corporate income tax. The following are among the most important of the federal changes that affect the State:

1. Changes in the moving expense deduction.
2. Valuation of securities dealers' inventory at fair market value; securities not in inventory are considered to have been sold at fair market value.
3. Reduction of the amount of qualifying business meals and entertainment expenses that may be deducted, from 80% to 50%.
4. Repeal of the deduction for certain club dues.
5. Expansion of the rules for amortization of certain intangible business assets, including goodwill.
6. Elimination of passive loss restrictions for certain real estate professionals.
7. Retroactive extension of the health insurance deduction for self-employed individuals.

8. Increase in the recovery period for depreciation of non-residential property, from 31.5 years to 39 years.
9. Deduction for wages of the CEO and four highest paid officers of a public corporation limited to $1 million each.
10. Repeal of the deduction for lobbying expenses.

The act also eliminates an inconsistency in the tax law. Since 1989, the State individual income tax law has conformed to the federal law that allows a taxpayer to carry net operating losses and certain capital losses back to the three previous tax years and then forward for fifteen years. Under the new law, the first tax year to which a loss could be carried back is 1989, which means that carrybacks were allowed beginning with losses incurred in 1992. To deduct the loss carryback for the 1989 tax year, the taxpayer must file an amended return for that year. The taxpayer would first learn of the loss in preparing the tax return for the 1992 tax year, which was due April 15, 1993, for calendar year taxpayers. Under federal law, the taxpayer has three years from the due date of the 1992 return to claim the loss carryback on an amended return for 1989. Under prior North Carolina law, however, the normal statute of limitations applied: the loss had to be claimed within three years after the due date of the 1989 return. Thus, in most cases, the taxpayer would have had to file the amended return within days or weeks of learning the deduction was available.

This discrepancy in the law occurred because, at the time the law was changed to allow loss carryback deductions, no conforming change was made to the statute of limitations to allow time to file for the deductions. The act makes this conforming change so that the usual three-year period for claiming refunds will run, in the case of loss carryback deductions, from the due date of the return for the year the loss occurs rather than the year to which the deduction is carried back.

Another change made by the act conforms the State individual income tax law to the federal law that allows a seven-year period for claiming a refund due to a deduction for a worthless debt or a worthless security. This longer period is considered equitable because of the complexity under federal law of determining when a debt or security became worthless and, consequently, which year is the appropriate year for taking the deduction. A security becomes worthless for federal tax purposes not when it loses value but when the taxpayer has no reasonable expectation that it will become valuable at some future time. A debt becomes worthless for federal tax purposes when there are identifiable events that have caused the taxpayer to reasonably abandon hope of ever recovering any payment. In many cases, a taxpayer may take the deduction for the wrong year and learn much later that the deduction should have been taken for a different year. Without the longer statute of limitations, the taxpayer could not then file an amended return to take the deduction and claim a refund for the appropriate year.

The conforming changes made by the act to the statute of limitations are retroactive to the 1989 tax year, the year in which the changes were first needed. Interest on refunds due to loss carrybacks will run, however, only from 45 days after the filing date of the return for the year in which the loss occurred rather than from the year to which the loss is carried back. For example, if the taxpayer is a calendar year taxpayer, interest on a refund for a loss that occurred in 1992 and is carried back to 1989 will run only from May 30, 1993, which is 45 days after the April 15 due date of the 1992 return.

The Department of Revenue estimates that the revenue gain from conforming the Internal Revenue Code reference to the latest federal changes will be approximately $5 million in the 1994-95 fiscal year. The estimated loss from the net operating loss carryback change is a one-time loss of $3.4 million in the 1994-95 fiscal year. Therefore, the net impact of this act is a gain to the General Fund of $1.6 million for the 1994-95 fiscal year and a gain of at least $5 million for each fiscal year thereafter.

1994 Chapter 674 (Senate Bill 716, Sen. Kerr)

AN ACT TO MODIFY THE CORPORATE INCOME TAX CREDIT FOR CONSTRUCTION OF A COGENERATING POWER PLANT BY (1) PROVIDING THAT A PARTNERSHIP MAY QUALIFY FOR THE CREDIT, (2) CLARIFYING THAT A PARTNERSHIP MAY PASS AN INCOME TAX CREDIT THROUGH TO ITS PARTNERS, (3) EXPANDING THE CREDIT TO INCLUDE NATURAL GAS COGENERATING POWER PLANTS, (4) PROVIDING AN ALTERNATIVE METHOD TO CALCULATE THE CREDIT, (5) LIMITING THE AMOUNT OF CREDIT THAT MAY BE ALLOWED EACH YEAR EFFECTIVE BEGINNING IN 1994, AND (6) RESTRICTING THE CREDIT TO NATURAL GAS COGENERATING POWER PLANTS EFFECTIVE BEGINNING IN 1998.

This act modifies the corporate income tax credit for construction of a cogenerating power plant and codifies the principles that apply to all income tax credits of partnerships. The modifications to the cogenerating power plant tax credit that broaden the credit are effective for taxable years beginning on or after January 1, 1993, and the modifications that limit the credit become effective for taxable years beginning on or after either January 1, 1994 or January 1, 1998, as explained below. The codification of the principles that apply to all income tax credits of partnerships is effective for taxable years beginning on or after January 1, 1993. The changes to the cogenerating power plant tax credit are expected to decrease General Fund tax revenue annually by an amount that ranges from $275,000 in fiscal year 1994-95 to $800,000 in fiscal year 1997-98; codification of the principles that apply to income tax credits of partnerships has no fiscal impact.

The cogenerating power plant tax credit, set out in G.S. 105-130.25, is a corporate income tax credit that has no parallel individual income tax credit. Until this act, the credit applied to 10% of the costs of purchasing and installing in a power plant equipment that sequentially produced electrical or mechanical power and useful thermal energy from a shared power source that used a fuel other than residual oil, middle distillate oil, gasoline, natural gas, or liquid propane gas. The credit was allowed only for costs paid during the taxable year, could not exceed the amount of tax owed for the taxable year, and could not be carried forward or backward if the allowable credit exceeded the amount of tax owed.

The act both broadens and limits this tax credit and sets out the current administrative practice concerning the availability of the credit to a corporate partner in a partnership. Section 1 of the act broadens the credit in two ways. First, it extends the credit to cogenerating equipment

fueled by natural gas. Second, it gives a corporation the option of cumulating costs paid for cogenerating equipment in years before a plant becomes operational and claiming a credit for the cumulated costs in the year the plant becomes operational. Prior to this act, natural gas was not an allowable fuel source and the cost of cogenerating equipment could be claimed as a credit only in the year the cost was paid.

If a corporation chooses the optional method of calculating costs and claims a credit for cumulated costs in the year the plant becomes operational, the credit cannot exceed one-fourth of the amount of corporate income tax the corporation owes for the taxable year reduced by any other credits allowed the corporation. Other credits allowed the corporation for the taxable year include carry-forwards of the cogenerating credit. If the credit claimed exceeds this one-fourth limitation, the excess can be carried forward for the next 10 taxable years. To carry forward an amount that exceeds the one-fourth limitation, however, a corporation must submit an application for the credit for each year the corporation seeks to claim the carry-forward.

Sections 2 and 4 of the act limit the credit in three ways. Section 2 sets an annual ceiling on the credit and creates a one-year delay in taking the credit. Section 4 eventually allows a credit only for cogenerating equipment fueled by natural gas.

Beginning in taxable year 1994, the act sets a ceiling of $5 million on the amount of cogenerating power plant credits that can be taken in a taxable year by all corporations combined. The amount of any cogenerating credits to be carried forward from a previous year is included in determining whether the total amount claimed for a year exceeds the ceiling. Current law does not set a ceiling on the total amount of credits that can be claimed. The amounts claimed for the taxable years for which the credit has been in effect have ranged from zero to $2.9 million, and the total amount claimed for all taxable years for which the credit has been in effect is approximately $6.1 million. The ceiling was enacted to prevent a large loss in any one year due to the new option of cumulating costs.

Under the revised credit, if the amount claimed by all corporations exceeds the $5 million ceiling, the credit claimed by each corporation is reduced proportionally until the total reduced amount does not exceed the ceiling. A corporation whose credit is reduced to meet the ceiling may carry the amount of the reduction forward for the next 10 taxable years. To carry the amount forward, however, the corporation must submit an application for the credit for each year the corporation seeks to claim the carry-forward. An annual application is necessary to enable the Department of Revenue to determine for each year whether the amounts claimed exceed the $5 million ceiling.

The act further limits the credit by delaying by one year the tax period for which the credit can be taken. Until taxable year 1994, a corporation that claims a credit for a taxable year takes the credit for the year the credit is claimed. Thus, a corporation that claims a credit for the 1993 taxable year can subtract the amount of the credit from the amount of tax due for the 1993 taxable year. Starting with the 1994 taxable year, a corporation must apply for the credit in one year and then take the credit in the following year. This delay is a result of the $5 million ceiling. The delay allows the State to determine in advance of a taxable year whether the credits claimed for that year will exceed the ceiling and to notify corporations of any reduction in the credits claimed in the event the amount claimed by all corporations exceeds the ceiling.

The final limitation the act imposes on the credit is to require the cogenerating equipment to be fueled by natural gas beginning in taxable year 1998. Thus, the act first allows natural gas as

a fuel source beginning in taxable year 1993 and then excludes all fuel sources other than natural gas beginning in taxable year 1998.

The act also changes the language of the credit to include a partnership as well as a corporation. This is a clarifying change rather than a substantive change, however, because corporate partners of a partnership could already take the credit under the prior law because they were corporations. Corporate partners of partnerships were allowed to take corporate income tax credits in proportion to the corporate partner's distributive share of the partnership income.

Because the application of the cogenerating credit to a corporate partner was not clear, the act codifies the principles that apply to the eligibility of a partnership for any corporate or individual income tax credit. Section 3 of the act sets out these principles. Under these principles, a partner in a partnership is eligible for a credit if the partnership qualifies for the credit and the partner could take the credit if the partner stood in the position of the partnership. Thus, an individual partner in a partnership could not take the cogenerating credit because the credit is not available to individuals.

Partnerships qualify for corporate income tax credits on behalf of their corporate partners. Whether a partnership qualifies for an individual income tax credit depends on the wording of the credit. For example, a partnership qualifies for an individual income tax credit that is allowed to a person, but not one that is allowed to an individual or a taxpayer.

The amount of a credit that can be taken by a partner is determined by the partner's distributive share of the partnership in accordance with sections 702 and 704 of the Internal Revenue Code. Under those sections, a partner's distributive share is determined by the partnership agreement. If the partnership agreement does not provide for the distributive shares, however, a partner's share is determined in accordance with the partner's interest in the partnership.

Any limit on the amount of a credit that can be taken or any other restrictions on a credit apply separately to each partner of a partnership that is eligible for a credit. Thus, if a credit cannot exceed 25% of a person's tax liability, the limit is calculated separately for each partner. This principle results from the nature of a partnership as a pass-through entity. In a partnership, the partners and not the partnership itself is liable for any income tax due on income earned by the partnership.

1994 Chapter 679 (Senate Bill 906, Sen. Daniel)

AN ACT TO MAKE VARIOUS SUBSTANTIVE AMENDMENTS TO THE WORKERS' COMPENSATION ACT AND TO MAKE RELATED CHANGES.

This act amends the Workers' Compensation Act to make it fairer to employees as well as to employers and to make it simpler and easier to enforce. Among the changes made by the act are two that affect tax information. The act requires employers to include information relating to their workers' compensation coverage on the annual informational return they must file with the Department of Revenue concerning the taxes deducted and withheld from their employees' wages. The employers must name their workers' compensation insurance carriers and the number and expiration dates of their policies. If self-insured, the employers will report the name of their self-insurance group, if applicable, the names of the third parties that administer their

self-insurance programs, and the employer code numbers used by the Department of Insurance for these self-insureds. The act also amends the confidentiality provisions of the revenue laws to allow the Department of Revenue to release to the Industrial Commission the information it collected on the annual informational returns concerning employers' workers' compensation coverage. The act provides that these changes became effective on the date it was ratified, July 5, 1994. Employers will be required to provide the information beginning with their next annual informational return, which is due in early 1995.

1994 Chapter 681 (House Bill 1944, Rep. Redwine)

AN ACT TO EXPAND THE STATE PORTS TAX CREDIT.

This act changes the State ports income tax credit by expanding it to include any charges assessed on cargo exported by a taxpayer as well as any charges paid on the cargo exported by a taxpayer. The change, recommended by the Economic Development Board of the Department of Commerce, is effective for taxable years beginning on or after January 1, 1994. It is estimated that this act will reduce General Fund revenues by approximately $50,000 annually.

Many exporters sell their products "F.O.B. plant" (free on board plant), which means that the buyer rather than the seller (exporter) pays the cost of shipping the product, including the port costs for which the State ports income tax credit is available. Under prior law, a taxpayer could claim the ports credit only for charges paid by the taxpayer. Therefore, a taxpayer who exported a product that is shipped "F.O.B. plant" could not take the credit for that export because the taxpayer did not pay for the shipping costs.

This act eliminates the requirement that a person who claims the ports credit must have paid the shipping cost. It allows a taxpayer to claim a credit for all of the port costs assessed on cargo exported by the taxpayer, regardless of who paid the costs.

The 1992 General Assembly enacted the State ports income tax credit to encourage exporters to use the two State-owned port terminals at Wilmington and Morehead City. When the credit was enacted, 70% of North Carolina exporters and importers used ports in other states to move their cargo, even though the North Carolina ports had the capacity to accommodate the additional vessels and cargo. The amount of credit allowed is equal to the amount of charges paid to the North Carolina Ports Authority in the taxable year that exceeds the average amount of charges paid to the Authority for the past three years. The credit is limited to 50% of the tax imposed on the taxpayer for the current year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years. The cumulative credit may not exceed one million dollars per taxpayer. The credit will expire in 1996.

1994 Chapter 697 (House Bill 1775, Rep. Luebke)

AN ACT TO RESOLVE A CONFLICT IN THE DEALER LICENSE PLATE LAW CONCERNING THE USE OF DEALER LICENSE PLATES ON VEHICLES USED BY A DEALER IN A BUSINESS THAT IS SEPARATE FROM THE BUSINESS OF SELLING MOTOR VEHICLES, AND TO PROVIDE THAT A REGISTRATION CARD

ISSUED FOR A DEALER PLATE IS NOT REQUIRED TO BE SPECIFIC FOR THAT DEALER PLATE.

This act makes two changes in the dealer plate laws. First, it establishes a uniform policy on the display of dealer license plates on motor vehicles that are used in a business that is separate from a dealer's business of selling motor vehicles. It does this by repealing the one exception to the general prohibition on this type of use. Second, it allows a registration card for dealer plates to be a generic card that applies to all dealer plates issued to the same dealer rather than a card that is specific to a particular dealer plate.

The first of these two changes was proposed by the Revenue Laws Study Committee. It becomes effective July 1, 1996. The second change was added by the House Transportation Committee. It became effective upon ratification, July 6, 1994.

With one exception, the dealer license plate laws prohibit a dealer from putting a dealer license plate on a motor vehicle that is used by the dealer in a business that is separate from the business of selling motor vehicles. The one exception is for a motor vehicle dealer who also sells, trades, or services farm tractors or other farm-related equipment. The law allows these dealers to put a dealer license plate on a motor vehicle that is used to haul the farm tractors or other farm-related equipment.

This one exception to the general prohibition is the result of two conflicting provisions concerning dealer license plates that were enacted in the 1993 Session. Section 169.4 of Chapter 321 of the 1993 Session Laws, the Current Operations Appropriations Act, amended the dealer license plate laws by inserting the exception to the general prohibition. Chapter 321 was ratified on July 9, 1993; the exception was effective July 1, 1993. On July 12, 1993, the General Assembly enacted Chapter 440 of the 1993 Session Laws. Chapter 440 rewrote the dealer license plate laws to restrict the number of plates that can be issued to a dealer and to set out clearly the existing restrictions on the use of dealer plates. That act, which was recommended by the Revenue Laws Study Committee, became effective October 1, 1993.

Chapter 440 made no exceptions to the general prohibition against the display of a dealer license plate on a motor vehicle that is used in a business that is separate from a dealer's business of selling motor vehicles. The exception created by Chapter 321 remained, however, even though the exception was contrary to the intent of Chapter 440.

The result is that the current law allows a dealer who sells tractors or other farm-related equipment to put a dealer plate on a vehicle used in a business that is separate from the business of selling motor vehicles and prohibits all other dealers from a similar use of dealer plates. A dealer's business of selling motor vehicles includes only the sale of motor vehicles that must have a license plate to be driven on a highway. Consequently, if a dealer both sells and services motor vehicles, the dealer cannot put a dealer plate on a motor vehicle the dealer loans to a car owner whose vehicle is being repaired by the dealer. That dealer also cannot put a dealer license plate on a motor vehicle the dealer uses to pick up parts for the vehicles the dealer services.

Dealers have been and are now generally restricted from using dealer license plates on motor vehicles that are used in a separate business of the dealer because this use is contrary to the purpose of dealer license plates and is difficult to reconcile with the requirement that a motor vehicle displaying a dealer license plate be part of the inventory of the dealer. The purpose of a dealer license plate is to allow a customer of the dealer to test-drive a motor vehicle offered for sale by the dealer and to allow the dealer to pick up a motor vehicle from its point of purchase by

the dealer and to have the vehicle prepared for sale. Furthermore, a motor vehicle used regularly by the dealer for property-hauling purposes or any other purpose is not in fact part of the dealer's inventory.

The Revenue Laws Study Committee is concerned about the improper use of dealer plates because of the effect of the improper use on State and local revenues. A motor vehicle that is improperly driven with a dealer license plate escapes local property taxes, escapes State motor vehicle title and registration fees, and receives an unfair advantage on automobile insurance. It escapes property taxes because it is supposedly part of the inventory of the dealer and is, therefore, exempted from property tax by the exemption of inventory. It escapes motor vehicle title and registration fees because the title to the vehicle has not been transferred to the person who uses the vehicle. It enjoys an unfair advantage on insurance because it is insured through the dealer's blanket liability insurance policy rather than through a policy that is specific to the vehicle.

The second change made by the act implements a recommendation of the automobile dealers. The dealers explained that the requirement of having the proper registration card in a vehicle that displays a dealer plate becomes a logistical problem when the plates are switched in a short period of time from one vehicle to another. To solve the problem, they suggested that a dealer receive the same number of registration cards as dealer plates, but that each registration card be interchangeable and apply to any of the plates. Section 2 of the act changes the law to accommodate this request. The Division of Motor Vehicles of the Department of Transportation plans to implement the change by printing on a registration card issued for a dealer plate the series of dealer plates to which the card applies.

1994 Chapter 726 (Senate Bill 1473, Sen. Kerr)

AN ACT TO ADDRESS MOTOR FUEL TAX EVASION.

This act addresses two areas of motor fuel tax evasion: cross-border movements of fuel and the use of non-tax-paid fuel in a motor vehicle for highway use. The parts of the act addressing cross-border movements of fuel were recommended by the Revenue Laws Study Committee. The act becomes effective January 1, 1995; the resulting reduction in fuel tax evasion is expected to increase collections by an unknown amount, possibly several million dollars.

Cross-border Movement of Fuel

A cross-border movement of fuel is a movement of fuel across state borders. To avoid fuel taxes in a state with a high fuel tax rate, a person can buy fuel in one state, pay that state's tax on the fuel, bring the fuel to a state with a higher fuel tax, and then sell the fuel in that higher fuel tax state without paying the higher rate of tax. North Carolina is particularly vulnerable to tax evasion by cross-border movements of fuel because its motor fuel tax rate is 22¢ a gallon compared to 16¢ a gallon in South Carolina and 7.5¢ a gallon in Georgia. The act combats this problem through improved documentation and reporting requirements for interstate movements of fuel.

The most important change the act makes concerning cross-border movements of fuel is the "destination state" requirement. Under this requirement, a shipping paper issued by a terminal operator for fuel to be delivered by transport truck or railroad tank car must state the destination state of the fuel, the driver of the truck or the rail carrier must deliver the fuel in accordance with the listed destination state, and the buyer of the fuel is prohibited from accepting delivery if the destination state on the shipping document is not correct. Section 4 of the act contains these

requirements along with sanctions for failure to comply with the requirements. For the first violation, there is a civil penalty equal to the amount of fuel tax payable on the improperly transported or diverted fuel. For a second or subsequent violation, there is a civil penalty equal to the greater of $1,000 or five times the amount of fuel tax payable on the improperly transported or diverted fuel.

Two of our neighboring states, Virginia and Georgia, have already enacted destination state legislation. The Uniformity Committee of the Motor Fuel Tax Section of the Federation of Tax Administrators is strongly encouraging all states to enact similar legislation.

In addition to the destination state requirement, the act modifies the kind of information that must be reported to the Secretary by those who receive or deliver fuel by pipeline, marine vessel, railroad tank truck, or transport truck. Section 6 of the act requires these transporters of motor fuel to report all fuel imported into or exported from the State.

Prior law required these transporters to report all fuel imported into the State and all fuel transported from one place in the State to another place in the State. It did not require the transporters to report fuel exported from the State and it did not limit reports of tank truck movements to movements of fuel by trucks that carry at least 4,200 gallons. The prior law was not enforced, however. Section 6 therefore changes the reporting requirements by deleting both the requirement that intrastate movements be reported and the requirement that trucks designed to carry fewer than 4,200 gallons file reports and by expanding the law to include reports of exports. The section also changes the date a report is due from the 10th of each month to the 25th. This later date corresponds better to the tax reports of motor fuel, which are due either on the 20th or the 25th of each month.

The other sections of the act that concern cross-border movements of fuel make conforming changes needed to implement the destination state requirement or the modified reporting requirements. Section 1 adds definitions of "bulk plant," "destination state," "rack," "terminal," "terminal operator," and "transport truck," and clarifies the definitions of "import" and "export." All of the added or modified definitions, except that of "transport truck," reflect definitions used by the Internal Revenue Service or recommended for use by the Uniformity Committee of the Motor Fuel Tax Section of the Federation of Tax Administrators. The definition of "transport truck" is used to distinguish the large transport trucks that typically carry between 8,000 and 9,000 gallons of motor fuel from the small "tank wagons" used to carry less than 4,200 gallons.

Section 2 requires terminal operators who are not already licensed as distributors of gasoline or suppliers of diesel fuel to register with the Secretary of Revenue. There are only a few of these in the State. The registration requirement is needed to enable the Department of Revenue to enforce the requirement that terminal operators print the destination state on shipping documents and make reports to the Secretary.

Section 3 modifies the requirements that apply to persons whose only connection with motor fuel in this State is to buy it for export to another state. Under prior law, these persons could buy the fuel tax-free because it is exported to another state, and they did not have to show that they were licensed for motor fuel tax purposes with the state to which the fuel is exported. The act requires these buyers of motor fuel to establish that they are registered with another state for the payment of fuel taxes to that state before they can buy tax-free fuel in this State.

Section 5 makes a conforming change to the list of Class 1 misdemeanor gasoline tax violations to include failure to give or show a shipping document when required by Section 4 of the act. Section 5 also provides that the violations apply to a "person" rather than a "distributor," so that terminal operators as well as licensed distributors will be covered.

Sections 7 and 8 make conforming changes to the diesel fuel tax laws. Section 7 makes the destination state requirement applicable to shipments of diesel fuel; it deletes the provisions of a statute that duplicate G.S. 105-228.90 and substitutes the destination state requirement for diesel fuel. Section 8 conforms the list of Class 1 diesel fuel tax violations to the list of gasoline tax violations by adding to the list failure to give or show a shipping document when required.

Non-Tax-Paid Fuel Used on the Highways

Diesel fuel is subject to federal and State per gallon excise taxes if it is used to operate a motor vehicle on a highway. Beginning in 1994, the federal government began requiring non-tax-paid diesel fuel, which is supposed to be used only for non-highway uses, to be dyed. Diesel fuel on which the tax has been paid is therefore "clear" diesel because it is not dyed. Under the federal law, it is unlawful to use dyed diesel fuel for a highway use, and a person who operates on a highway a motor vehicle whose supply tank contains dyed diesel fuel is liable for a civil penalty equal to $10 a gallon or $1,000, whichever is greater.

Section 10 of this act makes it a State violation as well as a federal violation to use dyed diesel fuel for a highway use. A person who operates on a highway a motor vehicle whose supply tank contains dyed diesel fuel is guilty of a Class 1 misdemeanor and is liable for a civil penalty. The penalty is the greater of $1,000 or five times the amount of motor fuel tax payable on the fuel in the supply tank. This penalty is in addition to any motor fuel tax assessed.

1994 Chapter 739 (Senate Bill 605, Sen. Seymour)

AN ACT TO EXEMPT WORKS OF ART FOR STATE BUILDINGS FROM STATE AND LOCAL SALES TAXES.

As its title indicates, this act exempts certain works of art from State and local sales and use taxes. The works of art affected are those purchased for State buildings under the State's "Art Works in State Buildings Program," which is set out in Article 47A of Chapter 143 of the General Statutes. The exemption becomes effective September 1, 1994.

The Art Works in State Buildings Program requires that one-half of one percent of the amount appropriated to construct a State building be used to buy works of art for the building. A State building is a building that is to be used by a State agency and is to be constructed or renovated by means of a State appropriation of $1 million or more. A work of art can be sounds, such as the North Carolina sound tape in the Department of Revenue, a mural, such as the one on the side of the Department of Public Instruction's Education Building, or more traditional art forms such as sculptures or paintings. The only restriction on works of art is that they cannot be reproductions of original art by mechanical means.

This exemption is the second sales and use tax exemption specifically for works of art. G.S. 105-164.13(29) exempts works of art purchased by the North Carolina Museum of Art in whole or in part with money received through gifts or other donations.

The exemption delays the timing but not the amount of revenue received by the State. It does not affect the amount of local sales and use tax paid by the State because the State receives a refund under G.S. 105-164.14(e) of any local sales and use taxes paid. Thus, the act allows the State to retain revenue it would otherwise receive in the form of a refund. The act does not affect the net amount of State revenue because the reduction in the State's cost for the required artwork in State buildings offsets the reduction in State sales and use tax revenue.

The exemption applies to the 2% local sales and use taxes as well as the 4% State sales and use taxes. The exemption from local sales and use taxes results from G.S. 105-467. That statute limits local sales and use taxes to items that are taxed by the State at the general State 4% sales tax rate.

1994 Chapter 745 (House Bill 1725, Rep. Jarrell)

AN ACT TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES, TO IMPROVE THE ADMINISTRATION OF THE SOFT DRINK EXCISE TAX, AND TO EXTEND THE SUNSET OF A TAX CREDIT, TO AMEND THE LAW REGARDING APPLICATION FOR CERTIFICATION AS A CLINICAL SOCIAL WORKER, TO RESTORE THE SOFT DRINK TAX EXEMPTION FOR NATURAL JUICE WITH NO ADDITIVES OTHER THAN VITAMINS, MINERALS, OR SUGAR, AND TO MAKE THE EFFECTIVE DATE OF CHANGES MADE DURING THE 1993 SESSION TO THE CONSUMER CREDIT SALE LAWS RETROACTIVE.

This act makes a number of technical and clarifying changes to various revenue laws and makes four substantive changes in these laws. The act also makes two substantive changes unrelated to revenue laws. The original bill, which consisted only of technical and clarifying changes to various revenue laws and related statutes, was recommended by the Revenue Laws Study Committee.

The first substantive change modifies liability for and payment of the soft drink excise tax. This change allows a person who is not otherwise liable for the tax to assume liability for the tax, effective October 1, 1994. It does this at the request of soft drink taxpayers who would rather be responsible for paying the tax than have to trace the method of shipment of soft drink products they receive in order to determine their liability. This change is expected to be revenue-neutral.

The soft drink excise tax is payable by the person who is the first to bring the product into the State. Who the first person is depends on how the product is brought into the State. If it is brought in by common carrier, the person who receives it is the person to bring it in. If it is brought in on a truck owned or operated by the out-of-state seller of the product, the out-of-state seller is the person to bring it in.

Taxpayers of the soft drink excise who receive products from a person who both transports some products by the person's own trucks and ships others by common carrier often find it difficult to sort out the products for which they are liable and those for which they are not. Sections 32 and 33 create a soft drink certificate of liability that allows a taxpayer to assume liability

for all soft drink products the taxpayer acquires, regardless of their mode of shipment. The act does not change the rate of tax or the total amount of tax payable.

The second substantive change extends the sunset on the corporate and individual income tax credits for constructing a fuel ethanol distillery. Under prior law, the credits were set to expire January 1, 1996. The bill extends the expiration date until January 1, 1998. A credit has never been claimed under these sections. The credit is allowed for 20% of the cost of constructing a distillery to make ethanol, at least 80% of which will be used for fuel for motor vehicles or airplanes, as a de-icer, or in a process that removes pollutants from coal or other sources of fuel. Section 34 extends the corporate credit and Section 35 extends the individual credit.

Sections 36 through 38 make the third substantive change. They prohibit a county from charging a disposal fee for the disposal of a white good while the white goods disposal tax is in effect. A white goods disposal tax is levied on the sale of a white good. The tax is $5.00 if the white good does not contain chlorofluorocarbons and it is $10 if the white good does contain chlorofluorocarbons. Although under prior law a county could not charge an additional fee to dispose of a white good, it could charge whatever fee it levied for the disposal of other types of municipal solid waste. Many taxpayers complained about the disposal fee, which was in addition to the white goods disposal tax. This change became effective August 1, 1994.

The fourth substantive change exempts from the soft drink excise tax juice whose only added ingredients are sugar, vitamins, minerals, or extracts of the juice. These juices were exempt from the excise tax prior to 1991. In 1991, the General Assembly replaced the exemption for soft drinks that contained at least 35% natural fruit juice with an exemption for soft drinks that are 100% natural fruit juice. The definition of "natural" now specifies that a product is not "natural" if it has sugar as an added ingredient.

Under the prior law, bottled juice that would be natural if it did not contain sugar was taxed at the rate of one cent (1¢) per bottle. Juice concentrate that would be natural if it did not contain sugar was taxed at the rate of $1.00 per gallon, or four-fifths of a cent (4/5¢) an ounce. Under the act, both forms of juice are exempt from the tax beginning October 1, 1994. The revenue loss from this exemption is expected to be $1 million in fiscal year 1994-95 and $1.3 to $1.5 million for each fiscal year thereafter. Section 38.2 contains this exemption.

The last two substantive changes are unrelated to the revenue laws. The first of these two changes, made by Section 38.1, extends the deadline that allows a person with experience in clinical social work to apply for certification as a clinical social worker without meeting the educational requirements. Prior to this act, a person with at least one year experience in social work could apply for certification without meeting the educational requirements of the Social Worker Certification Act if the person applied for certification prior to January 1, 1993. This act extends the deadline to include people who applied for certification between December 1, 1993, and January 15, 1994.

The second of these two changes, made by Section 38.3, amends a law enacted by the General Assembly last session. Prior to October 1, 1993, the law required that payments made by a buyer be applied to the purchases bought on credit in proportion to the amount owing on each purchase. Last year, the General Assembly changed the law to reflect the more common accounting practice of applying payments first to finance charges and then to principal in the order that each obligation is assumed. That act, however, did not address how merchants were to apply payments on accounts to which items had been charged prior to October 1, 1993. The implementation problem created by this oversight meant merchants had to bifurcate each account

and divide each payment made so as to apply payments proportionally on items charged before October 1, 1993, and to apply payments on a "first in-first out" basis to charges made after October 1, 1993. This section solves the implementation problem by allowing merchants to treat payments received on or after October 1, 1988, on a "first in-first out" basis if the seller determined, and disclosed to the buyer, that this accounting method would be used at the time the items were charged.

The technical changes are described below by section:

Section	Explanation
1.	Repeals a Session Law that duplicates another Session Law, Section 18 of Chapter 485 of the 1993 Session Laws.
2.	Adds a missing catchline to a subdivision.
3.	Conforms statute to existing administrative practice that soft drink base products are taxed on a per container basis. If a container contains less than the unit measure (a gallon for liquid products and an ounce for dry products), the tax is reduced proportionally.
4.	Reenacts a provision that may not have been rollcalled when originally enacted and corrects a grammatical error.
5.	Clarifies that the deduction described in this subdivision is based on two forms of the same federal adjustment. This change was requested by the Department of Revenue.
6.	Removes an unnecessary cross-reference and a reference to a repealed statute and substitutes a reference to the Code.
7.	Provides an individual income tax deduction to prevent double taxation in cases in which the basis of property for State tax purposes exceeds the basis of property under the Code. For example, individual taxpayers who claim certain federal income tax credits may be required to make a reduction in the basis of their property; if there is no corresponding State tax credit, the basis for State tax purposes will be higher.
8.	Clarifies that the reduction in basis required when a taxpayer takes a tax credit for a qualified business investment applies only if the taxpayer was not required to make a corresponding adjustment under the State corporate income tax.
9.	Deletes a reference to a repealed subsection and clarifies that certain references to "the Secretary" mean the Secretary of State.
10.	Adds a missing catchline.
11.	Makes a language change that was in the 1993 Session Laws but did not go into effect due to a redlining error.
12.	Deletes a word that was inadvertently retained due to a redlining error and modernizes and clarifies language.
13.	Makes conforming changes to reflect the fact that the gasoline and oil inspection fee has been renamed the gasoline and oil inspection tax.

14. Removes a redundant sentence, adds a catchline, and modernizes and clarifies language.

15. Corrects an incorrect word.

16. Corrects an incorrect term.

17. Removes an obsolete reference to pensions for Confederate soldiers and widows and deletes redundant provisions.

18. Removes language that gives the incorrect impression that there are restrictions on whom a taxpayer is permitted to consult with and clarifies that an interview will not be suspended if the taxpayer is already accompanied by a representative.

19. Makes a conforming change to reflect the fact that the gasoline and oil inspection fee has been renamed the gasoline and oil inspection tax.

20-25. Changes the word "propel" to "operate" to clarify that fuel used to operate a motor vehicle on the highways is equally taxable whether the vehicle is moving or idling.

26. Makes a conforming change to reflect the fact that the gasoline and oil inspection fee has been renamed the gasoline and oil inspection tax and changes the word "propel" to "operate" to clarify that fuel used to operate a motor vehicle on the highways is equally taxable whether the vehicle is moving or idling.

27. Repeals a redundant statute. The substance of this statute is contained in Article 9 of Chapter 105 of the General Statutes, which governs the administration of taxes collected by the Department of Revenue.

28. In 1993, the fees for nonresident malt beverage permits and nonresident wine vendor permits were raised from $25.00 to $50.00. The 1993 legislation failed to make a conforming increase from $25.00 to $50.00 in the fee for a combined nonresident malt beverage and nonresident wine vendor permit. This section makes the conforming increase in the combined permit fee.

29. Makes a conforming change to reflect the fact that the gasoline and oil inspection fee has been renamed the gasoline and oil inspection tax. Also clarifies and modernizes the language of the statute.

30. Deletes a reference to a repealed subsection.

31. Changes a cross-reference to reflect that the powers of a regional economic development commission, formerly listed in a single statute, are now listed in several statutes in Article 2 of Chapter 158 of the General Statutes.

32-38.3 Discussed above.

39. Clarifies that real and personal property belonging to the Woodmen of the World is exempt from property tax under the exemption for fraternal or civic orders and organizations operated for nonprofit benevolent, patriotic, historical, charitable, or civic purposes. This organization is a kind of fraternal order.

40. Provides that the act is effective upon ratification except as otherwise provided: Section 11 becomes effective July 1, 1995, Sections 32 and 33 (soft drink tax liability) become effective October 1, 1994, Section 36 (no white goods fee) became effective August 1, 1994, Section 38 (white goods fee when tax repealed)

becomes effective July 1, 1998, and Section 38.2 (soft drink exemption for certain juice with sugar) becomes effective October 1, 1994.

1994 Chapter 772 (Senate Bill 733, Sen. Sherron)

AN ACT TO ESTABLISH A PARKS AND RECREATION TRUST FUND.

This act is part of a continuing effort to secure additional funds for State and local park needs. It takes a first step towards this goal by establishing the Parks and Recreation Trust Fund as a special revenue fund and by annually appropriating revenue in this Fund to the Department of Environment, Health, and Natural Resources to be used for the State Parks system (75%), matching grants to local units for local parks (20%), and the Coastal and Estuarine Water Beach Access Program (5%). As a special revenue fund, revenue in the new Trust Fund will not revert to the General Fund at the end of a fiscal year and interest and other investment income earned by the Fund will be credited to it. The act is only the first step towards the goal of securing additional funds for State and local park needs because it does not provide a source of revenue for the new Trust Fund. The act is effective upon ratification.

Although the act does not provide a source of revenue for the new Trust Fund, it declares that it is the intent of the General Assembly to dedicate an amount equal to 75% of the State's share of the deed stamp tax imposed by G.S. 105-228.30 to the new Trust Fund and to dedicate an additional 10% of the State's share of this tax to the Recreation and Natural Heritage Trust Fund, which the act renames as the Natural Heritage Trust Fund. To implement this intent, the General Assembly must pass another act making the changes to the use of the deed stamp tax.

The deed stamp tax is an excise tax on instruments transferring real property. It is collected by the register of deeds of the county in which the property is located and is collected when the deed transferring the property is recorded. The tax rate is $1.00 for each $500.00 (0.2%) of the value of the property conveyed. Each county must remit one-half of the net proceeds of the tax to the Department of Revenue. The requirement that each county send one-half of the tax to the State was enacted in 1991 when the State doubled the tax rate from 50¢ for each $500.00 of value to $1.00 for each $500.00 of value and kept the increase.

The Department of Revenue credits 15% of the State's share of the tax to the Natural Heritage Trust Fund and credits the remaining 85% to the General Fund. The State receives approximately $14 million from this tax each year. If the intent language in this act is implemented, the State's share of the tax would be allocated among the new Parks and Recreation Trust Fund (75%), the Natural Heritage Trust Fund (10%), and the General Fund (15%)

1993 Tax Law Changes

Prepared by Cynthia Avrette, Sabra J. Faires, and Martha H. Harris

1993 Chapter 12 (House Bill 81, Rep. Gamble)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED TO DETERMINE CERTAIN TAXABLE INCOME AND TAX EXEMPTIONS.

This act rewrites the definition of the Internal Revenue Code used in various State tax statutes to change the reference date from January 1, 1992, to January 1, 1993, and it corrects an incomplete cross reference to a section of the Internal Revenue Code. Sections 1 through 7 and Sections 9 through 11 change the definition of Code, and Section 8 makes the technical correction. The act is effective for taxable years beginning on or after January 1, 1993.

Updating the reference to the Internal Revenue Code makes recent amendments to the Internal Revenue Code applicable to the State to the extent that State tax law previously tracked federal law. This update has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law. The franchise tax, gift tax, highway use tax, inheritance tax, insurance company gross premiums tax, and intangibles tax also determine some exemptions based on the provisions of the Code.

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code as it existed on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of periodic updates. The answer to the question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law recently and the likelihood of continued changes, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue losses. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, 2(1) of the Constitution provides in pertinent part that the "power of taxation... shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would... be invalidated as an unconstitutional delegation of legislative power."

Each year, in deciding whether the Internal Revenue Code reference should be updated, the General Assembly considers the changes that have been made to the Code in the past year. No changes were made in the Code in 1992 that affect a tax other than the individual income tax, and the changes that affect the individual income tax are minor and are not expected to have a significant revenue impact on the State.

The minor changes to the Code were made in the federal Unemployment Compensation Amendments of 1992 and the federal Comprehensive National Energy Policy Act of 1992; no major federal revenue bill was enacted in 1992. Among other changes, these acts extended from December 31, 1995, to December 31, 1996, the date when the federal phaseout of personal exemptions for certain high-income taxpayers was to expire, allow the tax-free roll-over of certain partial distributions from qualified pension plans or qualified annuity plans, modified the monthly amount of employer-provided transportation benefits that is excludable from gross income, and simplified the payment by employers of withheld income taxes.

Recommended by the Revenue Laws Study Committee.

1993 Chapter 45 (House Bill 654, Rep. Baddour)

AN ACT TO EXPAND THE NUMBER OF COUNTIES IN WHICH THE TAX CREDIT FOR CREATING JOBS IS AVAILABLE.

This act makes the following changes in the law:

(1) It expands the existing income tax credit for creating jobs in severely distressed counties by increasing from 33 to 50 the number of counties that are considered severely distressed.

(2) It increases from 33 to 50 the number of counties that can use program income, as well as the number of counties whose cities can use program income, from certain federal block grants to establish revolving loan funds (G.S. 153A-376(f) and G.S. 160A-456(e1)).

The first of these changes is set out in the act. The second change occurs automatically when the class of "severely distressed counties" changes for purposes of the tax credit because the cited statutes are tied to that class. The act is effective for taxable years beginning on or after January 1, 1993.

This act also broadens the number of counties in which local governments are eligible for funds from the Industrial Development Fund, G.S. 143B-437A, to be used for utilities for new or proposed industrial buildings. Any county that is designated as depressed or distressed under the Industrial Development Fund is eligible for funds for utilities for existing industrial buildings; to be eligible for funds for utilities for new or proposed industrial buildings, the county must also be designated as distressed for the purpose of the tax credit. A county that is experiencing major economic dislocation, however, is eligible for funds for utilities for existing, new, or proposed industrial buildings even if it has not been designated as depressed or distressed under either the Industrial Development Fund or the tax credit.

The tax credit is available to businesses that create full-time manufacturing or industrial jobs in a severely distressed county. The credit is $2,800 for each new job. The credit must be taken in four equal installments beginning the year after the new job was created. If the new job

does not continue for this four-year period, the part of the credit not yet taken is forfeited. The credit may not exceed 50% of the tax due for a year; the part of a credit that cannot be used because of this limitation can be carried forward for five years.

The fiscal impact of this act will be phased in over four years because the credit is taken in four installments. The Department of Revenue has estimated the annual loss to the General Fund to be as follows:

Fiscal Year	General Fund Loss
1994-95	$0.5 to 1 million
1995-96	$1 to 2 million
1996-97	$1.5 to 3 million
1997-98 & later:	$2 to 4 million

When the tax credit was first enacted in 1987, the number of severely distressed counties was limited to 20. That number was increased in 1989 to 25 and was increased again in 1991 to the present 33.

Because the list of severely distressed counties the Secretary of Commerce gave the Secretary of Revenue for 1993 included only 33 counties, the act directs the Secretary of Commerce to give the Secretary of Revenue by July 15, 1993, a list of the additional 17 counties that will qualify under this act and to determine those counties based on the criteria available when the 33 counties were determined.

As more and more counties qualify for the designation "severely distressed," the name of the designation describes the broader category less accurately. Also, as the credit is expanded to more and more counties, the public purpose of the credit becomes more tenuous.

1993 Chapter 85 (House Bill 920, Rep. Redwine)

AN ACT TO REDUCE THE STATE UNEMPLOYMENT INSURANCE TAX RATE UNDER CERTAIN CIRCUMSTANCES.

This act provides employers who have a credit balance in their unemployment insurance tax account with a 30% reduction in their contribution rate for the remainder of the 1993 calendar year. It also provides these employers with a 30% reduction in their contribution rate for any calendar year in which the balance in the Unemployment Insurance Fund equals or exceeds $800,000,000 as of the preceding August 1. Roughly 80% of the more than 144,000 employers in North Carolina have a credit balance in their account.

The contributions paid by employers go into the Unemployment Insurance Fund. After deducting any refunds payable from the Fund pursuant to G.S. 96-10, the money is deposited with the secretary of the treasury of the United States to the credit of this State's account in the Unemployment Trust Fund. As the money is needed to pay benefits, it is transferred to the State and credited to the benefits account of the State's Unemployment Insurance Fund to be used to pay benefits to people who lose their job through no fault of their own.

North Carolina's account is one of the most solvent accounts of any state in the country. In 1992, the General Assembly was able to suspend the additional unemployment tax collected

from employers and credited to the Employment Security Commission Reserve Fund. This Reserve Fund bolsters the Unemployment Insurance Fund. This act goes a step further by lowering the unemployment contribution tax rate for employers with a credit balance in their unemployment insurance tax account.

1993 Chapter 140 (Senate Bill 159, Sen. Kerr)

AN ACT TO PROHIBIT DELIVERY OF NON-TAX-PAID SPECIAL FUEL INTO THE SUPPLY TANK OF A MOTOR VEHICLE AND ACQUISITION OF NON-TAX-PAID SPECIAL FUEL FOR USE IN A MOTOR VEHICLE.

This act creates two related misdemeanor offenses involving the purchase of nontaxpaid special fuel. Special fuel is diesel fuel and other kinds of motor fuel except gasoline. Nontaxpaid special fuel is special fuel on which the per gallon excise tax has not been paid. The two new offenses are knowingly dispensing nontaxpaid special fuel into a motor vehicle and knowingly allowing someone to dispense nontaxpaid special fuel into a vehicle. Both offenses are punishable by imprisonment for up to six months, a fine of up to five hundred dollars, or both. The act becomes effective December 1, 1993.

In addition to creating two misdemeanor offenses, the act makes two technical changes. First, it deletes the word "penalties" in the catchline to G.S. 105-449.34 because the statute contains no penalties other than misdemeanors. Second, it deletes the words "of Revenue" following "Secretary" in two places to apply the definition of Secretary in G.S. 105-449.2. That definition was added in 1991 and a conforming change was not made to this statute.

The misdemeanor offenses created by the act apply only to special fuel rather than to both special fuel and gasoline because of the difference in the application of the per gallon excise tax to these fuels. The per gallon excise tax on special fuel applies to the first sale of the fuel in this State for a highway use; the per gallon excise tax on gasoline applies to the first sale of the gasoline in this State for any use. This difference reflects the difference in the uses of these fuels. Over half of all special fuel sold in this State is used for a purpose other than to propel a motor vehicle, but almost all gasoline sold is used to propel a motor vehicle. The result of these differences is that much special fuel is sold without the per gallon excise tax being collected on the sale. The availability of this nontaxpaid special fuel creates opportunities for tax evasion, a prime example of which is the purchase of nontaxpaid special fuel from nonhighway pumps at service stations.

This act is designed to address the problem of persons buying special fuel from service station pumps marked "Nonhighway Use Only," either with or without the complicity of the service station attendant. The Department discovered this problem during the course of a "sting" operation it conducted in which many retail service stations were caught allowing customers to dispense diesel fuel into motor vehicles from pumps marked "Nonhighway Use Only." In attempting to prosecute those caught, the Department found that although those caught could be assessed a civil penalty under G.S. 105-449.24 or be charged with felony tax evasion, they could not be charged with any misdemeanor offenses. The Department felt that the civil penalty alone was not a sufficient deterrent and that the chance of obtaining felony convictions in these circumstances was unlikely. The Department therefore recommended the creation of these misdemeanor offenses.

Recommended by the Revenue Laws Study Committee.

1993 Chapter 230 (House Bill 936, Rep. Richardson)

AN ACT TO EXPAND THE PROPERTY TAX EXEMPTION FOR NONPROFIT ORGANIZATIONS PROVIDING LOW- AND MODERATE-INCOME HOUSING TO INCLUDE REAL PROPERTY HELD AS A SITE FOR FUTURE LOW- AND MODERATE-INCOME HOUSING.

G.S. 105-278.6 exempts from local property taxes real and personal property belonging to nonprofit organizations that provide housing for people with low or moderate incomes, as long as the property is used exclusively for charitable purposes. This act expands the exemption beginning with the 1994-95 tax year to provide that property belonging to such an organization is considered to be held for a charitable purpose if it is held for no more than five years as a future site for housing for people with low or moderate incomes.

The act provides that the taxes that would otherwise be due on this property become a lien on the property and are deferred. If housing for people with low or moderate incomes is not built on the property within five years after the tax year the exemption is first claimed, the deferred taxes become due, along with interest. The act does not affect State revenues; any revenue loss would be of local government property taxes.

1993 Chapter 255 (House Bill 136, Rep. Barnes)

AN ACT TO EXTEND FOR AN ADDITIONAL FIVE YEARS THE REQUIREMENT THAT COUNTIES USE PART OF THE TWO HALF-CENT LOCAL SALES TAX PROCEEDS ONLY FOR PUBLIC SCHOOL BUILDINGS AND TO CLARIFY THE PROCEDURE BY WHICH A LOCAL GOVERNMENT MAY USE THE TAX PROCEEDS FOR OTHER LAWFUL PURPOSES IF IT CAN PROVIDE FOR ITS PUBLIC SCHOOL AND WATER AND SEWAGE CAPITAL NEEDS WITHOUT RESTRICTING THE TAX PROCEEDS.

There are three Articles of the Revenue Act that authorize counties to levy local sales and use taxes. Article 39 authorizes a one-cent tax, Article 40 authorizes a half-cent tax, and Article 42 authorizes an additional half-cent tax. Article 40, enacted in 1983, and Article 42, enacted in 1986, each provided that for the first ten fiscal years in which the tax was in effect in a county, the county was required to use a percentage of the tax revenue for public school capital outlay purposes (including retirement of outstanding debt). The first ten fiscal years under Article 40 would have ended for most counties in July 1993. This act extends the ten-year periods under both Article 40 and Article 42 for an additional five years. For these five additional years, counties will be required to use 30% of the tax revenue from the first half-cent local sales tax (Article 40) and 60% of the tax revenue from the second half-cent local sales tax (Article 42) only for public school capital outlay purposes. The amount of tax revenue affected by the extension of this requirement is $52.7 million a year. Any local legislation that had already been enacted exempting a county from the

restrictions of Article 40 or 42 will remain in effect during the additional five-year period. An example of this type of legislation is Chapter 326 of the 1985 Session Laws, which applies to Burke County.

Articles 40 and 42 also require municipalities to use a percentage of the tax revenue they receive under those Articles for water and sewer purposes. A county or a municipality can, however, petition the Local Government Commission for a waiver of the applicable use restrictions. The Local Government Commission may waive part or all of the restrictions if the county or city demonstrates that its public school capital needs or water and sewer needs, respectively, can be met without the use of the restricted sales tax revenue. This act clarifies the procedure for obtaining a waiver, effective July 1, 1993. First, the petition for a waiver must be in the form of a resolution adopted by the governing body of the county or city. Second, in evaluating the petition, the Local Government Commission is authorized to consider not only the county's public school capital needs or the city's water and sewer needs, but also the other capital needs of the county or city. The act apparently intends to allow the Local Government Commission to weigh these competing needs and possibly grant a waiver if the other needs are greater than the county's school needs or the city's water and sewer needs. On the other hand, the law still requires the county or city to demonstrate that its school needs or water and sewer needs, respectively, can be provided for without restricting the local sales tax revenue for those purposes.

1993 Chapter 314 (House Bill 57, Rep. Gamble)

AN ACT TO REQUIRE PARTNERSHIPS TO FURNISH EACH PARTNER A COPY OF THE STATE "K-1" TAX FORM.

This act requires a partnership that is doing business in North Carolina to send to each partner enough information about that partner's share of partnership income or loss to enable the partner to file a North Carolina income tax return. The requirement is effective for taxable years beginning on or after January 1, 1993.

Current law requires a partnership that is doing business in North Carolina and is required to file an information return with the Internal Revenue Service to file an information return with the Department of Revenue. Section 6031 of the Internal Revenue Code requires all partnerships except certain nonprofits and partnerships that have gross annual receipts of less than $5,000 to file federal information returns. In addition to requiring an information return, federal law requires a partnership that is required to file an information return to send a statement, known as a K-1, to each partner. The statement sets out the partner's share of the partnership's income or loss. Current State law does not require a partnership to send each partner a similar statement. This act imposes that requirement.

Because each partner gets a federal K-1, the effect of this act is to help nonresident partners file a North Carolina income tax return. A resident partner's partnership income would be included in the partner's federal taxable income that is used as the starting point for computing State taxable income. A nonresident partner, however, who would not normally file a North Carolina income tax return, may not realize that a North Carolina return is required because of the partnership income. Receiving a State K-1 will alert the nonresident partner to the tax liability in this State.

1993 Chapter 315 (House Bill 173, Rep. Luebke)

AN ACT TO PROVIDE THAT THE STATE SHALL PAY INTEREST ON INCOME TAX REFUNDS NOT REFUNDED TO THE TAXPAYER WITHIN FORTY-FIVE DAYS AFTER THE RETURN WAS FILED OR DUE TO BE FILED, WHICHEVER IS LATER.

This act establishes a new rule for determining when the State will pay interest on an overpayment of either corporate or individual income tax and reorganizes and clarifies G.S. 105-266, which governs refunds of all tax overpayments. The new rule became effective upon ratification, July 9, 1993, and applies to overpayments reflected in final returns filed on or after that date. By making this change, the act accomplishes three goals: it establishes the same rule for all overpayments of individual income tax, it establishes the same rule for both corporate and individual income tax, and it makes the State rule for overpayments of income tax the same as the federal rule.

The general rule under G.S. 105-266 that applies to overpayments of any State tax is that interest accrues starting 90 days after the date of an overpayment until a refund is made. Under prior law, two different interest rules applied to overpayments of individual income tax. Overpayments of individual income tax that were not the result of advance payments, made through amounts withheld from wages or from estimated payments, followed the general 90-day rule. Overpayments of individual income tax that were the result of advance payments accrued interest from six months after the later of the date the final return was due or the date the final return was filed. Under prior law, overpayments of corporate income tax followed the general 90-day rule, which makes no distinction between advance payments and other payments for purposes of determining when interest begins to accrue. Therefore, overpayments of corporate income tax made through quarterly estimated payments accrued interest for a large part of the year. This resulted in substantial interest payments each year from the State to corporations that overpaid their estimated income tax.

Under the new rule, interest is payable by the State on an overpayment of corporate or individual income tax 45 days after the latest of the following:

(1) The date the final income tax return was filed.

(2) The date the final income tax return was due.

(3) The date the income tax overpayment was made.

Thus, for overpayments that are the result of advance payments of individual income tax, the bill shortens from 6 months to 45 days the period of time that must elapse before interest begins to accrue. For corporate overpayments made through estimated taxes, the act reduces the length of time that interest will accrue. For excess payments of individual and corporate income tax made with a final return, the act shortens from 90 days to 45 days the period that must elapse before interest begins to accrue.

The federal rule for the accrual of interest on income tax overpayments is the same as the rule established by this act for overpayments of State income tax. Several special rules account for the inevitable delay in processing millions of refunds, for returns that are not processible, and for retroactive application of deductions that create an overpayment for an earlier tax year. Federal law provides that if an overpayment is created by retroactive application of a deduction, the

overpayment is considered to have been made on the filing date of the tax year the deduction was created. Federal law also provides that a return is not considered filed until it is in processible form. The State rule established by this act incorporates these special rules.

Recommended by the Revenue Laws Study Committee.

1993 Section 26 of Chapter 321 (House Bill 134, Rep. Nesbitt, and Senate Bill 48, Sen. Perdue)

LOCAL FINANCIAL SECURITY.

Section 26 makes significant changes concerning the distribution of State tax revenue to local governmental units. Most importantly, it converts the distribution to local units of State-shared tax revenue from an annual appropriation to an earmarking of current tax collections and removes the current "growth-freeze" on State-shared tax revenue. It also changes the timing of the distribution of State-shared intangibles tax revenue and beer and wine tax revenue, changes the timing of the State reimbursements to local units for the repeal of local property taxes on inventories and on poultry and livestock, and changes the source of funds for the State reimbursement to local units for the repeal of the intangibles tax on money on deposit and the modification of the intangibles tax on accounts receivable. The change in the source of funds for the intangibles tax reimbursement became effective July 9, 1993. The remaining changes become effective July 1, 1995.

State-shared tax revenue is tax revenue distributed by the State to local units based on collections of the State tax on intangible personal property, the State excise taxes on beer and wine, and the State corporate franchise tax on electric power companies, natural gas companies, and telephone companies. These revenues are sometimes referred to by local units as "State-collected local revenues" even though they are a part of State tax revenues because the State has traditionally shared its revenues from the intangibles tax, the beer and wine taxes, and the utility franchise tax with local units.

State-shared tax revenue is sometimes confused with State reimbursements to local units, but the two are distinct. State reimbursements are amounts distributed to local units to compensate them for revenue lost as a result of the removal by the General Assembly of property from the local sales and use tax base, the local property tax base, or the intangibles tax base. State reimbursements consist of reimbursements for the repeal of the property tax on inventories, the repeal of the intangibles tax on money on deposit, the modification of the intangibles tax on accounts receivable, the repeal of the property tax on poultry and livestock, the "homestead exemption" from property tax, and the repeal of local sales and use taxes on food purchased with food stamps. This act changes the timing and source of two of the reimbursements but does not restore growth in any State reimbursement or otherwise change the amount of any State reimbursement.

Earmarking of State-shared Revenue

Before fiscal year 1989-90, State-shared tax revenue was earmarked rather than appropriated annually. Earmarking refers to the accrual method of accounting for the amount of State-shared tax revenue to be distributed, by which the amount is put in a liability reserve account of the State and then automatically disbursed on the specified date. In 1990, the General Assembly

changed the accounting treatment of State-shared tax revenue from an earmarking, which is an accrual accounting method, to an annual appropriation, which is a cash accounting method. The reason for the change was to balance the 1989-90 State budget on a financial basis by removing approximately $140 million from liability reserves. Consequently, the State appropriation act for fiscal year 1990-91 and each subsequent year has included an appropriation to local units of the State-shared tax revenue.

Effective with the 1995-96 fiscal year, paragraphs (a), (g), (h), and (i) of section 26 restore the earmarking method of accounting for distributions of State-shared tax revenue, once again making the distribution an automatic "off-budget" transfer. As an "off-budget" transfer, the distribution will not appear in the appropriations act for fiscal year 1995-96 and subsequent years and is thereby removed from annual legislative scrutiny during the budget process and from the possibility of reduction by the Governor, acting under Article III, 5(3) of the North Carolina Constitution, to prevent a deficit for a fiscal year.

Removal of Growth Freeze in State-shared Revenue

In addition to restoring the prior accounting method used for State-shared tax revenue, Section 26 also restores the prior method for determining how much revenue is to be shared, with one important difference. That difference is a deduction for the growth freeze in this revenue in effect for distributions made from July 1, 1991, up to July 1, 1995.

Under Section 26, the State-shared tax revenue base consists of the following: (i) the amount of intangibles tax collected, less the four-year growth freeze for the tax and the State's cost in collecting the tax, in hearing property tax appeals, in providing a few property-tax related courses at the Institute of Government in Chapel Hill, and in operating the Local Government Commission; (ii) 23 3/4% of the State excise tax on beer; (iii) 62% of the State excise tax on unfortified wine; (iv) 22% of the State excise tax on fortified wine; and (v) the amount of the State franchise tax on electric power companies, natural gas companies, and telephone companies that equals 3.09% of the taxable gross receipts derived by these companies from sales of electricity, natural gas, and telephone service within cities, less the four-year growth freeze for the tax. Except for the growth-freeze deduction, this base is almost identical to the pre-growth freeze base. That previous base, however, did not deduct the cost of the Local Government Commission from intangibles tax collections; this deduction was first made in fiscal year 1991-92.

As did the pre-growth freeze State-shared revenue base, the base in Section 26 will vary from year to year as total collections of the specified taxes change. Consequently, if total collections of the specified taxes increase, the amount distributed to local units will increase and if total collections decrease, the amount distributed to local units will decrease.

Under current law, State shared-tax revenue is a fixed $237 million. This amount is based on fiscal year 1989-90 intangibles tax collections, collections of beer and wine taxes from October 1, 1989, through September 30, 1990, and collections of the utility franchise tax from April 1, 1990, through March 31, 1991. Although the benchmark period for each tax differs, the result is that all distributions of these taxes made in fiscal years 1991-92 through 1994-95 are frozen and distributions of taxes made in other fiscal years are not frozen.

The General Assembly froze the amount of State-shared tax revenue to be distributed to local units beginning in fiscal year 1991-92. For that year and subsequent fiscal years, the frozen amount was $237 million. This amount was the same amount of State-shared tax revenue the General Assembly appropriated to local units in fiscal year 1990-91, which was the first year

State-shared revenue was appropriated rather than earmarked, and included the growth in the revenue. Local units received 6.2% less in fiscal year 1990-91 than the General Assembly appropriated, however, because the Governor reduced the appropriation as part of the effort to balance the State budget for that year. For the 1991-93 fiscal biennium, the total growth freeze was $35.2 million. By the time the growth freeze ends on July 1, 1995, the total growth freeze amount is expected to grow to between $55 and $60 million.

Effective for the 1995-96 fiscal year, paragraphs (a), (g), (h), and (i) of Section 26 remove the growth freeze but require distributions of intangibles tax collections and utility franchise tax collections to be reduced by the growth freeze amount for these taxes. The section does not require a growth freeze deduction from the distribution based on beer and wine tax collections because those collections have not grown significantly since the freeze went into effect.

The growth freeze amount for the intangibles tax is the difference between the amount of intangibles tax collected during the 1993-94 fiscal year and the 1989-90 fiscal year. State-shared intangibles tax is distributed to local units once a year. Therefore, the growth freeze amount for this tax will be deducted annually from intangibles tax collections in calculating the amount to be distributed to local units.

The growth freeze amount for the utility franchise tax is the difference between the amount of utility franchise tax collected for the period April 1, 1994, to March 31, 1995, and the period April 1, 1990, to March 31, 1991. State-shared utility franchise tax is distributed to local units in four quarterly payments. Therefore, one-fourth of the annual growth freeze amount for this tax will be deducted from utility franchise tax collections in calculating the quarterly amount to be distributed to local units.

The amount of State-shared tax revenue estimated to be distributed to local units in fiscal year 1995-96 is $255 million. The growth freeze deduction for that year is expected to be between $55 and $60 million.

Timing Changes in Distributions of State-shared Revenue and Reimbursements

When the switch from appropriating State-shared revenue to earmarking it becomes effective in fiscal year 1995-96, the State will once again put the revenue in a liability reserve account as it is collected and hold it for subsequent distribution to local units. The amount put in a reserve account will no longer be available for appropriation and will be a liability on the State's balance sheet rather than an asset. Therefore, to the extent State-shared tax revenue is collected in one fiscal year for distribution in the next fiscal year, the State must carry the reserve over from one fiscal year to the next.

To avoid having to suddenly reserve over $120 million in the 1994-95 fiscal year to make the distribution of State-shared intangibles tax revenue in August of the 1995-96 fiscal year, which would put the State's balance sheet for fiscal year 1994-95 out of balance, paragraph (a) of the section changes the timing of the intangibles tax distribution from August of one calendar year to June 25 of the following calendar year and changes the collection period used for making the distribution from the previous fiscal year to July 1 through April 30 of the same fiscal year. This change in distribution date and collection period puts the collection and distribution of the intangibles tax within the same fiscal year and means that the June 25 distribution of State-shared intangibles tax revenue will be made from intangibles tax revenue collected in the same fiscal year the distribution is made. To ensure that local units receive an amount equivalent to what they would receive if the collection period were 12 months instead of 10 months, paragraph (a) sets

the starting amount to be used in calculating the distribution at 103% of collections rather than 100%.

The distribution date and collection period established by paragraph (a) for State-shared intangibles tax revenue differs from the distribution date and collection period used for the tax before fiscal year 1990-91, when the tax was also earmarked rather than appropriated. In the pre-1990-91 system, intangibles tax revenue collected in one fiscal year, largely in April of each year, was put in a reserve and distributed in August or September of the next fiscal year.

Paragraph (g) of this section makes a similar change to the distribution date and collection period for State-shared beer and wine tax revenue. It changes the distribution date from within 60 days after September 30 of one calendar year to within 60 days after March 31 of the next calendar year, and changes the collection period on which the distribution is based from the 12-month period ending September 30 to the 12-month period ending March 31. This change reduces the amount of beer and wine taxes the State must reserve from one fiscal year to the next and delays the distribution to local units.

Delaying the distribution date for State-shared intangibles tax revenue delays the receipt of these funds by local units by almost 10 months, and delaying the distribution date for State-shared beer and wine taxes delays the receipt of these funds by local units by 6 months. To mitigate the cash-flow impact on local units from these delays, paragraphs (b) through (f) of this section move the distribution of 60% of the reimbursement for the repeal of property taxes on inventories and on poultry and livestock from April of one calendar year to August of the preceding calendar year. There is no accounting impact from splitting this reimbursement distribution into two distributions because the reimbursements are currently earmarked out of current-year revenues and both reimbursements stay within the same fiscal year. Under current law, local units receive 100% of the inventory tax reimbursement and of the poultry and livestock reimbursement in April of each year. Beginning in fiscal year 1995-96, local units will receive 60% of the money in August of a fiscal year and the remaining 40% in April of the same fiscal year.

Source of Funds For Reimbursement For Modification and Partial Repeal of Intangibles Tax

Paragraph (k) of Section 26 changes the source of tax revenue used to reimburse local units for the repeal of the intangibles tax on money on deposit and the revision of the intangibles tax on accounts receivable. The source is changed from corporate income tax collections to individual income tax collections. The change was made at the request of the Office of State Controller. That Office requested the change because this reimbursement distribution is made in August and during that month the State typically has enough individual income tax collections to cover the distribution but does not have enough corporate income tax collections to cover the distribution.

Recommended by the Joint Select Fiscal Trends and Reform Study Commission.

1993 Chapter 360 (House Bill 105, Rep. R. Smith)

AN ACT TO INCREASE THE PROPERTY TAX HOMESTEAD EXEMPTION AMOUNT FROM TWELVE THOUSAND DOLLARS TO

FIFTEEN THOUSAND DOLLARS AND TO MAKE TECHNICAL CHANGES TO THE HOMESTEAD EXEMPTION STATUTES.

This act increases the homestead exemption amount from $12,000 to $15,000 and makes numerous technical changes to the homestead exemption statutes. The act becomes effective for taxable years beginning on or after July 1, 1994.

The homestead exemption is a partial exemption from property taxes for the residence of a person who has an income of less than $11,000 and is either age 65 or older or totally disabled. The current exemption amount is $12,000. The exemption was last increased in 1987, when it was increased from $10,000 to $12,000. The technical changes made in the act are as follows:

(1) Changes the statutory citation in the definition of income because the statute cited in the current law was repealed in 1989.

(2) Adds a definition of Internal Revenue Code to the list of defined terms.

(3) Puts the definitions in alphabetical order.

(4) Makes the statutes gender neutral.

(5) Changes the reference from mobile homes to manufactured homes.

(6) Removes substantive provisions from the definition section and places them in the appropriate places.

(7) Conforms the use of the terms "permanent residence" and "exclusion" so that they are used consistently throughout the statutes.

(8) Changes the property tax information sheet and the abstract to reflect the changes to the homestead exemption amount.

The revenue loss associated with this act will be a loss to the general funds of local governments. Prior to 1991, the State reimbursed counties and cities for 50% of their losses from the homestead exemption. In 1991, the General Assembly froze the amount of reimbursements made to local governments at the amount each city and county was entitled to receive in fiscal year 1990-91.

1993 Chapter 362 (House Bill 509, Rep. Griffin)

AN ACT TO RAISE THE INHERITANCE TAX FILING THRESHOLD.

This act provides that an inheritance tax return does not need to be filed for an estate whose beneficiaries are all Class A beneficiaries, the surviving spouse, or both, if the gross value of the estate is less than $450,000. The act applies to estates of decedents dying on or after July 1, 1993. Under prior law, a return had to be filed in these circumstances if the gross value of the estate was $250,000 or more. This act is not expected to have any impact on State revenues.

Property passing to a surviving spouse is exempt from inheritance tax. Property passing to Class A beneficiaries (lineal ancestors and descendants) is entitled to an inheritance tax credit of $26,150; this credit amount effectively exempts approximately $500,000 in value of an estate that passes to Class A beneficiaries. Under former law, an estate that passed to the spouse, Class A beneficiaries, or both was required to file an inheritance tax return with the Secretary of Revenue if the value of the estate was $250,000 or more, even though no tax would be required if the value

of the estate was under $500,000. This act will relieve more beneficiaries from this filing requirement by increasing the threshold to $450,000. The filing threshold remains below $500,000, however, to allow the Department of Revenue to review inheritance tax returns of larger estates to determine whether the value placed on the estate's assets is understated.

1993 Chapter 364 (House Bill 1274, Rep. Gamble)

AN ACT TO PROVIDE THAT THE EXEMPTION FROM THE SCRAP TIRE TAX FOR TIRES SOLD FOR PLACEMENT ON NEWLY MANUFACTURED VEHICLES SHALL APPLY UNIFORMLY REGARDLESS WHEN THE TIRES WERE SOLD.

This act grants a retroactive scrap tire tax exemption to new tires placed on newly manufactured vehicles, gives anyone who paid tax on tires that are exempted by the act additional time to claim a refund for the tax paid, and restricts the amount of interest payable by the State on a refund. The act became effective July 16, 1993.

The exemption granted by the act applies to the period beginning January 1, 1990, and ending July 15, 1992. This is the period from the effective date of the tax to the date these tires were exempted from the tax by Chapter 867 of the 1991 Session Laws (Reg. Sess. 1992).

A refund for taxes paid during this period may be claimed at any time before July 1, 1994. Interest payable on a refund accrues at the rate of 5% a year instead of at the rates that would otherwise apply. The rates that would otherwise apply are 9% for calendar years 1990 and 1991, 8% for calendar year 1992, and 7% for calendar year 1993 and subsequent calendar years. Interest accrues on a refund of the scrap tire tax starting 90 days after an overpayment of the tax until the refund is made.

Proponents of this act argued that the scrap tire tax was never intended to apply to new tires placed on newly manufactured vehicles. Whether or not this was the intent, however, the tax by its terms did apply to new tires purchased for placement on newly manufactured vehicles from its effective date of January 1, 1990, until the exemption became effective on July 15, 1992.

Currently, the scrap tire disposal tax is a 1% tax on the price of certain tires. Effective October 1, 1993, the tax rate will increase to 2% on tires having a bead diameter of less than 20 inches and will remain at 1% for all other tires. Most of the revenue from the tax is used to pay for the disposal of scrap tires or the abatement of a nuisance caused by storing scrap tires.

The scrap tire tax was first enacted in 1989 and was revised by Chapter 221 of the 1991 Session Laws. When first enacted, the tax applied to new motor vehicle tires sold at retail and the regular exemptions from sales tax did not apply to sales of the tires. Thus, the exemption for items that are component parts of a manufactured product did not apply and tires purchased for placement on newly manufactured vehicles were subject to the tax. The 1991 revision did not change the taxation of new tires placed on newly manufactured vehicles.

After the 1991 Session, several manufacturers of vehicles, including Freightliner and Caterpillar, asked the Revenue Laws Study Committee to study the issue of the taxation of new tires purchased for placement on newly manufactured vehicles. The Committee concluded that taxation of these tires was contrary to the intent of the tax and placed North Carolina-made vehicles at a competitive disadvantage to vehicles made in other states. The Committee therefore

recommended that new tires placed on newly manufactured vehicles be exempted from the tax and that the exemption apply retroactively.

In its 1992 regular session, the General Assembly enacted the recommendation of the Revenue Laws Study Committee to exempt from the scrap tire tax new tires placed on newly manufactured vehicles. It did not enact that Committee's recommendation to make the exemption retroactive. This act, however, makes the exemption retroactive.

The Revenue Laws Study Committee found that the intent of the scrap tire disposal tax is to tax a tire that replaces a tire that is removed from a vehicle and is therefore in need of disposal. Obviously, when a new tire is placed on a newly manufactured vehicle, no tire is being replaced and no tire is in need of disposal.

1993 Chapter 371 (Senate Bill 158, Sen. Kerr)

AN ACT TO PROVIDE THAT THE PENALTY FOR FAILURE TO FILE AN INHERITANCE TAX RETURN WILL BE ASSESSED AND COLLECTED IN THE SAME MANNER AS THE PENALTY FOR FAILURE TO PAY INHERITANCE TAXES.

This act makes the procedure for collecting the existing penalty for failure to file an inheritance tax return the same as the procedure for collecting the penalty for failure to pay inheritance taxes or other taxes, specifies that the penalty for failure to file does not apply if there is no inheritance tax due on the estate, and makes several technical changes to the affected statute. The act is effective for the estates of decedents dying on or after October 1, 1993. The act is expected to result in a minimal increase in General Fund revenues.

The penalty for failure to file an inheritance tax return is $500. The penalty is payable by the personal representative. This act changes the collection procedure for this penalty by deleting the sentence in former law that required the penalty to be collected by filing a suit in the Wake County Superior Court. By deleting this sentence, the penalty will become subject to the general administrative provisions of Article 9 of the Revenue Act and become collectible in accordance with those provisions. Under Article 9, penalties are collectible in the same manner as taxes: the Department of Revenue proposes an assessment and the taxpayer has the right to contest the assessment through standard administrative procedures before appealing to the court system.

The requirement that the inheritance tax penalty be recovered in an action brought in the superior court of Wake County is unique to that penalty and is an historical anachronism. The general collection provisions in Article 9 were enacted in 1949 but the inheritance tax law was enacted before that date. The procedure for collecting the inheritance tax penalty was not changed to conform to the general provisions in 1949.

This act also makes several technical changes. It substitutes the general term "personal representative" for the terms "administrator" and "executor" that appear in G.S. 105-23. It deletes an incorrect cross-reference to G.S. 105-2(a)(3), and it deletes obsolete provisions. One of the obsolete provisions deleted is the requirement that the inheritance tax return state the ages of any minor children of the decedent. That requirement dates back to the time exemptions were allowed against the taxable estate; some of the exemptions were based upon the ages of any beneficiaries

who were children of the decedent. This exemption provision was replaced with the current inheritance tax credit in 1977.

Recommended by the Revenue Laws Study Committee.

1993 Chapter 372 (Senate Bill 183, Sen. Kerr)

AN ACT TO PROVIDE THAT A SALES TAX LICENSE IS VOID IF THE RETAILER REPORTS NO SALES FOR EIGHTEEN MONTHS.

This act provides that a sales tax license becomes void if the licensed retailer reports no sales for a period of 18 months. The act became effective August 1, 1993.

All sales of tangible personal property are presumed to be taxable (G.S. 105-164.26). A sale is not taxable if the buyer intends to resell the property. A person who sells property in a wholesale sale can negate the presumption that the sale is taxable by checking the buyer's certificate of resale. A certificate of resale states that the property bought is for resale, states the buyer's sales tax license number, and indicates the type of property the buyer sells in the regular course of business.

In 1992, the Revenue Laws Study Committee received complaints from taxpayers about individuals who acquire a sales tax license and then fraudulently give a certificate of resale when purchasing property they have no intention of reselling. The Committee found no hard data indicating the extent to which this type of tax evasion occurs. The Committee felt that tax evaders would be deterred by a new penalty enacted in 1992 upon the recommendation of the Revenue Laws Study Committee. Chapter 914 of the 1991 Session Laws (1992 Session) added an additional penalty of $250 to be assessed by the Secretary of Revenue against a buyer who misuses a certificate of resale, effective July 10, 1992.

A sales tax license is required of every person who engages in the retail or wholesale business. The license costs $15 and, once issued, remains valid unless the license holder remains continuously out of business for five years. The Committee noted that increasing the $15 license fee or requiring periodic renewal of licenses would place a burden on the many legitimate small retailers and have only a small impact on potential tax evaders. The Committee decided that the State could limit the number of non-retailers who obtain licenses for fraudulent purposes by providing that a license becomes void if the license holder makes no sales for an 18-month period. The Committee felt that all legitimate merchants would make at least some sales every 18 months. This act implements the Committee's recommendation. The act provides an exception for wholesalers and for license holders who make only exempt sales. The latter group includes civic organizations and other nonprofit associations who occasionally sell items to raise funds; these license holders may go for long periods between fund-raising sales.

Recommended by the Revenue Laws Study Committee.

1993 Chapter 400 (House Bill 681, Rep. DeVane)

AN ACT TO IMPLEMENT THE REQUIREMENTS OF THE 1990 AMENDMENTS TO THE FEDERAL CLEAN AIR ACT, TO REPEAL THE EXPIRATION OF A PORTION OF THE PER GALLON FUEL

TAX, TO DEDICATE A PORTION OF THE PROCEEDS OF THE TAX TO THE ADMINISTRATION OF THE AIR QUALITY PROGRAM, TO DEDICATE A PORTION OF THE PROCEEDS OF THE TAX TO THE CLEANUP OF LEAKING PETROLEUM UNDERGROUND STORAGE TANKS, AND TO REPEAL THE EXPIRATION OF THE LEAKING PETROLEUM UNDERGROUND STORAGE TANK CLEANUP ACT OF 1988.

This act changes various procedures concerning the issuance and enforcement of air quality permits to conform State law on this subject to the 1990 amendments to the federal Clean Air Act, repeals the 1995 scheduled reduction in and the 1999 repeal of the additional 1/2¢ a gallon motor fuel tax that became effective January 1, 1992, and changes the distribution of this additional 1/2¢ motor fuel tax. The conforming air quality permit changes and the repeal of the scheduled reduction in and the repeal of the additional 1/2¢ motor fuel tax became effective July 19, 1993. The change in the distribution of the additional 1/2¢ a gallon motor fuel tax becomes effective January 1, 1995.

The 1991 General Assembly increased the motor fuel per gallon excise tax by 1/2¢ a gallon effective January 1, 1992. The increase applies to the tax on gasoline imposed by Article 36 of Chapter 105 of the General Statutes, to the tax on diesel fuel and other special motor fuel imposed by Article 36A of that Chapter, and to the road tax imposed by Article 36B of that Chapter on motor carriers who purchase fuel outside the State for use inside the State.

The purpose of the additional 1/2¢ a gallon tax increase was to provide funds to clean up the environmental damage caused by leaking underground petroleum storage tanks. One-half of the revenue from this additional tax is therefore credited to the Commercial Leaking Underground Petroleum Storage Tank Cleanup Fund, established under G.S. 143-219.94B, and the remaining half is credited to the Groundwater Protection Loan Fund, established under G.S. 143-215.94P.

In the act that imposed the additional 1/2¢ a gallon tax, the 1991 General Assembly reduced the tax to an additional 1/4¢ tax effective January 1, 1995, directed how the reduced tax was to be distributed, and then repealed the reduced tax effective January 1, 1999. All of the proceeds of the reduced January 1, 1995, tax were to be credited to the Commercial Leaking Underground Petroleum Storage Tank Cleanup Fund. Sections 11 and 12 of this act repeal the scheduled 1995 reduction in and the scheduled 1999 repeal of the additional 1/2¢ tax, thereby making the 1992 increase a permanent increase.

Section 13 of this act changes the distribution of the now permanent additional 1/2¢ a gallon motor fuel tax. Effective January 1, 1995, the proceeds of the additional tax will be distributed as follows: 19/32 to the Commercial Leaking Petroleum Underground Storage Tank Cleanup Fund, 3/32 to the Noncommercial Leaking Petroleum Underground Storage Tank Cleanup Fund, and 5/16 to the Water and Air Quality Account within the Department of Environment, Health, and Natural Resources. Thus, the Commercial Leaking Petroleum Underground Storage Tank Cleanup Fund will receive slightly more of the 1/2¢ tax than it is currently receiving, the Groundwater Protection Loan Fund will receive no revenue from the additional tax, and the Noncommercial Leaking Petroleum Underground Storage Tank Cleanup Fund and the Air and Water Quality Account will begin to receive revenue from the additional tax.

The proceeds credited to the Water and Air Quality Account must be used for the air quality program. This restriction ensures that the additional tax proceeds will continue to be used for environmental programs that address problems created by the use of motor fuels. Air quality programs are related to problems created by the use of motor fuels because motor vehicle emissions contribute significantly to air pollution.

1993 Chapter 424 (Senate Bill 787, Sen. Kerr)

AN ACT TO IMPOSE A PENALTY FOR FAILURE TO COMPLY WITH ESC TAX REPORTING REQUIREMENTS.

This act imposes two new penalties for failure to comply with certain reporting requirements of the Employment Security Commission. It imposes a penalty on an employer with 250 or more employees who does not file on magnetic tapes or diskettes that portion of the "Employer's Quarterly Tax and Wage Report" that contains the name, social security number, and gross wages of the employees. The penalty will be $25. It also imposes a penalty on an agent of employers who does not file the required information on magnetic tape or diskette if the agent files the report for 250 or more employees of one or more employers. In this case, the penalty will not be monetary. Instead, the law will prohibit that agent from reporting wages and filing reports with the Employment Security Commission on behalf of the subject employees for a period of one year. The Commission may reduce or waive a penalty against either an employer or an agent for good cause shown. The act becomes effective September 30, 1995, and applies to Employer's Quarterly Tax and Wage Reports required to be filed on or after the quarter ending September 30, 1995.

The Commission began requiring the filing of this report on magnetic tape or diskette in 1992 because of an act passed by the General Assembly in 1991. The large employers subject to this requirement are currently required to file this information on tape with the federal government. The purpose of the requirement is to speed up reporting and make it more efficient. Current law does not contain an appropriate penalty for an employer or an agent who does not file the report in the correct manner. At the present time, the Commission considers a report that is not filed correctly as not being filed. The penalty for failure to file is 5% of the tax for each month that the report is not filed, not to exceed 25% of the aggregate or $5 per month, whichever is greater. The majority of the more than 152,000 employers subject to this requirement have complied. In the approximately 400 cases where the requirement has not been met, the Commission has waived the failure to file penalty that it believes it could impose.

1993 Chapter 432 (House Bill 720, Rep. G. Miller)

AN ACT TO INCREASE THE INCOME TAX CREDIT FOR CHILD AND DEPENDENT CARE EXPENSE FOR FAMILIES WITH INCOME BELOW FORTY THOUSAND DOLLARS A YEAR.

This act increases the income tax credit for child and dependent care expenses for families with income below $40,000 a year. Under current law, the credit is based on a flat percentage of the child and dependent care expenses claimed on the taxpayer's federal tax return. Effective for taxable years beginning on or after January 1, 1994, the credit will be based upon income and filing

status. The act will lower General Fund revenues by $3.7 million in fiscal year 1994-95 and by $4 million in fiscal year 1995-96.

Under current law, a taxpayer may claim a tax credit equal to 7% of the federal employment-related expenses for dependents who are seven years old or older and 10% for dependents who are either under the age of seven or are physically or mentally incapable of caring for themselves. Under this act, the applicable percentages will range from 7% to 9% for dependents who are seven years old or older and 10% to 13% for dependents who are either under the age of seven or are physically or mentally incapable of caring for themselves. The act also equalizes the value of the credit among the taxpayers with a different filing status.

The act does not increase the maximum credit amount allowed. The credit may not exceed $2,400 if the taxpayer's household includes one qualifying individual and it may not exceed $4,800 if the taxpayer's household includes more than one qualifying individual.

The actual percentages allowed under this act are as follows:

Filing Status	Adjusted Gross Income	Dependents age 7 or older, not disabled	Other Dependents
Head of Household	Up to $20,000	9%	13%
	Over $20,000 Up to $32,000	8%	11.5%
	Over $32,000	7%	10%
Surviving Spouse or Joint Return	Up to $25,000	9%	13%
	Over $25,000 Up to $40,000	8%	11.5%
	Over $40,000	7%	10%
Single	Up to $15,000	9%	13%
	Over $15,000 up to $24,000	8%	11.5%
	Over $24,000	7%	10%
Married Filing Separately	Up to $12,500	9%	13%
	Over $12,500 Up to $20,000	8%	11.5%
	Over $20,000	7%	10%

1993 Chapter 433 (House Bill 843, Rep. Gamble)

AN ACT TO REQUIRE THE DEPARTMENT OF REVENUE TO INCLUDE IN ITS BIENNIAL TAX EXPENDITURE REPORT ESTIMATES OF THE AMOUNT BY WHICH EACH TAX EXPENDITURE REDUCES STATE REVENUES AND TO SEND A COPY OF THE REPORT TO EACH LEGISLATOR.

This act requires the Secretary of Revenue to include in the biennial tax expenditure report prepared by the Department of Revenue an estimate of the amount by which revenue is reduced by each tax expenditure. A tax expenditure is an exemption, an exclusion, a deduction, an allowance, a credit, a refund, a preferential tax rate, or another device that reduces the amount of tax revenue that would otherwise be available to the State. Under prior law, an estimate of the revenue loss was not required if making the estimate would impair other duties of the Secretary or the Department. The availability of the actual tax costs of the tax expenditures will better enable the General Assembly to scrutinize and evaluate the costs and benefits of these expenditures. The act also requires the Secretary to give each member of the General Assembly a copy of the tax expenditure report. Under prior law, members received copies of the report only upon request.

The Department of State Treasurer has suggested that, for the tax expenditure report to be an effective tool, "it needs to be carried further, and upgraded to include the actual tax costs of the many preferences; and it needs both legislative and public scrutiny." This act seeks to enhance the effectiveness of the biennial tax expenditure report by making it more complete and by making it more accessible to the members of the General Assembly.

1993 Chapter 440 (Senate Bill 162, Sen. Kerr)

AN ACT TO LIMIT THE NUMBER OF MOTOR VEHICLE DEALER LICENSE PLATES THAT CAN BE ISSUED TO THE SAME DEALER, TO MODIFY THE SANCTIONS FOR MISUSE OF A DEALER LICENSE PLATE, TO EXPAND THE USE OF TRANSPORTER PLATES, TO ESTABLISH A SPECIAL SPORTS EVENT TEMPORARY PLATE, AND TO CHANGE THE FEES FOR DEALER PLATES AND TRANSPORTER PLATES.

This act makes the changes described in its title and also makes numerous administrative and technical changes. The dealer plate changes and the authorization for the new special sports event temporary plate become effective October 1, 1993. The transporter plate changes become effective January 1, 1994. Sections 2, 3, and 7 through 12 make the dealer plate changes, Sections 4 through 6 make the transporter plate changes, Section 13 authorizes the new sports event temporary plate, and Section 1 makes an unrelated technical change.

The purpose of the act is to prevent the misuse of motor vehicle dealer license plates. The act does this by restricting the number of dealer license plates that can be issued to the same dealer, expanding the allowable uses of transporter plates so that fewer dealer plates are needed, and creating a new sports event temporary plate that can be used by dealers who provide vehicles for athletic events.

The misuse of a dealer license plate occurs when a dealer in new or used motor vehicles allows a dealer license plate to be used on a motor vehicle that is not, for all practical purposes,

part of the inventory of the dealer. The General Assembly is concerned about this problem because a motor vehicle that is improperly driven with a dealer license plate escapes property taxes, escapes motor vehicle title and registration fees, and receives an unfair advantage on automobile insurance. It escapes property taxes because it is supposedly part of the inventory of the dealer and is, therefore, exempted from property tax by the exemption for inventory. It escapes motor vehicle title and registration fees because the title to the vehicle has not been transferred to the person who uses the vehicle. It enjoys an unfair advantage on insurance because it is insured through the dealer's blanket liability insurance policy rather than through a policy that is specific to the vehicle.

Dealer Plate Changes

The most important change the act makes is to limit the number of dealer plates that can be issued to the same motor vehicle dealer. Until October 1, 1993, a dealer can obtain an unlimited number of dealer plates by submitting an application to the Division and paying the $10 fee for each plate. After October 1, 1993, a dealer can obtain no more than the maximum number of plates authorized by a schedule that is based on a combination of the number of motor vehicles the dealer sold during the relevant twelve-month period and the average number of qualifying sales representatives employed by the dealer during that period. The number of plates the schedule authorizes is as follows:

Vehicles Sold In Relevant 12-Month Period	Maximum Number of Plates
Fewer than 12	1
At least 12 but less than 25	4
At least 25 but less than 37	5
At least 37 but less than 49	6
49 or more	At least 6, but no more than 4 times the average number of qualifying sales representatives employed by the dealer during the relevant 12-month period.

The relevant 12-month period is the most recent 12-month period ending April 30. A "qualifying sales representative" is a sales representative who works for the dealer at least 25 hours a week on a regular basis and is compensated by the dealer for this work.

The act makes special allowances for new dealers as well as for established dealers who, for the first time, sell at least 49 vehicles in a year. A new dealer who was not in business for part or all of the relevant 12-month period may obtain the number of plates that equals four times the number of qualifying sales representatives employed by the dealer on the date the dealer files the application for dealer plates. An established dealer who was in business during the relevant 12-month period, who sold fewer than 49 vehicles during that period, but who has sold at least 49 vehicles since May 1 may apply for additional plates and may receive the number of plates that equals four times the average number of qualifying sales representatives employed by the dealer during the relevant 12-month period.

Although the act limits the number of dealer plates a dealer can obtain, the act preserves the open-ended use of the plates by officers and employees of the dealer, with one new restriction. The act prohibits an employee of the dealer who is less than 18 years old from driving a vehicle bearing a dealer plate unless that employee regularly works for the dealer at least 15 hours a week. Otherwise, as under prior law, an officer or an employee of the dealer can drive a motor vehicle bearing a dealer plate for any purpose and a person who is not an officer or an employee of the dealer can drive a motor vehicle bearing a dealer plate only if that person is test-driving the vehicle and has a demonstration permit.

To encourage compliance with the law concerning the use of dealer plates, the act changes the penalties for the unauthorized use of these plates and specifically prohibits a dealer from lending, renting, leasing, or otherwise placing a dealer plate at the disposal of a person who is not authorized to drive a vehicle with dealer plates. Under prior law, a dealer's license to engage in business as a motor vehicle dealer could be revoked for the misuse of dealer plates and a dealer who allowed the unauthorized use of dealer plates could arguably have been charged with a misdemeanor offense. In practice, no dealer's license was revoked for this reason and, because the law was vague, no dealer was ever charged with a misdemeanor violation for the misuse of dealer plates.

The act deletes these ineffective sanctions and substitutes three new sanctions. It declares that a violation of any of the restrictions on the use of dealer license plates is an infraction committed by the individual driving the car, is grounds for a civil penalty payable by the dealer of $200, and is grounds for the rescission by the Division of Motor Vehicles of all dealer plates issued to the dealer.

In addition to imposing new restrictions on the use of dealer plates and new penalties for their misuse, the act changes the fees for dealer plates. Under prior law, the fee for each dealer plate was $10. The act increases the fee for the first five dealer plates issued to the same dealer from $10 each to $20 each, but leaves the fee for the sixth and subsequent plates issued to the same dealer at $10 each.

Finally, the act makes administrative and technical changes to the dealer plate laws. One administrative change clarifies that all dealer plates must be turned in when a dealer's license is surrendered. Another administrative change deletes the requirement that a copy of a title or a manufacturer's certificate of origin be carried in a vehicle driven with dealer plates and substitutes a requirement that a registration card be carried.

The technical changes primarily sort motor vehicle dealer plate provisions and motor vehicle dealer licensing provisions, group the former into rewritten G.S. 20-79, and insert the latter into the appropriate statute in Article 12 of Chapter 20 of the General Statutes, the Motor Vehicle Dealers and Manufacturers Licensing Law. For example, Section 3 moves the requirement that an application for a motor vehicle dealer's license be accompanied by an application for dealer license plates from G.S. 20-79 to G.S. 20-288(a) because it is a requirement for licensure, and Sections 8 and 11 move from G.S. 20-110 to G.S. 20-294(11) and (12) in Article 12 two grounds for revocation of a dealer's license.

In sorting the provisions, the act repeals obsolete or redundant provisions. For example, in Article 12, G.S. 20-287 requires motor vehicle dealers and manufacturers to be licensed and G.S. 20-308 makes it a general misdemeanor to fail to get a dealer's license or for a person who is not a dealer to get dealer plates. The act therefore deletes provisions similar to these from G.S.

20-79. Similarly, because rewritten G.S. 20-79 makes it clear that only a dealer can obtain dealer plates, Section 10 of the act repeals G.S. 20-293, which states the same restriction.

In addition to the technical changes that sort dealer plate and dealer licensing provisions, the act makes conforming changes to various statutes to reflect the changes in rewritten G.S. 20-79. For example, Section 9 deletes a reference in G.S. 20-111(l) to exemptions in G.S. 20-79 because G.S. 20-79 no longer contains any exemptions. Similarly, Section 12 deletes unnecessary references to the use of dealer plates from the statute governing the transfer of a vehicle to a dealer or an insurance company.

Transporter Plate Changes

The act expands the allowable uses of transporter plates, primarily to provide dealers with plates that can be used in lieu of dealer plates, and changes the fee for a transporter plate. In contrast to a dealer plate, a transporter plate can be used only for a limited purpose. It is therefore easier to detect an unauthorized use of a transporter plate than of a dealer plate.

The act adds the following four uses for transporter plates: to pick up for repair, road-test, and then deliver to the dealer a vehicle that is offered for sale by a dealer, to drive a motor vehicle to or from a motor vehicle auction, to drive a vehicle that is at least 25 years old in a parade or other public event, and to drive a motor vehicle that is part of the inventory of a dealer to a motor vehicle trade show. These new uses are contained in rewritten G.S. 20-79.2(a)(4) and new G.S. 20-79.2(a)(5), (8), and (9).

The act changes the fee for a transporter plate to bring it closer to the fee for a dealer plate. The act sets the fee for a transporter plate at $10. Under current law, the fee for a transporter plate is $19 for the first plate issued to the same person and is $6 for each additional plate issued to the same person. Like dealer plates, transporter plates are issued on a yearly basis and are not specific to a vehicle. They can therefore be switched from one vehicle to another as long as the use of each vehicle remains within the allowable uses.

In expanding the allowable uses of transporter plates, the act makes technical changes to the transporter plate provisions. It incorporates all the allowable uses of transporter plates into subsection (a) of G.S. 20-79.2 and makes conforming changes required because of this new arrangement. Section 4 deletes G.S. 20-79.2(b) but moves its content to new G.S. 20-79.2(a)(8). Similarly, Section 5 repeals the statute that currently authorizes the use of transporter plates for house trailers and mobile homes because the authorization is moved to new G.S. 20-79.2(a)(7) in Section 4. Section 6 makes a conforming change to remove a reference to repealed G.S. 20-79.3, which was incorporated into G.S. 20-79.2(a)(7).

Special Sports Event Temporary Plate

The act authorizes a new type of plate for use by motor vehicle dealers. The new plate is called a special sports event temporary plate. It can be obtained only by a dealer and used only on a vehicle that is in the dealer's inventory and is loaned by the dealer to another for use at a special sports event. A "special sports event" is a sports event that is held no more than once a year and is open to the public. The Greater Greensboro Open Golf Tournament is an example of a special sports event. The fee for a special sports event temporary plate is $5.00 for each plate.

A special sports event plate is valid for up to 45 days. When obtaining a special sports event plate, a dealer may specify a shorter period of time during which the plate is valid. When the plate expires, the dealer to whom it is issued must destroy it. The plate will be a cardboard plate

similar to the 30-day cardboard plate issuable to the buyer of a motor vehicle for use until the Division issues the regular plate for the vehicle.

Unrelated Technical Changes

Sections 1 and 11 make technical changes that are unrelated to the substantive changes discussed above. Section 1 removes the 6-month limit on how often a person can apply for a motor vehicle dealer's license and makes a technical change to eliminate an incorrect reference to an established place of business. The limitation is removed because it appears to serve no purpose. Among other changes, Section 11 eliminates an incorrect reference to an established place of business. G.S. 20-288(d) requires a wholesaler to have an established office and a motor vehicle dealer to have an established salesroom. The correct term, therefore, is either established office or established salesroom, not established place of business.

1993 Chapter 442 (Senate Bill 1025, Sen. Kerr)

AN ACT TO PROVIDE FOR PAYMENT OF THE CIGARETTE TAX BY REPORTING RATHER THAN BY TAX STAMPS.

This act changes the method of collecting the State excise tax on cigarettes from a stamp method to a reporting method and reduces the discount allowed when paying the tax from 7/24¢ per stamp to 4% of the amount of tax payable. The per stamp discount amounts to $1.75 for each case of 60 cartons of cigarettes, which is approximately 6.28%. The changes become effective January 1, 1994. The changes are expected to increase General Fund revenue by $1.1 million each fiscal year. This increase is the result of a cost savings of $200,000 from no longer having to print the tax stamps and a reduction of $900,000 in the annual amount of cigarette tax discounts allowed.

Under current law, the State cigarette excise tax is paid through the use of tax stamps that are bought from the Department of Revenue by the distributor of the cigarettes and placed on each pack of cigarettes. The stamp indicates that the State excise tax has been paid. Effective January 1, 1994, the tax will be submitted with a monthly return filed with the Department of Revenue.

With the change in collection method, North Carolina becomes the fifth state that does not require tax stamps on cigarettes. The other four states are Alaska, Hawaii, Michigan, and North Dakota. This change also make collection of the State cigarette excise tax like collection of the State excise taxes on other tobacco products, soft drinks, and alcoholic beverages. All of these other excise taxes are paid by means of a monthly report and those who file the reports are allowed a 4% discount. The current per stamp discount is allowed as compensation for the expense of handling the stamps. Similarly, the 4% discount will be allowed as compensation for the expense of preparing the records and reports associated with payment of the cigarette excise tax and for the expense of furnishing a bond to the State. Unlike the other excise tax discounts, however, the 4% cigarette excise tax discount is not intended to cover the expense of paying the tax on products that subsequently cannot be sold because they become stale or otherwise become unsuitable for sale. Distributors of cigarettes will be allowed a refund of tax paid on packages of unsalable cigarettes that are returned to the manufacturer of the cigarettes. A refund of tax paid on these cigarettes, less the discount allowed, can be obtained by filing a refund claim with the Department of Revenue.

North Carolina levies an excise tax on cigarettes at the rate of 2 1/2 mills per individual cigarette. This translates to 5¢ per pack of cigarettes. The tax does not apply to free samples of cigarettes either given in packages of five or fewer cigarettes or given to cigarette factory workers.

Under current law, only licensed distributors may obtain unstamped cigarettes. If a person other than a distributor comes into possession of cigarettes upon which the excise tax has not been paid, that person must pay a use tax at the same rate as the excise tax. Similarly, under the act, only licensed distributors may obtain non-tax-paid cigarettes and anyone else who comes into possession of non-tax-paid cigarettes is liable for the use tax on the cigarettes.

Under current law, it is unlawful to transport, sell, or offer to sell unstamped cigarettes, except that tourists and others traveling to this State may possess up to 600 unstamped cigarettes (three cartons) for personal use. Possession of more than 600 unstamped cigarettes by anyone other than a licensed distributor is prima facie evidence that the cigarettes are possessed in violation of the tax law. Unstamped cigarettes, their container, and any vehicle or vessel in which they may be transported are contraband goods subject to seizure and confiscation.

Effective January 1, 1994, it will still be unlawful to transport, sell, or offer to sell non-tax-paid cigarettes, and non-tax-paid cigarettes, their container, and any vehicle or vessel in which they were transported will still be contraband goods. Unless the cigarettes bear the stamp of another state or country, however, law enforcement officers will not know by looking at them whether the North Carolina tax has been paid and, consequently, whether or not they are non-tax-paid cigarettes.

1993 Chapter 443 (Senate Bill 1141, Sen. Kerr)

AN ACT TO EXPAND THE TAX CREDITS FOR QUALIFIED BUSINESS INVESTMENTS AND TO PROVIDE THAT THE TAX CREDITS SHALL SUNSET FOR INVESTMENTS MADE ON OR AFTER JANUARY 1, 1999.

I. INTRODUCTION

Chapter 443 of the 1993 Session Laws makes a number of changes to the Qualified Business Investments Tax Credits, effective beginning with the 1994 tax year. Some of the changes, such as allowing partnerships to qualify for the credits and allowing investors to participate in the businesses, are designed to expand the credit. Other changes, such as reducing the maximum annual investment for individuals and prohibiting certain types of businesses from qualifying for the credit, narrow the credit. Other changes are designed to clarify the law and make it easier to administer. It is not known what effect these changes will have on General Fund revenues. The law as in effect until 1994 is summarized below as "former law." The changes made by the act are outlined following the summary of former law.

II. FORMER LAW

Division V of Article 4 of Chapter 105 of the General Statutes, Tax Credits for Qualified Business Investments, was enacted in 1987 to allow tax credits to individuals and corporations that invest in qualified North Carolina businesses or the North Carolina Enterprise Corporation. For individuals, the credit is allowed against individual income taxes. For corporations, the credit is allowed against corporate income taxes, franchise taxes, and insurance premiums taxes.

Until the 1994 effective date of Chapter 443, the amount of the credit allowed is 25% of the amount invested, up to a maximum credit of $100,000 for individuals and $750,000 for corporations. If the allowable credit exceeds the taxpayer's tax liability, the excess may be carried forward for up to five years. The total amount of tax credits that can be granted to individuals or corporations in any tax year is capped at $12 million. The investors apply for the credit through an application filed with the Department of Revenue by April 15; the Department then determines whether the $12 million cap has been exceeded and, if so, proportionally reduces the amount of each credit applied for.

Until the 1994 tax year, individuals are allowed credits for investments in the equity securities or subordinated debt of the North Carolina Enterprise Corporation and of three types of qualified businesses: qualified business ventures, qualified grantee businesses, and qualified investment organizations. Corporations are allowed credits only for investments in the equity securities of the North Carolina Enterprise Corporation and of one type of qualified business: qualified investment organizations.

A qualified business venture is a company that is headquartered and has most of its operations in North Carolina, had less than $5 million in sales in the prior year, and engages primarily in manufacturing, processing, warehousing, wholesaling, research and development, or a service-related industry. A qualified business venture may not engage primarily in construction, contracting, retailing, or investing.

A qualified grantee business is a company that is headquartered and has most of its operations in North Carolina and has received funding during the past three years from the North Carolina Biotechnology Center, the North Carolina Microelectronics Center, the Technological Development Authority, or the federal Small Business Innovation Research program.

A qualified investment organization is a firm engaged primarily in the business of investing in qualified business ventures and qualified grantee businesses. Since the enactment of the qualified business investment tax credits, no tax credits have been claimed for investments made in qualified investment organizations.

The North Carolina Enterprise Corporation is an entity formed under Article 3 of Chapter 53A of the General Statutes to make investments in small North Carolina businesses. The Corporation focuses on investments that have significant potential to create jobs and diversify and stabilize the economy of rural areas of the State.

Qualified businesses must register with the Secretary of State and renew their registrations annually. There is a $100.00 fee for registration and a $50.00 fee for renewal. Since 1988, the Secretary of State has registered 121 qualified business ventures and qualified grantee businesses but no qualified investment organizations. Individuals and corporations have applied for approximately $14 million in tax credits, which represents $56 million in investment in small North Carolina companies.

Under the law in effect until 1994, an investor in a qualified business venture or a qualified grantee business forfeits the tax credit if one of the following occurs within three years after the investment was made:

(1) The investor or the investor's family participates in the operation of the business.

(2) The business fails to renew its registration, other than solely because its revenues have grown above $5 million per year.

(3) The business has its registration revoked by the Secretary of State.

III. CHANGES MADE BY CHAPTER 443

Only Direct Investments Qualify

The act provides that the tax credit applies only to investments made in securities purchased directly from the qualified business. Under former law, a credit would potentially be available to both the original purchaser of the securities from the business and a person to whom the original purchaser sold the securities.

Pass-through Entities May Take Credit

The act provides that a pass-through entity may qualify for the credit and pass it on to the entity's owners. Under former law, only corporations and individuals could qualify for the credit. A pass-through entity is an entity, such as a partnership or a Subchapter S corporation, that is treated as owned by individuals or other entities under federal tax law and whose income, losses, and credits are reported by the owners on their State income tax returns. The pass-through entity may qualify for up to $750,000 of the credit per year. Investments in the equity securities or subordinated debt of any type of qualified business may be passed through to individuals; only investments in the equity securities of the North Carolina Enterprise Corporation may be passed through to corporations. This treatment parallels the types of investments for which credits are available to individuals and corporations.

Limit on Individuals' Credits Reduced

The act reduces from $100,000 to $50,000 the amount of credit an individual may claim each tax year for investments in qualified businesses.

Types of Qualified Business Ventures Restricted

The act provides that a business formed for the primary purpose of acquiring one or more other businesses does not qualify for the tax credit. In response to concerns that the credit was being used for inappropriate businesses such as law firms and golf courses, the act also provides that the credit does not apply to firms engaged primarily in the following types of businesses:

(1) A real estate-related business. A real estate-related business is a business involved in or related to the brokerage, selling, purchasing, leasing, operating, or managing of hotels, motels, nursing homes or other lodging facilities, sports or social clubs, restaurants, storage facilities, or commercial or residential lots or buildings.

(2) Providing a professional service. This category includes accountants, architects, attorneys, medical professionals, psychologists, occupational therapists, geologists, and foresters.

(3) Providing personal grooming or cosmetics services.

(4) Offering any form of entertainment, amusement, recreation, or athletic or fitness activity for which an admission or membership is charged.

Rules for Investor Participation in Business Modified

Under former law, an investor would forfeit the tax credit if the investor or the investor's family participates in the business. This act will allow investors and their families to participate actively in the business as long as they receive no financial compensation for their services aside from reimbursement for expenses and/or participation in a stock option or stock bonus plan. The

act also adds siblings to the types of family members who may not participate in the business for compensation.

Monitoring of Businesses Required

This act requires an application for renewal of registration as a qualified business to indicate whether the business is a minority business and to report the number of jobs created in the previous year that are attributable to the tax credit as well as the average wages paid by each job. In addition, it requires the Secretary of State to report to the Legislative Research Commission annually the following information about each qualified business registered for the investment tax credit: name and address, types of business in which it engages, whether it is a minority- or women-owned business, the number of jobs created by the business, and the average wages paid by these jobs.

Five-Year Sunset Placed on Tax Credit

Section 7 of this act repeals the entire tax credit for qualified business tax credits effective for investments made on or after January 1, 1999. This repeal will not affect carryforwards and credits for investments made before January 1, 1999.

Forfeiture Required for Transfer or Redemption of Securities

This act provides that an investor forfeits the tax credit for an investment in the North Carolina Enterprise Corporation or in a qualified business in the following cases:

(1) Within one year after making the investment, the investor transfers the securities, other than as a result of an individual investor's death, a corporate investor's liquidation, or a corporate investor's merger or consolidation approved by the North Carolina Enterprise Corporation or the qualified business.

(2) Within five years after the investment, the North Carolina Enterprise Corporation or the qualified business redeems the securities.

Limitations Period Extended for Assessments Based on Forfeitures

The statute of limitations for assessing taxes is, in most cases, three years after the tax return was filed or was required to be filed, whichever is later. Because forfeitures of qualified business investment tax credits may occur years after the credit was allowed, Section 6 of this act provides that the Department of Revenue may assess the tax due as a result of a forfeiture within three years after the date of the forfeiture.

No Forfeiture Required for Failure to Renew Registration

The act provides that an investor does not forfeit the tax credit if the qualified business fails to renew its registration with the Secretary of State, unless the business was unable to renew its registration because it has moved out of North Carolina or failed to relocate into North Carolina. If a qualified business venture fails to renew its registration, its registration is revoked, but it may apply to have its registration reinstated upon payment of a late filing penalty of $1,000. Under former law, an investor in a qualified business venture forfeited the credit for the investment if, within three years, the business failed to renew its registration, unless the failure to renew was solely because the business' revenues had grown beyond $5 million per year.

Restrictions on Registration Effective Date and Transfer Clarified

The act provides that the effective date of a qualified business's registration is the date the application is filed, rather than the date the application is approved. This provision allows investors a credit for investments made in a qualified business while waiting for its application to be approved. If the application is not approved, however, the investments will not qualify for the credit. The act also provides that registration as a qualified business may not be transferred from one business to another; however, if a qualified business is involved in a merger or consolidation and the surviving company qualifies for the registration, the surviving company may retain the registration.

Other Changes

This act makes the following additional changes:

(1) Repeals the provisions of the former law allowing tax credits for investments in qualified investment organizations. Because no tax credits have ever been claimed for these investments, it appears that this part of the law is serving no purpose.

(2) Clarifies the definition of "selling or leasing at retail."

(3) Allows the Department of Revenue to extend until September 15 the April 15 deadline for applying for the tax credit.

(4) Clarifies that the $50,000 and $750,000 annual limits on tax credits for individuals and corporations, respectively, do not apply to amounts carried forward from a previous tax year.

(5) Provides that the investor's basis in the securities representing the investment for which a credit is allowable will be reduced by the amount of the allowable credit, and adds a conforming change to the individual income tax law to allow taxation of the resulting gain when the securities are disposed of.

(6) Provides that if an investment is paid for other than in money, the taxpayer must include with the application for the credit a certified appraisal of the property used to pay for the investment.

(7) Clarifies that the Secretary of State will not revoke the registration of a qualified business solely because the business has ceased business operations.

(8) Provides that a person who submits a false application for registration as a qualified business is guilty of a general misdemeanor.

1993 Chapter 450 (House Bill 174, Rep. Luebke)

AN ACT TO AUTHORIZE THE DEPARTMENT OF REVENUE TO ALLOW OR REQUIRE PAYMENT OF TAXES BY ELECTRONIC FUNDS TRANSFER.

This act authorizes the Department of Revenue to require a taxpayer who owes an average of $20,000 a month of a type of tax to pay that tax by electronic funds transfer. An electronic funds transfer is a transfer of funds that is initiated through an electronic terminal, a telephone, or a computer to authorize a financial institution to debit or credit a taxpayer's account. The processing of certain tax payments electronically will enable the State Treasurer to invest tax

receipts sooner due to the reduced float time in receiving mail through the postal service and clearing checks through the banking system. The Department of Revenue estimates that the increased earnings on this decreased float will be approximately $1 million in fiscal year 1993-94 and $2 million in fiscal year 1994-95. The General Assembly appropriated $400,000 in fiscal year 1993-94 and $310,000 in fiscal year 1994-95 to the Department of Revenue in the expansion budget to enable the Department to implement an electronic funds transfer program.

The act became effective August 1, 1993. However, because of the time needed by the Department of Revenue to implement the program, the earliest date that electronic payments could actually be required is January 1, 1994. The act prohibited the Department from requiring the payment of motor fuels taxes or inspection fees by electronic funds transfer earlier than July 1, 1995. The Department of Revenue plans to phase the electronic funds transfer program in over several years. As planned, the program will be limited to the largest taxpayers and to taxes that are paid quarterly or more frequently. The first phase of the program, planned to begin January 1, 1994, involves withholding tax and corporate income tax. Later in 1994, utilities sales tax, utilities franchise tax, alcoholic beverages excise tax, and sales and use tax will be added. Initially, taxpayers with average payments of a single tax of $100,000 a month will be required to pay electronically. This threshold will be lowered as the program is developed, with full implementation for all targeted business taxes expected by the end of 1996.

The act enables the Department of Revenue to implement tax payments by electronic funds transfer by eliminating provisions in the former law that prohibit these payments. Some of these provisions require a tax to be paid at an office of the Department of Revenue and some require a tax to be paid by cash or check. This act deletes these conflicting provisions and substitutes a requirement that a tax be paid at the place and in the form required by the Secretary.

The monthly threshold applies separately to each tax. The Secretary will notify taxpayers who must pay taxes electronically and will educate them about the procedures to be followed. After the Secretary requires a taxpayer to pay a tax by electronic funds transfer, the Secretary must review the taxpayer's average payments at least annually. If the average amount of the payments falls below the $20,000 threshold, the Secretary must suspend the electronic funds payment requirement and so notify the taxpayer.

The act adds two new tax penalties related to electronic funds transfers. The first is a penalty for making an electronic funds transfer that is not honored due to insufficient funds or nonexistence of an account. Like the penalty for a bad check, this penalty is equal to 10% of the amount of the payment, with a maximum of $1,000. Like all other penalties except the bad check penalty, this penalty may be compromised or forgiven by the Secretary of Revenue for good cause. The second is a penalty for paying a tax in a form other than the form required by the Secretary. The penalty is equal to 5% of the amount of the tax, with a maximum of $1,000. This penalty will provide an incentive for taxpayers to comply with the electronic funds transfer requirements imposed by the Secretary.

Recommended by the Revenue Laws Study Committee.

1993 Chapter 459 (Senate Bill 658, Sen. Kaplan)

AN ACT TO EXPAND THE PROPERTY TAX EXEMPTION FOR COMPUTER SOFTWARE.

This act is the result of a compromise between the North Carolina Association of County Commissioners and a taxpayer group called the North Carolina Software Coalition. It replaces the current property tax exemption for certain computer software used by manufacturers, wholesalers, and retailers with an across-the-board property tax exemption for all computer software, and its related documentation, other than embedded software and software that the taxpayer buys or licenses from an unrelated seller and that is required by generally accepted accounting principles to be treated as a capital asset. The new exemption is effective for property taxes imposed for taxable years beginning on or after July 1, 1994.

The original purpose of the Software Coalition was to expand the current property tax exemption for certain computer software to include all computer software. As introduced, therefore, this legislation exempted all computer software from property taxes. The North Carolina Association of County Commissioners pointed out that a blanket exemption for computer software would seriously erode the local property tax base and, as a result, would reduce local property tax revenues by over $10 million each year. To reduce the Association's opposition to the proposal, the Coalition agreed to the compromise reflected in this act.

The act first "undoes" the 1992 computer software exemption. That exemption, which was enacted at the request of some of the members of the Software Coalition, distorted the definition of inventories and thereby exempted certain computer software from property tax as part of the exemption for inventories. The 1992 exemption applied only to the following three kinds of software that were held by a manufacturer, a wholesaler, or a retailer and were not treated as a capital asset:

(1) Software developed or modified by the taxpayer for the taxpayer's own use.

(2) Software developed or modified by someone other than the taxpayer to the special order of or to meet the particular needs of the taxpayer.

(3) Software developed, acquired, or used to develop or enhance programs the taxpayer intended to sell to others.

The 1992 exemption was effective for two years only. It became effective for the 1992-93 tax year and is repealed by this act effective with the 1994-95 tax year. Thus, it applied only in 1992-93 and 1993-94.

After "undoing" the 1992 computer software exemption, the act establishes a new exemption for computer software effective for the 1994-95 tax year. It provides that software is exempt unless it is either embedded software or is treated as a capital asset. Thus, the new exemption applies uniformly to all taxpayers, abandons the requirement that the software be specially made to suit the taxpayer or be used by the taxpayer to develop other software, and preserves the requirement that to be exempt the software must not be considered a capital asset.

Software is another name for a computer program or computer instructions. Embedded software is software that is stored on a microchip or circuit board, is an integral part of a piece of equipment such as a dishwasher, a cash register, or an automobile, and is the reason the equipment can perform the functions it can. A seller is unrelated to a taxpayer if the seller and the taxpayer are not subject to any common ownership, either directly or indirectly, and neither the seller nor the taxpayer has a direct or an indirect ownership interest in the other.

By exempting certain computer software from the property tax, this act reduces the local property tax base. The resulting annual revenue loss to local governments is unknown.

1993 Chapter 467 (Senate Bill 128, Sen. D. Winner)

AN ACT TO EXEMPT CERTAIN TRANSFERS OF VEHICLES FROM THE HIGHWAY USE TAX, TO REIMBURSE THE HIGHWAY TRUST FUND FOR REVENUE THAT WOULD OTHERWISE BE LOST AS A RESULT OF THE EXEMPTIONS, TO INCREASE REVENUES TO PROVIDE FUNDS TO MAKE THE REIMBURSEMENT, TO LOWER THE MAXIMUM HIGHWAY USE TAX ON CERTAIN COMMERCIAL VEHICLES, TO INCREASE THE ANNUAL REGISTRATION FEES FOR CERTAIN PROPERTY-HAULING VEHICLES, AND TO CREDIT THE INCREASED REVENUE FROM THE REGISTRATION FEES TO THE HIGHWAY TRUST FUND.

During the legislative process, this act grew from a one-section proposal concerning highway use tax exemptions to its current conglomeration of highway use tax changes and off-setting revenue increases. It changes the highway use tax by exempting three kinds of transfers from the tax, by modifying the exemption for transfers between certain family members, by reducing from $1,500 to $1,000 the maximum highway use tax payable on the transfer of a Class A or Class B commercial motor vehicle, and by allowing those who paid more than $1,000 on the transfer of one of these commercial motor vehicles to obtain a refund of the excess amount paid. Sections 1, 3, and 6 of the act make these changes; they became effective August 1, 1993.

The other changes the act makes are designed to provide revenue to off-set the revenue lost to the Highway Trust Fund as a result of the changes made to the highway use tax. The act authorizes the Division of Motor Vehicles of the Department of Transportation to use registration stickers to renew the registration of vehicles registered under the International Registration Plan, increases by 5¢ per hundred pounds the annual registration fee paid by certain property-hauling vehicles, and transfers revenue that is raised by the act in the Highway Fund to the Highway Trust Fund. Sections 2, 4, and 5 of the act make these "off-setting" changes. The authorization concerning the use of registration renewal stickers became effective August 1, 1993. The remaining off-setting changes become effective October 1, 1993.

In addition to these substantive changes the act makes numerous technical changes to the affected statutes. For example, it deletes several obsolete and inaccurate provisions in G.S. 20-66 concerning the annual renewal of motor vehicle registrations, and it changes the property-hauling vehicle registration weight categories, set out in G.S. 20-88(b), to conform to those that are used by the Division of Motor Vehicles.

Highway Use Tax Changes

The highway use tax is the tax that was enacted in 1989 to replace the sales tax on motor vehicles and provide a source of revenue for the Highway Trust Fund. The tax is 3% of the retail value of a motor vehicle, subject to a minimum tax of $40.00 and a maximum tax of either $1,000 or $1,500. Before July 1, 1993, the maximum tax for all vehicles was $1,000. Unlike the former sales tax on motor vehicles, which was payable only when a motor vehicle was sold, the highway

use tax is payable every time a certificate of title is issued for a motor vehicle. A title is issued every time a motor vehicle is transferred to a new owner or the owner changes names, regardless of whether any cash changes hands in the transfer or how many times the vehicle has previously been transferred.

The three transfers the act exempts are gifts between stepparents and stepchildren, transfers of handicapped vans from the Department of Human Resources to the handicapped, and transfers to local boards of education of driver education vehicles that are either "on loan" from a dealer or are owned by another local board of education. Before August 1, 1993, the effective date of these exemptions, these three types of transfers were subject to highway use tax at the full 3%, $1,500 maximum rate.

The exemption for vehicles transferred as the result of a gift between stepparents and stepchildren is a logical extension of the current exemption for transfers between parents and children and a clarification of that exemption. When the General Assembly exempted transfers between parents and children in 1991, it assumed that stepparents and stepchildren were included in the exemption. After the exemption became effective, however, the Attorney General's Office issued an opinion stating that the exemption for parents and children did not include stepparents and stepchildren. This act corrects this problem by specifically including transfers between stepparents and stepchildren in the list of exemptions.

The other two transfers the act exempts apply only in limited circumstances. One applies to vehicles that are transferred to a handicapped person from the Department of Human Resources after the Department has equipped the vehicle for use by the handicapped. The other applies to certain driver education vehicles.

The purpose of the exemption for vehicles transferred to the handicapped by the Department of Human Resources is to prevent two payments of highway use tax on the same vehicle within a short period of time. The Department of Human Resources pays highway use tax when it acquires a vehicle to be equipped for use by the handicapped. Before this exemption became effective, the handicapped person to whom the Department of Human Resources transferred the vehicle also paid highway use tax on the vehicle upon the transfer. This exemption eliminates the second payment of highway use tax in this circumstance by exempting the transfer to the handicapped person from the tax.

The purpose of the driver education exemption is to avoid increasing the cost of the driver education program in the public schools. This goal is accomplished by exempting from the tax the transfer of driver education vehicles that either are "on loan" from a motor vehicle dealer or were transferred between local boards of education. A vehicle is considered to be "on loan" from a dealer when it is transferred by the dealer to a local board of education and the dealer and the local board agree that the local board will transfer the vehicle back to the dealer within 300 days.

The act further changes the highway use tax exemptions by limiting the exemption for transfers between husbands and wives or parents and children to transfers that are the result of gifts. This same limitation applies to the new exemption for transfers between stepparents and stepchildren. Under prior law, all sales and other transfers of motor vehicles between spouses or between parents and children were exempt from the tax.

In addition to changing the highway use tax exemptions, the act lowers from $1,500 to $1,000 the maximum highway use tax payable on the transfer of a Class A or Class B commercial motor vehicle and allows a person who paid more than this new maximum on one of these vehicles

to obtain a refund of the excess amount paid. It does not change the maximum tax on a non-commercial motor vehicle.

A Class A or Class B commercial motor vehicle is a vehicle that weighs at least 26,001 pounds, either alone or in combination with a towed unit that weighs at least 10,001 pounds. In general, these vehicles are truck tractors and large trucks and, to drive them, a person must have the appropriate class of commercial drivers license. The fact that a vehicle is used commercially or has a registration plate bearing the word "commercial" does not determine whether the vehicle is a Class A or Class B commercial motor vehicle. Many vehicles that are used in a business and that have commercial plates are not Class A or Class B commercial motor vehicles because they do not meet the statutory definition of those vehicles.

For the period July 1, 1993, until August 1, 1993, the maximum tax on Class A and Class B commercial motor vehicles was $1,500 instead of $1,000. This is because the maximum tax increased from $1,000 to $1,500 effective July 1, 1993, and the reduction made by this act did not become effective until August 1, 1993. This act therefore allows a person to whom a Class A or Class B commercial motor vehicle was transferred during the month of July and who paid more than $1,000 tax on the transfer to obtain a refund for the amount that exceeds $1,000. To obtain a refund, the person must submit a claim to the Division of Motor Vehicles by January 1, 1994.

The changes in the highway use tax exemptions are expected to result in an annual loss of revenue to the Highway Trust Fund of $300,000. The reduction in the maximum highway use tax payable on the transfer of a Class A or Class B commercial motor vehicle is expected to result in an annual loss of revenue to the Highway Trust Fund of $2.2 million. The act transfers to the Highway Trust Fund revenue generated in the Highway Fund by the offsetting changes described below. The result is that the neither the Highway Trust Fund nor the Highway Fund loses money as the result of the changes.

Offsetting Revenue Changes

The act increases revenue in the Highway Fund by increasing certain annual vehicle registration fees and by authorizing the Division of Motor Vehicles to renew by means of a renewal sticker the registration of a vehicle that is registered under the International Registration Plan. Raising the annual registration fee generates most of the $2.5 million annual increase in Highway Fund revenue expected to occur as a result of the changes. The change in the renewal method results in a reduction in costs rather than an increase in a stream of revenue.

The act increases by 5¢ per hundred pounds the annual vehicle registration fee payable by property-hauling vehicles that are registered for 5,000 pounds or more and are in the private hauler, contract carrier, flat rate common carrier, and exempt for-hire carrier category. It therefore does not increase the annual registration fee for the average pick-up truck because most pick-up trucks are registered at 4,000 pounds, nor does it increase the annual vehicle registration fee for vehicles in the farmer category.

The act increases the annual registration fee on certain property-hauling vehicles rather than raise other fees because some of the property-hauling vehicles whose annual registration fee is increased are in the group of commercial motor vehicles that will benefit from the reduction in the maximum highway use tax. To some extent, therefore, the same people who benefit from the tax reduction will provide revenue through the increased fees to cover the loss. The group whose fees are increased, however, is much larger than the group that will enjoy the reduction in the

maximum highway use tax because the fee increases start at 5,000 pounds rather than 26,000 pounds.

The new property-hauling registration fee structure also abandons the historical relationship between the rate for the farmer category and the other category. Traditionally, the farmer rate has been one-half the regular rate. With the increase made by this act, the farm rate will be less than one-half the regular rate for every weight category except 4,000 pounds.

The other way the act increases revenue in the Highway Fund is by authorizing the Division of Motor Vehicles to renew the registration of vehicles registered under the International Registration Plan by means of a sticker. That Division currently renews the registration of these vehicles by issuing a new plate each year. The new plates are all issued on a calendar year basis.

Before this act changed the law on this subject, the Division could not renew these plates by means of a sticker. Switching to renewal by sticker will allow the Division to stagger the renewals and to avoid the cost of the new plates. This change was recommended by an audit of the Division of Motor Vehicles performed by the State Auditor.

After it increases revenue in the Highway Fund, the act transfers revenue from the Highway Fund to the Highway Trust Fund. The transfer compensates the Highway Trust Fund for revenue that is lost to it by the highway use tax changes the act makes. The transfer is made by putting into the Highway Trust Fund part of the title fee that currently goes to the Highway Fund. Effective October 1, 1993, the Highway Trust Fund will receive $31.50 of every $35 title fee instead of $30 of every $35 title fee.

Section 1 of this act was recommended by the Revenue Laws Study Committee.

1993 Chapter 471 (Senate Bill 60, Sen. Odom)

AN ACT TO IMPOSE AN ADVANCE DISPOSAL TAX ON NEW WHITE GOODS, TO REQUIRE EACH COUNTY TO PROVIDE FOR THE MANAGEMENT OF DISCARDED WHITE GOODS, AND TO PROVIDE FOR THE REMOVAL OF CHLOROFLUOROCARBON REFRIGERANTS FROM WHITE GOODS.

This act imposes a temporary tax on white goods and provides for the removal of chlorofluorocarbon refrigerants from discarded white goods. The tax becomes effective January 1, 1994, and expires July 1, 1998. A white good is a domestic or commercial large appliance, such as a refrigerator, a water heater, an air conditioner unit, or a dishwasher. Chlorofluorocarbon refrigerant is a type of gas that must be removed from a white good under federal law. Chlorofluorocarbon refrigerants are currently being phased out and will be banned as of January 1, 1996, by the Environmental Protection Agency (EPA). The EPA contends that chlorofluorocarbon refrigerants, if improperly removed, may pose a serious threat to the environment. The cost to properly remove the gas is between $5 and $17 per white good.

The act imposes a flat rate tax on each new white good sold in this State of $5 if the new white good does not contain chlorofluorocarbon refrigerants and $10 if the new white good does contain chlorofluorocarbon refrigerants. The tax is collected and administered, to the extent practical, as if it were an additional State sales tax. A person who buys 50 new white goods of any kind may obtain a refund of 60% of the amount of tax imposed when all of the white goods

purchased are to be placed in new or remodeled dwelling units that are located in the State and do not already contain the kind of white good purchased. Neither a local government unit nor a contracting party can charge a person an additional fee for the disposal of white goods until July 1, 1998, which is the date the white goods disposal tax expires.

The tax is expected to generate a little over $2 million in fiscal year 1993-94 and approximately $4.5 million annually in fiscal years 1994-95 through 1997-98. For the first year of the tax, the Department of Revenue may deduct its cost of collection, not to exceed $225,000, from the proceeds of the tax. Each quarter the Secretary shall distribute the proceeds of the tax as follows:

(1) 5% to the Solid Waste Management Trust Fund. The money in this Fund is used to fund activities of the Department of Environment, Health, and Natural Resources (DEHNR) to promote waste reduction and recycling, to fund research on the solid waste stream in North Carolina, to fund activities related to the development of secondary materials markets, to fund demonstration projects, and to fund research by in-State colleges and universities.

(2) 20% to the White Goods Management Account. The money in this Account will be used to make grants to local governmental units to assist them in managing discarded white goods.

(3) 75% to the 100 counties on a per capita basis to be used only for the management of discarded white goods.

Each county must provide at least one site for the collection of discarded white goods. The act also requires each county to provide for the disposal of discarded white goods and for the removal of chlorofluorocarbon refrigerants from white goods. A county may contract with another unit of local government or with a private entity for the management of discarded white goods or for the removal of chlorofluorocarbon refrigerants from white goods. A county must establish written procedures for the management of white goods and must include these procedures in any solid waste management plan required by DEHNR.

If a county's costs of managing white goods for a six-month period exceeds the amount the unit receives from the per capita distribution of the white goods disposal tax, the county is eligible to apply for a grant from the White Goods Management Account. A grant to a unit may not exceed the unit's unreimbursed cost of managing white goods for the six-month period. The grant program will be administered by the DEHNR and will remain in effect until July 1, 1999.

Under the act, DEHNR may assess a civil penalty of not more than $100 against a person who, knowing it is unlawful, disposes of a discarded white good in a landfill, an incinerator, or a waste-to-energy facility. The Department may also assess a civil penalty of up to $100 against a person who, knowing it is required, fails to remove chlorofluorocarbon refrigerants from a discarded white good. These penalties may be assessed for each day the violation occurs. The civil penalties collected will be credited to the General Fund as nontax revenue.

1993 Chapter 484 (Senate Bill 154, Sen. Seymour)

AN ACT TO MAKE MOBILE CLASSROOMS AND MOBILE OFFICES SUBJECT TO SALES TAX RATHER THAN HIGHWAY USE TAX AND TO EXEMPT CERTAIN MOBILE CLASSROOMS FROM SALES TAX.

This act makes two changes in the law concerning the taxation of mobile offices and mobile classrooms. First, it makes mobile offices and mobile classrooms subject to sales tax rather than highway use tax. Second, it exempts from sales tax mobile classrooms sold to a local board of education or a local board of trustees of a community college. The changes become effective October 1, 1993. The changes are expected to increase General Fund sales and use tax revenue by $150,000 each year and to reduce highway use tax revenue by $30,000 each year. The net fiscal effect therefore is a gain of $120,000 each year.

The act makes the first change to avoid the potential revenue loss that occurs when mobile offices and mobile classrooms are not titled. Mobile offices and mobile classrooms are currently subject to highway use tax rather than sales tax because they are considered to be motor vehicles. Motor vehicles are subject to highway use tax and are not subject to sales tax. The highway use tax is collected only when a vehicle is titled. Although the law requires mobile classrooms and mobile offices to be titled, many are not. Consequently, no highway use tax is being collected on many mobile classrooms and mobile offices.

The act makes the second change to avoid imposing an additional tax burden on local boards of education and local boards of trustees of community colleges. Without the exemption, the act would impose an additional tax burden on these local boards when they purchase mobile classrooms because even though they are required to title mobile classrooms, they frequently do not and therefore frequently do not pay the highway use tax due on the mobile classrooms.

The act does not change the rate of tax that applies to mobile offices and mobile classrooms. Its practical effect, therefore, is to collect the same amount of tax when a mobile office or a non-exempt mobile classroom is sold instead of when it is titled.

Section 1 of the act removes mobile offices and mobile classrooms from the definition of "motor vehicle" that is used for sales tax purposes so that they will be subject to sales tax rather than highway use tax. Section 2 sets the sales tax rate that will apply to mobile offices and mobile classrooms; the rate set is the same as the current highway use tax rate. The highway use tax rate for mobile offices and mobile classrooms is 3% of the retail value of the vehicle, subject to a maximum tax of $1,500. As with manufactured homes, each segment of a double-wide mobile office or mobile classroom will be considered a separate item and the maximum tax will apply to each of the segments. Section 3 contains the exemption for mobile classrooms sold to local boards of education or local boards of trustees of community colleges.

Before the enactment of the highway use tax in 1989, manufactured homes, mobile offices, and mobile classrooms were all subject to sales tax at the rate of 2% with a $300 cap on each segment. The highway use tax legislation distinguished between manufactured homes, mobile offices, and mobile classrooms, leaving the first of these three subject to sales tax and making the last two of these subject to highway use tax. This act once again makes all three of these items subject to sales tax.

Recommended by the Revenue Laws Study Committee.

1993 Chapter 485 (Senate Bill 155, Sen. Plexico)

AN ACT TO MAKE TECHNICAL AND CONFORMING CHANGES TO THE REVENUE LAWS AND TO CLARIFY AND MODIFY THE TAX SECRECY PROVISION.

Sections 1 through 30 of this act makes numerous technical and clarifying changes to the revenue laws and related statutes. The remaining sections of this act clarify, reorganize, and modify the statutes governing secrecy of government tax records. These sections were introduced by Representative Gamble in House Bill 74. The act became effective upon ratification, July 23, 1993.

TECHNICAL CHANGES

The following table provides an analysis of the technical changes made by the first 30 sections of the act:

Section	**Explanation**
1	Repeals a Session Law that is ineffective because the language it amended had already been deleted by an earlier Session Law.
2	Makes a conforming change to reflect the fact that official population estimates that were formerly certified by the State Budget Officer are now certified by the State Planning Officer.
3	Removes stray language from a statute; the language resulted because the changes made to a statute by two different acts enacted in 1993 were in conflicting forms. This is not a substantive change (see the summaries for Chapters 362 and 371, above).
4	Removes inaccurate provisions regarding the scope of G.S. 105-122 contained in the franchise tax exemptions statute and reorganizes and clarifies the language of the statute. The removed provisions are corrected and placed in the appropriate statute in Section 5.
5	Corrects inaccurate provisions regarding the scope of G.S. 105-122 and places the provisions in the appropriate introductory statute applicable to franchise taxes.
6	G.S. 55-14-05(c) of the Business Corporation Act provides that a corporation that dissolves does not owe franchise tax unless it engages in business activities during the tax year. This section adds the same provision to the franchise tax law. The Department of Revenue is currently administering the law in accordance with this provision. This change was requested by the Department of Revenue.
7	Makes a conforming change to reflect the fact that official population estimates that were formerly certified by the State Budget Officer are now certified by the State Planning Officer.
8	Makes a conforming change to a cross-reference to G.S. 105-134.6, which is rewritten by Section 9 of this act.
9	The federal courts have held that North Carolina cannot tax income earned by a member of a federally recognized Indian tribe from activities on the reservation. This section adds to the individual income tax statutes a provision explicitly recognizing that rule of law. This change was requested by the Department of Revenue.

This section also makes technical changes in the wording of the individual income tax adjustments and in the location in the statutes of some of these adjustments, as follows: it changes the word "gross" to "taxable" in a few places because some items that are to be added to or subtracted from federal taxable income are not specifically identifiable under the Code as deductions subtracted from gross income. It also creates a new subsection (d) in G.S. 105-134.6 to provide for deduction of amounts that are not specifically identified as income items included in gross income under the Code.

10	Clarifies ambiguous language in accordance with the correct interpretation by the Department of Revenue.
11	Makes a conforming change to reflect the fact that official population estimates that were formerly certified by the State Budget Officer are now certified by the State Planning Officer.
12	Substitutes the correct term "minority business" for "minority business enterprise" in the statutes requiring a business to provide background information when renewing its registration as a qualified business. Tax credits are allowed for investments in certain businesses that have registered as qualified businesses. For more information, see the summary of Chapter 443, above.
13	Makes a conforming change to reflect the fact that official population estimates that were formerly certified by the State Budget Officer are now certified by the State Planning Officer.
14	Corrects an incorrect cross-reference and simplifies some awkward statutory language. This change was requested by the Department of Revenue.
15	Removes redundant language regarding the scope of Article 9 of Chapter 105 of the General Statutes. The scope of Article 9 is set out in G.S. 105-228.90.
16	Makes a conforming change to reflect the fact that official population estimates that were formerly certified by the State Budget Officer are now certified by the State Planning Officer.
17	Deletes a reference to a repealed subsection.
18	Excludes short term rental vehicles from the new system for collecting property taxes on motor vehicles. The old system of taxation, in which the vehicles will be listed by the company, is more appropriate for these vehicles. This change was requested by the Department of Revenue and the Association of County Commissioners.
19	Removes incorrect and unnecessary cross-references.
20 - 21	Clarify that the penalty for failure to file an additional bond for motor fuel tax purposes also applies to failure to file a replacement bond. This change was requested by the Department of Revenue.
22	Removes a reference to a provision, repealed in Section 23, allowing counties to collect their own local sales and use taxes.
23	Repeals a provision allowing counties to collect their own local sales and use taxes.

24	Makes a conforming change to reflect the fact that official population estimates that were formerly certified by the State Budget Officer are now certified by the State Planning Officer. Simplifies and clarifies awkward statutory language.
25 - 27	Remove references to a provision, repealed in Section 23, allowing counties to collect their own local sales and use taxes.
28	Deletes a reference to a repealed statute and substitutes the applicable provisions of that statute.
29	Conforms the catchline of G.S. 105-449.15 to reflect its true content. The exemption from the special fuels tax for nonanhydrous ethanol expired on January 1, 1993.
30	Repeals the exemption for nonanhydrous ethanol from the gasoline tax statute so that it conforms with the special fuels tax statute. The exemption in the special fuels tax statute expired on January 1, 1993. The expiration language for the exemption was inadvertently omitted from the gasoline tax statute when it was revised in 1985. To the knowledge of the Department of Revenue, this exemption has never been used. (Nonanhydrous ethanol is not used to make gasohol; it has a water content and, by its nature, cannot be mixed with gasoline.)

TAX SECRECY CHANGES

Sections 31 through 40 of this act reorganize and make both clarifying and substantive changes to the statutes governing confidentiality of government tax records. The substantive changes delete the authority of the Governor and of members of the General Assembly to have access to confidential tax information, expand two existing exceptions to the prohibition against disclosing information (G.S. 105-259(b)(11) and (12)), add six narrow exceptions to the list of information that can be disclosed (G.S. 105-259(b)(13) through (18)), and remove information that is contained on a master application form submitted to the Business License Information Office of the Secretary of State from the definition of confidential tax information. The changes are described in more detail below.

Governor and General Assembly Members

This act deletes the authority of the Governor to have access to confidential tax information and deletes any right of access the members of the General Assembly may have to confidential tax information. Both former Governor Jim Martin and current Governor Jim Hunt concur with the change in the Governor's access.

Under former law, it was not clear whether members of the General Assembly had access to confidential tax information. G.S. 120-19, enacted in 1937, required all State agencies to furnish the General Assembly upon request "all information and data within their possession." The Revenue Act's secrecy provision, however, which was enacted in 1939, made no exception for members of the General Assembly. This act resolves this conflict by making it clear that members of the General Assembly do not have access to confidential tax information. The act therefore puts members of the General Assembly in the same position concerning this matter as the Governor.

Expanded Exceptions

The act expands the former exceptions to the prohibition against disclosure found in G.S. 105-259(b)(11) and (12). It expands the authorization to give one spouse information about the other spouse's income taxes when the spouses file a joint income tax return to include any joint

return the couple files. In addition to filing joint income tax returns, spouses frequently file joint intangibles tax returns. Under former law, the Department could not give a copy of the intangibles tax return to a spouse who signed the return but did not have a copy of the return because the return discloses information about the other spouse.

The act expands the current exception for a financial institution to receive payments of withheld individual income taxes to include the transmittal of payments by electronic funds transfer. Chapter 450 of the 1993 Session Laws, summarized above, authorizes the Department of Revenue to initiate an electronic funds transfer payment program. That program cannot be initiated without this exception to the secrecy law.

New Exceptions

This act adds to the exceptions to the tax secrecy provisions the limited disclosures listed in G.S. 105-259(b)(13) through (18). Those disclosures are as follows:

(b)(13): Fiscal Research: Authorizes the Department of Revenue to give to the Fiscal Research Division of the General Assembly a sample of returns from which taxpayer identifying information has been removed so that the Division can prepare estimates of the effects of proposed changes in the law and conduct other research.

(b)(14): Department of Agriculture: Authorizes the Department of Revenue to share motor fuel tax information with the Department of Agriculture; the two agencies work together in administering motor fuel taxes and the Gasoline and Oil Inspection Act.

(b)(15): Excise Tax Information: Authorizes the Department of Revenue to exchange information on tobacco, soft drink, alcoholic beverage, or controlled substance excise taxes with the North Carolina Alcoholic Beverage Control Commission, the Alcohol Law Enforcement Division of the Department of Crime Control and Public Safety, and the federal Bureau of Alcohol, Tobacco, and Firearms. Under former law, the Department of Revenue could not exchange information, other than lists of licensees, with these agencies.

(b)(16): Corporate Existence: Authorizes the Department of Revenue to give the Secretary of State names and identifying information of corporations to enable the Secretary of State to locate a corporation and notify the corporation that it is required to file an annual report.

(b)(17): License Application Status: Authorizes the Department of Revenue to give to the Business License Information Office of the Secretary of State information on the status of a license application for which the applicant has asked the License Office for assistance in coordinating. The License Office has the duty to assist and coordinate license applications but former law prohibited the Department of Revenue from disclosing information the Office needed to carry out this duty.

(b)(18): Vendor Location: Authorizes the Department of Revenue to give the State Controller names and identifying information of taxpayers to enable the State Controller to locate vendors who do business with the State and to track debtors of the State.

Master Business License Application Information

The act excludes information submitted to the Business License Information Office on a master application form from the definition of tax information. This change makes the information submitted on a master application form accessible to the various agencies that need to see the form to be able to process the applications included on the form and makes the information available to the public.

Clarifying Changes

In addition to making the substantive changes described above, the act makes several clarifying changes. It clarifies that local tax records containing information relating to a taxpayer's income or receipts are confidential and that other tax records, such as property tax records, are not confidential. It also makes conforming changes to various statutes and moves provisions that are unrelated to the disclosure of tax information from G.S. 105-259 (the secrecy provision of the Revenue Act) to more appropriate statutes.

Recommended by the Revenue Laws Study Committee.

1993 Chapter 494 (Senate Bill 1018, Sen. Ward)

AN ACT TO CLARIFY THAT REAL ESTATE MORTGAGE INVESTMENT CONDUITS WILL BE TREATED AS PASS-THROUGH ENTITIES FOR STATE TAX PURPOSES TO THE SAME EXTENT AS UNDER THE FEDERAL TAX LAW.

This act brings the State law into conformity with the federal tax law by exempting real estate mortgage investment conduits (REMICs) from corporate income taxes, franchise taxes, and the intangibles tax. A REMIC is an entity, usually a trust, that holds a pool of real estate mortgages for the benefit of investors who have invested in the entity. In concept, it is similar to a mutual fund that holds securities for the benefit of its investors. Current law already exempts similar entities, regulated investment companies (RICs) and real estate investment trusts (REITs), from these taxes.

Federal law authorizes the creation of REMICs in order to facilitate investment in real estate mortgages. Since 1986, federal tax law has provided that a REMIC is not subject to federal income tax as an entity; instead, income from its mortgages is taxed directly as income of the investors. This makes a REMIC a pass-through entity: the income is "passed through" to the individual investors, rather than being taxed to the entity. A partnership, a mutual fund, a REIT, and a Subchapter S corporation are other types of pass-through entities.

North Carolina law does not specifically recognize REMICs as pass-through entities, although it does recognize other pass-through entities. The Department of Revenue interprets the current income tax law as allowing pass-through status for REMICs. It is not clear, however, whether the franchise tax law and the intangibles tax law would be interpreted in the same way. This act establishes with certainty the tax treatment of REMICs in North Carolina. This act becomes effective beginning with the 1993 tax year.

1993 Chapter 495 (Senate Bill 1111, Sen. Hoyle)

AN ACT TO ALLOW EACH OF THE MEMBERS OF THE FARMERS MUTUAL FIRE INSURANCE ASSOCIATION OF NORTH CAROLINA TO BE INDEPENDENTLY CHARTERED.

This act abolishes the Farmers Mutual Fire Insurance Association of North Carolina, which was established by an act of the General Assembly in 1893, and enables all the current

branches of that association to convert to independently chartered mutual insurance companies. The act becomes effective January 1, 1994.

A current branch of the Farmers Mutual Fire Insurance Association that converts to an independently chartered mutual insurance company will be subject to the same taxes and fees as under current law. Thus, the bill makes no substantive change in the taxation of these companies. It makes one technical change, however, concerning the taxation of these companies. It deletes a reference in the insurance tax statutes to branches of the farmer's mutual assessment fire insurance company because, effective January 1, 1994, these companies will be independent companies and not branches of the same company.

1993 Chapter 497 (Senate Bill 1157, Sen. D. Winner)

AN ACT TO AMEND THE CONSTITUTION TO PERMIT CITIES AND COUNTIES TO ISSUE BONDS TO FINANCE THE PUBLIC PORTION OF ECONOMIC DEVELOPMENT PROJECTS AND TO AUTHORIZE COUNTIES AND CITIES TO ACCEPT AS CONSIDERATION FOR A CONVEYANCE OR LEASE OF PROPERTY TO A PRIVATE PARTY THE AMOUNT OF INCREASED TAX REVENUE EXPECTED TO BE GENERATED BY THE IMPROVEMENTS TO BE CONSTRUCTED ON THE PROPERTY.

This act gives counties and cities two different tools to enhance their ability to recruit and retain economic development. The first part of the act permits voters to vote on a constitutional amendment that will allow the General Assembly to enact general laws authorizing counties and cities to borrow money, without voter approval, to finance public activities associated with private economic development projects within a defined territorial area. This development tool, known as economic development financing, will allow local governments to set aside the additional property taxes that are generated by a new investment to pay for public facilities that support that new investment. The second part of the act authorizes counties and cities to accept as consideration for a conveyance or lease of property to a private party the amount of increased tax revenue expected to be generated by the improvements to be constructed on the property. This part of the act became effective upon ratification, July 23, 1993.

The economic development financing bonds issue will be placed before the voters on Tuesday, November 2, 1993. The issue has been defeated by the voters once, on November 2, 1982. The Constitution needs to be changed to allow this because under the Constitution as it now reads the General Assembly does not have the power to authorize any unit of local government to issue bonds secured by its property tax revenue without a vote of the people.

If the amendment is approved, counties and cities may create a development financing district and adopt a development financing plan for that district. The total land area of the district may not exceed 5% of the total land area of the unit creating the district. The development financing plan describes the projects the unit of local government desires to finance and how the tax proceeds from the economic development financing bonds will be used. The plan must also include a description of how the proposed development, both public and private, will benefit the residents and business owners of the district in terms of jobs, affordable housing, and services. The plan must pass an environmental review and it must contain a requirement that initial users

of a new manufacturing facility located in the district pay employees of the facility an average weekly manufacturing wage that is either above the average weekly manufacturing wage paid in the county where the district is located or is at least 10% above the average weekly manufacturing wage paid in the State. A plan may be exempt from the wage requirement if the Secretary of Commerce finds that unemployment in the county in which the district is located is especially severe.

If a county or city wants to issue economic development financing bonds to finance public activities associated with private economic development projects within a development financing district, it must have the approval of the Local Government Commission. The Commission cannot approve an application until the development financing district is created and the development financing plan is adopted. The bonds may be issued to finance parking facilities, sewer systems, solid waste disposal systems, storm sewers and flood control facilities, water systems, public transportation facilities, land development for industrial or commercial purposes, and redevelopment. Redevelopment includes purchasing and improving property to help local redevelopment commissions. Before approving the bond issuance, the Commission must find, among other things, that the proposed economic development financing bond issue is necessary to secure significant new economic development for a development financing district and that the private development forecast in the development financing plan would not be likely to occur without the public projects to be financed by the bonds.

To secure the bonds, the county or city issuing the bonds must establish a separate fund to account for the proceeds paid to it from taxes levied on the incremental valuation of the development financing district. The incremental valuation is the excess of the assessed value of taxable property in the district at the time the taxes are levied over the assessed value of property in the district at the time it was created. The Local Government Commission must find that the taxes on the incremental valuation, together with any proceeds that may be realized from the sale of property in the district and any revenues that may be realized from a public facility in the district, will be sufficient to service the economic development financing bonds. The district may remain in effect for 30 years or until the bonds are retired. The bonds must be retired within 30 years or within the useful life of the projects financed, whichever is shorter. After that, all taxes are paid into the local general fund.

To provide additional security for the bonds, the county or city issuing the bonds may pledge the proceeds from the sale of property in the development financing district and the net revenues from public facilities in the development financing district constructed or improved under the development financing plan. The city or county may also pledge any other available sources of revenue as long as the agreement to use the sources to make payment does not constitute a pledge of the county's or city's taxing power. Other available sources of revenues that do not constitute a pledge of a county's or city's taxing power include taxes levied by the State that are transferred to a county or city, such as beer and wine tax revenues, utilities franchise tax revenues, and intangibles tax revenues.

The second part of the act authorizes counties and cities to estimate the amount of increased tax revenue that would accrue during the succeeding 10 years from economic development of a piece of property by the purchaser of the property and to accept the estimated amount as consideration for a conveyance of the property from the county or city to a purchaser that will bring the anticipated economic development. This same provision is contained in House Bill 1109, ratified as Chapter 536 of the 1993 Session Laws. Several cities and counties currently have this authority under local acts ratified over the past several years.

The county or city must determine that the conveyance of the property will result in the creation of a substantial number of jobs in the county or city that pay at or above the median average wage in the county or, for a city, in the county where the city is located. In accepting the consideration, the governing board of the county or city must contractually bind the purchaser of the property to construct, within five years, improvements on the property that will generate the tax revenue taken into account in arriving at the consideration. Upon failure to construct the improvements specified in the contract, the purchaser must reconvey the property back to the county or city.

1993 Chapter 507 (Senate Bill 659, Sen. Kaplan)

AN ACT TO PROVIDE THAT DEPOSITS ON RETURNABLE AERONAUTIC REPLACEMENT PARTS WILL BE TREATED THE SAME WAY AS DEPOSITS ON RETURNABLE AUTOMOTIVE, INDUSTRIAL, MARINE, AND FARM REPLACEMENT PARTS FOR SALES TAX PURPOSES.

State and local sales taxes are calculated as a percentage of the sales price of an item sold at retail. G.S. 105-164.3(16) defines sales price as the total amount for which an item is sold, with certain exceptions. Subpart e. of G.S. 105-164.3(16) provides that the sales price does not include refundable deposits paid by buyers on automotive, industrial, marine, and farm replacement parts that can be returned to the seller for rebuilding. Replacement parts do not include tires and batteries.

Effective August 1, 1993, this act extends this exception to provide that the sales price for sales tax purposes will not include refundable deposits paid by buyers on aeronautic replacement parts that can be returned to the seller for rebuilding. The anticipated loss to the General Fund is approximately $91,000 annually.

1993 Chapter 527 (House Bill 1359, Rep. Colton)

AN ACT TO ALLOW AN INCOME TAX CREDIT FOR EXPENDITURES TO REHABILITATE A CERTIFIED HISTORIC STRUCTURE.

This act allows a corporate and an individual income tax credit for qualifying rehabilitation expenditures, as defined under section 47 of the Internal Revenue Code, with respect to a certified historic structure located in North Carolina. The amount of the credit is equal to one-fourth of the federal income tax credit for qualifying rehabilitation expenditures. The federal credit is 20% of the qualifying rehabilitation expenditures. Therefore, for State tax purposes, the credit would equal 5% of the qualifying rehabilitation expenditures. However, the amount of the State tax credit cannot exceed the amount of tax due and any excess credit cannot be carried forward. The credit will be available for taxable years beginning on or after January 1, 1994.

A certified historic structure is a building that is listed in the National Register or that is located in a registered historic district and is certified by the Secretary of the Interior as being of historic significance to the district. A qualifying expenditure is one that can be chargeable to a

capital account and for which a straight line depreciation is allowable. The expenditure must be in connection with the rehabilitation of a building and it must be consistent with the historic character of the property or the district in which the property is located. Qualifying expenditures do not include the cost of buying a structure or any expenditure attributable to the enlargement of an existing structure.

1993 Chapter 532 (Senate Bill 832, Sen. D. Winner)

AN ACT TO PROVIDE A TIMETABLE WITHIN WHICH THE DEPARTMENT OF REVENUE AND THE TAX REVIEW BOARD MUST HOLD ADMINISTRATIVE HEARINGS AND RENDER DECISIONS AND TO PROVIDE FOR STATE TAXPAYERS' RIGHTS.

This act makes numerous substantive and technical changes relating to administrative review in tax disputes and other tax enforcement and administration matters. Many of the changes were introduced by Representative Hackney in House Bill 1028, AN ACT TO PROVIDE FOR STATE TAXPAYERS' RIGHTS. The act is not expected to have any impact on State revenues. The act becomes effective January 1, 1994.

Timetable for Administrative Hearings

Sections 2, 3, and 10 through 12 of this act establish the timetable for administrative hearings by the Secretary of Revenue and the Tax Review Board on proposed and final tax assessments, requests for refunds, and allocation and apportionment of corporate income to this State for franchise tax and income tax purposes. If a taxpayer makes a timely, written request for a hearing, the Secretary or the Tax Review Board must schedule the hearing for a date within 90 days after the request and must notify the taxpayer within 60 days after the request and at least 10 days before the hearing. The hearing may be postponed at least once for up to 90 days, and longer upon the mutual agreement of the parties. The Secretary or the Tax Review Board is required to notify the taxpayer of the decision on the hearing within 90 days after the hearing. Under current law, there are no time limits within which a requested hearing must be scheduled or, after it is held, within which a decision must be made.

Notice of Final Assessment

Section 2 of this act requires the Secretary of Revenue to notify a taxpayer when a proposed assessment becomes final. The notice must include a statement outlining the procedure for levy on and sale of the taxpayer's property, administrative appeals and other options that are available to the taxpayer, and procedures to redeem the property and obtain release of a lien on the property. Under current law, a notice of a proposed assessment is required but, unless the taxpayer disputes the proposed assessment, there is no additional notice required when the assessment becomes final.

Jeopardy Actions

Sections 2, 3, and 4 of this act provide for special administrative and judicial review of jeopardy assessments and jeopardy levies. A jeopardy assessment is an immediate assessment of tax without the otherwise required 30 days' advance notice and opportunity for a pre-assessment hearing. The Secretary of Revenue is authorized to make a jeopardy assessment only if the Secretary finds that collection of the tax is in jeopardy and immediate assessment is necessary to

protect the interest of the State. A jeopardy levy is an immediate filing of a lien against a taxpayer's property or an immediate execution against a taxpayer's personal property for an assessed tax without the required 30 days' advance notice and opportunity for a pre-levy hearing. After a taxpayer has requested a pre-levy hearing, the Secretary of Revenue is authorized to file a jeopardy lien upon determining that immediate action is necessary to protect the interest of the State and is authorized to cause a jeopardy execution against the taxpayer's personal property upon Secretary determining that collection of the tax would be jeopardized by delay. The taxpayer may prevent the execution by filing a bond for the amount of the assessed tax.

Sections 2 and 3 of this act provide that within five days after a jeopardy assessment or levy has been made, the Secretary of Revenue must provide the taxpayer a written statement of the information upon which the Secretary relied in making the assessment or levy. This statement is not required, however, if the jeopardy assessment or levy is of the controlled substances excise tax or is the result of a criminal investigation. These sections also provide that, upon request of a taxpayer against whom a jeopardy assessment or levy has been made, the Secretary must review the assessment or levy within 30 days to determine whether it was reasonable under all the circumstances. Section 4 of this act adds a new G.S. 105-241.5 to provide for special judicial review of jeopardy assessments and jeopardy levies made by the Department of Revenue. The taxpayer may bring an action in superior court, either in Wake County or in the county in which the taxpayer resides, for review of the reasonableness of the assessment or the levy. The court must make a determination within 20 days and may order appropriate relief.

Tax Collection Mechanisms

Section 5 of this act makes several changes to G.S. 105-242, which governs the collection of taxes by levy against and attachment and garnishment of taxpayers' property. First, this section provides that if the Department of Revenue has seized tangible property, the owner of the property may request the Secretary to sell the property within 60 or more days. Unless the Secretary determines that the requested sale would not be in the best interest of the State, the Secretary must authorize the sale. The Department of Revenue will retain the administrative expenses of selling property at the request of the property's owner.

Second, Section 5 requires the Secretary of Revenue to release a State tax lien if the liability for which the lien attached has been satisfied. Third, Section 5 authorizes the Secretary to release a State tax lien if (i) the underlying liability is unenforceable due to lapse of time, (ii) the lien is creating an economic hardship due to the taxpayer's financial condition, (iii) release of the lien on the value of property that exceeds the value of the underlying liability would not hinder collection of that liability, or (iv) release of the lien would probably facilitate, expedite, or enhance the State's chances of collecting a tax. Fourth, Section 5 exempts from levy, attachment, and garnishment the taxpayer's principal residence (unless the Secretary approves the levy in writing or finds that collection of the tax is in jeopardy) and the taxpayer's personal property that is exempt from levy under the federal tax code. It does not change the existing exemption for 90% of a taxpayer's monthly pay.

Fifth, Section 5 prohibits the Secretary of Revenue from levying against property if the Secretary estimates that the cost of the levy would exceed the fair market value of the property. Finally, Section 5 requires the Secretary to review a tax lien if the taxpayer alleges that it was filed in error.

Installment Payments

Section 1 of this act authorizes the Secretary of Revenue to enter into an agreement with a taxpayer for payment in installments of a tax that has been assessed. The Secretary may enter into the agreement if the Secretary determines that the agreement will facilitate collection of the tax. As part of the agreement, the Secretary may waive tax penalties but may not waive any tax or interest due. The Secretary is authorized to modify or terminate the agreement if circumstances change or if the taxpayer has not provided accurate or complete information. Although current law does not speak to installment agreements, the Department Revenue already uses installment agreements under its general authority to facilitate tax collection.

Taxpayer Interviews

Section 7 of this act establishes the following rules governing taxpayer interviews with Department of Revenue personnel, other than interviews concerning a criminal investigation, the controlled substance excise tax, or a jeopardy assessment or levy. The taxpayer and the Department have the right to record an interview. If the Department records an interview, it must provide the taxpayer a transcript upon the taxpayer's request. The Department must provide the taxpayer, at or before the initial audit or collection interview, a written explanation of the audit process or the collection process, as appropriate, and of the taxpayer's rights during the process. The taxpayer may authorize another person to represent the taxpayer during the interview process by executing a power of attorney; the representative may appear instead of the taxpayer at the interview unless the Department has summoned the taxpayer. If, during an interview, the taxpayer wishes to consult with a representative, the Department must suspend the interview. Current law is silent on taxpayer interviews.

Taxpayer Bill of Rights

Section 6 of this act requires the Secretary of Revenue to publish annually and make available to taxpayers a statement of the taxpayer's bill of rights. This statement must set forth (i) the confidentiality of tax information; (ii) rights and obligations during an audit; (iii) procedures for appealing an adverse decision of the Department at each level, for claiming a refund, for requesting information, assistance, and interpretations, and for making complaints; (iv) penalties and interest that may apply and the basis for requesting waiver of a penalty; and (v) procedures the State may use to collect a tax, including assessment, jeopardy assessment, liens, and garnishment and attachment.

Evaluation of Tax Personnel

Section 8 of this act prohibits the Department of Revenue from using records of tax enforcement results, or production goals based on these records, as the sole criteria in evaluating Department personnel. Section 8 also requires the Department to consider records of taxpayer complaints naming a Department employee when evaluating that employee.

Reliance Upon Department's Tax Advice

Section 9 of this act provides that if a taxpayer requests in writing specific advice and receives from the Department erroneous written advice, the taxpayer is not liable for any penalty or additional tax assessment attributable to the taxpayer's reasonable reliance on the erroneous advice. This provision does not apply to the extent the penalty or additional tax assessment resulted from the taxpayer's failure to supply the Department adequate or accurate information. Under current law, taxpayers are entitled to rely upon interpretations and rules issued by the Department and currently in effect.

Annual Reporting on Taxpayer Services

Section 13 of this act requires the Department of Revenue to report annually to the Joint Legislative Commission on Governmental Operations regarding the quality of services provided to taxpayers.

1993 Chapter 536 (House Bill 1109, Rep. Baddour)

AN ACT TO AUTHORIZE COUNTIES AND CITIES TO ENGAGE IN ADDITIONAL LOCAL ECONOMIC DEVELOPMENT ACTIVITIES.

This act makes several changes in the law concerning local economic development. It authorizes counties and cities to spend public money for "site preparation" for industrial properties and facilities that are privately owned and to extend or finance the extension of water and sewer lines to industrial properties and facilities that are privately owned. It also authorizes counties and cities to estimate the amount of increased tax revenue that would accrue during the succeeding 10 years from improvements made to a piece of property and to accept the estimated amount as consideration for a conveyance of the property from the county or city to a business that will bring the anticipated economic development. Several local bills making these changes have been enacted since 1987 for individual cities and counties. This act makes the changes for all counties and cities in the State effective January 1, 1994.

Before a county or city may accept anticipated tax revenues as consideration for a conveyance of property, it must determine that the conveyance of the property will result in the creation of a substantial number of jobs in the county or city that pay at or above the median average wage in the county or, for a city, in the county where the city is located. In accepting the consideration, the governing board of the county or city must contractually bind the purchaser of the property to construct, within five years, improvements on the property that will generate the tax revenue taken into account in arriving at the consideration. Upon failure to construct the improvements specified in the contract, the purchaser must reconvey the property back to the county or city.

The change this act makes to the local economic development law was also made by Senate Bill 1157, ratified as Chapter 497 of the 1993 Session Laws. The change in Chapter 497 became effective upon ratification.

1993 Chapter 542 (Senate Bill 14, Sen. Perdue)

AN ACT TO AUTHORIZE THE ISSUANCE OF GENERAL OBLIGATION BONDS OF THE STATE, SUBJECT TO A VOTE OF THE QUALIFIED VOTERS OF THE STATE, TO PROVIDE FUNDS FOR (1) CAPITAL IMPROVEMENTS FOR THE UNIVERSITY OF NORTH CAROLINA, (2) GRANTS TO COMMUNITY COLLEGES FOR CAPITAL IMPROVEMENTS, (3) GRANTS, LOANS, AND REVOLVING LOANS TO LOCAL GOVERNMENT UNITS FOR WATER SUPPLY SYSTEMS, WASTEWATER COLLECTION SYSTEMS, WASTEWATER TREATMENT WORKS, AND WATER CONSERVATION PROJECTS,

AND (4) CAPITAL IMPROVEMENTS AND LAND ACQUISITION FOR NEW AND EXISTING STATE PARKS AND RECREATION AREAS.

This act authorizes the issuance of $740 million in general obligation bonds of the State, if approved by the voters in a referendum to be held on Tuesday, November 2, 1993. The bonds are:

$310	million	University of North Carolina Improvements
$250	million	Community Colleges Improvements
$ 45	million	Deposit in Clean Water Revolving Fund
$100	million	Local Government Loans for Water and Sewer
$ 35	million	State Parks
$740	million	Total

The net cost to the General Fund of annual debt service on the above bonds should be about $59 million; this amount is lower than one might expect because the repayments of the $100 million in Water and Sewer loans can be applied toward debt service on the bonds.

The list of projects for the University of North Carolina provides at least one project for each constituent institution. The list is the same as that requested by the Board of Governors, with three exceptions: (i) the project for Fayetteville State University has been changed from a fine arts building to residence hall renovations at the request of the chancellor; (ii) the building for the N.C. School of the Arts Filmmaking School is specified as a production facility; and (iii) one of the projects for UNC-Asheville has been changed from Ramsey Library renovations to a conference center. The act also provides an additional $12 million for "other critical needs" of the University system, as determined by the Board of Governors.

If approved by the voters, the University Improvement bonds can be issued for the specified projects without further action by the General Assembly. If a project or an allocation later needs to be changed, due to a change of circumstances or another reason, the General Assembly has the power to make the change.

The Community Colleges Bond proceeds would be distributed in the form of grants to individual community colleges for building projects plus any related equipment and land acquisition. Like other appropriations to community colleges for capital projects, these grants would have to be matched with local funds on a dollar-for-dollar basis. Many of the colleges are "overmatched" to some extent, however; these colleges could use the overmatch to meet the matching requirement.

The act lists $226.1 million in specific projects for individual colleges and satellite campuses. Each community college has at least one project on the list. If approved by the voters, this part of the Community College bonds can be issued for the specified projects without further action by the General Assembly. If a project or an allocation later needs to be changed, due to a change of circumstances or another reason, the General Assembly has the power to make the change.

The act provides that the remaining $23.9 million in Community College bonds will be used for grants to be specified by the General Assembly in 1994 or later. This part of the bonds cannot be issued until the General Assembly allocates the funds for specific projects. It is intended

that the allocations will be based on the recommendations of the Legislative Study Commission on Community College Capital Needs created in Section 11(a) of the act.

The Legislative Study Commission on Community College Capital Needs will consist of 10 voting members: 5 appointed by the Speaker of the House of Representatives and 5 appointed by the President Pro Tempore of the Senate. In addition, the President of the Community College System and the Chair of the State Board of Community Colleges will serve as ex officio, nonvoting members. The Study Commission is to study the issue of present and future capital needs of the Community College System and report its findings and recommendations to the General Assembly by April 1, 1994.

Of the $145 million Clean Water Bonds, $45 million is allocated to the existing Clean Water Revolving Loan and Grant Fund and $100 million is allocated for nonrevolving loans. This allocation is similar to that recommended to the 1993 General Assembly by the Legislative Research Commission's Water Issues Study Committee. If approved by the voters, the Clean Water bonds can be issued without further action by the General Assembly.

The $45 million will be used in the same way as funds in the Clean Water Revolving Loan and Grant Fund are used: to match federal funds for the 1993-95 biennium and to provide grants and low-interest loans. The sum of $45 million should be sufficient to provide the match for two years and to capitalize the revolving fund.

The act amends the Clean Water Revolving Loan and Grant Fund to increase the percentages of funds that will be used for grants to local governments without resources to repay loans, and to increase from $500,000 to $1,000,000 the maximum annual amount of a grant that can be made. Both of these changes are designed to help smaller, poorer communities obtain funding.

The other $100 million would all go out in loans to local government units for water supply systems, water conservation projects, wastewater collection systems, and wastewater treatment works. The funds would be allocated 69% for wastewater projects and 31% for water supply systems and water conservation projects. These percentages are based on the allocations in the existing revolving fund.

Local government units that may apply for loans include counties, cities, towns, sanitary districts, and water and sewer districts, as well as two or more of these units acting jointly. Priorities for the loans would be determined by the Department of Environment, Health, and Natural Resources, based on the priority factors for the existing revolving fund and on the need to create efficient regional systems. In addition, to qualify for a loan, a unit must have a water supply facility plan or a wastewater facility plan, as appropriate. The plan must be approved by the Department of Environment, Health, and Natural Resources.

The Department of Environment, Health, and Natural Resources will administer the making of loans, and the State Treasurer will determine the interest rate and maturity of the loans. The interest rates must reflect the self-supporting nature of the loan program: repayments must be sufficient to cover the State's debt service and costs of issuing and administering the bonds. The Department of Environment, Health, and Natural Resources is required to report annually in detail on this loan program to the Joint Legislative Commission on Governmental Operations.

Section 10 of the act provides the details of how the loan program will be administered. Local government units may submit applications on a semiannual basis but, before submitting an application, the unit must hold a public hearing. The Department of Environment, Health, and

Natural Resources may hold additional public hearing and, if requested by affected members of the public, a referendum must be held on whether the unit will apply for a loan.

To be eligible for a loan, a local government unit must demonstrate that it has the financial capacity to repay the loan. In addition, in its loan agreement, the unit must authorize the State Treasurer to intercept any of its State funds distributions if it fails to make timely payments on a loan. This intercept provision will protect the State against default by a local government unit.

The act provides that $35 million of bonds would be used for the State Parks System for repairs, renovations, new construction, and land acquisition. However, no more than 30% of the bond proceeds may be used for land acquisition. If approved by the voters, the bonds could not be issued immediately; further action by the General Assembly is required in 1993 or later. It is intended that the General Assembly would appropriate the proceeds of the bonds in 1994 for specific projects based on a plan developed by the Department of Environment, Health, and Natural Resources. Section 11(b) of the act requires the Department of Environment, Health, and Natural Resources to develop a State parks capital improvement and land acquisition plan, which will include a priority list of needed land acquisitions and a priority list of needed repairs, renovations, and new construction. The priority lists are to be based on objective criteria. The Department of Environment, Health, and Natural Resources is to report this plan to the General Assembly by the first day of the 1994 Session.

Section 13 of the act modifies the law regarding refunding obligations. The former law, G.S. 142-29.5, authorized the State Treasurer, with the consent of the Council of State, to issue obligations to refund outstanding obligations. The law restricted the principal amount of the refunding obligations to the principal amount of the obligations being refunded. Section 13 provides an exception to this limitation: the principal amount of the refunding obligations may exceed the principal amount of the obligations being refunded if the refunding results in an aggregate debt service savings and the increase in the principal amount does not create cash-in-hand available for new capital improvements. This change will enable the State Treasurer to save money for the State through refinancing of outstanding debt.

Section 14 of the act states that the minority business participation goals set in G.S. 143-128 apply to projects undertaken with bond proceeds. The affected State agencies are required to monitor compliance and report annually to the General Assembly on the participation by minority businesses in the bond projects.

1993 Chapter 543 (Senate Bill 161, Sen. Kerr)

AN ACT TO ALLOW ALL TRAILERS TO OBTAIN MULTIYEAR LICENSE PLATES, TO INCREASE THE TYPES OF SPECIAL LICENSE PLATES, TO SPECIFY HOW FEES FROM THE NEW SPECIAL LICENSE PLATES ARE TO BE USED, TO MODIFY THE APPEARANCE OF THE SPECIAL LICENSE PLATE ISSUED TO MEMBERS OF THE NORTH CAROLINA GENERAL ASSEMBLY,

AND TO MAKE TECHNICAL AND ADMINISTRATIVE CHANGES TO THE LAWS CONCERNING SPECIAL LICENSE PLATES.

This act makes technical changes and changes that conform the statutes to administrative practice in the laws governing multiyear trailer plates and special license plates. It also authorizes several new special license plates, sets the fees for the new plates, and directs how the fees are to be distributed.

The act authorizes all trailers to obtain multiyear plates. It does not change the multiyear plate fee, which is $75, or the annual plate fee, which is $10. Although this change appears substantive, the Division of Motor Vehicles is currently allowing all trailers to obtain multiyear plates even though the law states that a multiyear plate can be obtained only for a semitrailer. Thus, this change conforms the statute to the administrative practice.

The act also makes a conforming change to the statute that specifies which motor vehicles are to be listed with the county tax assessor for purposes of local property taxes and which are not. It adds trailers that receive multiyear plates to the list of vehicles that must be listed annually with the local assessor. These vehicles must be listed annually because the multiyear plate takes them out of the annual vehicle registration renewal process. It is this annual vehicle registration that triggers payment of property taxes for those vehicles that are subject to the new system for collecting property taxes on motor vehicles and thus do not have to be listed locally.

The act authorizes several new special license plates. Special license plates are optional license plates that can be obtained in lieu of the regular license plates. The most popular of these plates are collegiate plates and personalized plates.

All of the new plates authorized by this act are subject to the same $10 additional fee that applies to practically all other special plates. That $10 additional fee is credited to the Special Registration Plate Account. Some of the new plates authorized are designed as a fund-raiser and are subject to a higher additional fee. Except for new plates authorized for groups that do not and never will include 300 members, the act requires at least 300 applications for each new plate before the plate can be issued. The two plates added that cannot and likely never will include 300 members are the Legion of Valor plate and the Register of Deeds plate. The new plates authorized by the act are listed below:

(1) American Legion. -- Issuable to a member or supporter of that organization.

(2) Civic Club. -- Issuable to a member of a nationally recognized civic organization whose member clubs in North Carolina are exempt from State corporate income tax under G.S. 105-130.11(a)(5).

(3) County Commissioner. -- Issuable to a county commissioner.

(4) Future Farmer of America. -- Issuable to a member or supporter of that organization.

(5) Legion of Valor. -- Issuable to a recipient of one of the following military decorations: the Congressional Medal of Honor, the Distinguished Service Cross, the Navy Cross, or the Air Force Cross. The plate for the Congressional Medal of Honor has been authorized for some time as a free plate. Although this act does not change this, it does impose the standard special plate fees on the other Legion of Valor plates. This is in keeping with the policy set by the 1991 General Assembly when it established standard provisions for special license plates. The special license plate statutes were rewritten in 1991 and standard fees were applied to all but a few plates that had historically been free of charge.

(6) Register of Deeds. -- Issuable to a register of deeds.

(7) Special Olympics. -- Issuable to any vehicle owner. This plate is designed as a fund-raiser. The fee for the special plate is an additional $25. Fifteen dollars of the additional $25 fee goes to the North Carolina Special Olympics.

(8) State Attraction. -- Issuable to any vehicle owner. The State Attraction plates authorized by this act are The North Carolina Arboretum and The North Carolina Zoological Society. These plates are designed as a fund-raiser. The fee for these special plates is an additional $30. Twenty dollars of the additional $30 fee derived from The North Carolina Arboretum special plate goes to The North Carolina Arboretum Society. Twenty dollars of the additional $30 fee derived from The North Carolina Zoological Society special plate goes to The North Carolina Zoological Society.

(9) Veterans of Foreign Wars. -- Issuable to a member or supporter of the organization.

(10) Wildlife Resources. -- Issuable to any vehicle owner. This plate is designed as a fund-raiser. The fee for this special plate is an additional $20. Ten dollars of the additional $20 fee goes to the Wildlife Conservation Fund.

The act makes several changes to the statutes concerning special license plates. These changes are listed below:

(1) Limits the "Horseless Carriage" special license plate to a vehicle that is a model year 1943 or older. However, the owner of a vehicle that is a model year 1943 or older may elect to have the special plate bear the phrase "Antique". The statute retains the definition of an "Antique" vehicle as a vehicle that is at least 35 years old from the date of manufacture.

(2) Deletes the requirement that a person be licensed by the Federal Communications Commission (FCC) as a Class D Citizen's Radio Station Operator to be eligible for the Class D Citizen's Radio Station Operator special plate because the FCC has not issued licenses for these operators since April 27, 1983. The form of the plate is also changed to reflect the fact that some operators do not have official call letters.

(3) Corrects the spelling of the word "Consular".

(4) Requires that "The Great Seal of the State of North Carolina" be displayed on the plates issuable to members of the North Carolina General Assembly. This change applies beginning with plates issued to legislators serving in the 1995 General Assembly.

(5) Changes the form of the retired military plate to reduce the number of words the plate must display and to require the plate to display the appropriate insignia. It also requires at least 300 people to apply for a retired military plate before the plate can be issued. As of January 1, 1993, the Division had received only one request for this plate.

(6) Allows the surviving spouse of a person who had a prisoner of war plate to keep the plate until that spouse remarries or does not renew the plate. This authorization was deleted from the law in 1991, but the Division has continued to allow the surviving spouses of prisoners of war to keep these plates.

(7) Requires at least 300 people to apply for a street rod plate before the plate can be issued. During calendar year 1992, the Division received fewer than 20 applications for these plates.

1993 Chapter 544 (Senate Bill 853, Sen. Kerr)

AN ACT TO AUTHORIZE CERTAIN COUNTIES THAT WILL DERIVE ECONOMIC BENEFITS FROM THE NORTH CAROLINA GLOBAL TRANSPARK TO FORM A GLOBAL TRANSPARK DEVELOPMENT ZONE TO PROMOTE ECONOMIC DEVELOPMENT OF, AND TO ENCOURAGE INFRASTRUCTURE CONSTRUCTION IN, THE COUNTIES OF THE ZONE.

This act authorizes the following counties that would derive economic benefits from the North Carolina Global TransPark to join together to create an economic development district: Carteret, Craven, Duplin, Edgecombe, Greene, Jones, Lenoir, Nash, New Hanover, Onslow, Pamlico, Pitt, Wayne, and Wilson. The district will be known as the Global TransPark Development Zone. The North Carolina Global TransPark is a large industrial area planned to surround an air cargo and air transportation complex in Lenoir County, to be called the North Carolina Global TransPark Complex.

A minimum of three counties are required to create the Zone. To create the Zone, the counties that wish to participate must, after July 24, 1993, but before October 2, 1993, adopt resolutions stating their intent to create the Zone. Each participating county must hold a public hearing before adopting the resolution. The resolutions must be forwarded to the Secretary of State by October 15, 1993; the Secretary of State will then issue a certificate of incorporation that will constitute the Zone as a public body.

The governing body of the Zone will be the Global TransPark Development Commission, with the following membership:

-- Each county that creates the Zone will appoint three voting members, at least one of whom must be a woman or a member of a racial minority and one of whom may be a member of the board of commissioners of the county.

-- The Global TransPark Authority will appoint between three and seven voting members, the minimum number necessary to assure that the voting membership of the Commission includes at least seven women and seven members of a racial minority.

-- Four additional nonvoting members will be appointed, one by the chancellor of East Carolina University, one by the presidents of the community colleges in the Zone, one by the State Ports Authority, and one by the Global TransPark Foundation, Inc.

The Zone is authorized to levy a temporary $5.00 registration tax on motor vehicles with a situs within the Zone. The Zone must hold a public hearing before adopting a resolution levying the tax. The tax may not become effective before July 1, 1994, and expires five years after the effective date of the first tax levied by the Zone. The amount of revenue generated by the tax depends on how many counties join the Zone, but is not expected to exceed $3.7 million a year in any case.

The proceeds of the tax, and any other funds of the Zone, would be used to carry out the Zone's purpose:

> To promote the development of the North Carolina Global TransPark and to promote and encourage economic development within the territorial jurisdiction

of the Zone by fostering or sponsoring development projects to provide land, buildings, facilities, programs, information and data systems, and infrastructure requirements for business and industry in the North Carolina Global TransPark outside of the Global TransPark Complex, or elsewhere in the Zone.

The funds could not be used for projects carried out within the actual four to six thousand acre site of the Global TransPark Complex. Eighty-five percent of the tax proceeds must be kept in a trust account of which the participating counties are the beneficial owners. The principal of the account may be used only for loans. If the Zone is terminated or is otherwise unable to expend the tax proceeds, the tax proceeds and the other assets of the Zone will go back to the participating counties in proportion to the amount of tax collected in each county, except that any funds attributable to a State appropriation will revert to the State.

The Zone's powers to carry out its purpose include the following local development powers currently granted local governments in G.S. 158-7.1 (except that the Zone may not levy a property tax):

(1) To make appropriations to aid and encourage the location of manufacturing enterprises.

(2) To acquire and develop land for an industrial park.

(3) To acquire and hold for resale property suitable for industrial or commercial use.

(4) To extend utility services to an industrial facility.

(5) To acquire property and convey or lease it to private interests for fair market value, which value would be determined after taking into account future potential revenue gains from the development.

The Zone also has the power:

(1) To make loans and grants to carry out its economic development activities.

(2) To acquire or support public infrastructure systems or facilities.

(3) To provide employee training programs.

(4) To maintain a clearinghouse of economic data and business information.

(5) To prepare site studies and provide businesses opportunities to examine sites.

Chapter 561 of the 1993 Session Laws, the Capital Improvements Appropriations Act of 1993, appropriates $7.5 million to the Global TransPark Development Zone to be used in the same way as the proceeds of the motor vehicle registration tax: for economic development projects and infrastructure construction projects within the Zone. Section 72 of that act places a number of restrictions on these funds. First, the appropriation will be placed in the same interest-bearing trust account as 85% of the tax and will be subject to the same restrictions. Second, the funds must be matched with non-State funds or property contributed, on or after July 1, 1993, to the Global TransPark Foundation, Inc. Third, the funds may not be distributed until after the effective date of the motor vehicle registration tax. Thus, the Zone must be created and the tax must be levied and become effective before the appropriation can be distributed. Finally, if the Zone terminates, the funds will revert to the General Fund.

1993 Chapter 548 (House Bill 83, Rep. DeVane)

AN ACT TO TEMPORARILY INCREASE THE SCRAP TIRE DISPOSAL TAX, TO PROVIDE FOR THE DISTRIBUTION OF THE ADDITIONAL TAX PROCEEDS, TO TEMPORARILY REVOKE THE GENERAL AUTHORITY OF A UNIT OF LOCAL GOVERNMENT OR A CONTRACTING PARTY TO IMPOSE A SEPARATE SCRAP TIRE DISPOSAL FEE, AND TO AUTHORIZE THE DEPARTMENT OF ENVIRONMENT, HEALTH, AND NATURAL RESOURCES TO DEVELOP AND IMPLEMENT ALTERNATIVE, MARKET-BASED PILOT PROGRAMS FOR SCRAP TIRE COLLECTION AND RECYCLING.

This act makes several changes to the scrap tire tax and the distribution of the proceeds of that tax. It temporarily increases the scrap tire tax from 1% to 2% for tires that have a bead width of less than 20 inches, temporarily changes the distribution of the scrap tire tax proceeds, temporarily prohibits local governments from charging an additional fee for processing scrap tires, and permanently limits the amount of scrap tire tax proceeds the Department of Revenue can retain for its administrative expenses in collecting and distributing the tax. The restriction on local scrap tire fees becomes effective January 1, 1994. The other changes become effective October 1, 1993. The temporary changes expire June 30, 1997.

From October 1, 1993, through June 30, 1997, the act increases the scrap tire tax from 1% to 2% for tires that have a bead width of less than 20 inches. The tax remains at 1% for tires that have a bead width of at least 20 inches. Bead width is the width of the inside opening of the tire. Tires for cars, vans, and pick-up trucks have a bead width of less than 20 inches. The tax increase is expected to increase scrap tire tax proceeds by approximately $3.3 million each year it is in effect.

From October 1, through June 30, 1997, the act also changes the distribution of the scrap tire tax. Under current law, 10% of the proceeds goes to the Solid Waste Management Trust Fund and 90% goes to the counties on the basis of population. Effective October 1, 1993, the act reduces from 10% to 5% the amount of the proceeds that go to the Solid Waste Management Trust Fund, reduces from 90% to 68% the amount of the proceeds that go the counties, and puts the remaining 27% of the proceeds in the newly created Scrap Tire Disposal Account.

The Department of Environment, Health, and Natural Resources will administer the Scrap Tire Disposal Account. The Department may use up to $500,000 of the revenue in the Account during the 1993-95 biennium to conduct a pilot program on alternative, market-based approaches to scrap tire collection and recycling, may use up to 25% of the revenue in the Account for the duration of the temporary tax to make grants to eligible local governments for the disposal of scrap tires, and must use the remainder to clean up nuisance tire collection sites. The Department must report quarterly to the Environmental Review Commission on the use of revenue in the Account.

A local government is eligible for a grant if its cost for scrap tire disposal for the most recent 6-month period exceeds the amount it received for that period from the 68% of the proceeds that are distributed on the basis of population. To obtain a grant, an eligible local government must apply for a grant and be selected by the Department based on criteria established

by the Department. The criteria, however, must include the local government's financial ability to provide for scrap tire disposal, the severity of the local government's scrap tire disposal problem, and the effort made by the local government to provide for scrap tire disposal within the resources available to it.

Until June 30, 1997, the act prohibits a local government from charging a fee for the disposal of scrap tires except for two kinds of scrap tires. They are new tires that are defective and therefore cannot be sold and tires that are brought from another state to a disposal site in North Carolina.

The act permanently caps at $225,000 the annual amount of scrap tire tax proceeds the Department of Revenue can retain to cover the cost of collecting and administering the tax. Current law allows the Department to retain its costs and does not cap the amount allowed.

Recommended by the Solid Waste Control and Disposal Issues Study Committee.

1992 Tax Law Changes

Prepared by Cynthia Avrette, Sabra J. Faires, and Martha H. Harris

1992 Chapter 812 (House Bill 1245, Rep. Nesbitt)

AN ACT TO MAKE MODIFICATIONS IN THE BASE BUDGET AND EXPANSION BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, FOR THE 1992-93 FISCAL YEAR, TO EXTEND CERTAIN EXPIRING BUDGET PROVISIONS, AND FOR OTHER PURPOSES.

Section 9 of this act provides a mechanism to either increase or decrease the amount of revenue in the Reserve for Reimbursements to Local Governments and Shared Tax Revenues when more or less revenue than was appropriated to that Reserve is needed to make the distributions from the Reserve that are required by law. If more revenue than was appropriated is required in a fiscal year, the difference is to be transferred from the General Fund to the Reserve. Conversely, if less revenue than was appropriated is required in a fiscal year, the excess in the Reserve reverts to the General Fund.

The section applies retroactively to July 1, 1991. Less revenue was appropriated to the Reserve for fiscal year 1991-92 than was required to be distributed to local governments from the Reserve for that year. To make the required distributions from the Reserve, the amount of the deficiency was taken from the General Fund. Thus, this section conforms the law to the actions taken in fiscal year 1991-92 concerning the Reserve and avoids a similar problem in the future.

The Reserve for Reimbursements to Local Governments and Shared Tax Revenues was established to be the revenue source for distributions to local units of government for reimbursements made to them by the State for various repealed local taxes and for distributions made to them based on the amount of various State tax collections. Chapter 993 of the 1991 Session Laws, which is explained in this document, changed the method for making the reimbursements from an appropriation to an automatic allocation of part of the State corporate income tax. Therefore, effective for the 1992-93 fiscal year, the Reserve contains only the revenue needed to make the distributions to local units of government based on collections of the following State taxes: the intangibles tax (G.S. 105-213); beer and wine excise taxes (G.S. 105-113.82): and the corporate franchise tax on natural gas companies, power companies, and telephone companies (G.S. 105-116 and G.S. 105-120).

1992 Chapter 814 (Senate Bill 972, Sen. Lee)

AN ACT TO PERMIT PUBLIC TRANSPORTATION AUTHORITIES AND REGIONAL PUBLIC TRANSPORTATION AUTHORITIES TO RECEIVE ANNUAL SALES TAX REFUNDS.

This act adds two types of local public transportation authorities to the list of governmental entities that may apply for an annual refund of State and local sales and use taxes paid directly or indirectly on items purchased by the entity. The two types added are local public

transportation authorities created under Article 25 of Chapter 160A of the General Statutes and regional public transportation authorities created under Article 26 of Chapter 160A of the General Statutes. The local public transportation authorities affected by the bill consist primarily of a single county authority or a multi-county authority. The only regional public transportation authority, and the only one that can be created under the statutes, is the Triangle Transit Authority, which consists of Wake, Durham, and Orange Counties.

Several local public transportation authorities that are organized other than under Article 25 of Chapter 160A currently receive sales and use tax refunds. Some transportation authorities are organized in city charters, some are created by special act, and some are organized under the public enterprise laws. Those organized in one of these ways are considered extensions of the city or county and, as part of the city or county, receive sales and use tax refunds.

In addition to all counties and incorporated cities and towns, there are 15 other, primarily local, governmental entities currently entitled to refunds of State and local sales and use taxes. In addition to this act, Chapter 917 of the 1991 Session Laws added WTVI Channel 42 in Charlotte to this list of governmental entities entitled to an annual refund of sales and use taxes.

The governmental entities must apply for the refund within six months after the end of each fiscal year. This act became effective upon ratification, July 1, 1992, so the public transportation authorities can obtain a refund for sales and use taxes paid during the 1992-93 fiscal year and subsequent years. The act is expected to reduce General Fund revenues by no more than $33,000 annually and local government revenues by approximately $17,000 annually.

Recommended by the Railroads and other Public Transportation Study Committee.

1992 Chapter 857 (Senate Bill 185, Sen. Block)

AN ACT CONCERNING THE TAXATION OF CORPORATIONS THAT ATTRIBUTE PART OF THEIR INCOME FROM THE SALE OF CERTAIN EXPORT PROPERTY TO A FOREIGN SALES CORPORATION.

This act establishes the portion of income attributed to a foreign sales corporation that must be included in the State taxable income of the corporation whose income was attributed to the foreign sales corporation. The portion of attributed income that must be included in State taxable income under this act is the portion of the attributed income that the foreign sales corporation was required to include in its federal taxable income. Thus, under the act, if a corporation attributes $100 in profit from export sales to a foreign sales corporation under section 925 of the Internal Revenue Code and the foreign sales corporation is required to include $30 of this $100 of attributed income in its federal taxable income, the corporation must add back to its federal taxable income the sum of $30 to derive its State taxable income.

Before the enactment of this act, the law on this topic was unclear. Without a specific add back, a corporation could argue that none of the corporation's income that was attributed to a foreign sales corporation was subject to tax by North Carolina because the income was not included in the corporation's federal taxable income, which is the starting point for computing State taxable income, and no provision in State law required an adjustment. Unlike the federal government, the State cannot tax the foreign sales corporation because, by definition, a foreign

sales corporation is a kind of foreign corporation over which the State has no jurisdiction and therefore no authority to tax as a separate entity.

The Code provisions allowing for the creation of foreign sales corporations and the attribution of income to them provide a way for the federal government to indirectly subsidize export sales of goods made in the United States. A foreign sales corporation is a corporation created by a parent or other related corporation for the purpose of making export sales of the parent's or other related corporation's goods or services. The parent or other related corporation can use one of three formulas set by the Code to attribute income from the sale of exports to the foreign sales corporation and part of the attributed income is exempt from the federal taxable income of the foreign sales corporation.

In 1987, the General Assembly passed a law that, in practice, accomplished the same purpose as this act. The law expired on December 31, 1991. The changes made by this act became effective for taxable years beginning on or after January 1, 1992. Thus, there will be no gap between the original provision and the new provision.

1992 Chapter 867 (House Bill 1320, Rep. Gamble)

AN ACT TO CLARIFY THAT THE SCRAP TIRE DISPOSAL TAX DOES NOT APPLY TO NEW TIRES PLACED ON NEWLY MANUFACTURED VEHICLES.

This act provides that new tires purchased for placement in this State on newly manufactured vehicles are exempt from the scrap tire disposal tax imposed by Article 5B of Chapter 105 of the General Statutes. The 1991 revision of the scrap tire disposal tax had inadvertently included these tires within the scope of the tax. The act became effective July 15, 1992.

The scrap tire disposal tax is a 1% tax on the price of certain tires. It was first enacted in 1989 and was revised by Chapter 221 of the 1991 Session Laws. When first enacted, the tax applied only to new motor vehicle tires sold at retail. As revised in 1991, the tax applied, with a few narrow exceptions, to all new vehicle tires sold at retail and to some new vehicle tires sold at wholesale.

The intent of the scrap tire disposal tax is to tax a tire that replaces a tire that is removed from a vehicle and is therefore in need of disposal. When a new tire is placed on a newly manufactured vehicle, no tire is being replaced and no tire is in need of disposal. Thus, imposition of the scrap tire disposal tax in this situation is not consistent with the intent of the tax. In creating the new exemption for tires purchased for placement on newly manufactured vehicles, the General Assembly accepted the finding of the Revenue Laws Study Committee that the 1991 revision of the scrap tire disposal tax did not intend to include new tires placed on newly manufactured vehicles.

This act will not affect the General Fund because the proceeds of the scrap tire disposal tax are not credited to the General Fund. Ten percent of the revenue from the tax is deposited in the Solid Waste Management Trust Fund and the other ninety percent is distributed to the counties on a per capita basis to be used for the disposal of scrap tires or the abatement of a nuisance caused by storing scrap tires. The act is expected to reduce the scrap tire disposal tax proceeds, but the amount of the reduction is not known.

Recommended by the Revenue Laws Study Committee.

1992 Chapter 900 (House Bill 1340, Rep. Nesbitt)

AN ACT TO MODIFY THE APPROPRIATIONS AND BUDGET REVENUE ACT OF 1991, AS AMENDED, AND TO MAKE OTHER CHANGES IN THE BUDGET OPERATION OF THE STATE.

Section 20 of this act establishes a permanent procedure for the disposition of the proceeds of the tax imposed by Article 2D of Chapter 105 of the General Statutes on illegal drugs, which the law refers to as controlled substances, and eliminates the temporary procedure that has been in effect since the tax became effective on January 1, 1990. The change became effective July 1, 1992.

Under the new procedure, the proceeds of the illegal drug tax are temporarily credited to a newly-created, nonreverting State Controlled Substances Tax Account. All of the tax proceeds that are the result of voluntary compliance with the tax rather than an assessment against a drug dealer are transferred from the Account to the General Fund. The tax proceeds that are the result of an assessment against a drug dealer are shared by the State and the State or local law enforcement agency that conducted the investigation that led to the assessment. When a drug dealer who pays an assessment no longer has the legal right to challenge the assessment, 25% of the proceeds from the assessment is transferred from the Account to the General Fund and the other 75% is transferred from the Account to the appropriate State or local law enforcement agency. Amounts transferred to the General Fund are not restricted in their use.

Under the old procedure, the proceeds of the tax were credited to the State Controlled Substances Tax Fund created by Section 6 of Chapter 772 of the 1989 Session Laws. As under the new procedure, 75% of the tax proceeds that were the result of an assessment against a drug dealer were transferred from the Fund to the State or local law enforcement agency that conducted the investigation that led to the assessment when the drug dealer who paid the assessment no longer had the legal right to challenge the assessment. Unlike under the new procedure, however, the rest of the tax proceeds remained in the Fund and, as directed by Chapter 772 of the 1989 Session Laws, were to continue to remain in the Fund until the General Assembly transferred the proceeds to the General Fund.

Section 20 of this act makes that contemplated transfer. It transfers the accumulated tax proceeds in the State Controlled Substances Tax Fund that are not earmarked for remittance to a law enforcement agency from that Fund to the General Fund, abolishes the State Controlled Substances Tax Fund, and requires $594,158 of the amount transferred to be applied in the 1992-93 fiscal year to the cost of administering the tax.

1992 Chapter 913 (Senate Bill 1011, Sen. Winner)

AN ACT MAKING TECHNICAL AND OTHER CHANGES TO THE FUEL TAX LAWS.

This act makes several unrelated substantive changes to the fuel tax laws and also makes several technical changes to these laws. Most of the substantive changes concern the road tax

imposed on motor carriers; the remaining substantive changes concern receipts for retail sales of special fuel and the income tax credit for construction of a fuel ethanol distillery.

Chapter 441 of the 1991 Session Laws had deleted the requirement in former G.S. 105-449.26 that a seller of special fuel keep a record of and give a receipt for each retail sale of the fuel and substituted a requirement that a seller of special fuel keep a record of and give a receipt for all sales of 25 gallons or more of fuel for highway use and for all sales of any amount of fuel for nonhighway use. Although this change reduced the circumstances in which a seller of special fuel had to keep a record of and give a receipt for a retail sale of fuel, sellers continued to report problems with the law to the Department of Revenue. To keep the type of record and give the type of receipt required, the seller had to know the name and address of the person buying the fuel and other information about the buyer. In some cases, buyers of fuel would refuse to give the required information and became angry. In the case of special fuel sold at marinas for use in watercraft, sellers complained that the paperwork was unnecessary because the pump was located in a place, such as the end of a marina, where it would be used only to dispense fuel for nonhighway use. Effective July 10, 1992, Section 7 of Chapter 913 makes the following changes to G.S. 105-449.26 in response to these complaints:

(1) It deletes the requirement that a seller keep a record of and give a receipt for all sales of 25 gallons or more of special fuel for highway use and substitutes a requirement that a seller keep a record of and give a receipt for any amount of special fuel sold for highway use only when the buyer asks for a receipt.

(2) It deletes the requirement that a seller give a receipt for every sale of any amount of special fuel sold for nonhighway use and, instead, requires a receipt to be given only when requested by the buyer. It retains the requirement that the seller keep a record of all of these sales, however.

(3) It requires that a record of and a receipt for a sale of special fuel for nonhighway use include the type of container or equipment into which the fuel was dispensed.

(4) It requires a seller of special fuel at a marina whose fuel pump is located at a place that makes it improbable that fuel could be dispensed from the pump into a motor vehicle to keep a record of and give a receipt for a sale of fuel only when the buyer asks for a receipt for the sale.

Sections 14 and 15 of the act extend the expiration dates of the corporate and individual income tax credits for construction of a fuel ethanol distillery from January 1, 1994, to January 1, 1996. These tax credits are designed to provide an incentive for a person to construct a distillery to make ethanol from agricultural or forestry products for use as fuel for motor vehicles or airplanes, for use as a de-icer, or for use in removing pollutants from coal or other fuel sources. The expiration dates were extended because it was believed that construction of such a distillery would take place as a result of the incentives, but not until after January 1, 1994.

The rest of the substantive changes made by this act, which are contained in Sections 8 through 11, affect motor carriers and their liability for the road tax. In general, motor carriers are operators of large trucks and the road tax is a tax on the amount of fuel a motor carrier uses in its operations in this State.

Section 8 changes the definition of motor carrier to conform to proposed changes in the International Fuel Tax Agreement (IFTA). As a result of Chapter 487 of the 1991 Session Laws, North Carolina became a member of the IFTA on January 1, 1992. To join the IFTA, a state must

agree to certain uniform provisions. When North Carolina joined the IFTA, the definition of motor carrier in G.S. 105-449.37(a) met the requirements of the IFTA. Because of proposed changes to the IFTA definition of motor carrier, however, the definition of motor carrier in G.S. 105-449.37 before amendment by this act would not have met the requirements of the IFTA as of January 1, 1993. Effective July 10, 1992, this act ties the definition of motor carrier in State law to the definition used by the IFTA. The immediate effect of this change is to include within the definition of motor carrier a person who operates a combination vehicle whose registered gross vehicle weight exceeds 26,000 pounds. Although the change also appears to delete the exception for recreational vehicles, this deletion has no practical effect because recreational vehicles are not qualified motor vehicles under the IFTA. Section 8 is not expected to have a noticeable impact on Highway Fund or Highway Trust Fund revenues because it does not significantly increase the number of vehicles subject to the road tax.

Section 9 of this act addresses a problem of lessee liability for compliance with the road tax and with other provisions specific to motor carriers. Under G.S. 105-449.42A(b), a person who leases a motor vehicle from an independent contractor for fewer than 30 days cannot choose to be the motor carrier; the independent contractor is always the motor carrier in that circumstance. Nevertheless, former G.S. 105-449.42A(c) made the lessee jointly liable with the independent contractor for compliance with the road tax and other motor carrier provisions. Based on a finding by the Revenue Laws Study Committee that it was not fair to hold a person liable for compliance with a law when someone else has the sole legal duty to comply with the law, Section 9 of this act relieves a lessee of a motor vehicle who legally cannot choose to be the motor carrier with respect to that vehicle from liability for compliance with the motor carrier laws. This change became effective July 10, 1992.

Sections 10 and 11 of this act change the amount of the fee charged for a temporary motor carrier permit and the amount of a civil penalty that can be imposed on a motor carrier for operating in this State without proper registration. Section 10 increases the temporary motor carrier permit fee from $25 to $50 and Section 11 increases the civil penalty from $75 to $100, thereby maintaining the current $50 difference between the fee and the penalty. Before this change, the temporary permit fee had not been increased since it was established in 1982 and the civil penalty had not been increased since 1981, when it was raised from $25 to $75. The increases in the fee and penalty became effective September 1, 1992, and are expected to increase Highway Fund revenues by approximately $650,000 each year.

A temporary permit authorizes a motor carrier to operate in the State for 20 days without reporting mileage to the Department of Revenue and paying the road tax based on the number of miles driven. When the former $25 permit fee was set in 1982, the per gallon fuel tax was 12¢ and, consequently, each $25 of road tax liability equaled approximately 208 gallons of fuel and 1,040 miles driven. The per gallon tax is now 22.3¢ and each $25 of road tax liability equals approximately 112 gallons of fuel and 560 miles driven. To put this mileage in context, one round trip up and down I-85 within North Carolina is approximately 468 miles. Thus, the State was losing road tax revenue each time a person with a temporary permit made two round trips up and down I-85.

Section 10 also makes another change designed to avoid a revenue loss through the use of temporary permits. It gives the Secretary of Revenue the authority to refuse to issue a temporary permit to a motor carrier whose road tax registration has been withheld or revoked or who the Secretary finds is evading payment of the road tax through the use of temporary permits.

In addition to the substantive changes described above, this act makes a number of technical corrections set out in Sections 1 through 6 and Sections 12 and 13. Unless otherwise noted in this explanation, the technical corrections became effective upon ratification of the act, July 10, 1992.

Section 1 adds standard definitions of "person" and "Secretary" to the gasoline tax article, Article 36 of Chapter 105 of the General Statutes. Section 2 eliminates an unnecessary reference to a fuel tax refund for the Department of Transportation. The Department of Transportation no longer receives refunds because sales of fuel to the Department became exempt from fuel tax under G.S. 105-449A beginning August 1, 1991.

Section 3 deletes a statute, G.S. 105-442, that was no longer needed because its provisions were either repeated elsewhere in the statutes or not used. The provisions in G.S. 105-442 on suits to enforce payment of fuel taxes were repeated in G.S. 105-239, which is made applicable to the fuel tax laws by G.S. 105-269.3. The provision concerning double liability when a court finds that a person willfully failed to pay fuel tax had never been used; instead, the general penalties in G.S. 105-236 have been applied. The provision on revocation of a distributor's license was repeated in G.S. 105-441(b).

Sections 4, 5, and 6 of the act correct redlining errors that caused the word "tax" to be in the wrong place in G.S. 105-445. That statute appears in each of those sections because there are three versions of the statute with different effective dates. The effective dates of these technical corrections match the effective dates of the different versions of G.S. 105-445; Section 4 became effective upon ratification, Section 5 becomes effective January 1, 1995, and Section 6 becomes effective January 1, 1999.

Section 12 of the act deletes a cross-reference to repealed G.S. 105-436 that appeared in the statute that imposes a motor fuel inspection fee of 1/4¢ a gallon. It also inserts a reference to the statutes that impose a tax on special fuel as opposed to gasoline. Section 13 inserts the missing word "a" in the definition of "reseller" in G.S. 105-449.2(8).

The provisions of this act, other than Sections 13, 14, and 15, were recommended by the Revenue Laws Study Committee.

1992 Chapter 914 (Senate Bill 1015, Sen. Winner)

AN ACT TO RELIEVE A SELLER WHO SELLS PROPERTY UNDER A CERTIFICATE OF RESALE OF THE BURDEN OF PROVING THAT THE SALE WAS FOR RESALE AND TO PROVIDE A PENALTY FOR A PURCHASER WHO MISUSES A CERTIFICATE OF RESALE.

This act eliminates the requirement that a seller who sells property under a certificate of resale make a "reasonable and prudent inquiry concerning the type and character of the tangible personal property [sold] as it relates to the principal business of the [buyer]" in order for the seller to escape the statutory presumption that the sale was taxable. All sales of tangible personal property are presumed to be taxable (G.S. 105-164.26). A sale is not taxable if the buyer intends to resell the property. Under former law, a person who sold property in a wholesale sale could negate the presumption that the sale was taxable by checking the buyer's certificate of resale and asking the buyer whether the buyer intended to resell the property. A certificate of resale states

that the property bought is for resale, states the buyer's sales tax license number, and indicates the type of property the buyer sells in the regular course of business. If the seller checked the buyer's certificate of resale but did not inquire about the buyer's intended use of the property, the sale was presumed taxable and the seller could be assessed for sales tax on the sale.

This act deletes the requirement that the seller ask the buyer whether the buyer intends to resell the property. In recommending this change, the Revenue Laws Study Committee had found that there were situations in which it would be impossible or impractical for a seller to make an inquiry about the buyer's intended use of the property and keep a record of the buyer's response. Under the new law, the seller does not have the burden of proving that the sale was for resale if the seller, acting in good faith, accepts a certificate of resale from the buyer.

Although this act lessens the burden placed on a seller to ascertain whether or not each sale is for resale, it continues to protect the State's interest in preventing sales tax evasion. If the Department of Revenue proves that the buyer did not resell the property, the seller would remain jointly liable with the buyer for the applicable sales tax. In addition, to deter buyers from evading sales tax by offering a certificate of resale when the property is not going to be resold, the act adds an additional penalty of $250.00 to be assessed by the Secretary of Revenue against a buyer who misuses a certificate of resale. The provisions of this act became effective upon ratification, July 10, 1992.

Recommended by the Revenue Laws Study Committee.

1992 Chapter 917 (Senate Bill 1245, Sen. Odom)

AN ACT TO PROVIDE THAT JOINT AGENCIES CREATED BY INTERLOCAL AGREEMENT TO OPERATE PUBLIC BROADCASTING TELEVISION STATIONS ARE ELIGIBLE FOR SALES TAX REFUNDS PROVIDED TO GOVERNMENTAL ENTITIES.

This act adds a joint agency created by interlocal agreement to operate a public broadcasting television station to the list of governmental entities entitled to an annual refund of both State and local sales and use taxes paid on their direct and indirect purchases of tangible personal property. At this time, the only public broadcasting television station that meets this description is WTVI Channel 42 in Charlotte, North Carolina. In addition to all counties and incorporated cities and towns, there are 15 other, primarily local, governmental entities currently entitled to refunds of State and local sales and use taxes. In addition to this act, Chapter 814 of the 1991 Session Laws added public transportation authorities and regional public transportation authorities to this list of governmental entities entitled to an annual refund of sales and use taxes.

The governmental entities must apply for the refund within six months after the end of each fiscal year. This act became effective upon ratification, July 1, 1992, and applies to sales and use taxes paid on or after July 1, 1992. Thus, the act does not affect the 1992-93 General Fund revenues. It is expected to reduce General Fund revenues in subsequent fiscal years by approximately $33,000 and local government revenues by approximately $17,000 annually.

1992 Chapter 921 (House Bill 1325, Rep. Gamble)

AN ACT TO MAKE CONFORMING CHANGES TO THE CORPORATE INCOME TAX ON UNRELATED BUSINESS INCOME OF EXEMPT CORPORATIONS.

Under both State and federal law, organizations that are exempt from corporate income tax must nevertheless pay tax on "unrelated business income." G.S. 105-130.11(b) is the State law governing corporate income tax on unrelated business income of exempt organizations. When G.S. 105-130.11(a) was amended in 1983 to provide that organizations exempt from federal corporate income tax are also exempt from State corporate income tax, a conforming amendment was not made to expand the scope of G.S. 105-130.11(b) to the same extent. This act makes this conforming change.

Unrelated business income is, with certain exceptions, income from a trade or business the conduct of which is not substantially related to the exercise by the exempt organization of its charitable, educational, or other function that is the basis for its exemption from corporate income tax. The tax on unrelated business income is levied because the organization is engaging in substantial commercial activities. In the absence of such a tax, nonexempt organizations would be at a competitive disadvantage compared to exempt nonprofit organizations.

When the General Assembly restructured the Corporation Income Tax Act in 1967 to use federal taxable income as a starting point for calculating State taxable income, it retained G.S. 105-130.11(a) rather than adopt the exemptions provided in section 501 of the Internal Revenue Code because there was some question whether adopting the federal language might eliminate exemptions then being enjoyed by some corporations. In 1983, G.S. 105-130.11(a) was brought more closely into conformity with the Code by adding language stating that any corporation that is exempt from federal income tax is also exempt from State income tax. The separate State exemption categories were retained, however, because of continuing questions regarding whether the State exemptions are broader than the federal exemptions.

When the General Assembly amended G.S. 105-130.11(a) in 1983, it failed to make a conforming amendment to G.S. 105-130.11(b). Before the ratification of this act, G.S. 105-130.11(b) made no reference to those organizations exempt under the Code. This act amends G.S. 105-130.11(b) to include all organizations that are exempt from federal corporate income tax but are not specifically listed in G.S. 105-130.11(a).

In amending G.S. 105-130.11(b), the act also eliminates all but one of the exceptions to the definition of unrelated business income that were set out in the State law because they are identical to the federal exceptions that State law has already adopted by reference. The remaining exception under the act, for three types of research, is very similar to the exceptions provided in section 512(b)(7), (8), and (9) of the Code but, because there is some question whether the wording of the State exception might lend itself to a broader interpretation than that given to the Code, the act retains the separate State exceptions for these types of research.

This act is effective for taxable years beginning on or after January 1, 1992. The act has no fiscal effect.

Recommended by the Revenue Laws Study Committee.

1992 Chapter 922 (House Bill 1326, Rep. Gamble)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED TO DETERMINE CERTAIN TAXABLE INCOME AND TAX EXEMPTIONS.

This act rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1991, to January 1, 1992. Updating the reference makes recent amendments to the Internal Revenue Code applicable to the State to the extent that State tax law previously tracked federal law. This update has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law. The inheritance tax, franchise tax, and intangibles tax also determine some exemptions based on the provisions of the Code.

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code as it existed on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of periodic updates. The answer to the question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law recently and the likelihood of continued changes, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue losses. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, 2(1) of the Constitution provides in pertinent part that the "power of taxation... shall never be surrendered, suspended, or contracted away." Relying on this constitutional provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would... be invalidated as an unconstitutional delegation of legislative power."

Each year, in deciding whether the Internal Revenue Code reference should be updated, the General Assembly considers the changes that have been made to the Code in the past year. No changes were made in the Code in 1991 affecting individual income, inheritance, or gift taxes. A few changes were made to the Code in 1991 affecting corporate income taxes. These changes, however, are not expected to have a significant revenue impact on the State's C corporation income tax, S corporation income tax, or franchise tax.

Recommended by the Revenue Laws Study Committee.

1992 Chapter 926 (Senate Bill 811, Sen. Royall)

AN ACT CONCERNING PROPERTY OWNED BY A NONPROFIT EDUCATIONAL INSTITUTION AND USED FOR SPORTS OR RECREATION.

Property owned by nonprofit educational institutions and used exclusively for an educational purpose is exempt from property tax. G.S. 105-278.4 provides that incidental use by the general public of an educational building or facility does not defeat the institution's property tax exemption; the building or facility is still considered to be used exclusively for an educational purpose. This act provides that golf courses, tennis courts, sports arenas, and other similar sport and sport recreational properties owned by nonprofit educational institutions for the use of students and faculty maintain their property tax exemption based on use for an educational purpose, regardless of the extent to which the property is also available to and patronized by the general public.

The county assessor in Durham County considered the general public's use of Duke University's golf course as material, rather than incidental. The assessor denied a property tax exemption for this property based on the incidental use limitation. This act overcomes the incidental use limitation for sports properties of nonprofit educational institutions.

As originally written, the act would have given property owned by private, nonprofit educational institutions the same property tax breaks as property owned by the State educational institutions. Article V, 2(3) of the North Carolina Constitution exempts all property owned by the State and its political subdivisions from property tax. Thus, property owned by State educational institutions is exempt from property tax not by virtue of its use, but by virtue of its relationship to the State. On the other hand, property owned by nonprofit educational institutions and used for an educational purpose is exempt by statute from property tax by virtue of its use. Under prior law, sports properties owned by nonprofit educational institutions and used to a large extent by the general public were not entitled to a property tax exemption because they were used for a purpose other than the one for which the exemption was granted--an educational purpose.

The act became effective upon ratification, July 1, 1992, and applies to taxes imposed for taxable years beginning on or after July 1, 1992. G.S. 105-282.1 provides that an owner claiming exempt property must file an application for exemption during the listing period. G.S. 105-307 states that the listing period for a fiscal year begins on the first business day in January preceding the fiscal year and continues through the month of January. The revenue effect of this act on local governments is indeterminate.

1992 Chapter 930 House Bill 1324, Rep. Gamble)

AN ACT TO CLARIFY THE STATUTES GOVERNING INCOME TAX RETURNS AND TAX FILING EXTENSIONS AND TO AUTHORIZE THE SECRETARY OF REVENUE TO ALLOW PAPERLESS TAX FILING EXTENSIONS AND ELECTRONIC FILING OF INCOME TAX RETURNS.

This act makes several changes in the laws concerning the filing of certain tax returns. Its principal change is to allow the Secretary of Revenue to provide certain taxpayers with the opportunity to do either or both of the following: (i) file their tax returns electronically and (ii)

obtain an extension of time to file their tax returns without filing an application requesting the extension. Under the act, the taxpayers for whom the Secretary can allow electronic filing and paperless extensions are those filing individual income tax returns, estate or trust income tax returns, gift tax returns, and any other returns for which the law does not specifically require the taxpayer to file a paper return or submit an application for an extension.

In addition to this change, the act clarifies that an extension for filing a gift tax return does not extend the time for paying any gift tax due and makes various technical changes to the affected statutes. A large part of the technical changes consists of eliminating unnecessary duplication that exists between statutes that apply to only one tax and statutes in Article 9 of Chapter 105 of the General Statutes; Article 9 contains the administrative provisions that apply to all taxes collected by the Secretary of Revenue.

The act accomplishes its principal change by removing barriers in the former law that prevented the Secretary from implementing an electronic filing program, a paperless extension program, or both. The act, however, does not require the Secretary to implement either of these programs. The act also does not apply to all taxes. Even with the enactment of this act, the Secretary cannot allow corporate income taxpayers, for example, to file their corporate income tax returns electronically or obtain an extension of time for filing their returns without submitting an application for an extension because the act does not change G.S. 105-130.17(d) or (f).

Under the prior law, a taxpayer who filed an individual income tax return or a return for an estate or trust had to "annex" to the return an affirmation that the return was correct. A taxpayer who filed an individual income tax return also had to submit the taxpayer's withholding statement with the return. Sections 3 and 9 of the act modify these requirements by providing that the affirmation and withholding statement must be furnished to the Secretary of Revenue but need not accompany or be attached to the appropriate return. In place of these requirements, the Secretary of Revenue can adopt rules providing that taxpayers who file their individual income tax or estate and trust tax returns electronically must file a separate signature card containing the affirmation and, for individual income tax returns, must include with the signature card a copy of the withholding statement.

Also under prior law, a taxpayer who wanted an extension for filing an individual income tax return or an estate or trust income tax return had to file an application requesting the extension. The Internal Revenue Service is considering implementing a new procedure to simplify the extension process for federal income taxes. If implemented, the federal program would remove the requirement that a taxpayer file an application for an extension. Instead, if the taxpayer has paid the full amount of the federal tax due by the original due date of the return, the taxpayer would be automatically allowed to file the return late without penalty.

Sections 3, 4, 7, 8, 10, and 11 of this act enable the Secretary of Revenue to implement the same extension program for State individual income taxes, estate and trust income taxes, gift taxes, and other taxes for which no contrary State provisions apply by deleting provisions in the current individual income tax laws and estate and trust laws that specifically require a taxpayer to submit an application for an extension of time for filing. In place of submitting an application for an extension of time for filing a return, Section 11 of the act requires a taxpayer to "comply with any application requirement set by the Secretary." The act does not change the law that an extension to file income taxes is not an extension of time for paying the full amount of income tax due.

The act accomplishes the gift tax clarification by the changes made in Sections 10 and 11. Section 10 adds a sentence to G.S. 105-197, the gift tax return statute, to specifically authorize a

taxpayer to request an extension of time for filing a gift tax return. Section 11 adds gift taxes to the list of taxes for which an extension of time for filing a return does not extend the time for paying the tax. Prior law was silent on this subject. The Department of Revenue's practice, however, conformed to the clarification made by the act.

Finally, the act makes numerous technical and clarifying changes to the statutes governing income tax returns, information returns, and tax filing extensions. Section 1 rewrites the statute governing income tax returns to clarify who must file, what information the taxpayer may be required to furnish, and when a couple must file a joint return. Section 2 clarifies the law regarding information returns that must be filed by employers and other payers of income and by partnerships. Section 3 clarifies the time and place of filing income tax returns and information returns in addition to deleting the specific requirements that an affirmation be attached to the income tax return and that an application for a filing extension be submitted. Section 4 eliminates redundant language in the income tax law regarding filing extensions; the applicable provisions regarding filing extensions are contained in G.S. 105-263, set out in Section 11 of the act.

Sections 5 and 6 clarify the statutes requiring taxpayers to make returns and requiring the Secretary of Revenue to provide tax filing forms. Sections 7 and 8 revise estate and trust income tax provisions to clarify where returns are to be filed and to delete redundant language regarding tax filing extensions. The applicable provisions regarding filing extensions are contained in G.S. 105-263, set out in Section 11 of the act.

Section 12 repeals a statute relating to joint income tax returns; the provisions of this statute are added to the statute regarding individual income tax returns by Section 1 of the act. Sections 15 through 23 repeal cross-references to the repealed statute.

Section 13 adds a new section to Article 9, the administrative Article of Chapter 105 of the General Statutes. This section clarifies that the provisions of Article 9 apply to all taxes collected by the Secretary of Revenue as well as motor fuel and kerosene inspection fees collected by the Secretary of Revenue. The new section also provides definitions for common terms used throughout Article 9 of Chapter 105 of the General Statutes. Section 14 removes redundant language in the corporate income tax statutes regarding tax filing extensions; the applicable provisions regarding filing extensions are contained in G.S. 105-263, set out in Section 11. Section 24 makes the act effective upon ratification.

Recommended by the Revenue Laws Study Committee.

1992 Chapter 931 (House Bill 1366, Rep. Redwine)

AN ACT TO EXPAND THE SCHOOL LUNCH SALES TAX EXEMPTION TO INCLUDE ALL SCHOOL FOODS SERVED BY SCHOOL CAFETERIAS DURING THE SCHOOL DAY AND FOODS SOLD BY SCHOOL CAFETERIAS TO DAY CARE CENTERS.

Effective August 1, 1991, this act expands the State and local sales and use tax exemption for school lunches and adds a new exemption for food sold by public school cafeterias to certain day care centers. This act is expected to reduce General Fund revenues by approximately $100,000 annually and local government revenues by approximately $50,000 annually.

The sales and use tax law has provided an exemption for nonprofit sales of lunches to school children within school buildings for more than 35 years. The Department of Revenue construed this exemption to apply to all food, not just lunches, reasoning that when it was first enacted, schools served only lunches, not the breakfasts and nutritional snacks that are also served today. Section 1 of this act clarifies that the exemption applies to all nonprofit sales of food during the regular school day, not just to lunches. Section 1 also clarifies that the school food exemption applies to sales by both private and public school cafeterias.

In addition to making clarifying changes, Section 1 expands this exemption by removing the limitation of its scope to only sales "to school children." As interpreted by the Department of Revenue, the exemption had been allowed for sales to instructional personnel supervising children in the cafeteria but not to other school employees, volunteers, or visitors. Section 1 provides that the exemption now applies to food sold by the cafeteria to anyone within the school building.

The schools included within the exemption addressed in Section 1 of this act are the elementary and secondary schools offering instruction in grades K through 12. A different sales tax exemption, G.S. 105-164.13(27), applies to food sold in dining rooms of institutions of higher learning.

Section 2 of this act creates a new sales tax exemption for food sold by a public school cafeteria to certain child day care centers. To be exempt, the food must be sold to a child day care center that participates in the Child and Adult Care Food Program operated by the Department of Public Instruction. Day care centers operating under this program must be nonprofit centers and must be federally subsidized. As of June 1992, the following school systems sold food to day care centers operating under this program: Alamance County, Burlington City, Alexander County, Beaufort County, Washington City, Cleveland County, Henderson County, High Point City, Nash County, Orange County, Chapel Hill-Carrboro City, and Pitt County.

1992 Chapter 935 (Senate Bill 969, Sen. Carpenter)

AN ACT TO EXEMPT FROM SALES AND USE TAXES FOOD THAT IS ACQUIRED AT WHOLESALE AND THEN DONATED TO A NONPROFIT ORGANIZATION, AND TO REMOVE THE INSURANCE LIABILITY EXCEPTION TO THE QUALIFIED IMMUNITY OF DONORS AND DONEES OF DONATED FOOD.

This act creates a new sales and use tax exemption for certain food donated for charitable purposes and provides that the existing qualified immunity for donors and donees of food applies regardless whether the donor or donee has liability insurance. The act became effective August 1, 1992.

Section 1 of this act exempts from State and local sales and use taxes food that is purchased by a wholesale merchant or a retailer for resale and, instead of being resold, is then donated to a nonprofit organization to be used for a charitable purpose. Under prior law, a wholesale merchant (including a manufacturer) or a retailer who manufactured or bought food for resale and then gave the food to a food bank or other nonprofit organization instead of selling the food was liable for use tax on the food or the food ingredients. A wholesale merchant or retailer does not pay sales or use taxes when buying food or the ingredients to manufacture food because the food is to be resold and sales and use taxes do not apply to property purchased for resale or ingredients

purchased to manufacture products for resale. If it turned out that the wholesale merchant or retailer did not resell the food, under prior law, the wholesale merchant or retailer became liable for use tax on the food or food ingredients because the resale exemption no longer applied. Section 1 eliminates this liability for use tax by providing a specific exemption for food donated by a wholesale merchant or retailer to a nonprofit organization to be used for charitable purposes. Section 1 of this act is expected to reduce General Fund revenues by $200,000 annually and local government revenues by $100,000 annually.

Under G.S. 99B-10, a person who donates food to a nonprofit organization is not liable for civil damages or criminal penalties resulting from the donated food unless the donor's gross negligence, recklessness, or intentional misconduct caused an injury. Similarly, a nonprofit organization that uses or distributes food donated to it is not liable for civil damages or criminal penalties resulting from the donated food unless the organization's gross negligence, recklessness, or intentional misconduct caused an injury. The statute formerly provided an exception to this qualified immunity: if the donor or nonprofit organization had liability insurance, the donor or organization could be liable for damages, based on negligence, to the extent of the coverage of the insurance. Section 2 of this act eliminates the exception so that the qualified immunity for donors and nonprofit organizations now applies regardless whether the donor or organization has liability insurance.

1992 Chapter 940 (Senate Bill 1195, Senator Daniel)

AN ACT TO EXEMPT FROM SALES AND USE TAXES DRUGS THAT ARE DONATED TO A NONPROFIT ORGANIZATION.

Effective August 1, 1992, this act exempts from State and local sales and use taxes prescription and nonprescription drugs that are donated to a nonprofit organization for a charitable purpose. Under prior law, prescription drugs were exempt from sales tax when sold at retail but not when donated. Nonprescription drugs remain subject to sales tax when sold at retail. This act is expected to reduce General Fund revenues by approximately $100,000 annually and local government revenues by approximately $50,000 annually.

Property purchased for resale and ingredients purchased to manufacture property for resale are not subject to sales and use tax. If the retailer, wholesaler, or manufacturer decides not to resell the property but instead donates it or puts it to another use, the exemption for property to be resold no longer applies. Until this act added a specific exemption for drugs donated to a nonprofit organization for a charitable purpose, retailers, wholesalers, and manufacturers who made these donations were liable for use tax. Retailers and wholesalers were liable for the amount of sales tax that should have been collected on their purchase of the drugs and manufacturers were liable for the amount of sales tax that should have been collected on their purchase of the ingredients used to manufacture the drugs.

1992 Chapter 949 (Senate Bill 1012, Sen. Winner)

AN ACT TO REINSTATE TWO SALES TAX PROVISIONS THAT WERE INADVERTENTLY DELETED IN PRIOR LEGISLATION AND TO

PROVIDE THAT COMPUTER ACCESS CHARGES ARE NOT TANGIBLE PERSONAL PROPERTY.

This act reinstates two unrelated sales tax provisions that were unintentionally deleted in prior legislation. The first provision concerns sales tax on items that are traded in or are repossessed. The second provision concerns the liability of a person who buys a business for sales taxes owed by the seller of the business. This act also codifies a Department of Revenue interpretation of the term "tangible personal property" for sales tax purposes.

Section 1 restores a pre-1989 condition on the sales tax exemption in G.S. 105-164.13(16) for property that has been traded in for another item or has been repossessed. Before 1989, property that had been traded in for another item was exempt from sales tax when it was resold only if sales tax had been collected on the sale of the item for which the property was traded in. Similarly, the sale of a repossessed item would be exempt from sales tax only if sales tax had been paid on the original purchase of the item. This condition was inadvertently deleted by Chapter 692 of the 1989 Session Laws, the Highway Trust Fund legislation, which rewrote the exemption to remove motor vehicles.

Since October 1, 1989, the effective date of Chapter 692 of the 1989 Session Laws, G.S. 105-164.13(16) has exempted traded-in property from sales tax regardless of whether sales tax was paid on the item for which the property was traded in. Likewise, it has exempted the sale of repossessed items from sales tax regardless of whether sales tax was paid on the original sale of the item. To reverse this unintended result, Section 1 of this act puts back into the law the deleted conditions on the exemption.

The act also restores a provision that was inadvertently deleted by Chapter 690 of the 1991 Session Laws. Among other changes, that act rewrote G.S. 105-164.38 to provide an additional one-year period during which the Department of Revenue may assess unpaid sales taxes owed by a retail business against a person to whom the business was transferred. That statute requires the buyer of a business to withhold from the amount paid the seller the amount of any sales taxes the seller owes. If the buyer fails to withhold the required amount, the buyer is personally liable for the seller's taxes.

Before the enactment of Chapter 690, G.S. 105-164.38 allowed the State to assess against the buyer of the business the greater of the amount paid for the business or the fair market value of the business. As amended by Chapter 690, however, the statute limited the amount that can be assessed to the amount paid for the business. Section 2 corrects this error by amending G.S. 105-164.38 to allow the State to assess the buyer of a retail business for the fair market value of the business. This addition is important in cases in which a business is sold at a price that is less than its fair market value.

Section 3 of the act clarifies that the term "tangible personal property" does not include access to a computer program or a database when the user of the computer program or database pays a separately stated fee or other charge for the access. The Department of Revenue has always interpreted the term in this manner for sales tax purposes. This act simply codifies and reiterates an existing departmental practice.

Section 1 of this act became effective August 1, 1992. The remainder of the act became effective upon ratification, July 14, 1992. The act will have a slightly positive effect on the General Fund.

Sections 1 and 2 of this act were recommended by the Revenue Laws Study Committee.

1992 Chapter 950 (Senate Bill 1248, Sen. Odom)

AN ACT TO MAKE THE STATE THRESHOLD FOR IMPOSITION OF A PENALTY FOR UNDERPAYMENT OF INDIVIDUAL INCOME TAXES THE SAME AS THE FEDERAL THRESHOLD.

As its title indicates, this act makes the State threshold for imposition of a penalty for the underpayment of estimated individual income tax the same as the federal threshold. The change is effective for taxable years beginning on or after January 1, 1992. The change is not expected to have a significant impact on General Fund revenues.

The act accomplishes this change by deleting a specified dollar threshold from the State statute and referring to the threshold set in the federal Internal Revenue Code. By using the reference to the Code, the act ensures that the State and federal thresholds will remain the same as long as the General Assembly regularly updates the Code reference date.

The immediate effect of the act is to increase from $40 to $500 the amount of an underpayment of estimated individual income tax that triggers the imposition of the penalty for an underpayment of the tax. The current federal threshold is $500 and the State threshold before this act was $40.

The penalty for an underpayment of estimated individual income taxes is an amount that equals the interest the State lost by an individual's failure to make the required tax payment. Interest is computed at the statutory rate, which is currently 8% a year, from the date the payment should have been made.

The penalty applies to any failure to make required, estimated individual income tax payments. Individuals who receive taxable income from which no taxes are withheld must make estimated tax payments. For individuals who receive wages from which taxes are withheld, the withheld amounts are considered estimated payments of tax.

The $40 State threshold was established in 1973. Before 1973, the federal threshold was $40. For the 1973 tax year and subsequent years, the federal threshold was increased to $100. The federal threshold was again increased by $100 each year in 1982, 1983, 1984, and 1985 to reach the current $500 level. Based on this history, it is possible that the State's original $40 threshold was intended to be the same as the federal and that this act conforms the State threshold with its original intent.

1992 Chapter 955 (Senate Bill 1009, Sen. Winner)

AN ACT MAKING TECHNICAL AND ADMINISTRATIVE CHANGES TO THE LICENSE AND EXCISE TAX LAWS.

This act makes a number of technical and administrative changes to the license and excise tax statutes; the changes became effective upon ratification of the act, July 15, 1992.

Section 1 of the act changes the designation of the lowest bracket of the closed container soft drink dispenser tax from "5-50 dispensers" to "1-50 dispensers" to make it clear that the tax applies to all dispensers of an operator and not just the number above the first four. To be an operator of closed container soft drink dispensing machines for purposes of the tax, a person must

have at least five dispensers. The operator must pay an annual privilege license tax of $100 plus an extra amount based on the number of dispensers the operator has. Despite the lowest bracket designation in the table in G.S. 105-65.1(b), the extra amount an operator pays for each dispenser has been construed to include every dispenser of the operator, not just the number above the first four.

Section 2 clarifies that the laundry privilege license tax imposed by G.S. 105-85 applies to a person who provides washing machines and dryers in an apartment building unless that person is the owner or manager of the apartment building. Chapter 479 of the 1991 Session Laws revised the laundry privilege license tax to set two uniform tax rates, one applicable to laundries that do not have vehicles that drive around and pick up laundry and one applicable to laundries that have vehicles that drive around and pick up laundry. In making the changes, a former limitation of the apartment building exemption to the owner or manager of the apartment building was inadvertently omitted. This section reinserts that limitation and brings the statute into conformity with its continued administrative interpretation.

Sections 3 through 12 of this act change the tobacco products excise taxes primarily to make certain provisions that apply to cigarette distributors and to collection of the cigarette excise tax also apply to wholesale and retail dealers of other tobacco products and to collection of the excise tax on other tobacco products. These sections also make technical changes.

Article 2A of Chapter 105 of the General Statutes contains the excise tax on cigarettes and the excise tax on tobacco products other than cigarettes. Section 3 of this act revises general provisions about issuing a license to distribute cigarettes and moves the provisions from Part 2 of Article 2A to Part 1 of Article 2A so that they apply to licenses issued to wholesale and retail dealers of tobacco products other than cigarettes as well as licenses issued to distributors of cigarettes. These provisions require licenses to be issued by the Secretary of Revenue, require payment of the license tax before a license is issued, require a license to be posted at the appropriate place of business, specify that a refund of a license tax is allowed only when the tax was collected or paid in error, and specify the procedure for obtaining a duplicate or amended license.

Sections 4 and 11 change the word "fee" in two sections of Article 2A to "tax" to make consistent the language used throughout Article 2A to refer to the payment for a license. Sections 5, 6, and 8 delete the license provisions from Part 2 of Article 2A that were moved by Section 3 to Part 1 and reformat the remaining provisions in the affected sections of Part 2. The reformatting makes the provisions more readable; it does not make substantive changes.

Sections 7 and 9 delete incorrect cross-references in the tobacco tax statutes. Section 7 deletes an incorrect reference in G.S. 105-113.16(e) to G.S. 105-84, which was repealed by Chapter 150 of the 1979 Session Laws and replaced by G.S. 105-102.5(b)(7). Section 9 deletes an incorrect cross-reference in G.S. 105-113.24(b) to G.S. 105-113.13(d), which is reformatted by Section 5 of this act as G.S. 105-113.13(b).

Section 10 extends a provision that applies to manufacturers of cigarettes to manufacturers of tobacco products other than cigarettes. Section 10 allows manufacturers of tobacco products other than cigarettes to apply to the Secretary of Revenue for permission to be exempt from paying the excise tax on sales to wholesale and retail dealers, the result being that the tax would be paid by the wholesale or retail dealer.

Section 12 deletes an unnecessary refund provision that had created confusion among some taxpayers and was contrary to the designated sale procedure in G.S. 105-113.37, which is intended to be the mechanism for avoiding payment of the tobacco products excise tax on the sale of products to which the tax does not apply. Some taxpayers had argued that the designated sale procedure was optional and that the taxpayer could simply file for a refund as provided in G.S. 105-113.37(c) rather than follow the designated sale procedure. That subsection, however, was intended merely as a cross-reference to the general refund provisions in Article 9 of Chapter 105 and not as a substitute for the designated sale procedure. Repeal of the subsection does not change the general law in Article 9, but removes the appearance in G.S. 105-113.37 that the designated sale procedure is optional.

Sections 13 through 16 amend the soft drink excise tax statutes, which were extensively revised by Chapter 689 of the 1991 Session Laws. Section 13 slightly expands the definition of "natural" to allow a beverage to be considered natural even if it has added minerals, such as iron or calcium, or added extracted ingredients, such as essence. As amended in 1991, the law provided that beverages with added ingredients other than vitamins were not considered natural. Section 14 corrects a grammatical error. Section 15 rewrites the exemption for certain base products for domestic use to make it more understandable but to make no substantive change. Section 16 deletes a refund provision in the soft drink excise tax statutes that is similar to the provision in the tobacco excise tax statutes repealed by Section 12 of this act. The soft drink refund provision is deleted for the same reasons as the tobacco tax provision.

Sections 18 and 19 of this act revise the laws authorizing counties and municipalities to tax laundries, dry cleaners, and similar businesses. Under prior law, municipalities could tax these businesses located within their borders, and both counties and municipalities could tax businesses that were located out of State but sent trucks within the county's or municipality's borders. Sections 18 and 19 delete the authority of both counties and municipalities to tax laundries, dry cleaners, and similar businesses located out of State. The prior law created a possible constitutional violation because it taxed out-of-State businesses more heavily than in-State businesses. Under the prior law, a North Carolina laundry or dry cleaner that sent trucks into more than one county or municipality could be taxed only by a municipality in which it was located. A Virginia laundry or dry cleaner that sent trucks into more than one North Carolina county or municipality could, however, be taxed by every county and municipality into which it sent trucks. As amended by this act, the law no longer discriminates against out-of-State businesses because it does not allow local governments to tax out-of-State laundries, dry cleaners, or similar businesses.

The provisions of this act, other than Sections 18 and 19, were recommended by the Revenue Laws Study Committee.

1992 Chapter 961 (House Bill 1350, Rep. Kerr)

AN ACT TO MAKE TECHNICAL AND ADMINISTRATIVE CHANGES RELATING TO PROPERTY TAXES ON MOTOR VEHICLES.

This act makes technical and administrative improvements to the new procedure for collecting property taxes on motor vehicles that was enacted by Chapter 624 of the 1991 Session Laws and first becomes effective January 1, 1993. The improvements were recommended by the groups that worked to develop the new procedure: the North Carolina Association of County Commissioners, the North Carolina League of Municipalities, the Division of Motor Vehicles

(DMV), the North Carolina County Assessors' Association, the Department of Revenue, and the Institute of Government.

The improvements made by this act become effective January 1, 1993. They are explained in the section by section analysis below. They do not change the basic structure of the new procedure as enacted by Chapter 624 of the 1991 Session Laws.

Under the new procedure, all motor vehicles other than the few that are exempted from the procedure are classified for listing, assessment, and taxation separately from other classes of property. Those classified vehicles that are registered with DMV will be taxed on a revolving, year-round schedule. Those classified vehicles that are not registered with DMV will continue to be listed, assessed, and taxed in accordance with the system now in effect.

Every month under the new procedure, DMV will provide each county a list of the motor vehicles in the county for which registration was renewed or obtained two months earlier. The county will then list and appraise the vehicles and send the vehicle owners a bill for the county, city, and special district taxes due. If the owner does not pay the taxes due on a classified, registered vehicle, DMV will refuse to renew the vehicle registration the following year unless the owner obtains a receipt showing that the taxes have been paid.

Chapter 624 of the 1991 Session Laws was enacted to improve the collection rate for property taxes on motor vehicles. It was estimated that $11.1 million in property tax revenue is lost each year because of noncompliance with the requirement to list motor vehicles for property taxes. By tying the listing of most motor vehicles to the registration of the vehicles, the 1991 act eliminates most of the opportunity for noncompliance.

Section	**Explanation**
1	Includes passenger and service vehicles owned by a public service company within the definition of "rolling stock" so that the vehicles will be appraised by the Department of Revenue and will be exempt from the new procedure. Chapter 624 exempted rolling stock of a public service company from the new procedure because it is appraised by the Department of Revenue rather than by a local tax office and its property tax values are assigned by the Department of Revenue to local governments. By including passenger and service vehicles in the definition of "rolling stock," this section makes uniform the property tax treatment of vehicles owned by public service companies.
2	Repeals a statute that incorrectly exempts all classified motor vehicles from the current system of property tax. Under the new procedure, a classified vehicle that is not registered with DMV will continue to be taxed under the system now in effect. Payment of tax under the new procedure is triggered by the registration of the vehicle with DMV. If a vehicle is not registered, it should nevertheless be subject to tax and it should be taxed under the system now in effect.
3	Exempts the following vehicles from the new procedure: a. Vehicles that are not required to be registered with DMV under G.S. 20-51. These vehicles include farm tractors, farm trailers, and mopeds. Vehicles that are not registered with DMV never trigger payment under the new procedure and, therefore, should not be subject to the new procedure.

b. Mobile classrooms. Although subject to registration, most mobile classrooms are not registered and would, therefore, not trigger payment under the new procedure.

c. Mobile offices. Although subject to registration, most mobile offices are not registered and would, therefore, not trigger payment under the new procedure.

d. Semitrailers registered on a multiyear basis under G.S. 20-88. These vehicles are not registered annually and would, therefore, not trigger payment under the new procedure.

4 Makes two changes:

a. Changes the valuation date for a new vehicle that is subject to the new procedure but whose value cannot be determined as of January 1 of a year from the first day of the month in which the vehicle is registered to the date that model vehicle was first offered for sale in the State.

b. Requires an appeal concerning a vehicle that is subject to the new procedure to be filed with the assessor within 30 days after the owner is notified of the tax due.

5 Sets May 1 of each year as the due date for payment of taxes under the new procedure on classified motor vehicles that are on an annual, as opposed to a staggered, registration system with DMV. Most motor vehicles are registered under the staggered system, which provides for vehicle registrations to expire during different months of the year so that all registrations do not have to be renewed at the same time. Commercial vehicles and some private passenger vehicles, however, are registered under an annual system; their registrations are due to be renewed each year between December 1 and the following February 15.

6 Specifies the information that must be on the tax notice sent to a classified, registered vehicle owner and reverses the order of subsections (b) and (c) of the affected statute.

7 Makes two changes concerning the release or refund of taxes under the new procedure:

a. Clarifies that for the owner of a classified, registered vehicle to obtain a release or refund of taxes when the owner surrenders the vehicle's license plate to DMV, the owner must have transferred the vehicle to a new owner.

b. Gives these owners 60 days after surrendering the plates to apply for a release or refund of the taxes.

8 Clarifies that monthly lists of vehicles prepared by the county tax collector should include only classified, registered vehicles.

9 Authorizes the board of commissioners of each county to appoint a special committee to hear appeals concerning classified, registered motor vehicles.

10 Clarifies that the tax collector's relief from collecting taxes on classified motor vehicles applies only to classified vehicles that are registered.

11	Specifies when DMV is to send each county assessor a list of vehicles registered under the annual, as opposed to the staggered, registration system. The list is to be sent in March and is to include all the annual registrations made between the annual registration period of December 1 through February 15.
12	Amends the effective date of Chapter 624 of the 1991 Session Laws to provide for vehicles registered under the annual, as opposed to the staggered, registration system. The new procedure will apply to annual-system vehicles renewed in the period beginning December 1, 1992. For the 1993 tax year, taxes on annual-system vehicles will be due July 1; for subsequent years the taxes will be due May 1.
13	Makes the act effective January 1, 1993, the same date as Chapter 624 of the 1991 Session Laws.

Recommended by the Revenue Laws Study Committee.

1992 Chapter 965 (Senate Bill 1016, Sen. Winner)

AN ACT TO REPEAL THE PRIVILEGE LICENSE TAX ON SECURITY DEALERS, TO INCREASE THE REGISTRATION FEE FOR SECURITY SALESMEN, AND TO MAKE TECHNICAL CHANGES.

This act repeals the current privilege license tax on companies that deal in securities and increases the annual registration fee for individuals that sell securities from $45 to $55. The fee is payable to the Secretary of State under G.S. 78A-37 when the annual registration is renewed. The registration expires on March 31 of each year. The purpose of the act is to remove the inequities in the former privilege license tax on securities dealers by converting the tax from a per office tax to an increase in a fee that applies to the number of individuals who sell securities. The act also makes technical changes in the privilege license tax on those who deal in installment paper to make it clear that the tax on installment paper dealers applies to certain secured transactions and not to securities.

The privilege license tax on security dealers taxed the entity that was registered as a securities dealer with the Secretary of State under G.S. 78A-2. The entity could be an individual, a partnership, or a corporation. The tax on a securities dealer was either $200 or $450 for each office location of the dealer--$200 for a location that did not have a wire service that provided stock price quotes and $450 for each location that had a wire service that provided stock price quotes.

A significant inequity resulted from the imposition of the tax on the basis of the number of office locations rather than on the volume of business or number of agents. A dealer, for example, who had one agent in five offices located throughout the State paid five times as much tax as a dealer who had one office but had 25 agents working in that office. Insurance companies, in particular, were affected by this inequity because they frequently have agents in offices throughout the State and many agents are authorized to sell mutual funds, which are a type of security. The insurance company was therefore liable for the securities dealer privilege license tax based on each office that has an agent who sells mutual funds.

The repeal of the privilege license tax on securities dealers and the technical changes became effective upon ratification, July 15, 1992. The increase in the registration fee on securities

salesmen becomes effective January 1, 1993. The General Fund is expected to gain $30,000 in fiscal year 1992-93 and $90,000 each fiscal year thereafter from this act.

1992 Chapter 974 (House Bill 1455, Rep. Brubaker)

AN ACT TO IMPOSE A PRIVILEGE LICENSE TAX ON REAL ESTATE APPRAISERS.

This act adds real estate appraisers to the list of professionals subject to an annual privilege license tax of $50 under G.S. 105-41(a). Real estate brokers and salesmen are subject to this privilege license tax. Thus, the act treats real estate appraisers the same as other individuals licensed in the real estate field. The law provides that an individual who is licensed under the real estate license law as a real estate broker or salesman and as a real estate appraiser need only obtain one privilege license to cover both activities.

The act also substantially rewrites G.S. 105-41(a) to make it easier to read and understand. The act became effective July 1, 1992. Its impact upon the General Fund is expected to be negligible.

1992 Chapter 975 (Senate Bill 1003, Sen. Block)

AN ACT TO PROVIDE THAT CONTRACTORS' INVENTORIES WILL BE ENTITLED TO THE SAME PROPERTY TAX EXEMPTION AS MANUFACTURERS', RETAILERS', AND WHOLESALERS' INVENTORIES.

This act is one of two enacted in 1992 that expand the property tax exemption for inventories. In 1985 and 1987, the General Assembly enacted legislation exempting from property tax inventories owned by manufacturers and retail and wholesale merchants. Inventories were defined as goods held for sale in the regular course of business by manufacturers and retail and wholesale merchants. The term included property consumed in the process of manufacturing goods for sale. The State reimburses local governments annually for part of their loss due to elimination of this part of their property tax base.

Effective beginning with the 1992-93 tax year, this act provides that contractors' inventories will also be exempt from property tax. A contractor is defined as someone in the business of building, installing, repairing, or improving real property. The act also expands the definition of inventories so it now includes not only goods held for sale by contractors but also goods held by contractors to be furnished in the course of building, installing, repairing, or improving real property. The act does not provide a State reimbursement to local governments for their revenue losses due to this elimination of part of their property tax base. The amount of local government revenue loss that will result from the act is not known. The Association of General Contractors had estimated that the total amount of property taxes that could be levied on contractors' inventories was between $2 and $4 million annually.

1992 Chapter 977 (Senate Bill 67, Sen. Block)

AN ACT TO PROVIDE A TAX CREDIT FOR THE USE OF NORTH CAROLINA PORTS.

This act provides a State income tax credit to any corporation or individual using the Wilmington or Morehead City ports for the export of cargo. Although the North Carolina ports have the capacity to accommodate additional vessels and cargo, 70% of North Carolina exporters and importers use ports in other states to move their cargo. To increase the use of the State's ports, the number of shipping lines and cargo sources available through the ports needs to increase. It is hoped that the tax credit will increase the volume of cargo moving through the State ports and thereby attract the shipping lines necessary to move that cargo.

The income tax credit provided by the act equals the excess of charges paid, directly or indirectly, on exported, processed cargo for the current taxable year over an amount equal to the average of charges paid for the current taxable year and the two preceding taxable years. The credit is limited to 50% of the tax imposed for the current year. Any excess credit, however, may be carried forward and applied to the taxpayer's income tax liability for the next five years. The cumulative credit may not exceed one million dollars per taxpayer.

The credit applies to wharfage, handling charges on break bulk cargo or LCL (less-than-container-load) cargo, bulk through put charges (bulk products wharfage), and the equivalent or like charges on container cargo. To receive a credit, the taxpayer must provide a statement from the State Ports Authority certifying the amount of charges paid on which the credit is based and any other information necessary to verify the amount of credit allowable.

The act also requires the State Ports Authority to make an annual report to the General Assembly on the impact of this act on shipping and economic growth.

The act becomes effective for taxable years beginning on or after March 1, 1992, and ending on or before February 28, 1996. It is estimated that the loss to the General Fund will be $13,000 for the 1992-93 fiscal year and $477,000 for fiscal year 1993-94 from this act.

1992 Chapter 981 (Senate Bill 1007, Sen. Winner)

AN ACT TO PROVIDE THAT IF A PERSON CONDUCTS BUSINESS AT A TRADE SHOW OR FLEA MARKET, THE TRADE SHOW OR FLEA MARKET IS NOT CONSIDERED THE PERSON'S BUSINESS LOCATION FOR THE PURPOSE OF THE PRIVILEGE LICENSE TAX.

Effective July 20, 1992, this act exempts specialty market vendors from any requirement of obtaining a State privilege license and paying the applicable State privilege license tax before offering goods for sale at a specialty market. As defined in G.S. 105-53(d), a "specialty market vendor" is a person who offers goods for sale at a specialty market and does not have a store in the same county as the specialty market, and a "specialty market" is a location, other than a retail store, where space is rented to others for the purpose of selling goods at retail or offering goods for sale at retail. A flea market and a trade show are examples of specialty markets.

Article 2 of Chapter 105 of the General Statutes requires a State privilege license for various types of businesses and imposes a State privilege license tax for each required license. State privilege licenses are location licenses. Therefore, if a person engages in a taxed business, such as the retail sale of motor vehicles or motor vehicle parts and accessories, at more than one location,

the person generally must have a separate privilege license and pay the applicable privilege license tax for each location.

Under prior law, a person who sold goods for which a State privilege license was required both at a store located in the State and at one or more trade shows or flea markets held outside the county in which the store was located had to have one State privilege license for the store and another for each trade show or flea market. Similarly, if a person who did not have a store in this State participated in one or more trade shows or flea markets in this State and sold goods for which a State privilege license was required, the person had to obtain a State privilege license for each trade show or flea market.

This act eliminates the requirement that a person obtain any applicable State privilege license before selling goods at a trade show or flea market. Thus, an automobile parts dealer required to obtain a State privilege license under G.S. 105-89 will no longer have to obtain another State privilege license to sell automobile parts at a trade show or flea market. Similarly, a merchant who sells pianos, bicycles, home appliances, or electronic equipment for which a State privilege license is required under G.S. 105-102.5 will no longer have to obtain another State privilege license to sell these items at a trade show or flea market. Because fewer State privilege license taxes will be paid as a result of this act, the act is expected to result in a revenue loss to the General Fund of no more than $50,000 in fiscal year 1992-93 and each subsequent year.

1992 Chapter 993 (House Bill 916, Rep. Barnes)

AN ACT TO PROVIDE THAT REIMBURSEMENT TO LOCAL GOVERNMENTS SHALL BE PROVIDED BY EARMARKING RATHER THAN BY APPROPRIATION AND TO PROVIDE THAT THE FISCAL TRENDS STUDY COMMISSION SHALL STUDY LOCAL GOVERNMENT FISCAL ISSUES.

This act changes the source of funds used to reimburse local governmental units for the loss of certain local tax revenue, makes conforming changes required by the change in the source of funds, changes the time when some of the reimbursements must be made, and directs the Joint Select Commission on Fiscal Trends and Reform to refer issues affecting local governments to a subcommittee of that Commission. The act became effective July 1, 1992. The act does not affect the source of funds for appropriations to local governmental units of certain amounts of State taxes, nor does it change the 1991 "freeze" on those reimbursements and State-shared taxes that previously had built-in growth factors.

Sections 1 through 5 and Section 10 of the act change the source of the reimbursement funds from appropriations made to the Reserve for Reimbursements to Local Governments and Shared Tax Revenues to current collections of corporate income tax. This switch to an identified revenue stream as the source of the funds for the reimbursements removes the funds from the Current Operations Appropriations Act, thereby restoring the method for funding the reimbursements that was used before the creation of the Local Government Tax Reimbursement Reserve effective July 1, 1989.

Removal of the funds from the Current Operations Appropriations Act has three principal effects. First, it avoids annual legislative consideration of the amount needed to fund the reimbursements. Second, it eliminates the possibility that the Governor, acting under Article III,

5(3) of the North Carolina Constitution, could reduce the amount distributed from the Reserve to prevent a deficit for a fiscal year. Third, because it takes the reimbursements out of the State's operating budget as contained in the Current Operations Appropriations Act, it removes the amount of the reimbursements from any formula that restricts the growth in the operating budget or otherwise ties an event to an amount in the operating budget.

Section 5 of the act, along with Section 6, also separates the reimbursement for the revision of the intangibles tax on accounts receivable from the intangibles tax-sharing provisions. The act leaves the tax-sharing provisions in G.S. 105-213 and moves the reimbursement provisions to G.S. 105-213.1.

Sections 7 and 8 change the timing of the reimbursements for repealed property taxes on inventories and on poultry, livestock, and feed for poultry and livestock. Prior law stated that the Secretary of Revenue was to make the reimbursements as soon as practicable after January 1 of each year, and the reimbursements were made in March of each year except 1992, when they were made in April because of cash-flow problems. At the request of the State Controller, this act changes the date to April 30 because the State's cash flow is generally at a low in March and improves in April.

Section 9 directs the Joint Select Commission on Fiscal Trends and Reform, created in 1991, to broaden its study of local government fiscal issues and to refer these issues to a subcommittee. The full Commission is to study the report of its subcommittee and make recommendations on these issues to the 1993 General Assembly.

Sections 11 through 14 of the act make conforming changes to various statutes that include the reimbursement funds in the Current Operations Appropriations Act. Because this act changes the source of the funds from an appropriation to an automatic deduction from corporate income tax collections, it also deletes all references to the funds as an appropriation.

The State reimburses local governmental units for the loss of the local tax revenue described below. The State reimburses local units for this lost revenue because the General Assembly's action in removing property from either the local sales and use tax base or the local property tax base is the cause of the lost revenue.

(1) **Revenue lost because of the removal of food purchased with food stamps or supplemental food instruments (WIC vouchers) from the sales and use tax base.**

The exemption, in G.S. 105-164.13(38), became effective October 1, 1985, and the reimbursement, required by G.S. 105-164.44C, began in fiscal year 1986-87. As specified by Section 1 of this act, the Department of Revenue is to make the reimbursement as soon as practicable after July 1 of each year by taking the amount needed from corporate income tax collections. For the 1992-93 fiscal year and each subsequent fiscal year, the Department plans to make the reimbursement in October, which is when counties and cites have previously received this reimbursement.

The Department of Revenue allocates to each county the amount of local sales and use tax revenue determined to be lost in the county during the 1989-90 fiscal year as a result of the exemption. The Department then distributes the allocated amount between the county and the cities in the county in accordance with the method by which local sales and use taxes are distributed in that

county under G.S. 105-472. At the direction of the board of county commissioners, local sales and use taxes are distributed between the county and the cites located in the county on the basis of either population or proportional property tax levies. The total amount distributed to all counties and cities each year is $6,409,140.

(2) **Revenue lost because of the removal of money on hand, money on deposit, and funds on deposit with insurance companies from the intangible personal property tax base, and the revision of the intangible personal property tax on accounts receivable.**

The exemptions, in G.S. 105-275(31), and the revision, in G.S. 105-201, became effective for taxable years beginning on or after January 1, 1985, and the reimbursement, now required by G.S. 105-213.1 and, prior to this act, required by G.S. 105-213 and 105-213.1, began in fiscal year 1986-87. As specified by Section 5 of this act, the Secretary of Revenue is to make the reimbursement on or before August 30 of each year by taking the amount needed from corporate income tax collections; August 30 is the same date by which local units receive tax-sharing revenue under G.S. 105-213 based on the amount of intangible tax revenue collected by the State. Prior law stated that the Secretary was to make the reimbursement as soon as practicable after July 1 of each year, and the reimbursement was always made during the last week of August.

The Department of Revenue allocates to each county the amount of revenue allocated to the county in August of 1990 for the lost intangible tax revenue. The 1990 allocation was based on actual collections of tax on the exempted items for the 1984-85 fiscal year, increased each year by a growth factor based on growth in State personal income, plus 40% of actual collections on accounts receivable for the 1989-90 fiscal year. The 1990 total allocation amount for the exempted items was $27,298,512.70, and the 1990 total allocation for the revision of the tax on accounts receivable was $6,342,062.76. Having determined the total amount to be allocated, the Department then distributes the allocated amount between the county and the municipalities, including any special districts, in the county in accordance with proportional property tax levies.

(3) **Revenue lost because of the removal of inventories owned by manufacturers from the personal property tax base.**

The exemption, in G.S. 105-275(33), was phased in over an eight-year period and began in 1980 as a limited income tax credit for part of the amount of property taxes paid on certain manufacturing inventories. The income tax credit was expanded to a 20% credit for all manufacturers effective for the 1986 income tax year and was again expanded to a 40% credit for all manufacturers effective for the 1987 income tax year. The income tax credit was repealed beginning with the 1988 income tax year and all inventories owned by manufacturers were exempted from property taxes beginning with the 1988-89 property tax year. The reimbursement, required by G.S. 105-275.1, began in fiscal year 1988-89; however, the State had indirectly subsidized

property taxes on manufacturers' inventories since 1980 when the first income tax credit on manufacturers' inventories became effective. As specified by Sections 2 and 7 of this act, the Secretary of Revenue is to make the reimbursement on or before April 30 of each year by taking the amount needed from corporate income tax collections.

The Secretary of Revenue reimburses counties and cities for the lost property tax revenue in the amount they received for this purpose in March of 1991. The 1991 allocation for counties was based on inventories listed in the county for the 1987 tax year and adjusted by the initial one-time application of a growth factor based on growth in State personal income. The 1991 allocation for cities was based on (i) inventories listed in the city for the 1987 tax year and adjusted by the initial one-time application of a growth factor based on growth in State personal income plus (ii) inventories that would have been listed in the city for the 1987 tax year if areas annexed between September 1, 1987, and July 1, 1990, had been part of the city in January of 1987, adjusted by the one-time initial application of a growth factor based on growth in State personal income. The 1991 total allocation for the revenue lost by the exemption for manufacturers' inventories was $106,471,222.

(4) **Revenue lost because of the removal of poultry, livestock, and feed used in the production of poultry and livestock from the personal property tax base.**

The exemption, in G.S. 105-275(37), changed over an eight-year period from an income tax credit to the current exemption. An income tax credit for property taxes paid on poultry or livestock by the producer of the poultry or livestock became effective in 1981 and remained unchanged until 1989 when it was repealed and replaced by the current exemption for poultry and livestock and feed used in the production of poultry and livestock. The reimbursement, required by G.S. 105-275.1(b), began in fiscal year 1989-90; however, the State had indirectly subsidized property taxes on poultry and livestock since 1981 when the income tax credit on poultry and livestock became effective. The reimbursement for this lost property tax revenue is required by the same statute that requires a reimbursement for revenue lost because of the repeal of the property tax on manufacturers' inventories. As specified by Sections 2 and 7 of this act, the Secretary of Revenue is to make the reimbursement on or before April 30 of each year by taking the amount needed from corporate income tax collections.

The Secretary of Revenue reimburses counties and cities for the lost property tax revenue in the amount they received for this purpose in March of 1991. The 1991 allocation for both counties and cities was based on poultry, livestock, and feed listed in each county and city for the 1987 tax year and adjusted by the initial one-time application of a growth factor based on growth in State personal income. The 1991 total allocation for revenue lost because of the exemption for poultry, livestock, and feed for poultry and livestock was $1,650,922.

(5) **Revenue lost because of the removal of inventories owned by retail and wholesale merchants from the personal property tax base.**

The exemption, in G.S. 105-275(34), was phased in over a three-year period beginning with the 1986-87 property tax year. These inventories were classified and taxed under former G.S. 105-277(i) at 90% of their assessed value for the 1986-87 tax year, were classified and taxed at 80% of their assessed value for the 1987-88 tax year, and were completely exempted from tax beginning with the 1988-89 tax year. The reimbursement, required by G.S. 105-277A, began in fiscal year 1986-87. As specified by Sections 3 and 8 of this act, the Secretary of Revenue is to make the reimbursement on or before April 30 of each year by taking the amount needed from corporate income tax collections.

The Secretary of Revenue reimburses counties and cities for the lost property tax revenue in the amount they received for this purpose in March of 1991. The 1991 allocation was based partly on an amount specified in 1989 that increased each year until 1991 by a growth factor based on growth in State personal income (the first per capita distribution in G.S. 105-277A(b)), partly on an amount specified in 1989 that did not increase each year (the second per capita distribution in G.S. 105-277A(c)), partly on inventories listed for the 1987-88 property tax year (the claims-based distribution in G.S. 105-277A(c1), and partly on a "hold-harmless" adjustment (the supplemental distribution in G.S. 105-277A(c2)). The 1991 total allocation for the lost revenue was $82,073,199.

The reimbursement is distributed among the counties and cities in accordance with several formulas. The first per capita distribution is shared by counties and cities on the basis of population, and the second per capita distribution is shared on the basis of proportional property tax levies. The claims-based distribution is made on the basis of inventory listings in each county and city. The supplemental distribution is made on the basis of the difference between other amounts received by each county and city and the amount of inventory taxes levied by each county and city for the 1987-88 property tax year.

(6) **Revenue lost because of the property tax "homestead exemption."**

The "homestead exemption," in G.S. 105-277.1, is an exclusion from property tax of the first $12,000 of the value of a residence owned by an elderly or disabled person whose annual disposable income does not exceed $11,000. As required by G.S. 105-277.1A, the State reimburses counties and cities for one-half of the property tax revenue lost by them in fiscal year 1990-91 because of the exemption. This amount is $7.8 million. As specified by Section 4 of this act, the Secretary of Revenue is to make the reimbursement by taking the amount needed from corporate income tax collections.

1992 Chapter 1004 (Senate Bill 1264, Sen. Royall)

AN ACT TO AMEND THE DEFINITION OF INVENTORIES IN THE MACHINERY ACT TO INCLUDE CERTAIN COMPUTER SOFTWARE.

This act is the second of two enacted in 1992 that expand the property tax exemption for inventories. In 1985 and 1987, the General Assembly enacted legislation exempting from property tax inventories owned by manufacturers and retail and wholesale merchants. Inventories were defined as goods held for sale in the regular course of business by manufacturers and retail and wholesale merchants. The term included property consumed in the process of manufacturing goods for sale. The State reimburses local governments annually for part of their loss due to elimination of this part of their property tax base.

Effective beginning with the 1992-93 tax year, this act expands the definition of inventory for purposes of the tax exemption to include the following three kinds of computer programs (software) owned or licensed for use by taxpayers who are manufacturers or retail or wholesale merchants:

(1) Programs developed or modified by the taxpayer for the taxpayer's own use.

(2) Programs developed or modified by someone other than the taxpayer to the special order of or to meet the particular needs of the taxpayer.

(3) Programs developed, acquired, or used to develop or enhance programs the taxpayer intends to sell to others.

A computer program is not inventory, however, if the taxpayer treats it as a capital asset for income tax purposes.

This change is inconsistent with the conceptual basis of the definition of "inventories" as goods held for sale and property consumed in manufacturing goods for sale; the new definition now includes items the taxpayer uses in operating its business. To avoid creating this logical inconsistency in the law, the act should have listed these types of computer software as specific exemptions from the property tax rather than adding them to a definition that does not properly apply.

The new law creates potential problems in that it treats similarly situated taxpayers differently and treats similar property differently. For example, a bank that has a financial program developed to its specifications must pay tax on the program, but a retail store that has a financial program developed to its specifications does not pay tax on the program. A manufacturer that uses an automated manufacturing process must pay tax on the equipment used in the process, including the computer that runs the program that controls the process, but does not pay tax on the program itself.

The act does not provide a State reimbursement to local governments for their revenue losses due to this elimination of part of their property tax base. The amount of local government revenue loss that will result from the act is not known.

1992 Chapter 1007 (House Bill 1321, Rep. Gamble)

AN ACT TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

This act made numerous technical and clarifying changes to the revenue laws and related statutes. The following table provides a section-by-section analysis of the changes.

Section	Explanation
1	Amends the new excise tax on producers of newsprint publications, imposed by G.S. 105-102.6, to make the definition of "net tonnage of newsprint consumed" easier to understand and to remove a phrase in subsection (c) that was inadvertently left in the statute because of an error in engrossing an amendment.
2	Makes clear that the 1990 revision of G.S. 105-116, which was made by Chapter 813 of the 1989 Session Laws (Reg. Sess. 1990), did not change the existing authority of certain local governments to impose local taxes on power companies and gas companies.
3	Clarifies that the individual income tax adjustments for state and local income taxes paid apply to taxes of all states.
4	Deletes a reference to the former 3% merchant's discount. The merchant's discount was repealed effective August 1, 1987, by the School Facilities Finance Act of 1987, Chapter 622 of the 1987 Session Laws.
5	Inserts the missing word "be" in the second sentence of the subsection and corrects style.
6	Adds a cross-reference to the rules for apportioning to this State income of holding companies, so that the proper taxable percentage may be calculated under the intangibles tax for shares of stock in holding companies.
7	Deletes an unnecessary word to conform the language used in the statute. However, this part of the statute was rewritten by Chapter 993 of the 1991 Session Laws so this section has no effect.
8	In 1991, certain insurance statutes were rewritten and renumbered. This section changes references to those statutes to reflect the 1991 rewrite.
9	Deletes references to the following repealed intangibles tax statutes: 105-199 (money on deposit); 105-200 (money on hand); and 105-205 (funds on deposit with insurance companies). The remaining reference is to 105-204 (beneficial interest in foreign trusts).
10	Deletes an inaccurate reference and supplies missing references to the laws governed by the penalty provisions of the Revenue Act.
11	Deletes an inaccurate reference and supplies missing references to the laws governed by the compromise provisions of the Revenue Act. Also clarifies the language of the statute.
12	Inserts a word omitted in a recent rewrite.
13	Changes a cross-reference to a recently repealed statute.

14	Deletes the requirement that financial institutions report currency transactions over $10,000. This requirement is similar to and duplicates the federal requirement, resulting in dual reporting. The State-required reports are not utilized by the Department of Revenue or the State Bureau of Investigation to any extent because of a lack of resources. In addition, the Department has access to the information it needs through its tax exchange agreement with the Internal Revenue Service. The Department of Revenue requested this repeal; the State Bureau of Investigation concurs.
15	The 1990 rewrite of the Business Corporation Act expedited the procedure for dissolving a domestic corporation. See Article 14 of Chapter 55 of the General Statutes. The new law eliminated the former requirement of a tax clearance letter from the Department of Revenue. This section conforms the Revenue Act to the Business Corporation Act by repealing the corresponding provision in Chapter 105 of the General Statutes.
16	Corrects a grammatical error; the verb "are" should be the singular "is".
17	Deletes a phrase that appears twice in the statute. Section 16 of Chapter 42 of the 1991 Session Laws rewrote this statute and contained a redlining error so that the phrase "and to inspection fees levied under Chapter 119 of the General Statutes." appears twice.
18	Eliminates a cross-reference to a repealed statute.
19	Eliminates a cross-reference to a repealed statute.
20-21	Correct incorrect diction and punctuation.
22	Changes improper upper case to lower case and corrects incorrect diction and punctuation.
23	Corrects incorrect diction and punctuation.
24	Corrects an incorrect instruction about the statute that was amended; Section 1 of Chapter 267 intended to rewrite all of G.S. 18B-1114.1, not just G.S. 18B-1114.1(a). G.S. 18B-1114.1 concerns winery special event permits.
25	Repeals a temporary provision concerning the marking of fuel storage tanks. The provision has been superseded by G.S. 105-449.17, which became effective January 1, 1992.
26	Inserts a phrase at the request of the Codifier to make it absolutely clear that the portion of G.S. 153A-292 that was not redlined by the 1991 Session Law remains part of the law.
27	Corrects capitalization and punctuation; the phrase "emergency medical service" is not capitalized elsewhere in Chapter 20 or the General Statutes.
28	Makes G.S. 20-14(4) parallel with the other subdivisions and amends the beginning phrase of the statute so it makes sense when applied to subdivision (4); a person who does not have a license because the license was revoked is not a licensee. The inconsistencies in this statute resulted from the combination of two separate amendments made by Section 2 of Chapter 682 and Section 327 of Chapter 689 of the 1991 Session Laws.

29	Inserts the missing word "one", which was inadvertently deleted by a redlining error.
30-31	Delete unnecessary cross-references to the definition of handicapped, delete obsolete references to handicapped identification cards and pavement markings designating handicapped spaces, correct grammatical errors, and apply the defined terms in G.S. 20-4.01.
32	Deletes an unnecessary and incorrect statutory cross-reference and deletes obsolete provisions concerning the transitions to First in Flight Plates that began in 1982. Personalized plates are issued under G.S. 20-79.4, not G.S. 20-81.3.
33	Corrects an incorrect statutory cross-reference and an incorrect reference to the Special Registration Plate Fund. Section 3 of Chapter 672 of the 1991 Session Laws recodified G.S. 20-81.3 as G.S. 20-79.7.
34	Deletes part of a sentence that repeats the first sentence of G.S. 20-127(d) and inserts the missing word "the" in the remainder of the sentence.
35	Repeals a statutory provision that duplicates another provision, G.S. 65-55(c)(2), and erroneously states the amount of the minimum deposit a cemetery operator must make to a cemetery care and maintenance fund.
36	Corrects a cross-reference to the definition of motor fuel in G.S. 105-430 and conforms both cross-references to other definitions to the standard drafting format. Chapter 441, Section 1, of the 1991 Session Laws rewrote G.S. 105-430 to, among other things, put the definitions in that statute in alphabetical order. As a result of the rearrangement, the definition of motor fuel is in G.S. 105-430(4) instead of 105-430(1). Standard drafting format, however, requires the deletion of the subdivision reference to avoid this type of problem in the future.
37	Corrects an incorrect cross-reference. The Property Tax Commission statutes were recodified by Chapter 110 of the 1991 Session Laws and no longer appear in Chapter 143B.
38	Eliminates references to assessment ratios in the sanitary district statute and eliminates unnecessary descriptions of procedures that are set out in the Machinery Act.
39	Corrects incorrect statutory cross-references in the Burial Commission statutes.
40	Corrects an incorrect cross-reference.
41	Makes the use of "assessed" and "appraised" in Chapter 159 of the General Statutes consistent. Chapter 11 of the 1991 Session Laws repealed obsolete references in the Local Government Bond Act to assessment ratios. This section is a further conforming change.
42	Corrects an incorrect cross-reference.
43	Makes clear that the restriction on the price for which bonds can be sold applies only to general obligation bonds and not to revenue bonds, thereby making this provision consistent with G.S. 159-125(a). G.S. 159-125(a) was changed in 1987 to allow general obligation bonds to be sold for less than their par value but at no less than 98% of the par value. The last sentence of G.S. 159-123(c) was added at

	the same time and was intended to apply only to general obligation bonds. However, the sentence just says "the bonds" and has raised questions about the section's applicability to revenue bonds.
44	Deletes an unnecessary reference in a sales tax exemption to motor vehicles. Motor vehicles are no longer subject to sales and use tax.
45-47	Corrects erroneous references to "this act" and makes other stylistic changes.
48	Provides that Section 2 of the act is effective retroactively to June 21, 1990, that Section 3 of the act applies retroactively to taxable years beginning on or after January 1, 1989, and that the rest of the act is effective upon ratification, July 21, 1992.

Most of the sections of this act were recommended by the Revenue Laws Study Committee.

1992 Chapter 1016 (Senate Bill 1262, Sen. Daniel)

AN ACT TO MODIFY THE PROCEDURE FOR PROPERTY TAX APPEALS BEFORE THE PROPERTY TAX COMMISSION FROM APPRAISAL AND LISTING DECISIONS, AND TO CHANGE THE AUTHORITY TO APPOINT ONE MEMBER OF THE PROPERTY TAX COMMISSION FROM THE PRESIDENT OF THE SENATE TO THE PRESIDENT PRO TEMPORE OF THE SENATE.

This act makes two changes in the law concerning the Property Tax Commission, which is the five-member State board of equalization and review that decides administrative appeals by taxpayers concerning their local property taxes. The changes became effective August 1, 1992.

First, Section 1 of the act eliminates a requirement that previously hampered the Property Tax Commission in exercising its authority to delegate to one or more members of the Commission or to one or more employees of the Department of Revenue the power to act as a hearing officer and hear property tax appeals on behalf of the Commission. The requirement eliminated by the act is the prior requirement that the Commission provide, at its own expense, a transcript of any appeal heard by a hearing officer on behalf of the Commission. The cost of providing the transcript effectively prevented the Commission from delegating its authority to hear appeals and has resulted in a large back-log of appeals waiting to be heard by the Commission.

In lieu of the requirement that the Property Tax Commission provide a transcript in every appeal heard by a hearing officer, the act allows a party to an appeal heard by a hearing officer to request that a transcript of the appeal be prepared for submission to the Commission. The party requesting the transcript must pay for it unless the Commission, for good cause, finds that the Commission should pay for it. If a transcript is prepared, the Commission will consider the transcript when it reviews the findings of fact and conclusions of law received from the hearing officer in the appeal.

With the enactment of Section 1 of this act, the Property Tax Commission plans to begin exercising its authority to delegate the power to hear property tax appeals on its behalf. The Commission plans to delegate to one or more members of the Commission the power to hear

simple appeals and to have the full Commission, or at least a quorum of the Commission, hear the more difficult appeals. A simple appeal is one that does not involve a significant legal issue, a question concerning the exemption of property from tax, or a large assessment, and, conversely, a more difficult appeal is one that involves one or more of these elements.

Second, Section 2 of the act transfers from the President of the Senate to the President Pro Tempore of the Senate the power to appoint one of the members of the Property Tax Commission. The President of the Senate is the Lieutenant Governor and the President Pro Tempore of the Senate is a senator who is elected to the position of President Pro Tempore by the members of the Senate. The first appointment by the President Pro Tempore will be for a four-year term beginning July 1, 1995. Although effective August 1, 1992, the act does not affect the current term of the member appointed by the President of the Senate, which expires June 30, 1995.

1992 Chapter 1019 (House Bill 1323, Rep. Gamble)

AN ACT TO REPLACE THE AUTHORITY OF COUNTIES TO RETAIN THEIR COSTS IN COLLECTING THE STATE'S SHARE OF THE DEED STAMP TAX WITH THE AUTHORITY TO RETAIN A FIXED PERCENTAGE OF THE REVENUE FROM THAT TAX.

This act makes several changes concerning the collection and remittance of the excise tax imposed by Article 8E of Chapter 105 of the General Statutes on instruments transferring interests in real property. This excise tax, known as the deed stamp tax, is $1.00 on each $500.00 of the value of the interest in real property that is transferred. The tax is collected locally by county registers of deeds when deeds and other instruments are recorded and is shared by the State and the counties, with the State and the counties each receiving one-half of the tax proceeds.

The act makes several changes concerning this tax. It changes from an indefinite allowance for "costs" to a flat 2% the amount a county may retain when remitting to the State the State's share of the tax; it changes from monthly to quarterly the frequency with which a county must remit to the State the State's share of the tax; and it makes technical changes to the procedures to be followed by the county registers of deeds in accounting for the tax proceeds. The changes are effective for taxes collected on or after July 1, 1992.

The most important of these changes is the change in the amount a county may retain when remitting the State's share of the tax. The act repeals the authority of a county to deduct the county's cost of "collecting and administering" the tax from the total proceeds of the tax before dividing the proceeds in half and sending the State its one-half share. In place of this authority, the act allows a county to deduct and retain 2% of the State's one-half share of the total proceeds of the tax as compensation to the county for the cost of collecting the State's share of the tax and remitting that share to the State.

In making this change, the act makes it clear that the 2% allowance is compensation for the county's incremental cost in collecting and remitting the State's share of the tax rather than compensation for part or all of the county's costs in collecting the county's share of the tax. The incremental cost to a county consists of the cost to fill out a one-page form each quarter with information the county would have gathered anyway, to calculate the State's share of the tax, to

write a check to the State Department of Revenue for the State's share, and to send the form and the check to the Department of Revenue.

The change in the amount a county may retain as compensation addresses a problem created by the 1991 revision of the deed stamp tax. Chapter 689 of the 1991 Session Laws changed this tax in three ways effective August 1, 1991. It doubled the tax rate from 50¢ for each $500.00 of value to $1.00 for each $500.00 of value, expanded the tax base by removing the deduction for the value of an assumed lien, and directed each county to remit one-half of the net proceeds of the tax to the State. G.S. 105-228.30(b) defined "net proceeds" as gross tax proceeds less the cost to the county of "collecting and administering the tax," as determined by the county register of deeds.

The registers of deeds interpreted this direction to deduct the cost of collection and administration in various ways and, consequently, kept widely differing percentages of the gross proceeds of the tax as the cost of collection and administration. From August 1, 1991, through June 30, 1992, the percentage of gross proceeds retained varied from 0% to 91%. Seven counties, Ashe, Craven, Davidson, Gates, Pasquotank, Perquimans, and Wake, retained nothing; 33 counties retained no more than 5%; 25 counties retained from 5% to 10%; 15 counties retained from 10% to 20%; and the remaining 20 counties retained more than 20%.

The variance in these percentages reflects the different methods used by the registers of deeds in calculating the costs of collection and administration. The counties that retained nothing reasoned that the county was collecting the tax anyway and that the cost to write a check to the State and complete the one-page form that must be sent to the Department of Revenue with the check was negligible. Some counties used a flat percentage as a guess of what the costs were. Some counties calculated an average cost of all documents recorded at the register of deeds office and some calculated an average cost of only instruments that are subject to the deed stamp tax.

For a county that previously retained as compensation for its costs more than is allowed by this act, the amount of tax revenue retained by the county will decrease and the amount sent to the State will increase. For this reason, the State is expected to receive more revenue from the deed stamp tax over a 12-month period than it previously received.

In debating the amount a county should be allowed to keep as compensation for the cost of collecting and remitting the State's share of the deed stamp tax, several members of the General Assembly questioned why there was a difference in the time counties must send the State the State's share of the deed stamp tax and the State must send local governments their sales and use tax revenue that has been collected by the State. Former G.S. 105-228.30(b) required counties to send the deed stamp tax to the State on a monthly basis, and G.S. 105-472 requires the State to send local sales and use tax revenue to local governments on a quarterly basis. This act makes these periods the same by changing the period for sending the State the State's share of the deed stamp tax from monthly to quarterly.

Finally, the act conforms the accounting procedure to be followed by the registers of deeds in collecting the deed stamp tax to the requirements of The Local Government Budget and Fiscal Control Act, Article 3 of Chapter 159 of the General Statutes. G.S. 159-32 requires tax revenue to be deposited daily and requires that revenue deposited by an official other than the finance officer be immediately reported to the finance officer. Former G.S. 105-228.30(b) appeared to authorize a register of deeds to report deed stamp tax collections to the finance officer on a monthly rather than a daily basis and to authorize the register of deeds to deposit only the net proceeds of the tax

rather than the total amount collected. This act rewrites the first sentence of G.S. 105-228.30(b) to make it clear that G.S. 159-32 applies to deed stamp tax revenue.

Recommended by the Revenue Laws Study Committee.

1992 Chapter 1030 (House Bill 1656, Rep. Kennedy)

AN ACT TO MAKE VARIOUS TECHNICAL AMENDMENTS TO THE GENERAL STATUTES AS RECOMMENDED BY THE GENERAL STATUTES COMMISSION AND TO MAKE TECHNICAL AMENDMENTS TO THE LAW.

This act makes technical changes to the General Statutes. Three changes relate to Chapter 105 of the General Statutes. Section 25 of the act updates a reference to area mental health authorities in the statute that grants sales tax refunds to certain local government entities. The statute's reference to "area mental health, mental retardation, and substance abuse authorities" is updated to reflect the current terminology: "area mental health, developmental disabilities, and substance abuse authorities." Section 26 of the act changes a cross-reference in the agriculture law from a repealed license and excise tax statute to the statute that now applies. Section 30 deletes from the school law a cross-reference to a repealed sales tax statute. These changes all became effective upon ratification of the act, July 24, 1992.

1992 Chapter 1044 (Senate Bill 1205, Rep. Marvin)

AN ACT TO MODIFY THE CAPITAL IMPROVEMENTS APPROPRIATIONS FOR NORTH CAROLINA FOR THE 1992-93 FISCAL YEAR, TO MAKE OTHER CHANGES IN THE BUDGET OPERATION OF THE STATE, AND TO MAKE TECHNICAL CORRECTIONS NECESSARY TO EFFECT THE BUDGET OPERATION OF THE STATE.

Section 9.5 of this act modifies the amount of the manufacturers' inventory reimbursement to local governments. The manufacturers' inventory reimbursement was originally calculated based on the value of inventories within local governments as of September 1, 1987. The reimbursement was expanded several times; one of these expansions occurred in 1990 when the General Assembly allowed an additional reimbursement based on the value of inventories located as of January 1, 1987, within an area for which a municipality had instituted annexation proceedings and which later became a part of the municipality. Only one municipality, Mount Holly, qualified for this additional reimbursement.

In 1990-91, the first fiscal year the additional reimbursement was to be made, the amount of the additional reimbursement (approximately $200,000) was drawn from the funds that otherwise would have been used to reimburse local governments that year for lost property taxes on manufacturers' inventory. Each local government's share of the total amount to be reimbursed was reduced by 0.19% to generate the funds for the additional reimbursement. The law did not provide how the additional reimbursement would be funded in later fiscal years. In the 1991-92 fiscal year, the amount of the additional reimbursement was drawn from the General Fund; the

other local governments' share was not reduced. Effective beginning with the 1992-93 fiscal year, this section provides that the additional reimbursement will be funded each year as it was in 1990-91: each local government's share of the total amount to be reimbursed under the manufacturers' inventory reimbursement will be reduced by 0.19%.

1991 Tax Law Changes

Prepared by: Cynthia Avrette, Sabra J. Faires, and Martha H. Harris

1991 Chapter 10 (House Bill 24, Rep. Lilley)

AN ACT TO CONSOLIDATE THE LAWS CONCERNING REPORTS BY THE DEPARTMENT OF REVENUE.

This act repeals obsolete reporting requirements of the Department of Revenue, gathers the remaining reporting requirements into a single statute, repeals obsolete provisions concerning the Tax Research Division of the Department of Revenue, and provides that the Secretary of Revenue may charge a fee for a copy of a report or other document. The act became effective upon ratification, March 20, 1991.

Section 1 rewrites G.S. 105-256 to combine its provisions with those of G.S. 105-453, 105-453.1, and 105-456, repealed by Section 3. It restates current law in directing the Department of Revenue to prepare and publish the Statistics of Taxation and the Biennial Tax Expenditure Report and in enabling the Department to obtain information needed for these or other reports from units of State and local government. It clarifies existing law by specifying who is to receive a free copy of any report prepared by the Department and it deletes the requirements that the Department print 2,000 copies of the Statistics of Taxation and include estimates of revenue loss in the Biennial Tax Expenditure Report. The latter requirement applied only if funds were appropriated for that purpose; funds had not been appropriated for that purpose since the provision was enacted. Should funds be appropriated for that purpose at a later time, the appropriations act would specify the purpose of the funds.

Section 2 provides that the Department may charge a fee for a copy of a report or other document. G.S. 12-3.1 grants similar authority to all agencies.

Section 3 repeals G.S. 119-24, G.S. 147-88, and the statutes on the Tax Research Division of the Department of Revenue because these statutes are obsolete or incorrect in several respects and because the relevant portions are transferred to revised G.S. 105-256. The statutes on the Tax Research Division are left over from the days when the Tax Research Division was a separate department of State government. That separate department became a division of the Department of Revenue in the 1971 reorganization of State government.

In repealing G.S. 147-88 and the Tax Research Division statutes, two obsolete reporting requirements are repealed. The requirement in G.S. 147-88 that the Secretary report proposed revisions of the revenue laws to the General Assembly within the first 10 days of each session is repealed. Likewise, the requirement in G.S. 105-455 that the Secretary submit proposed revisions to the revenue laws to the Advisory Budget Commission is repealed. These statutes had not been followed and, with the advent of legislative study committees, were not needed. The Department of Revenue routinely reports its suggestions for changes to the revenue laws to the Revenue Laws Study Committee, the Property Tax Study Committee, or another special purpose study committee.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 11 (House Bill 50, Rep. Rhodes)

AN ACT TO MAKE TECHNICAL CHANGES TO THE PROPERTY TAX STATUTES.

As the title indicates, this act makes several technical changes to the property tax statutes and statutes that refer to property taxes. The act became effective upon ratification, March 20, 1991.

Section 1 deletes an unnecessary and inaccurate parenthetical in G.S. 105-272. The parenthetical attempts to cite the statutes included in Subchapter II of Chapter 105 of the General Statutes, but does not include all the statutes. Even if it were accurate, the parenthetical is not needed.

Sections 2 through 5 of the bill amend statutes in Chapter 159, Local Government Finance, to delete obsolete references to the assessment ratio and to change the word "appraised" to the technically correct word "assessed." With these changes, the statutes correctly reflect the tax value of property and are consistent with the definitions used in the property tax statutes.

Chapter 159 contains several references to the appraised value of property before application of the assessment ratio. For example, bonds subject to the Local Government Bond Act and certain financing agreements related to capital assets may not be adopted or executed if the local government's net debt exceeds 8% of the appraised value of property subject to taxation by the local government unit before the application of any assessment ratio.

References to the appraised value of property before application of an assessment ratio are obsolete and refer to the pre-1974 procedure for taxing property. Before 1974, local governments assessed a percentage of the property's appraised value for taxation. The value of the property on the tax books was known as the "appraised value" and the percentage was known as the "assessment ratio."

Today, local governments do not apply assessment ratios. By law, they must tax the entire value of the property as listed on the tax records. Since 1974, the appraised value has been defined as the property's true value. Assessed value is the value on the tax books. It is the value on the tax books, for example, that the Local Government Commission looks at to compute the 8% debt limitation.

Recommended by the Property Tax Study Commission.

1991 Chapter 30 (House Bill 13, Rep. Lilley)

AN ACT TO ELIMINATE THE FRANCHISE TAX INITIAL RETURN AND TO INCREASE THE MINIMUM FRANCHISE TAX.

Effective for taxable years beginning on or after September 1, 1991, this act makes two changes to the corporate franchise tax. First, it repeals the requirement that a new corporation file an initial franchise tax return within 60 days after it is authorized to do business in this State and pay a tax of $25.00 for the period from the date of beginning business until the end of the first income year. A new corporation is a corporation that files articles of incorporation in this State

or, if the corporation has already been formed in another state, applies for authorization to do business in this State.

Second, it increases the minimum annual corporate franchise tax from $25.00 to $35.00. The act increases the annual minimum to offset the revenue loss that would otherwise occur by repealing the initial return requirement. Overall, therefore, the act neither increases nor decreases franchise tax revenue to the State. The act, however, increases the tax for a corporation liable for only the minimum franchise tax from $25.00 to $35.00.

Corporations pay franchise tax annually based on the value at the end of the tax year of the largest of (i) capital stock plus surplus and undivided profits apportioned to North Carolina, (ii) 55% of the value of real and tangible personal property in North Carolina plus the value of intangibles, or (iii) the net book value of real and tangible personal property in North Carolina. The tax is at the rate of $1.50 for every $1,000 of value, with a minimum tax of $25.00 until September 1, 1991, and a minimum of $35.00 for taxable years beginning on or after that date. Many corporations are not affected by the increase in the minimum tax because their franchise tax liability is at least $35.00.

Prior law required a new corporation to file an initial corporate franchise tax return within 60 days after beginning business in this State and to pay a tax of $25.00 for the period from the date the corporation began doing business until the end of the corporation's first income year. This act deletes this requirement but does not change the requirement that a new corporation and any other corporation that does business in this State file a franchise tax return and pay franchise tax at the end of each of the corporation's tax years.

Under prior law, if a corporation failed to file the initial franchise tax return and pay the $25.00 tax, its charter or certificate of authority was suspended, even if it filed its subsequent annual returns. Thirty percent of corporate suspensions were a result of failing to file this return. The Department of Revenue reported that this situation caused an administrative burden for the Department of Revenue and the Department of Secretary of State and was inconvenient for taxpayers.

The Department of Revenue also reported that its operation would not be hampered by repeal of the initial return requirement because G.S. 55-16-22 requires corporations other than professional corporations to file an initial report with the Secretary of State within 60 days after the end of the month in which they first incorporate or begin doing business. The Department of Revenue can obtain whatever information it needs regarding these corporations from the Secretary of State and can obtain information about professional corporations from the licensing boards that govern the professions.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 34 (Senate Bill 128, Sen. Winner)

AN ACT TO PROVIDE FOR THE SYSTEMATIC REVIEW OF PROPERTY EXEMPTED OR EXCLUDED FROM PROPERTY TAXATION AND TO ALLOW PROPERTY THAT WAS

ERRONEOUSLY EXEMPTED OR EXCLUDED TO BE TREATED AS DISCOVERED PROPERTY.

This act corrects an inequity in the law that allowed property that was granted a property tax exemption or exclusion in error to keep the exemption or exclusion indefinitely unless the use or ownership of the property changed and enacts procedures to require an on-going review of exempt or excluded property. The act became effective upon ratification, April 10, 1991.

Section 1 of the act explicitly requires the applicant for an exemption or exclusion to make a complete and accurate statement of the facts that qualify the property for exemption or exclusion. This addition to G.S. 105-282.1(a) will give the assessor more information on which to make a determination and will enable the assessor to make better decisions. In making this change, the section makes needed technical corrections to the statute.

Section 2 requires each assessor to annually review at least one-eighth of the property that has been exempted or excluded from taxation to verify that the property is entitled to the exemption or exclusion. The assessor may require the owner to submit any information needed to verify that the property continues to qualify for the exemption or exclusion. This procedure parallels the procedure for review of property classified for taxation at its use-value. Each assessor must review one-eighth of the use-value property each year to verify its eligibility for the program.

Section 3 moves the definitions in G.S. 105-312(a) to the appropriate statute and corrects the inequity that existed under prior law by allowing the assessor to use the "discovery" procedures that apply to unlisted property for property that has been granted an exemption or exclusion but does not qualify for the exemption or exclusion either because the exemption or exclusion was granted in error or because the property no longer qualifies as a result of a change in use, ownership, or some other circumstance. Under these procedures, the assessor can discover property at any time during the tax year and can recover up to five years' back taxes.

Section 4 repeals G.S. 105-312(a). This subsection is no longer necessary because the relevant definitions have been incorporated into G.S. 105-273, the definition section.

The act addresses a dilemma raised by the Property Tax Commission in an appeal by the Church of the Creator, Inc. in December of 1989. In that case, the assessor decided the Church of the Creator did not qualify for the "property used for religious purposes" exemption because the Church did not appear to be using the property for religious purposes. The Commission held that the assessor did not have the authority to remove a previously granted exemption during the tax year, even if the property was not entitled to receive the exemption in the first place.

The Commission indicated that the assessor could require the Church of the Creator to complete a new application prior to the listing period for the upcoming tax year but, if the new application was denied, the assessor could not require the owner to pay taxes for the previous years in which it did not qualify for the exemption. Under prior law, however, it was not clear whether the assessor could require the Church of the Creator to file a new application, as the Commission indicated. The law required a new application only for one or more of the following reasons, none of which applied to the Church of the Creator:

(1) New or additional property was acquired.

(2) Improvements were added or removed from the property necessitating a change in value.

(3) There was a change in either the use of the property or the qualifications or the eligibility of the owner.

Recommended by the Property Tax Study Commission.

1991 Chapter 42 (Senate Bill 110, Sen. Winner)

AN ACT TO IMPROVE THE ADMINISTRATION OF THE TAXES ON MOTOR FUELS, SPECIAL FUEL, AND MOTOR CARRIERS, AND TO TEMPORARILY RESTORE THE $40,000 CAP ON BONDS THAT MAY BE REQUIRED OF FUEL DISTRIBUTORS AND SUPPLIERS.

This act makes two types of changes to the motor fuel tax laws. First, it makes a temporary change to the bond amount required of distributors and suppliers of fuel to keep the maximum bond at $40,000 until July 1, 1991. Second, it makes numerous unrelated changes to these laws to make them clearer and easier to administer. To accomplish this purpose, the act resolves current ambiguities and inequities in the law and makes uniform the provisions that apply to distributors of gasoline and suppliers of special fuel, which is primarily diesel fuel.

The 1990 General Assembly changed the maximum amount of the bond required from a distributor of gasoline or a supplier of diesel fuel from $40,000 to two times the distributor's or supplier's expected tax liability, effective January 1, 1991. Many distributors and suppliers who have a history of timely tax payments had difficulty obtaining bonds at the higher amounts. In recognition of the severity of this problem, this act did two things to help a distributor or supplier who could not obtain the bond required under the 1990 legislation:

(1) It allowed the Secretary of Revenue to accept an irrevocable letter of credit in lieu of a bond from a distributor of gasoline or a supplier of diesel fuel.

(2) It established a temporary ceiling of $40,000 for a bond required of a distributor or supplier by postponing the effective date of the change in the required bond from January 1, 1991, until July 1, 1991. Chapter 441 of the 1991 Session Laws, effective June 28, 1991, established a permanent solution to this problem by setting a maximum bond amount of $125,000.

The act makes uniform the provisions that apply to both distributors of gasoline and suppliers of diesel fuel. It clarifies that a corporation or a limited partnership must be authorized to do business in this State to be a distributor or a supplier, requires an individual or a general partnership to designate an agent for service of process, and makes the language concerning a license application and bond of a distributor the same as for a supplier of special fuel. The act adds failure to keep records to the list of actions for which criminal liability attaches and for which a distributor's or supplier's license can be revoked, inserts a requirement of willfulness in failing to file a report or pay tax when due, specifies the amount of notice that must be given before the Secretary cancels a license of a distributor or a supplier, and conforms the language concerning cancellation of a distributor's license to that used for a supplier. The changes in the amount of notice required are made to ensure due process. The act also provides that a supplier is an agent of the State in collecting the special fuel tax. Distributors are declared agents of the State in G.S. 105-444.

The act makes other changes to the motor fuel tax laws to make them clearer and easier to administer. It gives the Secretary of Revenue the discretion to waive the penalty for a late application for a refund of motor fuel or special fuel taxes rather than require an automatic reduction in the amount of the refund equal to the amount of the penalty. The Secretary generally has the power to waive penalties concerning the late payment of taxes.

The act clarifies that a refund is available only for tax paid on fuel used in the previous year. This is the clear intent of the statute but taxpayers have argued that G.S. 105-446 entitles them to a refund of taxes paid for any year. The question arises only when the Department assesses a taxpayer for the excise tax that was not paid but should have been paid on fuel.

The act deletes the requirement that a bulk-user store at least 100 gallons of fuel. Under prior law, it was not clear how a person who stores less than 100 gallons of fuel for the person's use should be treated.

The act clarifies the liability of a supplier and a user-seller for any tax due on fuel sold or used by the supplier to the user-seller. It makes clear that a supplier is liable for taxes due on fuel sold to a user-seller unless the fuel is dispensed into a tank that is marked "For Nonhighway Use" and that a user-seller is liable for taxes due on fuel that is dispensed into a tank marked "For Nonhighway Use" but is used for a highway purpose.

The act clarifies that a user-seller who uses more fuel than the user-seller reports is presumed to have acquired the extra fuel tax-free for use in a licensed motor vehicle. The prior law stated that the user-seller is presumed to have acquired the extra fuel tax-free but did not go the extra step and presume that the fuel was acquired for a taxable purpose, thereby creating a presumption that the fuel is taxable. Chapter 441 of the 1991 Session Laws, effective January 1, 1992, expands this presumption to cover fuel incorrectly reported as well as fuel that is not reported at all.

The act allows a truck that is cited for not having a registration card or identification marker to continue to operate if payment of the $75 penalty is not in jeopardy. Prior law prohibited further operation of the vehicle until payment of the $75 penalty regardless of whether payment of the penalty was in jeopardy or the circumstances of the vehicle.

The section of the act establishing a temporary ceiling of $40,000 for a bond or letter of credit required of a distributor or supplier was effective retroactively to January 1, 1991, and expired July 1, 1991. The remainder of the act became effective upon ratification, April 22, 1991.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 45 (House Bill 61, Rep. Lilley)

AN ACT TO MAKE TECHNICAL CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

This act makes numerous technical and clarifying changes to the revenue laws and related statutes. The Department of Revenue requested many of the changes in the act. The act became effective upon ratification, April 22, 1991.

The act makes some noteworthy changes to the privilege license tax law. Section 1 adds a definitional statute to the privilege license tax statutes. The definitions included in the statute

clarify terms currently in use and allow for consistent use of these terms in the future. Section 3 clarifies that those corporations liable for the banking institution privilege license tax are exempt from the installment paper dealer taxes. Section 4 clarifies the long-standing administrative practice that an installment paper dealer is exempt from loan agency license tax only if its activity is limited to that of an installment paper dealer taxed under G.S. 105-83. An installment paper dealer that extends its activity to that of a loan agency is subject to both installment paper dealer and loan agency license taxes.

The act also makes a couple of changes to the income tax statutes. Section 13 clarifies that a married couple filing a joint return must be liable for at least $2.00 of tax in order for each spouse to check off the box on the form indicating whether $1.00 should go to the North Carolina Political Parties Financing Fund. Sections 20 through 22 recodify the statute allowing taxpayers to donate individual income tax refunds to the North Carolina Candidates Financing Fund and combine the corporate income tax provision allowing taxpayers to donate income tax refunds to the Wildlife Fund with the individual income tax provision.

The most notable technical change is the repeal of the sales tax exemption for Bibles in section 17 of the act. The federal courts ruled this tax exemption unconstitutional in 1990. Because the exemption cannot be enforced, its repeal is not a substantive change.

The remaining sections of this act modernize the language in many of the statutes so that it reads more clearly, remove redundant language, correct incorrect cross references, or repeal unnecessary provisions relating to statutes whose purposes have been accomplished or to statutes that have been amended or repealed.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 46 (House Bill 10, Rep. Lilley)

AN ACT TO ALLOW LESSORS AND RENTERS OF MOTOR VEHICLES TO ELECT TO PAY HIGHWAY USE TAX ON MOTOR VEHICLES OWNED ON OCTOBER 1, 1989, AND TO CLARIFY THAT THESE MOTOR VEHICLES ARE OTHERWISE SUBJECT TO THE GROSS RECEIPTS TAX.

This act gives lessors and renters of motor vehicles the option of paying the highway use tax rather than the alternate gross receipts tax on motor vehicles owned on October 1, 1989, and clarifies the tax status of these motor vehicles. It became effective upon ratification, April 23, 1991.

The 1989 Highway Trust Fund legislation repealed the sales tax on motor vehicles effective October 1, 1989, imposed a titling tax on motor vehicles, and gave lessors and renters of motor vehicles an option of either paying the new 3% titling tax when purchasing a vehicle for lease or rental or waiving payment of the titling tax and collecting a tax on the gross lease or rental receipts. The gross receipts tax is 8% on short-term rentals (less than one year) and 3% on long-term rentals. The law did not give lessors and renters an option of paying titling tax on vehicles owned on the effective date of the change.

The act allows lessors and renters of motor vehicles to elect to pay the 3% highway use tax on motor vehicles owned by them on October 1, 1989, the effective date of the tax change. In

doing so, it gives them the same option on their existing inventory that they have on vehicles purchased since October 1, 1989.

A lessor or renter who elects to pay the titling tax under the proposal will pay tax based on the retail value of the vehicle. The retail value for these motor vehicles is the wholesale book value of the vehicle as determined in accordance with schedules of value adopted by the Commissioner of Motor Vehicles. The retail value may be less than or greater than the lessor's or renter's book value of the vehicle, which is based on cost less depreciation.

Taxes collected on motor vehicles owned on October 1, 1989, and leased on or after that date will be credited to the General Fund. It was estimated that this act will generate a one-time revenue increase to the General Fund of $1 million to $1.5 million for the 1991-92 fiscal year.

Because the 1989 Highway Trust Fund legislation provided that the highway use tax applied to vehicles titled on or after October 1, 1989, it was not entirely clear what tax applied to leases made or renewed on or after October 1, 1989, that involved a motor vehicle owned as of October 1. The pre-1989 law did not apply and, arguably, the new highway use tax law with its alternate gross receipts tax had not been triggered because no vehicle had been titled. This act clarifies that those motor vehicles owned on October 1, 1989, that are leased on or after that date are subject to the alternate gross receipts tax and pay tax at the applicable 3% or 8% rate.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 64 (House Bill 343, Rep. Cunningham)

AN ACT TO AUTHORIZE THE CITY OF CHARLOTTE TO REDUCE ITS PRIVILEGE LICENSE TAX PENALTIES AND TO AUTHORIZE CERTAIN CITIES TO ALLOW CREDITS FOR PRIVILEGE LICENSE TAX PENALTIES.

This act makes two local changes to the penalties that apply to failure to obtain a city privilege license. First, effective July 1, 1991, it allows the City of Charlotte to reduce the amount of the penalty payable by those who engage in business in Charlotte without obtaining a required privilege license. Second, from April 30, 1991, to October 1, 1992, it allows any city with a population of at least 380,000 to give a tax credit against the city's privilege license taxes for the amount of any penalties paid to the city for failure to obtain a required privilege license.

Although the second change would apply to any city that meets the population threshold, Charlotte is in fact the only city that meets this description. Raleigh, the next most populous city, has a population of 207,000. The second change is written to apply to any city that fits the description to avoid violating Article II, 24(1)(i) of the North Carolina Constitution. That provision prohibits local acts that remit penalties or refund money paid into the public treasury.

1991 Chapter 77 (Senate Bill 347, Sen. Smith)

AN ACT TO PROVIDE THAT THE COUNTY TAX ASSESSOR SHALL MAKE CERTAIN TAXPAYER BUSINESS RECORDS AVAILABLE TO THE EMPLOYMENT SECURITY COMMISSION ON REQUEST.

Effective May 8, 1991, this act allows county assessors to share certain information about business property with the Employment Security Commission. The act applies to information about business property that is provided to an assessor at the assessor's request and is in addition to the information contained on the property tax abstract for the business. Under prior law, the Employment Security Commission could obtain information included on a property tax abstract because abstracts are public documents, but could not obtain any additional information provided at the assessor's request because the law prohibited an assessor from disclosing the additional information to anyone other than an employee of the Department of Revenue.

1991 Chapter 79 (House Bill 9, Rep. Lilley)

AN ACT TO REINSTATE SALES TAX ON MOPEDS, TOW DOLLIES, AND CERTAIN VEHICLE BODIES AND TO ESTABLISH A UNIFORM LONG-TERM LEASING RATE.

This act corrects several problems created by the 1989 Highway Trust Fund legislation. Effective July 1, 1991, it reinstates the sales tax on mopeds, tow dollies, and certain motor vehicle bodies that were subject to sales tax prior to October 1, 1989. It also eliminates the two-tiered long term leasing rate and replaces that rate with a flat rate effective July 1, 1991.

The Highway Trust Fund legislation exempted motor vehicles from the 2%, $300 maximum sales tax and made them subject to the 3%, $1,000 maximum highway use tax. The highway use tax is triggered when a certificate of title is issued by the Division of Motor Vehicles. Although mopeds and tow dollies were considered motor vehicles, they did not need to be titled. Therefore, they were not subject to either the highway use tax or the sales tax. This act excludes mopeds and tow dollies from the sales and use tax definition of motor vehicle and, consequently, subjects them to the 4% State sales tax rate and the 2% local sales tax rate.

The act also reinstates sales tax on motor vehicle bodies that are installed on motor vehicle chassis that are already titled. These motor vehicle bodies were specifically exempted from sales tax in the Highway Trust Fund legislation as a result of an erroneous assumption that a chassis receiving a new body would be retitled and would thus be subject to the highway use tax. The act makes these motor vehicle bodies subject to the 4% State sales tax rate and the 2% local sales tax rate.

In addition to closing gaps in taxation, the act changes the taxation of leases and rentals of motor vehicles. A retailer who leases or rents motor vehicles may either pay the highway use tax or elect to pay a tax on the gross receipts of the lease or rental of the vehicle. Under prior law, the rate of tax on the gross receipts was 8% for the first 90 days of a lease or rental to the same person and 3% thereafter. This two-tiered rate was costly to administer and was forcing many lessors to pay the highway use tax rather than exercise the option of paying on gross receipts. This act replaces the two-tiered rate with a flat 8% short-term lease or rental rate and a flat 3% long-term lease or rental rate. A long-term lease or rental is a written lease or rental for at least one year. A short term rental or lease is any other rental or lease. Gross receipts taxes collected at the 8% rate

are credited to the General Fund and taxes collected at the 3% rate are credited to the Highway Trust Fund.

The act is expected to generate a maximum of $50,000 annually for the General Fund. The revenue increase to the General Fund generated from the levy of sales tax on mopeds, tow dollies, and motor vehicle bodies is expected to be slightly greater than the decrease in revenues to the General Fund from changing the gross receipts tax rate for long-term leases from a two-tiered rate that includes an 8% rate for 90 days to a flat 3% rate.

Recommended by the Revenue Laws Study Commission.

1991 Chapter 110 (House Bill 51, Rep. Rhodes)

AN ACT TO CONSOLIDATE AND REVISE STATUTES CONCERNING THE PROPERTY TAX COMMISSION, TO REPEAL UNNECESSARY DUTIES OF THE DEPARTMENT OF REVENUE, TO REPEAL THE REQUIREMENT THAT ALL OF THE EMPLOYEES IN THE DEPARTMENT OF REVENUE TAKE AN OATH, AND TO CONFORM THE OATHS REQUIRED BY THE OFFICEHOLDERS IN THE DEPARTMENT OF REVENUE TO THE OATH REQUIRED BY THE CONSTITUTION.

Effective May 23, 1991, this act made several clarifying changes to the property tax statutes. First, it moved the provisions governing the creation, membership, and organization of the Property Tax Commission from Chapter 143B of the General Statutes to Chapter 105 of the General Statutes. Chapter 105 contains a Subchapter on property taxes and is a more logical place for these provisions. The move does not in any way change the membership of the Property Tax Commission or compensation or duties of the members of the Commission.

Second, the act moves several provisions concerning property tax duties of the Department of Revenue into G.S. 105-289, the statute that lists the duties of the Department, and deletes the requirement that the Department report to the Governor and to the General Assembly the proceedings of the Property Tax Commission and any recommendations to change the property tax statutes. These reporting requirements are unnecessary because the Department regularly provides information and reports to various legislative study committees and commissions.

Third, the act revises the provisions relating to oaths to delete the requirement that all employees of the Department of Revenue take the same oath as is taken by Property Tax Commission members and to replace the oath contained in several property tax statutes with a reference to the oath required of officeholders by Article VI, 7 of the North Carolina Constitution. The statutory requirement that all employees of the Department of Revenue take an oath of office was inappropriate because most employees of the Department do not hold an office and should therefore not be required to take an oath of office. Repetition of the oath set out in the North Carolina Constitution is unnecessary.

Recommended by the Property Tax Study Commission.

1991 Chapter 157 (House Bill 462, Rep. Miller)

AN ACT TO AUTHORIZE DEPARTMENT OF REVENUE EMPLOYEES TO SERVE CIVIL SUMMONSES AND OTHER CIVIL PAPERS.

To ascertain the tax liability of a person, the Secretary of Revenue has the power to examine any documents that may be relevant to the question. Although the law gives the Secretary the authority to summon the person who is liable for the tax or is responsible for the necessary documents, it does not say who may serve the summons. Effective July 1, 1991, Department of Revenue employees may serve these special administrative summonses along with other legal documents in civil matters to which the Secretary is a party. In the past, the Department depended upon the resources of the sheriffs' departments. This process often involved needless delay and expense. A summons is often used to obtain information concerning tax liability when the information is not voluntarily made available.

1991 Chapter 160 (House Bill 745, Rep. Nesbitt)

AN ACT TO PROVIDE A GRACE PERIOD FOR MILITARY PERSONNEL TO LIST AND PAY PROPERTY TAXES AFTER DEPLOYMENT OR ACTIVE DUTY.

This act gives military personnel deployed in the Persian Gulf conflict of 1990-91, commonly referred to as Operation Desert Storm and Operation Desert Shield, 90 days after the end of their deployment to pay their 1990-91 property taxes without interest and to list property for the 1991-92 tax year. Property taxes for the 1990-91 fiscal year would otherwise be due September 1, 1990, and interest would begin to accrue on the taxes from January 6, 1991. The regular listing period for property taxes for the 1991-92 year ended on January 31, 1991.

The act is effective retroactively as of August 2, 1990. The 1991 General Assembly passed a similar act, Chapter 439, that gives personnel deployed in Operation Desert Storm or Operation Desert Shield an extension of 180 days in which to file a State income tax return.

1991 Chapter 182 (Senate Bill 112, Sen. Winner)

AN ACT TO MAKE ANNUAL SPECIAL FUEL REPORTS DUE THE SAME TIME AS ANNUAL MOTOR CARRIER REPORTS AND TO MAKE CONFORMING CHANGES TO THE MOTOR CARRIER LAWS TO FACILITATE ANNUAL MOTOR CARRIER REPORTS.

This act resolves a conflict in reporting dates for persons eligible to file annual road tax reports and diesel fuel reports. It changes the filing period for annual diesel fuel reports from a calendar year to a fiscal year so that both the annual road tax report and the diesel fuel tax report are due at the same time. This change will simplify reporting for the taxpayers and the Department of Revenue. The conflict arose after the General Assembly enacted Chapter 1050 of the 1989 Session Laws. That act allowed a motor carrier whose annual liability for the road tax is less than

$200.00 to file an annual report rather than a quarterly report. The allowed annual report covers a fiscal year rather than a calendar year. Chapter 1050 also allowed a user of diesel fuel to file a report on an annual basis if the user is allowed to file an annual road tax report. The act set the filing period for the diesel fuel report on a calendar year basis, however, rather than on a fiscal year basis.

The act also clarifies how the motor carrier who files an annual report should compute the amount of tax liability or credit. The road tax on motor carriers is set at the same rate as the per gallon excise tax. The per gallon excise tax rate has two components--a flat tax of 17¢ a gallon and a variable component equal to the greater of 3 1/2¢ a gallon or 7% of the weighted average wholesale price of gasoline and No. 2 diesel fuel for the most recent six-month base period. In computing the tax liability or credit for a motor carrier filing on an annual basis, the act provides that the average of the two variable cents-per-gallon rates of tax in effect during the year should be used.

This act was effective upon ratification, June 3, 1991.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 193 (House Bill 8, Rep. Lilley)

AN ACT TO IMPROVE THE ADMINISTRATION OF THE HIGHWAY TRUST FUND AND TO MAKE TECHNICAL CHANGES TO THE LAWS AFFECTED BY THE HIGHWAY TRUST FUND.

This act makes two administrative changes and numerous technical changes to the highway use tax statutes. The General Assembly enacted the highway use tax in 1989 as a source of revenue for the North Carolina Highway Trust Fund, the funding source for a $9.1 billion highway program. The 3%, $1,000 maximum "highway use tax" replaced the 2%, $300 maximum sales tax on motor vehicles.

The first administrative change became effective July 1, 1991, and gives the Division of Motor Vehicles the authority to revoke or suspend a motor vehicle dealer's license if the dealer submits a bad check to the Division in payment of the highway use tax. The highway use tax must be paid before a certificate of title is issued for a motor vehicle. Because many motor vehicle dealers apply for a certificate of title for vehicles bought from them, the law allows a dealer to collect the highway use tax payable on a motor vehicle and remit the tax to the Division when the dealer applies for a title on behalf of the buyer of the motor vehicle. During the first year the highway use tax was in effect, the Division received over $15,000 in bad checks from dealers in payment of the tax. Under prior law, the only remedy available to the Division was to remove the registration plate from any vehicle for which a bad check was given in payment of the highway use tax. It did not seem fair, however, to remove the plate from a vehicle when the owner of the vehicle paid the tax to a dealer and the dealer submitted a bad check to the Division.

The second administrative change clarifies that the Department of Revenue has the same authority to audit those who elect to pay the gross receipts tax on the lease or rental of motor vehicles that it has to audit those who remit sales and use taxes and gives the Division of Motor Vehicles the specific authority to request the Department of Revenue to conduct an audit of a person who pays the gross receipts tax. Prior to the highway use tax legislation, the gross receipts tax on the lease or rental of motor vehicles was part of the sales tax law and was administered by

the Department of Revenue. Under current law, the gross receipts tax is an elective alternate to the highway use tax and is set out in the highway use tax statutes. Although the tax is collected by the Department of Revenue, the highway use tax statutes are administered by the Division of Motor Vehicles.

In addition to the administrative changes, the act makes the following technical changes:

(1) It deletes an inaccurate reference in G.S. 105-187.6(b)(4) to the filing of a security interest in a motor vehicle with the Secretary of State. Security interests in most motor vehicles are perfected by filing with the Division of Motor Vehicles, rather than the Secretary of State.

(2) It deletes G.S. 105-436 because it conflicts with G.S. 105-445 and is unnecessary. G.S. 105-436 states that gas tax revenue is to be credited to the Highway Fund, but G.S. 105-445 requires 75% of gas tax revenue to be credited to the Highway Fund and 25% to be credited to the Highway Trust Fund. The provisions in G.S. 105-436 on payment of the gas tax by distributors duplicate G.S. 105-434(b).

(3) It allocates gas tax refunds made to the Cherokee Tribe between the Highway Fund and the Highway Trust Fund in accordance with the 75%/25% split for other refunds.

(4) It deletes unnecessary and inaccurate language in G.S. 20-57(b) concerning the fee imposed for issuing a copy of a registration card for a motor vehicle. G.S. 20-85 sets the fee at $10.00.

(5) It deletes unnecessary and inaccurate language in G.S. 20-85 concerning an exception to the fee schedule set in that statute. G.S. 20-68 does not contain an exception to the fee schedule in 20-85 and has not since 1975.

(6) It corrects a cross reference to the statute that required highway use tax revenue to be credited to the Highway Trust Fund.

Except as otherwise noted, the provisions of the act became effective upon ratification, June 3, 1991. The act does not have any revenue impact.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 213 (House Bill 1047, Rep. Lilley)

AN ACT TO ELIMINATE DOUBLE TAXATION OF ALARM SYSTEMS INSTALLERS LICENSED BY THE ALARM SYSTEMS LICENSING BOARD.

G.S. 105-51.1 imposes an annual privilege license tax on alarm system businesses licensed by the Alarm Systems Licensing Board pursuant to Chapter 74D of the General Statutes. Alarm systems businesses that must be licensed under Chapter 74D and pay the tax under G.S. 105-51.1 are those businesses whose sale, installation, or other service of alarm systems involves entry into the customer's residence or place of business. Businesses that merely sell smoke alarms or other security devices over the counter are not licensed under Chapter 74D or taxed under G.S. 105-51.1.

G.S. 105-102.5 levies a general business license on certain businesses, including a business that sells "burglar alarms, smoke alarms, or other warning devices." (G.S. 105-102.5(b)(3)). The intent of G.S. 105-102.5, enacted in 1989, was to eliminate situations in which a taxpayer was required to obtain more than one privilege license for the same business. Nonetheless, the statute could be construed to levy a duplicate license tax on alarm systems businesses already taxed under G.S. 105-51.1.

Consistent with the original intent of G.S. 105-102.5, this act provides that an alarm systems business that is required to be licensed under G.S. 105-51.1 does not have to pay the privilege license tax under G.S. 105-102.5 for the same location. Businesses that sell alarms over the counter but do not enter the customer's premises, and thus are not taxed under G.S. 105-51.1, will continue to be taxed under G.S. 105-102.5. The act became effective July 1, 1991.

1991 Chapter 221 (House Bill 11, Rep. Lilley)

AN ACT TO APPLY THE TIRE TAX, USED TO PAY FOR THE DISPOSAL OF SCRAP TIRES, TO NEW TIRES FOR ROAD CONSTRUCTION EQUIPMENT AND OTHER NEW VEHICLE TIRES.

This act recodifies the scrap tire disposal "fee" as a tax under the Revenue Act and expands the scope of the levy to include certain new tire transactions that were previously exempt. The 1989 General Assembly imposed a scrap tire disposal "fee" on new motor vehicle tires sold at retail. Because the levy applied only to motor vehicle tires and only to tires sold at retail, not all new tires were subject to the fee.

The definition of motor vehicle that applied to the fee excluded farm equipment, road construction equipment, and special mobile equipment and did not include aircraft. Therefore, a new tire for an airplane or a new tire for a tractor, an earth mover, a well-drilling rig, or any other vehicle that fell in a category of vehicles excluded from the definition of motor vehicle was not subject to the fee. The definition of retail sale that applied to the fee excluded sales of tires that are placed on a motor vehicle offered for sale, lease, or rental. Therefore, new tires sold for used cars offered for sale, lease, or rental by a dealer were also excluded from the fee.

The General Assembly found that the limitation of the scrap tire disposal fee to motor vehicle tires and to tires sold at retail was not consistent with the purpose of the fee. As stated in G.S. 130A-309.54, the purpose of the fee is to provide funds for the disposal of scrap tires. By limiting the fee to motor vehicle tires and to tires sold at retail, however, many tires that contribute to the disposal problem were not subject to the fee.

Accordingly, effective July 1, 1991, this act extends the scrap tire disposal fee to new tires for the following vehicles:

(1) Farm tractors and other farm vehicles.

(2) Graders, earth movers, and other construction vehicles.

(3) Well-drilling rigs, truck cranes, and other vehicles that are included in the class of vehicles known as special mobile equipment. Vehicles in this class are registered with the Division of Motor Vehicles but drive on the road only to get to an off-road job.

(4) Used vehicles offered for sale, lease, or rental by a dealer.

(5) Aircraft.

The act does not change the current exemptions for tires for vehicles propelled by human power, such as bicycles, and for recapped tires.

Because the proceeds of the scrap tire tax go to the Solid Waste Management Trust Fund and to counties, this act does not affect the General Fund. It will generate approximately $150,000 in additional revenue for the Solid Waste Management Trust Fund each year.

In addition to these substantive changes, the act makes two technical changes: it moves the levy of the fee from Chapter 130A to Chapter 105 of the General Statutes and renames the levy a tax rather than a fee. Although originally named a "fee", the scrap tire disposal fee is, in fact, a supplemental sales tax and therefore belongs in Chapter 105 of the General Statutes, the tax chapter, rather than in Chapter 130A, the public health chapter, and should be called by its proper name. The use of the word "fee" to describe the tax contradicts the definition of a disposal fee in G.S. 130A-309.53(2) as a charge imposed by a local unit of government or another entity for accepting a tire for disposal.

Based on a recommendation of the Revenue Laws Study Committee.

1991 Chapter 228 (House Bill 445, Rep. Brawley)

AN ACT TO ALLOW DEPARTMENT OF REVENUE EMPLOYEES TO LEVY ON TAXPAYERS' PERSONAL PROPERTY TO COLLECT TAXES TO THE SAME EXTENT AS A LOCAL TAX COLLECTOR.

This act was requested by the Department of Revenue to give the Department the same authority county tax collectors have in levying on personal property to collect delinquent taxes. Under existing law, Department of Revenue employees could collect unpaid taxes by directing the sheriff to levy upon the delinquent taxpayer's real and personal property located in the sheriff's county. By contrast, a local tax collector could levy against a delinquent taxpayer's personal property to collect unpaid property taxes. (G.S. 105-366, 105-367, and 105-368.)

Effective upon ratification, June 5, 1991, this act provides that the Secretary of Revenue may either direct the sheriff to levy upon the delinquent taxpayer's real and personal property or direct a Department of Revenue employee or officer to levy upon and sell the taxpayer's personal property. In the latter case, the property may be sold either in the county in which it was seized or in Wake County, in the Secretary's discretion. This levy by a Department of Revenue employee or officer is governed by the laws that regulate levy and sale under execution.

1991 Chapter 347 (House Bill 276, Rep. Jones)

AN ACT TO PROVIDE FOR THE ADMINISTRATION OF THE POLITICAL PARTIES FINANCING FUND.

This act substitutes the State Board of Elections for the State Treasurer as the person or entity responsible for distributing funds in the North Carolina Political Parties Financing Fund. The act became effective June 20, 1991. The Treasurer will continue to manage the Fund as part

of the State Treasury, but the State Board of Elections will determine each political party's share of the Fund and direct the disbursement of funds to each eligible political party.

In changing the responsibility for distributing revenue in the Fund, this act, in combination with Section 9 of Chapter 690 of the 1991 Session Laws, made conforming changes to G.S. 105-159.1. That statute permits a taxpayer to direct that $1.00 of the taxpayer's individual income tax liability be credited to the Fund without increasing or decreasing the amount of any tax refund the taxpayer is otherwise due. The conforming changes to G.S. 105-159.1 parallel those made to the election statutes and make the State Board of Elections, rather than the State Treasurer, responsible for administering distributions from the Fund.

1991 Chapter 356 (Senate Bill 234, Sen. Perdue)

AN ACT TO PERMIT REGIONAL SOLID WASTE MANAGEMENT AUTHORITIES TO RECEIVE ANNUAL SALES TAX REFUNDS.

This act adds regional solid waste management authorities to the list of governmental entities in G.S. 105-164.14(c) that are entitled to an annual refund of both State and local sales and use taxes paid on their direct and indirect purchases of tangible personal property. In addition to all counties and incorporated cities and towns, there are 14 other, primarily local, governmental entities currently entitled to refunds of State and local sales and use taxes. These governmental entities must apply for the refund within six months after the end of each fiscal year. This act became effective upon ratification, June 24, 1991, so regional solid waste management authorities will be able to apply for a refund of taxes paid during the 1990-91 fiscal year. The act is expected to reduce General Fund revenues by no more than $500,000 over the next three fiscal years.

In 1990, the General Assembly enacted Article 22 of Chapter 153A of the General Statutes, which allows two or more local governments to create a regional solid waste management authority. The purpose of an authority is to provide environmentally sound, cost effective management of solid waste, including storage, collection, transportation, separation, processing, recycling, and disposal of solid waste.

1991 Chapter 439 (Senate Bill 697, Sen. Raynor)

AN ACT TO ALLOW AN ADDITIONAL 180-DAY PERIOD FOR DEPLOYED ARMED FORCES PERSONNEL AND SUPPORT PERSONNEL TO FILE STATE TAX RETURNS AND TO CONFORM THE STATE INCOME TAX ABATEMENT PROVISIONS CONCERNING MILITARY PERSONNEL TO FEDERAL LAW.

This act changes North Carolina law in two ways. First, it gives armed forces personnel and support personnel serving in the Persian Gulf conflict of 1990-91, commonly referred to as Operation Desert Shield and Operation Desert Storm, the same amount of time to file a State tax return that federal law gives them to file a federal tax return. In doing so, it waives penalties and interest that might otherwise have accrued during the extension period. Second, it makes a technical change to the current State provision concerning abatement of State income taxes for

persons who die in combat to ensure that the State provision tracks the federal income tax abatement provision.

The extension period for income taxes granted by this act is the number of days during the regular filing period the individual was in the combat zone plus 180 days. The length of the regular filing period, which runs from January 1 to April 15, is 105 days. The maximum 285-day extension is reduced by the number of days of the regular filing period during which the individual had left the combat zone. For example, if the individual returned on February 1, 1991, the extension equals 211 days (31 days of the regular filing period when the individual was in the combat zone plus 180 days).

The act does not give armed forces personnel and support personnel interest on their income tax refunds as does federal law for federal tax refunds. Under federal law, armed forces personnel and support personnel are paid interest on any federal income tax refund due from April 15 until the refund is paid. Under State law, no interest is paid on a refund if the refund is made within six months from the later of the date on which the annual return is filed or the date the annual return is due to be filed.

This act is effective retroactively as of August 2, 1990. The estimated loss to the General Fund for the 1991-92 fiscal year is $272,000. The loss is attributable to the interest that would otherwise be due on returns with tax liability filed after April 15. The General Assembly passed a similar act, Chapter 160, that gives military personnel deployed in Operation Desert Storm or Operation Desert Shield 90 days after the end of their deployment to pay their 1990-91 property taxes without interest and to list property for the 1991-92 tax year.

1991 Chapter 441 (House Bill 46, Rep. Brawley)

AN ACT TO REQUIRE SALES OF BOTH HIGHWAY AND NONHIGHWAY SPECIAL FUEL TO BE REPORTED, TO ELIMINATE THE REQUIREMENT THAT CERTAIN USERS OF SPECIAL FUEL FILE REPORTS SPECIFYING THEIR USE OF SPECIAL FUEL, TO CHANGE THE MAXIMUM BOND REQUIRED OF FUEL DISTRIBUTORS AND SUPPLIERS, AND TO CHANGE THE METHOD FOR DETERMINING THE AMOUNT OF A BOND PAYABLE BY CERTAIN FUEL IMPORTERS.

This act provides a permanent solution to the bonding dilemma addressed temporarily in Senate Bill 110, ratified as Chapter 42 of the 1991 Session Laws, and modifies the licensing and reporting system for the sale of special fuel, which is primarily diesel fuel as opposed to gasoline. The changes to the licensing and reporting requirements become effective January 1, 1992, and will make the administration of the special fuels statutes easier for the Department of Revenue and less cumbersome for the public.

The 1990 General Assembly changed the maximum amount of the bond required from a distributor of gasoline or a supplier of diesel fuel from $40,000 to two times the distributor's or supplier's expected tax liability. Many distributors and suppliers who had a history of timely tax payments had difficulty obtaining bonds at the higher amounts. Chapter 42 of the 1991 Session Laws provided a temporary solution to the problem by reinstating the $40,000 maximum bond

amount until July 1, 1991. Effective July 1, 1991, this act sets the maximum bond required of a distributor of gasoline or a supplier of special fuel at $125,000. The maximum bond for a person who is both a supplier and a distributor is $250,000.

The act also establishes a different bonding requirement for importers of gasoline. Under the act, the amount of the bond required of distributors who import or exchange fuel is based on the amount of fuel imported or exchanged rather than the amount of fuel sold to other licensed distributors. These importers have large potential tax liabilities and some have few assets or ties to the State. Under prior law, the bond amount for these importers and traders was based on the amount of tax payable on the sale of gasoline to others. However, no tax is due when an importer or trader sells to a licensed distributor; the tax is due when the purchasing distributor subsequently resells or uses the gasoline.

In addition to changing the bond requirements, the act expands the reporting requirements for special fuel. Beginning January 1, 1992, the act requires all suppliers of special fuel to obtain a license from the Department of Revenue and to report all sales of special fuel. Currently, only suppliers of special fuel to be used for highway purposes are licensed and only sales of special fuel to be used for highway purposes are reported. In addition, the act exempts suppliers of nonhighway fuel from the bonding requirement and allows these suppliers to report sales quarterly instead of monthly.

The act modifies the licensing and reporting requirements for users of special fuel. A user is a person who uses special fuel in a licensed motor vehicle. The act exempts motor carriers who file road tax reports from the reporting requirement, allows the Secretary to waive the reporting requirement for motor carriers who are not required to file road tax reports, exempts users whose vehicles weigh less than 10,001 pounds from both the licensing and reporting requirements, and replaces the reporting requirement for the remaining users with a requirement that the users file an annual statement certifying that they did not use nontaxpaid fuel during the year in their motor vehicles. Currently, all users of special fuel whose vehicles weigh more than 6,000 pounds must file either quarterly or annual reports that list each purchase of fuel, including the date of the purchase, the seller of the fuel, and the amount of the purchase. Many users of special fuel find this report burdensome.

The act relieves certain bulk users of diesel fuel from the requirement of marking storage facilities for the fuel. Under current law, a bulk user of special fuel that is not used for a highway purpose must mark the facility "For Nonhighway Use." The act eliminates the marking requirement when the fuel is used only for heating, drying crops, or a manufacturing process and could not be readily extracted from the storage facility and used for a highway purpose. It also provides that a supplier of special fuel who sells or delivers fuel into a storage facility of a user-seller that is marked for nonhighway use is liable for any tax due on the fuel if the supplier knows or has reason to know that the user-seller intends to use the fuel for a highway purpose.

The act expands the presumption concerning when fuel is taxable to cover fuel that is incorrectly reported as having been purchased for a nonhighway use. Chapter 42 of the 1991 Session Laws clarified the existing presumption by stating that a user-seller who uses more fuel than the user-seller reports is presumed to have acquired the extra fuel tax-free for use in a licensed motor vehicle. Therefore, under the current law, only fuel that is not reported at all rather than falsely reported is presumed taxable.

The act relieves retail sellers of special fuel from the requirement of giving purchasers of special fuel a detailed receipt when the purchaser buys fewer than 25 gallons of fuel for highway

purposes and requires a receipt for all sales for nonhighway purposes. Current law requires a user-seller to give a receipt for every retail sale of any amount of special fuel. The receipt must contain the name and address of the purchaser, among other information.

1991 Chapter 453 (Senate Bill 104, Sen. Winner)

AN ACT TO ELIMINATE A TAXPAYER'S DEDUCTION FOR CERTAIN CONTRIBUTIONS OF LAND OR CROPS TO ACCOUNT FOR TAX CREDITS ALLOWED FOR THE SAME CONTRIBUTIONS.

This act makes an adjustment to two individual income tax credit laws to restore to taxpayers the benefits of the credits that were inadvertently limited by the Tax Fairness Act of 1989. It also provides that only one credit is allowed with respect to property owned by a married couple, regardless of the nature of the ownership interest.

G.S. 105-151.12 allows a tax credit of 25% of the value of property donated for land conservation purposes. The maximum credit for a donation of property is $25,000. G.S. 105-151.14 allows a tax credit of 10% of the market price of a crop that the owner allows to be gleaned. When these tax credits were enacted in 1983 and 1984, respectively, they provided that the taxpayer could not also claim a deduction for the donation that was the basis of the credit. In effect, the taxpayer could choose between taking a credit or a deduction for State tax purposes.

Under the Tax Fairness Act of 1989, federal taxable income is the starting point for calculating State taxable income. Separate State tax deductions are therefore eliminated and the deductions taken for federal purposes apply to the State tax as well. To prohibit a double tax benefit for the same donation, the Tax Fairness Act amended these two State tax credits to provide that they could not be taken for amounts that were deducted for federal tax purposes. The effect of the revision, therefore, was to restrict inadvertently the situations in which the tax credit could be used. Under the original law, the taxpayer could choose between the State credit and the State deduction; because the credit provided a greater tax benefit, the taxpayer would normally choose the credit. Under the revised law, the taxpayer had to forgo both the State and federal deductions to receive the credit. This removed the extra incentive for making the donation in the first place.

This act amends the law to reflect its original intent: a taxpayer can choose either the State credit or the State deduction. Claiming the State credit does not affect the federal deduction. The act provides that a taxpayer who claims the State credit must forgo the benefit of the deduction for State tax purposes. If the deduction has already been claimed in determining federal taxable income, the taxpayer must add the amount of the deduction to North Carolina taxable income. The adjustments to the two individual income tax credits are effective retroactively beginning with the 1989 tax year. The average annual loss to individual income tax revenue for the seven-year period these credits have been in effect is $145,000.

Effective for taxable years beginning on or after January 1, 1991, only one credit is allowed with respect to property owned by a married couple, regardless of the nature of the ownership interest. Under prior law, a married couple that owned property by the entirety could take only one credit for a donation of the property. However, if the couple had a tenancy in common, each spouse could take a separate credit.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 454 (Senate Bill 114, Sen. Winner)

AN ACT TO REPEAL INHERITANCE TAX EXEMPTIONS FOR CERTAIN TYPES OF PROPERTY.

This act revises the State inheritance tax exemptions to reflect changes made to the inheritance tax laws in 1985. It is effective for the estates of decedents dying on or after September 1, 1991.

The act repeals the separate inheritance tax exemptions for the following types of property, each of which is fully taxable under the federal estate tax:

(1) Pension, profit-sharing, and stock bonus plans qualified under section 401 of the Internal Revenue Code and retirement annuity contracts qualified under section 403 of the Internal Revenue Code.

(2) Amounts receivable under individual retirement accounts (IRAs), individual retirement annuities, and individual retirement bonds.

(3) Federal military retirement and survivor benefits.

It repeals these specific exemptions because their purpose, which is primarily to protect property passing to a spouse, children, or grandchildren from inheritance taxation, is accomplished by changes made to the inheritance tax law in 1985. In that year, the General Assembly enacted the spousal exemption and increased the Class A inheritance tax credit to an amount that exempts at least $500,000 of property that passes to lineal ancestors and descendants from tax. Under those changes, any property, including the property listed above, is exempt from inheritance tax if it passes to a spouse and is eligible for application of the Class A credit if it passes to a lineal ancestor or descendant. Repeal of these exemptions is expected to increase revenue to the General Fund by no more than $100,000 annually.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 479 (Senate Bill 107, Sen. Winner)

AN ACT TO SIMPLIFY AND MODERNIZE PRIVILEGE LICENSE TAXES RELATING TO DRY CLEANERS AND LAUNDRIES.

Effective July 1, 1991, this act revises the privilege license taxes payable by laundries (including linen rental businesses) and by dry cleaners. It establishes two categories of State privilege licenses for laundries and dry cleaners and changes local taxation of these businesses.

The two categories of State licenses are a location license and a soliciting license. The location license is payable by a dry cleaner or laundry with a fixed place of business in this State. The soliciting license is payable by a laundry or dry cleaner that does not have a fixed place of business in this State but enters the State to pick up clothes or other articles to be cleaned or pressed at a place outside the State.

The State privilege tax for a location license is $50.00 if the business operated at the location does not also have vehicles pick up items from outside the county where the business is located to be cleaned or pressed at the business location. The State privilege tax for a location

license is $100.00 if the business operated at the location also has vehicles pick up items from outside the county where the business is located to be cleaned or pressed at the business location. The State privilege tax for a soliciting license is $100.00. The new tax rates are not expected to have a significant impact on the General Fund.

Under prior law, each dry cleaner or laundry was required to obtain one $50.00 State license for each fixed location and an additional $50.00 State license for each city or town, other than the one where it is located, to which it sent vehicles to pick up items to be cleaned or pressed, unless there was not another similar business in that city or town. In addition, a dry cleaner or laundry that had a fixed location only in another state and sent a vehicle into this State to pick up items to be cleaned or pressed was required to obtain a $200.00 State license for each vehicle. These prior provisions were apparently designed to hamper statewide competition and to inhibit competition from out-of-state businesses. The provisions were exceedingly complex and the out-of-state provision was arguably unconstitutional. The new law will simplify State administration and taxpayer compliance.

This act also changes the local privilege license taxes that can be levied on laundries and dry cleaners by counties and municipalities. The prior law was complex. Counties were not authorized to levy a tax on dry cleaners located in the State, but they could levy a tax of up to $200.00 on out-of-state dry cleaners that solicited in the county. Counties were authorized to tax laundries that entered the county to pick up items to be laundered if the actual laundering location was outside the county. If the location was outside the county but inside the State, the county could levy a tax of up to $12.50 on the business; if the location was outside the State, the county could levy a tax of up to $200.00 on each vehicle entering the county.

Under prior law, municipalities with a population of less than 10,000 could levy an annual tax of up to $25.00 on dry cleaners; municipalities with a population of 10,000 or more could levy an annual tax of up to $50.00 on dry cleaners. Municipalities had the same authority as counties to tax laundries: they could levy a tax of up to $12.50 on laundries and linen rental businesses entering the municipality to pick up items to be laundered if the actual laundering location was outside the municipality but inside the State. If the location was outside the State, the municipality could levy a tax of up to $200.00 on each vehicle entering the municipality.

This act simplifies local taxation of these businesses. It provides that municipalities may tax each dry cleaner or laundry that has a place of business in the municipality. The rate of tax may not exceed the State location rate. Both counties and municipalities may tax businesses that do not have a fixed place of business in this State but enter the county or municipality to pick up clothes or other articles to be cleaned at a place located outside the State. The rate of tax may not exceed the State soliciting rate.

Based on a recommendation of the Revenue Laws Study Committee.

1991 Chapter 487 (House Bill 23, Rep. Lilley)

AN ACT TO MODIFY THE FUEL TAX STATUTES TO ENABLE NORTH CAROLINA TO ENTER THE INTERNATIONAL FUEL TAX AGREEMENT.

This act changes several provisions in the motor fuel tax statutes to enable North Carolina to enter the International Fuel Tax Agreement (IFTA). As of December 1, 1990, at least sixteen

states belonged to the IFTA and four more, including North Carolina, had indicated a desire to join. The sixteen member states are primarily Midwestern and western states. If North Carolina joins, several other southeastern states are expected to follow suit. The act becomes effective January 1, 1992, the date North Carolina expects to become a member of the IFTA. It is estimated that this act will increase State revenues by $137,500 in the 1991-92 fiscal year and $275,000 in the 1992-93 fiscal year. Three-fourths of the new revenue will be credited to the Highway Fund and the remainder will be credited to the Highway Trust Fund.

The IFTA is an agreement between member taxing jurisdictions to assist each other in the collection and administration of taxes paid by interstate motor carriers on their use of motor fuel. These taxes are frequently referred to as road taxes or highway use taxes and are not to be confused with the motor vehicle titling tax enacted in 1989 that is also referred to as a highway use tax. The road tax is a tax on the amount of fuel a motor carrier uses in its operations in a state. The tax is at the same rate as the state's per gallon excise tax on motor fuel and a credit is given for excise taxes paid to the state on motor fuel. Thus, the purpose of the tax is to tax motor carriers who drive in a state using fuel purchased in another state.

Under the IFTA, a motor carrier declares one member jurisdiction to be the carrier's base jurisdiction for registering the carrier's vehicles for purposes of the road taxes and reporting the taxes due to all the member jurisdictions. The base jurisdiction then collects the road taxes payable by the motor carrier to every member jurisdiction and remits the taxes collected to the appropriate jurisdictions. By centralizing the payment and collection of road taxes, the agreement greatly simplifies the payment of road taxes by motor carriers and the collection of road taxes by the member jurisdictions.

The IFTA requires a member jurisdiction to agree to certain administrative provisions to ensure uniformity among the participating jurisdictions. Some of North Carolina's statutes conflict with these provisions and must be changed in order for North Carolina to be able to enter the IFTA. This act makes the necessary changes.

Section 1 changes the law on who is a user of special fuel, which is primarily diesel fuel, for reporting fuel consumed by a leased motor vehicle. G.S. 105-449.10 requires a user of special fuel to file periodic reports of fuel use. For leased motor vehicles, the question is whether the lessor or lessee must file the report.

Under existing law, the lessee is required to file the report unless the lessor supplies the fuel, pays for the fuel, or includes the cost of fuel in the lease and elects to be the lessee. Under the act, beginning January 1, 1992, the one who is designated as the motor carrier with respect to the leased vehicle must file the report. If the leased vehicle is not subject to the road tax and, consequently, neither the lessor nor the lessee is a motor carrier with respect to the vehicle, the one who is liable for payment for the fuel consumed by the leased vehicle must file the report.

Section 2 modifies the exemptions from the road tax to ensure that the same vehicles are subject to road tax in each member jurisdiction under the IFTA. It rewrites the definitions of "motor carrier" and "motor vehicle" to delete the existing exemptions for vehicles operated by nonprofit organizations and retain the exemptions for vehicles operated by the United States, vehicles operated by the State or a political subdivision of the State, and special mobile equipment.

Section 3 modifies the refund provisions of the road tax to ensure that a motor carrier who registers under the IFTA is subject to the same refund provisions in each member jurisdiction of the IFTA. The modified provision will allow the Secretary of Revenue discretion to refund

excess motor fuel excise taxes paid by a motor carrier without first auditing the motor carrier's records or requiring the motor carrier either to furnish a bond or to establish a one-year history of compliance with the motor fuel tax laws. Under existing law, the Secretary may not refund excess tax paid by a motor carrier unless the Secretary audits the carrier or the carrier either furnishes a bond or has a one-year history of compliance with the motor fuel tax laws.

Section 4 enables the Secretary of Revenue to require a motor carrier to furnish a bond in certain circumstances and raises the maximum bond from $10,000 to four times a carrier's expected liability or refund. Under existing law, a motor carrier is required to furnish a bond only if the carrier wants a refund of taxes paid and does not have a one-year history of compliance with the motor fuel tax laws. Under the act, beginning January 1, 1992, the Secretary can require a motor carrier to file a bond when the motor carrier fails to file a report or pay tax when due or if the Secretary determines after auditing the motor carrier that a bond is needed to protect the State from loss. The maximum bond required under existing law is $10,000. Section 4 increases the maximum bond to four times the carrier's liability to North Carolina to reflect the increase in the amount of taxes that will be collected by North Carolina as the base state. For motor carriers who designate North Carolina as their base jurisdiction, North Carolina will collect road taxes payable to all the other member jurisdictions.

Section 5 is a companion change to the change made in Section 1 concerning leased motor vehicles. This section changes the law on who, between the lessor and lessee of a leased motor vehicle, is considered the motor carrier and must consequently file periodic road tax reports and pay the road tax. Under existing law, the lessee is the motor carrier unless the lessor supplies the fuel, pays for the fuel, or includes the cost of fuel in the lease and elects to be the lessee. Under the act, who between the lessor and the lessee is the motor carrier will differ depending on whether the lessor is a company that is regularly engaged in the leasing business or is an independent contractor and owner-operator of a truck or other vehicle. If the lessor is regularly engaged in the leasing business, the lessor is the motor carrier unless the lessor and lessee agree that the lessee is the motor carrier and the lessee notifies the Secretary of Revenue. If the lessor is an independent contractor, the lessee is the motor carrier unless either the motor vehicle whose operations must be reported is leased for fewer than 30 days or the motor vehicle is leased for at least 30 days, the lessor and lessee agree that the lessor is the motor carrier, and the lessor notifies the Secretary of Revenue.

Section 6 modifies the procedure for registering a motor carrier and its fleet for purposes of the road tax. The modifications are made to accommodate the registration procedures under the IFTA. The section changes current law by requiring registration of both a motor carrier and each vehicle in the carrier's fleet and by eliminating the requirement that each identification marker for a vehicle have a unique identifying number. Under existing law, each motor vehicle operated by a motor carrier is registered with the Department of Revenue and the motor carrier is not separately registered. The Department assigns a unique number to each registered motor vehicle and issues a registration card, which is carried in the cab of the motor vehicle, and an identification marker, which is placed on the vehicle. Under the IFTA, registration focuses on the motor carrier, and both the motor carrier and the vehicles in the carrier's fleet are registered. A unique number is assigned to each motor carrier but not to each motor vehicle in a carrier's fleet. An identification marker is issued for each vehicle in the carrier's fleet but the marker identifies the vehicle as part of a certain carrier's fleet. A copy of the motor carrier's registration must be carried in the cab of each motor vehicle and the vehicle's identification marker must be placed on the vehicle.

Section 7 eliminates the current credit against the road tax for any temporary permit fee paid. No other state allows this credit. Under existing law, a motor carrier may operate for no more than 20 days in this State without registering for payment of the road tax if the carrier applies for and receives a temporary permit. The fee for a temporary permit is $25.00. Under existing law, if the motor carrier files a road tax report for its temporary operations, the carrier can receive a credit against the road tax for its temporary permit fee. If the carrier's operations were exclusively intrastate, it can obtain a refund of the temporary permit fee by filing a report. This section eliminates both the credit and the refund.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 517 (House Bill 1236, Rep. Rogers)

AN ACT TO CONFORM THE CRITERIA FOR DESIGNATION AS A DISTRESSED COUNTY FOR INCOME TAX PURPOSES TO THE CRITERIA USED BY THE INDUSTRIAL DEVELOPMENT FUND, TO INCREASE THE NUMBER OF SEVERELY DISTRESSED COUNTIES TO THIRTY-THREE, AND TO REPEAL THE SUNSET.

In 1987 the General Assembly created a tax credit for individuals and corporations that hired additional full time employees in a severely distressed county. Under current law, a county is considered severely distressed if its distress factor is one of the 25 highest in the State. The Secretary of Economic and Community Development assigns a distress factor to each county in the State at the end of each calendar year. The factor is based on the sum of the county's rank by rate of unemployment, from lowest to highest, and its rank by per capita income, from highest to lowest, averaged over a three year period. As enacted, the credit would have expired for taxable years beginning on or after January 1, 1993.

This act increases the number of severely distressed counties from 25 to 33, removes the sunset on the credit, and adds a third criteria to be used in determining whether or not a county is severely distressed. The third criteria is the county's rank by percentage of growth in population from lowest to highest. The addition of this third criteria conforms the criteria for designation as a severely distressed county to the criteria used in determining which counties may benefit from the Industrial Development Fund under G.S. 143B-437A.

This act becomes effective for taxable years beginning on or after January 1, 1992. Through May 1991, the cost of this tax credit in fiscal year 1990-91 was approximately $300,000. This figure represents 1/4 of the total tax credits available to employers because the $2,800 maximum credit must be taken in equal installments over a four-year period. It is estimated that increasing the number of severely distressed counties to 33 will add at least an additional $100,000 to the cost of the credit on a fiscal year basis. However, no additional cost will be incurred until fiscal year 1993 because the credit must be taken in the taxable year after the job has been created.

1991 Chapter 538 (House Bill 1222, Rep. Nesbitt)

AN ACT TO AMEND VARIOUS STATUTES RELATING TO THE CLEANUP OF LEAKING PETROLEUM UNDERGROUND STORAGE

TANKS, TO INCREASE THE PER GALLON FUEL EXCISE TAX, AND TO DEDICATE THE PROCEEDS OF THE TAX INCREASE TO THE CLEANUP OF LEAKING PETROLEUM UNDERGROUND STORAGE TANKS.

This act revises the law on leaking underground petroleum storage tanks in various ways to encourage the replacement of these tanks and to ensure that sufficient funds are available to clean up the environmental damage caused by them. As part of the effort to provide adequate funds for the clean-up, the act increases the per gallon excise tax on motor fuels for a limited period of time and earmarks the revenue for this purpose.

Effective January 1, 1992, the act increases the per gallon excise tax on motor fuels by 1/2¢ a gallon, dedicates one-half of the increased revenue to the Commercial Leaking Petroleum Underground Storage Tank Fund, established under G.S. 143-215.94B, and dedicates the remaining one-half to the Groundwater Protection Loan Fund, which the act creates in new G.S. 143-215.94P. Effective January 1, 1995, the act reduces the 1/2¢ increase by 1/4¢ a gallon and eliminates the dedication of revenue to the Loan Fund. Thus, when the 1995 changes take effect, the per gallon tax will be 1/4¢ more a gallon than it is now and all the revenue from the increase will be earmarked for the Commercial Tank Fund. Effective January 1, 1999, the changes to the per gallon tax made in 1992 and 1995 are repealed.

1991 Chapter 539 (House Bill 1224, Rep. Mavretic)

AN ACT TO PROVIDE AN INCENTIVE FOR THE USE OF RECYCLED NEWSPRINT BY REQUIRING PUBLISHERS WHO DO NOT USE A MINIMUM AMOUNT OF RECYCLED NEWSPRINT TO PAY A TAX ON NONRECYCLED NEWSPRINT.

To encourage the use of recycled newsprint, this act imposes a privilege license tax on those who produce publications printed on newsprint and do not use a minimum amount of recycled paper. The tax becomes effective October 1, 1991, and is payable quarterly. The tax rate is $15.00 for each ton of newsprint that is consumed during a reporting period and has an average recycled content percentage that is less than the required minimum recycled content percentage. The proceeds of the tax are earmarked for the Solid Waste Management Trust Fund created under G.S. 130A-309.12. The act is expected to generate no more than $90,000 for fiscal year 1991-92 and each subsequent year.

The average minimum recycled content requirement for newsprint consumed by a producer each quarter increases over a six-year period. From 1991 to 1997, the percentage of required recycled content gradually increases from 12% to 40%. After 1997, the percentage remains at 40%.

The tax does not apply in a few circumstances. It does not apply to newsprint that is acquired by a producer and then recycled by the producer. It also does not apply if the producer of a publication could not meet the required minimum recycled content standards for one or more of several reasons. The reasons are an inability to obtain newsprint made from recycled paper at a price or quality comparable to other newsprint, in an amount needed for a publication, or in a reasonable amount of time. A producer who claims an exemption for one of these reasons must

document the producer's effort to obtain newsprint that contained the required minimum percentage of recycled paper.

Assuming a producer did not recycle any newsprint acquired and had no reason for not using newsprint with the appropriate recycled content, a producer would compute the tax due under this act by the following procedure. The producer would determine the number of tons of newsprint acquired during a quarter and the recycled content percentage of the acquired newsprint. Assume the producer acquired 100 tons of virgin paper, 100 tons of paper with a recycled content of 20%, and 100 tons of paper with a recycled content of 10%. The producer under this assumption has an average recycled content percentage of 10%.

The producer then multiplies 300 (the number of tons acquired) by 12% (the required percentage for 1991) to get 36, and multiplies 300 (the number of tons acquired) by 10% (the average recycled content of the paper acquired) to get 30. As the final step, the producer subtracts 30 from 36 and multiplies the result, 6, by $15.00 to find that the producer owes a tax of $90.

Because the tax imposed by this act falls on the publication of newspapers, the question arises of whether the act impermissibly interferes with the exercise of the fundamental right to freedom of the press. Given the clear purpose of the act, which is to address a solid waste problem and not interfere with freedom of the press, the amount of the tax, and the exemptions from the tax, the act is likely to withstand a constitutional challenge.

1991 Chapter 584 (House Bill 308, Rep. Abernethy)

AN ACT TO ALLOW LOCAL GOVERNMENTAL UNITS TO CONTRACT WITH FINANCIAL INSTITUTIONS FOR RECEIPT OF PAYMENTS OF DELINQUENT PROPERTY TAXES AND INTEREST AND TO AUTHORIZE LOCAL GOVERNMENTS TO ALLOW PAYMENT OF PROPERTY TAXES BY CREDIT CARD.

This act expands the authority of local governments to contract with financial institutions for collection of property taxes and authorizes tax collectors to allow payment of property taxes by credit card. In 1989, the General Assembly authorized all local governments to contract with a bank or other financial institution to collect property taxes. Before 1989, several local acts authorized specific local governments to contract for this type of property tax collection, popularly known as "lockbox property tax collection." The 1989 act was limited to collection of current taxes only; the financial institution could not collect overdue taxes. Effective upon ratification, July 8, 1991, Section 1 of this act removes that limitation and authorizes local governments to contract with financial institutions for collection of delinquent property taxes and interest as well as current taxes.

Under existing law, tax collectors, and financial institutions that have contracted to collect property taxes for a local government, may accept either cash or checks in payment of property taxes. Effective beginning with the 1991-92 tax year, Section 2 of this act authorizes tax collectors, but not financial institutions, to accept credit cards in payment of property taxes. Like acceptance of a check, acceptance of a credit card is at the tax collector's own risk; the tax collector is individually liable for any loss resulting from acceptance of a credit card. The fee charged to the tax collector by the financial institution for the credit card service will not be borne by the taxing unit; it is to be passed on to the taxpayer. The tax collector may issue a receipt at the time a credit

card payment is made or may withhold the receipt until the credit card invoice is honored. Dishonor of a credit card invoice has the same consequences as dishonor of a check; if the tax collector issued a receipt and the credit card invoice is later dishonored, a purchaser for value or a lienholder who in good faith relied upon the receipt has rights superior to the taxing unit's tax lien.

1991 Chapter 598 (House Bill 1039, Rep. Kerr)

AN ACT TO FACILITATE THE CONSTRUCTION OF FACILITIES IN AND THE EXTENSION OF NATURAL GAS SERVICE TO UNSERVED AREAS AND TO REVISE THE PROCEDURES FOR GAS COST ADJUSTMENT FOR NATURAL GAS LOCAL DISTRIBUTION COMPANIES.

This act creates a method to promote expansion of natural gas service into unserved areas of North Carolina where it may not otherwise be economically feasible. Under the act, the Utilities Commission may order a local distribution company to create a special natural gas expansion fund to be used to make the expansion of natural gas services economically feasible. Revenue in the fund may only be used to the extent needed to make the expansion project economically feasible. When the project becomes economically viable, the Commission may require the company to repay either the customers or the fund for the amount spent on the project. The sources of funding for expansion funds include refunds received by local distribution companies from gas suppliers, expansion surcharges on customers when approved by the Commission, and any other source of funding approved by the Commission. The expansion surcharges applied to customers purchasing natural gas or transportation services cannot exceed 15¢ per dekatherm.

To ensure that all of the funds received through customer surcharges are used for the expansion of natural gas services, the act exempts from certain taxes the income received by local distribution companies from the surcharges. In determining State net income, a local distribution company may deduct from federal taxable income the amount of natural gas expansion surcharges collected. On the other hand, the company must add to federal taxable income any amount allowed under the Code as a depreciation expense or an expense in lieu of depreciation for a utility plant acquired by the company with customer surcharges, to the extent the plant is included in the company's rate base at zero cost. The act also allows a natural gas company to deduct natural gas expansion surcharges from its gross receipts before determining its franchise tax liability; natural gas companies pay franchise tax at a rate of 3.22% of total gross receipts. Lastly, the act allows a natural gas company to deduct the surcharges from its gross receipts before determining its sales tax liability, which is 3% of the gross receipts derived from sales of piped natural gas.

The act became effective upon ratification, July 8, 1991. The act does not decrease current General Fund revenues because the surcharges do not currently exist.

1991 Chapter 613 (House Bill 544, Rep. Brawley)

AN ACT CREATING CIVIL PENALTIES FOR BUYING OR SELLING NON-TAX-PAID FUEL.

This act, requested by the Department of Revenue, imposes civil penalties for buying or selling non-tax-paid motor fuel or special fuel for use in motor vehicles. Effective October 1, 1991, a person who dispenses non-tax-paid fuel or allows non-tax-paid fuel to be dispensed into a motor vehicle is subject to a penalty. If the amount of fuel dispensed is less than 25 gallons, the penalty is $75.00. If the amount dispensed is 25 or more but less than 50 gallons, the penalty is $150.00. If the amount dispensed is 50 gallons or more, the penalty is $300.00. In addition, this act provides that failure to pay the penalty is grounds to withhold or revoke the registration plate of the motor vehicle into which the non-tax-paid fuel was dispensed. The penalties collected will be credited to the Highway Fund.

The per-gallon excise taxes levied by the State on fuel apply to all fuel used to operate motor vehicles. Fuel used for other purposes is not taxable. A person who uses motor fuel for a purpose other than to propel a motor vehicle may obtain a refund of the tax paid on the fuel. A person who uses special fuel, which is primarily diesel fuel, for a purpose other than to propel a motor vehicle may either purchase non-tax-paid fuel from a supplier or, if the fuel used was tax-paid fuel, obtain a refund of the tax paid on the fuel. A recent investigation by the Department of Revenue revealed that a high percentage of supplier-resellers selling non-tax-paid special fuel were allowing individuals to evade the tax by allowing the non-tax-paid fuel to be dispensed into motor vehicles. The Department requested this act to help ensure compliance with the tax.

1991 Chapter 618 (House Bill 933, Rep. Howard)

AN ACT TO REPEAL THE SALES TAX EXEMPTION FOR PRISON CONCESSION SALES.

Effective August 1, 1991, this act repealed the State and local sales and use tax exemption for sales to prison inmates and to on-duty prison guards at concession stands operated by the State prison system within prison confines. These sales will now be subject to the 4¢ State sales tax and the 2¢ local sales taxes. This act is expected to increase General Fund revenues by approximately $334,000 in the 1991-92 fiscal year and $400,000 in the 1992-93 fiscal year.

1991 Chapter 624 (House Bill 20, Rep. Kerr)

AN ACT TO PROVIDE FOR A MORE EFFICIENT AND EQUITABLE PROCEDURE FOR ASSESSING AND COLLECTING LOCAL AD VALOREM PROPERTY TAXES ON CERTAIN MOTOR VEHICLES.

This act creates a new procedure for collecting property taxes on motor vehicles. It is the product of the combined efforts of representatives from the North Carolina County Commissioner's Association, the North Carolina League of Municipalities, the Division of Motor Vehicles, the North Carolina County Assessors Association, the Department of Revenue, and the Institute of Government. Its purpose is to improve the collection rate for property taxes on motor vehicles and thereby recover the estimated $11.1 million in property tax revenue that was lost each

year under the former collection system. Its enactment culminates years of study and failed proposals.

The new collection system created by the act becomes effective January 1, 1993. Under the system, all motor vehicles, except public service company vehicles appraised by the Department of Revenue and manufactured homes, are classified for listing, assessment, and taxation separately from other classes of property. The classified motor vehicles consist of two groups: those that are registered with the Division of Motor Vehicles and those that are not registered with the Division of Motor Vehicles. A vehicle is not registered with the Division either because it is a tractor, an earthmover, or some other type of vehicle that cannot be registered with the Division or it is a car or truck and could be, but for some reason, is not registered with the Division.

VEHICLES THAT ARE REGISTERED

Year-round Procedure

The primary purpose of the act is to change the collection procedure for motor vehicles that are registered with the Division of Motor Vehicles. Under the act, registered motor vehicles are taxed on a revolving, year-round basis. To accomplish this, the act requires the Division of Motor Vehicles to give each county a monthly list of all the motor vehicles in the county for which registration was renewed or obtained two months earlier (Section 5, G.S. 20-50.4). The county will then list and appraise the vehicles and send the owners of the vehicles a bill for the county, municipal, and special district property taxes due (Section 1, G.S. 105-330.3(a); G.S. 105-330.5(a)).

How Tax Is Computed

The date the value of the vehicle is determined is the same as before, but the date that ownership, situs, and taxability of the vehicle is determined is different. The value of the motor vehicle is determined as of January 1 preceding the date a new registration is applied for or the current registration is renewed (Section 1, G.S. 105-330.2(a)). The ownership, situs, and taxability of the motor vehicle is determined as of the day the registration is applied for or renewed (Section 1, G.S. 105-330.2(a)).

For a vehicle whose registration is renewed, the amount of property tax due on the vehicle is the value of the vehicle multiplied by the applicable property tax rates in effect on the first day of the month in which the registration of the vehicle would have expired if it had not been renewed. For a vehicle registered for the first time by the vehicle's owner, the amount of property tax due on the vehicle is the value of the vehicle multiplied by the applicable property tax rates in effect on the first day of the month in which the vehicle is registered. (Section 1, G.S. 105-330.2 and 105-330.5(a)).

Payment of Tax

Taxes on registered motor vehicles are due four months after the registration is obtained or renewed (Section 1, G.S. 105-330.4(a)). A motor vehicle owner who does not pay the taxes is liable for interest at the rate of 3/4% per month (Section 1, G.S. 105-330.4(b)).

If the taxes on a registered vehicle are not paid within four months after they become due, the county includes the motor vehicle on a list that is sent to the Division of Motor Vehicles (Section 1, G.S. 105-330.7). The Division then refuses to renew the vehicle's registration the following year unless the taxpayer obtains a receipt showing that the previous year's taxes have been paid (Section 5, G.S. 20-50.4). Unpaid taxes may also be collected by levying on the motor

vehicle or other personal property of the owner, but, unlike under former law, they do not become a lien on the owner's real property (Section 1, G.S. 105-330.4(c)).

For registered motor vehicles, the tax year runs from the first month after the registration is obtained or renewed. The bill provides that the forms necessary to implement this system will begin being used on January 1, 1993.

Transfer of Plates

If an owner transfers the registration plates from one registered vehicle to another, the second vehicle is not taxed until the end of the first vehicle's tax year (Section 1, G.S. 105-330.6). The taxes must be paid on the first vehicle, however, before the registration can be renewed for the second vehicle (Section 5, G.S. 20-50.4).

Registration Not Renewed

If a taxpayer does not renew a motor vehicle's registration, the taxpayer must list the vehicle for taxes by filing an abstract with the assessor of the county in which the vehicle is located on or before January 31 following the date the registration expires (Section 1, G.S. 105-330.3(a)(2)). The vehicle is then taxed as an unregistered vehicle.

Vehicle Tags Surrendered

If a taxpayer surrenders a vehicle's tags and registration before the end of the vehicle's tax year, the taxpayer can obtain a release or refund of the rest of that year's taxes (Section 1, G.S. 105-330.6). The amount is prorated based on the number of full months remaining the vehicle's tax year.

VEHICLES THAT ARE NOT REGISTERED

Under the system, a motor vehicle that is not registered with the Division of Motor Vehicles, either because the Division does not register that type of vehicle or the vehicle owner chooses not to register the vehicle, or a motor vehicle whose registration is not renewed when it expires will continue to be taxed in the same manner. As before, the value, ownership, situs, and taxability of the motor vehicle is determined on January 1 of the year in which the motor vehicle is required to be listed (Section 1, G.S. 105-330.5(b)); the owner must list the motor vehicle by January 31 (Section 1, G.S. 105-330.3(a)(2)); the assessor must prepare a tax notice by the following September 1 (Section 1, G.S. 105-330.5(b)); the county, municipal, and special district tax rates are the rates in effect on July 1 of the year in which the vehicle is required to be listed (Section 1, G.S. 105-330.5(b)); and the taxes become due on September 1 following the January 31 listing (Section 1, G.S. 105-330.4(a)).

The only difference for these vehicles under the system created by this act concerns liens. Under this act, Section 1, G.S. 105-330.4(c), the tax due on one of these vehicles is not a lien on the real property of the owner of the vehicle. Under current law, the property tax due on any motor vehicle is a lien on the real property of the owner of the vehicle.

CONFORMING CHANGES

Sections 2 through 8 of the act make conforming changes to various statutes to eliminate potential conflicts and confusion and repeal provisions that are no longer needed. Section 2 exempts classified motor vehicles from the listing, appraising, and assessing provisions of Article 22 of Chapter 105 of the General Statutes. This section is necessary to avoid a conflict between

Article 22 and new Article 22A. Classified motor vehicles are listed, appraised, and assessed under new Article 22A instead of Article 22.

Section 3 gives the board of county commissioners the discretion to relieve the tax collector from the charge of taxes on classified motor vehicles that are one year or more past due when it appears the taxes are uncollectible.

Section 4 repeals G.S. 20-50.2, which requires an applicant for vehicle registration to certify that the property taxes have been paid on the vehicle and that the vehicle has been listed for property taxes. This provision is not necessary under the system established by this act.

Section 5 adds two new sections to Chapter 20 of the General Statutes. The first section requires the Division of Motor Vehicles to send a list of vehicles for which registration has been renewed or obtained to each county assessor. The second section requires the Division to refuse to renew a vehicle's registration the following year if the Division has received a list from the tax collector indicating that the taxes on the vehicle have not been paid.

When the Division is notified that taxes for a vehicle have not been paid, the Division will send a notice to the taxpayer, with the notice of registration renewal, stating that the Division will refuse registration of the vehicle unless the taxpayer obtains a receipt showing that the previous year's taxes have been paid. If the owner has transferred the tags to another vehicle, the Division will refuse registration of the second vehicle until the owner presents a paid tax receipt identifying the vehicle from which the plates were transferred. The Division, however, cannot refuse to register a vehicle for a person, not named in the list, to whom a vehicle named in the list has been transferred in good faith.

Section 6 deletes the provision in G.S. 20-66(d) that allows a person to register and purchase a license plate for a two-year period. The system established by this act could not work if registration plates were issued for two years instead of one year.

Section 7 clarifies that a taxpayer may request the Division of Motor Vehicles to consolidate the taxpayer's motor vehicle registration dates so that all the vehicles have the same due date. This will ensure that the taxpayer receives only one tax bill annually for the property taxes due on the motor vehicles.

Section 8 repeals the additional $100.00 penalty for failure to list a motor vehicle. The penalty was imposed to encourage more people to list their motor vehicles. The penalty is not necessary under the new system because registration of a vehicle is also the listing of the vehicle.

Recommended by the Property Tax Study Commission.

1991 Chapter 637 (House Bill 487, Rep. Anderson)

AN ACT TO AMEND THE LAW ALLOWING TAX CREDITS FOR QUALIFIED BUSINESS INVESTMENTS.

Effective July 11, 1991, this act makes technical and administrative changes to the statutes concerning tax credits for qualified business investments. In general, a qualified business investment is an investment in the stock of a North Carolina business that is registered with the Secretary of State and is a small business venture, is a business that has received a grant from

certain State or federal agencies, is an investment company whose primary investments are in either or both of these first two types of businesses, or is a North Carolina Enterprise Corporation.

The act changes the law as follows:

(1) It deletes references to North Carolina Capital Resource Corporations. These corporations do not exist and can no longer be created because the statutes authorizing their creation, Article 2 of Chapter 53A, have expired.

(2) It gives the Secretary of State the authority to adopt administrative rules concerning the annual registration renewal required of the types of businesses whose stock investments are eligible for a tax credit under G.S. 105-163.011, other than the North Carolina Enterprise Corporation, and requires these businesses to comply with the rules.

(3) It makes several clarifying changes concerning financial statements and revenues of a qualified business venture. First, it requires a qualified business venture to file an annual financial statement with the Secretary of State as well as an initial financial statement. Second, it requires that each financial statement show revenues for the preceding year of no more than $5,000,000 for investments in the business to continue to qualify for a tax credit. Third, it requires a qualified business venture to notify the Secretary of State when its annual revenues exceed $5,000,000.

(4) It changes the tax credit forfeiture provisions in two ways to avoid unintended results. First, it provides that a taxpayer does not forfeit a credit received for investing in a qualified business venture before the annual revenue of the business exceeded $5,000,000. Prior law required a taxpayer who received a credit in any of the three years before revenues exceeded $5,000,000 to forfeit the credit and pay tax. Second, it provides that a taxpayer does not forfeit a credit received for investing in a qualified grantee business if the business does not receive a grant at least every three years. Prior law required a taxpayer who received a credit to forfeit the credit if the business does not receive another grant in the next three years.

The act does not change the amount of an investment credit allowed. For a corporation, the credit is 25% of the amount invested or $750,000, whichever is less. A corporation may apply the credit against its income tax, franchise tax, or premiums gross receipts tax. For an individual, the credit is 25% of the amount invested or $100,000, whichever is less. An individual may apply the credit against the individual's income tax liability. A tax credit is taken for the taxable year beginning in the calendar year following the calendar year in which an investment is made. A credit cannot exceed the amount of taxes imposed; the amount of any unused credit may be carried forward for the next five succeeding years.

1991 Chapter 652 (House Bill 86, Rep. James)

AN ACT TO AUTHORIZE CITIES AND COUNTIES TO IMPOSE AN AVAILABILITY FEE FOR SOLID WASTE DISPOSAL FACILITIES AND

TO BILL AND COLLECT THE FEE IN THE SAME MANNER AS PROPERTY TAXES.

This act provides uniform, Statewide authorization for counties and municipalities to levy availability fees for solid waste disposal facilities and to collect the fees in the same manner as property taxes. G.S. 160A-192, 160A-311, and 160A-314 authorize municipalities to impose fees for solid waste collection and disposal. G.S. 153A-292 authorizes counties to impose fees for solid waste collection and for the use of solid waste disposal facilities. In 1989 and 1990, a series of local laws was enacted authorizing certain counties and one municipality to bill and collect these solid waste fees in the same manner as local property taxes. Most of these laws applicable to counties were codified as G.S. 153A-293.

Effective upon ratification, July 12, 1991, this act clarifies the authority of local governments to impose fees for different types of solid waste services and authorizes all counties and municipalities to collect the fees in the same manner as property taxes. Section 1 amends G.S. 153A-292 to provide that a county may levy (i) a fee for collection of solid waste, (ii) a fee for the use of a disposal facility provided by the county, and (iii) a fee for the availability of a disposal facility provided by the county.

There are several limitations on these fees. The collection fee may not exceed the cost of collection. The facility use fee may not exceed the cost of operating the facility and may be imposed only on those who use the facility. The facility use fee may not be imposed on a municipality or its residents unless the fee is based on a schedule that applies uniformly throughout the county. The facility availability fee may not exceed the cost of providing the facility and may be imposed on all improved property that benefits from the facility. The facility availability fee may not be charged in addition to a collection fee that includes the cost of disposal in the available facility.

Section 2 authorizes counties to provide that fees imposed pursuant to G.S. 153A-292 may be billed and collected in the same manner as property taxes. The county may provide that the fees are a lien on the real property for which they are assessed. Section 3 provides a conforming technical change.

Sections 4 and 5 provide that, in addition to the solid waste collection fees and facility use fees it is already authorized to impose, a municipality may impose a fee for the availability of a disposal facility provided by the municipality. The same limitations that apply to a county facility availability fee apply to a municipal facility availability fee. Like a county, a municipality may provide that the availability fees will be billed and collected in the same manner as property taxes and that the fees will be a lien on the real property for which they are assessed. Section 6 repeals the various local acts that formerly applied to specific local governments.

1991 Chapter 666 (House Bill 80, Rep. Lineberry)

AN ACT TO AUTHORIZE A REGIONAL TRANSPORTATION AUTHORITY TO LEVY A VEHICLE REGISTRATION TAX.

This act authorizes a Regional Public Transportation Authority to levy an annual vehicle registration tax not to exceed $5.00 per vehicle. The General Assembly enacted legislation in 1989 authorizing the creation of an Authority in any area of the State between three counties that meet certain criteria. At this time, only Wake, Durham, and Orange counties meet the specifications. In accordance with the 1989 legislation, these counties have formed an Authority to enhance mobility

in and between the three counties through an efficient, economical, and environmentally sound public transportation system.

Although the 1989 legislation gave an Authority the power to collect taxes it is authorized to levy, it did not authorize an Authority to levy any kind of tax. This act gives an Authority the power to levy a vehicle registration tax. The Authority may adopt a resolution imposing the tax only after it has held a public hearing on the levy and received a resolution approving the levy from the special tax board of the Authority as well as the board of county commissioners of each county organizing the Authority. The resolution must set the effective date of the levy, which cannot be earlier than the first day of the third calendar month after the adoption of the resolution.

The tax will be collected by the Division of Motor Vehicles at the time a person registers a motor vehicle or renews a motor vehicle's registration. The vehicles listed for property taxes in the counties organizing the Authority are subject to the tax. The Division shall credit the money collected from the vehicle registration tax to a special fund. The net proceeds in the fund will be disbursed quarterly to the Authority. The interest credited to the fund will be disbursed quarterly to the Highway Fund to reimburse the Division for the costs of collecting and administering the tax. An Authority may not spend more than 2% of the money it receives from the tax proceeds for administrative expenses.

1991 Chapter 674 (House Bill 547, Rep. Miller)

AN ACT TO PROVIDE FOR PAYMENT OF EXCESS DAMAGES AGAINST A STATE EMPLOYEE FOR COLLECTING OR ADMINISTERING AN UNCONSTITUTIONAL TAX.

This act authorizes the State to indemnify a State employee who has been held liable for damages for collecting or administering an unconstitutional tax. The act became effective upon ratification, July 13, 1991. The Department of Revenue requested its enactment because of a court case brought the State and the former Secretary of Revenue, Helen Powers.

Section 1 requires the State, in a case in which the State is defending a State employee, to pay the excess amount of a judgment or settlement against the State employee for collecting or administering a tax that is held unconstitutional. The excess amount is the amount above the existing $100,000 protection and any insurance coverage over that limit. Section 2 reorganizes and clarifies the existing law that provides for payment of judgments and settlements up to the $100,000 limit. Section 3 clarifies that the new statute provides protection only for amounts in excess of the insurance coverage provided by the Public Officers and Employees Liability Insurance Commission.

The act does not provide a source of funds to pay an award. If a multi-million dollar award is made against a State employee in a case to which the act applies, the State is legally responsible. The State is protected, however, against having to pay damages that arise from an employee's egregious behavior. The State can decline to become responsible for a case if the Attorney General determines that, because of the employee's behavior or for another reason, it is not in the best interest of the State to do so.

Several lawsuits were filed against the State as a result of the 1989 United States Supreme Court case, Davis v. Michigan, which held that a State cannot give its own employees or retirees more favorable tax treatment than it gives federal employees or retirees. In response to this

decision, in 1989, North Carolina repealed its income tax exemption for State and local retirement benefits and enacted a law that allowed only a limited exemption for all retirees. State and local retirees filed suit challenging that new law. In addition, because of the timing of the Supreme Court case, a number of federal retirees did not receive refunds for taxes paid on their retirement benefits in 1989 and earlier years. Federal retirees filed two lawsuits seeking relief, one in State court and one in federal court. In the federal case, Swanson v. Powers, the lower court decision stated that the Secretary of Revenue could be held personally liable for damages for administering the type of law that was found unconstitutional in Davis v. Michigan. The court found that the damages could be assessed on the theory that the Secretary should have known before Davis v. Michigan was decided that North Carolina's law would be held unconstitutional; therefore, when she administered the law, she was intentionally violating the constitutional rights of some taxpayers. The State cannot be held liable for these damages because of its sovereign immunity.

The Swanson case was reversed on appeal, but its underlying theory caused concern. There are many types of taxes which raise constitutional questions that have never been resolved. As the Davis case illustrates, a new court ruling can invalidate a law that has been on the books and accepted by constitutional scholars for many years. Constitutional law is subtle and complex and is constantly evolving over time. Under the lower court's theory in the Swanson case, if the State chooses to enact a tax that raises an unresolved point of constitutional law, the Secretary and other tax officials are forced to choose between putting themselves at risk for damages of millions of dollars or refusing to perform their legal duty to administer the tax.

Under existing law, the State may indemnify a State employee for up to $100,000 in damages awarded in a judgment or settlement in a civil or criminal action relating to the scope and course of the employee's employment. This protection, provided in Article 31A of Chapter 143 of the General Statutes, is similar to protection under the Tort Claims Act. If the Attorney General determines that it is in the State's best interest to defend a State employee, the State will provide a defense and will pay the damages up to the $100,000 limit. In addition, the State has professional liability insurance for excess coverage of up to $1,000,000 in certain cases. This insurance is obtained by the Public Officers and Employees Liability Insurance Commission in the Department of Insurance.

This coverage protects State employees in many cases but, due to the $1,000,000 limit, it would not be enough to pay the potential multi-million dollar award in Swanson or another case challenging the constitutionality of a tax law. This act goes further and protects tax officials from any potential liability as a result of administering the laws that the State asks them to administer.

Recommended by the Revenue Laws Study Committee.

1991 Chapter 689 (House Bill 83, Rep. Nesbitt)

AN ACT TO MAKE BASE BUDGET AND EXPANSION BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES; TO MAKE APPROPRIATIONS FOR CAPITAL IMPROVEMENTS FOR STATE DEPARTMENT, INSTITUTIONS, AND AGENCIES; TO MAKE APPROPRIATIONS FOR OTHER PURPOSES; TO PROVIDE FOR

BUDGET REFORM; AND TO PROVIDE FOR REVENUE RECONCILIATION.

This act is the Appropriations and Budget Revenue Act of 1991. Title IV (Parts 46 - 56) contains most of the revenue provisions of the act. A few other revenue provisions are found throughout the act. Those provisions are summarized at the end of the explanation of Title IV of the act.

PART 46. INTERNAL REVENUE CODE UPDATE

Part 46 of Chapter 689 rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1990, to January 1, 1991. Updating the reference makes recent amendments to the Internal Revenue Code applicable to the State to the extent that State tax law previously tracked federal law. This update has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law. The inheritance tax, franchise tax, and intangibles tax also determine some exemptions based on the provisions of the Code.

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code as it existed on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of periodic updates. The answer to the question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law recently and the likelihood of continued changes, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue losses. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, 2(1) of the Constitution provides in pertinent part that the "power of taxation... shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would... be invalidated as an unconstitutional delegation of legislative power."

A number of changes made by the Revenue Reconciliation Act of 1990 will affect the State corporate and individual income tax. The changes in corporate tax law are fairly minor and will not have a significant impact on State revenues.

The State individual income tax will not be affected by the 1990 changes in the federal tax rate structure; these changes include an increase in the maximum federal tax rate to 31%, a lower federal rate for capital gains, and an increase in the federal alternative minimum tax rate. Recent changes in the calculation of federal taxable income will, however, have a significant impact on North Carolina individual income tax. Beginning with the 1991 tax year, the Internal Revenue Code provides that the deduction for personal exemptions is phased out for taxpayers with adjusted gross income above a threshold amount. The threshold amounts are $150,000 for married

couples filing jointly and $100,000 for single taxpayers. The personal exemptions must be reduced by 2% for every $2,500, or fraction thereof, by which the taxpayer's income exceeds the threshold. The personal exemptions are fully phased-out by the time a married couple's income reaches $272,500 and a single taxpayer's income reaches $222,500.

During the House debate on this legislation, the question arose of whether using federal taxable income, that may include only part or even none of the personal exemption deduction, to calculate State taxable income violates the North Carolina Constitution. The General Assembly concluded that it did not. Article V, 2(6) of the North Carolina Constitution states: "The rate of tax on incomes shall not in any case exceed ten percent, and there shall be allowed personal exemptions and deductions so that only net incomes are taxed." The question was whether this provision guaranteed each person the same personal exemption in calculating income. Although the Constitution requires only net income to be taxed, it does not define net income. The amount to be subtracted from gross income in calculating net income is left to the discretion of the General Assembly. Under current law, every taxpayer gets to deduct a minimum standard deduction. The vast majority of taxpayers get additional deductions. Therefore, the phase-out of one type of deduction, the federal personal exemption, does not violate the North Carolina Constitution.

Another major change in the Code is the limitation on itemized deductions for high-income taxpayers. Effective beginning with the 1991 tax year, married taxpayers filing jointly must reduce their itemized deductions by 3% of the amount by which their adjusted gross income exceeds $100,000. For married individuals filing separately, the threshold is $50,000. However, a taxpayer's itemized deductions may not be reduced by more than 80%. The reduction in allowable deductions results in an increase in federal taxable income, the basis for North Carolina taxable income.

Two changes in the Code necessitated a technical adjustment to the State tax law. The Revenue Reconciliation Act of 1990 enacted two new tax credits that, if elected by a taxpayer, require the taxpayer to reduce related federal deductions. State tax law does not pick up federal tax credits, but the reduction of the taxpayer's deductions would be passed through for State purposes. A technical correction provided in this part allows the taxpayer the full benefit of otherwise allowable federal deductions in the calculation of North Carolina taxable income when there is no corresponding State tax credit.

The Revenue Reconciliation Act of 1990 contained a number of other changes that affect the individual income tax. These changes include disallowance of a medical expense deduction for cosmetic surgery, extending income exclusions for certain employer-paid benefits, extending a deduction for health insurance costs paid by self-employed individuals, reducing a deduction for costs of making businesses accessible to disabled individuals, and expanding the percentage depletion allowance for oil and gas producing properties.

This Part of the act is effective for taxable years beginning on or after January 1, 1991. It is estimated that the additional State General Fund tax revenue from this Internal Revenue Code update will be at least $10 million per year, beginning with the 1991-92 fiscal year.

PART 47. CORPORATE INCOME TAX CHANGES

Part 47 of Chapter 689 raises the corporate income tax rate from 7% to 7.75%, effective for taxable years beginning on or after January 1, 1991. It also imposes a temporary surtax equal to a stated percentage of the corporation's income tax liability. The percentage rate of the surtax is 4% for taxable years beginning on or after January 1, 1991. The rate is reduced by 1% each

taxable year until January 1, 1995, when it will no longer exist. This Part also updates the definitional statute for the corporate income tax law by defining and clarifying terms currently in use. It is estimated that the amount of revenue gained from the corporate income tax rate increase and the temporary surtax will be $85 million for the 1991-92 fiscal year.

PART 48. CIGARETTE TAX CHANGES

Part 48 of Chapter 689 increases the excise tax on cigarettes from one mill per individual cigarette to two and one-half mills per individual cigarette. This translates into an increase from 2¢ per pack to 5¢ per pack. The increase was effective August 1, 1991, and it is expected to generate $20 million in additional General Fund revenue for the 1991-92 fiscal year.

PART 49. OTHER TOBACCO TAX CHANGES

Part 49 of Chapter 689 imposes an excise tax on tobacco products other than cigarettes at the rate of 2% of the cost price of the products. The cost price is defined as the price paid for the product by the person liable for the tax before any discount, rebate, allowance, or tax imposed by this Part. As with the tax imposed on cigarettes, the following transactions are exempt from the tax imposed by this part: tobacco products sold outside the State, tobacco products sold to the federal government, and sample tobacco products distributed without charge.

The wholesale or retail dealer who first handles tobacco products subject to the tax in this State is liable for the tax. The dealer must remit the tax to the Secretary of Revenue on a monthly basis. The Secretary may require a dealer to obtain a bond in an amount sufficient to protect the State from loss if the dealer fails to pay the taxes due. A dealer who is primarily liable for the tobacco products tax may deduct 4% from the amount of tax to cover losses due to damage to tobacco products, expenses incurred in preparing the records and reports, and the expense of furnishing a bond. A wholesale dealer must obtain a continuing tobacco products license for each place of business and pay a tax of $25 for the license. The retail dealer must also obtain a continuing tobacco products license and pay a tax of $10 for it.

The excise tax on tobacco products other than cigarettes becomes effective January 1, 1992. The estimated amount of revenue from this new tax is $500,000 for the 1991-92 fiscal year.

PART 50. SOFT DRINK TAX ADMINISTRATIVE CHANGES

Part 50 rewrites much of Article 2B of Chapter 105, the Soft Drink Tax Act, to make the law easier to understand, simpler to administer, and more equitable among the groups of taxpayers subject to the tax. This Part makes the following substantive changes effective October 1, 1991; it does not change the soft drink tax rate.

(1) It eliminates payment of the excise tax on soft drinks based on the purchase of stamps and crowns. Existing law allows but does not require payment based on stamps and crowns; this method is used infrequently.

(2) It establishes a uniform monthly reporting method for payment of the excise tax by distributors, wholesale dealers, and retail dealers. Existing law allows but does not require payment of tax based on monthly reports. The new law does not change the time allowed for filing a monthly report.

(3) It establishes a uniform 4% discount, allows the discount only if the tax is paid on time, and does not allow a discount on bottled soft drinks subject to tax at a reduced rate. The 4% discount is the same percentage discount as is allowed under the alcoholic beverage excise tax.

Under existing law, the discount varies with the method of payment, can be claimed whether or not the tax is timely paid, and applies both to bottled soft drinks taxable at the regular rate of 1¢ per bottle and to bottled soft drinks taxable at the reduced rate of 1/2¢ a bottle. This reduced rate applies to the first 15,000 gross of bottled soft drinks sold at wholesale each year by each distributor and wholesaler.

(4) It establishes a procedure for identifying soft drinks that are exempt from tax because they will ultimately be sold outside the State or to the federal government. By this procedure, a distributor or wholesale dealer who sells an otherwise taxable item that is to be resold outside the State or to the federal government can sell the item without collecting tax on it if the purchaser gives the distributor or wholesale dealer a written statement certifying that the item will be resold in a non-taxable transaction.

Under existing law, tax is collected whenever a bottled soft drink or base product is sold. If a distributor or wholesale dealer sells to a person who resells the item outside the State or to the federal government, the person notifies the distributor. The distributor then gives the person a credit on the next tax the distributor collects when selling a bottled soft drink or base product to the person, and the distributor applies to the Department of Revenue for a refund. The new procedure will be simpler and less time consuming.

(5) It replaces the exemption for soft drinks that contain at least 35% natural fruit or vegetable juice and have no artificial flavoring, coloring, or preservative with an exemption for soft drinks that are 100% natural fruit or vegetable juice. Under existing law, there were over 500 exemptions for soft drinks that contain at least 35% juice but less than 100% juice. The new law eliminates the exemption for these items. Elimination of the exemption will save time for the Department of Revenue because it will no longer have to register each of these items and periodically check the formula of the item to ensure that it is still tax-exempt.

(6) It deletes the exemption for soft drink base products that are for domestic as opposed to commercial use and are not otherwise exempt from tax.

In addition to these substantive changes, Part 50 makes numerous technical changes. It deletes unnecessary or obsolete language and makes various clarifying changes. It is estimated that this act will generate approximately $500,000 in the 1991-92 fiscal year and $800,000 in the 1992-93 fiscal year.

Recommended by the Revenue Laws Study Committee.

PART 51. INSURANCE TAX CHANGES AND REGULATORY CHARGE

This Part makes several changes concerning the taxation and regulation of insurance companies. The changes are designed to increase revenue for the General Fund, make the Department of Insurance a receipt-supported agency, and enable insurers to recoup assessments paid by them to provide funds to cover claims against insolvent insurers.

To increase revenue for the General Fund, the Part makes a two-step increase in the insurance gross premiums tax rate. It increases the rate from 1.75% to 1.875% effective for the 1991 tax year and, effective for the 1992 tax year and subsequent years, increases the tax rate again from 1.875% to 1.90%. The increases are expected to raise General Fund revenue by $3.1 million in fiscal year 1991-92 and by $3.8 million in fiscal year 1992-93.

To make the Department of Insurance receipt-supported and thereby eliminate General Fund support of the Department, the Part imposes a regulatory charge on certain insurance companies. The regulatory charge imposed is similar to the charge imposed on utilities by the North Carolina Utilities Commission.

The charge will be imposed beginning with the 1991 tax year and will be a percentage of an insurer's gross premiums tax liability for a year. For the 1991 year the charge is 6.5% of gross premiums tax liability. For each subsequent year, the amount of the charge will be set by the General Assembly. The charge is due when the gross premiums tax is due; therefore, an insurer that pays the gross premiums tax in installments must also pay the regulatory charge in installments. The 1991 charge is expected to generate $11.9 million.

Because the charge is a percentage of gross premiums tax liability, it does not apply to insurers, such as health maintenance organizations, that are not subject to the gross premiums tax. It also does not apply to hospital, medical, or dental service corporations, such as Blue Cross Blue Shield and Delta Dental Corporation, because these nonprofit corporations are specifically exempted from the charge even though they are subject to the gross premiums tax.

The statutes creating the charge distinguish the charge from a tax. Consequently, the statutes provide that the charge is not to be counted as a tax in determining this State's tax rate on insurance companies for the purpose of calculating an out-of-state insurer's liability for any retaliatory taxes due this State and, conversely, for the purpose of calculating an in-State insurer's liability for retaliatory taxes due another state.

From North Carolina's perspective, retaliatory taxes are taxes payable by an out-of-state insurer whose home state requires North Carolina-based insurers to pay a higher tax to that state than North Carolina requires the out-of-state insurer to pay to this State. If the other state's taxes are higher, the out-of-state insurer must pay tax to this State as if this State had the same tax rate as the other state, and the difference between this State's rate and the other state's rate is called the retaliatory tax.

From the perspective of another state, retaliatory taxes are taxes payable by a North Carolina insurer to a state whose tax is lower than North Carolina's rate. The difference between that state's rate and North Carolina's rate is a retaliatory tax for that state.

To preserve the regulatory charge as a source of operating support for the Department of Insurance, this Part establishes the Department of Insurance Fund and credits to the fund all revenue from the regulatory charge as well as all revenue from fees collected from motor clubs, collections agencies, bail bond sureties and runners, and building code inspectors. Revenue in the Fund can be used only to support the Department of Insurance and does not revert to the General Fund at the end of a fiscal year.

To enable insurers to recoup assessments paid to cover claims against insolvent insurers, this Part allows insurers to claim a tax credit against their gross premiums tax for the amount of assessments paid to the North Carolina Insurance Guaranty Association or the Life and Accident and Health Insurance Guaranty Association. These associations require insurers to pay assessments when revenue is needed to cover claims against insolvent or impaired insurers. Under this Part, an insurer who pays an assessment can take 20% of the amount paid as a tax credit in each of the succeeding five years. Because an insurer is allowed a credit, the Part repeals a provision that allowed insurers to recoup assessments by increasing premiums. The tax credit is effective with the 1991 tax year.

PART 52. INDIVIDUAL INCOME TAX CHANGES

Part 52 of Chapter 689 adds a third tax rate bracket of 7.75% to the individual income tax rate schedule, effective for taxable years beginning on or after January 1, 1991. The higher tax rate bracket is expected to increase revenue $51 million for the 1991-92 fiscal year. Under prior law, there were only two tax rates-- a 6% rate and a 7% rate. The new third bracket affects higher income taxpayers; the Part does not change the incomes subject to the 6% rate. The new rate schedule is as follows:

Filing Status	Income Bracket	Rate
Married, filing jointly	Up to $21,250	6%
+ Surviving spouses	$21,251 to $100,000	7%
	Over $100,000	7.75%
Heads of households	Up to $17,000	6%
	$17,001 to $80,000	7%
	Over $80,000	7.75%
Unmarried individuals	Up to $12,750	6%
	$12,751 to $60,000	7%
	Over $60,000	7.75%
Married, filing separately	Up to $10,625	6%
	$10,626 to $50,000	7%
	Over $50,000	7.75%

PART 53. ALCOHOL TAX CHANGES

Part 53 increases several alcoholic beverage taxes and permit fees and changes the hours during which alcoholic beverages may be sold or consumed. Under prior law, a mixed beverage permittee who purchased spirituous liquor for resale in mixed beverages paid a surcharge of $15.00 per gallon. Of the $15.00 mixed beverage surcharge, $5.00 went to the General Fund, $1.00 went to the Department of Human Resources for substance abuse treatment and education, and $9.00 was distributed to local ABC boards and local governments in the same manner as other alcoholic beverage receipts. Effective August 1, 1991, Part 53 increased the mixed beverage surcharge from $15.00 to $20.00. The additional $5.00 will go to the General Fund; the amounts going to the Department of Human Resources and to local boards and local governments will remain the same.

Effective October 1, 1991, Chapter 565 of the 1991 Session Laws authorizes the sale of spirituous liquor in hotel guest room cabinets. Under that act, a guest room cabinet permittee who purchases spirituous liquor for resale in a guest room cabinet would pay a surcharge of $15.00 per gallon. Part 53 increases the guest room cabinet surcharge from $15.00 to $20.00 to make it the same as the mixed beverage surcharge.

Effective May 1, 1992, Part 53 increases the following ABC permit application fees from $100.00 to $200.00: on-premises malt beverage permits, off-premises malt beverage permits, on-premises unfortified wine permits, off-premises unfortified wine permits, on-premises fortified wine permits, off-premises fortified wine permits, and combined malt beverage or wine permits. Effective May 1, 1992, Part 53 also increases to $100.00 the annual privilege license taxes for retail malt beverage licenses and retail wine licenses. It is estimated that the tax and fee increases in Part

53 will increase General Fund revenues by $2.9 million in the 1991-92 fiscal year and $6.3 million in the 1992-93 fiscal year.

Finally, effective August 1, 1991, Part 53 expanded the hours during which alcoholic beverages may be sold. Under prior law, sales of alcoholic beverages could be made until 1:00 a.m. and alcoholic beverages could be consumed on-premises until 1:30 a.m. During daylight saving time (April - October), however, sales could be made until 2:00 a.m. and consumption could continue on-premises until 2:30 a.m. Now, the same hours apply all year: alcoholic beverages may be sold until 2:00 a.m. and consumed on-premises until 2:30 a.m.

PART 54. SALES TAX CHANGES

To increase State revenue, this Part increases State sales taxes in two ways. First, it increases the general State sales tax rate from 3% to 4%. Second, it increases the preferential sales tax rate on boats, aircraft, railway cars, and locomotives from 2% to 3%, but does not change the $1,500 maximum per article tax for these items. The changes became effective for sales made on or after July 16, 1991.

The increase in the general sales tax rate is expected to generate $430 million for the General Fund in fiscal year 1991-92 and $516 million for the General Fund in fiscal year 1992-93. The 1% increase in the preferential rate on boats, aircraft, railway cars, and locomotives is expected to generate $2 million for the General Fund in fiscal year 1991-92 and $2.1 million for the General Fund in fiscal year 1992-93.

PART 55. HIGHWAY TAX CHANGES

Part 55 makes several changes that affect revenue in the Highway Fund and the Highway Trust Fund. It transfers funds from the Highway Fund to the General Fund to offset the General Fund loss due to the Department of Transportation's sales tax exemption, exempts several types of vehicle transfers from the highway use tax, increases the highway use tax on out-of-State vehicles, and raises fees collected by the Division of Motor Vehicles.

Since 1986, sales to the Department of Transportation have been exempt from State and local sales and use taxes. Sales to most other State entities are not exempt. Because the Department of Transportation uses Highway Fund money to make purchases, and because State sales and use tax proceeds are credited to the General Fund, the effect of the Department of Transportation's exemption is to increase the Highway Fund at the expense of the General Fund. Earlier versions of House Bill 83 had proposed repeal of the Department of Transportation's tax exemption. In lieu of a repeal, the final version of the bill provides for a quarterly transfer from the Highway Fund to the General Fund of the amount of revenue lost by the General Fund due to the sales tax exemption.

The transfers begin in the 1991-92 fiscal year. For fiscal year 1991-92, $8.7 million will be transferred from the Highway Fund to the General Fund, and $9.4 million is expected to be transferred in fiscal year 1992-93. The transfers have the same fiscal effect on the State as repealing the tax exemption, but do not place on the Department of Transportation the administrative and accounting burden it predicted would result from repeal of the exemption.

Part 55 exempts certain transfers from the highway use tax effective August 1, 1991, as recommended by the Revenue Laws Study Committee. The highway use tax is the 3%, $1,000 maximum motor vehicle titling tax enacted in 1989 to help fund the Highway Trust Fund. The General Assembly created the Highway Trust Fund in 1989 to provide a separate source of funds for a $9.1 billion highway program. To provide additional revenue for the Fund, in 1989 the

General Assembly increased the motor fuels tax, increased the fee for issuing a certificate of title from $5.00 to $35.00, and increased related motor vehicle title and registration fees from varying amounts to $10.00.

Unlike the former sales tax on motor vehicles, which was payable only when a motor vehicle was sold, the highway use tax is payable every time a certificate of title is issued for a motor vehicle. A title is issued every time a motor vehicle is transferred to a new owner regardless whether any cash changes hands in the transfer. A new title is also issued if the owner's name, as shown on the title, needs to be changed or corrected. Part 55 reflects the General Assembly's determination that the following motor vehicles, which were formerly subject to the minimum highway use tax of $40.00, should be exempt from the tax:

(1) Vehicles transferred as a result of the death of the former owner.

(2) Vehicles transferred as result of a conveyance between a wife and husband or a parent and child.

(3) Vehicles transferred in a distribution of marital property as a result of a divorce.

(4) Vehicles for which a new title is issued to reflect a change or correction in the owner's name.

Part 55 also increases from $100.00 to $150.00 the maximum highway use tax that applies when a title is issued for a vehicle that has been titled in another state. This increase became effective August 1, 1991.

Finally, Part 55 increases and makes technical corrections to a series of fees and civil penalties paid to the Division of Motor Vehicles. The increases will generate revenue for the Highway Fund and the Highway Trust Fund to help offset the revenue-reducing provisions of Part 55. The fee and penalty increases are as follows:

FEE OR CIVIL PENALTY	INCREASE	
	FROM	TO
Learner's Permit	$5.00	$10.00
Limited Learners Permit	$5.00	$10.00
Duplicate Drivers License	$5.00	$10.00
Special Identification Card	$5.00	$10.00
Extract of Drivers License Record	$4.00	$ 5.00
Certified Copies of Drivers License Record	$4.00	$ 5.00
Penalty for Owner's Failure to Obtain Timely Title	$4.00	$..5.00
Penalty for Dealer's Failure to Obtain Timely Title		$10.00 New Fee
Overweight Permit, Single Trip	$5.00	$10.00
Overweight Permit, Annual Per Vehicle 1 – 50 Vehicles	$25.00	$50.00

Next 50 Additional Vehicles Next 50 Additional Vehicles Any Additional Vehicles	$20.00 $15.00 $10.00	$40.00 $30.00 $20.00
Vehicle Dealer/Distributor's License	$30.00	$50.00
Vehicle Manufacturer's License	$75.00	$100.00
Vehicle Manufacturer's License for Each Factory Branch	$45.00	$70.00
Vehicle Sales Representative's License	$5.00	$10.00
Reissuance of Representative's License to Reflect Employer Name Change	New Fee	$5.00 from 10-01-1991 until 06-30-1992; thereafter, ½ of fee for original license.

These fee and penalty increases became effective August 1, 1991, except that the increases in the fees for annual licenses for vehicle dealers, distributors, and others, become effective July 1, 1992, and the fee for renewal of these licenses to reflect a new employer name becomes effective October 1, 1991.

The fee and penalty increases will generate approximately $10 million annually. The net effect of all the changes made by Part 55 will be an annual gain of $350,000 for the Highway Trust Fund and no gain or loss for the Highway Fund.

PART 56. CONVEYANCE TAX CHANGES

Article 8E of Chapter 105 of the General Statutes levies an excise tax on instruments transferring real property. The tax is known as the deed stamp tax and is collected by the register of deeds of the county in which the real property is located when the deed transferring the property is recorded. This Part changes three aspects of that tax-- the tax rate, computation of the tax, and distribution of the tax revenue.

The Part increases the tax rate from 50¢ for each $500.00 (0.1%) of the value of the property conveyed, less the value of any assumed lien, to $1.00 for each $500.00 (0.2%) of the value of the property conveyed, including the value of any assumed lien. Thus, the Part doubles the tax rate and eliminates the deduction for assumed liens in computing the amount of tax due. The increase is expected to generate $11.9 million for fiscal year 1991-92 and $13.9 million for fiscal year 1992-93.

In addition, the Part directs each county to remit one-half of the net proceeds of the tax to the Department of Revenue, which will credit 15% of the amount received to the Recreation and Natural Heritage Trust Fund, established under G.S. 113-77.7, and will credit the remaining 85% of the amount received to the General Fund. Under prior law, all the proceeds of the tax were retained by the counties.

The Part became effective August 1, 1991, and applies to transfers made on or after that date. A transfer is made when a deed is properly executed, and not when a deed is recorded. Thus, the changes do not apply to deeds executed before August 1, 1991, but recorded after that date.

MISCELLANEOUS REVENUE PROVISIONS

The appropriations provisions of the Appropriations and Budget Revenue Act of 1991 made several changes in the tax laws. The provisions require the cost of the Local Government Commission to be borne by local governments, exempt motor fuel sold for State vehicles from the per gallon excise tax, "freeze" local government reimbursements at their 1990 level, and allow State agencies to receive a refund of local sales and use taxes.

Local Government Commission Funding

Section 24 of this act provides that the cost of the Local Government Commission in the Department of State Treasurer will be paid from the proceeds of the intangibles tax, effective July 1, 1991. Until this change, the Local Government Commission had been funded by annual appropriations from the General Fund. The Local Government Commission performs services for local governments, as provided in the Local Government Finance Act, Chapter 159 of the General Statutes. Several other State programs that provide assistance to local governments are already paid for out of intangibles tax revenue, which is distributed to local governments. These programs are:

(1) Collection of the intangibles tax by the Department of Revenue.

(2) Services performed by the Department of Revenue and the Property Tax Commission in connection with local property taxes.

(3) Training programs operated by the Institute of Government in property tax appraisal and assessment.

Section 24 adds the cost of the Local Government Commission to the list of programs funded from intangibles tax revenue. This change will create an annual saving of approximately $1,047,000 for the General Fund.

State Fuel Tax Exemption

Section 25 of this act provides a fuel tax exemption for motor fuel purchased by the State for use in State-owned vehicles for State business, effective August 1, 1991. Under existing law, the Department of Transportation receives quarterly refunds of motor fuel tax it pays. Other State agencies do not receive fuel tax refunds.

Local Revenue Sharing and Reimbursement Freeze

Section 28 of this act freezes the amount of revenue distributed to local governments under both existing revenue-sharing and reimbursement statutes. As a form of revenue sharing, the State has traditionally distributed to local governments part of the revenue derived from excise taxes on beer and wine and from franchise gross receipts taxes on utility companies, and all the revenue from intangible personal property taxes. In 1990, the laws providing for this revenue sharing with local governments were changed in order to improve the State's balance sheet. The amounts that were formerly earmarked from the tax proceeds and held in a liability reserve for distribution to local governments were credited to the General Fund to be appropriated annually.

This section changes the method for determining how much revenue is to shared. It provides that local governments will share an amount equal to the dollar amount that should have

been distributed to them under each statute in the 1990-91 fiscal year and will not receive a fixed percentage of the tax revenues, as formerly designated by statute. Thus, local governments will receive the same amount each year and will not benefit from any growth in revenues from these taxes. The annual distribution will be measured by the amount that should have been distributed in 1990-91 rather than the amount that was distributed in 1990-91 because the Governor, in order to balance the State budget, withheld some of the distributions that should have been made in the 1990-91 fiscal year.

Local governments also receive annual reimbursements from the State for part or all of their revenue losses due to repeal of the property tax on inventories, repeal of part of the intangibles tax, exemption of food stamp sales from sales tax, and allowance of the property tax homestead exemption. Most of the statutes providing the reimbursement formulas allowed for annual growth in the amount to be reimbursed to reflect the fact that the amount that local governments otherwise would have received from the taxes, had they not been repeal or limited, would have grown each year. Section 28 provides that the amount to be distributed each year will be frozen at the amount that should have been distributed in the 1990-91 fiscal year. The annual distribution will be measured by the amount that should have been distributed in 1990-91 rather than the amount that was distributed in 1990-91 because the Governor, in order to balance the State budget, withheld some of the distributions that should have been made in the 1990-91 fiscal year.

The total amount to be appropriated each year for distribution to local governments pursuant to these revenue-sharing and reimbursement statutes will be frozen at $474,606,174. This freeze reduces the amount that otherwise would have been appropriated from the General Fund by approximately $25 million in the 1991-92 fiscal year and $48 million in the 1992-93 fiscal year.

State Agency Local Sales Tax Refund

Section 190.1 of the act allows a State agency to claim a refund for the amount of local, as opposed to State, sales and use taxes paid by the agency on its direct purchases of property and on its indirect purchases of supplies and fixtures for a building owned or leased by the agency. A "State agency" is any unit of the executive, legislative, or judicial branch of government, including The University of North Carolina but excluding local boards of education.

To enable an agency to claim a refund for tax paid on indirect purchases, the act requires a person who purchases material that becomes part of a building project for an agency to give the agency sufficient information for the agency to determine the amount of refund due the agency. Each State agency is responsible for verifying the accuracy of the information submitted.

The section directs agencies to file claims for a refund within 15 days after the end of each calendar quarter. A late application will be accepted, however, without reduction of the amount of the refund otherwise due. The provision applies to property purchased on or after April 1, 1991.

The purpose of allowing the refund for local sales and use taxes was to generate revenue for the General Fund. The section therefore requires all refunds received by the agencies to be credited to the General Fund. As a result of this provision, the General Fund is expected to receive approximately $14 million in fiscal year 1991-92. The refund provision intentionally targets local sales and use taxes and does not include State sales and use taxes because allowing a refund for State sales and use taxes would not bring any additional revenue to the General Fund. All State sales and use tax revenue is already credited to the General Fund.

Under prior law, a few agencies were granted an exemption from or allowed a refund of both State and local sales and use taxes. The Department of Transportation was exempt and remains exempt from State and local sales and use taxes on its direct purchases. The amount of revenue, however, that the General Fund loses each year as a result of the Department's exemption from State sales and use taxes is transferred from the Highway Fund to the General Fund under Part 55 of the act.

In addition to the exemption for the Department of Transportation, prior law allowed three agencies to receive refunds of both State and local sales and use taxes. The three agencies are the North Carolina Low-Level Radioactive Waste Management Authority, the North Carolina Hazardous Waste Management Commission, and, for purchases made with contract or grant funds, The University of North Carolina.

1991 Chapter 690 (Senate Bill 108, Sen. Winner)

AN ACT TO IMPROVE ADMINISTRATION OF THE SALES AND USE TAX BY INCREASING THE LICENSE TAXES, ALLOWING MORE SMALL RETAILERS TO FILE QUARTERLY SALES TAX RETURNS, AND EXTENDING THE LIMITATIONS PERIOD FOR ENFORCING LIABILITY AGAINST CERTAIN TRANSFEREES AND CORPORATE OFFICERS, AND TO MAKE TECHNICAL CORRECTIONS TO THE REVENUE LAWS.

This act makes a number of changes to the sales and use tax statutes, as requested by the Department of Revenue, to simplify administration of the taxes. It also modernizes some of the language of the sales and use tax statutes and makes technical changes to reconcile two other statutes with unrelated changes enacted earlier in 1991.

Sections 1, 2, 3, and 5 increase the cost of the privilege licenses that retailers and wholesale merchants must obtain. Effective August 1, 1991, Sections 1 and 3 increase from $5.00 to $15.00 the cost of the one-time privilege license that retailers must obtain before engaging in the retail business. Effective July 1, 1992, Section 2 increases from $10.00 to $25.00 the cost of the annual privilege license that wholesale merchants must obtain. Effective August 1, 1991, Section 5 increases the cost of reissuing one of these licenses if the license is suspended or revoked. For reissuing a retailer license, the cost is increased from $5.00 to $15.00; for reissuing a wholesale merchant license, the cost is increased from $10.00 to $25.00. The purpose of these licenses is to register the merchants with the Sales and Use Tax Division of the Department of Revenue. The cost of the licenses had not been increased in twelve years and was less than the actual administrative cost of issuing and renewing the licenses.

Section 4 authorizes quarterly sales tax filing for more small retailers, effective July 1, 1992. Under existing law, all businesses that owe at least $25.00 in State and local sales taxes each month are required to file monthly returns; businesses that owe less than this amount may file quarterly. Section 4 raises the threshold from $25.00 to $50.00, so that all businesses liable for less than $50.00 a month may file quarterly. This change will simplify sales tax filing for many small businesses.

Sections 1 through 5 of this act will affect General Fund revenues differently in different fiscal years. In the 1991-92 fiscal year, an increase of approximately $360,000 is expected; in the 1992-93 fiscal year, there will be no fiscal impact because the estimated gain of $960,000 due to the increase in the licenses costs will be offset by an estimated one-time loss of the same amount due to the change in the filing threshold; in the 1993-94 fiscal year, an increase of approximately $960,000 is expected.

Effective August 1, 1991, Sections 6 and 7 provide an additional one-year period during which the Department of Revenue may assess unpaid taxes of a retail business against (i) a person to whom the business has been transferred, (ii) the business property that was transferred, or (iii) a corporate officer who has allowed corporate funds to be disbursed without paying taxes due. This change makes the period relating to retail businesses the same as the period allowed for assessing a person to whom a taxpayer's assets have been transferred.

Under existing law, if a retail business is transferred, the transferor is required to pay all sales and use taxes owed by the business. The taxes are a lien against the transferor's property, including the transferred business property. In addition, in order to protect the State's interest in these taxes, the law requires the transferee to withhold enough of the purchase price to cover the taxes until the transferor shows a receipt or certificate proving that there are no outstanding taxes due from the business. If the transferee fails to do this, and the transferor does not pay the taxes, the transferee is personally liable under existing law for the taxes to the extent of the purchase price paid for the business or the fair market value of the property, whichever is greater.

Section 6 provides that the Department of Revenue may enforce the lien against the property or assess the liability against the transferee for an additional year after the limitations period has expired against the transferor. The Department stated that the additional year is necessary so that the Department may first pursue its remedies against the transferor before proceeding against the transferee. Section 6 also provides that the transferee is personally liable only to the extent of the consideration paid for the business; if the fair market value of the property exceeds the consideration paid, the transferee is not personally liable for the excess amount. The Department of Revenue may proceed against the property to collect the excess amount.

Under existing law, corporate officers are required to pay taxes due to the State before allowing corporate funds to be distributed. If a corporate officer allows the funds to be disbursed without paying the taxes due, the officer becomes personally liable for the taxes. Section 7 provides that the Department of Revenue may assess this liability against the officer for an additional year after the limitations period has expired against the corporation. The Department stated that the additional year is necessary so that the Department may first pursue its remedies against the corporation before proceeding against the officer.

Sections 8, 9, and 10 correct problems created by earlier 1991 legislation. Sections 8 and 9 correct problems created by amendments made in the 1991 Session to the same statute, G.S. 105-159.1. The revenue laws technical correction bill and an election law bill both amended that statute in different ways. These sections make the changes intended by those earlier amendments. Section 10 corrects a cross-reference to the scrap tire tax. A Revenue Laws Study Committee proposal enacted earlier in the 1991 Session recodified the scrap tire tax statutes.

Based on a recommendation of the Revenue Laws Study Committee.

1991 Chapter 708 (Senate Bill 539, Sen. Staton)

AN ACT TO AUTHORIZE THE DEPARTMENT OF REVENUE TO ESTABLISH THE TIME PERIOD FOR STAMPING CIGARETTES.

Effective October 1, 1991, this act repeals the requirement that a distributor must affix tax stamps to cigarettes within 48 hours after receiving the unstamped cigarettes and provides instead that the time within which the stamps must be affixed is to be set by the Secretary. The purpose of the change is to allow for situations in which a distributor purchases such a large quantity of cigarettes that it cannot stamp them all within 48 hours. The new law will enable the Secretary of Revenue to adopt a rule setting a time limit of 48 hours but providing an exception for unusually large purchases.

1991 Chapter 717 (Senate Bill 263, Sen. Perdue)

AN ACT TO EXTEND THE PROPERTY TAX EXCLUSION FOR HISTORIC PRESERVATION PROPERTY TO INCLUDE LAND HELD AS A SITE TO WHICH AN HISTORIC BUILDING WILL BE MOVED.

Effective July 1, 1991, this act adds another type of property to the list of property that is excluded from property taxes. The act excludes from taxation property that is owned by a nonprofit historic preservation corporation, is located within an historic district created under Part 3A of Article 19 of Chapter 160A of the General Statutes, and is to be the site of an historic structure that is to be moved to the property.

Unlike most exclusions, the exclusion granted by this act is of limited duration and the taxes that would otherwise by payable on the property in the absence of this exclusion are deferred and might become payable. The deferred taxes never become payable if an historic structure is moved to the property, as planned, within five years after the taxes are first deferred. The deferred taxes, plus interest, become payable if an historic structure is not moved to the property within five years after the taxes are first deferred.

Under prior law, property held by a nonprofit historic preservation corporation for use as the future site of an historic structure could not be excluded from property tax because it did not meet the requirement that the property be currently used for historic preservation. Although the property's future use was to be for historic preservation, its current use as vacant land or as property of no historical significance was not considered to be a current historic preservation use.

1991 Chapter 752 (Senate Bill 103, Sen. Winner)

AN ACT TO CLARIFY SUBCHAPTER S CORPORATION LOSS CARRYFORWARDS.

This act clarifies the intent of a 1990 act concerning net economic loss carryforwards by Subchapter S corporations. The 1990 act, Chapter 984 of the 1989 Session Laws (Reg. Sess. 1990), mitigated the effect of the 1989 transition from non-recognition of S corporations under the State income tax law to recognition of these corporations. The 1990 act allowed S corporations to carry

forward part of the net economic losses incurred by them during any of the five years before January 1, 1989. During these years, S corporations were taxed as C corporations rather than as individual shareholders.

The 1990 act allowed S corporations to carry net economic losses forward for three years, but limited the amount that could be carried forward to one-half of the amount that could have been carried forward under prior law if the S corporation were taxed as a C corporation. This act resolves questions that arose over the meaning of the one-half limitation. It clarifies that the limitation to one-half of the amount that would have been allowed if the law had not changed applies separately to each of the years to which losses may be carried forward and does not limit the aggregate amount that may be carried forward to one-half of the total pre-1989 net economic losses.

Thus, if an S corporation has a pre-1989 net economic loss of $1,000 that can be carried forward, it is not limited to deducting only $500.00 (half of $1,000), at most, of the loss. How much of the loss it can deduct depends on its income for 1989, 1990, and 1991. If the corporation has enough income in each of those three years to deduct fully the amount it would have been able to deduct if the law had not changed and to meet the separate requirement that the deduction not exceed one-half of the corporation's income for the year in which the deduction is made, the corporation can deduct $500.00 in 1989 (half of $1,000), $250.00 in 1990 (half of the $500.00 that could not be deducted in 1989), and $125.00 in 1991 (half of the $250.00 that it could not deduct in 1989 or 1990).

Recommended by the Revenue Laws Study Committee.

1990 Tax Law Changes

Prepared by: Cynthia Avrette, Sabra J. Faires, and Martha H. Harris

1990 Chapter 813 (House Bill 2377, Rep. Dave Diamont)

AN ACT TO REQUIRE UTILITIES TO PAY CERTAIN TAXES IN FISCAL YEAR 1989-90 THAT WOULD OTHERWISE BE PAYABLE IN FISCAL YEAR 1990-91 AND TO CHANGE THE ACCOUNTING METHOD THAT APPLIES TO REVENUE DISTRIBUTED TO LOCAL GOVERNMENTS FROM CERTAIN TAXES LEVIED BY THE STATE.

Article III, 5 of the North Carolina Constitution requires the State to have a balanced budget. The budget must be balanced on both a cash and budget basis as well as on a financial basis, in accordance with generally accepted accounting principles. The Governor's decision to move the State employees' pay day from June 30, 1990, to July 1, 1990, balanced the 1989-90 budget on a cash and budget basis. This act allowed the budget to be balanced on a financial basis as well by:

(1) Receiving cash in the 1989-90 fiscal year that the State would otherwise have received in the next fiscal year.

(2) Changing what were liability reserves for revenue that is to be distributed to local governments to appropriations from next year's budget.

(3) Shifting certain venture capital investments made from the General Fund and the Highway Fund to special funds, such as the Escheats Fund.

Although this act changed the timing and accounting for certain revenue, it did not generate additional recurring revenue.

Utility companies normally remit sales taxes and pay franchise taxes on a quarterly basis. This act requires utility companies with an accrued sales tax liability or an accrued franchise tax liability for the months of April and May 1990 of at least $2,000 to pay the taxes collected for those months by June 25, 1990. It further requires these utilities to remit taxes that accrue in June 1990 by July 30, 1990. The State receives $58.3 million from these utility tax payments in the 1989-90 fiscal year that it would have otherwise received in the 1990-91 fiscal year. Effective October 1, 1990, Chapter 945 of the 1989 Session Laws, requires most utility companies to begin paying sales taxes and franchise taxes on a monthly basis.

Effective June 21, 1990, excise taxes on beer and wine, franchise gross receipts taxes on utility companies, and taxes on intangible personal property that were reserved for distribution to local governments are credited to the General Fund, subject to annual appropriation to the local governments. This change in liability reserves to appropriations changes the distribution to local governments from an accrual method of accounting to a cash method of accounting. It also had the effect of transferring $140 million in the 1989-90 fiscal year from liability reserves for revenue that is distributed to local governments to appropriations from the 1990-91 budget. Recognizing that the distributions to local governments from these taxes are a traditional revenue source for them, the act states that it is the General Assembly's intent for the appropriations to be continuing appropriations.

Cities receive 3.09% of the gross receipts derived by an electric power company, a natural gas company, or a telephone company from business within the city. The revenue is distributed to the cities on a quarterly basis. Previously, when the utilities paid the gross receipts taxes, the share of the cities was put in a liability reserve account and was not counted as revenue to the State. Under this act, the cities' share is placed in the General Fund and the amount needed to make the quarterly distributions is appropriated from the General Fund in the State budget.

Currently, cities and counties in which the sale of beer and wine is legal receive 23.75% of the excise tax on beer, 62% of the excise tax on unfortified wine, and 22% of the excise tax on fortified wine. Cities and counties receive this revenue within 60 days after September 30 based on collections for the 12-month period ending on September 30. As with the gross receipts tax, the act changes the accounting method for these excise taxes so that the revenue is not put in a reserve account as it is collected but is instead appropriated in the State budget.

Cities and counties also receive most of the intangibles tax revenue collected. They receive their share as soon as practical after the end of the fiscal year based on collections for the fiscal year. The act likewise changes this distribution to an appropriation. The appropriation must be made by August 30 of each year.

Under prior law, the State Treasurer could invest General Fund and Highway Fund money in the North Carolina Enterprise Corporation and in limited partnership interests in partnerships that are managed primarily for the purpose of investment in venture capital firms and corporate buyout transactions. This act shifts these investments from the General Fund and the Highway Fund to special funds, such as the Escheats Fund. This change was made to release $50 million from liability reserves in the General Fund and Highway Fund and to shift long-term investments out of the General Fund and Highway Fund.

1990 Chapter 814 (Senate Bill 1361, Senator Dennis Winner)

AN ACT TO MAKE TECHNICAL CHANGES TO THE REVENUE LAWS.

This act makes numerous technical and conforming changes to the revenue laws. Except as otherwise noted, the provisions of this act are effective upon ratification.

Section 1 deletes a cross-reference to a statute that was repealed in 1988. Section 2 corrects an incorrect cross-reference that was added in 1989 and section 3 corrects an ungrammatical construction.

Effective July 1, 1990, section 4 repeals an obsolete, redundant statute providing for licensure of certain emigrant agents. In practice, all emigrant agent licenses have been issued under G.S. 105-90, which essentially duplicates G.S. 105-90.1. Both the Department of Revenue and the Employment Security Commission confirmed that G.S. 105-90.1 serves no known purpose.

Section 5 deletes a cross-reference to a statute that was repealed in 1989 and corrects a cross-reference to a subsection that was renumbered in 1989.

Sections 6 through 9 make clarifying amendments to the Controlled Substance Tax Act. The first two sections separate criminal and civil penalties for violation of the Act and clarify that interest applies to overdue taxes. The latter two sections clarify that reporting requirements

imposed on law enforcement agencies by the Act apply only to arrests where drugs seized are subject to tax.

Sections 10 and 11 delete language in two franchise tax statutes that relates to provisions repealed as obsolete in 1989. Section 12 changes from December 31 to September 30 the cut-off date relating to the return used for computing the proportion of dividends deductible for corporate income tax purposes and the stock value not taxable for intangibles tax purposes. The modification, requested by the Department of Revenue, is needed to enable the Intangibles Tax Division to publish annually the booklet, Stock and Bond Values, in a more complete and timely manner.

Both the corporate and individual income tax allow a credit for construction of a fuel ethanol distillery. In 1987, the bill rewriting these credits was amended at the last minute to extend the sunset date from 1993 to 1994 for the individual income tax credit. Apparently through oversight, the corporate income tax credit sunset was not similarly extended. Section 13 extends the corporate income tax credit sunset date from 1993 to 1994.

Section 14 updates a reference to the former Department of Commerce, now the Department of Economic and Community Development. Section 15 removes "corporation" from the definition of a person under the Individual Income Tax Act. Effective with the 1990 tax year, section 16 authorizes the Secretary of Revenue to issue individual income tax tables, similar to tables issued by the Internal Revenue Service and many other states. This change will simplify tax preparation for North Carolina citizens.

Section 17 makes language changes that were included in a 1989 act but did not take effect due to an error in the coded bill drafting format. Section 18 corrects an incorrect cross-reference added in 1989. Section 19 corrects an ambiguous cross-reference, thus clarifying that the tax rates for single individuals apply to nonresident partners of a North Carolina partnership. Section 20 deletes a stray word that a 1989 law intended to repeal, but due to an error in the coded bill drafting format, did not.

Effective with the 1990 tax year, section 21 corrects the formula for apportioning estate or trust income by providing the appropriate distinction between income that is for the benefit of a resident of this State and income that is for the benefit of a nonresident. Section 22 deletes a reference to a repealed law. Section 23 corrects an erroneous cross-reference to the statutes providing general administration provisions, penalties, and remedies for the Revenue Act.

Sections 24 through 27 amend gift tax, intangibles tax, and gross premiums tax statues to delete cross-references to repealed statutes and substitute appropriate cross-references to preserve the substance of the law. Section 28 clarifies that corporations as well as individuals may elect to apply all or part of their income tax refunds to the following year's tax liability. Section 29 corrects a grammatical error.

Sections 30 through 34 clarify that only the additional fee for vanity plates is credited to the Personalized Registration Plate Fund; the $20.00 registration fee charged for all passenger vehicles continues to go to the Highway Fund. These sections also correct grammar and replace the phrases "deposited in" and "placed in" with the technically correct phrase "credited to."

Recommended by the Revenue Laws Study Committee.

1990 Chapter 848 (Senate Bill 1362, Senator Dennis Winner)

AN ACT TO TREAT INVESTMENTS IN A PARTNERSHIP IN WHICH THE NORTH CAROLINA ENTERPRISE CORPORATION IS THE ONLY GENERAL PARTNER AS AN INVESTMENT IN THE CORPORATION AND TO EXTEND THE TAX CREDIT FOR INVESTMENTS IN AN ENTERPRISE CORPORATION.

Effective for taxable years beginning on or after January 1, 1990, this act makes two changes in the tax credit allowed in G.S. 105-163.011 for investments in a North Carolina Enterprise Corporation. First, it expands the tax credit to include investments in a limited partnership in which a North Carolina Enterprise Corporation is the only general partner. Second, the act adds gross premiums taxes to the list of taxes for which a tax credit is available as a result of an investment in a North Carolina Enterprise Corporation.

Under prior law, an investment in a North Carolina Enterprise Corporation qualified for a tax credit but an investment in a limited partnership in which a North Carolina Enterprise Corporation was a general partner did not. Also under prior law, a tax credit could be applied to corporate and individual income taxes and corporate franchise taxes but not to gross premiums taxes.

The purposes of the first change are to allow a North Carolina Enterprise Corporation to establish a limited partnership without its investors suffering adverse tax consequences and to allow a North Carolina Enterprise Corporation to reduce its potential corporate income and corporate franchise tax liability by transferring its venture capital and stocks to the limited partnership. As a partner in the limited partnership, a North Carolina Enterprise Corporation would pay taxes on its share of the partnership income but would not have to pay corporate income and franchise taxes on distributions of venture capital income and on its assets. The change reduces a Corporation's potential franchise tax liability by $30,000 and its potential income tax liability by an undetermined amount. To date, the only North Carolina Enterprise Corporation has not distributed any investment income to its shareholders and its income has been limited to interest earned on its invested cash.

The purpose of the second change is to encourage insurance companies to invest in a North Carolina Enterprise Corporation. Under G.S. 105-228.5, insurance companies pay taxes based on their gross premiums instead of paying corporate income and franchise taxes. Under prior law, an insurance company had no incentive to invest in a North Carolina Enterprise Corporation because the insurance company could not benefit from a tax credit against income or franchise taxes. Allowing a credit against gross premiums taxes will have no effect on revenue in fiscal year 1990-91 and will have an effect in future years only to the extent that insurance companies invest in a North Carolina Enterprise Corporation.

A North Carolina Enterprise Corporation is a corporation established under Article 3 of Chapter 53A of the General Statutes to provide venture capital for businesses located primarily in rural North Carolina. Since the General Assembly authorized these corporations in 1988, only one North Carolina Enterprise Corporation has been established. The State is the principal investor in that corporation, named The North Carolina Enterprise Corporation.

G.S. 105-163.011 provides individual and corporate tax credits for investments in a North Carolina Enterprise Corporation. Individuals are allowed a credit against income taxes equal to 25% of the amount invested or $100,000, whichever is smaller. Corporations are allowed a credit against income or franchise taxes equal to 25% of the amount invested or $750,000, whichever is smaller. A credit is taken in the taxable year following the year in which an investment is made.

Total tax credits for investments in a North Carolina Enterprise Corporation and several other types of businesses cannot exceed $12,000,000 in any year.

Recommended by the Revenue Laws Study Committee

1990 Chapter 869 (Senate Bill 1496, Senator Russell Walker)

AN ACT TO EXTEND TIME FOR THE RESOLUTION OF CLAIMS TO LAND UNDER NAVIGABLE WATERS.

This act extends by four years the time allowed to resolve claims to land under navigable waters. G.S. 105-151.12 gives a person who donates land to the State that is useful for land conservation purposes a tax credit equal to 25% of the donated property's interest. In the case of marshland for which a claim has been filed, the offer of donation had to be made before December 31, 1990, to qualify for the credit. This act extends the credit to December 31, 1994.

In 1965, the General Assembly established a procedure for the registration and resolution of submerged lands claims. Approximately 3,000 claimants registered about 10,000 claims by the deadline date of January 1, 1970. In 1985, the General Assembly extended the tax credit provided in G.S. 105-151.12 to people who donated marshland to the State for which an interest was claimed. The credit gives citizens some incentive to relinquish their marshland claims and allows the State to regain valuable marshland. The cost to the State of the credit is minimal since the property tax value of marshlands is low. Two donations have been made under this provision to date.

The original legislation set a 21-year deadline for the State to resolve the claims in order to prevent the claims from perfecting by adverse possession. In 1988, the North Carolina Supreme Court ruled that lands under navigable waters cannot be acquired by adverse possession, thus removing the need for the 21-year deadline. Although the Division of Marine Fisheries of the Department of Environment, Health, and Natural Resources has worked diligently to resolve the claims by the 1990 deadline, it finds it cannot because of the complex title issues involved and the length of time it takes to complete each claim.

1990 Chapter 881 (Senate Bill 1354, Senator William Staton)

AN ACT TO REGULATE REFUND ANTICIPATION LOANS.

In 1989, North Carolina became the first state to enact legislation regulating Refund Anticipation Loan (RAL) programs in conjunction with electronically filed tax returns. An RAL program is a program in which a person who has his or her federal income tax return filed electronically by a tax preparer can obtain a loan from a national bank in the amount of the anticipated federal tax refund, less charges for the preparation and filing of the return and for the loan. Refund anticipation loans involving North Carolina income tax refunds are prohibited by G.S. 143-3.3.

This act creates the "Refund Anticipation Loan Act" to become effective October 1, 1990. The act applies to a "facilitator," any person who processes, receives, or accepts an application for a refund anticipation loan or a check in payment of refund anticipation loan proceeds, or who

otherwise facilitates such a loan. "Refund Anticipation Loan" is defined as a loan that the lender (bank) arranges to be repaid directly from the proceeds of the borrower's income tax refund.

Under the new law, facilitators of refund anticipation loans are required to register with the Commissioner of Banks and pay a fee of $250.00. Failure to register is a misdemeanor punishable by imprisonment for up to sixty days, a fine of up to $2,000, or both. Registration must be renewed annually; the fee for renewal is $100.00. A facilitator that is a bank, savings and loan, or credit union is not required to register under this act, because these institutions are already regulated by the Department of Economic and Community Development.

Registrants are required to file a schedule of refund anticipation loan fees with the Commissioner of Banks and post that schedule at each office. If the Commissioner finds the fee schedule to be unconscionable, the Commissioner must notify the registrant.

At the time a person applies for a refund anticipation loan, the registrant must disclose the following information:

1. The fee for the loan;
2. The fee for electronic filing of a tax return;
3. The time within which the proceeds of the loan will be paid if approved;
4. That the debtor is responsible for repayment if the tax refund is not paid;
5. The availability of electronic filing and the average time announced by the appropriate taxing authority in which a taxpayer can expect to receive a refund if the return is filed electronically and the taxpayer does not receive a refund anticipation loan; and
6. Examples of annual percentage rates for average RAL's.

Facilitators of refund anticipation loans are prohibited from engaging in the following activities:

1. Misrepresenting a material factor or condition;
2. Failing to arrange for the loan promptly;
3. Fraud;
4. Charging a fee that is different from the posted fee or is in an amount that the Commissioner has notified the facilitator is unconscionable;
5. Arranging for payment of any portion of the loan for an unrelated service; and
6. Arranging for a lender to take a security interest in property other than the proceeds of the tax refund.

Engaging in a prohibited activity or an unfair or deceptive practice may result in entry of a cease and desist order, revocation of registration, and various civil penalties. Appeals may be taken directly from the Commissioner of Banks to the North Carolina Court of Appeals.

Recommended by the Depository Institutions Study Commission.

1990 Chapter 908 (House Bill 2074, Rep. Dan Lilley)

AN ACT TO INCREASE THE MAXIMUM BOND THAT MAY BE REQUIRED OF FUEL DISTRIBUTORS AND SUPPLIERS.

This act increases the maximum bond that may be required of fuel distributors and suppliers. Distributors of motor fuel are subject to the Gasoline Tax under Article 36 of Chapter 105 of the General Statutes. Distributors must obtain a license from the Department of Revenue and post a bond in the amount required by the Secretary of Revenue, up to a maximum of $40,000. Suppliers of special fuels (primarily diesel fuel) are subject to the Special Fuels Tax under Article 36A of Chapter 105 of the General Statutes. Suppliers must obtain a license from the Department of Revenue and post a bond equal to three times the supplier's average monthly tax liability, up to a maximum of $40,000. Distributors who are also suppliers may obtain a single bond to cover both taxes, up to a maximum bond of $80,000.

Effective January 1, 1991, the new law increases the maximum bond required of a distributor of motor fuel or a supplier of special fuels to two times the taxpayer's average monthly liability, or $2,000, whichever is greater. For a person who is both a distributor and a supplier, the maximum bond is the total of the two bonds or $4,000, whichever is greater.

Recommended by the Revenue Laws Study Committee.
1990 Chapter 936 (House Bill 2335, Rep. George Miller)

AN ACT TO IMPLEMENT THE JOINT REPORT TO PROVIDE MANAGEMENT INCENTIVES AND FLEXIBILITY FOR THE CONSTITUENT INSTITUTIONS OF THE UNIVERSITY OF NORTH CAROLINA AND TO REQUIRE THE CREATION AND ENHANCEMENT OF A PROGRAM OF PUBLIC SERVICE AND TECHNICAL ASSISTANCE TO THE PUBLIC SCHOOLS.

This act primarily makes changes in the procedures used by the 16 State universities to account for funds appropriated to them. In addition, it raises the competitive bidding threshold and the State purchasing threshold for all agencies from $5,000 to $10,000 and allows the 16 universities to obtain a semiannual sales tax refund for State and local sales and use taxes paid by them on personal property purchased with contract and grant funds, as opposed to funds appropriated to them by the State. The sales tax refund becomes effective January 1, 1992, and applies to sales and use taxes paid on or after that date.

Under prior law, all purchases made by the universities were subject to sales and use taxes and no refund was available. Until recently, the universities and all other State-supported agencies were not allowed an exemption from or a refund for sales and use taxes on the theory that a sales tax exemption or refund creates an administrative problem and does not result in a net revenue gain to the agency. If an agency does not have to pay sales and use taxes, the General Assembly does not need to appropriate money to the agency to cover the taxes and can therefore reduce the appropriation it would otherwise make to the agency. In 1986, the General Assembly departed from this theory and exempted purchases made by the Department of Transportation from sales and use taxes.

Allowing the universities to obtain a refund of sales and use taxes beginning January 1, 1992, will reduce State General Fund revenue and local revenue beginning with the 1992-93 fiscal year by an undetermined amount. Because of the delayed effective date, the refund will obviously have no effect on revenues for the 1990-91 fiscal year. The refund will also have no effect on

revenues for the 1991-92 fiscal year because the first semiannual refund period for which a university can claim a refund ends June 30, 1992.

1990 Chapter 945 (Senate Bill 1586, Senator Kenneth Royall)

AN ACT TO ACCELERATE THE PAYMENT OF SALES TAXES AND GROSS RECEIPTS TAXES BY UTILITIES AND TO ACCELERATE THE PAYMENT OF WITHHELD INDIVIDUAL INCOME TAXES BY EMPLOYERS.

This act accelerates the dates on which the following taxes must be paid: sales taxes on utility services, certain franchise taxes on utilities, and income taxes withheld from wages by employers.

Sales taxes on utility services were formerly payable on a quarterly basis by the 30th day after the end of the quarter. Effective October 1, 1990, sections 1 and 2 of this act provide that all utilities, other than telephone companies that make quarterly returns of franchise taxes, must make monthly returns of sales taxes on utility services. A monthly return is due on the last day of the following month, except that the return for May is due June 25. A utility filing on a monthly basis may make estimated returns for the first two months of the quarter and will not be penalized if the amount paid for these months is at least 95% of the amount due.

Franchise taxes on utility companies were formerly payable on a quarterly basis by the 30th day after the end of the quarter. Effective October 1, 1990, sections 3 and 4 of this act require telephone companies that have an average tax liability of $3,000 or more, electric power companies, and natural gas companies to make monthly payments of franchise taxes; reports must be filed each quarter. A monthly payment is due on the last day of the following month, except that the payment for May is due June 25. A utility filing on a monthly basis will not be penalized if the amount paid is at least 95% of the amount due and the balance is paid with the next quarterly report.

The remainder of this act changes the rules governing withholding of income taxes from employees' wages by employers, effective January 1, 1991. Section 5 simplifies definitions relating to withholding and adopts certain federal definitions. Section 6 provides that a member of the clergy will be considered self-employed, and thus not subject to withholding, unless he or she elects to be treated as an employee for purposes of withholding. This change conforms the State law to the federal law.

Sections 7 and 8 provide that the amount withheld shall be the employee's anticipated State income tax liability, estimated based on the exemptions, deductions, and credits to which the employee is entitled. Section 9 makes clarifying changes.

Formerly, transient and seasonal employers and employers withholding an average of $500.00 or more from wages per month were required to make returns and pay withheld taxes on a monthly basis; all other employers paid quarterly. Section 10 now provides that employers who withhold an average of $2,000 or more per month shall pay the withheld taxes on the date set under the Code for depositing or paying federal income taxes withheld from the same wages. Under current federal regulations, that date is usually three banking days after the end of an "eighth-monthly period" if, at that time, the employer has $3,000 or more in undeposited federal

taxes. An "eighth-monthly period" is one of eight periods into which each month is divided under the Internal Revenue Code. Federal law also requires an employer to make a deposit one banking day after accumulating $100,000 or more in withheld taxes; Section 10 provides that this requirement does not apply to deposits of North Carolina taxes. Section 10 also provides that an extension of time for filing a return or paying withheld federal taxes is an automatic extension with respect to withheld State taxes. The Secretary is required to notify each employer of the payment schedule it must follow.

Section 11 provides that an annual information report of State income taxes withheld from wages is due on the same date as the federal information return of federal income taxes withheld from wages. Section 12 clarifies the liability of employers and others for amounts required to be withheld from taxes and clarifies the penalty of 25% for an employer's failure to withhold or pay taxes. Section 13 makes clarifying changes. Section 14 provides that the general enforcement and administration provisions of the Revenue Act apply to withholding taxes. Section 15 provides that the Secretary of Revenue may contract with a financial institution for the receipt of withheld income tax payments from employers.

Finally, this act provides that the nonrecurring revenue it generates shall be used to fund only nonrecurring expenses. It is estimated that the changes in withholding payments will generate $110.5 million in nonrecurring revenue in the 1990-91 fiscal year. The changes in payments by utilities make permanent the changes made by Chapter 813 of the 1989 Session Laws; those changes generated nonrecurring revenue of $58.3 million for the 1989-90 fiscal year. The State will realize some recurring revenue from the interest that will be earned on the taxes paid earlier pursuant to this act. This recurring revenue is estimated at $5.3 million for the 1990-91 fiscal year and $8.9 million for the 1991-92 fiscal year.

1990 Chapter 946 (Senate Bill 1587, Senator Bill Barker)

AN ACT TO IMPROVE THE PROCEDURE FOR COLLECTING DEBTS OWED THE STATE BY SETTING OFF THE DEBTS AGAINST TAX REFUNDS.

This act amends the Setoff Debt Collection Act to allow claimant agencies to file an on-going claim for setting off against an individual's State tax refund the amount of any debt owed by the individual to the State. Currently, a claim must be filed each year. Under this act, the claimant agency files a claim with the Department of Revenue stating the date, if any, that the debt is expected to expire. The claim is effective to initiate setoff against refunds of $50 or more that would be made in calendar years following the year in which the claim was first filed until the date the debt expires.

The act is effective July 1, 1990, and applies to taxable years beginning on or after January 1, 1991. In order to pay for the computer programming, data entry, and related expenses needed to implement the provisions of this act, the Department of Revenue is authorized to draw up to $81,500 from individual income tax net collections for the 1990-91 fiscal year.

1990 Chapter 960 (Senate Bill 1617, Senator A. D. Guy)

AN ACT TO PROVIDE THAT THE GOVERNING BODY OF A TAXING UNIT MAY DELAY THE ACCRUAL OF INTEREST ON CERTAIN UNPAID PROPERTY TAXES.

G.S. 105-321(c) requires a taxing unit to deliver its property tax receipts to the tax collector by September 1 each year. This act provides that if the property tax receipts of a taxing unit for the 1989-90 tax year were not delivered to the tax collector before January 1, 1990, the governing body of the taxing unit may adopt a resolution providing that interest will not accrue on those taxes unless they remain unpaid after July 1, 1990. The taxing unit may also refund interest that accrued on these taxes between January 7, 1990, and July 1, 1990. This act is effective upon ratification; although it applies to all taxing units, only Onslow County will likely adopt a resolution authorized by this act. Property tax receipts for a newly annexed area of the Town of Richlands were not delivered to the Onslow County tax collector until after December 31, 1989.

1990 Chapter 970 (Senate Bill 1365, Senator Dennis Winner)

INHERITANCE AN ACT TO REPEAL THE INHERITANCE TAX EXEMPTION FOR FEDERAL RETIREMENT BENEFITS, THEREBY MAKING THE TAX TREATMENT FOR FEDERAL RETIREMENT BENEFITS THE SAME AS FOR STATE RETIREMENT BENEFITS, AND TO AUTHORIZE THE LEGISLATIVE RESEARCH COMMISSION TO STUDY THE TAX EXEMPTIONS.

In 1989, the General Assembly repealed the inheritance tax exemption for benefits received by a survivor under a State employee retirement program, but inadvertently retained the inheritance tax exemption for benefits received by a survivor under a federal employee retirement program. As a result, beneficiaries of a federal employee retirement program received more favorable treatment than beneficiaries of a State employee retirement program. This act equalizes the inheritance tax treatment of federal and State employee death benefits by repealing the inheritance tax exemption for benefits received by a survivor under a federal employee retirement program, effective September 1, 1990.

This act also authorizes the Legislative Research Commission to study existing inheritance tax exemptions to determine if any changes need to be made in light of amendments to the inheritance tax law enacted since 1985. As part of the Tax Reduction Act of 1985, the General Assembly reduced inheritance taxes. It enacted a total exemption for property passing to a surviving spouse and increased the Class A tax credit, which applies to lineal descendants and ancestors, to an amount that exempts at least $500,000 of property from inheritance tax. The inheritance tax exemptions were not reviewed when these tax reductions were enacted, however.

This act is expected to increase General Fund revenue by an insignificant amount because most death benefits are received by a surviving spouse or a class A beneficiary and would not be taxable due to the existing exemption for surviving spouses and credit for Class A beneficiaries.

This act is based on a recommendation of the Revenue Laws Study Commission that would have expanded the exemption for federal benefits to include State and local benefits but would have limited the exemption to Class A beneficiaries only.

1990 Chapter 981 (House Bill 2067, Rep. Dan Lilley)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED TO DETERMINE CERTAIN TAXABLE INCOME AND TAX EXEMPTIONS.

This act rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1989, to January 1, 1990. Updating the reference makes recent amendments to the Internal Revenue Code applicable to the State to the extent State tax law previously tracked federal law. This update has the greatest effect on State corporate and individual income taxes because these taxes are a percentage of federal taxable income and are therefore closely tied to federal law. The act is effective upon ratification.

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code as it existed on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of bills like this. The answer to this question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law recently and the likelihood of continued changes, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue losses. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, 2(1) of the Constitution provides in pertinent part that the "power of taxation...shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would...be invalidated as an unconstitutional delegation of legislative power."

Recommended by the Revenue Laws Study Committee.

1990 Chapter 984 (House Bill 2138, Rep. Bill Hurley)

AN ACT TO PROVIDE TRANSITIONAL ADJUSTMENTS RELATING TO SUBCHAPTER S CORPORATIONS, TO CORRECT AN ERROR THAT INADVERTENTLY DISALLOWED DEDUCTIONS FOR SOME MORTGAGE INTEREST PAYMENTS, TO PROVIDE ADDITIONAL TAX RELIEF FOR TAXPAYERS WITH DEPENDENTS WHO ARE PERMANENTLY AND TOTALLY DISABLED, TO ALLOW A TAX CREDIT FOR STATE INCOME TAXES PAID ON GOVERNMENT

RETIREMENT BENEFITS RECEIVED IN 1988, TO PROVIDE THAT AN EXTENSION OF TIME FOR FILING AN INCOME OR FRANCHISE TAX RETURN IS NOT AN EXTENSION OF TIME FOR PAYING THE TAX, AND TO REDUCE THE THRESHOLD FOR PAYMENTS OF ESTIMATED CORPORATE INCOME TAX.

This act addresses many different tax issues. It addresses some of the unintended tax consequences of the Tax Fairness Act of 1989, it grants a tax credit for State income taxes paid on government retirement benefits received in 1988, it provides that a request for an extension of time to file an income or franchise tax return must be accompanied by a check in the amount of the taxes estimated to be owed, and it reduces the threshold for when a corporation must pay estimated corporate income tax.

The 1989 General Assembly enacted a sweeping reform of the State's personal income tax system by tying the State tax calculation to federal taxable income. The legislation, known as the Tax Fairness Act of 1989, became effective for taxable years beginning on or after January 1, 1989. Despite the scrutiny the legislation received by the General Assembly, and because of the 1989 effective date, there were some tax consequences of the rewrite that were not discovered until after its enactment. The Revenue Laws Study Committee reviewed these consequences and recommended the changes relating to the Tax Fairness Act contained in this act.

Subchapter S Corporations

Since 1958, federal income tax law has allowed certain corporations having fewer than 35 shareholders to elect to be taxed as "Subchapter S Corporations." Under the S Corporation option, items of income and loss are not taxable to the corporation but are passed through to the shareholders in the same way items of income and loss of a partnership are taxed to the individual partners. As part of the Tax Fairness Act of 1989, the State allowed S Corporation tax treatment for federal S Corporations. However, the legislation did not provide for the carryover of pre-1989 losses.

Regular corporations are allowed to carry forward net economic losses for up to five years. The legislation enacted in 1989 did not allow losses at the corporate level prior to the conversion to S Corporation status to be used to offset income under the new system and the 1989 effective date did not give the taxpayers the planning period necessary to adjust to the new system. This resulted in unanticipated tax increases for numerous small businesses in North Carolina, including many farmers.

This act provides as a transitional adjustment an extension of time for loss carryforwards. Pre-1989 net economic losses may be carried forward by an S corporation and used to offset the corporation's income in taxable years beginning on or after January 1, 1989, and before July 1, 1991. The corporation may deduct the loss to one-half of the extent it could have deducted the loss if the S Corporation Income Tax Act had not become effective until July 1, 1991. The loss carryforward may not exceed one-half of the corporation's net income. This offset will be passed through to the shareholders of the corporation. The act makes this section retroactive to the 1989 tax year, allowing affected taxpayers to file amended returns for that year. It will expire for taxable years beginning on or after July 1, 1991.

For an S Corporation that does not use the calendar year as its tax year, certain earnings for the corporation's 1988 tax year were taxed at the corporate level under the old law, because the corporation's tax year started before 1989, and also at the individual level under the new law,

because the earnings, distributed as dividends, were included in the shareholder's 1989 taxable income. Prior to the enactment of the Tax Fairness Act of 1989, the "double taxation" may have been avoided through the deduction for N.C. dividends. However, under the new law, dividends receive only a limited tax credit, subject to a $300 maximum. This act provides relief to taxpayers in this situation by allowing a full tax credit, without any maximum, for distributions from pre-1989 earnings made before October 1, 1989, or made by a fiscal year corporation during its 1988 tax year. The act makes the applicable sections retroactive to the 1989 tax year, allowing affected taxpayers to file amended returns for that year.

Mortgage Certificate Credit

Section 25 of the Internal Revenue Code provides that first-time home buyers who do not exceed certain income and sales price levels may obtain a Mortgage Credit Certificate (MCC) that enables the homeowner to take a federal tax credit of up to 25% of the annual mortgage interest payments. The portion of the interest that is taken as a credit may not also be taken as a deduction in calculating federal taxable income. Under the Tax Fairness Act, North Carolina uses federal taxable income as the starting point in calculating North Carolina taxable income; however, it does not allow a tax credit for MCC holders. As a result, an MCC holder whose mortgage interest deduction under the Code was reduced by the amount of the federal credit could not deduct the full amount of the mortgage interest for North Carolina tax purposes. To correct this oversight, this act allows a taxpayer to deduct from taxable income the amount of the mortgage interest that was not deducted under the Code due to the taxpayer's use of the mortgage interest credit. This deduction ensures that 100% of the mortgage interest costs are deductible for State tax purposes. The applicable section is retroactive to the 1989 tax year, allowing affected taxpayers to file amended returns for that year.

Credit for the Disabled

Until the 1989 tax year, North Carolina provided an additional personal exemption for taxpayers and some dependents with certain physical conditions, regardless of whether the condition led to the person being disabled. These exemptions, which covered 13 different diseases and physical conditions, were repealed by the Tax Fairness Act of 1989. This act provides a tax benefit for persons who were formerly allowed a deduction by granting an additional tax credit for taxpayers with disabled dependents or spouses. The amount of the credit decreases as the taxpayer's income increases and phases out completely when the taxpayer's income reaches a certain point. The base amount of the credit, along with the phase-out thresholds, are listed below:

		Adjusted Gross Income	
	Maximum Credit	Beginning of Phase-Down	End of Phase-Down
Head of Household	$64.00	$16,000	$32,000
Married, filing jointly	80.00	20,000	40,000
Single	48.00	12,000	26,000
Married, filing separate	40.00	10,000	20,000

Credit for Taxes Paid on Federal Retirement in 1988

In 1989, the United States Supreme Court ruled in Davis v. Michigan, 109 S.Ct. 1500 (1989), that the doctrine of intergovernmental tax immunity prohibits a state from taxing federal retirement income at a higher rate than it taxes state retirement income. Prior to 1989, North Carolina allowed a $3,000 income tax exclusion for federal and military retirees; it allowed a full income tax exclusion for State retirement income. Legislation enacted in 1989 to comply with Davis provides that all government retirees receive a $4,000 State income tax deduction. The Davis case was decided on March 28, 1989. The effect of the decision was to allow federal and military retirees a full income tax exclusion for their 1988 government retirement income. However, taxpayers who had already filed their 1988 tax returns could obtain a refund only by demanding it within 30 days after the taxes were paid to the Department of Revenue.

Many taxpayers were unable to obtain refunds of the 1988 State income taxes paid on their federal government retirement income because they did not demand a refund within 30 days after paying their taxes to the Department, which many had filed early. For taxpayers who filed before February 26, 1989, the 30-day period for demanding a refund had already expired on March 28 when the Davis case was decided. The result was that the taxpayers who had filed their returns promptly were penalized while those who filed later received refunds. This act addresses this inequity by allowing taxpayers who received government retirement benefits during the 1988 tax year to claim a credit equal to the amount by which the tax paid by the taxpayer for the 1988 tax year would have been reduced if none of the taxpayer's government retirement benefits had been included in the taxpayer's taxable income. The credit may be claimed in equal installments over the taxpayer's first three taxable years beginning on or after January 1, 1990.

Tax Return Filing Extensions

For federal income tax purposes, the automatic four-month extension of time for filing a return is conditioned upon payment of a reasonable estimate of the tax due when the application for an extension is filed. Federal regulations provide that the penalty for late payment is not imposed if the tax paid with the extension request is at least 90 percent of the total amount of tax due and the remaining balance is paid with the income tax return on or before the expiration of the extension. This act provides a similar rule for State income tax purposes. For taxable years ending on or after July 19, 1990, an application for an extension of time to file an income or franchise tax return must be accompanied by the full amount of the tax anticipated to be due. The Secretary of Revenue may forgive the penalty for underpayment of the tax for good cause; it is anticipated that the Secretary will adopt a rule like the federal regulation which forgives the penalty if 90% of the tax is paid with the application for an extension.

Corporate Estimated Taxes

Effective August 1, 1990, corporations with an expected annual tax liability of $500.00 or more must make quarterly payment of estimated income tax. Under prior law, only corporations with an estimated annual tax liability of $5,000 had to make the quarterly payment of estimated income tax.

Tax Enforcement

Finally, the act notes that the budget reductions for the Department of Revenue will impair the Department's efforts to modernize the State's tax enforcement program and will have a direct negative impact on the 1990-91 revenue collections. To maintain the integrity of the State's modernized tax enforcement program, the act states an intent that the money generated by this act be used by the Department to continue its tax enforcement programs.

1990 Chapter 989 (House Bill 2073, Rep. Dan Lilley)

AN ACT TO ALLOW A SALES TAX EXEMPTION FOR FUEL USED BY A SMALL POWER PRODUCER TO GENERATE ELECTRICITY.

Effective July 1, 1991, this act creates a sales tax exemption for fuel used by a small power producer to generate electricity. Without the exemption, the fuel would be subject to State sales tax at the rate of 1% under G.S. 105-164.4(a)(1c)d.

The United States Code, in 16 U.S.C. 796(17)(A), defines a "small power production facility" as a facility that produces energy by using primarily biomass waste, renewable resources, geothermal resources, or any combination of these and has a power production capacity of not more than 80 megawatts. The purpose of the federal law is to encourage the production of energy from alternative energy sources.

Coal used to generate electricity is exempt from sales tax under G.S. 105-164.13(3) if it is sold by the producer. Piped natural gas used to generate electricity is subject to State sales tax under G.S. 105-164.4(a)(4a) at the rate of 3% and is not subject to local sales tax. Other fuel used to generate electricity is subject to State sales tax under G.S. 105-164.4(a)(1c)d. at the rate of 1% and is not subject to local sales tax.

This act is expected to result in a revenue loss to the General Fund of $60,000 for the 1991-92 fiscal year. No local revenue loss will occur because under existing law fuel used by a small power producer to generate electricity is not subject to local sales tax.

Recommended by the Revenue Laws Study Committee.

1990 Chapter 1001 (House Bill 2402, Rep. Alex Hall)

AN ACT TO EXPAND THE EGG PROMOTION TAX TO INCLUDE PROCESSED EGGS.

This act levies a tax on processed eggs sold for use in this State. Processed eggs include frozen eggs, liquid eggs, and hard-cooked eggs. There is currently an excise tax on shell eggs in the amount of 5¢ for each case of 30 dozen eggs. Effective October 1, 1990, the excise tax on processed eggs will be 11¢ for each 100 pounds of processed eggs. A person who sells less than 1,000 pounds of processed eggs per year is exempt from this tax.

The Department of Agriculture collects the tax and the money is deposited in the "North Carolina Egg Fund." The money in the Fund is appropriated to the North Carolina Egg Association for research, education, publicity, advertising, and other promotional activities for the benefit of producers of eggs sold in the State.

1990 Chapter 1002 (Senate Bill 1084, Senator Marshall Rauch)

AN ACT TO CONFORM THE LAWS OF NORTH CAROLINA TO THE REQUIREMENTS OF CERTAIN FEDERAL LAWS AND CONSTITUTIONAL PRINCIPLES.

This act makes two changes in North Carolina's tax laws to resolve conflicts with federal laws and federal constitutional principles. Section 1 of the act repeals the separate franchise tax on railroads levied in G.S. 105-115. Section 2 of the act repeals the $1,500 individual income tax exemption allowed under G.S. 105-134.6(b)(4) for compensation received for service in the North Carolina National Guard. Both changes are effective for taxable years beginning on or after January 1, 1990.

Railroad Tax

In 1976, Congress passed the Railroad Revitalization and Regulatory Reform Act. Among other things, the act declares that a State imposes an unreasonable burden on interstate commerce when it imposes a tax that discriminates against a rail carrier (49 U.S.C. 11503(b)(4)). G.S. 105-115 imposes a franchise tax on railroads based on the appraised value of the railroad's property. G.S. 105-122 imposes a franchise tax on corporations based on the highest of the corporation's appraised property value, its net worth, or its net book value of property. The tax rate under G.S. 105-115 is .0075. The tax rate under G.S. 105-122 is .0015.

G.S. 105-115 therefore discriminates against a rail carrier with respect to franchise taxes. It imposes tax at a rate that is five times the rate that applies to most corporations.

To avoid a lawsuit over the constitutionality of G.S. 105-115, the General Assembly decided to repeal it and let the general franchise tax apply to railroads. The repeal of the special tax produces a revenue loss to the General Fund of $1.6 million for fiscal year 1990-91 and $1.7 million for fiscal year 1991-92.

National Guard Exemption

In 1989, the United States Supreme Court held in Davis v. Michigan that a state violates the principle of intergovernmental tax immunity when it gives more favorable tax treatment to itself or those with whom it deals than to the federal government or those with whom the federal government deals unless there are significant differences between the two groups that justify the different treatment. Based on this principle, the court in the Davis case held that it is unconstitutional for a state to exempt retirement income of State employees while taxing retirement income of federal employees. The court saw no significant differences between state employees and federal employees that would justify the different tax treatment.

Before 1989, North Carolina exempted all retirement income of retired State employees and exempted only $3,000 of retirement income of retired federal civil service and military employees. As a result of the Davis decision, the General Assembly changed the law to limit the exemption for State retirement income to $4,000 and to raise the exemption for federal retirement income to $4,000 so that the exemptions would be equal and would comply with federal law.

When the General Assembly changed the law on individual income tax exemptions for retirement income, however, it left a $1,500 exemption for National Guard pay in the law. The National Guard is the State militia and is paid from a combination of State and federal funds. The exemption for National Guard pay has been in the law at the amount of $1,500 since 1979.

The decision not to repeal the National Guard exemption in 1989 led to additional problems concerning the issues raised by the Davis case. In the pending case of Swanson v. Powers, in which the federal retirees seek to obtain refunds of taxes paid on federal retirement pay for the years preceding the 1989 tax year, the federal retirees have argued that the State's failure to repeal the National Guard exemption is evidence that the State does not comply with federal law and should therefore be required to make the refunds requested by the retirees.

In addition, federal armed forces reservists and federal active duty military personnel have amended the complaint in the Swanson lawsuit and claim that the $1,500 exemption for National Guard pay violates the principle established in the Davis case. The reservists and active duty personnel claim that they are entitled to a $1,500 exemption for their federal reserve or active duty pay because the State cannot constitutionally treat its militia better than it treats the federal militia.

Losing the Swanson case would have serious adverse revenue effects on the State's General Fund. If the federal retirees prevail and the State has to refund taxes paid on federal retirement pay, the General Fund will suffer a one-time loss of approximately $80 million. If the federal reservists and active duty military personnel prevail in their claim, the State would have to grant them the same $1,500 exemption and would suffer a revenue loss of $8 million for each year a refund must be made. Because the State has had reason to know the $1,500 exemption is unconstitutional since the Davis decision, the State would almost certainly be held liable for some back refunds and possibly three years' refunds or $24 million. In addition, the State could be required to pay the retirees', reservists', and active-duty military personnel's legal costs of the suit if the State loses.

To avoid the potential revenue losses created by the $1,500 National Guard exemption, the General Assembly decided to repeal it. The repeal indicates the State's good faith compliance with federal law, eliminates a possible recurring revenue loss of $8 million, and produces a revenue gain to the General Fund of $1.9 million for fiscal year 1990-91 and $2 million for fiscal year 1991-92.

1990 Chapter 1005 (Senate Bill 1363, Senator Dennis Winner)

AN ACT TO MODIFY THE TIME ALLOWED FOR FILING CERTAIN PROPERTY TAX APPEALS, TO MAKE THE PENALTY FOR SUBMITTING A BAD CHECK IN PAYMENT OF PROPERTY TAXES THE SAME AS FOR SUBMITTING A BAD CHECK IN PAYMENT OF OTHER TAXES, AND TO MAKE TECHNICAL CORRECTIONS TO THE PROPERTY TAX STATUTES.

This act makes several conforming and technical changes to the property tax statutes, effective upon ratification. Section 1 makes the time for filing a notice of appeal from a decision of a board of county commissioners the same as the time period for filing a notice of appeal from a decision of a board of equalization and review: 30 days after the date a notice of the decision is mailed to the property owner. Previously, the time for filing a notice of appeal from a decision of a board of county commissioners was 30 days after the decision was entered. Section 2 of the act changes the time when a notice of appeal submitted by mail to the Property Tax Commission is considered to have been filed from the date the notice is actually received to the date the notice is postmarked.

Sections 4 through 7 of the act delete obsolete references to the effective property tax rate. Since 1974, local governments have been required to assess property for taxation at the property's market value. Before then, property could be assessed at a percentage of its market value. These sections delete references to the pre-1974 assessment ratios produced when property was taxed at a percentage of market value.

Sections 8 and 9 make the penalty for submitting a bad check in payment of property taxes the same as for submitting a bad check in payment of other taxes by establishing a $1,000 maximum for all bad checks given in payment of taxes and giving a tax collector the same authority as the Secretary of Revenue to waive the penalty if a taxpayer wrote a bad check on the wrong account through inadvertence. The previous penalty for submitting a bad check in payment of taxes other than property taxes was 10% of the check, subject to a maximum of $200.00, and the penalty could be waived if the Secretary of Revenue found that the taxpayer wrote a bad check on the wrong account through inadvertence. The penalty for submitting a bad check for property taxes was 10% of the check with no maximum and no waiver was allowed under any circumstances.

Sections 1 through 7 of this act have no fiscal effect. Section 8, which increases the maximum penalty for bad checks given in payment of taxes other than property taxes, will increase General Fund revenue by approximately $50,000 annually. Last year, the Department collected $496,137 in bad check penalties. Section 9, which sets a $1,000 maximum bad check penalty for property taxes, will reduce local revenue in a few instances because there is now no cap on the penalty.

Sections 1 through 7 of this act were recommended by the Revenue Laws Study Committee.

1990 Chapter 1027 (Senate Bill 1380, Senator Wendell Murphy)

AN ACT TO PROVIDE FOR A STRAWBERRY ASSESSMENT.

This act creates the "Strawberry Assessment Act." The Act provides a means whereby strawberry producers may voluntarily assess themselves in order to provide funds for strawberry research and marketing. All expenditures of the funds collected must be approved by a funding committee composed of seven members of the North Carolina Strawberry Association, Inc., appointed by the Commissioner of Agriculture.

The Strawberry Association will conduct referenda on the question of whether an assessment should be levied. All persons engaged in the commercial production of strawberries are eligible to vote in the referenda. The amount of the proposed assessment and the method of collection must be set forth on the ballot.

An assessment cannot be collected unless at least two-thirds of the votes cast in a referendum are in favor of the assessment. The amount of the proposed assessment cannot exceed 5% of the value of the previous year's strawberry plant sales and the period for which each assessment can be levied cannot exceed three years. The Strawberry Association determines the amount of the proposed assessment and the period for which the assessment is levied.

If a referendum receives a two-thirds favorable vote, the Department of Agriculture will notify all strawberry plant growers of the assessment. The assessment would be added by plant growers to the price of all strawberry plants sold for planting in North Carolina. The assessment must be remitted to the Department no later than the 10th day following the end of each calendar quarter; the Department will then forward the money collected to the Strawberry Association.

1990 Chapter 1039 (House Bill 2375, Rep. Larry Justus)

AN ACT TO ENACT THE 1990 OMNIBUS DRUG ACT.

This act makes various changes to criminal offenses involving controlled substances, extends the sunset on investigative grand juries from October 1, 1991, to October 1, 1993, requires registers of deeds to distribute information on the harmful effects on a fetus of substance abuse by the mother, and changes the distribution of the excise tax on controlled substances. Effective retroactively to January 1, 1990, the effective date of the excise tax on controlled substances, the act requires 75% of all excise taxes collected by assessment to be remitted to the State or local law enforcement agency that conducted the investigation that led to the assessment of the tax. If more than one agency conducted the investigation, the Secretary of Revenue must equitably divide the 75% among the investigating agencies.

Under prior law, the proceeds of the excise tax on controlled substances were deposited in a special account designated the State Controlled Substances Tax Fund. As of July 31, 1990, a total of $137,194.29 had been deposited in the Fund while more than $49 million in controlled substance excise taxes had been assessed but not collected. The Department plans to make the first distribution to law-enforcement agencies in the fall of 1990.

1990 Chapter 1047 (House Bill 2394, Rep. Johnathan Rhyne)

AN ACT TO PROVIDE FOR THE FILING OF NOTICES OF LIENS, CERTIFICATES, AND OTHER NOTICES AFFECTING VARIOUS FEDERAL LIENS IN THE SAME MANNER AS NOTICES OF FEDERAL TAX LIENS.

This act replaces the Uniform Federal Tax Lien Registration Act, codified as Article 11 of Chapter 44 of the General Statutes, with the Uniform Federal Lien Registration Act. The act extends the filing requirements that previously applied to federal tax liens to all federal liens, such as a federal lien against real property for costs paid from the federal Hazardous Substance Superfund to remove hazardous substances from the property. The act does not change the filing requirements concerning federal tax liens or the fees charged for filing the liens. The act is effective August 1, 1990.

1990 Chapter 1050 (House Bill 603, Rep. Alex Hall)

AN ACT TO ALLOW CERTAIN INTERSTATE MOTOR CARRIERS TO FILE ANNUAL FUEL USE TAX REPORTS AND TO ALLOW CERTAIN

USERS OF DIESEL FUEL TO FILE ANNUAL RATHER THAN QUARTERLY REPORTS.

Effective January 1, 1991, this act allows a motor carrier whose annual fuel use tax liability is no more than $200.00 to file a tax report annually rather than quarterly. The act also authorizes annual, rather than quarterly, special fuel tax reports for users of special fuel (primarily diesel fuel) that use the fuel only in a motor vehicle operated in this State or that file fuel use tax reports annually.

1990 Chapter 1060 (House Bill 2117, Rep. Ray Fletcher)

AN ACT TO PROVIDE THAT FOOD SOLD BY RELIGIOUS ORGANIZATIONS IS EXEMPT FROM TAX.

This act provides a sales tax exemption for food sold by a church or other religious organization not operated for profit when the proceeds of the sales are actually used for religious activities. The exemption applies to sales made on or after August 1, 1990. Under prior law, religious organizations were required to collect the sales tax for all food sales except sales of "Meals on Wheels" to shut-ins.

Religious organizations are allowed a refund of sales taxes paid by them on certain purchases. The State has also given religious organizations other tax advantages. Examples of the existing tax advantages include a federal and State income tax exemption for nonprofit corporations organized for religious purposes, State inheritance and gift tax exemptions for property passing to religious organizations, intangibles tax exemption for nonprofit religious organizations, property tax exemptions for property owned by religious organizations and used for religious or educational purposes, and privilege license tax exemptions for certain exhibitions and performances benefiting religious purposes, for professional religious spiritual healers, and for peddlers and itinerant merchants who are religious organizations.

1990 Chapter 1068 (House Bill 2207, Rep. Lawrence Diggs)

AN ACT TO REMOVE THE OBSOLETE SALES TAX EXEMPTION FOR ICE.

This act repeals the sales tax exemption for the retail sale of ice, thus making sales of ice subject to State sales tax at the rate of 3% and local sales tax at the rate of 2%. However, ice used to preserve agriculture, aquaculture, and commercial fishery products until the products are sold at retail retains its exempt status. This exemption overlaps with the sales tax exemption for supplies sold to commercial fishermen; that exemption, granted by G.S. 105-164.13(9), applies to ice.

Effective September 1, 1990, the repeal of the sales tax exemption for ice is expected to generate $280,000 in additional State tax revenue for the 1990-91 fiscal year, which will have only 10 collection months, and $390,000 in additional State tax revenue in the 1991-92 fiscal year. It is also expected to generate $185,000 in additional local sales tax revenue for the 1990-91 fiscal year, and $260,000 in additional local sales tax revenue in the 1991-92 fiscal year.

The sales tax exemption for ice was enacted in 1937 as an extension of an exemption then in the law for certain food items. The reason for the exemption was that ice was used primarily in ice-boxes to preserve food. Today, food is no longer exempt from sales tax and refrigerators, rather than ice-boxes, are used to preserve food.

1990 Chapter 1069 (House Bill 2257, Rep. H. M. Michaux)

AN ACT TO INCREASE VARIOUS FEES AND CREATE NEW FEES CHARGED BY THE DEPARTMENT OF INSURANCE; TO AMEND THE RETALIATORY PREMIUM TAX LAW; TO CREATE, MAINTAIN, AND APPROPRIATE MONEY TO THE DEPARTMENT OF INSURANCE CONSUMER PROTECTION FUND; AND TO IMPROVE THE FINANCIAL STABILITY OF THE STATE PROPERTY FIRE INSURANCE FUND.

This act makes several changes to the insurance laws. It increases various fees paid by insurers and imposes new fees on insurers, it establishes a $1 million Department of Insurance Consumer Protection Fund, it changes the source of funding for payments to local governments for fire protection provided to State-owned buildings and their contents, and it clarifies the retaliatory insurance tax imposed under G.S. 105-228.8. The clarification of the retaliatory tax is effective retroactively to January 1, 1987, the effective date of the retaliatory tax, and resolves a lawsuit brought against the Department of Insurance by insurance companies over the meaning of the retaliatory tax.

The retaliatory tax issue is intertwined with the differing tax rates on insurance coverage. G.S. 105-228.5 imposes taxes on insurance companies based on the companies' gross premiums. The general rate is 1.75% of gross premiums. Insurers that provide fire and lightning coverage pay an additional tax at the rate of 1.33% of gross premiums for fire and lightning coverage provided on property other than vehicles and boats. Thus, on certain fire and lightning coverage, insurers pay the general rate of 1.75% plus the additional rate of 1.33% for a total combined rate of 3.08%. Twenty-five percent of the additional 1.33% tax, or .33%, must be deposited in the Rural Volunteer Fire Department Fund. That Fund provides matching grants to rural volunteer fire departments for equipment and capital improvements. The remaining 1% of the additional tax and all the general 1.75% tax is deposited in the General Fund.

G.S. 105-228.8 imposes a retaliatory tax on insurers that are chartered in a state other than North Carolina. The purpose of the retaliatory tax is to equalize other states' treatment of insurers chartered in North Carolina and doing business in those states with North Carolina's treatment of insurers chartered in another state and doing business in North Carolina. For example, if North Carolina taxes insurers at 1.75% and Virginia taxes insurers at 3%, G.S. 105-228.8 imposes an additional 1.25% retaliatory tax on Virginia insurers doing business in North Carolina because Virginia taxes a North Carolina insurer that does business in Virginia at 3%.

In calculating whether an insurer owes retaliatory tax, G.S. 105-228.8(e) provides that "special purpose obligations or assessments based on premiums" and "special purpose dedicated taxes based on premiums" cannot be considered. Thus, in the previous example, if North Carolina imposed a special purpose tax of 1.25% in addition to the general 1.75% tax, the retaliatory tax on

a Virginia insurer would still be 1.25% because the Virginia insurer could not count the 1.25% special purpose tax in calculating whether the insurer owed retaliatory tax.

Clearly, therefore, the answer to the question whether a tax is a special purpose tax has a significant impact on determining the amount of tax payable to North Carolina by insurers chartered in another state. Before the passage of this act, the Department of Insurance maintained that the additional 1.33% tax on fire and lightning premiums was a special purpose tax and therefore could not be included in a calculation of whether an insurer owed retaliatory taxes. Insurers sued the Department of Insurance and sought refunds of retaliatory taxes paid on the ground that 1% of the 1.33% tax on fire and lightning coverage was not a special purpose tax because it was deposited in the General Fund and should therefore be included in calculating retaliatory tax liability.

The act resolves the lawsuit by conceding the issue and declaring that 1% of the 1.33% tax on fire and lightning coverage is not a special purpose tax. By implication, the remaining .33% of the 1.33% tax is a special purpose tax. The resulting ability of insurers to include 1% of the 1.33% additional tax on fire and lightning coverage in calculating the amount of taxes paid for purposes of the retaliatory tax will reduce General Fund revenue by $1,800,000 each fiscal year.

Because of the retroactive effective date of the retaliatory provision, the Department of Insurance must refund $2.5 million in overpayments of retaliatory taxes made in previous years for which timely refund claims have been submitted. Although not stated in the act, the Department has indicated that it will make the required refunds by allowing a credit for overpayments of retaliatory taxes over a four-year period. The refunds, taken as a credit over four years, will reduce revenue by approximately $640,000 for each of the four fiscal years beginning with the 1990-91 fiscal year. The four-year annual $640,000 reduction is in addition to the $1,800,000 permanent reduction.

1990 Chapter 1073 (Senate Bill 1588, Senator George Daniel)

AN ACT TO SIMPLIFY THE PRIVILEGE LICENSE TAX ON RESTAURANTS.

As the title indicates, this act simplifies the annual privilege license tax imposed on restaurants and other establishments that serve prepared food, effective July 1, 1991, by changing the way the tax is calculated. Under prior law, the tax was $1.00 for each seat in the establishment with a minimum of $50.00. As changed by the act, the tax is a flat $50.00 for establishments that have seating for fewer than five customers and is a flat $85.00 for establishments that have seating for five or more customers.

The act will increase General Fund revenue by $4,000 each year beginning with the 1991-92 fiscal year and will have a varying effect on particular establishments depending on the establishment's seating capacity. The act does not change the privilege tax liability of establishments, such as grocery stores that sell prepared foods at a deli within the store, that have no seating or seating for fewer than five customers. The act increases the privilege tax liability of establishments that have between five and 50 seats from $50.00 to $85.00. The act increases the privilege tax liability of establishments that have more than 50 but no more than 84 seats by the difference between their number of seats and 85. The act decreases the privilege tax liability of

establishments that have more than 85 seats; some of these establishments have over 350 seats and will therefore enjoy a decrease in tax liability of at least $265.00.

1989 Tax Law Changes

Prepared by: Cynthia Avrette, Sabra J. Faires, Sue Floyd, and Martha H. Harris

1989 Chapter 7 (House Bill 58, Rep. Dan Lilley)

AN ACT TO MAKE CONFORMING CHANGES TO THE MOTOR CARRIER FUEL USE TAX SO THAT A UNIFORM TAX REPORTING FORM MAY BE ADOPTED.

This act amends the motor carrier fuel use tax, effective January 1, 1990, in order to enable North Carolina to adopt a uniform tax reporting form. In Section 19 of the federal Motor Carrier Act of 1980, Congress directed the United States Secretary of Transportation and the Interstate Commerce Commission to study differing state regulations and requirements imposed on interstate motor carriers. As a result, the National Governors' Association formed a working group on state truck issues. The working group developed a consensus agenda and recommended, among other things, that the states adopt a uniform fuel use tax reporting form. The National Conference of State Legislatures has endorsed this recommendation as well.

Before North Carolina could adopt a uniform reporting form, it needed to make minor changes in the scope of the fuel use tax and in the deadline for applying for refunds. This act replaces the definition of motor carrier in G.S. 105-449.37, one who operates "a passenger vehicle with seating capacity for more than 20 passengers, a road tractor, a tractor truck, or a truck with more than two axles," with a new definition, one who operates "a motor vehicle used, designed, or maintained for transportation of persons or property and (i) having two axles and a gross vehicle weight or registered gross vehicle weight exceeding 26,000 pounds, (ii) having three or more axles regardless of weight, or (iii) used in combination when the weight of the combination exceeds 26,000 pounds gross vehicle weight." This act enables the Department of Revenue to eliminate paperwork and simplify the refund process by altering the tax reporting form to provide space on the face of the form for the taxpayer to request a refund. Recommended by Revenue Laws Study Committee.

1989 Chapter 36 (House Bill 4, Rep. Dan Lilley)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED TO DETERMINE CERTAIN TAXABLE INCOME AND TAX EXEMPTIONS.

This act rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1988, to January 1, 1989. Updating the reference makes recent amendments to the Internal Revenue Code applicable to the State to the extent State tax law previously tracked federal law. This update has the greatest effect on State corporate and individual income taxes because these taxes are a percentage of federal taxable income and are therefore closely tied to federal law. The act is effective upon ratification.

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically.

In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code as it existed on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of bills like this. The answer to this question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law recently and the likelihood of continued changes, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue losses. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, 2(1) of the Constitution provides in pertinent part that the "power of taxation...shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would...be invalidated as an unconstitutional delegation of legislative power." Recommended by Revenue Laws Study Committee.

1989 Chapter 37 (House Bill 5, Rep. Dan Lilley)

AN ACT TO MAKE TECHNICAL CHANGES TO THE REVENUE LAWS.

This act makes numerous technical and conforming changes to the revenue laws. Except as otherwise noted, the provisions of the act are effective upon ratification.

Section 1 amends G.S. 105-130.19 to eliminate an installment payment option allowing corporations to pay income tax within an additional period of nine months after the due date of the income tax return. Effective for taxable years beginning on or after January 1, 1989, this amendment brings the statute in harmony with another provision of the law, G.S. 105-163.41, which requires that 90% of the income tax be prepaid before the due date of the return. Because few corporations elect to use the installment method under G.S. 105-130.19, its elimination will not have a significant impact on taxpayers and will be more cost efficient for the Department of Revenue.

Section 2 deletes two obsolete references to the Internal Revenue Code of 1954 and replaces them with references to "the Code," elsewhere defined as the Internal Revenue Code of 1986. Section 3 amends G.S. 105-147(7) to eliminate a loophole that allowed a nonresident individual to take an income tax deduction for a prorated portion of deductible dividends even if the dividends were not taxable to North Carolina. G.S. 105-147 was later repealed, however, by the Tax Fairness Act of 1989. See Chapter 728, discussed below.

Section 4 amends G.S. 105-159.1(b) to delete a reference to the Election Campaign Fund and substitute the "Political Parties Financing Fund" in order to conform the statute to a change in the name of the Fund made in 1988. Section 5 repeals G.S. 105-163.05 effective for taxable years beginning on or after January 1, 1990. This statute, which allows an income tax credit for

property taxes paid on poultry and livestock, is obsolete because the General Assembly exempted poultry and livestock from property taxes effective with the 1989 tax year.

Section 6 amends G.S. 105-242(b) to provide that the procedure used for serving garnishments will be the same for both local and State taxes. Currently, for property taxes, notice of garnishment may be served "in any manner provided by Rule 4 of the North Carolina Rules of Civil Procedure." (G.S. 105-368). Before this amendment, in the case of State taxes, personal service was required, which could cause embarrassment for the taxpayer if service was made at his or her workplace. Section 6 changes the law for State taxes to allow service as provided in Rule 4.

Section 7 clarifies an ambiguous provision in the Machinery Act. G.S. 105-375(c) provided in certain foreclosure procedures for the assessment of administrative costs against the taxpayer but did not specify whether these costs are to be paid to the clerk of court or to the taxing unit. Section 7 amended the statute to clarify that the costs go to the taxing unit. Section 8 amends G.S. 106-277.28 to eliminate a loophole placed in the statute when it was amended in 1988. The statute set out a license tax for seed dealers with sales of less than $500.00 and for seed dealers with sales of more than $500.00, but none for seed dealers with sales of exactly $500.00. Section 8 corrects that problem. Recommended by Revenue Laws Study Committee.

1989 Chapter 79 (House Bill 78, Rep. Charles Beall)

AN ACT TO MAKE AVAILABLE TO COUNTIES INFORMATION HELPFUL IN CHOOSING A FIRM TO CONDUCT A REAPPRAISAL AND TO ALLOW THE DEPARTMENT OF REVENUE TO ASSIST COUNTIES DURING THE CONTRACT PHASE OF COUNTY REAPPRAISAL.

Effective for taxable years beginning on or after January 1, 1990, this act requires the Department of Revenue to assist counties, upon their request, in the preparation of the specifications and proposed contracts related to the selection of private contractors employed to conduct the county's general revaluation of real property. Although prior law did not require the Department to assist counties in the preparation of their specifications and contracts, the Department provided this service, as well as other services related to county reappraisals.

G.S. 105-289(i) requires the Department to maintain a register of appraisal firms and other firms having expertise in one or more duties of the assessor. To register with the Department, the firms must file an annual report with the Department setting forth their qualifications, financial condition, and a complete resume of their employees, experience, and training. This register is available to the counties as a resource in choosing an appraisal firm. To make this tool more valuable to the counties, this act requires that additional information be maintained in the register to give counties a measure of a firm's quality of work.

The act first requires that a report submitted to the Department by a county evaluating an appraisal firm that conducted the county's revaluation be included in the register and indexed under that appraisal firm. The report can outline any problems encountered in the reappraisal process, the number of appeals submitted, and the success rate of the appeals.

Secondly, the act requires the Department to include in its register a county's median ratio for the first two years following the effective date of the county's revaluation and the county's

coefficient of dispersion for those two years, indexed under the appraisal firm that conducted the revaluation. The median ratio provides the most accurate representation of the overall level of assessment of real property. The coefficient of dispersion provides the most accurate representation of the degree of uniformity of assessment among the properties. Recommended by the Property Tax Appraisal Study Committee.

1989 Chapter 99 (Senate Bill 49, Senator Frank Block)

AN ACT TO ELIMINATE THE FOUR-YEAR OWNERSHIP REQUIREMENT FOR USE-VALUE FORESTLAND TRANSFERRED TO THE OWNER OF OTHER USE-VALUE FORESTLAND.

This act allows an owner of forestland that is classified for taxation at its use value to acquire other land that is classified for taxation at its use value or is eligible for use value classification and, upon acquiring the land, to have the newly acquired land immediately classified for taxation at its use value. In making this change, the act conforms the treatment of forestland with that of horticultural land and agricultural land; these types of land enjoy immediate use value classification when transferred to a person who already owns land classified at use value.

Before this act, an owner of classified forestland who acquired other classified forestland had to wait four years after acquiring the other forestland before being able to have the other land classified for taxation at its use value. This result followed from the general requirement that, to be eligible for taxation at use value, land owned by an individual must be the individual's place of residence or have been owned by the individual for four years and land owned by a corporation must have been owned by the corporation or one of its principal stockholders for four years.

The act is effective for taxable years beginning in 1989, but the benefit applies to land acquired before 1989 as well as during or after 1989. To give taxpayers sufficient notice of this change, the act allows an application for use value to be filed until September 1, 1989. Normally, these applications must be submitted during the regular listing period.

1989 Chapter 111 (House Bill 198, Rep. Al Lineberry)

AN ACT TO MAKE TECHNICAL CHANGES TO THE TAX CREDIT FOR CREATING JOBS IN SEVERELY DISTRESSED COUNTIES.

In 1987, the General Assembly enacted income tax credits for corporations and individuals that create jobs in severely distressed counties. These credits, set out in G.S. 105-130.40 and G.S. 105-151.17, respectively, allow a credit of $2,800 to eligible taxpayers for each additional full time employee hired in a severely distressed county. A severely distressed county was defined as a county whose combined unemployment and per capita rankings were among the twenty worst in the State and that had an unemployment rate of 7% or higher.

This act makes the following changes to the credit, effective for taxable years beginning on or after January 1, 1989:

(1) It removes the requirement that, to be eligible for the credit, a taxpayer must be engaged in manufacturing, agribusiness, processing, warehousing, wholesaling, retailing, research and development, or a service-related industry, as determined by the

Employment Security Commission. This requirement was meaningless because the Employment Security Commission determined that there were no businesses that failed to fall into one of the categories. The credit was further amended by Chapter 753 of the 1989 Session Laws, discussed below, to limit the credit to taxpayers engaged in manufacturing goods or in an industrial activity.

(2) It deletes a provision requiring the Employment Security Commission to calculate and report to the Department of Revenue the number of new jobs created by employers. Instead, taxpayers are required to maintain and make available to the Secretary of Revenue records to verify the taxpayer's eligibility for the credit. The burden of proving eligibility for the credit and the amount of the credit was placed on the taxpayer.

(3) It deletes the requirement that a county must have an unemployment rate of 7% or more to be designated a severely distressed county.

Chapter 753 of the 1989 Session Laws, discussed below, increases the number of severely distressed counties from 20 to 25.

1989 Chapter 148 (Senate Bill 523, Senator Ted Kaplan)

AN ACT TO AUTHORIZE FULLY CERTIFIED LOCAL AIR POLLUTION CONTROL PROGRAMS TO CERTIFY POLLUTION CONTROL EQUIPMENT FOR TAX PURPOSES.

Under prior law, the owner of certain pollution control equipment was entitled to tax benefits under the corporate franchise tax (G.S. 105-122), corporate (G.S. 105-130.10) and individual income taxes, and property tax (G.S. 105-275(8)) if the Department of Natural Resources and Community Development (now, Department of Environment, Health, and Natural Resources) certified that the equipment complied with all applicable requirements. Effective with the 1989 tax year, this act provides that certification of the equipment by a fully certified local air pollution control program is sufficient to qualify the equipment for the tax benefits. Incidentally, the special individual income tax benefit for this equipment was repealed by Chapter 728 of the 1989 Session Laws effective for taxable years beginning on or after January 1, 1989.

1989 Chapter 176 (Senate Bill 63, Senator Bob Martin)

AN ACT TO AUTHORIZE A COUNTY TO PERMIT TAXPAYERS TO APPEAL DECISIONS OF THE BOARD OF EQUALIZATION AND REVIEW TO THE BOARD OF COUNTY COMMISSIONERS.

Effective for taxable years beginning on or after January 1, 1990, this act allows the board of county commissioners to include in the resolution creating a special board of equalization and review a procedure for appeal of the special board's decisions as to the listing or appraisal of real property to the county commissioners. The act allows but does not require the appeal procedure to be included in the resolution. If an appeal procedure is included in the resolution, the board of

county commissioners has the authority to change the orders of the special board on the abstracts and tax records when necessary to give effect to the decisions it makes during the appeal hearings.

Under prior law, the only avenue of appeal available to the taxpayer from a decision of the special board of equalization and review was to the Property Tax Commission. The board of county commissioners could not change an order of the special board once the change the special board ordered had been entered on the abstracts and tax records. Recommended by the Property Tax Appraisal Study Committee.

1989 Chapter 196 (Senate Bill 28, Senator Joe Johnson)

AN ACT TO ALLOW THE BOARD OF EQUALIZATION AND REVIEW TO ADJOURN ON DECEMBER 1 IN THE YEAR OF A COUNTY REVALUATION OF REAL PROPERTY.

Under prior law, a county board of equalization and review had to complete its duties by July 1. The counties that experienced problems in their revaluation process often had a difficult time granting hearings to property owners under the July 1 time constraint. Effective for taxable years beginning on or after January 1, 1990, this act extends the time a board of equalization and review has to complete its duties to December 1 in the year the county conducts a revaluation. The July 1 deadline remains the same for non-revaluation years. Recommended by the Property Tax Appraisal Study Committee.

1989 Chapter 251 (Senate Bill 411, Senator Alexander Sands)

AN ACT TO PERMIT THE ROCKINGHAM COUNTY AIRPORT AUTHORITY TO RECEIVE ANNUAL SALES TAX REFUNDS.

This act adds the Rockingham County Airport Authority to the list of local governmental entities that can apply for a refund of State and local sales and use taxes paid by them. The governmental entities eligible for sales and use tax refunds are listed in G.S. 105-164.14(c) and include counties, cites, water and sewer authorities, and regional councils of government. Eligible governmental entities may file for annual sales and use tax refunds of taxes paid during the preceding fiscal year, except sales taxes paid on electricity, natural gas, or telephone service.

The act is effective July 1, 1989, and permits the Rockingham County Airport Authority to apply for a refund of sales and use taxes paid during fiscal year 1988-89 by submitting an application before July 31, 1989. Without this authorization, the refund provisions would have applied only to sales and use taxes paid after the effective date of the act.

1989 Chapter 346 (Senate Bill 552, Senator Bill Goldston)

AN ACT TO REPEAL THE SUNSET DATE APPLICABLE TO INSURANCE PREMIUM TAXES.

This act repeals the insurance premium tax sunset that was set at January 1, 1988, by Section 5.1 of Chapter 1031 of the 1986 Session Laws and extended to January 1, 1990, by Section

4 of Chapter 814 of the 1987 Session Laws. The repeal of the sunset thus leaves in effect the reform of the taxes on gross premiums of insurance companies made in 1985 and 1986.

In 1985 and 1986, the General Assembly changed the rates of tax on gross premiums of insurance companies in response to a United States Supreme Court case, Metropolitan Life Insurance Company v. Ward, which held it unconstitutional to tax premiums of foreign insurance companies at a higher rate than premiums of domestic insurance companies. Before the changes that were made in 1985 and 1986, the State taxed premiums of domestic insurance companies at lower rates than those of foreign insurance companies. Now, the State premium tax rates are the same for foreign and domestic companies. To achieve this equality, the domestic tax rate was increased from 1.5% to 1.75% and the foreign tax rate was decreased from 2.5% to 1.75%.

1989 Chapter 392 (House Bill 784, Rep. C. P. Stewart)

AN ACT TO ALLOW AN EXTENSION OF TIME FOR THE CITY OF DUNN TO FILE AN APPLICATION FOR A SALES TAX REFUND.

G.S. 105-164.14 allows certain local governmental entities to receive annual refunds of sales and use taxes paid on direct purchases of tangible personal property. In order to receive the full refund, the entity must submit an application within six months after the end of the fiscal year. An entity that submits its application within the next six months after the due date can receive a partial refund. No refunds are allowed for applications that are more than six months late. The City of Dunn failed to file an application for a refund for taxes paid during the 1986-87 fiscal year; this act allows the city a full refund of these taxes if it files an application by December 31, 1989.

1989 Chapter 435 (Senate Bill 119, Senator A. D. Guy)

AN ACT TO REPEAL THE PRIVILEGE LICENSE TAX FOR FLEA MARKET VENDORS, TO INCREASE THE TAX FOR FLEA MARKET OPERATORS, TO EXEMPT GOVERNMENTAL ENTITIES FROM THE TAX, TO REDEFINE FLEA MARKETS AS "SPECIALTY MARKETS", AND TO INCREASE THE PENALTY FOR CERTAIN VIOLATIONS.

Under prior law, G.S. 105-53 imposed a privilege license tax on peddlers, itinerant merchants, flea market operators, and flea market vendors. Before July 1, 1988, this statute had taxed flea market operators but not the flea market vendors to whom the operators rented space. Legislation enacted in 1987 to become effective July 1, 1988, levied a twenty-five dollar license tax on flea market vendors and required license applicants to provide positive identification before receiving the license. The new law also required peddlers, itinerant merchants, and flea market operators and vendors to display their licenses and required flea market operators to maintain a list of all flea market vendors selling at the flea market. Finally, the 1987 law provided that violation of the license tax and other requirements is a misdemeanor punishable by up to 30 days' imprisonment, up to two hundred dollars' fine, or both.

The intent of the 1987 law was to deter the sale of stolen goods at flea markets and provide consumers the means to trace a vendor who may have sold shoddy merchandise. During 1988 and

1989, a number of problems with the new law were brought to the attention of the General Assembly.

Representatives of the License and Excise Tax Division of the Department of Revenue noted that the identification requirements forced the Department to process the license applications manually. This problem, along with the volume of new vendor licenses, drained the resources of the Division, leading to backlogs in processing privilege licenses of all sorts. In addition, the Division staff had been unable to notify all vendors newly subject to tax, leading to uneven enforcement and bad publicity when vendors were surprised by the tax. Local government officials were troubled by the new law as well. One of the technical definitions contained in the statute subjected municipalities to the flea market operators' tax.

By far the most numerous complaints concerning the license tax came from taxpayers. Operators of consumer trade shows, such as furniture shows, antique shows, and coin dealer shows, objected to the imposition of the tax on their vendors. They found the label "flea market" offensive when applied to their shows and pointed out that a consumer trade show vendor was not the type of vendor that would sell stolen goods or refuse to make a refund to a dissatisfied customer. The trade show operators also pointed out that because neighboring states do not impose a tax on vendors, operators and vendors were moving their shows out of North Carolina to avoid the tax. In addition, flea market operators and vendors complained about the new tax, stating that it imposed an unreasonably heavy burden on vendors, many of whom are elderly or handicapped and have little or no other income. They also noted several instances in which the tax was enforced against flea markets but not against trade shows and festivals that are also liable for the tax. Finally, all parties subject to the tax complained of the difficulty of providing a copy of a positive identification before being able to obtain the license.

The Revenue Laws Study Committee developed this act to address all of these concerns and to maintain a mechanism for protecting consumers and deterring sale of stolen goods at flea markets. The act repeals the license tax on flea market vendors and raises the tax on flea market operators from $100.00 to $200.00. In addition, it substitutes the term "specialty market" for "flea market" in the statute because consumer trade shows as well as flea markets are covered by the law. The act repeals the requirement that licensees submit a copy of a positive identification before receiving a license; this change will eliminate the need for the Department to process applications by hand. The act addresses the concerns of local governments by exempting units of government from the tax. Finally, the act enhances efforts to regulate licensees and make them accountable by (i) requiring specialty market vendors and operators and other licensees to show positive identification upon the request of a customer or a State or local revenue or law enforcement officer, in addition to displaying their retail sales tax license; (ii) requiring specialty market operators to keep a list with the name, address, and sales tax number of every vendor at the market; (iii) requiring specialty market operators to refuse to allow vendors to sell if they do not have a retail sales tax license; and (iv) imposing an increased penalty of up to $1,000 for a specialty market operator or vendor who fails to comply with these requirements. The act became effective July 1, 1989. Recommended by Revenue Laws Study Committee.

1989 Chapter 522 (Senate Bill 175, Senator Joe Raynor)

AN ACT TO ALLOW COUNTIES TO COMPROMISE THE ONE HUNDRED DOLLAR PENALTY FOR FAILURE TO LIST A MOTOR

VEHICLE AND TO CLARIFY OTHER PROVISIONS OF G.S. 105-312 RELATING TO THE PENALTY.

G.S. 105-312(h1) imposes a $100 penalty for falsely certifying that a vehicle has been listed for property tax purposes. This act provides that a county may compromise the $100 penalty, as it may the penalty for failure to list a vehicle, if the penalty has not already been paid.

Section 2 of the act creates an exception to the prohibition on compromising penalties that have already been paid. It provides that, for $100 penalties paid for 1988 and 1989 only, a county may refund the penalty if it determines that the taxpayer's false certification was not made intentionally to avoid the property tax. The authority to make these refunds may be delegated to the county finance officer or another county official.

The act further provides that the procedure for collecting the $100 penalty shall be the same as for other penalties. These changes become effective with the 1989 tax year.

1989 Chapter 530 (Senate Bill 787, Senator Paul Smith)

AN ACT TO AUTHORIZE THE SECRETARY OF REVENUE TO SET THE INTEREST RATE FOR STATE TAX ASSESSMENTS EVERY SIX MONTHS.

The Secretary of Revenue sets the interest rate that is charged on late payments of taxes, G.S. 105-241.1(i), and that is paid on tax refunds, G.S. 105-266 through 105-267. Effective June 30, 1989, this act changes the frequency with which the rate is set from once a year to twice a year. It directs the Secretary to set a rate by June 1 of each year to be in effect from July 1 to December 31, and to set a rate by December 1 of each year to be in effect from January 1 to June 30. If the Secretary does not set a new rate by the designated date, the rate for the previous six-month period continues in effect.

The Secretary must therefore set a rate by December 1 of this year that will be in effect from January 1, 1990, to June 30, 1990. Before this act, the Secretary set the interest rate to be in effect during a calendar year by December 1 of the previous year. As under the previous law, the rate cannot be more than 16% a year or less than 5% a year.

1989 Chapter 531 (Senate Bill 893, Senator George Daniel)

AN ACT TO CONFORM THE NORTH CAROLINA GENERATION SKIPPING TRANSFER TAX TO THE INTERNAL REVENUE CODE.

This act makes technical corrections to the State's generation skipping transfer tax statute. It conforms the language and the Code references in the North Carolina statute to the Internal Revenue Code. It imposes the tax not only upon a taxable distribution and a taxable termination, but also upon a direct skip as determined under the provisions of the federal generation skipping transfer tax. A direct skip is a transfer to a person who is two or more generations younger than the transferor. For example, a transfer of an interest in property by a grandparent to a grandchild would be considered a direct skip. The act is applicable to decedents dying on or after the date of ratification, June 30, 1989.

1989 Chapter 557 (House Bill 272, Rep. George Miller)

AN ACT TO CREATE A TAX AMNESTY PROGRAM AND IMPROVE STATE TAX ENFORCEMENT AND COMPLIANCE TO ASSURE FAIRNESS IN THE COLLECTION OF TAXES FROM ALL TAXPAYERS.

Called the "Fair Share Tax Act of 1989," this act seeks to ensure that all taxpayers are paying taxes owed by them. To achieve this purpose, the act creates a one-time tax amnesty program, raises the criminal penalties for failure to pay taxes, and appropriates funds to the Department of Revenue to collect taxes.

The amnesty program established by the act applies during the 3-month period from September 1, 1989, through December 1, 1989. During this period, a person who pays previously unreported, underreported, or assessed but unpaid taxes, plus the interest due on the taxes, cannot be criminally prosecuted. In addition, a person who prepares a tax return submitted under the amnesty program cannot be prosecuted for willfully aiding another to evade taxes.

The amnesty program applies to almost all taxes collected by the State. It applies to inheritance and gift taxes, State privilege license taxes, excise taxes, franchise taxes, income taxes and income withholding taxes, State and local sales and use taxes, intangible taxes, motor fuel taxes, and motor fuel inspection taxes. It does not apply to insurance gross premium taxes. The amnesty program is expected to generate $25,000,000 in one-time revenue.

Effective with the end of the amnesty period on December 2, 1989, the act increases several of the criminal penalties that apply to the failure to pay taxes. The specific increases are:

VIOLATION	PRIOR LAW	NEW LAW
Attempt to evade or defeat tax **G.S. 105-236(7)**	Misdemeanor: -$1,000 fine -6 months imprisonment, -or both	Class I felony: -$25,000 fine -5 years imprisonment, -or both Presumptive: 2 years
Willful failure to collect, withhold, or pay over tax **G.S. 105-236(8)**	Misdemeanor: -$1,000 fine -2 years imprisonment, -or both	Misdemeanor: Same punishment but extends time within which a person can be prosecuted from 2 years to 3 years
Willful failure to file return, supply information, or pay tax **G.S. 105-236(9)**	Misdemeanor: -Unlimited fine - 2 years imprisonment, -or both	Misdemeanor: Same punishment but extends time within which a person can be prosecuted from 2 years to 3 years
Willful aiding or assisting in filing fraudulent return or document **G.S. 105-236 (9a)**	Misdemeanor: -Unlimited fine -2 years imprisonment, -or both	Class J felony: -$10,000 fine -3 years imprisonment, -or both Presumptive: 1 year

To ensure better compliance with the tax laws, the act couples the increased criminal penalties with appropriations to the Department of Revenue for additional enforcement personnel and related costs. The act appropriates $5,071,142 for the 1989-90 fiscal year and $4,914,908 for the 1990-91 fiscal year. In addition, the act authorizes the Department of Revenue to use up to $1,100,000 of income tax revenue to publicize and pay for the tax amnesty program. The increased criminal penalties coupled with better enforcement are expected to generate additional recurring revenues of $69,000,000 each fiscal year. Recommended by Tax Fairness Study Commission.

1989 Chapter 578 (Senate Bill 628, Senator Marshall Rauch)

AN ACT TO ALLOW THE GOVERNING BODY OF A COUNTY OR ITS MUNICIPALITIES TO CONTRACT WITH FINANCIAL INSTITUTIONS FOR RECEIPT OF PAYMENT OF PROPERTY TAXES.

This act gives the governing body of a taxing unit the authority to enter into a contract with a bank or other financial institution under which the institution agrees to collect property taxes owed the taxing unit. This type of arrangement for collection of property taxes is commonly known as "lockbox" property tax collection. Without this act or a special local act, the governing body could not enter into this type contract.

Several limitations apply to the collection of property taxes by an institution. The institution can collect only those taxes that are current; it cannot collect overdue taxes on which interest is payable. In addition, the institution cannot give a receipt for payment of taxes; only the tax collector can issue a tax receipt for payment of taxes.

The same benefits apply to the payment of property taxes at an institution as at the tax collector's office. The institution must give the taxpayer any discount allowed by the taxing unit for early payment of taxes, and the taxpayer may pay by check. If the check is returned unpaid, the institution notifies the tax collector, who proceeds to collect the unpaid taxes in the same manner as other unpaid property taxes.

The act is effective upon ratification and repeals local acts authorizing specific taxing units to contract for receipt of payment of property taxes. With the enactment of this general law, the local acts are no longer needed. The local acts applied to Cleveland, Gaston, Iredell, and Wake Counties and to the taxing units in those counties.

1989 Chapter 580 (Senate Bill 788, Senator Paul Smith)

AN ACT TO PERMIT THE DEPARTMENT OF REVENUE AND LOCAL TAX COLLECTORS TO ATTACH THE ESCHEAT FUND.

This act permits the State or a local property tax collector to recover property in the Escheat Fund and apply the property to the payment of State or local taxes, as appropriate, if the State Treasurer determines that the person who owned the escheated property owed taxes. The act is effective July 5, 1989, the date it was ratified. Previously, it was unclear whether the State or a local tax collector could attach this property in the Escheat Fund in payment of taxes.

Escheated property is property to which the State assumes ownership under Chapter 116B of the General Statutes, either because the property is determined to be abandoned or the property was owned by a person who died and had no heirs. Article IX, 10 of the North Carolina Constitution requires property in the Escheat Fund to be used to "aid worthy and needy students who are residents of this State and are enrolled in public institutions of higher education in this State." The State Treasurer administers the Escheat Fund and resolves the claims of any creditors of those who owned property that has escheated.

1989 Chapter 582 (House Bill 330, Rep. Dave Diamont)

AN ACT TO REPEAL OBSOLETE CORPORATE FRANCHISE TAX EXEMPTIONS AND CLARIFY THE DEFINITION OF PRIVATE TELECOMMUNICATIONS FOR CORPORATE FRANCHISE TAX PURPOSES.

Effective for taxable years beginning on or after January 1, 1989, this act clarifies existing law and repeals obsolete corporate franchise and corporate income tax credits. Section 1 repeals G.S. 105-129.1, which provides a manufacturer a refund of franchise taxes paid on natural gas used as an ingredient or component (raw material) of a manufactured product. This provision has not been used in several years.

Section 2 clarifies the term "private telecommunications service" to conform the statutory definition to the administrative policy. The act deletes language that limits the service to priority use of channels between exchanges, thereby clarifying that all private telecommunications services are subject to the 6.5% sales tax levied under G.S. 105-164.4(4c).

Section 3 of the act repeals the tax credit provisions of G.S. 105-120(b), which applied when a city or town sold at public auction the right to engage in a telephone business in the town for a percentage of the receipts and then collected revenue not exceeding 1% of the receipts. Under prior law, the amount of revenue the municipality collected from its percentage of the gross receipts was credited entity against the franchise tax liability of the telephone company. This credit provision was enacted in 1931 but has no application today. In recent years, the credit has not been used by taxpayers liable for the tax levied under G.S. 105-120(b). Recommended by the Tax Fairness Study Commission.

1989 Chapter 584 (House Bill 512, Rep. George Miller)

AN ACT TO AMEND ARTICLE 2, "LICENSE TAXES," OF THE REVENUE ACT TO PROVIDE FOR TAX SIMPLIFICATION AND TO RAISE REVENUES.

The State levies annual privilege license taxes on a variety of businesses under Article 2 of Chapter 105 of the General Statutes. Effective for privilege license taxes levied for fiscal year 1990-91, this act amends many of the privilege license tax provisions to:

(1) Eliminate tax rates based on the population of the city where the business is located or other variables such as seating capacity.

(2) Consolidate 10 of the privilege license taxes into one "general business" $50.00 license tax under new G.S. 105-102.5.

(3) Increase many privilege license taxes that were below $50.00 to $50.00.

(4) Repeal two privilege license taxes.

VARIABLE PRIVILEGE LICENSE TAXES CHANGED TO FLAT RATE

Under prior law, at least 18 privilege license taxes were based on population or other variables, such as seating capacity or number of vehicles used. For those taxes based on population, the amount of the tax increased as the population of the city where the business was located increased. If a business was located in an unincorporated area, the smallest tax based on population applied to the business. To administer the license taxes that were based on population, the Department of Revenue applied the population figures resulting from the most recent 10-year census.

The act changes all tax rates based on population and most of the tax rates based on other variables to a single rate that applies regardless of the population where the business is located or of other factors peculiar to each taxpayer. The new tax rate is generally a rate approximately midway between the former lowest and highest rates. If the former highest rate was less than $50.00, however, the new rate is $50.00. In many instances, therefore, taxpayers in the more populous cities will enjoy a tax decrease while those in the less populous cities experience a tax increase.

The privilege license taxes that previously varied on the basis of population or other factors and that have been changed to a single rate of tax are listed below along with the new tax rate.

LICENSE	MINIMUM AND MAXIMUM Tax Based on Population	NEW RATE
Drive-in Movie G.S. 105-36.1	Minimum: .67 per car Maximum: $1.34 per car	$100.00
Movie Theater G.S. 105-37	Minimum: $62.50 per theater Maximum:: $1,200 per theater	$200.00 per theater
Athletic Events, Dances, and Other Entertainment G.S. 105-37.1	Minimum: $10.00 per place Maximum: $50.00 per place	$50.00 per place
Circuses and Other Traveling Shows G.S. 105-38	Minimum: $7.50 per motor vehicle Maximum: $300.00 per rail	$50.00 each day a performance is given
Undertakers and Retail Dealers in Coffins G.S. 105-46	Minimum: $10.00 Maximum: $100.00	$50.00
Pawnbrokers G.S. 105-50	Minimum: $200.00 Maximum: $400.00	$275.00

Security Dealers Without Ticker Tape Service G.S. 105-67(a)	Minimum: $25.00 Maximum: $300.00	$200.00
Security Dealers With Ticker Tape Service G.S. 105-67(d)	Minimum: $150.00 Maximum: $600.00	$450.00
Dry Cleaners G.S. 105-74	Minimum: $7.50 Maximum: $75.00	$50.00
Laundries G.S. 105-85	Minimum: $6.25 Maximum: $62.50	$50.00
Placing Outdoor Advertising In a City G.S. 105-86	Minimum: $5.00 Maximum: $200.00	$70.00
Automotive Service Stations G.S. 105-89(a)	Minimum: $10.00 Maximum: $5.00 times the number of pumps	$50.00
Wholesale Auto Parts Dealers G.S. 105-89(b)	Minimum: $25.00 Maximum: $125.00	$75.00
LICENSE	**MINIMUM AND MAXIMUM Tax Based on Population**	**NEW RATE**
Motor Vehicle Dealers G.S. 105-89(c)	Minimum: $25.00 Maximum: $200.00	$100.00
Motorcycle and Motorcycle Parts Dealers G.S. 105-89.1	Minimum: $10.00 Maximum: $40.00	$50.00
Unemployment Agencies G.S. 105-90 G.S. 105-90.1	Minimum: $100.00 Maximum: $500.00	$300.00
Plumbers, Heating Contractors, and Electricians G.S. 105-91	Minimum: $7.50 Maximum: $40.00	$50.00

FLAT-RATE PRIVILEGE LICENSE TAXES INCREASED TO $50

The act increases most of the privilege license taxes that were less than $50.00 to that amount to make collection of the taxes cost effective. In addition, the act increases several minimum taxes to $50.00 for the same reason.

The act does not increase a few taxes to $50.00, such as the $15.00 tax on electronic video games, because, although the rate itself is less than $50.00, the rate applies to each place or taxable article and a taxpayer who applies for a privilege license includes all places or articles on the same

application and therefore generally pays more than $50.00. These taxes are therefore cost effective to collect despite the low rate.

The flat-rate privilege license taxes that were increased to $50.00 are:

1. Attorneys, doctors, dentists, veterinarians, opticians, registered engineers and land surveyors, landscape architects, photographers, realtors, accountants, morticians, and certain other professionals, G.S. 105-41. The former tax was $25.00.
2. Private detective or private investigator, G.S. 105-42. The former tax was $25.00.
3. Installing, servicing, monitoring, or responding to alarms, G.S. 105-51.1. The former tax was $25.00.
4. Contractor project licenses for projects costing less than $10,000, G.S. 105-54(b). The former tax was $25.00.
5. Day-care facilities caring for fewer than 50 children, G.S. 105-60. The former tax was $10.00 for fewer than 30 children and $60.00 for 30 to 49 children.
6. Hotel and motel minimum privilege license, G.S. 105-61. The former tax was $2.00 per room, with a minimum of $10.00. The new tax is $2.00 per room, with a minimum of $50.00.
7. Restaurants and other prepared food vendors minimum privilege license, G.S. 105-62. The former tax was $1.00 per customer seat, with a minimum of $5.00. The new tax is $1.00 per customer seat, with a minimum of $50.00.
8. Employment agencies whose sole business is placing teachers or other school employees or placing domestic servants or unregistered nurses, G.S. 105-90 and 105-90.1. The former tax was $25.00.
9. Manufacturers and wholesale distributors of ice cream and similar frozen products, G.S. 105-97. The former tax was $1.50 per continuous freezer gallon capacity and $5.00 per non-continuous freezer gallon capacity, with a minimum of $10.00. The new tax rate is the same, but the minimum tax is increased to $50.00.
10. Cooperative associations, G.S. 105-102.1. The former tax was $10.00.

CONSOLIDATED PRIVILEGE LICENSE TAXES

The privilege license taxes listed below were consolidated in G.S. 105-102.5 into a single general business license having a tax of $50.00. The previous tax for any one of these privilege licenses ranged from $5.00 to $30.00.

The general business license replaces the privilege licenses listed below and permits a person to engage in any of the listed activities. Previously, a person who engaged in all of these activities was required to pay a separate privilege license tax for each activity. The general business license preserves any exemptions that previously applied to the separate licenses as well as any limitations on the adoption of local privilege licenses on the same activity.

The privilege license taxes that were consolidated into a single license tax are the taxes that were levied on:

(1) Those engaged in selling, leasing, or providing movies shown where no admission fee is charged or at a school, former G.S. 105-36.

(2) Bicycle dealers, former G.S. 105-49.

(3) Retail dealers in office equipment, home appliances, or alarms, former G.S. 105-51.

(4) Campground operators, former G.S. 105-61.1.

(5) Pool table operators, former G.S. 105-64.

(6) Bowling alley operators, former G.S. 105-64.1.

(7) Those who sell sandwiches, operate fewer than five vending machines, operate a soft drink stand, or sell tobacco products, former G.S. 105-65.2.

(8) Merry-go-round operators, former G.S. 105-66.

(9) Those engaged in selling or repairing pianos, organs, stereos, tape players, and other audio equipment, former G.S. 105-82.

(10) Retail ice cream dealers, former G.S. 105-97(c).

REPEALED PRIVILEGE LICENSE TAXES

The following license taxes were repealed:

(1) Checking attendance at a movie or show, former G.S. 105-36. This tax was repealed because no one has applied for the license in years and the tax therefore produced no revenue.

(2) Sundries license for those operating five or more closed-container soft drink vending machines, former G.S. 105-65.2(g). This tax was repealed because operators of closed-container soft drink vending machines pay a flat license tax of $100.00 plus a per drink machine tax of approximately $7.00 per machine under G.S. 105-65.1.

1989 Chapter 605 (House Bill 800, Rep. Don Beard)

AN ACT AUTHORIZING THE APPOINTMENT OF A SPECIAL BOARD OF EQUALIZATION AND REVIEW FOR CUMBERLAND COUNTY.

Effective upon ratification, this act authorizes the Cumberland County Commissioners to appoint a Special Board of Equalization and Review. The Board will consist of five to nine members with authority to sit in as many as three three-member panels during revaluation years. The Commissioners may delegate to the Board the authority to make changes in tax records, compromise discoveries, and approve releases and refunds at any time in a calendar year.

1989 Chapter 615 (House Bill 1383, Rep. Bob Hunter)

AN ACT TO RECOGNIZE BONA FIDE ESTATE SETTLEMENTS FOR INHERITANCE TAX PURPOSES.

This act requires inheritance taxes to be assessed on the basis of a settlement agreement made by two or more persons who contest the distribution of a decedent's property under a will. Without the act, inheritance taxes would be assessed on the basis of who was given the property

by the will rather than on who actually received the property under the settlement agreement. The act thus conforms North Carolina law to federal law on the subject of recognizing settlements in determining the amount of estate or inheritance tax due. The act applies to the estates of decedents dying on or after October 1, 1989.

Before a settlement is used to determine the amount of inheritance tax due, however, the taxpayer must prove to the Secretary of Revenue that the settlement was made in good faith to resolve an actual controversy over the distribution of a decedent's property and was not made for the purpose of avoiding taxes. A taxpayer who disagrees with the Secretary's determination of whether the settlement was a "good faith" settlement can appeal the determination to court.

The amount of inheritance tax due on the transfer of property by a decedent depends on to whom the property is given. Transfers to some recipients, such as a spouse or a charity, are exempt from inheritance tax. Transfers to other recipients are taxed at varying rates depending on the relationship of the recipient to the decedent. Transfers to a child, for example, are taxed at a lower rate than transfers to an unrelated friend.

Under prior law, if a will gave all of a decedent's property to the decedent's children and none to the decedent's spouse, inheritance tax would be assessed on all the property at the rate applicable to transfers to the children even if the children and the spouse entered into a settlement agreement that gave part of the property to the spouse. Under this act, the part of the property transferred to the spouse under the settlement agreement would be exempt from tax.

The act does not affect the determination of inheritance tax due when a court decision directs how property is to be distributed. In that circumstance, inheritance tax is payable based on who receives property under the decision. The act avoids the necessity of having a court decision, however. The persons who dispute the distribution made by the will can settle the dispute outside of court and have the settlement determine the amount of tax payable.

1989 Chapter 628 (Senate Bill 786, Senator Paul Smith)

AN ACT TO ALLOW THE DEPARTMENT OF REVENUE TO PROVIDE IDENTIFICATION INFORMATION FROM TAX RETURNS TO THE DEPARTMENT OF STATE TREASURER FOR ESCHEATS PURPOSES AND TO CLARIFY THE PURPOSE FOR WHICH THE EMPLOYMENT SECURITY COMMISSION MAY REQUEST IDENTIFICATION INFORMATION FROM THE DEPARTMENT OF REVENUE.

Effective upon ratification, this act allows the Department of Revenue to furnish to the Department of State Treasurer the names, addresses, and account and identification numbers of taxpayers who may be entitled to property held in the Escheat Fund when the Treasurer requests the information for the purpose of administering the Escheat Fund.

An escheat occurs when a property owner dies with no heirs or when the property is determined to be abandoned. Under prior law, property that might be placed in the hands of the owners could not be distributed by the State Treasurer for want of sufficient addresses or other identifying information.

The act also allows the Department to furnish to the Employment Security Commission the names, addresses, and account and identification numbers of taxpayers for the purpose of administering unemployment insurance.

1989 Chapter 667 (House Bill 556, Rep. Alex Hall)

AN ACT TO AUTHORIZE THE SECRETARY OF REVENUE TO ENTER INTO COOPERATIVE AGREEMENTS WITH OTHER STATES TO ADMINISTER THE FUEL TAX AND TO MAKE A CONFORMING CHANGE TO THE DEFINITION OF MOTOR CARRIER.

Like Chapter 7 of the 1989 Session Laws and House Bill 603 of the 1989 Session, this act is a recommendation of the Working Group on State Truck Issues established by the National Governor's Association. The Working Group's recommendations aim at simplifying the reporting requirements of interstate motor carriers.

Effective July 24, 1989, this act permits the Secretary of Revenue to enter into a "base state compact" with other states concerning administration of the motor carrier road tax, also called the motor fuel use tax, levied under Article 36B of Chapter 105 of the General Statutes. The road tax is levied on the amount of fuel used by a motor carrier in its operations in this State and is levied at the same rate as the excise tax on motor fuel purchased in this State. A credit is allowed against the road tax for the amount of tax paid on fuel purchased in this State. Thus, only motor carriers who drive in this State and do not purchase in this State the amount of gas used in driving in this State have a net road tax liability.

The act states that an agreement can specify the method for determining the base state for a motor carrier, set recordkeeping and audit requirements, set penalties and interest rates, permit the exchange of taxpayer information among the member states, and determine a method by which the base state will collect and distribute all road taxes or motor fuel use taxes due the member states in which the motor carrier operates. The agreement cannot change the amount of any tax or fee payable to this State by a motor carrier, however.

The act changes the definition of "motor carrier" used in the motor vehicle laws to match the changes made to that term in the tax laws by Chapter 7 of the 1989 Session Laws. Chapter 692 of the 1989 Session Laws, however, repeals the change made by this act in the definition of "motor carrier" because it repeals the "decal" fee effective January 1, 1990, to which the definition applies.

1989 Chapter 674 (Senate Bill 1146, Senator Ollie Harris)

AN ACT TO CLASSIFY FOR PROPERTY TAXATION PRECIOUS METALS USED BY MANUFACTURERS AS MACHINERY.

Pursuant to the power granted the General Assembly in Article V, 2(2) of the North Carolina Constitution, this act designates certain precious metals as a special class of property and directs how they are to be assessed for property taxation. The act is effective for taxable years beginning on or after January 1, 1989. Although it is a statewide act, it currently affects only Cleveland and Davidson Counties because these counties are the only ones with these metals.

The metals affected are precious metals used or held for use directly in manufacturing or processing by a manufacturer as part of industrial machinery. These metals are taxed at the lower of their market value and their original cost less depreciation. To determine original cost less depreciation, the index factor, if any, that is used in assessing the related industrial machinery must be applied, the depreciable life of the metals is considered the same as the life assigned to the related industrial machinery, and the residual value of the metals may not exceed 25% of the manufacturer's original cost. Without this act, it was unclear how these metals should be assessed.

An owner of precious metals classified by this act must apply for the tax benefit granted by the act. In 1989, an owner can file an application any time before September 2. In subsequent years, an owner must file an application within the regular listing period. Once an owner of precious metals has applied for this benefit and the application has been approved, however, the owner continues to receive the benefit in subsequent years without having to reapply as long as the precious metals, or subsequently acquired precious metals, are used in the manufacturing process.

1989 Chapter 682 (Senate Bill 566, Senator Alexander Sands)

AN ACT TO REPEAL THE REQUIREMENT THAT LIENHOLDERS OF RECORD FILE A REQUEST IN ORDER TO RECEIVE NOTICE OF AN IN REM TAX FORECLOSURE.

Effective October 1, 1989, and applicable to foreclosure proceedings begun on or after that date, this act requires a county tax collector to notify all lienholders of record who have a lien against the listing taxpayer or against any subsequent owner of the property of a pending in rem tax foreclosure action against the property under G.S. 105-375. Under prior law, the tax collector was required to notify only those lienholders who had specifically requested that they be notified.

1989 Chapter 692 (House Bill 399, Rep. Bob Hunter)

AN ACT TO ESTABLISH THE NORTH CAROLINA HIGHWAY TRUST FUND, TO PROVIDE REVENUE FOR THE FUND, TO DESIGNATE HOW REVENUE IN THE FUND IS TO BE USED, AND TO RAISE REVENUE FOR THE GENERAL FUND.

(As amended by Chapters 700, 770, 788, and 799)

This act is the principal revenue-raising legislation of the 1989 Session. It raises revenue for both the General Fund and a 13 1/2 year, $9.1 billion highway program that it establishes. Under the act, the General Fund receives new revenue from four sources: an increase in the sales tax cap on the sale of a boat, an aircraft, a railway car, or a locomotive from $300.00 to $1,500 effective August 1, 1989; an increase in the estimated individual income tax reporting threshold from 80% to 90% effective for taxable years beginning on or after January 1, 1990; an increase in the short-term rental rate for motor vehicles from 2% to 8% effective October 1, 1989; and a transfer in fiscal years 1989-90 and 1990-91 of part of the increased revenue from a new "highway use" tax.

To implement the highway program, the act creates the North Carolina Highway Trust Fund, raises taxes and fees to provide revenue for the Fund, and specifies the programs for which Trust Fund revenue must be used. The act generates revenue for the Trust Fund by increasing the motor fuel tax by 5.2¢ a gallon, increasing the fee for issuing a certificate of title from $5.00 to $35.00, increasing related title fees from varying amounts to $10.00, and replacing the 2%, $300.00 maximum sales tax on motor vehicles with a 3%, $1,000 maximum "highway use" tax payable whenever a certificate of title for a motor vehicle is issued. The Trust Fund projects consist of the Intrastate System, seven urban loops, a supplement to cities for city streets, and a supplement for secondary road construction.

The Trust Fund is administered by the Department of Transportation and monitored by the Joint Legislative Highway Oversight Committee, which is created by the act. The Trust Fund is separate from the Highway Fund. Like the Highway Fund, however, the Trust Fund is subject to the Executive Budget Act. The Trust Fund and the tax and fee increases that are sources of revenue for the Fund terminate when the projects of the Trust Fund are completed.

In addition to the primary purposes of raising revenue for the General Fund and creating the Highway Trust Fund, the act makes numerous other changes in the law. For example, it establishes a 10% goal for minority participation in highway construction contracts, establishes a distribution formula for funds spent on the Intrastate System projects of the Trust Fund and on highway construction under the Transportation Improvement Program, requires all steel and cement permanently incorporated into highway construction projects to be produced in the United States, repeals the motor carrier "decal" fee, and provides a credit against the equipment use tax for taxes paid in another state. The many changes are described in the following detailed explanation of the act.

EXPLANATION OF HOUSE BILL 399, CHAPTER 692 OF THE 1989 SESSION LAWS

(As amended by Chapters 700, 770, 788, and 799 of the 1989 Session Laws)

Table of Contents

Part I. North Carolina Highway Trust Fund.

Part II. Certificate of Title Fee/Alternate Transportation Funding.

Part III. Sales Tax Changes.

Part IV. Motor Vehicle Use Tax.

Part V. Motor Fuel Tax.

Part VI. Repeal Road Tax Registration Fee.

Part VII. Estimated Income Tax Amendments.

Part VIII. Effective Dates and Sunset.

Summary

This act is the principal revenue-raising legislation of the 1989 Session. It raises revenue for both the General Fund and a 13 1/2 year, $9.1 billion highway program that it establishes. Under the act, the General Fund receives new revenue from four sources: an increase in the sales

tax cap on the sale of a boat, an aircraft, a railway car, or a locomotive from $300 to $1,500 effective August 1, 1989; an increase in the estimated individual income tax reporting threshold from 80% to 90% effective for taxable years beginning on or after January 1, 1990; an increase in the short-term rental rate for motor vehicles from 2% to 8% effective October 1, 1989; and a transfer in fiscal years 1989-90 and 1990-91 of part of the increased revenue from a new "highway use" tax.

To implement the highway program, the act creates the North Carolina Highway Trust Fund, raises taxes and fees to provide revenue for the Fund, and specifies the programs for which Trust Fund revenue must be used. The act generates revenue for the Trust Fund by increasing the motor fuel tax by 5.2C a gallon, increasing the fee for issuing a certificate of title from $5 to $35, increasing related title fees from varying amounts to $10, and replacing the 2%, $300 maximum sales tax on motor vehicles with a 3%, $1,000 maximum "highway use" tax payable whenever a certificate of title for a motor vehicle is issued. The Trust Fund projects consist of the Intrastate System, seven urban loops, a supplement to cities for city streets, and a supplement for secondary road construction.

The Trust Fund is administered by the Department of Transportation and monitored by the Joint Legislative Highway Oversight Committee, which is created by the act. The Trust Fund is separate from the Highway Fund. Like the Highway Fund, however, the Trust Fund is subject to the Executive Budget Act. The Trust Fund and the tax and fee increases that are sources of revenue for the Fund terminate when the projects of the Trust Fund are completed.

In addition to the primary purposes of raising revenue for the General Fund and creating the Highway Trust Fund, the act makes numerous other changes in the law. For example, it establishes a 10% goal for minority participation in highway construction contracts, establishes a distribution formula for funds spent on the Intrastate System projects of the Trust Fund and on highway construction under the Transportation Improvement Program, requires all steel and cement permanently incorporated into highway construction projects to be produced in the United States, repeals the motor carrier "decal" fee, and provides a credit against the equipment use tax for taxes paid in another state. The many changes are described in the following section by section analysis.

Section by Section Analysis

Section 1.1: This section establishes the North Carolina Highway Trust Fund, specifies the sources and uses of the Fund, and requires the Department of Transportation to develop completion schedules for the Trust Fund projects.

G.S. 136-175. This provision defines Intrastate System, Transportation Improvement Program, and Trust Fund.

G.S. 136-176. This provision creates the Trust Fund, specifies the Fund's sources of revenue. designates the purposes for which revenue in the Fund is to be used, and specifies the percentage of Trust Fund revenue that is to be applied to each purpose. Trust Fund revenue consists of revenue received from the following:

(1) A motor fuel tax increase of 5.2¢ per gallon.

(2) The levy of a 3%, $1,000 maximum titling tax on the issuance of a certificate of title for a motor vehicle. (The act calls this tax a "highway use" tax).

(3) Revenue from title fee increases.

(4) Revenue made available by the retirement of highway refunding bonds.

(5) Interest on the Fund.

Trust Fund revenue is applied to the following purposes:

(1) Intrastate System- (61.95%).

(2) Urban loops-- (25.05%)

(3) Supplement to municipalities ("Powell Bill")-- (6.5%).

(4) Supplement for secondary roads-- (6.5%), plug $15 of the $30 increase in the fee for issuing a certificate of title. (See G.S. 20-85(b) in Section 2. 1. of this act.).

(5) Expenses of the Department of Transportation in administering the Trust Fund, not tb exceed 5% of the revenue collected from the motor fuel tax, highway use tax, and title fee increases. The percentage for expenses is calculated and subtracted before the four project percentage allocations are made.

(6) Expenses of the Joint Legislative Highway Oversight Committee- actual expenses are deducted from the amount allocated to the Intrastate System projects. (See G.S. 120-70.52 in Section 1.2 of this act.)

G.S. 136-177. This provision limits the amount of Trust Fund revenue that can be spent on highway construction for the next five fiscal years. Federal revenue and Trust Fund revenue used to supplement either the "Powell Bill" appropriation or secondary road construction are not counted in applying this dollar limitation. The amount that exceeds the limitation can be used only for preliminary planning and design and the acquisition of rights-of-way for Trust Fund projects.

G.S. 136-178. This provision describes the Intrastate System and permits the Department of Transportation to add routes to the System if the routes are built in accordance with the standards for the System.

G.S. 136-179. This provision lists the 32 projects of the Intrastate System that are to be funded from the Trust Fund. For each project listed, the provision indicates the counties that are affected by the project. The projects are listed in numerical order by road type. The projects primarily consist of widening and improving existing Interstate, U.S., and N.C. routes.

G.S. 136-180. This provision lists the seven urban loops that are to be funded from the Trust Fund. The loops are listed in alphabetical order by city. The seven loops are for the cities of Asheville, Charlotte, Durham, Greensboro, Raleigh, Wilmington, and Winston-Salem.

G.S. 136-181. This provision requires Trust Fund revenue used to supplement the "Powell Bill" appropriation to municipalities for city streets to be distributed the same way as that appropriation, which is by population. This supplement is in addition to the appropriation in G.S. 136-181 of the equivalent of a 1 3/4 per gallon tax on motor fuels. Like that appropriation, this supplement is distributed on October I of each year and is based on the amount collected during the fiscal year ending the preceding June 30. Cities will therefore not receive a Trust Fund supplement until October of 1990 because no Trust Fund revenue was collected during the 1988-89 fiscal year.

G.S. 136-182. This provision states the purpose of the secondary road supplement made from the Trust Fund, which is to pave in the next ten years all unpaved, state-maintained secondary roads traveled by at least 50 vehicles a day. It provides that the supplement is to end when the Department of Transportation certifies that all unpaved, state-maintained secondary roads can be paved in the next six years with non-Trust Fund revenue. This supplement is in addition to the allocation for secondary roads of the equivalent of a 1 3/4 per gallon tax on motor fuels. That

allocation is made on the basis of anticipated revenues; therefore, secondary roads will receive a Trust Fund supplement in fiscal year 1989-90.

G.S. 136-183. This provision credits to the Trust Fund. rather than the Highway Fund, money that will become available in fiscal year 1994-95 and subsequent fiscal years from the retirement of highway refunding bonds. The amount increases a few years and then levels off at $38 million when all principal and interest payments on the bonds have been made.

G.S. 136-184. This provision requires the Department of Transportation to make completion schedules for the projects funded from the Trust Fund and to submit annual progress reports on the projects to the Joint Legislative Highway Oversight Committee. It further requires the Department to submit to that Committee any information the Committee needs to determine whether the expenditures from the Trust Fund and the Highway Fund comply with the new distribution formula in G.S. 136-17.2A.

Section 1.2. This section establishes the Joint Legislative Highway Oversight Committee. The Committee consists of 16 legislators, eight appointed by the Speaker of the House of Representatives and eight appointed by the President Pro Tempore of the Senate. Three of the Speaker's appointees must be members of the minority party, and two of the President Pro Tempore's appointees must be members of the minority party. The Committee is funded from Trust Fund revenue allocated for the Intrastate System and is to monitor both Trust Fund and Highway Fund revenues and expenditures and the progress on the Trust Fund projects.

Section 1.3. This section requires the Department of Transportation to submit a proposed Transportation Improvement Program. or proposed interim changes to a Transportation Improvement Program, to members of the Joint Legislative Highway Oversight Committee and a few other listed legislators and staff at least 30 days before the Board of Transportation approves the Program or the interim changes. (Section 74.16 of Chapter 770 changes the 25-day period in Chapter 692 to a 30-day period.)

Section 1.4. This section creates new G.S. 136-1 7.2A, which establishes a distribution formula for Trust Fund revenue spent on the Intrastate System and for revenue spent under the Transportation Improvement Program, other than revenue spent on an urban loop. The formula is designed to ensure that every region in the State receives its fair share of the transportation improvements. The formula divides the State into seven regions by grouping two of the existing 14 highway engineering divisions into a region. The statute lists the counties that are in each region.

Until 90% of the mileage of Intrastate System projects is completed, each region must receive between 90% and 110% of the total amount expended during any consecutive seven-year period multiplied by a factor that is based on the following components and weights: estimated miles to complete the Intrastate System projects in the region compared to the estimated miles to complete the Intrastate System projects in the State, weighted 25%; population of the distribution region compared to the population of the State, weighted 50%; and the fraction one-seventh. weighted 25%. When 90% of the mileage of the Intrastate System projects is completed, the factor by which the amount expended is multiplied changes to have only two components as follows: population of the distribution region compared to the population of the State, weighted 66%; and the fraction one-seventh, weighted 34%.

Although each distribution region receives an equal share over time, each county within a distribution region may not necessarily receive the same amount as all other counties in the

distribution region. The statute, however, directs the Department of Transportation to consider the highway needs of every county in a distribution region.

Section - 1.5. This section amends G.S. 136-28.4 to set a 10% goal for minority participation in construction contracts let by the Department of Transportation. The goal applies to all construction contracts let by the Department, not just the contracts for the Trust Fund projects. The goal is not a quota and parallels the 10% minority participation goal established by the federal government for federal highway contracts.

Section 1.6. This section directs how the Trust Fund supplement for city streets is to be distributed among the cities. Trust Fund revenue is distributed on the same basis as the "Powell Bill" appropriation of motor fuel tax revenue, which is by population.

Sections 1.7 and 1.8. These sections specify how the Trust Fund supplement for secondary roads is to be used. They require the first $68.67 million of the revenue allocated to secondary roads from the Highway Fund and Trust Fund to be distributed on the basis of the formula in G.S. 136-44.5, which contains a two factor formula based on population and unpaved miles, and require the remainder to be distributed based on the number of unpaved miles traveled by at least 50 vehicles a day. The sum "$68.67 million" is the amount of the existing allocation for secondary roads. In effect, all the Trust Fund supplement is applied to paving secondary roads traveled by at least 50 vehicles a day.

Section 1.9. This section prohibits the Department of Transportation from removing a secondary road that is on the list of the top ten roads to be paved by the Department in a county until the road is paved.

Section 1.10. This section requires the Department of Transportation to include in, or include in a document published with, a Transportation Improvement Program a list of any changes made in the previous year's Transportation Improvement Program.

Section 1.11. This section directs the Department of Transportation to make a toll study and determine on which ferries, roads, or bridges, if any, it is desirable to establish tolls. It requires the Department to report its findings to the General Assembly but does not set a date by which the Department must make its report.

Section 1.12. This section authorizes the Legislative Research Commission to study the long-range transportation needs of the state, including alternatives to highway construction.

Sections 1.13, 1.14, 1.15, and 1.16. These sections amend the gasoline tax, special fuel (diesel) tax, and motor carrier tax statutes to separate Trust Fund revenue from Highway Fund revenue. They require 75% of the revenue collected from the fuel taxes to be deposited in the Highway Fund and 25% to be deposited in the Trust Fund. These percentages were chosen because the 5.2¢ increase in the motor fuel tax is approximately 25% of the total motor fuel per gallon tax.

As amended by Chapter 788 of the 1989 Session Laws, Section 1.14 limits the Wildlife Resources Commission's percentage share of gasoline tax revenue to the amount deposited in the Highway Fund but, effective July 1, 1990, increases the amount of the percentage share from 1/8 of 1% to 1/6 of 1%. This change compensates the Wildlife Resources Commission for not receiving a share of the Trust Fund revenue.

Section 1.17. This section is a transitional provision that appropriates $11 million to the Department of Transportation for fiscal year 1989-90 for its expenses incurred in implementing the Trust Fund. Without this provision, the 5% limit for expenses in G.S. 136-176(b) would apply.

Section 1.18. This section adds a new G.S. 136-28.7 to require all steel and cement permanently incorporated into highway and bridge construction projects to be produced in the United States, unless the Department of Transportation finds that the products are not produced in the United States or cost too much. Note that Sections 74.12, 74.14, and 74.15 of Chapter 770 of the 1989 Session Laws all amend this section.

Section 2. 1. This section increases various title fees and allocates part of the fee increases for secondary roads. It increases the fee for issuing a certificate of title from $5 to $35 and increases related fees, such as the fee for recording a lien, to $10. It also directs that $15 of the $30 fee increase for issuing a certificate of title be added to the Trust Fund supplement for secondary roads. Five dollars of the $35 fee remains in the Highway Fund and the rest of the revenue from the $35 fee and all the revenue from the $10 fees is deposited in the Trust Fund. The fee increases are effective August 15. (The act sets an August I effective date. but Chapter 700 of the 1989 Session Laws changes the date to August 15.)

Section 2.2. This section increases the fee for one-day title service from $25 to $50, effective August 15, and requires the fee to be paid in cash or by certified check.

Section 2.3. This section amends G.S. 136-44.20 to permit the Department of Transportation to use up to $5 million of the amount appropriated each year for State construction to develop economical transit alternatives to highway construction.

Section 3.1. This section increases the sales tax cap on boats, aircraft, railway cars, and locomotives from $300 to $1,500, effective August 1, 1989. It does not affect the sales tax rate, which remains at 2%.

Section 3.2. This section distinguishes manufactured homes from motor vehicles so that manufactured homes are not affected by the changes in the taxation of motor vehicles made by this act. Under prior law, a manufactured home was considered a motor vehicle for sales tax purposes. Manufactured homes continue to be taxed under the sales tax at the rate of 2% with a $300 cap.

Sections 3.3 through 3.6. These sections exempt motor vehicles from sales tax, effective October 1, 1989. and allow a credit against the equipment use tax for taxes paid in another state. Motor vehicles are exempted from sales tax because they are subject to the new "highway use" tax levied in Section 4.1 of this act. The equipment use tax credit is the same as was recommended by the Revenue Laws Study Committee and introduced as House Bill 58. The sales tax cap of $1,500 on boats, aircraft, railway cars, and locomotives established in Section 3.1 of this act is preserved by Section 74.4 of Chapter 770 of the 1989 Session Laws.

Sections 3.7. through 3.10. These sections make technical changes to the local sales and use tax statutes and acts to make those statutes and acts conform to the revised structure of the sales tax statutes. These sections make no substantive changes.

Section 4.1. This section enacts a new Article 5A in Chapter 105 of the General Statutes. The new Article levies a titling tax, called a "highway use" tax, on the issuance of a certificate of title for a motor vehicle. The titling tax replaces the 2%, $300 maximum sales tax on motor vehicles.

G.S. 105-165. This provision applies the sales tax definitions to the highway use tax and defines Commissioner of Motor Vehicles and Division of Motor Vehicles.

G.S. 105-166. This provision states the nature of the tax levied by the new Article. The tax is a privilege tax on the privilege of using the highways of this State.

G.S. 105-167. This section sets the rate of the highway use tax. The rate is 3% of the retail value of the vehicle for which a title is issued. The tax cannot be less than $40, cannot exceed $1,000 until July 1, 1993. and cannot exceed $1,500 after that date. The retail value of a vehicle is determined as follows:

(1) New vehicle-- value is the sales price, less the amount of any trade-in allowance.

(2) Used vehicle sold by a dealer-- value is the sales price, less the amount of any trade-in allowance.

(3) Used vehicle sold by a person who is not a dealer-- value is presumed to be the wholesale book value of the vehicle. A person who disagrees with the presumed value must pay the tax due based on the presumed value, but may appeal the value to the Commissioner of Motor Vehicles in accordance with new G.S. 105-174.

(4) Vehicle transferred for a reason other than a sale of the vehicle, such as a gift-- value is presumed to be the wholesale book value of the vehicle. A taxpayer who disagrees with the presumed value must pay the tax due based on the presumed value, but may appeal the value to the Commissioner of Motor Vehicles in accordance with new G.S. 105-174.

G.S. 105-168. This section states how the highway use tax is collected. The tax is collected by the Commissioner of Motor Vehicles when a title is issued. A motor vehicle dealer can collect the tax due and remit the tax when applying for a certificate of' title on behalf of the purchaser of a vehicle. The tax must be paid, however, before a title can be issued.

G.S. 105-169. This section provides an alternate gross receipts tax for lessors and renters of motor vehicles. It gives those who lease or rent motor vehicles the option of paying the highway use tax when they purchase a vehicle for lease or rent or of paying a tax on the gross lease or rental receipts subsequently received when the vehicle is leased or rented. The optional tax on gross receipts is 8% on leases or rentals to the same person for no more than 90 days, and it is 8% for the first 90 days of a lease or rental to the same person for more than 90 days and 3% for the period in excess of 90 days. The maximum highway use tax applies to lease or rental receipts, but the maximum is computed anew on each lease or rental of the vehicle to a different person. The optional tax is collected by the Department of Revenue instead of the Commissioner of Motor Vehicles in the same manner as sales and use taxes are collected under Article 5 of Chapter 105 of the General Statutes.

The option of paying a gross receipts tax applies to vehicles purchased on or after October 1, 1989, the effective date of the tax change, it does not apply to vehicles owned on that date. The lease or rental of vehicles owned as of October 1 is subject to the new 8% short-term and 3% long-term rates, and the lessor or renter does not have the option on October 1 of paying a use tax on the vehicles rather than charge the new rates. The change, however, applies only to leases oi- rentals made on or after October l. Therefore, the change does not affect a long-term lease in effect on October 1, for example, until the lease is renewed.

G.S. 105-170. This section sets the full and partial exemptions from the highway use tax. Two types of title transactions are exempt, several are subject to only the $40 minimum tax, and out-of-state vehicles titled in this State have a special $100 maximum. The sales tax exemptions and refund provisions do not apply to the highway use tax. Therefore. the local governmental entities and the nonprofit organizations that receive refunds of sales taxes do not receive refunds of the highway use tax.

The two types of transfers of title that are exempt from the new highway use tax are titles for wrecked vehicles transferred to an insurance company and titles transferred to a motor vehicle dealer when the car is to be sold by the dealer. Section 74.9 of Chapter 770 of the 1989 Session Laws adds the second of these exemptions.

The transfers that are subject to only the $40 minimum tax are: gifts between spouses or a parent and child, transfers by will or intestacy, distributions of marital property, transfers to a person who has a lien on the transferred motor vehicle, Internal Revenue Code § 351 or 721 transfers to a partnership or corporation upon the formation of the entity or to a corporation upon the merger or consolidation of the corporation with another entity. and transfers to (he same owner to reflect a change in the owner's name. These transfers are considered partial exemptions because they are subject to the $40 minimum.

Titles issued for vehicles of out-of-State residents who move to this State have a maximum tax of $100. This maximum applies to titles issued to motor vehicles that have previously been titled in another state for at least 90 days.

G.S. 105-171. This section provides a credit against the highway use tax for sales tax or any similar tax paid to another state on the out-of-state purchase of a motor vehicle that is titled in this State within 90 days after it is purchased. If the tax paid to the other state is less than the amount of highway use tax payable upon the titling of the vehicle in this State, the owner must pay the difference to the Commissioner of Motor Vehicles before a title can be issued.

G.S. 105-172. This section allows a refund of all but the minimum $40 highway use tax paid on a purchased motor vehicle that turns out to be a "lemon. " To obtain a refund, the "lemon" must be returned within 90 days after it was purchased and the buyer must have received either a refund of the purchase price or a replacement of the vehicle. An application for a refund must be filed with the Commissioner of Motor Vehicles within 30 days after receiving the refund or the replacement vehicle.

G.S. 105-173. This section directs the disposition of revenue from the highway use tax and the optional gross receipts tax. All revenue from the highway use tax is deposited in the Highway Trust Fund. Revenue from the optional gross receipts tax is placed in the Trust Fund if it is at the 3% rate and is placed in the General Fund if it is at the 8 % rate. Generally, therefore, revenue from long-term leases or rentals is deposited in the Trust Fund. and revenue from short-term leases or rentals is deposited in the General Fund.

Part of the revenue deposited in the Trust Fund is transferred to the General Fund each year. The amounts transferred in fiscal years 1989-90 and 1990-91 are set out in Section 4.3 of this act ($279.4 million for 1989-90 and $356 million in 1990-91). In subsequent fiscal years, $170 million is transferred to the General Fund. The amount of $170 million was chosen because it is the amount of sales tax revenue the General Fund received from the sale of motor vehicles before the repeal of the sales tax on motor vehicles.

G.S. 105-174. As amended by section 74.8 of Chapter 770 of the 1989 Session Laws, this section sets out the penalties and remedies applicable to the highway use tax. It imposes a 10% penalty for bad checks offered in payment of the highway use tax, gives the Division of Motor Vehicles the same collection remedies that apply to other taxes collected by the Division. and establishes an appeal procedure.

To appeal the presumed value of a vehicle, the taxpayer disputing the value must provide two independent estimates of the motor vehicle's value to the Commissioner of Motor Vehicles.

If the Commissioner agrees with the taxpayer, the taxpayer receives a refund of any overpayment of tax with interest from the date the tax was paid.

Section 4.2. This section raises the maximum highway use tax from $1,000 to $1,500 effective July 1, 1993.

Section 4.3. This section specifies how much Trust Fund revenue is to be transferred to the General Fund in this biennium. The amount of the transfers are:

1989-90 fiscal year-- $279 million.

1990-91 fiscal year-- $356 million.

Section 5.1. Effective August 1, 1989, this section increases the fuel tax by a flat Y per gallon plus 4% of the average wholesale price and mandates that the percentage component of the gas tax cannot be less than 3 1/2¢. The prior tax rate was a flat rate of 14¢ per gallon plus 3% of the average wholesale price. Before the increase the tax was 15.7¢ a gallon, after the increase the tax was 20.9¢ a gallon. The tax therefore increased by 5.2¢ a gallon.

Section 5.2. This section amends the statute that permits those who buy motor fuel for a purpose other than driving on the highway to get a refund of the tax paid on the fuel, less 1¢ a gallon. The section increases the refund rate to the new tax rate, less 1¢.

Section 5.3. This section amends the statute that permits The Department of Transportation, counties, cities, volunteer rescue squads, volunteer fire departments, and sheltered workshops to receive a tax refund of the motor fuel tax paid on fuel used by them, less 1¢ a gallon. The section increases the refund rate to the new tax rate, less 1¢.

Section 5.4. This section amends the statute that permits taxis and transit system buses to receive a refund of the motor fuel tax paid on fuel used by them, less IC a gallon. The section increases the refund rate to the new tax rate, less 1¢.

Section 5.5. This section amends the statute that permits vehicles, like concrete mixers, that use fuel for a purpose other than to propel the vehicle to receive a partial refund of the motor fuel tax paid by them. It increases the refund rate to one-third of the motor fuel tax paid, less I C a gallon.

Section 5.6. This section amends the statute that permits those who purchase motor fuel that is transported outside the state to receive a refund of the amount of motor fuel tax paid by them on the fuel, less I C a gallon. The section increases the refund rate to the new tax rate, less I C.

Section 5.7. This section amends the statute that gives motor carriers a credit against their highway use tax, or road tax, liability for the amount of motor fuel tax paid on fuel purchased in this State. The highway use tax is a tax imposed on motor carriers at the rate of the gas tax. Those that drive only in this state pay no tax because they also buy their gas here and the tax paid on the gas offsets their liability for the highway use tax. Those that do not buy their gas here pay the highway use tax. Unlike the gas tax refunds described in the previous sections, the gas tax credit is for the full amount of the tax paid with no I c a gallon reduction.

Sections 5.8 through 5.13. These sections are transitional provisions that require those who have motor fuel on hand on the effective date of the gas tax increase to pay the difference in the old tax rate and the new tax rate. The provisions also set the quarterly and annual refund rates that apply to the first quarter and year following the increase. Annual refund claims are made on a calendar year and not a fiscal year basis.

Section 5.14. This section repeals a change to a motor carrier statute that was made earlier in the 1989 Session and conflicts with this act.

Sections 6.1 and 6.2. These sections repeal the nirrent $10 fee motor carriers must pay to register for payment of the road tax, which is also known as Ille highway use tax. The fee is repealed because fees similar to this fee have been held unconstitutional by the United States Supreme Court as a burden on interstate commerce.

Section 6.3. This section repeals a change made to the definition of motor carrier in G.S. 20-88.01 in a previous act of the 1989 Session. The changed definition has no application outside the repealed fee and is therefore unnecessary.

Section 7.1. This section raises the estimated individual income tax reporting threshold from 80% of the tax due to 90%. This change conforms to federal law. Effective with the 1990 tax year, a person who is required to make estimated individual income tax payments during the year must pay at least 90% of the amount due to avoid having to pay a penalty.

Section 8.1. This section makes it clear that the requirement imposed by the act that secondary roads remain on a priority list until paved applies to the list adopted for the 1988-89 fiscal year.

Section 8.2. This section preserves a taxpayer's and the State's rights to refunds and to the collection of taxes when a tax is repealed under this act.

Section 8.3. This section specifies when the parts of the act become effective. The increase in the sales tax on boats, airplanes. railway cars, and locomotives is effective August 1. The titling tax is effective October 1. The title fee increases are effective August 15 (by operation of Chapter 700). The gas tax increase is effective August 1. The income tax reporting change is effective for taxable years beginning on or after January 1, 1990. The road tax registration fee is repealed effective January 1, 1990. The Trust Fund provisions are effective August 1.

Section 8.4. This section sunsets the Trust Fund and the tax and fee increases made by the act when all contracts for the Trust Fund projects have been let and sufficient revenue has been accumulated to pay the contracts. When the revenue has accumulated, the Secretary of Transportation will certify that occurrence, and then the titling tax will be repealed and the sales tax on cars reinstated at the rate of 2% with a $300 cap. the gas tax increase will be repealed, the $35 title fee will be reduced to $10, the Trust Fund will be abolished, and the Joint Legislative Highway Oversight Committee will be abolished.

$170 Million Highway Trust Fund Transfer
Background Explanation

Prior to the enactment of the Good Roads Package in 1989, a sales tax was levied on the sale of motor vehicles. The proceeds of the tax went to the General Fund. During the last couple of years in which the tax was collected, the yield was around $170 million (almost no year-to-year growth).

The 1989 package converted the tax from a sales tax to a much-broader highway use tax and both the tax rate and tax limit per vehicle was raised. The proceeds of the tax are credited to the Highway Trust Fund. For the 1989-91 biennium, the full amount of the proceeds from the new tax was transferred to the General Fund. This was part of a budget agreement that resulted from concerns by school advocates that the "motor vehicles sales tax" belonged totally to the General Fund and highway advocates who felt that all of the new tax should remain with the Trust Fund.

For years after 1990-91 a flat $170 million was to be transferred to the General Fund. The idea was that this would be a full hold harmless to the General Fund for the loss of the revenue it

formerly received from the sales tax on motor vehicles. No growth was provided because it was felt that the motor vehicle sales tax had not grown in the years leading up to 1989.

1989 Chapter 704 (House Bill 945, Rep. Pryor Gibson)

AN ACT TO EXEMPT VENTURE CAPITAL COMPANIES FROM INTANGIBLES TAX.

Effective for taxable years beginning on or after January 1, 1989, this act exempts venture capital firms from paying intangibles tax. A venture capital firm, as defined in this act, is a person, corporation, partnership, limited partnership, or other entity that meets all the following requirements:

(1) Invests in the securities of a company for the sole purpose of selling the securities in the future.

(2) Is not organized to make a permanent investment in one type of company.

(3) Is organized for the purpose of investing more than 50% of all its investments, other than its idle funds, in the equity securities or subordinated debt of companies that at the time of the investment:

   a. Had no more than 100 owners of their securities, excluding officers, directors, partners, and employees;

   b. Were not financial institutions; and,

   c. Did not derive their income or value primarily from real estate.

(4) Has the remainder of its investments in shares of stock or other investments on which no tax is either imposed or is payable under this Article.

A venture capital firm can rely on the written representations of a company as to the number of owners of its securities.

1989 Chapter 705 (House Bill 1775, Rep. Steve Wood)

AN ACT TO INCREASE THE MAXIMUM PROPERTY TAX EXCLUSION FOR RESIDENCES OF DISABLED VETERANS.

G.S. 105-275(21) allows a property tax exclusion for specially adapted housing (including land) owned and used by a disabled veteran receiving benefits under 38 U.S.C. 801. This act increases the maximum amount of the exclusion from $34,000 to $38,000 to bring it in line with the corresponding federal grant amount. The act is effective for taxable years beginning on or after January 1, 1990.

1989 Chapter 713 (Senate Bill 1163, Senator Russell Walker)

AN ACT TO PROVIDE THAT A PAID PREPARER OF TAX RETURNS MAY NOT DESIGNATE ON A TAXPAYER'S RETURN WHETHER OR

NOT TAX FUNDS SHALL BE PAID FOR THE USE OF POLITICAL PARTIES UNLESS THE PREPARER OBTAINS THE CONSENT OF THE TAXPAYER OR THE TAXPAYER'S SPOUSE.

G.S. 105-159.1 allows a taxpayer to designate on her or his income tax form that $1.00 of the amount of tax paid shall be used for the North Carolina Political Parties Financing Fund. This act provides that a paid preparer of tax returns, such as an accountant or attorney, may not make a designation on the return either for or against such use of the $1.00 unless the taxpayer or the taxpayer's spouse consents to the designation. The act is effective beginning with the 1989 tax year.

1989 Chapter 716 (Senate Bill 405, Senator J. K. Sherron)

AN ACT TO INCREASE THE MAXIMUM INCOME TAX CREDIT FOR DONATIONS OF REAL PROPERTY FOR LAND CONSERVATION.

Effective for taxable years beginning on or after January 1, 1989, this act increases both the maximum individual and the maximum corporate income tax credits allowed for certain donations of property from $5,000 to $25,000. The credit applies to property that is donated to a governmental entity or to a nonprofit conservation organization and can be used for public beach access, public access to public waters or trails, fish and wildlife conservation, or other similar land conservation purposes.

The credit allowed is 25% of the fair market value of the donated property, not to exceed $25,000. The credit cannot reduce the taxpayer's income tax liability below zero and any excess credit cannot be carried forward to subsequent years.

1989 Chapter 718 (Senate Bill 894, Senator George Daniel)

AN ACT TO ELIMINATE DOUBLE TAXATION OF INCOME IN RESPECT OF A DECEDENT.

This act allows a taxpayer to deduct from federal taxable income the amount of inheritance tax paid by the taxpayer on certain property, such as an installment note, that generates future income and an accompanying income tax. The deduction is allowed from federal taxable income because, with the enactment of Chapter 728 of the 1989 Session Laws, North Carolina personal income tax is a percentage of federal taxable income. Federal law allows a similar deduction for the amount of federal estate tax attributable to income-producing property. The act is effective for taxable years beginning on or after January 1, 1989.

The principle underlying this deduction is the avoidance of double taxation of the same property by both an inheritance tax and an income tax. Under prior law, a person who inherited an installment note or other type of property that represents a right to future income paid inheritance tax upon receiving the property and then paid income tax upon receipt of the income. This act eliminates this double taxation aspect by providing an income tax deduction for the amount of inheritance tax paid on the property.

1989 Chapter 723 (House Bill 457, Rep. Steve Wood)

AN ACT TO EXCLUDE FROM AD VALOREM TAXATION REAL AND PERSONAL PROPERTY OWNED BY NONPROFIT ORGANIZATIONS AND LEASED BY UNITS OF GOVERNMENT FOR PUBLIC PURPOSES.

This act exempts a limited category of property from property tax effective for taxable years beginning on or after January 1, 1989. It exempts property that is owned by a nonprofit corporation organized at the request of a local government unit for the sole purpose of financing projects for public use, is leased to the unit of government that requested the formation of the corporation, and is used for a public purpose. Once an owner of this type property applies for the exemption and the application is approved, the act relieves the owner of the duty of reapplying for the exemption in future years.

To enable property owners to take advantage of the exemption in 1989, the act permits an application for the exemption to be filed on or before September 1, 1989. Normally, applications for property tax exemptions must be filed during the regular listing period.

1989 Chapter 728 (Senate Bill 51, Senator Dennis Winner)

AN ACT TO ENHANCE THE SIMPLICITY AND FAIRNESS OF THE STATE INCOME TAX SYSTEM.

This act, the Tax Fairness Act of 1989, conforms the State individual income tax to the federal income tax law in order to simplify calculation of the tax, provide tax relief to low income taxpayers, and enhance the Department of Revenue's ability to enforce the law. The act revises the Individual Income Tax Act, effective with the 1989 tax year, to tax at the rates of 6% and 7% each taxpayer's taxable income, which is calculated as the individual's federal taxable income attributable to North Carolina, minus amounts that are exempt from State income tax, and plus amounts that are taxed by the State but not by the federal government. These revisions have the effect of modernizing the tax system and adjusting it for inflation by increasing personal exemptions and the standard deduction. As a result, taxes will be reduced for approximately 65% of low to moderate income taxpayers and increased to some extent for the remaining taxpayers. Tax exempt bonds and social security benefits will remain exempt from tax.

The act also authorizes married couples to file joint returns, makes conforming changes to the income tax provisions applicable to Subchapter S Corporations and estates and trusts, increases the child and dependent care tax credit from 7% to 10% for pre-school children and disabled dependents, and makes conforming changes to other parts of Chapter 105 of the General Statutes.

The act was amended by Chapter 792 of the 1989 Session Laws, discussed below, to exempt from tax $4,000 of state, local, and federal retirement benefits or $2,000 of private retirement benefits. Because this act will change the amounts of tax that should have been withheld or paid as estimated tax for 1989, it provides that no estimated tax penalty will be imposed for an underpayment for the 1989 tax year to the extent the underpayment is due to the changes made by the act. Recommended by the Tax Fairness Study Commission.

For a more detailed discussion of the Tax Fairness Act of 1989, see the following explanation:

EXPLANATION OF SENATE BILL 51, CHAPTER 728 OF THE 1989 SESSION LAWS

The Tax Fairness Act of 1989

Table of Contents

Part 1. Income Tax Reform.

A. Individual Income Tax Act Amendments.

B. S Corporation Income Tax Act Amendments.

C. Income Tax Act for Estates and Trusts Amendments.

D. Chapter 105 Conforming Amendments.

Part 11. Savings Clause and Effective Date.

Summary

Part I of the act revises the Individual Income Tax Act, effective with the 1989 tax year, to tax at the rates of six percent (6%) and seven percent (7%) each taxpayer's taxable income. which is calculated as the individual's federal taxable income attributable to North Carolina, minus amounts that are exempt from State income tax, and plus amounts that are taxed by the State but not by the federal government. Part I also authorizes married couples to file joint returns, makes conforming changes to the income tax provisions applicable to Subchapter S Corporations and estates and trusts, increases the child and dependent care tax credit for certain dependents, and makes conforming changes to other parts of Chapter 105 of the General Statutes.

Part 11 of the act provides the savings clause and effective dates for the bill. Because Part I will change the amounts of tax that should be withheld or paid as estimated tax for 1989, Part 11 provides that no estimated tax penalty will be imposed for an underpayment for the 1989 tax year to the extent the underpayment is due to Part I of the act.

Section by Section Analysis

Part I of the act reforms the individual income tax laws of this State. Subpart A of Part I rewrites the Individual Income Tax Act, Division 11 of Article 4 of Chapter 105 of the General Statutes. Sections 1. 1 and 1.2 make minor changes regarding the title and purpose of the Individual Income Tax Act. Section 1.3 repeals 23 statutes from current law that relate to definitions, tax rates, year of assessment, calculation of gross income and net income, deductions, and exemptions.

Section 1.4 adds nine new statutes to replace those deleted by Section 1.3. New § 105-134. 1, Definitions. modifies or deletes existing definitions and adds new definitions as necessary for the new law. The Internal Revenue Code referenced is the law as of January 1. 1989, but does not include provisions to automatically increase exemptions and standard deductions to keep up with inflation. Definitions from the Code are adopted by cross-reference.

New § 105-134.2 imposes the individual income tax as a percentage of each individual's North Carolina Taxable Income. which is federal taxable income adjusted as provided below. As in the federal law. there are separate brackets for married individuals filing joint returns and surviving

spouses. heads of households, single individuals. and married individuals filing separate returns. The brackets are as follows:

Joint return	$0-21,25	6%
	Over $21.250	7%
Head of Household	$0- 17,000	6%
	Over $17,000	7%
Single	$0- 12,750	6%
	Over $12.750	7%
Separate return	$0- 10,625	6%
	Over $10,625	7%

New § 105-134.3, providing that the tax is paid in the year following the taxable year, is the same as current G.S. 105-137, repealed by Section 1.3 above. New § 105-134.4 requires taxpayers to use the same taxable year for State tax purposes as for federal tax purposes.

New § 105-134.5 defines North Carolina Taxable Income as federal taxable income adjusted as provided in new §§ 105-134.6 and 105-134.7. below. For nonresidents and part-year residents the amount is further adjusted to exclude income that is not attributable to North Carolina sources. For S Corporations and partnerships, corporate income apportionment formulas from the Corporation Income Tax Act' are used to determine the amount of income that is attributable to North Carolina.

New § 105-134.6 provides for adjustments to federal taxable income in calculating North Carolina Taxable Income. In subsection (a), certain S Corporation income is adjusted in the same way as corporate income under the Corporation Income Tax Act. In subsection (b), amounts are deducted if they are to be exempt from State income tax: interest on U.S.. North Carolina, and local government obligations; interest on and gain from the disposition of tax exempt obligations; retirement benefits under the Social Security Act and the Railroad Retirement Act; up to $1,500 received as compensation for national guard service; and refunds of State, local. or foreign income taxes included in the taxpayer's gross income. In subsection (c), amounts are added if they are exempt from federal- income tax but not State income tax: interest on obligations of other states and their political subdivisions-, income taxed under federal law separately from taxable income; State, local, and foreign income taxes; and automatic increases in federal exemptions and deductions.

New § 105-134.7 provides for adjustments to federal taxable income necessary to effect the transition from current law to the new State tax law enacted by the act. These adjustments relate to calculating the basis of property when it is transferred, recognizing gain that was previously unrecognized, carrybacks and carryforwards of net losses, and carryforwards of other losses and deductions. The section also authorizes the Secretary of Revenue to require other adjustments as necessary to avoid double taxation or unintended exemptions due to the transition from old to new law.

New § 105-134.8 is essentially the same as current G.S. 105-146. This statute authorizes the Secretary of Revenue to take inventories.

Sections 1.5-1.7. 1.9, 1.10, 1.12-1.15, and 1. 17-1.20 carry forward the following tax credits with conforming changes:

G.S. 105-15 1.	Tax credits for income taxes paid to other states by individuals.
G.S. 105-151.1.	Tax credit for construction of dwelling units for handicapped persons.
G.S. 105-151.2.	Credit for solar hot water, heating, and cooling.
G.S. 105-151.5.	Credit for conversion of industrial boiler to wood fuel.
G.S. 105-151.6.	Credit for construction of a fuel ethanol distillery.
G.S. 105-151.7.	Credit for installation of a hydroelectric generator.
G.S. 105-151.8.	Credit for installation of solar equipment for the production of industrial or process heat.
G.S. 105-151.9.	Credit for installation of a wind energy device.
G.S. 105-151.10.	Credit for construction of a methane gas facility.
G.S. 105-151.12.	Credit for certain real property donations.
G.S. 105-151.13.	Credit for conservation tillage equipment.
G.S. 105-151.14.	Credit for gleaned crop.
G.S. 105-151.15.	Credit for distributing North Carolina wine.
G.S. 105-151.17.	Credit for creating jobs in severely distressed county.

Section 1. 16 modifies G.S. 105-15 1.11, Credit for child care and certain employment related expenses, to track the federal credit and increase the percentage of child care or dependent care expenses that is allowed as a credit from seven percent (7%) to ten percent (10%) for dependents that are under seven years old or are physically or mentally incapable of caring for themselves.

Sections 1.8, 1.11, and 1.21 of the bill repeal the following individual income tax credits:

G.S. 105-151.4.	Credit against personal income tax for construction of cogenerating power plants.
G.S. 105-151.6A.	Credit against personal income tax for construction of a peat facility.
G.S. 105-151.16.	General credit for individuals with low or moderate incomes.

Section 1.22 adds two new tax credits to the Individual Income Tax Act: § 105-151.18, Credit for the disabled, and § 105-151.19, Credit for North Carolina dividends. The credit for the disabled allows a low-income or moderate-income person who is permanently and totally disabled and retired on disability income a tax credit of up to $250.00 if single or $375.00 if married filing a joint return. The credit for North Carolina dividends allows a credit equal to six percent (6%) of the amount of dividends received from corporations doing at least 50% of their business in North Carolina, up to a maximum credit of $300.00 if single or $600.00 for a married couple.

Section 1.23 amends G.S. 105-152 to make conforming changes, authorize joint returns, and authorize the Secretary to require taxpayers to attach a copy of their federal return to their State return. Section 1.24 adds a new § 105-152.1 to provide that a husband and wife may file a joint

return tinder certain circumstances. Sections 1.25-1.27 and 1.29-1.32 make conforming changes to the following individual income tax statutes:

G. S. 105-154.	Information at the source.
G.S. 105-155.	Time and place of filing returns.
G. S. 105-156.	Failure to file returns-, supplementary returns.
G. S. 105-157.	Time and place of payment of tax.
G. S. 105-158.	Abatement of income taxes of certain members of the armed forces upon death.
G. S. 105-159.	Corrections and changes.
G. S. 105-159.1.	Designation of tax by individual to political party.

Section 1.28 repeals G.S. 105-156. 1, which was recodified as § 105-134.8, above.

Subpart B of Part I of the act amends the S Corporation Income Tax Act, Division I-S of Article 4 of Chapter 105 of the General Statutes, to conform to the rewrite *of* the Individual Income Tax Act. Sections 1.33 and 1.34 amend Chapter 1089 of the 1987 Session Laws to make conforming changes and to change that law's effective date *of* July 1, 1990, to January 1, 1989. Section 1.35 revises Division I-S to provide that State taxation of Subchapter S Corporations and their shareholders shall be done in the same way as under the Code, and to make conforming and technical changes.

Subpart C of Part I of the act, Sections 1.36-1.38, rewrites the Income Tax Act for Estates and Trusts. Division III of Article 4 of Chapter 105 of the General Statutes. to conform to the rewrite of the Individual Income Tax Act. Subpart D *of* Part I of the act, Sections 1.39-1.48, makes changes to cross-references in Chapter 105 needed because the provisions referenced were rewritten by the act and clarifies the language in these statutes.

Part 11 provides that the act is effective for taxable years beginning on or after January 1, 1989. It does not affect pending litigation. No penalty for underpayment of estimated taxes for 1989 will be imposed if the underpayment was due to the tax law changes contained in Part 1.

1989 Chapter 736 (House Bill 1397, Rep. Gene Wilson)

AN ACT TO PROVIDE SPECIAL RULES FOR USE VALUE TAXATION OF CHRISTMAS TREES.

Effective for taxable years beginning on or after January 1, 1990, this act changes the horticultural use value requirements for land used to produce evergreens intended for use as Christmas trees. The act directs the Department of Revenue to establish, with the assistance of the Use-Value Advisory Board, requirements for horticultural land used to produce Christmas trees that differ from the gross income requirements for other horticultural land.

Under prior law, all land qualifying for horticultural use value must have produced an average gross income of at least $1,000 for three years preceding January 1 of the year for which the benefit was claimed. Often, this requirement could not be met by horticultural land used for the production of evergreens intended for use as Christmas trees because of the income fluctuations that result from the lengthy and varied growth periods of evergreens.

The act directs the Department to establish a "qualifying requirement" in lieu of a "gross income requirement" to be used for horticultural land used to produce Christmas trees until the trees are harvested from the land. The Department is also directed to establish a new gross income requirement for this type of horticultural land, that differs from the income requirement for other horticultural land, to be used when the trees are harvested from the land.

1989 Chapter 748 (Senate Bill 1145, Senator Ted Kaplan)

AN ACT TO PROVIDE THAT SALES AND USE TAXES DO NOT APPLY TO THE LEASE OR RENTAL OF TOBACCO SHEETS AND TO PERMIT THE NEW HANOVER COUNTY AIRPORT AUTHORITY TO RECEIVE ANNUAL SALES AND USE TAX REFUNDS.

Tobacco sheets are burlap sheets used in handling tobacco in the warehouse and transporting tobacco to and from the warehouse. In order to alleviate a shortage of tobacco sheets, a corporation was formed to repair existing sheets, purchase new sheets, supply sheets to warehouses, and pick up sheets from warehouses and plants for redistribution. Warehouses, farmers, and purchasers of tobacco will pay a 25¢ fee for the use of each sheet in order to finance this supply system. This act provides that, effective August 1, 1989, sales and use taxes do not apply to the 25¢ fee for use of a tobacco sheet.

This act also contains a technical correction to the law authorizing the creation of a New Hanover County Airport Authority to clarify that the airport authority will be eligible for sales and use tax refunds to the same extent as a municipal corporation. The technical correction is effective upon ratification.

1989 Chapter 753 (Senate Bill 740, Senator Howard Bryan)

AN ACT TO AUTHORIZE THE NORTH CAROLINA DEPARTMENT OF REVENUE TO ENTER INTO AGREEMENTS WITH THE EASTERN BAND OF CHEROKEE INDIANS REGARDING REFUNDS OF MOTOR FUELS AND SPECIAL FUELS TAXES, TO INCREASE THE NUMBER OF COUNTIES ELIGIBLE FOR CLASSIFICATION AS A SEVERELY DISTRESSED COUNTY FROM TWENTY TO TWENTY-FIVE, AND TO PROVIDE ELIGIBILITY CRITERIA FOR TAX CREDITS FOR SEVERELY DISTRESSED COUNTIES.

Effective retroactively to January 1, 1985, this act authorizes the Department of Revenue to enter into a memorandum of understanding or an agreement with the Eastern Band of Cherokee Indians to make refunds of motor and special fuel taxes paid by the Indians for fuel purchased on the reservation. These refunds will be made to the Tribe on behalf of its members who reside on or engage in otherwise taxable transactions within Cherokee trust lands. Any agreement must be approved by the Tribal Council and signed by the Chief on behalf of the Tribe.

Individual members of the Tribe, however, remain entitled to a refund upon application. Amounts refunded to individual members of the Tribe are deducted from the amounts to be refunded to the Tribe. All refunds are charged to the Highway Fund.

The United States Supreme Court has ruled on numerous occasions that Indians and Indian property on an Indian reservation are not subject to state taxation unless Congress expressly grants this authority to the state. Congress has not granted North Carolina the authority to levy motor and special fuel taxes on the Eastern Band of Cherokee Indians, which is the only federally recognized Indian tribe in North Carolina. It should be noted, therefore, that refunding money to the Council on behalf of the members, or to individual members, does not preclude an individual member or members from bringing legal action against the State, based on the Constitution and federal statutes, to invalidate any State tax imposed on the sale of motor or special fuels to members of the Tribe on Cherokee trust lands.

Effective for taxable years beginning on or after January 1, 1989, this act also amends the law granting an income tax credit to a corporation or an individual who creates jobs in a severely distressed county. That credit is also amended by Chapter 111 of the 1989 Session Laws, discussed above.

The General Assembly created this income tax credit in 1987; it will expire for taxable years beginning on or after January 1, 1993. To be eligible for the credit, the individual or corporation claiming the credit must employ nine or more people for at least 40 weeks during the year and the business must be located in a severely distressed county. A taxpayer meeting these requirements may claim a $2,800 credit for each additional full time employee hired. The credit of $2,800 must be taken in equal installments over the four years following the year in which the additional employee was hired. The credit is conditioned on the continued employment of the number of employees the taxpayer had upon hiring the employee that caused the taxpayer to qualify for the credit.

Under prior law, the 20 counties with the highest distress factors were considered the "severely distressed counties." The act increases the number of severely distressed counties to the 25 counties with the highest distress factors. The distress factor is based upon the county's rate of unemployment and per capita income.

The act also establishes a third eligibility requirement for the tax credit. To be eligible for the tax credit, the taxpayer must have obtained this tax credit for taxable year 1988 or be engaged either in the manufacturing of goods or in an industrial activity.

1989 Chapter 769 (Senate Bill 50, Senator Dennis Winner)

AN ACT TO CLARIFY THAT INCOME DERIVED FROM DEPOSITS AT THE FEDERAL HOME LOAN BANK IS EXEMPT FROM STATE INCOME TAX.

Effective for taxable years beginning on or after January 1, 1989, this act exempts from income taxation the amount of interest earned by savings and loan associations on deposits they maintain at the Federal Home Loan Bank of Atlanta. To be eligible for this exemption, the savings and loan association must meet the qualified thrift lender test set forth in the federal Financial Institutions Reform, Recovery and Enforcement Act of 1989 (Pub. L. No. 101-73).

1989 Chapter 772 (Senate Bill 699, Senator Bob Shaw)

AN ACT TO IMPOSE AN EXCISE TAX ON CONTROLLED SUBSTANCES.

This act imposes an excise tax on the illegal possession of controlled substances, effective January 1, 1990. The act is designed to provide additional deterrence and punishment for illegal drug dealers as well as an economic disincentive to trafficking in drugs. The tax applies to possession of more than 42.5 grams of marijuana, seven or more grams of any other controlled substance sold by weight, or ten or more dosage units of a controlled substance not sold by weight. The tax is at the rate of $3.50 per gram of marijuana, $200 per gram of other controlled substance sold by weight, and $400 per ten dosage units of a controlled substance not sold by weight.

Like the cigarette tax, this tax is paid through the purchase of tax stamps. The stamps must be affixed to the substance to show that the tax has been paid. Failure to pay the tax is a felony; a person who possesses a controlled substance on which the tax is not paid is liable for the amount of the tax plus an additional penalty of 100% of the amount of tax due. Failure to pay the tax is a Class I felony, punishable by up to five years' imprisonment, an unlimited fine, or both.

This act requires local law enforcement agencies and the State Bureau of Investigation to notify the Department of Revenue of drug arrests to enable the Department to collect the tax from those arrested. Because of uncertainty regarding the amount of revenue that may be derived from this tax, any proceeds collected are to be held in a special fund until the General Assembly determines that they may be deposited in the General Fund.

1989 Chapter 782 (House Bill 1668, Rep. R. Hunter)

AN ACT TO ALLOW AN ADDITIONAL THIRTY-DAY PERIOD FOR THE SELLER OF A MOTOR VEHICLE TO FILE AN AFFIDAVIT STATING THAT THE SALE WAS EXEMPT FROM SALES TAX AND TO CLARIFY THE LAW ABOLISHING PARENT-CHILD IMMUNITY IN MOTOR VEHICLE CASES.

This act gives a retailer who sells a motor vehicle to a nonresident a second chance to report the sale to the Department of Revenue, thereby preserving the conditional exemption of the sale of the motor vehicle from sales tax. Under prior law, G.S. 105-164.13(32) exempted from sales tax motor vehicles sold to nonresidents for immediate transportation to another state. To obtain the exemption, however, a retailer who sold a motor vehicle to a nonresident had to report the sale by affidavit to the Department of Revenue when filing the monthly sales tax return for the month in which the sale occurred. If the report was not filed with the proper monthly return, the exemption did not apply and the retailer was liable for the sales tax.

This act changes the conditional exemption in G.S. 105-164.13(32) to allow a retailer who did not report the sale of a motor vehicle to a nonresident with the proper monthly sales tax return to report the sale within 30 days after the Department of Revenue discovers the omission and still obtain the sales tax exemption for the vehicle. Although a motor vehicle reported within this "second-chance" period is exempt from sales tax, the retailer or the purchaser must pay a penalty of 25% of the amount of sales tax that would otherwise be due.

The act is effective August 12, 1989, and applies to discoveries of omitted reports made on or after that date. It does not apply to assessments of tax made before that date or to taxes already paid.

Because Chapter 692 of the 1989 Session Laws, discussed above, repeals the sales tax on motor vehicles effective October 1, 1989, the problem of omitted reports will eventually disappear. It will continue for a few years beyond the repeal of the tax, however, because it may be two years after a sale to a nonresident occurs before the Department audits the retailer who made the sale and discovers the retailer's failure to submit the report.

1989 Chapter 788 (Senate Bill 1336, Senator Bill Barker)

AN ACT TO INCREASE THE PERCENTAGE OF GAS TAX PROCEEDS TRANSFERRED EACH YEAR TO THE WILDLIFE RESOURCES COMMISSION.

This act increases the percentage of the net proceeds of the per gallon excise tax on gasoline that is transferred annually from the Highway Fund to the Wildlife Resources Commission from 1/8 of 1% of the net proceeds to 1/6 of 1% of the net proceeds. "Net proceeds" means the amount collected less the amount refunded. The act is effective for taxes levied on or after July 1, 1990.

The amount due the Wildlife Resources Commission is transferred to the Commission in January of each year. The transfer made in January of 1991 will therefore include transfers at both the 1/8 of 1% and 1/6 of 1% rates.

This act is a response to the separation of gasoline tax revenue into the Highway Fund and the Highway Trust Fund made by Chapter 692 of the 1989 Session Laws. Chapter 692 increases the gas tax by 25%, requires the 25% increase to be deposited in the Trust Fund, and requires the remaining 75% to be deposited in the Highway Fund. It also specifies that the transfer to the Wildlife Resources Commission is to be based on only the amount of gas tax proceeds deposited in the Highway Fund and not the Highway Trust Fund. This act compensates for the denial of a percentage of the Trust Fund by increasing the percentage the Wildlife Resources Commission receives from the Highway Fund.

1989 Chapter 792 (House Bill 1311, Rep. Alex Hall)

AN ACT TO PROVIDE INCOME TAX EXEMPTIONS FOR ALL RETIREES AND TO INCREASE STATE AND LOCAL RETIREMENT BENEFITS.

The United States Supreme Court decided the case of Michigan v. Davis, 109 Sup. Ct. 1500 (1989), on March 28, 1989. In that case, a retired federal employee challenged the Michigan tax system which exempted from taxation the retirement benefits of retired state and local employees but fully taxed all other retirement benefits. The Court held that Michigan's tax law violated the constitutional doctrine of intergovernmental tax immunity, which prohibits taxes imposed directly on one sovereign by another and taxes that discriminate against one sovereign or

those with whom it deals. Pursuant to this doctrine, the Court held that the state must treat federal employees and state employees equally for tax purposes.

The Michigan v. Davis case implicated the North Carolina income tax system, which provided full tax exemptions to retirement benefits of State and local government retirees but only partial exclusions for federal retirees. In order to bring the tax law in compliance with the new rule, this act allows an equal tax exclusion of $4,000 for all public retirees---state, local, and federal. To help offset the impact of the tax on state and local retirees who formerly paid no State income tax on their retirement benefits, the act provides for an increase in the amount of retirement benefits paid to these retirees.

In addition, in order to partially equalize the treatment of private retirees (who previously received no tax exclusion) and public retirees, the act allows a $2,000 tax exclusion for private retirement benefits.

In the case of a married couple filing a joint return, the maximum amounts of the exclusions provided by this act apply separately to each spouse if both receive retirement benefits. The $4,000 exclusion for public retirement benefits and the $2,000 exclusion for private retirement benefits are not cumulative, however. A person who receives both public and private retirement benefits is entitled to a maximum exclusion of $4,000. The act is effective for taxable years beginning on or after January 1, 1989.

1988 Tax Law Changes

1988 Chapter 882 (House Bill 2227, Rep. Bob Etheridge)

AN ACT TO AUTHORIZE THE CREATION OF NORTH CAROLINA ENTERPRISE CORPORATIONS.

Effective for taxable years beginning on or after January 1, 1988, this act provides income and franchise tax credits for 25% of the amount of an investment in a "North Carolina Enterprise Corporation." The credits are similar to those currently allowed under Division V of Article 4 of Chapter 105 of the General Statutes for investments in North Carolina Capital Resource Corporations, qualified investment organizations, qualified business ventures, and qualified grantee businesses. A $12 million-dollar annual limit applies to the total amount of credits the State will allow. The act adds a new Article 3A to Chapter 53A of the General Statutes authorizing the creation of enterprise corporations which will provide capital to qualified North Carolina businesses in rural areas in order to enhance economic development. The enterprise corporation concept was developed by the Rural Economic Development Center.

1988 Chapter 892 (House Bill 142, Rep. Jeralds)

AN ACT TO INCREASE THE ANNUAL INCOME TAX EXCLUSION FOR FEDERAL CIVIL SERVICE AND MILITARY RETIREMENT PAY.

Effective for taxable years beginning on or after January 1, 1989, this act increases the individual income tax exclusions for federal civil service retirement pay and military retirement pay from $3,000 to $4,000.

1988 Chapter 936 (House Bill 2170, Rep. Lilley)

AN ACT TO EXPAND THE INCOME TAX EXEMPTION FOR DOUBLE LEG AMPUTEES TO INCLUDE BELOW-THE-KNEE AMPUTATION.

Prior law allowed a $1,100 individual income tax exemption for individuals who have both legs amputated above the knee. Effective for taxable years beginning on or after January 1, 1988, this act extends the exemption to all double leg amputations **above the ankle.** Recommended by Revenue Laws Study Committee.

1988 Chapter 937 (House Bill 2186, Rep. Lilley)

AN ACT TO EXEMPT INSULIN FROM SALES AND USE TAXES.

Prior law provided a sales and use tax exemption for medicines sold on prescription. Federal law does not require a prescription for the sale of insulin. Effective for sales made on or

after August 1, 1988, this act provides that sales of insulin shall be exempt from sales and use taxes. Recommended by Revenue Laws Study Committee.

1988 Chapter 941 (Senate Bill 1601, Senator Rauch)

AN ACT TO LIMIT THE INCOME TAX DEPENDENCY EXEMPTION TO RELATIVES AND FOSTER CHILDREN OF THE TAXPAYER AND DEPENDENTS OF WHOM THE TAXPAYER HAS LEGAL CUSTODY.

Prior law allowed a taxpayer to claim an $800 income tax exemption for dependents who are members of the same household, but not for the taxpayer's spouse. The effect of the law was to give a tax break to unmarried couples who live together but not to married couples. Effective for taxable years beginning on or after January 1, 1988, this act makes the dependency exemption unavailable to unmarried couples by requiring that the dependent be related to the taxpayer by blood, adoption, or affinity. (The dependency exemption will remain unavailable for spouses).

1988 Chapter 994 (House Bill 2372, Rep. Miller)

AN ACT TO AMEND THE FORMULA USED TO APPORTION THE INCOME OF MULTI-STATE CORPORATIONS TO THIS STATE FOR INCOME TAXATION AND TO CONFORM THE FORMULA FOR PAYMENT OF ESTIMATED TAXES TO THE FEDERAL FORMULA.

G.S. 105-130.4(i) provides that the income of a multi-state corporation shall be apportioned to this State using a three-factor formula based on the corporation's payroll located in this State, the corporation's property located in this State, and the corporation's sales in this State. Current law weights each of these factors equally. Effective for taxable years beginning on or after January 1, 1989, Section 1 of this act provides that the sales factor will be given double weight. This will affect the amount of corporate franchise tax due as well as the amount of income that is apportioned to this State.

Effective for taxable years beginning on or after June 25, 1988, Sections 2 and 3 of the act modify the rules for payment of estimated corporate income taxes to conform them to the federal rules. These conforming changes increase the amount of the payments due from 80% to 90% of the estimated tax liability for the current year and provide that large corporations (corporations having taxable income of $1,000,000 or more) may not take advantage of a provision in current law that decreases the amount due if the previous year's tax liability was less than 90% of the current year's liability.

1988 Chapter 1001 (House Bill 2169, Rep. Lilley)

AN ACT TO CHANGE THE EFFECTIVE DATE OF THE TRANSFER OF RESPONSIBILITY FOR ISSUING BINGO LICENSES FROM THE

DEPARTMENT OF REVENUE TO THE DEPARTMENT OF HUMAN RESOURCES.

Chapter 866 of the 1987 Session Laws transferred the responsibility for issuing bingo license and establishing audit procedures for bingo accounts from the Department of Revenue to the Department of Human Resources. The act never became effective because it was conditioned on an appropriation that was never made. This act makes the transfer effective September 1, 1988. Recommended by Revenue Laws Study Committee.

1988 Chapter 1013 (House Bill 2376, Rep. Redwine)

AN ACT TO PROVIDE AN ADDITIONAL ONE THOUSAND ONE HUNDRED DOLLARS ($1,100) INCOME TAX EXEMPTION FOR TAXPAYERS AND THEIR DEPENDENTS WHO HAVE MUSCULAR DYSTROPHY.

Effective for taxable years beginning on or after January 1, 1988, this act adds an additional $1,100 individual income tax exemption for taxpayers and their dependents who have muscular dystrophy. To claim the exemption, the taxpayer must attach to the tax return a doctor's certification.

1988 Chapter 1015 (Senate Bill 1612, Senator Guy)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED TO DETERMINE CERTAIN TAXABLE INCOME AND TAX EXEMPTIONS.

This bill rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1987, to January 1, 1988. Updating the reference makes recent amendments to the Internal Revenue Code applicable to the State to the extent State tax law previously tracked federal law. This update has the greatest effect on State corporate income taxes because these taxes are a percentage of federal taxable income and are therefore closely tied to federal law. Individual income taxes are not tied to federal law in the same way, but many individual income tax deductions are based on federal tax deductions. Recommended by Revenue Laws Study Committee.

1988 Chapter 1032 (House Bill 2429, Rep. Stamey)

AN ACT TO PROVIDE AN ADDITIONAL ONE THOUSAND ONE HUNDRED DOLLARS INCOME TAX EXEMPTION FOR TAXPAYERS AND THEIR DEPENDENTS WITH TRANSPLANTED ORGANS OR TISSUES.

Effective for taxable years beginning on or after January 1, 1988, this act adds an additional $1,100 individual income tax exemption for taxpayers and their dependents who have received

organ or tissue transplants and are required to take immunosuppressant medications. To claim the exemption, the taxpayer must attach to the tax return a doctor's certification.

1988 Chapter 1039 (House Bill 2648, Rep. Miller)

AN ACT TO CLOSE LOOPHOLES THAT ALLOW HIGH-INCOME TAXPAYERS TO CLAIM THE LOW-INCOME TAX CREDIT AND TO INCREASE THE MAXIMUM FEES THAT CAN BE ESTABLISHED BY THE MANUFACTURED HOUSING BOARD AND THE BOARD OF PHARMACY.

G.S. 105-151.16 provides an individual income tax credit for taxpayers with net taxable income of $15,000 or less. Effective for taxable years beginning on or after January 1, 1988, Section 1 of this act revises G.S. 105-151.16 to provide that a married couple's income will be combined to determine eligibility for the credit, and to provide that individuals and married couples who have gross income of $30,000 or more are not eligible for the credit. Sections 2 and 3 of this act make changes regarding fees that can be established by certain occupational licensing boards.

1988 Chapter 1041 (Senate Bill 1645, Sen. Winner)

AN ACT TO MODIFY THE FORMULA FOR REIMBURSING LOCAL GOVERNMENTS FOR REVENUE LOST DUE TO THE REPEAL OF PROPERTY TAXES ON INVENTORIES AND TO MAKE TECHNICAL CHANGES.

This act exempts from property taxes livestock and poultry that is not already exempt as inventory and modifies the reimbursement statutes enacted by the School Facilities Finance Act of 1987 to reimburse local governments for their losses due to the repeal of the property tax on inventories. It provides a method for counties and cities to share reimbursement funds with their special districts, replaces the "county area hold harmless" formula with an "individual county and city hold harmless" formula to eliminate losses that would have occurred under the prior law, provides for correction of errors in calculating the reimbursements, provides that reimbursements will be made for poultry and livestock beginning in 1990, and makes a technical change regarding the source of the funds to pay for the reimbursements provided.

Section 1 of this act rewrites parts of G.S. 105-275.1, the manufacturers' inventory reimbursement statute. The changes in the first part of subsection (a) provide that livestock and poultry and other similar products will be counted in calculating the amount of the inventory tax loss; reimbursement for these items will be made beginning in 1990. The changes at the end of subsection (a) and in subsection (b) provide a method for counties and cities to share funds received with their special districts: each county and city will calculate the inventory tax loss for each district and divide the funds attributable to special districts among them in proportion to their losses. The Local Government Commission is authorized to adopt rules to resolve any disputes that may arise, to correct any errors, and to provide for cases where a special district is dissolved or merged. The Local Government Commission is also directed to report to the 1990 General Assembly any inaccuracies it discovers in the information furnished by local governments

to the Department of Revenue regarding the amount of their losses. Section 1 also adds a new subsection (f) at the end of G.S. 105-275.1. This new subsection provides that if the Secretary of Revenue discovers any errors in the amount or value of inventories or other items listed by a city or county, she may adjust the amount of the reimbursement to correct the error.

Sections 1.1, 1.2, and 1.3 provide that poultry and livestock and feed used in their production, if not already exempt as inventory, shall be exempt from property taxes effective for taxable years beginning on or after January 1, 1989.

Section 2 of the act rewrites G.S. 105-277A, the wholesalers' and retailers' inventory reimbursement statute. The changes convert the formula for the 80% exemption enacted in 1987 from a two-step process that first made a per capita calculation and then a county-area hold harmless calculation to a new formula. Under the new formula, each county will receive a per capita distribution that will be shared with the cities on an ad valorem basis. Then, the Secretary will calculate whether any city or county suffered a loss under this formula. If so, it will receive additional funds to make sure the amount of the reimbursement was sufficient to cover its losses due to the inventory tax repeal. Further, if the amount of the county or city's loss calculated by the Secretary (based on an average of inventory taxes over the last eight years) is below 90% of the actual inventory levy for 1987, the Secretary will distribute to the county or city an additional amount to bring its reimbursement up to 90% of its 1987 inventory levy.

This statute is also amended to provide for distribution to special districts in the same manner as under the manufacturers' inventory reimbursement discussed above, and to provide that the Secretary may correct any errors in the amount or value of inventories listed by a county or city. Finally, the statute is amended to change the source of the funds for the reimbursements from income tax collections to sales tax collections. Most of the provisions of this act were recommended by the Revenue Laws Study Committee.

1988 Chapter 1044 (House Bill 2171, Rep. Lilley)

AN ACT TO MAKE TECHNICAL AMENDMENTS TO THE REVENUE LAWS.

Sections 1 through 12 of this act correct typographical errors, update obsolete references, make conforming changes, and clarify various provisions of the Revenue Act. Section 13 adds a notice requirement that was inadvertently deleted from the Machinery Act in 1987. Sections 13.1 and 13.2 provide that land enrolled in the federal Conservation Reserve Program shall not be disqualified from present use value treatment on the grounds that it is not in actual production. If the land is disqualified based on a change in income due to placement in the program, no deferred taxes shall be owed. Section 13.3 provides that the Committee to Elect Julian Pierce, Superior Court Judge may expend its funds for charitable purposes. Sections 1-13 of this act were recommended by the Revenue Laws Study Committee.

1988 Chapter 1047 (House Bill 2390, Rep. Fussell)

AN ACT TO PROVIDE THAT THE INVENTORY TAX REIMBURSEMENT CALCULATION FOR WAKE FOREST SHALL

INCLUDE THE VALUE OF MANUFACTURERS' INVENTORIES LOCATED IN AN AREA THAT WAS THE SUBJECT OF LITIGATION CHALLENGING ITS ANNEXATION AT THE TIME THE TAX ON INVENTORIES WAS REPEALED.

This act provides that when the Secretary of Revenue makes reimbursements to local governments to compensate for their revenue losses due to repeal of the property tax on manufacturers' inventories, she shall calculate the amount to be reimbursed to the City of Wake Forest based on inventories that were located in an area that the city was seeking to annex, in addition to other inventories located in the city.

1988 Chapter 1052 (House Bill 2651, Rep. Watkins)

AN ACT TO CORRECT THE DATES FOR PHASE-IN OF THE MODIFIED SYSTEM FOR ADJUSTING THE ASSESSMENT LEVEL OF PUBLIC SERVICE COMPANY SYSTEM PROPERTY.

Effective January 1, 1988, this act provides that where, due to problems with the dates for phasing in new legislation regarding adjustment of the assessment level of public service company property, the assessment level of a public service company's property is reduced in a county in the third year following the last general reappraisal of real property and again in the fourth year following reappraisal, then in the fourth year the amount of the third year reduction shall be added back into the fourth year assessment level. This will eliminate the windfall that would have accrued to public service companies from reductions in both the third and fourth years.

1988 Chapter 1063 (House Bill 1124, Rep. Jones)

AN ACT TO LIMIT CAMPAIGN EXPENDITURES AND TO STRENGTHEN PUBLIC FINANCING OF POLITICAL CAMPAIGNS.

This act establishes the North Carolina Candidates Financing Fund. Effective for taxable years beginning on or after January 1, 1988, Section 2 of this act amends G.S. 105-163.16 to provide that any taxpayer entitled to an income tax refund may contribute all or part of the refund to the North Carolina Candidates Financing Fund. Space and instructions will be provided on the income tax forms.

1988 Chapter 1076 (House Bill 1144, Rep. Miller)

AN ACT TO AMEND THE LAW RELATING TO PENALTIES FOR VIOLATION OF THE REVENUE LAWS.

Effective October 1, 1988, this act makes the following changes to the penalties for violation of the Revenue Act:

1. Increases the penalty for attempting to evade or defeat a tax from a misdemeanor with a maximum fine of $1,000 and maximum imprisonment of 6 months to a

misdemeanor with no specified punishment. (G.S. 14-3 provides that where no punishment is specified for a misdemeanor, it is punishable by up to 2 years in prison and/or a fine in any amount, and where it is an "infamous" misdemeanor, i.e., done in secrecy and malice, or with deceit and intent to defraud, it is punishable by up to 10 years in prison and/or a fine in any amount).

2. Increases the penalty for willful failure to collect, withhold, or pay over a tax from a misdemeanor with a maximum fine of $500 and maximum imprisonment of 6 months to a misdemeanor with a maximum fine of $1,000 and maximum imprisonment of 2 years.
3. Makes it unlawful to willfully aid and abet the filing of a false or fraudulent document; a violation is punishable as a misdemeanor with no specified fine or maximum term of imprisonment. (See #1 above).
4. Increases the penalty for willful failure to file return, supply information, or pay tax from a misdemeanor with a maximum fine of $200 and maximum imprisonment of 30 days to a misdemeanor with no specified punishment. (See #1 above).

1988 Chapter 1081 (House Bill 1206, Rep. Miller)

AN ACT TO REPEAL AN OBSOLETE PROVISION IN THE REVENUE LAWS, MODIFY THE DEFINITION OF "FLEA MARKET" FOR LICENSE TAX PURPOSES, AND MAKE TECHNICAL CORRECTIONS TO ELECTION LAWS, AND THE EMPLOYEE THEFT STATUTE.

Effective July 1, 1988, this act repeals the $500 license tax for mercantile agencies. Also effective July 1, 1988, the act revises the definition of "flea market" for license tax purposes to exclude locations within the enclosed area of a mall or shopping center. This act also contains provisions relating to election laws and employee theft that do not affect tax law.

1988 Chapter 1082 (House Bill 1288, Rep. Miller)

AN ACT TO REPEAL AN OBSOLETE LAW, TO MAKE TECHNICAL CHANGES TO THE REVENUE ACT, TO MODIFY THE LAW REGARDING PRIVILEGE LICENSES FOR CERTAIN EMPLOYMENT AGENCIES, TO MODIFY THE STANDARDS FOR ISSUING LICENSES FOR REFRIGERATION CONTRACTORS, AND TO MAKE CLARIFYING AND TECHNICAL AMENDMENTS TO VARIOUS LAWS RELATING TO LOW-LEVEL RADIOACTIVE WASTE AND HAZARDOUS WASTE.

Effective July 1, 1988, Sections 1 and 1.1 of this act repeal the privilege license tax on carnival companies. Sections 2, 3, and 4 make a technical change to the law regarding adjustment of the amounts of local sales and use taxes to be distributed to local governments. Section 5 relates to the standards for licensing refrigeration contractors. Section 6 removes the requirement that, in order to receive a special privilege license, an employment agency for school employees be

approved by the State Superintendent of Public Instruction. Sections 7, 8, and 8.1 make changes regarding tinted windows on motor vehicles. The rest of the act makes clarifying and technical changes to laws relating to low-level radioactive and hazardous waste.

1988 Chapter 1089 (House Bill 2389, Rep. Hall)

AN ACT TO PROVIDE FOR SPECIAL TAX TREATMENT OF SUBCHAPTER S CORPORATIONS.

Effective for taxable years beginning on or after July 1, 1990, this act provides that corporations that have Subchapter S status for federal income tax purposes shall receive the same treatment for State income tax purposes. An individual who is a shareholder in a Subchapter S corporation will pay individual income tax on his or her pro rata share of the corporation's net income, rather than having the income taxed at the corporate level. The act, based on uniform legislation developed by the American Bar Association, sets out procedures for apportioning to this State the income of multi-state Subchapter S corporations and provides transitional rules.

1988 Chapter 1096 (House Bill 2430, Rep. Miller)

AN ACT TO PROVIDE THAT SALES AND USE TAXES SHALL BE IMPOSED ON CERTAIN MAIL ORDER SALES.

Effective for sales made on or after January 1, 1989, this act expands the Sales and Use Tax Act to allow the State to require out-of-State retailers to collect sales and use taxes on mail order sales to North Carolina customers if the retailer has purposefully or systematically exploited the market in this State through solicitation by mail or by advertising in print or electronic media.

In 1967, the United States Supreme Court decided the case of National Bellas Hess, Inc. v. Illinois, 386 U.S. 753 (1967). In that case, the court held that a State may not require a retailer to collect sales and use taxes from customers in the State if the retailer's only connection with customers in the State is by common carrier or United States mail. Such state action would invade the exclusive authority of Congress to regulate interstate commerce and would violate the due process requirement that there be some nexus between a State and the person it seeks to tax.

North Carolina currently requires a retailer to collect sales and use taxes if the retailer (i) has, directly or through an agent, any office, place of distribution, or other place of business in the State, (ii) has, permanently or temporarily, any person operating in the State in soliciting, selling, or delivering, or (iii) maintains in the State, permanently or temporarily, any tangible personal property for lease or rental. This act expands the law to require a retailer to collect the taxes from its North Carolina customers if the retailer creates nexus with this State "by purposefully or systematically exploiting the market provided by this State by any media-assisted, media-facilitated, or media-solicited means, including direct mail advertising, distribution of catalogues, computer-assisted shopping, television, radio or other electronic media, or magazine or newspaper advertisements, or other media."

While this expansion appears to violate the rule stated in the 1967 Bellas Hess case, it is consistent with an interpretation, developed by the Multistate Tax Commission, that contends that the decision was based on interstate commerce clause considerations rather than Due Process, and that therefore only "minimum contacts" by the retailer are necessary to justify the State's tax

jurisdiction. A number of other states have extended their sales tax laws accordingly; North Dakota has recently filed a test case seeking to require Speigel to collect the tax.

The act recognizes that federal legislation is pending to directly authorize states to require out-of-state mail order companies to collect sales taxes. If such legislation passes, and if it applies only to States that have a uniform tax rate statewide, the act provides that counties may not repeal their local sales and use taxes in effect at the time.

The act also authorizes the Secretary of Revenue to work with other states to enhance collection of sales taxes on mail order sales, and requires the Department of Revenue to study the consequences of the act and report any findings and recommendations to the Revenue Laws Study Commission or to the General Assembly.

1987 Tax Law Changes

1987 Chapter 832 (Senate Bill 944, Sen. Goldston.)

AN ACT TO INCREASE THE EXCISE TAX ON SPIRITUOUS LIQUOR AND TO PROVIDE THAT LOCAL SALES TAXES SHALL BE LEVIED BY THE COUNTY IN WHICH THE RETAILER IS LOCATED WHEN THE PROPERTY SOLD IS DELIVERED TO THE PURCHASER IN ANOTHER COUNTY

This act increased the excise tax on spirituous liquor from 22.5% to 28%, effective October 1, 1987.

This act also closed a loophole with respect to local sales and use taxes. Under prior law, local option sales and use taxes did not apply to sales where the tangible personal property was sold in one county and delivered to the purchaser in another county. Instead, the purchaser was liable for use tax levied by the purchaser's county. In practice, this use tax was often not collected. Effective March 1, 1988, this act provided that the situs of a sale is considered to be the county of the retailer's place of business. Thus, if property is sold by a retailer in one county and delivered to a purchaser in another county, the local sales tax of the retailer's county applies to the sale.

This change in the situs, for local sales tax purposes, from the purchaser's county to the seller's county, would have resulted in some counties gaining revenue and others losing revenue. In order to hold counties harmless, this act amends the distribution formula for the two half-cent taxes, which are distributed on a per capita basis. Each county's allocation is adjusted up or down by a percentage before distribution. This adjustment offsets the fiscal impact of the change in tax situs, so that local governments are held harmless.

1987 Chapter 622 (House Bill 1155)

AN ACT TO CREATE THE PUBLIC SCHOOL BUILDING CAPITAL FUND TO ASSIST COUNTY GOVERNMENTS IN MEETING THEIR PUBLIC SCHOOL BUILDING CAPITAL NEEDS, TO CREATE THE CRITICAL SCHOOL FACILITY NEEDS FUND TO PROVIDE FUNDS FOR COUNTIES THAT HAVE THE GREATEST CRITICAL SCHOOL FACILITY NEEDS, TO CREATE A COMMISSION TO DETERMINE THE CRITICAL SCHOOL FACILITY NEEDS OF EACH COUNTY, TO REPEAL THE TAX ON INVENTORIES OF MANUFACTURERS, RETAILERS, AND WHOLESALERS, TO REIMBURSE LOCAL GOVERNMENTS FOR THE RESULTING REVENUE LOSS, TO INCREASE THE CORPORATE INCOME TAX, TO REQUIRE MOST EMPLOYERS TO REMIT WITHHOLDING TAXES ON A MONTHLY BASIS, TO REPEAL THE RETAILERS' DISCOUNT FOR PAYMENT OF SALES AND USE TAXES WHEN DUE, AND TO EARMARK

ADDITIONAL LOCAL SALES AND USE TAX PROCEEDS FOR PUBLIC SCHOOL CONSTRUCTION.

In 1987, the General Assembly increased the corporate income tax from 6% to 7% and earmarked half of the increase for local school facility needs. This change was part of a package in which the property tax on manufacturing inventory was repealed and the remaining 80% of wholesale/retail inventories was exempted from property tax.
