2023 Finance Law Changes

H76 - Access to Healthcare Options. (SL 2023-7)

Part I of the act does the following:

- Provides Medicaid coverage through NC Health Works to adults aged 18-64 with incomes up to 133% of the federal poverty level, beginning on the later of (i) the date the Current Operations Appropriations Act for the 2023-2024 fiscal year becomes law or (ii) the federally-approved start date.
- Provides increased Medicaid reimbursements to hospitals through the Healthcare Access and Stabilization Program (HASP) upon federal approval of a request developed and submitted by the Department of Health and Human Services (DHHS).
- Increases hospital assessments to provide funding for the NC Health Works coverage and the HASP program.

Part II of the act enacts various workforce development measures to promote employment among Medicaid enrollees.

Part III of the act removes psychiatric beds and facilities, chemical dependency treatment beds and facilities, ambulatory surgical centers in large counties, MRI machines in large counties, certain home care agency treatment for minors, and the first $3 million worth of replacement and diagnostic center equipment from certificate of need review.

This act has various effective dates. Please see the full summary for more details

S174 - Revenue Laws Technical, Clarifying, and Administrative Changes. (SL 2023-12)

S.L. 2023-12 makes various technical, clarifying, and administrative changes to the revenue laws as recommended by the Department of Revenue.

This act has various effective dates. Please see the full summary for more detail.

H347 - Sports Wagering/Horse Racing Wagering. (SL 2023-42)

S.L. 2023-42, effective January 8, 2024, does the following:

- Authorizes, regulates, and taxes sports wagering in North Carolina. The Lottery Commission is responsible for issuing licenses to involved parties and regulating sports wagering in North Carolina. Section 11.18 of S.L. 2023-134 amended these provisions.
- Authorizes and regulates pari-mutuel wagering on horse racing in North Carolina. The Lottery Commission is responsible for issuing licenses to involved parties and regulating pari-mutuel wagering in North Carolina.
- Authorizes live horse racing in North Carolina. The Lottery Commission is responsible for regulation of horse racing.
- Creates and provides funding for the North Carolina Major Events, Games, and Attractions Fund, which is administered by the Department of Commerce to provide grants for local governments or nonprofit entities working with local governments to attract major entertainment, musical, political, sporting, and theatrical events to the State to stimulate economic activity and create jobs. Section 11.18 of S.L. 2023-134 amended these provisions.

S299 - Reimburse Late Audit Costs with Sales Tax Rev. (SL 2023-59)

S.L. 2023-59 authorizes the Local Government Commission to withhold a county or municipality's sales tax distribution if the county or municipality fails to submit an annual audit report. The amount withheld is equivalent to 150% of the cost of the required audit.

This bill was vetoed by the Governor on June 19, 2023, and that veto was overridden by the General Assembly on June 27, 2023. Section 1 of the act becomes effective January 1, 2024, and applies to audits for fiscal years ending on or after June 30, 2023. The remainder of the act became effective June 27, 2023.

S582 - North Carolina Farm Act of 2023.
Sec. 1: Include Income From the Sale of Honey in Gross Income for Purposes of Present Use Value Taxation. (SL 2023-63)

SL 2023-63 (S582), Sec. 1

Section 1 of S.L. 2023-63 allows income from the sale of honey to be considered gross income for the purposes of present use value taxation.

This bill was vetoed by the Governor on June 23, 2023, and that veto was overridden by the General Assembly on June 27, 2023.

This section became effective for taxes imposed for taxable years beginning on or after July 1, 2023.

S582 - North Carolina Farm Act of 2023.

Sec. 1.4: Exempt Compost from Sales Tax for Qualifying Farmers. (SL 2023-63)

SL 2023-63 (S582), Sec. 1.4

Section 1.4 of S.L. 2023-63 exempts compost from sales and use tax when purchased by a qualifying farmer for use primarily in farming operations.

This bill was vetoed by the Governor on June 23, 2023, and that veto was overridden by the General Assembly on June 27, 2023.

This section became effective October 1, 2023.

H364 - Self-Liquidating Projects/Property Transfers. (SL 2023-66)

S.L. 2023-66 does the following:

- Authorizes constituent institutions of The University of North Carolina (UNC) to finance and acquire or construct certain capital improvement projects reviewed and approved by the Board of Governors of UNC on February 23, 2023. The projects will be financed through revenue bonds, special obligation bonds, and other funds available to the institutions, excluding tuition and appropriations from the General Fund
- Authorizes the transfer of personal property between constituent institutions of UNC with the approval of the President of UNC.

This act became effective June 30, 2023.

H219 - Charter School Omnibus. (SL 2023-107)

Sec. 6: Authorize Counties to Provide Capital Funds to Charter Schools. (SL 2023-107)

Section 6 of S.L. 2023-107 allows counties to use property taxes to provide direct appropriations for capital funds to charter schools that can be used for real property, building construction and renovation, and furnishings and equipment. Counties receive a security interest if charters used the funds to acquire or improve property, which the county can subordinate to other liens, and release if the charter paid back the capital funds provided. Counties can also lease real property to charters. If a charter is dissolved, any assets purchased with county capital funds is deemed the property of the contributing county or counties.

This bill was vetoed by the Governor on July 21, 2023, and that veto was overridden by the General Assembly on August 16, 2023. This section of the act became effective August 16, 2023, and applies beginning with the 2023-2024 school year.

H259 - 2023 Appropriations Act.

Sec 5.9: Preemption of Certain Local Government Actions. (SL 2023-134)

Section 5.9 of S.L. 2023-134 provides that the North Carolina Wage and Hour Act supersedes and preempts any ordinance, regulation, or policy of a unit of local government or other political subdivision of the State that imposes requirements upon employers pertaining to compensation, including wage levels, hours of labor, payment of wages, benefits, leave, or well-being of minors in the workforce. This does not apply to: a local government regulating, compensating, or controlling its own employees, certain economic development incentives, a requirement of federal community development block grants, and programs established under the statute dealing with community development programs and activities.

This section also restricts counties and cities from adopting ordinances and rules to: (i) restrict, tax, charge a fee, prohibit, or otherwise regulate the use, disposition, or sale of an auxiliary container (e.g. bags, containers, bottles, merchandise containers, etc.), and (ii) regulate the use of shopping carts, including the imposition of a fee or fine on a business for failure to take possession of a shopping cart that was removed from the premises of the business. This section allows counties and cities to operate recycling programs, composting programs, and solid waste disposal programs and to regulate the use of auxiliary containers on property owned or maintained by the county or city. This section became effective July 1, 2023.

H259 - 2023 Appropriations Act.

Sec. 9E.7: Ensuring Certain Medicaid Receipts (SL 2023-134)

Section 9E.7 of S.L. 2023-134 changes the calculation of the modernized hospital assessments under Part 2 of Article 7B of Chapter 108A of the General Statutes for one taxable quarter to allow the Department of Health and Human Services (DHHS) to collect an additional $43 million in hospital assessments. This additional assessment amount offsets $43 million in Medicaid disproportionate share adjustment receipts that were anticipated for the 2022-2023 fiscal year but that were not collected as a result of the retroactive implementation of the healthcare access and stabilization program (HASP) which is a new initiative providing increased Medicaid reimbursements to hospitals participating in Medicaid managed care. This section of the act allows DHHS to use the additional hospital assessment receipts in the same manner as was allowed for the disproportional share adjustment receipts that are being offset.

The effective date of this section of the act is the later of the following dates: (i) the first day of the next assessment quarter after this act becomes law or (ii) the first day of the next assessment quarter after the Centers for Medicare and Medicaid Services (CMS) approves HASP hospital reimbursements for the 2022 2023 fiscal year that are greater than $400 million. Based on the timing of these conditions being met, this section became effective January 1, 2024.

H259 - 2023 Appropriations Act.

Sec. 9E.23: Agency Requested Changes / Division of Health Benefits (SL 2023-134)

Section 9E.23 of S.L. 2023-134 makes technical, clarifying, and conforming updates to various laws relating to Medicaid as requested by the Department of Health and Human Services. See full summary for effective dates.

H259 - 2023 Appropriations Act.

Sec. 11.12: Selectsite Readiness Program (SL 2023-134)

Section 11.12 of S.L. 2023-134 establishes the Selectsite Readiness Program to be administered by the Economic Development Partnership of North Carolina.

This section became effective July 1, 2023.

H259 - 2023 Appropriations Act.
Sec. 11.18: Sports Wagering Technical Corrections (SL 2023-134)
Section 11.18 of S.L. 2023-134 makes changes to S.L. 2023-42 (Sports Wagering/Horse Racing Wagering), most notably, the following:

- Requires a prospective interactive sports wagering operator applicant to have a written designation agreement with a professional sports team, a motorsports facility, a facility that hosts a professional golf tournament annually, or certain sports governing bodies to be eligible for licensure.
- Authorizes an indoor venue that does not meet the definition of "sports facility" but hosts sporting events and is designed to host 22,000 or more live spectators to be an eligible location for grant funding from the North Carolina Major Events, Games, and Attractions Fund.

This act has various effective dates. Please see the full summary for more details.

H259 - 2023 Appropriations Act.
Sec. 14.3: Tobacco Farm Life Museum Special Fund (SL 2023-134)
Section 14.3 of S.L. 2023-134 directs the Department of Natural and Cultural Resources (DNCR) to assume ownership and administration of the Tobacco Farm Life Museum in Johnston County from the Tobacco Farm Life Museum, Inc. and creates the Tobacco Farm Life Museum Fund within the DNCR to pay costs associated with the operation, interpretation, development, expansion, preservation, and maintenance of the Tobacco Farm Life Museum. Of the funds appropriated to the DNCR General Fund, $375,000 in the 2023-2024 fiscal year and $350,000 in the 2024-2025 fiscal year must be used for the operation, administration, and new positions staffing the Tobacco Farm Life Museum. The section also repeals laws (Article 51, Chapter 143) requiring the DNCR to establish and otherwise manage tobacco museums in Rockingham County and in Nash or Edgecombe County.

The section that repeals statutes requiring the DNCR to establish and manage tobacco museums became effective October 3, 2023.

The remainder of the section becomes effective only if the Tobacco Farm Life Museum transfers and conveys all of its assets to the State.

H259 - 2023 Appropriations Act.
Sec. 29.1: Reporting Requirements (SL 2023-134)
Section 29.1 of S.L. 2023-134 makes changes to the reporting requirements of the North Carolina Housing Finance Agency by allowing multiple reports to be consolidated into one comprehensive report and outlining other information that must be included in that comprehensive report. The report is required to be submitted to the House Finance Committee, the Senate Finance Committee, and the Joint Legislative Oversight Committee on General Government on or before February 15 of each year. The section further repeals certain other reporting requirements of the North Carolina Housing Finance Agency.

This section became effective July 1, 2023 and applies to reports due on or after that date.

H259 - 2023 Appropriations Act.
Sec. 29.2: Housing Finance Agency - Increase Project Caps for Workforce Housing Loan Program (SL 2023-134)
Section 29.2 of S.L. 2023-134 increases the amount a taxpayer can receive as a loan under the Workforce Housing Loan Program. The Workforce Housing Loan Program finances loans to construct or substantially rehabilitate affordable rental housing in combination with federal low- income housing tax credits. Loans are

capped based on the income designation of the county in which the low-income housing development is located, as designated by the North Carolina Housing Finance Agency. Loans to eligible taxpayers are subject to the following limits:

- Low-income county: $3 million (increased from $2 million)
- Moderate-income county: $2 million (increased from $1.5 million)
- High-income county: $500,000 (increased from $250,000) This

section became effective July 1, 2023.

H259 - 2023 Appropriations Act.

Sec. 29.3: Housing Finance Agency - Workforce Housing Loan Program (SL 2023-134)

Section 29.3 of S.L. 2023-134 allows a taxpayer who was allocated a low-income housing tax credit for a low-income housing development located in a low-income county before October 3, 2023, to be eligible for a loan under the Workforce Housing Loan Program. The taxpayer must provide evidence that the loan funds are necessary to address inflationary costs associated with the low-income housing development. These funds would be in addition to other sources of funding for the development project included in the taxpayer's initial loan application.

This section became effective July 1, 2023.

H259 - 2023 Appropriations Act.

Sec. 34.3: Department of Revenue Administrative Costs for Collecting Prepaid Wireless Telecommunications Service Charges (SL 2023-134)

Section 34.3 of S.L. 2023-134 increases the amount the Department of Revenue (DOR) can retain from the total 911 service charges for prepaid wireless telecommunications service remitted to DOR. DOR is authorized to retain up to $750,000 per year (was $500,000) to cover costs associated with collecting the charges.

This section became effective July 1, 2023.

H259 - 2023 Appropriations Act.

Sec. 35.1: Increase Fees for Lobbyists and Lobbyist Principals (SL 2023-134)

Section 35.1 of S.L. 2023-134 raises the registration fees that lobbyists and lobbyist principals must pay from $250 to $500. This section of the act became effective July 1, 2023.

H259 - 2023 Appropriations Act.

Sec. 36.3: Bond Referendum Transparency (SL 2023-134)

Section 36.3 of S.L. 2023-134 amends the ballot language required for a general obligation bond referendum to add the following:

- The estimated cumulative cost over the life of the bond, using the highest interest rate charged for similar debt.
- The amount of property tax liability increase to service the cumulative cost over the life of the bond, stated for each $100,000 of property tax value.

Section 36.3 also requires that the ballot language explicitly state that additional property taxes can be levied on property located in the unit of local government to repay the debt.

This section became effective December 31, 2023, and applies to bond referendums conducted on or after that date.

H259 - 2023 Appropriations Act.
Sec. 41.11B: Ferry Maintenance Report (SL 2023-134)

Section 41.11B of S.L. 2023-134 requires the Ferry Division of the Department of Transportation to report on the use of funds appropriated for marine and facilities maintenance for each year of the 2023-2025 fiscal biennium, including (i) the projects on which the funds were used, (ii) the amount of funds used for each project, (iii) whether the work on the project was performed by a contractor or by the Ferry Division, and (iv) the name of the contracting company for all work performed by a contractor. The report must be submitted to the chairs of the Joint Legislative Transportation Oversight Committee, the chairs of the House and Senate Transportation Appropriations Committees, and the Fiscal Research Division on June 30, 2024, and June 30, 2025.

This section became effective July 1, 2023.

H259 - 2023 Appropriations Act.
Sec. 41.14D: Increase Electric and Hybrid Vehicle Fees (SL 2023-134)

Section 41.14D of S.L. 2023-134 increases the additional registration fee for electric vehicles and creates a new additional registration fee for plug-in hybrid vehicles.

This section becomes effective January 1, 2024, and applies to vehicles registered on or after that date.

H259 - 2023 Appropriations Act.
Sec. 41.14E: Authorize the Division of Motor Vehicles to Implement Transaction Fees on Electronic Payments (SL 2023-134)

Section 41.14E of S.L. 2023-134 requires the Division of Motor Vehicles (DMV), Department of Transportation, to develop a plan for adding a fee to transactions where it accepts electronic payment to offset any service charge DMV pays for electronic payment service and to submit the plan to the chairs of the Joint Legislative Transportation Oversight Committee, the chairs of the House and Senate Transportation Appropriations Committees, and the Fiscal Research Division by January 1, 2024. This section also authorizes DMV to charge a transaction fee of up to 2% of the electronic payment beginning July 1, 2024.

The directive to DMV became effective October 3, 2023. The provision authorizing DMV to add a transaction fee of up to 2% for electronic payments becomes effective July 1, 2024.

H259- 2023 Appropriations Act. (SL 2023-134)

Part 42 of S.L. 2023-134 (2023 Appropriations Act) includes the following tax-related changes:

- Personal income tax changes that include accelerating the currently scheduled rate reductions for 2024, 2025, and 2026 with successive rate reductions of .5% if General Fund revenues hit certain triggers in certain fiscal years with a floor of 2.49%. (Section 42.1)
- Business tax changes that include:
- Capping the franchise tax at $500 for the first one million dollars of a C Corporation's tax base. (Section 42.6A)
- Repealing the State privilege tax on professionals, effective for taxable years beginning on or after July 1, 2024. (Section 42.7)
- Allowing certain trusts and corporations to be partners of a taxed partnership. (Section 42.21)

- Sales tax changes that include:
- Prospectively exempting from sales tax goods and services, other than alcoholic beverages, sold by a provider of continuing care to its independent living residents. The exemption would not apply to sales of alcoholic beverages, and a provider of continuing care must pay sales and use tax on the purchase price of an item that would be exempt under this provision. (Section 42.10)
- Extending the sunsets on exemptions and refunds for professional motorsports teams. (Section 42.11)
- Aligning the sales tax exemption for parts and accessories used in the repair and maintenance of certain aircraft with the existing sales tax exemption for labor on the same aircraft. (Section 42.12)
- Extending by 5 years the sunset on the exemption for aviation gasoline and jet fuel for use in commercial aircraft. (Section 42.13)
- Expanding the exemption on fuels and consumables used by boats engaged in the transportation of freight on the ocean to also include transport in intracoastal waterways, sounds, or rivers (currently limited to oceangoing vessels on the high seas). (Section 42.14)
- Exempting breast pumps, including repair and replacement parts, and breast pump collection and storage supplies. (Section 42.16)
- Excise tax change that modifies the way in which snuff is taxed from being cost-based to weight-based and an expansion of the tax base to include alternative nicotine products. (Section 42.18)
- Creation of a new excise tax applicable to the gross receipts derived from each ride using a for-hire ground transportation service provider, such as Uber, Lyft, or a taxi service,

effective July 1, 2025. The rate will be 1.5% for exclusive ride service and 1% for shared ride service. The proceeds of the tax will be credited to the Highway Fund. (Section 42.19)

- Prohibiting a regional transportation authority from levying the short-term car rental tax in a county that has withdrawn from the authority. This provision applies only to Surry County. (Section 42.20)
- Clarification of the motor fuel tax formula. (Section 42.22)
- Property tax exclusion for real and personal property located at a legacy airport, effective for taxable years beginning on or after July 1, 2024. (Section 42.23)

H259 - 2023 Appropriations Act.
Sec. 42.1: Personal Income Tax Rate Reductions (SL 2023-134)

Section 42.1 of S.L. 2023-134 accelerates the currently scheduled personal income tax rate reductions for 2024, 2025, and 2026 with successive rate reductions of .5% if General Fund revenues hit certain triggers in certain fiscal years with a floor of 2.49%.

This section became effective October 3, 2023.

H259 - 2023 Appropriations Act.
Sec. 42.6A: Cap the Franchise Tax on First One Million Dollars of C Corp Tax Base – (SL 2023-134)

Section 42.6A of S.L. 2023-134 caps the franchise tax at a maximum of $500 for the first one million dollars of a C Corporation's tax base.

This section is effective for taxable years beginning on or after January 1, 2025, and applicable to the calculation of franchise tax reported on the 2024 and later corporate income tax return.

H259 - 2023 Appropriations Act.
Sec. 42.7: Repeal State Privilege Tax on Professionals (SL 2023-134)

Section 42.7 of S.L. 2023-134 repeals the State privilege tax on professionals, effective for taxable years beginning on or after July 1, 2024.

H259 - 2023 Appropriations Act.
Sec. 42.10: Sales Tax Exemption for Continuing Care Retirement Communities (SL 2023-134)

Section 42.10 of S.L. 2023-134 prospectively exempts from sales tax goods and services, other than alcoholic beverages, sold by a provider of continuing care to its independent living residents. The exemption does not apply to sales of alcoholic beverages, and a provider of continuing care must pay sales and use tax on the purchase price of an item that is exempt under this provision.

This section became effective for goods and services sold on or after November 1, 2023.

H259 - 2023 Appropriations Act.
Sec. 42.11: Extend Sunset on Exemptions and Refunds for Professional Motorsports (SL 2023-134)

Section 42.11 of S.L. 2023-134 extends the sunsets on exemptions and refunds for professional motorsports teams.

This section became effective October 3, 2023.

H259 - 2023 Appropriations Act.
Sec. 42.12: Expand Aviation Sales Tax Exemption So That Parts and Accessories Exemption Aligns with Labor Exemption for Same Type of Aircraft (SL 2023-134)

Section 42.12 of S.L. 2023-134 aligns the sales tax exemption for parts and accessories used in the repair and maintenance of certain aircraft with the existing sales tax exemption for labor on the same aircraft.

H259 - 2023 Appropriations Act.
Sec. 42.13: Extend Sunset for Aviation Gasoline and Jet Fuel for Use in Commercial Aircraft (SL 2023-134)

Section 42.13 of S.L. 2023-134 extends by five years the sunset on the exemption for aviation gasoline and jet fuel for use in commercial aircraft.

This section became effective October 3, 2023.

H259 - 2023 Appropriations Act.
Sec. 42.14: Expand Sales Tax Exemption for Fuel and Consumables Used by Boats Transporting Freight on Inland and Intracoastal Waterways (SL 2023-134)

Section 42.14 of S.L. 2023-134 expands the exemption on fuels and consumables used by boats engaged in the transportation of freight on the ocean to also include transport in intracoastal waterways, sounds, or rivers. The current exemption is limited only to oceangoing vessels on the high seas.

H259 - 2023 Appropriations Act.

Sec. 42.16: Exempt Breast Pumps, Breast Pump Collection and Storage Supplies, and Repair and Replacement Parts (SL 2023-134)

Section 42.16 of S.L. 2023-134 exempts breast pumps, including repair and replacement parts, and breast pump collection and storage supplies from sales tax.

This section became effective for sales occurring on or after November 1, 2023.

H259 - 2023 Appropriations Act.

Sec. 42.18: Change Method of Taxing Snuff from Cost-Based to Weight-Based and Expand Base to Include Alternative Nicotine Products (SL 2023-134)

Section 42.18 of S.L. 2023-134 modifies the way in which snuff is taxed from being cost-based to weight-based, and it expands the tax base to include alternative nicotine products.

This section becomes effective July 1, 2025, for sales or purchases occurring on or after that date.

H259 - 2023 Appropriations Act.

Sec. 42.19: Enact New Transportation Commerce Tax (SL 2023-134)

Section 42.19 of S.L. 2023-134 creates a new excise tax applicable to the gross receipts derived from each ride using a for-hire ground transportation service provider, such as Uber, Lyft, or a taxi service. The rate is 1.5% for exclusive ride service and 1% for shared ride service. The proceeds of the tax are credited to the Highway Fund.

This section becomes effective July 1, 2025, and applies to for-hire ground transport services occurring on or after that date.

H259 - 2023 Appropriations Act.

Sec. 42.20: Prohibit Regional Transportation Authorities from Levying Short-Term Car Rental Tax in a County that has Withdrawn from Authority (SL 2023-134)

Section 42.20 of S.L. 2023-134 prohibits a regional transportation authority from levying the short-term car rental tax in a county that has withdrawn from the authority. This provision applies only to Surry County.

This section became effective November 1, 2023, and applies to the gross receipts derived from short-term leases or rentals billed on or after that date.

H259 - 2023 Appropriations Act.

Sec. 42.21: Allow Certain Trusts and Corporations to be Partners of a Taxed Partnership (SL 2023-134)

Section 42.21 of S.L. 2023-134 allows certain trusts and corporations to be partners of a taxed partnership.

This section is effective for taxable years beginning on or after January 1, 2022.

H259 - 2023 Appropriations Act.

Sec. 42.23: Property Tax Exclusion for Property Located at a Legacy Airport (SL 2023-134)

Section 42.23 of S.L. 2023-134 creates a property tax exclusion for real and personal property located at a legacy airport.

This section becomes effective for taxable years beginning on or after July 1, 2024.

H600 - Reform Act of 2023.

Sec. 27: Prohibit Counties and Cities from Regulating Certain Online Marketplaces – Regulatory (SL 2023-137)

Section 27 of S.L. 2023-137 prohibits counties or cities from regulating the operation of an online marketplace; or requiring an online marketplace to provide personally identifiable information of users, unless pursuant to a subpoena or court order.

This bill was vetoed by the Governor on October 2, 2023, and that veto was overridden by the General Assembly on October 10, 2023. This section became effective on October 10, 2023.

2022 Finance Law Changes

H83 - Revenue Laws Technical, Clarifying, & Administrative Changes. (SL 2022-13)

S.L. 2022-13 makes various technical, clarifying, and administrative changes to the revenue laws as recommended by the Department of Revenue.

H103 - 2022 Appropriations Act.

Sec. 9D.10: Medicaid Hospital Assessment Technical Adjustments. (SL 2022-74)

Section 9D.10 of S.L. 2022-74 amends statutes (G.S. 108A-146.12 and G.S. 108A-146.13) enacted in Section 9D.13A(c) of S.L. 2021-180 to make technical adjustments to the modernized hospital assessments, as follows:

- Reduces the amount of assessment collected from hospitals through the postpartum component to account for the portion of the added postpartum costs that will be collected through the other components of the modernized hospital assessments. Because the postpartum coverage and the postpartum component took effect April 1, 2022, and this section becomes effective October 1, 2022, this section provides for a reconciliation of the April and July quarters in the quarter

beginning October 1, 2022.
- Adjusts the historical subcomponent of the modernized hospital assessments related to the recent change of ownership of Vidant Beaufort hospital that was reported to the Joint Legislative Oversight Committee on Medicaid and NC Health Choice.

This section becomes effective October 1, 2022, and applies to modernized hospital assessments imposed on or after that date.

H103 - 2022 Appropriations Act.
Sec. 23.1: OSBM/Report to Oversight Committee on New Positions. (SL 2022-74)

Section 23.1 of S.L. 2022-74 requires the Office of State Budget and Management to report quarterly to the Joint Legislative Oversight Committee on General Government (Committee) and the Fiscal Research Division of the General Assembly on the number of new positions established by a State agency under the purview of the Committee and approved by the Director of the Budget. Pursuant to G.S. 143C-2-1, the Governor is the Director of the Budget.

The report must include all of the following: (i) the justification for each position established, (ii) the position title and duties of each position, (iii) the salary for each position, and (iv) the source of funds used to establish each position.

This section became effective July 1, 2022.

H103 - 2022 Appropriations Act. Part 42: Finance. (SL 2022-74)

Part XLII of S.L. 2022-74 makes the following tax-related changes:

- Section 42.1 – Expands the individual income tax exclusion of military retirement pay to include retirement pay for service in all uniformed services. The exclusion enacted in Section 42.1A of S.L. 2021-180 applied only to members of the Armed Forces; this provision extends the exclusion to retirees of the commissioned corps of the National Oceanic and Atmospheric Administration (NOAA) and the U.S. Public Health Service. This provision became effective for taxable years beginning on or after January 1, 2022.
- Section 42.2 – Exempts from sales and use tax purchases by interstate air and ground couriers of certain equipment, including conveyor systems, and related parts and accessories, purchased for use at package sorting facilities. Minimum investment and employment thresholds must be met to be eligible for and to maintain the exemption. This provision became effective July 1, 2022, and applies to purchases made on or after that date.
- Section 42.3 – Transfers a portion of the sales and use tax proceeds, ranging from 2%-6% over three years, to the Highway Fund and Highway Trust Fund for transportation needs. This provision became effective July 1, 2022.
- Section 42.4 – Shifts from annual to quarterly the motor fuel tax refund available for the off-highway use of motor fuel. This provision becomes effective January 1, 2023, and applies to purchases of motor fuel on or after that date.

H103 - 2022 Appropriations Act. Sec. 42.1: Expand Income Tax Exclusion of Military Retirement Pay to NOAA and U.S. Public Health Service Retirees. (SL 2022-74)

Section 42.1 of S.L. 2022-74 expands the individual income tax exclusion of military retirement pay to include retirement pay for service in all uniformed services. The exclusion enacted in Section 42.1A of S.L. 2021-180 applied to members of only the Armed Forces; this provision extends the exclusion to retirees of the commissioned corps of the National Oceanic and Atmospheric Administration (NOAA) and the U.S. Public Health Service.

This section became effective for taxable years beginning on or after January 1, 2022.

H103 - 2022 Appropriations Act. Sec. 42.2: Sales Tax Exemption for Interstate Air and Ground Couriers. (SL 2022-74)

Section 42.2 of S.L. 2022- 74 exempts from sales and use tax purchases by interstate air and ground couriers of certain equipment, including conveyor systems, and related parts and accessories, purchased for use at package sorting facilities. Minimum investment and employment thresholds must be met to be eligible for and to maintain the exemption.

This section became effective July 1, 2022, and applies to purchases made on or after that date.

H103 - 2022 Appropriations Act.
Sec. 42.3: Use Sales Tax Revenues for Transportation Needs. (SL 2022-74)

Section 42.3 of S.L. 2022-74 transfers a portion of the sales and use tax proceeds, which are otherwise deposited into the General Fund, to the Highway Fund and Highway Trust Fund for transportation needs. The amount transferred ranges from 2%-6% over three years.

This section became effective July 1, 2022.

H103 - 2022 Appropriations Act.
Sec. 42.4: Quarterly Motor Fuel Tax Refund for Off-Highway Use. (SL 2022-74)

Section 42.4 of S.L. 2022-74 shifts from annual to quarterly the motor fuel tax refund available for the off-highway use of motor fuel.

This section becomes effective January 1, 2023, and applies to purchases of motor fuel on or after that date.

H674 - Require DNA Various Convict'ns/Other Matters. (SL 2022-50)

S.L. 2022-50 does the following:

- Adds additional offenses to the list of offenses requiring submission of a DNA sample after a conviction or a finding of not guilty by reason of insanity. This section becomes effective December 1, 2022, and applies to convictions or findings of not guilty by reason of insanity on or after that date.
- Clarifies that medical facilities and medical professionals cannot bill sexual assault victims for forensic medical examinations and updates certain definitions. This section becomes effective October 1, 2022, and applies to forensic medical examinations completed on or after that date.
- Authorizes a county board of commissioners to designate the county finance officer or the county manager to refund the deed stamp tax.
- Requires that the register of deeds maintains a separately kept backup storage system, that is restorable from any point, for the purposes of disaster recovery, for the index of registered instruments that the register of deeds is required to maintain.

Except as otherwise provided, this act became effective July 7, 2022.

H674 - Require DNA Various Convictions/Other Matters. Sec. 2.1: Deed Stamp Tax Refunds. (SL 2022-50)

Section 2.1 of S.L. 2022-50 authorizes a county board of commissioners to designate the county finance officer or the county manager to refund the deed stamp tax.

Section 2.1 of S.L. 2022-50 became effective July 7, 2022.

H792 - Barbers/Electrolysis Boards/Merger. (SL 2022-72)

S.L. 2022-72 does the following:

- Amends the statutes pertaining to the practice of barbering and electrolysis as follows:
  - Merges the existing State Board of Barber Examiners and the Board of Electrolysis Examiners into a single board to be known as the North Carolina Board of Barber and Electrolysis Examiners (Board). The terms of the newly created Board begin on January 1, 2023.
  - Authorizes mobile barbershops.
  - Revises barber school requirements.
  - Establishes an electrolysis apprenticeship program.
  - Modifies certain fee provisions.

- Increases the annual Job Development Investment Grant for any business headquarters in the State by 20% if the business meets certain requirements, such as relocating its out-of-state manufacturing operation to a development tier 1 or tier 2 area.

- Makes a technical correction to the effective date of language in S.L. 2022-73.

Section 1 and Section 2 of this act become effective January 1, 2023, and apply to applications for licensure, examination, and renewal submitted on or after that date. The remainder of this act became effective July 8, 2022.

H1068 - UNC Non-Appropriated Capital Projects. (SL 2022-15)

S.L. 2022-15 authorizes the financing and construction of listed capital improvement projects by the constituent institutions of The University of North Carolina. The projects will be financed through revenue bonds, special obligation bonds, and other funds available to the institutions, excluding tuition and appropriations from the General Fund. This act also makes a series of changes related to capital improvement projects included in the 2021 Appropriations Act.

This act became effective June 29, 2022.

S265 - Bond Info Transparency/LGC Toolkit II. (SL 2022-53)

S.L. 2022-53 does the following:

- Requires units to provide a statement of disclosures that contain the estimated interest costs of the bond issuance, estimated property tax rate changes, if any, needed to service the proposed debt, and a calculation of the two-thirds bonds capacity of the unit for the current fiscal year (Sections 1-4).
- Requires units to file interim reports with the Local Government Commission (LGC) for events that will or may have a material, adverse effect on the financial health, operations, or internal controls of the unit (Section 5).
- Limits the amount of debt a unit on the most recently published Unit Assistance List could incur without LGC approval (Section 6).

- Repeals a provision requiring the State Health Plan to charge interest on late premiums to local governments and charter schools as the provision is not cost-effective to administer (Section 7).
- Requires notice to the LGC of the creation of any new public authority or unit that is subject to the Local Government Budget and Fiscal Control Act (Section 8).
- Increases the fidelity bond requirements for finance officers to protect the assets of local governments and public authorities (Section 9). This section becomes effective January 1, 2023.
- Authorizes charter schools to participate in the State Treasurer's Ancillary Governmental Participant Investment Program (AGPIP) (Section 9.5).

Except as otherwise provided, this act became effective July 7, 2022, and applies to bonds issued under bond orders introduced on or after October 1, 2022, and to contracts entered into on or after October 1, 2022.

S347 - Captive Insurance Amendments. (SL 2022-7)

S.L. 2022-7 makes a number of technical and substantive changes to the laws governing captive insurance companies in the State. This act has various effective dates. Please see the full summary for more detail.

S347 - Captive Insurance Amendments.
Sec. 5: Captive Insurance Company Tax Changes. (SL 2022-7)

Section 5 of S.L. 2022-7 makes the following tax-related changes regarding captive insurance companies:

- Provides that two or more captive insurance companies under common ownership and control will be taxed as separate companies if they are either a protected cell captive insurance company or a special purpose captive insurance company with a cell or series structure. It also specifies the aggregate amount of tax payable by a special purpose captive insurance company with a cell or series structure with more than 10 cells or series. This provision is effective for premium taxes imposed for taxable years beginning on or after January 1, 2022.
- Provides that if a licensed captive insurance company formed and licensed in another jurisdiction redomesticates to North Carolina with the approval of the Commissioner prior to December 31, 2022, it is exempt from premium taxes otherwise due for the remainder of the year in which redomestication occurs and for the calendar year following its redomestication. This provision is effective for premium taxes imposed for taxable years beginning on or after January 1, 2021, and expires for taxable years beginning on or after January 1, 2024.

S388 - Qualifying Farmer Zoo Sales Tax Exemption. (SL 2022-45)

S.L. 2022-45 does the following three things:

- Allows qualifying farmers that also have zoo operations to purchase items for the zoo under their qualifying farmer sales tax exemption certificate, effective for items purchased on or after January 1, 2023. (Part I)
- Creates a new sales tax exemption for certain items purchased by a wildlife manager for wildlife management activities, effective for items purchased on or after October 1, 2022. (Part II)

- Modifies and expands the property tax classification for wildlife conservation land, effective for taxes imposed for taxable years beginning on or after July 1, 2022. Property classified as wildlife conservation land is assessed and taxed at a value lower than its fair market value. (Part III)

Except as otherwise provided, this act became effective July 7, 2022.

S762 - North Carolina Farm Act of 2022.
Sec. 4: Preserve Conservation Easements After Property Tax Foreclosures. (SL 2022-55)

Section 4 of S.L. 2022-55 provides that conservation agreements survive real property tax foreclosure sales.

This section became effective July 8, 2022.

S762 - North Carolina Farm Act of 2022.
Sec. 6: Specify That Commercial Production or Growing of Animals for Purposes of Present Use Value Taxation Includes Boarding Horses. (SL 2022-55)

Section 6 of S.L. 2022-55 provides that boarding horses qualifies as the commercial production or growing of animals for purposes of the present use value property tax program.

This section became effective for taxes imposed for taxable years beginning on or after July 1, 2022.

H243 - Budget Technical Corrections.
Sec. 20.7: Grant Program Tax Deductions. (SL 2022-6)

Section 20.7 of S.L. 2022-6 provides a State individual and corporate income tax deduction for the amount received by a taxpayer from one or more of the following State created COVID-19 related grant programs: Business Recovery Grant Program, ReTOOLNC grant program, and the rent and utility assistance grant program. This section is effective for taxable years beginning on or after January 1, 2020.

H243 - Budget Technical Corrections.
Sec. 20.15: Allow State Income Tax Deduction for Employers Who Took the Federal Payroll Tax Credit for Employee Retention in lieu of a Federal Income Tax Deduction Where North Carolina has No Similar Tax Credit. (SL 2022-6)

Section 20.15 of S.L. 2022-6 is a technical change to fix an issue in the State individual and corporate income tax laws caused by the way the employee retention credit was setup and administered at the federal level. The technical change allows a State tax deduction that is intended and assumed under current law.

This section is effective retroactively for taxable years beginning on or after January 1, 2020.

2021 Finance Law Changes

H273 - Modify Builders Inventory Tax Exclusion. (SL 2021-113)

S.L. 2021-113 excludes from property taxation for up to three years any increase in value of residential real property attributable to new townhouse construction when held for sale by a builder.

This act becomes effective for taxes imposed for taxable years beginning on or after July 1, 2022.

H279 - COVID-19 Related Tax Changes/Unemployment Insurance Technical Correction. (SL 2021-16)

S.L. 2021-16 does the following:

- Clarifies that the extra credit grants and federal stimulus payments received as COVID-19 relief are not considered income for determining eligibility for property tax exemptions based on income.
- Provides for the nonaccrual of interest on 2020 individual income tax returns filed on or before May 17, 2021 and extends the statute of limitations for requesting a refund consistent with the extension provided by the Internal Revenue Service (IRS).
- Makes a technical correction to S.L. 2021-5, DES COVID Modifications and Technical Changes.

S.L. 2021-16 became effective April 27, 2021.

H196 - 2021 COVID-19 Response & Relief. (SL 2021-3)

S.L. 2021-3 (i) makes modifications to the State COVID-19 relief legislation and (ii) appropriates and provides additional guidance for expenditure of COVID-19 pandemic relief funds from the federal Coronavirus Response and Relief Supplemental Appropriations Act (CRRSAA).

Except as otherwise provided, this act became effective, March 11, 2021.

H383 - Medicaid Modernized Hospital Assessments. (SL 2021-61)

S.L. 2021-61 enacts two modernized hospital assessments that support continued funding for Medicaid payments to hospitals under the new Medicaid managed care system that began July 1, 2021. The modernized assessments replace two hospital assessments that historically provided funding for Medicaid payments to hospitals but that could not continue to be operated in the same manner upon the transition of the Medicaid program to managed care.

The repeal of the 2020 Revised Hospital Assessments became effective July 1, 2020. The remainder of the act became effective July 1, 2021.

H797 - Extend Farmers/Fishermen Tax Filing Deadline. (SL 2022-5)

S.L. 2022-5 extends from March 1 to April 15 the deadline by which qualifying farmers and fishermen must file and pay their 2021 taxes to avoid having to pay interest for failure to make estimated payments throughout the year.

This act became effective February 24, 2022.

S36 - 2020 COVID Relief Bill Modifications. (SL 2021-1)

Session Law (S.L.) 2021-1 makes modifications to the State COVID-19 relief legislation in light of the additional federal legislation and guidance.

This act has various effective dates. Except as otherwise provided, this act became effective February 10, 2021.

S105 - 2021 Appropriations Act.
Sec. 9D.13A: Modernized Hospital Assessments Additional Components and Technical Corrections . (SL 2021-180)

Section 9D.13A of S.L. 2021-180 adds two new components to the modernized hospital assessments enacted in S.L. 2021-61. The new components increase the amount of the assessments collected from hospitals in order to fund other changes to the Medicaid program required by the act, as follows:

- The postpartum coverage component assesses hospitals for costs associated with the increase in postpartum Medicaid coverage required by Section 9D.13 of the act. The postpartum component is effective during the five-year period that the postpartum coverage is authorized by Section 9D.13 of the act and the American Rescue Plan Act.
- The home and community-based services (HCBS) component assesses hospitals, beginning April 1, 2024, for ongoing costs associated with the HCBS projects that are described in Section 9D.8 of the act and that are to be funded through March 30, 2024, with nonrecurring funds from the HCBS Fund.

The other changes to the modernized hospital assessments made in this section are technical.

This section became effective January 1, 2022.

S105 - 2021 Appropriations Act.
Part 42: Finance. (SL 2021-180)

Part 42 of S.L. 2021-180 (2021 Appropriations Act) makes the following tax changes:

- Personal Income Tax Changes

S105 - 2021 Appropriations Act.
Sec. 42.1: Personal Income Tax Reduction. (SL 2021-180)

Section 42.1 of S.L. 2021-180 makes the following personal income tax changes:

- Reduces the personal income tax rate to 3.99% over 6 years.
- Increases the standard deduction by approximately 18.6%.
- Increases the child deduction by $500 and expands eligibility.
- Conforms to the permanent federal medical expense deduction threshold.

These changes are effective for taxable years beginning on or after January 1, 2022.

S105 - 2021 Appropriations Act.
Sec. 42.1A: Eliminate Tax on Military Pension Income. (SL 2021-180)

Section 42.1A of S.L. 2021-180 exempts the following military retiree income from taxation:

- Military retirement pay received by a retired member of the Armed Forces of the United States who served at least 20 years or was medically retired.
- Payments from the Survivor Benefit Plan to a beneficiary of a retired member of the Armed Forces of the United States who served at least 20 years or was medically retired.

This section is effective for taxable years beginning on or after January 1, 2021.

S105 - 2021 Appropriations Act.
Sec. 42.2: Phase Out Corporate Income Tax. (SL 2021-180)

Section 42.2 of S.L. 2021-180 eliminates the corporate income tax over a period of six years, beginning with the 2025 tax year.

This section is effective for taxable years beginning on or after January 1, 2025.

S105 - 2021 Appropriations Act.
Sec. 42.3: Franchise Tax Reduction and Simplification. (SL 2021-180)

Section 42.3 of S.L. 2021-180 simplifies the franchise tax base calculation and, for some taxpayers reduces the franchise tax amount, by eliminating the two tax bases calculated using property values.

This section is effective for taxable years beginning on or after January 1, 2023, and applicable to the calculation of franchise tax reported on the 2022 and later corporate income tax returns.

S105 - 2021 Appropriations Act.
Sec. 42.4: Conform to Federal Tax Treatment for PPP Loans and Related Business Assistance/IRC Update. (SL 2021-180)

Section 42.4 of S.L. 2021-180 (2021 Appropriations Act) updates the reference to the Internal Revenue Code used in defining and determining certain State tax provisions from May 1, 2020, to April 1, 2021.

This section became effective when the act became law on July 1, 2021.

S105 - 2021 Appropriations Act.
Sec. 42.5: Reduce Impact of Federal SALT Cap by Allowing Certain Pass-Throughs to Elect to Pay Tax at the Entity Level. (SL 2021-180)

Section 42.5 of S.L. 2021-180 allows pass-through entities to elect to pay the State income taxes at the entity level, which is not subject to the federal state and local tax (SALT) cap of $10,000.

This section is effective for taxable years beginning on or after January 1, 2022.

S105 - 2021 Appropriations Act.
Sec. 42.6: Separate State Net Operating Loss Calculation for Individual Income Tax Purposes. (SL 2021-180)

Section 42.6 of S.L. 2021-180 creates a separate North Carolina net operating loss (NOL) calculation to more closely align to the calculation of North Carolina taxable income by adjusting for differences between federal and State law and business activities taking place in multiple states.

This section is effective for taxable years beginning on or after January 1, 2022.

S105 - 2021 Appropriations Act.
Sec. 42.7: Reenact and Extend Mill Rehabilitation Credit. (SL 2021-180)

Section 42.7 of S.L. 2021-180 reenacts and extends the mill rehabilitation tax credit, including the credit for a rehabilitated railroad station.

This section became effective when the act became law on July 1, 2021.

S105 - 2021 Appropriations Act.
Sec. 42.7A: Expand and Extend Historic Rehabilitation Credit. (SL 2021-180)

Section 42.7A of S.L. 2021-180 expands and extends the historic rehabilitation tax credit.

The expansion of the credit to provide a bonus amount for historic structures used for an educational purpose became effective for taxable years beginning on or after January 1, 2021. The remainder of this section became effective July 1, 2021, when the act became law.

S105 - 2021 Appropriations Act.
Sec. 42.8: Limit Gross Premiums on Surety Bonds. (SL 2021-180)

Section 42.8 of S.L. 2021-180 limits the gross premiums tax base for premiums paid to a surety bondsman to the amount paid by the surety bondsman to the insurer of the bail bonds.

This section is effective for taxable years beginning on or after January 1, 2022.

S105 - 2021 Appropriations Act.
Sec. 42.9: Modify Excise Tax on Cigars and Clarify Delivery Sales and Remote Sales of Tobacco Products. (SL 2021-180)

Section 42.9 of S.L. 2021-180 imposes the current rate of excise tax, which is 12.8% of the cost price per cigar, on remote sales of cigars, and creates a cap of 30¢ per cigar for all cigar purchases, regardless of whether purchased in-person or online. This section also modifies existing excise tax statutes to distinguish between delivery sales and remote sales of tobacco products.

This section becomes effective July 1, 2022, and applies to sales occurring on or after that date.

S105 - 2021 Appropriations Act.
Sec. 42.10: Credit Short-Term Vehicle Rental Proceeds to Highway Fund. (SL 2021-180)

Section 42.10 of S.L. 2021-180 credits 100% of the proceeds derived from the 5% and 8% alternate highway use tax applied to short-term vehicle rentals to the Highway Fund.

This section became effective July 1, 2021, when the act became law.

S105 - 2021 Appropriations Act.
Sec. 42.11: Graduate Late Payment Penalties. (SL 2021-180)

Section 42.11 of S.L. 2021-180 (2021 Appropriations Act) replaces the flat penalty amount assessed for failure to pay a tax when due to a graduated amount that is 2% of the tax for the first month and is increased by 2% for each succeeding month or fraction thereof, not to exceed 10%.

This section becomes effective July 1, 2022, and applies to tax assessed on or after that date.

S105 - 2021 Appropriations Act.
Sec. 42.12: Property Tax Exemptions. (SL 2021-180)

Section 42.12 of S.L. 2021-180 creates two property tax exemptions: one for commercial cemetery property and one for vaccines.

This section is effective for taxable years beginning on or after July 1, 2022.

S105 - 2021 Appropriations Act.
Sec. 42.13A-F: Revenue Laws Technical, Clarifying, and Administrative Changes. (SL 2021-180)

Section 42.13A-F makes various technical, clarifying, and administrative changes to the Revenue Laws, most of which were recommended by the Department of Revenue.

Please see the individual provisions for the applicable effective dates.

S172 - Additional COVID-19 Response & Relief. (SL 2021-25)

S.L. 2021-25 establishes the following reserves and funds to handle grant funds received by the State under the federal American Rescue Plan Act: State Fiscal Recovery Reserve and Fund, Coronavirus Capital Projects Reserve and Fund, and Local Fiscal Recovery Reserve and Fund. This act also appropriates funds from the Local Fiscal Recovery Fund for distribution to various local governments and appropriates grant funds provided to the State under the American Rescue Plan Act. Technical and other changes are also included in the legislation.

This act became effective May 24, 2021.

S323 - Joint Municipal Power Agencies/Investments. (SL 2021-73)

S.L. 2021-73 allows moneys deposited in certain decommissioning funds established by North Carolina Municipal Power Agency Number 1, as well as funds deposited in the Swain County Settlement Trust Fund, to be invested through the State Treasurer's Ancillary Governmental Participant Investment Program.

This act became effective July 2, 2021.

2020 Finance Law Changes

H77 - DOT 2020-2021 FY Budget/Governance. (SL 2020-91)

S.L. 2020-91 adjusts the North Carolina Department of Transportation's FY 2020/2021 Certified Budget, and implements various financial governance provisions, including changes to the North Carolina Board of Transportation.

- Parts 1 through 4 of the act make various changes and clarifications to the Department's FY 2020/2021 budget.
    - Sections 4.2 and 4.6 relate to Motor Fuel Tax changes, and these provisions and their effective dates are summarized separately.
- Part 5 makes various changes to laws that relate to the governance, reporting requirements, and financial management of the Department.
- Parts 6 and 7 contain miscellaneous and technical provisions of this act.

The act became effective July 1, 2020, except for Section 4.9, which became effective June 15, 2020, and Section 5.1, which became effective July 31, 2020.

H77 - DOT 2020-2021 FY Budget/Governance.
Sec. 4.2: Motor Fuel Excise Tax Floor . (SL 2020-91)

Section 4.2 of S.L. 2020-91 sets a temporary floor on the motor fuel excise tax rate such that the 2021 rate cannot be lower than the current rate of 36.1¢ per gallon. Effective July 1, 2020, this change is expected to increase revenue by $20.2 million in FY 2020-21 and $33.4 million in FY 2021-22.

This section became effective July 1, 2020.

H77 - DOT 2020-2021 FY Budget/Governance.
Sec. 4.6: Modify Fuel Tax Distribution. (SL 2020-91)

Section 4.6 of S.L. 2020-91 modifies the current 71%/29% distribution of motor fuel tax revenue to the Highway Fund and the Highway Trust Fund as follows:

- Effective July 1, 2020, 81% to the Highway Fund and 19% to the Highway Trust Fund.
- Effective July 1, 2021, 80% to the Highway Fund and 20% to the Highway Trust Fund.
- Effective July 1, 2022, 75% to the Highway Fund and 25% to the Highway Trust Fund.

This section became effective July 1, 2020.

H308 - Regulatory Reform Act of 2020.
Sec. 1A: Establish a Maximum Fee for the Authorized On-Site Wastewater Evaluator Program. (SL 2020-74)

Section 1A of S.L. 2020-74 authorizes the North Carolina On-Site Wastewater Contractors and Inspectors Certification Board to establish an application fee for an authorized on-site wastewater evaluator in an amount not to exceed $300.

This section became effective July 1, 2020.

H1023 - Coronavirus Relief Fund/Additions & Revisions. Sec. 1.1(e) Revisions to S.L. 2020-4. (SL 2020-80)

Section 1.1(e) of S.L. 2020-80 creates multiple sections in S.L. 2020-4. Please see S.L. 2020-4 for these summaries.

H1043 - 2020 COVID-19 Recovery Act.
Sec. 3.3(75a): Lost Wage Assistance Program. (SL 2020-4)

Section 3.3(75a) of S.L. 2020-4, as enacted by Sec. 1.2 of S.L. 2020-97, provides that up to $50 million of the CARES Act funds may be used to fulfill the State's match obligation for the FEMA-approved $300/beneficiary grant funding for the Lost Wage Assistance program. Portions not used for this purpose will be used for continuity of operation needs across State government, in accordance with Section 3.3(3) of S.L. 2020-4. If this provision's allocation is insufficient for the state match requirement, OSBM may meet the requirement with funds allocated under Section 3.3(3) of S.L. 2020-4.

This provision became effective when it became law, on September 4, 2020.

H1043 - 2020 COVID-19 Recovery Act.
Sec. 4.2B: Job Retention Grants. (SL 2020-4)

Sec. 4.2B of S.L. 2020-4, as enacted by Sec. 1.1(e) of S.L. 2020-80, and amended by Sec. 1.5(a) of S.L. 2020-97, appropriates additional money from the Coronavirus Relief Fund to the Office of State Budget and Management (OSBM) and allocates $15 million to be used to establish a Job

Retention Grant program.

This section became effective July 1, 2020.

H1079 - Various Sales Tax Changes. (SL 2020-6)

S.L. 2020-6 has three parts consisting of various sales and use tax changes:

- Part I of the act provides relief to auctioneers and estate sale companies in light of recent law changes. The expansion of the sales tax exemption for the purchase of certain animals by qualifying farmers contained in this Part becomes effective July 1, 2020. The remainder of this Part became effective June 5, 2020.
- Part II of the act expands the scope of the sales and use tax exemption for equipment purchased by a large fulfillment facility. This provision becomes effective July 1, 2020, and applies to sales occurring on or after that date.
- Part III of the act makes the following changes with respect to the sales tax on digital property:

- Clarifies that the provision of an "educational service" by certain institutions, regardless of whether all or a portion of the instruction is delivered through an online class, whether live or recorded, is not a taxable event.
- Exempts sales of digital audio works and digital audiovisual works that qualify as an educational expense when purchased by the operator of a homeschool.
- Exempts sales of digital audio works and digital audiovisual works that consist of nontaxable service content when the transfer occurs contemporaneously with the provision of the nontaxable service in real-time.

This Part is effective retroactively to October 1, 2019, and applies to sales occurring on or after that date.

H1080 - Revenue Laws Recommendations. (SL 2020-58)

Session Law 2020-58 makes the following changes:

- Updates the reference to the Internal Revenue Code from January 1, 2019 to May 1, 2020.
  - It conforms to the exclusion from gross income of any amount of indebtedness forgiven on a loan covered under the Paycheck Protection Program.
  - It conforms to the reduction of the threshold amount for the medical expense deduction from 10% to 7.5% for 2019 and 2020 and transfers $36 million from the Medicaid Transformation Reserve to the General Fund to finance this tax reduction.
- Sets and codifies the insurance regulatory charge used to fund the Department of Insurance at 6.5%. The charge generated $47.2M in FY2018-19.
- Extends JDIG from January 1, 2021 to January 1, 2030.
- Extends the Natural Gas Economic Development Infrastructure Cost Recovery program from July 1, 2021 to July 1, 2026.
- Makes various other tax law changes recommended by the Department of Revenue and approved by the Revenue Laws Study Committee.

See full summary for effective dates.

H1105 - Coronavirus Relief Act 3.0.
Sec. 1.3: Extra Credit Grant Program. (SL 2020-97)

This provision allocates $440,541,000 of the federal funds in the Coronavirus Relief Fund to provide a grant of $335 to eligible families to assist with virtual schooling and child-care costs during the COVID- 19 pandemic. The grant is available to families that resided in the State for all of 2019 and reported they had at least one child eligible for the federal child tax credit in 2019. 1.2 million families, with almost 2 million children, are expected to qualify for the grant. The provision also provides a State income tax deduction for the 2020 taxable year equal to the grant amount received.

Section 1.1(c) and Section 1.3 of this act became effective when the act was signed into law on September 4, 2020. Section 1.4 of this act is effective for taxable years beginning on or after January 1, 2020, and expires for taxable years beginning on or after January 1, 2021.

H1105 - Coronavirus Relief Act 3.0.
Sec. 1.5: Job Retention Grant Program. (SL 2020-97)

This provision does the following:

- Allocates an additional $45.5 million of the federal funds in the Coronavirus Relief Fund to the Job Retention Grant program created by S.L. 2020-80.
- Corrects a statutory reference that will enable 501(c)(6) entities to be eligible for a grant under this program.
- Provides that if any funds remain available after the first round of grants, a second round of grants will be made available solely for a business or nonprofit that employs 20 or fewer employees.

H1105 - Coronavirus Relief Act 3.0.
Sec. 1.6A: Increased Benefit Amount. (SL 2020-97)

This provision allocates $87 million of the federal CARES act funds to provide individuals receiving State unemployment assistance an increased benefit amount of $50/week. The increased benefit amount is payable for weeks beginning on or after September 5, 2020. It expires immediately following
the week that fully expends the $87 million or the week beginning December 26th, whichever occurs first.

This provision became effective when it was signed into law, September 4, 2020.

S704 - COVID-19 Recovery Act .
Sec. 1.1: Waive Accrual of Interest on Deferred Payment of Corporate Income and Franchise Tax and Individual Income Tax and Extend Certain Tax Related Deadlines. (SL 2020-3)

Section 1.1 of S.L. 2020-3 waives the accrual of interest on individual income tax and corporate income and franchise tax returns due on or before April 15, 2020, from April 15 until July 15. The relief applies to partnership and estate and trust tax returns, as well as estimated tax payments for 2020 due on or before April 15, 2020. It also extends certain tax-related deadlines.

CURRENT LAW AND BACKGROUND: The Department of Revenue is statutorily required to waive the penalty for late filing and payment of taxes for any period in which the time for filing a federal return or report or for paying a federal tax is extended because of a presidentially declared disaster. The Department does not have the statutory authority to waive the accrual of interest. In

the wake of past disasters, although the late filing and payment penalties have been waived, the accrual of interest has not.

On March 13, 2020, the POTUS declared a national emergency concerning the COVID-19 outbreak under the Robert T. Stafford Disaster Relief and Emergency Assistance Act. As part of that declaration, he instructed Secretary Mnuchin to provide relief from tax deadlines. On March 20,2020, the United States Department of Treasury and the Internal Revenue Service announced that the time for filing federal income tax returns, as well as estimated tax payments for tax year 2020 that are due on April 15, 2020, was extended to July 15, 2020. The announcement stated penalties and interest will begin to accrue on any unpaid balances as of July 16, 2020.

On April 9, 2020, the IRS extended the following tax deadlines:

- The time for filing estimated tax payments due on or before June 15 to July 15.
- The time to request a refund of 2016 tax overpayments extended to July 15.
- The time to file certain petitions and requests for review due to be performed on or after April 1, 2020, and before July 15, 2020, extended to July 15.

On March 10, 2020, the Governor signed Executive Order 116 declaring a state of emergency in response to COVID 19. On March 17, the Department of Revenue announced penalty relief for taxpayers. On March 21, in response to the federal action, the Department announced it would extend the April 15 tax filing deadline to July 15 for individual income tax and corporate income and franchise taxes to mirror the announced deadline change from the IRS. The Department will not assess late action penalties if the returns are filed and payments made on or before July 15.

On March 31, 2020, the Department expanded penalty relief for failure to obtain a license, file a return, or pay tax that is due on March 15, 2020, through July 15, 2020, if the corresponding license is obtained, return is filed, or tax is paid on or before July 15, 2020. The tax relief applies to the following tax types:

- Withholding tax
- Sales and use tax
- Scrap tire disposal tax, white goods disposal tax, solid waste disposal tax, and dry-cleaning solvent tax
- Motor vehicle lease and subscription tax
- 911 service charge for prepaid telecommunications tax
- Primary forest product tax
- Freight car line companies
- Excise tax on alcohol, tobacco products, installment paper dealers
- Privilege tax
- Excise tax on motor carrier, motor fuel, alternative fuel and inspection tax

BILL ANALYSIS: Subsection 1.1(a) waives the accrual of interest from April 15, 2020, through July 15, 2020, on an underpayment of tax imposed on a franchise, corporate income, or individualincome tax return, including a partnership and estate and trust tax return, due from April 15, 2020, through July 15, 2020. The relief from accrual of interest would also include estimated tax payments due on or before April 15, 2020; that would apply to the first and second quarter estimated taxes. The act does not waive the accrual of interest on the tax payment extension of the other tax types.

Subsections 1.1(b) and 1.1(c) extend certain tax-related deadlines in the same manner as the IRS extended certain federal tax-related deadlines in its notice published on April 9th:

- Subsection 1.1(b) gives taxpayers until July 15, 2020, to request an overpayment of individual income taxes and corporate income and franchise taxes for which the statute of limitations to seek a refund expires on or after April 15, 2020, and before July 15, 2020. Under the general statute of limitations in G.S. 105-241.6, the time for requesting an overpayment of a tax due on or before April 15, 2017, would be April 15, 2020. This subsection provides anexception to the general rule by allowing a taxpayer to make the request on or before July 15, 2020.
- Section 1.1(c) gives taxpayers additional time to meet certain administrative and judicial action dates if those dates for action are due to be performed on or after April 1, 2020, and before July 15, 2020. Those actions include requests for a Departmental review of a proposed denial of a refund or a proposed assessment of tax, a petition for a contested case hearing at the Office of Administrative Hearings when a taxpayer disagrees with a notice of final determination issued by the Department, and a petition seeking judicial review of a party aggrieved by the final decision in a contested case. The actions are considered timely if filed on or before July 15, 2020.

S704 - COVID-19 Recovery Act .
Sec. 1.2: Flexibility to Administer Unemployment Compensation and SUTA Tax Credit. (SL 2020-3)

Section 1.2 of S.L. 2020-3 authorizes unemployment insurance benefits (UI) for employees affected by the coronavirus emergency due to theemployerr temporarily ceasing operations or reducing hours or theemployeee being diagnosed with coronavirus or being quarantined by a health care provider or government official.

Section 1.2 of the act also grants employers a credit equal to the employer's first quarter UI tax due, effectively eliminating UI tax for the first quarter of 2020.

Section 1.2 of the act became effective May 4, 2020; applies retroactively beginning March 10, 2020; and expires on the earlier of: the recension of Executive Order No. 116, Declaration of a State of Emergency to Coordinate Response and Protective Actions to Prevent the Spread of COVID 19 or December 31, 2020.

S704 - COVID-19 Recovery Act .
Sec. 1.4: UI Oversight Committee Recommendations. (SL 2020-3)

Section 1.4 of S.L. 2020-3 enacts three of the four recommendations of the Joint Legislative Oversight Committee on Unemployment Insurance:

- Allows an employer to file a UI claim for an employee (i.e., attached claim) for unemployment due directly to a disaster covered by a federal disaster declaration.
- Clarifies that liens for UI taxes have the same priority as other State tax liens.

- Makes the Joint Legislative Oversight Committee on Unemployment Insurance a permanent statutory study committee.

This section became effective when the act became law, May 4, 2020.

S704 - COVID-19 Recovery Act .
Sec. 1.3: Unemployment Insurance Oversight Committee Recommendations. (SL 2020-3)

Section 1.3 of S.L. 2020-3 enacts one of the four recommendations of the Joint Legislative Oversight Committee on Unemployment Insurance. It allows an unemployment insurance (UI) claimant to satisfy a work search contact by attending a reemployment activity offered by a local career center.

The section became effective July 1, 2020.

S808 - Medicaid Funding Act. (SL 2020-88)

Session Law 2020-88 appropriates funds for the Dorothea Dix campus relocation project and NC FAST; appropriates Coronavirus Relief Funds for early childhood initiatives, behavioral health and crisis services, and COVID-19 testing, contract tracing, and trends tracking and analysis; appropriates funds for the Medicaid program and Medicaid transformation; and makes changes related to Medicaid transformation implementation.

Except where provided otherwise, this act is effective July 2, 2020. See full summary for details.

2019 Finance Law Changes

H399 - Extend Tax Credits/Other Finance Changes. (SL 2019-237)
S.L. 2019-237 makes the following finance law changes:

- Allows an income exclusion for distributions from IRAs to charities by taxpayers age 70½ or older, effective for taxable years beginning on or after January 1, 2019.
- Allows an income tax deduction for amounts received as a JDIG, JMAC, or OneNC grant, effective for taxable years beginning on or after January 1, 2020.
- Extends the following sunsets for four years, from January 1, 2020, until January 1, 2024:
    - Historic Rehabilitation Tax Credit.
    - Sales tax exemption and refund for professional motorsports racing teams or related members of a team.
    - Sales tax exemption for aviation gasoline and jet fuel sold to an interstate air business.

- Extends the Mill Rehabilitation Tax Credit for an eligible railroad station that meets certain conditions.
- Extends the Dry-Cleaning Solvent Cleanup program, and the revenues used to fund the program, for 10 years.
- Sets the insurance regulatory charge at 6.5% for the 2020 calendar year.

S.L. 2019-237 appropriates the following amounts to the Department of Revenue from the Collections Assistance Fee Special Fund:

- $12.5 million for critical costs associated with tax systems operations and maintenance upgrades for the 2019-20 fiscal year.
- $4.4 million to contract with a vendor to perform identity theft and tax fraud analysis using the Government Data Analytics Center (GDAC) for the 2019-20 and the 2020-21 fiscal years.

This act has various effective dates. Please see the full summary for more detail.

H492 - Simplify Builder Inventory Exclusion. (SL 2019-123)

S.L. 2019-123 allows a builder to file a one-time application for the builder inventory property tax exclusion, effective for property tax years beginning July 1, 2019.

H537 - Alt. Hwy Use Tax Vehicle Subscriptions. (SL 2019-69)

S.L. 2019-69 defines "vehicle subscription" for purposes of the application of the alternate highway use tax and sets the tax rate at 5%, which is applied to the gross receipts derived from vehicle subscriptions. Under prior law, these subscriptions were considered short-term rentals by way of an interpretation of the Department of Revenue, which are subject to a rate of 8%.

This act became effective October 1, 2019, and applies to vehicle subscription agreements entered on or after that date.

H555 - Medicaid Transformation Implementation. (Ratified)

House Bill 555 provides funding for the operation of the Medicaid program and the transition to managed care during the 2019-2021 fiscal biennium and makes other changes necessary for the transition of the Medicaid program to managed care as required by Medicaid Transformation legislation that was enacted in 2015.

This bill was vetoed by the Governor on August 30, 2019, has not been overridden by the General Assembly, and has not become law.

This bill has various effective dates. Please see the full summary for more detail.

S56 - Revenue Laws Technical Changes. (SL 2019-6)
S.L. 2019-6 makes various technical changes to the State's revenue laws as recommended by the Department of Revenue including:

- Updates the reference to the version of the federal Internal Revenue Code (IRC) used to compute North Carolina tax items from February 9, 2018, to January 1, 2019.
- Requires a seller who, in the previous or current calendar year, made gross sales of more than $100,000 sourced to North Carolina or who made 200 or more separate sales transactions sourced to this State to collect and remit North Carolina sales and use tax.

The act became effective March 20, 2019; however, many sections were already effective under the Department's administrative rules.

S95 - Veterans Memorial Funds/Do Not Revert. (SL 2019-75)
S.L. 2019-75 does the following:

- Provides that funds appropriated for the construction of public facilities at the North Carolina Veterans Memorial Pavilion do not revert to the General Fund until June 30, 2020.
- Extends until June 30, 2021, the time in which funds allocated for water lines for Rockingham and Guilford counties, and certain municipalities within those counties, may be used before reverting to the General Fund, and expands the use of those funds to include sewer and wastewater projects.
- Allocates funds that were directed to be used to provide a grant to the Resource Institute, Inc. for hurricane mitigation projects on Topsail Island directly to the Towns of North Topsail Beach, Surf City, and Topsail Beach for hurricane recovery projects.
- Provides that funds allocated for planning and permitting of a satellite aquarium area shall instead be used to address storm damage at the Core Sound Waterfowl Museum and Heritage Center and to add the home of civil rights leader Golden Frinks to the Historic Edenton State Historic Site.
- Clarifies the purpose of water and wastewater infrastructure funding to the Town of Mount Airy.

This act became effective June 30, 2019.

S190 - Expand Special Assessments for Dam Repair. (SL 2019-190)
Session Law 2019-190 extends the sunset on counties' authority to impose special assessments for dam repair from July 1, 2019 to July 1, 2022, and expands the authority to repair privately-owned dams used for recreational and flood control purposes with a lake between 1,100 and 1,300 acres. The Woodlake dam in Moore County has a lake within this range.

S.L. 2019-151 made the sunset extension effective July 1, 2019. The remainder of this act became effective August 1, 2019.

S498 - Facilitate Response to Disasters. (SL 2019-187)

S.L. 2019-187 helps facilitate and expedite recovery after a natural disaster in two ways:

- Provides that nonresident businesses and nonresident employees that are requested to come into the State by a critical infrastructure company are not doing business in this State for the disaster-related work performed during the disaster response period; therefore are exempt from registration requirements and various State tax filing and payment requirements.
- Allows the Secretary of Revenue to issue a temporary license to an importer, exporter, distributor, or transporter of motor fuel in response to a disaster declaration without requiring that person to post a bond or obtain a certificate of authority to operate in this State from the Secretary of State.

This act became effective when it was signed into law on August 1, 2019.

S505 - Rural Job Retention Act. (SL 2019-14)

S.L. 2019-14 allows the Department of Commerce to award an additional grant of $15 million through the Job Maintenance and Capital Development Fund (JMAC), and it adds a new category of businesses eligible to receive a JMAC grant: a heritage manufacturing employer. Assuming Commerce awards an additional JMAC grant for $15 million over ten years, it will increase General Fund expenditures by $1.5 million per year for ten years, beginning in fiscal year 2021-22. The current recurring appropriation of $7.5 million to the JMAC account is expected to be sufficient to pay the expected grant payments.

The act became effective July 1, 2019.

S523 - Rev. Laws Clarifying & Administrative Changes. (SL 2019-169)

S.L. 2019-169 makes technical, clarifying, and administrative changes to the State's Revenue Laws, most of which were recommended by the Department of Revenue, including:

With respect to sales tax,

- Broadens the scope of the sales tax on digital property by eliminating the requirement that an item have a taxable, tangible corollary in order to be taxable.
- Clarifies that counties must wait at least one year from the date of the last preceding election before holding another special election on the issue of levying the quarter-cent local option sales tax.
- Clarifies the taxation of repair, maintenance, and installation services provided by property managers pursuant to a property management contract.
- Creates a new category of limited service car washes and exempts them from sales tax.
- Exempts the sales of equipment, including attachments and repair parts, used in cutting, shaping, polishing and finishing slabs of natural and engineered stone sold to a company primarily engaged in the business of made-to-order countertops, walls, or tubs.
- Exempts certain incontinence supplies when those supplies are paid for by the State's Medicaid program.

With respect to the tobacco excise tax,

- Requires tobacco product licensees to renew their excise tax license every three years at no cost. Currently, these licenses are not required to be renewed after the initial issuance.
- Regulates the Internet sale of tobacco products, except for cigars. Many of the requirements are already required under federal law with respect to cigarettes and smokeless tobacco products.

With respect to collection and other administrative matters,

- Imposes the collection assistance fee after 60 days. Currently, the fee is imposed after 90 days.
- Makes three groups of informational returns subject to penalties for failure to file and failure to file in the correct format: Article 2A Tobacco Products Tax; Article 2C Alcoholic Beverage License and Excise Taxes; and Article 4 Income Tax (includes informational returns from payers and partnerships).
- Broadens the innocent spouse relief provision to mirror the federal law and provide relief for both underpayments and understatements of tax.
- Restores the venue for criminal tax law violations to the office of the Secretary in Raleigh, which was the law prior to December 1, 2018.

S.L. 2019-169 became effective July 26, 2019; however, many sections have separate effective dates as detailed in the bill analysis.

S529 - Fees/Returned Checks. (SL 2019-77)

S.L. 2019-77 increases the maximum fee that a merchant can charge when a customer's check is returned from $25 to $35.

S557 - Various Finance Law Changes. (SL 2019-246)

S.L. 2019-246 makes the following finance law changes:

- Increases the standard deduction by 7.5%, from $20,000 to $21,500 for MFJ, effective for taxable years beginning on or after January 1, 2020.
- Expands the definition of "holding company" for franchise tax purposes, effective for taxable years beginning on or after January 1, 2020.
- Requires a multistate corporation to calculate its sales factor, for apportionment purposes, based on the percentage of income attributed to the consumption of products and services in the North Carolina marketplace, effective for taxable years beginning on or after January 1, 2020.
- Obligates a "marketplace facilitator" that meets the same threshold applicable to remote retailers to calculate, collect, and remit sales tax on a third-party seller's behalf, effective February 1, 2020.
- Directs the Revenue Laws Study Committee to review certain tax sunset provisions.
- Requires the Department of Revenue to update its electronic tax systems to store and recognize power of attorney registrations to ensure that notices are simultaneously sent to both the taxpayer and the person designated in the taxpayer's power of attorney.

S578 - Reduce Franchise Tax/Expand Film Grants. (Ratified)

SB 578 would do the following:

- Reduce the franchise tax rate from $1.50 to $0.96 over a two-year span and remove one method of calculating a corporation's franchise tax base, beginning with the 2021 taxable year.
- Reduce the qualifying expense thresholds for awards from the Film and Entertainment Grant Fund (Fund) and increase from $12 million to $15 million the maximum grant amount for a single season of a television series.

This bill was vetoed by the Governor on November 8, 2019, has not been overridden by the General Assembly, and, therefore, has not become law.

2018 Finance Law Changes

H320 - PUV Changes. (SL 2018-95)

S.L. 2018-95 creates an additional way land may be used to qualify for present-use value (PUV) taxation as wildlife conservation land. Property that qualifies for PUV taxation is appraised and taxed at its present-use value as opposed to its fair market value. S.L. 2018-95 extends the PUV classification and treatment to land that is actively and regularly used as a reserve for hunting, fishing, shooting, wildlife observation, or wildlife activities. If the land qualifies under this new provision, up to 800 acres of land can be classified for PUV taxation.
This act is effective for taxes imposed for taxable years beginning on or after July 1, 2019.

H374 - Regulatory Reform Act of 2018.
Sec. 25: Exempt Personal Property of Charter Schools from Property Tax. (SL 2018-114)

Section 25 of S.L. 2018-114 exempts the personal property of charter schools from property tax so long as the property is wholly and exclusively used for educational purposes.
This section became effective for taxes imposed for taxable years beginning on or after July 1, 2018.

H569 - Pretax Supplemental Benefits. (SL 2018-64)

S.L. 2018-64 provides that supplemental insurance plans offered to State employees through the Employee Insurance Committees may be offered on a pre-tax basis if the offering complies with Section 125 of the Internal Revenue Code.

S75 - Const. Amd. - Max. Income Tax Rate of 7.0%. (SL 2018-119)

S.L. 2018-119 proposes an amendment to the North Carolina Constitution to cap the tax rate on both personal and corporate incomes at 7% for taxable years beginning on or after January 1, 2019, and places that amendment on the ballot in the 2018 general election. The cap is currently 10%.
Except as otherwise provided, the act became effective June 28, 2018.

S99 - Appropriations Act of 2018.
Sec. 5.6: Tax Deduction for Certain Hurricane Relief Payments. (SL 2018-5)
Secs. 5.6(j) and 5.6(k) of the Appropriations Act of 2018, S.L. 2018-5, adds two tax deductions for hurricane relief payments from the State Emergency Response and Disaster Relief Reserve Fund:

- Individual taxpayers may deduct hurricane relief payments from adjusted gross income under new G.S. 105-153.5(b)(13) excluding payments for goods or services provided by the taxpayer.
- Corporate taxpayers may deduct hurricane relief payments from federal taxable income under new G.S. 105-130.5(b)(29) excluding payments for goods or services provided by the taxpayer.

The deductions are effective for taxable years beginning on or after January 1, 2017.

S99 - Appropriations Act of 2018.
Sec. 19.3: Military Affairs Commission/Members and Payment of Expenses from BRAC Funds. (SL 2018-5)
Sec. 19.3 of S.L. 2018-5 amends the laws governing expenditure of funds from the Military Presence Stabilization Fund and the voting authority of members of the General Assembly serving on the North Carolina Military Affairs Commission (NCMAC) to:

- Eliminate the restriction limiting expenditure of certain Military Presence Stabilization Funds to the 2017-2018 fiscal year.
- Require the Department of Military and Veterans Affairs (DMVA) to pay from its appropriations certain expenses approved by the NCMAC within 30 days of receiving a payment request by the NCMAC, and to make payment on any contract or grant awarded by the NCMAC no later than its due date without need of a request from the NCMAC.
- Extend to February 15, 2019, the due date of a report by the NCMAC to the Joint Legislative Oversight Committee on General Government on expenditures from the Military Presence Stabilization Fund.
- Prohibit any member of the General Assembly appointed to the NCMAC from voting on matters that expend funds appropriated by the General Assembly.

This act was vetoed by the Governor on June 6, 2018, and that veto was overridden by the General Assembly on June 12, 2018. This section became effective on July 1, 2018.

S99 - Appropriations Act of 2018.
Sec. 35.17: Require Submission of Pay Plan Design. (SL 2018-5)
Sec. 35.17 of S.L. 2018-5 requires any agency requesting an allocation from the Pay Plan Reserve of the General Fund to first submit to the Office of State Budget and Management (OSBM) a detailed description of the pay plan design, including the salary or salary range at each step within the pay plan, and the criteria for movement between steps of the pay plan.

S99 - Appropriations Act of 2018.
Sec. 35.25: State Troopers Increase/Training Loan Reimbursement. (SL 2018-5)
Sec. 35.25, as amended by Sec. 8.1 of S.L. 2018-97, implements a new pay plan for the State Highway Patrol and establishes a trooper training cost recovery program applicable after training to cadets and to certain law enforcement employers that hire cadets. To avoid possible federal income tax consequences associated with creating a forgivable loan program, Section 8.1 of the Budget Technical Corrections act (S.L. 2018-97, Senate Bill 335) restructured the program into a contract to reimburse the training expenses if the trooper separates from the Highway Patrol before 36 months of service.Instead of excusing liability monthly under a promissory note effective during training with forgiveness over the 36-month period, a trooper will agree to reimburse the State only if they leave State employment prior to the agreed upon contract period of 36 months. Covered law enforcement employers who hire a trooper who is still under contract requirements will be liable to the State for training costs in the amount of $36,000.
The changes became effective for the 2018-2019 fiscal year.

S99 - Appropriations Act of 2018.
Sec. 37.5: Exempt DOR/IT from Transition to DIT. (SL 2018-5)
Sec. 37.5 of S.L. 2018-5, as amended by Sec. 10.4 of S.L. 2018-97, provides that the Department of Revenue is not subject to the migration of information technology functions and personnel to the Department of Information Technology. Sec. 10.4 of S.L. 2018-97 provides that the Community College System Office has until October 1, 2019, to report to the Joint Legislative Oversight Committee on Information Technology and the Fiscal Research Division on its transition plan to the Department of Information Technology.
Please see the full summary for details on the various effective dates.

CURRENT LAW: G.S. 143B-1325 requires certain State agencies to transfer information technology personnel, operations, projects, assets, and appropriate funding to the Department of Information Technology (DIT) for the State Chief Information Officer to prepare plans to transition each participating agency to DIT. S.L. 2017-204[1] provided the Department of Revenue (DOR) additional time to complete the transfer and consolidation of its information technology to DIT due to the heightened security requirements imposed by the federal government for purposes of sharing taxpayer information, which were not yet in place at DIT.

BILL ANALYSIS: Sec. 37.5 of S.L. 2018-5 provides that DOR is not subject to the migration of information technology functions and personnel to DIT. DOR's security protocols are determined by the taxpayer secrecy and confidentiality provisions of G.S. 105-259 and IRS Publication 1075. The IT personnel in DOR meet the federally-required security checks, possess IT knowledge and skill, and understand tax law and tax return processing. Although the Department will not be subject to the migration of its IT functions and personnel to DIT, it will continue to furnish tax information to the State Chief Information Officer as required by G.S. 105-259(b)(45) and G.S. 143B-1385 for use by the Government Data Analytics Center.

G.S. 143B-1325 provides that the Community College System Office, the Department of Public Instruction, DOR, and the Bipartisan State Board of Elections and Ethics Enforcement have until October 1, 2018, to report to the Joint Legislative Oversight Committee on Information Technology and the Fiscal Research Division on their respective transition plans. As DOR is no longer subject to the migration of information technology to DIT, DOR will also no longer be required to report

[1] A link to S.L. 2017-204 can be found here.

on its transition plans. As amended, this section further provides that the Community College System Office has until October 1, 2019, to report on its transition plans.

EFFECTIVE DATE: Sec. 37.5 (c) of S.L. 2018-5 became effective July 1, 2018. The remainder of the section became effective June 12, 2018. Sec. 10.4 of S.L. 2018-97 became effective July 1, 2018.

S99 - Appropriations Act of 2018.
Sec. 38.1: IRC Update. (SL 2018-5)
Sec. 38.1 of S.L. 2018-5 updates the reference to the Internal Revenue Code (IRC) from January 1, 2017, to February 9, 2018. Therefore, to the extent North Carolina follows federal tax provisions in calculating State tax liability, changes made to the IRC by the federal Tax Cuts and Jobs Act (TCJA) and the Bipartisan Budget Act of 2018 (Budget Act) will apply to North Carolina.

S99 - Appropriations Act of 2018.
Sec. 38.2: Business Tax Changes. (SL 2018-5)
Sec. 38.2 of S.L. 2018-5, as amended by Sec. 11.2(a) of S.L. 2018-97, makes various changes to the business tax statutes to make the laws more equitable, intelligible, easier to administer, and concise by eliminating unnecessary provisions.
This section has various effective dates. Please see the full summary for more detail.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE:

Except as otherwise provided, this section became effective when it became law on June 12, 2018.

Subsection	Explanation	Effective Date
(a)	Amends the definition of a "corporation" for purposes of the application of the franchise tax to include partnerships that elect to be taxed as a corporation for income tax purposes. Under current law, the definition includes limited liability companies that elect to be taxed as corporations, but it does not include partnerships. This change equalizes the treatment among all business entities that either are corporations or choose to be taxed as one. Moreover, the change makes franchise tax treatment consistent with the income tax treatment.	1/1/19, and applies to calculation of franchise tax reported on the 2018 and later returns.
(b)	Does two things as it relates to the determination of net worth for franchise tax purposes: • Eliminates vague language to make clear that if a corporation does not maintain its books in accordance with generally accepted accounting principles (GAAP), then its net worth is computed in accordance with the method it uses for federal tax purposes. If a corporation uses a method for federal tax purposes other than GAAP, then the new subdivision (1a) requires that asset valuation, depreciation, depletion, and amortization be calculated for franchise tax purposes using same method used for federal income tax purposes.	1/1/19, and applies to calculation of franchise tax reported on the 2018 and later returns.

	• Prevents a double deduction of treasury stock that is already captured in the current franchise tax calculation.	
(c)	Provides guidance to the Department with respect to the term "income-producing activity" for apportionment purposes. The modernization of the language comports with current practice and policy. Section 11.2 of S.L. 2018-97 amended this subsection to remove the clarifying language as it applies to the sourcing of intangibles for corporate income and franchise tax apportionment.[2]	
(d)	Repeals references in the corporate addback statute to credits or deductions that have expired. G.S. 105-130.47 is the film credit that expired January 1, 2015. G.S. 105-129.16H is the credit for donating funds to a nonprofit or unit of State or local government to enable the acquisition of renewable energy property, which expired January 1, 2017.	
(e), (f), and (g)	Clarifies that non-North Carolina captive insurance companies, which are those licensed and taxed in another state, are not subject to the tax on captive insurance companies, the corporate income tax, the franchise tax, or the gross premiums tax. No state taxes a foreign captive insurance company despite the fact that the insured risk may be located in the state.	
(h)	Re-enacts a provision that was inadvertently not roll-called during the 2017 Session. Section 4 of S.L. 2017-151 added massage and bodywork therapists to the list of professionals that are required to pay the annual $50 State privilege license tax. However, the bill was not roll-called at the time of enactment as required by the NC Constitution.	Applies to taxable years beginning on and after July 1, 2018.
(i)	Provides that the income tax applicable to unrelated business income of a nonprofit organization does not include amounts paid or incurred by a 501(c)(3) organization for transportation and parking benefits it	Applies to taxable years beginning or and after January 1, 2018

[2] The original change included in this act sought to clarify that if an intangible is used in NC to generate income, such as a patent or trademark, then that income is sourced to NC. This sourcing principle is consistent with current policy as reflected in DOR bulletins. DOR suggested the clarifying language because some taxpayers have argued that if the royalty payment comes from an office located outside NC, then the income is not subject to tax in NC in spite of the fact that the patent or trademark is used in NC to generate income. However, some taxpayers feared that the change may impact the apportionment of other intangible income, such as dividends. To alleviate this concern, the Budget Technical Corrections act (Senate Bill 335, enacted as S.L. 2018-97) removed the clarifying language, thus retaining the current language.

	provides to its employees. Under the TCJA[3], a nonprofit organization that provides these benefits must pay tax on these expenses. This section ensures that NC's income tax treatment of these expenses will remain the same.	

S99 - Appropriations Act of 2018.
Sec. 38.3: Federal Determinations and Amended Returns. (SL 2018-5)
Sec. 38.3 of S.L. 2018-5 makes various changes to the federal corrections statutes, which are statutes that address a taxpayer's obligation when their federal taxable income is changed or corrected at the federal level and that change affects the amount of State tax payable. Specifically, the changes create a distinction between situations where the changes are the result of an action initiated by the Internal Revenue Service (IRS) and situations where the changes are the result of an amended return voluntarily filed by a taxpayer.
This section became effective June 12, 2018, and applies to federal amended returns filed on or after that date.

S99 - Appropriations Act of 2018.
Sec. 38.4: Automatic Extension of Time to File Tax Returns. (SL 2018-5)
Sec. 38.4 of S.L. 2018-5 provides that a taxpayer who is granted an automatic extension to file a federal income tax return is granted an automatic extension to file a State income and franchise tax return.
This section applies to taxable years beginning on or after January 1, 2019.

S99 - Appropriations Act of 2018.
Sec. 38.5: Sales and Use Tax Changes. (SL 2018-5)
Sec. 38.5 of S.L. 2018-5 does the following:

- Provides an option for a retailer who pays sales and use tax on property or services, and subsequently resells them at retail, to recover the sales and use taxes the retailer originally paid.
- Extends the Sales Tax Base Expansion Protection Act for an additional year to better ensure retailers with sales tax obligations understand the applicable tax law changes.
- Clarifies the sales and use tax treatment of frequently questioned transactions.
- Streamlines, clarifies, and modernizes statutory language to comport with recent sales and use tax changes.
- Makes other miscellaneous and technical sales and use tax changes.

This section has various effective dates. Please see the full summary for more detail.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE: Sec. 38.5 of S.L. 2018-5 makes various changes to the sales and use tax laws. Unless noted otherwise, the changes became effective when they became law on June 12, 2018.

Subsection	Explanation	Effective Date

[3] The federal Tax Cut and Jobs Act. For more information, see the explanation for Section 38.1 of this act.

<table>
<tr><td>(a)</td><td>Clarifies that the term "mixed transaction contract" applies to real property transactions; it does not include a contract that consists of a capital improvement and repair, maintenance, and installation (RMI) services for tangible personal property.</td><td>Effective retroactively to January 1, 2017.</td></tr>
<tr><td>(b)</td><td>Makes various stylistic and clarifying changes to sales tax definitions. The following changes are of note:
In subdivision (33c), language is being added regarding certain requirements for datacenters to address the fact that often there are no jobs at the time of application for a written determination.
In subdivision (33l), the language that creates an exemption for security or other monitoring services from taxable RMI services is being moved to the exemption statute {See subsection (j)}. The changes in this subdivision also separate services applicable to motor vehicles into one sub-subdivision.
In subdivision (37), the language clarifies that a credit allowed for a trade-in does not reduce the sales price of the item purchased.
In subdivision (45a), the reference date to the Streamlined Agreement is updated to the most recent iteration.
In subdivision (49), a reference in the definition of "use" is being deleted because it is no longer applicable on or after January 1, 2017, as a result of the change to the definition of "storage" for sales and purchases.</td><td></td></tr>
<tr><td>(c)</td><td>Merges the imposition of sales and use tax of RMI services with the taxation of the items themselves. This change alleviates the necessity of determining whether the imposition is on the sale of the item plus installation or on the RMI service. The taxation of the installation is the same, regardless of how it is classified; and this change removes any distinction that may exist.</td><td></td></tr>
<tr><td>(d)</td><td>Does two things in the sourcing statute:
Clarifies that the sourcing principles are generally for the benefit of the seller and that they do not alter the imposition of the use tax against a purchaser.
Provides guidance regarding the sourcing of computer software renewal. Currently, the statute is silent on this issue and the new language is consistent with the provisions of the Streamlined Sales and Use Tax Agreement.</td><td></td></tr>
</table>

(e)	Clarifies that certain activities are exempt from the sales and use tax on admission charges. The Department receives a number of inquiries regarding whether certain charges are subject to or exempt from the tax on admissions charges. Much of the administration of the tax hinges on the definition of "admission charges" which states, in part, "gross receipts derived for the right to attend an entertainment activity." The exemption for these activities is consistent with current practice, but by listing them explicitly in the statute, it will provide clearer guidance to taxpayers.	
(f)	Moves service contract exemptions from the service contract statute to the sales tax exemption statute. It is not a substantive change {See subsection (j)}.	
(g)	Corrects a statutory cross-reference.	Effective retroactively to January 1, 2017.
(h) and (i)	Provides a mechanism for a retailer who pays sales and use tax on property or services and subsequently resells the property or service at retail to recover the sales tax originally paid to a seller. The retailer could recover the sales tax originally paid by reducing taxable receipts by the taxable amount of the purchase price of the property or services resold for the period in which the retail sales occurs.[4] The records of the retailer must clearly reflect and support the adjustment to taxable receipts for the period in which the adjustment is made. The General Assembly provided a temporary means for a retailer to recover sales and use tax originally paid on an item subsequently resold at retail last session in section 2.8 of S.L. 2017-204, and directed the Revenue Laws Study Committee to study the feasibility of providing a permanent means.	
(j)	Makes various technical and clarifying changes to the sales and use tax exemption statute. The notable changes are as follow: • Last year, the General Assembly repealed the 1%/$80 privilege tax on mill machinery and substituted a sales tax exemption. The intent was to keep the interpretation and application of Article 5F the same, but to eliminate the tax on those items.	

[4] A retailer who purchases property or services for resell may purchase the items with a sales tax exemption certificate. If the items are subsequently used by the retailer, as opposed to resold, the retailer must remit use tax on the items purchased. The mechanism provided by this section give the retailer a different way to address this situation.

	Under the prior law, G.S. 105-187.51 specified that the term "accessories" did not include electricity. This caveat was inadvertently dropped when the language was moved into the sales tax exemption statute. The change in subdivision (5e) corrects the omission. • Subdivision (13) clarifies the taxation of over-the-counter drugs. In 2003, NC changed its taxation of drugs to use the defined terms under the Streamlined Sales and Use Tax Agreement. Since that time, drugs required by federal law to be dispensed only on prescription and over-the-counter drugs sold on prescription have been exempt from sales tax and the Department's Directives have provided guidance that adheres to the statutory exemptions. However, several questions continue to arise in this area and the intent of the amendment to this subdivision is to clarify the statutory language and adhere to the historical application. The amendment makes it clear that pet food is subject to tax, even if the manufacturer of that food requires that the food be sold on prescription; the exemption only applies to drugs required by *federal law* to be dispensed only on prescription. The amendment also makes it clear that over-the-counter drugs used to treat a patient in a medical facility are subject to tax; the exemption only applies to over-the-counter drugs *sold* on prescription. • Subdivision (15) provides guidance with respect to "worthless accounts" by reference to "bad debts" under the Code. A retailer may deduct worthless accounts from gross sales. • Relocates the current exemptions from the tax on RMI services and service contracts from the service contract statute. • Subdivision (70) is not a substantive change but merely corresponds with and cross-references the statute that sets out how to administer the tax on accommodations. That statute currently provides exemptions for private residences rented for fewer than 15 days a year, an accommodation provided for 90 or more days, and accommodations provided by a school, camp, or similar entity where a fee is charged for enrollment.	
(k)	This subsection does two things:	Effective retroactively to July 1, 2014.

	• Clarifies that a qualifying farmer may be a person who boards horses. This clarification conforms to a similar change made to the present use value statutes last session. • Provides that remedies, vaccines, medications, litter materials, feeds, rodenticides, insecticides, and other substances may be exempt from sales and use tax if purchased for use on animals and plants held or produced for commercial purposes by a qualifying farmer. Prior to the tax law change made in 2014, these substances were exempt from tax if purchased for use on animals or plants held or produced for commercial purposes. Effective July 1, 2014, these substances *had to be purchased by a qualifying farmer* to meet the exemption requirements. Under the change made by this section, the exemption applies regardless of who purchases the substances so long as the substances are used to provide a service to a person who holds a qualifying farmer exemption certificate or a conditional farmer exemption certificate. Provides a person who paid sales and use tax for a return period ending prior to the date this subsection became law on an item exempt under this subsection may seek a refund directly from the Department of Revenue. The request must be made on or before October 1, 2018.	
(*l*)	Adds the term "taxable" to the statute authorizing a sales tax refund on certain purchases by an interstate carrier. By adding this term, it will identify that motor vehicle service contracts are exempt from sales and use taxes and will eliminate the requirement to include purchases of various items that are exempt from sales and use tax. Since the refund is calculated using a ratio reflecting in-State mileage which is then multiplied by the purchase price of the items purchased, the refund amount is more accurately reflective of the formula if only taxable items are included within the total purchase price of items.	
(m)	Makes a technical change to accurately correspond with defined term.	
(n)	Eliminates a provision limiting the Secretary to extend the time for filing a sales tax return to no more than 30 days after the regular due date of the return. This change came about as the result of needing to extend the time beyond the 30-day period for taxpayers who were affected by Hurricane Matthew. With the change, sales tax extensions would be governed by G.S. 105-263 without the 30-day limitation. Under that statute, an extension of time for filing a return other than a franchise tax return or an income tax	

	return extends the time for paying the tax due and the time when the penalty attaches for failure to pay the tax. However, interest accrues on the tax due from the original due date of the return.	
(o)	Makes two changes in the direct pay permit statute: • Clarifies that a direct pay permit is not applicable to any of the items that are subject to the combined general rate of tax, with the exception of telecommunication service as allowed under G.S. 105-164.27A(b). • Clarifies that items withdrawn from inventory and sent to another state are subject to tax in NC because the first "use" occurs in this State. This change is consistent with removal of the exceptions from the definition of "storage," effective January 1, 2017.	
(p)	Adds facilitators to the statute that authorizes the Secretary to estimate tax due and assess entities with sales tax remittance obligations when those entities fail to file a return or file a false or fraudulent return. They are being added because facilitators have sales tax remittance obligations under the sales tax statutes along with retailers and wholesale merchants.	
(q)	Extends the Sales Tax Base Expansion Protection Act for an additional year to better ensure retailers with sales tax obligations understand the applicable tax law changes. Under the Act, impacted retailers are given a grace period under which the Department will not impose assessments if the retailer demonstrates a good faith effort to comply. It also adds transactions to the grace period that have been inadvertently omitted.	
(r)	Corrects a cross-reference due to the repeal of a subsection.	
(s)	Makes a grammatical change.	
(t)	Provides that a consumer must keep records of items purchased inside the State, as well as outside the State. This change is needed to enable the Department to administer the new provision enacted by subsection (h) of this section that allows a retailer who pays sales and use tax on property or services and subsequently resells the property or service at retail to recover the sales tax originally paid to a seller. It also highlights for the retailer the need to retain these records.	
(u)	Provides a sale tax exemption for that portion of the gross receipts derived from an admission charge that is described in section 170(*l*)(2) of the Code. Under the federal Tax Cuts and Jobs Act, a charitable deduction is no longer allowed	

	for an amount paid to an educational institution of higher learning if the taxpayer receives, directly or indirectly, the right to purchase tickets for an athletic event. Under sales tax law, any amount deductible as a charitable contribution is exempt from sales tax. The amendment ensures that any change in the deductibility of a contribution for income tax purposes does not inadvertently broaden the sales tax base for admission charges.	
(v)	Modernizes the statute to recognize the expansion of the sales tax base to services.	
(w)	Modernizes the statute and makes changes consistent with provisions in Part VI of the act that provide a framework for the Department of Revenue to offer and prescribe the format for electronic filings.	
(x), (y), and (z)	Defines a property management contract and provides that a property management contract is not subject to sales tax. The effective date is January 1, 2020. The service of providing property management is not currently subject to sales tax. However, RMI services that a property management company may perform in addition to its management services may be subject to sales tax. Directs the Revenue Laws Study Committee to review the amendments made by subsections (x) and (y), and to recommend any changes necessary to make the law concise, intelligible, easy to administer, and equitable.	Effective January 1, 2020

S99 - Appropriations Act of 2018.
Sec. 38.6: Excise Tax Changes. (SL 2018-5)
Sec. 38.6 of S.L. 2018-5 makes various excise tax changes, including the following:

- Requiring certain ABC permit holders to register with the Department of Revenue (Department) in order to aid in tax compliance.
- Increasing the motor fuel rate authorized to be charged by a certain class of gas stations allowed to charge the South Carolina rate due to the gas station being considered in North Carolina because of the NC/SC border recertification in 2016. The rate increase will be 2Â¢ each year over the next six years, totaling 12Â¢, to mirror the motor fuel rate increase imposed in South Carolina.

Sec. 38.6(c), requiring certain listed ABC permit holders to register with the Department and to notify the Department when a permittee discontinues their business, becomes effective July 1, 2018.
Except as otherwise provided, this section became effective June 12, 2018.

S99 - Appropriations Act of 2018.
Sec. 38.7: Modified Risk Tobacco Product Tax Reduction. (SL 2018-5)
Sec. 38.7 of S.L. 2018-5 provides an excise tax rate reduction for modified risk tobacco products. A modified risk tobacco product is a product that is sold or distributed for use to reduce harm or the risk of tobacco-related disease associated with commercially-marketed tobacco products. For a product to qualify as a modified risk tobacco product, it must be issued an order by the United States Food and Drug Administration (FDA). To date, the FDA has not issued any such orders.
This section became effective June 12, 2018.

S99 - Appropriations Act of 2018.
Sec. 38.8: Allow Cities to Use Revenues for Public Education. (SL 2018-5)
Sec. 38.8 of S.L. 2018-5, as amended by Sec. 11.1 of S.L. 2018-97, authorizes, but does not require, cities to levy property taxes to supplement funding for elementary and secondary public education that benefits the residents of the city and to appropriate those revenues, in addition to any other unrestricted revenues,for that purpose.
This section became effective July 1, 2018, and applies to revenues derived from taxes levied on or after that date.

S99 - Appropriations Act of 2018.
Sec. 38.9: Waive Certain Property Tax Penalties and Interest. (SL 2018-5)
Sec. 38.9 of S.L. 2018-5, as amended by Sec. 9.5 of S.L. 2018-76, provides an additional circumstance under which certain property tax deadlines are extended to the next business day. The additional circumstance is when all of the following conditions occur on the due date: (i) the tax office is closed, (ii) the U.S. Postal Service did not provide service to the taxpayer's address, and (iii) a disaster has been declared.
This section is effective for taxes imposed for taxable years beginning on or after July 1, 2017.

S99 - Appropriations Act of 2018.
Sec. 38.10: Other Tax Changes. (SL 2018-5)
Sec. 38.10 of S.L. 2018-5 makes several miscellaneous tax changes, including the following:

- Clarifies that when a corporation's articles of incorporation or a limited liability company's articles of organization are suspended, the entity is nevertheless liable for its tax obligations.
- Provides that meals other than breakfast served at a bed and breakfast home or inn must be separately stated rather than added to the room rate. The change more accurately reflects the intended result when the General Assembly changed the law in 2017 to allow bed and breakfast inns to serve lunch and dinner. The effect of this change means that those meals will be subject to State and local sales tax and the prepared food tax, if there is one, but not the occupancy tax.
- Repeals a provision enacted last year that inadvertently created a double tax benefit for funds placed in a Personal Education Savings Account. The deduction will remain in place, but the exclusion from income is repealed. This provision is effective for taxable years beginning on or after January 1, 2018.
- Authorizes the Secretary of Revenue (Secretary) to make provisions for the electronic filing of returns and modifies the penalties related to informational returns in an effort to combat refund fraud and identity theft.

This section has various effective dates. Please see the full summary for more detail.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE:

Subsection	Explanation	Effective Date
(a) and (b)	Clarifies that the imposition of a revenue suspension, which is an act done by the Secretary of State at the direction of the Department of Revenue (Department), does not mean that the suspended corporation or LLC ceases to be liable following the suspension for accrued, current, or subsequent State taxes; rather the tax liability remains unaffected by the suspension.	June 12, 2018
(c)	Clarifies the expiration date of a provision that allows the Secretary to compromise the liability of a retailer who is assessed for failure to properly collect sales tax on admission charges, service contracts, prepaid meal plans, or aviation gasoline and jet fuel. The language is being adjusted to mirror the language in G.S. 105-237.1(a)(7) because the intent was for the provision to be tied to a certain reporting period and not for the expiration to be tied to when assessments are issued.	June 12, 2018
(d)	Adds references to recently created property tax exemptions to the list of those for which a property owner must file a single application. Generally speaking, a property owner seeking a property tax exemption must file an annual application. There are some exceptions, under which either no application is required or only a one-time application is required. This section adds the following exemptions to the single application requirement; these exemptions were established in recent years but corresponding changes were not made to the application statute: • Real and personal property occupied by charter schools that is wholly and exclusively used for educational purposes. • Energy mineral interest in property for which a permit has not been issued under G.S. 113-395. • Real and personal property located on lands held in trust by the United State for the Eastern Band of Cherokee Indians, regardless of ownership. • A mobile classroom or modular unit that is occupied by a school and used exclusively for educational purposes.	June 12, 2018
(e) and (f)	Corrects a cross-reference.	June 12, 2018
(g)	Requires that lunch and dinner meals, served at the option of guests staying at a bed and breakfast home or inn, be charged separately on the guest's bill and, therefore, are not included in the room rate. This change corrects a	Effective July 1, 2018, and applies to gross receipts derived

	provision enacted last year to more accurately reflect the General Assembly's intent. The effect of this change means that those meals will be subject to State and local sales tax and the prepared food tax, if there is one, but not the occupancy tax. This treatment is consistent with how traditional room service meals are taxed at hotels. By contrast, the room rental and the breakfast, which is typically included as part of the room rental, is subject to State and local sales tax and occupancy tax. Subsection 38.10(s), the effective date provisions for this section, provide that a retailer is not liable for an undercollection of sales tax, occupancy tax, or prepared food and beverage tax if the retailer made a good-faith effort to comply with the law and collect the proper amount of tax; this provision applies only to the period beginning January 1, 2018, and ending July 1, 2018.	from the rental of an accommodation that a consumer occupies or has a right to occupy on or after that date.
(h)	Waives an antiquated restriction regarding sales and use tax revenue distributed to a municipality for water and sewer capital outlay purposes. G.S. 105-487(b) required a municipality to use a percentage of the sales and use tax revenue distributed to it under Article 40 of Chapter 105 of the General Statutes, First One-Half Cent (½¢) Local Government Sales and Use Tax, only for water and sewage capital outlay purposes. This restriction was time-limited. Prior to the sunset of the restriction, a municipality could petition the Local Government Commission to waive part or all of the restriction if the municipality demonstrated that its water and sewer needs could be met without the use of the restricted sales tax revenue. A similar restriction existed under Article 42, Second One-Half Cent (½¢) Local Government Sales and Use Tax. The restrictions on this use expired more than 20 years ago. The General Assembly repealed the obsolete restrictions in S.L. 1998-98: G.S. 105-487(b) and G.S. 105-504. Some municipalities have monies in their enterprise funds received from sales and use tax distributions prior to the expiration of the restrictions. Those funds must be expended as provided in the statute that existed at the time of the distributions, unless the municipality petitions the Local Government Commission to waive the restriction and the petition is approved. Under 20-NCAC 03.0112, the Local Government Commission charges a fee of $625.00 for services rendered to obtain this approval. There are some municipalities who do not own or operate a water or sewer system. In at least once instance, the amount of revenue subject to the restriction is less than $1,500. This section would allow a municipality that does not own or operate a water or sewer system to expend	June 12, 2018

	those funds for any public purpose without the necessity of petitioning the Local Government Commission for approval.	
(i)	Repeals an obsolete provision.	June 12, 2018
(j) and (k)	Provides more specificity with regard to the expiration of the Historic Rehabilitation Tax Credits. The State historic tax credit under Article 3D expired for expenditures incurred on or after January 1, 2015. However, the taxable year for which the credit is taken is not the year in which the expenditures are incurred, but the taxable year in which the certified historic structure is placed in service. Generally speaking, "placed in service" is the earlier of the taxable year in which the period for depreciation with respect to the property begins, or the taxable year in which the property is available for a specifically assigned function (ie, trade or business, production of income, personal activity, tax-exempt activity). The purpose of these subsections is to give more specificity with regard to the expiration of the tax credit, so the Department will know with certainty when it may remove the tax credit from the tax forms. Under subsection (j), the property for which an expenditure was incurred prior to January 1, 2015, must be placed in service by January 1, 2023. Subsection (k) makes a similar clarification to the prospective sunset of the existing historic rehabilitation tax credit under Article 3L – the credit expires for expenditures incurred on or after January 1, 2020, and the historic structure for which those expenses were incurred must be placed in service by January 1, 2028.	June 12, 2018
(*l*)	Deletes a reference to an expired credit that is not permitted to be claimed by an estate or trust. G.S. 105-153.10 is the child credit that is repealed for tax years beginning on or after January 1, 2018.	June 12, 2018
(m)	Repeals a provision that creates a double income tax benefit for funds in a Personal Education Savings Account (PESA). A PESA is a bank account provided to a parent for the purpose of holding scholarship funds awarded by the State Education Assistance Authority for an eligible student to be used for certain qualifying education expenses. The General Assembly enacted the program in Section 10A.4 of S.L. 2017-57. As part of the program's provisions, it provides that funds deposited in a PESA are not taxable income. In addition, the legislation provided an income tax	For taxable years beginning on or after January 1, 2018.

	deduction from adjusted gross income for amounts deposited in a PESA, to the extent those funds are included in adjusted gross income. To prevent a double tax deduction, this subsection removes the language from the PESA statute stating that funds deposited into a PESA are not taxable income, and leaves the applicable deduction in the tax statutes.	
(n)	Restores the "out of business" provision, which directs employers as to when they must file the withholding reconciliation informational return if the employer terminates its business during the calendar year. In 2015, the General Assembly changed the due date for filing the NC-3 Form from "the same date the employer's federal information return of federal income taxes withheld from wages is due under the Code" to "January 31." Under the Code, an employer that goes out of business is required to file the federal reconciliation report with the IRS within 30 days from the last day the taxpayer has payroll. An unintended consequence of changing the due date without reference to the Code was the loss of this 30- day provision. This change restores that requirement for NC tax purposes. This section also moves existing language from another statute into this statute. This language is not new but is being relocated. (See summary for subsection (p) of this section).	June 12, 2018
(o)	Corrects a typographical error and strikes penalty language for failure to timely file an information request because the penalty language is being modified and addressed in another statute. (See summary of Section 38.10(p)).	June 12, 2018
(p)	Modifies the existing penalty for failure to file an informational return and creates a $200.00 penalty for failure to file an informational return in the proper format. The current penalty for failure to file an NC-3 is $50.00; the current penalty for failure to file an informational return under G.S. 105-251.2, which applies to occupational licensing boards, alcohol vendors, and payment settlement entities, is $1,000. This subsection tries to better align these penalties by changing both to $50.00 per day with a maximum penalty of $1,000. This issue was studied by the Revenue Laws Study Committee during the 2017-2018 interim and links to the Department and staff presentations can be found here and here.	June 12, 2018
(q)	Provides that the Secretary will prescribe when a return, report, payment, or any other document that is	June 12, 2018

	electronically submitted to the Department is considered timely filed.	
(r)	Provides a framework for the Department to offer and prescribe the format for electronic filings. This statute includes authority to waive an electronic submission requirement and requires the Department to publish annually on its website a list of returns that are *required* to be filed electronically and those that are *permitted* to be filed electronically during the next calendar year.	June 12, 2018

S220 - Motor Fuel Tax Exemption for Joint Agency. (SL 2018-39)

S.L. 2018-39 exempts a joint agency created by interlocal agreement for the purposes of fire protection, police protection, or emergency services from having to pay motor fuel excise taxes. This act becomes effective October 1, 2018, and applies to purchases made on or after that date.

S411 - Various Motor Vehicle Law Revisions.
Secs. 6, 7, and 8: Motor Vehicle Taxes. (SL 2018-42)

Secs. 6, 7, and 8 of S.L. 2018-42 clarify the applicability of local and regional public transportation registration taxes and DMV fee adjustments on motor vehicles sold by a motor vehicle dealer by making clear that the applicable rate or fee is the one in effect on the date of sale, regardless of the date of submission of the title and registration application.
These sections became effective June 22, 2018, and apply to any tax or tax increase with an effective date on or after that date.

S412 - Abandoned Vehicles/Charities. (SL 2018-43)

S.L. 2018-43 does the following:

- Provides a process for used motor vehicle dealers to sell vehicles donated to charitable organizations when the donated vehicle is titled in this State but the title is not provided with the donation.
- Provides that a charitable organization is not required to register and title a vehicle that was donated to the organization solely for purposes of resale.
- Provides that willful and intentional failure to comply with the new statutory process is grounds for denying, suspending, placing on probation, or revoking a motor vehicle dealer's license.
- Exempts a charitable organization where a vehicle was donated to the organization solely for purposes of resale from the definition of motor vehicle dealer.
- Exempts a charitable organization from paying highway use tax for a title issued as the result of a transfer of a vehicle to the organization that was donated solely for purposes of resale.

This act became effective June 22, 2018.

S561 - Violate Tax Law/Venue/Property Tax. (SL 2018-98)

S.L. 2018-98 does the following:

- Exempts from property tax leasehold interests in exempt property. This change is effective for taxes imposed for taxable years beginning on or after July 1, 2019.

- Changes the venue for the prosecution of criminal tax violations from Raleigh to the county where the charged offense occurs. This change becomes effective December 1, 2018, and applies to offenses committed on or after that date.

S616 - Heroin & Opioid Prevention & Enforcement Act. (SL 2018-44)
S.L. 2018-44 does the following:

- Amends laws pertaining to the North Carolina Controlled Substances Act.
- Amends laws pertaining to the North Carolina Controlled Substances Reporting System Act.
- Establishes conditions and requirements for the release of information from the Controlled Substances Reporting System to local law enforcement.
- Revises and establishes penalties for certain violations.
- Expresses the intent to appropriate additional funds in the future for community-based substance use disorder treatment and recovery services, the purchase of overdose medications, Operation Medicine Drop, and a special agent position with the State Bureau of Investigation.
- Amends the statewide Telepsychiatry program that delivers mental health and substance abuse care.

This act has various effective dates. Please see the full summary for more detail.

BILL ANALYSIS:

Part I. TITLE OF ACT

Section 1 sets forth the title of the act as the Heroin and Opioid Prevention and Enforcement (HOPE) Act of 2018.

Part II. AMENDMENTS TO THE NORTH CAROLINA CONTROLLED SUBSTANCES ACT

Sections 2, 3, and 6 make technical changes to the chemical names of two controlled substances.

Section 4 includes the immediate precursor chemical required for the manufacture of fentanyl as a Schedule II Controlled Substance under G.S. 90-90.

Section 5 adds the precursor chemical used in the manufacturing process of fentanyl to the list of immediate precursor chemicals.

Section 7 makes conforming changes to the way opioids are referenced in Chapter 90, expands the criminal offenses related to MDPV to include "any substituted cathinone" and consolidates the existing offenses in light of the expansion.

Section 8 adds a new section to Article 5 of Chapter 90 of the General Statutes that does the following:

- Creates the position of a "certified diversion investigator".
- Requires that a certified diversion investigator request and receive prescription information from pharmacies when required, and only when required, for an active investigation related to a controlled substance.
- Requires that a pharmacy provide the requested information, and protects the pharmacist from liability for sharing the confidential information.

Section 9 makes technical corrections, expands the Class 1 misdemeanor for aiding the diversion of a controlled substance and creates the following criminal offenses:

- A Class G felony for intentionally aiding the diversion of a controlled substance.
- A Class E felony for a medical professional that intentionally dilutes or substitutes any controlled substance.

Part III. AMENDMENTS PERTAINING TO THE NORTH CAROLINA CONTROLLED SUBSTANCES REPORTING SYSTEM ACT

The Controlled Substances Reporting System (CSRS) is a database maintained by DHHS that tracks prescriptions for Schedule II through Schedule V controlled substances. Dispensers are required to report certain information on prescriptions they fill within close of the next business day after the prescription is delivered, but are encouraged to report such information within 24 hours of delivery. Such information is confidential and may only be accessed by certain persons for specific purposes set forth by statute. Current law allows DHHS to release CSRS data to persons authorized to prescribe controlled substances, special agents of the North Carolina SBI, as well as others.

Section 10 requires a lawful controlled substance dispenser to report the prescriber's national provider identification number, and relieves a pharmacy or pharmacist from liability for failure to report a prescriber's national identification number when it is not received by the pharmacy.

Section 11(a) authorizes access to the controlled substance reporting system to the Attorney General of North Carolina, expands access to the Tactical Diversion Squad in North Carolina, and creates the following criminal offenses:

- A Class I felony for accessing unauthorized prescription information in the CSRS.
- A Class I felony for disclosing prescription information for an unauthorized purpose.
- A Class H felony for maliciously obtaining, disclosing, or disseminating prescription information for personal gain or to cause harm.

Section 11(a) also does the following:

- Permanently bars an individual convicted of one of these criminal offenses from accessing the CSRS.
- Expands the SBI's Diversion & Environmental Crimes Unit's jurisdiction to include suspected criminal use of the CSRS.

Section 11(b) establishes the following conditions and requirements for the release of information from the CSRS to local law enforcement:

- Release is only authorized to a certified diversion investigator, working with a qualified law enforcement agency, related to illegal controlled substance activity, and the request for information has been approved by the SBI.
- The SBI is not liable for the disclosure of confidential information as requested by the certified diversion investigator.
- Documentation of the requested information and resulting investigations will be kept, and audited by the SBI.
- The information obtained by the certified diversion investigator may only be shared with law enforcement and prosecutors directly involved with the investigation and prosecution.
- The matter may be referred by local law enforcement to the SBI if appropriate.

- Information may not be requested or received from other states, using the CSRS.
- Defines the new terms related to the parties authorized access to the reporting system.
- The Department of Health and Human Services (DHHS) is directed to enable specific access to the CSRS.
- Direct DHHS to document the system's activity so that unauthorized access may be investigated by the SBI and prosecuted by the Office of the Attorney General.

Section 11(c) directs DHHS to begin developing ways to implement the data release provisions required.

Section 12 enables DHHS to temporarily suspend a reporting system user's access to the system in the event of a suspected unauthorized use of information, and relieves a party acting lawfully and in good faith from liability for accessing and disclosing confidential information.

Section 13 authorizes and describes the training and certification of diversion investigators.

Section 14 creates the minimum standards and levels of training for diversion investigators and diversion supervisors, and requires recertification at least every three years, and authorizes Training and Standards Commission to suspend, revoke, and deny certification.

Part IV. APPROPRIATIONS

Section 15 expresses the General Assembly's intent to appropriate additional funds in the future for community-based substance use disorder treatment and recovery services, the purchase of overdose medications, Operation Medicine Drop, and a special agent position within the SBI.

Part IV-A. TELEPSYCHIATRY

Section 15.1 adds new definitions and modifies existing definitions of G.S. 143B-139.4B, which requires the Office of Rural Health to oversee and monitor establishment and administration of a statewide telepsychiatry program. This section creates a definition for community-based site. This section modifies the definition for referring site to include approved community-based sites, and removes the word acute from the definitions of consultant site, consulting provider and telepsychiatry.

Section 15.1 also requires referring sites to use consulting providers at a consultant site to provide timely psychiatric assessment and rapid initiation of treatment for patients at the referring emergency department site experiencing mental health or substance abuse or for patients at an approved community-based site in need of mental health or substance abuse care.

Part V. SEVERABILITY CLAUSE AND EFFECTIVE DATE

Section 16 makes any provisions of the bill held to be invalid by a court severable from the other provisions of the bill, which would remain in effect.

Section 17. The section requiring a lawful controlled substance dispenser to report the prescriber's national provider identification number, and relieving a pharmacy or pharmacist from liability for failure to report a prescriber's national identification number becomes effective September 1, 2018.

The criminal offenses expanded and created by this act become effective December 1, 2018.

The sections making technical changes to the North Carolina Controlled Substances Act, including the immediate precursor chemical required for the manufacture of fentanyl as a Schedule II Controlled Substance and adding the precursor chemical used in the manufacturing process of fentanyl to the list of immediate precursor chemicals become effective December 1, 2018.

The section creating the position of a certified diversion investigator, requiring a certified diversion investigator to request and receive information from pharmacies for an active investigation related to a controlled substance and requiring a pharmacy to provide the requested information becomes effective July 1, 2019.

The section establishing the conditions and requirements for the release of information from the CSRS to local law enforcement becomes effective July 1, 2019.

The remainder of this act became effective July 1, 2018.

Jennifer Bedford contributed substantially to the preparation of this summary.

S711 - NC Farm Act of 2018.
Sec. 14: Provide Uniformity to Assessment of Farm Machinery. (SL 2018-113)
Sec. 14 of S.L. 2018-113 directs the Department of Revenue to publish a depreciation schedule for farm equipment and make the schedule electronically available on its website. A county appraiser may use any of the appraisal methods provided in statute and must consider relevant taxpayer information. However, if the county uses a cost approach method to appraise the equipment, the county must appraise the equipment using the depreciation schedule published by the Department of Revenue.
This bill was vetoed by the Governor on June 25, 2018, and that veto was overridden by the General Assembly on June 27, 2018. This section is effective for taxes imposed for taxable years beginning on or after July 1, 2019.

S711 - NC Farm Act of 2018.
Sec. 15: Clarify Cemetery Property Tax Exemption. (SL 2018-113)
Under existing law, real property set apart for burial purposes, where the property is not offered for sale or rental or sale of burial rights therein, is not subject to property tax. Sec. 15 of S.L. 2018-113 provides that the owner of the property is not required to apply for the property tax exemption for burial property. A county is prohibited from denying the exemption to a taxpayer who lacks a survey or plat detailing the exempt property.
This bill was vetoed by the Governor on June 25, 2018, and that veto was overridden by the General Assembly on June 27, 2018. This section became effective June 27, 2018.

S750 - Health in Local Confinement/Veterinarians Controlled Substances/Wendell Holmes Murphy Freeway/Tax Due Date. (SL 2018-76)
S.L. 2018-76 does the following:

- Addresses health issues in local confinement facilities.
- Ensures State prisons are full participants in the NC Health Information Exchange, known as NC HealthConnex.
- Amends the duties of law enforcement officers related to involuntary commitment.
- Amends the North Carolina Controlled Substances Act and the Controlled Substances Reporting System pertaining to the practice of veterinary medicine.
- Requires continuing education for veterinarians on the abuse of controlled substances.
- Includes the North Carolina Veterinary Medical Board on the Prescription Drug Abuse Advisory Committee.
- Amends various budget provisions.

This act has various effective dates. Please see the full summary for more detail.

BILL ANALYSIS:

Section 1 requires that the medical examiner and the coroner must be notified immediately if a prisoner in the custody of a local confinement facility dies, regardless of the physical location of the prisoner at the time of death.

Section 2 requires the Department of Health and Human Services (DHHS) to study how to improve prisoner health screening with a goal of improving the determination that a prisoner in a local confinement facility has been prescribed life-saving prescription medications and a process to ensure the timely administration of those prescription medications. DHHS is required to report on or before November 1, 2018 to the JLOCHHS.

Section 3(a) requires the Department of Public Safety, DHHS, and the Government Data Analytics Center (GDAC) within the Department of Information Technology (DIT) to work collaboratively with organizations representing local government and law enforcement to facilitate the secure transmission of health information pertaining to prisoners in local confinement facilities through participation in the HIE Network, known as NC HealthConnex.

Section 3(b) requires the Department of Public Safety, DHHS, and GDAC to ensure prison facilities are full participants in NC HealthConnex. **Section 3(c)** requires DHHS and GDAC, to provide an interim report to JLOCHHS on or before October 1, 2018 and a final report on or before October 1, 2019.

Section 3.1 increases by four percent the annual salaries of all State employees employed in positions based in State adult correctional facilities in effect on June 30, 2018.

Section 3.2(a) and **Section 3.2(b)** require a law enforcement officer to transport an individual under involuntary commitment proceedings to a facility or other location identified by the LME/MCO in the community crisis services plan unless circumstances indicate the respondent appears to be suffering a medical emergency in which case the law enforcement officer will seek immediate medical assistance for the individual.

Section 4 clarifies a practitioner does not include a veterinarian for purposes of this section, which exempts a veterinarian from having to review patient information in the CSRS prior to prescribing a targeted controlled substance.

Section 5 states a veterinarian may continue to prescribe targeted controlled substances from valid written, oral or facsimile prescriptions. This further clarifies the exemption for a veterinarian from the electronic prescription requirement. The existing statute and this clarification are not effective until January 1, 2020.

Under current law, a dispenser who dispenses any Schedule II to V Controlled Substance must report prescription information to the CSRS.

Section 6 clarifies the definition of a dispenser for purposes of the requirements for CSRS includes a veterinarian when that person dispenses any Schedule II through V controlled substances. A veterinarian must report this prescription information to the CSRS. G.S. 90-113.73(g), as created by this section, states a veterinarian may submit prescription information by paper form or other means, provided all information required of electronically submitted data is submitted.

Under current law a practitioner may not prescribe more than a five day supply of any targeted controlled substance upon initial consultation and treatment of a patient for acute pain or prescribe more than a seven day supply of any targeted controlled substance for post-operative acute pain following a surgical procedure. **Section 7** exempts prescriptions for controlled substances wholly administered in an emergency facility, veterinary hospital or animal hospital as defined in G.S. 90-181.1, from the five day and seven day limitations on prescriptions for acute pain. Section 7 clarifies the definition of acute pain does not include pain treated as part of cancer care, hospice care or palliative care provided by a veterinarian. Section 7 modifies the definition of surgical procedure to include procedures performed by a veterinarian.

Section 8 requires the Veterinary Medical Board to require continuing education on the abuse of controlled substances as a condition of license renewal.

Section 9 adds the Veterinary Medical Board to the Prescription Drug Abuse Advisory Committee. **Section 9.2** requires the Department of Transportation to designate the portion of Interstate 40 in North Carolina from mile marker 380 to mile marker 385 the Senator Wendell Holmes Murphy, Sr. Freeway. **Section 9.5** clarifies the applicable date when a due date for taxes imposed for taxable years beginning on or after July 1, 2017 falls on a weekend, holiday or closure date.

EFFECTIVE DATE: The section clarifying a veterinarian may continue to prescribe targeted controlled substance from valid written, oral or facsimile prescriptions becomes effective January 1, 2020.

The section governing the transportation of an individual under involuntary commitment proceedings by a law enforcement officer is effective October 1, 2019 and applies to proceedings initiated on or after that date.

Veterinarians must report prescription information to the CSRS for dispensing any Schedule II through V controlled substances effective January 1, 2019. G.S. 90-113.73(g), as enacted by Section 6 of this act, expires effective October 1, 2019.

The section requiring the North Carolina Veterinary Medical Board to require continuing education on the abuse of controlled substances became effective June 25, 2018 and applies to renewal applications received in 2020.

The remainder of this act became effective June 25, 2018.

*Theresa Matula contributed to this Bill Summary.

S758 - Build NC Bond Act of 2018. (SL 2018-16)

S.L. 2018-16, The Build NC Bond Act of 2018, authorizes the issuance of up to $3 billion in special indebtedness to create an additional funding source for Build NC Projects, which consists of Division Needs Projects and Regional Impact Projects scheduled in accordance with the Strategic Transportation Investments law in Article 14B of Chapter 136 of the General Statutes.
This act becomes effective January 1, 2019 and expires December 31, 2028.

2017 Finance Law Changes

H59 - Revenue Laws Technical Changes. (SL 2017-39)

S.L. 2017-39 makes technical changes to the Revenue Laws as recommended by the Department of Revenue.
The section of the act pertaining to tax credits for constructing a railroad intermodal facility became effective June 21, 2017 and applies to taxable years beginning on or after January 1, 2017. The remainder of this act became effective June 21, 2017.

H158 - Special Assessments/Critical Infrastructure. (SL 2017-40)

S.L. 2017-40 does two things:

- It authorizes a county or city to contract with a private party to construct a project on behalf of the county or city, and to reimburse the private party for costs incurred by the private party related to the project from the imposition of special assessments on the benefited property owners. The county or city would not be obligated to reimburse the private party

any amount in excess of assessment revenues actually collected, less the entity's related administrative expenses.

- It clarifies who may be entitled to the proceeds of a performance guarantee issued by a developer to a county or city to assure successful completion of required improvements by the developer under a subdivision control ordinance.

This act became effective June 21, 2017, and applies to assessments made on or after that date.

H434 - Coins/Currency/Bullion Sales Tax Exemption. (SL 2017-181)

S.L. 2017-181 exempts from sales and use tax the sales of rare coins, paper currency, and precious metal bullion. This act became effective July 1, 2017, and applies to sales made on or after that date.

H548 - Equalize Treatment of Wastewater Products. (SL 2017-139)

S.L. 2017-139 exempts from sales and use tax wastewater dispersal products approved by the Department of Health and Human Services to equalize treatment among the various suppliers of these products. The act became effective July 1, 2017, and applies to sales made on or after that date.

S257 - Appropriations Act of 2017.

Sec. 10A.4: Personal Education Savings Account Program. (SL 2017-57)

S.L. 2017-57, Sec. 10A.4 establishes the North Carolina Personal Education Savings Account Program (PESA). A PESA is a bank account provided to a parent for the purpose of holding scholarship funds awarded by the State Education Assistance Authority (SEAA) for an eligible student to be used for certain qualifying education expenses. To be eligible for the scholarship, a student must reside in North Carolina, have not yet received a high school diploma and meet all three of the following requirements:

- Meet one of the following criteria:
- Was a full time student (i) assigned to and attending a public school pursuant to State law or (ii) enrolled in a Department of Defense Elementary and Secondary School located in North Carolina, during the previous semester.
- Received scholarship funds for a PESA during the previous school year.
- Is entering either kindergarten or the first grade.
- Is a child in foster care.
- Is a child whose adoption decree was entered not more than one year prior to submission of the scholarship application.
- Is a child whose parent or legal guardian is on full time duty status in the active uniformed service of the United States.
- Is a child enrolled part time in a public school and part time in a nonpublic school that exclusively provides services for children with disabilities.
- Has not enrolled in a postsecondary institution in a matriculated status eligible for enrollment for 12 hours of academic credit.
- Is a child with a disability.
- The SEAA must annually make applications available and select recipients for scholarships according to the following criteria:
- First priority must be given to eligible students who were awarded scholarship funds for a PESA during the previous school year if applications are made by March 1.
- After funds have been awarded to prior recipients, any remaining funds can be used to award scholarship funds for a PESA for all other eligible students.

The SEAA may verify information on any application for the award of a PESA, and household members of applicants must authorize access information needed for verification efforts held by other State agencies.

Scholarships will be awarded each year for up to $9,000 per eligible student, deposited in quarterly installments, subject to execution of a parental agreement. Funds will be accessible to the parent on a debit card with the prepaid funds loaded on the card, and parents will be required to submit quarterly expense reports. Parents of a PESA recipient must complete an annual written agreement to use at least a portion of the scholarship to provide an education to the eligible student in, at a minimum, the subjects of English language arts, mathematics, social studies, and science. The parent must also agree to release the local education agency the student is eligible to attend of all obligations to educate the student while the student is receiving the PESA. PESA funds do not constitute taxable income to the parent, legal guardian, or legal custodian of an eligible student or to the eligible student.

Students who receive the PESA are also to receive an Opportunity Scholarship. Students who receive the PESA and an Opportunity Scholarship are also eligible to receive a Students with Disabilities Scholarship if the student has one or more of the following disabilities:

- Autism.
- Developmental disability.
- Hearing impairment.
- Moderate or severe intellectual disability.
- Multiple, permanent orthopedic impairments.
- Visual impairment.

A student's continuing eligibility for the scholarship must be assessed every three years by either the local education agency or a licensed psychologist with a school psychology focus or a psychiatrist.

PESA funds may only be used for the following qualifying education expenses of the eligible student:

- Tuition and fees for a nonpublic school that meets certain requirements.
- Textbooks required by a nonpublic school.
- Tutoring and teaching services provided by an individual or facility accredited by a State, regional, or national accrediting organization.
- Curricula.
- Fees for nationally standardized norm referenced achievement tests, advanced placement tests, or nationally recognized college entrance exams.
- Fees charged to the account holder for the management of the PESA.
- Fees for services provided by a public school, including individual classes and extracurricular programs.
- Premiums charged to the account holder for any insurance or surety bonds required by the SEAA.
- Educational therapies from a licensed or accredited practitioner or provider.
- Educational technology defined by the SEAA as approved for use.
- Student transportation, pursuant to a contract with an entity that regularly provides student transportation, to and from (i) a provider of education or related services or (ii) an education activity.

PESA funds may not be used for any of the following purposes:

- Computer hardware or other technological devices not defined by the Authority as educational technology approved for use.
- Consumable educational supplies, including paper, pen, or markers.
- Tuition and fees at an institution of higher education or a private postsecondary institution.
- Tuition and fees for a home school.

The SEAA is responsible for administration of the PESA program, including providing notifications to various State agencies, establishing rules and regulations for the administration of the program, including a lottery process for the selection of recipients within the criteria if necessary, contracting in the SEAA's discretion with a private financial management firm or institution to manage PESAs, and conducting annual audits of PESAs.
The SEAA must report annually by September 1 to the Joint Legislative Education Oversight Committee on the following:

- Total number, grade level, race, ethnicity, and sex of eligible students receiving scholarship funds.
- Total amount of scholarship funding awarded.
- Number of students previously enrolled in public schools in the prior semester by the previously attended local education agency.
- Nonpublic schools in which scholarship recipients are enrolled, including numbers of scholarship recipients at each nonpublic school.
- The number of substantiated cases of fraud by recipients and the number of parents or students removed from the program for noncompliance with the provisions of this Article.

EFFECTIVE DATE: This section became effective July 1, 2017. The PESA program applies beginning with the 2018-2019 school year. Changes to laws related to income tax are effective for taxable years beginning on or after January 1, 2018.

S257 - Appropriations Act of 2017.
Part 38: Finance Provisions. (SL 2017-57)
Part 38 of S.L. 2017-94 contains the following finance provisions:
Individual Income Tax

- Lowers the personal income tax rate from 5.499% to 5.25%, effective for taxable years beginning in 2019.
- Increases the standard deduction to $20,000 for married filing jointly taxpayers and to $10,000 for single filers, effective for taxable years beginning in 2019.
- Changes the standard deduction for head of household filers to an amount that is 75% of the amount for married filing jointly taxpayers, effective for taxable years beginning in 2019.
- Changes the child credit to a tiered child deduction, effective for taxable years beginning in 2018.

Corporate Income Tax

- Reduces the corporate income tax rate from 3% to 2.5% rate, effective for taxable years beginning in 2019.

Franchise Tax

- Reduces the franchise tax rate for S corporations by applying a flat $200 on the first $1 million of the calculated base, applicable to the calculation of franchise tax reported on the 2018 and later corporate income tax returns.

Sales Tax

- Exempts from sales tax distribution equipment, and accessories, attachments, or repair parts for distribution equipment, sold to a large fulfillment facility, effective July 1, 2017.
- Repeals the 1%/$80 privilege tax applicable to mill machinery and certain other manufacturing and industrial equipment and establishes a sales tax exemption for this equipment, effective July 1, 2018. It also directs the Revenue Laws Study Committee to study this area of law to provide more guidance to taxpayers and the Department of Revenue about what constitutes "mill machinery," how to define "manufacturing," and how to incorporate the body of Departmental administrative law in this area into the statutes.
- Exempts from sales tax repair or replacement parts for a ready mix concrete mill, regardless of whether the mill is freestanding or affixed to a motor vehicle, effective July 1, 2018.
- Provides a sales tax refund for building materials, supplies, and equipment sold to a business that receives a JDIG award prior to June 30, 2019, for a "transformative project," which is a project that requires an investment of $4 billion in private funds and creates at least 5,000 eligible positions.

Renewable Energy Tax Credit

- Allows certain biomass resource-related projects to claim the renewable energy tax credit if it had a certain minimum level of completion prior to January 1, 2016, and it was placed in service prior to May 5, 2017.

S326 - Clarify HUT & Improve Vehicle Titling Process.
Sec. 1: Clarify HUT. (SL 2017-69)

Section 1 of S.L. 2017-69 clarifies that the highway use tax applies to out-of-state vehicles when they are first titled in this State, effective June 28, 2017.

S391 - Ferry Transportation Authority. (SL 2017-120)

S.L. 2017-120 authorizes the creation of a Ferry Transportation Authority to operate a ferry system in the area of a tidal river, and adjoining estuaries, in the vicinity of a municipality that is only accessible by water.
This act became effective July 18, 2017.

S468 - QZAB Use Modification. (SL 2017-187)

S.L. 2017-187 makes modifications to the conditions for the award of Qualified Zone Academy Bonds (QZABs) by providing that the conditions established by the State Board of Education (SBE) for the uses of a QZAB allocation must be for one of the purposes permitted by federal law, and that the QZAB funds must be prioritized so that those funds are first used in Tier 1 counties

determined to have greater economic distress and for schools where 75% or more of the school's students are eligible to receive free or reduced lunch under the federal lunch program.
Effective July 1, 2017, the act also authorizes award of grant funds from the Needs Based Public School Capital Fund for projects when a pre-development agreement for an operational lease was entered into on or before June 30, 2017.
Except as otherwise provided, this act became effective July 25, 2017, and applies to bond proceeds used on or after that date.

S615 - North Carolina Farm Act of 2017. (SL 2017-108)

S.L. 2017-108 made various changes to laws governing agricultural matters, including provisions involving the following:

- Agriculture and forestry awareness study commission studies
- Expand facilities exempt from EMC rule
- Present use-value change
- Abandoned livestock amendments
- Authority of the Department of Agriculture and Consumer Services to adopt and administer forest practice guidelines for purposes of the sedimentation pollution control act
- Assent to mutual aid provisions of the Great Plains Wildland Protection Compact
- Clarify activities incident to the farm and agritourism
- Eliminate county authority to adopt zoning regulations governing swine farms
- Allow food compliance inspectors to drive state vehicles without state tags and bumper stickers
- Meat and poultry technical corrections
- Modernize forest ranger statutes
- Allow emergency workers to receive worker's compensation when responding to non-fire emergencies
- Create exception from conservation benefit analysis for certain easements
- Exempt farm trucks that stay in State from having a USDOT identification number
- Exempt closure of hog lagoons from requiring the use of a professional engineer
- Exempt farm vehicles engaged in intrastate commerce from certain federal motor carrier safety regulations
- Authorize wine sales at farmers markets
- Allow extension of conditional exemption from sales and use tax for certain farmers
- Amend conditions that may be applied to agreements for the purchase of agricultural products

S628 - Various Changes to the Revenue Laws. (SL 2017-204)

S.L. 2017-204 makes various substantive, technical, clarifying, and administrative changes to the revenue laws. This act has various effective dates. Please see the full summary for more detail.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE:

Section	Bill Analysis	Effective Date
PART I. BUSINESS TAX CHANGES		
1.1	Removes unnecessary language in the franchise tax statutes.	August 11, 2017

1.2	Recognizes that a holding company may own companies that do not own stock.	August 11, 2017
1.3	Allows taxpayers to reduce the tangible property base for franchise tax purposes by the amount of any debt owed on the property. The adjustment was eliminated in the 2015 franchise tax simplification changes. The section also modernizes the statute. Subsection (c) of this section rewrites a provision in the budget bill, S.L. 2017-57, that reduces the franchise tax rate for S-corporations to include the technical changes made by this act.	The modernization changes became effective August 11, 2017. The reenactment of the deduction becomes effective for taxable years on or after Jan. 1, 2020
1.4	Specifies that a transferor of the historic tax credit for restoring non-income producing property must provide the transferee with information detailing the rehabilitation expenses and the credit amount.	Taxable years on or after Jan. 1, 2017
1.5	Clarifies that petroleum-based liquid pipeline companies apportion income for corporate income and franchise tax based upon the number of barrel miles transported in this State. This change codifies	Taxable years beginning on or after
	subsection also modernizes the statute. This subsection becomes effective for taxable years beginning on or after January 1, 2017.	January 1, 2017.
1.6	Modifies corporate income tax deduction for interest expense paid or accrued to affiliates. Under current law, a corporation may deduct the greater of an amount limited to 15% of its adjusted taxable income or its proportionate share of interest paid or accrued by the affiliated group to an unrelated party. However there is no limitation on the deduction under certain conditions, such as if the recipient is subject to state tax on the interest income. The act eliminates the 15% provision. The act also clarifies that if one of the conditions is met, the Department cannot disallow the deduction by applying one of the rules of the regulations under Section 385 of the Internal Revenue	Taxable years on or after Jan. 1, 2017
1.7	Corrects a statutory cross-reference. The current statutory reference became obsolete when the income tax statutes were substantially changed, effective for taxable years beginning on or after January 1, 2014.	Taxable years on or after Jan. 1, 2014
1.8	Corrects a statutory cross-reference.	August 11, 2017

1.9	An out of state owner in an S corporation or partnership is subject to North Carolina tax on the pro rata share of income attributable to North Carolina. This section clarifies that this amount includes guaranteed payments received in addition to profit distributions; the changes do not represent a change in the law.	Applicable to all taxable years
1.10	This section was removed by the conference report. [1]	
1.11	Subsection (a) clarifies that the additional rate of 0.74% applicable to the gross premiums on insurance contracts for property coverage is not part of the gross premiums tax, but is a special purpose assessment based upon gross premiums. Subsection (b) allows a taxpayer that elected to take a business and energy tax credit against the gross premiums tax for a taxable year prior to January 1, 2017, may take an installment or carryforward of the credit against the additional tax for taxable years beginning before January 1, 2017, but may not take an installment or carryforward of the credit against the additional tax for taxable years beginning on or after January 1, 2017. A taxpayer may apply to the Department for a refund of any excess tax paid to the extent the refund is the result of the benefit provided by this subsection. A request for a refund must be made on or before January 1, 2018. An request for a refund received after this date is barred. The issue of whether the special assessment is part of a taxpayer's gross premiums tax liability has been challenged. If the assessment is part of the tax liability, then a taxpayer may offset the liability with tax credits. This section codifies the Department's long-standing interpretation of the law, and provides some relief to taxpayers that failed to properly take an installment or carryforward of a business and energy tax credit against only the gross premiums tax by permitting them to take installments and	August 11, 2017
	carryforwards of that tax credit for taxable years beginning before January 1, 2017.	
1.12	Makes a technical change by changing "rates" to "rate" to reflect the fact that North Carolina has a single flat individual income tax rate	August 11, 2017
1.13	Requires the filing of an annual report with the Secretary of State, rather than the Department of Revenue. The report would be due by the 15th day of the fourth month following the close of the corporation's fiscal year. This date coincides with the filing of the corporation's income tax return. Since 1998, most corporations have submitted their annual reports with their corporate income and franchise tax return. The General Statutes Commission recommended this change in the law in 1998 to make filing the annual report easier for corporations by allowing a single filing with one agency and to reduce inadvertent failures to file the annual report.	August 11, 2017

<table>
<tr><td>1.14</td><td>Under current law, a taxpayer seeking an extension of time to file a corporate franchise and income tax return or an individual income tax return must file an application with the Department, which can be submitted electronically. The NCACPA has expressed interest in the ability to use the filing of a federal extension to serve as an application for a State extension. However, the Department's current system functionality is unable to receive and process federal extension information. This section would require the Department of Revenue to study the feasibility of allowing the federal extension to be used as an application for a State extension, which will require contact with the IRS and identifying other states that use a similar process. The Department is directed to report its findings and recommendations to the Revenue Laws Study Committee by March 1, 2018.</td><td>August 11, 2017</td></tr>
<tr><td colspan="3">PART II. SALES AND USE TAX CHANGES</td></tr>
<tr><td colspan="3">Last biennium, the General Assembly expanded the sales tax base to repair, maintenance, and installation (RMI) services. The Department of Revenue worked with Finance chairs, legislative staff, and interested parties to implement those sales tax changes. Sections 2.1 through 2.7 of this Part make technical, clarifying, and minor substantive changes to the sales tax applicable to RMI services and real property contracts. Section 2.8 of this Part provides transitional adjustments for retailers of RMI services and real property contracts. Section 2.8A of this Part provides tax relief to certain retailers in the hospitality industry. Section 2.12 provides a sales tax exemption from RMI services for certain aircraft. The remaining sections of this Part make technical, administrative, and clarifying changes to the sales tax laws.</td></tr>
<tr><td>2.1</td><td>Moves definitions from G.S. 105-164.4H into the sales tax definition statute,
G.S. 105-164.3. The following definitions have been amended to provide greater clarity:

• Capital improvement. – Simplifies the definition and treats lessees of property the same as property owners. It also clarifies that painting provided as part of a repair, maintenance, and installation service is part of that service.

• Free-standing appliance. – A new defined term. A free-standing appliance is tangible personal property and remains TPP once</td><td>Effective Jan. 1, 2017</td></tr>
</table>

	installed. It is taxable as TPP. There is a sales tax exemption for installation charges that are part of the sale price of TPP purchased by a real property contractor to fulfill a real property contract. GS 105-164.13(61c). • Landscaping. – Clarifies that landscaping modifies living elements. It does not include hardscape or services to items in pots or buildings. Provides that landscaping, by definition, is a capital improvement, and taxed accordingly. • Mixed transaction. – Clarifies that it is a contract for a capital improvement as well as a repair, maintenance, or installation service unrelated to the capital improvement. • Motor vehicle service contract. – Clarifies that the term includes a contract sold by a motor vehicle dealer on behalf of a motor vehicle service company. • Remodeling. – Clarifies the definition by using the language more similar to the language contained in the Department's directives and notices. • Repair, maintenance, and installation service. – Clarifies that the term includes the installation of an item being installed to replace a similar existing item when the replacement is not part of a capital improvement. The replacement of more than one of a like-kind item, such as more than one window, is a single RMI service.	
2.2	Clarifies that a sale of a free-standing appliance is a retail sale of tangible personal property. Removes an imposition that is unnecessary because the tax treatment of an item purchased by a real property contractor to fulfill a real property contract is addressed in G.S. 105-164.4H; provides a cross- reference to this tax treatment in G.S. 105-164.4(a)(16).	Effective Jan. 1, 2017
2.3	Clarifies the sourcing of services.	Effective Jan. 1, 2017

2.4	Makes changes to the statute that addresses the taxation of real property contracts. A transaction is taxable as a repair, maintenance, and installation service unless a person substantiates that the transaction is subject to tax as a real property contract. Subsections (a) and (b) of this section make the following changes to G.S. 105-164.4H: • G.S. 105-164.4H(a) and (b): Removes "services" because a real property contractor does not owe sales tax on services; the term should have been removed when the General Assembly removed the tax distinction between retailer-contractors and real property contractors. G.S. 105-164.4H(a1): Adds a new subsection to clarify that a transaction involving services to real property is a retail sale unless the person substantiates that a transaction is a real property contract. Provides that a person may substantiate a transaction as a real property contract by records or by receipt of an affidavit of capital improvement. A person who receives an affidavit of capital improvement is not liable for any additional tax due on transaction if the transaction is not a capital improvement. • G.S. 105-164.4H(b1): Repeals this subsection re: liability for unpaid sales and use taxes because the liability for unpaid taxes is already addressed in G.S. 105-164.6. • G.S. 105-164.4H(d): Makes a substantive change to mixed transactions by increasing the percentage of RMI services that may be taxed as part of a capital improvement from 10% of the contract price to 25% of the contract price. • G.S. 105-164.4H(e): Repeals this subsection because the definitions are moved to the definition statute, GS 105-164.3. Subsection (c) of this section revises G.S. 105-164.6 to include any necessary language from the repealed G.S. 105-164.4H(b1). The liability provisions need to be in one statute to avoid confusion and to ensure consistent tax treatment. • Subsections (d) and (e) of this section make technical and clarifying changes to related statutes.	Effective Jan. 1, 2017

2.5	Subsection (a) of this section repeals the list of transactions exempt from the tax on service contracts under G.S. 105-164.4I(b) because the list is moved to the sale tax exemption statute, G.S. 105-164.13. Subsection (b) clarifies that a contract to provide a certified operator for a wastewater system is not a taxable service contract. Subsection (a) of this section also repeals G.S. 105-164.4D(a)(6) because a service contract for tangible personal property, digital property, and services is a bundled transaction and subdivisions (1) through (5) of subsection (a) are sufficient to determine how to tax a bundled transaction. Transactions involving real property or services to real property cannot be a bundled transaction under the Streamlined Sales Tax Agreement. This subdivision (6) was added to address service contracts for real property. Subsection (b) of this section creates a new subsection under G.S. 105-164.4I, Service Contracts, entitled Mixed Service Contracts. This provision provides how a service contract for real property is taxable when one service is subject to tax and one is not. The rules are the same as currently exist for bundled transactions. The entire service contract is subject to tax unless the person determines an allocated price for the taxable portion of the contract based on a reasonable allocation of revenue supported by the person's business records; in that circumstance, tax applies to the taxable portion. If the taxable portion of the contract does not exceed 10% of the price of the contract, then the entire contract is exempt from tax.	Effective Jan. 1, 2017

2.6	Consolidates the sales tax exemptions into the sales tax exemption statute, G.S. 105-164.13. Clarifies that property or services used to fulfill a RMI service or a service contract remains taxable if the service or service contract is exempt from tax. Clarifies and expands the exemption for inspection reports. Removes the exemption for (i) landscaping services and (ii) services performed to resolve an issue that was part of a real property contract because both transactions are defined as a capital improvement. This change does not represent a substantive change. Currently, the items are listed as both an exemption and as a capital improvement. Removing the items from the exemption statute clarifies that the taxation of the property and services used to fulfill the real property contract. Defines "pest control" and "moving services" Adds an exemption for funeral-related services and services to animals, such as hoof shoeing and microchipping a pet. Moves the exemptions related to professional motorsports into one place. It makes no substantive change to this exemption.	Effective Jan. 1, 2017
2.7	Clarifies that the sales tax refund provided for interstate carriers applies to not only tangible personal property but also RMI services and service contracts. The effective date for this section is retroactive to the date RMI services became subject to sales tax.	March 1, 2016
2.8	Subsection (a) of this section allows a seller who paid sales tax on a product and used the product as part of a taxable RMI service, to offset the sales tax liability on the service with the sales tax paid on the products. This provision helps contractors and subcontractor who purchased and paid sales tax on items subsequently used in a taxable service. Subsection (b) of this section directs the Revenue Laws Study Committee to study the feasibility of providing such an option on an on-going basis. Subsection (c) of this section directs the Department of Revenue to take no action to assess tax due if a retailer meets all the conditions of this section. The section provides a grace period to retailers during this educational and transitional period.	Effective Jan. 1, 2017, and expires July 1, 2018 August 11, 2017 For period beginning on or after Mar 1, 2016, and ending before January 1, 2018

2.8A	Allows the Secretary of Revenue to reduce by 90% a sales tax assessment that involves the failure to properly collect sales and use tax on charges for vacation rental linens. The sales tax is a transactional tax. The sale or rental of tangible personal property is subject to sales tax under G.S. 105-164.4(a)(1). The receipts derived from an accommodation rental are subject to tax under G.S. 105- 164.4(a)(3). Since 2009, the Department has had a bulletin in place that lists various charges that are considered to be "derived from the rental of an accommodation." This list includes linen fees. When a linen rental company rents linens to a property management company, the transaction being taxed is the rental of tangible personal property, which is taxable under G.S. 105-164.4(a)(1). When those same linens are included as part of an accommodation rental by the property management company to a vacationer, the gross receipts derived from that accommodation rental are subject to tax under G.S. 105-164.4(a)(3). Since the sales tax is a transactional tax, the application of the law may have the effect of an item being taxed more than once if it is included in more than one transaction. Some members of the vacation rental industry have incorrectly interpreted or applied the law with respect to the rental of linens as part of a vacation rental and have been assessed by the Department. This section would permit the Department to reduce an assessment by 90% under the following circumstances: - The taxpayer has remitted all of the sales and use taxes it collected for the audit period. - The taxpayer had not been informed in a prior audit or requested a private letter ruling advising of the requirement to collect tax on the linen rental charges. - The assessment is based on the incorrect application of the law with regard to collecting sales tax on separately stated linen charges or with regard to issuing resale certificates to the lessors of linens in error. - The period at issue occurred prior to January 1, 2018. To get the reduction, the taxpayer must file a written request with the Department and file a request for review within 120 days following the receipt of a proposed assessment. In addition to the reduction, the Secretary may waive all penalties that were imposed as part of the assessment. See the notice published by the Department of Revenue: DOR notice - Taxaccomodations - Linens	August 11, 2017

2.9	Makes several technical and clarifying changes to the sales tax statutes, as requested by the Department: Subsection (a) of this section provides a cross-reference to the Qualifying Farmer sales tax exemption and clarifies that human blood, tissue, etc. is exempt from sales tax. This change makes no substantive change to the law. Subsection (b) of this section clarifies the nonprofit sales tax refund cap applies to the State's fiscal year, not the fiscal year of the nonprofit. Subsection (c) of this section corrects statutory references. Subsection (d) of this section corrects statutory references and modernizes the language. Subsection (e) of this section removes unnecessary language and clarifies when local use tax applies. Subsection (f) of this section corrects statutory references. Subsection (g) of this section removes unnecessary language. Subsection (h) of this section incorporates the rounding rules required under the Streamlined Sales Tax Agreement. Subsection (i) of this section updates the reference to the Streamlined Sales Tax Agreement.	August 11, 2017
2.10	Clarifies that an admission charge to an entertainment event sponsored by a farmer on farmland is not subject to sales tax. The Department receives this question often, especially during the fall when corn mazes and pumpkin patch events are prevalent. These events do not meet the definition of an entertainment event. This change does not make a substantive change to the law.	January 1, 2014
2.11	Subsection (a) of this section simplifies the collection and remittance of use tax due and payable on the repair and maintenance of a boat or aircraft. The change does not change the amount of use tax due on the repair and maintenance of a boat or aircraft. Subsection (b) of this section provides a cross-reference in the sales tax exemption statutes to the direct pay permit. The provision was also in Senate Bill 552, introduced by Sen. Cook.	August 11, 2017
2.12	Provides a sales tax exemption from RMI services for an aircraft with a gross take-off weight of more than 2,000 pounds. Currently, RMI services provided to a qualified aircraft are exempt from sales tax. A "qualified aircraft" is an aircraft with a maximum take-off weight of more than 9,000 pounds but not in excess of 15,000 pounds.	July 1, 2019

2.13	Provides that Sections 2.1 through 2.8 of this Part are effective retroactively to January 1, 2017. If any change made by these sections increases a sales or use tax liability, that change is effective when this act becomes law. Except as otherwise provided, the remainder of this Part is effective when it becomes law.	August 11, 2017
PART III. TAX COLLECTION AND ENFORCEMENT		
3.1	Creates a new crime for identify theft in the tax statutes. Currently, a person may be prosecuted for identity theft under Article 19C of Chapter 14 of the General Statutes. Under G.S. 14-113.20, an element of the crime is that the person must represent themselves as another person. Under Article 19C, identity theft is punishable as a Class G felony; it is punishable as a Class F felony if the person is in possession of identifying information pertaining to three or more persons. The new crime created by this section would not require the person to represent themselves as another person; it would be sufficient if the person fraudulently utilized identifying information of another person in a submission to the Department of Revenue to obtain anything of value, benefit, or advantage for themselves or another. Also, each person's identity obtained, possessed, or used would count as a separate offense. The crime of identity theft under the tax statutes would be punishable as follows: • Class G felony (maximum punishment of 47 months) • Class F felony (maximum punishment of 59 months) if a person suffers any adverse financial impact as a result of the identity theft.	December 1, 2017.
3.2	Requires a payment settlement entity (financial institutions) that submits credit card information to the IRS to also submit the information to the Department of Revenue. DOR requests this change to improve audit and examinations. Also requires electronic filing for reports submitted to the Department. Failure to file a timely report is subject to a $1,000 penalty.	August 11, 2017
3.3	Provides that taxes, debts, fines, penalties, or other obligations or amounts payable to a governmental unit are not voidable transactions under the Uniform Voidable Transactions Act.	August 11, 2017
PART IV. ADMINISTRATIVE CHANGES		

4.1(a)	Makes a conforming change because of a change enacted last year related to a taxpayer's request for a refund. If the Department determines that the taxpayer's request for a refund is outside the statute of limitations, the Department will issue a notice of denial. Under prior law, the taxpayer could only dispute the denial in superior court. In 2016, the General Assembly changed the law to allow a taxpayer whose claim for refund is denied because it was filed after the statute of limitations passed to appeal the determination before the Office of Administrative Hearings. A final decision by the administrative law judge on the denial is subject to judicial review. With this change, there are two kinds of "denials" issued by the Department subject to administrative review – a proposed denial of a refund claim and a denial of a refund claim when the basis for the denial is a determination by the Department that the claim is outside the statute of limitations. When the Department denies a taxpayer's claim for refund under either basis, it must send the taxpayer a notice. This subsection adds language to the notice requirement to reflect both kinds of denial.	August 11, 2017
4.1(b)	Requires a taxpayer to provide an explanation for the basis of the taxpayer's request for review of a proposed denial of a refund or a proposed assessment of tax. This explanation, however, would not prevent the taxpayer from raising other grounds for objecting to the Department's proposed denial of refund or proposed assessment during the conference process. Adds clarifying language regarding a request for review of a failure to pay penalty. Under current law, a taxpayer who does not request review of a proposed assessment may not request review of a failure to pay penalty based on that assessment. This provision clarifies that the failure to pay penalty is issued on a subsequent date in another notice.	See "Effective date" explanation below

4.1(c)	Provides for situations where the Department requests additional information from a taxpayer who has requested review of a proposed denial of a refund or a proposed assessment, and the taxpayer makes no response. In these situations, the cases remain pending, and the Department is unable to move them to collections unless they schedule a conference with the taxpayer and the taxpayer fails to show. The Department would like the ability to close out these cases where the taxpayer is nonresponsive. Under this section, the Department must make at least two attempts to obtain additional information in response to a request for review: the initial request and, if there is no response within the requested time frame, then the Department must reissue the request. The Department must give a taxpayer a minimum of 30 days to respond to the initial request and to the reissuance of the request. If there is no response to the second attempt, the Department must issue a "notice of inaction," which gives the taxpayer a final 10 days to respond. If there is no response to this notice, then the proposed denial of a refund or the proposed assessment becomes final. Once final, a proposed denial of a refund or a proposed assessment is not subject to further administrative or judicial review, and the Department may proceed with collection efforts. Conforming changes are found in Section 4.1(d) and Section 4.2(a).	See "Effective date" explanation below
4.1(d)	Clarifies that one of the possible actions by the Department in response to a taxpayer's request for review is that the Department may adjust the amount of the tax due or a refund owed. Clarifies that if a taxpayer requests review but thereafter pays the amount due, the Department may accept payment and take no further action on the request for review, unless the taxpayer states in writing that he or she wishes to continue the review. A situation like this may occur when a taxpayer wants to stop the accrual of interest on a proposed assessment. Under current law, when a taxpayer files a request for review, the Department can take one of three actions: (1) grant the refund or remove the assessment; (2) schedule a conference with the taxpayer; or (3) request additional information from the taxpayer. This subsection reworks the statute but effectively maintains the substance of the current law. Under the act, the three actions that could be taken by the Department are: (1) grant the refund or remove the assessment; (2) adjust the amount of the tax due or refund owed; or (3) request additional information. If none of these actions, or payment by the taxpayer of the amount owed, resolves the taxpayer's objections, then the Department would schedule a conference with the taxpayer.	See "Effective date" explanation below

	Effective date - For the above three subsections, which deal with changes to the request for review process, the effective date is when it becomes law. The provisions would apply to requests for review filed on or after that date and to pending requests for review. However, for pending cases, the Department must reissue a request for additional information, if one has previously been issued, allow the taxpayer time to respond, and notify the taxpayer that failure to respond will result in the matter becoming final and subject to collection efforts.	
4.1(e)	Changes the term "taxpayer" to "party" thereby allowing either a taxpayer or the Department of Revenue to appeal a decision of OAH to the Superior Court of Wake County. This change reflects current practice as described in the background below. The statutory framework for the administrative and judicial review of actions by the Department with respect to claims for refund and proposed assessment were substantially overhauled in 2007. Prior to 2007, these matters were heard before a hearing officer within the Department with the ability to appeal to the Tax Review Board. The 2007 rewrite changed the process to give taxpayers an independent hearing outside the Department. Under the current process, if a taxpayer and the Department are unable to resolve matters informally and internally, a taxpayer can file a contested case with the Office of Administrative Hearings, which can be further appealed to superior court. As part of the rewrite, G.S. 105-241.16 was revised to reflect these changes, providing that a *taxpayer* aggrieved by the decision in a contested case could appeal to Superior Court. It did not make any provision for the Department to appeal to Superior Court because of the way OAH decisions were handled at that time. Prior to 2011, OAH could only issue a "recommended decision." The decision was referred back to the originating agency, and the agency would issue a "final decision" that could be appealed to superior court. The authority to issue a final decision included the ability to change OAH's decision. Therefore, as a practical matter, when G.S. 105-241.16 was originally drafted in 2007, the Department would not have needed the authority to appeal to superior court because the Secretary could reverse an unfavorable OAH decision.[2]	Retroactive to January 1, 2012

	In 2011, the General Assembly changed the law to allow OAH to issue final decisions. G.S. 150B-43 was changed to state, "Any *party or* person aggrieved by the final decision in a contested case…is entitled to judicial review…"; previously, the statute only said "person." The change recognized that agencies, as well as aggrieved citizens, could seek judicial review of OAH final decisions. However, when this change was made, no corresponding change was made to G.S. 105-241.16, which also provides for judicial review of OAH decisions, but specifies that those cases must be heard in Business Court. The Department believes that the failure to make a conforming change to G.S. 105-241.16 in 2011 was an oversight and that it currently has authority under G.S. 150B-43 to appeal cases to Superior Court and are currently doing so. An interpretation otherwise would mean the Department of Revenue is one of the only, if not *the* only, agencies that may not seek judicial review of an adverse OAH decision, making OAH the final arbiter of tax cases in which the Department is the aggrieved party. Because the Department believes this is essentially a technical change, it has requested a retroactive effective date of January 1, 2012, which is the date the 2011 legislation, allowing OAH to render final decisions, became effective. It is worth noting that there is an ongoing lawsuit involving a sales and use tax assessment in which the taxpayer is alleging that the court lacks subject matter jurisdiction to hear the case based on G.S. 105-241.16.	

4.3 – 4.6	Changes terminology throughout the various excise tax statutes to clarify the license cancellation and revocation process and changes the term "license holder" to "licensee" throughout. Specifically, Section 4.3 makes these changes to the tobacco products statutes; Section 4.4 makes these changes to the motor carrier statutes; and Sections 4.5 and 4.6 make these changes to the motor fuel tax statutes. Makes two additional changes in the motor carrier statutes. Changes the term "registration" to "licensure" to be consistent with the International Fuel Tax Agreement (IFTA) which uses the term "licensing" throughout all of the IFTA manuals, and also to differentiate between "registering for the vehicle plate" which is completed through DMV or IRP. Adds the phrase "used in connection with any business endeavor" in G.S. 105-449.47 to make the statutory language consistent with the IFTA Articles of Agreement, which specifies that in order to qualify as a recreational vehicle, the vehicle shall not be used in conjunction with any business endeavor. Tobacco products dealers/distributors, motor carriers, and motor fuels suppliers, importers, and distributors are required to obtain a license from the Department of Revenue. There are circumstances under which the Secretary may "summarily cancel" a license, which means the Secretary cancels the license *prior* to holding a hearing on the matter, or the Secretary may "cancel" a license, which occurs only *after* holding a hearing. The term "cancel" is also used to refer to when a licensee voluntarily requests the cancellation of his or her license because, for example, the licensee is no longer engaging in business in the State. These sections change the terminology so that the term "cancellation" would refer only to an action taken by the Secretary upon a voluntary surrender, and the term "revocation" would refer to a "for cause" situation based on the noncompliance factors outlined in statute.	August 11, 2017
4.7	Amends the confidentiality statute to allow the Department to provide State tax information that relates to noncustodial parent location information to the Office of Child Support and Enforcement of the Department of Health and Human Services as required under federal law. This agreement to share information has previously existed with DHHS through a memorandum of understanding but has since expired. The provision is needed to be compliant with an IRS audit. Both Departments are in agreement to the provision.	August 11, 2017

4.8	Gives the Department of Revenue additional time to complete the transfer and consolidation of its information technology to the Department of Information Technology due to the heightened security requirements imposed by the federal government for purposes of sharing taxpayer information, which are not yet in place at DIT. It would put the Department of Revenue on the same footing as the Community Colleges, DPI, and the State Board of Elections, which have additional time to make the transition. The Department would have to report by October 1, 2018 to the Joint Legislative Oversight Committee on Information Technology on the progress of the transition plan.	Effective July 1, 2017
PART V. PROPERTY TAX		
5.1	Makes two changes to the Tax and Tag Program. The change made in subdivision (2)a. reflects the way the system is currently programmed. The change works best for counties and taxpayers. The changes made in subdivisions (2)d. and e. allows counties to bill only once a year, and charge the same amount of interest on unregistered vehicles as on registered vehicles. It treats vehicles the same, whether they are registered or unregistered with DMV.	Taxable years on or after July 1, 2017
5.2	Corrects a statutory reference.	August 11, 2017
5.3	Clarifies that all public service companies are treated the same when the value to a taxing unit amounts to less than $500.	August 11, 2017
5.4	Provides a property tax exemption for a mobile classroom or modular unit that is occupied by a school and is wholly and exclusively used for educational purposes, regardless of the ownership of the property. The term "school" includes a public school, a nonprofit charter school, a regional school, or a nonprofit nonpublic school, or a community college. Real property that is occupied by a charter school and is wholly and exclusively used for educational purposes regardless of the ownership of the property is currently excluded from property taxes, but mobile classroom are often treated as personal property.	Taxable years beginning on or after July 1, 2018
PART VI. OTHER CHANGES		
6.1	Allows money collected or received by a local government to be submitted to a cash collection service and eliminates the monthly deposit requirement if the money on hand is less than $500. Under current law, local governments must deposit collections daily. However, a board can approve that deposits be required only when the cash on hand is at least $250, but it must always be deposited by the last business day of the month.	Effective October 1, 2017

6.2	Allow an individual taxpayer to make an irrevocable election to direct all or part of an income tax refund to the Cancer Prevention and Control Branch, Division of Public Health (DPH), Department of Health and Human Services (DHHS), to be used for the early detection of breast and cervical cancer.[3] Check-off donations would be used for early detection of breast and cervical cancer in accordance with the NC Breast and Cervical Cancer Control Program. The General Assembly finds that the funds generated by the check-off donation are intended to be additional funding for early detection of breast and cervical cancer and are not intended to replace	Effective for taxable years beginning on or after January 1, 2017, and expiring for taxable years beginning on or after
	current appropriations. There are currently two other income tax refund check-offs: Wildlife Conservation Account and NC Education Endowment Fund.[4] The contents of this section were also in House Bill 164, introduced by Representatives Dollar, Howard, Stevens, and S. Martin.	January 1, 2021.
6.3	Corrects an interpretation of motor fuel excise tax change made by S.L. 2017-39. See the notice from the Department of Revenue: DOR notice - tax on ethanol and biodiesel	August 11, 2017
PART VII. EFFECTIVE DATE		
	Except as otherwise provided, this act is effective when it becomes law.	August 11, 2017

[1] This section would have made modifications to the gross premiums tax applicable to captive insurance companies

[2] NC Department of Revenue v. First Petroleum Servs. Inc.

[3] The donations must be distributed to the Cancer Prevention and Control Branch of the Division of Public Health of the Department of Health and Human Resources. website

2016 Finance Law Changes

H533 - Modify Present Use Value Exceptions to Disqualification.
Sec. 1: Modify Present Use Value Exceptions to Disqualification. (SL 2016-76)

Sec. 1 of S.L. 2016-76 pro rates deferred taxes when real property is transferred for less than its fair market value to a nonprofit entity for conservation or historical preservation, the State or a political subdivision of the State, or the United States.

This section became effective for taxes imposed for taxable years beginning on or after July 1, 2016

H533 - Modify Present Use Value Exceptions to Disqualification.
Sec. 2: Administrative Review of Statute of Limitations Determinations by Department of Revenue. (SL 2016-76)

Sec. 2 of S.L. 2016-76 allows a taxpayer to contest before the Office of Administrative Hearings the determination by the Department of Revenue that the taxpayer's amended return or claim for refund were filed outside the statute of limitations.

Sec. 2 of this act became effective June 30, 2016, and the act allows a taxpayer to appeal a past denial of an amended return or claim for refund due to the statute of limitations if the taxpayer appeals the denial within 60 days of June 30, 2016.

H1023 - Municipal Service Districts/Statutory Changes. (SL 2016-8)

S.L. 2016-8 requires additional accounting of certain contractors of cities with respect to municipal service districts, requires that an ordinance to establish a municipal service district be adopted at two separate meetings of the city council, and establishes a process by which property owners may petition for creation or reduction of a municipal service district. This act was recommended by the Legislative Research Commission Committee on Municipal Service Districts.

This act became effective June 1, 2016, and applies to contracts entered into on or after that date.

H1030 - 2016 Appropriations Act.
Sec. 6.1: Establishing or Increasing Fees. (SL 2016-94)

Sec. 6.1 of S.L. 2016-94 provides that:

- An agency is not required to consult with the Joint Legislative Commission on Governmental Operations prior to establishing or increasing a fee to the level authorized or anticipated in the Appropriations Act of 2016.
- An agency may adopt an emergency rule to establish or increase a fee as authorized by the Appropriations Act of 2016, if the adoption of a rule would otherwise be required by law.

This section became effective July 1, 2016.

H1030 - 2016 Appropriations Act.
Sec. 23.1: Insurance Regulatory Charge. (SL 2016-94)

G.S. 58-6-25 requires an annual insurance regulatory charge be levied on each insurance company, other than a captive insurance company. Sec. 23.1 of S.L. 2016-94 sets the percentage rate to be used in calculating the insurance regulatory charge at 6.5% for the 2017 calendar year.

This section became effective July 1, 2016.

H1030 - 2016 Appropriations Act.
Sec. 38.1: Increase Zero Tax Bracket. (SL 2016-94)

Sec. 38.1 of S.L. 2016-94 increases the standard deduction by $2,000 over two years, beginning in 2016:

- $1,000 to $16,500 (married, filing jointly) for tax year 2016.
- $1,000 to $17,500 (married, filing jointly) for tax year 2017, and subsequent years.

This section became effective July 1, 2016.

H1030 - 2016 Appropriations Act.
Sec. 38.2: Expand Taxation of Mill Machinery. (SL 2016-94)

Sec. 38.2 of S.L. 2016-94, as amended by Secs. 11.1 and 11.3 of S.L. 2016-123, expands the preferential tax treatment of certain machinery and equipment subject to the 1% / $80 tax by adding provisions for the following:

- Parts, accessories, or attachments for equipment that is currently eligible for a company located at a ports facility. This provision became effective July 14, 2016, and applies retroactively to purchases made on or after July 1, 2013.
- Secondary metal recyclers, effective for purchases made on or after July 1, 2016. The equipment must be used in a process that converts ferrous or nonferrous metals or other items that have served their original purpose into new or different products for sale.
- Precious metal processors, effective for purchases made on or after July 1, 2016. This provision applies to a company that processes tangible personal property for the purpose of extracting precious metals regardless of whether the company owns the property being processed.
- Metal fabricators that derive more than $8 million annually from the fabrication or manufacture of metal products, effective for purchases made on or after July 1, 2016. This provision applies regardless of whether the products manufactured are for sale or for the company's own use.

H1030 - 2016 Appropriations Act.
Sec. 38.4: Market-Based Sourcing. (SL 2016-94)

Beginning in 2018, North Carolina will use a single sales factor apportionment formula for apportioning the corporate income and franchise tax liability of multistate corporations. Single sales factor apportionment provides an incentive for multistate corporations to select North Carolina as their primary state to conduct business activities, unless the corporation provides a service instead of a product. Single sales factor apportionment does not provide the same incentive to a multistate company that provides services, because its sales factor is not based on the percentage of income derived from consumption of the company's services in the North Carolina marketplace. Consequently, states that adopt a single sales factor apportionment incentive usually adopt a

market-based calculation of the sales factor for all multistate corporations, including those that provide services. This section does not enact market-based sourcing however; it does direct the Department of Revenue to adopt rules to implement market-based sourcing by January 1, 2017. The rules, if approved by the Rules Review Commission, cannot be entered into the Administrative Code until the General Assembly enacts market-based sourcing legislation and directs the Codifier of Rules to do so. The provision ensures that the General Assembly, and the public, will know what the rules pertaining to market-based sourcing would be if the General Assembly decides to enact market-based sourcing legislation in the future.

This section became effective July 14, 2016.

H1030 - 2016 Appropriations Act.
Sec. 38.5: Sales Tax Changes. (SL 2016-94)

Sec. 38.5 of S.L. 2016-94, as amended by Part XI of S.L. 2016-123, does the following:

- Provides a grace period for retailers who provide repair, maintenance, and installation services. This part of the section became effective July 14, 2016, and the relief provided for related transactions applies retroactively to January 1, 2015.
- Amends the sales tax on repair, maintenance, and installation services to treat similar transactions the same and to identify taxable transactions more clearly. In treating similar transactions the same, the act expands the sales tax base to include repair and maintenance of real property. This part of the section becomes effective January 1, 2017.
- Allows a use tax exemption equal to the amount of the installation charges and sales price of, or gross receipts derived from, the repair, maintenance, and installation services that exceed $25,000 for a boat, aircraft, or qualified jet engine. This part of the section became effective July 1, 2016.
- Repeals the $17.6 million State contribution to local sales and use tax revenue distributed to counties and cities, effective for fiscal years beginning on or after July 1, 2016. The contribution would have become effective July 1, 2016; thus, the repeal nullifies the contribution before it became effective.
- Allows a sales tax exemption for products made of more than 75% recycled material by weight if the products are sold for use in an accepted wastewater dispersal system. The exemption becomes effective October 1, 2016.

H1030 - 2016 Appropriations Act.
Sec. 38.6: Property Tax Exclusion Extension. (SL 2016-94)

Sec. 38.6 of S.L. 2016-94 continues to allow a property tax exemption for contiguous tracts of land donated to a nonprofit that were previously used for commercial or industrial purposes and significantly damaged by fire or explosion. The exemption was enacted in 2011 in response to the explosion of the ConAgra plant in June 2009.

This section became effective July 14, 2016. The property tax exemption is effective for taxable years beginning on or after July 1, 2011, and expires for taxable years beginning on or after July 1,

2021. Prior to the enactment of this section, the exemption would have expired for taxable years beginning on or after July 1, 2016.

H1035 - Local Government Commission/Training for Local Government Finance Officers. (SL 2016-84)

S.L. 2016-84 authorizes the Local Government Commission to require certain local government and public authority finance officers, or other employees who perform the duties of a finance officer, to attend training as to the powers, duties and responsibilities of a finance officer, and to charge a fee for the training.

This act became effective June 30, 2016.

S105 - Report Number of Veterans Filing Tax Returns. (SL 2016-112)

S.L. 2016-112 requires the Secretary of Revenue to provide a space on the individual income tax form D-400 for the voluntary disclosure of veteran status by persons filing State income tax returns, to use the information so disclosed to compile aggregate summary information on the number of veterans filing tax returns in North Carolina annually, and to provide this information to the Department of Military and Veterans Affairs.

This act became effective July 26, 2016

S481 - Fund Small Businesses/Department of Revenue Rulings/City Rights of Way. Part II: Public Disclosure of Written Determinations Made by the Department of Revenue. (SL 2016-103)

Part II of S.L. 2016-103 requires the Department of Revenue publish on its Web site redacted versions of written determinations responding to taxpayer questions within 90 days after the determination was issued.

This Part II became effective July 22, 2016, and the Department of Revenue must publish redacted versions of determinations issued on or after January 1, 2010, within 120 days of that date.

S575 - North Carolina/South Carolina Original Boundary Confirmation. (SL 2016-23)

S.L. 2016-23 addresses several legal and tax issues related to the reestablishment of the original boundary line existing between North Carolina and South Carolina. North Carolina and South Carolina created a Joint Boundary Commission to relocate and reestablish their 334-mile common boundary. The Commission began its work in 1995 and completed the technical part of its work by May of 2013. For the last three years, efforts have been underway to reduce or eliminate the impact of the work on property owners whose residency or business would be moved from South Carolina to North Carolina, or vice versa, because of the reestablished boundary line. This act addresses not only the tax consequences of the reestablished boundary line but also other issues, such as public education enrollment and drivers licenses. South Carolina enacted similar legislation in June 2016: Act 270, Ratified 292, and Senate Bill 667.

This act became effective June 22, 2016. It is anticipated that the process to complete the reestablishment of the boundary line will be completed by the end of this calendar year. The boundary must be approved by the Governor and the Council of State before the Governor may issue a proclamation declaring the reestablished line as the true boundary line between North Carolina and South Carolina.

S726 - Internal Revenue Code (IRC) Update. (SL 2016-6)

S.L. 2016-6, as amended by Sec. 1.2 of S.L. 2016-92, updates from January 1, 2015, to January 1, 2016, the reference to the Internal Revenue Code used in determining certain State tax provisions. The act does not conform to the extensions listed below under the federal Protecting Americans from Tax Hikes Act of 2015 (PATH Act), but it does conform to the $250 teacher expense deduction and to the income exclusion for amounts received by wrongfully incarcerated individuals.

The act does not conform to the following two provisions that were made permanent at the federal level:

- Enhanced Section 179 expensing.
- Tax-free distribution from IRAs to public charities.

The act does not conform to the following three provisions that were extended at the federal level through the 2016 taxable year:

- Deduction for higher education tuition expenses.
- Exclusion from income for forgiveness of debt on principal residence.
- Deduction for mortgage insurance premiums.

This act became effective on June 1, 2016. North Carolina has decoupled from the above-named provisions for taxable years beginning on or after 2013.

S729 - Various Changes to the Revenue Laws. (SL 2016-5)

S.L. 2016-5 makes various changes to the Revenue Laws including the following changes with broader impact:

- Limits the qualified interest expense deduction for interest paid to a related corporation to 15% (from 30%) of a corporate taxpayer's adjusted taxable income and allows an unlimited qualified interest expense deduction if the corporate taxpayer can trace the interest expense to a unrelated lender.
- Restores a miscellaneous itemized deduction applicable when individual taxpayers restores a substantial amount held under claim of right that the taxpayer included in gross income for a prior taxable year because it appeared that taxpayer had an unrestricted right to that item.
- Adds a deduction for individual taxpayers who report business income on a Schedule C to equalize treatment of individual taxpayers and corporate taxpayers reporting ordinary and

necessary business expenses where the expense was taken as a tax credit for federal purposes.

- Provides that individual taxpayers must adjust federal adjusted gross income to prevent a double benefit of the federal net operating loss (NOL) carryover.
- Repeals the sales tax exemption for items sold by a nonprofit organization when the receipts from the sale of the items will be directly or indirectly contributed to the State or school.
- Creates a new sales tax exemption for food, prepared food, soft drinks, and other items of tangible personal property sold not for profit for or at an event that is sponsored by an elementary or secondary school when the net proceeds will be given to the school.
- Disallows the State government sales tax exemption and sales tax refund of local taxes paid on indirect purchases for occupational licensing boards and State governmental entities that are specifically designated to apply for a sales tax refund under G.S. 105-164.14.

This act became effective May 11, 2016; however, most sections have an effective date based on the tax reporting period for the type of tax. Please see the full summary for additional detail.

Section	Bill Analysis	Effective Date
PART I: BUSINESS TAX CHANGES		
1.1	Repeals the annual franchise or privilege tax on mutual burial associations. The Department of Revenue collected $750 in franchise tax on mutual burial associations in 2014. The General Assembly repealed most of the State	Taxes due on or after 4/1/17
	privilege license taxes in the mid-1990s as an archaic form of taxation. The tax rate varies from $15 to $50, depending upon the membership of the association. There are currently 60 to 65 mutual burial associations, and all but three have a tax liability of $15. Makes conforming changes to delete reference to repealed statute.	
1.3	Defines a "qualified air freight forwarder" as a company that is an affiliate of an airline and whose air freight forwarding business is primarily carried on with that affiliated airline. The provision allows a qualified air freight forwarder to utilize its affiliated airline's revenue ton miles factor for purposes of apportioning its income to North Carolina. Without this change, an air freight forwarder that owns no planes would be considered a service company and would be subject to the three-factor apportionment formula.	Taxable years beginning on or after 1/1/16
1.4	Corrects a statutory reference.	When law
1.5	Clarifies that an exercise of the royalty reporting option by a taxpayer does not affect whether the taxpayer has nexus and does not permit receipts to be excluded from the calculation of the sales factor.	When law

1.6	Excludes from the definition of "sales" that determine how much of a multistate corporate taxpayer's income is subject to tax in NC the following: (1) financial swaps and other similar financial derivatives and (2) certain receipts in the nature of dividends. Therefore, these transactions will not affect how much income is taxable in NC.	Taxable years beginning on or after 1/1/16
1.7	Corrects the effective date in Section 32.15.(g) of S.L. 2015-241 and Section 10.1(i) of S.L. 2015-268 which made changes to the corporate franchise tax base. The effective date was 1/1/17 and taxes due after 1/1/17. However, short-year 2016 tax returns would compute the 2017 franchise tax because the corporate franchise tax under G.S. 105-122 is computed on the basis of the books of the corporation as of the close of its income year. The corrected effective date will be for taxable years beginning on or after January 1, 2017. This effective date will apply the franchise tax base modifications to all franchise tax reported on the 2016 income and franchise tax return regardless of when the tax return is due.	When law
1.8(a)	Makes the definition of deductible interest expense paid between parent and subsidiary corporations consistent for in-State and out-of-State companies. The technical change makes the definitions parallel and clarifies the treatment of consolidated returns.	Taxable years beginning on or after 1/1/16
1.8(b)	Limits the qualified interest expense deduction for interest paid to a related corporation to 15% (from 30%) of a corporate taxpayer's adjusted taxable income and allows an unlimited qualified interest expense deduction if the corporate taxpayer can trace the interest expense to a unrelated lender.	Taxable years beginning on or after 1/1/16
1.9	Corrects the effective date for the deduction to prevent double taxation of income. The American Recovery & Reinvestment Act of 2009 in Internal Revenue Code section 108(i)(1) permitted an individual or a corporate taxpayer	Taxable years beginning
	with income from business indebtedness discharged by the reacquisition of a debt instrument occurring in 2009 or 2010 to defer that income until 2014. Beginning in 2014, the taxpayer is required to recognize the income ratably over a 5-year period for federal income tax purposes. NC decoupled from this federal law change in S.L. 2009-451. Therefore, the taxpayer has already recognized the income for State tax purposes. Sections 1.9, 2.1, and 2.4 of this bill address the State tax treatment of Internal Revenue Code section 108(i)(1).	on or after 1/1/09 Time barred refund claims allowed until 7/1/16 by section 6.1
	PART II: PERSONAL TAX CHANGES	
2.1(a)	Restores a miscellaneous itemized deduction applicable when a taxpayer restores a substantial amount held under claim of right that the taxpayer included in gross income for a prior taxable year because it appeared that taxpayer had an unrestricted right to that item. This provision prevents a person from paying income tax on amounts the person did not receive. An example of this type of situation is a taxpayer who works on commission. The Department of Revenue recommended this change.	Taxable years beginning on or after 1/1/14

2.1(b)	Adds a deduction to prevent double taxation of income. The American Recovery & Reinvestment Act of 2009 in Internal Revenue Code section 108(i)(1) permitted an individual or a corporate taxpayer with income from business indebtedness discharged by the reacquisition of a debt instrument occurring in 2009 or 2010 to defer that income until 2014. Beginning in 2014, the taxpayer is required to recognize the income ratably over a 5-year period for federal income tax purposes. NC decoupled from this federal law change in S.L. 2009-451. Therefore, the taxpayer has already recognized the income for State tax purposes. In 2009, G.S. 105-134.6 was amended to provide a deduction from federal taxable income for this income. The deduction was inadvertently omitted from the list of deductions when G.S. 105-134.6 was recodified and amended as G.S. 105-153.5. Sections 1.9, 2.1, and 2.4 of this bill address the State tax treatment of Internal Revenue Code section 108(i)(1).	Taxable years beginning on or after 1/1/14 Time barred refund claims allowed until 7/1/16 by section 6.1
2.1(c)	Adds a deduction to equalize treatment of corporate taxpayers and individual taxpayers who report business income on a Schedule C. Corporate taxpayers may deduct ordinary and necessary business expenses for State purposes where the expense was taken as a tax credit for federal purposes under G.S. 130.5(b)(11). This section adds the same deduction (i.e., deduct business expenses for State purposes where a federal credit was taken in lieu of a deduction) for individual taxpayers. This deduction existed for individual taxpayers under repealed G.S. 105-134.6(d)(2). The deduction was inadvertently omitted from the list of deductions when G.S. 105-134.6 was recodified and amended as G.S. 105-153.5.	Taxable years beginning on or after 1/1/16
2.2(a)	Provides that an individual taxpayer must adjust federal adjusted gross income to prevent a double benefit of the federal net operating loss (NOL) carryover.	Taxable years
	NC piggybacks the federal NOL law, which instructs taxpayers to deduct the entire amount of NOL being carried to that year. If all of the NOL is not used, the unused amount is carried forward to the succeeding year. If North Carolina has additions to federal taxable income, they would be offset by the unused NOL and the taxpayer would also benefit from the unused NOL in the succeeding year. To prevent the double benefit, this addition to federal adjusted gross income is needed. The adjustment was required under G.S. 105-134.6, but was inadvertently omitted when G.S. 105-134.6 was recodified and amended as G.S. 105-153.5.	beginning on or after 1/1/16
2.2(a)	Provides that an individual taxpayer must add the amount deducted in a prior taxable year if the amount was withdrawn from the Parental Savings Trust Fund of the State Education Assistance Authority and not used for qualified higher education expenses unless the withdrawal was made without penalty under section 529 of the Code due to the death or permanent disability of the designated beneficiary. The adjustment was required under G.S. 105-134.6, but was inadvertently omitted when G.S. 105-134.6 was recodified and amended as G.S. 105-153.5.	Taxable years beginning on or after 1/1/16
2.3	Corrects a statutory reference and removes obsolete language.	When law

2.4	Adds a deduction to prevent double taxation of income. The American Recovery & Reinvestment Act of 2009 in Internal Revenue Code section 108(i)(1) permitted an individual or a corporate taxpayer with income from business indebtedness discharged by the reacquisition of a debt instrument occurring in 2009 or 2010 to defer that income until 2014. Beginning in 2014, the taxpayer is required to recognize the income ratably over a 5-year period for federal income tax purposes. NC decoupled from this federal law change in S.L. 2009-451. Therefore, the taxpayer has already recognized the income for State tax purposes. In 2009, G.S. 105-134.6 was amended to provide a deduction from federal taxable income for this income. The deduction was inadvertently omitted from the list of deductions when G.S. 105-134.6 was recodified and amended as G.S. 105-153.5. Sections 1.9, 2.1, and 2.4 of this bill address the State tax treatment of Internal Revenue Code section 108(i)(1).	Taxable years beginning on or after 1/1/09 Time barred refund claims allowed until 7/1/16 by section 6.1
PART III: SALES TAX CHANGES		
3.1	S.L. 2014-66 clarified the authority of the Department of Revenue to collect the 911 fee paid on prepaid wireless service. This section conforms the effective date of the collection authority to when the fee was initially imposed.	When law
3.2(a)	This subsection removes obsolete definitions and updates the statutory reference to the Streamlined Sales Tax Agreement.	When law
3.2(b)	Simplifies the sales tax application for storage by removing exceptions that are problematic to administer because taxpayers often do not retain sufficient documentation to support the exceptions to the definition of "storage".	1/1/17
3.3	Corrects a statutory cross-reference.	When law
3.4	The tax treatment for receipts from a ticket reseller was changed in S.L. 2014-3. This section makes a conforming change by recognizing who is the retailer for purposes of that transaction.	When law
3.5	Changes the term "affixed" to "applied" so the terminology is consistent with the terminology used in the definition and with the remainder of the statute.	When law
3.7	Replaces a term with the defined term.	When law

3.8	Changes the term "conditional service contract" to "conditional contract" so that the transactions in the statutory section will not be confused with a service contract. The transactions addressed in this section concern tangible personal property sold below cost if purchased with a contract. An example of this type of transaction is a mobile phone sold for a discounted price if purchased with a mobile phone plan. Sales tax applies to tangible personal property sold below cost with a contract. Under prior law, sale tax applied to the presumed sales price if the service in the contract was not taxable; and it applied to the part of the presumed sales price paid by the consumer if the service in the contract was taxable. The presumed sales price is the retail price at which the item would sell in the absence of the service contract. The prior law did not address the situation where part of the service was taxable and part of it was not. For example, a mobile phone contract may include not only taxable telecommunications service but also internet access service that is not taxable. This section clarifies what the presumed sales price of the item is when a portion of the conditional contract is taxable and a portion of it is not. It provides that the presumed sales price of the item is equal to the percentage of the service in the contract that is not taxable. It also makes a conforming change to the local sales tax base to clarify that the local sales tax applies to the presumed sales price.	When law
3.9	Subsection (a) repeals the sales tax exemption for items sold by a nonprofit organization when the receipts from the sale of the items will be directly or indirectly contributed to the State or school. An example of an entity that benefits from this exemption is a museum gift shop. Subsection (b) creates a new sales tax exemption for food, prepared food, soft drinks, and other items of tangible personal property sold not for profit for or at an event that is sponsored by an elementary or secondary school when the net proceeds will be given to the school.	1/1/17
3.11	Corrects a statutory reference and clarifies that fuel and piped natural gas exempt from sales tax (because it is sold to a manufacturer for use in connection with the operation of a manufacturing facility) remains taxable if it is used solely for comfort heating at a manufacturing facility where there is no use of fuel or piped natural gas in a manufacturing process.	1/1/17
3.12(a)	Provides that the sales tax exemption for items purchased by a contractor apply to items purchased for the holder of a conditional farmer exemption certificate	When law
	as well as the holder of a qualifying farmer exemption certificate.	
3.12(b)	Corrects a statutory reference.	When law
3.14	Repeals an obsolete provision.	When law

3.15	Removes the time period for which a person must maintain records. The three-year time period is misleading. Records should be retained for periods covered within a statute of limitations. The statute of limitations is generally three years. However, an ongoing audit may exceed a period of three years. There is no statute of limitations when a taxpayer fails to file a return.	When law
3.16	Adds "data" to the types of records the Secretary of Revenue may examine.	When law
3.17(a)	Makes changes necessitated by the Streamlined Sales and Use Tax Agreement. The change will allow certified service providers adequate time to make changes to their systems. This section also allows the Department to make adjustments as needed to the tax matrix used by certified service providers.	When law
3.17(b)	Changes the timing of any local tax rate increase from 2 months after the adoption of the tax increase to the calendar quarter after a minimum of 60 days' notice to sellers.	When law
3.18	Provides that a certified service provider may file with either the Secretary or the Streamlined Sales Tax Governing Board a certificate of deposit, in addition to a bond or an irrevocable letter of credit.	When law
3.19	This section clarifies that a park model RV is a recreational vehicle and is subject to the highway use tax. Under current law, it has been unclear whether a park model RV is subject to sales tax or highway use tax.	7/1/16
3.20	Clarifies that the white goods tax applies to any new white good purchased for storage, use, or consumption in this State.	7/1/16
3.21	Clarifies that the net proceeds of the One-Quarter Cent Local Option Sales Tax is allocated to the taxing county.	When law
3.22	Disallows the State government sales tax exemption and sales tax refund of local taxes paid on indirect purchases for (i) occupational licensing board and (ii) State governmental entities that are specifically designated to apply for a sales tax refund under G.S. 105-164.14. An occupational licensing board is defined by G.S. 93B-1 to be "any board, committee, commission, or other agency in North Carolina which is established for the primary purpose of regulating the entry of persons into, and/or the conduct of persons within, a particular profession or occupation, and which is authorized to issue licenses; … the term does not include State agencies, staffed by full-time State employees, which as a part of their regular functions may issue licenses." The NC Bar Association and the NC State Board of Certified Public Accountants are occupational licensing boards under that definition. As such, these entities would no longer be eligible for the State sales tax exemption.	7/1/17
3.23	Clarifies that the exemption for aviation gasoline and jet fuel applies to commercial aircraft in interstate or foreign commerce. The change adds "foreign commerce" to allow the exemption to apply where commercial aircraft fly directly to another country from NC. The effective date is retroactive to match the effective date of the enactment of the exemption.	1/1/16

3.24	Clarifies the sales tax exemption for service contracts on transmissions, engines, rear-end gears, and any other items purchased, leased, or rented by a professional motorsports racing team.	Applies retroactively to 1/1/14
PART IV: EXCISE TAX CHANGES		
4.1	Conforms the bonding requirements for entities that must pay excise tax on cigarettes and tobacco products. Provides that the entities must file a bond (or letter of credit) in an amount that is two times the monthly average liability of the taxpayer. The minimum amount of the bond is $2,000, the maximum amount of the bond is $2 million. The Secretary must periodically review the bonds, and adjust the amount based on changes in the taxpayer's liability.	When law
4.2	Clarifies the applicability of the tax on other tobacco products (OTP) to specify that the OTP rate does not apply to cigarettes that are taxed at 45¢ per pack and does not apply to vapor products that are taxed at 5¢ per mL of consumable product.	When law
4.3	Authorizes wine shippers to file excise tax returns on shipments once a year, rather than monthly. Sections 4.3 and 4.12 address wine shipper permittee filing annual reports.	When law
4.4	Conforms the bonding requirements for the severance tax on energy minerals to the provisions for other excise taxes. Clarifies that the tax is imposed on the producer of the energy mineral. Repeals a provision that would have relieved the producer of paying the tax. In Section 4.4(c), the phrase "prior to" is replaced with "after." The change allows severance producers to post a bond or irrevocable letter of credit after obtaining a permit under G.S. 113-395. The Department of Revenue requested this change to avoid a situation where the Department holds bond indefinitely until the producer receives the required permit.	When law
4.5	Makes three changes in regards to the disclosure of tax information: • Clarifies when information regarding sales by a nonparticipating manufacturer may be disclosed for reports required by the MSA. • Authorizes the Department to provide a list of entities licensed under the tobacco products tax Article to aid in the administration of the tobacco products tax. • Authorizes the Department to disclose tax information regarding motor fuel tax compliance to other IFTA (International Fuel Tax Agreement) jurisdictions.	When law
4.6	Conforms the statutes for temporary trip permits for motor carriers to the current Department practice.	When law
4.7	Authorizes the Secretary to appoint a designee to enter into agreements regarding the administration of IFTA. The agreements entered into may not impact the amount of motor fuel taxes due.	When law
4.8	Clarifies the interest rate applicable to IFTA taxpayers.	When law

4.9	Restores the calculation of the cost per gallon of motor fuel used when a taxpayer receives a refund of the motor fuel excise tax less the sales tax on the motor fuel. S.L. 2015-2 (Senate Bill 20) changed the calculation of the motor fuels excise tax rate. Conforming changes were made to the calculation of the tax refund on motor fuels excise tax. The conforming changes continued to authorize a refund of motor fuel excise tax less sales tax but omitted a method to calculate an average cost per gallon. Section 4.9 restores the method to calculate the average price per gallon of motor fuel. Prior to S.L. 2015-2, the calculation method used "average wholesale price." Section 4.9 follows S.L. 2015-2 and uses the Consumer Price Index Detailed Reports published by the Bureau of Labor Statistics of the United States Department of Labor for retail sales of motor fuels. The Department of Revenue requested this section.	1/1/16
4.10	Corrects cross references	1/1/16
4.11	The 2015 Budget Bill phased out the Noncommercial LUST Fund. Subsection (a) of this section clarifies the legislative intent by specifically providing that any revenue allocated from the ½ cent per gallon for various funds that is not distributed is to be distributed with the remaining excise tax revenue. Effectively, that means the 3/32 percent of the ½ cent per gallon revenue that is currently allocated to the Noncommercial LUST will be distributed to the Highway Fund and the Highway Trust Fund, effective with FY16-17. Subsection (b) of this section clarifies that distributions of the excise tax revenue to the Noncommercial LUST fund will be discontinued, beginning with FY16-17. For accounting purposes, the current date of June 30 creates ambiguity for the Department of Revenue as to how to distribute the funds from that one day's collections.	7/1/16
4.12	Makes conforming changes to G.S. 105-113.84 to allow wine shipper permittees to file an annual report. Sections 4.3 and 4.12 address wine shipper permittee filing annual reports.	When law
PART V: OTHER TAX CHANGES		
5.1	Extends the time period for which the Department may transfer an assessment against a responsible person.	When law
5.2	Repeals an obsolete statute.	When law
5.3	Repeals an antiquated statute in Chapter 131E, Public Hospitals, and puts the provisions pertaining to the taxability of public hospitals in the tax statutes,	When law

	Chapter 105. The antiquated statute refers to repealed taxes and contains a blanket statement that the authority is exempt from all taxes. In practice, hospitals apply for a refund of sales and use tax paid under G.S. 105-164.14. The property tax statutes exempt real and personal property of a hospital authority created under G.S. 131E-17 from tax, G.S. 105-278.1. This section exempts interest income from bond obligations from corporate and individual income tax and exempts motor fuel purchased by a hospital authority created under G.S. 131E-17.	
5.5	Replaces incorrect cross-references with the applicable wage, health insurance, and environmental impact standards, as they formerly existed in G.S. 105-129.83. Article 3J tax credits sunset for taxable years beginning on and after January 1, 2014. To be eligible for a tax credit under Article 3J, a taxpayer had to meet certain wage, health insurance, and environmental impact standards. Those standards were found in G.S. 105-129.83. Several grant programs and the sales tax exemption for qualifying datacenters refer to those standards.	When law
PART VI: EFFECTIVE DATE		
6.1	General effective date is when act becomes law. Authorizes a tax refund even if barred by the statute of limitations (G.S. 105-241.6(a)) for a taxpayer that had an amount added to taxable income as deferred income under section 108(i)(1) of the Internal Revenue Code and the amount would be excluded under Sections 1.9, 2.1, or 2.4 of this bill. A request for a refund must be made on or before July 1, 2016.	When law Time barred refund claims allowed for IRC sec. 108(i)(1) until 7/1/16

Cindy Avrette and Trina Griffin substantially contributed to this summary.

S770 - North Carolina Farm Act of 2016.
Sec. 10: Extend Sunset for Constructing Certain Renewable Fuel Facilities. (SL 2016-113)

Sec. 10 of S.L. 2016-113 extends for three years the sunset for the tax credit for constructing a commercial facility that processes renewable fuel but only for a taxpayer that signed a letter of commitment with the Department of Commerce to that effect prior to September 1, 2013, and that began construction of the facility prior to January 1, 2014.

This section became effective July 26, 2016.

S791 - License Plate Agency Commission Contractor Rate Revision and Study. (SL 2016-120)

S.L. 2016-120 does the following:

- Effective October 1, 2016, directs the Division of Motor Vehicles (DMV) to study the issues with incorrect inspection stops on vehicles and the cumbersome process by which data on federal vehicle inspections is entered into the system. DMV must submit its findings and recommendations to the Joint Legislative Transportation Oversight Committee by December 1, 2017.
- Effective October 1, 2016, compensates a license plate agency commission contractor for the removal of an incorrect inspection stop on a vehicle at a rate of $1.30 per transaction.
- Provides that the $1.30 transaction fee is subject to quadrennial increase for inflation.

Except as otherwise provided, this act became effective July 28, 2016.

S803 - Revenue Laws Technical, Clarifying, and Administrative Changes. (SL 2016-92)

S.L. 2016-92 makes technical changes to tax statutes, including the following, that amend the result from prior law: (i) allows local governments to share confidential taxpayer information necessary to administer a tax; (ii) limits the look back period to determine the amount of a bond for a Non-Participating Manufacturer under the Master Settlement Agreement to the preceding three calendar years; and (iii) moves the date to calculate employers' tax rate for unemployment insurance taxes to September 1 to include tax payments made in the second quarter of the year.

S.L. 2016-92 generally became effective July 11, 2016; however, several provisions had other effective dates due to reporting periods. Please see the full summary for additional detail.

Section	Bill Analysis	Effective Date
PART I: INCOME TAX CHANGES		
1.1	Deletes a reference to the Interstate Commerce Commission. The Interstate Commerce Commission was abolished in 1995.	When law
1.2	Clarifies that taxpayers remain able to exclude amounts under the insolvency rules after NC decoupled from the extension of the income exclusion for the discharge of qualified principal residence indebtedness in S.L. 2016-6 (S726). A taxpayer that excludes from income cancellation of mortgage debt under federal law using either insolvency rules (NC conforms) or mortgage debt forgiveness rules (NC decoupled) is allowed to exclude the income for NC purposes to the extent a taxpayer qualifies for the insolvency provision under IRC section 108.	When law
PART II: SALES TAX CHANGES		

2.1	Adds the word "also" to clarify that the language added by Section 3.23(a) of S.L. 2016-5 (S729) was not intended to change the current law that exempts sales of aviation gasoline and jet fuel to an interstate air business for use in a commercial aircraft.	1/1/16
2.2	Corrects verb tense ("recommend" replaced with "recommended").	When law
2.3 2.4	Makes a conforming change to update the sales tax collection statute for facilitators who are liable for sales tax under existing law.	When law
2.5	Clarifies that the sales tax exemption for food and prepared food provided to a person under a prepaid meal plan subject to tax under G.S. 105-164.4(a)(12) also excludes the packaging items (e.g., wrapping paper, plastic bags, cartons, cups, napkins, straws) that are part of the sale and delivered with the food.	When law
2.6	Makes conforming change to comply with the Streamlined Sales and Use Tax Agreement to determine the effective date of a rate change for the combined general rate.	When law
2.7	Corrects a statutory reference.	When law
PART III: LOCAL GOVERNMENT TAX CHANGES		
3.1(a) 3.1(b)	Allows a county to disclose to a municipality in the county and the municipality to disclose to the county tax information necessary to administer a tax. Local tax records that contain information about a taxpayer's income or receipts are not public records and local government employees are prohibited from disclosing this information unless the disclosure is authorized by statute.	When law
PART IV: MSA CHANGES		
4.1(a)	Limits the look-back period to determine the amount of a bond for a Non-Participating Manufacturer (NPM) under the Master Settlement Agreement (MSA) to the preceding 3 calendar years. Current law is an unlimited look-back period meaning the bond amount for a NPM is based on sales volume occurring in the State at any time in the past. Sales of cigarettes are declining nationally and in the State. This change will reduce the bond amount for NPM with declining sales volume. The Attorney General's Office requested this change.	10/1/16
PART V: UI TAX CHANGES		

5.(a)	Moves the date to calculate employers' tax rate for unemployment insurance (UI) taxes to September 1 to include tax payments made in the second quarter of the year. Under current law, employers pay UI taxes quarterly during the month after the quarter ends. Tax payments affect tax rates that are calculated annually on August 1. Some tax payments made during July are not received by August 1 and are not used in the tax calculation on August 1. This change moves the calculation date to September 1 to allow all second quarter tax payments to be credited to employers. Delaying the calculation date of UI tax rates will more accurately set tax rates based on all second quarter payments.	When law. Applies to contributions payable for calendar quarters beginning on or after 1/1/17
PART VI: EFFECTIVE DATE		
6	Except as otherwise provided, this act is effective when it becomes law.	

Trina Griffin substantially contributed to this summary.

2015 Finance Law Changes

H41 - Revenue Laws Technical Changes (SL 2015-6)

S.L. 2015-6 makes technical, clarifying, and administrative changes to the revenue laws.
This act became effective April 9, 2015. Please see the full summary for more details.

H44 - Local Government Regulatory Reform 2015, Sec. 6: Preaudit Certifications (SL 2015-246)

Obligations incurred by a local government subject to the Local Government Budget and Fiscal Control Act and by a local board of education subject to the School Budget and Fiscal Control Act accounted for in a fund included in the budget ordinance may not be incurred unless the budget ordinance includes an appropriation authorizing the obligation and an unencumbered balance remains sufficient to pay in the current fiscal year for that amount. For written contracts, each must be certified by the finance officer, or a duly appointed deputy finance officer, to that effect, and is often called a "preaudit" certification. Sec. 6 of S.L. 2015-246 updates that statutory requirement to reflect advances in technology that allow for credit cards, gas cards, procurement cards, and other means of remitting payment for obligations.
This section became effective October 1, 2015, and applies to expenditures incurred on or after that date.

H97 - 2015 Appropriations Act, Sec. 28.2: Modify Collection Assistance Fee Rules (SL 2015-241)

Sec. 28.2 of S.L. 2015-241 modifies the use of collection assistance fees imposed on overdue tax debts by augmenting the allowable uses of the fees to include (i) applying the fee to costs of reducing the incidence of overdue tax debts, (ii) paying auditors responsible for identifying overdue tax debts, (iii) increasing the amount of proceeds that may be used for correspondence relating to collecting overdue tax debts from $500,000 to $750,000 per year, and (iv) to pay for upgrades to departmental computer systems for electronic filing of returns and issuance of refunds and for other mission-critical information technology tasks approved by the Office of State Budget and Management in consultation with the State Chief Information Officer.
This section became effective July 1, 2015.

H97 - 2015 Appropriations Act, Sec. 29.27B: Adjust Distribution of Revenue from Motor Fuel Excise Tax Rate (SL 2015-241)
Sec. 29.27B of S.L. 2015-241 does the following:

- Amends the statutes that allocate revenue among various funds and accounts to adjust the amounts of motor fuel excise tax revenue allocated to the Highway Fund (from 75% to 71%) and the Highway Trust Fund (from 25% to 29%). This subsection became effective July 1, 2015, and applies to motor fuel excise tax revenue collected on or after that date.
- Effective June 30, 2016, amends the statutes that allocate revenue among various funds and accounts to repeal the amount of motor fuel excise tax revenue allocated to the Noncommercial Leaking Petroleum Underground Storage Tank Cleanup Fund.

H97 - 2015 Appropriations Act, Sec. 2.2(b): General Fund Availability Statement (SL 2015-241)
Subsec. (b) of Sec. 2.2 of S.L. 2015-241 repeals the reimbursement from the Highway Fund to the General Fund of the sales and use tax revenue not realized by the General Fund as a result of the statutory exemption for purchases by the Department of Transportation.
This subsection became effective July 1, 2015.

H97 - 2015 Appropriations Act, Sec. 29.34: Highway Use Tax Clarification (SL 2015-241)
Sec. 29.34 of S.L. 2015-241 clarifies that the maximum tax for out-of-state vehicles only applies if the motor vehicle has been titled in the name of the owner of the motor vehicle in another state for at least 90 days prior to the date of application for a certificate of title in this State.
This section became effective September 18, 2015.

H97 - 2015 Appropriations Act, Sec. 29.34A: Adjust Maximum Highway Use Tax Imposed for Certain Motor Vehicles (SL 2015-241)
Sec. 29.34A of S.L. 2015-241, as amended by Sec. 10.1 of S.L. 2015-268, increases the maximum highway use tax imposed for certain motor vehicles as follows:

- Class A or Class B Commercial Motor Vehicles. From $1,000 to $2,000.
- Recreational Vehicle. From $1,500 to $2,000.
- Out-of-State Motor Vehicles. From $150 to $250.

This section becomes effective January 1, 2016, and applies to sales made on or after that date, or for purposes of alternate tax for those who rent or lease motor vehicles, a lease or rental agreement entered into on or after that date.

H97 - 2015 Appropriations Act, Sec. 32.18: Sales Tax Base Expansion (SL 2015-241)
Sec. 32.18 of S.L. 2015-241, as amended by Sec. 10.1 of S.L. 2015-241, expands the sales tax base to include repair, maintenance, and installation of tangible personal property, effective March 1, 2016, as follows:

- Repeals the sales and use tax exemption applicable to installation charges when those charges are stated separately on the billing document.
- Imposes sales and use tax on the gross receipts derived from repair, maintenance, and installation services.
- Amends the definition of a "service contract" to include a contract where the obligor agrees to maintain or repair tangible personal property, regardless of whether the property is part of or becomes affixed to real property.

H97 - 2015 Appropriations Act, Sec. 32.19: Local Sales Tax Distribution (SL 2015-241)

Sec. 32.19 of S.L. 2015-241, as amended by Sec. 10.1(e1) of S.L. 2015-268, carves out a portion of the local option sales tax revenue and distributes that amount to the counties whose revenue-raising capacity from the local option sales taxes is less than it would be if the distribution of the revenue from the taxes was made on a per capita basis. The carve-out amount to be distributed in fiscal year 2016-2017 is $84.8 million. This amount is to be adjusted each fiscal year thereafter based upon the annual percentage change in the 2-cent local option sales taxes collected in the previous fiscal year. Seventy-nine counties will receive an allocation from the distribution. A county's allocation percentage is set by statute. The amount allocated to a county must be shared with the municipalities in that county. The General Assembly must periodically review the allocation percentages.

This section becomes effective July 1, 2016, and applies to local option sales and use taxes collected on or after that date and distributed to counties and cities on or after September 1, 2016.

H97 - 2015 Appropriations Act, Secs. 32.13, 32.14, 32.14A, and 32.15: Corporate Income and Franchise Tax Changes (SL 2015-241)

Secs. 32.13, 32.14, 32.14A, and 32.15 of S.L. 2015-241, as amended by Secs. 10.1 and 10.2 of S.L. 2015-268, make the following corporate income tax and franchise tax changes:

- Reduces the corporate income tax rate to 3%, effective for the taxable year that begins January 1 following the fiscal year in which the amount of net General Fund tax collected equals or exceeds $20,975,000,000.
- Expands the corporate income tax base by eliminating antiquated, obsolete, and special tax deductions, effective for taxable years beginning on and after January 1, 2016.
- Phases-in single sales factor apportionment over three years, starting with taxable years beginning on or after January 1, 2016 and directs the Revenue Laws Study Committee to study market-based sourcing.
- Simplifies the calculation of the franchise tax by conforming more closely to net worth as determined by generally accepted accounting principles, effective for franchise tax returns due in 2017. Increases the minimum franchise tax from $35 to $200 and increases the maximum franchise tax on holding companies from $75,000 to $150,000; both rate changes are effective for franchise tax returns due in 2017.
- Repeals the State privilege tax on banks, effective June 30, 2016.

H97 - 2015 Appropriations Act, Sec. 15.16B Municipal Service Districts/Contracts with Private Agency/Taxes/Study (SL 2015-241)

With respect to municipal service districts established by cities, Sec. 15.16B of S.L. 2015-241 does all of the following:

For all municipal service districts, the section requires the city to develop long-range plans and goals, set the tax rate in accordance with those plans and goals, and use the moneys collected for the purpose of those plans and goals. This provision becomes effective for tax imposed for taxable years beginning on or after January 1, 2016.

For municipal service districts created for historical districts, downtown revitalization, and urban revitalization, this section sets forth the following requirements on contracts with private agencies:

- Prior to entering into the contract the city must:
    - Solicit input from the residents and property owners as to the needs of the service district.
    - Use a bid process to determine which private agency is best suited to achieve the needs of the service district. If the city determines that a multiyear contract with a private agency is in the best interest of the city and the service district, the city may enter into a multiyear contract not to exceed five years in length.
    - Hold a public hearing.
- The city must require the private agency to report annually to the city, by presentation in a city council meeting and in written report, regarding the needs of the service district, completed projects, and pending projects.
- The contract is to specify the scope of services to be provided by the private agency. Any changes to the scope of services must be approved by the city council.

This provision became effective October 1, 2015, and applies to contracts entered into on or after that date.

Effective September 18, 2015, authorizes the Legislative Research Commission to study the feasibility of allowing property owners within a municipal service district to petition for removal from that municipal service district, and submit a report to the 2016 Regular Session of the 2015 General Assembly.

H97 - 2015 Appropriations Act, Sec. 32.16: Individual Income Tax Changes (SL 2015-241)

Section 32.16 of S.L. 2015-241 makes the following individual income tax changes:

- Reduces the tax rate to 5.499% in 2017 from the current rate of 5.75%.
- Increases standard deduction from $15,000 to $15,500 (for married filing jointly), effective for taxable years beginning on or after January 1, 2016.
- Allows unlimited medical deductions on Schedule A retroactive to January 1, 2015, to the extent a taxpayer can take the deduction at the federal level.

H97 - 2015 Appropriations Act, Sec. 29.27A: Adjust Municipal Vehicle Tax (SL 2015-241)

Sec. 29.27A of S.L. 2015-241 authorizes an annual municipal vehicle tax of $30 per vehicle resident in the city or town and places any local authorizations under the $30 cap. This section authorizes the tax for the following purposes:

- General purpose. Maximum $5 for any lawful purpose.
- Public transportation. Maximum $5 for financing, constructing, operating, and maintaining local public transportation systems if the municipality operates a public transportation system as defined in G.S. 105-550.
- Public streets. Any of the $30 authorization remaining for maintaining, repairing, constructing, reconstructing, widening, or improving public streets that are not a State highway.

This section becomes effective July 1, 2016.

H97 - 2015 Appropriations Act, Sec. 32.3: Historic Preservation Tax Credit (SL 2015-241)

Sec. 32.3 of S.L. 2015-241, as amended by Sec. 54.5 of S.L. 2015-264 and Sec. 10.1(b) of S.L. 2015-268, establishes a temporary tax credit for historic rehabilitation as described below. The tax credit becomes effective January 1, 2016, and applies to qualified rehabilitation expenditures incurred on or after that date. The credit will expire for expenses incurred on or after January 1, 2020.

- Income-Producing Propertyy. - A taxpayer is allowed a tax credit, capped at $4.5 million, that is equal to 15% of the first $10 million in qualified rehabilitation expenditures for an income-producing historic structure, plus 10% of the next $10 million, plus 5% for the first $20 million if the structure is located in a Tier 1 or 2 area, plus 5% for the first $20 million if the structure is located on an eligible targeted investment site.
- Non-Income Producing Propertyy. - A taxpayer is allowed a tax credit, capped at $22,500, that is equal to 15% of expenses to rehabilitate a building listed in the National Register of Historic Places or certified by the State Historic Preservation Officer as contributing to the historic significance of a National Register Historic District or a locally designated historic district certified by the United States Department of the Interior. The taxpayer must have at least $10,000 in expenses to qualify for the credit.

The credit also applies for certain 2014 and 2015 expenditures. Section 54.5 of S.L. 2015-264 (General Statutes Commission Technical Corrections Act of 2015) allows a taxpayer to claim the credit for expenses incurred in 2014 and 2015 if: (i) the historic structure is located in a Tier 1 or Tier 2 county; (ii) the structure is owned by a city; (iii) the rehabilitation activity commenced in 2014; and (iv) a certificate of occupancy is issued on or before December 31, 2015.

Finally, this section also modifies the expiration of the Mill Rehabilitation Tax Credit, which expired on January 1, 2015. Under prior law, as long as a taxpayer obtained an eligibility certification prior to the expiration date, the taxpayer could claim the credit whenever the project

was ultimately placed in service. This section provides that eligibility certifications will expire on January 1, 2023, so the availability of the credit is not as open-ended.

H117 - North Carolina Competes Act, Parts I and II: Job Development Investment Grant Program (JDIG) and One North Carolina Modifications (SL 2015-259)
Parts I and II of S.L. 2015-259 do the following:

- JDIG Modifications. - Section 1 of the act, as amended by Section 91 of S.L. 2015-264, extends the program, increases the amount that may be committed as grants under the program, provides additional commitment authority for high-yield projects, and makes other changes to the program. Except for a change in reporting requirements and the increase in the amount that may be committed, both of which became effective September 30, 2015, the remainder of this Part became effective October 1, 2015.
- One NC. - Section 2 of the act modifies the local match requirements to a tiered requirement: 3 State dollars for 1 local dollar for tier 1; 2 State dollars for 1 local dollar for tier 2; and an even local match for tier 3. This change became effective September 30, 2015.

H117 - North Carolina Competes Act, Parts III-VI: Sales Tax Changes (SL 2015-259)
Parts III through VI of S.L. 2015-259 make the following sales tax changes:

- Datacenter Infrastructure Act. - Part III creates a sales tax exemption for datacenters investing at least $75M within a 5-year period for sales of datacenter equipment and electricity located and used at the datacenter. The exemption becomes effective January 1, 2016, and applies to sales made on or after that date.
- Sales Tax Relative to Aviation. - Part IV (i) extends for 4 years the sales tax refund available to interstate passenger air carriers for sales tax paid on fuel in excess of $2.5M; (ii) exempts from sales tax fuel sold to an interstate air business for use in a commercial aircraft, effective January 1, 2016, taxes remaining sales of aviation gasoline and jet fuel at 7%, and earmarks the revenue from the tax to the Division of Aviation, Department of Transportation; (iii) increases the sales tax rate on aircraft and tax qualified jet engines at 4.75% with a maximum tax of $2,500, effective October 1, 2015; and (iv) exempts service contracts and repairs, maintenance, and installation services on qualified aircraft and qualified jet engines from sales tax, effective October 1, 2016.
- Exempt Motor Vehicle Service Contracts from Sales Tax. - Part V exempts service contracts on motor vehicles from sales tax. As part of the budget bill, S.L. 2015-241 (H97), sales tax is imposed on repair, maintenance, and installation services. The taxation of this service mitigates the need to impose the tax on service contracts and eases the administrative issues associated with the sales tax on service contracts for motor vehicles. This Part becomes effective March 1, 2016.
- Extend Sales Tax Preference for Motorsports Parts and Fuel. - Part VI, as amended by S.L. 2015-261, extends the current sales tax preferences for motorsports from January 1, 2016, to January 1, 2020, and clarifies the current sales tax on race

engines and service contracts on items used by a professional motorsports racing team.

H117 - North Carolina Competes Act, Part VII: Tax Compliance and Tax Fraud Prevention (SL 2015-259)

Part VII of S.L. 2015-259 contains changes requested by the Department of Revenue that will give it the tools it needs to reduce the occurrence of stolen identities and refund fraud and to better ensure tax compliance.
This Part has multiple effective dates; please see the full summary for more detail.

H163 - Captive Insurance Amendments (SL 2015-99)

S.L. 2015-99 makes enhancements and various technical and substantive statutory changes to the laws governing captive insurance companies in the State, as recommended by the Department of Insurance.
This act became effective June 19, 2015.

H168 - Exempt Builders' Inventory (SL 2015-223)

S.L. 2015-223 exempts the increase in value of certain improvements to real property held for sale by a builder:

- For residential real property, a builder may exclude for 3 years the increase in value due to subdivision, improvements, and buildings that are either a new single-family residence or a duplex.
- For commercial property, a builder may exclude for 5 years the increase in value due to subdivision and improvements - excluding buildings.

To qualify as a builder, the property owner must be in the business of buying real property, making improvements to it, and then reselling it. The owner is not required to be licensed as a general contractor.
S.L. 2015-223 will become effective for taxes imposed for taxable years beginning on July 1, 2016, and apply to subdivision of or other improvements made on or after July 1, 2015.

H229 - Church Tax Exemption/Driving Privileges (SL 2015-185)

S.L. 2015-185 exempts religious buildings that are under construction from local property tax, effective for taxes imposed for taxable years beginning on or after July 1, 2015.
The act also authorizes a judge to allow a person with a revoked driver's license to drive to attend religious worship under a limited driving privilege, effective October 1, 2015, and applies to limited driving privileges issued on or after October 1, 2015.

H912 - Taxation of Tribal Land and Tobacco Products (SL 2015-262)

S.L. 2015-262 does the following three things:

- It exempts from property tax real and personal property located on lands held in trust by the United States for the Eastern Band of Cherokee Indians, regardless of ownership, effective for taxes imposed for taxable years beginning on or after July 1, 2016.

- It allows the Department of Revenue to enter into an agreement with the Eastern Band of Cherokee Indians regarding the excise tax on tobacco products.
- It clarifies the legislative intent of Section 4 of S.L. 2015-98 (ABC Omnibus Legislation) to provide that distillers who sell bottles of liquor at the distillery are not required to remit portions of the cost of the bottle to the State warehouse or the local ABC board. [For a more detailed explanation of this provision, please see the summary for S.L. 2015-98 (HB 909) in the ALCOHOLIC BEVERAGE CONTROL subject area].

Except as otherwise provided, this act became effective September 30, 2015.

S20 - Internal Revenue Code Update/Motor Fuel Tax Changes (SL 2015-2)
S.L. 2015-2 consists of two Parts. The first Part, which was a recommendation of the Revenue Laws Study Committee, updates from December 31, 2013, to January 1, 2015, the reference to the Internal Revenue Code used in determining certain State tax provisions. The act decouples from the extensions listed below under the federal Tax Increase Prevention Act of 2014 for the 2014 tax year, but it conforms to the $250 teacher expense deduction. Enhanced Section 179 expensing

- Exclusion from income for forgiveness of debt on principal residence.
- Deduction for mortgage insurance premiums.
- Deduction for higher education tuition expenses.
- Tax-free distribution from IRAs to public charities.

This Part became effective March 31, 2015.
The second Part of the act makes the following changes to the motor fuels tax:

- Reduces the motor fuels tax rate from 37.5 cents to 36 cents beginning April 1, 2015, through December 31, 2015. It sets the rate at 35 cents per gallon (cpg) from January 1, 2016, through June 30, 2016, and at 34 cpg from July 1, 2016, through December 31, 2016.
- Changes the variable component of the formula for determining the rate. Beginning January 1, 2017, the rate will be 34 cpg multiplied by a percentage reflecting population change and the annual change in the Energy component of the Consumer Price Index for all Urban Consumers as produced by the U.S. Bureau of Labor Statistics.
- Replaces the two 6-month base periods used in determining the gas tax rate with a single 12-month base period.
- Makes $3.35 million and $10.1 million reductions in the Highway Trust Fund and Highway Fund budgets for the 2014-2015 fiscal year.

The motor fuels tax rate changes are effective as described above. The remainder of this Part became effective March 31, 2015.

S159 - Corrected Revaluations/Minimal Refunds/Property Taxes (SL 2015-266)
S.L. 2015-266 clarifies the process by which undervalued property is to be taxed under reappraisals conducted under S.L. 2013-362 (Require Certain General Reappraisals), and authorizes local governments to not mail minimal property tax refunds.
This act became effective October 1, 2015.

S273 - Motor Vehicle Tax: Waive Penalties/Interest (SL 2015-204)
S.L. 2015-204 authorizes counties to reduce or waive interest or penalties on delinquent motor vehicle taxes for tax years prior to July 1, 2013.
This act became effective August 11, 2015.

S372 - Renewable Energy Safe Harbor (SL 2015-11)
S.L. 2015-11, as amended by Sec. 54.3 of S.L. 2015-264, provides a delayed sunset for the credit for investing in renewable energy credit for the following taxpayers:

- Taxpayers that have incurred at least 80% of the costs, and partially constructed at least 80% of a project with less than 65 megawatts of capacity by January 1, 2016.
- Taxpayers that have incurred at least 50% of the costs, and partially constructed at least 50% of a project with 65 megawatts of capacity or more by January 1, 2016.

This act became effective April 30, 2015.

S399 - Joint Agency Tax Refund (SL 2015-235)
S.L. 2015-235 allows a joint agency created by interlocal agreement for the purposes of fire protection, police protection, and emergency services to receive a refund of sales and use taxes paid by it. This provision became effective July 1, 2015, and applies to purchases made on or after that date.
The act also directs the Revenue Laws Study Committee to study how the exemption from the motor fuels tax is applied to entities that are comprised of multiple local government units.
Except as otherwise provided, this act became effective September 1, 2015.

S448 - Equalize Tax on Propane Used as a Motor Fuel (SL 2015-224)
S.L. 2015-224 amends the motor fuels tax applicable to liquefied propane gas used as a motor fuel by specifying that the per gallon motor fuel tax rate is applied to the gas gallon equivalent of liquefied propane gas. The gas gallon equivalent is 5.75 pounds of liquefied propane gas.
This act becomes effective January 1, 2016.

S513 - North Carolina Farm Act of 2015, Sec. 2: Conform Compensation Paid to an H-2A Agricultural Worker to Federal Wage Withholding Standards (SL 2015-263)
Sec. 2 of S.L. 2015-263 provides that an employer does not have to withhold State income tax on compensation paid to an H-2A agricultural worker if the employer is not required to withhold federal income tax on that compensation. Since calendar year 2011, an employer must report compensation of $600 or more paid to an H-2A agricultural worker on Form W-2, but the employer is not required to withhold federal taxes on the compensation unless the worker fails to provide the employer with either a Social Security Number (SSN) or an Individual Taxpayer Identification Number (ITIN). In the case of an H-2A agricultural worker who fails to provide a SSN or ITIN, the employer must withhold and remit 28% of the compensation and continue withholding this amount until the worker furnishes the employer the SSN or ITIN.
This section is effective for taxable years beginning on or after January 1, 2015.

S513 - North Carolina Farm Act of 2015, Sec. 12: Present-Use Value Modifications (SL 2015-263)
Sec. 12 of S.L. 2015-263 makes three changes to present-use value taxation:

- Provides that, for purposes of present-use value, the commercial production or growing of animals includes the rearing, feeding, training, caring, and managing of horses.
- Provides that when a tax assessor is determining whether a business entity applicant for present-use value has farming as its principal business, there is a rebuttable presumption that farming is the business entity's primary business if the applicant has been approved for present value taxation for a qualifying property in another county. Any determination about the applicant's eligibility does not affect the determination of whether the individual parcel of land meets the classifications for agricultural, horticultural, or forest land pursuant to G.S. 105-277.3. Further, if the assessor is able to rebut the presumption, this does not invalidate a determination that the applicant's principal business is farming agricultural land, horticultural land, or forestland in the other county.
- Effective September 30, 2015, directs the Department of Revenue to annually publish a present-use value program guide and make the guide available on its Web site. Tax assessors must adhere to the Department's guide when making decisions regarding the qualifications or appraisal of property for the present-use value taxation program.

Except as otherwise provided, this section became effective July 1, 2015, and applies to taxes imposed for taxable years beginning on or after that date.

S621 - Registration Renewal Notice/E-Mail (SL 2015-108)
S.L. 2015-108 authorizes the Division of Motor Vehicles to send the required combined vehicle property tax and State registration notice by e-mail, subject to the written consent of the owner of a vehicle.
This act becomes effective January 1, 2016.

S682 - Modify Sunset Regarding Contingent Audits (SL 2015-109)
S.L. 2015-109 makes permanent the prohibition, established in 2012, on local governments from using third-party contractors paid on a contingent fee basis for audit and assessment purposes.
This act became effective June 24, 2015.

2014 Finance Law Changes

OMNIBUS TAX LAW CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2014-3	**HB 1050**	**Rep. Howard, W. Brawley, Lewis, Setzer**

AN ACT TO AMEND THE REVENUE LAWS, AS RECOMMENDED BY THE REVENUE LAWS STUDY COMMITTEE.

This act consists of fifteen Parts, each of which is separately summarized below.

PART I: DEDUCTION FOR STATE NET LOSS

SUMMARY: Part I of the Omnibus Tax Law Changes bill replaces the corporate net economic loss deduction with a State net loss deduction for taxable years beginning on or after January 1, 2015.

CURRENT LAW: Both federal and State tax law provide relief to a corporation that incurs more expenses than revenues during the taxable period. For federal tax purposes, a corporation is allowed a net operating loss deduction equal to the amount by which tax deductible expenses are more than taxable revenues. The federal deduction may be carried back two years preceding the loss year, thus providing immediate tax relief in the form of a tax credit; any unused portion of the deduction may be carried forward for 20 years. For State tax purposes, a corporation is allowed a net economic loss deduction[5] equal to the amount by which allowable deductions for the year other than prior year losses exceed income from all sources in the year, including nontaxable income.[6] The State deduction may be carried forward 15 years; any loss carryforward must first be offset by nontaxable income, including allowable deductions.

BILL ANALYSIS: This Part does three things to simplify the calculation and ease the administration of the corporate loss deduction, effective for taxable years beginning on or after January 1, 2015:

- It replaces the net economic loss calculation with a State net loss calculation that is more comparable to the federal net operating loss calculation.
- It removes the requirement that a net economic loss carried forward to taxable years beginning on or after January 1, 2015, be first offset by nontaxable income.
- It instructs the Secretary of Revenue to apply the standards under sections 381 and 382 of the Code when determining to what extent a loss survives a merger or an acquisition.

The Part replaces the State's net economic loss deduction with a State net loss deduction. The State net loss would be the amount by which allowable deductions for the year, other than prior year losses, exceed gross income under the Code for the year adjusted as

---

[5] NC is the only state with a net economic loss deduction that differs significantly from the federal net operating loss deduction. Other states that have a corporate income tax loss deduction use a calculation that is comparable to the federal net operating loss deduction.

[6] Nontaxable income includes income that has been deducted in computing State net income, nonapportionable income that has been allocated directly to another state under G.S. 105-130.4, and any other income that is not taxable under State law. Prior to August 17, 2013, the Department of Revenue interpreted G.S. 105-130.8 to require items deductible under G.S. 105-130.5, such as U.S. government interest and dividends, to be considered in the computation of the loss in the year of creation as nontaxable income. The Department revised its interpretation to recognize that an allowable deduction, although not taxable, may not reduce a loss in the year the loss is created. However, pursuant to G.S. 105-130.8(a)(3), the Department continued to require that a loss carried forward to a subsequent year must first be offset by any income not taxable, including allowable deductions under G.S. 105-130.5.

provided in G.S. 105-130.5. Adjustments under G.S. 105-130.5 include items such as the adjustments taxpayers must make when the State decouples from federal accelerated depreciation and expensing. If the taxpayer is a multi-state corporation with business within and without North Carolina, then the loss must be allocated and apportioned in the year of the loss in accordance with G.S. 105-130.4.

The repeal of the net economic loss deduction removes the applicability of North Carolina case law that governs the extent to which a net economic loss survives in a merger or an acquisition. The Part instructs the Secretary of Revenue to apply the federal regulations adopted under sections 381 and 382 of the Code in determining the extent to which a loss survives in a merger or acquisition. Although the provisions of the Code would be applied, the loss limitations may differ at the State level based upon the single entity reporting requirement in North Carolina and subject to the allocation and apportionment provisions of G.S. 105-130.4 in the year of the loss.

The Part changes the calculation of a net economic loss carry-forward. Under current law, the carry-forward must be reduced by nontaxable income. What constitutes nontaxable income has been a source of questions, disagreements, and litigation. Under the change made by this Part, the amount of the net economic loss, as determined on December 31, 2014, becomes a static amount. Any unused portion of a net economic loss carried forward in taxable years beginning on or after January 1, 2015, would be administered in accordance with the State net loss statute:

- Any unused portion of a net economic loss would not have to first be offset by nontaxable income.
- The standards under sections 381 and 382 of the Code would be applied in determining the extent to which a net economic loss survives a merger or acquisition that occurs on or after January 1, 2015.

EFFECTIVE DATE: This Part becomes effective for taxable years beginning on or after January 1, 2015.

PART II: OTHER INCOME TAX CHANGES

SUMMARY: Part II makes technical and clarifying changes to various income tax laws.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE: This Part makes the following technical and clarifying changes to the income tax laws.

<u>Section 179 expense deduction</u>

Section 2.1 makes two changes to the section 179 expense deduction for State income tax purposes to reflect the intent of legislative action taken in 2013.

First, it corrects the dollar amount of the section 179 expense investment limit. In the American Taxpayer Relief Act of 2013, Congress extended the $500,000/$2,000,000

accelerated section 179 expense deduction allowances for 2013 and 2014. The intent of S.L. 2013-10 was to decouple from this federal provision and return to the limits that would have been applicable under the Code as written in December 2010. The act erroneously referred to the Code as defined in May 2010. The Code was amended three times in 2010, and the changes included three different section 179 expense limits. S.L. 2013-414 rewrote the statutes that decouple from the federal accelerated depreciation expensing to make them clearer to understand. As part of the rewrite, the subsection decoupling from the section 179 expense limits sets forth the limits as opposed to referring to the Code on a certain date. In setting forth the limits, the dollar amount of the investment limit should have been $200,000 rather than $125,000.

Second, it makes changes to ensure that qualifying taxpayers may receive the benefit of the add-back deductions. Beginning in 2002, Congress has allowed taxpayers to depreciate certain assets more quickly than would otherwise be allowed – 100% bonus depreciation and section 179 expense deductions. Many states, including North Carolina, have decoupled from those provisions primarily because the fiscal impact of conforming to the greater depreciation rules would have been too costly. Instead of granting the larger depreciation in the initial years, North Carolina required taxpayers to add-back 85% of the deduction in the first year and to deduct 20% of this amount over the next five years. Taxpayers who changed their form of business entity or who merged with subsidiaries within the five-year period of deductions were not allowed to take the remaining deductions because the taxable entity that made the add-back and received the initial deductions either no longer existed or no longer owned the depreciable asset. The result in some cases was that the asset did not receive the full benefit of the deduction. S.L. 2013-414 changed the law to allow the transferee of an asset, where the tax basis of the transferred asset carried over from the transferor to the transferee for federal income tax purposes, to add any remaining deductions to the basis of the transferred asset and to depreciate the adjusted basis over the remaining life of the asset. For transactions that occurred prior to January 1, 2013, the law provided an election whereby the transferee could make the basis adjustment for any deductions foregone by the transferor. However, this allowance does not help a taxpayer who had disposed of the asset or whose asset had no remaining useful life. This section remedies this situation by allowing a taxpayer to deduct the remaining bonus depreciation on the 2013 tax return.

Personal income tax deductions

Section 2.2 does the following two things.

First, it clarifies that a person who is not eligible for a federal standard deduction is not eligible for a State standard deduction. North Carolina follows the federal law concerning an individual's eligibility for a standard deduction. The tax reform legislation inadvertently failed to follow this practice. Under federal law, the following individuals are not eligible for a standard deduction:

- A married individual filing a separate return where either spouse itemizes deductions.
- A nonresident alien individual. A resident alien is a person who meets either the "green card test" or the "substantial presence test".

- An individual making a return for a period of less than 12 months on account of a change in the person's annual accounting period.
- An estate or trust, common trust fund, or partnership.

Second, it clarifies the application of the $20,000 deduction for mortgage interest expenses paid and property taxes paid on real estate. S.L. 2013-316 limited the federally allowed itemized deductions for mortgage interest expenses paid and property taxes paid on real estate at $20,000. The intent of the legislation was for the $20,000 cap to apply to the cumulative deduction for a married couple, regardless of how the couple files a return. At the request of the Department of Revenue, this section clarifies this intent.

This section is effective for taxable years beginning on or after January 1, 2014.

Income tax rate applicable to estates

Section 2.3 updates the statutory references in G.S. 105 160.2 which imposes income tax on estates and trusts. Estates and trusts generally receive the same modifications to taxable income and tax rates as single individuals. House Bill 998, S.L. 2013 316, moved the statutes allowing modifications to North Carolina taxable income and setting the tax rate. This section is effective for taxable years beginning on or after January 1, 2014.

PART III: AGRICULTURAL EXEMPTION CERTIFICATE

SUMMARY: Part III of the Omnibus Tax Law Changes bill gives guidance to the farming community and the Department of Revenue as to the administration of the income threshold a person must meet to qualify for a sales tax agricultural exemption certificate. It also allows a three-year income averaging to address issues of income volatility in farming operations and a conditional exemption certificate for new farmers.

CURRENT LAW: In S.L. 2013-316, the General Assembly imposed an income threshold a person must meet to qualify for a sales tax agricultural exemption certificate. Effective July 1, 2014, a person does not qualify for an agricultural exemption certificate unless the person has an annual gross income for the preceding taxable year[7] of at least $10,000 from farming operations. For federal income tax purposes, gross income from farming includes sales of agricultural products, cooperative distributions, agricultural program payments, and crop insurance and federal disaster payments. It appears five other states impose an income requirement to qualify for a sales tax agricultural exemption: Connecticut, Georgia, Rhode Island, Tennessee, and Washington. The income limit in these states varies from $1,000 in Tennessee to $10,000 in Washington. Four of those states have conditional exemption certificates for new farmers.

An agricultural exemption certificate allows a person to purchase the following items for farming operations without paying sales tax on those items: fuel; electricity; commercial fertilizer, lime, land plaster, plastic mulch, plant bed covers, potting soil, baler twine, and

[7] The statute currently says "calendar year". The Department has requested that the term be changed to "taxable year". The bill draft makes this change.

seeds; farm machinery; attachments and repair parts for farm machinery; containers used in farm production, packaging, and transporting; grain, feed, or soybean storage facilities; substances for use on animals and plants, such as vaccines, insecticides, defoliants, and plant growth regulators; baby chicks; facilities used for housing, raising, or feeding animals; and bulk tobacco barns and parts and accessories for those barns.

A person who qualifies for an exemption certificate must apply to the Department. A certificate is valid until it is cancelled or revoked. An exemption certificate authorizes the retailer to sell an item to the holder and either collect tax at a preferential rate or not collect tax on the sale, as appropriate. A retailer does not need to obtain a certificate for each purchase if the retailer has a blanket certificate from a purchaser with which the retailer has a recurring business relationship. A person who purchases an item with a certificate is liable for any tax due on the sale if the Department determines the person is not eligible for the certificate. The statute does not place an affirmative duty on the holder of a certificate to notify the Department if the person no longer qualifies for it.

BILL ANALYSIS: Part III of the bill answers questions the farming community has posed concerning the implementation of the gross income requirements:

- Administration. – The bill clearly states that a person may not use an agricultural exemption certificate after July 1, 2014, unless the person meets the income requirements and that a person who no longer qualifies for the certificate is liable for any tax due. A qualifying farmer must apply to the Department for a new exemption certificate. A retailer may continue to rely upon a blanket certificate until October 1, 2014.
- Application for Certificate. – Neither the law enacted last year nor this bill changes the current administration of exemption certificates. However, the bill does impose an affirmative duty on a person who has an exemption certificate to notify the Department whenever the person no longer qualifies for it and to give notice to any seller that may rely on it. The affirmative duty applies to all holders of a certificate, not just farmers. This affirmative duty is similar to the one imposed on taxpayers who no longer qualify for preferential property tax treatment. The farming community is familiar with this requirement as part of the present use value property tax exemption program.
- Liability for Tax Due. – The bill affirmatively states that anyone who purchases an item under an exemption certificate is liable for the tax due on the purchase if the Department determines that the person is not eligible for the certificate or that the item purchased does not qualify for exemption under the certificate.
- Income Volatility. – The bill makes a substantive change to the income threshold at the request of the farming community to address volatility in farming income and to prevent a person from moving into and out of the exemption annually. To obtain a certificate, a person must have $10,000 of gross income from farming operations during the preceding taxable year or an average of $10,000 of gross income from farming operations for the three preceding taxable years. A farmer no longer qualifies for the exemption certificate when the farmer fails to meet the income threshold for three consecutive years. The Farm Bureau expressed

concerns for certain types of farming operations that may not produce income on an annual basis, such as cattle breeders and timber operations.

- New Farmers.[8] – The bill provides that a person who does not meet the income requirement to qualify for an exemption certificate may apply to the Department of Revenue for a conditional exemption certificate by certifying an intention to engage in farming operations and filing an income tax return that reflects income and expenses from farming operations.[9] A conditional exemption certificate is valid for three years, so long as the person provides the Department of copies of a tax return demonstrating activity from farming operations for each year the certificate is issued. A conditional certificate may not be extended or renewed; and a new one may not be issued for at least 15 years. A person who fails to meet the requirements of a conditional exemption certificate is liable for any taxes for which an exemption was claimed, together with interest and penalties from the date of the original purchase.

EFFECTIVE DATE: The bill would become effective July 1, 2014, and apply to purchases made on or after that date.

BACKGROUND: There are currently 49,437 agricultural exemption certificates outstanding. Last year the Department issued 2,185 new certificates and it issued 2,253 certificates in 2012. Here are some statistics from the 2012 USDA Census of Agriculture:

	2012	**2007**
Total NC Farms	50,218	52,913
NC Farms < $10,000 in sales	31,492	34,276
NC Farms > $10,000 in sales	18,726	18,637

[8] This provision was added to the bill by a Senate floor amendment.
[9] Form Schedule F is the IRS form a person uses to report farming activities if the person is engaged in the business of farming. A person who does not engage in farming activities for profit, i,e, farming is a hobby activity, does not use a Schedule F. The presumption is that the farming activity must produce a profit in at least 3 of the last 5 years, including the current year, to be considered a business.

NC Farms < $10,000 in sales & government payments	30,960	33,741
NC Farms > $10,000 in sales & government payments	19,258	19,172

PART IV: PREPAID MEAL PLANS

SUMMARY: Part IV of the Omnibus Tax Law Changes bill addresses sales tax issues related to the repeal of the sales tax exemption for meals served to students in dining rooms of regularly operated educational institutions.

CURRENT LAW: S.L. 2013-316 repealed the exemption for meals served to students in dining rooms of regularly operated by educational institutions, effective January 1, 2014. In practice, meals are not always sold directly. Today, educational institutions sell a variety of meal plans that offer choices between a specific number of "meal swipes" and "food dollars". The meal swipes are part of a prepaid meal plan that entitles the student to a predetermined number of meals. The cost applies regardless of whether or not the student consumes the meals. The food dollars are part of a declining card balance, much like a debit card, that may be used in on-campus facilities for a variety of purchases as well as with participating privately-owned facilities. The meal swipes are problematic to tax on a transactional basis because the gross receipts paid for the meal swipes applies regardless of whether or not the meals are consumed. In practice, few institutions operate their dining halls; instead, they contract with third party vendors to prepare the meals and operate the dining halls.

BILL ANALYSIS: Part IV of the bill addresses questions and administrative issues taxpayers and the Department of Revenue have encountered with the taxation of food and prepared food sold to students in colleges and universities.

Subsection	Explanation
(a)	Defines a prepaid meal plan to be a plan offered by an institution of higher education that entitled a person to food or prepared food, that is billed or paid for in advance, and that provides for predetermined units or unlimited access to food or prepared food but does not include a dollar value that declines with use. The definition limits the applicability to those transactions that benefited from the sales tax exemption repealed in S.L. 2013-316. It does not apply to the part of a meal plan that is based on a declining card balance, such as the food dollars, because those transactions are taxed at the time they are made. By applying the tax to the gross receipts derived from the plan, it is clear that that the tax is based upon the amount paid for the plan and not upon the use of the plan.
(b)	Imposes a sales tax at the general rate upon the sales price of or gross receipts derived from a prepaid paid meal plan. The local sales tax also applies to an item taxed by the State at the general sales tax rate.

(c)	Sources the local sales tax revenue to the county where the school is located.
(d)	Addresses how to tax a transaction where one amount is paid for a taxable item (prepaid meal plan; meals) and a nontaxable item (declining card balance; tuition; room). In that instance, tax applies to the allocated price of the prepaid meal plan. The tax applies to items purchased with a dollar value that declines with use as the dollar value is used. Tuition and room are not subject to sales tax.
(e)	This subsection does two different things: Clarifies that the remaining sales tax exemption for meals sold in elementary and secondary schools applies to any school regulated under Chapter 115C. Public K-12 schools, private K-12 schools, regional schools, and home schools are regulated under Chapter 115C. Residential schools are regulated elsewhere.[10] The bill removes the words "not for profit" because meals provided to K-12 students take many forms. This change ensures that the tax treatment for meals sold in elementary and secondary schools remains unchanged until the General Assembly makes a policy choice to tax them differently. Exempts food and prepared food used to prepare a meal for consumption under a prepaid meal plan from sales tax because this transaction is analogous to a sale for resale.
(f)	Provides schools with an option for reporting and remitting sale tax revenue derived from a prepaid meal plan to the State. The option allows the institution to contract with the food service contractor to be liable for the collection and remittance of the tax. At least one university has a contract with its food service contractor to remit the tax to the State on behalf of the university. The university remains the retailer under the sales tax laws because it is the person making, offering, and soliciting the sale of the prepaid meal plan. The tax will apply to the gross receipts the university derives from the prepaid meal plan; this amount includes the amount charged the university by the food service contractor and any other expenses included by the university in the price it charges for the prepaid meal plan. Under this option, the retailer (institution) would send the tax receipts collected to the food service contractor and the food service contractor would send the receipts, along with other tax receipts, to the Department of Revenue.

EFFECTIVE DATE: This act is effective when it becomes law and applies to gross receipts derived from a prepaid meal plan sold or billed on or after July 1, 2014.

PART V: ADMISSIONS

[10] The School of Math and Science and the School of the Arts are part of the UNC system.

SUMMARY: Part V of S.L. 2014-3 addresses sales tax issues associated with the expansion of the sales tax base to include gross receipts derived from admissions to a live event, a movie, and other attractions for which an admission is charged.

CURRENT LAW: S.L. 2013-316 changed the taxation of live events and movies from a 3% gross receipts privilege tax to a State and local sales tax. The two taxes differ in that the gross receipts tax was imposed upon the person engaged in providing the event; it was not designed to be passed directly onto the consumer. The sales tax is imposed upon the retailer, but it is intended to be passed onto the purchaser and borne by the purchaser instead of the retailer.[11] The payment of the tax is considered a debt from the purchaser to the retailer until it is paid. A retailer is considered to act as a trustee on behalf of the State when it collects tax from the purchaser. The tax should be stated and charged separately unless the retailer displays a statement indicating the sales price includes the tax.

The gross receipts tax was payable monthly and the return covered the gross receipts received during the previous month.[12] The sales tax is due quarterly, monthly, or bi-monthly depending upon the tax liability of the retailer.[13] The administration of the sales tax is more defined to ensure uniform tax treatment. North Carolina is also a member state in the Streamlined Sales Tax Agreement. One of the purposes of this Agreement is to ensure uniformity among the participating states so the tax may be more efficiently administered by retailers who conduct business in more than one state.

BILL ANALYSIS: This Part makes the following changes to the laws applicable to sales tax on the gross receipts derived from an admission charge:

Subsection	Explanation
(a)	Clarifies that for purposes of the imposition of sales tax, the term "gross receipts" has the same meaning as the term "sales price". "Sales price" is defined to be the total amount or consideration for which tangible personal property, digital property, or services are sold, leased, or rented. This subsection also removes the details concerning how amusements are taxed and moves those provisions to a new statute in subsection (c) of this section. The imposition of the tax itself remains in G.S. 105-164.4.
(b)	Sources the local sales tax revenue derived from admission charges to the location where admission to the entertainment activity may be gained. When the location where admission may be gained is not known at the time of the transaction, the general sourcing principles of G.S. 105-164.4B(a) apply: the business location where the product is received; the location where the product is received; the location indicated by the address of the purchaser.
(c)	Creates a new statute to address the taxation of admission charges:

[11] G.S. 105-164.7.
[12] By practice, some taxpayers remitted the gross receipts tax at the time the event occurred.
[13] G.S. 105-164.16.

	• It defines an "admission charge" as the gross receipts derived for the right to attend an entertainment activity. An entertainment activity is defined as a live performance, a movie, a museum or similar attraction and a guided tour of that attraction. The act does not expand the definition the types of entertainment subject to the tax. The policy decision of what types of entertainment to include in the sales tax base was made in S.L. 2013-316. It defines an "amenity" as a feature that increase the value of an entertainment activity by giving the person access to items that are not subject to sales tax and that are not available with purchase of admission to the event without the feature. Lastly, it defines a facilitator. The law enacted last session did not define "admission charge" or "amenity". A definition of "facilitator" is needed to accomplish the administration of the tax as provided in this subsection. • It provides that a retailer is the operator of the venue where the entertainment activity occurs. In practice, admission to an entertainment event may often be obtained at multiple places from multiple people. To accommodate this business practice, the act does the following: o Provides that a person who provides the entertainment and received admission charges directly from purchaser is a retailer. This provision would allow a person, such as the symphony, that leases space to perform to be a retailer. In this example, the venue would also be a retailer if the venue also sells admission to the symphony event. o Provides the operator of the venue and a facilitator may have a contractual agreement for dual reporting. Dual remittance will allow the operator of the venue to remit the tax on the admission charge and the facilitator to remit the tax on any other charges the facilitator imposed that were necessary for the purchaser to pay to complete the transaction. • It defines a facilitator as a person who accepts payment of an admission charge to an entertainment activity and is not the operator of the venue where the entertainment activity occurs. It requires the facilitator to report to the retailer the admission charge a person pays to the facilitator and to send to the operator the tax due on the gross receipts derived from an admission charge no later than 10 days after the end of each calendar month. A facilitator that does not send this amount to the retailer is liable for the tax due. These requirements are considered terms of the contract between the retailer and the facilitator. These provisions are the same as the provisions applicable to facilitators who accept payment from a consumer for accommodations. • It clarifies what transactions are not subject to the tax:

	○ Amounts paid to participate in sporting events. ○ Tuition, registration, or any other charge to attend an instructional or educational seminar, workshop, or conference. ○ A political contribution. ○ A charge for lifetime seat rights, leases, or rental of a suite or box, provided the charge is separately stated. ○ An amount paid solely for transportation. • It clarifies the following exemptions from the tax: ○ The portion of a membership charge that is deductible as a charitable contribution under federal income tax laws. ○ A donation that is deductible as a charitable contribution under federal income tax laws. ○ Charges for an amenity. • It changes the events that are exempt from the tax to the following: ○ An event sponsored by an elementary or secondary school. ○ An event sponsored by a nonprofit that is exempt from income tax if all of the following conditions are met: the entire proceeds of the event are used exclusively for the entity's nonprofit purpose; the entity does not compensate members or individuals; the entity does not compensate any person for participating in the event, performing in the event, placing in the event, or producing the event. • It repeals the following exemptions, thus subjecting the gross receipts derived from an admission charge to that event to sales tax, effective January 1, 2015: ○ An agricultural fair. ○ Up to two activities a year sponsored by a nonprofit.[14] ○ A State attraction.
(d)	Makes a conforming change to the exemption statute. This subsection becomes effective January 1, 2015.

[14] A subcommittee of the Revenue Laws Study Committee recommended that similar events be taxed similarly, regardless of the entity providing the event. This policy decision led to the repeal of these exemptions. The subcommittee also found that the exemptions caused confusion re: what was a State attraction and what two events could be exempt. This confusion should be eliminated by the repeal of these exemptions.

(e)	Clarifies that long-standing exemptions applicable to tangible personal property sold by nonprofit entities do not apply to gross receipts derived from an admission charge to an entertainment activity.
(f)	Provides that the gross receipts derived from admission to a live event purchased on or after January 1, 2015, will be taxable under the sales tax statutes, regardless of the date of the initial sale of tickets. S.L. 2013-315 provided a transitional period. Under S.L. 2013-316, the gross receipts for a live event where the initial sale of admission occurred on or before January 1, 2014, are taxable under the old 3% gross receipts privilege tax statutes.

EFFECTIVE DATE: Except as otherwise stated in the summary, the provisions in this Part become effective January 1, 2015.

PART VI: SERVICE CONTRACTS

SUMMARY: Part VI of the Omnibus Tax Law Changes bill addresses sales tax issues associated with the expansion of the sales tax base to include the sales price of a service contract.

CURRENT LAW: S.L. 2013-316 expanded the sales tax base to include the sales price of a service contract. A service contract is defined as a warranty agreement, a maintenance agreement, a repair contract, or a similar agreement or contract by which the seller agrees to maintain or repair tangible personal property. The act exempted from the tax items exempt from sales tax, other than motor vehicles; network assets on utility owned lands and on right-of-ways or easements; and items purchased by a professional motorsports racing team for which the team may receive a sales tax refund. The act also exempted an item used to maintain or repair tangible personal property pursuant to a service contract if the purchaser of the contract is not charged for the item.

BILL ANALYSIS: This Part makes the following changes to the law applicable to the sales tax on service contracts:

Subsection	Explanation
(a)	Changes the definition of a service contract to alleviate confusion about who must provide the work under the service contract for the contract to be taxable. In practice, service contracts are often sold by a seller on behalf of the person obligated to provide the service. This subsection changes the definition of a service contract to be a contract where the obligor under the contract agrees to maintain or repair tangible personal property or a motor vehicle.
(b)	Clarifies in the sales tax imposition statute that the tax applies to the sales price of or the gross receipts derived from a service contract.
(c)	Creates a new statute to address the sales tax on service contracts:

	• It clarifies that the local sales tax revenue from a service contract are sourced in accordance with the general sourcing principles of G.S. 105-164.4B. • It defines a retailer as the obligor when the obligor sells the service contract to the purchaser at retail. If the service contract is sold to the purchaser by a facilitator, the facilitator is the retailer unless the facilitator and the obligor have a contractual agreement that the obligor will be liable for payment of the tax. In this instance, the facilitator must send the retailer the tax due on the sales price of or the gross receipts derived from the service contract within 10 days after the end of each calendar month. A facilitator that does not send the retailer the sales tax due is liable for the tax. A facilitator is defined as a person who contracts with an obligor to market the service contract and accept payment for the contract. These provisions are substantially the same as the provisions that apply to a facilitator who accepts payment of sales tax on accommodations. • It moves the exemptions from G.S. 105-164.13 and places them in the newly created statute. • It adds an exemption for items subject to tax under Article 5F, the 1% excise tax on mill machinery and other similar transactions. • It clarifies that the tax does not apply to service contract for items sold at retail that become part of real property unless the service contract is sold at the same time as the item of tangible personal property covered in the contract. The tax does not apply to security or similar monitoring contracts for real property or to a renewal of a service contract where the tangible personal property covered by the contract becomes part of or affixed to real property prior to the effective date of the renewal. • It requires a retailer to report the sales price of or gross receipts derived from a service contract on an accrual basis, so that the receipts are recognized when the transaction occurs rather than when payment is received. Some service contracts are financed over time. This provision clarifies that the sales tax is due at the time of the retail sale and not at the time of the periodic payments.
(d)	Creates a new statute for refunds of sales tax paid on a rescinded sale or a cancelled service. Historically, retailers have provided purchasers a refund of the sales tax paid on tangible personal property that is returned to the retailer for a refund. The retailer is allowed to reduce taxable receipts on the subsequent sales tax return by the taxable amount of the refund for the period in which the refund occurs or may request a refund of an overpayment of tax. This section codifies this current practice. The new statute creates a process to allow a purchaser of a service contract a refund of the sales tax paid. The process is different for a service contract because often the refund is provided by a person who was not the retailer

	that sold the service contract. This situation becomes more uncertain when the service contract is for a motor vehicle. Under the bill, if the purchaser receives a refund on any portion of the sales price of a service contract purchased from the retailer who collected the sales tax on the retail sale, then the general provisions applicable to rescinded sales apply. If the purchaser receives a refund from anyone else and the amount refunded does not include the sales tax paid on the refundable amount, then the purchaser may apply directly to the Department of Revenue for a refund. An application for a refund must be supported by documentation on the taxable amount of the service contract refunded to the purchaser and it must be filed within 30 days after the refund is received. A sales tax refund filed after the due date is barred.
(e)	Makes a conforming change.
(f)	Clarifies the exemption applicable to an item used to maintain or repair tangible personal property pursuant to a service contract. The exemption does not apply to an item used to maintain or repair mill machinery and other items taxable under Article 5F, since the service contract applicable to this tangible personal property is not subject to tax. The exemption does not apply to a tool, equipment, or similar item of tangible personal property used to complete the maintenance or repair unless the item becomes a component or repair part of the item for which the service contract is sold. For example, the exemption does not apply to the hammer and screwdriver used to do the work under a service contract.
(g)	Clarifies that the gross receipts derived from a service contract for a motor vehicle are not subject to the highway use tax.
(h) (i)	Conforming changes to the local sales tax statutes.

EFFECTIVE DATE: This Part becomes effective October 1, 2014, and applies to gross receipts derived from a service contract sold at retail on or after that date.

PART VII: RETAILER-CONTRACTORS

SUMMARY: Part VII of this bill addresses the applicability of the sales tax laws to retailer-contractors, such as the major home improvement stores, when they are engaged in a performance contract rather than a retail sale. Specifically, a retailer-contractor would be considered the consumer of the items or materials they furnish and install or apply to real property to the extent the item becomes part of the real property. As the consumer of those items, the retailer-contractor would be responsible for payment of the tax rather than the customer. This provision becomes effective January 1, 2015.

CURRENT LAW: Under current law, retailers are required to collect and remit sales tax on retail sales of tangible personal property. Under a performance contract, the contractor agrees to furnish the necessary materials, labor, and expertise to accomplish the job; it is

not a contract for the sale of specific items. Contractors are deemed to be the consumers or end users of the tangible personal property they use in fulfilling performance contracts and are liable for the tax. However, when a customer purchases an item from a home improvement store and enters into a contract with the store for the installation of the item in their home, it is not always clear whether that transaction is a retail sale plus installation or a performance contract.

The statutes provide little guidance as to what the correct interpretation is. They do not define "contractor" or "performance contract" or speak to when the installation of tangible personal property constitutes a real property improvement. The definition of "sale" refers to when title or possession is transferred. When a contractor permanently affixes an item of tangible personal property to real estate, title and possession typically transfer upon installation. However, once the item is permanently affixed to real property, general principles of real estate law provide that the item is no longer tangible personal property but has transformed into a real property fixture. Therefore, when a homeowner obtains title or possession to the property, the property is real estate and, therefore, one could argue no retail sale of tangible personal property has occurred. Adding further confusion to the mix, North Carolina's definition of "retailer" includes the business of installing tangible personal property regardless of whether it is permanently affixed to real property. This definition suggests that all contractors are also retailers, which conflicts with other principles at play.

The Department has developed guidance on this issue through its technical bulletins, and the tax treatment is ultimately determined by looking at a number of factors, such as whether an item is sold with an installation agreement, the tenor of the agreement, if there is one, whether an item is pre-fabricated, whether an item is built on-site, and whether a specific quantity is stated in the agreement. Determining the tax consequences involves a complex and fact-specific analysis. Over the years, the guidance has been inconsistent and, at the very least, confusing. For example, the sale and installation the same item, such as carpet, may have different tax treatment depending on who the seller is and how the transaction is structured. Also, transactions that seem to be similar in nature, such as the installation of countertops and cabinets, are treated differently as well.

For several years, the Department has sought clarification from the General Assembly on this issue. The Revenue Laws Study Committee first studied it in 2012, with no recommendation, and again in 2013 recommending this legislation.

BILL ANALYSIS: This Part provides that the general rate of tax applies to the sales price of tangible personal property sold to a real property contractor when that property is used by the contractor for the improvement, alteration, or repair of real property and the item becomes part of the real property. The Part defines the term "retailer-contractor" as an entity that acts as a retailer when it sells tangible personal property and as a real property contractor when it performs real property contracts. The sales tax provisions applicable to a real property contractor would apply to a retailer-contractor when it is acting as a real property contractor. Retailer-contractors may continue to make tax-exempt purchases of materials, as they do now, but would accrue and pay the tax once the items are withdrawn from inventory and used in the performance of a real estate improvement contract. If the retailer-contractor uses a subcontractor to perform the installation, then the subcontractor would pay the tax on any items the subcontractor purchases in fulfilling the contract.

However, in accordance with existing use tax principles, the retailer-contractor and the subcontractor would be jointly and severally liable for the tax.

EFFECTIVE DATE: This Part becomes effective January 1, 2015, and applies to sales on or after that date and contracts entered into on or after that date.

BACKGROUND: This issue drew particular attention in 2009 when newspaper reports revealed a long-running dispute between Lowe's and the Department of Revenue on the application of the law in this area. The report indicated that Lowe's was not collecting sales tax when it sold and subsequently installed items such as cabinets, flooring, and countertops. The Department's position is that these transactions are retail sales plus installation and that Lowe's should be collecting sales tax on the purchases but not the installation charges as long as those charges are separately stated on the customer's invoice. Lowe's position is that these transactions are performance contracts and, therefore, they are only required to pay the use tax because they are the user or consumer of that property and that the cost is factored into the "contract price" ultimately paid by the customer, but it is not a separately stated cost.

PART VIII: OTHER SALES TAX CHANGES

SUMMARY: Part VIII makes various sales tax changes.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE:

Section	Explanation and Effective Date
8.1	This section moves the substance of the law imposing the State sales tax on accommodations to a new statutory section for stylistic purposes. The only substantive change provides that a private residence or cottage rented for fewer than 15 days that is listed with a real estate broker or agent is subject to sales tax and occupancy tax. Beginning in 1984, the Department of Revenue interpreted the private residence exemption to apply only if the residence was not listed with a real estate agent. A 1988 memo by an Associate Attorney General supported this interpretation. In 2012, the Department changed its interpretation and issued an Important Notice indicating that the sales tax exemption applied to a private residence rented for fewer than 15 days regardless of whether it was listed with a real estate agent. The current law states that "*The tax does not apply to a private residence or cottage that is rented for fewer than 15 days in a calendar year…*", but it goes on to state that "*A person who, by written contract, agrees to be the rental agent for the provider of an accommodation is considered a retailer under this Article and is liable for the tax.*" The Department has requested that language be added to the statute that is consistent with its pre-2012 interpretation. This change would impact the application of occupancy tax as well because G.S. 155A-155 and 160A-215 provide that "*the room occupancy tax applies to the same gross receipts as the State sales tax on accommodations and is calculated in the same manner as that tax*."

	This section would become effective June 1, 2014, and apply to private residences occupied as a transient accommodation on or after that date even if the accommodation was reserved or paid for prior to the effective date.
8.2	This section disallows a sales tax refund for sales tax paid on video programming and piped natural gas. Historically, the State sales tax refunds allowed to nonprofits and local governments has not applied to sales tax paid on utilities. Prior to 1995, when piped natural gas was subject to sales tax, piped natural gas was included in the list of utilities for which a sales tax refund was not allowed. Last session, when the General Assembly made the policy decision to return piped natural gas to the sales tax base, this conforming change was not considered or made. Likewise, when the General Assembly made the policy decision to begin taxing video programming as a utility, a conforming change to the refund statutes was not considered or made. This section treats utilities that are taxed by the State at the combined general rate the same. This section became effective July 1, 2014, and applies to purchases occurring on or after that date.
8.3	Subsection (a) repeals the sales tax exemption for sales from vending machines of one cent per sale. The provision is obsolete. S.L. 2013-316 removed the sales tax exemption applicable to newspapers sold by street vendors, newspaper carriers, and vending machines. The intent was to tax all newspapers at the State and local sales tax rate. However, G.S. 105-164.13(50) exempts 50% of the sales price of items sold through a coin-operated vending machine from sales tax. To maintain the intent of the 2013 tax law change, subsection (b) provides that the sales tax exemption applicable to 50% of the sales price of items sold through a vending machine does not apply to newspapers. The law currently excludes tobacco products sold through vending machines from this 50% exemption. This section became effective October 1, 2014, and applies to sales made on or after that date.

PART IX: EXCISE TAX CHANGES

SUMMARY: Part IX makes various changes to the excise tax statutes, as requested by the Excise Tax Division of the Department of Revenue.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE:

Section	Explanation	Effective Date
9.1	Subsection (c) of this section applies to the excise tax on alcohol. It would allow a wholesaler or importer of malt	When it becomes law

	beverages and wine to provide security to the Secretary in the form of a letter of credit as an alternative to a bond. This form of security is consistent with what is currently allowed under the excise tax statutes for motor fuels and tobacco products. This subsection also removes the option of a taxpayer providing security in the form of a bond based upon obligations of a governmental unit. This option has not been used in recent memory and is not a form of collateral allowed in other tax schedules. In the few instances where it has been used, the Department's experience has shown that the bonds are often rolled over into a personal CD when the bond matures rather than another governmental bond. Subsections (a) and (b) of this section modernize the statutes and clarify that the letter of credit must be issued by a bank acceptable to the Secretary and available to the State as a beneficiary.	
9.2	This section would allow a wholesale dealer or retail dealer of other tobacco products to provide the Department a manufacturer's tax affidavit in lieu of a notarized tax affidavit as supporting documentation for a tax refund. A dealer that has stale or unsalable tobacco products upon which the tax has been paid is allowed a refund of that amount. The majority of states allow a dealer to use manufacturer tax affidavits as supporting documentation. The allowance of a written certification from the manufacturer signed under perjury of law does not lessen the accountability of the taxpayer and it expedites the administration of the refund. The change in the statute has been requested by taxpayers.[15]	
9.3	This section amends the tax secrecy provisions as follows: • To allow the Department to furnish a data clearinghouse the information required to be released in accordance with the State's agreement under the December 2012 Term Sheet Settlement, as finalized by the State in the NPM Adjustment Settlement Agreement, concerning annual tobacco product sales by a nonparticipating manufacturer. • To allow the Department to share information with a person who provides a surety bond or irrevocable letter of credit on behalf of a taxpayer if the	When it becomes law

[15] U.S. Smokeless Tobacco Brands operates a secure website that allows distributors to access affidavits and credit memos for their returns. Each affidavit includes an accurate list of product eligible for return in a state along with an electronically signed statement.

	information is necessary for the Department to collect on the bond or letter of credit in the event the taxpayer does not comply with the tax laws.	
9.4	This section allows the Secretary of Revenue to delegate the authority to hold hearings. Under administrative practice, this authority has been delegated to a staff attorney.	When it becomes law
9.5	This section clarifies that the tax on motor carriers applies to both intrastate motor carriers and to interstate motor carriers. It also updates the reference to the International Fuel Tax Agreement from June 1, 2010, to July 1, 2013. The update in the reference does not make any substantive changes to the tax laws concerning motor carriers.	When it becomes law
9.6 9.10	Section 9.6 clarifies that local sales tax is due on motor fuel for which a refund of the per gallon excise tax is allowed. Under current law, the State sales tax is deducted from any amount of excise tax refunded. This section clarifies that the local sales tax revenue is also deducted from any amount of excise tax refunded. Section 9.10 clarifies the amount of local sales tax to be deducted from a refund of excise tax paid.	When it becomes law
9.7	This section imposes the excise tax on B100 biodiesel fuel, thus taxing all biodiesel fuel the same. B100 is not subject to federal excise tax, and as such was not subject to the State excise tax under the prior law. B99.9 is subject to the State excise tax since it is a blended product. B100 is most commonly used as a motor fuel. This section became effective October 1, 2014.	October 1, 2014
9.8	This section allows the Secretary to waive or reduce civil penalties imposed under the motor fuel tax statutes under the Department's penalty waiver policy used for other tax schedules. Under prior law, a person assessed a civil penalty under the motor fuel tax laws had to pay the penalty at the time it was assessed and file a request for a Departmental review of the penalty. Under the change made by this section, the penalty is not automatically payable upon assessment. The administrative process for waiving or reducing the penalty is made much more simple and less time consuming. Although a taxpayer must go through the review process for the waiver or reduction of a penalty, the guidelines used to make the decision are the same guidelines currently applied through the penalty waiver policy.	When it becomes law

9.9	This section clarifies that a shipping document required by the vessel transporting motor fuel is intended to provide permanent information. Under current law, if the document is issued by a refiner or a terminal operator, the document must be machine printed. That requirement does not apply for a tank wagon importer. A tank wagon importer is a person who imports motor fuel from a terminal or bulk plant in another state and transports the fuel only by means of a tank wagon. A tank wagon is a truck designed to carry at least 1,000 gallons of motor fuel but is not a transport truck. Motor fuel investigators have found shipping documents to be notes contained on a "grease board" or chalk board or other type of device that can be erased. This section became effective October 1, 2014.	October 1, 2014
9.10	Removes obsolete references to the privilege tax.	

EFFECTIVE DATE: Except as otherwise provided, this Part became effective when it became law on May 29, 2014.

PART X: TAX LAW COMPLIANCE CHANGES

SUMMARY: Part X of S.L. 2014-3, requires filing all State tax returns and paying all State taxes to receive and hold an ABC permit. Part X also authorizes the Department of Revenue to use $500,000 (currently, $150,000) from the collection assistance fee account to contract for taxpayer locater services. However, Part XXVI of Senate Bill 744, S.L. 2014-100, reduced the authorization from $500,000 to $350,000.

CURRENT LAW: G.S. 18B-900 lists the following requirements to receive and hold an ABC permit:

- Be at least 21 years old (19 years old for managers selling only beer and wine).
- Be a NC resident unless the out-of-state person is not responsible for operations.
- Not have been convicted of a felony within 3 years or had citizenship restored.
- Not have been convicted of an alcoholic beverage offense within 2 years.
- Not have been convicted of a misdemeanor controlled substance offense within 2 years.
- Not have had an ABC permit revoked within 3 years except failures to pay registration fee.
- Not have an unsatisfied judgment for injury caused by sales to underage persons.

The requirements under G.S. 18B-900 apply to each of the following persons:

- Owner of a sole proprietorship.
- Managers for a corporation.
- Members of a general partnership.
- General partners in a limited partnership.
- Managers and any members with 25% interest in a limited liability company.
- Each officer, director, and owner of 25% of a corporation.

G.S. 18C-141 prohibits the Director of the North Carolina State Lottery Commission from recommending lottery game retailers to the Commission who are not current in filing all State tax returns and paying all State taxes.

G.S. 105-230 suspends the charter of any corporation or a limited liability company that fails to file any tax return or pay any tax. Any act performed or attempted to be performed during the period of suspension is invalid and of no effect unless the charter is reinstated after filing and paying all taxes.

G.S. 105-243.1 imposes a 20% collection assistance fee on overdue tax debts after 90 days.[16] The collection assistance fee is credited to a special account and must be applied to the costs of collecting overdue tax debts.

BILL ANALYSIS:

Part X – Section 10.1.(a): This section adds a new requirement to G.S. 18B-900 that ABC permit applicants file and pay all State taxes. State taxes must be collectable and finally determined to be due for the tax to block an ABC application.

Procedurally, the ABC Commission will request the Department of Revenue check the State tax compliance status of persons. If the Department of Revenue reports to the ABC Commission that a person is not in State tax compliance, then the person cannot receive an ABC permit until the Department of Revenue reports to the ABC Commission that the person is in compliance. Taxpayers who enter into an installment payment agreement with the Department of Revenue are considered in compliance as long as the agreement is in force.

The requirement of State tax compliance operates like all ABC permit requirements under G.S. 18B-900 – applying to all persons listed in G.S. 18B-900(c) and applying continually to hold a permit. Four types of ABC permits may still be issued without State tax compliance: special occasion permit under G.S. 18B-1001(8), limited special occasion permit under G.S. 18B-1001(9), special one-time permit under G.S. 18B-1002, and salesman permit under G.S. 18B-1111.

[16] The Department of Revenue may not mail the collection assistance fee notice earlier than 60 days after the tax debt becomes collectible under G.S. 105-241.22. A collection assistance fee is imposed on an overdue tax debt that remains unpaid 30 days or more after the fee notice is mailed to the taxpayer.

Part X – Section 10.1.(b): The Administrative Procedure Act (Chapter 150B) does not apply to the ABC Commission's actions when determining State tax compliance and refusing to issue ABC permits.

Part X – Section 10.1.(c): The exchange of confidential taxpayer information between the Department of Revenue and the ABC Commission is authorized.

Part X – Section 10.1.(d): This section authorizes the Department of Revenue to spend $500,000 annually on taxpayer locater services. The current authorization is $150,000. The source of the funds is the collection assistance fee imposed on overdue tax debts.

However, Part XXVI of Senate Bill 744, S.L. 2014-100, reduced the authorization from $500,000 to $350,000.

BACKGROUND:

Sections 10.1(a-c): The session law closely follows the statute (G.S. 18C-141) requiring lottery retailers to file and pay all State taxes. The ABC Commission and the NC Department of Revenue plan to check the State tax compliance of all new and renewing ABC permits starting May 1, 2015.

Section 10.1(d): The collection assistance fee provides funds to pay for the costs of collecting overdue tax debts which have included personnel at the Department of Revenue that collect taxes, locator services, and infrastructure projects. When attempting to collect overdue taxes, the Department of Revenue uses locator services through contracts with private data services to identify current addresses for taxpayers.

EFFECTIVE DATE: Sections 10(a-c) requiring tax compliance for ABC permits will be effective May 1, 2015. Section 10.1(d) increasing funding for locator services became effective May 29, 2014 when the section became law.

PART XI: PROPERTY TAX CHANGES

SUMMARY: Part XI provides for the central assessment of mobile telecommunications property.

CURRENT LAW & ANALYSIS: Under current law, the property is locally assessed by each county. The valuation of this property has become increasingly complex due largely to the rapidly changing technology in the industry and to the frequent acquisitions and mergers of wireless carriers. Central assessment by the Department would simplify the listing process for the industry and ensure uniformity of assessment among the counties. The intent is to shift the responsibility for conducting the valuations of this particular kind of property from the individual counties to the Department of Revenue without creating any "winners" or "losers" in terms of the values allocated to the counties. The change is supported by the mobile telecommunications industry, the Department of Revenue, and local governments.

The central assessment would apply to all of the tangible personal property of a mobile telecommunications company and would also include the cellular towers owned by such companies as well as the cellular towers owned by "tower aggregators." Real property

owned or leased by a mobile telecommunications company or tower aggregator would continue to be assessed locally in each county. This section would become effective for taxable years beginning on and after July 1, 2015.

After the passage of H1050, the interested parties sought a clarifying change to this Part of the act. Under S.L. 2014-3, the allocation of the value among the counties in which the property is located is based only on original cost. Using original cost will have the effect of overinflating the value allocated to a particular county and decreasing the value allocated to other counties. A provision was added to the Revenue Laws Technical, Clarifying, and Administrative Changes bill (SB 763 and H1224) that would have provided that once the Department determines the value of the property, it will be allocated among the counties based on where the property is located, but neither of those bills passed. This clarifying change will likely be sought during the 2015 Session.

PART XII: PRIVILEGE LICENSE TAX CHANGES

SUMMARY: Part XII of S.L. 2014-3 maintains the local privilege tax authority for one more year with two modifications: a city may not increase the tax on any business during that year, and it may not tax a business physically located outside the city's limits. Beginning July 1, 2015, both the city and county authority to levy a privilege license tax is repealed. This includes their authority to levy a privilege tax on low-level radioactive and hazardous waste facilities.

CURRENT LAW: Under current law, a city has the authority to levy a privilege tax on all trades, occupations, professions, businesses, and franchises carried on within the city, subject to certain limitations. These limitations range from outright prohibitions on certain businesses and professions to a cap on the amount of tax for other types of businesses. For example, cities are currently prohibited from levying a privilege license tax on certain professionals who are taxed at the State level, such as attorneys, physicians, engineers, real estate brokers, and home inspectors. Cities are also prohibited from taxing banks, private protective services, burglar alarm dealers, household appliance dealers, and office equipment dealers. Approximately 64 types of businesses are subject to a cap on the amount of tax that a city may impose. Examples of businesses whose rate is capped include: amusements, $25; collection agencies, $50; peddlers of farm products, $25; contractors, $10; restaurants, $42.50; barbershops & beauty parlors, $2.50 per person employed; firearms dealers, $50; auto dealers, $25.

Other than these specifically named prohibitions and caps, there is no statutory restriction on the amount of tax that may be charged. It may be in the form of a flat tax or a tax measured by gross receipts. Over 300 cities levy a privilege tax generating $62.2 million. It produces significant revenue for about seven cities: Charlotte, Raleigh, Greensboro, Durham, High Point, Lumberton, and Hickory.

Cities and counties may tax businesses that do not have a permanent physical location in the taxing jurisdiction as long as the business has a legally significant economic nexus with the city. Most businesses that fall into this category are service providers that provide services on a customer's property. This would include businesses like landscapers, plumbers, electricians, home inspectors, and appraisers. To the extent a business sends

employees into a taxing jurisdiction to perform service or repair work, to deliver goods on a regular basis, to take orders for goods, or to receive payments, it is conducting business in that city and may be subject to the city's privilege tax.

Cities and counties also have authority under a separate statute to impose a privilege license tax on hazardous waste facilities or low-level radioactive waste facilities that are located within their limits. The rate is based on the additional costs incurred by the city or county from having such a facility in its jurisdiction to the extent compensation for the costs is not otherwise provided. These costs may include the loss of property tax revenues from the property on which the facility is located, the cost of providing additional emergency services, and the cost of monitoring air, surface water, groundwater, and other environmental media. There are approximately 42 of these facilities located inside city limits.

BILL ANALYSIS: Part XII of S.L. 2014-3 does three things:

- It reenacts G.S. 160A-211(a), the subsection that authorizes cities to levy a privilege license tax, which was inadvertently repealed by virtue of a drafting error in Section 58(b) of S.L. 2013-414. The reenactment is effective when it becomes law.
- It modifies the current authority in the following two ways:
  - For purposes of the 2014-2015 fiscal year, it limits a city's authority to tax only those businesses that are physically located within the city's limits. A business is not physically located within a city if its only presence in that city is through the performance of services or through the dispatch of employees to perform work, deliver goods, collect payments, or take orders. The intent of this provision is to tax only those businesses that have a physical location in the city, such as an office, a headquarters, a storefront, or other location from which the business directs and conducts its operations, or from which it holds itself out to the public as the place where the business is located.
  - It limits a city to the same privilege license tax schedule that was in place for the 2013-2014 fiscal year, meaning that a city may not increase any tax rate or tax amount for the 2014-2015 fiscal year; if a city did not have a privilege license tax in 2013-2014, it may not levy one in 2014-2015.
- Beginning July 1, 2015, both the county and city authority to levy a local privilege license tax are repealed. This includes the authority to levy a privilege tax on low-level radioactive and hazardous waste facilities. The city privilege tax generates a cumulative total of approximately $62 million; the county privilege tax, levied in only 37 counties, generates a total of less than $500,000. For many cities, the loss of revenue from the repeal of the current tax structure is overcome by the revenue it receives in local sales tax revenue from an expansion of the sales tax base under S.L. 2013-316[17] and from the greater

[17] Approximately $10.9 million.

collection of sales tax applicable to online purchases from the agreement of Amazon to collect and remit sales tax on purchases made through Amazon.[18]

PART XIII: LICENSE PLATE AGENT COMPENSATION

SUMMARY: Part XIII of S.L. 2014-3 sets the LPA transaction rate for the collection of property tax under the Tax & Tag Together program at the transitional rate of $1.06, clarifies the increased rate applies to all transactions where an LPA collects property tax as of July 1, 2014, and allows the retroactive portion of the fee increase to be paid out over a three month time period.

CURRENT LAW: The Division of Motor Vehicles (DMV) is required to ensure, as far as practicable and possible, that registration and registration renewals for motor vehicles may be issued through license plate agents (LPAs) located in every community across the State. DMV enters into commission contracts with individuals to perform this service. The local tag agents are compensated on a per transaction basis. The standard rate for a transaction is $1.43. Unless otherwise provided, the performance of one or more transactions at the same time is considered a single transaction for purposes of compensation. Certain transactions are always considered separate transactions and allowed a different rate of compensation. The collection the highway use tax is considered a separate transaction and compensated at $1.27.

In September 2013, the State began implantation of a combined system for motor vehicle registration renewal and property tax collection. Under the new Tax & Tag Together program, the motor vehicle owner will receive one bill, and make one payment for both property taxes and vehicle registration renewal. The Tax & Tag Together program also provides for the issuance of a temporary registration plate if property taxes are not paid with the issuance of a new plate. A person may be issued a limited registration "T" sticker for the temporary registration plate.

S.L. 2013-372 provided increased compensation for LPAs new duties required under the Tax & Tag Together program. The collection of property taxes and the issuance of a "T" sticker" are recognized as separate transactions for the purpose of compensation. The transaction rate for the issuance of a "T" sticker was set at $1.27, effective July 1, 2013. The transaction rate for collecting property tax with registration renewals for the transitional period of the first six months of the Tax & Tag Together program was set at $1.06. The transaction rate after the first six months for both new registration and renewals was set at $0.71.

BILL ANALYSIS: Part XIII of S.L. 2014-3 sets the LPA transaction rate for the collection of property tax under the Tax & Tag Together program at the transitional rate of $1.06. The transitional rate will apply to the collection of property taxes with registration renewals for the entire 2013 fiscal year. The draft also clarifies the increased rate applies to all transactions where an LPA collects property tax, effective July 1, 2014, therefore, setting the transitional rate of $1.06 per transaction to all collections of property tax by LPAs for the 2014 fiscal year and thereafter.

---

[18] Approximately $2.9 million.

Below is a chart that shows the recent changes in the compensation to LPAs, as well as the proposed increase:

	Transaction fee to LPAs for collection of:				
	Property tax with renewal		Property tax with new registration		Property tax with new registration and renewals
	July 2013 – March 2014	March 2014 – July 2014	July 2013 – March 2014	March 2014 – July 2014	July 2014 and thereafter
Prior to 2013-372	$0.48	$0.48	$0.48	$0.48	$0.48
2013-372	$1.06	$0.71	$0.71	$0.71	$0.71
2014-3	No change	$1.06	No change	No change	$1.06

The fee for property tax collection by LPAs for renewals that expire on or after March 1, 2014, was scheduled to decrease to $0.71. Part XIII of S.L. 2014-3 extended the transitional rate of $1.06 for the collection of property tax with registration renewals that expire on or after June 30, 2014. This Part directs DMV to calculate the difference in the payments made under the prior law and the act by September 1, 2014. The difference in the two rates will be paid to LPAs by deducting the appropriate amount of the property tax revenues remitted to the counties. The payment to the LPAs and the corresponding reduction in the payments to the counties would be made in equal amounts over a three month period.

This Part also clarifies the increased fee for property tax collection applies to all transactions where a LPA collects property taxes, effective July 1, 2014.

DMV receives compensation from the counties for the duties it performs under the Tax & Tag Together program. A conforming change made in S.L. 2013-372 has been interpreted to provide DMV with an increase in the fee it receives for the collection of property tax to mirror the amount paid to LPAs. This Part maintains the increase in the fee to $0.71 for DMV provided in S.L. 2013-372, but does not provide DMV with the increase provided to LPAs. The fee provided to DMV will be the amount set in the Memorandum of Understanding (MOU) signed by the Department of Revenue and the Division of Motor Vehicles. Future MOUs can amend the transaction fee paid to DMV, but the fee cannot exceed the per transaction fee allowed for LPAs.

EFFECTIVE DATE: The portion of this Part related to the fee for registration renewals is effective March 1, 2014. The remainder of this Part is effective July 1, 2014.

PART XIV: TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES

SUMMARY: Part XIV makes clarifying, conforming, and administrative changes to the various tax laws. Unless otherwise stated, this Part would become effective when it becomes law.

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE:

Section	Explanation and Effective Date
14.1	This section corrects a cross reference.
14.2	This section replaces two outdated references with respect to qualifying for the major recycling facility tax credits. First, it replaces the term "enterprise tier one area" with the term "development tier one area." The current statute requires that, at the time the owner begins construction, the facility be located in an enterprise tier one area. The term "enterprise tier one area" was part of the Bill Lee tax credits, which expired in 2007. The current equivalent term, originating with the enactment of the Article 3J tax credits, is "development tier one area." A development tier one area is a county whose annual ranking is one of the 40 highest in the State. Second, it deletes the wage standard requirement to be consistent with the current law as it applies to a tier one area. In 2002, the General Assembly eliminated the wage standard for enterprise tier one and two areas[19] but a conforming change was not made to this statute. At the time, there was only one taxpayer that qualified for the credit, and the wage standard was only required to be met at the time construction began on the facility, which had already occurred. However, to the extent there may be taxpayers who qualify for this credit, which is only available in a tier one area, in the future, the statute should be amended to reflect the fact that the wage standard is no longer a requirement in a tier one area.
14.3	This section inserts a word that was inadvertently omitted.
14.4(a)	This section deletes the definition of "Dependent" because the term is not required after the changes made by House Bill 998, S.L. 2013-316.
14.4(b) &14.5	This section updates the terminology used in the statutes authorizing withholding of income tax from wages. After House Bill 998, S.L. 2013-316, "exemptions" are not part of the computation of estimated tax to withhold from wages. Instead, the Department of Revenue uses the term "allowances."
14.6	This section deletes a statutory formula used to calculate the amount of estimated tax to withhold from pension payments where the recipient fails to file a withholding tax form. After House Bill 998, S.L. 2013-316, the statutory formula no longer approximates recipient's tax liability. Recipients who do not complete the tax form to calculate withholding from pension payments will be treated the same as employees who do not complete the tax form.
14.7	This section makes technical changes to sales tax definitions. It deletes the word "retail" within the definition of "net taxable sales" because the term is already included by virtue of the definition of the term "gross sales." It also

[19] S.L. 2002-172.

	deletes the word "the" in the definition of "retailer" because "engaged in business" is the proper defined term.
14.8	This section makes various technical changes to the sales tax imposition statute.
14.9	This section clarifies that a facilitator who is liable for tax[20] must obtain a certificate of registration like other retailers. A facilitator is a person, other than a real estate agent, who contracts with a provider of an accommodation to market the accommodation and who accepts payment from the consumer for the accommodation. An example of a facilitator would be an online travel company like Expedia, Orbitz, or Priceline.
14.10	This section provides for the applicable due date for a sales tax payment if the due date falls on a weekend or holiday or on a day that the Federal Reserve Bank is closed, which prohibits a person from making a payment by ACH[21] Debit or Credit. These provisions are currently contained in an informational document on the Department's website, but there is not a specific statute, other than one that applies only to payment of property taxes.[22]
14.11	This section changes from March 1 to March 15 the annual due date for the captive insurance tax return. S.L. 2013-116 provided that the annual report due date for some captive insurance companies is March 1 and, for others, such as a pure captive, it is March 15. The tax returns for all captives are due March 1. This year, the pure captive insurance companies filed premium tax returns by the March 1 due date and attached to the return copies of pages from their annual reports in support of the premium information marked "draft" since the tax return was due before the financial statement. This issue would be eliminated by changing the due date for all premium tax returns to March 15.
14.12	This section makes one technical change and one substantive change. The technical change corrects a statutory reference. The substantive change would add a new criminal offense to the list of offenses for which the Secretary of Revenue may appoint employees of the Criminal Investigations Division to serve as revenue law enforcement officers. The new offense, which was created by the General Assembly in 2013, is for the

[20] Under G.S. 105-164.4(a)(3), a facilitator must send the retailer the portion of the sales price that the facilitator owes the retailer plus the tax due once the accommodation rental marketed by the facilitator is completed. A facilitator that does not send the retailer the tax due on the sales price is liable for the amount of tax the facilitator failed to send.

[21] Automated Clearing House Debit is a method of payment that enables companies to electronically withdraw funds from bank accounts using bank routing numbers and individual account number.

[22] G.S. 105-395.1.

	possession, transfer, or use of an automated sales suppression device, informally known as "tax zapper software."
14.13	This section provides the Department of Revenue with guidance on how to treat amended returns filed under two repealed taxes. Subsections (a) and (b) provide guidance for amended returns filed under the franchise tax on electricity. Subsections (c) and (d) provide guidance for amended returns filed under the excise tax on piped natural gas. Subsections (e) and (f) clarify that only cities that received a distribution under the repealed franchise tax and excise tax will receive distributions from the new sales tax on electricity and piped natural gas. The Tax Reduction Act, S.L.2013-316, included electricity and piped natural gas in the State sales tax base while repealing the utility franchise tax on electricity and the excise tax on piped natural gas. A portion of both of the repealed taxes was shared with the cities. The Tax Reduction Act replaced the tax-sharing revenue under the repealed taxes with a distribution of part of the sales tax on electricity and piped natural gas. The amount distributed to each city under the sales tax is based on the distribution under the repealed taxes the last year those taxes were in effect. Utilities are allowed to file amended returns on the repealed taxes for up to three years. Amended returns filed on the repealed taxes can change both distributions under the repealed taxes and the amount to be distributed to cities under the new sales tax on electricity and piped natural gas. These sections provide guidance to the Department on how to treat amended returns that change past and future distributions. First, it provides that any additional funds needed for increases to past distributions under the repealed taxes can be drawn from the sales tax revenue. Second, it creates a date certain for the future distributions to be determined. The Department of Revenue will set the distributions for each fiscal year by September 15 using amended returns processed by the Department prior to July 31 of that year.
14.14	Property that is appraised at its present use value may remain in the program if the property is under an enforceable conservation easement that would qualify for the conservation easement tax credit. S.L. 2013-316 repealed the conservation easement tax credit for taxable years beginning on or after January 1, 2014. The repeal of the tax credit was not intended to effect property in the present use value program. This section puts the applicable provisions that were provided in the tax credit statutes in Chapter 113A and makes the necessary conforming changes in other statutes.
14.15	This section deletes an inconsistent effective date for the repeal of G.S. 105-159.2 which formerly allowed a taxpayer to checkoff a donation to the North Carolina Public Campaign Fund. Section 38.1.(f) of S.L.

	2013-381 repealed G.S. 105-159.2 effective July 1, 2013. This section makes the effective date of a duplicative repeal in Section 21.1.(c) of S.L. 2013 360 effective at the same time.
14.16	This section updates from January 2, 2013, to December 31, 2013, the reference to the Internal Revenue Code. This change keeps the statute up to date, but does not result in any substantive changes because there have not been any federal tax law changes since January 2, 2013, that impact the calculation of North Carolina taxable income.
14.17	This section changes the name of the document filed by the Secretary of Revenue to release an erroneous tax lien. Currently, the Department of Revenue files a "certificate of release" that credit reporting agencies treat as a negative item on a credit report. The renamed document, "certificate of withdrawal," is expected to cancel the original tax lien without impacting the taxpayer's credit report. This section is effective when it becomes law.
14.18	S.L. 2013-157 made a number of changes to North Carolina's Limited Liability Company Act. Among the changes was a new defined term of "company official" defined as: "*Any person exercising any management authority over the limited liability company whether the person is a manager or referred to as a manager, director, or officer or given any other title.*" This section incorporates the new term into the responsible person statute, which provides for personal liability when certain taxes are not paid. The section also removes the limitation on the type of withholding taxes that can be collected from a responsible person. Current law allows the Department of Revenue to hold business operators liable for income tax withheld on employee wages. This section eliminates the requirement that the withholding be for employee wages. For example, withholding on independent contractors could now be collected from responsible persons. This section is effective when it becomes law.
14.19	This section updates a statutory reference.
14.20	S.L. 2013-316 repealed the individual income tax credit for property taxes paid on farm machinery. This section removes references to the tax credit that are no longer needed in the property tax statutes.
14.21	This section makes a technical correction by adding (32a) to the list of exempt inventories for which a person need not provide a report under G.S. 105-315 and makes stylistic changes to update the statute.
14.22	This section repeals an obsolete subsection. G.S. 105-537(d) provides that a county may not levy the one-quarter cent sales and use tax under Article 46 if it also levies the land transfer tax under Article 60. Article 60 was repealed by S.L. 2011-18.

14.23	This section corrects a Session Law reference in last year's Revenue Laws Technical changes act with respect to a local occupancy tax act.
14.24	This section creates a new limited registration plate for vehicles that are registered after the prior registration on the vehicle has expired. Current law provides for a limited registration plate for an initial registration, but there is not a similar provision for registration renewals. This section is designed to solve two customer service problems, one involving military service members, and the second involving appeals for vehicle valuations where the customer has not been given an opportunity to appeal the valuation. There are instances where an individual can choose not to renew the registration on a vehicle for a year or longer. As long as the vehicle is not being driven, this is allowed under the law. When the vehicle will be operated again, the owner must renew the vehicle registration. Under Tax & Tag Together, when the individual renews the registration, property taxes on the vehicle for the upcoming tax year are due at the time of renewal. Military service members – The federal Service Members Civil Relief Act provides that personal property (including vehicles) of service members is not subject to personal property taxes simply due to the fact that the member is serving in the state. Active duty service members often do not renew vehicle registrations when the member is deployed overseas. Under Tax & Tag Together, when a service member returns from deployment and seeks to renew a vehicle registration, the system will not allow the vehicle to be registered without payment of the property tax, even if the service member does not owe the tax. Valuation appeals – Under current law, individuals may appeal the valuation assigned to a motor vehicle for property tax purposes. Taxpayers are given notice of the valuation of the vehicle and the right to appeal on the combined property tax notice. The combined notice is sent 60 days prior when the taxes are due. However, if an individual has allowed the registration to lapse more than a year, the individual would not have received a bill and would not have received notice of the tax value for the upcoming property tax year. Under the current system, the taxpayer will not be able to renew the vehicle registration without paying the tax for which the taxpayer did not have the opportunity to appeal. This section allows a temporary limited registration plate to be issued in both of these circumstances. Once the limited registration plate is issued, the taxpayer would have 60 days to remedy the tax issue. Once the tax issue has been resolved, the taxpayer could apply for a permanent tag.

14.25	This section sets the rate of tax on low street value drugs sold by weight at $50.00 per gram.
14.26	This section corrects a statutory reference.
14.27	This section makes a conforming change to the ticket scalping statute to related to the admissions changes.
14.28	This section makes technical changes to the reciprocity statute.

PART XV: VAPOR PRODUCTS AND PROHIBIT USE OF VAPOR PRODUCTS IN JAILS

SUMMARY: Part XV of S.L. 2014-3 imposes an excise tax of 5¢ per milliliter on vapor products, and prohibits the use of vapor products in State correctional facilities. Part XV of S.L. 2014-3 prohibited the use of vapor products in local confinement facilities. However, section 23 of S.L. 2014-115 repealed the prohibition of the use of vapor products in local confinement facilities and authorized local confinement facilities to provide vapor products and FDA-approved tobacco cessation products to inmates in those facilities.

CURRENT LAW: Under G.S. 105-113.5 cigarettes are taxed at 45¢ per pack. Other tobacco products (OTP), including pipe tobacco and roll-your-own tobacco is taxed under G.S. 105-113.35 at 12.8% of the cost of the product. The tax on cigarettes is paid by the distributor of the product. The tax on OTP products is payable by the wholesale dealer or retail dealer who first acquires or otherwise handles the product.

An electronic cigarette is a handheld device that produces vapor from a liquid. The liquid is generally heated to produce the vapor by a battery operated device. The liquid usually contains nicotine and sometimes contains flavors. The amount of the nicotine in the liquid can vary. Most electronic cigarettes are reusable. The liquid in the device can either be replenished replacing the cartridge that holds the liquid, or by manually refilling the liquid container.

In 2009, Congress enacted the Family Smoking Prevention and Tobacco Control Act, which gave the US Food and Drug Administration (FDA) the authority to regulate new tobacco products including e-cigarettes, nicotine gels, cigars, pipe tobacco, and dissolvable nicotine products.

In April 2014, the FDA issued proposed rules to regulate e-cigarettes. The proposed rules will be subject to 75 days of public comment. The proposed rules deem e-cigarettes a "tobacco product" for the purpose of federal regulation. The rules further propose to subject e-cigarettes to the following restrictions:

- Enforcement against adulterated or misbranded products.
- Ingredient disclosure and reporting of harmful components
- No modified risk descriptors (light cigarettes)
- No free samples

- Premarket review
- Minimum age for purchase

G.S. 148-23.1 prohibits the use and possession of tobacco products anywhere on the premises of a State correctional facility. Exemptions are provided for use and possession for religious purposes consistent with the policies of the Department of Public Safety (DPS), and also for possession by employees or visitors within the confines of a motor vehicle located in a parking area if the tobacco product remains in the vehicle and the vehicle is locked when the employee or visitor exits the vehicle.

G.S. 14-258.1 provides that it is a Class 1 misdemeanor to do either of the following:

- To knowingly give or sell tobacco products to an inmate on the premises of a correctional facility or in the custody of a local confinement facility, or to a person for delivery to an inmate.
- For an inmate in the custody of a local confinement facility to possess tobacco products.

BILL ANALYSIS:

Excise tax: Section 15.1 of S.L. 2014-3 imposes an excise tax of 5¢ per milliliter of the consumable product of vapor products. Vapor products are defined as noncombustible products that use a heating element to produce vapor from nicotine in a solution. The consumable product is the part of the vapor product that contains the nicotine liquid solution. All invoices for vapor products must contain the amount of the consumable product in milliliters.

Vapor products are considered a subset of the other tobacco products, therefore, the tax would be administered as the tax on OTP. The tax must be paid the wholesale dealer or retail dealer who first acquires or otherwise handles the product. The tax does not apply to products sold outside the State, products sold to the federal government, or products distributed without charge. Taxes are paid monthly. Each dealer must keep sufficient records of vapor products transactions.

Wholesale dealers and retail dealers must obtain a license for each place of business that handles tobacco products. The license fee for wholesale dealers is $25, and the license fee for retail dealers is $10.

Taxpayers that file timely returns and payments of the taxes on OTP are allowed a discount of 2% of the amount due. The discount does not apply to the tax on vapor products.

No vapor in prisons: Section 15.2(a) of S.L. 2014-3 prohibits the use of vapor products in State correctional facilities. Exemptions are provided for use and possession for religious purposes consistent with the policies of DPS, and for possession by employees or visitors within the confines of a motor vehicle located in a parking area if the vapor product remains in the vehicle and the vehicle is locked when the employee or visitor exits the vehicle.

Use of vapor products in local confinement facilities: Section 15.2(b) of S.L. 2014-3 created a Class 1 misdemeanor for an individual convicted of either of the following:

- To knowingly give or sell vapor products to an inmate on the premises of a correctional facility or in the custody of a local confinement facility, or to a person for delivery to an inmate.
- For an inmate in the custody of a local confinement facility to possess vapor products.

Section 23 of S.L. 2014-115 repealed the criminal offense for inmates of local confinement facilities to possess vapor products and specifically authorizes local confinement facilities to provide vapor products and FDA-approved tobacco cessation products to inmates.
EFFECTIVE DATE: The provisions related to imposing the excise tax on vapor products are effective June 1, 2015. The provisions related to vapor products in State confinement facilities are effective July 1, 2014. The provisions related to vapor products in local confinement facilities are effective December 1, 2014.

ENERGY MODERNIZATION ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2014-4	**SB 786**	**Sen. Rucho, Newton, Brock**

AN ACT TO (1) EXTEND THE DEADLINE FOR DEVELOPMENT OF A MODERN REGULATORY PROGRAM FOR THE MANAGEMENT OF OIL AND GAS EXPLORATION, DEVELOPMENT, AND PRODUCTION IN THE STATE AND THE USE OF HORIZONTAL DRILLING AND HYDRAULIC FRACTURING TREATMENTS FOR THAT PURPOSE; (2) ENACT OR MODIFY CERTAIN EXEMPTIONS FROM REQUIREMENTS OF THE ADMINISTRATIVE PROCEDURE ACT APPLICABLE TO RULES FOR THE MANAGEMENT OF OIL AND GAS EXPLORATION, DEVELOPMENT, AND PRODUCTION IN THE STATE AND THE USE OF HORIZONTAL DRILLING AND HYDRAULIC FRACTURING TREATMENTS FOR THAT PURPOSE; (3) AUTHORIZE ISSUANCE OF PERMITS FOR OIL AND GAS EXPLORATION, DEVELOPMENT, AND PRODUCTION ACTIVITIES SIXTY DAYS AFTER APPLICABLE RULES BECOME EFFECTIVE; (4) CREATE THE NORTH CAROLINA OIL AND GAS COMMISSION AND RECONSTITUTE THE NORTH CAROLINA MINING COMMISSION; (5) AMEND MISCELLANEOUS STATUTES GOVERNING OIL AND GAS EXPLORATION, DEVELOPMENT, AND PRODUCTION ACTIVITIES; (6) ESTABLISH A SEVERANCE TAX APPLICABLE TO OIL AND GAS EXPLORATION, DEVELOPMENT, AND PRODUCTION ACTIVITIES; (7) AMEND MISCELLANEOUS STATUTES UNRELATED TO OIL AND GAS EXPLORATION,

DEVELOPMENT, AND PRODUCTION ACTIVITIES; AND (8) DIRECT STUDIES ON VARIOUS ISSUES, AS RECOMMENDED BY THE JOINT LEGISLATIVE COMMISSION ON ENERGY POLICY.

SUMMARY: ***S.L. 2014-4 contains two tax provisions. Part VI of the act imposes a new severance tax on oil, gas and condensates extracted from the State. Section 30 of the act revises the motor fuels taxation of compressed natural gas and liquefied natural gas.***

PART VI: SEVERANCE TAX

Part VI of S.L. 2014-4 repeals North Carolina's previous severance tax and levies a new severance tax on the removal of energy minerals from the soil and water of the State. The previous State severance tax was enacted in 1945 and had not been modified since 1973. The previous tax was five mills on each barrel of oil (the equivalent of .5¢ per barrel of oil) and one-half mill on each 1000 cubic feet of gas (the equivalent of .05¢ per 1000 cubic feet of gas). No tax was collected under the previous law. The new severance tax adds condensates to the tax base, raises the tax rate on oil, and creates a floating tax rate for gas.

Energy minerals are defined in the act to include all forms of natural gas, oil, and related condensates. Thirty-three states, including North Carolina, currently impose some form of severance taxes on the extraction of oil and gas. Of the 33 states, 25 states impose a tax as a percentage of the value of the resource extracted, 7 states impose a tax on the volume extracted, and 1 state imposes a tax that is a combination of the two methods.

Tax Rate – Marginal gas is the gas produced from a well that is only capable of producing a small amount of gas (no more than 100 MCF of gas). The tax rate for the severance of energy minerals is as follows:

<table>
<tr><th></th><th>2015-2018</th><th colspan="3">2019-2020</th><th colspan="3">2021-2023</th><th colspan="3">2023 and thereafter</th></tr>
<tr><td>Oil and condensates</td><td>2%</td><td colspan="3">3.5%</td><td colspan="6">5%</td></tr>
<tr><td>Marginal Gas</td><td>.4%</td><td colspan="3">.6%</td><td colspan="6">.8%</td></tr>
<tr><td rowspan="5">Gas</td><td rowspan="5">.9%</td><td colspan="3">Based on delivered to market price per mcf</td><td colspan="3">Based on delivered to market price per mcf</td><td colspan="3">Based on delivered to market price per mcf</td></tr>
<tr><td>Over</td><td>Up to</td><td>Rate</td><td>Over</td><td>Up to</td><td>Rate</td><td>Over</td><td>Up to</td><td>Rate</td></tr>
<tr><td>-0-</td><td>$3</td><td>.9%</td><td>-0-</td><td>$3</td><td>.9%</td><td>-0-</td><td>$3</td><td>.9%</td></tr>
<tr><td>$3.01</td><td>$4</td><td>1.9%</td><td>$3.01</td><td>$4</td><td>1.9%</td><td>$3.01</td><td>$4</td><td>1.9%</td></tr>
<tr><td>$4.01</td><td>NA</td><td>2.9%</td><td>$4.01</td><td>$5</td><td>2.9%</td><td>$4.01</td><td>$5</td><td>2.9%</td></tr>
</table>

					$5.01	$6	3.9%	$5.01	$6	3.9
					$6.01	$7	4.9%	$6.01	$7	4.9%
					$7.01	NA	5%	$7.01	$8	5.9%
								$8.01	$9	6.9%
								$9.01	$10	7.9%
								$10.01	NA	9%

Tax Base – For condensates and oil, the tax rate is applied to the total actual gross price paid by the first purchaser of the condensate or oil. For gas, the tax rate is applied to the "delivered to market" value of the mineral sold. The "delivered to market value" of gas is the actual gross price paid minus the costs incurred by the producer to get the gas from the mouth of the well to the first purchaser.

Administration – The tax is the liability of the producer of the gas. The producer is the entity that extracts the mineral from the soil or the water of the State. Returns and taxes are due on either a monthly or quarterly basis, depending on the tax liability of the producer. A bond or letter of credit would be required for producers that fail to file a return or make a payment of tax due.

Permit Suspension – Permits for oil and gas exploration using horizontal drilling or hydraulic fracturing would be suspended for any producer that fails to file a return or make a payment for severance taxes.

No Local Taxes – Local governments would not be authorized to impose any additional taxes on the severance of energy minerals in the State.

Property Taxes – The value of real property attributable to the presence of energy minerals is exempt from taxation where a permit to drill on the property has not been issued.

SECTION 30: MOTOR FUELS TAX ON LNG AND CNG

Section 30 of S.L. 2014-4 adopts the gas gallon equivalent (GGE) equivalent for compressed natural gas and the (diesel gas equivalent) DGE equivalent for liquid natural gas for the purpose of motor fuel taxation.

The motor fuel tax rate has two components, a flat rate of 17.5¢, and a variable rate of the greater of 3.5¢ per gall on or 7% of the wholesale price of gas of the preceding six month base period. S.L. 2013-316 capped the motor fuel tax rate at 37.5¢ until June 30, 2015. Alternative fuels are taxed at the motor fuel rate. Unless otherwise provided, the Secretary will determine the equivalent rate for alternative fuels. The gas gallon equivalent (GGE) or diesel gas equivalent (DGE) is the amount of an alternative fuel that is needed to generate the same amount of energy of either a gallon of gas or a gallon of diesel.

The Department of Revenue adopted a GGE at 5.66 pounds for compressed natural gas in 1996. The International Fuel Tax Agreement (IFTA), which is used to report and distribute motor fuel taxes from motor carriers that operate in multiple jurisdictions, adopted the GGE for compressed natural gas earlier this year. The GGE equivalent is 5.66 pounds of compressed natural gas. The DGE equivalent of liquefied natural gas is 6.06 pounds of liquefied natural gas.

SOIL & WATER/REGIONAL JAILS REFUNDS.

Session Law	*Bill #*	*Sponsor*
S.L. 2014-20	**HB 558**	**Rep. Whitmire, Ramsey, Dixon, Waddell**

AN ACT TO ALLOW SALES TAX REFUNDS FOR SOIL AND WATER CONSERVATION DISTRICTS AND REGIONAL JAILS.

SUMMARY: House Bill 558, S.L. 2014-20, authorizes a sales tax refund for soil and water conservation districts and regional jails.

CURRENT LAW: G.S. 105-164.14 authorizes certain governmental entities to receive an annual refund of certain sales and use taxes paid on direct purchases of tangible personal property and services.

A soil and water conservation district is a governmental subdivision of this State, and a public body corporate and politic, organized in accordance with the provisions Chapter 139 of the General Statutes. According to the North Carolina Division of Soil and Water Conservation, there are 96 local conservation districts in the State. Districts partner with federal, state and local entities to deliver state and federal conservation programs related to water quality practices, farmland protection, wetlands restoration and wildlife habitat enhancement. Districts assist with community conservation planning in natural resource management areas, such as erosion and sediment control, stormwater management, flood control, water use efficiency, stream restoration, small-plot forestry management and restoration efforts after natural disasters. Districts also help implement conservation easements and respond to local projects, such as building environmental education centers.

A local confinement facility is a county or city jail, a local lockup, a regional or district jail, a juvenile detention facility, a detention facility for adults operated by a local government, and any other facility operated by a local government for confinement of persons awaiting trial or serving sentences. G.S. 153A-219 authorizes two or more units of local government to enter into an agreement to establish and operate a district confinement facility.

BILL ANALYSIS: The bill would add the following to the list of governmental entities entitled to an annual sales tax refund:

- Soil and water conservation districts organized under Chapter 139 of the General Statutes.
- District confinement facilities created under G.S. 153A-219, including those created under a local act modifying G.S. 153A-219.

EFFECTIVE DATE: House Bill 558, S.L. 2014-20, became effective July 1, 2015, and applies to sales made on or after that date.

CAPE HATTERAS/GAS CITIES/INFRASTRUCTURE LAND.

Session Law	*Bill #*	*Sponsor*
S.L. 2014-39	**SB 790**	**Senator Cook**

AN ACT TO PHASE IN THE SALES TAX RATE ON ELECTRICITY SOLD BY CAPE HATTERAS ELECTRICAL MEMBERSHIP CORPORATION AND THE SALES TAX RATE ON PIPED NATURAL GAS SOLD BY GAS CITIES, TO MODIFY THE PROPERTY TAX DEFERRAL PROGRAM FOR SITE INFRASTRUCTURE LAND, AND TO DELAY THE CHANGE IN THE HIGHWAY USE TAX BASE TO INCLUDE DEALER ADMINISTRATIVE FEES.

SUMMARY: S.L. 2014-39, Senate Bill 790, does the following:

- *Phases-in the sale tax on sales of electricity by the Cape Hatteras Electric Membership Corporation over two years.*
- *Phases-in the sales tax on sales of piped natural gas by the eight gas cities.*
- *Modifies the infrastructure property tax deferral program, enacted last year as S.L. 2013-130.*
- *Makes a technical change to ensure that the expansion of the highway use tax base to include dealer administrative fees is delayed from July 1, 2014, to October 1, 2014.*
-

CURRENT LAW, BILL ANALYSIS, AND EFFECTIVE DATE:

Phase-In Sales Tax Rate

S.L. 2013-316 (*Tax Simplification and Reduction Act*) provided for the uniform taxation of all utilities. The Act repealed the franchise tax on electricity and increased the sales tax on electricity to the combined general rate of 7%. It also repealed the excise tax on piped natural gas and replaced it with a sales tax at the combined general rate of 7%. These sales tax changes become effective July 1, 2014.

Currently, Cape Hatteras Electric Membership Corporation (EMC) is not liable for franchise tax or sales tax on its sale of electricity. Other EMCs are subject to franchise tax and sales tax on their sale of electricity. Currently, the eight gas cities are not subject to the excise tax on their sale of piped natural gas. The eight gas cities are Bessemer City, Greenville, Kings Mountain, Lexington, Monroe, Rocky Mount, Shelby, and Wilson. Sales of piped natural gas by other providers are subject to the excise tax. S.L. 2013-316 did not retain these exemptions. Section 1 of the House PCS would phase-in the sales tax rate on these sales of electricity and piped natural gas over two years: effective July 1, 2014, the sales tax rate would be 3.5%; and effective July 1, 2015, the sales tax rate would be the same as the rate paid by other consumers of these products, 7%.

Cities receive a share of the sales tax imposed on piped natural gas. Under the former excise tax system, the amount was one-half of the amount of tax attributable to that city based on gas delivered to sales or transportation customers in the city and gas received in each city by persons who have direct access to an interstate pipeline and who receive the gas for their own consumption. Beginning July 1, 2014, there is a different formula for distributing the proceeds to the cities. Moreover, the formula for gas cities differs from other cities. Subsections (b), (c), and (d) of this section clarify how the distribution is calculated for gas cities and provide that gas cities do not receive a distribution of the sales tax revenue derived from the reduced rate. A similar change is not necessary for the distribution of sales tax imposed on electricity for cities because there is no existing distribution impacted by the reduced rate for electricity sold by the Cape Hatteras EMC.

Electric membership corporations (EMCs) are not-for-profit entities that provide electric service in rural areas. North Carolina enacted legislation to allow EMCs in 1935 to promote electric service in the State. EMCs are not regulated by the Utilities Commission, but are governed by the board of directors that are elected by the customers of the EMC. Prior to 1965, each EMC was designated as a "public agency." As public agencies, the EMCs did not pay taxes on the sales of electricity by the EMCs. In 1965, the General Assembly enacted legislation clarifying the service area territories of EMCs and investor-owned public utilities. As part of the negotiation over the service areas, the legislation repealed the "public agency" designation for most of the EMCs. However, Cape Hatteras EMC retained its status as a "public agency" under the law. In 2000, the Department of Revenue informed Cape Hatteras EMC it would be required to remit sales tax on its sales of electricity.[23] Cape Hatteras paid the tax, but also filed suit for the return of taxes and clarification of its liability for the tax. In 2011, the North Carolina Court of Appeals held that Cape Hatteras EMC was not liable for the franchise or the sales tax on its sales of electricity.[24] S.L. 2013-316 specifically repealed the prior legislation that designated Cape Hatteras EMC as a "public agency" and stated "Cape Hatteras Electric Membership Corporation is subject to any other taxes to the same extent as other electric membership corporations established under Chapter 117 of the General Statutes.

---

[23] In 1965, only the franchise tax was imposed on the sale of electricity. In 1984, the General Assembly lowered the franchise tax on electricity and imposed a sales tax on sales of electricity.

[24] *Cape Hatteras Electric Membership Corporation v. Lay*, 210 N.C. App. 92 (2011).

Prior to 1999, the sale of piped natural gas was subject to sales and use tax, but sales by gas cities were exempt. In 1999, the sales and use tax on piped natural gas was replaced with a new excise tax. The new excise tax system preserved the tax exemption for gas received by a gas city for consumption by that city and for or gas delivered by a gas city to a sales or transportation customer of the gas city. A "gas city" is a city in this State that operated a piped natural gas distribution system as of July 1, 1998. There are only eight gas cities: Bessemer City, Greenville, Kings Mountain, Lexington, Monroe, Rocky Mount, Shelby, and Wilson. S.L. 2013-316 did not retain this exemption.

Modify the Property Tax Deferral Program for Site Infrastructure Land

S.L. 2013-130 created a property tax deferral program for sites with potential to be developed for office or industrial applications in order to encourage horizontal improvement so as to make the sites more readily adapted to those uses in a shorter timeframe. In order to qualify, the site must be zoned for office and/or industrial use, must consist of at least 100 acres, may not have a building permit for a primary building or structure issued for it, and must be currently enrolled in or have been enrolled within the previous six months in the PUV program.

Section 2 of the bill removes the qualification that the property be enrolled in the PUV program. It makes a conforming change to the amount of taxes that are deferred. The amount of property tax liability that can be deferred is the portion of tax that represents the increase in the property value resulting from any existing horizontal improvement plus the difference between the property valued at its true value and the property valued as it would have been valued as if it were zoned the same as it was in the calendar year prior to the time the application for property tax relief under this program was filed. The difference in value between property zoned as vacant or agricultural property and property zoned as industrial or office can be large. The change is effective for taxable years beginning on or after July 1, 2015.

The deferred taxes are carried forward in the records of the county and, if applicable, the city in which the property is located until the occurrence of a disqualifying event. A disqualifying event causes the current years' tax liability (without benefit of the program) and some previous years' deferred tax liability to be due and payable as follows:

- If, within five years of classification, an amount equal to the deferred taxes is not invested in improvements to make the land suitable for office and/or industrial use ("minimum investment"), the deferred taxes for the preceding five years are due and payable.
- If the minimum investment is made but the property is classified for 10 years in the program, the deferred taxes for the preceding five years are due and payable.
- If some or all of the land is rezoned for a use other than office and/or industrial use, all deferred taxes are due and payable.
- If land is transferred or a building permit issues for the land, the deferred taxes (for only that portion transferred or to which the permit applies) for the preceding year are due and payable. The remaining parcel continues to receive

treatment under this classification, even if it no longer meets the size requirement.

Delay the Change in the Highway Use Tax Base to include Dealer Administrative Fees

In S.L. 2013-360, the Current Operations and Capital Improvements Appropriations Act of 2013, the highway use tax base was expanded to include any dealer administrative fees, effective January 1, 2014. Almost immediately, in S.L. 2013-363, the implementation of this change was delayed until July 1, 2014. Although the Current Operations and Capital Improvements Appropriations Act of 2014, Senate Bill 744, is in conference, both the Senate and the House passed Section 34.6 in that bill that would delay the implementation of this provision until October 1, 2014. S.L. 2014-3 rewrote the relevant highway use tax statute, effective October 1, 2014.

Section 3 of this bill makes a technical change by repealing the two provisions related to this change enacted last year, and thus allowing the change enacted in S.L. 2014-3 to become effective October 1, 2014. Without this change, the highway use tax base will change to include dealer administrative fees effective July 1, 2014, instead of the agreed upon date of October 1, 2014. If this provision is enacted, the corresponding budget section 34.6(a) of Senate Bill 744 will no longer be needed.

911 BOARD/BACK-UP PSAP.

Session Law	*Bill #*	*Sponsor*
S.L. 2014-66	**SB 797**	**Senator Brock**

AN ACT TO AMEND THE DUTIES OF THE 911 BOARD RELATING TO PUBLIC SAFETY ANSWERING POINTS, AS RECOMMENDED BY THE JOINT LEGISLATIVE OVERSIGHT COMMITTEE ON INFORMATION TECHNOLOGY, AND TO CLARIFY THE COLLECTION AUTHORITY OF THE DEPARTMENT OF REVENUE FOR THE 911 FEE ON PREPAID WIRELESS.

SUMMARY: S.L. 2017-66 requires public safety answering points (PSAPs) to provide the capability to provide 911 call taking in the event the primary PSAP cannot process calls. The act also clarifies the authority of the Department of Revenue to collect the 911 fee on prepaid wireless service, and clarifies the fees the Department may retain as costs of administering collection.

CURRENT LAW: A monthly fee of 60¢ is imposed on each telecommunications subscriber. Other than prepaid wireless providers, each provider of telecommunications service collects the 911 fee from each subscriber of their service. Until July 1, 2013, the 911 fee was not collected on prepaid wireless phones. S.L. 2011-122 imposed the fee on retailers of prepaid wireless service. The 911 fee on prepaid wireless is collected by the Department of Revenue and remitted to the

911 Board each month within 45 days of the end of the month the service charges were collected.

The 911 Board distributes the 911 fees to "public safety answering points" (PSAP). Each PSAP is the public safety agency that receives incoming 911 calls and dispatches public safety agencies in response. The distributions from the 911 fees may only be used for certain eligible purchases by the PSAP.

BILL ANALYSIS: S.L. 2014-66 requires each PSAP to plan for 911 call taking in the event the primary PSAP cannot process calls. PSAPs will be authorized to use distributions from the 911 Fund to pay for dispatch equipment at a back-up PSAP. As of July 1, 2016, PSAPs will not be eligible for distributions from the 911 Fund if the PSAP does not have a back-up PSAP.

S.L. 2014-66 also clarifies the authority of the Department of Revenue to collect the 911 fee on prepaid wireless service. Although the fee is not a tax, the Department collects the fee from retailers. The initial legislation authorizing the collection of the fee limited the authority of the Department to certain administrative provisions. The Department has requested this clarification to provide that the Department may enforce collection of the fee.

The Department of Revenue is authorized to retain the costs of collecting the fee on prepaid wireless, not to exceed $500,000 a year. The original legislation allowed the Department to retain and additional $200,000, for a total of $700,000 in the 2013-14 fiscal year, to pay for start-up costs. Due to a delay in the implementation of the Department's new computer system, the Department only retained $60,000 in total costs in the 2013-14 fiscal year. This provision authorizes the Department to retain the additional $140,000 in start-up costs for the 2014-15 fiscal year, allowing the Department a total of $640,000 for costs retained in the 2014-15 fiscal year.

EFFECTIVE DATE: The provisions related to back-up PSAPs was effective when it became law and applies to PSAP distributions on or after July 1, 2016. The provisions related to the Department of Revenue retaining costs of collecting the 911 fee was effective July 1, 2014.

SPECIAL LICENSE PLATE DEVELOPMENT PROCESS.

Session Law	*Bill #*	*Sponsor*
S.L. 2014-96	**HB 101**	**Rep. Martin, Howard, Moffitt, Setzer**

AN ACT TO REAUTHORIZE EXPIRED SPECIAL REGISTRATION PLATES, TO AUTHORIZE ADDITIONAL SPECIAL REGISTRATION PLATES TO BE ON A BACKGROUND OTHER THAN THE "FIRST IN FLIGHT" BACKGROUND, AND TO ESTABLISH A PROCESS BY WHICH PERSONS OR

ORGANIZATIONS MUST OBTAIN A MINIMUM NUMBER OF PAID APPLICATIONS PRIOR TO OBTAINING LEGISLATIVE APPROVAL FOR THE DEVELOPMENT OF A SPECIAL REGISTRATION PLATE.

SUMMARY: Session Law 2014-96 does the following:

- ***It reenacts the 116 special registration plates that expired on July 1, 2013, until October 1, 2014.***
- ***It authorizes 4 existing or reauthorized plates to be on a full-color background, assuming the organization obtains the minimum number of required paid applications before their authorization expires.***
- ***It creates a new process for establishing or reenacting special registration plates that requires an organization to obtain the minimum number of paid applications and submit the total payment to DMV prior to seeking legislation authorizing the plate.***

CURRENT LAW: North Carolina offers approximately 150 special license plates. The process for developing a special license plate is not codified or published; an organization usually contacts a legislator or DMV to find out what the process is.

Generally speaking, an organization seeking a special license plate must find a legislative member to sponsor a bill authorizing the plate. Once the legislation is enacted, an organization must contact DMV for the next steps of the process. DMV may assist the organization with developing a form or will direct the organization to develop its own form to give to potential purchasers who want to apply for the plate. An organization must then collect the minimum number of paid applications and develop the artwork for the plate. The issuance of most plates is contingent upon the receipt by DMV of at least 300 applications for the particular plate if it is on a standard "First in Flight" background or at least 500 applications if it is on a full-color background. Once DMV has the list of purchasers, payment from those purchasers, and the final artwork, it will proceed with developing the plate. Over the years, there have been many more authorizations for plates than actual plates that have been developed, either due to an inability to meet the minimum number of applications or lack of knowledge about the process.

Once a plate is developed and available for purchase, a person may, upon application and payment of the required fees, obtain from DMV a special registration plate for a motor vehicle registered in that person's name if the person qualifies for the registration plate. As a general rule, the fee for a special registration plate is the regular vehicle registration fee, which is $28, plus a $10 special registration plate fee. The $10 special registration plate fee is credited to the Special Registration Plate Account. After deducting the cost of the plates from this account, $1.3 million is appropriated to provide operating assistance for Visitor Centers. The remaining revenue in the account is transferred quarterly to the Department of Commerce for advertising (33%), the Department of Transportation for highway beautification (50%), and the Department of Human Resources to promote travel accessibility for disabled persons (17%).

BILL ANALYSIS:

Temporary Reauthorization of Expired Plates

In 2011, the General Assembly created a mechanism by which special license plate authorizations would expire if the sponsoring organization had not obtained the minimum number of paid applications within two years of the plate being authorized or within two years of the passage of that legislation for plates authorized prior to July 1, 2011. On July 1, 2013, the authorization for 116 special license plates expired.[25] At least one of those organizations has indicated that it subsequently obtained the minimum number of paid applications.

Section 1 of the act reauthorizes the expired plates until October 1, 2014. This extension allows an organization that has obtained the required number of paid applications to proceed with the development of its plate. For any organization that does not submit the required number of paid applications to DMV by October 1, 2014, the authorization for the plate will expire on that date. However, any organization for which its authorization expires may proceed under the new process.

Authorize Additional Plates on Full-Color Background

In order for a plate to be on a background other than the "First in Flight" background (referred to as a "full-color plate"), it must be authorized under G.S. 20-63(b1). In 2013, the General Assembly began requiring organizations seeking a full-color plate to obtain an additional 200 paid applications, or a total of 500 paid applications.

Section 2 of the act adds four plates to the list of plates that may be printed on a full-color background. Two of the plates, Native Brook Trout and Red Drum, were authorized last year. Those plates have until July 1, 2015, to obtain 500 paid applications in order for the plate to be produced. Otherwise, the authorization will expire. The other two plates, S.T.A.R. and Alpha Phi Alpha, are plates being reenacted by this bill. They have until October 1, 2014, to obtain 500 paid applications or the authorization will expire.

New Special License Plate Development Process

Section 3 of the act establishes a new process for establishing or reauthorizing special license plates. This would codify the process and require DMV to explain the process on its website so that the public is aware of the process. The new process would be similar to the current process, except that the timing shifts as to when a requesting organization must obtain the minimum number of paid applications. The new process becomes effective October 1, 2014.

The new process will operate as follows:

Step 1: Organization Obtains Paid Applications

An organization seeking a plate would obtain a form from DMV to be completed by potential purchasers. DMV must make this form available on its website by October 1, 2014 **(Section 4)**. The form will explain the application process and the fees that must be

[25] A list of expired plates appears at the end of this Bill Analysis.

remitted to pre-pay for the plate. The organization must collect the minimum number of applications and payment from potential purchasers.

This step is similar to what happens now except that the organization must obtain the applications and payment after the General Assembly has authorized the plate.

Step 2: Organization Submits Development Application & Pre-Payment to DMV

Once an organization has obtained the minimum number of paid applications, it must submit to DMV a Special Registration Plate Development Application along with a single payment representing the total pre-payment received from potential purchasers. The deadline for submission would be February 15 in order for a bill to be considered in the legislative session being held that year. If an organization submits the application after February 15, a bill would be considered in the following year.

Organizations make this same payment to DMV now but only after legislation has been approved and once they have obtained the minimum number of paid applications from potential purchasers. The Special Registration Plate Development Application would be a new form that DMV must develop and make available on its website by February 1, 2015 **(Section 5)**. The form would require the organization to provide identifying information, point of contact information, a description of the proposed plate, the proposed fee for the plate, the name of at least one current member of the General Assembly who would sponsor legislation authorizing the plate, and sign a statement indicating that it has obtained the minimum number of paid applications.

At this point, an organization should have made contact with a legislator about sponsoring a bill to authorize the proposed plate. This bill does not restrict a member's ability to introduce legislation for a particular plate at any time within the filing deadlines.

Step 3: DMV Reports to General Assembly

By March 15 of each year, DMV would send to the Transportation and Finance chairs of both houses, as well as the Research Division, a list of the applicant-organizations that submitted an application and the required payment. The General Assembly may consider a bill during that year's session to authorize a special plate for those applicant-organizations.

Step 4: General Assembly Approves or Does Not Approve Bill

The General Assembly may approve, disapprove, or take no action on a bill authorizing a special license plate that applied in accordance with this process.

This step is the same as what happens now in that the General Assembly currently has discretion to approve, disapprove, or take no action on a bill authorizing a particular plate.

Step 5: Organization Submits Artwork & List of Purchasers to DMV

If the General Assembly approves the plate, the organization has 60 days within the bill becoming law to submit the artwork and list of purchasers to DMV or the authorization will expire **(Section 6)**. DMV will apply pre-payment at that time. If the General Assembly does not authorize the plate, DMV must refund the payment to the organization, and the organization is responsible for refunding the fees to each of the purchasers.

Step 6: DMV Issues Plate

DMV has 6 months to develop a plate that met all of the necessary requirements.

Deadline Extension for 2015 Session

Section 3(c) extends the deadlines for the first year that the new process would be in place to allow DMV to create and implement the new forms and the application process and to afford members and organizations an opportunity to become aware of and participate in the new process. In order for a bill to be considered in the 2015 Regular Session authorizing a new plate, an organization would have until April 1, 2015 to submit an application to DMV. DMV must report the list of applicant-organizations to the General Assembly by May 1, 2015.

Study of Special Registration Plates and Permanent License Plates

Section 7 of the act directs the Revenue Laws Study Committee to study the new process for special registration plates, as well as the costs incurred by DMV to administer the special plates, and to study the eligibility criteria for permanent license plates and report its findings and recommendations to the 2015 General Assembly.

APPROPRIATIONS ACT OF 2014.

Session Law	*Bill #*	*Sponsor*
S.L. 2014-100	**SB 744**	**Sen. Brown, Harrington, Hunt**

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

SUMMARY: The finance sections of the Appropriations Act of 2014 are summarized below.

- ***North Carolina Education Endowment Fund: S.L. 2014-100, Sec. 8.11 (SB 744, Sec. 8.11) establishes the North Carolina Education Endowment Fund (Fund) as a special fund to be used solely for differentiated teacher compensation related directly to improving student academic outcomes in the public schools. Revenue for this Fund may be generated from the sale of "I Support Teachers" special registration plates and the designation of tax refunds. Appropriate language and space must be made available on the State income tax form for the irrevocable designation of returns to be made to the Fund. The General Assembly intends to appropriate the funds to local boards of education to implement differential pay plans for highly-effective classroom teachers. This section became effective July 1, 2014, and the option to contribute tax refunds for the purposes of this section applies for taxable years beginning on or after January 1, 2014.***

- ***Reinstatement of Hospital Setoff Debt Collection Against Tax Refunds and Lottery Prizes: S.L. 2014-100, Sec. 12I.4 (SB 744, Sec. 12I.4) reauthorizes schools of medicine, clinical programs, facility, or practice affiliated with one of the constituent institutions of the University of North Carolina that provide medical care to the general public and The University of North Carolina Health Care System to use the setoff debt collection act. For these persons and entities, debt that may be set off is limited to the sum owed to one of these entities by law or by contract following an adjudication of a claim resulting from an individual's receipt of hospital or medical services at a time when the individual was covered by commercial insurance, Medicaid, Health Choice Medicare, Medicare Advantage, a Medicare supplement plan, or any other government insurance. The registration required of these reauthorized agencies is not affected by the repeal of the authority, and the priority of the agency must be determined under the initial statutory authority to utilize the debt setoff collection remedy. This section became effective August 7, 2014, and applies to tax refunds determined by the Department of Revenue on or after that date and to lottery prizes determined by the Lottery Commission on or after that date.***

- ***Solid Waste Disposal Tax Uses: S.L. 2014-100, Sec. 14.24 (SB 744, Sec. 14.24) increases, from 13% to 19%, the cap on the percentage of revenues from the solid waste disposal tax allocated to the Department of Environment and Natural Resources for assessment and remediation of pre-1983 landfills that may be used for administrative expenses. This section also broadens the types of administrative expenses that may be funded to include any expense related to hazardous and solid waste management. This section became effective July 1, 2014, and applies to funds credited to the Inactive Hazardous Sites Cleanup Fund on or after that date.***

- ***Motor Fuel Excise Tax: S.L. 2014-100, Sec. 34.6 (SB 744, Sec. 34.6) repeals the quarterly refund for the motor fuel excise tax paid for taxicabs. This section becomes effective for taxable years beginning on or after January 1, 2015.***

- ***Clarify "Net General Fund Tax Collected" for Purposes of the Corporate Income Tax Rate Reduction Trigger: S.L. 2014-100, Sec. 37.1 (SB 744, Sec. 37.1) clarifies what the term "net General Fund tax collected for a fiscal year" means for purposes of the corporate income tax rate trigger in statute. In 2013, the General Assembly reduced the corporate income tax rate from 6.9% to 6% for the 2014 taxable year and to 5% for the 2015 taxable year. In addition to these rate reductions, the law provides for a potential 1% rate reduction for taxable year 2016 if net General Fund tax collections for fiscal year 2014 to 2015 meet the statutory target amount of $20.2 billion and a potential 1% rate reduction for taxable year 2017 if net General Fund tax collections for fiscal year 2015 to 2016 meet the statutory target amount of $20.975 billion. To see whether or not the targeted collection amount has been met, prior law used the amount reported by the State Controller in the State's Comprehensive Annual Financial Report. This report contains***

several different reports and none of the reports necessarily reflect the collections used by the General Assembly and the Appropriations Committees when the Fiscal Research Division prepares the budget availability statement for a fiscal year. The number most commonly used by the legislature when it begins budget discussions is the amount reported by the Department of Revenue. This section clarifies that net General Fund tax collected for a fiscal year means the amount of net revenue reported by the Department of Revenue's June Statement of Collection as "Total General Fund Revenue" for the 12-month period that ended the previous June 30, modified as follows: less any large one-time, nonrecurring revenue, adjusted by any changes in net collections resulting from suspension or termination of transfers out of the General Fund. This section became effective August 7, 2014.

- *Modify County Hold Harmless for Repealed Local Taxes: S.L. 2014-100, Sec. 37.2 (SB 744, Sec. 37.2) modifies a hold harmless payment made to counties originally enacted in S.L. 2007-323. Under S.L. 2007-323, the State assumed the county portion of nonfederal Medicaid costs. To provide the financial resources to assume these costs, S.L. 2007-323 phased out one-half cent in local sales tax and made a corresponding increase in the State sales tax rate. S.L. 2007-323 also provided a hold harmless payment to counties equal to the counties' forgone or repealed sales tax revenue minus the Medicaid expenses that the State assumed. The payment guaranteed that every county would benefit from these changes by at least $500,000 annually. Section 37.2 of SB 744, phases out the provision that each county will benefit by $500,000 annually as follows: effective July 1, 2014, the guaranteed amount is $375,000; effective July 1, 2015, the guaranteed amount is $250,000; effective July 1, 2016, the guaranteed amount is $125,000; effective July 1, 2017, no guaranteed amount. Based on projected sales tax collections and Medicaid expenses, 24 counties will continue to receive a hold harmless payment beginning in FY 2017-18.*

Modular/Manufactured and Modular Home Sales Tax: S.L. 2014-100, Sec. 37.3 (SB 744, Sec. 37.3) exempts 50% of the sales price of a manufactured or modular home from sales tax. This section became effective September 1, 2014, and applies to sales made on or after that date.

2013 Finance Law Changes

UI FUND SOLVENCY & PROGRAM CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-2	HB 4	Rep. Howard, Warren, Starnes, Setzer

AN ACT TO ADDRESS THE UNEMPLOYMENT INSURANCE DEBT AND TO FOCUS NORTH CAROLINA'S UNEMPLOYMENT

INSURANCE PROGRAM ON PUTTING CLAIMANTS BACK TO WORK.

SUMMARY: S.L. 2013-2, House Bill 4, makes the following changes to the State unemployment insurance program (UI) to accelerate[26] the repayment of the $2.5 billion advance the State borrowed from the federal government to pay UI benefits:

- *Effective January 1, 2014, the bill makes the following tax rate changes: increase the minimum State unemployment tax (SUTA) rates from 0% to .06%, increase maximum SUTA tax rate from 5.7% to 5.76%; and compute SUTA tax rates based on a formula.*
- *Effective July 1, 2013, the bill establishes a new trigger for the collection and suspension of the surtax, which is equal to 20% of an employer's SUTA liability.*
- *Effective July 1, 2013, the bill requires a 1% reserve from all governmental entity and nonprofit employers that elect to finance benefits through reimbursement, and disallow refunds.*
- *Effective, July 1, 2013, the bill restricts the use of revenues in the Employment Security Commission Reserve Fund and the Special Employment Security Administration Fund.*
- *Effective July 1, 2013, the bill makes the following benefit changes: reduce the maximum duration of regular benefits from 26 weeks to 20 weeks and tie the duration of benefits to the seasonal adjusted unemployment rate; reduce the maximum weekly benefit amount (WBA) from $535 to $350; and change the calculation of the WBA from a formula based on the high quarter wage in the claimant's base period to the average of the last two quarters of that period.*
- *Effective July 1, 2013, the bill restricts the optional triggers for the availability of extended benefits to those times when the benefits would be 100% federally funded. It does not change the mandatory trigger for extended benefits.*
- *Effective July 1, 2013, the bill makes the following programmatic changes: require a waiting week for each new benefit claim; repeal substantial fault; eliminate most good cause provisions for leaving work; and redefine suitable work as any work paying 120% of weekly benefit amount after 10 weeks of benefits.*
- *The bill establishes a Joint Legislative Oversight Committee on Unemployment Insurance.*

BACKGROUND: The Unemployment Compensation Program is a Federal-state partnership created by the federal Social Security Act of 1935 and the Federal Unemployment Tax Act (FUTA). The purpose of the UI program is to provide economic stability to both the unemployed individual and the surrounding community. Federal law requires states to offer temporary unemployment compensation benefits to individuals who

---

[26] Simulations prepared by the Upjohn Institute suggest the UI Fund would have a positive credit balance in 2018 if the State did not change its laws and relied solely on federal tax increases for the payment of the debt. A simulation based on the changes proposed in the bill suggests the UI Fund would have a positive credit balance in 2015.

lose a job through no fault of their own and are able, available, and actively seeking work. States may design their own UI program so long as the program meets minimal federal coverage and benefit requirements. Employers pay both a federal and state unemployment tax to fund the program. No part of either tax may be deducted from an employee's wages.

The FUTA tax rate is 6% and is applied to a $7,000 taxable wage base. Employers are allowed a credit of up to 5.4% if a state's UI program complies with federal law and regulations, for an effective FUTA tax rate of 0.6% or $42 per employee. This amount is credited to the federal treasury and used to offset the costs of administering the states' UI programs.

If a state does not have sufficient revenues in its Unemployment Trust Fund to pay benefits, the federal unemployment account provides an automatic advance or loan to the state.[27] North Carolina received its first advance in February 2009. The State currently owes the federal unemployment account $2.5 billion.[28] To ensure repayment of the advance, the FUTA tax credit is reduced by 0.3% each year[29] until the debt is repaid; all of the revenue generated by the credit reduction is applied to the principal of the outstanding loan balance. The revenue cannot be used to pay the interest on the debt.[30]

The FUTA tax rate in North Carolina is currently $84 per employee.[31] Under this repayment method, the State is expected to have a positive balance in its Trust Fund account in 2018. Under the current repayment schedule, the FUTA tax rate is anticipated to be $105 per employee in 2014, $126 in 2015, $147 in 2016, $168 in 2017, and $189 in 2018 before returning to $42 in 2019.

CURRENT LAW: Chapter 96 of the General Statutes creates North Carolina's current UI program. The UI program provides coverage and benefits to the employees of private employers, State and local governments, Indian tribes, and nonprofit organizations.

Article 2 of Chapter 96 contains the financing system for UI. Under that system, private employers must pay a SUTA tax, or contribution, on the taxable wages of each of their employees. The taxable wage base in North Carolina is equal to 50% of the average yearly

---

[27] As of January 3, 2013, 20 states have an outstanding state loan from the Federal Unemployment Account.

[28] NC's debt is the 3rd largest behind California at $10.3 billion and New York at $3.5 billion.

[29] The credit reduction begins when a state has an outstanding federal loan balance 2 consecutive Januarys. The indebtedness must be eliminated by November 10th to restore the full credit for the succeeding calendar year.

[30] North Carolina has used revenue in the Employment Security Commission Reserve Fund to pay the interest payments. Interest payments are due on September 30th of each year. The interest rate is determined annually. The interest rate for 2012 was 2.9%. The interest rate for 2013 is 2.6%.

[31] The FUTA tax credit was reduced from 5.4% to 5.1% in 2012 and to 4.8% in 2013.

insured wage[32] The taxable wage base for 2013 is $20,900.[33] Employers that are governmental or nonprofit organizations must be given the election to finance benefits by making reimbursement payments to the Division in lieu of paying a contribution.

The SUTA contribution rates vary from 0% to 5.7%. The revenue from the contribution is credited to the Unemployment Insurance Fund and used only to fund benefits. An employer's SUTA contribution rate is based on an experience-rated system. The Division of Employment Security, Department of Commerce (Division) annually computes an employer's experience rating based on the contribution credits made to and benefits charges made against the employer's account. A positive experience rating produces a lower SUTA contribution rate and a negative experience rating produces a higher SUTA contribution rate.

An employer who has a SUTA tax liability must also pay surtax equal to 20% of the SUTA contribution liability. The revenue from the surtax is credited to the Employment Security Commission Reserve Fund. The revenue from the surtax may be used for various purposes. It has been used to pay the interest on the outstanding advance and to supplement federal grants from US Department of Labor (US DOL) for local Employment Security Commission offices.

Article 2 of Chapter 96 also contains the benefit system for UI. An employee with an attachment to the workforce, as evidenced by sufficient earnings and duration of employment in a 15-month base period, is entitled to some UI benefits if the employee loses a job through no fault on the part of the employee. The UI system imposes a two-year disqualification for UI benefits if the Division determines an individual lost a job for reasons of misconduct[34] and it imposes lesser periods of disqualification for an individual who lost a job for reasons of substantial fault.[35] The current UI program also allows benefits to employees who leave a job for certain causes unrelated to the job such as relocation of a spouse or health of a relative.

An individual who qualifies for UI benefits is eligible for a weekly benefit amount (WBA). The individual's eligibility is determined on a week-by-week basis. To receive a weekly benefit, an individual must be able to work, available to work, and actively seeking work. An individual who is determined to be ineligible for failure to meet one or more of these work search requirements does not receive a benefit for that week. However, the individual

[32] The average yearly insured wage = average weekly wage on August 1st divided by 52.
[33] Compared to the surrounding states of AL, FL, GA, KY, MS, SC, TN, and VA, North Carolina has the highest taxable wage base. The taxable wage base in most states is in the range of $8,000-$9,000. Data from Upjohn Institute.
[34] The two-year period may be reduced if the individual returns to work for at least five weeks, is paid cumulative wages of at least 10 times the individual's WBA, subsequently becomes unemployed through no fault, and meets the work search requirements.
[35] An individual found to be in substantial fault is disqualified for a period of nine weeks. The Division may increase or decrease this number of weeks based on aggravating or mitigating circumstances. An employer's account is not charged for benefits paid due to substantial fault.

remains eligible for benefits in the remaining weeks if the individual meets the requirements.

In addition to UI benefits for an employee who lost a job, an employee may collect UI benefits while remaining on an employer's payroll. An individual who is payroll attached is considered unemployed when the individual works less than the equivalent of three customary scheduled full-time days in the job in which the individual has payroll attachment as a regular employee. An individual who is payroll attached does not have to meet the work search requirements to be eligible to receive benefits. The individual must be able and available to return to work when recalled by the employer. Historically, attached claims account for approximately half of UI claims, although the percentage declined to 40-45% during the recent recession.

An individual's WBA is 50% of the high-quarter wages paid to the individual in the base period, not to exceed the maximum WBA. The maximum WBA is 66 2/3% of the average weekly insured wages. The Division calculates the maximum WBA on August 1st of each year. The maximum WBA for the period August 1, 2012, through July 31, 2013, is $535.

The number of weeks an individual may receive UI benefits is derived from a fraction of the individual's base period wages, with a minimum number of 13 weeks and a maximum number of 26 weeks. In addition to the regular benefit period, which is fully funded by SUTA revenue, the State may be entitled to 13 weeks of extended benefits if the unemployment rate in the State is higher than its two-year average. In some instances of very high unemployment the number of weeks of extended benefits may be as great as 20 weeks. Generally, the federal government pays 50% of the costs of providing extended benefits. During the Great Recession, the federal government fully funded the State's extended benefits. The federal funding for these benefits comes from direct appropriations, not from FUTA revenues. North Carolina triggered "off" extended benefits in May of 2012.

At times, including the recent Great Recession, Congress enacts temporary legislation providing additional weeks of Emergency Unemployment Compensation (EUC). At one point, EUC provided up to 53 weeks of additional benefits. Today, the number of weeks provided through EUC is up to 47. Congress recently extended the time for providing EUC from January 2, 2013, to January 1, 2014. A state does not have to participate in the EUC. To participate in the EUC, a state signs an agreement with the US DOL. A state may terminate the agreement with 30 days' written notice to US DOL. To participate in the current agreement, a state must not reduce the way it calculates benefits in such a way that the average weekly benefit would be less than the average weekly benefit provided by the state in June of 2010. In North Carolina today, an individual may be eligible for up to 73 weeks of benefits.[36]

SECTION-BY-SECTION BILL ANALYSIS: The policy changes to the UI program in House Bill 4 allow the State to accelerate the repayment of its $2.5 billion to the federal unemployment account by approximately three years. The accelerated repayment means the FUTA tax rate borne by NC employers would return to 0.6% in 2016 as opposed to 2019.

---

[36] 26 weeks of regular benefits, plus 47 weeks of EUC.

SECTION 1: FUND CHANGES

Substantively, section 1 restricts the use of revenue in the Employment Security Administration Reserve Fund (renamed the Unemployment Insurance Reserve Fund) to the payment of benefits, interest payment on federal advances used to pay benefits, and principal payment on federal advances used to pay benefits. Under current law, revenues in the fund may be used to fund local offices. Section 1 also caps the balance in the Fund on January 1 of any year to the greater of $50 million or the amount of interest paid the previous September on federal advances. Any amount in the Fund that exceeds this cap is transferred to the Unemployment Insurance Fund. The amount of interest paid in September 2012 on federal advances was $83.9 million.

Section 1 restricts the use of revenue in the Special Employment Security Administration Fund (renamed the Supplemental Employment Security Administration Fund). Under current law, revenues in the fund may be used for improvements to buildings, the enhancement of the work environment in buildings used by the Division of Employment Security, the acquisition of real estate, buildings, and equipment required for the expeditious handling of Division business, and the temporary stabilization of federal funds cash flow. The bill limits the use of money to the temporary stabilization of federal funds and to payment of costs determined by US DOL to be ineligible for payment from the Employment Security Administration Fund. The restrictions imposed by the bill on the use of money in this fund effectively limits the funds available to administer the State's UI program to the grant monies allocated to the State by US DOL.

Administratively, section 1 moves the definitions from Article 2 of Chapter 96 to Article 1 because the definitions apply throughout the Chapter. The bill puts the definitions in alphabetical order, it cross-references many definitions to their meaning under FUTA, and it removes definitions that are not needed. It renames the four funds used to administer the UI program to more clearly reflect their purpose and it removes antiquated and redundant language:

- Unemployment Insurance Fund. – The revenue for this fund consists of SUTA contributions and it is used to pay benefits. Contributions credited to the Unemployment Insurance Fund are transferred daily to the State's account in the Unemployment Trust Fund. The Trust Fund is held in the federal treasury. Money in the State's account is requisitioned by the State as needed to pay benefits. As the money is requisitioned, it is transferred to the State's Unemployment Insurance Fund to pay benefits. If the State's account in the Unemployment Trust Fund is not sufficient to meet the requisitioned amount needed to pay benefits, then the State receives an advance from the federal unemployment account.

- Unemployment Insurance Reserve Fund. – The revenue for this fund consists of surtax revenue and its use is limited by this bill to the payment of benefits and to payment of interest and principal on federal advances.

- Employment Security Administration Fund. – The revenue for this fund consists primarily of grant money allocated to the State from US DOL for the administration of the State's UI program.

- Supplemental Employment Security Administration Fund. – The revenue for this fund consists primarily of interest paid by employers on past due contributions and its use is limited by this bill to payment of costs determined by US DOL to be ineligible for payment from the Employment Security Administration Fund, temporary stabilization of federal funds cash flow, security for advances, and the repayment of an overpayment of interest previously credited to this fund.

SECTION 2: SUTA CONTRIBUTION AND SURTAX CHANGES RESERVE REQUIREMENTS FOR REIMBURSABLE EMPLOYERS

Substantively, Section 2 does the following:

- Replaces the current tax schedules with a formula.
- Increases the minimum and maximum SUTA contribution rates.
- Changes the trigger that suspends the collection of the surtax.
- Simplifies the reimbursement option for employers that are governmental and nonprofit organization by treating them uniformly. Uniformity means that all of them are required to maintain a reserve account equal to 1% of the taxable wages paid by them to their employees.

Section 2 repeals the current set of stepped tax schedules that determine an employer's SUTA contribution rate and replaces the schedules with an equation based on a reserve ratio. The change results in smoother movement between experience ratings and improves the responsiveness of the system. The contribution rate may change under the equation depending on the balance in the State's account in the federal Unemployment Trust Fund on August 1st. If the amount in the Trust Fund is less than or equal to 1% of the total wages reported by all insured employers in the State for the 12-month period ending on July 31st, then the contribution rate is 2.9% minus the employer's reserve ratio percentage (ERRP). The amount in the Trust Fund is currently less than 1% of total wages.

If the amount in the Trust Fund is greater than 1% of total insured wages but less than or equal to 1.25%, then the contribution rate is reduced to 2.4% minus the ERRP. If the amount in the Trust Fund is greater than 1.25% of total insured wages, then the contribution rate may decline to 1.9% minus the ERRP. The ERRP is the employer's reserve ratio based on the employer's experience rating. The bill does not change how an employer's experience rating is determined. The move from the stepped tax schedules to an equation may result in minor contribution changes for employers between the minimum and maximum contribution rates. The increase in contributions required from employers currently at the minimum and maximum contribution rates is attributable to the increase in the minimum and maximum rates.

Section 2 increases the minimum and maximum contribution rates; it does not change the standard beginning rate of 1%. It increases the minimum contribution rate from 0% to .06%. North Carolina is the only state with a 0% minimum tax rate. Approximately 20% of North Carolina's employers have no SUTA tax liability. Since the surtax is a percentage of SUTA liability, these employers do not have a surtax liability. Under the bill, these

employers will pay some SUTA tax and consequently the surtax.[37] The bill increases the maximum contribution rate from 5.7% to 5.76%. Approximately 10% of North Carolina employers pay SUTA at the maximum rate.

Section 2 changes the trigger for determining when the surtax must be collected. Under current law, the trigger is based upon how much is in the Employment Security Commission Reserve Fund (Reserve Fund). If the amount in the Reserve Fund equals or exceeds $163,349,000 on August 1st, the collection of the surtax is suspended for the succeeding calendar year. This dollar amount represented 1% of taxable wages in 1984.[38] The bill changes the trigger from an amount in the Reserve Fund to an amount in the State's account in the Unemployment Trust Fund: the surtax would be suspended when the amount in the Trust Fund equals or exceeds $1 billion.

Section 2 simplifies the provisions applicable to employers that must be given the option to reimburse the Unemployment Insurance Fund for benefits paid on their behalf as opposed to paying contributions.[39] Under current law, most nonprofit organizations and all Indian tribes and subsidiaries of an Indian tribe that make this election must maintain a reserve account equal to 1% of the taxable wages paid to its employees. The bill imposes this same 1% reserve requirement on governmental entities, as well as all nonprofit organizations.

For governmental entities, the change essentially ensures that the funds are available in the employer's account to pay unemployment benefits when the benefits are paid. The change represents a one-time cash flow expenditure for governmental entities because not only will these entities have to pay the full reimbursement cost of benefits paid to claimants in 2012 in January of 2014, they will also have to make advance payments for the four calendar quarters beginning with the quarter that begins July 1, 2013, to build the 1% reserve. The largest quarterly advance will likely be the one made for the first quarter of the calendar year, payable in April 2014. Thereafter, governmental entities will have an annual reconciliation to maintain the 1% balance in their reserve account. The Division will determine the amount necessary to maintain the appropriate reserve balance on August 1st of each year.

Most nonprofit organizations currently maintain a 1% balance in their reserve accounts. However, some are allowed to post a surety bond or have a line of credit in lieu of the 1% reserve. This change may represent a similar cash flow issue for these nonprofits. Currently, the bonds and lines of credit are allowed for two-year periods. Effective July 1, 2013, the bill prevents a nonprofit organization from submitting a line of credit or a surety bond to secure its reimbursing election. The bill does allow current lines of credit or surety bond contracts to expire in their normal course.

Administratively, Section 2 simplifies the statutes by adopting the relevant provisions of federal law. The bill does not change coverage of employers subject to the UI program.

---

[37] With a taxable wage base of $20,900, an employer's SUTA tax liability with a .06% rate would be $12.54 per employee and the surtax liability would be $2.51.
[38] The surtax last triggered on in 2005 and has been collected since then.
[39] FUTA requires states to give governmental and nonprofit employers a reimbursement option.

SECTION 3: ADMINISTRATION AND COLLECTION OF CONTRIBUTIONS

Substantively, Section 3 allows the Secretary of Commerce to compromise an employer's liability under the same limited circumstances that the Secretary of Revenue has to compromise a tax liability. When the Secretary compromises an employer's liability and the liability is at least $1,000, the Secretary must make a written statement that sets out the amount of the liability, the amount accepted under the compromise, a summary of the facts concerning the liability, and the findings on which the compromise is based.

Administratively, Section 3 consolidates the provisions concerning the administration and collection of contributions in one Article. It does not change the current law.

SECTION 4: ADMINISTRATION OF EMPLOYER ACCOUNTS

Substantively, Section 4 greatly reduces the number of reasons for which an employer may be relieved from having benefits charged against the employer's account. This change conforms to the benefit changes made in Section 5, and more fully explained in that section of the summary.

Section 4 also amends the penalty enacted last session that prohibits the release of charges when an overpayment is made to a claimant because the employer failed to respond timely to a request for information concerning the claim. To comply with federal law, a state must impose this penalty as part of its UI program, effective on or before October 21, 2013. The penalty applies to employers that have exhibited a pattern of failing to respond. Section 4 defines a "pattern of failing" by providing that a pattern cannot be found unless the employer failures during the year prior to the request is less than 2% of the total requests made to that employer. It also moves the effective date of this provision from October 1, 2013, to October 21, 2013, the date required by federal law.

Administratively, Section 4 consolidates the provisions concerning how and when contributions are credited to an employer's account and how and when benefit charges are credited against an employer's account. It also requires an employer with 25 or more employees to file the Quarterly Tax and Wage Report electronically. Under current law, the electronic filing requirement applies to an employer with 100 or more employees.

SECTION 5: PAYMENT OF BENEFITS

Substantively, Section 5 does the following:

- Requires a waiting week for each claim filed.
- Eliminates and modifies many of the reasons for which a claimant may qualify for benefits and changes the terms of the disqualification.
- Changes the calculation for how an individual's WBA is determined; reduces the maximum WBA to a statutorily set amount of $350; and changes the calculation for an individual's partial WBA.
- Reduces the maximum duration of regular UI benefits and limits the applicability of optional extended benefits.
- Redefines "suitable work".

- Places additional benefit limitations on company officers and spouses of company officers.

Waiting week.

To obtain benefits, an individual must file a valid claim for unemployment benefits and register for work. The bill requires an individual to wait a week for each claim filed before receiving a benefit. Under current law, the waiting week is limited to one per benefit year. A valid claim is one that meets certain employment and wage standards. The bill does not change those standards:

- An individual must have been paid wages in at least two quarters of the base period.
- An individual must have been wages totaling at least six times the average weekly insured wage during the base period, which is the first four of the last five completed calendar quarters. If the individual does not have sufficient base period wages, the alternative base period is the last four completed quarters.

Qualification changes.

For an individual that files a valid claim, the Division must determine whether the individual qualifies for benefits. Qualification for benefits is determined based on the reason for separation from employment. The bill makes the following qualification changes:

- Reduced work hours. – An individual may qualify for benefits if the individual's work hours have been reduced by more than 50% as part of a unilateral and permanent reduction of work hours. Under current law the reduction in work hours need only be 20%.[40]
- Disciplinary suspension. – An individual may qualify for benefits if the individual has been placed on disciplinary suspension for more than 30 consecutive days. Under current law the suspension need only be for 10 consecutive days. The issue becomes whether the reason for suspension is a disqualifying reason for benefits.
- Good cause.[41] – The bill eliminates all but two of the reasons for which an individual could voluntarily quit work and still qualify for UI benefits. Those two reasons are domestic violence and military spousal relocation.[42] The reasons eliminated include: bankruptcy; impending closure; spousal relocation; disability or other health concern, whether or not it is related to work; disability or health concern of minor child, aged or disabled parent, or disabled immediate family member; inability to accept work during a particular shift because of concerns related to child care, elder care, or care of a disabled family member.
- Substantial fault.[43] – The bill eliminates substantial fault. Under substantial fault, an individual may qualify for a reduced number of weeks of UI benefits if the reason for

[40] The bill does not change the 15% reduction of work pay as a reason for qualifying for benefits if the reduction is part of a unilateral and permanent reduction of work pay.
[41] Benefits not charged to employer's account.
[42] An individual that qualifies for benefits under this section would still need to meet the work search requirements to be eligible for a benefit.
[43] Benefits not charged to employer's account.

separation included fault on the part of the individual, but the fault did not rise to the level of misconduct. Under the bill, an individual would either qualify for benefits, or not qualify; there would be no qualifying for a reduced number of weeks of benefits.

In addition to the reasons given above for disqualification of benefits, an individual may be disqualified for leaving work without good cause attributable to the employer, for misconduct, or for failing to secure the necessary licenses, permit, bond, or surety required for the job. The length of the disqualification period may be two years, or it may be less. The current law gives the Division a lot of discretion in defining the length of the disqualification. The bill would remove this discretion. An individual would either qualify for the full duration of benefits, or not qualify for the benefits at all. And if an individual is disqualified for benefits, the disqualification only applies to that claim.

Weekly benefit amount.

The Division must determine the WBA and the duration of benefits a qualifying individual is entitled to receive. The bill makes the following changes in the calculation of the WBA:

- Changes the calculation of the WBA from 50% of the individual's high-quarter wages in the base period, not to exceed the maximum WBA, to 50% of the individual's average weekly wage in the last two quarters of the base period. [44] North Carolina's average weekly benefit (AWB) for 2011 was $291.[45] The Upjohn Institute report noted that wages for the two quarters immediately preceding unemployment were typically 66.4% of the high-quarter wages. Based on that assumption, this change is expected to reduce aggregate UI benefits by 33.6%. The actual number of claimants impacted is indeterminable; it would impact any individual whose quarterly wages are reduced in the two quarters preceding an unemployment claim.

- Sets the maximum WBA in statute at $350.[46] Currently, the Division calculates the maximum WBA annually based on 66 2/3% of the average weekly insured wages on August 1; the maximum WBA in the State today is $535.[47] An estimated 21.7% of weekly claims checks exceed $350; of those, approximately 17% are at the maximum amount. North Carolina's maximum WBA is 70% higher than the average of the following eight states compared in the Upjohn Institute report for 2011: AL ($265), FL ($275), GA ($330), KY ($415), MS ($235), SC ($326), TN ($275), and VA ($378).

- Changes the base for determination of the disregard for partial earnings from 10% of the individual's AWW in the high-quarter to 20% of the individual's WBA.

Duration of regular benefits.

---

[44] The methods states use to determine WBA vary greatly. At least half of the states use the high-quarter method. Other methods used include: multi-quarter, annual wage, average weekly wage formula.

[45] That amount was slightly higher than the AWB in the surrounding states of AL ($204), FL ($232), GA ($268), KY ($287), MS ($191), SC ($238), TN ($238), and VA.

[46] An individual annual wages would need to be $36,400 to qualify for a maximum benefit of $350.

[47] An individual's annual salary would need to be $55,640 to receive the maximum benefit of $535.

The duration of regular benefits in North Carolina ranges from 13 weeks to 26 weeks[48] depending upon the total benefit amount the individual is entitled to receive. The bill ties the duration of regular benefits to the seasonal adjusted statewide unemployment rate, as determined by the US DOL. The duration could change twice a year: January 1 and July 1. The bill also reduces the maximum number of weeks from 26 to 20.[49] Based on these two changes, the duration of benefits would vary as follows:

Seasonal adjusted UI rate	Minimum number of weeks	Maximum number of weeks
Less than or equal to 5.5%	5	12
Greater than 5.5% up to 6%	6	13
Greater than 6% up to 6.5%	7	14
Greater than 6.5% up to 7%	8	15
Greater than 7% up to 7.5%	9	16
Greater than 7.5% up to 8%	10	17
Greater than 8% up to 8.5%	11	18
Greater than 8.5% up to 9%	12	19
Greater than 9%	13	20

Weekly certification.

Once an individual qualifies for UI benefits, the individual must meet weekly work search eligibility requirements to receive the benefit. The individual must submit a certification each week attesting that the individual meets the work search requirements. If an individual does not meet the eligibility requirements, the individual is ineligible to receive a benefit until the reason for the ineligibility ceases to exist. The work search requirements are that the individual must be able to work, available to work, actively seeking work, and accepting suitable work. The Department of Commerce has made some administrative changes in this area, and the bill makes some statutory changes in it.

Last biennium[50] the General Assembly enacted legislation to place the Employment Security Commission as a division under the Department of Commerce. Through the merger process, the Division of Employment Security and the Division of Workforce Solutions have agreed in a Memorandum of Understanding (MOU) executed in November 2012 as to how each division will support the common goal of serving UI claimants who are in need of financial and job-seeking assistance. As part of that MOU, claimants will be encouraged to file UI claims remotely. The Division of Workforce Solutions will be the lead division that assists UI claimants with job search, retraining, and other support. As part of the re-employment goals, new UI claimants will be required to have an in-individual interview with someone from the Division of Workforce Solutions within the first four

[48] The average duration of regular UI benefits in December 2012 was 16.3 weeks. The exhaustion rate for North Carolina for the 3rd quarter of 2012 was 54.2%. The highest exhaustion rate was 63.9% in the 2nd quarter of 2010 and the lowest was 12.5% in the 1st quarter of 1989.

[49] Upjohn Institute reports that from 2006-2011, 43% of claimants exhausted their maximum eligibility of 26 weeks. During that time period, 43% of claimants would have been affected by a reduction in the number of weeks.

[50] SL 2011-145 and SL 2011-401.

weeks of receiving an initial UI benefit. The purpose of the individual visit is to verify the claimant's work search, schedule claimants to participate in an employability assistance process, and identify those claimants that need subsequent on site employability interviews. If an individual fails to come, the individual's UI benefit may be stopped.

The bill makes the following statutory changes in the work search requirements:

- It defines "suitable work" as any job paying 120% of the individual's WBA after the first 10 weeks of benefits.
- It eliminates the part-time suitable work exception. Under current law, if an individual is unemployed from a part-time job, the individual is not required to accept full-time employment.
- Under current law, an individual is considered to meet the work search requirements if the individual is in school. The bill restricts this provision by limiting it to enrollment in a training program approved by the Division, as required under FUTA.

Lastly, the bill places additional benefit restrictions on company officers and spouses of company officers. Under current law, an individual is disqualified from receiving benefits if the individual is self-employed and can reasonably return to work. Also, an individual or the individual's spouse is disqualified from receiving benefits if the individual is unemployed because the individual's ownership share of the employer was voluntarily sold and the individual held 5% or more of the outstanding shares of voting stock, or was a partner, or was the sole proprietor. Under the bill, a corporate officer that qualifies for benefits would be limited in the duration of benefits to six weeks.

Administratively, Section 5 consolidates the provisions concerning benefits in one Article. Except as otherwise noted in the summary, it does not intend to change the other provisions of current law.

SECTION 6: EXTENDED BENEFITS

Under federal law, a state must offer extended benefits during times of high unemployment in the state.[51] Extended benefits are typically funded 50% by the State and 50% by the federal government. Federal law sets one definition of high unemployment that a State must follow. It also provides optional definitions that may trigger extended benefits earlier than the mandatory definition. North Carolina's current law includes both the required trigger and the optional triggers.

The duration of extended benefits is typically equal to 50% of the total amount of regular benefits. By limiting the number of weeks of regular benefits, the bill indirectly reduces the number of extended benefits an individual may receive. Section 7 of the bill would also make one other change to the applicability of extended benefits in North Carolina by providing that the optional triggers would not "trigger on" unless the federal government has agreed to pay 100% of those extended benefits.

SECTION 7: ADMINISTRATION OF BENEFITS

Substantively, Section 7 does two things:

- It changes the administration of UI benefits by limiting the ability of employers to file attached claims on behalf of their employees.

[51] North Carolina "triggered off" extended benefits in May 2012.

- It authorizes the Division to collect fraudulent overpayments through attachment and garnishment.

Under current law, an employer may file a claim for an employee that it intends to keep on its payroll. That employee must be able to work for the employer and available to return to work for that employer whenever that employer calls the individual back to work. Otherwise, the employee does not have to meet the weekly certification requirements of engaging in work search efforts.

Historically, attached claims account for approximately half of UI claims, although the percentage declined to 40-45% during the recent recession. Although it is difficult to determine what employers file attached claims, it appears that those most likely to do are the employers engaged in manufacturing and construction. It also appears that a large amount of the current indebtedness can be attributed to employers who have reached the maximum contribution rate and that those employers may be largely related to manufacturing and construction. With the current limitations on the computer capabilities at the Division, a more accurate analysis is not available.

Some attached claims are filed for one or more weeks of unemployment. Under the regulations previously issued by the Employment Security Commission[52] an employer that files attached claims for one or more weeks must furnish the Division with a definite date when work will become available for the claimant. This period may not extend for more than six weeks unless the time period is extended by the local office.

Other attached claims are filed for days within a week. For example, an individual employed by a company that builds roads may file attached claims for employees when the weather outside prohibits work for less than three customary scheduled full-time days during the work week. This unemployment is known as partially unemployed. Under current law, an individual who is partially unemployed must serve one waiting week per benefit year. Under the bill, a claimant must serve a waiting week for each claim. That change effectively eliminates partially unemployed claims.

Under the bill, only certain employers will be allowed to file attached claims, and there are restrictions on how those claims are processed:

- Only employers that have a positive account balance would be allowed to file attached claims. If an employer that wished to file an attached claim had a negative account balance, the employer would have to make a voluntary contribution to the Unemployment Insurance Fund in an amount sufficient to bring its account balance to zero or better.
- An employer would have to immediately reimburse the Unemployment Insurance Fund for the full cost of UI benefits paid to the employee through the attached claim.
- An employer could only file an attached claim once a year for each employee, and the duration of the attached claim could not extend beyond six weeks.

Section 7 adds attachment and garnishment to the collection tools available to the Division to recover fraudulent overpayments. The Division requested this ability. A fraudulent overpayment is one that is made based on a finding that the claimant, or another individual

[52] Regulation 10.15 and 10.16.

acting in the claimant's behalf and with the claimant's knowledge, has knowingly made a false statement or representation or failed to disclose a material fact for the purpose of obtaining or increasing an unemployment benefit.
Administratively, Section 7 consolidates the provisions governing the administration of UI benefits in one Article.

SECTION 8: LOCAL OFFICES

The US DOL allocates grant money to the State to administer the UI program. Some of this grant money may be used to operate local offices. The State has historically appropriated money from the Employment Security Administration Reserve Fund to finance additional local offices. The amount appropriated in the past to fund local offices has been $19.5 million. North Carolina currently operates 90 local offices. By comparison, South Carolina operates 56 and Virginia operates 39. Section 1 of the bill restricts the use of the money in the Unemployment Insurance Reserve Fund so that continued appropriations may not be made from that fund to finance local offices. The restriction may result in the consolidation of local offices. Section 8 of the bill sets general parameters the Department of Commerce must consider as it determines the appropriate number and location of local offices.

SECTION 9: CONFORMING CHANGES

Section 9 makes conforming changes to other statutes.

SECTION 10: JOINT LEGISLATIVE OVERSIGHT COMMITTEE ON UNEMPLOYMENT INSURANCE

Section 10 establishes a Joint Legislative Oversight Committee on Unemployment Insurance. The Committee consists of eight members, four appointed by the Speaker of the House of Representatives and four appointed by the President Pro Tempore of the Senate. The Committee expires in 10 years. The Committee is authorized to do the following:

- Study the unemployment insurance laws and the administration of those laws.
- Review the State's unemployment insurance laws to determine which laws need clarification, technical amendment, repeal or other change to make the laws concise, intelligible, and easy to administer.
- Monitor the payment of the debt owed by the Unemployment Insurance Trust Fund to the federal unemployment account.
- Review and determine the adequacy of the balances in the Unemployment Trust Fund and the Unemployment Insurance Reserve Fund.
- Study the workforce development programs and reemployment assistance efforts of the Department of Commerce.

SECTION 12: EFFECTIVE DATE[53]

[53] The bill section numbers inadvertently omitted a Section 11.

The bill would become effective July 1, 2013. Changes made by the act to unemployment benefits apply to claims for benefits filed on or after July 1, 2013.[54] Changes made by the act to require an account balance by an employer that is a governmental entity or a nonprofit organization and that elects to finance benefits by making reimbursement payments in lieu of contributions apply to advance payments payable for calendar quarters beginning on or after July 1, 2013. Changes made by the act to the determination and application of the contribution rate apply to contributions payable for calendar quarters beginning on or after January 1, 2014.

IRC UPDATE.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-10	**HB 82**	**Representative Howard**

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE AND TO DECOUPLE FROM CERTAIN PROVISIONS OF THE FEDERAL AMERICAN TAXPAYER RELIEF ACT OF 2012.

SUMMARY: Session Law 2013-10 does the following:

- ***Updates from January 1, 2012, to January 2, 2013, the reference to the Internal Revenue Code used in determining certain State tax provisions, thereby incorporating and conforming to many of the provisions contained in the American Taxpayer Relief Act of 2012 (ATRA) [55] to the extent North Carolina law tracks those provisions, including:***
    - ***15-year depreciation schedule for leasehold, restaurant, and retail property***
    - ***Modified limitations on itemized deductions***
    - ***Student loan interest deduction***
    - ***Income exclusion for employer-provided educational assistance programs***
- ***Decouples from ATRA enhancements or extensions to the following provisions for the 2013 tax year:***
    - ***Bonus depreciation***

---

[54] Congress extended the Emergency Unemployment Compensation program (EUC) from January 2, 2013, to January 1, 2014, in the *American Taxpayer Relief Act of 2012.* The program provides claimants up to 47 additional weeks of benefits, financed by an appropriation from the federal government. A state's participation in the program is optional. North Carolina is currently a party to the agreement. The State can terminate the agreement with 30 days' notice. To participate in the agreement, a state cannot change the mathematical formula used to determine weekly benefit amounts in a manner that will result in the average WBA being less than the average WBA was in June 2010. The bill would violate this "non-reduction" rule, effective July 1, 2013.

[55]The federal legislation made many other changes that are not discussed in this Analysis because they either had no or minimal impact on North Carolina taxable income.

- ***Section 179 expensing (for both 2012 and 2013)***
  - ***Qualified tuition and expenses deduction***
  - ***Mortgage insurance premium as interest deduction***
  - ***Income exclusion for discharge of residence indebtedness***
  - ***Income exclusion for IRA distributions to charity by a person who has attained age 70.5.***

- ***Adjusts the following three tax credits that were enhanced by ATRA to achieve revenue neutrality:***
  - ***Work Opportunity credit***
  - ***Earned Income credit***
  - ***Adoption credit***

PRIOR LAW: North Carolina's tax law tracks many provisions of the federal Internal Revenue Code by reference to the Code.[56] The General Assembly determines each year whether to update its reference to the Code.[57] Updating the reference makes recent amendments to the Code applicable to the State to the extent that State law previously tracked federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made. Maintaining conformity with federal tax law simplifies tax reporting because a taxpayer will not need to account for differing federal and State treatment of the same asset. Prior to the passage of this legislation, the reference to the Code was January 1, 2012.

BACKGROUND: On January 2, 2013, the American Taxpayer Relief Act of 2012 (ATRA) was signed into law[58] and made substantial changes to the tax code. ATRA was intended to avert the anticipated "fiscal cliff" due to the sunset provisions scheduled to take effect in 2013 that would have ended the Bush-era tax cuts contained in the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA) and the Jobs and Growth Tax Relief Reconciliation Act of 2003 (JGTRRA), which were temporarily extended by the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010 (2010 Tax Relief Act).

ANALYSIS:

---

[56]North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[57]The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

[58] P.L. 112-240.

Update IRC Reference Date

Section 1 of the act updates the reference to the Code from January 1, 2012 to January 2, 2013, the date that ATRA became law. In doing so, North Carolina conforms to the following provisions:

- 2-year extension of the 15-year depreciation schedule for leasehold, restaurant, and retail property.[59]
- Permanent repeal of the limitation on itemized deductions for filers with incomes below $300,000 (MFJ) and application of the limitation for filers with incomes over $300,000.[60]
- Permanent increased phaseout ranges and elimination of the 60-month rule for the student loan interest deduction.[61]
- Permanent income exclusion for employer-provided educational assistance programs.[62]

Bonus Depreciation

Section 2 of the act does not conform to the one-year extension of the 50% bonus depreciation provision for property placed in service before January 1, 2014. The act

[59] If the provision had not been extended, this property would have been subject to a 39-year recovery period.

[60] Generally, taxpayers itemize deductions if their total deductions are more than the standard deduction amount. Since 1991, the amount of itemized deductions a taxpayer may claim has been reduced by 3% of the amount by which the taxpayer's AGI is above a certain amount. This limitation is known as the Pease limitation. EGTRRA repealed the Pease limitation on itemized deductions for 2010. The 2010 Tax Relief Act extended the repeal through 2012. ATRA permanently repeals the Pease limitation on incomes at or below $250,000 for individual filers and $300,000 for MFJ for tax years beginning after December 31, 2012. ATRA reinstates the limitations for individual filers over $250,000 and for MFJ with AGI over $300,000 beginning in 2013. The deduction phaseout will equal 3% of the taxpayer’s AGI over that threshold, although the total phaseout is capped at 80% of the total deductions claimed. If ATRA had not been enacted, the applicable threshold for 2013, as adjusted for inflation, would have been $178,150 for MFJ filers.

[61] Certain individuals who have paid interest on qualified education loans may claim an above-the-line deduction for interest expenses up to $2,500. Prior to 2001, this benefit was only allowed for 60 months and phased-out for taxpayers with income between $40,000 and $55,000 ($60,000 and $75,000 for joint filers). EGTRRA eliminated the 60-month rule and increased the income phase-out range from $40,000-$55,000 to $50,000-$65,000 ($100,000 and $130,000 for joint filers), with adjustments for inflation. ATRA permanently extends these changes for taxable years beginning after December 31, 2012.

[62] An employee may exclude from gross income up to $5,250 for income and employment tax purposes of employer-provided education assistance. Prior to 2001, this incentive was temporary and only applied to undergraduate courses. EGTRRA expanded this provision to graduate education. ATRA makes these changes permanent for taxable years beginning after December 31, 2012.

decouples in the same manner that has been done in the past. A taxpayer is required to add back 85% of the accelerated depreciation amount in the year it is claimed for federal purposes with a corresponding 20% deduction over the next five years. The taxpayer will be deducting the same amount of an asset's basis under State law as under federal law, it is just that the timing of the deduction differs. If North Carolina had conformed to this provision, the cost would have been approximately $140 million in FY 12-13 and $141 in FY 13-14.

Explained. – Businesses may depreciate the cost of a new asset[63] over a period of time, usually five to 15 years. Bonus depreciation allows a business to claim more of a deduction up front and spread the remainder out over the normal depreciation schedule.

Federal Background. – Since 2002, businesses have been authorized to take an additional depreciation deduction on depreciable property ranging from 30% to 100%, known as bonus depreciation. Most recently, the 2010 Tax Relief Act authorized 100% bonus depreciation for investments placed in service after September 8, 2010, and before January 1, 2012. It also provided 50% bonus depreciation for qualified property placed in service after December 31, 2012, and before January 1, 2013. ATRA extends the 50% bonus depreciation provision for one year.

North Carolina Background. – Since 2002 and through 2012, North Carolina has decoupled from the federal bonus depreciation provisions in the same manner as under this act.

Section 179 Expensing

Section 3 of the act does not conform to the enhanced **s**ection 179 expensing provision for 2012 or 2013. For tax year 2012, the deduction and investment limits are $250,000 and $800,000, respectively. For tax year 2013, the deduction and investment limits are $25,000 and $200,000, which is what the limits would have been at the federal level if ATRA had not been enacted.[64]

---

[63] One important difference between bonus depreciation and section 179 expensing is that bonus depreciation applies only to new equipment, while section 179 expensing may apply to new and used equipment.

[64] Drafting error has resulted in some confusion regarding this provision. Part of the error was not identified until after the conclusion of session and need to be corrected in the 2014 Session. The intended deduction and investment limits were supposed to be $125,000 and $500,000 for tax year 2012 and $25,000 and $200,000 for tax year 2013. These would have been the federal limits for those tax years if ATRA had not been enacted. However, S.L. 2013-10 mistakenly referred to the IRC as it existed on May 1, 2010, for purposes of determining the section 179 deduction and investment limits. As of May 1, 2010, the deduction and investment limits were $250,000 and $800,000. Since the act became law on March 13, 2013, in the middle of the 2012 filing season, the General Assembly could not retroactively change the provision with respect to the 2012 tax year. Therefore, the deduction and investment limits for tax year 2012 are $250,000 and $800,000 to the extent those were the federal limits as of May 1, 2010.

Each year, the General Assembly enacts legislation that makes technical, clarifying, and administrative changes to the tax laws. This year, those changes were enacted in S.L. 2013-

The act further provides that the property's basis will be the same for federal and State purposes and treats the difference in the same manner as State tax law has historically treated the bonus depreciation: A taxpayer must add back 85% of the additional expensing taken under federal law in 2012 and 2013 and then deduct 20% of this amount over the succeeding five years. Full conformity to the section 179 expense deduction would have been $38 million in FY 12-13 and $22 million in FY 13-14.

Explained. – Section 179 of the Code allows the expensing of the purchase price of some business assets[65] in the year of purchase rather than taking depreciation[66] throughout the life of the asset. In other words, expensing trades a smaller yearly deduction over time for a larger deduction in year one. Use of the allowance has two components: a deduction limit and a phaseout threshold. The deduction limit is the maximum amount of the deduction that the taxpayer may elect to take. The phaseout threshold is the maximum amount that can be spent on equipment before the deduction begins to be reduced. The deduction is reduced, dollar for dollar, by the amount that exceeds the threshold. Prior to 2010, section 179 was commonly thought to apply to small businesses because of its maximum deduction and investment limits.[67] However, the enhancements made by the Small Business Jobs Act of 2010 (2010 Jobs Act) were the most expansive ever enacted and those limits have been extended under ATRA.

Federal Background. – The 2010 Jobs Act increased the deduction limit for tax years 2010 and 2011 from $250,000 to $500,000 and increased the phaseout from $800,000 to $2 million. The 2010 Jobs Act also broadened the definition of qualified property to include qualified leasehold improvement property, qualified restaurant property, and qualified retail improvement property, and computer software. These enhancements were set to expire for the 2012 taxable year with the limits reverting to prior levels of $25,000 and $200,000.

The 2010 Tax Relief Act did not extend the types of property that qualify for the deduction beyond the 2011 taxable year, but it increased the limits for taxable year 2012 to $125,000, adjusted for inflation ($139,000) and $500,000. Under the 2010 Tax Relief Act, the deduction limits were set to revert to their prior levels of $25,000 and $200,000 in 2013.

414, and it was the logical vehicle to correct the section 179 provision. The Department of Revenue suggested putting the limits in the statute rather than referencing the Code so that the legislative intent would be clearer. Therefore, the act removed the May 1, 2010, date and replaced it with a listing of the limits for the respective tax years. Unfortunately, an additional error was made with regard to the 2013 tax year by stating $125,000 as the phase-out amount rather than the $200,000 figure as intended. The necessary clarification should be made next session.

[65] The business asset must be newly purchased tangible personal property that is used more than 50% for business purposes and is eligible to be depreciated under the Code. The newly purchased property may be new or used equipment.

[66] Generally, taxpayers take the Section 179 expensing deduction first and claim bonus depreciation on any remaining basis.

[67] Prior to the Emergency Economic Stabilization Act of 2008 (EESA), deduction limit was $125,000 with a phase-out beginning at $500,000.

ATRA increases the section 179 limitations for tax years 2012 and 2013 to the same limitations that applied to 2010 and 2011 and extends the qualified real property allowance through 2013. Qualified property generally consists of qualified leasehold property, restaurant property, and retail improvement property. Taxpayers can deduct up to $500,000 of section 179 property for tax years beginning in 2012 and 2013 with a $2 million phaseout. If ATRA had not been enacted, the federal limits under section 179 would have been $125,000 and $500,000 for 2012 and $25,000 and $200,000 for 2013.

The special rule allowing off-the-shelf computer software to be subject to section 179 expensing was scheduled to expire for software placed in service after 2012. ATRA extended the expensing of such software for another year. Thus, off-the-shelf software placed in service in 2013 is subject to the section 179 expensing election.

North Carolina Background. – Prior to 2010, North Carolina typically conformed to the enhanced section 179 expense deduction provisions. However, given the expansive nature of the enhancements made by the 2010 Jobs Act, North Carolina decoupled by maintaining the limits of $250,000 and $800,000 for taxable years 2010 and 2011. North Carolina conformed to the expanded definition of qualified property in 2011.

Work Opportunity Tax Credit

Section 4 of the act conforms to the extension of the work opportunity tax credit under ATRA, but it adjusts the North Carolina credit amount from 6% to 3% for the 2013 tax year to achieve revenue neutrality.

Explained. – The federal work opportunity tax credit is available to employers that hire individuals from the targeted groups listed below. The amount of the credit is generally 40% of the qualified worker's first-year wages up to $6,000.[68] The targeted groups are:

- Qualified individuals in families receiving certain government benefits, including Title IV-A social security benefits (aid for dependent children) or food stamps
- Qualified individuals who receive supplemental social security income or long-term family assistance
- Veterans who are members of families receiving food stamps, who have service-connected disabilities, or who are unemployed
- Designated community residents
- Vocational rehabilitation referrals certified to have physical or mental disabilities
- Qualified summer youth employees who live in empowerment zones, enterprise communities, or renewal communities
- Ex-felons hired no more than one year after the later of their conviction or release from prison

Federal Background. – The credit was scheduled to terminate in 2012 for wages paid to all targeted individuals, except for qualified veterans. The credit as it applies to wages paid

[68] $3,000 for summer youths and $12,000, $14,000, or $24,000 for qualified veterans, providing certain requirements are met. For long-term family aid recipients, the credit is equal to 40% of the first $10,000 in qualified first year wages and 50% of the first $10,000 of qualified second-year wages.

for qualified veterans was scheduled to terminate in 2013. ATRA extended the credit for all groups for two-years through 2013.

North Carolina Background. – North Carolina provides a State income tax credit to a taxpayer who is allowed a work opportunity tax credit under the Internal Revenue Code. The amount of the credit is equal to 6% of the amount of credit allowed under the Code.[69] The credit is set to expire January 1, 2014.

Deduction for Qualified Tuition and Related Expenses

Section 5 of the act conforms to the federal enhancements of the qualified tuition and expenses deduction for tax year 2012, but not for tax year 2013. For tax year 2013, a taxpayer will be required to add back the amount of the deduction taken at the federal level for purposes of determining North Carolina taxable income. If North Carolina had conformed to this provision, the cost would have been approximately $6 million in FY 13-14.

Explained. – Subject to income limitations, a taxpayer may take an above-the-line deduction for qualified education expenses paid during the year for the taxpayer or the taxpayer's spouse or dependents. Generally, any accredited public, nonprofit, or proprietary post-secondary institution is an eligible educational institution. The maximum deduction is $4,000 for an individual whose adjusted gross income for the tax year does not exceed $65,000 ($130,000 for MFJ filers), or $2,000 for other individuals whose adjusted gross income does not exceed $80,000 ($160,000 for MFJ filers).

Federal Background. – This deduction was established under EGTRRA and was scheduled to expire in 2006. It was subsequently extended through 2011. ATRA extends the deduction for two more years through 2013.

North Carolina Background. – North Carolina has previously conformed to this provision.

Section 5(b) disallows, for tax year 2013, the State deduction for taxpayers who opted to claim the Hope scholarship credit, the Lifetime Learning credit, or the American Opportunity tax credit in lieu of the federal deduction for tuition and fees.

At the federal level, a taxpayer may opt to claim one of the three above-named credits in lieu of the deduction for tuition and fees. A taxpayer who does so is eligible to claim a deduction on the North Carolina tax return for the tuition and fees deduction they forfeited on the federal return that they would have otherwise been entitled to claim had they not chosen to take one of the federal credits. By disallowing the State deduction, taxpayers are treated similarly regardless of whether they elected the federal credit or the federal deduction. Otherwise, a taxpayer who claims the federal deduction would get no State tax benefit (to the extent this act requires an addback for that deduction) while those who claim the federal credit would be entitled to the State tax deduction.

---

[69] The credit may be claimed against the franchise tax or the income tax. The taxpayer must elect the tax against which a credit will be claimed when filing the return; the election is binding. The credit allowed may not exceed 50% of the tax against which it is claimed. Any unused portion of the credit may be carried forward for five years.

Income Exclusion for Distributions from IRAs to Charity

Section 6 of the act does not conform to the extension of the income exclusion for a qualified charitable distribution from an individual retirement plan by a person who has attained the age of 70½ for tax year 2013. It requires a taxpayer to add back the amount excluded at the federal level for purposes of determining North Carolina taxable income. If North Carolina had conformed to this provision, the cost would have been approximately $3 million in FY 13-14.

> ***Explained.*** – Generally, a taxpayer must include in gross income distributions made from a traditional or Roth IRA account except to the extent they represent a return of nondeductible contributions or are rolled over into another qualified retirement plan.
> ***Federal Background.*** – Since 2006,[70] taxpayers age 70½ or older may contribute up to $100,000 from their IRA account to a charity tax-free. This income exclusion was set to expire for distributions made in tax years beginning after December 31, 2011. ATRA extends the availability of this exclusion for two years for distributions made in tax years beginning in 2012 and 2013.
> ***North Carolina Background***. – North Carolina has previously conformed to this provision.

Section 6(b) would allow a taxpayer age 70½ or older to take a charitable deduction for the donation of an IRA distribution to charity to the extent the taxpayer was required to add back the amount excluded from gross income at the federal level.

At the federal level, a taxpayer may not get a double benefit for donating an IRA distribution to charity by both excluding it from income and taking the charitable deduction. A taxpayer may elect one but not both. If a taxpayer elects to take the 170 charitable deduction at the federal level, the deduction would flow through for North Carolina purposes.[71] However, if a taxpayer elects the income exclusion, there would be no benefit at the State level because, under this act, a taxpayer is required to add that amount back. Therefore, this section allows the taxpayer to take a charitable deduction for that contribution.

Income Exclusion for Discharge of Qualified Principal Residence Indebtedness

Section 7 of the act does not conform to the extension of the income exclusion for the discharge of qualified principal residence indebtedness. It requires a taxpayer to add back the amount excluded at the federal level for purposes of determining North Carolina taxable income. If North Carolina had conformed to this provision, the cost would have been approximately $8 million in FY 13-14.

> ***Explained.*** – Taxpayers are generally required to recognize income from the discharge of indebtedness. An exception from this rule is for the discharge of qualified principal residence indebtedness, which has been excludible from gross income on a temporary

---

[70] This exclusion was originally authorized by the Pension Protection Act of 2006. The law was extended through 2009 by the Emergency Economic Stabilization Act of 2008, and through 2011, by the 2010 Tax Relief Act.
[71] Nonitemizers may take the credit under G.S. 105-151.26.

basis since 2007.[72] The exclusion is limited to $2 million, and applies to indebtedness incurred in the acquisition, construction, or substantial improvement of a principal residence and secured by the residence.

Federal Background. – This exclusion was scheduled to expire for debt discharged after December 31, 2012, but was extended for one year under ATRA.

North Carolina Background. – North Carolina has previously conformed to this provision.

Deduction for Mortgage Insurance Premiums as Interest

Section 8 of the act conforms to the extension of the deduction for mortgage insurance premiums as interest for tax year 2012, but not for tax year 2013. Therefore, taxpayers are required to add back the amount they took as a deduction at the federal level for purposes of determining North Carolina taxable income. If North Carolina had conformed to this provision, the cost would have been approximately $6 million in FY 13-14.

Explained. – Generally, taxpayers may not deduct any interest paid or accrued during the tax year that is considered personal interest. This restriction does not apply to certain types of interest, including qualified residence interest. Qualified residence interest includes interest on home acquisition indebtedness of up to $1 million and interest on home equity indebtedness of up to $100,000. In the case of a home acquisition loan, an individual who cannot pay the entire down payment amount may be required to purchase mortgage insurance.

Federal Background. –Since 2006, premiums paid for qualified mortgage insurance in connection with acquisition indebtedness for a qualified residence are treated as qualified residence interest and are deductible.[73] The treatment of qualified mortgage insurance as qualified residence interest was set to expire for amounts paid or accrued after December 31, 2011. ATRA extends the availability of the deduction for two years through 2013.

North Carolina Background. – North Carolina has previously conformed to this provision.

Earned Income Tax Credit

Section 9 of the act conforms to changes made under ATRA to the earned income tax credit, but it adjusts the North Carolina credit amount from 5% to 4.5% for the 2013 tax year to achieve revenue neutrality.

Explained. – The EITC is a refundable tax credit for working low to moderate income families that varies depending on the number of the taxpayer's qualifying children.

Federal Background. –EGTRRA made a number of changes to simplify the credit and to reduce the marriage penalty experienced by married taxpayers claiming the credit. The American Recovery and Reinvestment Act of 2009 (ARRA) increased the credit amount from 40% to 45% of a family's first $12,570 of earned income for families with

---

[72] This exclusion was originally authorized in the Mortgage Debt Relief Act of 2007.

[73] The deduction is subject to a phaseout. For every $1,000, or fraction thereof, by which the taxpayer's AGI exceeds $100,000, the amount of mortgage insurance premiums treated as interest is reduced by 10%.

three or more children and the beginning point of the phase-out range for married coupled filing a joint return by $1,880. The enhancements were set to expire for the 2011 taxable year. The 2010 Tax Relief Act extended the enhancements through the 2011 and 2012 taxable years. ATRA extends for five additional years, through 2017, the expansions that increased the EITC for families with three or more children and increased the phase-out range for all married couples filing a joint return.

North Carolina Background. – North Carolina provides a State income tax credit to a taxpayer who is eligible for the federal EITC. The amount of the credit is equal to 5% of the amount of credit allowed under the Code. The credit is set to expire January 1, 2014. North Carolina conformed to the EGTRRA enhancements to the federal credit in 2001 and to the extension of those enhancements under the 2010 Tax Relief Act.

Adoption Credit

Section 10 of the act conforms to changes made under ATRA to the adoption credit, but it adjusts the North Carolina credit amount from 50% to 30% for the 2013 tax year to achieve revenue neutrality.

Explained. – Taxpayers who adopt children can receive a tax credit for adoption expenses. Qualified adoption expenses include adoption fees, court costs, attorney fees, and other expenses related directly to the legal adoption of an eligible child. A taxpayer may also exclude from income adoption expenses paid by an employer.

Federal Background. –EGTRRA increased the credit from $5,000[74] to $10,000, and provided a $10,000 income exclusion for employer-assistance programs. The Patient Protection and Affordable Care Act of 2010 extended these benefits to 2011 and made the credit refundable. The 2010 Tax Relief Act extended the enhancements made by EGTRRA for one year. ATRA made permanent the increased adoption credit amount and the exclusion for employer-assistance programs as enacted in EGTRRA. Therefore, the adoption credit and income exclusion maximum amounts are $10,000, adjusted for inflation, with an income phase-out range between $150,000 and $190,000, adjusted for inflation

North Carolina Background. – North Carolina provides a State income tax credit to a taxpayer who is eligible for the federal adoption credit. The amount of the credit is equal to 50% of the amount of credit allowed under the Code. The credit is set to expire January 1, 2014. North Carolina conformed to the EGTRRA enhancements to the federal credit in 2001 and to the extension of those enhancements under the 2010 Tax Relief Act.

[74] $6,000 for a special needs child.

PROPERTY TAX/DEANNEXATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-19	**SB 97**	**Senator Goolsby**

AN ACT TO REQUIRE RELEASE OF PROPERTY TAXES IN ANY AREA THAT WAS PART OF A MUNICIPALITY FOR SIX MONTHS OR LESS AND THEN DEANNEXED.

SUMMARY: S.L. 2013-19 authorizes the governing body of a municipality to release property tax if the property was within the corporate limits for less than six months and if the municipality has not sent notice of the property tax. S.L. 2013-19 is effective when it becomes law and expires July 1, 2016.

CURRENT LAW: Property taxes are levied on a fiscal year basis with each fiscal year beginning on July 1 and ending the following June 30. Property added through annexation is subject to prorated property taxes as provided in G.S. 160A-58.10.

G.S. 105-380 prohibits the governing body of any taxing unit from releasing, refunding, or compromising any property taxes within its jurisdiction.

BILL ANALYSIS: S.L. 2013-19 authorizes the governing body of a municipality to release property tax if the property was within the corporate limits for less than six months and if the municipality has not sent notice of the tax.

BACKGROUND: In May 2009, the City of Wilmington voted to annex an area commonly known as "Monkey Junction." Originally scheduled to be annexed in June 2010, the effective date of the annexation was delayed due to litigation and did not become effective until January 1, 2012. S.L. 2012-3, effective July 1, 2012, deannexed the Monkey Junction area.

Under current law, the area annexed on January 1, 2012, and deannexed July 1, 2012, would be subject to prorated property tax for the tax year that began on July 1, 2011.

The City of Wilmington indicated that notice of the tax for Monkey Junction has not been sent, and no taxes have been collected from the area.

EFFECTIVE DATE: S.L. 2013-19 is effective when it becomes law and expires July 1, 2016.

ECONOMIC DEVELOPMENT JOBSITES PROGRAM.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-130	**HB 439**	**Rep. Howard, Moffitt, Murry, Tine**

AN ACT TO CREATE AN INFRASTRUCTURE PROPERTY TAX DEFERRAL PROGRAM.

SUMMARY: Session Law 2013-130 creates a property tax deferral program to defer a portion of taxes on a parcel of property if the parcel (i) is at least 100 contiguous acres, (ii) is zoned for industrial and/or office use, (iii) does not have a building permit for a primary building or structure issued for it, and (iv) is classified under the present use

value (PUV) property tax deferral program or was classified under the PUV program within the previous six months. The portion of taxes to be deferred is the sum of the value of any improvements on the site and the difference between the true value of the site and the value of the site treated as agricultural land in the present-use value program.

PRIOR LAW: North Carolina previously had seven property tax deferral programs: (i) historic district property held as a future site of historic structures, (ii) the circuit breaker tax deferral program, (iii) nonprofit property held as a future site of low or moderate income housing, (iv) PUV property, (v) working waterfront property, (vi) historic property, and (vii) the inventory deferral program. Uniform tax provisions for all deferral programs include the following:

- Taxes that are deferred under one of these programs become a lien on the property, which is extinguished when the taxes are paid.
- The deferred taxes are due and payable on the day the property loses its eligibility for deferral as a result of a disqualifying event.
- Interest accrues during the deferral period as of the date the taxes would have originally become due without the deferral program.
- Upon disqualification, the tax for a year in which a disqualifying event occurs is computed without the benefit of the deferral program.

BILL ANALYSIS: This act creates an eighth property tax deferral program for sites with potential to be developed for office or industrial applications in order to encourage horizontal improvement so as to make the sites more readily adapted to those uses in a shorter timeframe. In order to qualify, the site must be zoned for office and/or industrial use, must consist of at least 100 acres, may not have a building permit for a primary building or structure issued for it, and must be currently enrolled in or have been enrolled within the previous six months in the PUV program. The amount of property tax liability that can be deferred is the portion of tax that represents the increase in the property value resulting from any existing horizontal improvement plus the difference between the property valued at its true value and the property valued as agricultural land in the present use value system.

The deferred taxes are carried forward in the records of the county and, if applicable, the city in which the property is located until the occurrence of a disqualifying event. A disqualifying event causes the current years' tax liability (without benefit of the program) and some previous years' deferred tax liability to be due and payable as follows:

- If, within five years of classification, an amount equal to the deferred taxes is not invested in improvements to make the land suitable for office and/or industrial use ("minimum investment"), the deferred taxes for the preceding five years are due and payable.
- If the minimum investment is made but the property is classified for 10 years in the program, the deferred taxes for the preceding five years are due and payable.
- If some or all of the land is rezoned for a use other than office and/or industrial use, all deferred taxes are due and payable.

- If land is transferred or a building permit issues for the land, the deferred taxes (for only that portion transferred or to which the permit applies) for the preceding year are due and payable. The remaining parcel continues to receive treatment under this classification, even if it no longer meets the size requirement.

The tax collector must annually notify the owner of the accumulated sum of deferred taxes and interest. The owner must notify the county assessor if the land loses eligibility for the program, or the owner will be subject to a penalty of 10% of the total amount of deferred taxes and interest. The uniform provisions for deferral programs apply to this tax deferral program. Annual applications should be filed within the regular listing period and may be filed later if the board of equalization and review determines there is good cause for the lack of timely filing.

Deferred taxes are not triggered if land enrolled in the program is eligible and is transitioned back into a PUV program. The Secretary must annually report the number and location of lands enrolled in the program to the Department of Commerce, and the Department of Commerce must include that information in an annual publication.

EFFECTIVE DATE: This act became effective for taxes imposed for taxable years beginning on or after July 1, 2013.

AMEND DEFINITION OF SPECIAL PURPOSE PROJECT.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-135	**HB 629**	**Rep. Martin, R. Brawley, Lewis**

AN ACT TO AMEND THE DEFINITION OF A SPECIAL PURPOSE PROJECT TO INCLUDE AGRICULTURAL AND FORESTRY WASTE DISPOSAL FACILITIES.

SUMMARY: S.L. 2013-135 amends the definition of a special purpose project to include agricultural and forestry waste disposal facilities.

CURRENT LAW: A "special purpose project" is defined as any structure, equipment, or other facility for any one or more of the following purposes: water systems or facilities; sewage disposal systems; public transportation systems; public parking lots; public auditoriums; recreational facilities, including museums; rehabilitation facilities; orphanages; or land, equipment, and facilities for the disposal, treatment, or recycling of certain solid waste, etc.

The Local Government Commission may approve the issuance of bonds for special purpose projects under the Industrial and Pollution Control Facilities Financing Act. The governing body of the county in which the special purpose project is located must notice and conduct a public hearing and approve in principle the issuance of bonds beforehand.

The Industrial and Pollution Control Facilities Financing Act authorizes the issuance of tax-exempt industrial development and pollution control bonds. Under this Act, a local political subdivision issues bonds, the proceeds of which are used to finance the acquisition and construction of industrial, pollution control, or other capital facilities to be used by a

private company. The bonds are secured by and are sold exclusively on the basis of the company's obligation to make payments under a financing agreement entered into between the company and the political subdivision. Because the interest on the bonds is exempt from North Carolina and federal income taxes, the interest payments (made indirectly by the private company) are considerably lower than would be required in an ordinary taxable financing. The type and size of facilities that may be financed by industrial development and pollution control bonds are limited by both federal and state law.

BILL ANALYSIS: This act amends the definition of "special purpose project" to include land, equipment, and facilities for the disposal, treatment or recycling of solid waste, forestry waste, agricultural waste, or other waste including any residual material which is the byproduct or excess raw material remaining after the completion of any commercial, consumer, governmental, agricultural, or industrial production process. Included within this purpose are facilities for the handling and transport of products resulting from treatment and recycling.

BACKGROUND: Currently there are two waste wood facilities planned for North Carolina that will export wood pellets to a major English power plant. The first plant will be located in Wilson County with construction to begin this summer. The second plant is slated to be built near Gulf in Chatham County.

EFFECTIVE DATE: This act became effective June 19, 2013.

TAXPAYER DEBT INFORMATION ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-200	**HB 248**	**Rep. Conrad, Fulghum, Cleveland, Blust**

AN ACT TO REQUIRE DISCLOSURE ON THE BALLOT THAT AUTHORIZATION OF INDEBTEDNESS INCLUDES INTEREST AND THAT TAXES MAY BE LEVIED TO REPAY THE INDEBTEDNESS.

SUMMARY: S.L. 2013-200 makes the estimation of interest on a proposed bond issuance of voted debt by a local government part of the LGC review process and requires the ballot question for the authorization of bonds to state that the authorization includes interest and that additional taxes may be levied to repay the debt.

The act became effective September 1, 2013.

CURRENT LAW: Article 4 of Chapter 159 of the General Statutes (Local Government Bond Act) governs the ability of units of local government to borrow money secured by a pledge of the taxing power. When a local government proposes to issue bonds that must be approved by a vote of the people,[75] it must publish a notice of intent to apply to the Local Government

[75] Bonds issued for the following purposes do not require voter approval: (1) to suppress riots, insurrections, or any extraordinary breach of law and order; (2) to supply an

Commission (LGC) for approval. After considering an application, the LGC enters an order either approving or denying the application after considering several factors. The LGC must approve the application if it determines the following:

- **The proposed bond issue is necessary or expedient.**
- **The proposed amount is adequate for the proposed purpose.**
- **The unit's debt management procedures are good, or that reasonable assurances have been given that its debt will be managed in strict compliance with the law.**
- **The increase in taxes, if necessary to service the proposed debt will not be excessive.**
- **The proposed bonds can be marketed at reasonable rates of interest.**

Upon approval, the local government must hold a public hearing, followed by a bond referendum. Bonds may be issued under a bond order at any time within seven years after the order takes effect and up to 10 years with LGC approval. Any action contesting the validity of a bond referendum must begin within 30 days after the publication of the results. After this time period, no right of action may be brought. Chapter 142 governs the issuance of State debt.

BILL ANALYSIS:

***Statement of Estimated Interest.* – After or at the same time the application is filed, a bond order must be introduced before the governing board of the local government. Once introduced, the board must schedule a public hearing.**

Section 1 of the act requires that, after the bond order has been introduced but before the public hearing, the finance officer of the local government unit file a statement with the clerk and the LGC indicating the estimated total amount of interest that will be paid on the bonds over the expected term of the bonds and a summary of the assumptions upon which the estimate is based. It must also include a statement to the effect that the estimate is preliminary, that there is no assurance that the assumptions upon which the estimate is based will occur, and that the actual circumstances at the time the bonds are issued from the assumptions could result in significant differences between the estimated interest and the actual interest. Section 1 also provides that the validity of the bonds is not subject to challenge on the grounds that the actual interest when issued is different than the amount set forth in the statement.

---

unforeseen deficiency in the revenue when taxes actually received or collected during the fiscal year fall below collection estimates made in the annual budget ordinance; (3) to meet emergencies threatening the public health or safety, as conclusively determined in writing by the Governor; (4) to refund outstanding general obligation bonds or general obligation bond anticipation notes; (5) bonds as described in G.S. 159-49(2). There are also certain other purposes for which no vote is required to the extent of two-thirds of the amount by which the outstanding indebtedness of the issuing county, county water and sewer district, metro water district, or city was reduced in the preceding fiscal year.

Publication of Bond Order. – The bond order must be published after it has been introduced and again after it has been approved. Upon publication after introduction, it must include a statement describing the amount of the proposed bonds, indicating that a tax may be levied to pay the principal and interest on the bonds, and announcing when the public hearing will be held. Upon publication after adoption, it must include a statement that any action challenging the validity of the order must commence within 30 days after the date of publication of the notice.

Sections 2 and 3 of the act add similar language to each of the statutes related to the publication of the bond order. They would require inclusion of a statement in the order that the finance officer has filed a statement of estimated interest and indicating what the estimated amount is. The changes would permit a summary of the assumptions to be included in the publication and would include disclaimer language to the effect that the estimated amount of interest is preliminary, is for general informational purposes only, and that the validity of the bonds may not be challenged on the basis of the actual interest being different than the estimated interest once the bonds are issued.

Ballot Question. **– Under current law, the form of the question on the ballot for a local bond order is as follows:**

"Shall the order authorizing $ _______ bonds for (briefly stating the purpose) be approved?

[ ] YES

[ ] NO"

Section 4 of the act requires that the ballot question also indicate that the approval includes the application of interest to the principal debt amount authorized, but would not state a specific amount of estimated interest. The ballot would also include a statement that additional taxes may be levied in an amount necessary to pay the principal and interest on the bonds.

EFFECTIVE DATE: This act became effective September 1, 2013, and applies to bonds proposed on or after that date.

EXCLUDE CUSTOM SOFTWARE FROM PROPERTY TAX.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-259	**SB 490**	**Sen. Gunn, Barefoot, Walters**

AN ACT TO EXCLUDE CUSTOM SOFTWARE FROM PROPERTY TAX.

SUMMARY: S.L. 2013-259 excludes custom computer software from local property tax. Embedded software and the prewritten portion of capitalized, third-party software remain subject to local property tax.

CURRENT LAW: The only forms of intangible personal property subject to local property tax are leasehold interests in exempt real property (G.S. 105-275(31)) and certain computer software (G.S. 105-275(40)).

Under G.S. 105-275(40), computer software and documentation related to the software is excluded from local property tax except the exclusion does not apply to:

- **Embedded software or microcode –** Computer instructions that reside permanently in the internal memory of a computer system and are not intended to be removed without terminating the operation of the computer system and removing a physical part.
- **Capitalized, third-party software** – Computer software that is purchased or licensed from a unrelated person and that is capitalized by the taxpayer under generally accepted accounting principles (GAAP). A person is unrelated to a taxpayer if (1) the taxpayer and the person are not subject to any direct or indirect common ownership and (2) the taxpayer and the person do not have any direct or indirect ownership interest in the other.

BILL ANALYSIS: S.L. 2013-259 narrows the definition of computer software subject to local property tax. The capitalized, third-party software currently subject to local property tax would be limited to software that was not customized through development or modification to meet the customer's specified needs. S.L. 2013-259 excludes customized software from local property tax regardless of who customized the software (i.e., internally by the taxpayer or externally by a third party).

S.L. 2013-259 leaves embedded software subject to local property tax. S.L. 2013-259 only subjects the prewritten portion of capitalized, third-party software to local property tax. S.L. 2013-259 also prohibits State courts from using the law change to interpret any statute in pending litigation.

BACKGROUND: On July 21, 2011, the NC Department of Revenue issued a memorandum to county tax assessors explaining the taxability of modifications to computer software. The Department of Revenue concluded that modifications to taxable software are taxable and modifications to excluded software are excluded. The Department of Revenue's position is based on the interpretation that software, including any modifications, is either taxable or excluded and that property is not subdivided into parts to determine taxability.

The Department of Revenue's memorandum addresses only modifications to software. S.L. 2013-259 addresses both modifications to software and the taxability of customized software that would be taxed as capitalized, third-party software.

EFFECTIVE DATE: S.L. 2013-259 is effective for taxes imposed for taxable years beginning on or after July 1, 2014.

TAX SIMPLIFICATION AND REDUCTION ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-316	**HB 998**	**Rep. Lewis, Setzer, Moffitt, Szoka**

AN ACT TO SIMPLIFY THE NORTH CAROLINA TAX STRUCTURE AND TO REDUCE INDIVIDUAL AND BUSINESS TAX RATES.

SUMMARY: S.L. 2013-316 repeals the estate tax and reduces individual and business tax rates. To help offset the revenue loss from rate reductions applicable to all taxpayers, the act eliminates some tax expenditures and expands the sales tax base. The act makes the following changes to the State's tax structure:

- *Eliminates the estate tax for decedents dying on or after January 1, 2013.*
- *Replaces the individual marginal tax brackets with a flat rate. The rate is 5.8% for taxable year 2014 and 5.75% for taxable years thereafter. The act retains the 100% deduction for social security income, enhances the current child credit, increases the standard deduction, and retains the deduction for charitable giving. It eliminates the personal exemption, caps the mortgage interest expense deduction, and repeals many other deductions and credits.*
- *Reduces the corporate income tax rate to 6% for taxable year 2014, 5% for taxable year 2015, and possibly 3% or 4% in the years thereafter if General Fund revenues equal or exceed an established trigger amount of $20.2 billion in fiscal year 2014-15 or $20.975 billion in fiscal year 2015-16.*
- *Eliminates several sales tax exemptions and preferential tax rates, effective January 1, 2014, and July 1, 2014.*
- *Replaces the franchise tax on electricity and the excise tax on piped natural gas with a sales and use tax at the State combined general rate on the gross receipts derived from sales of electricity and piped natural gas, effective July 1, 2014.*[76]
- *Replaces the gross receipts privilege tax on amusements and taxes amusements with a sales tax on admission charges to an entertainment event at the applicable State and local sales tax rate, effective January 1, 2014.*
- *Expands the sales tax to include the sales price of service contracts, effective January 1, 2014.*
- *Establishes an annual gross income tax requirement of $10,000*[77] *from farming operations to qualify for the sales tax exemptions for farmers, effective July 1, 2014.*
- *Caps the annual sales tax refund amount a single nonprofit may receive at a State and local combined amount of $45 million, effective July 1, 2014.*

[76] See S.L. 2014-39; it phases-in the sales tax on sales of piped natural gas by the eight gas cities and on sales of electricity by the Cape Hatteras EMC over two years.
[77] See S.L. 2014-3; it allows a three-year income averaging of income and provides a conditional exemption certificate for new farmers.

- *Extends the sunset date applicable to sales tax refunds for passenger air carriers and motorsports for two years, from January 1, 2014, to January 1, 2016.*
- *Caps the motor fuel excise tax at 37.5 cents per gallon for the period September 1, 2013, through July 1, 2014.*
- *Directs the Revenue Laws Study Committee to study various tax policy issues.*

CURRENT LAW AND BILL ANALYSIS: S.L. 2013-316 reduces individual and corporate income tax rates, eliminates many tax expenditures, equalizes the tax treatment of utility services, and expands the sales tax base to include amusements and service contracts. The changes reduce revenues by $86.6 million in fiscal year 2013-14 and reduce the growth of revenues by 27% over five years. The projected revenue in fiscal year 2017-18 without these changes is $24,267.2 billion; the projected revenue in fiscal year 2017-18 with the changes made by this act is $23,617.3 billion.

PART I. INDIVIDUAL INCOME TAX CHANGES

This Part simplifies the calculation and administration of the individual income tax laws. It significantly broadens the base and lowers the rate. Currently, there are three tax brackets with rates of 6%, 7%, and 7.75%. Under the act, there is a flat 5.8% tax rate on taxable income for taxable year 2014 and a 5.75% tax rate for taxable years thereafter.[78] It broadens the base by eliminating most of the credits and deductions allowed under current law. It does not change the taxability of social security income. It increases the standard deduction amounts and eliminates the personal exemptions. It enhances the child credit, retains the itemized deduction for charitable giving, and caps the itemized deduction for mortgage expense and property taxes paid on real estate.

Bill Section	Brief Description
Section 1.1(a)	This Part reorganizes the individual income tax Article. In so doing, this subsection recodifies several of the administrative statutes: short title, purpose, definitions, definition of taxable income, credit for income taxes paid to another state (to prevent double taxation), credit for children, and income tax returns.
Section 1.1(b)	• Repeals obsolete statutes: 105-134.7, transitional adjustments from 1989 tax law changes; 105-134.8, a hold-over re: inventories from the pre-1989 tax law; and 105-151.20, a tax credit for federal retirees for taxes paid on income for years 1985-1988. The repeal is effective for taxable years beginning on or after January 1, 2014.

[78] The highest marginal tax rates in the surrounding states are as follows: GA, 6%; SC, 7%; TN, 0%; VA, 5.75%.

	• Repeals statutes whose contents are incorporated into other newly created statutes: 105-134.2, income tax imposed and 105-134.3, year of assessment.
	• Replaces 105-134.6, adjustments to AGI, with 105-153.5. Many of the adjustments allowed under 105-134.6 are not continued under 105-153.5 and are thus repealed, effective for taxable years beginning on or after January 1, 2014:
	  o Deduction for various itemized deductions allowed under federal law such as the medical expense deduction.
	  o Additional standard deduction amount allowed for the aged or blind.
	  o Deduction of up to $4,000 allowed for income received from one or more state, local, or federal government retirement plans.
	  o Deduction of up to $2,500 allowed for income received from a retirement plan other than a governmental retirement plan.
	  o Deduction of up to $35,000 allowed for severance wages.[79]
	  o Deduction for the amount paid to a taxpayer as compensation for pecuniary loss suffered by reason of erroneous conviction and imprisonment.
	  o Deduction for payments received from Disaster Relief Fund.[80]
	  o Deduction equal to 5% of the gross purchase price of a qualified sale of a manufactured home community.[81]
	  o Deduction not to exceed $50,000 of net business income.[82]

[79] Unemployment benefits are subject to income tax, and will continue to be subject to income tax.

[80] Under the Code, most payments received for disaster relief would be deductible as an itemized deduction; payments for lost income are not deductible under the Code. State law provided that in addition to the itemized deductions allowed, a deduction would be allowed for payments for lost income. Under the act, none of the payments would be deductible.

[81] S.L. 2008-107. The deduction was scheduled to sunset for taxable years beginning on or after January 1, 2015.

[82] S.L. 2011-145.

	o Adjustment for federal estate tax that is attributable to an item of income in respect of a decedent.[83] o Deductions for amounts contributed to a NC 529 college savings plan.[84] o Deduction of $250 for an unpaid member of a volunteer fire department or volunteer recue or emergency medical services squad. o Deductions for interest and investment income earned on a trust under the Tobacco Settlement Agreement.[85] This deduction is obsolete. o Deduction for payments received from Hurricane Floyd Reserve Fund. This fund no longer exists. This deduction is obsolete. o Addition for amounts allowed as a deduction under the Code by a separate tax. This deduction is obsolete. [86] • Repeals the following tax credits that do not have a sunset and that are only applicable to individual income tax: 105-151.11, child care credit; 105-151.18, credit for the disabled; 105-151.21, credit for taxes paid on farm machinery; 105-151.26, credit for charitable contributions made by non-itemizers, and 105-151.33, credit for education expenses.[87] The repeal is effective for taxable years beginning on or after January 1, 2014. • Repeals the following tax credits that do not have a sunset and are applicable to both individual and corporate income tax: 105-151.1, credit for construction of dwelling units for handicapped persons; 105-151.12, credit for real property donations; 105-151.13, credit for conservation tillage equipment; 105-151.14, credit for gleaned crops; and 105-151.25, credit for construction of

[83] Removing the adjustment simplifies the tax code. Its purpose is to avoid double taxation by both the decedent's estate and the beneficiary. Its scope is small.
[84] The interest earned on the plan continues to be exempt for federal and state tax purposes. The deduction only applied to amounts contributed to a NC 529 college savings plan, not to amounts contributed to any other college savings plan.
[85] Entity for which this deduction enacted chose to organize as a C-corporation. Therefore the deduction in the individual income tax law is not used or needed. The provision was part of an agreement for the Fund to reside in NC, *see S.L. 1999-333.*
[86] This provision was enacted for lump sum distributions when those distributions were deductible for federal income tax purposes. Today, those amounts are included in federal taxable income. For federal tax purposes, the income may be taxed at different rates.
[87] S.L. 2013-364, House Bill 269, also repealed the tax credit for educational expenses for children with disabilities and provided a scholarship grant for essentially the same group of people. A grant may not exceed $3,000 per semester.

	poultry composting facility. The repeal is effective for taxable years beginning on or after January 1, 2014. • Allows the following tax credits that are only applicable to individual income tax to sunset as scheduled: 105-151.28, credit for premiums paid on long-term care insurance; 105-151.31, earned income tax credit; and 105-151.32, credit for adoption expenses. • Allows the following tax credits that are applicable to both individual and corporate income tax to sunset as scheduled; the credits sunset for the 2014 taxable year unless otherwise noted: NC ports, film production (2016), recycling oyster shells, investing in renewable energy (2016), donating money to a nonprofit or governmental entity to invest in renewable energy (2016), constructing renewal fuel facilities, biodiesel producers, work opportunity, renewable energy property facility, historic rehabilitation (2015), low-income housing (2015), interactive digital media, mill rehabilitation (2015), Article 3J, and railroad intermodal facilities (2038).
Section 1.1(c)	Repeals the definition for retirement benefits. The definition is not needed because the deduction for retirement benefits is eliminated.
Section 1.1(d)	Replaces the graduated marginal tax rates of 6%, 7%, and 7.5% with a flat rate of 5.8% for taxable year 2014 is 5.8%. *New G.S. 105-153.7.* Makes significant changes to the individual income tax law by greatly reducing the number of adjustments that must be made to determine NC taxable income. *New G.S. 105-153.5.* • To determine NC taxable income, the only adjustments a person would make to adjusted gross income, as determined under the Internal Revenue Code, are as follows: o Deduction of any Social security benefits received and included in federal taxable income. o Deduction of those amounts that cannot be included in the tax base by federal law, amounts received under the Railroad Retirement Act, interest on US obligations, and income from an Indian tribe. o Deduction for those amounts that cannot be included in the tax base by a North Carolina court order, namely pension income received to the extent the amount is exempt under the *Bailey* decision.[88]

[88] Federal, State, and local governmental pension income is not taxable in North Carolina if the recipient of the pension income vested in the governmental retirement system on or before August 1989.

<table>
<tr><td></td><td>

<li style="list-style:none">

Deductions for those amounts generally accepted as a long-standing practice of the State – interest on State and local obligations, interest on nonprofit educational obligations, and gain from obligations issued prior to 1995 under bond law that exempted it.
Adjustments designed to prevent double taxation, such as a deduction for refunds of income taxes included in gross income.
Adjustments to conform to legislative decisions to decouple from federal income tax law, such as accelerated depreciation.

The standard deduction amount is increased from $6,000 to $15,000 for married taxpayers filing jointly; from $4,400 to $12,000 for heads of household; from $3,000 to $7,500 for single filers; and from $3,000 to $7,500 for married taxpayers filing separately.
There are only two federal itemized deductions allowed:

Charitable contributions. – The same amount allowed as an itemized deduction under the Code.
Mortgage interest and property taxes paid on real estate. – The same amounts allowed as an itemized deduction under the Code, capped at $20,000 for all taxpayers. Married taxpayers may not claim more than the cap amount, regardless of how the taxpayers choose to file.

The tax brackets eliminate the marriage penalty.
Consolidates and simplifies the adjustments when the State decouples from federal accelerated depreciation and expensing. New G.S. 105-153.6.[89]

</td></tr>
<tr><td>Section 1.(e)</td><td>Increases the child credit from $100 to $125 per child if the taxpayer's AGI is below $40,000 for married filing jointly; $32,000 for head of household; and $20,000 for single/married filing separately. The act retains the current tax credit amount of $100 for a taxpayer's whose AGI is over $40,000 and up to $100,000, married filing jointly. The credit is not allowable to a taxpayer's whose AGI is over $100,000, married filing jointly.</td></tr>
<tr><td>Section 1.2</td><td>Reduces the individual flat income tax rate from 5.8% to 5.75% for taxable years beginning on or after January 1, 2015.</td></tr>
<tr><td>Section 1.3</td><td>Makes technical and conforming changes. Provides that the percentage amount to be withheld from lottery winnings is the individual income tax rate.</td></tr>
</table>

PART II. CORPORATE INCOME TAX CHANGES

[89] See also House Bill 14, S.L. 2013-414, sections 34 and 58(a).

This Part reduces the corporate income tax rate over a period of two years, with additional reductions possible in the third and fourth years. It simplifies the calculation and administration of the corporate income tax laws by eliminating most of the credits allowed under current law. It does not change the applicability, calculation, or rate of the franchise tax.

Bill Section	Brief Description
Section 2.1(a)	Reduces the corporate income tax rate from 6.9% to 6% for taxable year 2014.[90]
Section 2.1(b)	Repeals the following tax credits that do not have a sunset and are applicable to both individual and corporate income tax: 105-130.22, credit for construction of dwelling units for handicapped persons; 105-130.34, credit for real property donations; 105-130.36, credit for conservation tillage equipment; 105-130.37, credit for gleaned crops; and 105-130.44, credit for construction of poultry composting facility. The repeal is effective for taxable years beginning on or after January 1, 2014. Repeals the following tax credits that do not have a sunset and that are only applicable to corporate income tax: 105-130.39, credit for certain telephone subscriber line charges[91] and 105-130.43, credit for savings and loan supervisory fees.[92] The repeal is effective for taxable years beginning on or after January 1, 2014. Allows the following tax credits that are applicable to both individual and corporate income tax to sunset as scheduled; the

[90] The corporate tax rate in the surrounding states is: FL, 5.5%, GA, 6%; SC, 5%; TN, 6.5%; VA, 6%.

[91] This statute allowed a tax credit for telephone companies that provide a discount to low income residents for home telephone service under the federal Lifeline program. The federal subsidy for local telephone service under the Lifeline program is $9.25 per month. The State is not required to provide a further subsidy for low income residents, but G.S. 62-140 allows the Commission to order a similar rate reduction. Under an Order of the State Utilities Commission, the State has required public utilities to give an additional reduction in rates of $3.50 for low-income residential consumers. The tax credit repealed by this act allowed the public utility to recover its cost of the reduction in rates. Section 11.1 of S.L. 2013-363 amended G.S. 62-140 to provide that if the State repealed the funding mechanism that allowed a public utility to recover its reduction in the local telephone rates for low-income residential consumers the Commission would be required to eliminate any subsidy funded by the tax credit. In 2011, there were 109,923 Lifeline subscribers. That number dropped to $67,065 in 2012; the reduction is probably due to a FCC requirement that companies recertify Lifeline subscribers. Many customers did not respond to the recertification request; this number may increase for 2013 as eligible subscribers who were de-enrolled choose to reapply for Lifeline service.

[92] In 1985, the General Assembly allowed a tax credit for savings and loan associations equal to the amount of supervisory fees assessed on the association by the Commissioner of Banks. According to the 2011 Biennial Tax Expenditure report, this credit reduced General Fund revenues by approximately $300,000 annually.

	credits sunset for the 2014 taxable year unless otherwise noted: NC ports, film production (2016), recycling oyster shells, investing in renewable energy (2016), donating money to a nonprofit or governmental entity to invest in renewable energy (2016), constructing renewal fuel facilities, biodiesel producers, work opportunity, renewable energy property facility, historic rehabilitation (2015), low-income housing (2015), interactive digital media, mill rehabilitation (2015), Article 3J, and railroad intermodal facilities (2038). Allows the tax credit for manufacturing cigarettes for exportation to expire as scheduled (2018).
Section 2.2(a)	Reduces the corporate income tax rate from 6% to 5% for taxable years beginning on or after January 1, 2015.
Section 2.2(b)	Allows an additional 1% rate reduction for 2016 if the amount of net General Fund tax collected in fiscal year[93] 2014-15 exceeds $20.2 billion. Allows an additional 1% rate reduction for 2017 if the amount of net General Fund tax collected in fiscal year 2015-16 exceeds $20.975 billion. The rate reduction triggers reflect the anticipated General Fund tax collections for that fiscal year. The act provides that the corporate income tax rate for taxable year 2017 will be the rate for taxable years thereafter. The rate may be 5%, 4%, or 3%, depending upon whether one or more of the rate reduction triggers are met.
Section 2.3	Extends the sunset of the tax credit for research and development until taxable years beginning on or after January 1, 2016. Allows the tax credit for interactive digital media to sunset as scheduled for taxable years beginning on or after January 1, 2014.
Section 2.4	Repeals the corporate income tax earmarked for the Public School Building Capital Fund. This Fund has not received this earmarked amount since 2008 because it has been suspended each year in the appropriations act. The amount of the earmark is equal to 5/69 of the net corporate income tax collections, or roughly between $70 and $80 million annually.

PART III. SALES TAX CHANGES

This Part makes changes to the existing sales tax law. It increases the tax rate on some items that were either exempt or taxed at a lower rate. It also imposes some new thresholds and caps. It does not change the State or local sales tax rates. The State general rate is 4.75%; the combined general rate is 7%; and the local rates vary from 2% to 2.75%.[94]

Bill Section	Brief Description

[93] See S.L. 2014-100, Sec. 37.1; it clarifies what the term "net General Fund tax collected for a fiscal year" means for purposes of the corporate income tax rate trigger.
[94] All counties have the authority to impose an additional .25% tax; as of April 1, 2013, 25 counties imposed the additional .25% local rate. Durham, Mecklenburg, and Orange counties have an additional .50% sales tax rate for public transit.

Modify Tax Rate on Manufactured and Modular Homes	
Section 3.1(a)	Increases the sales tax rate on manufactured and modular homes to the State general rate, effective January 1, 2014.[95] Prior to the increase, the tax rate on manufactured homes was 2% with a $300 per article cap; the tax rate on modular homes was 2.5%.[96] The tax applies to the sales price, including the all accessories attached to the home when it is delivered to the purchaser, even if the charges for those accessories are separately stated on the invoice.
Section 3.1(b)	Repeals the distribution of 20% of the taxes collected on modular homes to counties.[97]
Section 3.1(c)	Provides that the local sales tax rate does not apply to sales of manufactured or modular homes. Generally, the local sales tax applies to any item subject to the State general rate. This section exempts manufactured homes and modular homes from the local sales tax base.[98]
Section 3.1(d)	Effective January 1, 2014, and applicable to sales made on or after that date. A sale occurs when title to the property transfers or possession is taken; not when the contract or agreement to purchase is signed.[99]
Repeal Sales Tax Exemption for Nutritional Supplements	
Section 3.2(a)	The exemption, G.S. 105-164.13(13c), applies to nutritional supplements sold by a chiropractic physician at a chiropractic office to a patient as part of the patient's plan of treatment. The General Assembly enacted this exemption in S.L. 1997-369, effective October 1, 1997. The term "nutritional supplement" is not defined. The federal Dietary Supplement Health and Education Act of 1994 defines a dietary supplement. There are no laws that require a dietary supplement to be sold only by health care providers. The dispensing of dietary supplements

[95] See S.L. 2014-100, Sec. 37.3; it allows a sales tax exemption equal to 50% of the sales price, effective September 1, 2014.

[96] In committee discussions, some legislative members expressed a desire to begin taxing manufactured and modular homes more analogous to stick built homes. Sales tax does not apply to the sales price of a stick built home because it is real property and not tangible personal property; however, the State and local sales tax does apply to the cost of the materials used by the builder to create the home.

[97] S.L. 2003-400 began taxing modular homes at 2.5%, regardless of whether they were "on-frame" of "off-frame". Prior to 2003, on-frame modular homes were taxed as manufactured homes at 2%. Off-frame modular homes were not taxed to the ultimate consumer, but instead the general State and local sales tax rate applied to the cost of the materials used by the seller to create the home. The distribution to counties was made to help offset the local revenue loss to counties. The distribution is around $500,000 annually.

[98] The homes are subject to local property taxes annually.

[99]

	does not require a prescription. If sold elsewhere, a nutritional supplement would be subject to sales tax. Likewise, if a chiropractor sells other items of tangible personal property to their patients at their office, those items are subject to sales tax. This act repealed this exemption, effective January 1, 2014. All nutritional supplements will be subject to sales tax, regardless of where they are purchased or who sells them.
Repeal Sales Tax Exemption for Meal Plans	
Section 3.2(a)	The exemption, G.S. 105-164.13(27), applies to prepared food and food served to students in dining rooms regularly operated by State or private educational institutions or student organizations thereof. The exemption has existed since at least 1957. The provision of meals to students in higher educational facilities has changed extensively since 1957. Today, students purchase meal plans that may consist of both "meal swipes" and food dollars. In many instances, the schools contract with a third party to provide the meals. The current taxability of meals is a hodge-podge: meals purchased with cash are taxable; meals purchased by non-students are taxable; and items purchased with food dollars at locations not operated by the school's food service are taxable. Meals purchased with meal swipes are not taxable as well as meals purchased with food dollars at locations operated by the school's food service.[100] This act repealed the exemption, effective January 1, 2014.
Repeal Sales Tax Exemption for Newspapers	
Section 3.2(a)	The exemption, G.S. 105-164.13(28) applies to the sales of newspapers by newspaper street vendors, by newspaper carriers making door-to-door deliveries, and by means of vending machines. In 1957 all newspaper sells were exempt from tax. In 1961 the blanket exemption was repealed. The repeal that existed prior to this act meant similar products were taxed differently. Newspapers sold over the counter, digitally, and by subscription were taxable. Newspapers sold by independent newspaper carriers, subscriptions sold door-to-door, through vending machines, and by street vendors were exempt. Magazine sales had a similar dichotomy until 2009 when the General Assembly repealed the similar exemption provided for magazine sells. The repeal of the exemption was intended to equalize the tax treatment of newspapers. However, G.S. 105-164.13(50) exempts from sales tax fifty percent (50%) of the sales price of

[100] See S.L. 2014-3, Part IV; it addresses the sales tax issues related to the repeal of this exemption.

	items sold through a coin-operated vending machine, other than tobacco.[101]
Conforming changes	
Section 3.2(b)	The sales tax exemption for food sold in an elementary or secondary school remains exempt from taxation. This subsection clarifies that the exemption applies to all K-12 cafeterias, including public schools, private schools, charter schools, and regional schools.
Section 3.2(c)	Makes conforming changes to recognize that the effective date of a tax change applies the same to all items taxed at the general rate.
Section 3.2(d)	This section becomes effective January 1, 2014, and applies to sales made on or after that date.
Agricultural Sales Tax Exemption	
Section 3.3	Subsection (b) of this section repeals many of the sales tax exemptions for items purchased by farmers for farming operations under G.S. 105-164.13. Subsection (a) of this section creates a new statute that allows a sales tax exemption for the items previously exempted under G.S. 105-164.13 for *qualifying* farmers. To qualify for the exemption, a farmer must have an annual gross income of $10,000 or more from farming operations for the preceding calendar year. Under G.S. 105-164.13, anyone who purchased the listed items for farming received the exemption. The only items previously exempted under G.S. 105-164.13 that were not included in the new statute were obsolete items listed in G.S. 105-164.13(4d): metal flue used in curing tobacco. This section became effective July 1, 2014, and applies to items purchased on or after that date.[102]
Repeal Sales Tax Exemption for Bakery Thrift Stores	
Section 3.4(a)	This exemption, G.S. 105-164.(27a), applies to bread, rolls, and buns sold at a bakery thrift store. The General Assembly enacted the exemption in 2007 to ensure that all bread sold at a bakery thrift store is taxed at the same sales tax rate. A bakery thrift store is defined as a retail outlet of a bakery that sells at wholesale over 90% of the items it makes and sells at the retail outlet day-old bread, rolls, and buns returned to it by retailers that acquired those items from the bakery. If the bread sold at the thrift store is prepared at the thrift store bakery, it is taxed as prepared food and is subject to the State and local tax rate. If the bread sold at the thrift store is baked elsewhere, it is taxed

[101] See S.L. 2014-3, Part VIII; it provides that the 50% sales tax exemption for items sold through a vending machine does not apply to newspapers, effective October 1, 2014.
[102] See S.L. 2014-3, Part III; it made substantial and clarifying changes to the agricultural sales tax exemption, effective July 1, 2014. It allows a three-year income averaging and it provides a conditional exemption for new farmers.

	as food and is subject to the local tax rate. This act repeals this exemption, effective July 2014, and applicable to sales made on or after that date.
Repeal Sales Tax Holidays	
Section 3.4(a)	Repeals the two sales tax holidays. In 2001, the General Assembly enacted a sales tax exemption applicable to clothing[103] school supplies[104] computers, printers, and software[105] and recreational equipment[106] The exemption applied to purchases made during the first weekend in August. The exemption was commonly referred to as the "back to school sales tax holiday." In 2008, the General Assembly enacted a similar sales tax exemption applicable during the first weekend in November for the following Energy Star-rated products: clothes washers, freezers and refrigerators, central air conditioners and room air conditioners, air-source heat pumps, ceiling fans, dehumidifiers, and programmable thermostats. This section repeals both of these sales tax holidays, effective July 1, 2014.
Nonprofit Refunds of Sales and Use Tax Paid	
Section 3.4(b) and (c)	Places a cap on the amount of State and local sales and use tax refund a nonprofit entity is allowed, effective for the fiscal year 2014-15. Nonprofit entities may apply for a semi-annual refund of the sales and use taxes paid on purchases on items used to carry on the work of the nonprofit entity. A request for a refund for the first six months of a calendar year is due the following October 15; a request for a refund for the second six months of a calendar year is due the following April 15. A refund application submitted more than three years after the due date is barred. Subsection (b) of this section provides that the aggregated annual refund amount of State sales and use taxes allowed an entity for a fiscal year may not exceed $31,700,000. Subsection (c) of this section provides that the aggregated annual refund amount of local sales and use taxes allowed an entity for a fiscal year may not exceed $13,300,000. This aggregate amount will have little impact on refunds currently received, but it may limit future refund amounts.
Section 3.4(c) and (d)	Makes conforming changes.
Extend Sunsets on Various Tax Refund Provisions	

[103] Applied to clothing with a sales price of $100 or less.
[104] Applied to items with a sales price of $100 or less.
[105] Applied to computers with a sales price of $3,500 or less and to computer supplies with a sales price of $250 or less.
[106] Applied to items with a sales price of $50 or less.

Section 3.5	Extends the sunset for the following annual refund of sales and use taxes paid for two years, from January 1, 2014, to January 1, 2016: • On fuel in excess of $2,500,000 used by an interstate passenger air carrier. • On aviation fuel purchased by a professional motorsports racing team, a motorsports sanctioning body, or a related member of such a team or body that is used to travel to or from a motorsport event. • On 50% of the cost of any tangible personal property other than tires or accessories that comprises any part of a professional motorsport vehicle purchased by a professional motorsports racing team or a related member of a team.

PART IV. ELECTRICITY AND PIPED NATURAL GAS TAX CHANGES

This Part repeals the franchise tax on electricity and the excise tax on piped natural gas and replaces the taxes with a State sales tax on the sale of these utilities. A portion of both the franchise tax and the excise tax are shared with the cities on sales made within the cities. This Part repeals those tax-sharing provisions and substitutes a distribution of a portion of the sales tax derived from these utilities. The Part also directs the Utilities Commission to adjust the rates set by utilities for electricity and piped natural gas to reflect the changes made by this Part.

Bill Section	Brief Description
Section 4.1(a)	Repeals the 3.22% franchise tax on electric power, water, and sewerage companies. It also repeals the following provisions that were related to the franchise tax: • The distribution of 3.09% of the franchise tax derived from sales within a city to that city. *G.S. 105-116.1* • The sales tax deduction for municipalities that sell electric power. *G.S. 105-164.21A* • The payments in lieu of franchise taxes paid by municipalities to the State and the distribution of those revenues. *G.S. 159B-27(b), (c), (d) , and (e)*
Section 4.1(c) and (e)	Subsection (c) repeals the preferential sales tax rates applicable to electricity: 2.83% for sales of electricity sold to a commercial laundry and 3% on other sales of electricity. Subsection (e) imposes a State sales tax on sales of electricity and piped natural gas at the combined general rate. The combined general rate is defined as the State's general rate plus the sum of the rates of the local sales and use taxes authorized for every county. That rate is currently 7%.
Section 4.1(d)	Repeals the excise tax imposed on sales of piped natural gas, Article 5E of Chapter 105, and the sales tax exemption for sales of piped natural gas.

Section 4.1(b) and (f)	Subsection (b) makes a conforming change. Subsection (f) provides that the changes made by this section become effective July 1, 2014.
Section 4.2	Directs the Utilities Commission to adjust the rates set by utilities for electricity and piped natural gas to reflect the changes made by Section 4.1 of this act.
Section 4.3	Provides for a distribution of part of the sales tax on electricity and piped natural gas to the cities. Previously, cities received a portion of the franchise tax imposed on electricity and a portion of the excise tax imposed on piped natural gas. This section creates a new distribution formula based upon the amount received by a city under those former distributions, plus growth.
Section 4.4	Makes conforming changes.
Section 4.5	Removes a sales tax preference for sales of electricity by the Cape Hatteras Electric Membership Corporation so that all sales of electricity are taxed the same.[107]

PART V. ADMISSION CHARGES TO AN ENTERTAINMENT ACTIVITY

This Part replaces the gross receipts privilege tax on live entertainment and motion pictures with a State and local sales tax on admission charges to an entertainment activity.[108] The two taxes differ in that the gross receipts tax was imposed upon the person engaged in providing the event; it was not designed to be passed directly onto the consumer. The sales tax is imposed upon the retailer, but it is intended to be passed onto the purchaser and borne by the purchaser instead of the retailer.[109] The gross receipts tax was payable monthly and the return covered the gross receipts received during the previous month.[110] The sales tax is due quarterly, monthly, or bi-monthly depending upon the tax liability of the retailer.[111]

Bill Section	Brief Description
Section 5.(a)	Repeals the 3% privilege tax imposed on live entertainment and the 1% privilege tax imposed on movies, effective January 1, 2014. This subsection also makes a conforming change by repealing the exemptions from the privilege tax. Some of these exemptions were retained by providing a similar sales tax exemption; others were not.
Section 5.(b)	Imposes a State and local sales tax on admission charges to an entertainment activity.

[107] See. S.L. 2014-39; it phases-in the sales tax on sales of piped natural gas by the eight gas cities and on sales of electricity by the Cape Hatteras EMC over two years.
[108] See 2014-3; it addresses several issues re: to the expansion of the sales tax base to admission charges for an entertainment activity.
[109] G.S. 105-164.7.
[110] By practice, some taxpayers remitted the gross receipts tax at the time the event occurred.
[111] G.S. 105-164.16.

	The sales tax is a trust tax. It is payable by the purchaser to the retailer.[112] A retailer is considered to act as a trustee on behalf of the State when it collects tax from the purchaser. The tax should be stated and charged separately unless the retailer displays a statement indicating the sales price includes the tax. It defines an entertainment activity as the following: • A live performance or other live event. This base is substantially the same as the base for the 3% gross receipts privilege license tax under former G.S. 105-37.1. • A motion picture or film. This base is substantially the same as the base for the 1% gross receipts privilege license tax under former G.S. 105-38.1. • A museum, a cultural site, a garden, an exhibit, a show, or a similar attraction or a guided tour at any of these attractions. The imposition statute provides that an admission charge does not include a charge for amenities. In 2011, the General Assembly excluded amenities from the gross receipts privilege tax.[113] This act does not change the policy decision made in 2011.
Section 5.(c)	Exempts the following entertainment activities from the sales tax on admission charges: • An event held at an elementary or secondary school and is sponsored by the school. • A commercial agricultural fair. • A festival or activity that lasts no more than seven days and is sponsored by a nonprofit entity that is exempt from income tax and that uses the entire proceeds exclusively for the entity's nonprofit purpose. • A youth athletic contest sponsored by a nonprofit entity.
Section 5.(d) and (e)	Repeals obsolete statutes and makes conforming changes.
Section 5.(f)	Makes these changes effective January 1, 2014. Provides that for admissions to a live event, the tax applies to the initial sale or resale of tickets occurring on or after that date so that tickets to an event are taxed under the same tax: either the gross receipts privilege tax or the sales tax.

PART VI. SERVICE CONTRACTS

This Part imposes a State and local sales tax on the sales price of a service contract.[114] This Part does not modify or repeal the sales tax exemption for installation charges when the

[112] G.S. 105-164.7.
[113] S.L. 2011-330.
[114] See S.L. 2014-3; it addresses several issues re: to the expansion of the sales tax base to service contracts.

charges are separately stated on the billing document given to the purchaser at the time of the sale.

Bill Section	Brief Explanation
Section 6.(a)	Defines a service contract as a warranty agreement, a maintenance agreement, a repair contract, or a similar agreement or contract by which the seller agrees to maintain or repair tangible personal property.
Section 6.(b)	Imposes a State and local sales tax on the sales price of a service contract.
Section 6.(c)	Exempts from sales tax a service contract provided for an item that is exempt from sales tax, other than a service contract for a motor vehicle. A motor vehicle is exempt from sales tax under G.S. 105-164.13(32) because it is subject to a highway use tax. The tax applies to service contracts for motor vehicles. Exempts from sales tax a service contract for a transmission, distribution, or other network asset contained on utility-owned land, right-of-way, or easement. Exempts from sales tax an item used to maintain or repair tangible personal property pursuant to a service contract if the purchase of the contract is not charged for the item.
Section 6.(d)	Makes these changes effective January 1, 2014.

PART VII. ELIMINATE ESTATE TAX

This Part repeals the estate tax and the generation-skipping transfer tax for decedents dying on or after January 1, 2013.[115]

In 2001, the federal estate tax was designed as a revenue sharing system where the federal estate tax gave estates a 100% credit for state estate tax. Because estates received a full credit for state estate tax imposed, the estates did not pay any additional estate tax if state estate tax also applied. In 2001, all fifty states and the District of Columbia imposed an estate tax. During 2012, the federal estate tax was scheduled to return to the 2001 law for decedents dying in 2013 – meaning that any state estate tax paid would be fully credited against federal estate tax.

On January 1, 2013, the US Congress passed the American Taxpayer Relief Act of 2012 (also called the "fiscal cliff bill"). The 2012 Act permanently changed the federal estate tax system starting January 1, 2013. It repealed the scheduled return to the 2001 version of the federal estate tax; it provides only a deduction for state estate tax paid. Because the deduction does not relieve estates of the financial loss of paying state estate tax, estates do pay additional estate tax if state estate tax applies.

[115] North Carolina imposed an estate tax on the value of the estate over $5.25 million. The tax rate graduated from 0.8% to a maximum rate of 16% for taxable estates over $10,040,000.

PART VIII. CAP EXCISE TAX ON MOTOR FUEL

This Part caps the motor fuel excise tax rate for the period October 1, 2013, through July 1, 2015, at 37.5¢ per gallon. With a cap, the rate may fall below 37.5¢ per gallon for the given period but it may not exceed it. This provision effectively reduced the motor fuel excise tax rate on October 1, 2013, from 37.6¢ per gallon to 37.5¢. Effective July 1, 2014, the rate fell to 36.5¢ under the variable rate formula. The motor fuel tax rate has two components: a flat rate of 17.5¢ and a variable rate that may change every six months.[116] The variable rate is equal to 7% of the wholesale price of gasoline based on a weighted average price of gasoline and diesel, as reported by the US DOE Energy Information Administration.

A motor fuel excise tax is imposed on all motor fuel sold, distributed, or used in the State. The revenue generated by the motor fuel tax is distributed as set forth in G.S. 105-449.125. One-half cent of the excise tax on each gallon of gas is distributed to funds for underground tank storage cleanup water and air quality. The remaining excise tax revenue is allocated as follows:

- 75% to the Highway Fund and used for maintenance, transit, rail, State Highway Patrol, DMV, some secondary road improvement, Powell Bill distribution to local governments, and some other administrative needs. G.S. 105-449.126 credits 1/6 of 1% of this amount annually to the Wildlife Resources Fund to be used for the boating and water safety activities described in G.S. 75A-3(c).
- 25% to the Highway Trust Fund and used for construction of the intrastate system, some secondary road improvement, and Powell Bill distribution to local governments.

PART IX. STUDY AND EFFECTIVE DATE

This Part provides a savings clause. It also gives the Secretary of Revenue the authority to compromise a taxpayer's liability for sales tax on an admission charge to an entertainment activity or on the sales price of a service contract if the taxpayer made a good faith effort to comply with the sales and use tax laws. This additional compromise authority expires July 1, 2020. The purpose of this additional authority is to recognize the compliance issues and learning curve associated with the expansion of the sales tax base to services.

[116]The variable rate component was introduced in 1986 as part of legislation that increased funding for road construction. In addition to the introduction of a 3% variable rate, which equated to 1.5¢ per gallon at that time, the legislation increased the flat rate from 12¢ per gallon to 14¢ per gallon. The General Assembly incorporated the variable rate in part as recognition that the cost of road construction increases as the cost of motor fuel increases because of the petroleum products used in road construction. In 1989, the General Assembly increased the flat tax rate to 17¢ per gallon and increased the variable component from 3% to 7% of the average wholesale price. In 1992, the tax rate was changed to the current rate of 17.5¢ per gallon plus 7% of the average wholesale price (S.L. 1991-538).

NC CHARTER SCHOOL ADVISORY BOARD.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-355	**20**	**Sen. Tillman, Soucek**

AN ACT TO CREATE THE NORTH CAROLINA CHARTER SCHOOLS ADVISORY BOARD AND MAKE OTHER CHANGES TO CHARTER SCHOOL LAWS.

SUMMARY: This act provides limited immunity for certain controlled substance offenses in cases of medical necessity, and also provides immunity to a practitioner who dispenses an agent to treat overdoses, or an individual who administers the agent to another person. This act becomes effective December 1, 2013, and applies to offenses committed on or after that date.

BILL ANALYSIS:

Section 1 of the act provides that a person seeking medical assistance for themselves for a "drug-related overdose" (defined term in the act), or a person who seeks medical assistance for another individual who is experiencing a drug-related overdose, has immunity from prosecution for any of the following offenses:

- Misdemeanor possession of a controlled substance.
- Felony possession of less than one gram of cocaine..
- Felony possession of less than one gram of heroin.
- Misdemeanor possession of drug paraphernalia.

Any evidence obtained in connection with an investigation of other crimes committed by a person who may be entitled to limited immunity under the act remains admissible as to those crimes.

Section 2 provides there is no civil or criminal liability for the following:

- A practitioner who prescribes, dispenses, or distributes naloxone hydrochloride, an opioid antagonist approved by the Food and Drug Administration for the treatment of a drug overdose, to (i) a person at risk of experiencing an opiate-related overdose, or (ii) to another person in a position to assist an at risk person.
- A person who received an opioid antagonist, and administers it to another person if they have a good faith belief the person is experiencing a drug-related overdose, and the person exercises reasonable care in administering the agent.

EFFECTIVE DATE: This act becomes effective December 1, 2013, and applies to offenses committed on or after that date.

NC CHARTER SCHOOL ADVISORY BOARD.

Session Law	*Bill #*	*Sponsor*

S.L. 2013-355	SB 337	Sen. Tillman, Soucek

AN ACT TO CREATE THE NORTH CAROLINA CHARTER SCHOOLS ADVISORY BOARD AND MAKE OTHER CHANGES TO CHARTER SCHOOL LAWS.

THIS SUMMARY COVERS ONLY SECTION 3 OF S.L. 2013-355. A SUMMARY OF THE ENTIRE LAW IS AVAILABLE AS S337-SMRQ-51(sl).

SUMMARY: Section 3 of S.L. 2013-355 exempts real property occupied by a charter school and exclusively used for educational purposes from local property tax. Ownership of the property is not required.

CURRENT LAW:

G.S. 105-278.4 exempts certain real and personal property used for educational purposes. Exemption has an ownership requirement.

G.S. 105-278.7 exempts certain real and personal property used for educational, scientific, literary, or charitable purposes. Exemption has an ownership requirement.

G.S. 105-275(43) provides an exemption from local property tax for real (and tangible personal property) that is subject to a capital lease under G.S. 115C-531. The definition of capital lease in G.S. 115C-531 requires a local board of education be a party to the capital lease for use as school buildings or school facilities.

BILL ANALYSIS: Section 3 of S.L. 2013-355 exempts real property occupied by a charter school and exclusively used for educational purposes from local property tax. The use test requires the charter school "wholly and exclusively" use the property. Ownership of the property is not required.

BACKGROUND: Charter schools often operate on property owned by a separate entity because the charter school is not authorized to enter into a mortgage to buy land. For example, a charter school may lease a building that is owned by an affiliated nonprofit entity. The affiliated entity would have the authority to buy land and mortgage the land to finance the purchase.

EFFECTIVE DATE: Section 3 of S.L. 2013-355 is effective for taxes imposed for taxable years beginning on or after July 1, 2013.

APPROPRIATIONS ACT OF 2013.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-360	**SB 402**	**Sen. Brunstetter, Brown, Hunt**

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

SUMMARY: This analysis summarizes only the finance-related provisions in S.L. 2013. The finance provisions of that act are as follows:

- ***Increases fees by $60 million, $54.2 million of which would impact the General Fund and $5.8 million of which would impact various special funds.***[117]
- ***Authorizes a sales tax refund for an interstate passenger air carrier for the period January 1, 2011 through June 30, 2011.***
- ***Restores for one year the transitional hold harmless payments to local governments for repealed reimbursements.***
- ***Increases funding for dredging by allocating to the new Shallow Draft Navigation Channel Dredging Fund 1/6 of 1% of the amount allocated to the Highway Fund from the motor fuel excise tax in addition to appropriating funds for that purpose.***
- ***Sets the insurance regulatory charge at 6%, increase the regulatory fee for the Utilities Commission to .13%, and set the electric membership corporation regulatory fee at $200,000.***
- ***Changes the distribution or use of existing tax proceeds as follows:***
  - ***Reallocates the distribution of the .74% gross premiums tax on property coverage contracts and dedicate 20% to the Workers' Compensation Fund for volunteer safety workers.***
  - ***Eliminates the tax return designation of $3 of a taxpayer's tax liability to be remitted to the NC Public Campaign Fund and repeals the Fund.***
  - ***Directs the portion of the special license plate fee and the deed stamp tax that is remitted to the Natural Heritage Trust Fund to the Clean Water Management Trust Fund and repeals the Natural Heritage Trust Fund.***

The act also makes the following changes related to economic development:

- ***Increases the JDIG application fee and reporting fee.***
- ***Repeals the statutorily-created regional economic development commissions.***
- ***Modifies the Industrial Development Fund and Utility Account.***

BILL ANALYSIS:

FEE INCREASES

S.L. 2013-360 increases fees by $60 million, $54.2 of which would impact the General Fund and $5.8 of which would impact various special funds.

FINANCE-RELATED CHANGES

Sales Tax Refund for Passenger Air Carrier. – An interstate passenger air carrier is allowed an annual refund of the sales and use tax paid by it on fuel in excess of $2,500,000. This refund will expire for purchases made on or after January 1, 2014. A request for a refund is due within six months after the end of the State's fiscal year. The refund period covers purchases made during the State's fiscal year. Refunds applied for after the due date are barred. The only taxpayer that currently qualifies for this credit is U.S. Airways.

---

[117] The Senate budget increased fees remitted to the General Fund by $57.4 million and reduced fees remitted to various special funds by $38 million.

In 2010, the sales tax refunds transitioned from a calendar year basis to a fiscal year basis. Because of the transition, U.S. Airways failed to timely file for a refund. In 2012, the General Assembly enacted legislation authorizing a sales tax refund for the period January 1, 2011, through June 30, 2011, and the refund was capped at $3,150,000. Without the cap, the taxpayer would have been entitled to a State sales tax refund of $6,340,000 for that same six-month period. In the availability statement of the House version of the 2012 budget, there was an adjustment in the amount of $6.3 million for the sales tax refund application extension for U.S. Airways. In the Senate version, there was no adjustment to the availability statement for this purpose. In the budget as enacted there was a reserve in the amount of $3.15 million. Pursuant to the 2012 legislation, U.S. Airways applied for a refund for the full amount of $6.34 million.

Section 6.16 allows U.S. Airways to obtain a refund for the amount not previously refunded for the January-June 2011 period.

Temporarily Restore Hold Harmless Payment. – A decade ago, the General Assembly repealed the reimbursements it had traditionally provided to local governments as replacement for the revenue they lost due to the repeal of the property tax on inventories and on poultry and livestock, the repeal of the intangibles tax, the "homestead exclusion" from property tax, and the repeal of local sales and use taxes on food purchased with food stamps. In place of the reimbursements, the General Assembly gave local governments the authority to increase their local sales tax by one-half percent and it provided a transitional hold harmless payment to those local governments whose potential gain from the half-cent local sales tax increase would be less than their loss from the repealed State reimbursements. The hold harmless distribution is made on or before August 15th of each year. The transitional hold harmless payments were to be made through August 2012.

Section 6.17 extends those payments for one additional year, through August 2013.

Set Regulatory Fees. – **Section 15.1** increases from .12% to 0.13% the rate for the public utility regulatory fee beginning with fiscal year 13-14. It also sets at $200,000 for fiscal years 13-14 and 14-15 the annual public utility regulatory fee imposed on electric membership corporations whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale**.** The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to reimburse the General Fund for appropriations made to the Utilities Commission to pay the expenses incurred in regulating public utilities.

The last time the rate of the public utility regulatory fee was changed was in fiscal year 04-05. The rate for this fee must be set each year by the General Assembly. The utility regulatory fee is a tax that was first imposed in 1989. The regulatory fee is imposed on all utilities that are subject to regulation by the North Carolina Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenues. In general, jurisdictional revenue is derived from providing utility service in North Carolina.

The rate of the fee imposed on electric membership corporations has not changed since the General Assembly enacted it in 1999. The 1999 General Assembly enacted S.L. 1999-180, which authorized electric membership corporations to form subsidiary corporations that may provide energy services and products, telecommunications services and products, and water and wastewater collection and treatment. The subsidiary must fully compensate the electric membership corporation for its use of the corporation's personnel, services, equipment, and property. The Utilities Commission is charged with regulating this aspect of the subsidiary's business and, to pay for this regulation, S.L. 1999-180 levied a flat-rate regulatory fee to be

paid annually by the North Carolina Electric Membership Corporation.[118] Thus, the fee imposed on the North Carolina Electric Membership Cooperation will be passed on to its member electric membership corporations.

Section 20.3 sets the insurance regulatory charge at 6% for the 2013 and 2014 calendar years, the same as the rate set 2010, 2011, and 2012. The proceeds of the fee are credited to the Insurance Regulatory Fund and used to reimburse the General Fund for appropriations made to the Department of Insurance and other agencies to pay the expenses incurred in regulating the insurance industry. The insurance regulatory charge was first enacted in 1991 to defray the State's cost of regulating the insurance industry. The charge is a percentage of each insurance company's gross premiums tax liability.[119]

Section 34.29, as amended by S.L. 2013-363, Sec. 8.1, expands the retail value of a motor vehicle upon which the 3% highway use tax is imposed to include documentation fees and other administrative charges. This section becomes effective January 1, 2014.

CHANGES TO THE DISTRIBUTION OR USE OF TAX PROCEEDS

Clean Water Management Trust Fund. – **Section 14.3** directs the portion of the special license plate fee and the portion of the deed stamp tax[120] proceeds that are both currently remitted to the Natural Heritage Trust Fund to the Clean Water Management Trust Fund. The section also repeals the Natural Heritage Trust Fund.

***Scrap Tire, White Goods, and Solid Waste Disposal Taxes Credited to General Fund* - Section 14.16** directs 30% of the tax proceeds from the scrap tire disposal tax to the General Fund. This section ends the current earmarking of these proceeds to the Solid Waste Management Trust Fund, the Scrap Tire Disposal Account, the Inactive Hazardous Sites Cleanup Fund, and the Bernard Allen Memorial Emergency Drinking Water Fund. This section became effective July 1, 2013. **Section 14.17** directs 28% of the tax proceeds from the white goods disposal tax to the General Fund. This section ends the current earmarking of these proceeds to the Solid Waste Management Trust Fund and the White Goods Management Account. This section became effective August 1, 2013. **Section 14.18** directs 12.5% of the tax proceeds from the solid waste disposal tax to the General Fund. This section ends the current earmarking of these proceeds to the Solid Waste Management Trust Fund. This section became effective July 1, 2013.

***Increase Funding for Dredging.* – Section 14.22** allocates one-sixth of one percent of the amount that is allocated to the Highway Fund from the excise tax on motor fuel to the Shallow Draft Navigation Channel Dredging Fund created under the bill.

---

[118] The North Carolina Electric Membership Corporation is the only electric membership corporation whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale as provided in G.S. 117-16. It is a "generation and supply cooperative" owned by its members. Its members are all but one of the existing North Carolina electric membership corporations, which are "distribution cooperatives."

[119] Medical service corporations and health maintenance organizations began paying the charge in 2000.

[120] An excise tax is levied on each instrument by which any interest in real property is conveyed to another person. The tax rate is $1.00 on each $500 of the value of the interest conveyed.

Workers' Compensation Fund for Volunteer Safety Workers.[121] – North Carolina imposes a 1.9% tax rate on the gross premiums of most insurance policies.[122] In addition to the general rate, there is an additional rate of .74% applied to the gross premiums on insurance policies for property coverage. Thirty percent (30%) of the net proceeds of this additional tax is credited to the Volunteer Fire Department Fund,[123] 25% of the net proceeds is credited to the Department of Insurance for disbursement to the county fire districts,[124] and the remainder (45%) is credited to the General Fund.

Section 20.2 reallocates the proceeds of the additional tax by dedicating 20% to the Workers' Compensation Fund for volunteer safety workers. Until April 1, 2016, if the amount remitted is insufficient to meet the needs of the Fund as determined by a DOI actuarial study, the shortfall may be made up either through increased premiums or through an assessment on local governments. Beginning on and after April 1, 2016, the shortfall may be made up only through an assessment on local governments.

NC Public Campaign Fund. – The North Carolina Public Campaign Fund was established in 2002 to offer public campaign financing to court candidates who agree to strict fundraising and spending limits and who reject special interest money and to produce a nonpartisan judicial voter guide, mailed to voters across the state in the weeks before Election Day. The Fund is funded through a $50 surcharge imposed on every active member of the North Carolina State Bar and the designation by a taxpayer on the income tax return of $3.00 of the taxpayer's tax liability.

Section 21.1 repeals the $50 surcharge, the $3.00 designation on the tax return, and the Fund. The State Board of Elections must use the existing money in the Fund only to publish judicial voter guides until the funds have been exhausted.

ADMINISTRATIVE CHANGES

Section 6.9 of S.L. 2013-360 authorizes the NC Department of Revenue to disclose a sample of tax information suitable for statistical analyses to the State Budget Director or

[121] The House Finance Committee passed HB 27 on February 13, 2013, which proposed dedicating the 45% of the net proceeds that is currently credited to the General Fund to the Workers' Compensation Fund for the benefit of volunteer safety workers.
[122] Workers' compensation policies are taxed at 2.5%.
[123] Funds in the Volunteer Fire Department Fund provide matching grants to volunteer fire departments to purchase equipment and make capital improvements.
[124] The Insurance Commissioner will allocate to each county the amount of tax proceeds it received in the previous year. From that amount, the Commissioner will distribute to each fire district in the county the amount it received in the previous year. If the amount of proceeds to be allocated varies from the amount allocated the previous year, then the amount allocated to a county will be either reduced or increased by a percentage, the numerator of which is the population of the county and the denominator of which is the population of the State. If the amount to be distributed to the fire districts differs from the amount distributed the previous year, then the amount distributed will be either reduced or increased by a percentage, the numerator of which is the tax value of the property located in the district and the denominator of which is the tax value of all property located in any fire district in that county.

the Director's designee. The sample does not include taxpayers' names and identification numbers. This section is effective July 1, 2013.

Section 7.17 of S.L. 2013-360 authorizes the NC Department of Revenue to enter into an additional public-private arrangement in order to expand the implementation of the Tax Information Management System (TIMS). TIMS is the replacement to the Department of Revenue's computer system for processing tax returns. The authority allows an additional $16,000,000 of projects related to TIMS that generate increased revenues or cost-savings greater than a revenue baseline. This section is effective July 1, 2013.

CHANGES RELATED TO ECONOMIC DEVELOPMENT

JDIG Changes. – **Section 15.19** requires Commerce to notify each governing body of an area where a submitted application proposes locating a project subject to any confidentiality agreements imposed by the Department. **Section 15.20** increases from $5,000 to $10,000 the application fee for a Job Development Investment Grant. Every business that is awarded a grant must submit an annual payroll report showing withholdings as a condition of its continuation in the program and identifying eligible positions that have been created. The report must be accompanied by a $1,500 fee, which is allocated among Commerce, Revenue, and OSBM. **Section 15.21** increases the reporting fee from $1,500 to the greater of $2,500 or .03% of an amount equal to the grant less the maximum amount to be transferred to the Industrial Development Fund.

Repeal of Economic Development Commissions.[125] Effective June 30, 2014, Section 15.28 abolishes the statutorily-created Regional Economic Development Commissions and would provide for an allocation of funds appropriated to the Department of Commerce related to the commissions. The section also provides for the distribution of assets held by the Eastern Region upon repeal that is consistent with the current statutory distribution of assets upon dissolution.

Currently, there are seven regional economic development organizations in North Carolina – four statutorily-created commissions and three public-private partnerships that are nonprofit entities. The three partnerships, which were established prior to 1993, are the Charlotte Regional Partnership, the Piedmont Triad Partnership, and the Research Triangle Regional Partnership.[126] The four statutorily-created commissions are: Advantage West Economic Development Group, North Carolina's Eastern Region, Northeast Commission, and Southeast Commission.[127] The General Assembly appropriates recurring funds to the regions. The Department of Commerce distributes funds to the regions based on a formula that incorporates tier county rankings. Tier ranks are based on unemployment, population growth, median household income, and property value per capita.

---

[125] This provision is similar to SB 127, which passed the Senate and is in House Commerce.

[126] These three regions formed as multi-county partnerships to combine growth efforts around the three largest metropolitan areas.

[127] In 1993, the General Assembly created four additional regions to market the rural areas of the State.

Modification to IDF and Utility Account. – **Section 15.18** eliminates the Industrial Development Fund and the Utility Account, as an account inside the fund, and establishes the Industrial Development Fund Utility Account. It also:

- Reverses the change enacted July 1, 2012, limiting IDF availability to the 65 economically distressed counties by expanding the program back to all development tier one and two counties.
- Modifies language requiring that funds be reserved only for projects that "will directly result in the creation of jobs" to projects "reasonably anticipated to result in the creation of jobs." Language regarding job retention has been eliminated.
- Modifies language requiring that funds be reserved only for projects in eligible industries (company HQ, air courier services, information technology/services, manufacturing, warehousing, and wholesale trade) by merely giving priority to such industries instead of funds being reserved to such industries.

REQUIRE CERTAIN GENERAL REAPPRAISALS.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-362	**SB 159**	**Sen. Tarte, Rucho**

AN ACT TO CORRECT GENERAL REAPPRAISALS RESULTING IN PROPERTY VALUES THAT DO NOT COMPLY WITH THE REQUIREMENTS OF NORTH CAROLINA LAW BY SETTING FORTH THE STEPS REQUIRED TO BRING THE GENERAL REAPPRAISAL INTO COMPLIANCE WITH THE APPLICABLE PROPERTY TAX MANDATES.

SUMMARY: Session Law 2013-362 requires counties to retroactively change appraisals valued during the county's last general reappraisal if certain conditions are met.

PRIOR LAW: The value of real property must be appraised as of January 1 by each county at least once every eight years. Unless another standard applies for limited circumstances, the value to be determined is the true value of the property, or the price at which the property would change hands between a willing and financially able buyer and a willing seller, neither being under any compulsion to buy or sell and both having reasonable knowledge of all the uses to which the property is adapted and capable of being used. While there are limited exceptions, generally speaking, this value (i) must be used by the county until the county conducts its next general reappraisal and (ii) may not be changed for tax years other than the current tax year, regardless of whether the changes are sought by the taxpayer from the assessor, the board of equalization and review, or the board of county commissioners.[1] While G.S. 105-381 permits refunds or releases if the tax in question

[1] (See G.S. 105-287(c) (any change in appraisals made in non-general-revaluation years may take effect <u>in the current tax year only and not retroactively</u>; G.S. 105-296(i) (changes made informally by the assessor prior to the first meeting of the Bd of E&R may affect

was levied illegally or due to clerical error and while G.S. 105-394 permits retroactive changes to property tax records to correct "immaterial irregularities" in the listing, appraisal, levy, or collection process, neither provision expressly authorizes retroactive changes to appraisals based on the alleged misjudgments of market value by the county.[2]

BILL ANALYSIS: This act adds a time-limited exception to the general rule that the assessed value may not be changed for tax years other than the current tax year by superseding the time limitations disallowing retroactive changes where the following conditions are met:

- The county has evidence that the majority of commercial neighborhoods reviewed by a qualified appraisal company possess significant issues of inequity.
- The county has evidence that instances of inequity or erroneous data had an impact on the valuation of residential neighborhoods in the county.
- The county's last general reappraisal was performed in one of the years when the economic downturn most severely affected home prices (2008-2012).
- The county's evidence (i) resulted from a review performed by an appraisal service retained and selected by the county and registered with the Department of Revenue and (ii) resulted from a sample size of not less than 375 properties that were examined on site.

If all of the conditions are met, the county must undertake one of the two following options:

- The county must conduct a general reappraisal pursuant to G.S. 105-286 within 18 months with at least 1 appraiser certified by the Department for mass valuations per 4,250 parcels.
- The county must have a qualified appraisal service expand the county's evidence of inequity to cover the entire county.

Once one of the two options has been completed, the county must change the abstracts and tax records so that the assessed value reflects the true value for each tax year until the next general reappraisal required by G.S. 105-286. In making these changes, the county must prioritize significantly overvalued parcels first, significantly undervalued parcels second, other overvalued parcels third, and other undervalued parcels last, and, in making refunds,

---

only current-year appraisals); G.S. 105-322 (authorizes board of E&R to make changes as permitted by G.S. 105-287 and as needed to resolve timely filed appeals of current year's appraisals); G.S. 105-325 (authorizes board of county commissioners to make changes only to current-year appraisals).

[2] Neither provision has been the subject of much litigation. The leading cases are *Ammons v. Wake County*, 127 N.C. App. 426 (1997), which makes clear that a misjudgment of market value under G.S. 105-381 cannot justify a refund under the "clerical error" standard but does not address the "levied illegally" standard, and *In re: Morgan*, 362 N.C. 339 (2008), which deals with immaterial irregularities. An argument that a misjudgment of market value was either an illegal tax or an immaterial irregularity would render the appeal deadline created by G.S. 105-322 unnecessary, and courts strive to avoid interpreting a statute in a manner that eliminates the relevance of another statute.

the governing board of the county (and city, where applicable), must direct that a notice of refund and the refund amount be sent to the owner of record as of the date the payment was made. For overvalued parcels, the county must repay the overpayment with interest in the same manner as if there were an order of the Property Tax Commission reducing a valuation on property resulting in an overpayment under G.S. 105-290(b)(4), which is currently 5% per annum. For undervalued parcels, the additional taxes are treated as taxes on discovered properties pursuant to G.S. 105-312, on which interest does not begin to accrue until the next calendar date of delinquency, which would be the next January 6th. Penalties associated with discovered properties are expressly made non-applicable.

EFFECTIVE DATE: This act became effective when it became law by signature of the Governor on July 26, 2013.

BACKGROUND: In 2011, Mecklenburg County conducted a general reappraisal, which has been a source of controversy and debate. In response to a significantly higher rate of appeal and public criticism, the county commissioned a review of the reappraisal data. The resulting report indicated that many of the neighborhoods throughout the county had valuations that had either major or minor issues affecting the calculation.[3]

The report is available online at the following website:

http://charmeck.org/mecklenburg/county/AssessorsOffice/Pages/RevaluationReview.aspx

The act provides a remedy by conforming the previously established valuations to true or market values as of the date for which the reappraisal was to be effective coupled with a retroactive adjustment to tax liabilities. Laws amending property tax statutes must adhere to two North Carolina constitutional provisions:

- Art. II, Sec. 24 of the NC Constitution prohibits local bills that "extend the time for the levy or collection of taxes or otherwise relieving any collector of tax from the due performance of his official duties."
- Art. V, Sec. 2 of the NC Constitution requires that any "classification" of property for tax purposes "be made by general law uniformly applicable in every county, city, and town."

North Carolina courts have not addressed the question of whether an act permitting or ordering the retroactive changing of property tax assessments in some (but not all) counties would violate either of these constitutional provisions. Although the act addresses primarily a local issue and Mecklenburg County is the only county known to meet all of the conditions set forth in the act, any county that conducted a revaluation between 2008 and 2012 can meet the act's conditions. A taxpayer or a county in the State may have standing to challenge a law that violated a constitutional provision. It is unknown whether a court would find the act to be local in nature or non-uniform.

[3] For example, in the neighborhood review, the report indicated major or minor issues in 49 of 150 neighborhoods, and in the land increase neighborhood review, the report indicated major or minor issues in 38 of 52 neighborhoods.

MODIFICATIONS/2013 APPROPRIATIONS ACT.

Session Law	Bill #	Sponsor
S.L. 2013-363	**HB 112**	**Rep. Dollar, Collins, McElraft**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND OTHER MODIFICATIONS TO THE CURRENT OPERATIONS AND CAPITAL IMPROVEMENTS APPROPRIATIONS ACT OF 2013 AND TO RELATED LEGISLATION.

SUMMARY: Section 11.3 of S.L. 2013-363 extends the tax credit for renewable fuel facilities.

BILL ANALYSIS: S.L. 2013-363, Sec. 11.3, extends the sunset of the tax credit for constructing a renewable fuel facility from January 1, 2014, until January 1, 2017, if both of the following requirements are met:

- The taxpayer signs a letter of commitment with the Department of Commerce on or before September 1, 2013, stating the taxpayer's intent to construct and place into service in this State a commercial facility for processing renewable fuel.
- The taxpayer begins construction of the facility on or before December 31, 2013.

EFFECTIVE DATE: This section became effective July 24, 2013.

CHILDREN W/DISABILITIES SCHOLARSHIP GRANTS.

Session Law	Bill #	Sponsor
S.L. 2013-364	**HB 269**	**Rep. Jordan, Brandon, Jones, Stam**

AN ACT TO CREATE SPECIAL EDUCATION SCHOLARSHIP GRANTS FOR CHILDREN WITH DISABILITIES.

SUMMARY: S.L. 2013-364 would create \ special education scholarship grants for children with disabilities.

CURRENT LAW: A taxpayer is entitled to an education expenses tax credit of up to $3,000 per semester for tuition and special education and related services expenses for each "eligible dependent child" who is a resident of North Carolina and who enrolled for one or two semesters during the taxable year in grades kindergarten-12 at either (i) a nonpublic school or (ii) a public school where tuition is charged for the child's enrollment. For home schools, the credit is equal to the amount the taxpayer paid for special education and related services expenses, not to exceed $3,000 per semester.

Qualifications for the Tax Credit. – In order for a child to be an "eligible dependent child," all of the following criteria must be met:

- The child must be a child with a disability who requires an individualized education program (IEP) under Article 9 of Chapter 115C of the General Statutes (Education of Students with

Disabilities) and the federal Individuals with Disabilities Education Improvement Act (IDEA), 20 U.S.C. § 1400 et seq. (2004), as amended. The child must be reevaluated every three years by a local educational agency to verify that the child continues to be a child with a disability. Local educational agencies are not responsible for implementing IEPs for children in parentally placed nonpublic schools.

- The child must receive special education or related services on a daily basis.
- The child must be a child for whom the taxpayer is entitled to deduct a personal exemption under section 151(c) of the Internal Code for the taxable year.

For the initial eligibility for the tax credit during the first five years that the credit is available, the eligible dependent child must have been enrolled for at least the preceding two semesters in a public school or receiving special education or related services through the public schools as a preschool child with a disability. This initial eligibility requirement is reduced to one semester beginning for taxable years on or after January 1, 2016.

Disqualifications for the Tax Credit. – A taxpayer does not qualify for the education expenses tax credit for any semester when the taxpayer's otherwise eligible dependent child was:

- Placed in a nonpublic school or facility by a public agency at public expense.
- Enrolled for any time as a full-time student taking at least 12 hours of academic credit at a postsecondary educational institution.
- 22 years of age or older during the entire semester or graduated from high school prior to the end of the semester.

Reduction of the Tax Credit. – The amount of the education expenses tax credit is reduced for any semester in which the eligible dependent child spent any time enrolled in a public school. The amount of the reduction is equal to the percentage of the semester that the eligible dependent child was enrolled in a public school.

Carryforward of the Tax Credit. – Any unused portion of the credit may be carried forward for 3 succeeding years.

Fund for Special Education and Related Services. – The Fund for Special Education and Related Services (Fund) is a special revenue fund where monies in the Fund are to be used only for special education and related services for children with disabilities, to reimburse local educational agencies for conducting reevaluations for continued eligibility, and to develop revised individualized education programs for children with disabilities. At the end of each fiscal year, the Secretary of Revenue must transfer to the Fund from the net individual income tax collections an amount equal to $2,000, multiplied by the number of education expenses tax credits taken during the fiscal year. Interest and other investment income earned by the Fund accrue to it and monies in the Fund do not revert.

BILL ANALYSIS:

S.L. 2013-264 repeals the current tax credit for children with disabilities as well as the Fund for Special Education and Related Services. It creates the following new program in Article 9 of Chapter 115C of the General Statutes (Education of Children with Disabilities). All terms defined for that Article will apply in this law, including the definitions for child with a disability, IEPs, and special education and related services.

Special Education Scholarship Grants (grants) – The program will provide grants of not more than $3000 per semester to eligible students for reimbursement of tuition and special education and related services. Priority will be given in awarding grants to students who received a grant in the previous semester. Otherwise, grants will be awarded to eligible students in the order in which applications are received.

Scholarship Grant Eligibility - A child with a disability under the age of 22 who meets all of the following requirements will be eligible for a scholarship grant:

- Requires an individualized education plan.
- Receives special education or related services on a daily basis.
- Has not been placed in a nonpublic school or facility by a public agency at public expense.
- Has not spent any time enrolled in a postsecondary institution as a full-time student taking at least 12 academic credit hours.
- Has not received a high school diploma.
- Meets one of the following requirements:
    - Was enrolled in a NC public school during the previous semester.
    - Received special education or related services through the NC public schools as a preschool child with a disability during the previous semester.
    - Received a scholarship grant for the previous semester, or received a tax credit for students with disabilities as provided in G.S. 105-151.33 for the fall semester of the 2013-2014 school year.
    - Is eligible for initial enrollment in kindergarten or the first grade in a NC public school.

Administration - The State Education Assistance Authority (SEAA) will administer the scholarship grants.

- **Timeline of awards** - Applications will be made available by May 1 to eligible students. Awards of grants for fall semester will be made by July 1, and awards for spring semester will be made by December 1.
- **Reimbursement Documentation** - At the end of each semester, parents will submit receipts or other documentation to the SEAA for reimbursement up to the maximum amount of the grant. Parents must provide documentation that the student was enrolled in nonpublic school or was homeschooled and receiving related services for no less than 75 days of the semester for which the parent seeks reimbursement.
- **Verification of Eligibility** – The SEAA may seek verification on information on applications and may revoke grants if parents fail to cooperate with verification efforts. Parents must authorize the SEAA to access information held by the local educational agency.
- **Reevaluation** - After an initial award, students must be reevaluated by the local educational agency every three years to verify the student continues to be a child with a disability.

Reporting – The SEAA must report to the Joint Legislative Education Oversight Committee annually no later than October 1 on the following:

- Total number, age, and grade level of students receiving grants.
- Total amount of grant funding awarded.
- Nonpublic schools in which grant recipients are enrolled, and number of grant students at those schools
- Types of special education or related services for which grants were awarded.

Appropriations: $3,670,500 is appropriated to the SEAA for the 2013-2014 fiscal year, and $4,341,000 in recurring funds is appropriated to the SEAA for the 2014-2015 fiscal year to implement the act. SB 402 reserved funds for implementation of this act. Of those funds, $3,000,000 per year must be used by the SEAA to fund grants to eligible students. Unexpended funds do not revert and remain available to award grants. The remainders of the funds are transferred to DPI to conduct evaluation of eligible students. The SEAA may retain up to $200,000 of the funds for grants for administrative costs in fiscal year 2013-2014. For fiscal year 2014-2015 and subsequent years, the SEAA may retain 2% annually for administrative costs.

EFFECTIVE DATE: The repeal of the current tax credit (Sections 1, 2, and 3) is effective for taxable years beginning on or after January 1, 2014. The scholarship grant program (Section 4), is effective when it becomes law and applies beginning with the spring semester of the 2013-2014 school year. Sections 5 and 6, concerning appropriations and fund transfers, are effective July 1, 2013. Initial applications for the 2014 spring semester must be made available no later than October 1, 2014 and parents notified of awards as soon as practicable.

BACKGROUND: Approximately six states have scholarship grant programs for students with disabilities: Florida, Georgia, Louisiana, Ohio, Oklahoma, and Utah.

AMEND ASSESSMENTS FOR INFRASTRUCTURE NEEDS.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-371	**SB 103**	**Senator Hartsell**

AN ACT TO EXTEND AND AMEND THE AUTHORITY COUNTIES AND CITIES HAVE TO USE SPECIAL ASSESSMENTS TO ADDRESS CRITICAL INFRASTRUCTURE NEEDS.

SUMMARY: S.L. 2013-371 addresses two issues in the special assessment for critical infrastructure needs that have arisen as local governments have considered its use. It also extends the sunset on this program for two years, from July 1, 2013, to July 1, 2015.

CURRENT LAW: In 2008, the General Assembly gave counties and cities the opportunity to use special assessments on benefitted property as a financing tool for long-term capital projects. Although some local government units have considered using assessment-based financing[128] sometimes in conjunction with project development

[128] Iredell County may be considering the use of this financing tool in the near future.

financing, no unit has done so to date. The ability to use this financing tool expired July 1, 2013.

Assessment-based financing may be used for any purpose for which project development financing may be used. Those purposes include water and sewer systems, public transportation facilities, school facilities, gas systems, electric systems, industrial parks, parks and recreation facilities, and streets and sidewalks. Special assessments may be pledged as additional security for project development financing debt instruments as well as revenue bond financing debt instruments. If the assessment is pledged to secure financing, the city or county must covenant to enforce the payment of assessments.[129] Special assessments must be paid in annual installments over a period not to exceed 30 years.

A county or city may only impose special assessments if it receives a petition for the project to be financed through assessments that meets a two-prong test:

- The petition must be signed by a majority of the owners of the property assessed.
- And those owners must represent ownership of at least 66% of the assessed value of the property to be assessed.[130]

The county board of commissioners or city must adopt a preliminary assessment resolution that describes the project, the proposed basis for making the assessment, and information concerning the cost of the work and the terms of payment of the assessment. The proposed basis for making the assessment method most accurately assess property according to the benefits conferred upon it by the project for which the assessment is made. The county or city must hold a public hearing on the matter, prepare a preliminary assessment roll, and publish a confirmation of the assessment roll once it is adopted. An owner of property against which an assessment is made may file a notice of appeal to the General Court of Justice if the owner is dissatisfied with the amount of the assessment.

BILL ANALYSIS: This act addresses three issues:

- An extension of the sunset date from July 1, 2013, to July 1, 2015.[131]
- An adjustment of the assessment in cases where the use of the benefitted property changes.
- Clarification as to how to apply the two-prong test to parcels of property owned by more than one person.

---

[129] Unpaid assessments bear interest at a rate fixed in the assessment resolution. A county or city may foreclose assessment liens under procedures provided by law for the foreclosure of property tax liens.

[130] For example, if there are 21 owners involved and 10 hold 67% of the assessed value of the property to be assessed, at least one of the other 11 owners would have to sign the petition for the county or city to be able to impose the special assessments. Likewise, if 21 owners are involved and one owner owns 67% of the assessed value of the property, that one owner would have to be one of the signatures on the petition for the county or city to impose the special assessments.

[131] Senate Bill 104, also introduced by Sen. Hartsell, would repeal the sunset provision.

The original legislation enacted in S.L. 2008-165 contained a sunset date of July 1, 2013. Section 3 removes the sunset date from the effective date of the session law. Sections 1(a) and 2(a)[132] place the sunset provision in the statutes and extend the sunset date from July 1, 2013, to July 1, 2015.

One assessment method that may be used is one designed to allocate the costs in accordance with the benefits conferred. Sections 1(b) and 2(b) provide that the benefits conferred on an assessed property may be measured by how the property is used and that the assessment on that property may be adjusted over time if the use of the property changes. However, the assessment may not be changed unless the total amount of all the assessments is sufficient to pay the cost of the project after the adjustment is made.

Sections 1(c) and 2(c) address the two-prong ownership tests for properties owned by more than one person:

- A majority of the owners of the properties to be assessed must sign the petition. For purposes of determining a majority, each parcel of property is given one vote. The sole owner of a parcel is given one vote. Multiple owners of a parcel are given a percentage vote equal to one vote multiplied by a fraction, the numerator of which is one and the denominator of which is the total number of owners of the parcel.

- The petition signers must represent at least 66% of the properties to be assessed. For purposes of determining whether the assessed value represented by those signing the petition constitute at least 66% of the assessed value of all real property to be assessed, 100% of the assessed value of property owned by one person is included in the calculation. For property owned by more than one person, that person's proportionate share of the assessed value of that property is included in the calculation.

EFFECTIVE DATE: This act is effective June 30, 2013, and applies retroactively to special assessments imposed on or after that date.

UNC/REPORT/E-COMMERCE/IMPROVEMENTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-375	**SB 485**	**Senator Apodaca**

AN ACT TO ELIMINATE A DUPLICATIVE REPORTING REQUIREMENT REGARDING PERSONAL SERVICE CONTRACTS FOR THE UNIVERSITY OF NORTH CAROLINA, TO ALLOW THE BOARD OF GOVERNORS TO PROVIDE FOR THE IMPLEMENTATION AND EXPANSION OF E-COMMERCE INFRASTRUCTURE, AND TO CLARIFY THE PROPERTY TAX

[132] Section 1 makes the change in the statutes pertaining to counties and Section 2 makes the same change in the statutes pertaining to cities.

STATUS OF CERTAIN IMPROVEMENTS ON UNIVERSITY LANDS THAT ARE OWNED BY CERTAIN SOCIAL ORGANIZATIONS.

SUMMARY: Session Law 2013-375 enacted the following:

- ***An elimination of a reporting requirement regarding personal service contracts for the University of North Carolina.***
- ***Authority for the Board of Governors to implement and expand the use of electronic commerce infrastructure and capabilities among the constituent institutions.***
- ***A property tax exemption for improvements to real property that are owned by a university organization and located on land owned by one of the constituent institutions.***

ANALYSIS:

Each State agency reports annually to the Office of State Budget and Management on its use of personal services contracts exceeding $25,000; however, the utility of the reports have been questioned by constituent institutions of The University of North Carolina as those institutions try to become more efficient. **Section 1** of the act exempts The University of North Carolina from the reporting requirement.

Section 2 of the act allows the Board of Governors of The University of North Carolina to implement and expand the electronic commerce infrastructure among the constituent institutions in order to, among other things, allow use of common application programs as the institutions move towards electronic payment services.[133]

Section 3 of the act provides a property tax exemption for improvements made by a social fraternity, sorority, or similar organization on property owned by a constituent institution. The provision solves the tension under prior law that resulted in situations where property was exempt from property tax but the improvements built upon the property were not. Historically, the schools have owned the Greek housing. The exemption will encourage the Greek organizations to invest in the property and help the institutions defer investment in the housing.[134]

EFFECTIVE DATE: The property tax exemption in section 3 is effective for taxes imposed for taxable years beginning on or after July 1, 2013. The remainder of the act became effective when it was signed into law by the Governor on July 18, 2013.

---

[133] This section is especially meaningful to UNC-CH, UNC-W, and UNC-App. Without the legislation these institutions may have to discontinue the common application service they currently utilize and incur expense to build their own systems.

[134] This section is especially meaningful to NCSU. It has developed a new on-campus master planned Greek housing area to encourage on-campus fraternity and sorority housing.

MODERN STATE HUMAN RESOURCES MANAGEMENT/RTR.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-382	**HB 834**	**Rep. Collins, Burr**

AN ACT ENHANCING THE EFFECTIVENESS AND EFFICIENCY OF STATE GOVERNMENT BY MODERNIZING THE STATE'S SYSTEM OF HUMAN RESOURCES MANAGEMENT AND BY PROVIDING FLEXIBILITY FOR EXECUTIVE BRANCH REORGANIZATION AND RESTRUCTURING AND TO IMPROVE TRANSPARENCY IN THE COST OF HEALTH CARE PROVIDED BY HOSPITALS AND AMBULATORY SURGICAL FACILITIES; TO TERMINATE SET-OFF DEBT COLLECTION BY CERTAIN STATE AGENCIES PROVIDING HEALTH CARE TO THE PUBLIC; TO MAKE IT UNLAWFUL FOR HEALTH CARE PROVIDERS TO CHARGE FOR PROCEDURES OR COMPONENTS OF PROCEDURES THAT WERE NOT PROVIDED OR SUPPLIED; TO PROVIDE FOR FAIR HEALTH CARE FACILITY BILLING AND COLLECTIONS PRACTICES; AND TO PROVIDE THAT HOSPITALS RECEIVING MEDICAID REIMBURSEMENTS PARTICIPATE IN THE NORTH CAROLINA HEALTH INFORMATION EXCHANGE NETWORK.

BILL ANALYSIS: Part XII of S.L. 2013-382 prohibits The University of North Carolina (UNC) Health Care System and its affiliates, and other schools of medicine, clinical programs, facilities, and medical practices affiliated with one of the constituent institutions of UNC that provides medical care to the general public, from utilizing setoff debt collection procedures to collect outstanding debts from tax refunds and lottery winnings of debtors.

EFFECTIVE DATE: This Part becomes effective January 1, 2014, and applies to tax refunds determined by the Department of Revenue on or after that date.

REV LAWS TECHNICAL, CLARIFYING, & ADMIN. CHG.

Session Law	*Bill #*	*Sponsor*
S.L. 2013-414	**HB 14**	**Representative Howard**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE REVENUE LAWS AND RELATED STATUTES, AS RECOMMENDED BY THE REVENUE LAWS STUDY COMMITTEE.

SUMMARY: Session Law 2013-414 makes several technical, administrative, and clarifying changes to the revenue laws and related statutes.

EFFECTIVE DATE: Except as otherwise provided, the act became effective when it was signed by the Governor on August 23, 2013.

BILL ANALYSIS:

Section	Explanation
REVENUE LAWS RECOMMENDATIONS	
1	Corrects several references to "reports and statements" where there is no longer a requirement to submit a statement and substitutes the more appropriate term "return." Also replaces "make" or "making" a return with "file" or "filing." Makes other grammatical and stylistic changes to conform to drafting conventions.
2	Deletes a statutory reference due to repeal of another subsection.[135]
3	Corrects reference to period of underpayment to reflect the change in the due date of the corporate return from the third month (March 15) to the fourth month (April 15).
4	Corrects reference to the proper carryforward period under Article 3J when a taxpayer fails to qualify for an extended carryforward period due to a large investment.[136]
5	Makes technical corrections related to the shift from taxable income to AGI as the starting point for determining NC taxable income.[137]

[135] In S.L. 2010-89, the General Assembly provided an alternative apportionment formula for a corporation that signed a letter of commitment by September 15, 2010, certifying that it planned to invest at least $500 million in private funds to construct a facility in a development tier one area. No company signed such a letter. The General Assembly enacted the provision at the request of Microsoft; Microsoft announced in August of 2010 that it would be locating in Virginia. Since the alternative apportionment formula provided in G.S. 105-130.4(t2) and G.S. 105-122(c1)(3) was no longer needed, the General Assembly repealed those provision in S.L. 2011-330, s. 5. Therefore, the references to the repealed subdivisions in G.S. 105-122(c1)(2) and G.S. 105-130.4(t1) should be deleted.

[136] The Article 3J credits for creating jobs and for investing in business property have a 5-year carryforward period and the credit for investing in real property has a 15-year carryforward period. S.L. 2012-74 temporarily allows for a 20-year carryforward period under Article 3J for a taxpayer who makes an investment of $100 million in business and real property in a tier one county.

[137] Section 31A.1 of S.L. 2001-145 changed the starting point for calculating NC taxable income from federal taxable income to federal adjusted gross income. This change did not change the tax base or increase NC tax in any way.

6	Ensures that relevant transitional adjustments under G.S. 105-134.7 are retained by adding them to G.S. 105-134.6 with corresponding changes throughout.
7	Makes technical changes to the Credit for the Disabled.
8	Amends definitions related to the Streamlined Agreement and adjusts the definition of "storage" to clarify that the purchaser must know the original purpose and location where items will be used at the time of purchase.
9	Amends the facilitator reporting requirements to recognize various business practices and recordkeeping by facilitators. The Department was advised that some facilitators provide a credit card number for use by the hotelier before, during, or after the rental of accommodations.
10	Clarifies that a credit is allowed for use tax if the tax is shown on the invoice or other documentation issued by the retailer.
11	Makes various changes to certain sales tax exemptions: (26), (26a), (27), (31a), & G.S. 105-164.13A [138] Adds "prepared food" to various sales tax exemptions to modernize the language as a result of the adoption of definitions for Streamlined purposes and reflects the fact that schools sell both food and "prepared food." (33a): Clarifies that the sales and use tax exemption for tangible personal property delivered by the retailer for use outside the State applies to certain printed material. This exemption was adjusted during the 2011 Session at the request of the Department to add "by the retailer." However, additional adjustments are needed to retain the exemption for printed material that is not delivered by the retailer to the United States Postal Service or that is not purchased with a direct pay permit.[139] (43a): Amends the exemption for computer software "designed to run on an enterprise server operating system." The inclusion of the term "designed" has been problematic. The Department issued an "Important Notice" in February 2010 in an attempt to further clarify this issue. At issue are products that are designed but may not be run on an enterprise server operating system. It is burdensome for the Department to attempt to determine if the products meet the "designed" requirement.

[138] These changes were requested by the Department after the introduction of the bill and were not included in the original Revenue Laws recommendation.
[139] The proposed language tracks the language that is in Sales and Use Tax Bulletin 7.

	(57)[140] Clarifies that in order for the exemption for fuel and electricity sold to a manufacturer to apply, the facility must be *primarily* engaged in manufacturing.
12	Makes three changes to the sales tax refund statute for nonprofit entities. • Provides that sales and use tax liability indirectly incurred by a nonprofit entity through reimbursement to an employee of the entity for the purchase of tangible personal property and services for use in carrying on the work of the nonprofit entity is considered a direct purchase by the entity. • Replaces the term "medicines" with "over-the-counter drugs" in the statute that permits a refund of sales and use taxes to nonprofit entities and hospitals. • Clarifies that a single member LLC that is disregarded for federal income tax purposes qualifies for a refund if the owner of the single member LLC is a 501(c)(3) and the LLC engages in qualifying activities.
13	Ensures that statute is consistent with the Sales and Use Tax Technical Bulletin Section 46-1 E., which provides that the issuance of a direct pay permit to avoid payment of State and local sales taxes levied on hotel accommodations is a prohibited use. Adds a provision requiring a person who purchases direct mail under a direct pay permit to file a return and pay the tax due monthly or quarterly to the Secretary.
14	Repeals G.S. 105-164.35, which authorizes the Secretary to recompute sales and use tax if, after examining a return, he determines the correct amount of tax is greater or less than the amount shown on the return and to credit or refund excessive payments. This statute, which is specific to sales and use tax, is unnecessary because G.S. 105-241.7 gives the Secretary this authority for all tax types.
15	Provides liability relief to retailers for erroneous information provided by the Department regarding the taxability of certain items or insufficient notice regarding a sales tax rate change as required by the Streamlined Agreement.
16	Clarifies that the credit allowed under Article 5F for similar tax paid to another state also applies to sales and use tax paid in this State and not just paid to another state.

[140] This change was requested by the Department after the introduction of the bill and was not included in the original Revenue Laws recommendation.

17	Corrects references to Department Divisions based on reorganization. Adds various forms of identity theft to the subject matter jurisdiction of revenue law enforcement officers. Generally speaking, revenue law enforcement officers have the authority to serve and execute notices, orders, warrants, and demands, have full powers of arrest, and must be certified as criminal justice officers.
18	Deletes obsolete provision. The Secretary no longer makes a final agency decision in contested tax cases. Substantive final decisions are published on the OAH website.
19	Amends the secrecy statute as follows: (15a): Modifies the circumstances under which the Department may share information with law enforcement agencies. On occasion, the Department has shared information with the IRS or another taxing jurisdiction under G.S. 105-259(b)(3) that is connected to a criminal investigation. However, some of the information shared may be information that is not "discovered" in the course of the investigation (i.e. audits that occurred prior to the criminal investigation that led the Department to initiate the criminal investigation). While those records may be shared with other taxing agencies (i.e. the IRS) under (b)(3), there may not be specific authorization to share the information with prosecutors (i.e. the US Attorney) who later are working on the criminal case. In addition, the change gets rid of awkward language regarding who may receive the information. The Department has agreements with all agencies with whom it is allowed to share information listing the specific individuals allowed to receive the information. A literal reading of the current language would allow the Department to share the info only with the head of the agency. It clarifies that a prosecutorial agency is a law enforcement agency. Finally, it allows the share of information with local law enforcement or law enforcement from another state. (25)[141] Permits the Department to include a retailer's registration number in the public database of retailers who are authorized to collect sales and use tax. The Department already maintains a publicly accessible database listing the names of retailers authorized to collect sales and use tax. Many sellers use the online registry to verify sales and use tax numbers provided by customers who present an exemption certificate. (29): Corrects a citation and statutory reference.[142]

[141] This change has been requested by the Department since the introduction of the bill and was not included in the original Revenue Laws recommendation.
[142] Part 2F of Article 10 of Chapter 143B relates to the E-NC Initiative and has been repealed.

20	Conforms payment for TIMS to current practice. The language in the 2012-13 budget bill differed from standard practice used by DOR since the beginning of benefits funding for the project. Technically, OSBM authorizes DOR to make purchases rather than making those purchases itself.
21	Modifies the circumstances under which the Department may share information regarding the unauthorized substances tax. The current restriction on disclosure could prevent Department employees from sharing information in situations that do not present concerns about Constitutional protections for criminal defendants like double jeopardy or self-incrimination such as: • A prosecutor investigates allegations of law enforcement unlawfully seizing property from specific individuals. Law enforcement personnel report the property has been turned over the Department to satisfy a tax debt. • A prosecutor requests information from the Department in order to satisfy his obligation to provide the defendant in a criminal case with potentially exculpatory information. • A Department employee serving a tax warrant witnesses a crime committed by the taxpayer against a third party.
22	Subsection (a) clarifies the procedure and requirements for obtaining a license for the distribution of tobacco products and provides the Department with specific guidance as to when a license may be denied. This subsection also requires the Department to include certain information on the face of each license, and directs the Department to keep a record of license holders that may be provided to other license holders upon request. Subsection (b) clarifies the violations for which the Secretary, after a hearing, may cancel a license for the distribution of tobacco products. Subsection (c) clarifies a distributor of cigarettes may provide security to the Secretary in the form of an irrevocable letter of credit as an alternative to a bond. This subsection also deletes a redundant provision for investigation of license applicants. This section became effective September 1, 2013.

23	Makes changes to the sourcing of direct mail to comply with Streamlined requirements. Under current law, direct mail is sourced to the location from which it is shipped unless it was purchased using a direct pay permit or the purchaser provides the seller with information showing the jurisdictions to which the mail is to be delivered. In those instances, the mail is sourced to the delivery location. Under the Streamlined Agreement, direct mail categorized into "advertising and promotional direct mail" and "other direct mail." The current law as stated above is accurate except that "other direct mail" (direct mail other than advertising and promotional direct mail) should be sourced to the purchaser's address available from the seller's business records if the mail is not purchased using a direct pay permit or if the purchaser does not provide the seller with jurisdictional delivery information.
ADDITIONAL CHANGES	
30	Corrects a citation.
31	Clarifies that Department personnel have the right to access a specialty market registration list. This clarification will assist with compliance checks by Department employees and provide clear direction that operators are required to obtain and provide information to assist with administration and collection of sales tax at events.
32	Adds a sunset to 105-129.16H, which is the credit for donating funds to a nonprofit or unit of State or local government to enable that entity to acquire renewable energy property. G.S. 105-129.16A, which is the credit for investing in renewable energy property, currently has a sunset of January 1, 2016. The same sunset is implied for G.S. 105-129.16H to the extent the credit is tied to G.S. 105-129.16A; that is, G.S. 105-129.16H allows the same credit when the purchaser of renewable energy property is a nonprofit that is not subject to income tax.
33	Deletes the word "large" from the statute. This is a technical change because the credit for large recycling facilities was repealed by S.L. 2010-166.[143]

[143] The repeal of this credit was a recommendation of the Revenue Laws Study Committee because the incentive was never utilized. The credit was intended for Wisconsin Tissue; however, that company never located in North Carolina.

34	Consolidates the bonus depreciation and section 179 expensing provisions related to decoupling from the Code into a new, stand-alone statute. However, G.S. 105-130.5B(c) and G.S. 105-134.6A(c) contain a drafting error that needs to be corrected. Those subsections state that the investment limitation for tax year 2013 is $125,000 when it should be $200,000. It is anticipated that the General Assembly will make this correction in the 2014 Session. Provides that in the event of a transfer of assets, instead of taking any remaining bonus depreciation deductions, the transferee adds the amount of any remaining deductions to the basis of the transferred asset.
35	Effectuates intent of IRC Update (S.L. 2013-10) by clarifying that charitable deduction is not subject to charitable contribution limitation and carryover provisions but is subject to the overall limitation on itemized deductions under section 68 of the Code.
36	Makes conforming changes required by the fact that G.S. 105-130.6, which dealt with forced combinations, was repealed in 2011 and replaced with a new statute. The definitions for "subsidiary" and "affiliate" are the same definitions that were in G.S. 105-130.6.
37	Modifies the individual income tax credit for charitable contributions by non-itemizers for tax year 2013 by including in the taxpayer's excess charitable contributions the amount by which the taxpayer's charitable contributions for the taxable year would have been deductible under Section 170 of the Code had the taxpayer not elected to take the income exclusion under Section 408(d)(8) of the Code that exceed two percent of the taxpayer's adjusted gross income.
38	Makes a technical change to reflect the fact that the starting point for calculating North Carolina taxable income is adjusted gross income.
39	Gives the Department flexibility in requiring electronic submissions.
40	Makes the sales tax imposition statute for digital property mirror the sales tax imposition statute for tangible personal property to make clear that the imposition of sales tax on digital property includes lease or rental. This is a technical change.
41	Adds the word "product" to the sourcing provisions for mobile telecommunications, which currently covers only services. This change was recommended by Streamlined in light of the fact that under the federal Mobile Telecommunications Sourcing Act, sales of certain digital products, such as a ringtone, is adjunct to mobile telecommunication service and is, therefore, sourced under the mobile sourcing provisions.

42	Clarifies that joint library systems that serve two or more counties, or counties and cities, are allowed the sales and use tax refund as a public library.[144] Currently, the sales and use tax refund for public libraries applies only to public libraries created by act of the General Assembly. While most libraries are part of a city or county government and receive the refund due to the county/city refund provision, some libraries were chartered by an act of the General Assembly.[145] A public library may also be established jointly by two or more counties or cities and counties under general authority granted in G.S. 153A-270. This provision would allow libraries created pursuant to this general authority, in addition to those created by a specific local act of the General Assembly, to be eligible for a sales and use tax refund.
43	Rewrites the provision dealing with a certificate of exemption for sales tax purposes in light of changes adopted by the Streamlined Governing Board. Among the changes is the requirement that a retailer must pay within 90 days sales tax on a transaction unless it obtains a fully completed exemption certificate, or within 120 days upon audit.
44	Allows the Secretary of Revenue to authorize the Streamlined Sales Tax Governing Board to contract, on behalf of the Secretary, with a certified service provider for the collection and remittance of sales and use taxes on behalf of the seller.
45	Makes a technical change to the distribution of part of the sales tax on video programming service and telecommunications service to counties and cities. In 2010, the General Assembly repealed the PEG Grant Fund and increased the revenues from the video programming sales tax designated for Supplemental PEG channel support to $4 million per year.[146] However, the distributional section of the statute was not amended accordingly and still refers to $2 million.
46	Modernizes the language and clarifies that the activities at the establishment must fall within the applicable NAICS code.

[144] **§ 153A-270. Joint libraries; contracts for library services.**
Two or more counties or cities or counties and cities may establish a joint library system or contract for library services, according to the procedures and provisions of Chapter 160A, Article 20, Part 1.
[145] The Public Library of Charlotte and Mecklenburg County was chartered in 1903 by act of the General Assembly.
[146] S.L. 2010-158.

47	Codifies the Department's administrative practice of allowing protective refund claims. Generally speaking, there is a time limit within which a taxpayer may file a claim for refund. If the claim for refund is not timely filed, it will be barred. Occasionally, a taxpayer's right to a potential refund is based on a contingent event, such as pending litigation or an ongoing income tax audit in another state, for a taxable period for which the statute of limitations is about to expire, and the outcome of that event may affect the North Carolina tax liability. The Department has administratively allowed for a taxpayer in these circumstances to file a timely but incomplete claim for refund, known as a "protective refund claim," and then later perfect the claim when the essential information becomes available. The new provision requires the taxpayer to file the claim within 6 months of the conclusion of the contingent event. Under prior practice, there was no stated timeline for filing a protective claim. The taxpayer is also required to indicate an estimated amount of the overpayment. Previously, an estimate was not required.
48	Clarifies when a person may object to a proposed rule related to the Secretary's authority to require a combined return and request review by the Rules Review Commission (RRC). The rulemaking process allows an agency to change the text of a proposed rule in response to comments and objections raised during the public hearing and comment period, but a person should not be able to subject a rule to RRC review until the agency has adopted the rule. Under this rewrite, a person may only subject the rule to RRC review after the agency has adopted the rule rather than prior to its adoption.
49	Clarifies that it is the intent of the General Assembly to harmonize the language of the local statutes to be consistent with the State sales and use tax statues. These changes clarify that the local statutes are intended to be consistent with G.S. 105-164.8(c) relative to imposition of tax and destination sourcing requirements.

50	Allows a regional public transportation authority created under Article 26 of Chapter 160A[147] to create a special district consisting of one or more counties within its territorial jurisdiction to levy an annual license tax upon any motor vehicle in its jurisdiction to raise revenue for capital and operating expenses of the Authority in providing public transportation systems. Under prior law, regional public transportation authorities can only levy the tax if all counties in the region agree to the tax. Regional transportation authorities created under Article 27 of Chapter 160A[148] already have the authority to levy the tax if less than all of the member counties approve the tax.
51	Codifies Departmental policy promulgated in an Important Notice dated June 30, 2011, that lease receipts billed on or after July 1, 2011, are subject to the 4.75% State rate of sales tax instead of the 5.75% State rate of sales tax, regardless of the fact that the lease was entered into for a definite period of time prior to July 1, 2011, at which time the rate was 5.75%.[149]
52	Makes two clarifying changes regarding the retention by the Department of Revenue of the 911 surcharge for the first year of implementation. S.L. 2011-122 authorized collection of the 911 service charge for prepaid wireless service at the point of retail sale. Although the charge is not a tax, it is collected by the Department of Revenue. To offset the cost of collection, the Department is authorized to retain the cost of collection below a cap. This section clarifies the first year cap applies to the surcharge collected by the retailers in the first year. Due to the delay of the remittance, not all of the charges collected by retailers in the first 12 months will be remitted to the Department in those first 12 months. This section also clarifies that the Department may retain costs incurred by the Department prior to the effective date of the surcharge. In order to ensure compliance, the Department has mailed notification of the law change to all entities that remit the 911 surcharge prior to the effective date of the surcharge.

[147] This Article applies to the Research Triangle Regional Public Transportation Authority, better known as Triangle Transit or TTA, which is a three-county regional public transit agency serving Wake, Durham and Orange Counties.

[148] This Article applies to the Piedmont Authority for Regional Transportation (PART), which provides inter-city and regional public transportation for the Greensboro, Winston-Salem and High Point, NC area.

[149] S.L. 2009-451 provided for a temporary 1% State sales tax increase (to 5.75%) with a July 1, 2011 expiration date. Without further legislation action, the State sales tax rate returned to 4.75% on July 1, 2011.

53	Requires the Department of Revenue to allocate and distribute to cities and counties the amount equal to the average of the local sales and use taxes that was allocated and distributed to them in the preceding three fiscal years if the Department cannot accurately identify and calculate correct amounts for distributions payable in fiscal year 2014-15 because of implementation issues with the Tax Information Management System (TIMS).
54	Expands eligibility for a refund of sales and use taxes to include volunteer fire departments and EMS squads that are financially accountable to a city, a county, or a group of cities and counties and not merely those that are exempt from income tax under the Internal Revenue Code. The IRS treats entities that are financially accountable to a city or a county as tax exempt without any formal determination process. This section modifies the refund statute to match the current IRS practice and allow refunds to entities that would be treated by the IRS as tax exempt under the Internal Revenue Code. The NC Department of Revenue (DOR) has administratively ruled that some volunteer fire departments and volunteer EMS qualify for refunds of sales and use tax because the entities are financially accountable to a city or a county. This provision became effective July 1, 2013, and applies to purchases occurring on or after that date.
55	Makes technical citation changes.
56	Provides that a responsible person in a business entity is personally and individually liable only for the principal amount of taxes owed by the business entity. As recommended by the Revenue Laws Study Committee, the original bill included a proposal to clarify that penalties and interest, in addition to the principal amount of taxes, transfers to a responsible officer in a business entity that fails to pay taxes owed. During discussion in House Finance, the bill was amended to delete this provision, the intent being that a responsible officer should not be liable for penalties and interest. This provision more clearly effectuates that intent by specifically stating that the responsible person may only be liable for the principal amount of taxes owed. This provision became effective when the act became law on August 23, 2013, and applies to assessments proposed on or after that date.
57	Authorizes a new special registration plate for the North Carolina Paddle Festival. The plate costs $30, and the proceeds go to the Friends of the Hammocks and Bear Island, Inc.

58	Makes a series of technical and conforming changes to conform to the passage of S.L. 2013-316 (H998). Subsection (a) incorporates the changes made by Section 34(d) of this act. Subsection (b) repeals reporting requirements that are no longer necessary because the tax credits for which the information is needed have been eliminated. Subsection (c) corrects statutory references. Subsection (d) maintains the current authority cities have to impose a local privilege tax on live entertainment. Under current law, a local tax may not exceed $25. Without this clarification, a city's authority to impose a privilege tax on live entertainment could be interpreted to be more expansive than current law. Subsection (e) does two things: (1) it defines the term "State attraction" for purposes of the sales tax exemption as a physical place supported with State funds that offers cultural, educational, historical, or recreational opportunities, and (2) it exempts from sales tax a service contract provided for an item purchased by a professional motorsports racing team for which it is allowed a sales tax refund under current law.
OCCUPANCY TAX CHANGES	
60	Makes technical changes to various local occupancy tax acts so that they conform to changes made to the Uniform Provisions for Room Occupancy Taxes. In 2010[150] the General Assembly amended the uniform provisions governing occupancy tax to provide that room occupancy tax applies to the same gross receipts as the State sales tax on accommodations and is calculated in the same manner as that tax. The legislation further provided that to the extent this provision conflicts with any provision of a local act, the general law supersedes the local provision. Therefore, the changes in this section are technical because to the extent they conflict with State law, they have been superseded by the 2010 legislation. Specifically, there is no State sales tax exemption for businesses that rent fewer than five units, and the exemption for summer camps is not needed because they are already exempt under State law. The other deletions also reflect the application of State sales tax on accommodations. The table below shows the localities impacted because their legislation either imposes an occupancy tax on campgrounds/campsites or exempts from occupancy tax all or some combination of the following: • A business that offers to rent fewer than five units • Summer camps

TAX & TAG TOGETHER MOTOR VEHICLE PROPERTY TAX SYSTEM CHANGES

In 2005, the General Assembly created a framework establishing a combined system for motor vehicle registration renewal and property tax collection. Originally, the act was to become effective the earlier of January 1, 2009, or the date that the Department of Revenue and the Division of Motor Vehicles certified that an integrated computer system is in operation. The effective date was subsequently extended, and the system went into effect July 1, 2013. Under the new system, the taxpayer/motor vehicle owner will receive one bill for property taxes and the DMV license renewal, and DMV will be the collecting authority. Counties will still determine the value and the taxability situs of motor vehicles. A number of conforming changes are needed to fully implement the combined system. Sections 70-72 of this act consist of those changes.

70	Makes two changes to the effective dates of the acts that establish the combined system: • Removes conditional language. – The current effective date for the combined system contained a conditional clause that allowed the system to be effective earlier than July 1, 2013, if the integrated computer system was operational. The system went online as of July 1, 2013. Therefore, the conditional clause is deleted from the effective dates. • Clarifies local government authority. – Although the tax year for registered motor vehicles does not change under the combined system, the collection date for property taxes is earlier under the combined system. For the months of July, August, and September, local governments will send bills for tax years that begin on or before September 1, 2013. During those same months, the Tax and Tag Together system will begin to send bills for tax years that begin after September 1, 2013. The effective date is amended to clarify local government authority to collect property tax for tax years beginning on or before September 1, 2013, under the statutes as in effect June 30, 2013.
71	Repeals certain prior technical and conforming changes that are now inconsistent with the statutes since they became effective July 1, 2013, and recodifies the necessary technical changes. Over eight different session laws have amended the Tag and Tax Together system. The effective date for the system has also been changed at least three times. The combination of the multiple changes has made further technical changes difficult to make.
71(a)	Repeals inconsistent changes.

71(b)	Clarifies the appeals process for motor vehicle property tax. A taxpayer may appeal motor vehicle taxes on a number of grounds: the valuation by the county, the denial of an application for exemption or exclusion, and on the grounds that the county does not have authority to tax the vehicle because the situs of the vehicle is in another taxing district. The term "taxability" in the appeal statutes has been used to refer to both exemption status and situs, but because there are different time periods that apply depending on the basis of a taxpayer's appeal, the Department recommends separating the statutory provisions.[151] Therefore, this section strikes the term "taxability" from G.S. 105-330.2(b1) so that, as amended, this subsection would apply only to appeals based on valuation. It also creates a new subsection (b2) to address appeals based on an application for exemption or exclusion. Appeals based on a county's authority to tax are covered under current law in G.S. 105-381.
71(c)	Establishes a process for the collection of property tax on an unregistered vehicle. The objective of the process is to ensure that the taxpayer is not double-taxed and that property taxes are paid on motor vehicles that a person owns even if it is not registered. If a person does not register or renew registration, then the person would be required to list the vehicle with the county assessor. The listing will generate a tax bill. However, if the person subsequently registers or renews the tag for the vehicle, then DMV will charge the person for the registration plus the property tax. This provision allows a county to ignore the listing to the extent the person registered or renewed within the same year.

[151] A taxpayer has 30 days to appeal a determination of value or eligibility for an exemption or exclusion. However, there is a five-year period to appeal an "illegal" tax under G.S. 105-381.

71(d)	Clarifies that counties would have authority to use collection remedies for unpaid motor vehicle taxes that were billed prior to the effective date of the combined motor vehicle/property tax system. With a July 1 effective date, the first bills sent under the combined system will be for September registration renewals. The October 1st date is used because the tax year for September renewals begins October 1. It allows 45 days before the second month's interest begins. This is needed due to DMV's business process which DOR thinks may cause some taxpayers who pay by mail to get caught in a loop of sending in the payment after the due date, and the payment would be rejected. Without this change, the next month's interest would start before they got the correct amount mailed back in to DMV. This section also changes the term "tax collector" to "collecting authority" because under the new system, DMV and not the county tax assessor or tax collector will be the collecting authority.
72	Allows vehicles of victims of domestic violence, sexual offense, stalking, or human trafficking vehicles to be billed as other personal property, keeping the addresses confidential. Chapter 15C of the General Statutes establishes an Address Confidentiality Program to protect the confidentiality of the addresses of victims of domestic violence, sexual offense, stalking, or human trafficking. If these vehicles were taxed under the combined system, the address would not be confidential.

2012 Finance Law Changes

Extend Tax Provisions.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-36	**HB 1025**	**Rep. Howard, Starnes**

AN ACT TO EXTEND THE SUNSET OF CERTAIN TAX PROVISIONS.

OVERVIEW: This act extends several preferential tax provisions.

FISCAL IMPACT: The act will reduce General Fund revenues by $0.8 million in fiscal year 2012-2013. *(For a more complete fiscal analysis, see Finance Committee Highlights, 2012 Session, available online at www.ncleg.net.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 20, 2012.

ANALYSIS: North Carolina typically imposes a sunset on its tax credits, deductions, and refunds so they may be periodically reviewed to ensure they continue to achieve the policy goals intended. It is anticipated that major tax modernization will be undertaken during the 2013 session of the General Assembly. This act extends several preferential tax provisions through 2013 in order to maintain the current state of the North Carolina tax code until comprehensive tax modernization can be considered. The only credits extended beyond the 2013 taxable year were the income tax credits for rehabilitating historic structures and historic mill property[152] and the film credit,[153] which were extended through the 2014 taxable year.

Specifically, the act extends the tier one designation for seafood industrial parks through July 1, 2013. It extends the following income tax credits through January 1, 2014:

- Tax credit for renewable fuel facilities.
- Tax credit for biodiesel producers.
- Work opportunity tax credit.
- Article 3J tax credits.
- Tax credit for recycling oyster shells.
- Tax credit for premiums on long-term care insurance.
- Refundable earned income tax credit.
- Tax credit for adoption expenses.
- Tax credit for qualified business ventures. Lastly, it extends the following sales tax refunds through January 1, 2014:

[152][152] Section 12 of the act.
[153] S.L. 2012-194.

- Passenger air carriers.
- Machinery and equipment place in a tier 1 county.
- Aviation fuel for motorsports team of sanctioning body.
- Analytical services.
- Certain industrial facilities.

Expedited Rule Making for Forced Combination.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-43	**SB 824**	**Sen. Rucho, Hartsell**

AN ACT TO REQUIRE THE SECRETARY OF REVENUE'S INTERPRETATION OF THE LAW CONCERNING THE SECRETARY'S AUTHORITY TO ADJUST NET INCOME OR REQUIRE A COMBINED RETURN BE MADE THROUGH RULE MAKING AND TO PROVIDE AN EXPEDITED PROCESS FOR RULE MAKING ON THIS ISSUE.

OVERVIEW: This act requires the Department of Revenue to adopt rules regarding its interpretation of the statute enacted in 2011[154] that gives the Secretary of Revenue the authority to force combination of separate entity returns. The act provides an expedited rule-making process for these rules. The legislation was a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 14, 2012.

ANALYSIS: The issue of forced combination of separate entity returns began as a dispute between taxpayers and the Department of Revenue. Taxpayers have argued that the Department offered little to no guidance on how it interpreted the statutes that authorized it to force combination of separate entity returns. The N.C. Court of Appeals affirmed the Department's authority to force combination of separate entity returns in *Wal-Mart Stores East, Inc. v. Hinton.*[155] Although the Business Court upheld the Department's combination assessment against Delhaize in 2011, it struck the penalties imposed by the Department on the taxpayer for failure to file the combined return because it noted that the Department "worked actively to conceal the standards its decision makers were using when exercising their authority to combine returns."[156]

Largely in response to this litigation, the General Assembly enacted legislation in 2011 repealing the statute upon which the Department derived its authority to force combination of separate

[154] G.S. 105-130.5A.
[155] 197 N.C. App. 30 (2009).
[156] *Delhaize America Inc. v. Lay,* 06 CVS 08416 (Wake County Superior Court, Jan. 12, 2011), on appeal as, *Delhaize America, Inc. v Hoyle*, NC Ct of Appeals Docket No. 11-868.

entity returns and replaced it with more limited statutory authority.[157] The Department issued the first Corporate Tax Directive[158] it has issued since 2008 on the Secretary's authority to require a corporation to file a combined return under the new statute. The Revenue Laws Study Committee discussed the directive and how the Department administers its discretionary authority.[159] Throughout the hearings, the Committee expressed strong concerns on the need for the Department to provide clarity on the law for taxpayers and a belief that the guidance should be provided through the rulemaking process, especially on the issue of forced combinations. The Department voiced strong concerns about its ability to effectively and efficiently administer the tax laws if it had to undertake rulemaking for all of the guidance it provides. In the debate, the Committee identified three goals:

- The need for taxpayer certainty about the tax laws.
- The need for an outside determination as to whether the Department has exceeded its statutory authority in its interpretation of the law.
- The opportunity for public notice and comment on the Department's interpretation of the law.

This act seeks to balance these three goals. It requires the Secretary to adopt rules providing guidance to taxpayers on its administration of G.S. 105-130.5A, the newly enacted law regarding the Secretary's ability to redetermine a corporation's State net taxable income by adjustment or by forced combination. The act does not extend the rulemaking requirement to all interpretations of the tax laws by the Department because the Revenue Laws Study Committee did not have time to resolve the issues a larger proposal would entail; however, legislators have expressed a desire to consider a more far-reaching rulemaking requirement.

The act provides that the rulemaking procedure for the interpretation of G.S. 105-130.5A will follow the timetable for temporary rulemaking. This process may be completed in less than two months. This process allows 15 days for notice and comment from outside parties. Anyone may object to a proposed rule during the notice and comment period or within three business days of the adoption of the rule by requesting review by the Rules Review Commission (RRC). To ensure that all parties have knowledge of the adoption of a rule, the act requires the Department to provide electronic notification of its adoption of a rule to persons who are on the mailing list, who were originally given notice of the rulemaking, and who provided comment on the rule. If no one requests review by the RRC, the adopted rule may be delivered to the Codifier of Rules and entered into the Code. If the Department receives a written objection to the rule and a request that the rule be reviewed, then the RRC must review the rule within 15 days. The RRC may not extend the period of time for review. As provided in G.S. 150B-21.9, the RRC does not consider questions relating to the quality or efficacy of the rule, but limits its review to the following:

- Is the rule within the authority delegated to the agency?
- Is it clear and unambiguous?

[157] S.L. 2011-390, G.S. 105-130.5A.

[158] Corporate Income Tax Directives Table of Contents

[159] Revenue Laws Study Committee Report (2012), see "Combined Reporting and Interpretation of Tax Laws" beginning on page 6 of the report.

- Is it reasonably necessary to implement or interpret an act of the General Assembly or of Congress or of a regulation of a federal agency?
- Was it adopted in accordance with G.S. 105-262.1?

The act changes the fiscal note requirement for rulemaking to allow the Department to prepare its own fiscal note. It will not need to submit the fiscal note to the Office of State Budget and Management. The fiscal note must be submitted with the proposed rule to the Codifier of Rules and posted on the Internet. A person may comment on the fiscal note in the same manner a person may comment on a proposed rule. Section 4 of the act provides that the Department does not need to prepare a fiscal note for a proposed rule submitted to the Codifier of Rules prior to December 31, 2012. The reason for this waiver is that any rule submitted before the end of this calendar year under the statute created by this act is limited to the Department's application of G.S. 105-130.5A. The subject of the rule has been debated in the General Assembly during the 2011 session, where the Fiscal Research Division prepared a fiscal memo, and it has been the subject of four Revenue Laws Study Committee meetings in 2011 and 2012. The fiscal issues surrounding this particular rule appear to be well-known and understood by all the parties.

The act exempts rules proposed by the Department from the delayed effective date provisions that apply whenever the RRC receives 10 or more objections to a rule requesting review by the legislature. A rule adopted under this expedited process becomes effective on the last day of the month the Codifier of Rules enters the rule in the Code. This effective date provision differs from the general effective date provision in Chapter 150B and enables the rule to become effective a month earlier. Section 6 of the act clarifies that the Secretary's authority under G.S. 105-130.5A exists continuously for taxable years beginning on or after January 1, 2012. After a rule becomes effective, the Secretary may issue a proposed denial of a refund or a proposed assessment under the authority of G.S. 105-130.5A for any taxable year that beginning on or after January 1, 2012.

The act only applies to G.S. 105-130.5A. It does not apply to the Secretary's interpretations of the repealed statutes that continue to be applicable for taxable years beginning before January 1, 2012: G.S. 105-130.6, 105-130.15, and 105-130.16. The Department has issued a directive offering guidance on its interpretation of those laws, CD-12-01, and the directive appears to set forth the Department's application of the law as upheld by the North Carolina Courts. The Department has also issued a directive offering guidance on its interpretation of the newly enacted law, G.S. 105-130.5A, in CD-12-02. Section 5 of the act provides that a taxpayer who relied upon the interpretation in that Directive and whose North Carolina taxable income for the 2012 taxable year is less under the Directive's interpretation than under an interpretation adopted through the rulemaking process may rely on the interpretation under the Directive for the 2012 taxable year.

Appraisal Mgmt Co Reported to Dept of Revenue.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-65	**HB 1028**	**Rep. Howard, Starnes**

AN ACT TO REQUIRE THE NORTH CAROLINA APPRAISAL BOARD TO REPORT THE RECORDS OF APPRAISAL MANAGEMENT

COMPANIES TO THE NORTH CAROLINA DEPARTMENT OF REVENUE.

OVERVIEW: This act requires the North Carolina Appraisal Board to report annually to the North Carolina Department of Revenue the following information about registered appraisal management companies: name; address; process agent, if any; type of entity; employer identification number or social security number; and North Carolina Secretary of State identification number, if any. The legislation was a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 26, 2012.

ANALYSIS: The North Carolina Appraisal Board regulates real estate appraisal management companies, which are defined as entities that use a network of licensed appraisers who are independent contractors to perform appraisals. Federal regulations adopted in response to the housing crisis led to the growth of appraisal management companies. The appraisal management companies are intended to increase the quality and reliability of appraisals to prevent another housing crisis. The State began requiring appraisal management companies to register with the Appraisal Board in January 2011.[160] The Board has approximately 140 registered appraisal management companies. Only six of the 140 are North Carolina companies.

Although the out-of-state companies owe State income tax on the appraisal work conducted within the State, the Revenue Laws Study Committee questioned whether the companies were reporting the income and paying the tax. The purpose of the act is to insure out-of-state appraisal management companies are complying with North Carolina tax law. This act requires the Appraisal Board to report annually to the Department of Revenue information collected from appraisal management companies during a registration process. All of the information this act requires the Appraisal Board to report is already disclosed when an appraisal management company registers. The Department of Revenue will be able to use the information from the Appraisal Board to check the filing status of registered appraisal management companies.

RTP District Amendments.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-73	**HB 391**	**Rep. Avila, Torbett**

AN ACT TO REVISE THE LAWS RELATING TO COUNTY RESEARCH AND PRODUCTION SERVICE DISTRICTS TO REFLECT CHANGED CIRCUMSTANCES, TO ALLOW FLEXIBILITY IN PROVISION OF SERVICES IN URBAN AREAS OF SUCH DISTRICTS, AND TO AMEND THE COUNTY SERVICE DISTRICT ACT OF 1973 RELATING

[160] S.L. 2010-141, Article 2 of Chapter 93E of the General Statutes.

TO APPROVAL OF PROPERTY TAXES IN MULTIJURISDICTIONAL INDUSTRIAL PARK DISTRICTS.

OVERVIEW: This act amends the authorizing statutes for county research and production districts to allow for additional permitted uses in the districts, including mixed-use development that combines residential, retail, and business use. The act also allows each county in which a multijurisdictional industrial park is located to levy a tax in the portion of the park in that county and increases the property tax limit in multijurisdictional industrial parks.

FISCAL IMPACT: This act has no fiscal impact at the State level.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 26, 2012.

ANALYSIS: In 1985, the General Assembly authorized counties to establish county research and production districts. Under this authority, a board of commissioners may, by resolution, establish a research and production district for any area of the county if the area meets the statutory standards. Prior to passing a resolution creating the district, the board of county commissioners must publish a report outlining the district and hold a public hearing on the formation of the district. Multi-county districts are also authorized. For multi-county districts, the boards of county commissioners may pass concurrent resolutions. A county may levy property taxes within the district in addition to those levied throughout the county with a cap of 10¢ on each $100 value of taxable property.

The original standards for a research and production service district limited real property in the district to use for research or scientifically-oriented production or for associated commercial or institutional purposes. The original standards also included acreage requirements, employment requirements, and a restriction on the number of permanent residents in the district. The standards also provided that no part of a district could be within the boundaries of any incorporated city or town. At the time the county research and production service district legislation was enacted it was assumed that the Research Triangle Park would be the only district created under the act due to the acreage and employment level standards need to qualify for the creation of a district.

In 2009, the General Assembly amended these standards to allow for the creation of a district if all of the real property in the district is part of a multijurisdictional industrial park.[161] The maximum property tax rate for a district in a multijurisdictional industrial park is 15¢ on each $100 value of taxable property. Currently, there is one multijurisdictional industrial park, Triangle North, located in Franklin, Granville, Vance, and Warren Counties.

This act broadens the permitted uses in county research and production districts to allow for mixed-use development that combines residential, retail, and business use. The expansion of the permitted uses was requested by the Research Triangle Foundation. The Foundation sought to expand the purposes in county research and production service district to adapt to changing business models and remain competitive in attracting new tenants.

Specifically, real property in a district may be used for the following additional purposes:

Scientifically-oriented technology and education.

---

[161] S.L. 2009-523.

Residential purposes associated with scientifically-oriented production, technology, or education.

Any other purpose specifically authorized in the covenants adopted to restrict the use of the real property.

To finance the increase in services that must be provided in areas with residential development, the act also authorizes a board of county commissioners (board) to establish urban research service districts (URSD) within existing county research and production districts. The method of formation and governance of URSDs are substantially similar to provisions for county research and production service districts.

A URSD must be wholly located within a county research and production service district, must be wholly located within the county that establishes the URSD, and may not be contained in any other URSD. Prior to establishing a URSD, the board must receive a petition requesting creation of the URSD from 50% of the owners of real property in the proposed URSD that own at least 50% of the total area of the real property in the proposed URSD.

The board must provide an advisory committee for each URSD. The advisory committee will consist of owners and tenants of the URSD, an appointee of the developer of the district in which the URSD is located, and appointees of the board. The committee will advise the board on the services, facilities, and functions of the URSD.

To extend an URSD, the board must find the following: (1) the covenants restricting the use of real property will apply to the extension area; (2) 100% of the owners of real property in the extension area request to be added to the URSD; (3) the extension area is contiguous to the URSD; and (4) the extension area requires the additional services, facilities, or functions served by the USRD.

To remove area from an USRD, the Board must find the following: (1) the removal is recommended by a vote of two-thirds of the owners and tenants association and requested by 100% of property owners in the area to be removed; (2) the area to be removed no longer requires the additional services, facilities, or functions served by the USRD; and (3) the county has not financed any project for which taxes are levied on the area.

The board must provide services for which the URSD is being taxed in a reasonable time. The board may also authorize the developer of the county research and production service district in which the URSD is located to contract with any local government for services within the URSD.

The board may levy taxes in the URSD to finance and maintain services within the URSD. The taxes levied in the URSD are in addition to the taxes levied at the county level and the taxes levied in the research and development district. The rate of the tax in the URSD may not exceed the rate levied in the city with the largest population that is 1) contiguous to the county research and production service district in which the URSD is located, and 2) located primarily with in the same county as the URSD.[162] The taxes levied may be used for services in the URSD and debt service for debt incurred by the county for capital projects in the URSD.

This act also allows each county in which a multijurisdictional industrial park is located to determine whether or not to levy a tax in the portion of the park in that county. This change was

[162] There are three cities contiguous to RTP that could potentially meet this definition: Cary (tax rate of 33¢ per $100 value of taxable property); Durham (tax rate 55¢ per $100 value of taxable property); and Morrisville (tax rate 36¢ per $100 value of taxable property).

requested by the existing multijurisdictional industrial park, Triangle North. Unlike Research Triangle Park, Triangle North does not consist of one contiguous tract of land. Due to the separation of the tracts, each county with a portion of the park in its jurisdiction requested the flexibility to levy taxes appropriate to the level of service required in the portion of the park in that county. The act also increases the property tax limit in multijurisdictional industrial parks from 15¢ on each $100 value of taxable property to 20¢ on each $100 value of taxable property.

Economic Devpt. & Finance Changes.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-74	**HB 1015**	**Rep. Howard, Starnes**

AN ACT TO SET THE REGULATORY FEES AND TO ENHANCE ECONOMIC DEVELOPMENT.

OVERVIEW: This act does the following:

- Sets the rates for the public utility regulatory fees and the insurance regulatory charge for FY12-13 that are necessary to fund the Public Utilities Commission and the Department of Insurance. The rates for this year are the same as the rates for the prior fiscal year. The utility regulatory rates are expected to generate $14.2 million, and they became effective July 1, 2012. The insurance regulatory charge is expected to generate $29.98 million, and it became effective when the Governor signed it into law on June 26, 2012.
- Creates an individual income tax deduction for educator expenses to ensure that North Carolina educators will continue to receive the same tax benefit they have received since 2002, regardless of whether Congress extends the federal educator expense deduction. The deduction will reduce General Fund revenue by $1.8 million for FY 2012-13. The provision is effective for taxable years beginning on or after January 1, 2012.
- Clarifies and extends the time to apply for a sales tax refund of aviation fuel for FY 2010-11 and FY 2011-12. The refund will reduce General Fund revenues by $3.15 million for FY 2012-13 and it will reduce local government revenues by $2.72 million.[163] The provision became effective when the Governor signed it into law on June 26, 2012.
- Permits the use of Industrial Development Fund moneys for sewer infrastructure projects in adjoining counties. This provision has no General Fund impact; the IDF does not receive General Fund appropriations, it is funded by loan repayments only. The provision became effective when the Governor signed it into law on June 26, 2012.
- Temporarily allows a 20-year carryforward period under Article 3J for a taxpayer who makes an investment of $100 million in a tier one county. The change may decrease General Fund revenues by $2.4 million over the 20-year lifetime of the credit. The temporary change is effective for taxable years beginning on or after January 1, 2012, and expires for taxable years beginning on or after January 1, 2013.

[163] The local government revenue loss would be felt primarily in Forsyth and Mecklenburg Counties.

- Makes a technical correction to the definition of a port enhancement zone. This change has no fiscal impact. The correction becomes effective for taxable years beginning on or after January 1, 2013; this effective date is the same effective date applicable to the 2011 legislation that this provision clarifies.
- Accelerates the sales tax relief enacted in 2011 for purchases of specialized equipment used at State ports by providing a one-year sales tax refund for these purchases made in FY 2012-13. This provision is expected to decrease General Fund revenues by $58,000 to $64,000 in FY 2013-14. The provision became effective when the Governor signed it into law on June 26, 2012.

FISCAL IMPACT: The fiscal impact of the changes is included in the Overview. *(For a more complete fiscal analysis, see Finance Committee Highlights, 2012 Session, available online at www.ncleg.net.)*

EFFECTIVE DATE: The effective date of the changes is included in the Overview.

ANALYSIS: The act makes several changes necessary to balance the FY 2012-13 budget, enhance economic development projects, and clarify existing economic development statutes.

Set Regulatory Fees

In 1989, the General Assembly made a policy decision to finance the costs of the Utilities Commission and Public Staff through the imposition of a regulatory fee imposed on the entities regulated by the Commission. The General Assembly made a similar policy decision in 1991 to defray the State's cost of regulating the insurance industry through a regulatory charge imposed as a percentage of each insurance company's gross premiums tax liability. The General Assembly sets the rates for each fiscal year as provided in the statutes. The rates may not exceed the amount necessary to generate funds sufficient to defray the estimated cost of operating these agencies for the upcoming fiscal year, including a reasonable margin for a reserve fund. The revenues generated are credited to an interest-bearing, nonreverting special revenue fund and may only be expended upon appropriation of the General Assembly.[164] Section 1 sets the rates for FY 2012-13; the rates are the same as the rates for the prior fiscal year.

Regulatory Fee for Utilities Commission. – Subsection (a) sets the rate for the public utility regulatory fee for FY 2012-13 at 0.12%.[165] The rate has not changed since FY 2004-05. The utility regulatory fee is a tax that was first imposed in 1989. The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating public utilities. The regulatory fee is imposed on all utilities that are subject to regulation by the North Carolina Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenues. In general, jurisdictional revenue is derived from providing utility service in North Carolina.

Regulatory Fee for Electric Membership Corporation. – Subsection (b) sets at $200,000 for FY 2012-13 the annual public utility regulatory fee imposed on electric membership corporations whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale. The rate must be established by the General Assembly each year. The rate has not changed since the General Assembly enacted it in 1999. The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating electric

[164] G.S. 58-6-25(d) provides that the money credited to the Insurance Regulatory Fund is used to reimburse the General Fund for the appropriations made for specified purposes.

[165] G.S. 62-302(b) provides that the rate for each fiscal year is the greater of the rate established by the General Assembly or $6.25 each quarter. The General Assembly has always established the rate.

membership corporations. The 1999 General Assembly enacted S.L. 1999-180, which authorized electric membership corporations to form subsidiary corporations that may provide energy services and products, telecommunications services and products, and water and wastewater collection and treatment. The subsidiary must fully compensate the electric membership corporation for its use of the corporation's personnel, services, equipment, and property. The Utilities Commission is charged with regulating this aspect of the subsidiary's business and, to pay for this regulation, S.L. 1999-180 levied a flat-rate regulatory fee to be paid annually by the North Carolina Electric Membership Corporation.[166] Thus, the fee imposed on the North Carolina Electric Membership Cooperation will be passed on to its member electric membership corporations.

Insurance Regulatory Charge. – Subsection (c) sets the insurance regulatory charge at 6% for the 2012 calendar year, the same as the rate set for the 2011 and 2010 calendar years. The insurance regulatory charge was first enacted in 1991 to defray the State's cost of regulating the insurance industry. The rate of the regulatory charge must be established by the General Assembly. The charge is a percentage of each insurance company's gross premiums tax liability.[167]

Continue Educator Expense Deduction[168]

Section 2 of this act allows an individual income tax deduction for teachers in elementary or secondary education of up to $250 for unreimbursed expenses paid or incurred for school supplies. Congress enacted a tax benefit to help K-12 teaches defray some of the expenditures they voluntarily make to enhance the quality of their students' education. The deduction has been available for tax years 2002-2011. Since North Carolina begins its calculation of taxable income with federal AGI, teachers in North Carolina have been allowed the deduction at the State level as well.

Congress has not extended the tax deduction beyond the 2011 taxable year. This section allows North Carolina teachers to continue deducting up to $250 for unreimbursed expenses paid or incurred for school supplies for taxable years beginning on or after January 1, 2012. If a taxpayer files a joint return and both spouses are eligible educators, then they both may claim up to $250 of expenses for a $500 total on a joint return. If Congress extends the federal tax deduction beyond taxable year 2011, then this provision will not be needed. However, if it does not, this provision ensures that North Carolina educators will continue to receive the same tax benefit they have received since 2002.

Clarify and Extend the Time to Apply for a Sales Tax Refund of Aviation Fuel[169]

Since 2005, an interstate passenger air carrier has been allowed an annual refund of the sales and use tax paid by it on fuel in excess of $2,500,000. The only taxpayer that currently qualifies for this credit is U.S. Airways. Section 3 of the act ensures that the taxpayer may receive the refund for purchases made between January 1, 2010, and June 30, 2011.

---

[166] The North Carolina Electric Membership Corporation is the only electric membership corporation whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale as provided in G.S. 117-16. It is a "generation and supply cooperative" owned by its members. Its members are all but one of the existing North Carolina electric membership corporations, which are "distribution cooperatives."

[167] Medical service corporations and health maintenance organizations began paying the charge in 2000.

[168] This provision was included in Senate Bill 795 and House Bill 950, v.4.

[169] This provision was included in House Bill 142.

To receive the refund, a taxpayer must apply for it; a refund applied for after the due date is barred. Prior to 2010, the refund period covered purchases made during a calendar year, and the refund application was due within six months after the end of the calendar year. In 2010, the General Assembly enacted legislation, S.L. 2010-166, that consolidated and made uniform sunset and reporting features and requirements across the State's various economic incentives. Among the changes, the due dates of the sales tax refunds were standardized to apply to a fiscal year. The effective date of the legislation specifically provided that, "The first claim for refund by a taxpayer whose sales tax refund period is changed by this act is due within six months after July 1, 2010, and applies to purchases during the time period not covered by the taxpayer's last claim for refund."

There was some confusion associated with the 2010 legislation. During the same session, there was another bill,[170] which passed first, extending various sunsets from January 1, 2011, to January 1, 2013. S.L. 2010-166 failed to take into account the extension of the sunsets enacted by the other bill. When S.L. 2010-166 was enacted, it unintentionally nullified the sunset extensions because it was enacted after the first one passed. This error was later corrected in 2011 technical corrections legislation.[171]

In the midst of the confusion, the transition from filing for a refund on a calendar year basis to a fiscal year basis, which should have occurred in 2010, was overlooked by both U.S. Airways and the Department of Revenue. In February of 2011, U.S. Airways filed for a refund for calendar year 2010 and received it. In January of 2012, U.S. Airways filed for a refund for calendar year 2011 but was told that the claim for the first six months of 2011 was barred due to an untimely application, and the refund request for the second six months of 2011 was not yet due.

Section 3 of this act does two things. First, it validates the 2010 refund application and payment issued by the Department of Revenue and second, it provides for the transition from a calendar year refund period to a fiscal year refund period. Subsection (a) validates the 2010 refund payment made on a calendar year basis; this subsection became effective when the act became law on June 26, 2012. Subsection (b) allows the taxpayer to apply for a sales tax refund for aviation fuel purchased by it in excess of $1,250,000 between January 1, 2011, and June 30, 2011, so long as the application is made before October 1, 2012. The State refund amount is capped at $3,150,000. The cap is reduced to reflect the fact that the refund would only be for a six-month period. Without the cap, the taxpayer would have been entitled to a State sales tax refund amount of $6,340,000.[172] The provision has a fiscal impact because the taxpayer is not entitled to the refund under current law since it filed an untimely application. This subsection became effective January 1, 2011, and applies to purchases made on or after that date.

Industrial Development Fund Changes[173]

[170] S.L. 2010-31.
[171] S.L. 2011-330.
[172] The taxpayer will also receive a local sales tax refund amount of $2.71 million.
[173] This provision was included in House Bill 142.

The Industrial Development Fund (IDF)[174] provides funds to assist economically distressed counties[175] and cities located in those counties with creating new jobs. The funds must be used for an infrastructure project[176] located on the site of an eligible industry[177] or, if not located on the site, must be directly related to the operation of the specific eligible industrial activity. The funds must be expended at a maximum rate of $10,000 per new job created up to a maximum of $500,000 per project.

Section 4 of the act allows the IDF funds to be used by an economically distressed county for a sewer infrastructure project even though the project is located in an adjacent county that is not economically distressed. The act does not change the requirement that the infrastructure project must be directly related to the operation of an eligible industrial activity located in an economically distressed county. This change helps facilitate an economic development project in Davie County. Ashley Furniture is currently upfitting an existing building in Davie County that requires additional sewer capacity. Forsyth County operates the water and sewer system that serves Davie County. While Davie County is an economically distressed county, Forsyth County is not. As applied to this project, the change made by this act enables IDF funds to be used to improve sewer infrastructure located in a county that is not economically distressed to the extent the improvement is directly related to the operation of an eligible industrial activity in an economically distressed county. Forsyth County has indicated that the improvements to the sewer system for purposes of serving the Ashley Furniture site will not enhance sewer service in Forsyth County.

Temporary Expansion of 20-Year Carryforward Provision under Article 3J

Article 3J[178] of the tax statutes provides a tax credit for making an investment in business property that the taxpayer places in service in connection with an eligible business during the taxable year.[179] The investment must exceed a minimum threshold amount; the threshold amount varies based upon a county's tier designation from $0 for a tier one county to $2 million for a tier three county. Any unused portion of the credit may be carried forward for the succeeding five years.[180] If the Secretary of Commerce makes a written determination that a taxpayer is expected to invest at least $150 million worth of business and real property in a two-year period, then the carryforward period of any unused portion of a credit is extended to 20 years.

---

[174] IDF is currently funded by loan repayments only; there is no longer a General Fund appropriation for IDF. Loan repayments average around $50,000 annually. The fund is within the Department of Commerce.

[175] "Economically distressed county" is defined as a county that has one of the 65 highest rankings under the development tier designation. Under the development tier designation, the 40 most distressed counties are designated as tier 1, the next 40 as tier 2 and the 20 least distressed as tier 3.

[176] The IDF funds must be used for (i) installation of or purchases of equipment for eligible industries; (ii) structural repairs and renovations of buildings for expansion of eligible industries; or (iii) construction of or improvements to new or existing utility lines or equipment or transportation infrastructure for existing or new building for the eligible industries.

[177] An eligible industry is defined as a company or person engaged in the business of air courier services, information technology and services, manufacturing, or warehousing and wholesale trade.

[178] North Carolina seeks to incent businesses to create jobs and invest in business property primarily through Article 3J tax credits. A taxpayer's eligibility for a credit and the amount of the credit varies depending upon the county or zone in which the jobs are created or the investments are made. These credits may be combined to offset up to 50% of the taxpayer's State income and franchise tax liability, and as a general rule, unused credits may be carried forward for up to five years.

[179] G.S. 105-129.88.

[180] G.S. 105-129.84(c).

Section 5 of the act provides a temporary, one-year expansion of the 20-year carryforward provision. To be eligible for the 20-year carryforward, a taxpayer must receive a written determination from the Secretary of Commerce during the 2012 taxable year that the taxpayer is expected to purchase or lease, and place into service in connection with an eligible business, at least $100 million worth of business and real property. The investment must be made within a two-year period, and it must be made in a tier one county. If the taxpayer fails to make the necessary investment within the two-year period, the expanded carryforward provision will not apply. There is at least one potential project that may benefit from this change; this project is expected to be located in Halifax County.

Port Enhancement Zone Technical Correction

Under Article 3J of the tax statutes enhanced incentives are available to tier 1 counties. Those same enhanced incentives are available to a taxpayer located in an urban progress zone (UP zone) or an agrarian growth zone (AG zone). Last year, in S.L. 2011-302, the General Assembly created a new type of zone eligible for enhanced credits under Article 3J known as a "port enhancement zone."[181] The enhanced incentives for a port enhancement zone become effective for taxable years beginning on or after January 1, 2013. Section 6 of the act makes a change to the conditions that create a port enhancement zone in order to cover the areas the original legislation intended to include.

A port enhancement zone is an area that meets the following conditions:

- Is comprised of one or more contiguous census tracts, census block groups, or both, in the most recent federal census.
- All of the area is located within 25 miles of a state port and is capable of being used to enhance port operations.
- Every census tract and census block group in the area has at least 11% of households with incomes of $15,000 or less.
- The area of the county that is included in one or more port enhancement zones may not exceed 5% of the total area of the county.

The act changes the conditions to say that the zone may be comprised of *<u>part or all</u>* of one or more contiguous census tracts, census block groups, or both, in the most recent federal decennial census. Without this language, the areas intended to be covered by this provision would not meet the definition because the relevant tract exceeds the 5% limitation. This change would also make the port enhancement zone definition consistent with the UP zone definition.

---

[181] The enhanced credits available to an UP zone, an AG zone, and a ports enhancement zone under Article 3J are as follows:

- Jobs tax credit. – The threshold for new full-time jobs created to qualify for the tax credit for creating new jobs is the same as for a tier 1 county, five ; and the amount of the credit is increased by $1,000 per job. If the job is filled by a resident of the zone or a long-term unemployed worker, the credit is increased by an additional $2,000 per job.
- Machinery and equipment investment tax credit. – The investment threshold requirement to qualify for the tax credit for investing in business property is the same as a tier 1 county, which is none. The amount of the investment tax credit is also the same as a tier 1 county, 7% of the cost of tangible personal property that is placed in service during the taxable year.

North Carolina has two State ports, the Port of Morehead City and the Port of Wilmington. The Port of Morehead City is located in Carteret County; Carteret County is a tier 3 county. The Port of Wilmington is located in New Hanover County; New Hanover County is also a tier 3 county.

One-Year Sales Tax Refund for Purchases of Specialized Equipment used at State Ports

Last session, the General Assembly expanded the 1%, $80 preferential tax rate to include specialized equipment used at a port facility to unload or process bulk cargo to make it suitable for delivery to and for use by manufacturing facilities.[182] The change in the law becomes effective July 1, 2013; the reason for the out-year effective date was to ensure the provision did not impact the current fiscal biennium. At the time the legislation was enacted, there were no known projects that would benefit from the preferential tax rate. Today, it appears there is at least one taxpayer considering a project at the one of the State ports that would benefit from the preferential tax rate. To advance the benefit of the incentive, without impacting the current fiscal biennium, Section 7 of the act provides a full refund of local sales taxes and a portion of State taxes for purchases of specialized equipment used at a port facility made between July 1, 2012, and June 30, 2013. The portion of State taxes refunded is equal to the amount of tax paid less the amount of tax the facility would have paid had it been subject to tax under Article 5F. The taxpayer must make a written request for a refund on or after July 1, 2013, and before January 1, 2014. Although the refund provision applies to purchases made during this fiscal biennium, it is not payable until FY 2013-14, thus ensuring that the provision does not impact the current fiscal biennium.

Explanation
PART I: TECHNICAL CHANGES
A taxpayer is allowed a deduction for the amount by which the basis of a depreciable asset is required to be reduced under the Code for federal tax purposes because of a *tax credit* allowed against the corporation's federal taxable income. Section 1603 of ARRTA[183] directs the Treasury to provide cash payments, or grants, to eligible persons who place in service specified energy property and apply for the payments. The purpose of section 1603 is to reimburse eligible applicants for a portion of the expense of such property. A section 1603 grant recipient is required to reduce the basis of the asset. This section allows a taxpayer to reduce his or her State taxable income if the taxpayer receives a section 1603 *grant payment* rather than a credit under sections 45 or 48 of the Code.
This section deletes the word "adjusted" as used in the definition of North Carolina taxable income for nonresidents and part-year residents. In 2011, the General Assembly changed the starting point for calculating NC taxable income from federal taxable income to federal adjusted gross income.[184] This change simplified the calculation of NC taxable income because taxpayers no longer have to make adjustments to reduce the federal standard deduction and exemption amounts to determine the State deduction and exemption amounts. The intent was not to change the end result or impact the amount of NC taxable income.

[182] S.L. 2011-302.
[183] The American Recovery and Reinvestment Tax Act of 2009 (P.L. 111-5).
[184] Section 31A.1 of S.L. 2011-145.

For purposes of prorating NC taxable income for nonresidents and part-year residents, the relevant fraction should only refer to "gross income," which was how the proration was computed prior to the 2011 change. Using "adjusted gross income" could produce a different result, changing the amount of NC taxable income, which was not the intent of the 2011 change.
This section clarifies that the standard deduction amount for individual income tax purposes is the *lesser* of the amount set out in the statute or the amount allowed under the Code. The current law refers only to the "standard deduction amount listed in the table below." However, there are instances where the North Carolina standard deduction is zero[185] or less than is shown in the table. This is another technical change identified by the Department as the result of the passage of Section 31A.1 of S.L. 2011-145.
This section makes changes to the sales and use tax exemption statute with regard to motor fuels and installation and delivery charges. Motor fuels are subject either to the motor fuels tax or to the sales tax, but not both. Dyed diesel and dyed kerosene are examples of motor fuels that are subject to the sales tax, but are nevertheless defined as motor fuels. This change in the sales tax exemption statute makes it clear that, to the extent a motor fuel is taxed under Article 36C (Gasoline, Diesel, and Blends), it is exempt from sales and use tax. This section also amends the sales tax exemptions for delivery and installation charges so that the language is parallel. It adds the phrase "similar billing document," which currently appears in the exemption for delivery charges, to the exemption for installation charges. It adds the phrase "at the time of sale," which currently appears in the exemption for installation charges, to the exemption for delivery charges.
This section removes the words "manufacturing fuel" from the heading of Article 5F of Chapter 105 because the tax on manufacturing fuel was repealed, effective July 1, 2010.
This section corrects the catchline for G.S. 105-187.70 because it refers to an Article that does not exist.
This section updates from January 1, 2011, to January 1, 2012, the reference to the Internal Revenue Code. This change keeps the statute up to date, but does not result in any substantive changes because there have not been any federal tax law changes since January 1, 2011, that impact the calculation of North Carolina taxable income.
This section adds an additional Code reference to the statute that governs when a return, report, payment, or any other document that is mailed to the Department is timely filed. Code section 7503 addresses when the due date falls on a Saturday, Sunday, or a holiday.
This section corrects a statutory reference.
This section conforms the statute on the scope of the local use tax so that it is consistent with the parallel statute for the State use tax, which was amended during the 2011 session. The 2011 change[186] was a clarifying change.

[185] If a taxpayer is (1) married filing a separate return for federal income tax purposes and the taxpayer's spouse itemizes deductions; (2) a nonresident alien; or (3) filing a short-year return because of a change in the taxpayer's accounting period, the taxpayer is not entitled to the standard deduction.
[186] S.L. 2011-330, s. 25(a).

S.L. 2011-72 authorized certain cities to establish a municipal service district for the purpose of converting private residential streets to public streets. The act was designed to address 14 residential developments in the Town of Morrisville that were seeking to convert private streets to public streets. After the bill passed, it was discovered that some of the developments were created under the Condominium Act rather than the Planned Development Act, which the bill amended. This section makes the necessary conforming changes.
This section corrects several errors in the 2011 special license plate act.[187] It adds the "Mountains-to-Sea Trail" plate to the list of plates that may be on a background other than the First in Flight background, which was the original intent. Under current law, the authorization for the plate states that it "shall bear the phrase 'Mountains-to-Sea Trail' with a background designed by the Friends of the Mountains-to-Sea Trail," suggesting that the organization may design its own background. However, in order for an organization to have a background other than First in Flight, it must be authorized in G.S. 20-63. This section also corrects errors with regard to the fees for the Sustainable Fisheries and the Morgan Horse Club plates.
This section allows a taxpayer to claim an Article 3J credit that the taxpayer would have been ineligible for prior to 2010 because it failed to meet the environmental impact standard, which was loosened retroactively that year. In 2010, the General Assembly changed the environmental standard for Article 3J retroactively to 2007.[188] By loosening the standard and making the change retroactive to 2007, the General Assembly intended to allow certain taxpayers to file for an Article 3J credit. However, the 2010 change failed to make a corresponding change to the statute of limitations, which requires claims to be filed within six months of the due date of the return. Therefore, a taxpayer who did not claim the credit when the original standard was in effect would be unable to take advantage of the retroactive change which loosened the standard. This change does not have a fiscal impact.
This section makes changes required by the fact that G.S. 105-130.6, which dealt with forced combinations, was repealed last year and replaced with a new statute. The definitions are the same definitions that were in G.S. 105-130.6, except for "parent," which was not defined.

[187] S.L. 2011-392.

[188] Sec. 1.3 of S.L. 2010-147 (*Various Economic Incentives*). Prior to the 2010 change, a taxpayer was eligible for certain economic incentives if the taxpayer had no pending administrative, civil, or criminal enforcement actions based on alleged *significant* violations of any DENR-implemented programs and had no final determination of responsibility for any *significant* administrative, civil, or criminal violation of any DENR-implemented program within the prior five years. Article 3J had a definition of what constituted a "significant violation" but there was some confusion as to whether certain violations met the definition. At the time, the Department made no distinction between civil and criminal violations or on the basis of whether the violation was knowing and willful. The 2010 clarification was designed to ensure that minor violations do not disqualify a taxpayer that would otherwise be eligible for a tax incentive. The current definition of an "environmental disqualifying event," as enacted by S.L. 2010-147, is as follows:

(9a) Environmental disqualifying event. – Any of the following occurrences:

a. During the tax year in which the activity occurred for which a credit is being claimed, a civil penalty was assessed against the taxpayer by the Department of Environment and Natural Resources for failure to comply with an order issued by an agency of the Department to abate or remediate a violation of any program administered by the agency.

PART II: CLARIFYING AND ADMINISTRATIVE CHANGES
This section allows a wholesale or retail dealer of other tobacco products to provide security to the Secretary in the form of an irrevocable letter of credit as an alternative to a bond. An irrevocable letter of credit is typically used by a foreign company that is unable to obtain a bond because it does not have assets in this country. This form of security is consistent with what is currently allowed under the motor fuels tax statutes.
S.L. 2011-12 added synthetic cannabinoids to the list of controlled substances. No corresponding changes were made to the unauthorized substance tax laws. Therefore, without this change, they would be grouped with "other controlled substances" and be subject to tax at a rate of $200 per gram. However, synthetic cannabinoids are most analogous to marijuana, which is taxed at $3.50 per gram. This section taxes synthetic cannabinoids at the same rate as marijuana, effective when the S.L. 2011-12 became law.
Holding companies are subject to an annual franchise tax, which is capped at $75,000. A holding company is currently defined as one that receives more than 80% of its gross income from corporations in which it owns, directly or indirectly, more than 50% of the outstanding voting stock or capital interests. However, a corporation whose only asset is an investment in subsidiaries and has no income cannot meet the 80% test because the denominator would be zero. This section expands the definition of a holding company to address this situation. The Department has indicated that this is a clarifying change, not a substantive one. A question has arisen about this specific fact pattern where a taxpayer is clearly a holding company, in that all of its assets are investments in subsidiaries. For the year in question, the holding company had no income. Therefore, there would be $0 in income from subsidiaries and $0 in total income. Under a strict application of G.S. 105-120.2, $0 divided by $0 would result in an undefined mathematical value. Because it is undefined, it cannot be determined if it exceeds 80%. Alternatively, if one of the subsidiaries of the holding company had issued a dividend of as little as one cent, then 100% of the income would be coming from investments in subsidiaries. The Department believes that this interpretation is not what the General Assembly intended. The Department's interpretation is that it was a holding company and subject to the cap of $75,000 on franchise tax.

---

b. During the tax year in which the activity occurred for which a credit is being claimed or in the prior two tax years, any of the following:
   1. A finding was made by the Department of Environment and Natural Resources that the taxpayer knowingly and willfully, as defined in G.S. 143-215.6B, including all limitations thereto, committed a violation of any program implemented by an agency of the Department.
   2. An assessment for damages to fish or wildlife pursuant to G.S. 143-215.3(a)(7) was made against the taxpayer
   3. A judicial order for injunctive relief was issued against the taxpayer in connection with a violation of any program implemented by an agency of the Department of Environment and Natural Resources.

c. During the tax year in which the activity occurred for which the credit is being claimed or in the prior four tax years, a criminal penalty was imposed on the taxpayer in connection with a violation of any program implemented by an agency of the Department of Environment and Natural Resources.

This section makes the definition of business property in Article 3J consistent with the definition of business property in Article 3B[189] and the old provisions for eligible machinery and equipment in Article 3A.[190]
This section provides that a taxpayer may qualify for innocent spouse relief at the State level if the taxpayer would have qualified for relief at the federal level even if the taxpayer does not have a federal tax liability. North Carolina follows federal law with regard to a taxpayer's eligibility for innocent spouse relief. Prior to this change, a taxpayer would have had to have a federal tax liability that he or she was relieved of in order to qualify for relief at the State level. With this change, if the taxpayer would have qualified for innocent spouse relief had the taxpayer had a federal tax liability, the taxpayer is eligible for relief at the State level.
This section adds the education expenses credit to the list of credits that are not allowed to be claimed by an estate or trust. In 2011, the General Assembly enacted the Tax Credit for Children with Disabilities.[191] This is a conforming change that should have been made at the time and is consistent with the other credits that are not eligible to be claimed by an estate.
This section makes three changes to sales tax definitions in order to conform them to the definitions in the Streamlined Sales and Use Tax Agreement, and it updates the reference to the most current version of the Agreement dated December 19, 2011.
This section clarifies the general sourcing provisions to conform to the requirements in the Streamlined Sales and Use Tax Agreement. It was noted during the 2011 Annual Compliance Review that the existing statute was not consistent with the Streamlined requirements.
This section restores language stating that sales tax must be stated and charged separately that was inadvertently stricken from the statute.[192]
This section restores language relating to the application of use tax to items given away by merchants, which was inadvertently deleted in a 2009 budget provision. The language was originally added to the definition of "sale or selling" in 1996 as the result of a court case.[193]

[189] G.S. 105-129.15(1).
[190] G.S. 105-129.9(a).
[191] S.L. 2011-395. The credit allows an individual income tax credit for up to $3,000 per semester for tuition and special education and related services expenses for a taxpayer's eligible dependent child with a disability who is enrolled in a nonpublic school or a public school where tuition is charged for the eligible dependent child's enrollment.
[192] S.L. 2009-451, s. 27A.3(j).
[193]The use tax, first enacted in 1939, is the complement to the sales tax and applies to the storage, use, or consumption in this State of tangible personal property. Use tax accounts for approximately 5% of total sales and use tax collections. A merchant is liable for use tax on property it *uses* in its business, such as furniture, equipment, décor, or promotional giveaways. Items *sold* by the merchant, however, are not subject to use tax because sales tax will apply when the items are sold at retail. With regard to items given away free of charge, the general rule in this State, and virtually all states, is that a retailer is liable for sales and use tax on those items. Until 1993, the following items were considered used, not sold, and thus subject to use tax: meals provided free to a merchant's employees, food given away to the merchant's patrons, and matches given away to patrons, other than matches given away along with the sale of cigarettes. A group of restaurants appealed the assessment of the tax, claiming that the items should be considered sold. In *Matter of Rock-Ola Café*, 111 N.C.App. 683 (1993), the North Carolina Court of Appeals agreed with the restaurants that these items should be considered sold along with the food the restaurant sold as

The language was intended to restrict the application of that case, a broad application of which could be interpreted in such a way so as to eliminate the use tax. In 1996, the Revenue Laws Study Committee recommended limiting the application of the decision to the facts of that case, which involved food given away by restaurants. In 2009, a number of sales tax statutes were amended to address digital property. While amending those statutes, a number of stylistic and technical changes were also made. The language dealing with items given away by merchants was removed with the intent that it be located elsewhere in the sales and use tax statutes as a technical change. However, it was never relocated. This section restores the language by placing it in a new statutory section, effective the date that the 2009 deletion became effective since there was no intent to remove it.
This section makes two changes related to sales tax refunds for interstate carriers. First, it modifies the reference to "them" to make it clear that, for purposes of calculating a refund on certain cars, parts, fuel, and repair parts, an interstate carrier must include all motor vehicles, railroad cars, locomotives, and airplanes that the applicant owns or leases and that are operated both inside and outside the State in the denominator. Second, it clarifies that airplane miles are not in this State if the airplane only flies over North Carolina but does not take off or land in the State.
A direct pay permit authorizes the holder to purchase property that is subject to sales and use tax without paying the tax to the seller. A person who purchases an item under a direct pay permit is liable for use tax, which is payable when the property is placed in use or the service is received. A person can apply for a direct pay permit if the person purchases an item whose tax status cannot be determined at the time of purchase, and either: • The place of business where the item will be used is not known at the time of purchase and a different tax consequence applies depending on where the item is used, or • The manner in which the item will be used is not known at the time of purchase and one or more of the potential uses is taxable but others are not taxable. Generally speaking, a direct pay permit is not intended to allow purchasers to "shop" for a lower tax rate. It was originally designed to address situations where a purchaser of machinery, for example, did not know at the time of purchase how the machinery was going to be used and, therefore, whether it would be subject to sales tax at the general rate, exempt from tax, or subject to the 1%/$80 rate. In those cases, however, the property was always going to be used in North Carolina. The Department is aware of a situation where a retailer that has purchased items from NC vendors and has taken delivery of those items in NC wants to use a direct pay permit arguing that the items may be shipped out of state at some later date for

part of its business. However, the Revenue Laws Study Committee, in its report to the 1996 Regular Session, concluded that the Court's opinion was overly broad in its rationale. The rationale, that the cost of these items is recovered by the sales of other items, taken literally and if applied broadly, could be interpreted to eliminate the use tax altogether in that the cost of all of a merchant's purchases are ultimately covered by the price of sold items. The Committee recommended, and the General Assembly enacted, the language in this section to limit the application of the court's opinion to the facts of that case, which dealt specifically with restaurants. Under this language, property given away by a merchant is exempt from use tax only in the case of restaurants that provide free meals to employees or free bar food to patrons. The bill that was ultimately enacted added language to exempt items of inventory given away to a customer free of charge on the condition that the customer buy similar property ("buy one, get one free").

use in another state. This section adds the words "for storage, use, or consumption in this State" to make it clear that a direct pay permit may not be used to avoid paying NC sales tax in this way. A person who purchases telecommunications service under a direct pay permit must file a return and pay the tax due monthly to the Secretary. This section adds the word "quarterly" so that the filing frequency is consistent with the filing frequency for general State and local sales tax remitters.[194] By providing for quarterly filing, this change conforms the statute to current practice at the Department.
There is an excise tax imposed on piped natural gas received for consumption in this State, which is in lieu of the sales and use tax. The tax is payable on a monthly basis. Under prior law, a taxpayer who was consistently liable for at least $10,000 of tax a month must make a monthly prepayment of the next month's liability. This section changes from $10,000 to $20,000 the prepayment threshold for the tax on piped natural gas, the purpose of which is to be consistent with the prepayment threshold for retailers required to remit sales and use tax.[195] This change does not change the amount of excise tax revenue remitted to the General Fund, but it does change by one month the timing of the payment for the year of the transition to the higher threshold. The Department indicates that it knows of only one company that would be affected by increasing the threshold to $20,000.
Generally speaking, the State may not contract with foreign vendors that refuse to collect use tax, where applicable, on sales delivered to North Carolina. G.S. 143-59.1 requires the Department to periodically provide to the Secretary of Administration a list of ineligible vendors based on this requirement. This section provides that the Department of Administration may not enter into a contract with a vendor if the Department of Revenue has determined that the vendor or an affiliate of the vendor refuses to collect use tax. This language has been agreed to by both the Department of Revenue and the Department of Administration.
This section conforms the statute to current practice at the Department. If a taxpayer files a return electronically, then the taxpayer must pay the tax due before the taxpayer may submit the return.

[194]A taxpayer who is consistently liable for less than $100 a month in State and local sales and use taxes must file a return and pay the taxes due on a quarterly basis. A taxpayer who is consistently liable for at least $100 a month but less than $20,000 a month in State and local sales and use taxes must file a return and pay the taxes due on a monthly basis. (G.S. 105-164.16.)

[195]For sales and use tax, the threshold limit of $10,000 was enacted in 2001 as a means to accelerate the payment of sales and use tax dollars into the General Fund for fiscal year 2001-02. Prior to this change, the threshold amount for making bimonthly payments was $20,000. In the years following 2001, the sales and use tax rate, at its highest, reached 7.75%. The lowering of the threshold amount along with the increase in the tax rate subjected more retailers to the most extensive sales tax remittance requirements. Consequently, many small retailers expressed a cash flow hardship with the pre-payment requirement. In 2010, the General Assembly phased in a restoration of the $20,000 prepayment threshold. The change decreased the number of retailers required to submit a prepayment of 65% of the amount of sales tax revenue to be remitted for the following month.

S.L. 2011-296 changed the fees collected by register of deeds for the purpose of simplifying their collection and remittance. As part of the legislation, a new fee became applicable to the indexing and filing of "subsequent instruments." Several registers of deeds have questioned how to apply the new fee applicable to subsequent instruments that contain references to multiple recorded documents, such as cancellations of multiple deeds of trust or substitution of trustee in multiple documents. This section removes the confusion caused by the new fee applicable to the recording of subsequent instruments by eliminating the fee and imposing a $10 fee for an instrument that assigns more than one security instrument by reference to a previously recorded instrument.
This section makes conforming changes to the statutes dealing with the State Home Foreclosure Prevention Project (SHFPP). The SHFPP was created by the General Assembly in 2008[196] as an emergency program and was expanded and extended in 2010[197] to cover all homeowners. The program is an effort to reduce unnecessary foreclosures providing homeowners with free resources, such as counseling, as they work with servicers to create alternatives to foreclosure. In 2011, the administration and staffing of SHFPP homeowner and counseling activities was transferred to the NC Housing Finance Agency, effective July 1, 2011.[198] Under that legislation, the Office of the Commissioner of Banks retained administration of the pre-foreclosure filings database, servicing invoicing, and the granting of 30-day extensions. This section completes the transfer of all program activities to the NC Housing Finance Agency and removes the program sunset.
This section removes the $5 minimum penalty amount for failure to file a return or failure to pay tax when due, effective January 1, 2014. This change was requested by the Department because TIMS, its new computer system that is not up and running yet, will not be able to compute the minimum penalty well. It will require a work around and likely an addition to the current contract. This has no impact on the General Fund and a negligible impact on the Fines & Forfeiture Fund.
This section provides that the portion of the Register of Deeds fees that are remitted to Cultural Resources for archives and records management shall be placed in a special revenue fund. This change will prevent unspent monies from reverting to the General Fund at the end of a fiscal year, thus ensuring the monies will be used for their intended purpose.
PART III: COMBINED MOTOR VEHICLE REGISTRATION/PROPERTY TAX CHANGES

[196] S.L. 2008-226.
[197] S.L. 2010-168.
[198] S.L. 2011-288.

In 2005, the General Assembly created a framework establishing a combined system for motor vehicle registration renewal and property tax collection. Originally, the act was to become effective the earlier of January 1, 2009, or the date that the Department of Revenue and the Division of Motor Vehicles certified that an integrated computer system is in operation. The effective date has since been extended and is currently set to go into effect July 1, 2013. Under the new system, the taxpayer/motor vehicle owner will receive one bill for property taxes and the DMV license renewal, and DMV will be the collecting authority. Counties will still determine the value and the taxability situs of motor vehicles. A number of conforming changes are needed to fully implement the combined system, which goes into effect July 1, 2013. Part III of this act consists of those changes.
Current law permits the governing body of a taxing unit to pass a resolution directing its tax collector not to collect minimal taxes, defined as up to $5.00, charged on tax records and receipts. This section exempts taxes on registered motor vehicles for two reasons: (1) a minimum of $28 is collected for motor vehicle registration; and (2) DMV, not the counties, will be the collecting authority. Therefore, the minimal tax provision is not applicable with regard to combined motor vehicle and property tax collection.
A taxpayer may appeal motor vehicle taxes on a number of grounds: the valuation by the county, the denial of an application for exemption or exclusion, and on the grounds that the county does not have authority to tax the vehicle because the situs of the vehicle is in another taxing district. The term "taxability" in the appeal statutes has been used to refer to both exemption status and situs, but because there are different time periods that apply depending on the basis of a taxpayer's appeal, the Department recommends separating the statutory provisions.[199] Therefore, this section strikes the term "taxability" from G.S. 105-330.2(b1) so that, as amended, this subsection would apply only to appeals based on valuation. It also creates a new subsection (b2) to address appeals based on an application for exemption or exclusion. Appeals based on a county's authority to tax are covered under current law in G.S. 105-381.
This section establishes a process for the collection of property tax on an unregistered vehicle. The objective of the process is to ensure that the taxpayer is not double-taxed and that property taxes are paid on motor vehicles that a person owns even if it is not registered. If a person does not register or renew registration, then the person would be required to list the vehicle with the county assessor. The listing will generate a tax bill. However, if the person subsequently registers or renews the tag for the vehicle, then DMV will charge the person for the registration plus the property tax. This provision allows a county to ignore the listing to the extent the person registered or renewed within the same year.

[199] A taxpayer has 30 days to appeal a determination of value or eligibility for an exemption or exclusion. However, there is a five-year period to appeal an "illegal" tax under G.S. 105-381.

This section clarifies that counties would have authority to use collection remedies for unpaid motor vehicle taxes that were billed prior to the effective date of the combined motor vehicle/property tax system. The August 1 date is used because the tax year for July renewals begins August 1. It allows 45 days before the second month's interest begins. This is needed due to DMV's business process which DOR thinks may cause some taxpayers who pay by mail to get caught in a loop of sending in the payment after the due date, and the payment would be rejected. Without this change, the next month's interest would start before they got the correct amount mailed back in to DMV. This section also changes the term "tax collector" to "collecting authority" because under the new system, DMV and not the county tax assessor or tax collector will be the collecting authority.
This section repeals an unnecessary statute that relates to small underpayments and overpayments of motor vehicle taxes. Specifically, if a taxpayer fails to remit the additional $1.00 charged for payments that are mailed rather than paid in-person, the collecting authority is not permitted to bill or attempt to collect the additional $1.00. However, there is no longer a $1.00 charge for mailed in payments so the provision is unnecessary.
This section is a conforming change to the effective date. When the effective date for the implementation of the combined system was changed, this particular session law was missed.

Expand Setoff Debt Collection Act.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-88	**HB 605**	**Representative McElraft**

AN ACT TO EXPAND THE DEFINITION OF LOCAL AGENCY FOR PURPOSES OF THE DEBT SETOFF COLLECTION ACT.

OVERVIEW: This act allows counties that jointly operate a solid waste facility as a regional solid waste management authority the same collection tool that would be available to them if they operated the facility individually. It does so by adding a regional solid waste management authority to the list of local agencies authorized under the Setoff Debt Collection Act to collect debts owed to them by obtaining a setoff against a debtor's North Carolina tax refund.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act becomes effective January 1, 2013, and applies to tax refunds determined by the Department of Revenue on or after that date.

ANALYSIS: This act allows a regional solid waste management authority created under Article 22 of Chapter 153A of the General Statutes to participate under the Setoff Debt Collection Act in the same manner as counties and cities.

The Setoff Debt Collection Act authorizes State and local agencies to collect debts by diverting part or all of a debtor's North Carolina tax refund to pay a debt that an individual or a business owes to a particular agency. Before January 1, 2001, the setoff program was open only to State

agencies. Now, counties and municipalities participate through a clearinghouse.[200] While the use of debt setoff for State agencies is mandatory, usage by local agencies is optional. The Act only applies to debts that are at least $50 and to a refund that is at least this same amount. Local agencies are required to give written notice to the debtor of the intent to submit the debt for setoff, explaining the basis for the agency's claim, that the agency intends to apply the debtor's refund against the debt, and that an administrative fee of $15 will be charged.

Most counties operate their own landfill and recycling operations, and as such may use the Setoff Debt Collection Act. However, ten counties came together for economies of scale to provide these services as a regional authority. This act allows the counties that operate their solid waste management services collectively to have the same collection tool available that would be available to them if they operated the service individually. Currently, there are only two regional authorities:

- Coastal Regional Solid Waste Management Authority, which is comprised of Carteret, Craven, and Pamlico Counties.
- Albemarle Regional Solid Waste Authority, which is comprised of Perquimans, Chowan, Gates, Dare, Currituck, Hyde, and Tyrell Counties.

Unemployment Insurance Changes.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-134	**SB 828**	**Sen. Rucho, Hartsell**

AN ACT TO MAKE CHANGES TO THE UNEMPLOYMENT INSURANCE LAWS.

OVERVIEW: This act includes several changes to the unemployment laws that fall within the following categories:

- The extension of the three-year look-back period from January 1, 2012, to January 1, 2013. The extension became effective when the Governor signed the act into law on June 29, 2012, and applies retroactively to January 1, 2012.
- The resolution of outstanding issues associated with S. L. 2011-401, Senate Bill 532. These changes became effective November 1, 2012.
- The statutory changes required to comply with the federal Trade Adjustment Assistance Extension Act of 2011. The changes to the New Hire Directory became effective when the Governor signed the act into law on June 29, 2012. The remaining two changes become effective October 1, 2013.
- The recommendations of the House Unemployment Fraud Task Force. The criminal law changes become effective December 1, 2012. The reporting requirements became

[200] Because there are so many local agencies, funneling their claims through a clearinghouse avoids an undue administrative burden on the Department of Revenue. A $15.00 collection assistance fee is added to each local agency debt submitted for setoff, which is remitted to the clearinghouse that submitted the debt. The fee does not, however, apply to child support debts.

effective when the Governor signed the act into law on June 29, 2012. The remaining changes become effective October 1, 2012.

- Administrative changes requested by the Division of Employment Security (DES). These changes became effective when the Governor signed the act into law on June 29, 2012.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: The effective dates are included in the Overview.

ANALYSIS:

Part I: Change in the Law to Continue the Three-Year Look-Back Trigger for Extended Benefits

There are two permanent benefit programs required by federal law: regular unemployment insurance (UI) benefits and extended benefits. Regular UI benefits are fully funded by the State through its State Unemployment Insurance Trust Fund and claimants in North Carolina are eligible to receive benefits for up to 26 weeks under it. Extended benefits are available in a state when the state is experiencing high levels of unemployment. The program is funded 50% by state contributions and 50% by the federal government. However, the federal government has paid 100% of the extended benefit claims since February 22, 2009.

Extended benefits are triggered in a state when the unemployment rate is at least 6.5% and at least 10% higher than it was at the same time in either of the past two calendar years. This two-year window is known as the "two-year look-back." In the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010, Congress enabled more states to offer extended benefits by allowing the states to amend their laws to temporarily increase the two-year look-back period to a three-year look-back period. Under the 2010 federal legislation, the temporary measure ended December 31, 2011. Congress extended the temporary measure twice. It is currently set to expire December 31, 2012.

The language of the federal law clearly states that a "State may by law" provide for the temporary look-back extension. However, the Governor acted unilaterally through executive orders to extend the look-back period on two different occasions. Section 1 of the act does two things:

- It calls attention to the Governor's lack of authority to make the UI law changes by executive order and states that any executive order on this issue would be void unless the order is issued upon authority that is conferred expressly by an act of the General Assembly or granted specifically to the Governor by Congress.

- It acknowledges that the General Assembly validated the effects of Executive Order 93 when it enacted S.L. 2011-145, Section 6.16; and that it is validating the effects of Executive Order 113 by the extension of the three-year look-back sunset from January 1, 2012, until January 1, 2013. As a practical matter, extended benefits will not be allowed in North Carolina for claim weeks later than May 12, 2012, because the State's unemployment rate fell below the three-year look-back trigger.

Part II: Resolution of Outstanding Issues from S.L. 2011-401, Senate Bill 532

The General Assembly enacted Senate Bill 532[201] on July 26, 2011, over the Governor's veto of the legislation on June 30, 2011.[202] In the Governor's Objections and Veto Message, she stated the U.S. Department of Labor (USDOL) informed the administration that a lack of conformity between the bill and federal law could result in a loss of money for the State's UI program and a reduction in the FUTA tax credit.[203] After the General Assembly overrode the Governor's veto, the Employment Security Commission informed the General Assembly by a letter dated October 12, 2011, of its intention to suspend the provisions of the act determined by the USDOL to be noncompliant with federal law. G.S. 96-19(b) gives the DES the authority to suspend enforcement of a provision upon receiving notification from USDOL that a provision is noncompliant with the requirements of federal law. The suspension may be in effect until the Legislature next has an opportunity to reconsider the provisions purported to be noncompliant with federal law.

Part II of S.L. 2012-134 addresses the areas of concern noted by USDOL. The changes were shared with USDOL and have been found to be in compliance with federal law. The following changes became effective November 1, 2012:

Payment of UI benefits with the greatest promptness that is administratively feasible. - Senate Bill 532 expanded from 10 days to 30 days the time for an employer to provide information required to protest a claim. The USDOL noted that the extension of time would make it virtually impossible for the agency to make timely determinations under the standards set by federal regulations. The act provides that an employer has 10 days from the delivery of notice of the filing of a claim against the employer's account to protest the claim.

Misconduct connected with work and total reduction of benefit rights. - An individual is totally disqualified from receiving benefits if the DES determines the individual was discharged for misconduct connected with the work. Senate Bill 532 expanded the definition of "misconduct connected with the work" to include both of the following:

- *Arrest for or conviction of certain criminal offenses.* – USDOL noted that the new definition did not require that the criminal conduct be connected with the individual's work. The act provides that the offense must be related to the employee's work with the employer or in violation of a reasonable work rule or policy. It also amends a previous provision in North Carolina's law concerning the conviction of a person for drug offenses to make the same clarification that the offense be related to the employee's work with the employer or in violation of a work rule or policy.

- *Failure to adequately perform employment duties after being warned by three written reprimands within a 12-month period.* – USDOL noted that, in order to be the basis for a disqualification to receive UI benefits, unsatisfactory job performance must be the result of intentional behavior or gross negligence and must be egregious. The act provides that three written

[201] Senate Bill 532 created DES within the Department of Commerce and transferred the functions of ESC to DES; it made DES subject to rulemaking; and it made substantive and conforming changes to the UI laws.
[202] The Senate passed the bill on June 2, 2011, by a vote of 43 to 5. The House passed the bill on June 15, 2011, by a vote of 104 to 12.
[203] A state's law must conform to the provisions of the federal unemployment compensation laws in order for employers in the state to be eligible for a credit against the FUTA tax and for the state to be eligible to receive an administrative grant to operate its unemployment compensation programs.

reprimands within a 12-month period is prima facie evidence of an employee's failure to adequately perform employment duties; this presumption may be rebutted by the claimant.

Stipulation of the issues and the methods of administration requirement. - Senate Bill 532 allowed the parties to tender stipulation of the ultimate issues in cases pending on appeal to the agency and provided that the stipulation did not have to be recorded. USDOL noted that while a stipulation of facts might be acceptable, a stipulation of the issues vitiates the agency's federally-mandated responsibility to apply the unemployment law to specific facts. USDOL also recommended that any procedure or process by which an appeals referee or hearing officer accepts a stipulation of fact should be recorded. The act allows parties to agree to a stipulation of facts. The appeals referee or hearing officer may accept the stipulation if the stipulation provides sufficient information to make a UI benefit decision. If the stipulation does not provide sufficient information, the appeals referee or hearing officer must reject the stipulation. The decision to accept or reject the stipulation of facts must occur in a recorded hearing.

Salaries for Board of Review. – Senate Bill 532 created a Board of Review to determine appeals policies and procedures and to hear appeals arising from the decisions and determinations of the Employment Security Section and the Employment Insurance Section. The annual salaries of the three-person board are to be set by the General Assembly in the current Operations Appropriations Act. The Current Operations and Capital Improvements Appropriations Act of 2011 did not set the salaries for the members of the Board of Review. The act states that the current Operations Appropriations Act of 2012 must provide for the annual salaries of the Board of Review. S.L. 2012-142, The Current Operations and Capital Improvements Appropriations Act of 2012, set the salaries of the Board of Review: an annual salary of $120,737 for the two members and an annual salary of $122,255 for the chair.

Part III: Compliance with the Trade Adjustment Assistance Extension Act of 2011

In 2002, the United States General Accounting Office issued a report on the UI program and the need for an increased focus on program integrity. The focus of President Obama's Executive Order 13520, issued November 23, 2009, was the reduction of improper payments in major programs administered by the federal government, including the UI program. In response to the level of improper payments in the UI program, the USDOL developed a strategic plan to address the root causes of improper payments. The plan involves new performance measures for the states; increased funding of new tools and technology; and a focus on the root causes leading to improper payments. The three identified root causes leading to improper payments are:

- A gap in employment service registration.
- Untimely and insufficient separation information from employers and third party administrators.
- Claimants continuing to claim benefits after returning to work.

As part of the increased focus on program integrity, USDOL recommended legislative language to Congress in June of 2011. In October 2011, three key integrity provisions recommended by USDOL were enacted as part of the Trade Adjustment Assistance Extension Act of 2011. The act includes the statutory change North Carolina must make to be in conformity with the program integrity provisions this year as well as the statutory changes for the two provisions that must be enacted prior to October 21, 2013.

New Hire Directory. – The New Hire Directory was created years ago to assist states with the collection of child support payments. The Directory is administered by the Department of Health and Human Services. The directory is also a valuable tool for UI programs because it allows an agency to cross-check claimants with new hires. This information assists the agency with the detection of overpayments being made to individuals who have returned to work. To address the gap in employment service registration, the Trade Adjustment Assistance Extension Act of 2011 requires states to expand the definition of a "newly hired employee" to include a rehired employee who was separated for at least 60 days. It also requires employers to enter the start date of employment when the employer submits the information to the New Hire Directory. States are required to make the necessary statutory changes to its New Hire Directory provisions within two months after the latest legislative session ends. The act includes the necessary changes, effective July 1, 2012.

Prohibition on Non-Charging of Employer Accounts. – To address the untimely and insufficient separation information provided by employers and third party administrators to the state unemployment agencies, the federal law requires states to enact a provision prohibiting the non-charging of an employer's UI account when an improper payment is made because of the employer's failure to respond timely or adequately to a written request for separation information. In most states, an employer's state unemployment tax rate is based upon an experience rating whereby employers that have more claims or charges against their UI account have a higher tax rate. Under current law, benefits paid to a claimant erroneously may not be charged to the employer's account. Under this provision, the benefits would be charged to the employer's account if the erroneous payment is made because the employer failed to respond timely and adequately to the agency. This provision points to a trend whereby employers are expected to improve the quality of information provided to state employment agencies at the front end of the UI claim process, rather than waiting until a hearing to provide details. The act makes the necessary changes to impose the federally-mandated penalty; it does not impose a larger state penalty. The changes become effective October 1, 2013, and apply to an overpayment established on or after that date.

Monetary Penalty Assessment. – To address claimants who fraudulently continue to accept UI benefits after returning to work, the federal law requires states to impose a penalty on the claimant equal to 15% of the amount of erroneous overpayment if the agency determines that the overpayment is due to fraud. Under G.S. 96-18(a), a fraudulent overpayment is one that results from a person's false statement or representation knowing it to be false or from a person knowingly failing to disclose a material fact to obtain or increase a benefit received. The money collected from the penalty is payable to the State Unemployment Trust Fund and its use is limited to the payment of UI benefits. States may enact a larger penalty amount and may use the additional amount for whatever purpose it desires. The act makes the necessary changes. They become effective October 1, 2013, and apply to a fraudulent overpayments on or after that date.

Part IV: Enhance Unemployment Compensation Fraud Detection and Recovery, as Recommended by the House Unemployment Fraud Task Force

The House Unemployment Fraud Task Force met three times and spent time considering the differences between overpayments and fraudulent overpayments. An overpayment may occur when funds go to the wrong recipient; when the right recipient receives the wrong amount; and when documentation is not available to support a UI claim. Not all overpayments are fraudulent. An overpayment is considered fraudulent when the claimant makes a false statement or

representation knowing it to be false or knowingly fails to disclose a material fact to obtain or increase any UI compensation benefit.

One of the leading causes of overpayments is a person continuing to claim benefits after returning to work. The Task Force learned that proving a person knowingly made a false statement is sometimes difficult when the overlap of benefits and earnings is for a limited period of time. Claimants who return to work, but don't receive a paycheck for a period of two to four weeks after starting employment, sometimes fail to correctly answer the question asked regarding weekly earnings.

The implications of an overpayment versus a fraudulent overpayment are as follows:

- A person who has been found to have obtained a benefit fraudulently is not entitled to receive benefits for a period of 52 weeks.
- A person who has been found to have obtained a benefit fraudulently is guilty of a Class 1 misdemeanor.
- DES has 10 years to recover a fraudulent overpayment; it has only three years to recover an overpayment.
- DES may recover a fraudulent overpayment by deducting 100% of the overpayment from future benefits payable to the person; it may deduct only 50% from future benefits for a non-fraudulent overpayment.

The act makes the following changes to enhance DES's ability to recover overpayments:

- Makes it a Class I felony to wrongfully obtain or increase an UI benefit if the amount wrongfully obtained exceeds $400. The felony penalty provision mirrors the current criminal provision for wrongfully obtaining a benefit under the Medicaid Program. This change becomes effective December 1, 2012, and applies to offenses committed on or after this date. Under current law, it is a Class 1 misdemeanor.
- Removes the statute of limitations for recovering any overpayment. This change becomes effective October 1, 2012, and applies to an overpayment established on or after this date. Under current law, the statute of limitations for recovering on overpayment is three years and for recovering a fraudulent overpayment is 10 years.

The Task Force learned about the Unemployment Insurance Compensation Debt of the Treasury Offset Program (TOP-UIC). The TOP compares payee names and taxpayer identification numbers on federal payment certification vouchers to names and taxpayer identification numbers in TOP's debtor database. When a match occurs, TOP intercepts, or "offsets," all or part of a payee's eligible Federal or state payments. Congress first permitted UI compensation debts and uncollected contributions to be recovered under TOP in 2008. The initial legislation limited the types of UI debts that could be recovered through TOP. However, in December 2010, Congress removed many of the limitations. Today, the definition of "covered unemployment compensation debt" is no longer limited to overpayments due to fraud and any associated penalties or interest may be recovered through TOP if the UI compensation debt is due to a person's failure to report earnings or delinquent contributions. In addition, the term is no longer limited to debts that remain uncollected for 10 years.

To participate in the TOP-UIC, a state must have a Safeguards Procedure Report approved by the IRS, must send debtors 60 days-notice of the State's intent to send the debt to TOP-UIC, and

must complete several forms required by the Financial Management Service of the US Treasury Department. As of April 16, 2012, 14 states are participating in the TOP-UIC. Those states have recovered more than $140.6 million in tax refund payment offsets since February 2011.

Assistant Secretary for the DES, Dempsey Benton, indicated DES was pursuing the implementation of the TOP-UIC for North Carolina. The act notes the desire of the General Assembly that DES participate in the refund offset program on or before January 1, 2013. To that end, the act requires DES to report on its implementation of the program to the House Unemployment Fraud Task Force on September 1, 2012, November 1, 2012, and January 1, 2013.

Part V: Technical Changes Requested by the Division of Employment Security

Last session, as part of the reorganization of the Employment Security Commission, the information management system was placed under the Labor and Economic Analysis Division of Commerce. The act notes this change of responsibility in Article 4 of Chapter 96 of the General Statutes. The changes became effective when signed into law on June 29, 2012.

Part VI: NC Facts Program

The House Unemployment Fraud Task Force learned the importance of using cross-matching to discover and recover UI benefit overpayments. Cross-matching is a key tool in overpayment prevention, detection, and recovery. The act makes the necessary changes to enable DES to participate in NC FACTS by insuring that any disclosure made must conform to the confidentiality requirements of federal law. The changes became effective when signed into law on June 29, 2012.

NC FACTS is the North Carolina Financial Accountability and Compliance Technology System. It is a program designed to identify fraud, waste, and improper payments across State agencies. In 2007, the General Assembly directed the Office of the State Controller (OSC) to develop a strategic plan for the integration of databases and sharing of information among State agencies and programs. Since 2008, OSC has managed the Statewide Data Integration Program, including the design, development and statewide implementation of Criminal Justice Law Enforcement Automated Data Services (CJLEADS) criminal justice data integration program. Last year, in S.L. 2011-145, the General Assembly directed OSC to expand the data integration program by developing an enterprise process to detect fraud, waste, improper payments across State agencies. OSC has contracted with SAS to design, develop, and host NC FACTS.

Modify 2011 Appropriations Act.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-142, as amended by S.L. 2012-145	**HB 950**	**Representative Brubaker**

AN ACT TO MODIFY THE CURRENT OPERATIONS AND CAPITAL IMPROVEMENTS APPROPRIATIONS ACT OF 2011 AND FOR OTHER PURPOSES.

OVERVIEW: This act caps the motor fuel tax rate at 37½¢ cents a gallon for one year, July 1, 2012, through June 30, 2013, and it authorizes the Secretary of Revenue to enter into a

public-private partnership for the purpose of expanding the implementation of the Tax Information Management System (TIMS).[204]

FISCAL IMPACT: The cap on the motor fuel tax rate reduces Highway Fund revenues by $46.65 million in FY 2012-13 and reduces Highway Trust Fund revenues by $15.55 million in FY 2012-13. *(For a more complete fiscal analysis, see Finance Committee Highlights, 2012 Session, available online at www.ncleg.net.)*

EFFECTIVE DATE: This act became effective on July 1, 2012, when the General Assembly overrode the Governor's veto on July 2, 2012. [205]

ANALYSIS: This act contains the following finance-related provisions:

Reduce Motor Fuel Excise Tax Rate.[206] – Section 24.11 effectively reduced the motor fuel excise tax rate for the period July 1, 2012, through June 30, 2103, by placing a cap on the rate of 37.5¢ per gallon. With a cap, the rate may fall below 37.5¢ per gallon for the period July 1, 2012, through June 30, 2013, but it may not exceed it. Without this change the rate would have decreased from 38.9¢ per gallon to 37.7¢, effective for the period July 1, 2012, through December 31, 2012; however, without this change, it is projected that the rate would have increased to 38.8¢ a gallon for the period January 1, 2013, through June 30, 2013.

A motor fuel excise tax is imposed on all motor fuel sold, distributed, or used in the State. The motor fuel tax rate has two components: a flat rate of 17.5¢ and a variable rate that may change every six months.[207] The variable rate is equal to 7% of the wholesale price of gasoline based on a weighted average price of gasoline and diesel, as reported by the US DOE Energy Information Administration. The variable rate decreased from 21.4¢ to 20.2¢, effective July 1, 2012, based on the six-month period that ended March 31. However, it is projected that the variable rate effective January 1, 2013, would be higher based on the wholesale price of gasoline over the last few months. The variable tax rate effective January 1, 2013, would be based on the wholesale price of gasoline during the period April 1, 2012, through September 30, 2012.

The revenue generated by the motor fuel tax is distributed as set forth in G.S. 105-449.125. One-half cent of the excise tax on each gallon of gas is distributed to funds for underground tank storage cleanup water and air quality. The remaining excise tax revenue is allocated as follows:

---

[204] Section 24.21 of the act prohibits DOT from establishing or collecting tolls on I-95 prior to July 1, 2014. Originally, Section 24.18 of the act required DOT to collect the increased tolls on various ferry routes. However, Section 6.2 of S.L. 2012-145 reversed this provision by prohibiting DOT from collecting the increased ferry tolls during FY 2012-13.

[205] The failure of the act to be enacted on or before July 1, 2012, created initial uncertainty about the motor fuel excise tax rate. Section 61.2 of S.L. 2012-194 contained a savings clause to relieve a taxpayer from liability if the taxpayer over-collected or under-collected the excise tax on motor fuel if the taxpayer made a good faith effort to comply with the law.

[206] The House passed a similar provision in House Bill 645 during the special session held in November, 2011, and in House Bill 142 earlier this session.

[207]The variable rate component was introduced in 1986 as part of legislation that increased funding for road construction. In addition to the introduction of a 3% variable rate, which equated to 1.5¢ per gallon at that time, the legislation increased the flat rate from 12¢ per gallon to 14¢ per gallon. The General Assembly incorporated the variable rate in part as recognition that the cost of road construction increases as the cost of motor fuel increases because of the petroleum products used in road construction. In 1989, the General Assembly increased the flat tax rate to 17¢ per gallon and increased the variable component from 3% to 7% of the average wholesale price. In 1992, the tax rate was changed to the current rate of 17.5¢ per gallon plus 7% of the average wholesale price (S.L. 1991-538).

- 75% to the Highway Fund and used for maintenance, transit, rail, State Highway Patrol, DMV, some secondary road improvement, Powell Bill distribution to local governments, and some other administrative needs. G.S. 105-449.126 credits 1/6 of 1% of this amount annually to the Wildlife Resources Fund to be used for the boating and water safety activities described in G.S. 75A-3(c).[208]
- 25% to the Highway Trust Fund and used for construction of the intrastate system, some secondary road improvement, and Powell Bill distribution to local governments.

Tax Information Management System/Additional Public-Private Partnership Authorized. – Section 6A.3 authorizes the Secretary of Revenue to enter into an additional public-private arrangement in order to expand the implementation of TIMS.

For the last several years, the Department of Revenue has been in the process of implementing a new computer system known as the Tax Information Management System, which is designed to manage all tax schedules administered by the Department under one computer system. The new system will be phased in over a period of time as information is transferred from the current tax systems to TIMS.

This provision is an extension of authority that has been authorized each year since 2009, and all arrangements under this authority must terminate on June 30, 2018. The section appropriates additional sums from increased revenues or cost savings generated by the project under the public-private arrangement to cover the payment of internal costs and new resources necessary to provide additional electronic services, including the processing of payments and returns. The Department is required to report quarterly to the Chairs of the Appropriations Committees, the Joint Legislative Oversight Committee on Information Technology, and to the Fiscal Research Division of the General Assembly on the details of each public-private contract, the benefits from each contract, and a comprehensive forecast of using public-private agreements to implement TIMS.

Contingency Contracts for Audits/Assessments.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-152, as amended by S.L. 2012-194	**HB 462**	**Representative McCormick**

AN ACT TO LIMIT USE OF CONTINGENT-BASED CONTRACTS FOR AUDIT OR ASSESSMENT PURPOSES.

OVERVIEW: This act prohibits the Department of Revenue, local governments, and the State Treasurer from using third-party contractors paid on a contingent fee basis for audit and assessment purposes. The State Treasurer retains the authority to use a contingent fee contract with a maximum compensation of 12% of the final assessment for audits of unclaimed death benefits and unredeemed bond funds.

[208] The reduction in the motor fuel tax rate reduces the amount credited to the Wildlife Resources Fund by $197,000 for fiscal year 2012-13.

FISCAL IMPACT: This act has no fiscal impact at the State level.

EFFECTIVE DATE: The portion of the act relating to the Department of Revenue and the State Treasurer becomes effective October 1, 2012. The portion of the act relating to local governments becomes effective July 1, 2013, and expires July 1, 2015. *S.L. 2015-109 removed the sunset. Effective July 1, 2013, local governments cannot renew or enter into new contracts with an auditing firm for audit or assessment purposes that are contingency fee-based.*

ANALYSIS: Local governments and the State Treasurer currently contract with third-party auditors to search for unpaid taxes and other collectable funds. The contracts between the governmental entities and third parties may compensate the third-party auditors on a contingency fee based on the amount assessed or collected. The purpose of the act is to remove any conflict of interest between the correct assessment of liability and the third parties' financial interest in maximizing compensation under the contract.

State Government. – Section 1 of the act prohibits the Department of Revenue from contracting with an entity paid on a contingent fee basis to determine the tax liability of any taxpayer. The Department is authorized to outsource the collection of tax debts under G.S. 105-243.1, but the Department does not use third-party contractors to determine tax liability. The Department does use third-party contractors to collect tax debts from out-of-state taxpayers. The Department does not anticipate any changes in operation based on section 1 of this act.

Section 3 of the act prohibits the State Treasurer from contracting with entities paid on a contingent fee basis for administration of the Unclaimed Property Act. G.S. 116B-8 authorizes the State Treasurer to employ persons with specialized knowledge such as consultants and real estate managers. Section 3 contains an exemption to the prohibition for audits of life insurance companies where the audit is being conducted for the purpose of identifying unclaimed death benefits or to conduct audits of holders of unredeemed bond funds. These auditors may be paid on a contingent fee basis, but the contingency fee may not exceed 12% of the final assessment.[209] This exception allows the State Treasurer to participate with other states to use national firms to audit the voluminous records of life insurance companies.

Section 3.1 of the act allows the State Treasurer to use funds from the Escheat Fund to pay for consultants possessing specialized skills or knowledge to conduct audits for the administration of the Unclaimed Property Act. This authority allows the State Treasurer to continue to use third-party auditors paying the auditors from the Escheat Fund.

As originally enacted, these sections would have become effective July 1, 2012. Section 61.5 of S.L. 2012-194 changed the effective date. As amended, these three sections become effective October 1, 2012, and the Treasurer may not renew any contingency fee-based contracts for these services after October 1, 2012. Furthermore, the Treasurer may not assign further audits on a contingency fee basis to an auditing firm under a contract that meets both of the following conditions: (i) the contract would have been prohibited under this act had the contract been entered into after October 1, 2012, and (ii) the contract allows the assignment of audits on a discretionary basis by the Treasurer.

Local Governments. – Section 2 of the act prohibits counties from employing entities paid on a contingent fee basis to assist a county tax assessor. The board of county commissioners has the

---

[209] The contingency fee cap of 12% was removed from the statute by this act and restored by Section 61.5 of S.L. 2012-194.

authority under G.S. 105-299 to use third parties to assist the assessor in the performance of the assessor's duties.

Section 4 of the act prohibits counties from employing agents paid on a contingent fee basis to determine the tax liability of any taxpayer when imposing taxes. This prohibition limits the authority under G.S. 153A-146 for counties to impose taxes and administer tax collection.

Section 5 of the act prohibits cities from employing agents paid on a contingent fee basis to determine the tax liability of any taxpayer when imposing taxes. This prohibition limits the authority under G.S. 160A-206 for cities to impose taxes and administer tax collection.

As originally enacted, these sections would have become effective July 1, 2012. Section 61.5 of S.L. 2012-194 changed the effective date. As amended, these three sections become effective July 1, 2013, and expire July 1, 2015. During this two-year time period, a city or a county may not renew any contingency fee-based contracts for these services. Furthermore, a city or a county may not assign further audits on a contingency fee basis to an auditing firm under a contract that meets both of the following conditions: (i) the contract would have been prohibited under this act had the contract been entered into after July 1, 2013, and (ii) the contract allows the assignment of audits on a discretionary basis.

Public Finance Laws/Municipal Service Dists.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-156	**SB 426**	**Senator Clodfelter**

AN ACT TO MAKE CLARIFICATIONS AND MODIFICATIONS TO THE PUBLIC FINANCE STATUTES OF NORTH CAROLINA FOR THE IMPROVEMENT OF VARIOUS FINANCING STRUCTURES AND THE TERMS AND PROVISIONS OF THE FINANCING STRUCTURES AND TO AUTHORIZE A RESOLUTION ESTABLISHING A MUNICIPAL SERVICE DISTRICT TO BECOME EFFECTIVE UPON A DATE SPECIFIED IN THE RESOLUTION IF SPECIAL OBLIGATION BONDS ARE ANTICIPATED TO BE AUTHORIZED FOR A PROJECT.

OVERVIEW: This act does two things:

- It makes changes to the local government bond statutes designed to improve their efficiency.
- It authorizes a resolution establishing a municipal service district to become effective upon a date specified in the resolution, as opposed to July 1.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 28, 2012.

ANALYSIS:

Bond Statute Changes. – Under the Local Government Budget and Fiscal Control Act, an obligation may not be incurred by a city or county unless there has been an approved appropriation authorizing the payment of the obligation. For an obligation evidenced by a contract, an agreement, or a purchase order, the finance officer must have a certificate attached to the appropriate instrument stating the instrument has been pre-audited to assure that the obligation is an approved appropriation. An obligation incurred in violation of this requirement is invalid and may not be enforced. Section 1 of the act eliminates the need for the pre-audit certificate if the document has been approved by the Local Government Commission (LGC). The LGC approves all contractual obligations related to the financing of capital projects, including bond purchase agreements, credit facilities, repayment agreements, remarketing agreements, interest swap agreements, and installment purchase contracts. The approval by the LGC provides a "check" as a preaudit certification.

Under prior law, the Local Government Bond Act had a three-step process for adopting a bond order:

1. The governing body of a local government unit authorizes the filing of an application to issue general obligation bonds with the LGC in a formal meeting.
2. The LGC approves the application for the issuance of the revenue bonds. The governing body cannot adopt a bond order until the LGC has received and acknowledged receipt of the application requesting approval to issue GO bonds.
3. The governing body introduces a bond order in a formal meeting. The bond order is the formal resolution which specifies the details of the bonds being put to a vote: the purpose of the bond, the amount of the bond, the source of revenues for repayment of the bond, etc. The law then requires other meetings after the bond order is introduced, such as a public hearing.

Sections 2 and 3 of the act make this a two-step process by removing the restriction that the LGC must acknowledge receipt and approval of the bond application before the governing body may adopt a bond order[210] thus allowing a governing body to adopt the bond order at the same meeting in which it initiates the bond process with the application.[211]

Municipal Service District Changes. – Article V, Sec. 2(4) of the North Carolina Constitution allows the General Assembly to enact general laws authorizing the governing board of a local governmental unit to define territorial areas and to levy additional taxes within those areas to finance a service that is provided to a greater extent in that area than is provided to the entire area of the governmental unit. The purposes for which a service district may be created are: beach erosion control and flood and hurricane protection works; any service which the municipality may by law provide, such as placing utility wiring underground; downtown revitalization projects; transit-oriented development projects; drainage projects; sewage collection and disposal systems; lighting at interstate highway interchange ramps; off-street parking facilities; and watershed improvement projects.

Based on that provision, Article 23 of Chapter 160A authorizes a city to define a municipal service district and to levy a property tax in that district that is in addition to those levied through the city. A city may also incur debt, as allowed under general law, to finance services within a service district

[210] Section 3.
[211] Section 2.

and may allocate any other revenues whose use is not otherwise restricted by law. When there is no longer a need for the service district, the district may be abolished.

To create a district, a city must hold a public hearing on a proposed resolution. The resolution must define the service district and find that the area defined is in need of one or more of the services for which a district may be created to a demonstrably greater extent than the remainder of the city. Under prior law, a resolution establishing a municipal service district could only become effective either (1) at the beginning of the next fiscal year,[212] or (2) immediately, if it is anticipated that general obligation bonds will be issued for a project.

Section 4 of this act authorizes a resolution establishing a municipal service district to become effective upon a date specified in the resolution if special obligation bonds are anticipated to be authorized as funding for a project, as opposed to property tax revenues. North Topsail Beach would like to create a municipal service district for the purposes of beach erosion control. It plans to issue special obligation bonds. Under the prior law, it would have to have waited until July 1, 2013, to form the district. This change in the law enables the Town to proceed more quickly because it allows the Town, and any other city, to create a service district that could become effective upon a date set in the resolution creating the district.

Modify Taxation of HOA Property.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-157	**HB 1105**	**Representative Justice**

AN ACT TO SIMPLIFY THE COLLECTION OF PROPERTY TAXES THAT ARE DUE ON PROPERTY OWNED BY CERTAIN NONPROFIT HOMEOWNERS ASSOCIATIONS.

OVERVIEW: This act simplifies the collection of property taxes due on extraterritorial common property owned by nonprofit homeowners associations (HOA). The legislation is based upon a recommendation of the House Select Committee on Homeowners Associations.

FISCAL IMPACT: This act has no fiscal impact at the State level.

EFFECTIVE DATE: This act became effective for taxes imposed for taxable years beginning on or after July 1, 2012.

ANALYSIS: G.S. 105-277.8 provides that the value of real and personal property owned by a HOA must be included in the appraisals of property owned by members of the HOA and not be assessed against the HOA if each of the following requirements are met:

- All property owned by the HOA is held for the use, benefit, and enjoyment of all members of the HOA equally.
- Each member of the HOA has an irrevocable right to use and enjoy all the property owned by the HOA subject to the rules, regulations or bylaws of the HOA.

[212] No ad valorem tax may be levied for partial fiscal year.

- Each irrevocable right to use and enjoy all the property owned by the HOA is appurtenant to taxable real property owned by a member of the HOA.

The genesis for this act is because instances have arisen where HOAs purchased or were formed with property meeting these requirements but located in a separate taxing jurisdiction than the jurisdiction in which the HOA members reside. This property is defined by the act as "extraterritorial common property." Under prior law, the tax on the value of extraterritorial common property was incorporated into the members' residential property and remitted to the county of residence. This was problematic in that (1) if applied, counties would receive property taxes for property not located in the county, and (2) the assessor of the county with extraterritorial common property did not know the HOA membership.

This act modifies the property tax treatment of extraterritorial common property. Under the act, HOA extraterritorial common property is taxed in the jurisdiction in which it is located and to the HOA owner of record, which, in turn, recoups the taxes paid from its members. In order to ensure that developers do not use bylaws or covenants to escape paying taxes on portions of communities not yet sold, the act requires recoupment to be pro rata, based on the number of lots or units in the association. The value of extraterritorial common property is not included in the appraisals of property owned by the members of the HOA.

Nonappropriated Capital Projects.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-164	**SB 444**	**Senator Hartsell**

AN ACT TO AUTHORIZE THE CONSTRUCTION AND THE FINANCING, WITHOUT APPROPRIATIONS FROM THE GENERAL FUND, OF CERTAIN CAPITAL IMPROVEMENTS PROJECTS.

OVERVIEW: This act authorizes the following capital projects:

- The construction of numerous projects by The University of North Carolina (UNC) to be financed through revenue bonds and special obligation bonds, not appropriations from the General Fund.
- Thirty-five capital projects to be financed with receipts or from other non-General Fund sources.

FISCAL IMPACT: The act authorizes $225,194,410 in new debt at the UNC campuses. It is expected that there will be an increase in operating requirements and associated positions at the campuses. These operating impacts are commonly referred to as building reserves. The act authorizes $27,851,143 in projects to be funded from non-General Fund sources at the various State agencies, should the funding become available. Various agencies listed insignificant increases to operating budgets as a result of the projects; fiscal research assumes the agencies can absorb costs from current budgeted sources. *(For a more complete fiscal analysis, see Finance Committee Highlights, 2012 Session, available online at www.ncleg.net.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 12, 2012.

ANALYSIS: This act authorizes the following capital projects:

UNC Capital Improvement Projects. – The act authorizes the construction and financing of 16 capital improvement projects on eight campuses of UNC. The projects authorized by the act are not financed with funds appropriated from the State's General Fund but may be financed with gifts, grants, receipts, self-liquidating indebtedness, Medicare reimbursements for education costs, other funds available to the constituent institutions, or a combination of any of those financing methods. The projects include academic, research, clinical and administrative space and improvements to student services, residential living, dining, recreation, and athletics facilities. Once approved, a detailed financial plan will be developed in consultation with financial advisors and bond counsel for each project. The plans must be approved by the Chancellor, the Boards of Trustees, the President, and the Board of Governors before construction contracts may be awarded and bonds issued.

Under Article 8 of the State Budget Act, no State agency may expend funds for the construction or renovation of a capital improvement project unless authorized to do so by the General Assembly. The UNC Board of Governors may approve expenditures for projects that are to be funded entirely with non-General Fund money. However, under Article 3 of Chapter 116D, the General Assembly must approve the issuance of special obligation bonds for UNC projects. This act provides the necessary authorization and approval.

There are two types of self-liquidating bonds that may be issued by the UNC Board of Governors.

- Article 21 of Chapter 116 of the General Statutes authorizes the Board of Governors to issue revenue bonds for the types of projects enumerated in the Article. The types of projects for which revenue bonds may be issued include educational buildings, dormitories, recreational facilities, dining facilities, student centers, health care buildings, parking decks, etc. for the educational institutions, the University of North Carolina Health Care System, the University of North Carolina General Administration, and the University of North Carolina Hospitals at Chapel Hill. The revenue bonds are payable from rentals, charges, fees, and other revenues generated by the facility. The bonds are not payable from tax revenues.

- Article 3 of Chapter 116D of the General Statutes authorizes the Board of Governors to issue special obligation bonds payable with any sources of income or receipts of the Board of Governors or a constituent or affiliated institution, but not including tuition payments or appropriations from the General Fund from State revenues. The bond proceeds could be used for construction, improvement, and acquisition of any capital facilities located at UNC constituent and affiliated institutions. The project must be approved by the board of trustees for the respective institution for which the project is authorized and the General Assembly must approve the project and the maximum aggregate principal amount for the project. The bonds are not payable from tax revenues.

The self-liquidating projects the Board of Governors plans to finance with revenue or special obligation bonds are listed in Section 2 of the act. Section 3 authorizes the Board of Governors to expend non-General Fund money to plan six capital projects on four campuses. The Chancellors and Boards of Trustees for the listed campuses, as well as the President and the Board, have approved these projects. Support from General Fund sources for operating costs will be required only for facilities used for academic programs. Section 5 of the act expressly states that the maximum principal amount of special obligation bonds to be issued shall not exceed the amounts listed in Sections 2 and 3 of the act plus 5%. The additional 5% may be used for related

additional costs for which bond proceeds are routinely used, such as issuance expenses, funding of reserve funds, and capitalized interest.

Sections 6 and 7 authorize UNC-Chapel Hill and Winston-Salem State University to construct and finance projects through lease arrangements to, from, and with named entities. Once constructed and approved by state reviewing agencies, the improvements would transfer to the respective institutions. The two projects are:

- Chilled Water Infrastructure Improvements capital project at UNC-Chapel Hill. The school will partner with the Orange Water and Sewer Authority.
- New Student Housing Building capital project at Winston-Salem State University. The school will partner with Winston-Salem State University Foundation, Inc. and Winston-Salem State University Housing Foundation, LLC.

Non-General Fund State Agency Capital Improvement Projects. – Section 8 authorizes the construction of 35 capital projects to be funded with non-General Fund sources totaling $27,851,143. These projects must be approved by the General Assembly each year. Section 9 directs the Division of Veterans Affairs of the Department of Administration to report on or before January 1, 2013, to the Joint Legislative Commission on Governmental Affairs on the status of the Committal Structure project located at the Sandhills Cemetery.

PPP Pilot Toll Project/Ferry Tolls.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-184	**HB 1077**	**Rep. Frye, Mills**

AN ACT TO ALLOW THE DEPARTMENT OF TRANSPORTATION TO ENTER INTO A PILOT PUBLIC-PRIVATE PARTNERSHIP TOLL PROJECT AND TO REALLOCATE THE MONEY APPROPRIATED FOR STUDIES RELATED TO THE MID-CURRITUCK BRIDGE PROJECT TO THE DEPARTMENT OF TRANSPORTATION, FERRY DIVISION.

OVERVIEW: This act makes changes to the public-private partnership authority granted to the Department of Transportation (DOT) in 2006 to enable it to more effectively enter into such an agreement. The act is drafted to apply the changes to one project, the I-77 High Occupancy Toll Project.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 16, 2012.

ANALYSIS: In 2006, the General Assembly authorized DOT to enter into partnership agreements to finance transportation projects.[213] As part of this authority, DOT may finance the projects by tolls, contracts, and other financing methods authorized by law. Under Article 6H of

[213] S.L. 2006-230.

Chapter 136, DOT has toll-setting authority for the projects specifically identified for The Turnpike Authority and on any existing interstate highway for which the US DOT has granted permission by permit to do so.

This act places some restrictions on DOT's authority to enter into partnership agreements to finance transportation infrastructure.[214] A financing agreement that extends beyond 18 months requires approval of the agreement by the Local Government Commission (LGC). The approval of the LGC is also required for contracts that commit DOT to make nonretainage payments for undisputed capital costs of a completed transportation infrastructure project later than 18 months after final acceptance by DOT of the infrastructure.

The changes below apply to a public-private partnership agreement that is a candidate for funding under the Mobility Fund, that is planned for construction through a public-private partnership, and for which a Request for Qualifications has been issued by the DOT no later than June 30, 2012. The only project that meets these requirements is the I-77 High Occupancy Toll project. This project runs from the junction at NC-150 at Exit 36 to I-277 at Exit 9B.

- Allows DOT to accept performance and payment security from a private entity to an agreement in a form and an amount that DOT determines is sufficient, rather than as provided under the generally applicable payment and performance bond statutes.[215]
- Allows the private entity to an agreement to transfer some or all of its interest under the agreement to a lender, bondholder, or any other party. In no event shall the assignment create additional debt or debt-like obligations of the State, DOT, or other subdivision of the State to any other party providing financing or funding of the project subject to the agreement. This provision would apply in lieu of the State's general law on assignments of claims against the State.[216]
- Gives DOT the power to transfer its authority to fix, revise, charge, and collect tolls and fees with respect to a transportation infrastructure project to a private entity through an agreement.
- Allows DOT to act as a conduit issuer for private activity bonds. The issuance of private activity bonds would be governed by the State's revenue bond statutes[217] and the State's general law on adoption of a revenue bond order[218] if the bonds are obligations secured by a pledge of revenues allocated to a private entity under G.S. 136-18(39) and (39a).

Study Municipal Local Option Sales Tax.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-189	**HB 1181**	**Representative McElraft**

AN ACT TO AUTHORIZE THE REVENUE LAWS STUDY COMMITTEE TO STUDY WHETHER MUNICIPALITIES SHOULD HAVE THE AUTHORITY TO LEVY A LOCAL OPTION SALES TAX FOR BEACH NOURISHMENT AND TO STUDY THE TAXATION AND VALUATION OF LEASEHOLD INTERESTS IN EXEMPT REAL PROPERTY.

OVERVIEW: This act authorizes the Revenue Laws Study Committee to study two different issues: (1) whether municipalities should have the authority to levy a local option sales tax for beach nourishment, and (2) the taxation and valuation of leasehold interests in exempt real property.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 16, 2012.

ANALYSIS: This act authorizes the Revenue Laws Study Committee to study two different issues. The first issue is whether municipalities should be granted the authority to levy a local option sales tax for the purpose of providing dedicated funding for beach nourishment and other natural resources preservation. The Committee may report its findings, together with any recommended legislation, to the 2013 Regular Session of the General Assembly upon its convening.

Counties and cities are created by the State and have only the authority given to them by the State. The General Assembly has authorized counties to levy a local option sales tax on at least four different occasions. The counties must distribute a portion of the 2% local sales tax revenues to the cities. The distribution between the county and its municipalities is based upon one of two methods: ad valorem or per capita. Cities may use this revenue for any public purpose, including beach nourishment.

The General Assembly has not authorized any cities to levy a city-only sales tax. Cities do have general authority to levy local privilege license taxes and vehicle taxes. Many cities have also obtained local legislation authorizing the levy of a room occupancy tax. A portion of those proceeds may be used for beach nourishment. Cities also receive a distribution of beer and wine excise taxes, electric franchise taxes, piped natural gas excise taxes, telecommunications taxes, and video programming taxes.

The second issue is the taxation and valuation of leasehold interests in exempt real property. North Carolina imposes a property tax on a leasehold interest in real property where the real property is exempt from property tax. The property tax on a leasehold interest in exempt real property applies when a unit of government leases property to a private business and when the payments under

the lease are below the value of the interest in the real estate.[219] Most county assessors value these leasehold interests as the difference between the fair market value of the leasehold interest and the rent paid under the lease. For example, if the private tenant is paying market rate for the exempt real property owned by a local government, then the leasehold interest has no value because similar leases can be obtained at the same price. If the tenant is paying a bargain rate under the lease, the leasehold interest has value because a similar lease would cost more.

This topic received attention during this session because there were reports of inconsistent application of the law by different counties. However, there was not adequate time to address it during session. The Committee may report its findings, together with any recommended legislation, to the 2013 Regular Session of the General Assembly upon its convening.

GSC Technical Corrections/Other Changes.

Session Law	*Bill #*	*Sponsor*
S.L. 2012-194	**SB 847**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL CORRECTIONS TO THE GENERAL STATUTES, INCLUDING SPECIFICALLY AUTHORIZING THE REVISOR OF STATUTES TO PRINT DRAFTERS' COMMENTS TO THREE ACTS ENACTED IN 2011 IN WHICH THIS AUTHORIZATION WAS INADVERTENTLY OMITTED, AS RECOMMENDED BY THE GENERAL STATUTES COMMISSION, AND TO MAKE OTHER AMENDMENTS.

OVERVIEW: This act consists of technical corrections recommended by the General Statutes Commission and miscellaneous conforming and substantive changes. There are only two sections that are finance-related, one of which is a conforming change related to the cap on the motor fuel tax[220] and the other is an extension of the film credit. This Analysis addresses the extension of the film credit only.

FISCAL IMPACT: In recent years, the film credit has resulted in an annual loss to the General Fund of almost $36 million. The fiscal impact of the extension is estimated to cost $60 million and will occur in FY 2014-15. *(For a more complete fiscal analysis, see Finance Committee Highlights, 2012 Session, available online at www.ncleg.net.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 17, 2012.

ANALYSIS: Section 79.10 of this act extends the expiration of the refundable film production tax credit from January 1, 2014, to January 1, 2015.

During the 2012 Session, the General Assembly enacted S.L. 2012-36 (House Bill 1025)[221] which extended for one year a number of tax provisions that were scheduled to expire in 2013. The film

[219] The only other form of intangible property subject to property tax is certain computer software.
[220] For an explanation of Section 61.2 of this act, see the Analysis for S.L. 2012-142.
[221] This bill was a Revenue Laws Study Committee recommendation.

credit was not included in that bill because it was not scheduled to expire until 2014. During hearings on House Bill 1025, the sponsors of the bill indicated that only those tax provisions scheduled to expire in 2013 were included since the General Assembly intends to undertake comprehensive tax modernization efforts in 2013 that may significantly alter the tax structure and potentially eliminate those tax credits altogether. [222]

In 2005, the General Assembly replaced the film industry development grant program with a refundable income tax credit calculated based on the qualifying expenses spent by a production company in connection with a production.[223] The credit amount is equal to 25% of the production company's qualifying expenses, which must exceed $250,000 and may not include any amount in excess of $1 million in compensation paid to an individual. The refundable film credit is capped at $20 million. The credit is claimed for the taxable year in which the production activities are completed. The credit is computed based on all of the taxpayer's qualifying expenses incurred with respect to the production, not just the qualifying expenses incurred during the taxable year. If the credit exceeds the amount of tax imposed for the taxable year reduced by the sum of all credits allowable, the Secretary must refund the excess to the taxpayer. A pass-through entity is considered a taxpayer for purposes of claiming this credit. In 2010, the General Assembly clarified[224] that purchases of cameras, film, props, building materials used in construction of sets, and chemicals/equipment used to develop and edit film do not fall within the scope of mill machinery for privilege tax purposes and are, therefore, subject to the general rate of sales tax beginning January 1, 2011.

[222] However, during a Finance Committee meeting, the bill was amended to include an extension for the tax credits for rehabilitating historic structures and historic mill property, which were extended through the 2014 taxable year.
[223] Section 39.1 of S.L. 2005-276.
[224] S.L. 2010-147.

2011 Finance Law Changes

TC: Eligibility: Indus Facil/Fix Uwharrie Com.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-3	**SB 76**	**Sen. Hartsell, Rucho, Clary**

AN ACT TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE INDUSTRIAL FACILITIES SALES TAX REFUND, A TECHNICAL CORRECTION TO THE MEMBERSHIP COUNT OF THE UWHARRIE COMMISSION, TO PROVIDE INTEREST ON OVERPAYMENT OF PROPERTY TAX, AND TO PROVIDE DELAY OF THE COLLECTION OF PROPERTY TAX PENDING APPEAL.

OVERVIEW: This act reenacts and amends the sales tax refunds for industrial facilities, provides for interest on overpayments of property tax, and delays the collection of property tax pending appeal. The remainder of this act does not affect North Carolina tax laws and is not discussed below.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: The section related to the sales tax refunds for industrial facilities is effective July 1, 2010, and applies to sales on or after that date. The section relating to interest on overpayments of property tax is effective for taxable years beginning on or after January 1, 2011.

ANALYSIS: This act makes changes in two unrelated areas. Section 1 of the act deals with the sales tax refund for industrial facilities. Section 3 of the act deals with property tax overpayments and appeals.

Sales Tax Refund for Industrial Facilities. – In 2010, the General Assembly expanded the list of industries allowed an annual sales and use tax refund to include paper-from-pulp manufacturing[1] and turbine manufacturing[2] as part of the Keeping NC Competitive Act.[3] The change was intended to become effective July 1, 2010, and apply to sales made on or after that date. During the same session, another act made technical changes to the sales and use tax refunds generally, but inadvertently failed to include the newly enacted refunds.[4] Statutory construction provides that when the General Assembly enacts two bills that amend the same existing general statute, the bill

---

[1]This incentive coincided with the announcement by Clearwater Paper Corporation that it would build a new tissue paper plant in Shelby, NC. The plant opened in June of 2011. According to a press release, the company has hired 100 local employees and plans to hire 150 more before the project is complete. When completed, the facility is expected to produce 10 million cases of bathroom tissue and paper towels annually.

[2] In March 2010, Siemens Energy announced plans to expand its Charlotte manufacturing plant for turbines and generators, investing over $100 million and creating over 800 jobs.

[3] Section 4 of S.L. 2010-91.

[4] S.L. 2010-166.

enacted last controls. Therefore, the refunds enacted in the Keeping NC Competitive Act (S.L. 2010-91) were, in effect, removed by S.L. 2010-166.

This act reenacts the sales tax refunds for paper-from-pulp manufacturing and turbine manufacturing enacted in S.L. 2010-91. It also makes the following changes to the refunds for industrial facilities:

- Amends the definition of "owner" to include lessees under a capital lease.
- Deletes the defined term "strategic partner." This term was used only in the refund for computer manufacturing facility, which has been repealed.
- Removes additional reference to computer manufacturing facilities.
- Clarifies the minimum investment requirement for the refunds can be met by funds invested directly or indirectly through a related entity.

Property Tax Overpayments and Appeals. – Section 3 of this act provides interest on overpayments and suspension of the enforcement proceedings for property valuations that have been appealed to the county boards of equalization and review.

Individuals may appeal property tax valuations to the county board of equalization and review. The State Property Tax Commission hears appeals from the local boards of equalization and review. If the Property Tax Commission reduces the value of the property, or removes the property from taxation, the taxpayer receives interest on any overpayment of taxes. The tax collector may not enforce collection of the tax while the appeal to the Property Tax Commission is pending, but interest will accrue if the taxes are not timely paid. Under prior law, there were not corresponding provisions for appeals pending at county boards of equalization and review. Section 3 establishes similar provisions at the county level. If the county board of equalization and review reduces the value of the property, or removes the property from taxation, the taxpayer receives interest on any overpayment of taxes. The interest for overpayments is the same as the interest charged for delinquent taxes. The tax collector may not enforce collection of the taxes while the appeal to the board is pending, but interest will accrue if the tax is not timely paid.

Clarify Refunds of Tax Overpayments.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-4	**SB 97**	**Sen. Rucho, Hartsell, Daniel**

AN ACT TO CLARIFY WHEN THE DEPARTMENT OF REVENUE IS REQUIRED TO INITIATE A REFUND OF AN OVERPAYMENT OF TAX AND TO AUTHORIZE THE ISSUANCE OF REFUNDS OF OVERPAYMENTS THAT HAVE BEEN IDENTIFIED BY THE DEPARTMENT CONSISTENT WITH THIS CLARIFICATION.

OVERVIEW: This act clarifies when the Department of Revenue is required to initiate a refund of an overpayment of tax and directs the Department to issue refunds for overpayments that have been discovered within the statute of limitations consistent with this clarification.

<u>FISCAL IMPACT:</u> This act has no fiscal impact.

<u>EFFECTIVE DATE:</u> This act became effective when the Governor signed it into law on March 9, 2011.

<u>ANALYSIS:</u> Prior to the effective date of this act, the law provided two methods for obtaining a refund of tax from the Department of Revenue. If a taxpayer was aware that he or she had made an overpayment, then the taxpayer could request a refund by filing an amended return or by filing a claim for refund. If a taxpayer was not aware of an overpayment, the Department was required to initiate the refund process if, within the statute of limitations period, it became aware of or "found" the overpayment. Specifically, the Department was required to initiate a refund of an overpayment of tax when the Department processed a return and found all of the following:

1. The statute of limitations[5] for obtaining a refund has not expired.
2. The amount shown due on the return is not correct.
3. The correction of the amount due shows that the taxpayer has overpaid the tax.

Prior law did not specify what constitutes "finding" or discovering an overpayment for purposes of satisfying the statute of limitations. In other words, it did not identify what action must take place by the Department before the statute of limitations expires.

During 2009 and 2010, the Department was engaged in working through a backlog of returns that were flagged for review by the Department's computer system, some dating as far back as 1996. By December of 2010, the vast majority of returns had been reviewed and many refunds were issued. However, at the beginning of 2011, approximately 7,000 returns remained in which an overpayment was made but a refund was not issued because the Department believed it needed clarification from the General Assembly about the application of the then existing law. Those overpayments totaled a little over $2 million plus interest.

The Revenue Laws Study Committee examined the issue during the interim following the conclusion of the 2010 Regular Session. The Committee heard differing opinions about the interpretation of the law and its application to overpayments. The Secretary of Revenue testified that the Department had been advised by the Attorney General's office that the existing law required the Department to issue a refund of an overpayment only if the overpayment was verified by a Departmental employee within the statute of limitations period. Under this interpretation, a taxpayer's receipt of a refund is dependent on the Department's ability to timely review the return, which can vary depending on its workload and resources.

An alternative interpretation of the then existing law was that the Department is required to issue a refund of an overpayment if the return is flagged by the Department's computer system within the statute of limitations. The Department may need to verify the existence of an overpayment by manual review of a flagged return, but the manual review need not occur within the statute of limitations. Because returns are processed by the computer system almost immediately after they are filed, this interpretation assures that taxpayers will eventually get a refund if an overpayment was made.

Despite a finding by the Revenue Laws Study Committee that the existing law could reasonably be interpreted to authorize the Department to release the remaining 7,000 refunds because,

[5] The general statute of limitations for obtaining a refund is the later of three years after the due date of the return or two years after the payment of tax.

although they had not been manually reviewed within the statute of limitations, they had been flagged by the Department's computer system within the statute of limitations thereby putting the Department on notice, the Department sought clarifying legislation.

The act clarifies when the discovery of an overpayment occurs, triggering the Department of Revenue's obligation to issue a refund. Under the act, discovery occurs in any of the following circumstances:

1. When the automated processing of a return indicates the return requires further review.
2. When a review of a return by an employee indicates an overpayment.
3. When an audit of a taxpayer by an employee indicates an overpayment.

If the Department's computer system flags a return for further review, the Department must verify that an overpayment exists before issuing a refund because the automated flagging does not always indicate the precise nature of an error on a return. However, this act clarifies that the verification need not occur within the statute of limitations period. The flagging of the return is sufficient to put the Department on notice that a refund may be due for purposes of satisfying the statute of limitations.

The act also directed the Department to issue refunds of overpayments that have been discovered within the statute of limitations in a manner consistent with the clarification set out by the act. After passage of this act, the refunds were issued in April of 2011 with 5% interest.

IRC Update.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-5, as amended by S.L. 2011-330	**HB 124**	**Rep. Howard, Brubaker, Starnes, Setzer**

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE

OVERVIEW: This act updates the reference to the Internal Revenue Code used in defining and determining certain State tax provisions from May 1, 2010, to January 1, 2011. The act incorporates many, but not all, of the tax provisions contained in the federal Small Business Jobs Act of 2010 and the Tax Relief, Unemployment Insurance Reauthorization, and Job Creation Act of 2010.

It conforms to the Code by extending for an additional two years various individual and business tax deductions that expired in 2010, such as the tax deduction for higher education expenses and the $250 tax deduction for teacher's classroom supplies.

It decouples from the bonus depreciation provision, but maintains the same basis in the property for federal and State tax purposes, by requiring an 85% addback of any accelerated

depreciation a taxpayer claimed on the federal return for taxable years 2010[6] through 2012 and a corresponding deduction of 20% of this amount over the next five tax years.

It conforms to some of the section 179 changes, and decouples from others. It maintains the current section 179 expense deduction limit and cap through 2011 and conforms to the federal section 179 expense deduction limit and cap for 2012. It conforms to the expanded definition of qualifying property for taxable years 2010 and 2011. It decouples from the additional section 179 expense deduction by requiring an 85% addback of the additional expensing taken under federal law and providing a corresponding deduction of 20% of this amount over the next five tax years.

FISCAL IMPACT: With the exception of the estate tax, the act's impact on General Fund availability is minimal. Conformity to the higher estate tax exclusion amount of $5 million, and effectively $10 million for married couples, will reduce General Fund revenues by $59 million in Fiscal Year 2011-12 and by $79 million in Fiscal Year 2012-13. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on March 17, 2011.[7] Several of the tax provisions contained in the federal acts became effective retroactively. Article I, Sec. 16 of the North Carolina Constitution prevents North Carolina from enacting a law that retroactively increases a person's tax liability. Therefore, any amendments to the Internal Revenue Code enacted after May 1, 2010 that increase North Carolina taxable income for the 2010 taxable year or impose an estate tax on the estate of a decedent dying in calendar year 2010 become effective for taxable years beginning on or after January 1, 2011.

ANALYSIS: North Carolina's tax law tracks many provisions of the federal Internal Revenue Code by reference to the Code.[8] The General Assembly determines each year whether to update its reference to the Code.[9] Updating the reference makes recent amendments to the Code applicable to the State to the extent that State law previously tracked federal law. The General Assembly’s decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather

[6] The effective date of the federal 100% bonus depreciation provision applied to property placed in service after September 8, 2010, *in taxable years ending after such date*. This effective date means the bonus depreciation provision may be taken in the 2009 taxable year if a taxpayer had a taxable year ending after September 8, 2010, and before December 31, 2010. Therefore, the bill would provide that the adjustments needed to decouple from this provision may be reflected on a taxpayer's 2009 tax year return.

[7] S.L. 2011-330, Section 11, clarified that the act applies to the estates of decedents dying on or after January 1, 2011. The Department of Revenue requested the clarifying change so there would be no confusion as to the applicable exclusion amount for the estates of decedents dying on or after January 1, 2011, and before March 17, 2011.

[8] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[9] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the “power of taxation … shall never be surrendered, suspended, or contracted away.” Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General’s Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a “statute which adopts by reference future amendments to the Internal Revenue Code would be invalidated as an unconstitutional delegation of legislative power.”

than in the same year the federal changes are made. Maintaining conformity with federal tax law simplifies tax reporting because a taxpayer will not need to account for differing federal and State treatment of the same asset.

This act updates the reference to the Internal Revenue Code used in defining and determining certain State tax provisions from May 1, 2010, to January 1, 2011. The act incorporates many, but not all, of the tax provisions contained in the Small Business Jobs Act of 2010, enacted September 27, 2010, as P. L. 111-240 (2010 Jobs Act), and the Tax Relief, Unemployment Insurance Reauthorization and Job Creation Act, enacted December 17, 2010, as P. L. 111-312 (2010 Tax Relief Act).

The 2010 Jobs Act enhances existing business tax incentives and partially offsets this revenue loss with changes that are expected to increase revenue. The incentives in the 2010 Jobs Act are not limited to small businesses, and the accelerated deduction for depreciation represents a major benefit to large businesses. The 2010 Tax Relief Act boosts some of the business tax incentives in the 2010 Jobs Act and extends for two years the Bush-era individual and business tax incentives, included in the Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA)[10]

Extension and Expansion of Bonus Depreciation for 2010, 2011, and 2012. – Businesses may depreciate the cost of a new asset[11] over a period of time, usually five to 15 years. Bonus depreciation allows a business to claim more of a deduction up front and spread the remaining deduction amount over the normal depreciation schedule. The federal Economic Stimulus Act of 2008[12] provided a 50% first-year bonus depreciation for qualified property acquired and placed in service in 2008. The federal American Recovery and Reinvestment Act of 2009 extended the 50% bonus depreciation provided to qualified property for an additional year through 2009.

The 2010 Jobs Act extended retroactively the bonus depreciation for 2010 to property acquired and placed in service in 2010.[13] The 2010 Tax Relief Act increased the 50% bonus depreciation extended under the 2010 Jobs Act to 100% for property acquired and placed in service after September 8, 2010, and before January 1, 2012. It also provided 50% bonus depreciation for qualified property placed in service after December 31, 2012, and before January 1, 2013. Under the 2010 Jobs Act, the bonus depreciation would have expired for the 2012 taxable year. Under the 2010 Tax Relief Act, the bonus deprecation expires for the 2013 taxable year.

This act decouples from the bonus depreciation provisions for 2010, 2011, and 2012[14] in the same manner as it has decoupled from them in 2008 and 2009: a taxpayer may deduct the same amount

---

[10] Most of the tax provisions in EGTRRA were scheduled to expire in 2010 or 2011 and revert to the provisions as they existed in 2001.

[11] One important difference between bonus depreciation and section 179 expensing is that bonus depreciation applies only to new equipment, while section 179 expensing may apply to new and used equipment.

[12] Congress has authorized bonus depreciation several times to encourage business investment, specifically after September 11, 2001. The Jobs Creation and Worker Assistance Act of 2002 provided a 30% bonus depreciation allowance. The Jobs and Growth Tax Relief Reconciliation Act of 2003 extended the sunset and increased the amount to 50%.

[13] The property may be placed in service during 2011 for property with a recovery period of 10 years or longer and for transportation property (i.e., tangible personal property used to transport people or property).

[14] The cost to conform to the bonus depreciation provision would have been approximately $460 million. As of February 16, 2011, it appears 15 of 43 states conformed to this provision in some form while the remaining 28 states did not.

of an asset's basis under State law as under federal law, it is just that the timing of the deduction differs. Under State tax law, a taxpayer must add back 85% of the accelerated depreciation amount[15] in the year that it is claimed for federal purposes. Then, in subsequent tax years, the taxpayer may deduct from federal taxable income the total amount of the add-back, divided into five equal installments. This adjustment means that for State tax purposes, a taxpayer may deduct a greater depreciation amount in the outlying tax years, which will be the normal depreciation amount plus 20% of the accelerated depreciation amount the taxpayer had to add back.

Under the 2010 Tax Relief Act, the 100% bonus depreciation applied to property placed in service after September 8, 2010, *in taxable years ending after such date.* This effective date means the bonus depreciation provision may be taken in the 2009 taxable year if a taxpayer had a taxable year ending after September 8, 2010, and before December 31, 2010. Therefore, the act provides that the adjustments needed to decouple from this provision may be reflected on a taxpayer's 2009 tax year return.

Enhanced Section 179 Expensing for 2010, 2011, and 2012. – Section 179 of the Code allows the expensing of the purchase price of some business assets[16] in the year of purchase rather than taking depreciation[17] throughout the life of the asset. In other words, expensing trades a smaller yearly deduction over time for a larger deduction in year one. Section 179 is commonly thought to apply to small businesses because of its maximum deduction and investment limits. Prior to the Emergency Economic Stabilization Act of 2008 (EESA), the deduction limit for section 179 expensing was $128,000[18] of the cost of the property with a dollar-for-dollar phaseout of this amount whenever the total cost of qualifying property placed in service that year exceeded $510,000.[19] EESA increased the deduction limit from $128,000 to $250,000 with a phaseout at $800,000 for the 2008 tax year. The American Recovery and Reinvestment Tax Act of 2009 (ARRTA) extended the temporary increase through 2009. The federal Hiring Incentives to Restore Employment Act of 2010 extended the 2008 and 2009 increase through 2010. The limits were scheduled to revert to the prior levels of $25,000 and $200,000 in taxable year 2011.[20]

The 2010 Jobs Act not only delayed the reversion to the prior levels until the 2012 taxable year, it also increased the section 179 expensing deduction for tax years 2010 and 2011 from $250,000 and $500,000 to $800,000 and $2 million. The enhancements made by the 2010 Jobs Act are the most expansive ever enacted. The 'small business' label associated with the section 179 deduction does not reflect the true scope of the deduction as enhanced by the 2010 Jobs Act since it currently impacts businesses of many sizes. In addition to the expansion of the limits, the 2010 Jobs Act broadened the definition of qualified property to include qualified leasehold improvement property, qualified restaurant property, qualified retail improvement property, and computer

---

[15] The accelerated depreciation amount for property placed in service in 2008 is 50%.

[16] The business asset must be newly purchased tangible personal property that is used more than 50% for business purposes and is eligible to be depreciated under the Code. The newly purchased property may be new or used equipment.

[17] Generally, taxpayers take the Section 179 expensing deduction first and claim Section 168(k) depreciation on any remaining basis.

[18] Prior to the EESA, the dollar limits would have been $125,000 with a phase-out beginning at $500,000; both amounts would have been indexed for inflation resulting in the limits of $128,000 and $510,000.

[19] For example, if the taxpayer placed in service during the taxable year one or more items of qualifying property totaling $520,000, the amount that could be expensed under section 179 would be $118,000 -- $128,000 less $10,000, which is the excess of $520,000 over $510,000.

[20] North Carolina conformed to these changes.

software.[21] The enhancements made by the 2010 Jobs Act are set to expire for the 2012 taxable year.

The 2010 Tax Relief Act does not continue the expansion of the types of property that may qualify for the deduction beyond the 2011 taxable year, but it does increase the limits for the 2012 taxable year from $25,000 and $200,000 to $125,000 and $500,000. Under the 2010 Tax Relief Act, the deduction limits are set to revert to their prior levels of $25,000 and $200,000 in 2013.

This act conforms to the expanded definition of qualified property; but it maintains the 2010 deduction limits of $250,000 and $800,000 for taxable years 2010 and 2011; and it decouples from the enhanced limits of $500,000 and $2,000,000 for taxable years 2010 and 2011.[22] The act provides that the property's basis remains the same for federal and State purposes by treating the difference in the same manner as State tax law has historically treated the bonus depreciation: A taxpayer must addback 85% of the additional expensing taken under federal law in 2010 and 2011 and deduct 20% of this amount over the succeeding five years. The act conforms to the expensing limits of $125,000 and $500,000 for the taxable year 2012 and, like federal law, reverts to the prior expense limits of $25,000 and $200,000 for the taxable year 2013.

Estate Tax for 2010 - 2012. – EGTRRA gradually reduced the federal estate tax over a period of years and abolished it for decedents dying in 2010. During the year of its repeal, the basis of property passing through an estate was determined by the modified carryover basis rules under EGTRRA. EGTRRA also repealed the state estate tax credit for decedents dying on or after 2004 and replaced the credit with a deduction. The estate tax was scheduled to revert to the 2001 law in 2011: the 2001 maximum estate tax rate of 55% and a $1 million applicable exclusion amount.

The 2010 Tax Relief Act revived the estate tax retroactively for decedents dying on or after January 1, 2010; the revival of the estate tax allowed property passing through the estate to acquire a stepped-up basis. The maximum federal estate tax rate is 35% with an applicable exclusion amount of $5 million. The 2010 Tax Relief Act also provided for portability between spouses of the exclusion amount. This portability means that any unused exclusion amount by one spouse is available to the surviving spouse, effectively allowing a married couple to exclude up to $10 million from estate tax.[23] The new estate tax law is scheduled to sunset on December 31, 2012, to the pre-EGTRRA amounts. The 2010 Tax Relief Act gives the estates of decedents dying in 2010 the option to pay no estate tax and assume the modified carryover basis in the property.

North Carolina imposes an estate tax on the estate of a decedent when a federal estate tax is imposed on the estate.[24] By virtue of this language, the federal and state exclusion amounts are the

---

[21] Qualified real property is limited to a maximum deduction of $250,000.

[22] Full conformity to the section 179 expense deduction would have reduced General Fund revenue by approximately $97 million. As of February 16, 2011, it appears 24 of 43 states conformed to this provision in some form while the remaining 19 states did not.

[23] The portability election is set to sunset December 31, 2012. Therefore the utility of the portability election is limited to situations where both spouses die within the two-year term (2011 and 2012).

[24] North Carolina repealed its inheritance tax in 1998 and replaced it with an estate tax that was equivalent to the federal state estate tax credit allowed on a federal estate tax return. This type of state estate tax was known as a "pick up" tax because it picked up for the state the amount of federal estate tax that would otherwise be paid to the federal government.

same. The amount of the State's estate tax is the amount of the credit allowed on the federal estate tax return for state estate tax paid, as the federal law provided in 2001.[25]

Since the federal estate tax did not exist in 2010, North Carolina's estate tax was repealed for 2010. With the revival of the federal estate tax in 2011, North Carolina's estate tax is revived for the estates of decedents dying on or after January 1, 2011.[26] Unlike Congress, North Carolina cannot tax retroactively[27] the estates of decedents dying on or after January 1, 2010, and before January 1, 2011. However, by conforming to the definition of federal taxable income for income tax purposes, the basis of any property passing through an estate has the same basis for both federal and State tax purposes.

Business Tax Extenders for 2010 and 2011. – The 2010 Tax Relief Act extended many of the tax incentives enacted in EGTRRA for two years. The business tax incentives included enhanced deduction and expensing items, charitable deductions, and tax credits. North Carolina conformed to these incentives in 2002[28] this act conforms to these extensions.

The 2010 Tax Relief Act extended the following business tax incentives that were set to expire for the 2010 taxable year for the 2010 and 2011 taxable years:

15-year recovery period for qualified leasehold improvements, restaurant building and improvements, and retail improvements.

Seven-year recovery period for motor sports entertainment costs recovery.

Expensing election for certain film and television production costs.

Brownfields remediation expensing.

The 2010 Tax Relief Act extended the Work Opportunity Tax Credit (WOTC) to include individuals who begin employment after August 31, 2011, and before January 1, 2012. The WOTC is equal to 40% of up to $6,000 of the targeted employee's qualified first-year wages. North Carolina's WOTC is equal to 6% of the federal WOTC for wages paid for positions located in this State. The federal WOTC was scheduled to expire September 1, 2011.

The 2010 Tax Relief Act extended the following charitable incentives for taxable years 2010 and 2011:

Deduction for contributions of food inventory.

Deduction for contributions by C corporations of books to public schools.

Deduction for corporate contributions of computer equipment for educational purposes.

Basis adjustment to stock of S corporations making charitable contributions of property.

---

25 When Congress phased out the state estate tax credit, beginning in 2002, North Carolina enacted legislation not to conform to the phaseout of the credit. In other words, North Carolina began tying the amount of the State estate tax owed to the federal credit as it existed in 2001 rather than as it currently exists. Georgia, South Carolina, and Tennessee have not had an estate tax since January 1, 2005, because their estate tax equals the amount of the state estate tax credit allowed on the federal estate tax return. Virginia repealed its estate tax, effective July 1, 2007.

26 North Carolina's estate tax would have been revised in 2011 based upon the Code as written on May 1, 2010.

27 Article I, Sec. 16 of the North Carolina Constitution.

28 S.L. 2002-126.

Individual Income Tax Extenders for 2010, 2011, and 2012. – The 2010 Tax Relief Act extended many of the Bush-era individual tax incentives included in the EGTRRA for two years. Some of the tax incentives expired in 2010 and others were scheduled to expire in 2011. North Carolina conformed to these incentives in 2002[29] this act conforms to these extensions.

The following three individual income tax incentives were scheduled to expire in 2010, but the 2010 Tax Relief Act extended them retroactively for the 2010 tax year and the 2011 tax year:

Tax deduction for higher education tuition expenses

Up to $250 deduction for teacher's classroom expenses

Charitable contribution of IRA proceeds

The following individual income tax incentives were scheduled to expire in 2011, but 2010 Tax Relief Act extended the incentives for the 2011 and 2012 taxable years:

No limitation on itemized deductions. Section 68 of the Code, first added in 1990, established an overall limitation on itemized deductions. This limitation was gradually repealed starting in 2006, with the phase-out complete in taxable year 2010. The limitation was scheduled to revert in full in 2011. The 2010 Tax Relief Act extended the complete repeal of the limitation for 2011 and 2012.

Enhancements to the earned income tax credit (EITC). The EITC is a refundable tax credit that varies depending on the number of the taxpayer's qualifying children. North Carolina's EITC is equal to 5% of the federal credit amount. EGTRRA increased the credit amount from 40% to 45% of a family's first $12,570 of earned income for families with three or more children and the beginning point of the phase-out range for married coupled filing a joint return by $1,880. The enhancements were set to expire for the 2011 taxable year. The 2010 Tax Relief Act extended the enhancements through the 2011 and 2012 taxable years.

Enhancements to the adoption tax credit. EGTRRA increased the dollar limitation for the credit and the income exclusion for employer-paid expenses to $10,000, indexed for inflation. The Patient Protection and Affordable Care Act increased the credit and exclusion by another $1,000 for 2010 and 2011. The credit cap was scheduled to return to $5,000[30] for taxable years beginning on or after January 1, 2012. North Carolina's adoption tax credit is equal to 50% of the federal credit amount. The 2010 Tax Relief Act extended the enhancements made by EGTRRA for one year. Under the Act, the credit caps will revert to their prior levels in taxable year 2013.

Deductibility of mortgage insurance premiums. Mortgage insurance premiums became deductible in 2007. The insurance must be in connection with home acquisition debt for a first or second home. The deduction is subject to phase-out based on a taxpayer's income. The deductibility of mortgage insurance premiums was set to expire for taxable year 2011. The 2010 Tax Relief Act extended the deduction for one more year, through taxable year 2011

Educational assistance exclusion. EGTRRA allowed employees to exclude up to $5,250 in employer-provided education assistance from income and employment taxes. The exclusion was set to expire for taxable year 2011. The 2010 Tax Relief Act extended the exclusion for taxable years 2011 and 2012.

---

[29] S.L. 2002-126.

[30] The limit is $6,000 for a special needs child.

Student loan interest deduction. The student loan interest deduction is a deduction from gross income used to determine a taxpayer's adjusted gross income (AGI). The deduction is subject to a phase-out based on the taxpayer's AGI. EGTRRA eliminated the rule that the deduction only applies to payments made during the first 60 months that interest payments were required, and it increased significantly the phaseout amounts. These changes were set to expire in 2011, but the 2010 Tax Relief Act extended the changes for taxable years 2011 and 2012.

Coverdale education savings accounts. Coverdale education savings accounts allow a taxpayer to make nondeductible contributions and to withdraw the proceeds tax-free if they are used towards educational expenses. EGTRRA increased the amount that may be contributed to an account from $500 to $2,000, and it made elementary and secondary school expenses qualified expenses. The enhancements were set to expire for the 2011 taxable year. The 2010 Tax Relief Act extended the enhancements for taxable years 2011 and 2012.

Qualified scholarships. Qualified scholarships may be excluded from taxable income. EGTRRA provided that the national Health Services Corps Scholarship Program and the Armed Forces Scholarship Program are qualified scholarships for exclusion for income purposes. These scholarships were scheduled to be included in a recipient's income in taxable year 2011. The 2010 Tax Relief Act extended the income exclusion for taxable years 2011 and 2012.

Miscellaneous Business Incentives. -- The 2010 Jobs Act provided several tax incentives for businesses. This act conforms to those incentives.

Increase in amount allowed as a deduction for start-up expenditures. The Code allows up to $5,000 of start-up expenses to be deducted. The deduction is reduced by the amount of start-up costs that exceed $50,000. The 2010 Jobs Act increased the deduction to $10,000 for start-up and organization expenses of the taxpayer's trade or business in 2011 and increased the phase-out threshold to $60,000.

Modification to exclusion for gain from certain small business stock. Fifty percent of the gain realized on qualified small business stock may be excluded from income. To qualify, the stock must be purchased at its original issue and the aggregate gross assets of the issuing corporation may not exceed $50 million and at least 80% of the value of its assets must be used in the active conduct of one or more trades or businesses. The exclusion is capped at the greater of 10 times the taxpayer's basis in the stock or $10 million. ARRTA temporarily increased from 50% to 75% the exclusion for qualified small business stock sold by an individual. The increased exclusion percentage is applicable to stock acquired after February 17, 2009, and before January 1, 2011. North Carolina conformed to ARRTA's temporary increase of the exclusion. The 2010 Jobs Act increased the exclusion percentage to 100% for stock acquired after September 27, 2010, and before January 1, 2011.

Provisions in the 2010 Jobs Act Designed to Increase Revenue. – The 2010 Jobs Act contained provisions to increase revenues. The provisions projected to raise the most revenue were related to higher federal tax penalty provisions. These provisions would not apply to North Carolina and would not increase any revenues payable to North Carolina. The Act also contained some retirement-friendly provisions that, if chosen by the taxpayer, would encourage up-front distributions that would be taxable. This act conforms to these changes.

Deduction for health insurance costs in computing self-employment taxes. The 2010 Jobs Act allows self-employed individuals to deduct the cost of health insurance for the individual and immediate family to determine income subject to federal self-employment taxes. Health

insurance costs were already deductible for regular income tax purposes. The reduction in self-employment taxes affects North Carolina taxable income because self-employment taxes were deductible in determining State taxable income. Self-employed taxpayers with health insurance costs will have larger State taxable incomes because less self-employment taxes were imposed and deducted at the federal level.

Allow participants in governmental 457 plans to treat elective deferrals as Roth contributions. The 2010 Jobs Act gives participants the option to move retirement savings from government 457(b) plans to Roth accounts starting in 2011. The conversion will be taxable while the earnings and distributions from Roth accounts are generally tax-free.

Allow rollovers from elective deferral plans to Roth designated accounts. The 2010 Jobs Act allows retirement plans to offer participants the option starting September 27, 2010 to rollover distributions into Roth accounts within the same retirement plan. The rollover will be taxable while the earnings and distributions from the Roth account are generally tax-free.

Permit partial annuitization of a nonqualified annuity contract. The 2010 Jobs Act allows the owner of an annuity contract to begin receiving benefits based on a portion of the value of the annuity and leaving the balance of the annuity to accumulate earnings tax free. This option starts in 2011.

Source rules for income on guarantees. The 2010 Jobs Act clarifies the federal tax treatment of guarantee fees as income sourced to the United States if connected to the United States by a domestic payer or by the conduct of a trade or business in the United States.

Business Entity Changes.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-9	**HB 123**	**Rep. Howard, Brubaker, Luebke, Hill**

AN ACT TO REVISE THE BUSINESS ENTITY OWNERSHIP REQUIREMENTS OF LAND AT PRESENT-USE VALUE.

OVERVIEW: This act makes changes to the business entity ownership requirements for qualification of land at its present-use value for property tax purposes, so that the requirements are met when the current owner of the land shares members in common with the prior owner of the land. This act was a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: This act has no General Fund impact.

EFFECTIVE DATE: This act becomes effective for taxable years beginning on or after July 1, 2011. However, applications filed beyond the listing period (January 1-January 31) will be accepted up to and through September 1, 2011, so that an owner may benefit from the property tax relief during the July 1, 2011 tax year.

ANALYSIS: Since 1973, farmland[31] has been appraised and assessed at its present-use value (PUV) as opposed to fair market value for property tax purposes if the farmland meets certain

[31] Agricultural land, horticultural land, and forestland.

ownership, size, and use requirements. Farmland owned by a business entity meets the ownership requirements if the land was owned by the business entity or one of its members for the four years immediately preceding January 1 of the year for which the benefit is claimed.

This act allows the business entity ownership requirements to be satisfied when the business entity that currently owns the farmland shares one or more members in common with the business entity that previously owned the farmland. For example, if one or more partners of the partnership that currently owns the farmland are the same partners of the partnership that previously owned the farmland, the ownership requirement is met.

This act was a recommendation of the Revenue Laws Study Committee, which examined this issue after several counties denied PUV status to farmland owned as described below based upon the language in G.S. 105-277.3(b1). In this example, the farmland was not owned by its current owner, ABC Partnership, for four years immediately preceding the application, nor was the land owned by a partner of ABC Partnership.

> Farmland owned by ABC Partnership for past four years applies for PUV status.
>
> The partners of ABC Partnership are Tom, Dick, and Harry.
>
> The previous owner of the farmland was XYZ Partnership.
>
> XYZ Partnership shares one or more partners in common with the current owner ABC Partnership.

Prior to 2008, the members of the business entity had to be individuals. In 2008, the Revenue Laws Study Committee proposed legislation to broaden the ownership requirements so that farmland could be owned by a business entity whose membership includes modern estate planning vehicles such as a family limited partnership, a family limited liability company, or a trust.[32] S.L. 2008-146 alleviated problems tax assessors were having with recognizing these types of ownership. Now, for example, if the farmland is owned by a business entity, the members of the business entity are no longer restricted to individuals but may include trusts and other business entities. The 2008 changes to the PUV statutes focused on problems the tax assessors were having with recognizing types of ownership. Ownership is determined on the basis of the name on the deed but does not always consider real parties in interest.

Reform UI Tax Structure/Expedite Analysis.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-10	**SB 99**	**Sen. Clary, Rucho, Hartsell**

AN ACT TO EXPEDITE THE ANALYSIS OF THE TAX STRUCTURE FOR UNEMPLOYMENT INSURANCE IN NORTH CAROLINA GIVEN THE SUBSTANTIAL NEGATIVE BALANCE IN THE STATE'S

[32] When the membership of a business entity includes a business entity or trust, then the individual members of the business entity and the individual beneficiaries of the trust are deemed to be indirect members of the qualified business entity.

UNEMPLOYMENT INSURANCE TRUST FUND AND THE SUBSTANTIAL FEDERAL LOAN BALANCE OWED BY THE STATE FOR PAYMENT OF UNEMPLOYMENT INSURANCE BENEFITS.

OVERVIEW: This act authorizes the Department of Commerce to hire a consultant to analyze the State's unemployment insurance (UI) tax structure without adhering to the State's purchase and contract provisions.

FISCAL IMPACT: The act does not appropriate any funds to the Department of Commerce for the contract. The act states that the Department may seek and accept non-State funds, grants, and in-kind contributions to pay for the analysis as well as use funds available within the Employment Security Commission, including State and federal funds that may be used for this purpose. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on March 25, 2011.

ANALYSIS: The act directs the Department of Commerce to contract with a consultant to conduct a thorough analysis of the State's UI tax structure and it exempts the Department from purchase and contract requirements of Article 3C as they relate to this contract. The Department must provide periodic updates on the progress of the analysis and it must report the findings and recommendations of the analysis to the General Assembly within 45 days after the analysis is complete. The report must include recommendations on any tax structure changes and financial options the General Assembly may need to consider that addresses the servicing of the State's debt incurred to pay unemployment insurance benefits.

Article 3C of Chapter 143 directs the Department of Administration to ensure that consultant contracts be let to other agencies of the State if there is an agency that can reasonably perform the service, and if there is not an agency that can reasonably perform the consulting service, that a sufficient number of sources for the contract be solicited through competitive proposals. This act allows the Department of Commerce to use the contractor of its choice without soliciting competitive bids, and regardless of whether another State agency could reasonable perform the service. Through House and Senate Finance Committee discussions, members learned that South Carolina had undertaken a similar study prepared by *The Lucas Group,* a consultant in Boston, Massachusetts. The Department would not say who it would choose to conduct the study.[33]

The General Assembly made substantial changes in the State's UI tax structure in the 1990s.[34] There have been no legislative changes made to the rate structure since 1999. The current State UI tax rates range from 0% to 6.84%.[35] The standard beginning tax rate is 1.2%. The average UI tax rate for 2011 is 1.688%. The average UI tax rate for 2010 was 1.427%. The revenue generated

---

[33] It would cost between $200,000 and $300,000 to contract with *The Lucas Group.*

[34] The General Assembly reduced the UT tax contribution rate in 1993, 1994, 1995, and 1996. The UI tax rate automatically adjusts downward whenever the UI Trust Fund balance reaches $800 million. The Trust Fund balance has not exceeded $800 million since 2001. The last positive Trust Fund balance was in 2008 at $414 million.

[35] All states' UI rate structures use a system of experience rating by which individual employers' contribution rates are varied on the basis of their experience with the risk of unemployment. An employer may qualify for the 0% tax rate if no unemployment insurance benefits have been paid to employees after five years.

from the tax is credited to the State's Unemployment Trust Fund[36] to pay benefits to people who lost their job through no fault of their own.

If the amount of revenue in the State's Unemployment Insurance Trust Fund is insufficient to make the necessary benefit payments to claimants, the federal government loans money to the State. The State received a loan from the federal government in February 2009. The current loan balance is $2.6 billion. Interest began accruing on the loan in January 2011. The first interest payment is due September 30, 2011.[37] The necessary funds are available in the State's reserve account to make this interest payment.

In addition to the State UI tax, employers pay a federal payroll tax. The federal payroll tax (FUTA) on employers is 6.2% on a taxable wage base of $7,000.[38] Employers in states that are in compliance with federal regulations receive a 5.4% credit on their FUTA. This tax credit percentage is reduced by 0.3% annually on states with a federal loan balance outstanding for two consecutive Januarys. January 2012 will mark the second consecutive January North Carolina has a federal loan balance outstanding. To avoid a 0.3% reduction in the FUTA credit, the entire balance of the loan must be paid by November 10, 2011.[39] The 0.3% increase would effectively increase employers FUTA from 0.08% to 1.1%; this increase equates to $21 per employee.[40]

Repeal Land Tansfer Tax.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-18	**HB 92**	**Rep. Howard, Starnes, Brawley, Jordan**

AN ACT TO REPEAL THE LAND TRANSFER TAX.

OVERVIEW: This act repeals the authority granted to counties in 2007 to levy, upon approval of voters in the county, a tax on the sale of real property at the rate of up to 0.4% of the value of the property.

FISCAL IMPACT: This act has no fiscal impact because none of the counties implemented the levy.

---

[36] Unemployment tax contributions are paid by employers on a quarterly basis and deposited into the State Unemployment Insurance Trust Fund. After deducting any refunds payable from the Fund, the money is deposited with the Secretary of the Treasury of the United States to the credit of this State's account in the Unemployment Trust Fund. Funds in the State's account earn interest that is also credited to the account. As money in the State's account is needed to pay benefits, it is transferred to the State and credited to the benefits account of the State's Unemployment Insurance Fund.

[37] President Obama's budget proposal includes waiving the interest payment due September 30, 2011. Congress has not acted on this provision as of August 1, 2011.

[38] The federal taxable wage base has not been increased since 1983. The taxable wage base in NC is $19,700. This amount is indexed annually. The taxable wage base in other states ranges from $7,000 to $37,300.

[39] President Obama's budget proposal includes suspending the FUTA tax increase. Congress has not acted on this issue as of August 1, 2011.

[40] The revenue collected from the FUTA rate increase would be applied to the State's principal balance or it would lessen the amount of funds the State needs to borrow if the State is still a borrowing State at that time.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on March 31, 2011.

ANALYSIS: This act repeals the County Land Transfer Tax Act, which authorized counties to levy, with voter approval, a tax on the transfer of real property at the rate of up to 0.4% of the consideration or the value of the property interest, whichever is greater.

In 2007, legislation was enacted authorizing a board of county commissioners, by resolution and after 10 days public notice, to levy a local land transfer tax on instruments conveying interests in real property located in the county, up to a rate of 0.4%, in increments of 0.1%.[41] The imposition of the tax is subject to voter approval in a public referendum. The tax is payable by the transferor of the property. The tax is in addition to the excise stamp tax on conveyances of land, and land exempt from the stamp tax is also exempt from the land transfer tax.[42] This tax was one of two local financing options enacted during the 2007 session. As an alternative to the land transfer tax, counties also received the option of levying a one-quarter cent sales and use tax.[43] However, a county could not levy the land transfer tax at the same time as the local option one-quarter cent sales and use tax.

To date, no county has achieved voter approval to levy this local land transfer tax, although 21 counties have conducted public referendums. The 21 counties are Ashe, Avery, Brunswick, Chatham, Clay, Davie, Gates[44] Graham, Harnett, Henderson, Hoke, Johnston, Macon, Moore, Orange, Pender, Polk, Rutherford, Swain, Tyrrell[45] and Union.

However, the General Assembly has given four counties the authority to levy a land transfer tax on instruments conveying an interest in real property without a referendum: Dare,[46] Currituck,[47] Chowan,[48] and Camden.[49] The General Assembly has authorized the following three counties to levy, upon approval of the voters, a land transfer tax: Pasquotank,[50] Perquimans,[51] and Washington.[52] This act does not affect these local authorizations.

---

[41] Section 31.17 of S.L. 2007-323.

[42] The State excise tax on conveyances is imposed at the rate of $1 for each $500 of sales price. The proceeds from this tax are distributed as follows: ½ to the county for any public purpose, and the remaining ½ to the Department of Revenue (75% goes to Parks and Recreation Trust Fund and 25% goes to Natural Heritage Trust Fund). The following transfers are exempt from the State excise tax on conveyances: (1) by operation of law; (2) by lease for a term of years; (3) by will; (4) by intestacy; (5) by gift; (6) no consideration paid; (7) by merger, conversion, or consolidation; and (8) by instrument securing indebtedness. This act does not affect the imposition of the State excise tax.

[43] To date, 18 counties have successfully enacted the local option one-quarter cent sales and use tax authorized by the 2007 legislation.

[44] Gates County conducted two public referendums, one on November 6, 2007 and one on May 4, 2008.

[45] Tyrrell County conducted two public referendums, one on May 4, 2008 and one on November 4, 2008.

Tax of Improved Prop. in Roadway Corridors.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-30	**SB 107**	**Sen. Brunstetter, Garrou**

AN ACT TO REDUCE THE PROPERTY TAX OWED FOR IMPROVED PROPERTY INSIDE CERTAIN ROADWAY CORRIDORS.

OVERVIEW: This act classifies improved property inside a roadway corridor as a special class of property and provides that it will be taxable at 50% of its appraised value.

FISCAL IMPACT: The act does not affect State General Fund revenues. It will reduce local property tax revenues in counties where such property exists. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act becomes effective for taxes imposed for taxable years beginning on or after July 1, 2011, and sunsets for taxes imposed for taxable years beginning on or after July 1, 2021.

ANALYSIS: Article V, Sec. 2(2) of the North Carolina Constitution grants the General Assembly the power to classify property for taxation. That power must be exercised on a State-wide basis, by uniform rule, in a general law uniformly applicable in every unit of local government. In 1987, the General Assembly classified *unimproved* property in a transportation corridor marked on an official map as a special class of property and provided that it would be taxable at 20% of its appraised value. This act classifies *improved* property within a transportation corridor marked on an official map as a special class of property and provides that it is taxable at 50% of its appraised value.

A transportation corridor map may be adopted by the governing body of a local government as part of a comprehensive plan for streets and highways or by the Department of Transportation for part of the State highway system. Once a transportation corridor official map is filed with the register of deeds, no building permit may be issued for any building or structure on the property for up to three years.[53] If a building or structure exists on the property at the time the map is recorded, a permit may be issued provided the size of the building or structure is not increased.

There is no limit on how long the filer of a transportation corridor map may keep a proposed route on a map without purchasing the property. Although a proposed route does not prevent the sale of the property, it does affect the salability of the property because lenders and purchasers may not want to purchase property that may eventually be part of a highway corridor. A property owner may petition the filer of the map for acquisition of the property due to an undue hardship on the affected property owner.[54]

The Department of Transportation's ability to purchase property in recent years has been hampered by fiscal constraints. This constraint has placed a hardship on some property owners located in a transportation corridor. The reduction in the property tax assessment is one way to

[53] G.S. 136-44.51.

[54] G.S. 136-44.53. In the last nine years, 684 hardship advance acquisition requests in protected corridors have been received with approximately 500 receiving approval. Most hardship requests are related to financial or medical difficulties.

ease the financial burden on the property owners. However, the reduction in the property's tax value reduces the property tax revenue available to the counties in which these corridors lie. The Department of Transportation identified the roadway corridors that are not scheduled for near-term right-of-way acquisition. The corridors included six projects located in five counties: Currituck, Forsyth, Johnston, Pitt, and Wake. The cumulative revenue loss for the improved property located in these five counties is just over one-half million dollars.

The 10-year sunset provided in the act recognizes that it addresses a State issue, namely the length of time between when property is marked on a transportation corridor map and when it is purchased by the State, with a property tax expenditure that reduces local tax revenues.[55] The sunset gives the General Assembly an opportunity to review the policy in the future. The Department of Transportation began addressing some of the issues associated with property located in a protected corridor with changes to its current process: proposed evaluation of each protected corridor every 10 years; establishment of key criteria to aid in determining whether a corridor official map should be filed; and greater flexibility within existing law as to allowable property/home improvements.

Municipal Service District/Streets.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-72	**SB 281**	**Senator Stein**

AN ACT TO AUTHORIZE CITIES TO ESTABLISH A MUNICIPAL SERVICE DISTRICT FOR THE PURPOSE OF CONVERTING PRIVATE RESIDENTIAL STREETS TO PUBLIC STREETS AND TO AUTHORIZE RELATED COMMUNITY ASSOCIATIONS TO TRANSFER PLANNED COMMUNITY PROPERTY TO CITIES.

OVERVIEW: This act expands the purposes for which a city may create a municipal service district to include the conversion of private streets to public streets. The scope of the act is written to effectively limit its applicability to the following municipalities: Durham, Morrisville, and Raleigh.

FISCAL IMPACT: A city may impose a higher property tax rate on the taxpayers within a municipal service district to pay for the additional services received in that district. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on May 12, 2011.

ANALYSIS: Article V, Sec. 2(4) of the North Carolina Constitution allows the General Assembly to enact *general* laws authorizing the governing board of a local governmental unit to

[55] In Forsyth County, the Winston-Salem Beltway has over $80 million in previously purchased right-of-way; however, there is another $360 million in right-of-way that will need to be acquired to complete the project. The fiscal constraints delaying the acquisition of the property have meant that the owners of this property have few options for the use of the property. The owners of this property understand it may be as much as 20 years before the beltway is built. The fiscal loss to Forsyth County of this act is $385,714.

define territorial areas and to levy additional taxes within those areas to finance a service that is provided to a greater extent in that area than is provided to the entire area of the governmental unit. Article 23 of Chapter 160A provides the general law authorization that allows a city to establish a municipal service district and to levy a property tax in that district that is in addition to the property tax levied in the city as a whole. Article 23 specifies the purposes for which a municipal service district may be created.[56] This act expands the list of purposes to include the conversion of private streets to public streets, but the expansion only applies to the cities of Durham, Morrisville, and Raleigh.

This legislation addresses an issue specific to the Town of Morrisville. There are 14 residential developments in the Town of Morrisville that were constructed with private streets.[57] The private streets were constructed to a lesser standard than public streets. Of these 14 neighborhoods, five have submitted petitions to the Town Council signed by more than 60% of the residents requesting the town to upgrade and convert the streets to publicly maintained streets.[58] The Town does not have the authority to expend public funds for private streets.[59] To address the issue brought to the Town by its residents, the Town sought authority from the General Assembly to create a municipal service district for the purpose of converting the private streets to public streets. The conversion would include the transfer of ownership of the streets, an evaluation of the condition of the streets, and the design and construction costs related to improving the private streets to meet public streets standards.

Article XIV, Sec. 3 of the North Carolina Constitution prohibits local acts where general laws are directed; however, the Constitution does allow for classification by population. Not all municipalities wanted the ability to create special tax districts for the purpose of converting private streets to public streets. Therefore, the legislation is limited to a city that meets one of the following population classifications:

Located primarily in a county with a population of 750,000 and also in a county with a population of 250,000. The only two cities that meet this classification are Morrisville and Raleigh.

Located primarily in a county with a population of 250,000 and also in a county with a population of 750,000. The only city that meets this classification is Durham.

The act also creates the following limitations upon the creation of a district for this purpose:

The private road must be non-gated.

A city must receive a petition signed by 60% of the lot owners of the area to be included within the special district requesting the city to establish the district.

---

[56] Beach erosion control; flood and hurricane protection works; a service which a city may by law provide, such as placing utility wiring underground; downtown revitalization projects; transit-oriented development projects; drainage projects, sewage collection and disposal systems; lighting at interstate highway interchange ramps; off-street parking facilities; and watershed improved projects.

[57] These 14 developments comprise about one-third of Morrisville's homes.

[58] Three neighborhoods are continuing to collect petitions; the remaining seven have indicated no interest in pursuing the issue.

[59] G.S. 153A-205 gives counties the authority to expend funds for the cost of improvements needed to bring residential streets up to State standards so they may become part of the State-maintained system. An argument may be made that cities have authority under Article 10A of Chapter 160A of the General Statutes to impose a special assessment for this purpose, but it is not clear.

A city must be willing to accept the converted streets for perpetual public maintenance.

The additional tax rate levied in the special district may not exceed 30% of the property tax rate currently imposed in that district in the fiscal year prior to the establishment of the district.

After the private streets have been upgraded to meet public street standards and all of the costs have been recovered, the district must be abolished.

To create a municipal service district, a city must hold a public hearing on a proposed resolution. The resolution must define the service district and find that the area defined is in need of one or more of the services for which a district may be created to a demonstrably greater extent than the remainder of the city. The resolution may become effective at the beginning of a fiscal year. Once a district is created, the city must provide or let contracts for the service for which the residents of the district are being taxed within one year of the effective date of the district. A city may incur debt, as allowed under general law and supported by the property tax levy, to finance services within a service district. When there is no longer a need for the service district, the district must be abolished.

Level Playing Field/Local Gov't Competition.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-84	**HB 129**	**Rep. Avila, Howard, Carney, Wainwright**

AN ACT TO PROTECT JOBS AND INVESTMENT BY REGULATING LOCAL GOVERNMENT COMPETITION WITH PRIVATE BUSINESS.

OVERVIEW: This act creates new requirements for cities and joint agencies that operate a communications service that is offered to the public for a fee.

FISCAL IMPACT: General Fund revenue for new cities that elect to operate communications service is estimated at $18.98 per subscriber. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on May 21, 2011.

ANALYSIS: Under G.S. 160A-311, cities are authorized to operate and finance a number of public enterprises, including cable television systems. A North Carolina Court of Appeals case, *BellSouth Telecommunications, Inc. v. City of Laurinburg*, 168 N.C. App. 75, 606 S.E. 2d 721 (2005), interprets the statutory authority to operate a cable television system to include operation of a fiber optic network. Morganton (CoMPAS Cable TV), Salisbury (Fibrant), Wilson (Greenlight), and Mooresville and Davidson (MiConnection) currently offer cable and internet service as a public enterprise.

The cities that currently operate cable and internet systems financed their systems through the installment purchase contract method authorized by G.S. 160A-20. This financing mechanism is commonly known as certificates of participation. Under this financing method, a city enters into an installment contract secured by a security interest in the system that is constructed. Unlike the issuance of general obligation bonds, installment purchase financing is not subject to a vote of the

people. The Local Government Commission must approve a local unit's use of certificates of participation and the unit must give notice and hold a public hearing before it can enter into certificates of participation involving real property.

This act created a new Article 16A in Chapter 160A of the General Statutes. The new Article provides the following:

Communications Service Definition: "Communications service" is defined as the provision of cable, video programming, telecommunications, broadband, or high-speed internet access service to the public for a fee. A "city-owned communications service provider" includes cities that offer the service through an interlocal agreement or joint agency. Data sharing between governmental entities for internal governmental purposes and service offered to the public for free are not included in the definition of "communications service" and therefore, not subject to the limitations in this act.

High-speed Internet Access Service Definition: "High-speed internet access service" is defined as service with transmission speeds equal to or greater than the basic broadband service as defined by the FCC for broadband tier 1 service for broadband data gathering and reporting.

Requirements for City-owned Communications Providers: City-owned communications service providers, unless otherwise exempt, must fulfill all of the following requirements:

> Comply with all State, local, and federal laws and regulations a private company providing the same communications service is subject to.
>
> Establish separate enterprise funds for the communications service and conduct annual audits of the communications service. The annual audit conducted under G.S. 159-34 satisfies this requirement.
>
> Limit the provision of service to the jurisdictional boundaries of the city.
>
> Provide nondiscriminatory access of the city's rights-of-way, poles, or conduits to other service providers.
>
> Remit to its General Fund an amount equal to all the taxes and fees a private provider would pay if the private provider supplied the service.

City-owned communications service providers are prohibited from engaging in any of the following:

> Using the city's authority to require individuals or developments to subscribe to the communications service.
>
> Pricing the service below the cost of providing the service. The cost of providing the service must include the cost of capital components that would be equal to the cost of capital components a private provider would incur and an amount equal to all taxes a private provider would pay.
>
> Providing advertisements of the city-owned communications service on PEG channels of competing providers if the PEG channel is required to be carried on the system of another service provider. The use of funds not allocated to the communications service for advertisement is also prohibited.
>
> Subsidizing the provision of the communications service with other revenue.

Cities that choose to sell or discontinue a city-owned communications service are not required to hold a referendum prior to sale or discontinuation of the service.

Public Hearings: Prior to offering communications service, cities are required to hold at least two public hearings for comment on the service. The cities are required to provide notice for the hearings in the local newspaper and with the Utilities Commission. Private communications providers must be allowed to participate in the hearings. Feasibility studies, business plans, and public surveys for the communications service are deemed public records and must be available to the public prior to the hearings. The public hearing requirement does not apply to the repair or upgrade of an existing service.

Financing: Cities and joint agencies are prohibited from incurring debt, including installment purchase contracts and certificates of participation, for a communications system unless a special election is held. The question to be posed in the special election is whether or not the city may offer the communications service. The referendum requirement does not apply to repairs or improvements of an existing system.

Taxes, Payments in Lieu of Taxes: Cities and joint agencies operating a communications service will not receive a sales tax refund for purchases related to the provision of the communications service and are required to make the following payments in lieu of taxes:

> To the applicable county, a payment of the amount of property taxes that would be due if the communications system was subject to the property tax.
>
> To the State, an amount set by the Department of Revenue that approximates the amount of income, franchise, vehicle, motor fuel, and other taxes that would be due for a communications system subject to these taxes. Cities subject to this provision must provide information to the Department of Revenue necessary for the calculation of the payment. The amount of the assessment is set by January 1 of each year, and due by March 15 of each year.

Public-Private Partnerships for Communications Service: Cities are required to solicit proposals from private providers before constructing a communications network. Cities must issue request for proposals and provide notice to the public of the request for proposals. The city may consider any relevant factors, including system design, system reliability, operational experience, operational costs, compatibility with existing systems and equipment, and emerging technology. If the city in unable to negotiate terms with the two most responsive proposers, the city may proceed with offering communications service.

Designation as Public Utility: Cities and joint agencies that provide telephone service are included in the term "public utility" as defined by Chapter 62 of the General Statutes. Telephone service provided by these entities would be subject to oversight by the Utilities Commission.

Additional Financing Requirements: The Local Government Commission (LGC) must conduct additional review of applications to finance the construction, operation, expansion, or repair of a communications system by a city or joint agency. As part of the review, the following apply:

> The public hearings required by Article 16A of Chapter 160A must be held before an application for financing may be submitted.

A copy of the application for financing must be given to private communications providers that serve the city and areas adjacent to the city. The LGC must accept written and oral comments from private providers as a part of the application review.

The LGC must consider and make written findings regarding the reasonableness of the revenue projections of the service in light of the current and projected competitive environment, the impact of innovation, and the level of community support for the project.

Revenue Bonds: The act authorizes cities to issue revenue bonds to finance a cable television system. Although a referendum is not normally required for revenue bonds, cities that offer communications service as defined in G.S. 160A-340.1 are subject to the requirements of G.S. 160A-340.4(b) to hold a referendum before incurring debt to construct a communications system.

Exemptions: There are two exemptions from the provisions of the act. Cities that provide service to "unserved areas" are exempt from certain provisions of the act. Cities providing service as of January 1, 2011, are exempt from the entirety of the act, provided those cities limit service to certain areas.

Unserved Areas: The provision of communications service in an area that has been established by order of the Utilities Commission to be an "unserved area" is exempt from certain provisions of the act. For the purposes of this determination, whether an area is unserved area is determined by census block, and is an area in which 50% of the households have no access to high-speed internet, or only access to high-speed internet from a satellite provider. The provision of communications service in an unserved area is exempt from the following provisions in Article 16A in Chapter 160A:

Requirements for city-owned communications providers.

The requirement to hold a special election prior to financing.

The requirement of payments in lieu of taxes.

Existing providers: Cities that offered communications service as of January 1, 2011, are exempt from all of the provisions in the act provided the city limits the provision of service to the following:

Persons within the corporate limits of the city providing the service. For the purposes of this section, the corporate limits include areas in the corporate limits as of April 1, 2011, and any later annexed areas.

Existing customers of the service as of April 1, 2011, provided contracts for service outside the service area provided in the act are subject to public bidding upon expiration.

Persons within the service areas provided in the act. A city that is subject to a service area boundary will have 30 days from discovery or notice of providing service outside of the boundary to cease providing service outside the boundary without losing the exemption.

Prepaid Wireless/Point of Sale Collection.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-122	**HB 571**	**Rep. Sager, Justice, Bryant, Brawley**

AN ACT IMPOSING A SERVICE CHARGE ON EACH RETAIL TRANSACTION OF PREPAID WIRELESS TELECOMMUNICATIONS SERVICE FOR ANY PURPOSE OTHER THAN RESALE OCCURRING IN THIS STATE, REQUIRING THAT THE SERVICE CHARGE BE COLLECTED BY THE SELLER OF PREPAID WIRELESS TELECOMMUNICATIONS SERVICE AND REMITTED TO THE DEPARTMENT OF REVENUE, AND PROVIDING THAT THE DEPARTMENT OF REVENUE SHALL TRANSFER ALL SERVICE CHARGES COLLECTED, MINUS THE COSTS OF COLLECTION, TO THE 911 FUND TO SUPPORT 911 SERVICES IN THE STATE.

OVERVIEW: This act provides for the collection of the 911 service charge on prepaid wireless service at the point of retail sale.

FISCAL IMPACT: There is no fiscal impact on General Fund revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The repeal of the current methods of collection the 911 service charge from prepaid wireless service was effective when signed by the Governor on June 9, 2011. The remainder of this act is effective July 1, 2013 and applies to retail transactions on or after that date.

ANALYSIS: Prior to 2007, North Carolina local government entities collected a 911 service charge from subscribers of local telephone providers, and the Wireless 911 Board collected a monthly service charge from subscribers of wireless providers. In 2007, the local 911 service charge was eliminated, and a new statewide administrative system was adopted for collection and distribution of the 911 service charge.

The intent of this legislation was to collect a uniform fee from all providers, including the collection of the charge from prepaid wireless customers. Providers of prepaid wireless service were authorized to collect the 911 service charge using either of the following methods:

Decrement – The monthly charge is collected by decrementing the service charge from each active prepaid wireless customer with an account balance equal to or greater than the amount of the service charge.

Average Rate Per User - The monthly payment for 911 service charges for each provider of prepaid wireless service is determined based on its sales of prepaid revenue in the State during the month.[60]

[60] The provider's prepaid revenue in the state is divided by the "average revenue per user" and then multiplied by the amount of the service charge. The average rate per user in the statute is currently $50.

Due to concerns regarding the methods of collection, the original legislation provided a moratorium on the collection of the 911 charge from prepaid customers for one year after. The moratorium has been extended three times and is in effect through calendar year 2011.[61]

This act repeals the current method of collection and provides for the retail collection of the 911 service charge for prepaid wireless service. The 911 service charge for prepaid wireless must be the same as the monthly charge for 911 service imposed on all other phone subscribers. The service charge will be collected by retailers and administered by the Department of Revenue. The 911 service charge for prepaid wireless service will be the same charged for postpaid service, 70¢ on each retail transaction of prepaid wireless service, or a lower amount set by the Board.

Each seller of prepaid wireless will collect the 911 service charge and remit the charge to the Department of Revenue. A seller must remit the charges either monthly, or semiannually. For administrative costs, each retailer is allowed to retain all of the 911 service charges for prepaid wireless that it collects in the first three months after the effective date of the act, and 5% of the charges thereafter.

The Department of Revenue will collect the 911 service charge for prepaid wireless from the retailers and remit the charges collect to the 911 Board each month within 45 days of the end of the month. The Department may retain the cost of collection not to exceed $700,000 for the first year after the effective date of this act and not to exceed $500,000 each year thereafter.

The funds remitted to the 911 Board from prepaid service will be distributed for the administration of 911 service as provided in the statutes for postpaid service. Currently a portion of the 911 service charges is allocated to reimburse wireless providers to pay for upgrades to their system necessary for the implementation for enhanced 911. The upgrades allow the wireless phone systems to provide address and location information to the 911 call centers. The remainder of the 911 service charges is distributed to public safety answering points (PSAPs) for 911 service. This section clarifies that the 911 service charge from prepaid wireless service will be not allocated for reimbursements for wireless providers. All 911 service charges collected at retail from prepaid wireless transactions will be distributed to PSAPs.

Modify Property Tax Base Exclusions.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-123	**HB 206**	**Rep. Ross, Jackson, Gill**

AN ACT TO MODIFY THE PROPERTY TAX BASE EXCLUSIONS.

OVERVIEW: This act excludes from property tax a contiguous tract of commercial property that is significantly damaged by fire or explosion and donated to a nonprofit corporation.

FISCAL IMPACT: Due to the narrow circumstances under which a property may qualify for this exclusion, the revenue impact is expected to be minimal. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

---

[61] Section 1 of S.L. 2008-134, Section 1 of S.L. 2009-90, and Section 43 of S.L. 2010-95.

EFFECTIVE DATE: The act is effective for taxes imposed for taxable years beginning on or after July 1, 2011, and expires for taxable years beginning on or after July 1, 2016.

ANALYSIS: All real and personal property is subject to property tax unless it is excluded or exempted from the tax base. Article V, Sec. 2(2) of the North Carolina Constitution provides that the power to classify property for taxation lies with the General Assembly and must be exercised on a State-wide basis and made by general law uniformly applicable in every county and city.

This act designates property meeting the following requirements as a special class of property under Article V, section 2(2) of the North Carolina Constitution and excludes it from property taxation:

The property must be a contiguous tract of land previously used primarily for commercial or industrial purposes and damaged significantly as a result of a fire or explosion.

The property must have been donated to a nonprofit corporation by an entity other than an affiliate.

The property must not have been leased or sold by the nonprofit corporation.

This legislation addresses an issue specific to the Town of Garner. The ConAgra plant in Garner was damaged significantly as a result of a fire or explosion in June 2009. ConAgra wanted to donate the property to the Town of Garner so the Town could redevelop and market the property. The Town believed this task could be handled more efficiently by a private corporation. The Garner Economic Development Corporation was formed on November 22, 2010, as a nonprofit corporation. One of its stated purposes is to acquire funds and real property related to the ConAgra plant and to maintain, develop, and market the property for economic development.

Although the property would be exempt from taxation if held by the Town, the property is subject to tax since it is owned by a nonprofit corporation. G.S. 105-278.7 provides a property tax exemption for property used for educational, scientific, literary, or charitable purposes. In 2002, the Attorney General's office issued an opinion that property owned by the Charlotte/Mecklenburg Development Corporation was not entitled to a charitable exemption where the corporation's goal was to undertake site development and sell the property to businesses. Although the property was owned by a nonprofit entity, it was not held for a charitable purpose.

Since the nonprofit corporation created for the purpose of redeveloping and marketing the property in the Town of Garner does not have an initial cash flow, the Town sought legislation exempting the property from taxation. The language in the act is crafted to apply only to the property donated to the nonprofit corporation by the ConAgra plant, and the exclusion only applies for five years.

Appropriations Act of 2011.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-145, as amended by S.L. 2011-330	**HB 200**	**Representative Brubaker**

AN ACT TO SPUR THE CREATION OF PRIVATE SECTOR JOBS; REORGANIZE AND REFORM STATE GOVERNMENT; MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS AND INSTITUTIONS; AND TO ENACT BUDGET RELATED AMENDMENTS.

OVERVIEW: This act, known as the Current Operations and Capital Improvements Appropriations of 2011, contains a $19.7 billion budget for fiscal year 2011-12 and a $19.9 billion budget for fiscal year 2012-13.[62] The act also contains a finance package that allows a $50,000 personal income tax deduction for net business income, changes the starting point for calculating North Carolina taxable income from federal taxable income to federal adjusted gross income, and exempts from the franchise tax base reserves for amortization of intangible assets.

FISCAL IMPACT: The act reduces budget availability by $131.6 million in fiscal year 2011-12 and by $335.6 million in fiscal year 2012-13 for a total finance package of $467.2 million for the biennium. This tax relief is in addition to the $1.3 billion in expiring tax revenue. [63] The act generates State and county revenues of $100.9 million in fiscal year 2011-12 and $101.4 million in fiscal year 2012-13 by increasing various fees. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The two income tax provisions become effective for taxable years beginning on or after January 1, 2012. The franchise tax provision became effective retroactively for tax years beginning on or after January 1, 2007.

ANALYSIS: Part XXXI-A of the act contains three finance provisions.

Personal Income Tax Exemption for Business Income.[64] – Section 31A.1 adds a new deduction for "net business income" when calculating North Carolina taxable income for personal taxes. The deduction allows an individual taxpayer to exclude the first $50,000 of net business income received during the taxable year. To qualify, the income must be subject to personal tax and be business income from an activity where the taxpayer actively participates. Business income is defined to exclude income deemed passive under the federal tax rules.

[62] This document does not summarize the budget expenditure provisions; it only summarizes the finance law provisions.
[63] The 1% State sales tax rate expires July 1, 2011; the corporate and individual income surtaxes expire for taxable years beginning on or after January 1, 2011.
[64] This provision originated in the Senate Finance Committee Substitute, HB 200, Version 5. The provision in Versions 5 and 6 of HB 200 limited the deduction to a business whose cumulative gross receipts from all business activity in a taxable year did not exceed $825,000; and it sunset the deduction for taxable years beginning on or after January 1, 2014. The provision as enacted is not limited to businesses of a certain size and it does not sunset.

There is no limit on the size of the business. The business must be subject to personal taxes. Businesses subject to personal taxes on individual taxpayer's returns include sole proprietorships, partnerships, S corporations, and limited liability companies.[65] Very large businesses tend to be taxed at the corporate level under Subchapter C of the Internal Revenue Code - referred to as "C corporations." These C corporations do not qualify for the deduction.

Typically, non-passive business income would appear on an individual taxpayer's federal income tax return on schedules C, E, and F. Schedule C reports income from sole proprietorships. Schedule E reports income from partnerships and S corporations. Schedule F reports income from farming. Any income deemed passive under federal tax rules would not qualify. For example, rental income is generally considered passive.

Using Federal AGI as the Starting Point for State Taxable Income.[66] – Section 31A.1 changes the starting point for calculating NC taxable income from federal taxable income to federal adjusted gross income. This change did not change the tax base or increase North Carolina tax in any way. All current deductions and credits remain.[67]

The switch to federal adjusted gross income (AGI) as the starting point simplifies the calculation of North Carolina taxable income because North Carolina taxpayers no longer have to make adjustments to reduce the federal standard deduction and federal exemption amounts to determine the applicable State deduction and exemption amounts.[68] Now, taxpayers may start with federal AGI and deduct the State personal exemption amounts and, if the taxpayer does not itemize deductions,[69] the State standard deduction amounts, to calculate State taxable income.

Of the 35 states that begin their calculation of state taxable income with federal law, 29 use federal adjusted gross income while only six use federal taxable income. Federal taxable income is income after all federally allowed deductions; it includes the deductions from gross income to determine adjusted gross income and the deductions from adjusted gross income to determine taxable income. The primary differences between federal taxable income and adjusted gross income are the personal and dependency exemptions and the subtraction of either the standard deduction amount or the itemized deductions amount.

North Carolina began using federal taxable income as the starting point for this calculation in 1989. At the time, this change significantly simplified North Carolina's individual income tax by eliminating 30 individual income tax exclusions and reducing 47 deductions and exemptions to

[65] Assuming the LLC has not elected to be taxed at the corporate level.
[66] This provision originated in the Senate Finance Committee Substitute, HB 200, Version 5. The provision in Versions 5 and 6 of HB 200 would have also reduced each of the personal income tax rates by ¼%. To help offset the revenue loss from the rate reductions, the bills would have eliminated the personal income tax deductions for severance wages and qualified sales of a manufactured home community and the tax credit for oyster shell recycling; they also would have eliminated the sales tax exemption for nutritional supplements sold by a chiropractor at a chiropractic office and the sales tax holiday for certain energy star products.
[67] Section 12 of S.L. 2011-330 amended this section of the budget to ensure that the changes made by it did not inadvertently change the existing tax base in ways that were not intended
[68] In 1989, when North Carolina first began using federal taxable income as its starting point, the federal and State personal exemption and standard deduction amounts were the same. Since 1989, the federal amounts have been indexed and the State amounts have not.
[69] More than 70% of North Carolina taxpayers claim the standard deduction amount rather than itemize their deductions.

seven. [70] Since that time, however, the number of adjustments a taxpayer must make to federal taxable income to determine North Carolina taxable income has increased from 11 to more than 40. North Carolina's current system of additions and subtractions is confusing to taxpayers and complex to administer.

Franchise Tax Base Modification.[71] – Section 31A.2 provides an exemption of reserves for amortization of intangible assets from surplus and undivided profits, thus excluding them from the franchise tax capital base. Examples of intangible assets include goodwill, patents, copyrights, franchises, trademarks and trade names, as well as going concern value.

Some taxpayers deducted reserves for amortization of intangible assets prior to the law change because it is an allowable deduction under Generally Accepted Accounting Principles (GAAP). The Department disallowed the deduction and collected additional tax on taxpayers that elected to participate in the Department's Resolution Initiative. The law change was made retroactive to allow these taxpayers the benefit of the deduction.

Facilitate Electronic Listing.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-238	**HB 896**	**Representative Brubaker**

AN ACT TO FACILITATE ELECTRONIC LISTING OF PERSONAL PROPERTY FOR PROPERTY TAX PURPOSES.

OVERVIEW: This act authorizes the Department of Revenue, in consultation with the counties, to establish standards and requirements for the electronic listing of personal property allowed by counties.

FISCAL IMPACT: This act has no General Fund impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 23, 2011.

ANALYSIS: All property, real and personal, within the jurisdiction of this State is subject to property tax unless it is excluded by statute or exempted by the Constitution. The property must be listed annually. Under prior law, a board of county commissioners could, by resolution, provide for electronic listing of personal property. If a county allows the electronic listing of personal property, the assessor must publish this information, including the timetable and procedures for electronic listing.

This act repeals the existing statutory authority that allows counties to provide for electronic listing of personal property and creates a new statute in its place that allows counties to provide for electronic listing of personal property only after the Department of Revenue has established standards and minimum requirements, in consultation with the counties. Once the standards have

[70] Chapter 728 of the 1989 Session Laws.

[71] This provision first appeared in the Senate Appropriations/Base Budget Committee Substitute, HB 200, Version 7.

been established, a county may, by resolution, provide for electronic listing. A county may also delegate this authority to the county tax assessor.

The act also makes other procedural changes related to electronic listing. Section 3 of the act provides that a resolution that includes a general extension of time for the electronic listing of personal property continues to be in effect until the resolution is revised or rescinded. It further provides that if a board grants an individual taxpayer an extension for good cause shown for the electronic listing of personal property, the extension may not extend beyond June 1. Under prior law, the period for electronic listing may only be extended to June 1, both generally and in individual cases. Other individual extensions could not extend beyond April 15. The act also eliminates the requirement that a person with a duty to list property appear before the assessor and substitutes a requirement to file a completed abstract along with the required affirmation.

Government Reduction Act.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-266	**SB 593**	**Sen. Clary, Brock, Soucek**

AN ACT REDUCING STATE GOVERNMENT BY ABOLISHING CERTAIN STATE BOARDS, COMMISSIONS, AND COMMITTEES.

OVERVIEW: Section 1.15 of S.L. 2011-266 repeals G.S. 120-70.108 that required the Revenue Laws Study Committee to establish a Property Tax Subcommittee.

FISCAL IMPACT: This section has no fiscal impact.

EFFECTIVE DATE: This section became effective July 1, 2011.

ANALYSIS: Section 1.15 of S.L. 2011-266 abolishes the Property Tax Subcommittee of the Revenue Laws Study Committee. The Property Tax Subcommittee formerly studied and, if necessary, recommended changes to the property tax system. The current jurisdiction of the Revenue Laws Study Committee under G.S. 120 70.106 includes the study of all the revenue laws of North Carolina.

Property Tax Uniformity for Conservation Land.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-274	**HB 350**	**Rep. McGrady, Starnes, Brubaker, Harrison**

AN ACT TO MODIFY WHEN LAND USED FOR CONSERVATION PURPOSES IS TO BE EXCLUDED FROM THE PROPERTY TAX BASE.

OVERVIEW: This act does the following:

- Clarifies and modifies the tax exemption for real property for educational and scientific purposes as a protected natural area[72] by listing certain, enumerated conservation purposes.
- Creates a 5-year rollback for avoided taxes if conservation property is no longer used for conservation purposes, is used to generate income inconsistent with conservation, or is sold or transferred without an easement requiring perpetual use of the listed conservation purposes and without a prohibition on income generation.
- Expressly aligns definitions for educational and scientific purposes with the property tax exemption for property used for educational and scientific purposes.
- Requires that, as does the income tax credit for real property donations for conservation purposes, the entity owning the property must be "organized to receive and administer lands for conservation purposes".
- Adds the requirement that property qualifying under this exemption either not earn income or only earn income that is merely incidental to and not inconsistent with conservation purposes.

FISCAL IMPACT: Because the bill includes provisions which will potentially reduce local revenues (the expansion of qualifying purposes) and increase local revenues (a 5-year roll-back for disqualifying events), it is not clear whether the bill will result in an overall reduction or increase in local revenues. The overall change in revenue is expected to be minimal.

EFFECTIVE DATE: This act is effective for taxes imposed for taxable years beginning on or after July 1, 2011.

ANALYSIS: G.S. 105-275 lists classes of property that are authorized by the North Carolina Constitution to be excluded from the property tax base. Under prior G.S. 105-275(12), one of those classes was real property (i) owned by a nonprofit corporation or association and (ii) exclusively held and used by its owner for educational and scientific purposes as a protected natural area. Educational purpose and scientific purpose were not defined as they were elsewhere for property tax benefits in G.S. 105-275(12); property qualifying under G.S. 105-275(12) was excluded from the property tax base and, therefore, escaped property tax liability altogether; and whether the property earned income was not relevant to a determination of the property tax benefit afforded by G.S. 105-275(12).

This act modifies G.S. 105-275 (12) in various ways.

- It clarifies that the definitions for educational purpose and scientific purpose have the same meanings as defined in G.S. 105-278.7 (real and personal property used for, *inter alia*, educational or scientific purposes.)
- It expands the previous qualifying use (that land be used as a protected natural area) with the following, additional conservation purposes:
  - Managed under a written wildlife habitat conservation agreement with the North Carolina Wildlife Resources Commission

[72] A protected natural area is a nature reserve or park in which all types of wild nature, flora and fauna, and biotic communities are preserved for observation and study

- Managed under a forest stewardship plan developed by the Forest Stewardship Program.[73]
- Used for public access to public waters or trails.
- Used for protection of water quality and subject to a conservation agreement.[74]
- Held by a nonprofit land conservation organization for sale or transfer to a local, state, or federal government unit for conservation purposes.

- Property taxes avoided for up to the preceding 5 fiscal years are no longer eliminated but, instead, are carried forward as deferred taxes that become due and payable if a disqualifying event occurs. The following operate as disqualifying events:
  - The land is no longer used for one of the qualifying conservation purposes or is used to produce income inconsistent with the conservation use/s to which the land is applied.
  - The conservation organization transfers the land without an easement that requires the conservation use/s required for the land to qualify for the property tax benefit will continue to be applied and that prohibits income generation.
- It adds a requirement that property excluded from the tax base for conservation purposes not earn income or only earn income that is both incidental to and not inconsistent with the conservation purpose (e.g., a forest tract could not be managed for the commercial production of timber but some trees could be harvested if the harvesting is incidental and needed to accomplish the overall conservation purposes for which the tract is being managed)

Sales & Use Tax Overcollection.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-293	**HB 93**	**Rep. Howard, Setzer, Brubaker, Starnes**

AN ACT TO ALLOW A SELLER TO APPLY OVERCOLLECTED SALES TAX TO OFFSET A USE TAX LIABILITY ON A RELATED TRANSACTION.

OVERVIEW: This act allows a seller to apply overcollected sales tax to offset a use tax liability on a related transaction.

FISCAL IMPACT: There is no fiscal impact because the act has no effect on the amount of sales and use tax due.

[73] Authorized by the Cooperative Forestry Assistance Act of 1978, this Program provides technical assistance, through State forestry agency partners, to nonindustrial private forest owners to encourage and enable active long-term forest management.

[74] Conservation agreements are governed by the provisions of the Conservation and Historical Preservation Agreements Act, Article 4, Chapter 121 of the General Statutes

EFFECTIVE DATE: This act became effective July 1, 2011, and applies to tax liabilities that accrue on or after that date.

ANALYSIS: Generally speaking, the sales tax that a retailer collects is considered a debt from the purchaser to the retailer until it is remitted by the retailer to the State. The retailer is considered to act as a trustee on behalf of the State when it collects tax from the purchaser of a taxable item. When a seller collects tax in excess of the amount that should have been collected or when a seller collects tax on an exempt or nontaxable sale, the total amount collected must be paid over to the Secretary of Revenue. A retailer is not entitled to a refund of any amount of overcollected sales tax unless the purchaser receives credit for or is refunded the amount of tax overcollected. A cause of action against a seller for overcollected sales or use tax does not accrue until a purchaser has provided written notice to a seller and the seller has had 60 days to respond.

This act arose from a situation where a retailer collected and remitted sales tax on transactions that the Department of Revenue later determined were not subject to sales tax because the property was *used* by the retailer. In that instance, the retailer owed use tax on the property. Specifically, this company is in the business of selling and servicing office equipment, primarily copiers. The company collected sales tax on the sale of its service agreements rather than collecting use tax on the parts and supplies used to fulfill the service agreements. The company sought a credit in the amount of sales taxes it paid against the use tax it owed. Because the retailer could not or chose not to refund the erroneously collected tax to the people who paid it, a refund of the erroneously collected sales tax was not allowed under the existing statute. In this situation, the State effectively collected both sales tax and use tax on the same transactions. The matter was heard by the Business Court, which issued an order in favor of the taxpayer on January 4, 2010. The State has appealed.

This act modifies the statute in such a way that a retailer in the circumstances described above could offset its use tax liability with overcollected sales tax. Specifically, the Secretary of Revenue may take one of the following three actions when he or she determines that a seller has overcollected sales tax on a transaction:

Allow a refund of the tax if the seller gives the purchaser credit for or a refund of the overcollected tax. However, no refund would be given if the seller has elected to offset a use tax liability on a related transaction with the overcollected sales tax.

If the seller is liable for use tax on a related transaction, allow the seller to offset the use tax liability with the overcollected sales tax. However, no offset would be permitted if the seller elected to receive a refund of the overcollected sales tax. The fact that a seller is allowed an offset does not affect the liability of the seller to the purchaser for the overcollected tax.

If neither (1) or (2) apply, retain the total amount collected on the transaction.

Small Business Assist. Records/Tax Payments.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-297	**SB 385**	**Senator Hartsell**

AN ACT TO PROVIDE THAT SMALL BUSINESS ASSISTANCE RECORDS AND FINANCIAL STATEMENTS ARE NOT PUBLIC

RECORDS AND TO ALLOW A PASS-THROUGH ENTITY THAT CLAIMS A TAX CREDIT UNDER ARTICLE 3J TO TREAT THE CREDIT CLAIMED AS A TAX PAYMENT MADE BY OR ON BEHALF OF THE TAXPAYER.

OVERVIEW: This act does two things:

- It exempts from the public records law certain documents between an individual and a State entity related to business counseling or technical assistance provided by the entity to the individual.[75]
- It allows the owner of a pass-through entity that claims a tax credit under Article 3J of Chapter 105 of the General Statutes to treat some or all of the credit as a tax payment made by or on behalf of the taxpayer. By treating the credit as a tax payment, the taxpayer would be able to deduct from another state's tax calculation the taxpayer's tax paid to North Carolina, including any amount for which it received a credit.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: The provisions of the act related to the tax treatment of an Article 3J tax credit is effective for taxable years beginning on or after January 1, 2011.

ANALYSIS: Income may be taxable in more than one state. In those instances, a taxpayer may claim a credit for income tax paid to another state on the tax return the taxpayer files with his home state. The credit for tax paid to another state gives the taxpayer relief from being taxed twice on the same income. The credit is only allowed for tax paid. When a taxpayer receives a tax credit in the other state against the tax owed on that income, such as a credit for job creation or business investment, the credit reduces the amount of tax paid to that state, and effectively reduces the credit that may be claimed on the return due to the home state for tax paid to another state.

This act allows a pass-through entity to treat a tax credit received under Article 3J of Chapter 105 of the General Statutes[76] as a tax payment made by or on behalf of the taxpayer. By electing to treat the credit as a tax payment, nonresident members of a pass-through entity will not have their credit for taxes paid to another state reduced on their home state's return.

Various Economic Development Incentives.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-302	**HB 751**	**Representative McComas**

AN ACT TO EXPAND THE APPLICATION OF THE ONE PERCENT, EIGHTY DOLLAR EXCISE TAX ON CERTAIN MACHINERY AND EQUIPMENT TO SPECIALIZED EQUIPMENT USED AT A PORT FACILITY AND TO MACHINERY USED AT A LARGE MANUFACTURING AND DISTRIBUTION FACILITY; TO PROVIDE

[75] This document does not summarize this change.
[76] Article 3J provides tax credits for creating jobs and investing in machinery and equipment.

TIER ONE TREATMENT FOR PORT ENHANCEMENT ZONES; TO RETAIN AND ENCOURAGE INVESTMENT IN ECONOMICALLY DISTRESSED TIMES TO REMAIN ELIGIBLE TO TAKE AN INSTALLMENT OF A CREDIT EARNED UNDER THE BILL LEE ACT; AND TO AMEND THE AUTHORIZATION TO ISSUE SPECIAL INDEBTEDNESS FOR AN EDUCATIONAL BUILDING AT APPALACHIAN STATE UNIVERSITY.

OVERVIEW: This act does the following[77]:

- It expands the 1%, $80 excise tax applicable to equipment used to manufacture products by adding equipment used to distribute and assemble products.
- It expands favorable tax provisions applicable to a tier one county to areas designated as "port enhancement zones."
- It allows a taxpayer to continue to claim the tax credit for substantial investment in other property even though the requisite number of people employed at the location falls below the statutory requirement so long as the taxpayer has made a substantial investment in the property within two years of the date the employment fell below the requisite number.

FISCAL IMPACT: The provisions in the act that allows a taxpayer to remain eligible for the remaining installments of its Article 3A tax credit will reduce revenue by approximately $400,000 annually for five years, beginning in fiscal year 2010-11. The remaining provisions in the act do not impact revenues in this biennium, but will reduce General Fund revenues by more than $100,000 beginning in fiscal year 2013-14. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The expansion of the 1%, $80 excise tax to include distribution and assembly equipment becomes effective July 1, 2013. The expansion of the tier one benefits to port enhancement zones becomes effective for taxable years beginning on or after January 1, 2013. The retention of the remaining installments of an Article 3A tax credit becomes effective retroactively for taxable years beginning on or after January 1, 2009.

ANALYSIS: This act amends three different tax incentives: the 1%, $80 excise tax for mill machinery, Article 3J tax credits, and the Article 3A tax credit for substantial investment in other property.

Part I: Expand Excise Tax on Mill Machinery

North Carolina has long provided a preferential sales tax rate for mill machinery of 1% with an $80 cap per article.[78] The 2001 General Assembly enacted the excise tax in Article 5F in response to the requirement of the Streamlined Sales and Use Tax Agreement that states must simplify their

[77] The act allows bond proceeds allocated to Appalachian State University for an educational building to be used for improving property as well as acquiring property. This provision is not summarized in this document.

[78] North Carolina enacted a 3% sales tax rate in 1933. In 1935, the General Assembly enacted a preferential 1% rate for mill machinery. In 1937, the General Assembly enacted a cap per article of $10.

sales tax rates.[79] Items subject to the excise tax in Article 5F are exempt from sales and use tax. The current State sales tax rate is 4.75%; the local rates vary from 2% to 2.5% in Mecklenburg County.

The preferential rate applies to a manufacturing industry or plant that purchases mill machinery. The statute does not define "manufacturing," but North Carolina court cases define the term as the making of a new product by the application of skill and labor to the raw materials of which it is composed.[80] Section 57 of the Sales and Use Tax Bulletins and final decision issued by the Department of Revenue in 2003 reiterated that the preferential rate applied only to equipment used in the manufacturing process, not to equipment used in distribution or movement of manufactured products or to equipment used in the administrative work of the taxpayer.

Since 2005, Article 5F has been expanded to apply to purchases of fuel by a manufacturing plant, as well as machinery. It has also been expanded to include the following:

Certain personal property purchased by a major recycling facility.

Equipment purchased by a research and development company in the physical, engineering, and life sciences and used by that company in the research and development of tangible personal property.

Equipment purchased by a software publishing company that is used in the research and development of tangible personal property.

Equipment purchased by an eligible datacenter.

Specialized equipment used at a port facility.[81] – The act expands the 1%, $80 preferential tax rate to include specialized equipment used at a ports facility to unload or process bulk cargo to make it suitable for delivery to and for use by manufacturing facilities. This change in the law becomes effective July 1, 2013, and applies to purchases made on or after that date. The effective date ensured the provision would not impact the current fiscal biennium. There are no known projects at this point that would benefit from the preferential tax rate, but there have been taxpayers in the past interested in this type of incentive. The fiscal impact of this change is unknown.

Large manufacturing and distribution facility.[82] – The act creates a definition of a "large manufacturing and distribution facility" and expands the preferential 1%, $80 excise tax to include machinery used at the facility for assembling products and distributing finished products. Machinery located at such a facility for manufacturing products is already subject to the excise tax. The Winston Salem Journal reported on June 21, 2011, that Ashley Furniture Industries, Inc. the largest U.S. furniture manufacturer and retailer, was considering Davie County as a possible location for a $200 million complex to serve the East Coast. The facility would receive unassembled product pieces that it would assemble and distribute. This possibility appears to have spurred the enactment of the preferential rate; however, unlike past incentive legislation, the minimum

---

[79] The 2001 legislation, which became effective January 1, 2006, repealed the 1% sales tax rate, with an $80 cap, imposed on mill machinery purchased by a manufacturing industry or plant and replaced it with a privilege tax having the same rate.

[80] *Duke Power Co. v. Clayton,* 274 N.C. 505, 164 S.E.2d 289 (1968); *Sayles Biltmore Bleacheries, Inc. v. Johnson,* 266 N.C. 692, 147 S.E. 2nd 177 (1966); *Master Hatcheries, Inc. v. Coble,* 286 N.C. 518, 212 S.E.2d 150, (1975).

[81] The original bill made a variation of this amendment to Article 5F of Chapter 105.

[82] The House Finance Committee Substitute added this amendment to Article 5F to the bill.

investment and employment levels of this incentive could be obtained by other distribution facilities.

A large manufacturing and distribution facility is defined as one for which an investment of private funds of at least $80,000,000 is made within five years after the date on which the first property investment is made and one that will achieve an employment level of at least 550 within five years after the date the facility is placed into service. If the required level of investment or employment is not timely made, achieved, or maintained, then the preferential rate is forfeited and the taxpayer becomes liable for past sales and use taxes that would otherwise have been due. If the rate is forfeited for failure to timely make the required investment or timely achieve the required employment level, then the preferential rate is forfeited on all purchases made. If the rate is forfeited for failure to maintain the required employment level, then the rate is forfeited only on those purchases occurring on or after the date the taxpayer failed to maintain the required employment level.

The preferential rate for distribution equipment purchased by a large manufacturing and distribution facility becomes effective for purchases made on or after July 1, 2013, and expires for sales occurring on or after July 1, 2018. The delayed effective date ensured the provision would not impact the current fiscal biennium. The fiscal impact of this change in future years is unknown.

In addition to the preferential tax rate, the act also provides a sales tax refund to a large manufacturing and distribution facility that purchases distribution equipment on or after July 1, 2012, and before July 1, 2013. The facility would receive a full refund of local taxes and a portion of State taxes. The portion of State taxes refunded is equal to the amount of tax paid less the amount of tax the facility would have paid had it been subject to tax under Article 5F. The taxpayer must make a written request for a refund on or after July 1, 2013, and before January 1, 2014. Although the refund provision applies to purchases made during this fiscal biennium, it is not payable until fiscal year 2013-14, thus ensuring that the provision would not impact the current fiscal biennium. The fiscal impact of this change is unknown.

Part 2: Port Enhancement Zones[83]

North Carolina seeks to incent businesses to create jobs and invest in business property primarily through Article 3J tax credits. A taxpayer's eligibility for a credit and the amount of the credit varies depending upon the county[84] or zone[85] in which the jobs are created or the investments are made. These credits may be combined to offset up to 50% of the taxpayer's State income and franchise tax liability, and as a general rule, unused credits may be carried forward for up to five years.[86]

This act creates a new type of zone eligible for enhanced credits under Article 3J, a "*ports enhancement zone.*" North Carolina has two State ports, the Port of Morehead City and the Port of

[83] House Bill 903 contained the original contents of this provision. HB 903 remains in House Finance at the end of the 1st regular session of the 2011 General Assembly. The provisions of HB 903 were added to this act by an amendment offered in Senate Finance.

[84] The Department of Commerce annually ranks the State's 100 counties based on economic well-being and assigns a tier designation to each. The 40 most distress counties are designated as tier 1, the next 40 are tier 2, and the 20 least distressed are tier 3.

[85] Urban Progress Zones are defined in G.S. 143B-437.09 and Agrarian Growth Zones are defined in G.S. 143B-437.10.

[86] Fifteen-year carry-forwards apply to the credit for investing in real property and 20 carry-forwards exist for taxpayers that invest at least $150 million over a two-year period.

Wilmington. The Port of Morehead City is located in Carteret County; Carteret County is a tier 3 county. The Port of Wilmington is located in New Hanover County; New Hanover County is also a tier 3 county.

A ports enhancement zone is defined as an area that meets the following conditions:

> Is comprised of one or more contiguous census tracts, census block groups, or both, in the most recent federal census.
>
> All of the area is located within 25 miles of a state port and is capable of being used to enhance port operations.
>
> Every census tract and census block group in the area has at least 11% of households with incomes of $15,000 or less.

The defining statute stipulates that the area of the county that is included in one or more port enhancement zones may not exceed 5% of the total area of the county. Upon application of the county, the Secretary of Commerce is directed to make a written determination whether the requested area meets the conditions required for the designation. The Secretary must annually publish a list of all port enhancement zones.

The enhanced credits available to an urban progress zone (UP zone) and an agrarian growth zone (AG zone) will be available to a ports enhancement zone. The enhanced credits available to an UP zone or an AG zone under Article 3J are as follows:

> *Jobs tax credit*. – The threshold for new full-time jobs created to qualify for the tax credit for creating new jobs is the same as for a tier 1 county, five[87] and the amount of the credit is increased by $1,000 per job.[88] If the job is filled by a resident of the zone or a long-term unemployed worker, the credit is increased by an additional $2,000 per job.
>
> *Machinery and equipment investment tax credit*. – The investment threshold requirement to qualify for the tax credit for investing in business property is the same as a tier 1 county, which is none. The amount of the investment tax credit is also the same as a tier 1 county, 7% of the cost of tangible personal property that is placed in service during the taxable year.[89]

The enhanced credits become effective for taxable years beginning on or after January 1, 2013. The effective date ensures the changes do not have a fiscal impact in this biennium. The fiscal impact of this change is unknown.

Part 3: Encourage Investment to Retain Article 3A Installment[90]

In 2001, the General Assembly created a tax credit under the Bill Lee Act for substantial investment in other real property. To claim the credit for substantial investment in other property,

---

[87] The qualifying job threshold for a tier 2 county is 10; and a tier 3 county is 15.

[88] The amount of the jobs credit in a tier 1 county is $12,500 per job; a tier 2 county is $5,000; and a tier 3 county is $750.

[89] The threshold for a tier 2 county is $1 million and the credit is 5% of the cost of the property that exceeds the threshold. The threshold for a tier 3 county is $2 million and the credit percentage is 3.5%.

[90] Senate Bill 345 contained the original contents of this provision. The bill received a favorable report from the Senate; however, the bill received an unfavorable report in the House Finance Committee. The Senate Finance Committee adopted an amendment to this bill, HB 751, to incorporate a modified version of the contents of SB 345 – the Senate amendment required the taxpayer to retain an employment level of at least 125; the original bill did not contain a minimum employment level.

the Secretary of Commerce must make a written determination that the taxpayer is expected to invest at least $10 million in real property at a location within a three-year period and that the location will create at least 200 new jobs within two years of the time that the property is first used in an eligible business. The taxpayer may begin to claim the credit once the property is first used in an eligible business. A taxpayer may not claim both the credit for substantial investment in other property and the credit for investing in central office or aircraft facility property with respect to the same property.

The amount of the credit for substantial investment in other property is equal to 30% of the eligible investment amount and must be taken in installments over a seven-year period. There is no ceiling on the amount of the credit. Any unused credit may be carryforward for 20 years, as opposed to the more standard carryforward period of five years. The Bill Lee tax credits expired for business activities occurring on or after January 1, 2007.

The credit for substantial investment in other property expires if the number of people employed at the location falls below 200. In this case, the taxpayer may not take any remaining installments of the credit but the taxpayer may take the portion of an installment that accrued in a previous year and was carried forward.

This act creates an exception for which a taxpayer may continue to take the remaining installments of the credit for substantial investment in other property even when the number of employees the taxpayer employs at the property falls below 200. Under the law as amended by this act, the taxpayer may continue to claim the remaining installments of the credit if the taxpayer has invested a certain amount in the property within two years of the date the employment fell below 200 and the employment level has not fallen below 125. The amount that must be invested is at least two times the value of the remaining installments of the credit. If the employment level falls below 125, the taxpayer may not take the remaining installments of the credit, regardless of how much the taxpayer has invested in the property

This provision is effective retroactively for taxable years beginning on or after January 1, 2009. Fiscal Research is aware of only one taxpayer impacted by the legislation.[91] The act allows the taxpayer to remain eligible to take five remaining credit installments of $424,000 each. Without the changes made by the act, the taxpayer would become ineligible for these five remaining installments and its tax liability would increase accordingly

[91] The taxpayer appears to be Vantage Foods located in Lenoir, NC. The company is one of four of The Alex Lee Family of Companies located in North Carolina. The other three are Lowe's Foods Stores, Inc. in Winston-Salem, and Institution Food House, Inc. and Merchant's Distributor's, Inc., which are both located in Hickory, NC.

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

OVERVIEW: This act includes several technical, administrative, and clarifying changes to the revenue laws and related statutes.

FISCAL IMPACT: No impact.

EFFECTIVE DATE: Except as otherwise stated in the analysis, this act became effective when the Governor signed it into law on June 27, 2011.

ANALYSIS:

Section	Explanation
Business Tax Changes	
1	Changes the effective date for the exclusion of amenities from general admissions receipts. Prior to February 1, 2009, amenities were excluded from admissions receipts. Effective February 1, 2009, with one day's notice, the Department of Revenue issued a directive providing that amenities would be included in admissions receipts. The Revenue Laws Study Committee recommended, and the General Assembly enacted, a restoration of the prior understanding. The effective date of the legislation was August 1, 2010. Companies that paid the tax with amenities included in the admissions receipts sought a refund of the excess tax paid. The Department denied the refund request because the effective date of the legislative change was August 1, 2010, not February 1, 2009 (the day the directive took effect).
2	Modifies the cigarette excise tax payment statute to accommodate operating procedural changes being implemented by certain cigarette manufacturers and their affiliates. It does not change the manufacturer that is responsible for paying the tax.
3	Repeals an obsolete provision. When the General Assembly enacted the qualified business venture tax credits in 1987, they applied to investments in North Carolina companies and to both corporations and individuals. In 1996, the General Assembly revised the tax credit to apply to all investments because the restriction to North Carolina companies was unconstitutional. In the same act, S.L. 1996-14, ES2, the General Assembly also restricted the tax credit to individuals and pass-through entities. The

	subsection being repealed is a carry-over from the original law as it applied to holding companies.
4	Provides a definition for development tier one area in the tax credit for research and development. The tax credit amount for research performed in a development tier one area is 3.25%.
5	Repeals an obsolete provision. In S.L. 2010-89, the General Assembly provided an alternative apportionment formula for a corporation that signed a letter of commitment by September 15, 2010, certifying that it planned to invest at least $500 million in private funds to construct a facility in a development tier one area. No company signed such a letter. The General Assembly enacted the provision at the request of Microsoft; Microsoft announced in August that it would be locating in Virginia.
6	Repeals obsolete term. S.L. 2005-395 amended the real estate licensing laws to eliminate real estate salespersons licenses, making all licensed real estate agents real estate brokers as of April 1, 2006.
7	Removes reference to repealed statute. The General Assembly repealed G.S. 105-113.81A in the budget bill in 2009, S.L. 2009-451, as part of the special provision on "*Commerce/Enterprise Funds and Special Funds*".
8	Clarifies the franchise tax base.
9	Specifies the statutory reference.
10	Removes reference to obsolete provision. S.L. 2006-196 combined the statewide and local rates for insurance policies providing fire and lightning coverage and established a new statewide rate of 0.85% for the supplemental tax, effective January 1, 2008. The changes effectively replaced the tax on fire and lightening coverage with an additional tax on property coverage contracts.
Personal Tax Changes	
11	Clarifies that the IRC Update bill applies to the estates of decedents dying on or after January 1, 2011.
12	Makes changes to the provisions in the budget bill regarding the move from federal taxable income to adjusted gross income to ensure the bill does not inadvertently change the existing tax base in ways that were not intended.
13f	Ensures that a taxpayer may not take a double deduction for a 2009 net operating loss claimed on a 2006 return.
14	Reserved.
Sales and Use Tax and Article 5F Tax Changes	

15	Clarifies the original intent of the sales tax refund granted to professional motorsports teams for aviation fuel and tangible personal property that comprises part of the racing vehicle. In the last couple of years, the Department of Revenue has changed its interpretation of how the refund is applied. This section modifies the statutes to allow a related entity that pays the tax on behalf of the team to claim the refund and ensures that the refund only applies to professional motorsports teams that compete in at least 66% of the races sponsored in a race series. There are three race series in a season. The narrowing of the refund's applicability becomes effective when it becomes law; the other changes apply retroactively to the date the General Assembly authorized the refunds. Subsection (a) of this section also corrects a reference in the definition of 'over-the-counter drug' and makes conforming changes related to the change made in Section 17 of the act.
16	Clarifies that an accommodation arranged or provided by a school, camp, or similar entity to a person who pays to attend the school or camp is not subject to sales tax. In the past, the Department of Revenue did not consider summer camps, dorm rooms, or similar types of accommodations to be subject to sales tax. Recently, however, there appears to be some uncertainty. This section clarifies that there should not be a change in the application of the law in regards to these types of entities.
17	Removes the word "wireline" from the term 'prepaid calling service' at the request of the Streamlined Sales Tax Compliance Review and Interpretations Committee. It makes no substantive change in the law. Section 15 of the act made similar changes in the definitional statute.
18	Clarifies that the sales tax exemption for prosthetic devices is for human use, corrects the name of the agency where the Child and Adult Care Food Program is located, and corrects the name of the federal supplemental food program. This section also makes technical changes requested by the Department of Revenue in subdivisions (33a) and (49).
19	Removes geothermal heat pumps from the Energy Star sales tax holiday because consumers are not able to purchase them. Only a contractor can purchase a geothermal heat pump, which the contractor then sells to a consumer through the contractor's business. The holiday does not apply to the purchase of a product for use in a trade or business. The presence of the item in the list raised many questions and frustrated consumers.

20	Corrects the sunset dates of the sales tax refunds for fuel sold to passenger air carriers and motorsports teams. The General Assembly extended these sunsets from January 1, 2011, to January 1, 2013, in S.L. 2010-31. In a subsequent piece of legislation recommended by the Revenue Laws Study Committee, S.L. 2010-166, these refund provisions were reenacted in a new statute dedicated to economic incentive refunds. The later legislation failed to extend the sunset dates as provided in the previously enacted legislation.
21	Clarifies that use tax is payable by an individual on an annual basis for purchases made outside the State for a nonbusiness purpose of digital property and certain services. In 2009, the General Assembly imposed the State and local general rate of sales tax on certain digital goods, such as downloaded music and books. The legislation also made several conforming changes by adding the term "digital property" to a number of other sales tax statutes. Among them, the term "digital property" was added to the statute that sets out when an individual is required to pay use tax on out-of-State purchases. Since digital property was being subjected to sales tax, a corresponding change was made to subject it to use tax if it is purchased out of State. The Department of Revenue is interpreting the statute to exclude digital property and services from the annual use tax reporting requirement. This section clarifies that the "other than" phrase applies only to boats and aircraft. All other tangible personal property, digital property, and taxable services purchased outside the State for a nonbusiness use are subject to the annual reporting requirement for use tax.
22	Removes unnecessary and confusing words. If a datacenter fails to maintain its required levels of investments, it forfeits its incentive and must pay sales tax on its purchases. The statute stated that the sales tax would be calculated "*at the combined general rate*". The words are not necessary and may not correctly reference the right tax rate since the term "combined general rate" does not include the ¼ ¢ local sales tax applicable in some counties and may not accurately reflect the State tax rate in existence at the time of the investment.

23	Provides that a facilitator would not be liable for an over-collection or an under-collection of sales tax or local occupancy tax during the period of January 1, 2011, through April 1, 2011, as the result of the new collection and remittance obligations imposed under Section 31.6 of S.L. 2010-31 as long as the facilitator made a good faith effort to comply with the law and collect the proper amount of tax. During the 2010 Session, the General Assembly established new sales and use tax reporting and remittance obligations on "facilitators," which are entities that enter into a contract with the providers of accommodations to market and collect payment for accommodation rentals. An example of a facilitator is an online travel company, such as Expedia or Travelocity.
24	Gives effect to the changes the General Assembly made last session to the requirements for a datacenter to qualify for the 1% excise tax on the machinery and equipment it purchases. In S.L. 2007-323, the General Assembly created a tax incentive for the construction of datacenters by exempting the purchase of equipment from sales tax and, in its place, substituting the 1% excise tax. To qualify, a taxpayer had to invest $300 million in a NC datacenter over a five-year period. In S.L. 2010-91, the General Assembly reduced the investment threshold from $300 million to $225 million and also allowed taxpayers investing $225 million in one datacenter and $75 million in a second datacenter to pay the reduced rate on purchases of equipment for both datacenters. The modification allowed a datacenter to meet its investment threshold for the first facility at a lower threshold amount because the project was completed at a lower cost than originally estimated. It also provided that the initial investment amount would continue to be realized through investment in a second facility. The purpose of the legislation was to preserve the tax benefits for taxpayers who responded to the State's incentive offer in 2007 but whose investment expectations had changed. The 2010 legislation was generally effective July 1, 2010; the Department of Revenue questioned the applicability of the changes as they applied to datacenters already under construction. The Department reasoned that the language could be read to require a taxpayer to forfeit the reduced rate on all datacenter purchases made before July 1, 2010, even if the taxpayer met the investment threshold amounts. This section clarifies that the changes made in 2010 apply to all datacenter purchases made to date.
25	Clarifies that the amount of credit allowed for tax paid to another state is the amount of tax due and paid to that state.
26	Clarifies that a refund of tax allowed under G.S. 105-164.14, 105-164.14A, and 105-164.14B are not an overpayment of tax entitled to interest.
27	Clarifies the effective date of a tax change for services. North Carolina has been notified that it is out of compliance with the Streamlined Sales Tax

	Agreement on this issue because the Governing Board reads the current law to mean that different rates could apply to items billed in arrears and items billed in advance; the change is needed to comply with the Agreement.
28	Changes the term 'certificate of resale' for 'certificate of exemption' to conform to the name on the certificate.
29	Clarifies that for purposes of digital property, the sale is sourced to the place where the purchaser of the property takes possession or makes first use of the property, whichever comes first. North Carolina has been notified that it is out of compliance with the Streamlined Sales Tax Agreement on this issue; the change is needed to comply with the Agreement.
Excise Tax on Conveyances	
30	Clarifies the refund process for the deed stamp tax.
General Administration Tax Changes	
31	Updates the reference to NAICS and places the definition in the statute applicable to most of Chapter 105. NAICS is the North American Industry Classification System adopted by the US Office of Management and Budget. It is updated every five years. Makes a conforming change to the term "information technology and services" to reflect the changes from the 2002 NAICS to the 2007 NAICS.
32	Clarifies that the higher penalty for failure to obtain a license under the motor fuel statutes only applies after the taxpayer has received written notification from the Department of Revenue to obtain the requisite license.

33	Reconciles two conflicting provisions concerning whether the identity of certain taxpayers is public information. This section also makes conforming changes. The taxpayers affected are those who bring a contested case action at the Office of Administrative Hearings to obtain a review of an assessment or a denial of a refund by the Department of Revenue. Previously, G.S. 150B-31.1(e) stated that the record, proceedings, and decision in a contested case are confidential until the final decision is issued. The Secretary of Revenue makes the final decision and, once that decision issued, the records with the taxpayer name is public. However, G.S. 105-256(a)(9) required the Secretary of Revenue to publish the final decision in a contested case in a format that redacts identifying information. The requirement to redact the identifying information serves no purpose because once the decision is published, the record in the contested case proceeding becomes public in an unredacted form under G.S. 150B-31.1. Subsection (a) reconciles these provisions by amending G.S. 105-269(a)(9) to delete the requirement that the Secretary redact identifying taxpayer information when publishing final decisions. Subsection (b) makes a conforming change to the secrecy statute, G.S. 105-259, to change the word "report" to "publication" to ensure that the final decisions are included within the current exception for reports. G.S. 150B-31.1 and G.S. 105-256(a)(9) were both enacted in 2007 in Senate Bill 242, S.L. 2007-491. Under prior law, the Tax Review Board reviewed administrative decisions of the Secretary and made a decision, called an order, after the review. Orders of the Tax Review Board were published in the North Carolina Register, as required by G.S. 150B-21.17(a)(5),and were not redacted. S.L. 2007-491 revised the procedure for the review of contested tax cases and, as part of the revisions, eliminated the Tax Review Board. Subsection (c) makes a conforming change and repeals the obsolete requirement in G.S. 150B-21.17(a)(5) to publish orders of the Tax Review Board in the North Carolina Register.
34	Clarifies that a waiver of a statute of limitations must be executed before the statute of limitations expires.
35	Repeals an obsolete reporting provision. The reporting provisions were consolidated into a single statute in S.L. 2010-166.
36	Conforms the sunset provisions of miscellaneous provisions associated to the tax credit for recycling oyster shells. The General Assembly extended the sunset on this credit from January 1, 2011, to January 1, 2013, in S.L. 2010-147.

37	Ensures that the definition of 'person' for purposes of the Setoff Debt Collection Act of Chapter 105A is the same as the definition of 'person' for tax purposes under Chapter 105.
38	Deletes a statute concerning the procedure for Department initiated refunds of sales and use tax because the procedure applicable for all Department initiated refunds is in G.S. 105-241.7.
39	Reserved.
Property Tax Changes	
40	Clarifies the postmark rule for property taxes on registered motor vehicles. The provision is the same as the rule for other property tax payments and is the same as current administrative practice.
41	Clarifies that the definition of "public service company" in the property tax statutes does not include providers of mobile telecommunication service.
42	Corrects errors in the effective date section of the legislation regarding the change in the collection of motor vehicle property taxes.
43-44	Reserved.
Local Government Sales and Use Tax Changes	
45	Modernizes the local sales tax base to conform to the State sales tax base for items taxed at the general rate of tax. This change will remove the need to amend the local sales tax statute whenever an item is added to the State sales tax base and taxed at the general rate of tax. It effectively includes digital products in the local sales tax base, as intended by the General Assembly.
Miscellaneous Changes	
46	Removes the sunset from the provision that allows the Codifier of Statutes to renumber the subdivisions in the special license plates statute in sequential and alphabetical order. Changes the name of the Division of Legislative Drafting and Codification to Legislative Services Office, to conform to the changes made in S.L. 2011-97.
47	Clarifies the fees that should be credited to the Insurance Regulatory Fund.
48-49	Reserved.
Effective Date	
50	Except as otherwise provided, the act became effective when the Governor signed it into law on June 27, 2011.

Extend Sunsets.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-345	**SB 436**	**Senator Hartsell**

AN ACT TO EXTEND THE SALES TAX REFUND ALLOWED TO A JOINT GOVERNMENTAL AGENCY CREATED TO OPERATE A CABLE TELEVISION SYSTEM FOR ONE YEAR.

OVERVIEW: This act extends for one year the sales tax refund allowed to a joint governmental agency created to operate a cable television system.

FISCAL IMPACT: This act reduces General Fund availability by $25,000 for the 2011-12 fiscal year and local revenues by $5,000 per fiscal year. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 27, 2011.

ANALYSIS: Last session, the General Assembly allowed cities that jointly operate a cable television system to obtain a refund of State and local sales and use tax paid by the entity on purchases made between July 1, 2007, and June 30, 2010.[92] This act extends the refund for one year, for purchases made through June 30, 2011.

The only entity that fits this description is MI Connection. MI Connection is a locally owned and operated cable and Internet system serving the towns of Mooresville, Davidson and Cornelius in the counties of Mecklenburg and Iredell. The municipalities have created a joint agency through an interlocal agreement pursuant to G.S. 160A-462 to operate a cable television system. A cable television system is one of the listed systems that a municipality has the authority to operate as a public enterprise under Article 16 of Chapter 160A of the General Statutes.

Under G.S. 105-164.14(c) a city may obtain a sales tax refund of the purchases it makes. Under that authority, a city that operates a cable television system may obtain a sales tax refund; MI Connection was not allowed a refund under that subsection because it was operated as a joint venture, rather than by the cities themselves.

Increase In Rem Foreclosure Fee.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-352	**SB 537**	**Senator Hartsell**

AN ACT TO INCREASE THE IN REM FORECLOSURE FEE.

OVERVIEW: This act increases the amount of the charge for administrative costs that may be added to the tax due as part of the costs of the action in an in rem foreclosure proceeding for delinquent tax.

---

[92] S.L. 2010-153.

FISCAL IMPACT: Although no data is available on the number of in rem foreclosure proceedings in the state, this method of foreclosure has become more common in recent years. The $50 fee that is currently charged is not adequate to recover administrative costs to the taxing unit, particularly when a clear chain of title has to be established. The $250 fee would more closely reflect the actual administrative costs associated with in rem foreclosures. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective July 1, 2011, and applies to in rem foreclosure proceedings commenced on or after that date.

ANALYSIS: This act increases from $50 to $250 the charge for administrative costs that may be added to the tax due as part of the costs of the action in an in rem foreclosure proceeding for delinquent tax[93] due. The current administrative cost of $50 has not been increased since it was first allowed in 1987. The in rem procedure is an expedited procedure that permits a taxing unit to docket a judgment against the property in State court and proceed with a foreclosure sale within three months to two years after the judgment is docketed. In an in rem procedure, the costs of mailing and publication plus a $50 charge to defray administrative expenses may be added to the amount of taxes due; if an attorney is used, the attorney fee is paid by the taxing unit and may not be added to the judgment as part of the costs of the action. Much of the administrative time required for an in rem foreclosure is spent researching the property's chain of title.

Extend Time For Site Of Low/Mod. Inc. Housing.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-368	**HB 417**	**Representative McGrady**

AN ACT TO EXTEND THE TIME PERIOD FOR HOLDING REAL PROPERTY AS A FUTURE SITE FOR HOUSING FOR LOW- OR MODERATE-INCOME INDIVIDUALS AND FAMILIES.

OVERVIEW: This act extends from 5 years to 10 years the maximum time period that real property owned by a nonprofit organization as a future site for low or moderate income housing may be exempted from taxation.

FISCAL IMPACT: This act affects property taxes imposed by local governments.

EFFECTIVE DATE: This act is effective for taxes imposed for taxable years beginning on or after July 1, 2011.

ANALYSIS: Real property owned by a nonprofit organization providing housing for individuals or families with low or moderate incomes is exempt from property taxation if the owner is not organized or operated for profit and it is actually and exclusively occupied and used. This act provides that real property held for low or moderate income housing may be exempted from taxation for a maximum of 10 years. Under prior law, real property held for low or moderate income housing was exempted from taxation for a maximum of five years. The taxes otherwise due are a lien on the property. The taxes are carried forward to the next year as deferred taxes and

[93] Taxes become delinquent when interest begins to accrue on January 6 of the year in which the taxes were levied.

are due if the property loses eligibility because of a disqualifying event. A disqualifying event occurs when the property is not used for low or moderate income housing.

Forced Combinations.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-390	**HB 619**	**Rep. Howard, McLawhorn, Carney, Ingle**

AN ACT TO SPECIFY THE SECRETARY OF REVENUE'S AUTHORITY TO ADJUST THE NET INCOME OF A CORPORATION OR TO REQUIRE A CORPORATION TO FILE A COMBINED RETURN.

OVERVIEW: This act changes the Secretary of Revenue's authority to adjust the income of a multistate corporation by requiring it to file a combined return when the Secretary determines the corporation conducts its business in a way that fails to accurately reflect its income attributable to North Carolina.[94] Under current law, the Secretary may redetermine the net income of a corporation if the Secretary finds a report by the corporation does not reflect its true earnings from its business carried on in this State. Under the law effective for taxable years beginning on or after January 1, 2012, the Secretary may only make this redetermination if the Secretary finds the corporation fails to accurately report its State net income through the use of transactions that lack economic substance or are not at fair market value. The act also directs the Revenue Laws Study Committee to review the legislation and recommend any needed changes, as well as to determine whether the provisions of the new law should apply to pending assessments.[95]

FISCAL IMPACT: The Department of Revenue believes the changes made by the act will have a significant negative fiscal impact because it may affect agreements the Department has entered into with multistate corporate taxpayers through its resolution initiatives. [96] The Fiscal Research

---

[94] The Senate removed the original contents of House Bill 619, which were included in S.L. 2011-145, the Current Operations and Capital Improvements Appropriations Act of 2011, and replaced them with the provisions of this act. The House concurred in the Senate Finance Committee Substitute with its four unengrossed amendments.

[95] The Senate Finance Committee Substitute applied to pending assessments. Amendment #2 made the act prospective only and directed the Revenue Laws Study Committee to recommend whether the provisions of the act should apply to pending assessments. The amendment intended to replace Section 7 of the third edition, which extended the time the Department of Revenue had to issue a final determination, with the Revenue Laws Study. However, because of an engrossment error, the act retained that Section 7, which is harmless, as well as a second Section 7 that directs the study. The amendment would have removed the extension because it was no longer needed since the act is effective prospectively and does not apply to pending assessments.

[96] The Department of Revenue believes the changes made by Amendments #1 and #3 may have a significant fiscal impact. Amendment #1 prohibits the Secretary from making adjustments that limit a corporation's options for reporting royalty payments; Amendment #3 prohibits a life insurance company or an insurance company subject to tax under Section 831 of the Code from being included in a combined

Division noted the act will not increase or decrease revenues above the baseline budgeted amount because the biennial consensus revenue forecast does not include in the tax base any agreements the Department may have entered into with taxpayers. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act becomes effective January 1, 2012, and applies to proposed assessments for taxable years beginning on or after January 1, 2012.[97]

ANALYSIS: North Carolina is a single-entity filing state, meaning that a multistate corporation must determine its State net income as if it filed a separate return for each subsidiary corporation for federal income tax purposes. G.S. 105-130.14 prohibits a corporation from filing a combined return in North Carolina unless specifically directed by the Secretary of Revenue. Under G.S. 105-130.6, the Secretary can require a corporation to file a combined return with other parent, subsidiary, or affiliated corporations when the Department of Revenue believes the corporation's net income attributable to this State is not accurately reflected on its separate filing return.

A corporation directed to file a combined return has 60 days to file the return before being subject to penalties unless the taxpayer has requested a hearing on the tax liability used as the basis for the penalty. The Secretary was directed in 2010 to adopt rules that describe when the Secretary would require the filing of a combined return.[98] A corporation must file a combined return when the rule adopted by the Department requires or, after a written request from the corporation, the Secretary provided written advice to the corporation stating that the Secretary will require a combined return.

The act repeals G.S. 105-130.6 and replaces it with G.S. 105-130.5A, which provides the following:

> If the Secretary has reason to believe a corporation's business conduct causes it to inaccurately report net income attributable to its business in North Carolina, the Secretary may give notice to and require any information necessary from the corporation to determine whether its intercompany transactions have economic substance[99] and are at fair market value between affiliated members.[100] The corporation has 90 days to comply.

---

return. The Revenue Laws Study Committee plans to consider these changes as part of its review of the legislation.

[97] The Department of Revenue has requested clarification of the effective date. The repeal of G.S. 105-130.6 on January 1, 2012, appears to leave a window in which no law exists regarding the Secretary's authority to determine the State net income of a corporation who fails to accurately reflect its income attributable to North Carolina. A clearer effective date would have been one that made the act effective for taxable years beginning on or after January 1, 2012.

[98] The Department did not adopt any rules in this area.

[99] G.S. 105-130.5A(f), as enacted by this act, defines economic substance to require one or more transactions that have both reasonable business purposes and economic effects. Reasonable business purposes and economic effects include any material benefit other than tax benefits, excluding tax benefits consistent with legislative intent. A showing that a transaction has economic effect beyond tax benefit may be satisfied by demonstrating material business activity of the entities involved. Centralized cash management of an affiliated group, alone, is not evidence of an absence of economic substance, and a financial accounting benefit is not a reasonable business purpose, alone, if the origin is a reduction of income tax.

[100] An affiliated group is two or more corporations or noncorporate entities in which more than 50% of the voting stock, including ownership interests for noncorporate entities, of each member is directly or indirectly owned or controlled by a common owner or owners, excluding (i) corporations not required to file a federal income tax return; (ii) certain insurance companies; (iii) certain tax-exempt corporations; (iv)

If the Secretary reviews the provided information and finds as fact that the intercompany transactions lack economic substance or were not at fair market value, the Secretary may redetermine the State net income of the corporation by (i) adjusting the intercompany transactions to accurately reflect State net income or (ii) requiring the corporation to file a combined return for all members of its affiliated group conducting a unitary business.[101] If either option is utilized, the Secretary must provide the corporation with a written statement containing details of the rationale supporting the findings of fact as to inaccurate reporting and as to the Secretary's proposed computational method of income.

If the Secretary finds as fact that a combined return is required, the Secretary may require the submission of a combined return within 90 days of written notice. The submission does not act as an admission of liability, and the Secretary or corporation may propose a combination of fewer members.[102]

In determining whether transactions between members of the affiliated group of entities are at fair market value, the Secretary must apply the standards contained in Section 482 of the Code.

If a combined return is required, the combined net income of the corporation and affiliated members must be apportioned in a way that fairly reflects the current apportionment formula applicable to the corporation and each included affiliated member in determining State income tax.

Properly required returns not timely submitted result in penalties.

A corporation may request in writing specific advice regarding whether a redetermination of net income or a combined return would be required under listed facts, and the Secretary may request additional information. Advice must be provided within 120 days of receipt of the request. The Secretary may charge a fee for providing advice, which are credited to an account in the Department and do not revert to the General Fund. The fee must be between $100 and $5,000 unless waived by the Secretary.

The Secretary and corporate taxpayers may extend the time limits contained in G.S. 105-130.5A, by mutual agreement.

Appeals of the Secretary's determination are to the Office of Administrative Hearings. The administrative law judge holds a de novo review of the following issues:

- Whether the separate income tax returns fail to report State net income property due to transactions that lack economic substance or are not of fair market value between affiliated members.
- Whether the Department's redetermination of net income is appropriate to properly determine the corporation's income attributable to North Carolina.

S corporations; (v) foreign corporations under section 7701 of the Code; (vi) a partnership, LLC, or other entity not taxed as a corporation; and (vii) a corporation with at least 80% of its gross income from all sources in the tax from active foreign business income.

[101] This authority exists even if all members of the affiliated group are not doing business in the State.

[102] Senate Amendment #4 increased the time from 60 days to 90 days. Likewise, the amendment imposed a 90-day requirement on the Department of Revenue to provide the taxpayer with a written statement of facts after a proposed assessment.

- Where a combined return is required, whether adjustments other than requiring the combined return are adequate to determine State net income.

Tax Credits for Children with Disabilities.

Session Law	*Bill #*	*Sponsor*
S.L. 2011-395	**HB 344**	**Rep. Stam, Randleman, Jordan, Jones**

AN ACT TO ALLOW AN INDIVIDUAL INCOME TAX CREDIT FOR CHILDREN WITH DISABILITIES WHO REQUIRE SPECIAL EDUCATION AND TO CREATE A FUND FOR SPECIAL EDUCATION AND RELATED SERVICES.

OVERVIEW: This act creates a new income tax credit for tuition and special education and related services expenses for a taxpayer's eligible dependent child with a disability who is enrolled in a private school or a public school where tuition is charged for the eligible dependent child's enrollment. The act also creates a Fund for Special Education and Related Services with the monies to be used for special education and related services for children with disabilities. The act requires the Department of Revenue to report on the administration of the credit.

FISCAL IMPACT: Effective for tax years beginning on or after January 1, 2011 and semesters occurring on or after July 1, 2011 the legislation is expected to reduce General Fund availability by $1.4 million in fiscal year 2011-12, and increase General Fund availability in future years. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2011 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The new tax credit is effective for taxable years beginning on or after January 1, 2011, and applies to semesters for which the credit is claimed beginning on or after July 1, 2011. The Fund is effective January 1, 2011, but transfers to the Fund will not be made before the 2012-2013 fiscal year.

ANALYSIS: This act creates a new individual income tax credit of up to $3,000 per semester for tuition and special education and related services expenses for a taxpayer's eligible dependent child with a disability who is enrolled in a nonpublic school or a public school where tuition is charged for the eligible dependent child's enrollment.[103]

---

[103] Approximately five states provide programs for students with disabilities to attend private schools:

- Florida - The John M. McKay Scholarships Program for Students with Disabilities gives parents a voucher to send their child to a private school or another public school of their choice.
- Utah - The Carson Smith Special Needs Scholarship Program awards scholarships to students with disabilities who attend a private school, both secular and non-secular.
- Ohio - The Special Education Pilot Project, also known as the Autism Scholarship Program, is a scholarship awarded to parents of autistic children for services at a public or nonpublic special education program, which includes tuition at a private school.
- Oklahoma - Oklahoma enacted the Lindsey Nicole Henry Scholarship for Children with Disabilities in 2010. The amount of the scholarship would be either the private school's tuition or the amount of state and local money that would be given to the school system where the student is enrolled, whichever is less.

Credit. – A taxpayer is allowed an education expenses tax credit for tuition and special education and related services expenses for each "eligible dependent child" who is a resident of this State and who is enrolled for one or two semesters during the taxable year in grades Kindergarten-12 at either a nonpublic school or at a public school for which tuition is charged. The credit amount is $3,000 per semester, up to two semesters a year for a maximum of $6,000 for a full academic or taxable year. For home schools, the credit is equal to the amount the taxpayer paid for special education and related services expenses not to exceed $3,000 per semester.

An eligible dependent child must meet all of the following criteria:

> Is a child with a disability who requires an individualized education program (IEP) under Article 9 of Chapter 115C of the General Statutes[104] and the federal Individuals with Disabilities Education Improvement Act (IDEA).[105] The child must be reevaluated every 3 years by a local educational agency to verify that the child continues to be a child with a disability.
>
> Receives special education or related services on a daily basis.
>
> Is a child for whom the taxpayer is entitled to deduct a personal exemption under section 151(c) of the Code for the taxable year.

For the initial eligibility for the tax credit during the first five years that the credit is available, the eligible dependent child must have been enrolled for at least the preceding two semesters in a public school or receiving special education or related services through the public schools as a preschool child with a disability. This initial eligibility requirement is reduced to one semester beginning for taxable years on or after January 1, 2016, and applies to semesters for which the credit is claimed beginning on or after July 1, 2016.

For purposes of this credit, there are two semesters during each taxable year with the spring semester being the first 6 months of the taxable year and the fall semester being the second six months of the taxable year. An eligible dependent child is considered to have been enrolled in a school for a semester if the eligible dependent child is enrolled in that school for more than 70 days during that semester.

The tax credit is not refundable but any unused portion of the credit may be carried forward for three succeeding years.

Disqualification. – A taxpayer is not qualified for the education expenses tax credit for any semester if the taxpayer's otherwise eligible dependent child meets any of the following conditions:

> Was placed in a nonpublic school or facility by a public agency at public expense.
>
> Spent any time enrolled as a full-time student taking at least 12 hours of academic credit at a postsecondary educational institution.
>
> Was 22 years of age or older during the entire semester.
>
> Graduated from high school prior to the end of the semester.

- Georgia - Georgia enacted the Special Needs Scholarship Act in 2007, creating a program which allows children with special needs to attend the public or private school that best meets their educational needs.

[104] Education of Students with Disabilities.

[105] 20 U.S.C. § 1400 et seq.(2004), as amended.

Reduction. – The amount of the education expenses tax credit is reduced for any semester in which the eligible dependent child spent any time enrolled in a public school. The amount of the reduction is equal to the percentage of the semester that the eligible dependent child was enrolled in a public school.

Documentation. – To substantiate the credit, a taxpayer must provide all of the following information to the Department of Revenue, if requested by the Secretary of Revenue:

The name, address and social security number of each eligible dependent child for whom the credit is claimed and the name and address of the school or schools in which the eligible dependent child was enrolled in and attended for more than 70 days of each semester.

A certification that there were no disqualifying factors.

The name of the local school administrative unit in which the eligible dependent child resides.

The amount of the tuition paid to a public school for each semester the eligible dependent child was enrolled in and attended that public school.

The eligibility determination that the eligible dependent child is a child with a disability who requires special education and related services.

A listing of the tuition and special education and related services expenses on which the education expenses tax credit is based.

For home schools, a listing of the special education and related services expenses on which the education expenses tax credit is based.

Fund for Special Education and Related Services. – The act also establishes a Fund for Special Education and Related Services (Fund). At the end of each fiscal year, the Secretary of Revenue must transfer an amount equal to $2,000 multiplied by the number of education expenses tax credits taken during the fiscal year to the Fund from the net individual income tax collections. The Fund is a special revenue fund under the control and direction of the State Board of Education. Interest and other investment income earned by the Fund accrue to it and monies in the Fund do not revert. The revenue in the Fund may only be used for special education and related services for children with disabilities. In addition, the monies in the fund must be used to reimburse local educational agencies for conducting reevaluations for continued eligibility and developing revised individualized education programs for children with disabilities.

Report. – The Department of Revenue must report to the Revenue Laws Study Committee and the Joint Legislative Education Oversight Committee on the administration of the education expenses tax credit by October 1, 2013. The report must include all of the following:

The number and amount of education expenses tax credits taken.

Concerns relating to the administration of the education expenses tax credits or taxpayer compliance.

Any other matter the Department wishes to address with respect to the education expenses tax credit.

The remainder of this act (Sections 4A, 5, and 5A) make necessary budget adjustments to the 2011 Appropriations Act[106] needed for the implementation of this act.

[106] S.L. 2011-145.

2010 Finance Law Changes

Modify Renewable Energy Property Credit.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-4	**SB 388**	**Senator Clodfelter**

AN ACT TO REMOVE CERTAIN GRANTS MADE UNDER THE AMERICAN RECOVERY AND REINVESTMENT TAX ACT FROM THE DEFINITION OF PUBLIC FUNDS FOR WHICH A CREDIT FOR INVESTING IN RENEWABLE ENERGY PROPERTY IS NOT AVAILABLE.

OVERVIEW: This act amends the credit for investing in renewable energy property to allow the credit when the cost of the property was provided by grants made under the American Recovery and Reinvestment Tax Act of 2009.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: The act is effective January 1, 2009, and applies to renewable energy property placed into service on or after that date.

ANALYSIS: North Carolina allows a tax credit for investing in renewable energy property. The credit is equal to 35% of the cost of the property and may be taken against the franchise tax, income tax, or gross premiums tax. The credit applies to the following machinery and equipment or real property:

Biomass equipment that uses renewable biomass resources[1] for biofuel production of ethanol, methanol, and biodiesel; anaerobic biogas production of methane using agricultural and animal waste or garbage; or commercial thermal or electrical generation from renewable energy crops or wood waste materials.

Hydroelectric generators.

Solar energy equipment.

Wind equipment.

Geothermal heat pumps and geothermal equipment.

In the case of renewable energy property that services a single-family dwelling, the credit must be taken for the taxable year in which the property is placed in service. For all other renewable energy property, the credit must be taken in five equal installments, beginning with the taxable year in which the property is placed in service. The maximum amount of the credit is based upon the type of property serviced.

[1] Renewable biomass resources are organic matters produced by terrestrial and aquatic plants and animals, such as standing vegetation, forestry and agricultural residues, landfill wastes, animal wastes, and spent pulping liquor.

The renewable energy tax credit is not allowed to the extent the cost of the renewable energy property was provided by public funds. This act removes certain federal grants from the definition of "public funds" in the statute. This change allows property funded with these grants to qualify for the credit, placing renewable energy projects on the same footing that they would have been had the recession not greatly reduced potential investors' participation in the projects.

Section 1603 of the American Recovery and Reinvestment Tax Act of 2009 provides eligible taxpayers that develop renewable energy projects a grant equal to up to 30% of the basis of property used to produce electricity from wind energy, closed-loop biomass, open-loop biomass, geothermal, landfill gas, trash combustion, incremental hydropower, marine and hydrokinetic energy, fuel cell property, solar property, and small wind property. Grants of 10% are available for geothermal property that is not eligible for the 30% rate, qualified microturbines, combined heat and power property, and geothermal heat pumps. The property must be placed in service during 2009 or 2010, or after 2010 but before the credit termination date for such property if construction for the property began during 2009 or 2010.

The grant program was enacted, in part, to help the investment market for renewable energy projects. Developers of renewable energy projects often seek investors that are allocated a portion of the income, gains, losses, deductions and tax credits of the project. In the current economic environment, potential tax investors may not be paying federal income taxes and therefore may be reluctant to make these investments. The creation of a grant program removes this obstacle by permitting developers to obtain a federal subsidy by means of a government grant instead of a tax credit.[2]

Appropriations Act of 2010.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-31	**SB 897**	**Senator Dannelly**

AN ACT TO MODIFY THE CURRENT OPERATIONS AND CAPITAL IMPROVEMENTS APPROPRIATIONS ACT OF 2009 AND FOR OTHER PURPOSES.

OVERVIEW: Part 31 of S.L. 2010-31 provides tax and administrative relief to small businesses, extends various economic development incentives, incorporates four tax proposals recommended by the Revenue Laws Study Committee, and clarifies the application of tax penalties in cases of forced consolidation.

The act provides the following tax relief to small businesses:

It extends the five-year carryback for net operating losses sustained in 2009. (Section 31.1)

It provides a refundable income tax credit to small business taxpayers whose gross receipts for the taxable year are less than $1 million. The credit amount is equal to 25% of the

---

[2]AMERICAN RECOVERY and REINVESTMENT ACT of 2009: *Law, Explanation and Analysis,* 200 (CCH 2009).

amount of the unemployment insurance contributions the taxpayer paid during the calendar year on wages paid to an individual. (Section 31.1A)

It decreases the number of retailers required to submit a pre-payment of 65% of the amount of sales tax revenue to be remitted for the following month by changing the threshold for this payment schedule from $10,000 to $15,000, effective October 1, 2010, and from $15,000 to $20,000, effective October 1, 2011. (Section 31.3)

The act provides administrative relief to small businesses by stipulating that the first annual report of a limited liability company (LLC) is due April 15 following its year of organization. (Section 31.4)

It contains the following provisions to encourage economic development:

It reserves $9.8 million for commerce business recruitment initiatives.[3]

It extends the sunset on the following expiring tax credits and refunds: (Section 31.5)

The tax credit for mill rehabilitation.

The tax credit for qualified business investments.

The sales tax refund for air passenger carriers.

The sales tax refund for motorsports aviation fuel.

It contains the following tax proposals recommended by the Revenue Laws Study Committee:

It updates the reference to the Internal Revenue Code used in defining and determining certain State tax provisions from May 1, 2009, to May 1, 2010. By doing so, North Carolina conforms to the changes made by five federal acts. The bill does not conform to the 5-year carryback for net operating losses (NOL) available to large businesses. (Section 31.1)

It establishes new sales and use tax and local occupancy tax reporting and remittance obligations on a person who enters into a contract with a provider of transient accommodations to facilitate the rental of an accommodation and who collects payment for the rental. (Section 31.6)

It extends the admissions tax to the Internet resale of tickets by a person engaged in the business of reselling and restores the Department of Revenue's pre-2009 interpretation of the admissions tax statute to exclude from tax charges for amenities that are bundled with a ticket purchase. (Section 31.7)

It directs the Department of Revenue to give taxpayers ample notice when it issues an interpretation that revises a prior interpretation by expanding the scope of a tax or otherwise increasing the amount of tax due. (Section 31.7A)

It improves the tax and debt collection process of the Department of Revenue by expanding the use of the Setoff Debt Collection Act, authorizing the use of electronic process for sending notice of garnishment, providing for a data match between the Department and financial institutions holding accounts of delinquent taxpayers, and expanding the Statewide Accounts Receivable Program. (Section 31.8)

---

[3] See S.L. 2010-89, 2010-91, 2010-147, and 2010-167.

It applies retroactively a tax law change enacted last session. S.L. 2009-422 excluded from a corporation's franchise tax base all billings in excess of costs, effective for taxable years beginning on or after January 1, 2010. This provision would apply the change retroactively to 2007. (Section 31.9)

Lastly, it provides that a taxpayer may not be assessed a penalty if the taxpayer pays the tax due within the stated period of time. (Section 31.10)

FISCAL IMPACT: See ANALYSIS. *(For a more complete fiscal analysis, see NC 2010 Legislative Session Budget and Fiscal Policy Highlights. Available online:* http://www.ncleg.net/fiscalresearch/highlights/highlights_pdfs/2010_Session_Highlights.pdf*)*

EFFECTIVE DATE: Except as otherwise noted, the act became effective when the Governor signed it into law on June 30, 2010.

ANALYSIS: Part XXXI of The Current Operations and Capital Improvements Appropriations Act of 2010 made the following tax law and related changes.

IRC Update. – Section 31.1 updates the reference to the Internal Revenue Code used in defining and determining certain State tax provisions from May 1, 2009, to May 1, 2010.[4] However, the act does not conform to the five-year carryback of net operating losses incurred by large businesses. This section of the act became effective when the Governor signed it into law on June 30, 2010. The estimated loss to the General Fund for fiscal year 2010-11 is $7.7 million.

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code by reference to the Code.[5] The General Assembly determines each year whether to update its reference to the Internal Revenue Code.[6] Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law tracks federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made.

This section conforms North Carolina income tax law to the Internal Revenue Code as of May 1, 2010.[7] This change allows North Carolina taxpayers to take advantage of two business tax benefits

---

[4] Recommended by the Revenue Laws Study Committee, SB 1183; HB 1829. House Finance removed the IRC Update provisions from HB 1829 and replaced them with various renewable energy incentives (See S.L. 2010-167).

[5] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[6] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

[7] The act incorporates tax changes made by five federal acts: the Worker, Homeownership, and Business Assistance Act (WHBA), P.L. 111-92; Acceleration of Income Tax Benefits for Haiti Relief, P.L. 111-126; the Patient Protection and Affordable Care Act, P.L. 111-148; the Health Care and Education Reconciliation Act, P.L. 111-152; and the Hiring Incentives to Restore Employment Act (HIRE), P.L. 111-147.

that are also available at the federal level and simplifies tax reporting because a taxpayer will not need to account for differing federal and State treatment of the same asset. The two benefits are:

> ***Increased expensing limits*** – It extends for one year the increased expensing limit under Section 179 of the Internal Revenue Code.[8] Section 179 allows the expensing of the purchase price of some business assets[9] in the year of purchase rather than taking depreciation[10] throughout the life of the asset. In other words, expensing trades a smaller yearly deduction over time for a larger deduction in year one. The cost of conforming to this change is approximately $1.2 million in fiscal year 2010-2011.
>
> ***Five-year carryback period for NOLs*** – It extends the five-year carryback period for NOLs established under the *American Recovery and Reinvestment Act of 2009* (ARRA), but it does not expand the scope of the relief beyond small businesses, which Congress provided for in the *Worker, Homeownership, and Business Assistance Act of 2009* (WHBA).
>
> In general, NOLs may be carried back and deducted against taxable income in the two tax years before the NOL year, and then carried forward and applied against taxable income for up to 20 years after the NOL year. Under the ARRA, eligible small businesses were allowed to carry back 2008 NOLs for three, four, or five years, instead of the normal two years. An eligible small business is a corporation or partnership with less than $15 million in gross receipts for the tax year in which the loss arose. As part of the WHBA, Congress not only extended this benefit for an additional year, but also expanded the scope of the benefit by removing the small business limitation. The current federal relief is applicable to any taxpayer with business losses, except those that received payments under the Troubled Asset Relief Program. The relief also applies to a loss from operations of a life insurance company.
>
> This section conforms to the one-year extension for small businesses only. Since North Carolina does not allow NOL for corporate taxpayers, conformity to this provision applies only to individual filers. The cost of conforming to this change is approximately $6.5 million in fiscal year 2010-2011.
>
> This section does not conform to the five-year carryback of NOL for other businesses. It requires these larger businesses to add back for purposes of determining their State taxable income any NOL deductions claimed on their federal returns for 2008 or 2009 losses. Then, for taxable years 2011 through 2013, the taxpayer may deduct from federal taxable income one-third of the NOL absorbed on the taxpayer's 2003, 2004, 2005, and 2006 federal returns.[11]

---

[8] The federal HIRE Act of 2010 extended the 2008 and 2009 expense limit of $250,000 with a phase-out at $800,000 for the 2010 tax year. Prior to the Emergency Economic Stabilization Act of 2008 (EESA), the deduction was limited to $128,000 of the cost of the property with a phase-out at $510,000. EESA temporarily increased the deduction limit and the phaseout through 2008. The American Recovery and Reinvestment Act of 2009 (ARRA) extended the temporary increase through 2009.

[9] The business asset must be newly purchased tangible personal property that is used more than 50% for business purposes and is eligible to be depreciated under the Code.

[10] Generally, taxpayers take the Section 179 expensing deduction first and claim Section 168(k) depreciation on any remaining basis.

[11] This provision, G.S. 105-134.6(d)(7) and (8), is similar to what the State did in the past when it decoupled from the federal accelerated depreciation provisions.

Conformity to the Internal Revenue Code also allows North Carolina taxpayers the following tax benefits:

> ***DOD Homeowner's Program.*** – Provides that payments made under the Department of Defense Homeowners Assistance Program to certain military and civilian employees in connection with base closures are excluded from taxable income.[12]
>
> ***Donation for Haiti Relief.*** –Provides a monetary donation to a qualified charitable organization for Haiti relief after January 11, 2010, and before March 1, 2010, may be claimed as a charitable deduction on the person's tax return for either 2009 or 2010.[13]

The *Patient Protection and Affordable Care Act*, as amended by the *Health Care and Education Reconciliation Act*, made the following changes to the tax law. This section conforms to these changes:

> ***Medical expense deduction.*** – Effective January 1, 2013, the threshold for unreimbursed medical expenses will increase from 7.5% to 10% of adjusted gross income. Individuals age 65 and older are temporarily exempt from the increase; it will apply to seniors effective January 1, 2017. Approximately 6% to 8% of North Carolina taxpayers claim the medical expense deduction on their income tax return.
>
> ***Flexible spending account limits.*** – Effective January 1, 2011, the definition of "qualified medical expenses" for purposes of Flexible Spending Accounts, Health Spending Accounts, and Health Reimbursement Accounts will be modified to conform to the definition of that term for purposes of the medical expense itemized deduction. This modification means that over-the-counter medicines will not be covered unless they are prescribed by a health care professional. Effective January 1, 2013, the amount a person may contribute to a Flexible Spending Account plan will be limited to $2,500, indexed annually after that year. There is no limit under current law, although some employers may limit the amount that may be set aside.
>
> ***Executive compensation***. – The *Patient Protection and Affordable Care Act* restricts high-level executive pay for insurance providers if the providers do not meet minimum acceptable coverage requirements. Effective January 1, 2011, if at least 25% of premium income does not meet these requirements, the insurer may not claim a deduction for the executive pay to the extent the remuneration exceeds $500,000.

<u>*Small Business Tax Relief.*</u>[14] – *Section 31.1A provides a refundable income tax credit to a small business equal to 25% of the amount it paid in unemployment insurance tax on wages paid to employees. This section of the act applies only to the 2010 and 2011 taxable years. The estimated loss to the General Fund for fiscal year 2010-11 is $34.1 million.*

Unemployment insurance (UI) tax is a tax on employer payrolls paid by employers and used to provide funds from which unemployment benefits are paid to qualified unemployed workers. The UI tax is not deducted from employee wages. The State UI tax rate[15] is determined annually based

---

[12] Part of the WHBA.

[13] P.L. 111-126.

[14] This provision replaces the other provisions proposed by the Senate and House for small business tax relief. The Senate proposed a top rate of 6.9% on small business income (Section 31.2 of SB 897, 3rd Edition) and the House proposed a small business job credit and an extension of the small business health insurance tax credit. (Sections 31.13 and 31.14 of SB 897, 6th Edition).

[15] Based on economic conditions, the rate may be as low as 0.0% or as high as 6.84%.

on the employer's experience rating.[16] The State UI tax revenues are credited to the State Unemployment Insurance Fund. The average State UI tax rate for all employers through the first half of 2010 was 1.7%.

This section allows a small business a refundable income tax credit equal to 25% of the UI tax paid during the taxable year with respect to wages paid for employment in this State. A small business is a business whose cumulative gross receipts from business activity for the taxable year do not exceed $1 million. Based upon statistics compiled by the Employment Security Commission, there are approximately 125,000 businesses in North Carolina[17] whose gross receipts are less than $1 million. These businesses employ more than 500,000 people. Most of these businesses have 10 or fewer employees. The average annual State UI tax per employee in North Carolina is $265.

The credit provided by this section lowers the cost of maintaining and adding jobs in North Carolina for the next two years. The credit amount is directly related to the amount the taxpayer spends on employment in this State. It does not distinguish between part-time and full-time jobs. Because the credit is based upon the amount of UI tax paid by the business, there is no need for reporting or clawback provisions.

Lower Sales Tax Compliance Burden on Small Retailers. – Section 31.3 decreases the number of retailers required to submit a pre-payment of 65% of the amount of sales tax revenue to be remitted for the following month by changing the threshold for this payment schedule from $10,000 to $15,000, effective October 1, 2010, and from $15,000 to $20,000, effective October 1, 2011.[18] *This change in the law does not change the amount of sales tax revenue remitted to the General Fund, but it does change by one month the timing of the payment for the year of the transition to the higher threshold. It reduces the amount of revenue received in fiscal year 2010-11 by $7 million and the amount received in fiscal year 2011-12 by $12 million.*

Retailers must remit sales tax payments to the State on one of three filing schedules:

> A retailer who is consistently liable for less than $100 a month in sales and use taxes must file a return and pay the taxes due on a quarterly basis.
>
> A retailer who is consistently liable for at least $100 but less than $10,000 a month must file a return and pay the taxes due on a monthly basis.
>
> A retailer who is consistently liable for at least $10,000 a month must make a monthly prepayment of the next month's tax liability. Prior to 2006, retailers in this category had to pay tax twice a month. At the request of several large retailers in the Streamlined Sales Tax Project, North Carolina adopted the once a month payment schedule.[19]

The threshold limit of $10,000 was enacted in 2001 as a means to accelerate the payment of sales and use tax dollars into the General Fund for fiscal year 2001-02.[20] Prior to this change, the threshold amount for making bimonthly payments was $20,000. Since 2001, the State and local

---

[16] The experience rating is affected by payroll, tax paid, timeliness of payments, and UI benefits charged against the employer's account.

[17] There are approximately 176,000 firms in North Carolina based on U.S. Census County Business Patterns.

[18] The provision first appeared in the Senate Budget, SB 897, 2nd Edition; it was also in HB 1829, 2nd Edition.

[19] Section 9 of S.L. 2006-33.

[20] The acceleration of sales tax payments in 2001 created a nonrecurring revenue gain of more than $40 million in FY01-02.

tax rate has increased from 6.5% to 7.75%.[21] The lowering of the threshold amount as well as the increase in the tax rate has subjected more retailers to the most extensive sales tax remittance requirements. Some of the small retailers in this category, especially those whose sales are not consistent from month to month, have expressed a cash flow hardship with the pre-payment requirement.

This section restores the sales tax filing thresholds to their pre-2001 level of $20,000 over a two-year period. By increasing the threshold from $10,000 to $15,000, the act relieves 2,133 retailers from the pre-payment requirement. These retailers will continue to file a monthly return and pay the sales tax due on a monthly basis. The increase of the threshold from $15,000 to $20,000 will relieve an additional 1,000 plus retailers from the pre-payment requirement.

Relieve Annual Report Compliance Burden on Small Business. – Section 31.4 stipulates that the first annual report of a LLC is due April 15 following its year of organization. The section became effective when the Governor signed it into law on June 30, 2010. The estimated loss to the General Fund for fiscal year 2010-11 is $400,000.

In March 2009, the Secretary of State's Office mailed 270,000 notices to businesses stating they were late in filing their annual reports. Failure to file an annual report is grounds for administrative dissolution for both business corporations and LLCs. The Secretary of State found that many businesses thought their first annual reports were due the year after their formation.[22] The Secretary of State informed the businesses that the first annual report is due on April 15th, regardless of when the business is formed. Under this interpretation, a LLC that filed its articles of organization on April 10th and paid the $125 filing fee would also have to file an annual report five days later along with a $200 annual report filing fee. The Revenue Laws Study Committee considered the issue at the request of many CPAs.

This section does three things to address the areas of concern:[23]

> It conforms the due date for filing annual reports to the due date for filing corporate income tax returns. In 1997, at the recommendation of the General Statutes Commission, the General Assembly set the due date for corporate annual reports at the due date for filing tax returns.[24] The change was designed to make the filing of annual reports easier by establishing a more familiar deadline and allowing the corporation to file the report with its tax return to the Department of Revenue. In 2007, the General Assembly changed the date a corporate tax return is due to be filed from the 15th day of the third month following the close of the corporation's fiscal year to the 15th day of the fourth month.[25] However, a conforming change was not made to the annual report filing statute. The lack of uniformity has caused confusion. Subsection (a) makes the necessary conforming change.
>
> It provides that the first annual report required to be filed by a LLC is due by April 15th of the year *following* the calendar year in which the company files its articles of organization.

---

[21] In some counties, the combined State and local sales tax rate is 8%.

[22] Prior to the enactment of S.L. 2007-475, annual reports were filed on the anniversary of the business' incorporation. In an attempt to make the filing of the report easier, S.L. 2007-475 provided that a business would file its report with its income tax return to the Department of Revenue.

[23] The Revenue Laws Study Committee recommended this provision as part of SB 1177 and HB 1810. The Senate included it in its version of the budget, SB 897, 3rd Edition, and the House included it in HB 1829, 2nd Edition.

[24] Section 6.1 of S.L. 1997-475.

[25] Section 14 of S.L. 2007-491.

The section makes this change retroactively by stipulating in the effective date subsection that a LLC whose articles of organization were filed on or after January 1, 2010, but before April 15, 2010, is not required to file an annual report until April 15, 2011. Likewise, it provides that a LLC that was formed before January 1, 2001, and has filed an annual report for each year after the calendar year in which its articles of organization were filed, is considered to have met its annual report filing requirements.

It provides that the annual report must specify the year to which the report applies. The practice of the Secretary of State's Office is to credit an annual report that it receives to the oldest year in which an annual report is due and owing.

Extend Sunset on Expiring Tax Incentive Income Tax Credits and Sales Tax Refunds. – Section 31.5 extends the sunset on four incentive provisions.

This section extends the sunset on the following four incentive provisions:

Tax Credit for Mill Rehabilitation. – Extends the sunset of the credit for rehabilitating vacant historic manufacturing sites from January 1, 2011, to January 1, 2014.[26] The credit was established in 2006 and was last extended in 2008.[27] To be eligible for the credit, a taxpayer must spend at least $3 million to rehabilitate a historic, vacant, former manufacturing facility. The amount of the credit depends upon the development tier in which the site is located and the eligibility of the site for a federal credit.

Tax Credit for Qualified Business Ventures. – Extends the sunset of the credit for investments in qualified business ventures from January 1, 2011, to January 1, 2013.[28] The credit was last extended in 2007. The purpose of the credit is to stimulate early stage investments that help move new technologies from universities and other research laboratories to commercialization. The qualified business investment tax credit is allowed for an individual taxpayer who invests in a qualifying small business. Qualifying small businesses include a business that engages primarily in manufacturing, processing, warehousing, wholesaling, research and development, or a service-related industry, a business that has received within the preceding three years funding from a federal agency under the Small Business Innovation Research Programs, or a business that has been certified by a research university as currently performing under a licensing agreement with the institution for commercializing technology developed at the institution. The credit is equal to 25% of the amount invested and may not exceed $50,000 per individual in a single taxable year. The total amount of tax credits allowed to taxpayers for investments made in a calendar year may not exceed $7.5 million. If the total amount of tax credits claimed exceeds this maximum amount, the credit is allocated proportionately among the taxpayers.

[26] The Senate budget, SB 897, 3rd Edition, would have extended the sunset to 2012. HB 1829, 2nd Edition, would have extended the sunset to 2014.

[27] Section 28.4 of S.L. 2008-107 clarified the applicability of the credit by specifying that the credit would be allowed so long as an application for an eligibility certification is submitted before the sunset date.

[28] The Senate budget, SB 897, 3rd Edition, would have extended the sunset to 2012. The House budget, S897, 6th Edition, would have extended the sunset to 2013 and expanded the annual cap from $7.5 million to $8 million. The Governor's budget also recommended expanding the cap to $8 million. The act does not expand the cap.

Sales Tax Refund for Passenger Air Carriers. – Extends the sunset of the sales tax refund allowed to an interstate passenger air carrier from January 1, 2011, to January 1, 2013.[29] The sunset was last extended in 2008. In 2005, the General Assembly allowed an annual tax refund to an interstate passenger air carrier for the net amount of sales and use tax paid by it on fuel during a calendar year in excess of $2,500,000. The "net amount of sales and use taxes paid" is the amount of sales tax paid by the interstate passenger air carrier less the refund of that tax allowed to all interstate carriers under subsection (a) of G.S. 105-164.14. The refund for which the sunset provision is being extended is in addition to the refund allowed under G.S. 105-164.14(a).

Sales Tax Refund for Motorsports Aviation Fuel. – Extends the sunset of the sales tax refund allowed to a professional motorsports racing team or a motorsports sanctioning body from January 1, 2011, to January 1, 2013.[30] The sunset was last extended in 2008. The General Assembly enacted the annual refund provision in 2005. The amount of the refund is equal to the amount of sales and use tax paid on aviation fuel used to travel to or from a motorsports event in this State, from this State to a motorsports event in another State, or to this State from a motorsports event in another State. For the purposes of the refund, a 'motorsports event' includes a motorsports race, a motorsports sponsor event, and motorsports testing.

Modernize Sales Tax on Accommodations.[31] *– Section 31.6 establishes new sales and use tax and local occupancy tax reporting and remittance obligations on a "facilitator," which is a person who enters into a contract with a provider of transient accommodations to market and collect payment for the rental of accommodations. A facilitator would include an online travel company but not a rental agent. This section becomes effective January 1, 2011, and applies to gross receipts derived from the rental of an accommodation that a consumer occupies or has the right to occupy on or after that date.*[32] *The estimated fiscal impact of this section is a General Fund gain of $1.7 million in fiscal year 2010-11 and $4.9 million in fiscal year 2011-12.*

Gross receipts derived from the rental of transient accommodations are subject to State and local sales tax at the general rate, which is currently 7.75% in most counties. Over 70 counties and over 85 cities also levy an occupancy tax on accommodations, with rates ranging from 1% to 6%. Neither the sales tax nor the occupancy tax applies to a private residence or cottage rented for less than 15 days in a calendar year or to any lodging supplied to the same person for 90 or more continuous days.

Deemed "retailers" under the Sales Tax Article, operators of hotels, motels, tourist homes, tourist camps, and similar type businesses and persons who rent private residences and cottages to transients are required to collect and remit the tax due. This includes rental agents or real estate brokers who rent private residences or cottages to transients on behalf of the owners. However, under the plain language of the statute, online travel companies (OTCs) that list available rooms

---

[29] The Senate budget, SB 897, 3rd Edition, would have extended the sunset to 2012. HB 1973, 2nd Edition, would have extended the sunset to 2014.

[30] The Senate budget, SB 897, 3rd Edition, would have extended the sunset to 2012. HB 1973, 2nd Edition, would have extended the sunset to 2014.

[31] This provision was a recommendation of the Revenue Laws Study Committee and was included in the Senate budget, SB 897, 3rd Edition.

[32] Based on this language, tax would be owed on the total amount charged by an OTC for a person who made a reservation prior to January 1, 2011, but did not occupy the accommodation until after January 1, 2011.

and collect payment for the rental of those rooms are not retailers required to collect State and local sales and use tax or local occupancy tax on accommodations because they are not "operators" of those accommodations. This interpretation was the holding in the Fourth Circuit case of *Pitt County v. Hotels.com*.[33]

Generally speaking, a person who wishes to make a reservation for an accommodation may contact the accommodation directly, use the services of a commissioned travel agent, or make reservations through an OTC, such as Expedia or Travelocity. OTCs contract with accommodation providers for the right to facilitate or market the reservation of the provider's rooms through the OTC's website. By virtue of their contract with the hotels, the OTCs have no ownership interest or legal right to the rooms, nor do they bear any risk of loss if rooms are not booked through their site. Under the contract, the OTC agrees to pay the provider a discounted room rate and then adds a "facilitation fee" or other similarly-named charge to the discounted room rate and also collects an amount that reflects anticipated taxes plus a nominal service or processing fee. Typically, the facilitation fee is not disclosed to the customer or to the provider, and the amount collected for taxes and fees is not itemized.

With regard to payment, a consumer who books with the provider directly or uses a travel agent typically provides the hotel or agent with a credit card number to guarantee the reservation and then pays the hotel directly at the time of check-out. A consumer who books through an OTC pays up front and prior to occupancy. This business model is known as the "merchant model" or the "prepaid model." Under this model, once the customer occupies the room, the provider bills the OTC for the discounted room rate plus State and local sales tax and occupancy tax, if applicable, based on that rate. Since the provider does not know the final room rate paid by the consumer, it cannot collect sales and occupancy tax based on that amount.

There is little debate that OTCs are required to remit sales and occupancy taxes to a provider of accommodations based on the discounted room rate that they have negotiated. The central issue that has garnered national attention in this industry over the last several years is to what extent OTCs may be required to collect sales tax and occupancy tax based on the marked-up rate that they ultimately charge consumers, which includes their service fees. The Revenue Laws Study Committee studied this issue during the interim prior to the 2010 Regular Session and recommended legislation requiring OTCs to collect and remit sales and occupancy tax on the sales price charged to the consumer. Section 31.6 of this act is a modified version of that initial recommendation.

Section 31.6 does the following:

> ***Definitions.*** – It creates definitions for the terms "accommodation" and "facilitator." An accommodation is defined as a hotel room, a motel room, a residence, a cottage, or a similar lodging facility for occupancy by an individual. A facilitator is defined as a person who is not a rental agent and who contracts with a provider of an accommodation to market the accommodation and to accept payment from the consumer for the accommodation.
>
> ***Gross Receipts Include "Sales Price."*** – It provides that the gross receipts derived from the rental of accommodations include the *sales price* of the rental. "Sales price" is currently

[33] The *Pitt County* case dealt only with the collection and remittance of local occupancy tax, but since the collection of local occupancy tax is tied to the collection of sales tax, the fact that OTCs are not required to collect State and local sales and use tax is consistent with, though not at issue, in that case.

defined as the total amount or consideration for which tangible personal property, digital property, or services are sold, leased, or rented, and it includes the retailer's costs as well as charges for any services necessary to complete the sale. This section provides that the sales price of the rental of an accommodation is determined as if the rental were the rental of tangible personal property. In addition, since the definition of sales price includes charges for any services necessary to complete the sale, the sales price of an accommodation rented through an OTC would include the OTC's facilitation fees and any other fee it collects. The rationale for incorporating the term "sales price" is to capture the total cost paid by the consumer for an accommodation regardless of whether it is paid to a hotel directly or to a third party that charges facilitation or other service fees in addition to the room rate.

Notice by Retailer. – It requires a retailer, who, in this case, is the provider of an accommodation, to notify a facilitator with whom it has a contract when an accommodation marketed by the facilitator is completed.

OTC to Report and Remit Within Three Days. – Within three business days of being notified of a completed rental, a facilitator is required to report to the retailer the sales price charged to the consumer and to send the portion of the sales price owed to the retailer and the sales and local occupancy tax due. The retailer is required to remit the sales tax payments received from a facilitator to the Department of Revenue and to remit local occupancy tax payments to the appropriate local tax collecting body, just as the retailer is required to do under current law with respect to the tax owed on the discounted room rate.

Liability. – A facilitator that does not send the tax due on the sales price is liable for the amount of tax the facilitator fails to send, but is not liable for tax sent but not remitted by the retailer. A retailer is not liable for tax due but not received from a facilitator.

Terms of Contract. – The requirements of this section are considered to be terms of the contract between a retailer and a facilitator.

Sourcing. – It codifies the current practice with regard to sourcing transactions for the rental of transient accommodations by stating that they are sourced to the location of the accommodation.

Local Occupancy Tax. – It makes conforming changes to the statute that sets out the uniform provisions for occupancy taxes. In doing so, it imposes the same responsibility and liability on a facilitator with regard to occupancy tax as the facilitator would have for State sales tax on accommodations. It also makes clear that the room occupancy tax applies to the same gross receipts and is calculated in the same manner as the State sales tax on accommodations.

Modernize Admissions Tax and Restore Amenities Exclusion.[34] *– Section 31.7 extends the admissions tax to the Internet resale of tickets by a person engaged in the business of reselling. This provision is effective January 1, 2011, and applies to admission tickets sold on or after that date. This section also restores the Department of Revenue's pre-2009 interpretation of the admissions tax statute to exclude from tax charges for amenities that are*

[34] This provision was a recommendation of the Revenue Laws Study Committee and was included in the Senate budget, SB 897, 3rd Edition.

bundled with a ticket purchase. This provision is effective for charges for admission received on or after August 1, 2010. The estimated fiscal impact of this section is a recurring annual loss of $700,000.

Modernize Admissions Tax. – North Carolina imposes a 3% privilege tax on the gross receipts of a person who offers or manages any of the following taxable amusements:

A dance or athletic contest for which admission fee in excess of 50¢ is charged.

Amusement or entertainment for which an admission is charged.

A performance, show, or exhibition, such as a circus or dog show.

G.S. 14-344 limits the total amount a seller or reseller of an admission ticket may charge to "…the combined face value of the ticket, tax and the authorized service fee." The service fee may not exceed $3.00 unless the promoter of the event and the ticket sales agency agree in writing to a different amount and that amount is made known to the public in writing. A violation of this section is punishable as a Class 2 misdemeanor.

In 2008, as part of S.L. 2008-158 (Senate Bill 1407), the General Assembly enacted G.S. 14-344.1. This statute authorizes a person to resell an admission ticket on the Internet with no cap on price unless the resale is prohibited by the venue. A person who resells an admission ticket under this statute is required to provide a ticket guarantee that must be conspicuously displayed on the person's Website and to direct a prospective purchaser to the ticket guarantee before completion of the resale transaction. The guarantee must provide that a purchaser will be given a full refund if any of the following occurs:

The event is cancelled.

The purchaser is denied admission other than due to an act or omission by the purchaser.

The ticket is not delivered as promised resulting in purchaser's inability to attend event.

Under current law, ticket resales are not subject to the admissions tax because the secondary seller is not "giving, offering, managing, or exhibiting" the amusement. The reseller does not fall within the scope of the statute. As a compromise agreement in 2008, the General Assembly required Internet ticket resellers to report their gross receipts for North Carolina events to the Department of Revenue on a monthly basis. Since August 2008, there have been 65 reports, reflecting 17 reporting entities.

Section 31.7 modernizes the tax on admissions as follows:

It extends the 3% admissions tax to the gross receipts of a person who is engaged in the business of reselling tickets under G.S. 14-344.1. The gross receipts exclude the price printed on the face of the ticket. Thus, the tax is imposed on the difference between the price sold and the face value of the ticket. If the price is not printed on the ticket, the tax applies to the difference between the amount the reseller paid for the ticket and the amount the reseller charges for the ticket.[35] This provision modernizes the admissions tax by recognizing the current business model for the sale and resale of tickets, which did not exist at the time the admissions tax was originally enacted in the 1930s. It also equalizes the admissions tax by treating the markup in a resale transaction the same as the face value price in the first sale.

---

[35] This same tax provision passed the Senate when S.L. 2008-158 was being considered during the 2008 Regular Session, but it was removed when the bill was considered in the House Finance Committee.

It makes the collection and remittance of the admissions tax on ticket resales a condition of reselling tickets on the Internet. Under current law, there are only two conditions. First, a person may resell tickets on the Internet if the venue has not prohibited the resale by filing a notice with the Secretary of State. Second, the ticket reseller must also provide the purchaser with a guarantee assuring the legitimacy of the ticket and offering a refund in the event the purchaser is denied access to the event through no fault of the purchaser.

It repeals the reporting requirement. The reporting requirement was added to S.L. 2008-158 when the tax provision was removed. That act originally included a sunset, which required the General Assembly to revisit the legislation. At the time, the rationale for the reporting requirement was to provide the General Assembly with data for when it reconsidered the legislation. Now, by taxing these transactions, there is no need for a reporting requirement.

It provides for the repeal of G.S. 14-344.1 if a court finds that the privilege tax violates the Internet Tax Freedom Act (ITFA) or is otherwise found to be invalid. ITFA temporarily prohibits states from imposing multiple or discriminatory taxes on electronic commerce. A discriminatory tax is one that is not generally imposed and legally collectible on transactions involving similar property, goods, services or information accomplished through other means. Arguments have been raised as to whether this legislation might violate ITFA because it taxes only those ticket resales that occur on the Internet. However, face-to-face ticket resales for greater than face value are generally illegal in North Carolina. As such, a counter argument may be made that Internet ticket resales are, in fact, given preferential treatment to the extent they are authorized, with no cap, whereas face-to-face ticket resales are essentially prohibited. A similar transaction cannot be conducted by a means other than the Internet. However, since the issue has been raised, the section provides that if a court finds that the privilege tax violates ITFA, then the authority to resell tickets on the Internet is repealed.

It prohibits cities or counties from imposing a privilege license tax on Internet ticket resellers.

This part of the section becomes effective January 1, 2011, and applies to admission tickets sold on or after that date.

Restore Amenities Exclusion. – Entertainment venues frequently offer their patrons certain amenities in conjunction with the sale of admission tickets to performances of live entertainment. Those amenities may include parking privileges, preferential or more luxurious seating, access to special concession stands, access to luxury viewing suites, and access to concierge staff. In some cases, the venue will separately state the "seat price" on the face of a ticket with charges over and above that price reflecting the cost of the amenities. In other cases, a purchaser may buy a package or contract for the lease of a suite where the price includes a seat for an event as well as amenities, but the charges are not separately stated.

The current admissions tax statute does not specifically address how these amenities are to be taxed. In 1994, a taxpayer requested a written opinion from the Department of Revenue as to whether the admissions tax applied to amenities, and the Department responded that amenities were excludable from the tax. This interpretation was in place for over 15 years, and during that time, the statute did not change in any substantive way. However, on January 30, 2009, the Department issued a directive, effective the following day, stating that amenities are subject to the admissions tax. Specifically, the directive reads:

"Gross receipts are taxes computed on the admission price of the amusement. An admission price is the price paid to enter an event. Effective for tickets for admission sold on or after February 1, 2009, the gross receipts tax is due on the price paid by the customer for admission into an event regardless of whether that price just covers the seat price or also includes amenities."

The Revenue Laws Study Committee considered this issue during the 2009-2010 interim given that it is a matter of tax policy on which the statute is silent and because the Department reversed its longstanding interpretation of the statute despite the fact that the statute has remained the same. The Committee concluded that the decision of whether amenities should be subject to the admissions tax is one for the Legislature and should not be determined by an interpretive ruling.

Subsection (a) of this section restores the Department's pre-2009 interpretation of the admissions tax statute by excluding amenities from the tax. If the charges for the amenities are not separately stated on the face of the ticket, then the charge for admission would be equal to the charge for a ticket to the same event that does not include amenities and that is for a seat located directly in front of or closest to a seat that includes amenities. This provision became effective for charges for admission received on or after August 1, 2010.

Give Taxpayers Notice of Revised Tax Interpretations.[36] *– Section 31.7A requires the Department of Revenue to provide ample notice to taxpayers when it issues an interpretation that revises a prior interpretation by expanding the scope of a tax or otherwise increasing the amount of tax due. This provision became effective when the Governor signed the act into law on June 30, 2010.*

G.S. 105-264 provides that it is the duty of the Secretary of Revenue to interpret all laws administered by the Department. When the Secretary interprets a law by adopting a rule or publishing a bulletin or directive, the interpretation is a protection to the officers and taxpayers affected by the interpretation, and taxpayers are entitled to rely upon the interpretation. The Secretary is permitted to change an interpretation, and that change may apply on and after the effective date of the change, but there is no statutory requirement that the Department provide a certain amount of notice to taxpayers prior to applying a revised interpretation.

In the course of considering whether amenities associated with ticket sales should be subject to tax, the Revenue Laws Study Committee learned that the Department reversed its position on the taxability of amenities with one-day's notice to taxpayers. The Committee was persuaded that G.S. 105-264 should be amended to require some level of notice prior to the Department changing the interpretation of a tax law that expands the scope of a tax. Therefore, this provision requires the Department to provide notice to taxpayers if it revises a prior interpretation by expanding the scope of a tax or otherwise increasing the amount of tax due. Under this section, a revised interpretation would not become effective until the sooner of the following:

For a tax that is payable on a monthly or quarterly basis, the first day of a month that is at least 90 days after the date the revised interpretation is issued.

For a tax that is payable on an annual basis, the first day of a tax year that begins after the date the revised interpretation is issued.

---

[36] This provision was a recommendation of the Revenue Laws Study Committee and was included in the Senate budget, SB 897, 3rd Edition.

Improve Tax and Debt Collection Process.[37] *Section 31.8 improves the tax and debt collection process of the Department of Revenue by:*

> *Expanding the use of the Setoff Debt Collection Act to allow the following: debts owed by a business to be set off against a tax refund due the business, a setoff against any type of tax refund, and a community college to submit for setoff debts owed the college.*
>
> *Authorizing the use of electronic process for sending notice of garnishment.*
>
> *Providing for a data match between the Department of Revenue and financial institutions holding accounts of delinquent taxpayers.*
>
> *Expanding the Statewide Accounts Receivable Program to allow for collection of the following accounts receivable by setoff against payments the State owes to individuals and businesses: accounts receivable that are submitted to the Department of Revenue under the Setoff Debt Collection Act and overdue tax debts.*

These improvements to the tax and debt collection process were initially recommended to the Revenue Laws Study Committee by the Department of Revenue, developed in collaboration with the Office of State Controller and the North Carolina Bankers Association. [38] *Unless otherwise stated, section 31.8 became effective when the Governor signed the act into law on June 30, 2010.*

The improvements are expected to increase revenue by $3 million for each fiscal year beginning in fiscal year 2010-2011.

Expansion of Setoff Debt Collection Act. – The Setoff Debt Collection Act, enacted in 1997, authorizes the Department of Revenue to set off an individual's income tax refund against a debt the individual owes a State agency or local agency.[39] Under the Act, a claimant agency sends the Department notice of the debt and the Department immediately sets off the debt against the tax refund and notifies the taxpayer and the claimant agency.

Subsections (d) through (g) of this section expand the Setoff Debt Collection Act to allow community colleges to collect debts owed to them through setoff of tax refunds and to allow debts that a business owes a claimant agency to be set off against the entity's tax refund. Previously, the Act only allowed debts owed to claimant agencies by individuals to be set off against the individual's income tax refund. The act also expands the Setoff Debt Collection Act to apply to any type of tax refund, not just income tax refunds.

Notice of Garnishment by Electronic Process. – The Department of Revenue is authorized by statute to attach and garnish intangible property in payment of taxes owed to the Department. The kinds of property that are subject to attachment and garnishment are wages and salaries, rents, bank deposits, the proceeds of property subject to levy, and property in the Escheat Fund. When the property sought to be attached is the taxpayer's checking account, the garnishee is the bank. When the property is wages, the taxpayer's employer is the garnishee. No more than 10% of a

---

[37] The Revenue Laws Study Committee recommended this provision in SB 1188 and HB 1881. The provision also appeared in HB 1829 2nd Edition.

[38] See a synopsis of this legislation at the following School of Government website: http://sogweb.sog.unc.edu/blogs/localgovt/?m=201007

[39] State agency includes a unit of the executive, legislative, or judicial branch of State government and a local agency to the extent it administers a program supervised by the Department of Health and Human Services. A local agency includes a county, municipality, water and sewer authority, regional joint agency created by interlocal agreement, public health authority, metropolitan sewerage district, or sanitary district.

taxpayer's wages or salary per month is subject to attachment and garnishment. Current law requires that the notice of garnishment must be delivered in person or by mail.

Subsection (i) of this section authorizes electronic notice, if the garnishee agrees to this method and the Department and garnishee have an agreement that establishes the protocol for electronic notice. The act also streamlines the process if the garnishee is a financial institution by reducing the time period for filing a response to the notice of garnishment from 30 days to 20 days and by releasing the notice of garnishment when the institution complies with the notice. All other garnishees will continue to receive a notice of release. Streamlining is consistent with the current garnishment practice with banks wherein the Department faxes notice of garnishment to a bank and the bank then sends money in the account to the Department within 10 to 15 days.

A "financial institution" is defined as a banking corporation, trust company, savings and loan association, credit union, or other entity principally engaged in the business of lending money or receiving or soliciting money on deposit.[40]

Data Match between Financial Institutions and the Department of Revenue. – Subsection (h) of this section becomes effective January 1, 2011, and will further streamline the attachment and garnishment process by providing for a data match between financial institutions and the Department of Revenue. The Department will be authorized to submit information to a financial institution on a quarterly basis, or with the agreement of the financial institution, more frequently. The information will identify any delinquent taxpayer to a financial institution and require the financial institution to notify the Department of the amount the institution may hold that belongs to the taxpayer. The Department will reimburse the financial institution for the cost of providing the information. The cost may not exceed the amount that the Department of Health and Human Services currently pays to financial institutions for conducting a data match in order to attach and garnish the account of an absent noncustodial parent.[41]

The federal government has issued a proposed rule to implement statutory restrictions on the garnishment of federal benefit payments.[42] These payments are protected under federal law from garnishment and include Social Security benefits, Supplemental Security Income benefits, and VA benefits. The rule sets forth uniform procedures for financial institutions to follow in order to minimize the hardships encountered by federal benefit payment recipients whose accounts are frozen pursuant to a garnishment order. The rule also assists financial institutions to determine whether exempt funds were directly deposited to the account.

Expansion of Statewide Accounts Receivable. – The Statewide Accounts Receivable Program, enacted in 1993, requires the State Controller to monitor accounts receivable owed to State agencies, to adopt procedures for the management and collection of accounts receivable, and to establish procedures for writing off accounts receivable.[43] The Program also provides for written-off accounts receivable to be set off against payments the State owes to debtors. A

---

[40] G.S. 53B-2.

[41] The DHHS and financial institutions have developed a data match system that requires a financial institution to provide DHHS the following information on a quarterly basis in order to secure child support: name, SSN, address, telephone number, account numbers, and other identifying data for any person who maintains an account at the financial institution.

[42] Garnishment of Accounts Containing Federal Benefit Payments 75 Fed. Reg. 20299 (April 19. 2010).

[43] An account receivable is an asset of the State reflecting a debt owed to the State. The term includes claims, damages, fees, fines, forfeitures, loans, overpayments, and tuition as well as penalties, interest and other costs authorized by law. The term does not include court costs or fees.

written-off accounts receivable is one that has been removed from a State agency's accounts receivable records.

Subsections (a) through (c) of this section expand the Statewide Accounts Receivable Program as follows:

Expand the definition of "accounts receivable" to include taxes.

Allow debts that have been submitted to the Department of Revenue under the Setoff Debt Collection Act to be set off against payments the State owes to these debtors. The following is an example of how this improvement will work. The Department of Revenue will give the State Controller a list of debtors under the Setoff Debt Collection Act. The State Controller will then check to see if any of these debtors are vendors that are owed money by the State for services or goods received by the State. The State Controller will then deduct the amount of the debt from the amount owed by the State. The State Controller will send this amount to the claimant agency owed the debt.

Reduce Franchise Tax Burden on Construction Companies.[44] *– Section 31.9 applies the provision enacted last session excluding from a corporation's franchise tax base all billings in excess of costs retroactively to taxable years beginning on or after January 1, 2007.*

The State imposes a franchise tax on C-corporations and S-corporations. The tax rate is $1.50 per $1,000[45] and is applied to a company's capital stock, surplus, and undivided profits.[46] The term "surplus" for franchise tax purposes has a broader and more inclusive meaning than the generally accepted accounting definition. G.S. 105-122(b) provides that surplus and undivided profits include all liabilities, reserves, and deferred credits unless those items are specifically exempt. One of the exemptions from surplus and undivided profits is "definite and accrued legal liabilities." The Department of Revenue defines a definite and accrued legal liability as one that meets both of the following conditions:

The liability is definite in amount, meaning it is exactly determined and not merely accurately estimated.

The liability will be incurred before the end of the taxable year.

Generally accepted accounting principles require that revenue be recorded in the period it is earned regardless of when it is billed or when cash is received. In long-term construction contracts, there is often a mismatch between actual billed revenue and earned revenue. Sometimes elements of a contract are billed in advance and sometimes they are delayed. The accounting solution to this problem is the percentage of completion method of revenue recognition. Under this method of accounting, where the costs can be reasonably estimated, revenue is recognized as production takes place. This method of accounting may result in "billings in excess of costs" or "cost in excess of billings." Billings in excess of costs is a balance sheet liability because it represents unearned income. Cost in excess of billings is a balance sheet asset. For purposes of the State's franchise tax, the balance sheet liability of "billings in excess of costs" is not considered a definite and accrued legal liability because it is based on estimates; therefore, it is included in a corporation's capital base.

---

[44] This provision was included in the Senate budget, SB 897, 3rd Edition.

[45] The minimum tax is $35.

[46] A corporation's capital base may not be less than 55% of the appraised value of tangible property in NC, or less than its actual investment in tangible property in the State.

The construction industry sought to change this interpretation because it resulted in contractors having to pay taxes on liabilities and for revenue they had not actually received. S.L. 2009-422 adopted the industry's position by providing billings in excess of costs that are determinable using the percentage of completion principles are exempted from surplus and divided profits, and therefore, excluded from the franchise tax base. The act became effective for taxable years beginning on or after January 1, 2010.

The Department of Revenue audited some companies and assessed additional tax on them for taxable years prior to 2010 for excluding billings in excess of costs from their capital base. This section applies the 2009 law change retroactively to 2007. It also allows a taxpayer that paid franchise tax in taxable years 2007, 2008, or 2009 and that included billings in excess of costs in its capital base to apply to the Department for a refund of any excess tax paid to the extent the refund is the result of the retroactive application of the billings in excess law change. A request for a refund must be made on or before January 1, 2011. A request for a refund received after that date is barred.

Fair Tax Penalties. – Section 31.10 provides that a penalty for understatement of tax due does not apply to a taxpayer who complies with the Secretary of Revenue's request and files a consolidated or combined return and that a failure to pay penalty does not apply to a taxpayer who has requested a hearing on the tax liability used as the basis for the penalty. It requires a corporation to file a consolidated or combined return when the corporation's facts and circumstances meet those described in a permanent rule adopted by the Department of Revenue or when they meet those described in a letter of written advice provided by the Secretary to the corporation at the request of the corporation.[47] This section became effective when the Governor signed it into law on June 30, 2010. This section does not impact the General Fund.

North Carolina is a single entity filing state, meaning that a multistate corporation must determine its State net income as if it filed a separate return for federal income tax purposes. G.S. 105-130.14 prohibits a corporation from filing a consolidated or combined return in North Carolina unless specifically directed to do so by the Secretary of Revenue. Under G.S. 105-130.6, the Secretary can require a corporation to file a combined return with other parent, subsidiary, or affiliated corporations when the Department believes the corporation's net income attributable to this State is not accurately reflected on its separate entity filing return.[48] G.S. 105-130.6 states that a corporation has 60 days to file a combined return after being directed to do so by the Secretary before the corporation is subject to penalties under G.S. 105-236. The penalties under G.S. 105-236 include a failure to file penalty of 5% to 25%, a failure to pay penalty of 10%, a negligence penalty of 10%, and a large understatement penalty of 25%. It appears the Department's penalty practice when it requires combined returns is as follows:

Action	Failure to File Penalty 105-236(a)(3)	Failure to Pay Penalty 105-236(a)(4)	Large Deficiency/ Negligence Penalty 105-236(a)(5)
Return filed within time requested and payment made	No	No	Yes

[47] This provision was included in the Senate budget, SB 897, 3rd Edition, and in SB 1172.

[48] The Department of Revenue has collected millions of dollars in taxes from forced combinations. The Department generated $424 million through Resolution Initiative in 2009. The Current Operations and Capital Improvements Appropriations Act of 2010 includes $110 million in its adjustments to availability attributable to 'Department of Revenue Settlement Initiative'.

Return filed within time requested but no payment with return because hearing requested	No	Yes	Yes
Return not filed within time requested but hearing requested	Yes	Yes	Yes

This section clarifies the circumstances under which a corporation may be required to file a consolidated or combined return and the applicability of the penalties to those returns. It also provides that a failure to pay penalty does not apply to a taxpayer who has requested a hearing on the tax liability used as the basis for the penalty.

Subsection (d) of this section allows the Secretary to adopt rules that describe facts and circumstances under which the Secretary would require a corporation to file a consolidated or combined return. This provision does not limit the Secretary's authority under G.S. 105-130.6 to require a corporation to file a consolidated or combined return when the Secretary finds as a fact that a single entity report does not disclose the true earnings of a corporation on its business carried on in this State. Subsection (f) of this section provides expedited notice and hearing procedures for the Department to follow when adopting these rules.[49] The expedited notice and hearing procedures mirror those required of the State Ethics Commission.

Subsection (e) of this section creates two new exceptions to the general rule requiring a corporation to file a single entity return. Under prior law, a corporation could not file a consolidated or combined return unless the Secretary required the corporation to do so in writing. This subsection requires a corporation to file a consolidated or combined return in the following circumstances:

> The corporation's facts and circumstances meet the facts and circumstances described in a permanent rule adopted by the Department.
>
> Pursuant to a written request from the corporation, the Secretary has provided written advice to the corporation stating that the Secretary will require a consolidated or combined return under the facts and circumstances set out in the request.

Subsection (b) of this section affects taxpayers that file a combined return at the written direction of the Secretary, under a permanent rule adopted by the Department, or pursuant to written advice the taxpayer receives from the Secretary at the request of the taxpayer. It provides that the difference between the taxes due on a combined return filed under one of these circumstances, as compared to the taxes due on a single entity return, is not considered a deficiency and is not subject to the negligence or understatement penalties under G.S. 105-236(a)(5). Previously, these penalties were being assessed even though the taxpayer could not lawfully file the combined return without receiving the request from the Secretary.

Subsection (a) of this section makes it clear that a taxpayer who disputes the amount of tax owed and requests a hearing on the issue is not subject to a penalty for failure to pay the disputed tax before the hearing is held. As set out in this subsection, a taxpayer who requests a hearing has 45

[49] As a general rule, the Department of Revenue is exempt from notice and hearing requirements under Chapter 150B of the North Carolina General Statutes.

days after the conclusion of the administrative process to pay any amount that is determined to be due without incurring a failure to pay penalty. If the amount is not paid within the 45-day period, the penalty applies. This change is consistent with the tax appeal provisions contained in G.S. 105-241.9 through G.S. 105-241.16, which provide that a taxpayer does not need to pay the tax due when an assessment is made against the taxpayer in order to have a hearing on the merits of the taxpayer's defense to the assessment before an independent hearing officer.

Subsections (a) and (b) of this section apply to penalties that are assessed and unpaid as of the effective date, except penalties and taxes that are the subject of pending litigation in a General Court of Justice as of the effective date, and to penalties and taxes assessed on or after that date.

Subsection (c) of this section is a technical change that makes it clear that the filing of a combined return at the request of the Secretary does not trigger the automatic collection of the tax. G.S. 105-241.22(1) is intended to apply when a taxpayer files an original or amended individual income tax return that shows an amount due but does not include payment.

Subsection (g) specifically states that the changes made by this section should not be construed to affect the interpretation of any statute that is the subject of litigation pending as of the effective date of this act in the General Court of Justice or to affect any other aspect of such pending litigation.

No Add-Back for Film Credit/Apportionment.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-89	**HB 713**	**Rep. Allen, Gibson**

AN ACT TO PROVIDE THAT THE ADDITION TO FEDERAL TAXABLE INCOME OF AMOUNTS ALLOWED AS A CREDIT AGAINST NORTH CAROLINA INCOME DOES NOT APPLY TO THE FILM CREDIT AND TO INCREASE THE PERIOD OF TIME FOR WHICH THE SECRETARY OF REVENUE MAY ALLOW A CORPORATION TO USE AN ALTERNATIVE APPORTIONMENT FORMULA.

OVERVIEW: This act does two things:

It reduces the corporate tax liability of a taxpayer who claims the film credit by providing that the taxpayer does not have to make an addition to federal taxable income when computing North Carolina taxable income for the amount of the credit taken against the tax.

It increases the period of time for which the Secretary may allow a corporation to use an alternative apportionment formula from three taxable years to fifteen taxable years.

FISCAL IMPACT: The film credit change will result in an annual loss to the General Fund of approximately $800,000, beginning in fiscal year 2011-12. The fiscal impact of increasing the period of time for which a taxpayer may use an alternative apportionment formula is unknown. *(For a more complete fiscal analysis, see NC 2010 Legislative Session Budget and Fiscal Policy Highlights. Available online: http://www.ncleg.net/fiscalresearch/highlights/highlights_pdfs/2010_Session_Highlights.pdf)*

EFFECTIVE DATE: The change in the corporate income tax law applicable to taxpayers claiming the film credit becomes effective for taxable years beginning on or after January 1, 2011. The remainder of the act became effective when the Governor signed it into law on July 11, 2010.

ANALYSIS: This act includes two changes to the corporate income tax laws to make them more favorable to film production companies and to certain companies seeking to use an alternative apportionment formula.

Film Production Credit. – In 2009, the General Assembly increased the income tax credit for a production company from 15% to 25% of the company's qualifying expenditures,[50] and this session the General Assembly increased the cap of the film credit from $7.5 million to $20 million.[51] Section 1 of this act provides another enhancement to the corporate income tax film credit by not requiring a taxpayer to add back to its federal taxable income for State income tax purposes the amount of any film credit the taxpayer received during the taxable year.[52] The General Assembly made this change at the request of the film industry, who argued the taxation of the credit amount reduced the value of the credit taken. This exception to the general law will reduce the corporate income tax liability of a taxpayer claiming a film credit in the subsequent taxable year and will result in annual loss to the General Fund of approximately $800,000. The change becomes effective for taxable years beginning on or after January 1, 2011.

Alternative Apportionment Formula. – Section 2 of the act allows the Secretary of Revenue to apply a written decision granting a corporation's request for an alternative apportionment formula method for fifteen years instead of three years, effective for requests filed on or after July 11, 2010. Subsections (a) and (b) apply to the corporate income tax; subsection (c) makes a similar change to the corporate franchise tax.

A corporation must use the statutory double-weighted sales factor apportionment formula unless the corporation requests an alternative apportionment formula and the Secretary of Revenue grants the request. A return filed that uses an alternative apportionment formula that is not permitted by the Secretary is not a lawful return. A corporation that believes the double-weighted sales factor apportionment formula subjects a greater portion of its income to tax than is attributable to its business in this State may make a written request to the Secretary of Revenue for permission to use an alternative method. The request must set out the reasons for the corporation's belief and propose an alternative method. A corporation has the burden of establishing by clear, cogent, and convincing proof that the proposed alternative method is a better method of determining the amount of the corporation's income attributable to the corporation's business in North Carolina.

The Secretary must issue a written decision on a corporation's request. If the decision grants the request, it must describe the alternative method the corporation is authorized to use and state the tax years to which the alternative method applies. The Secretary's decision is final and is not subject to administrative or judicial review. A decision may apply to no more than three tax years. A corporation may renew its request to use an alternative apportionment method.

---

[50] S.L. 2009-529.

[51] S.L. 2010-147.

[52] The film credit may also be taken against the personal income tax when the taxpayer is a pass-through entity. However, the personal income tax does not require a similar add-back to federal taxable income; therefore, a corresponding change in the personal income tax statute was not needed.

This section allows a corporation that signs a letter of commitment by September 15, 2010, certifying it plans to invest at least $500 million in private funds to construct a facility in a development tier one area within five years after the time construction begins[53] to request the Secretary of Revenue to grant the corporation permission to use an alternative apportionment method. The Secretary of Commerce would have to certify that the corporation meets the investment criteria. The corporation would follow the same procedures as prescribed by current law to make the request and would have to meet the same burden of proof as required by current law. The only difference would be that if the Secretary of Revenue grants the request, the decision may apply for as many as fifteen tax years, instead of only three tax years.

The apportionment formula is the conventional method used by states to source income of a corporation that does business in more than one state.[54] Generally speaking, a taxpayer multiplies its taxable income by its apportionment percentage to determine the amount of its income sourced to a state. The state's corporate income tax rate is applied to the corporation's income apportionable to that state. Most states use an apportionment formula based on or substantially similar to the Uniform Division of Income for Tax Purposes Act (UDITPA). The UDITPA formula is a composite of three factors: a property factor, a payroll factor, and a sales factor. The property factor represents the ratio of the taxpayer's real and tangible personal property in the taxing state to its real and tangible personal property everywhere. Likewise, the payroll factor and the sales factor represent a ratio of the taxpayer's payroll and sales in the taxing state to its payroll and sales everywhere. Under UDITPA, the sum of the three factors is divided by three, resulting in a taxpayer's apportionment percentage.

North Carolina shifted to a double weighted sales factor apportionment formula in 1988 at the request of RJR Nabisco. A double weighted sales factor tends to favor home state industries that have a concentration of their total facilities in a state but sell their products all over the country. Under North Carolina's current apportionment formula, the payroll and property factors are each weighted 25% and the sales factor is weighted at 50%; the sum of the four factors is divided by four.

Last session[55] the General Assembly changed the corporate income tax apportionment formula used by a capital intensive multistate corporation[56] meeting specific investment criterion from a three-factor formula based upon property, payroll, and double weighted sales to a single sales factor formula. Under the single sales factor formula, the total allocation of a corporation's nationwide profits to North Carolina is solely based on where the corporation's sales occur. This method of apportionment provides a tax reduction to a corporation with relatively large shares of its nationwide property and payroll in North Carolina but a relatively small share of its nationwide sales in North Carolina. Unlike the provision in this act, a corporation meeting the statutory

[53] Microsoft requested this change because it was considering investing at least $500 million in a datacenter in Cleveland County. However, on August 27, 2010, it was announced that Microsoft decided to locate the datacenter in Virginia.
[54] The U.S. Supreme Court cases have upheld the right of states to tax the income of multistate corporations so long as the income is fairly sourced to the taxing state.
[55] S.L. 2009-54. The act provided that if no corporation met the capital intensive requirements by January 1, 2019, the single sales factor provision would be repealed.
[56] The General Assembly made the change at the request of Apple, who built a major datacenter in Maiden, N.C.

conditions to be considered capital intensive[57] may use the single sales factor apportionment method; it does not have to make a written request of the Secretary, and the Secretary has no decision-making responsibility in the matter.

Keeping NC Competitive Act.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-91	**SB 1171**	**Senator Clodfelter**

AN ACT TO MODIFY ELIGIBILITY FOR ECONOMIC INCENTIVE SALES AND USE TAX EXEMPTIONS AND REFUNDS; TO MODIFY ELIGIBILITY FOR THE ONE PERCENT PRIVILEGE TAX ON DATACENTER MACHINERY AND EQUIPMENT; AND TO MODIFY THE CIRCUMSTANCES UNDER WHICH THE DEPARTMENT OF COMMERCE MAY EXTEND THE BASE PERIOD FOR A JDIG GRANT.

OVERVIEW: This act provides the following tax incentives requested by the Department of Commerce to aid in its recruitment initiatives:

- An expansion of the sales tax exemption available to an Internet datacenter for the electricity and business property used at its facility to include a datacenter engaged in software publishing.
- An annual refund of the sales and use tax paid on building materials, supplies, fixtures, and equipment to construct a paper-from-pulp manufacturing facility and a turbine manufacturing facility.
- A modification of the requirements for a datacenter to qualify for the 1% excise tax on the machinery and equipment it purchases. The modification allows a datacenter to meet its investment threshold through the construction of two facilities, rather than one facility. The act also extends the sunset on this provision from July 1, 2013, to July 1, 2015.
- The creation of an option for contractors and subcontractors that allows them to elect to pay the lower 1% excise tax rather than the sales and use tax on its purchases of machinery and equipment in connection with a datacenter.
- A modification of the circumstances under which the Department of Commerce may extend a business' base period and the length of that extension under the Job Development Investment Grant Program.

FISCAL IMPACT: Fiscal Research estimates a fiscal impact of $8.9 million in fiscal year 2010-11 and $13.7 million in fiscal year 2011-12. *(For a more complete fiscal analysis, see NC 2010 Legislative Session Budget and Fiscal Policy Highlights. Available online:* http://www.ncleg.net/fiscalresearch/highlights/highlights_pdfs/2010_Session_Highlights.pdf*)*

[57] The corporation must meet certain investment, employment, wage, employee benefit, and location conditions. G.S. 105-130.4(s1).

EFFECTIVE DATE: See ANALYSIS.

ANALYSIS:

Sales Tax Exemptions. – In 2006, the General Assembly granted a sales tax exemption to an Internet datacenter for the electricity and business property used at its facility.[58] For purposes of the exemption, an "eligible Internet datacenter" is defined as a facility that meets the following requirements:

- Its primary business is as a Web search portal included in Industry 51811 of NAICS.[59]
- It is comprised of a structure or series of structures located on contiguous parcels of land owned by the same operator.
- It is located in a development tier one or two county.
- The owner commits at least $250 million of private funds in the facility over a five-year period.

Under this definition, the exemption applied to a facility engaged in Web search portals.[60] Section 1 of this act broadens the definition of an eligible Internet datacenter to include not only a facility that operates Web search portals but also facilities engaged in software publishing.[61] The remaining components of the definition did not change. This change became effective July 1, 2010, and applies to sales made on or after that date.

The General Assembly began offering sales tax exemptions to encourage companies to locate and expand in North Carolina[62] in 1998 when it granted a sales tax exemption to a major recycling facility[63] for the lubricants and other additives used at its facility for its machinery and equipment, for the electricity used at its facility, and for the materials and supplies consumed in the manufacturing processes at its facility.[64]

To be exempt, the business property must be located at the facility, it must be capitalized for tax purposes under the Code, and it must be used for one of the following purposes:

- For the provision of a service provided as part of its primary business.

---

[58] G.S. 105-164.13(55); S.L. 2006-66. At the time the legislation was being considered, Google was considering Lenoir as a possible site for one of its server farms, and this tax incentive was part of the recruitment package being offered.

[59] The North American Industry Classification System, or "NAICS," is the standard used by Federal statistical agencies in classifying business establishments for the purpose of collecting, analyzing, and publishing statistical data related to the U.S. business economy. It was developed under the auspices of the Office of Management and Budget (OMB) and adopted in 1997 to replace the Standard Industrial Classification (SIC) system.

[60] Google and Facebook are examples of an Internet datacenter that operate Web search portals.

[61] Microsoft is an example of an Internet datacenter engaged in software publishing. North Carolina was one of three sites Microsoft considered for the location of its datacenter to serve as the East Coast hub for its online services. Microsoft selected a site near Boydton, Virginia in August 2010.

[62] There are at least seven sales tax exemptions targeted to specific industries: G.S. 105-164.13(10a), (45), (45a), (45b), (45c), (55), and (56).

[63] Nucor.

[64] G.S. 105-164.13(10a); S.L. 1998-55.

- For the generation, transformation, transmission, distribution, or management of electricity.
- For the provision of related computer engineering or computer science research.

The owner of an Internet datacenter must forfeit the sales tax exemptions it has been allowed if it fails to meet the investment threshold, fails to locate and use the property at the datacenter, or fails to use the electricity at the datacenter. A taxpayer that forfeits an exemption is liable for all past taxes avoided as a result of the exemption, computed from the date the taxes would have been due if the exemption had not been allowed, plus interest. The past taxes and interest are due 30 days after the date the exemption is forfeited.

Section 2 of the act updates the NAICS reference used in the sales and use tax statutes to the most recent edition of NAICS.[65] The Office of Management and Budget[66] updates NAICS every five years. As part of this update, the 2002 NAICS classification for "Internet Service Providers and Web Search Portals," Industry 51811, was changed in the 2007 edition of NAICS to "Internet Publishing and Broadcasting and Web Search Portals," Industry 519130. Section 1 made this conforming change. Section 3 also makes a conforming change in language that was based upon the wording used in the 2002 edition of NAICS.

Sales Tax Refunds. – Section 4 expands the list of industries allowed an annual sales and use tax refund to include paper-from-pulp manufacturing[67] and turbine manufacturing.[68] This change became effective July 1, 2010, and applies to sales made on or after that date.

The General Assembly began offering sales tax exemptions to encourage companies to locate and expand in North Carolina[69] in 1998 when it granted a sales tax exemption to a major recycling facility[70] for the lubricants and other additives used at its facility for its machinery and equipment, for the electricity used at its facility, and for the materials and supplies consumed in the manufacturing processes at its facility.[71]

To be exempt, the business property must be located at the facility, it must be capitalized for tax purposes under the Code, and it must be used for one of the following purposes:

- For the provision of a service provided as part of its primary business.
- For the generation, transformation, transmission, distribution, or management of electricity.
- For the provision of related computer engineering or computer science research.

---

[65] G.S. 105-164.3 and G.S. 105-187.51B use NAICS references. In those instances, the industry codes did not change with the most recent update. Therefore, no conforming changes were necessary.
[66] OMB is the White House office responsible for devising and submitting the president's annual budget proposal to Congress.
[67] Governor Perdue announced on June 10, 2010, that Clearwater Paper Corporation would build a new tissue paper plant in Shelby, North Carolina.
[68] Siemens Energy announced plans to expand its Charlotte manufacturing plant for turbines and generators in March 2010.
[69] There are at least seven sales tax exemptions targeted to specific industries: G.S. 105-164.13(10a), (45), (45a), (45b), (45c), (55), and (56).
[70] Nucor.
[71] G.S. 105-164.13(10a); S.L. 1998-55.

The owner of an Internet datacenter must forfeit the sales tax exemptions it has been allowed if it fails to meet the investment threshold, fails to locate and use the property at the datacenter, or fails to use the electricity at the datacenter. A taxpayer that forfeits an exemption is liable for all past taxes avoided as a result of the exemption, computed from the date the taxes would have been due if the exemption had not been allowed, plus interest. The past taxes and interest are due 30 days after the date the exemption is forfeited.

Section 2 of the act updates the NAICS reference used in the sales and use tax statutes to the most recent edition of NAICS.[72] The Office of Management and Budget[73] updates NAICS every five years. As part of this update, the 2002 NAICS classification for "Internet Service Providers and Web Search Portals," Industry 51811, was changed in the 2007 edition of NAICS to "Internet Publishing and Broadcasting and Web Search Portals," Industry 519130. Section 1 made this conforming change. Section 3 also makes a conforming change in language that was based upon the wording used in the 2002 edition of NAICS.

Sales Tax Refunds. – Section 4 expands the list of industries allowed an annual sales and use tax refund to include paper-from-pulp manufacturing[74] and turbine manufacturing.[75] This change became effective July 1, 2010, and applies to sales made on or after that date.

The General Assembly has allowed various industrial facilities to apply for an annual refund of the sales and use tax paid by them on building materials, supplies, fixtures, and equipment installed during the construction of a facility. Purchases for subsequent repair, renovation or equipment replacement do not qualify for the refund. The list of industrial facilities entitled to this refund has increased over the years:

- Air courier services. (1998)
- Aircraft manufacturing. (2004 and 2007)
- Bioprocessing. (2003)
- Computer manufacturing. (2004)
- Financial services. (2006)
- Motor vehicle manufacturing. (2004)
- Pharmaceutical and medicine manufacturing and distribution of pharmaceuticals and medicines. (2003)
- Semiconductor manufacturing. (2004)
- Solar electricity generating materials manufacturing. (2008)

---

[72] G.S. 105-164.3 and G.S. 105-187.51B use NAICS references. In those instances, the industry codes did not change with the most recent update. Therefore, no conforming changes were necessary.

[73] OMB is the White House office responsible for devising and submitting the president's annual budget proposal to Congress.

[74] Governor Perdue announced on June 10, 2010, that Clearwater Paper Corporation would build a new tissue paper plant in Shelby, North Carolina.

[75] Siemens Energy announced plans to expand its Charlotte manufacturing plant for turbines and generators in March 2010.

To be allowed the refund, all of the listed industries must meet an investment threshold.[76] If the facility is located in a development tier one area, the required investment level is $50 million. For all other facilities, the investment level is $100 million. If the required investment level is not made within five years after the first refund is allowed, the facility loses its eligibility for the refund and must forfeit all refunds already received.[77] Only one of the listed industries must also meet a wage standard;[78] no industry listed must meet a specified employment level. A request for a refund must be made within six months after the end of the State's fiscal year. A refund applied for after the due date is barred. Under existing law, this refund provision will expire for all industries, including the newly added industries, for sales made on or after January 1, 2013.

1% Excise Tax, Subject to $80 Cap, on Certain Machinery & Equipment. – In 2007, the General Assembly substituted the 1%, $80 cap excise tax for the sales and use tax on certain purchases of machinery and equipment located and used at a datacenter.[79] This provision expires for sales occurring on or after July 1, 2013. To be taxed at the lower rate, the machinery and equipment must be used to provide datacenter services or for the generation, transformation, transmission, distribution or management of electricity. To qualify for the reduced tax rate, a datacenter must meet the following requirements:

- Provide infrastructure for hosting or data processing services.[80]
- Satisfy the wage standard and health insurance requirements of Article 3J.[81]
- Meet a minimum investment threshold.[82] The minimum investment threshold is $150 million within five years for development tier one areas.[83] The investment threshold is $300 million for facilities not located in a development tier one area. A business that fails to meet the minimum investment threshold forfeits the lower tax rate provided by this Article and must pay all sales and use taxes, with interest, that would have been due on ineligible purchases.[84]

This act allows a datacenter to meet its $300 million investment threshold through the construction of two facilities. The act requires one facility to meet a large investment threshold of $225 million. Once a taxpayer qualifies for the lower 1% privilege tax by constructing a facility satisfying this large investment threshold, the taxpayer may also qualify for the lower tax rate on a

[76] The costs of construction may include the cost of acquiring and improving the land for the facility and the costs of the equipment for the facility.
[77] The owner of the facility is liable for past taxes due plus interest.
[78] Solar electricity generating materials manufacturing.
[79] S.L. 2007-323, Section 31.22. The 1% excise tax available to a datacenter does not apply to an "eligible Internet datacenter" to the extent the equipment and machinery of an Internet datacenter is exempt from sales tax.
[80] G.S. 105-164.3(5c).
[81] G.S. 105-164.50(2)c.
[82] G.S. 105-164.50(2)b.
[83] The 3rd Edition of SB 1171 had removed the lower threshold because no company was currently taking advantage of the incentive, and it became known that the company for which the lower threshold was targeted was planning to locate in a development tier two or three county.
[84] A credit, in the amount of the privilege tax paid, is allowed against the sales and use taxes due following forfeiture, and interest is not computed against the amount of this offset. The past taxes and interest are due 30 days after the date of forfeiture.

second datacenter if all of the following requirements listed below are met. It also extends the sunset of this section from July 1, 2013, to July 1, 2015. The requirements are:

- o The owner invests at least $75 million in the second datacenter.
- o The two datacenters are linked through a fiber optic connection or a similar connection.
- o The two datacenters are placed into service within five years of each other.

This act also adds a "contractor option" for the tax imposed on the machinery and equipment of a datacenter. Under this option, a contractor or subcontractor may elect to pay the lower 1% privilege tax rather than the sales and use tax on its purchases of machinery and equipment in connection with the datacenter. To make this election, the contractor or subcontractor must register with the Secretary of Revenue. An eligible contractor must purchase the machinery and equipment for use in performance of a contract with the owner of a datacenter. A subcontractor must purchase the machinery and equipment for use in performance of a contract with a general contractor that has a contract with the owner of a datacenter.

Sections 5 through 7 of the act make the following stylistic and clarifying changes to Article 5F:

- o Incorporate the investment threshold, as well as the wage and health insurance requirements, in the statute providing the lower tax rate for a datacenter so that all of the provisions governing the applicable tax may be found in one statute. Section 5 removes the investment, wage, and health insurance requirements from the definitional statute for Article 5F.
- o Clarify that the excise tax does not apply to equipment and machinery of an eligible Internet datacenter or software used in an eligible Internet datacenter that is exempt from sales tax. This provision is effective January 1, 2010. [85]

The 2001 General Assembly enacted Article 5F in response to the requirement of the Streamlined Agreement that states must simplify their sales tax rates.[86] The 2001 legislation repealed the 1% sales tax rate and $80 per article cap imposed on mill machinery and replaced it with a privilege excise tax having the same rate. Since that time, the Article has been expanded to tax other machinery and equipment at the lower rate, so long as the machinery and equipment are capitalized by the following companies for tax purposes under the Code:

- o A major recycling facility. (2005)
- o A research and development company in the physical, engineering, and life sciences. (2006)
- o A software publishing company. (2007)
- o An industrial machinery refurbishing company. (2008)

JDIG Changes. – Section 8 of the act authorizes the Economic Investment Committee charged with administering the JDIG Program to extend a business' base period by up to four years if the business has created and maintained at least 1,000 jobs. The current law remains in place if the business creates fewer than 1,000 jobs, which means that the Committee may extend the base period for up to two years. The act makes clear that under no

---

[85] With this change, the clarifying language will have the same effective date as the change made in last year's budget regarding the sales tax exemption for certain "enterprise" software (Section 27A.3(f) of S.L. 2009-451). This effective date was requested by the Department of Revenue.
[86] S.L. 2001-347.

circumstances may the base period be extended by more than four years. This section became effective when the Governor signed the act into law on July 11, 2010, and applies to all agreements in effect on or entered into after that date. This section expires January 1, 2013.

In 2002, the General Assembly created a new economic development tool for new and expanding businesses in North Carolina, the Job Development Investment Grant (JDIG) Program.[87] JDIG is used to attract businesses to the State by allowing a five-member Economic Investment Committee[88] (Committee) to award grants to businesses. The grants may be awarded over as many as 12 years, and the amounts of the grants are based on income tax withholdings from new jobs created by the businesses. The Committee may enter into no more than 25 agreements per calendar year and may commit no more than $15 million in any fiscal year under all agreements entered into during a single calendar year.

If a business that receives a grant fails to meet any condition or requirement set forth in its agreement, the Committee, in consultation with the Attorney General, must reduce the amount of the grant or the term of the agreement, may terminate the agreement, or both. The reduction of the grant amount or the term must be proportional to the failure to comply.

If a business fails to maintain employment at the levels stipulated in the agreement or otherwise fails to meet a condition of the agreement for two consecutive years, one of two actions must be taken. The action taken will depend on whether the business is still within the "base period" established by the Committee and set forth in their agreement. If the business is no longer within the base period, the agreement must be terminated. If the business is still within the base period, the grant payment must be withheld for any consecutive year after the second consecutive year remaining in the base period in which the business fails to comply with any condition of the agreement. The Committee may extend the base period for up to two years, but under no circumstances may the term of the agreement be extended beyond the date set at the time the Committee awarded the grant.

Rev. Laws Technical & Admin. Changes.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-95	**SB 1177**	**Senator Clodfelter**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE TAX AND RELATED LAWS.

OVERVIEW: This act makes technical, clarifying, and administrative changes to various tax statutes and related laws.

FISCAL IMPACT: No significant impact.

[87] Part II of S.L. 2002-172.

[88] The members of the Committee are the Secretary of Commerce, the Secretary of Revenue, The Director of the Office of State Budget and Management, and two public members appointed by the General Assembly, one upon the recommendation of the President Pro Tempore of the Senate and the other upon the recommendation of the Speaker of the House of Representatives. G.S. 143B-437.54.

EFFECTIVE DATE: Except as otherwise specified, the act became effective when the Governor signed it into law on July 17, 2010.

ANALYSIS: This act makes the following changes:

Section	Explanation
VARIOUS TAX LAW CHANGES	
1	Corrects a reference.
2	Corrects a statutory cite.
3	Conforms the definition of "political party" in Chapter 105 to the definition in Chapter 163. When the General Assembly enabled taxpayers to designate part of their tax refund to a political party, the definition of "political party" in the tax statute conformed to the definition of "political party" in Chapter 163. The General Assembly changed the definition of "political party" in Chapter 163 in 2006, but failed to make a conforming change in Chapter 105. The two different definitions have led to confusion because the definition under Chapter 163 recognizes three political parties while the definition in the tax statutes recognizes only two political parties.
4	Allows a sales and use tax refund to a public library created by an act of the General Assembly. Unlike other public libraries that are part of a city or county government, the Public Library of Charlotte and Mecklenburg County is a creature of law. The General Assembly chartered the library in 1903 as a body corporate. Other public libraries are allowed an annual sales and use tax refund as part of a unit of local government. This section adds public libraries created pursuant to an act of the General Assembly to the list of governmental entities allowed an annual refund. Prior to 2008, the Public Library applied for semi-annual sales and use tax refunds as a charitable entity under G.S. 105-164.14(b). The General Assembly clarified the charitable refund provision in 2008 as applying to 501(c)(3) organizations to limit the expansion of the provision by a Court of Appeals decision in *The Lynnwood Foundation v. N.C. Department of Revenue.*[89] The Public Library of Charlotte and Mecklenburg County is not organized as a 501(c)(3) entity. The section is effective July 1, 2008, and applies to purchases made on or after that date. The retroactive effective date refers to the date that the 2008 clarifying legislation became effective.
5	Consolidates two subsections into one because both subsections define the retail value of a motor vehicle for purposes of the highway use tax.

[89] S.L. 2008-107.

6	Provides that a certificate of title issued as the result of a transfer to a revocable trust from an owner who is the sole beneficiary of the trust is exempt from the highway use tax. This transfer is essentially a transfer to the same owner. The current law currently exempts transfers to the same owner to reflect a name change.
7	*Reserved.*[90]
8	Consolidates two separate notices concerning taxes owed into one notice. The two notices are a notice of a proposed assessment of tax and a notice of a failure to pay penalty if the proposed assessment of tax is not paid within 45 days. Subsection (a) requires a notice of a proposed assessment of tax to inform the taxpayer that a failure to pay penalty will apply to the assessed tax if the assessment is not paid or protested within 45 days. This change streamlines the assessment process and eliminates the mailing costs for the current, separate notice of the failure to pay penalty. Subsection (b) clarifies that the protest of a proposed assessment applies to any failure to pay penalty imposed on the underlying assessment.
9	Clarifies a disputed tax amount must be paid before seeking judicial review.
10	Clarifies that the federal mailbox rule governs when a document that is mailed to the Department of Revenue is timely filed. Under the federal mailbox rule, documents submitted by mail to the IRS are considered to be filed on the date shown on the postmark stamped by the USPS. Under current NC law, a notice of appeal submitted to the Property Tax Commission by mail is considered to be filed on the date shown on the postmark stamped by the USPS. However, in regards to other documents submitted to the Department, the issue is unclear. The statutes typically provide that a return or payment must be filed by a certain date or is due by a certain date. The Department has traditionally abided by the mailbox rule. As part of the Tax Appeals changes in 2007, G.S. 105-241.11 provides that requests for review of a denial of a refund or a proposed assessment are considered timely filed on the date the Department receives it. The Department believes the law is now unclear with regards to other filings. This section clarifies the law with respect to documents submitted by mail to the Department and it makes a conforming change to the Tax Appeals statute to remove any ambiguity.
11	Enables nonparticipating manufacturers to have access to the information that is used to determine their escrow payments, which are based upon the volume of tobacco product sales in this State.
12	Provides that a local sales tax rate may be changed on the first day of any calendar quarter so long as the county gives the Department of Revenue

[90] A section in a bill may be reserved to preserve the sequential numbering in a bill. It denotes that the section as currently written does not make any changes to the law. Sections may be reserved to accommodate changes that may be added to the bill at a later time or to reflect provisions that have been removed from the bill.

	at least 90 days notice. Under prior law, a local tax rate change could only be made on the first day of either January or July. The General Assembly enacted that provision in July 2000 as part of the Streamlined Sales Tax Agreement changes. The Agreement, subsequently enacted in January 2001, provided for the quarterly dates and 60 days notice. Upon the request of the counties, this section conforms to the quarterly date allowed under the Agreement. Upon the request of the Department of Revenue, the act retains the 90-day notice requirement; the extra 30 days gives the Department the time it needs to notify retailers of the local sales tax change. (See temporary modification in Section 44.)
13	Repeals a redundant statute. G.S. 105-254 gives the Secretary of Revenue the authority to prepare the necessary forms, and to provide those forms upon request.
14	Corrects the reference to the Department of Human Resources to the Department of Health and Human Services; and directs DHHS to give the Secretary of Revenue the data the Department of Revenue needs to calculate the county hold-harmless payments required by G.S. 105-523 by February 24th and July 24th of each year. The State is required to make hold harmless payments to counties to ensure that each county benefits by at least $500,000 as a result of the provisions of the Medicaid swap, enacted in S.L. 2007-323. In calculating this hold-harmless amount, the Secretary must estimate Medicaid expenditures, based upon data provided to it by DHHS.
PROPERTY TAX CHANGES	
15	Clarifies that liens are extinguished when an historic structure is located on the site within the allowed statutory time period.
16	Amends the definition of "disabled veteran" to include a veteran whose death was the result of a service-connected condition and adds a definition for the term "service-connected."
17	Clarifies that no deferred taxes are due and all liens are extinguished on historic properties when the historical significance of the property is lost or impaired due to fire or other natural causes.
18	Clarifies that liens are extinguished when property is used for low or moderate income housing within the allowed statutory time period.
19	Removes the obsolete term "radio common carrier" from the definition of "public service company" in G.S. 105-333.
20	Adds a definition of "terminal" to the property tax statutes that govern the assessment and taxation of public service companies.
21	Clarifies the repeal of the builder's inventory property tax deferral does not affect the eligibility of certain property receiving the benefit.
22	Corrects an incorrect effective date for the combined motor vehicle system.

23-24	*Reserved.*[91]
MOTOR FUEL TAX CHANGES	
25	Expands the electronic funds transfer[92] (EFT) requirement to motor carriers and kerosene suppliers under Article 3 of Chapter 119. Since 1999, the State has required EFT of the following tax payments: taxes due by corporations that pay federal estimated tax by EFT, as well as sales tax prepayments, utilities franchise tax payments, and taxpayers of motor fuel taxes and alternative fuel taxes that must file the return electronically[93]
26	Changes the word "report" to "return" to more accurately reflect the type of document described.
27	Updates the reference to the International Fuel Tax Agreement (IFTA) from June 1, 2008, to June 1, 2010.
28	Provides that a motor carrier who wants to register in North Carolina as its base state under IFTA must be incorporated in this State or authorized to transact business in this State. This change imposes the same licensing restrictions on motor carriers that the State imposes on refiners, suppliers, terminal operators, and others.
29	Repeals some of the purposes for which a distributor may obtain a monthly refund for the motor fuel tax the distributor paid on kerosene used for a non-highway purpose. In most instances, kerosene used for a non-highway purpose will be dyed fuel, upon which the motor fuel tax has not been imposed. To the extent the motor fuel tax has been paid on the kerosene, an end-user of the fuel that uses the fuel for a non-highway purpose may continue to receive the benefit of the tax refund by applying annually for a refund of the motor fuel tax paid on the kerosene under G.S. 105-449.197. In 1994, the federal government began requiring motor fuel to be dyed if it was non-tax-paid fuel. The dyed fuel indicates that the fuel is used for a nontaxable purpose under federal law and for a non-highway use in North Carolina. Dyed fuel is not subject to either the federal or State excise tax on motor fuel. Effective July 1, 1998, the federal government began requiring diesel fuel to be dyed. Kerosene is defined as diesel fuel. By requiring kerosene to be dyed, the federal government provided a way to purchase kerosene for non-highway uses, such as heating, without having to pay the motor fuel excise tax on the fuel. At the time, the public feared that dyed kerosene could not safely be used in kerosene heaters and because of that fear many people would only use undyed kerosene. When North Carolina conformed to the federal law in 1998, it enacted this refund provision so as not to impose the motor fuel tax on kerosene,

[91] See the footnote for Section 7 of the act for an explanation regarding the term "Reserved."
[92] G.S. 105-163.40.
[93] G.S. 105-241(b).

	which was often used for heating purposes.[94] The fear that dyed kerosene would be unsafe for heaters has not materialized and the refund provision at the distributor level is no longer necessary since retailers who wish to sell kerosene for non-highway uses may purchase and sell dyed kerosene. Specifically, this section repeals the refund provided to a distributor who sells kerosene to a retailer and dispenses the kerosene into a dispensing device that is kept locked by the retailer and must be unlocked by the retailer for each sale of kerosene. The distributor is liable for any overpayment of the refund, even if the overpayment is attributable to an act of the retailer. It also repeals the refund provided to a distributor who sells kerosene to an airport to be used only for fueling airplanes because no tax has been refunded for this purpose for at least the past four years. This section becomes effective January 1, 2011, and applies to sales of kerosene made by a distributor on or after that date.
30	Removes a miscellaneous word created by a redlining error.
31	Subsection (a) provides a definition of taxicab that is substantially the same as the one that existed in G.S. 20-87(1), prior to repeal. Subsection (b) clarifies that the quarterly refund of motor fuel tax paid on fuel used to operate special mobile equipment (SME) is for the *non-highway* operation of the equipment and for equipment that is registered as SME under Chapter 20. This subsection becomes effective October 1, 2010, and applies to motor fuel purchased on or after that date.
32	Provides that applications for refunds must be filed in the form required by the Secretary. This change will allow for the electronic filing of refund applications.
33-34	*Reserved.*[95]
OTHER RELATED LAW CHANGES	
35	Corrects a statutory reference.
36	Removed from the bill. The General Assembly enacted the substance of this provision in S.L. 2010-31, section 31.4.
37	Corrects a drafting error in S.L. 2009-520. This section became effective July 1, 2010; the same date S.L. 2009-520 became effective.
38	Removes a reference to the privilege tax imposed on manufacturing fuel because the tax no longer exists. This section became effective July 1, 2010, the date the privilege tax imposed on manufacturing fuel was repealed.[96]
39	Removes a duplicate subsection header.

[94] S.L. 1994-726 and S.L. 1998-146.
[95] See the footnote for Section 7 of the act for an explanation regarding the term "Reserved."
[96] See G.S. 105-187.51A.

40	Corrects an incorrect statutory reference.
41	Repeals a redundant provision. S.L. 2009-527 adjusted the local vehicle registration fee that may be imposed by a transit authority from $5 to $8 as part of an overarching plan designed to provide funding options to improve public transportation and to relieve transportation-related congestion, as recommended by the 21st Century Transportation Committee. The subsection being repealed states that a regional public transportation authority may not impose a vehicle registration fee that exceeds $5. The subsection not only conflicted with the 2009 law change but also became unnecessary in light of the 2009 law change.
42	Corrects an effective date error. Section 27A.3(b) of S.L. 2009-451 eliminated the delayed repeal of G.S. 105-269.14. G.S. 105-269.14 requires taxpayers to report and pay use tax annually on the individual income tax return. The elimination of the repeal means that taxpayers will continue to report and pay use tax annually on the individual income tax return. Section 27A.3.(c) amended the effective date of the original legislation enacted in 2000. By amending the effective date, the change inadvertently triggered a retroactive application of the way individuals would be required to pay the use tax between July 14, 2000, and August 7, 2009. To correct this interpretation, this section repeals Section 27A.3.(c) of S.L. 2009-451, as suggested by the codifier of the General Statutes.
43	Extends the moratorium on the collection of the 911 fee from prepaid wireless providers from the 2010 calendar year to the first nine months of the 2011 calendar year. The moratorium has been extended twice.
44	Provides that during the 2010 calendar year, a local sales and use tax levied under Article 46 of Chapter 105 of the General Statutes may become effective on the first day of any calendar quarter so long as the county gives the Secretary at least 75 days advance notice of the new tax levy, rather than 90 days advance notice. Under the Streamlined Sales Tax Agreement, the notice requirement is 60 days. In earlier versions of this legislation, the 90-day notice provision was shortened to 60 days. (See summary for Section 12) A couple of counties[97] had a successful sales tax referendum this spring and hoped to implement the new rate October 1, based upon the 60-day notice period in the earlier versions of the legislation. This date could not be achieved with the 90-day notice provision. This provision gives the counties the ability to begin collecting sales tax at the higher rate with 75 days notice for the 2010 calendar year only.
EFFECTIVE DATE	
45	Except as otherwise noted, this act is effective when it becomes law. The Governor signed the legislation into law on July 17, 2010.

[97] New Hanover and Wilkes Counties.

Remove Sunset/ Priv. Sale Local Gov't Bonds.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-125	**HB 1936**	**Representative Owens**

AN ACT TO REMOVE THE SUNSET ON THE AUTHORIZATION TO SELL, THROUGH A PRIVATE SALE, LOCAL GOVERNMENT BONDS THAT ARE EITHER NOT RATED OR RATED BELOW "AA," SO AS TO CONTINUE TO TAKE ADVANTAGE OF THE FEDERAL "BUILD AMERICA BONDS" PROGRAM.

OVERVIEW: This act removes the sunset on the authorization to sell through a private sale local bonds that are either not rated or rated below "AA."

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 21, 2010.

ANALYSIS: This act removes the December 31, 2010 sunset on the private sale of obligation bonds issued under the Local Government Bond Act that have been rated by a nationally recognized credit rating agency at a credit rating below "AA" or are unrated.

Bonds issued by units of local government must be sold by the Local Government Commission after advertisement and upon sealed bids, unless they meet one of nine statutory exceptions.[98] One of the exceptions is for general obligation bonds issued under the Local Government Bond Act that have been rated by a nationally recognized credit rating agency at a credit rating below "AA" or are unrated if they are sold before December 31, 2010. This exception was added to the statute in 2009[99] because of a provision in the *American Recovery and Reinvestment Tax Act of 2009* (ARRTA). ARRTA expanded the ability of banks to buy bonds issued by small local governmental units and certain nonprofit entities because those entities were facing considerable challenges in borrowing during the economic downturn. The federal provisions are scheduled to expire December 31, 2010. According to the State and Local Government Finance Division of the Office of the State Treasurer, allowing the private sale of general obligation bonds with no rating or rated below AA would enable local governments to take advantage of the debt issuance relief afforded under ARRTA. Presently, there is movement at the federal level to extend the relief given the continued uncertainty in the bond market. Lifting the current sunset date, in anticipation of the extension of

---

[98] Eight of the exceptions are as follows: (1) bonds that a State or federal agency has previously agreed to purchase; (2) bonds for which no legal bid is received within the time allowed for submission of bids; (3) revenue bonds and special obligations bonds issued under G.S. 159-84; (4) refunding bonds issued under G.S. 159-78; (5) refunding bonds issued under G.S. 159-72 if the Local Government Commission determines that a private sale is in the best interest of the issuing unit; (6) bonds that result in a tax credit to the owners under federal income tax laws if the Local Government Commission determines that a private sale is in the best interest of the issuing unit; (7) project development financing debt instruments; (8) bonds that are part of an issue in which the interest payment on some or all of the bonds is intended to be subsidized by payments from the federal government if the Local Government Commission determines that a private sale is in the best interest of the issuing unit.

[99] S.L. 2009-140; SB 754.

the federal provisions, allows local governments to continue taking advantage of these instruments.

Construction of Wills and Trusts.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-126	**SB 1176**	**Senator Clodfelter**

AN ACT TO CONSTRUE CERTAIN FORMULA CLAUSES THAT REFER TO FEDERAL ESTATE AND GENERATION-SKIPPING TRANSFER TAX LAWS.

OVERVIEW: This act construes certain formula clauses that reference federal estate and generation-skipping transfer tax laws that take effect in 2010, during which time there is no applicable federal estate or generation-skipping transfer tax, to refer to the applicable laws as they applied with respect to estates and trusts of decedents dying on December 31, 2009. The Revenue Laws Study Committee recommended this legislation.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 21, 2010.

ANALYSIS: Effective January 1, 2010, the federal estate tax and generation-skipping transfer tax law is repealed for one year. North Carolina imposes an estate tax on the estate of a decedent when a federal estate tax is imposed on the estate. Consequently, North Carolina's estate tax is also repealed for one year. The Fiscal Research Division estimates an $85 million loss of revenue associated with this repeal to the General Fund for fiscal year 2010-2011.

Many wills and trust agreements include formula provisions to determine what amounts of the estate will pass to different beneficiaries or to trusts for the benefit of different beneficiaries. These formula provisions are usually based upon the estate and generation-skipping transfer tax laws applicable at the time of the decedent's death. With the repeal of the federal estate law for the year 2010, these provisions could result in a devise contrary to the decedent's intent. For example, a will or trust agreement could include a formula provision allocating the largest amount or percentage of the testator's estate that can pass free of estate tax to a "Family Trust" for the benefit of the testator's children and the remainder of the estate to a "Marital Trust" for the benefit of the testator's surviving spouse. In the absence of an estate tax, it is possible that this kind of provision could result in the entire estate passing to the Family Trust and nothing passing to the Marital Trust.

This act addresses the confusion and ambiguity in formula clauses caused by the repeal of the estate tax law for 2010 by generally putting people who die in 2010 in the position they would have been in if they had died on December 31, 2009. It also addresses instruments executed by a person who dies before 2010, but who left a document with formula language that takes effect in 2010. The act provides that a will or codicil, or trust instrument or amendment to a trust instrument, that refers to federal estate and generation-skipping transfer tax laws and becomes applicable during the time in which no such laws exist, will be construed to refer to the federal estate and generation-skipping transfer tax laws as they existed on December 31, 2009, unless the

document clearly manifests an intent that a contrary rule applies. At least nine other states have adopted similar construction provisions.[100]

Homebuilder Property Tax Deferral Change

Session Law	*Bill #*	*Sponsor*
S.L. 2010-140	**HB 1249**	**Rep. Harrell, England**

AN ACT TO MODIFY THE INVENTORY PROPERTY TAX DEFERRAL.

OVERVIEW: This act modifies the homebuilders' inventory property tax deferral program by allowing residences constructed by a builder and owned by either the builder or a business entity of which the builder is a member to qualify for the deferral.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act is effective for taxes imposed for taxable years beginning on or after July 1, 2010.

ANALYSIS: In 2009, the General Assembly added for taxable years beginning on or after July 1, 2010, a property tax deferral program for occupant-ready residences constructed and owned by a general contractor for resale on a parcel of real property.[101] The amount of property tax liability that can be deferred is the portion of tax that represents the increase in the property value resulting from the construction of the residence on the property. This act modifies the ownership requirements for qualifying for the inventory tax deferral program. Under previous law, the property had to be owned by a builder. Interpretive conflicts arose in situations where a builder constructed a residence on property, the title to which was held by a business entity of which the builder was a member.[102] This act addresses that conflict and allows property so held to qualify for the deferral program.

Administrative provisions for the inventory tax deferral program are consistent with the other tax deferral programs and include (i) taxes that are deferred become a lien on the property, which is extinguished when the taxes are paid; (ii) the deferred taxes are due and payable on the day the property loses its eligibility for deferral as a result of a disqualifying event; (iii) interest accrues during the deferral period as of the date the taxes would have originally become due without the deferral program; and (iv) upon disqualification, the tax for a year in which a disqualifying event occurs is computed without the benefit of the deferral program. Applications for the deferral program should be filed within the regular listing period and may be filed later if the board of equalization and review determines there is good cause for the lack of timely filing.

The deferred taxes are carried forward in the records of the county and, if applicable, the city in which the property is located until the occurrence of one of four disqualifying events:

---

[100] Idaho, Indiana, Maryland, Nebraska, New York, South Dakota, Tennessee, Virginia, and Washington.
[101] S.L. 2009-308.
[102] "Member" is defined in G.S. 105-277.2 as a shareholder of a corporation, a partner of a general or limited partnership, or a member of a limited liability company.

The builder transfers the residence.

The residence is occupied by the builder or another with the builder's consent.

Five years have passed from the time the improved property was first subject to listing for taxation by the builder.

Three years have passed from the date the improved property first received the property tax benefit provided by this deferral program.

Various Economic Incentives.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-147	**HB 1973**	**Rep. Owens, Gibson, Wainwright, Brubaker**

AN ACT TO MODIFY EXISTING ECONOMIC DEVELOPMENT INCENTIVES AND TO INCENT NEW ECONOMIC DEVELOPMENT OPPORTUNITIES; TO PROVIDE FUNDING FOR THE DNA DATABASE AND DATABANK; AND TO ENCOURAGE THE USE OF MULTIPLE AWARD SCHEDULE CONTRACTS WHEN ISSUING REQUESTS FOR PROPOSALS FOR STATE CONTRACTS.

OVERVIEW: This act does the following:

Extends the sunset for the following tax credits:

- Article 3J of Chapter 105 of the General Statutes.
- Oyster shell recycling.

Enhances the film production tax credits.

Creates a new tax credit for interactive digital media.

Creates economic development incentives and favorable tax treatment for Eco-Industrial Parks.

Exempts certain wood chippers from sales tax.

Provides funding for the DNA Database and Databank.

Encourages the Department of Administration to consider the use of multiple award schedule contracts when issuing requests for proposals for State term contracts.

FISCAL IMPACT: Fiscal Research estimates a fiscal impact of $830,000 for fiscal year 2010-2011. Of the various incentives in this act, the expansion of the film production tax credit is estimated to have the most significant impact over the next five years reaching a General Fund loss of $56 million in fiscal year 2012-2013. *(For a more complete fiscal analysis, see NC 2010 Legislative Session Budget and Fiscal Policy Highlights. Available online:* http://www.ncleg.net/fiscalresearch/highlights/highlights_pdfs/2010_Session_Highlights.pdf*)*

EFFECTIVE DATE: Except as otherwise stated, this act became effective when the Governor signed it into law on July 22, 2010.

ANALYSIS: This act enhances several of North Carolina's existing economic development tools and creates some new incentives. It is one of five acts the General Assembly passed this year to encourage economic development.[103]

Part I: Extend and Revise Tax Credits for Growing Businesses

Established to replace the Bill Lee tax credits, Article 3J provides credits for job creation and investment in real and business property. The credits became effective for tax years beginning on and after January 1, 2007.

Under prior law, Article 3J for growing businesses was scheduled to sunset for business activities that occur on or after January 1, 2011. In order to qualify for a number of economic incentives[104] offered by the State, including Article 3J, a taxpayer must meet an environmental impact test. In addition, under Article 3J, a taxpayer may receive a credit for investing in business property if the investment meets a specified threshold. The amount of the credit varies, depending upon the tier designation. Activities that occur in an agrarian growth zone may receive enhanced economic incentives.

This act makes three changes to Article 3J. First, it extends the sunset by two years from January 1, 2011, to January 1, 2013.

Second, it makes a technical change to the definition of an "agrarian growth zone." An agrarian growth zone is a zone that meets each of the following conditions: (i) it is comprised of one or more contiguous census tracts, census block groups, or both, in the most recent federal decennial census, (ii) all of the area is located in whole within a county that has no municipality with a population in excess of 10,000, and (iii) each census tract and each census block group that comprise the area has more than 20% of its population below the poverty level according to the most recent federal census. The act modifies the third requirement by allowing each census tract either to have more than 20% of its population below the poverty level or to be adjacent to another census tract or census block group in the zone that has more than 20% of its population below the poverty level according to the most recent federal census. The act further requires that the zone, as a whole, have more than 20% of its population below the poverty level according to the most recent federal census. This change is effective for taxable years beginning on or after January 1, 2011.

Third, the act clarifies what constitutes an environmental disqualifying event for purposes of qualifying for certain economic incentives. A taxpayer qualifies for certain economic incentives only if the taxpayer certifies that it has no pending administrative, civil, or criminal enforcement actions based on alleged significant violations of any DENR-implemented programs and has had no final determination of responsibility for any significant administrative, civil, or criminal violation of any DENR-implemented program within the last five years. These are civil and criminal violations with associated penalties. While Article 3J has a definition for what constitutes a "significant" violation, some confusion has arisen as to whether certain violations meet this definition. The Department of Revenue has interpreted the current language to make no distinction between civil and criminal violations or on the basis of whether the violation was

---

[103] S.L. 2010-31; S.L. 2010-89; S.L. 2010-91; S.L. 2010-167.

[104] These incentives include site infrastructure development, JMAC (Job Maintenance and Capital Development Fund), and any tax incentive that incorporates, by reference, the environmental test set forth in Article 3J.

knowing or knowing and willful. This act clarifies that for certain economic incentives[105] an environmental disqualifying event occurs when (i) a civil penalty is assessed by DENR for failure to comply with an order to abate or remediate a violation of any DENR program, (ii) a criminal penalty is imposed in connection with any DENR-implemented program, or (iii) DENR finds a taxpayer knowingly and willfully committed a violation of a DENR-implemented program, an assessment for damages to fish or wildlife is made, or a judicial order for injunctive relief was issued in connection with a violation of any DENR-implemented program.[106] This clarification is designed to ensure that minor violations do not inadvertently disqualify a taxpayer that would otherwise be eligible for a tax incentive and was vetted with the Departments of Commerce and Revenue. The clarification of a disqualifying environmental event for existing agreements is effective for credits claimed for taxable years beginning on or after January 1, 2007. The clarification of a disqualifying environmental event for new applicants became effective when the Governor signed the act into law on July 22, 2010, and applies to all agreements in effect on or entered into on or after that date.

Part II: Expand Tax Credits for Production Companies[107]

In 2005, the General Assembly replaced the film industry development grant program with a refundable income tax credit calculated based on the qualifying expenses spent by a production company in connection with a production.[108] The credit included a $1 million cap on employee compensation. In 2006, the General Assembly clarified that amounts paid to a highly compensated individual are not eligible for the credit regardless of whether paid directly by the production company or indirectly through another entity.[109] In 2009, the credit was modified to provide a production company with the choice of two different credit amounts: either a credit equal to 15% of qualifying expenses[110] or an alternative credit equal to 25% of qualifying expenses, less the difference between the amount of tax paid on purchases subject to the privilege tax on mill machinery under G.S. 105-187.51, which has historically been applied to cameras, film, props, building materials used in construction of sets, and chemicals/equipment used to develop and edit film, and the amount of tax the company would have paid on those purchases if they had been subject to the combined general rate of sales tax under G.S. 105-164.4.[111]

The refundable film credit is capped at $7.5 million. In order to obtain the credit, the taxpayer's qualifying expenses must exceed $250,000, which cannot include any amount in excess of $1

---

105 Article 3J, the Site Infrastructure Fund, and the Jobs Maintenance and Capital Development Fund (JMAC).

106 The first two apply only for the tax year in which the activity occurred; the last includes the current tax year as well as the prior two tax years.

107 The 2010 General Assembly further expanded the film credit in S.L. 2010-89. Section 1 of that act provides that a taxpayer is not required to add back to federal taxable income amounts allowed for the film credit.

108 Section 39.1 of S.L. 2005-276.

109 Section 4 of S.L. 2006-162. In the film industry, it is a customary practice to pay actors indirectly through a contract with a personal services company.

110 Qualifying expenses are the total amount spent in North Carolina on (i) goods and services leased or purchased by a production company in connection with a production, (ii) compensation and wages paid by a production company on which it remitted withholding payments to the Department of Revenue, other than an amount paid in excess of $1 million to an individual, and (iii) the cost of production-related insurance coverage obtained on the production. Expenses for insurance and coverage purchased from a related member may not be included as a qualifying expense.

111 S.L. 2009-529.

million in compensation paid to an individual. The credit is claimed for the taxable year in which the production activities are completed. The credit is computed based on all of the taxpayer's qualifying expenses incurred with respect to the production, not just the qualifying expenses incurred during the taxable year. If the credit exceeds the amount of tax imposed for the taxable year reduced by the sum of all credits allowable, the Secretary must refund the excess to the taxpayer. A pass-through entity is considered a taxpayer for purposes of claiming this credit.

Part II of this act does the following, effective for taxable years beginning on or after January 1, 2011:

Increases the applicable percentage used to calculate the credit from 15% of the amount of qualifying expenses to 25% of the amount of qualifying expenses and eliminates the alternative credit.

Allows a taxpayer to include as qualifying expenses both employee fringe contributions (including health, pension, and welfare contributions) and per diems, stipends, and living allowances paid for work being performed in the State.

Increases the cap of the film credit from $7.5 million to $20 million.

Clarifies that the scope of mill machinery for privilege tax purposes does not include purchases of cameras, film, props, building materials used in construction of sets, and chemicals/equipment used to develop and edit film. With this change, these purchases will be subject to the general rate of sales tax beginning January 1, 2011.

Part III: Tax Credit for Developing Interactive Digital Media

North Carolina does not provide any statutory incentive programs for companies that produce virtual world, flight, or training simulations or engines, platforms, or other programmed components of simulations. Effective for taxable years beginning on or after January 1, 2011, Part III of this act creates a new economic incentive to help recruit producers of interactive digital media (IDM) to North Carolina. The term 'interactive digital media' is defined as a product that meets all of the following requirements:

Produced for distribution on electronic media, including distribution by file download over the Internet.

Contains a computer-controlled virtual universe with which an individual who uses the program may interact in order to achieve a goal.

Contains a significant amount of at least three of the following: text, sound, fixed images, animated images, and 3D geometry.

The credit is equal to a percentage of the taxpayer's expenses paid during the taxable year in developing the media, platform, or engine that exceed $50,000. The percentage amount varies as follows:

20% for expenses paid to a "participating community college," defined as a community college that offers an associate in applied science degree in simulation and game development, or to a research university.

15% for all other allowable expenses.

The credit is available only if the taxpayer meets the wage standard, health insurance, environmental impact, safety and health programs, and no-tax-delinquency requirements of

Article 3J. IDM credits may be taken against either franchise or income tax liability. The taxpayer must elect which tax the credit will be claimed against when filing the return and that election is binding, including with respect to carryfowards. IDM credits may not exceed 50% of the amount of tax against which the credit is claimed, and unused portions of a credit may be carried forward for eight years. If a producer claims or has claimed an IDM credit with respect to a facility, that taxpayer is ineligible for One NC Fund and JDIG grants. This credit expires January 1, 2014.

Part IV: Extend Sunset for Recycling Oyster Shells Credit

This act extends the sunset on the tax credit for recycling oyster shells from January 1, 2011, to January 1, 2013. The General Assembly first enacted this credit in 2006[112] to offer an additional incentive to recycle oyster shells. Beginning October 1, 2009, oyster shells may not be disposed in landfills.

The credit is a nonrefundable income tax credit of one dollar for each bushel of oyster shells that a taxpayer donates to the Division of Marine Fisheries of the Department of Environment and Natural Resources. To be eligible for the credit, the taxpayer must provide the Department of Revenue with documentation, supplied by the Division of Marine Fisheries, verifying the donation and the number of bushels donated. The credit may be carried forward for five years. The taxpayer may not claim a deduction for any oyster shells for which a credit is claimed.

The Division of Marine Fisheries operates a voluntary oyster shell donation program. The Division of Marine Fisheries purchases oyster shells in very large quantities from shucking houses at a negotiated price per bushel.[113] Recycled oyster shells offer the following value: (1) aid in the restoration of oyster populations by their placement in sanctuaries and/or estuaries; (2) landscaping purposes; and (3) nutritional supplements.

Part V: Create Economic Development Incentives for Eco-Parks

Part V of this act provides new economic development incentives for Eco-Industrial Parks. To qualify as an Eco-Industrial Park, it must meet the following requirements: (i) it has at least 100 developable acres; (ii) it is located in a county that is not subject to motor vehicles emissions inspections; (iii) each building in the park meets the energy-efficiency and water usage standards established in G.S. 143-135.37; and (iv) each business in the park is in a clean industry. If these requirements are met, an Eco-Industrial Park will enjoy certain favorable treatment with regard to existing economic incentives. First, an Eco-Industrial Park has a development tier one designation for purposes of economic development programs. Second, for purposes of selecting applicants for the Job Development Investment Grant Program and selecting projects in a priority area for the NC Green Business Fund (Fund), an applicant or a project in an Eco-Industrial Park has priority over comparable projects that are not in an Eco-Industrial Park. Third, with respect to the Fund and unlike with other projects, the Department of Commerce may neither set a cap on a grant nor require matching funds for a grant from the Fund for projects in an Eco-Industrial Park. Fourth, the limitation on the tax credit for the installation of renewable energy property in nonresidential property is increased to $5 million per installation if the property is located in an Eco-Industrial Park. Under current law, the tax credit available against income, franchise, or gross premiums tax liability for taxpayers investing in renewable energy property for nonresidential property has a ceiling of $2.5 million per installation. Lastly, under current law, a taxpayer that has qualified research expenses is allowed a credit equal to the percentage of the expenses ranging

---

[112] S.L. 2006-66, Section 24.18.

[113] In 2006, the negotiated price was 50¢ per bushel.

from 1.25% to 3.25%.[114] This Part provides that the applicable percentage for expenses with respect to research performed in an Eco-Industrial Park is 35% of the expenses.

The priority treatment afforded projects in an Eco-Industrial Park with respect to grants under JDIG or the NC Green Business Fund applies to grant applications submitted on or after July 1, 2010. The remaining provisions such as the tier one designation and the tax credit changes are effective for taxable years beginning on or after January 1, 2011.

Part VI: Sales Tax Exemption for Wood Chippers

Under prior law, companies that produce wood chippers that are for use by out-of-state customers and that are immediately removed from North Carolina and are delivered to the customer's out-of-state location are required to collect sales tax for certain sales. This practice has, in practical effect, put these companies at a competitive disadvantage with similarly situated companies located in other States. These taxable sales included (i) where a customer's employee picks up the chipper at the company location using the customer's vehicle, (ii) where the customer pays a drive-away service driver to pick up the chipper at the company, and (iii) where the customer pays a drive-away service driver to pick up the chipper at the company using the customer's vehicle. These chippers are commercial units that are towed behind another vehicle and are assigned a vehicle identification number.

This act exempts from sales tax a wood chipper that meets all of the following requirements:

Is designed to be towed by a motor vehicle.

Is assigned a 17-digit vehicle identification number by the National Highway Transportation Safety Association.

Is sold to a person who purchases a motor vehicle in this State that is to be registered in another state and who uses the purchased motor vehicle to tow the wood chipper to the state in which the purchased motor vehicle is to be registered.

This Part became effective July 1, 2009, and applies to sales made on or after that date.

Part VII: Funding for the DNA Database and Databank

During the 2010 Session, the General Assembly enacted S.L. 2010-94, Collect DNA Sample on Arrest. Under this act, DNA samples will be taken from persons upon arrest for specified offenses, and the general method of sampling is changed from blood sample to cheek swab for all DNA sampling. Part VII of this act provides a funding mechanism for this new program. A two-dollar ($2.00) criminal court cost will be assessed in every criminal case in Superior or District Court where the defendant is convicted, enters a guilty or nolo contendere plea, or when costs are assessed against the prosecuting witness. The cost does not apply to infractions. The funds are appropriated directly to the Department of Justice for the support and services of the SBI's DNA Database and DNA Databank.

The additional court cost becomes effective October 1, 2010, and applies to court costs imposed or collected on or after that date. However, in misdemeanor cases where the citation was issued before October 1, 2010, and the case is disposed of on or after that date by written appearance, by waiver of trial or hearing, or by plea of guilty or admission of responsibility, then the cost shall be the lesser of the cost specified in G.S. 7A-304(a), as amended by this act, or the cost specified in the notice portion of the defendant's copy of the citation. This Part also provides that if the

[114] North Carolina university research expenses get a credit equal to 20% of the expenses.

$2.00 court cost is insufficient to fund the program, the Department of Justice must cover the additional costs through other funds appropriated to it and by applying for grants or seeking funds from the federal government or other sources.

Part VIII: Use of Multiple Award Schedule Contracts

This act encourages the North Carolina Department of Administration to consider the use of multiple award schedule contracts when issuing requests for proposals for State term contracts. This Part became effective when the act was signed into law by the Governor on July 22, 2010.

The use of multiple award schedules allows the government to leverage its purchasing power to garner volume discounts for commercial supplies and services, and it allows multiple vendors to compete and be awarded a contract based upon the value of their products or services. Under this process, vendors provide their total catalogue for lines of equipment and attachments to eligible purchasers, including State agencies, departments, institutions, public school districts, political subdivisions, and higher education facilities. The State then evaluates vendors based on a variety of factors, including discounts, total life cycle costs, service, warranty, distribution channel, and past vendor performance. Multiple award schedule contracts can result in competitive pricing, transparency, administrative savings, expedited procurement, and flexibility for State purchasers.

Sales Tax Changes/Study Competing Systems.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-153	**HB 455**	**Rep. Insko, Bryant, Current, Neumann**

AN ACT TO ALLOW A SALES TAX REFUND TO A JOINT GOVERNMENTAL AGENCY CREATED TO OPERATE A CABLE TELEVISION SYSTEM.

OVERVIEW: This act allows cities that jointly operate a cable television system to obtain a refund of State and local sales and use tax paid by the entity on purchases made between July 1, 2007, and June 30, 2010. The request must be made in writing before January 1, 2011.

FISCAL IMPACT: The estimated fiscal impact of this provision for the State's General Fund is a revenue loss of less than $25,000; it also reduces local sales tax revenues by approximately $5,000. *(For a more complete fiscal analysis, see NC 2010 Legislative Session Budget and Fiscal Policy Highlights:* http://www.ncleg.net/fiscalresearch/highlights/highlights_pdfs/2010_Session_Highlights.pdf*)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 22, 2010.

ANALYSIS: Cities and counties may apply for an annual refund of the State and local sales tax paid by the governmental entity on direct and indirect purchases of tangible personal property, other than electricity and telecommunications service. Other governmental entities allowed this refund include various regional authorities and joint agencies created by interlocal agreements to operate a public broadcasting television station.

MI Connection is a locally owned and operated cable and Internet system serving the towns of Mooresville, Davidson and Cornelius in the counties of Mecklenburg and Iredell. The

municipalities have created a joint agency through an interlocal agreement pursuant to G.S. 160A-462 to operate a cable television system. A cable television system is one of the listed systems that a municipality has the authority to operate as a public enterprise under Article 16 of Chapter 160A of the General Statutes.

Under current law, a city that operates a cable television system may obtain a sales tax refund of the purchases it makes. However, because the cities that operate MI Connection do so as a joint agency, they are not entitled to the sales tax refund. The only joint agency allowed a sales tax refund is one that operates a public broadcasting television station.

This act enables cities that have created a joint agency to operate a cable system that provides video programming to obtain a refund of State and local sales and use tax paid by the entity on purchases made between July 1, 2007, and June 30, 2010. Ordinarily, a request for a refund is due within six months of an entity's fiscal year, and it is barred if it is received more than three years after the due date. However, for purposes of the refund allowed by this act, the request must be made before January 1, 2011.

The act limits the refund provision to a specified time period in deference to the General Assembly's continued study of local government owned and operated communication systems. Senate Bill 1209 would have restricted the issuance by a local government of non-voted debt in the form of certificates of participation for the purpose of financing a communication system, such as a cable system or a system that provides internet access service. The General Assembly did not enact the restriction, but it did authorize the Revenue Laws Study Committee to continue to study local government owned and operated communication services.[115] The time period in the act corresponds to the time when MI Connection undertook large capital expenditures to begin the operations of the cable system.

Use of 911 Funds.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-158	**HB 1691**	**Rep. Bryant, Faison, Sager, West**

AN ACT TO AMEND THE STATUTES GOVERNING EMERGENCY TELEPHONE SERVICE, AS RECOMMENDED BY THE HOUSE SELECT COMMITTEE ON THE USE OF 911 FUNDS, AND TO INCREASE FUNDS FOR SUPPLEMENTAL PEG CHANNEL SUPPORT.

OVERVIEW: This act makes various changes to the statutes governing Emergency Telephone Service, and increases the funding available for supplemental PEG channel support.

FISCAL IMPACT: This act has no impact on General Fund revenues.

EFFECTIVE DATE: Except as otherwise provided, this act became effective July 1, 2010.

ANALYSIS:

[115] S.L. 2010-152, Section 7.5.

911 Emergency Telephone Service

Prior to 2007, local government entities collected a 911 service charge from subscribers of local telephone providers, and the Wireless 911 Board collected a monthly service charge on each subscriber of wireless providers. The entire fee collected by local governments, and a portion of the fees collected by the Wireless 911 Board was distributed to "public safety answering points" (PSAP). Each PSAP is the public safety agency that receives incoming 911 calls and dispatches public safety agencies in response. Funds from the Wireless 911 Board not distributed to PSAPs were used to reimburse wireless providers for the costs of updating equipment necessary for PSAPs to geographically locate individuals who call 911 from wireless phones. In 2007, the local 911 service charge was eliminated and a new statewide administrative system was adopted for collecting the 911 service charge and distributing the funds. The 911 Board oversees the distribution of funds to PSAPs and wireless providers. The amount of the distributions to each eligible PSAP is based on the prior distribution to the PSAP from both the local service charge and the Wireless 911 service charge. Due to the differences in the fee that was previously collected on the local level, the distribution to some PSAPs was insufficient to cover actual costs while other PSAPs received distributions that far exceeded the actual cost of providing 911 service.

This act makes the following changes to the statutes governing Emergency Telephone Service:

The 911 Board. – The membership of the 911 Board is changed to increase the total number of local government representatives. One position representing a Commercial Mobile Radio Service (CMRS) provider, and one position representing the National Emergency Number Association (NENA) are removed. Two positions are added to the Board: a fire chief with experience operating or supervising a PSAP upon the recommendation of the NC Firemen's Association, and a Rescue or Emergency Medical Services Chief with experience operating or supervising a PSAP upon the recommendation of the NC Association of Rescue and Emergency Medical Services. The Act also prohibits Board members from serving more than two terms.

The Act amends the authority of the 911 Board to allow the Board to establish operating standards for PSAPs that receive distributions from the Fund, to create, design, or acquire public education materials regarding the proper use of 911, and to pay a private vendor for the provisioning of a network for the purpose of providing 911 service. The Board is authorized to increase from 1% to 2% the percentage of funds it retains for administrative expenses.

PSAP Distributions. – The 911 Board is authorized to determine the monthly distributions to eligible PSAPs. The distribution of funds to eligible PSAPS will be based on the cost of providing 911service, rather than on prior distribution levels. The new distribution amount is based on a formula adopted by the Board and is effective for distributions beginning in fiscal year 2011. The Board must notify each PSAP of the estimated distributions of the next fiscal year by December 31st of the prior year, and notify each PSAP of the actual amount of distributions by June 1.

Base amount formula: The Board must establish a formula to determine each PSAP's base amount. The formula must consider information including population, area served, and cost history.

Additional distributions: The Board may increase the distribution to a PSAP above its base amount if the PSAP receives less than its eligible costs in any fiscal year. The Board may not distribute less than the base amount unless the PSAP carries forward excess amounts.

Reconsideration: The Board must provide a procedure for a PSAP to request a reconsideration of its distribution or eligible expenses.

Carry forward: A PSAP may carry forward to the next fiscal year up to 20% of the total funds disbursed by the Board during a fiscal year for eligible expenditures for capital outlay, capital improvements, or equipment replacement. If more than 20% is carried forward, the Board may use the amount carried forward to lower the PSAPs annual distributions.

Fund Use and Fund Balance. – The use of the 911 Fund is expanded to include dispatch equipment within the building where the PSAP is located excluding the costs of base station transmitters, towers, microwave links and antennae used to dispatch emergency call information from the PSAP. The use is also expanded to include training specific for supervising and training a primary PSAP.

Due to the restriction on use of funds and the inequality in PSAP distributions under the prior law, some PSAPS have accumulated a large fund balance of distributed funds that are not required for eligible expenses. A PSAP may use 50% of its fund balance on July 1, 2010 for public safety needs, including costs that are not eligible expenses under G.S. 62A-46.

Statewide Projects. – The 911 Board is authorized to implement statewide projects for the benefit of 911 service. Under current law, surplus funds designated to be used for reimbursement for CMRS providers may be reallocated to the PSAP Grant Account. The Grant Account is redesignated the PSAP Grant and Statewide Projects Account. In order for the Board to use funds for a statewide project, the Board must determine the project is consistent with the 911 Plan, is cost effective and efficient when compared to the aggregated costs of similar projects if implemented by primary PSAPs, the expenses are eligible under the Fund, and the project has a statewide benefit.

Supplemental PEG Channel Support

S.L. 2007-151, the Video Service Competition Act, equalized the taxation of video programming services and replaced locally negotiated franchises of cable service with a State-issued franchise. The 2007 legislation distributed a portion of the sales tax revenue derived from video programming to cities and counties. The distributions are made quarterly. City and county revenue from the video programming tax has exceeded the projections of anticipated revenue.

G.S. 105-164.44I(b) designates $2 million of the video programming sales tax revenue distributed to cities and counties for Supplemental PEG channel support.[116] Up to $6,250 per quarter ($25,000 per year) may be distributed for each certified channel. The amount distributed per PEG channel depends on the total number of PEG channels certified. For the first quarter of 2010, there were 107 certified PEG channels. Each certified channel eligible to receive funding received $4,672.90 for that quarter.

Although the amount of sales tax revenue has exceed expectations, the amount distributed per PEG channels has been less than anticipated due to a greater number of certified PEG channels than expected. The 2007 legislation anticipated there would be excess revenue dedicated to PEG channel support. Excess revenues not expended for Supplemental PEG support would be transferred to the PEG Grant Fund, administered by e-NC Authority.[117] With the higher number

---

[116] A PEG channel is a channel set aside by a cable operator for public, educational, or governmental use. To receive a distribution of the Supplemental PEG channel support funds, a city or county must certify the PEG channels provided to the city or county for its use.

[117] A grant may only be used for capital expenditures necessary to provide PEG channels. The size of a grant may not exceed $25,000, and an applicant may receive no more than one grant per fiscal year. The applicant must match the grant on a dollar-for-dollar basis. The Authority must publish an annual report on the grants awarded from the Fund.

of PEG channels, there are not excess Supplemental PEG support revenues to transfer to the PEG Grant Fund.

This act repeals the PEG Grant Fund and increases the revenues from the video programming sales tax designated for Supplemental PEG channel support to $4 million per year. Cities and counties must continue to certify PEG channels and may certify up to three PEG channels. The yearly cap on funding per PEG channel is removed. Each PEG channel will receive a proportional share of the total revenues available. Based on the number of certified PEG Channels in the first quarter of 2010, each PEG channel would receive approximately $9,300 per quarter. The repeal of the PEG Grant Fund was effective July 1, 2010. The increase in Supplemental PEG Channel support is effective July 1, 2011.

Economic Incentives Alignment & Changes.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-166	**SB 1215**	**Senator Jenkins**

AN ACT TO INCREASE UNIFORMITY IN SUNSET AND REPORTING REQUIREMENTS OF ECONOMIC INCENTIVES TOOLS AND TO ELIMINATE NONUTILIZED ECONOMIC INCENTIVES.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, does the following:

- Harmonizes sunset and reporting features and requirements across the State's various economic incentives.
- Creates a single, unified economic incentives report that contains the information currently reported separately for each economic incentive.
- Deletes obsolete credits under Articles 3C and 3G of Chapter 105 of the General Statutes.

FISCAL IMPACT: Fiscal Research estimates no fiscal impact for fiscal year 2010-2011. For subsequent fiscal years, Fiscal Research estimates a fiscal impact of roughly $2.14 million. *(For a more complete fiscal analysis, see NC 2010 Legislative Session Budget and Fiscal Policy Highlights. Available online:* http://www.ncleg.net/fiscalresearch/highlights/highlights_pdfs/2010_Session_Highlights.pdf*)*

EFFECTIVE DATE: This act became effective July 1, 2010, and included effective date language that ensures that sales and use tax refund eligibility are not affected.

ANALYSIS: Under prior law, many of the economic incentives enacted as the Article 3 credits, the income tax credits in Article 4, and the sales and use tax benefits in Article 5 had some combination of reporting requirements[118] and sunset provisions; however, those requirements were not uniformly set out in each incentive. Where reporting requirements were set out, there

[118] Currently, there is no reporting requirement for Article 3H or for sales and use tax refunds for analytical services, for railroad intermodal facilities, or for vehicle parts for motorsports racing teams.

were inconsistencies with respect to itemization by taxpayer,[119] itemization by credit,[120] the reporting entity,[121] and other miscellaneous differences.

In addition, there were two economic incentives that were either never utilized or were no longer being utilized. The first was the credit in Article 3C for large recycling facilities, which was intended for Wisconsin Tissue; however, that company never located in North Carolina. The second credit was for major computer manufacturing facilities in Article 3G. Other than the Dell facility for which the credit was enacted, no other taxpayer utilized that credit.

Part I of the act requires data on each of the State's economic incentives to be reported in a single economic incentives report and establishes sunsets for various economic incentives, as provided in the chart below. Part II of the act eliminates obsolete economic incentives. Part III of the act makes conforming changes to various statutory provisions. The following table describes the changes in more detail by section number of the act:

Section Number(s)	Effect
1.2	Adds requirement of itemization by taxpayer and by credit to the Art. 3B (Business and Energy Tax Credits) report.
1.4, 1.6	Adds requirement of itemization by taxpayer to Arts. 3D (Historic Rehabilitation Tax Credits) and 3E (Low-Income Housing Tax Credits) report, respectively.
1.8	Creates reporting requirement for Art. 3H (Mill Rehabilitation Tax Credits).
1.13	Transfers reporting requirement for G.S. 105-130.46 (credit for exporting cigarettes and increasing employment) from the corporation claiming the credit to DOR and harmonizes reporting requirements.
1.17, 1.18, 1.19, 1.20	Separates and categorizes the current sales and use tax refunds, all of which are currently found in G.S. 105-164.14, into three types of refunds: (1) refunds that were enacted for non-industrial facilities for economic incentives purposes (found in the newly created G.S. 105-164.14A), (2) refunds that were enacted for industrial facilities for economic incentives purposes (found in the newly created G.S. 105-164.14B), and (3) refunds that were

119 While itemization by taxpayer for economic incentives credits is generally required, it is not currently required by the reporting requirements of Articles 3B, 3D, or 3E.

120 Both Articles 3B and 3J contain multiple credits. While Article 3J's reporting provisions require itemization by credit, Article 3C's reporting provisions do not.

121 Generally speaking, the reporting entity is the Department of Revenue for each economic incentives report required; however, the reporting entity differs for Article 3C (in which Revenue and Commerce jointly report) and for the credit for utilizing State ports to export cigarettes while increasing employment (in which the corporation claiming the credit reports).

	not enacted for economic incentives purposes (remaining in G.S. 105-164.14)[122].
1.21	Creates the economic incentives report.
1.1, 1.2, 1.3, 1.4, 1.6, 1.7, 1.9, 1.10, 1.11, 1.12, 1.13, 1.14, 1.15, 1.16	Makes conforming and technical changes to the reporting requirement necessary to transfer the current, separate reports into a new, unified annual report.
1.5, 1.18	Proposes sunsets for Art. 3D historic rehabilitation credit (2014), and for the sales and use tax refund for low-tier machinery (aligns sunset to Art. 3J), motorsports racing vehicle parts (2014), analytical services supplies (2013), and railroad intermodal facilities (2038).
2.1	Eliminates credit for large recycling facilities.
2.2	Repeals Art. 3G (Tax Incentives for Major Computer Manufacturing Facilities).
Part III	Makes conforming changes.

Renewable Energy Incentives.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-167	**HB 1829**	**Representative Luebke**

AN ACT TO PROMOTE THE USE OF RENEWABLE ENERGY BY EXTENDING THE CREDIT FOR CONSTRUCTING RENEWABLE FUEL FACILITIES AND THE CREDIT FOR BIODIESEL PRODUCERS, REVISING THE TAX CREDIT FOR INVESTING IN RENEWABLE ENERGY PROPERTY, REINSTATING AND EXPANDING THE TAX CREDIT FOR A RENEWABLE ENERGY PROPERTY FACILITY, CLARIFYING THE AUTHORITY OF LOCAL GOVERNMENTS TO FINANCE ENERGY PROGRAMS, CLARIFYING THAT REAL PROPERTY DONATED FOR A CONSERVATION PURPOSE CAN BE USED ONLY FOR THAT PURPOSE, AND TO DESIGNATE THE APPROPRIATE PERSON TO PROVIDE A WRITTEN ALLOCATION OF THE FEDERAL §179D TAX

[122] Session Laws 2010-31 and 2010-91 extended the repeal dates from 2011 to 2013 for interstate passenger air carriers and aviation fuel for motorsports events and added pulp-to-paper manufacturing and turbine manufacturing to the industries eligible for sales tax refunds, respectively. However, these changes were not incorporated into Session Law 2010-166. A technical correction will be included in the 2011 Revenue Laws Technical Changes bill to adjust the repeal dates.

DEDUCTION FOR ENERGY EFFICIENT COMMERCIAL BUILDINGS OWNED BY A GOVERNMENTAL ENTITY.

<u>OVERVIEW:</u> This act, which embodies the energy incentive legislation enacted this session, does the following:

- Extends credits for constructing renewable fuel facilities and biodiesel producers.
- Modifies the credit for investing in renewable energy property by amending the definitions and adding combined heat and power property to the credit.
- Reinstates and expands the credit for a renewable energy property facility.
- Clarifies the local government authority to finance energy programs.
- Clarifies that real property donated for conservation purposes may only be used for those purposes.
- Clarifies who is responsible for making the allocation of the federal §179D tax deduction.

<u>FISCAL IMPACT:</u> The act will reduce General Fund revenues by $0.7 million in fiscal year 2010-2011 and $1.3 million in fiscal year 2011-2012. *(For a more complete fiscal analysis, see NC 2010 Legislative Session Budget and Fiscal Policy Highlights. Available online:* http://www.ncleg.net/fiscalresearch/highlights/highlights_pdfs/2010_Session_Highlights.pdf*)*

<u>EFFECTIVE DATE:</u> Except as otherwise noted, this act became effective when the Governor signed it into law on August 2, 2010.

<u>ANALYSIS:</u>

<u>Extension of Credit for Constructing Renewable Fuel Facilities and Credit for Biodiesel Producers</u>. – The General Assembly enacted a credit for constructing renewable fuel facilities in 2004.[123] The credit includes a 15% credit for the costs of constructing a facility for dispensing renewable fuel and a 25% credit for the costs of constructing a facility for producing renewable fuel. In 2006, the sunset was extended until January 1, 2011, and an enhanced credit was created for taxpayers that invest at least $400 million in three separate facilities over a five-year period.[124]

The General Assembly enacted a tax credit for certain biodiesel providers in 2006.[125] In order to qualify for the credit, the provider must be a producer of biodiesel (as opposed to an importer) that produces at least 100,000 gallons of biodiesel during the taxable year. The amount of the credit is equal to the per gallon excise tax paid by the producer on the biodiesel. The credit is repealed for taxable years beginning on or after January 1, 2010.

Section 1 of the act extends the sunset for both credits. Each credit is repealed for taxable years beginning on or after January 1, 2013.

<u>Changes to Credit for Investing in Renewable Energy Property.</u> – Under current law, the credit for investing in renewable energy property applies to biomass equipment, hydroelectric generators, solar energy equipment, wind equipment, and geothermal heat pumps and equipment. The amount of the credit for investing in renewable energy property is 35% of the cost of the property placed in service. In the case of renewable energy property that services a single-family dwelling, the credit must be taken for the taxable year in which the property is placed in service. For all other

[123] S.L. 2004-153.
[124] S.L. 2006-66, Section 24.7.
[125] S.L. 2006-66, Section 24.8.

renewable energy property, the credit must be taken in five equal installments, beginning with the taxable year in which the property is placed in service. The amount of the credit is subject to certain limits depending on the type of property and whether the property is placed in service in a residential or nonresidential setting. The credit will sunset on January 1, 2016.

Section 2 of the act makes the following changes to the credit for investing in renewable energy property:

Amends the definition of "cost" to follow the federal definition under the Internal Revenue Code. Prior to the act, the cost of leased property was determined by multiplying the annual rent by eight.[126] This definition is the same one that is used under the Bill Lee Act and Article 3J. In some instances, a developer will structure a project in such a way as to elect for federal purposes to pass through the federal tax credit to an affiliated entity that is leasing the equipment. In these instances, the actual cost of the renewable energy property and installation can be greater than the amount derived by multiplying the annual rent by eight. This change to the definition will allow a person who elects to pass through the federal credit to use the actual cost of the property when calculating the tax credit.

Creates a definition for the term "installation" that is consistent with the interpretation of the term by the Department of Revenue in private letter rulings. The tax credit is limited to $2.5 million per nonresidential installation. Because the term "installation" was not defined, investors routinely sought rulings from the Department of Revenue for clarification of this term and its application to particular projects. The Department had defined installation as "renewable energy property that standing alone or in combination with other machinery, equipment, or real property is able to produce usable renewable energy on its own."

Adds combined heat and power equipment to the types of property that is eligible for the credit. Combined heat and power equipment produces heat and electricity simultaneously. The paper and pulp industry is the primary State industry that uses combined heat and power equipment.

Amends the definition of wind turbine to include equipment used in relaying the electricity produced by a wind turbine by cable to the power grid.

Makes other technical and conforming changes to the statute.

This section of the act is effective for taxable years beginning on or after January 1, 2010.

Reinstate and Expand Credit for Renewable Energy Property Facility. – Prior to 2006, a corporation that constructed a facility in North Carolina for the manufacture of renewable energy equipment such as solar energy and wind equipment could receive a corporate income tax credit for the costs of constructing the facility.[127] The credit was equal to 25% of the installation and equipment costs of construction paid during the taxable year. This credit, which was never used, was repealed for costs incurred during taxable years beginning on or after January 1, 2006. Renewable energy equipment was defined as biomass equipment, hydroelectric generators, solar energy equipment, and wind equipment.

---

[126] G.S. 105-130.4(j)(2).

[127] This credit is distinguished from the credit in Section 2 of this act in that this credit is for constructing a facility that manufactures renewable energy equipment or property as opposed to a credit for the placement into service of such equipment or property once manufactured.

Section 3 of the act reinstates and expands the credit for a renewable energy property facility. The credit is also expanded to include a facility for the manufacture of major component subassembly for a solar array or a wind turbine facility. The credit is equal to 25% of the cost to the taxpayer of converting a facility, or 25% of the costs to the taxpayer of constructing and equipping the facility. Renewable energy property includes biomass equipment, combined heat and power equipment[128] hydroelectric generators, geothermal equipment, solar energy equipment, and wind equipment. The credit may be taken against the franchise tax or the income tax. The entire credit must be taken in five equal installments, beginning with the taxable year the facility is placed in service. If the facility is disposed of, or taken out of service, the taxpayer may not take any remaining installments. The credit is subject to the following limitations:

> The credit may not exceed 50% of the tax against which it is claimed for the taxable year. Any unused portion of the credit may be carried forward for the succeeding five years.
>
> A taxpayer that claims any other credit with respect to the construction of a facility to manufacture renewable energy property may not take this credit with respect to the same facility.

This section is effective for taxable years beginning on or after January 1, 2010, and sunsets for facilities placed in service on or after January 1, 2014.

Clarify Local Government Authority to Finance Energy Programs. – In 2009, the General Assembly authorized cities and counties to establish loan programs to finance energy efficiency improvements and the installation of distributed renewable energy sources that are permanently affixed to real property.[129] North Carolina cities and counties were eligible to obtain federal grant funds under the *American Recovery and Reinvestment Act of 2009* (ARRA), during the 2009-2011 biennium to finance certain energy-related programs. The Energy Efficiency Conservation Block Grants Program (EECBG) sought to assist eligible entities to reduce fossil fuel emissions, to reduce total energy use, and to improve energy efficiency in transportation and buildings. Cities and counties may use EECBG funds and any other unrestricted funds for the program. The loans may be used for energy efficiency improvements and the installation of distributed renewable energy sources that are permanently affixed to commercial and residential real property. The term of the loans may not be greater than 15 years, and the annual interest rate charged on the loans may not exceed 8%. The term "renewable energy source" has the same meaning as "renewable energy resource" in G.S. 62-133.8.[130]

Section 4 of the act clarifies that cities and counties may establish loan loss reserve funds to finance energy improvements, and may establish other energy programs funded through federal grants. This section also clarifies that cities and counties may use State and federal grants and loans, and property taxes for the financing program.

Clarify Use of Real Property Donated for a Conservation Purpose. – The General Assembly first enacted the conservation income tax credit in 1983. The credit is allowed to a taxpayer that donates real property for public beach access or use, public access to public waters or trails, fish and wildlife conservation, or other similar land conservation purposes. To qualify for the credit, the land must

---

[128] Combined heat and power equipment is added under the changes in Section 2 of this act.

[129] S.L. 2009-522.

[130] That definition does not include peat, fossil fuel, or nuclear energy resources, but does include solar electric, solar thermal, wind, hydropower, geothermal, ocean current or wave energy resource, biomass resource, waste heat, and hydrogen derived from a renewable energy resource.

be donated in perpetuity to and accepted by the State, a local government, or a body organized to receive and administer lands for conservation purposes and qualified to receive charitable contributions. The amount of the credit is 25% of the fair market value of the donated property interest, capped at $250,000 for individuals and $500,000 for corporations. This credit was taken by an individual after donating ocean front property in Currituck County to the Audubon Society, an organization whose mission is to conserve and restore natural ecosystems. The Audubon Society is currently seeking to sell the donated property to a group that plans to turn the property into a development that will include a hotel, shops, and condominiums.

Section 5 of the act clarifies that donations of real property must be for a qualifying use listed in the statute, and the donation must be subject to a perpetual restriction on the use of property.

Allocation of Federal §179D Tax Deduction for Energy Efficient Commercial Buildings Owned by a Governmental Entity. – To encourage businesses to incorporate energy efficiency into their operational plans, Congress enacted the section 179D energy tax deduction as part of the Energy Policy Act of 2005. This deduction relates to the design and construction of energy-efficient commercial buildings. The deduction allows a taxpayer to take an immediate expense, subject to a cap, for the cost of energy-efficient improvements that would normally take years to recover through depreciation. To qualify, energy-efficient improvements must reduce total annual energy and power costs with respect to interior lighting systems and heating, cooling, ventilation, and hot water systems by 50%. The deduction is allowed for the taxable year the property is placed in service, and it expires for property placed in service after December 31, 2013. [131] North Carolina also allows this deduction.[132]

For energy-efficient commercial building property expenditures made by a public entity, the IRS issued guidance on March 12, 2008, that allows the deduction to be allocated to the person primarily responsible for designing the property in lieu of the public entity. Some believe the deduction is underutilized in North Carolina for energy efficient property placed in governmental buildings owned by the State because designers do not know how to obtain the governmental allocation. Section 6 of the act clarifies the Secretary of Administration is the person responsible for providing the written allocation to the designer for property owned by the State.

Low-Profit Limited Liability Company.

Session Law	*Bill #*	*Sponsor*
S.L. 2010-187	**SB 308**	**Senator Jacumin**

AN ACT TO PROVIDE FOR THE FORMATION OF A LIMITED LIABILITY COMPANY AS A LOW-PROFIT LIMITED LIABILITY COMPANY.

---

131 The deduction was originally set to expire for property placed in service after December 31, 2007. Congress extended the sunset until December 31, 2013.

132 North Carolina, as part of the IRC Update legislation of 2006, conformed to this federal tax law deduction. The State also conformed to the extension of the sunset when it enacted the IRC Update legislation in 2009.

OVERVIEW: This act recognizes a new type of corporate designation known as a low-profit limited liability company (L3C).

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on August 3, 2010.

ANALYSIS: Chapter 57C of the North Carolina General Statutes provides for the formation of a limited liability company (LLC). A low-profit limited liability company is a LLC that is formed for both a business purpose and a charitable purpose that requires operation of the company in accordance with these three requirements:

To accomplish one or more charitable or educational purposes within the meaning of section 170(c)(2)(B) of the Code.

To operate so that no significant purpose of the company is the production of income or the appreciation of property.

To operate so that no purpose of the company is to accomplish one or more political or legislative purposes within the meaning of section 170(c)(2)(D) of the Code.

A LLC may choose to put these conditions on its operations by including them in its articles of organization and by operating in accordance with them. This act allows a company that meets these requirements to call itself a "low-profit limited liability company" and to use the designation "L3C."[133] Like a LLC, a L3C is subject to federal and State tax and investments in a L3C are not tax deductible.

The formation of a L3C is designed to facilitate program-related investments (PRI) by private foundations. Private foundations must distribute at least 5% of their capital for charitable purposes to maintain their nonprofit status. Although foundations often expend these funds through grants, they may also meet the expenditure requirement with IRS-sanctioned PRIs. A PRI is an investment that supports charitable activities but may involve the potential return of capital. An example of a PRI is a loan, a loan guarantee, and an equity investment in a charitable organization.

Foundations do not usually make PRIs without an IRS private letter ruling that the investment meets the IRS requirements as an acceptable PRI. The expense of obtaining a private letter ruling deters foundations from this form of investment. The founders of the L3C designation hope that the IRS or Congress will choose to treat an investment in a L3C as a PRI without the need for a private letter ruling because the three requirements to form as a L3C mirror the IRS requirements for a PRI. Neither the IRS nor Congress has evidenced any movement on this issue.

[133] Vermont became the first state to recognize the L3C as an official legal structure in April 2008, and Michigan become the second state in January 2009.

2009 Finance Law Changes

MODIFY CORPORATE APPORTIONMENT FORMULA.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-54	**SB 575**	**Senator Hoyle**

AN ACT TO ENCOURAGE THE LOCATION AND EXPANSION OF CAPITAL INTENSIVE COMPANIES IN THIS STATE BY PROVIDING FOR APPORTIONMENT OF CORPORATE INCOME BASED SOLELY ON THE SALES FACTOR FOR COMPANIES THAT MEET CERTAIN INVESTMENT AND QUALITY JOBS CRITERIA.

OVERVIEW: This act changes the corporate income tax apportionment formula used by a capital intensive multistate corporation meeting specific investment criterion from a three-factor formula based upon property, payroll, and double-weighted sales to a single sales factor formula. The apportionment formula determines the amount of a multistate corporation's income that may be taxable by North Carolina. A single sales factor formula reduces the income tax liability of a corporation with relatively large shares of its nationwide property in North Carolina but a relatively small share of its nationwide sales in North Carolina.

FISCAL IMPACT: The act reduces General Fund revenues by approximately $3 million annually beginning in fiscal year 2011-2012. The loss could become as great as $12.5 million a year by fiscal year 2018-2019. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act is effective for taxable years beginning on or after January 1, 2010.

ANALYSIS: A corporation that does business in more than one state must pay income tax to each of the states in which it has nexus. The U.S. Supreme Court cases have upheld the right of states to tax the income of multistate corporations so long as the income is fairly sourced to the taxing state. The conventional method used by states to source income has been the apportionment formula, which is used to derive an apportionment percentage. Generally speaking, a taxpayer multiplies its taxable income by its apportionment percentage to determine the amount of its income sourced to a state. The state's corporate income tax rate is applied to the corporation's income apportionable to that state.

Most states use an apportionment formula based on or substantially similar to the Uniform Division of Income for Tax Purposes Act (UDITPA).[1] The UDITPA formula is a composite of three factors: a property factor, a payroll factor, and a sales factor. The property factor represents the ratio of the taxpayer's real and tangible personal property in the taxing state to its real and tangible personal property everywhere. Likewise, the payroll factor and the sales factor represent a ratio of the taxpayer's payroll and sales in the taxing state to its payroll and sales everywhere.

[1] UDITPA dates back to 1957.

Under UDITPA, the sum of the three factors is divided by three, resulting in a taxpayer's apportionment percentage.

North Carolina shifted to a double-weighted sales factor apportionment formula in 1988 at the request of RJR Nabisco.[2] A double-weighted sales factor tends to favor home-state industries that have a concentration of their total facilities in a state but sell their products all over the country. Under North Carolina's current apportionment formula, the payroll and property factors are each weighted 25% and the sales factor is weighted at 50%; the sum of the four factors is divided by four.

This act creates a single sales factor apportionment formula at the request of Apple, who plans to build a major East Coast data center in Maiden, NC.[3] Apple will invest at least $1 billion in the infrastructure hub and it is expected to employ 50 full-time employees.4 Under the single sales factor formula, the total allocation of a corporation's nationwide profits to North Carolina is solely based on where the corporation's sales occur. This method of apportionment provides a tax reduction to a corporation with relatively large shares of its nationwide property and payroll in North Carolina but a relatively small share of its nationwide sales in North Carolina.

The act limits the single sales factor apportionment formula to a 'qualified capital intensive corporation'. The act defines a 'qualified capital intensive corporation' as one that meets all of the requirements listed below. At the time the General Assembly considered this legislation, no taxpayer met these requirements. However, it is anticipated that Apple will meet these requirements. The act provides that if no corporation has met these requirements by January 1, 2019, the single sales factor provision is repealed.

- The corporation's property factor must meet one of the following conditions:
    - The property factor as a percentage of the sum of the factors in North Carolina's double weighted sales factor apportionment formula must exceed 75%.
    - The average property factor for the preceding three years as a percentage of the average sum of the double weighted sales factor apportionment formula must exceed 75%.
- The Secretary of Commerce makes a written determination that the corporation has invested or is expected to invest at least $1 billion in private funds to construct a facility in this State within nine years of the time that construction begins.

[2] RJR Nabisco had plans for a large automated bakery in the Garner area. After the change was adopted, RJR Nabisco was bought out and forced to cut back on capital expenditures. The company never built the plant.

[3] Although the identity of the company was not made public during the legislative deliberations, Governor Perdue issued a press release on June 3, 2009, the same day she signed Senate Bill 575 into law, announcing that Apple selected North Carolina as the location for a new data center. Apple announced in July that it would locate the data center in Catawba County, in the town of Maiden. It had also considered locating the facility in Cleveland County.

[4] The Department of Commerce projects that a data center investment of $1 billion will create more than 3,000 jobs in the regional economy over the next 10 years.

- With respect to the facility that meets the $1 billion investment threshold, it must:
    - Be located in a county designated as a tier one or tier two area at the time construction began.[5]
    - Maintain the average number of employees it has at the facility during the first two years after the facility is placed in service for the remainder of time in which the corporation must complete the required $1 billion investment.
    - Meet the weekly wage standard set out in Article 3J.[6] The applicable weekly wage standard for Catawba County in 2009 is $592.
    - Provide health insurance for all full-time jobs at the facility.[7]

The act provides that a qualified capital intensive corporation must forfeit the benefit of the single sales factor apportionment formula prospectively if it fails to make the required investment in capital facilities within nine years. It does not require the recapture of any benefits already received. The act also provides that a qualified capital intensive corporation is ineligible for Article 3J tax credits[8] a grant from the Job Development Investment Grant Program[9] or a grant from the One NC Fund[10] with respect to a facility that met the $1 billion investment threshold. Lastly, the act encourages qualified capital intensive corporations to utilize the Employment Security Commission and cooperating local agencies as a first source for recruitment of employees.

In 2006 and 2007, the General Assembly enacted exemptions from the sales and use tax for data centers that meet certain conditions[11] In January of 2007, Google announced its decision to invest $600 million in a new facility in Caldwell County in Lenoir, North Carolina.[12] G.S. 105-164.13(55) exempts an eligible Internet data center from sales tax on electricity and on certain business property located and used at the data center. G.S. 105-187.51C imposes a privilege tax, in lieu of a sales tax, on certain equipment and machinery purchased by an eligible data center. The rate of tax is 1% of the sales price of the equipment and machinery, capped at $80 per article. To be an eligible Internet data center under G.S. 105-164.13 or an eligible data center under G.S. 105-187.51C, a facility must meet certain use, location, wage, employee insurance benefits, and investment conditions. If Apple meets the conditions of these exemptions, it would be eligible for them as well as the modified corporate apportionment formula.

---

[5] Catawba County is designated as a tier 2 area in 2009.

[6] G.S. 105-129.83 provides that a job in a tier two area satisfies the wage standard if it pays an average weekly wage that is at least equal to the lesser of one hundred ten percent (110%) of the average wage for all insured private employers in the State and ninety percent (90%) of the average wage for all insured private employers in the county.

[7] Under G.S. 105-129.83, a taxpayer provides health insurance if it pays at least fifty percent (50%) of the premiums for health care coverage that equals or exceeds the minimum provisions of the basic health care plan of coverage recommended by the Small Employer Carrier Committee pursuant to G.S. 58-50-125.

[8] See Article 3J of Chapter 105 of the North Carolina General Statutes.

[9] See Part 2G of Article 10 of Chapter 143B of the North Carolina General Statutes.

[10] See Part 2H of Article 10 of Chapter 143B of the North Carolina General Statutes.

[11] Section 24.17 of S.L. 2006-66 and Section 31.22 of S.L. 2007-323.

[12] North Carolina also provided a grant to Google under the Job Development Investment Grant Program. The grant required the company to create 200 jobs in four years. In December 2008, Google withdrew its application for the grant incentive because it could not meet the job creation criteria. As of December 2008, the company had approximately 50 employees at the data center located in Lenoir, NC.

ADD DIVISION OF LESS TO CCPS.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-81, as amended by S.L. 2009-550	**HB 201 HB 274**	**Rep. Spear, R. Warren**

AN ACT TO FACILITATE THE TRANSFER OF MOTOR VEHICLES FROM THE UNITED STATES DEPARTMENT OF DEFENSE TO LOCAL GOVERNMENT UNITS, VOLUNTEER FIRE DEPARTMENTS, AND VOLUNTEER RESCUE SQUADS AND TO CLARIFY THAT THE DIVISION OF LAW ENFORCEMENT SUPPORT SERVICES IS A DIVISION OF THE DEPARTMENT OF CRIME CONTROL AND PUBLIC SAFETY.

OVERVIEW: This act provides exemptions from the highway use tax for State agencies acting as a pass-through for vehicles received through a United States Department of Defense program that are subsequently transferred to an emergency response unit, a law enforcement agency, or fire department. S.L. 2009-550 establishes the retail value of a vehicle transferred through this program for purposes of the highway use tax as the price paid by the purchaser of the vehicle rather than the market value of the vehicle.[13] The remainder of this act does not affect North Carolina tax laws and is not discussed below.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 11, 2009. The clarifying change in S.L. 2009-550 became effective when the Governor signed it into law on August 23, 2009.

ANALYSIS: Federal law provides programs through which vehicles are disbursed from the Department of Defense to emergency response units, local law enforcement, and fire departments.[14] The Federal programs require a state agency to facilitate the transfer of these vehicles. The Department of Crime Control and Public Safety (DCCPS) has been operating one of these programs for over 15 years. Last year, the DCCPS facilitated the transfer of over $1 million in vehicles to local law enforcement through this program.[15] A similar program facilitated by the Department of Environment and Natural Resources (DENR) has been in operation for the past two years and has facilitated the transfer of approximately 90 vehicles.

[13] Section 2.(e) of S.L. 2009-550, AN ACT TO MAKE VARIOUS CLARIFYING CHANGES TO THE GENERAL STATUTES AND SESSION LAWS.

[14] 10 U.S.C. §381 establishes procedures under which states and units of local government may purchase law enforcement equipment for counter-drug activities through the Department of Defense. 10 U.S.C. § 2576b establishes procedures under which states may purchase personal property to assist firefighting agencies.

[15] Section 17.5 of S.L. 2009-451 established a fee that a local law enforcement agency must pay to the Department of Crime Control and Public Safety for equipment it receives through the Department from the United States Department of Defense. The fee amount is set by the DCCPS. (see G.S. 143B-475.2)

When vehicles under this program are initially transferred, the department facilitating the program does not take title to the vehicle. The ultimate recipient, which is either an emergency response unit, local law enforcement, or a fire department, takes title to the vehicle and pays the highway use tax. If the recipient decides the vehicle is no longer needed, the vehicle is transferred to the department facilitating the program for transfer to another emergency response unit, local law enforcement, or fire department in the State. During this subsequent transfer, the department may take title, at which point the department would be required to pay highway use tax.

The highway use tax is payable when a person applies for a certificate of title for a motor vehicle. The rate of tax is 3% of the retail value of the vehicle. The retail value of a vehicle is its sales price if the vehicle is sold by a retailer. Otherwise, the retail value of a vehicle is its market value, which is presumed to be the value of the vehicle as set in a schedule of values adopted by the Commissioner of Motor Vehicles.

The program operated by DCCPS was momentarily halted this year after the Division of Motor Vehicles raised concerns about whether the facilitating agency should obtain title to the vehicles when initially transferred, and if so, whether the facilitating agency should pay the highway use tax. The question also arose as to the retail value of the vehicle, for purposes of the highway use tax, since the price paid for the vehicle may be less than its market value. This act, and S.L. 2009-550, resolve these issues.

Section 1 of this act and Section 2(b) of S.L. 2009-550 exempt the facilitating department from the requirement under G.S. 20-73 to apply for a certificate of title within 28 days of the transfer of the vehicle.[16] This exemption will allow both DCCPS and DENR to transfer vehicles under the federal programs without first obtaining title to the vehicle. If the agency does not have to obtain a title, it does not have to pay the highway use tax. Sections 2(a), (b), and (d) of S.L. 2009-550 also exempt the facilitating agency from the mileage and damage disclosure requirements of Chapter 20 of the North Carolina General Statutes.

Section 2 of this act exempts the facilitating agency from paying highway use tax when it obtains title to a vehicle from a unit of local government, volunteer fire department, or volunteer rescue squad for the purpose of transferring the vehicle to another unit of local government, volunteer fire department, or volunteer rescue squad. Section 2(e) of S.L. 2009-550 sets the retail value of a vehicle transferred under this federal program as the price paid for the vehicle rather than its market value.

STATE TREASURER INVESTMENTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-98	**SB 703**	**Senator Rand**

AN ACT CONCERNING INVESTMENTS OF THE STATE TREASURER.

[16] A person who fails to apply for a certificate of title within the required time frame is subject to a $15 civil penalty and is guilty of a Class 2 misdemeanor.

OVERVIEW: This act, requested by the Office of the State Treasurer, gives the State Treasurer more flexibility to invest special funds[17] held by the State Treasurer, with the goal of increasing portfolio return and better managing risk.

FISCAL IMPACT: No impact.

EFFECTIVE DATE: This act became effective when it was signed into law by the Governor on June 11, 2009.

ANALYSIS: The State Treasurer has statutory authority to invest certain special funds held by the Treasurer in excess of the amount required to meet the current needs and demands of these funds. Authorized investments are outlined by statute in G.S. 147-69.1(c)(1)-(7) and G.S. 147-69.2(b). This act provides the Treasurer with more flexibility and tools to invest these funds as follows:

- Authorizes the investment of funds in obligations that are convertible into equity securities. These are non-investment grade securities. These newly authorized investments, as well as the currently authorized investment in obligations, must bear one of the four highest ratings of at least one nationally recognized rating service when acquired. The act deletes the requirement that the obligations must not bear a rating below the four highest by any nationally recognized rating service that rates the particular security. (See G.S. 147-69.2(b)(4)).
- Permits investment in asset-backed securities that bear a rating below the four highest by any nationally recognized rating service that rates the particular securities. (See G.S. 147-69.2(b)(6)).
- Requires the Treasurer to invest assets of the Retirement Systems[18] so that no less than 20% of these assets are at all times invested in investments authorized by G.S. 147-69.2(b)(1)-(6). This liquidity requirement is designed to ensure that funds are available to meet the cash needs of the Retirement Systems. (See G.S. 147-69.2(b)(6a)).
- Authorizes the Treasurer to make investments pursuant to G.S. 147-69.2(b)(1)-(6) directly, or indirectly through contractual arrangements as long as the indirect investment is managed by an investment manager that has assets under management of at least $100,000,000. (See G.S. 147-69.2(b)(6b)).
- Authorizes the Treasurer to invest the assets of the Retirement Systems in obligations and other debt securities, including debt securities convertible into other securities, that do not meet the investment requirements of G.S. 147-69.2(b)(1)-(6) and (7) as long as these investments in credit opportunities meet all of the following requirements:
  - The investments must be made through the following investment entities or vehicles: investment companies registered under the Investment Company Act of

---

[17] These special funds are listed in G.S. 147-69.2 and include, among others, the various State and local governmental employee retirement systems. The employee retirement systems are supported by investment returns, employee contributions, and employer contributions.

[18] The following systems are referred to collectively as the Retirement Systems: the Teachers' and State Employees' Retirement System, the Consolidated Judicial Retirement System, the Firemen's and Rescue Workers' Pension Fund, the Local Governmental Employees' Retirement System, the Legislative Retirement System, and the North Carolina National Guard Pension Fund.

1940, individual, common collective trust funds of banks and trust companies, group trusts and limited partnerships, limited liability companies or other limited liability investment vehicles that invest primarily in investments authorized by G.S. 147-69.2(b)(6c) and through contractual arrangements. If the investment is through a contractual arrangement, the investment manager for each investment must have assets under management of at least $100,000,000.

  - The investments may not exceed 5% of the market value of all invested assets of the Retirement Systems.

  (See G.S. 147-69.2(b)(6c))

- Authorizes the investment of Retirement Systems' assets in equity securities traded on a public securities exchange or market organized and regulated under the laws of the jurisdiction of the exchange or market. Prior law permitted investment only in preferred or common stock. These investments are still capped at 65% of the market value of all invested assets of the Retirement Systems, but the act removes the 5% cap on assets that may be invested in the stocks or shares of a diversified investment company registered under the Investment Company Act of 1940. So long as each investment manager manages assets of at least $100,000,000 (was $50,000,000), Retirement Systems assets may be invested through the following:

  - Investment companies registered under the Investment Company Act of 1940.
  - Individual, common, or collective trust funds of banks and trust companies.
  - Group trusts.

  The act adds the following investments to this list:

  - Contractual arrangements in which investment managers have full and complete discretion and authority to invest assets specified in such contractual arrangements.

  (See G.S. 147-69.2(b)(8))

- Authorizes the Treasurer to directly invest Retirement Systems' assets in any equity securities represented in the S&P 500 Index or that have been publicly announced to be included in the S&P 500 Index. The act eliminates certain statutory limitations on the investments of Retirement Systems' assets. The act, however, maintains the requirement that no more than 1½% of the market value of the Retirement Systems' assets be invested directly in the stock of a single corporation, and the total number of shares in that corporation not exceed 8% of the issued and outstanding stock of the corporation. Prior to this legislation, all stock management was outsourced. The Treasurer will still outsource most stock management, but the direct management of some funds should allow the Treasurer greater access to market data and savings in fees. (See G.S. 147-69.2(b)(8)).

- Authorizes the Retirement Systems' assets to be invested in inflation resistant assets such as commodities, timberlands, real estate, and treasury inflation protected securities.[19] As some of the other investments authorized by this act, these investments must be made through investment companies registered under the Investment Company Act of 1940,

[19] The cash flows from treasury inflation protected securities are based on inflation; as inflation sets in periodic interest payments increase.

individual, common or collective trust funds of banks and trust companies, group trusts and limited liability investment vehicles and through contractual agreements in which the investment manager has full discretion and authority to invest Retirement Systems assets in these investments. For each investment allowed under G.S. 147-69.2(b)(9a), the investment manager must manage assets of at least $100,000,000, and the investments authorized under subdivision (9a) must not exceed 5% of the market value of all invested assets of the Retirement Systems. (See G.S. 147-69.2(b)(9a)).

The act permits the Treasurer to use fees assessed under G.S. 147-69.2((b2) and (b3) to defray the cost of administering these investments. Subsection (b2) applies to the investment of public hospital funds deposited with the Treasurer, and subsection (b3) applies to the investment of UNC Hospitals at Chapel Hill funds deposited with the Treasurer.

The remaining changes to G.S. 147-69.2 are conforming and technical.

TEMPORARY FLOOR FOR MOTOR FUELS TAX RATE.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-108	**SB 200**	**Senator Jenkins**

AN ACT TO ESTABLISH A MINIMUM MOTOR FUELS TAX RATE FOR TWO YEARS.

OVERVIEW: This act establishes a minimum variable rate of 12.4¢ a gallon for calculation of the motor fuel tax rate, applicable for the period July 1, 2009, through June 30, 2011. With a minimum variable rate of 12.4¢, the motor fuel tax rate may be greater than 29.9¢ per gallon but it may not be less.

FISCAL IMPACT: The act increases revenue $50 million for fiscal year 2009-2010 and it is expected to increase revenue $17.5 million for fiscal year 2010-2011. Three-fourths of the revenue derived from the excise tax on motor fuel is allocated to the Highway Fund and the remaining quarter is allocated to the Highway Trust Fund.[20] *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 15, 2009.

ANALYSIS: This act establishes a minimum motor fuel tax rate of 29.9¢ a gallon for the period July 1, 2009, through June 30, 2011, by providing that the variable component of the rate may not be less than 12.4¢ a gallon. The motor fuel tax rate consists of a flat rate of 17.5¢ per gallon plus a variable rate based upon the average wholesale price of motor fuel. With a minimum variable rate of 12.4¢, the rate may be greater than 29.9¢ per gallon, but it may not be less.

The variable component of the motor fuel tax rate is equal to the greater of 7% of the average wholesale price of motor fuel during a base six-month period or 3.5¢ per gallon. The base

[20] One-half cent per gallon of the excise tax is allocated to various environmental funds. The remaining revenue is allocated to the Highway Fund or the Highway Trust Fund.

six-month period for the motor fuel rate applicable on and after July 1 ends March 31. The base six-month period for the motor fuel rate applicable on and after January 1 ends September 30. Based upon the average wholesale price of motor fuel for the base period April 1, 2008, through September 30, 2008, the motor fuel rate effective on and after July 1, 2009, would have been 27.8¢ a gallon.

In 2006, the General Assembly capped the variable wholesale component of the motor fuels tax at 12.4¢ per gallon, the wholesale rate for the period of January 1, 2006, through June 30, 2006.[21] The General Assembly extended the cap in 2007 from July 1, 2007, through June 30, 2009.[22] With the cap, the rate could be less than 29.9¢ per gallon, but it could not be greater. During this period, the rate fell to 29.7¢ per gallon for the period July through December 2007. Otherwise, it stayed at 29.9¢ per gallon.

CHANGES FOR BONDS AUTHORIZED UNDER ARRTA.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-140	**SB 754**	**Senator Clodfelter**

AN ACT TO AMEND THE NORTH CAROLINA GENERAL STATUTES TO ALLOW THE STATE TO TAKE FULL ADVANTAGE OF THE EXPANSION OF EXISTING BOND PROGRAMS AND THE CREATION OF NEW BOND PROGRAMS UNDER THE AMERICAN RECOVERY AND REINVESTMENT TAX ACT OF 2009 (ARRTA).

OVERVIEW: This act does two things:

- It authorizes local governments to issue several types of government bonds established under the American Recovery and Reinvestment Tax Act of 2009 (ARRTA).
- It authorizes the private sale of general obligation bonds that have a credit rating below "AA" or that are unrated and that are issued prior to December 31, 2010.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 19, 2009.

ANALYSIS:

[21] Section 24.3 of S.L. 2006-66. Section 2.2(g) of S.L. 2006-66 provided a reserve in the General Fund for the purpose of holding harmless the Highway Fund and the Highway Trust Fund in the event that the variable wholesale component of the tax would have exceeded 12.4¢ per gallon.
[22] Section 31.15 of S.L. 2007-323.

Authorize new bonds. – This act authorizes local governments to issue several types of government bonds[23] established under ARRTA. Bonds under these programs are either tax-exempt[24] bonds or tax credit bonds. Tax credit bonds are a recent alternative to traditional tax-exempt bonds. They are not interest-bearing obligations; instead, a taxpayer holding a tax credit bond is allowed a credit against federal income tax equivalent to the interest that the bond would otherwise pay. The bondholder must include the amount of the credit in gross income and treat it as interest income. The credit effectively replaces the interest that would be paid on an exempt bond, allowing the issuer to borrow interest-free. The types of bonds authorized under ARRTA are:

- **Build America bonds.** – Unlike tax credit bonds, which provide a tax credit in lieu of interest payments, build America bonds pay interest to the bondholders and also provide a tax credit. The bondholder must include the interest in gross income, but is allowed a credit against federal income tax liability for a portion of the interest payments received. The tax credit is equal to 35% of the interest payable on the interest payment date of the bond. These bonds must be issued before January 1, 2011. State and local governments may elect to receive a direct payment in the form of a refundable credit in lieu of the credit to the bondholder.

- **Qualified school construction bonds.** – ARRTA provides bond authority to states and local governments for school infrastructure through two primary tax credit bond programs: a new qualified school construction bond program and the extension of the qualified zone academy bond (QZAB) program.

  North Carolina's QZAB program is currently administered by the State Board of Education. The national volume cap for these bonds is $11 billion for 2009 and another $11 billion for 2010. There is also an annual cap allocated among the states based on their respective populations of individuals below the poverty line. North Carolina's QZAB allocation for 2009 is $44.1 million.

  The State Board of Education will also administer the statewide allocation of qualified school construction bonds, which are to be issued in the same manner and under the same guidelines as the QZABs. The statewide allocation to North Carolina under ARRTA for these bonds is approximately $187.2 million.[25] A bond is a qualified school construction bond if all of the following conditions are met:

---

[23] State and local bonds are classified as either governmental bonds or private activity bonds. Governmental bonds are primarily used to finance governmental functions and are repaid with governmental funds. Interest on these bonds is generally exempt from federal and State income tax. Private activity bonds are bonds that allow the state or local government to serve as a conduit for providing financing to nongovernmental entities. Interest on private activity bonds is not excluded from gross income for federal income tax purposes unless the bonds fall within certain defined categories.

[24] Federal law limits the amount of certain types of tax-exempt bonds that may be issued each year in the State. North Carolina has established the North Carolina Federal Tax Reform Allocation Committee (Committee) to manage the federal allocation and to decide which of the local bonds may be issued if the demand exceeds the supply. The Committee consists of the Secretary of the Department of Commerce, the Executive Assistant to the Governor for Budget Management, and the Treasurer.

[25] ARRTA provided that the 100 largest school districts in the United States are to receive a percentage of the total amount of bonds authorized. The following counties will receive a part of this special allocation:

- Mecklenburg - $25.96 million
- Cumberland - $15.95 million

- 100% of the available project proceeds of the issue of which it is a part are to be used for the construction, rehabilitation, or repair of a public school facility or to acquire land on which a facility funded by the same issue is to be built.
- The bond is issued by a state or local government within the jurisdiction of which the school is located.
- The issuer designates the bond as a qualified school construction bond under section 54F of the Internal Revenue Code.

- **Recovery zone facility bonds.** – Recovery zone facility bonds are a type of qualified private activity bond, the interest income of which is tax-exempt. The national limitation on the amount of these bonds that may be issued before January 1, 2011 is $15 billion. The IRS will allocate the national amount to the states based on an amount that bears the same ratio to the total limitation that its employment decline for 2008 bears to the aggregate of the 2008 employment declines for all of the states.

  A recovery zone facility bond is any bond issued before January 1, 2011 and where 95% or more of the net proceeds of the issue are to be used for recovery zone property. Recovery zone property is depreciable property constructed, reconstructed, renovated, or acquired by purchase by the taxpayer after the date on which the recovery zone designation took effect where substantially all of the use of the property is in a recovery zone and is in the active conduct of a qualified business by the taxpayer in the zone. A recovery zone is (1) any area designated as having significant poverty, unemployment, rate of home foreclosures, or general distress; (2) any area designated by the issuer as economically distressed by reason of the closure or realignment of a military installation; or (3) any area for which a designation as an empowerment zone or renewal community is in effect.

- **Recovery zone economic development bonds.** – Recovery zone economic development bonds are a type of qualified bond, which entitles the county or municipal issuer to elect to receive a 45% tax credit for the interest paid on the bond. Up to $10 billion in these bonds may be issued nationally before January 1, 2011. It is estimated that $351.7 million will be allocated to North Carolina. The proceeds of the bonds are to be used for qualified economic development purposes defined as expenditures for promoting development or other economic activity in a recovery zone.

- **Qualified energy conservation bonds.** – Qualified energy conservation bonds are a new type of tax credit bond authorized under the Emergency Economic Stabilization Act of 2008. These bonds provide a federal subsidy to assist state and local governments in financing energy conservation projects with respect to capital expenditures, research expenditures, expenses for mass commuting facilities, demonstration projects that promote green building technology, and other technologies that promote energy efficiency. ARRTA expands the program by increasing the national cap from $800 million to $3.2 billion. North Carolina's allocation is $95.7 million.

- Forsyth - $12.24 million
- Guilford - $17.15 million
- Wake - $17.30 million

Conform Federal Tax Reform Allocation Committee. – This act also amends the Article governing the Federal Tax Reform Allocation Committee (Committee) to reflect the addition of recovery zone facility bonds, recovery zone economic development bonds, and qualified energy conservation bonds under ARRTA. With this change, the Committee is authorized to manage the allocation of these new bonds and to study the ways in which these bonds can be utilized.

Authorize private sale of certain general obligation bonds. – Bonds issued by units of local government must be sold by the Local Government Commission (LGC) after advertisement and upon sealed bids, unless they meet one of the statutory exceptions. Under prior law, the following types of bonds could be sold at private sale:

- Bonds that a state or federal agency has previously agreed to purchase.
- Any bonds for which no legal bid is received within the time allowed for submission of bids.
- Revenue bonds and special obligation bonds issued pursuant to Chapter 159I of the General Statutes.
- Special obligation refunding bonds.
- Refunding bonds issued pursuant to G.S. 159-72, if the LGC determines that a private sale is in the best interest of the issuing unit.
- Bonds designated as qualified zone academy bonds pursuant to G.S. 115C-489.6, if the LGC determines that a private sale is in the best interest of the issuing unit.
- Project development financing debt instruments.

This act adds to the above list general obligation bonds issued pursuant to the Local Government Bond Act that have been rated by a nationally recognized credit rating agency at a credit rating below "AA" or that are unrated if they are sold prior to December 31, 2010.

The act also authorizes the private sale of bonds that are part of an issue in which the interest payments on some or all of the bonds are intended to be subsidized by payments from the federal government under federal tax laws, if the LGC determines that a private sale is in the best interest of the issuing unit. The purpose of this language is to permit the use of build America bonds, in which the interest subsidy is paid directly by the U.S. Treasury to the issuer of the obligations.

Conform Industrial and Pollution Control Facilities Financing Act. – The act makes conforming changes to the Industrial and Pollution Control Facilities Financing Act to take into account the recovery zone facility bonds authorized under ARRTA.

The Industrial and Pollution Control Facilities Financing Act authorizes the issuance of tax-exempt industrial development and pollution control bonds. Under this Act, a local political subdivision issues bonds, the proceeds of which are used to finance the acquisition and construction of industrial, pollution control, or other capital facilities to be used by a private company. The bonds are secured by and are sold exclusively on the basis of the company's obligation to make payments under a financing agreement entered into between the company and the political subdivision. Because the interest on the bonds is exempt from North Carolina and federal income taxes, the interest payments (made indirectly by the private company) are considerably lower than would be required in an ordinary taxable financing. The type and size of

facilities that may be financed by industrial development and pollution control bonds are limited by both federal and state law.

The act authorizes a county or city to designate an Industrial Facilities and Pollution Control Financing Authority as a governmental entity authorized to issue recovery zone facility bonds. It allows facilities that qualify as recovery zone property in connection with the issuance of recovery zone facility bonds to qualify as "special purpose projects" under the Act. Finally, it allows facilities used in the production of tangible or intangible personal property to qualify as "industrial projects" under the Act.

Conform North Carolina Capital Facilities Financing Act. – The act also makes changes similar to those made to the Industrial and Pollution Control Facilities Financing Act, to the North Carolina Capital Facilities Financing Act. It allows facilities used in the production of tangible or intangible personal property to qualify as "projects" under the North Carolina Capital Facilities Financing Act.

RESCIND ADVANCED PROPERTY TAX APPRAISAL.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-180	**HB 1530**	**Rep. Cole, Holloway, Burr, Starnes**

AN ACT TO VALIDATE THE SCHEDULE OF VALUES USED TO APPRAISE REAL PROPERTY FOR THE TAXABLE YEAR BEGINNING JULY 1, 2009, BY A COUNTY THAT ADOPTED A RESOLUTION TO POSTPONE A 2009 REAPPRAISAL BETWEEN JANUARY 1, 2009, AND JUNE 30, 2009.

OVERVIEW: This act validates a resolution adopted by a board of county commissioners between January 1, 2009, and June 30, 2009, to postpone a 2009 property tax reappraisal. The effect of the validated resolution is that the schedule of values adopted by the board of county commissioners and used to appraise real property in the county for its last reappraisal will remain the schedule of values for property tax appraisal purposes until the county reappraises real property in accordance with the statutory time schedule.[26]

FISCAL IMPACT: No General Fund impact.

EFFECTIVE DATE: This act became effective when it was signed into law by the Governor on June 26, 2009.

ANALYSIS: This past year's economic condition, in which the national median sales price for existing homes dropped by roughly 25%, the stock market began sliding, and North Carolina's

[26] G.S. 105-286 requires counties to reappraise real property at least every eight years. The purpose of a reappraisal is to help a county fairly and equitably distribute the tax burden between the different classes of property. To accomplish this purpose, a county may voluntarily advance its reappraisal schedule to a shorter cycle by passing a resolution setting a different reappraisal cycle. A county that has advanced its reappraisal cycle may also pass a resolution to go back to a longer cycle, so long as the octennial requirement continues to be met.

unemployment rate increased, was an impetus for counties to postpone their 2009 property tax reappraisals.[27] In 2009, six counties voted to repeal or postpone their 2009 revaluations. Four of the counties that had advanced their property tax appraisals and had already conducted reappraisals for the 2009 taxable year, chose to postpone the 2009 appraisals after January 1, 2009.[28] In April, 2009, the North Carolina Attorney General issued an advisory memorandum confirming the earlier opinions of the Department of Revenue and the School of Government that North Carolina law does not permit a county to rescind a revaluation once the schedule of values becomes effective on January 1. The advisory memorandum pointed out that under North Carolina law a board of county commissioners must review and approve a schedule of values before January 1 of the year they are applied, and that the value of real property is determined as of January 1 of the year in which the valuation is fixed. Because the statutes do not expressly authorize a county to repeal a schedule of values once it takes effect, such authority may not be read into the statutes. A county must therefore proceed with the schedule of values approved by the county commissioners. The memorandum also emphasized that if a county were allowed to rescind previous approval of an advanced reappraisal and the new schedule of values at any time during the year, then the tax rate determined by the county might not meet its financial needs.[29]

The act validates the resolutions adopted by Caldwell, Stanley, and Rockingham Counties, as well as that of any other county, to repeal or postpone the 2009 revaluations so long as the boards of county commissioners voted to do so by June 30, 2009.

TWO-THIRDS BONDS ACT OF 2008.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-209	**HB 1508**	**Rep. Owens, Goforth, Womble**

AN ACT TO MAKE TECHNICAL CORRECTIONS TO THE TWO-THIRDS BONDS ACT OF 2008 AND TO PROVIDE FOR THE ISSUANCE OF GENERAL OBLIGATION BONDS TO FINANCE THE COSTS OF THE BIOMEDICAL RESEARCH IMAGING CENTER.

OVERVIEW: This act modifies the Two-Thirds Bonds Act of 2008[30] in the following two ways:

---

[27] See Christopher B. McLaughlin, "The Revaluation Revolt of 2009", *Local Government Law Bulletin* No. 121 (September2009), available at www.sog.unc.edu/bulletins/lglb for a detailed discussion of the history of this legislation.

[28] Caldwell County passed a resolution on January 5, 2009, to delay its revaluation until 2011; Stanly County passed a resolution on January 20, 2009;Rockingham County passed its resolution on March 9, 2009; and Swain County abandoned its 2009 revaluation in June, 2009.

[29] A county must submit a tax rate to the governing board by June 1, and the rate must be approved by July 1. The tax rate, necessary to meet the financial needs of the county, is based upon the value of the taxable property.

[30] Section 27.9 of S.L. 2008-107, as amended by Section 2.7(c) and (d) of S.L. 2008-118.

- It changes the way the term 'biennium' is used for purposes of calculating the two-thirds bonds availability. The effect of this change is to extend the authorization for the sale of bonds for the Green Square Project into the 2009-2011 biennium.
- It adds as an authorized special indebtedness project the Biomedical Research Imaging Center at the University of North Carolina at Chapel Hill. The act authorizes the issuance of $223 million of non-voted general obligation bond indebtedness to finance the capital costs of this facility.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on June 29, 2009.

ANALYSIS: Last year, the General Assembly, in its continuation budget, authorized the issuance of $107 million of non-voted general obligation bond indebtedness to finance the Green Square Project. General obligation bond indebtedness is secured by the faith and credit and taxing power of the State. As a general rule, general obligation bond indebtedness must be approved by the voters. However, under Article V, Section 3(f)[31] of the North Carolina Constitution, the State may issue non-voted general obligation bonds in an amount not to exceed two-thirds of the amount by which it reduced its outstanding general obligation debt in the preceding biennium. The term 'biennium' is not specifically defined in the Constitution. The Two-Thirds Bonds Act of 2008 used the term 'biennium' to refer to any consecutive two-year period. Specifically, it referred to the two-year period ending June 30, 2008. Based upon this formula, the State could have issued up to $125 million of non-voted general obligation bonds for fiscal year 2008-2009. No bonds have been issued under this authorization yet.

The current bond counsel for the State of North Carolina interprets the term 'biennium' as used in Article V, Section 3(f) of the North Carolina Constitution to refer to the traditional State biennium beginning on July 1 of odd-numbered years and ending on June 30 of the second following year. Thus, two-thirds bonds may be issued during the biennium ending June 30, 2011 based on the amount of net debt reductions for the biennium ending June 30, 2009. This interpretation is consistent with the way the State applied the two-thirds provision for bonds authorized by legislation enacted in 1988 (S.L. 1987-1048) and in 1991 (S.L. 1991-760). With this change, the issuance of the two-thirds bonds authorized last session for the Green Square Project would be moved to the 2009-2011 biennium.

The Green Square Project consists of an office building for the North Carolina Department of Environment and Natural Resources, the construction of a Nature Research Center for the NC Museum of Natural Science, and an underground parking deck with 426 spaces. The Project also

---

[31] **"Sec. 3. Limitations upon the increase of State debt.**

(1) Authorized purposes; two-thirds limitation. The General Assembly shall have no power to contract debts secured by a pledge of the faith and credit of the State, unless approved by a majority of the qualified voters of the State who vote thereon, except for the following purposes:

…

(f) for any other lawful purpose, to the extent of two-thirds of the amount by which the State's outstanding indebtedness shall have been reduced during the next preceding biennium."

consists of another parking deck, authorized in S.L. 2006-231, which will house up to 900 spaces. The total cost of the Project, excluding the parking deck authorized in 2006, is $150 million. The General Assembly appropriated $25 million for the project last year. Parking receipts will service the debt for parking construction and the Friends of the Museum of Natural Science have committed $27.5 million towards the cost of the Nature Research Center and $15.5 million toward the cost of the exhibits.

This act also adds as a project to the Two-Thirds Bonds Act of 2008, the Biomedical Research Imaging Center at the University of North Carolina at Chapel Hill (BRIC). The act authorizes the issuance of $223 million of non-voted general obligation bond indebtedness to finance the capital costs of this facility.

Under the constitutional two-thirds limitation, the State may issue up to $486.8 million of non-voted general obligation bonds this coming biennium. Under the Debt Affordability Study, dated February 2009, the State's recommended debt affordability capacity for each of the next five years is $50.2 million. In conducting its analysis, the Treasurer's Office included anticipated debt of the Green Square Project. The addition of the BRIC project to the act would cause the State to exceed the recommended debt capacity. Therefore, the act also adjusts the indebtedness for several projects financed through special indebtedness to provide enough debt capacity, under the Debt Affordability Study, to add BRIC to the Two-Thirds Bonds Act of 2008.

EMS/FIRE DEPT. SALES TAX REFUND.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-233	**HB 511**	**Rep. Williams, Goforth, Lucas, E. Warren**

AN ACT TO REENACT THE SALES TAX REFUND FOR CERTAIN VOLUNTEER EMERGENCY RESPONSE PERSONNEL.

OVERVIEW: This act allows a volunteer fire department and a volunteer EMS squad that is exempt from income tax under the Internal Revenue Code (Code) a sales and use tax refund, regardless of how the nonprofit is organized.

FISCAL IMPACT: The act will reduce General Fund revenues by $2.4 million in fiscal year 2009-2010 and $2.5 million in fiscal year 2010-2011. The act will also reduce local revenues by $1.0 million in fiscal years 2009-2010 and approximately $1.0 million in each year thereafter. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act is effective July 1, 2008, and applies to purchases made on or after that date. The retroactive effective date refers to the date that the 2008 clarifying legislation became effective. The change made by this bill effectively reinstates the semiannual sales and use tax refund for volunteer fire departments and voluntary EMS squads.

ANALYSIS: During the 2008 Session, the General Assembly clarified the types of nonprofits that may receive a semiannual refund of State and local sales and use taxes paid by the nonprofit

on direct purchases of tangible personal property and services[32] for use in carrying on the work of the nonprofit entity. Prior to the clarification, the Department of Revenue had to determine whether an entity requesting a refund was a 'charitable institution.' To make its determination, the Department relied upon past determinations and court decisions. In May 2008, the North Carolina Court of Appeals appeared to expand what could be considered a 'charitable institution.'[33] The intent of the 2008 legislation was neither to expand nor limit the prior law's application but to clarify it.

The clarification provided a bright line test that used as its starting point nonprofits exempt from income tax under section 501(c)(3) of the Code. The clarification became effective July 1, 2008. After the passage of the legislation, some volunteer fire departments learned they no longer qualified for the sales and use tax refund because they were not organized as a section 501(c)(3) organization. Many of the volunteer fire departments organized prior to the mid-1970s organized as a section 501(c)(4) organization[34] because that is how, at the time, the IRS recommended they organize.

This act allows a volunteer fire department or a volunteer EMS squad that is exempt from income tax under the Code a sales and use tax refund, regardless of how the nonprofit is organized. A request for a refund for the first six months of a calendar year is due the following October 15, and a request for a refund for the second six months of a calendar year is due the following April 15. However, under G.S. 105-164.14(d), a refund is not barred unless it is applied for more than three years after its due date.

TAX INFO DISCLOSURE TO STATE TREASURER.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-283	**SB 691**	**Senator Dorsett**

AN ACT TO PERMIT DISCLOSURE OF CERTAIN TAX INFORMATION OF LOCAL GOVERNMENTS TO THE DEPARTMENT OF STATE TREASURER AND TO ENACT THE TREASURER'S GOVERNANCE AND TRANSPARENCY ACT OF 2009.

OVERVIEW: This act makes the following changes related to the authority of the State Treasurer:

- Permits the Department of Revenue to disclose certain tax information concerning local governments to the Treasurer's Office.
- Increases the membership of the State Treasurer's Investment Advisory Committee from five to seven members by adding two public members and changes the experience requirements of the public members.

---

[32] The refund does not apply to direct purchases of electricity, telecommunications service, or ancillary service.

[33] *The Lynnwood Foundation v. N.C. Department of Revenue.* 660 S.E.2d 611 (2008).

[34] Section 501(c)(4) refers to civic leagues or organizations not organized for profit but operated exclusively for the promotion of social welfare.

- Codifies the fiduciary standard to be applied to the Treasurer with respect to the discharge of his or her duties in connection with the retirement systems administered by the Treasurer's Office.

- Requires the Treasurer to make annual reports to the General Assembly on investments made under new grants of authority.[35]

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 10, 2009.

ANALYSIS: This act was requested by the Office of the State Treasurer and makes several changes related to the Treasurer's authority.

Disclosure of tax information. – The act creates a new exception in the tax secrecy statute by authorizing the Department of Revenue to release tax information to the Treasurer's Office concerning whether a local government has timely filed a withholding report, has charged a penalty, or has paid a penalty for failure to file the report. This information may be used by the Treasurer to determine compliance with the Local Government Finance Act.
Current law provides that the disclosure of tax information is prohibited unless the disclosure is for one of the purposes enumerated by statute. There are currently over 35 purposes for which disclosure is permitted. Individuals who disclose tax information in violation of the statute are guilty of a Class 1 misdemeanor. Public officials and employees who disclose tax information in violation of the statute are dismissed from office or employment and may not hold public office or public employment for five years after the violation.

Increased Investment Advisory Committee membership. – The State Treasurer is authorized to appoint an Investment Advisory Committee (Committee). Under prior law, the Committee consisted of five members: the State Treasurer, two members from the board of trustees of the Retirement Systems, and two public members. The public members were required to have experience in one or more of the following areas: investment management, real estate investment trusts, real estate development, venture capital investment, or absolute return strategies. The Committee has only advisory powers.

This act increases the membership of the Committee from five to seven members, with the two additional members to be appointed by the Treasurer as public members. The act also changes the experience requirements for the public members by removing the requirement for experience in real estate investment trusts and venture capital investments, and substituting experience in securities law.

Codification of fiduciary standard. – The State Treasurer is authorized to invest the assets of all the State-administered retirement systems. There are several limitations on the amount and types of investments that can be made with these funds. This act codifies the fiduciary standard applicable to the Treasurer with regard to the administration of the retirement systems. The standard was modeled on the Model Uniform Management of Public Employee Retirement Systems Act, which was approved by the National Conference of Commissioners on Uniform State Laws. Specifically, the Treasurer must discharge his or her duties as follows:

- Solely in the interest of participants and beneficiaries.

[35] The last three bullets were originally the contents of Senate Bill 632.

- For the exclusive purpose of providing benefits and paying reasonable administrative expenses.
- With the care, skill, and caution under the circumstances that a prudent person who was familiar with the matters would use in a like situation.
- Impartially, taking into account the differing interests of participants and beneficiaries.
- Incurring only appropriate and reasonable costs.
- In accordance with a good-faith interpretation of the law governing the Retirement Systems.

The act also sets standards to be used by the Treasurer in investing and managing the assets of the retirement systems, including that the Treasurer:

- Must consider the following circumstances:
    - General economic conditions.
    - The possible effects of inflation or deflation.
    - The role of each investment in the overall portfolio.
    - The expected total return and the appreciation of capital.
    - Needs for liquidity, regular income, and preservation or appreciation of capital.
    - The adequacy of funding based on reasonable actuarial factors.
- Must diversify the investments unless the Treasurer determines it is clearly not prudent to do so.
- Must make reasonable efforts to verify relevant facts.
- May invest in any kind of real property which the State is authorized to acquire under Article 6 of Chapter 146 of the General Statutes.
- May consider other benefits created by an investment in addition to return on the investment, only if the investment would be prudent even without the collateral benefit.

The Treasurer's compliance with this standard must be determined based on the facts and circumstances at the time the decision was made, not using hindsight. In addition, the Treasurer's investment and management decisions must be evaluated in light of the portfolio as a whole and as part of an overall investment strategy.

Reporting requirement. – The act also provides that when the Treasurer is granted broadened investment authority by the General Assembly regarding certain funds, the Treasurer must report in detail to the General Assembly regarding the investments. The report must be made for four years after the new authority is granted, and include the return on those investments, earnings, changes to value, and gains and losses in the disposition of the investments. The funds are:

- The General Fund.
- The Teachers' and State Employees' Retirement System.
- The Consolidated Judicial Retirement System.
- The Firemen's and Rescue Workers' Pension Fund.
- The Local Government Employees' Retirement System.
- The Legislative Retirement System.
- The North Carolina National Guard Pension Fund.

- Any idle fund.

DEFER TAX ON BUILDERS' INVENTORY.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-308	**HB 852**	**Rep. Dickson, Brubaker, Holliman, Wainwright**

AN ACT TO DEFER A PORTION OF THE PROPERTY TAX DUE ON REAL PROPERTY HELD FOR SALE BY A BUILDER.

OVERVIEW: This act creates a property tax deferral program to defer for a maximum of three years the portion of taxes on an unoccupied, unsold residence attributable to the construction of the residence by a builder.

FISCAL IMPACT: This act is estimated to result in a deferral of local property tax revenues in the amount of $30-$35 million in FY 2010-11 and $7-$12 million in FY 2011-12. Minimal or positive impact in subsequent years as program sunsets and deferred taxes are paid.

EFFECTIVE DATE: This act is effective for taxes imposed for taxable years beginning on or after July 1, 2010, and is repealed for taxes imposed for taxable years beginning on or after July 1, 2013.

ANALYSIS: North Carolina currently has six property tax deferral programs: (i) historic district property held as future site of historic structures , (ii) the circuit breaker tax deferral program , (iii) nonprofit property held as future site of low or moderate income housing , (iv) present use value (PUV) property , (v) working waterfront property , and (vi) historic property. Uniform tax provisions for all deferral programs include the following:

- Taxes that are deferred under one of these programs become a lien on the property, which is extinguished when the taxes are paid.
- The deferred taxes are due and payable on the day the property loses its eligibility for deferral as a result of a disqualifying event.
- Interest accrues during the deferral period as of the date the taxes would have originally become due without the deferral program.
- Upon disqualification, the tax for a year in which a disqualifying event occurs is computed without the benefit of the deferral program.

This act adds a seventh property tax deferral program for an occupant-ready residence constructed[36] and owned by a general contractor for resale on a parcel of real property. The amount of property tax liability that can be deferred is the portion of tax that represents the increase in the property value resulting from the construction of the residence on the property. For example, if the land value of unimproved real estate was $100,000, and the value of the property, as improved by the construction of a residence, was $400,000, the builder must pay the

---

[36] Construction activities limited to renovating, refinishing, rehabilitating, or remodeling do not qualify.

property tax on the land value ($100,000) but may defer the property tax liability for the value of the improvement ($300,000).

The deferred taxes are carried forward in the records of the county and, if applicable, the city in which the property is located until the occurrence of one of the following disqualifying events: (1) the builder transfers the residence; (2) the residence is occupied by the builder or another with the builder's consent; (3) five years from the time the improved property was first subject to being listed for taxation by the builder, or (4) three years from the date the improved property first received the property tax benefit provided by this deferral program. The uniform provisions for deferral programs apply to this inventory tax deferral program. Applications should be filed within the regular listing period and may be filed later if the board of equalization and review determines there is good cause for the lack of timely filing.

ENERGY SAVINGS CONTRACTS' CAP/PROGRAM ADMIN.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-375	**SB 304**	**Senator Clodfelter**

AN ACT TO INCREASE THE AMOUNT THE STATE MAY FINANCE UNDER GUARANTEED ENERGY SAVINGS CONTRACTS AND TO MODIFY THE REPORTING REQUIREMENTS.

OVERVIEW: This act increases the cap on guaranteed energy savings contracts and modifies the reporting requirements of the program.

FISCAL IMPACT: There is no net impact on General Fund revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on July 20, 2009.

ANALYSIS: State agencies and local governments have the authority to enter into financing contracts to finance the cost of energy conservation measures. Prior to this act, the aggregate principal amount payable by the State under these contracts was limited to $100 million. An energy conservation measure is a facility or meter alteration, training, or services that will provide anticipated energy savings with respect to a facility. The financing contracts are known as guaranteed energy savings contracts. Under the contract to implement energy conservation measures, all payments, except obligations on early termination, are to be made over time, and energy cost savings are guaranteed to exceed the cost of the contract.

The law provides that a guaranteed energy savings contract is not a pledge of the government's taxing power. The debt is secured by a lien on, or a security interest in, any part of the property with respect to which an energy conservation measure is undertaken and/or the land upon which the property is or will be located. It is anticipated that the energy savings will generate enough money to pay the debt service on the contract. This is a method of funding repair and renovation projects without impacting the State's debt capacity.

State agencies that enter into guaranteed energy savings contracts are required to report to the State Energy Office which, in turn, reports annually to the Joint Legislative Commission on Governmental Operations. State energy conservation measures are subject to inspection and compliance by the State Construction Office or the local building inspector. The cost of the evaluation of the contract by either an independent architect or engineer, or by the State Construction Office, and the costs of the necessary building inspections are included in the cost of the contract.

Before a guaranteed energy savings contract can be entered into, the Office of State Budget and Management must certify that resources are expected to be available to pay the amounts due under the contract. Next, the Council of State must approve the contract by resolution that sets out the maximum maturity and the maximum interest rates. The maximum maturity may not exceed 20 years. The State Treasurer also must approve the financing, finding that the amount to be borrowed is adequate and not excessive, that it will not require an excessive increase in any State revenues to provide for repayment, and that the special indebtedness can be incurred or issued on terms favorable to the State.

This act increases the limit on the contracts from $100 million to $500 million, and clarifies that the limit is a revolving limit based on the amount of contracts at any given time rather than a limit on the aggregate amount of all savings contracts entered into. The act requires a qualified provider to conduct a life-cycle cost analysis of each conservation measure in a final proposal. A life-cycle cost analysis considers certain costs of owning and using property over its economic life, including the initial costs, system repair and replacement costs, maintenance costs, operating costs, and salvage value. The act also requires local governments that enter into energy savings contracts to report the contracts and the terms of the contracts to the State Energy Office. Previously, local governments that entered into energy savings contracts were required to report the contracts to the Local Government Commission.

JDIG TECHNICAL MODIFICATIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-394	**HB 1516**	**Rep. Crawford, Dickson, Gibson**

AN ACT TO MAKE CERTAIN MODIFICATIONS TO AND EXTEND THE SUNSET OF THE JOB DEVELOPMENT INVESTMENT GRANT PROGRAM.

OVERVIEW: This act makes clarifying and technical changes to the Jobs Development Investment Grant program and extends the sunset of the program from 2010 to 2016.

FISCAL IMPACT: No impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on July 31, 2009.

ANALYSIS: In 2002, the General Assembly created a new economic development tool for new and expanding businesses in North Carolina, the Job Development Investment Grant (JDIG) Program. JDIG is used to attract businesses to the State by allowing a five-member Economic

Investment Committee[37] to award grants to businesses. The grants may be awarded over as many as 12 years, and the amounts of the grants are based on income tax withholdings from new jobs created by the businesses. The Committee may enter into no more than 25 agreements per calendar year and may commit no more than $15 million in any fiscal year under all agreements entered into during a single calendar year. When the General Assembly created the program, it imposed a two-year sunset on the authority of the Committee to enter into new grant agreements. The General Assembly has voted to extend this sunset three times since its enactment.[38] This act extends the program a fourth time, from January 1, 2010 to January 1, 2016.

The act also makes the following clarifying and technical changes to the program, upon the recommendation of the Department of Commerce.

- Section 1 removes the reference to 'negotiated' agreements because the form of the basic agreement is standard for all grantees. The term 'negotiated' has led some grantees to believe they may negotiate the terms required by the State.
- The act clarifies that the JDIG program awards grants, and that the program may enter into agreements with businesses to provide grants.
- Section 1 removes language that refers to the cap on annual grants for the year 2006.
- Section 2 clarifies that a business may apply for grants that include performance by related members of the business. The purpose of this change is to make it clear that the grantee is not the legal representative of the related member and that the related member has no legal right to grant payments. Current law provides that a business may not include performance by related members in its application for a grant unless the related members assign to the business any claim of right the related members may have to apply for grants individually.
- Section 2 changes the annual reporting requirements of the JDIG program as follows:
    - The report must include the annual maximum State liability under each grant awarded as well as the maximum total lifetime State liability under the grant.
    - The report may list the wage levels of jobs created by projects that received grants in increments of $10,000 as opposed to $5,000.
    - The report must identify any changes in criteria developed by the Economic Investment Committee to implement the program.
    - The report must indicate separately the number of awards made to new businesses and those made to existing, expanding businesses.
- Sections 3 and 5 change the method for reducing grants whenever a grantee defaults upon one or more of the provisions in the agreement. Previously, the Economic Investment Committee had to must formally approve an amendment to the grant agreement to implement the grant reduction. Under the act, the Committee and its staff may reduce the

---

[37] The members of the Committee are the Secretary of Commerce, the Secretary of Revenue, The Director of the Office of State Budget and Management, and two public members appointed by the General Assembly, one upon the recommendation of the President Pro Tempore of the Senate and the other upon the recommendation of the Speaker of the House of Representatives. G.S. 143B-437.54.

[38] S. L. 2004-124, S.L. 2005-241, and S.L. 2006-168.

amount or term of grant if a grantee fails to comply with the terms of the agreement. A grant agreement must include provisions providing the Committee with this authority. It also provides for a reduced payment due to default in the payment for the year in which the default occurred, rather than the following year.

- Section 4 clarifies that the grantees must provide annual reports showing withholding as well as identifying positions created during the year that remained filled at the end of the year.

CONTINUE SCHOOL CONSTRUCTION FUNDING.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-395	**HB 311**	**Rep. Yongue, Glazier, Johnson, Wainwright**

AN ACT TO CONTINUE THE CONSTRUCTION FUNDING OF SCHOOLS THROUGH THE FIRST AND THE SECOND ONE-HALF CENT SALES AND USE TAXES.

OVERVIEW: This act makes permanent the designation of a certain percentage of local sales and use taxes for public school capital outlay purposes or related debt retirement by eliminating the sunsets on those requirements.

FISCAL IMPACT: This act has no impact on General Fund revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act is effective January 1, 2010, and applies to sales made on or after that date.

ANALYSIS: A percentage of the first ½ cent and second ½ cent sales and use tax levied by counties must be used for public school capital outlays. Under both the first ½ cent and second ½ cent sales and use tax, the amount designated for public school capital outlay may be used to retire indebtedness incurred for public school capital outlay. However, if a county can demonstrate that it does not need the earmarked revenue to meet its public school capital needs, it may petition the Local Government Commission to authorize it to use the money for any public purposes. In making its decision, the Commission must consider not only the public school capital needs but also the other capital needs of the county.

First ½ Percent Sales and Use Tax. – Article 40 of Chapter 105 of the General Statutes provides counties that levy a one percent (1%) sales and use tax the authority to levy an additional one-half percent (1/2%) sales and use tax. For the first five years of the tax, 40% of the revenue must be used for public school capital outlay; for the next 23 years of the tax, 30% of the revenue must be used for public school capital outlay. This act amends G.S. 105-487 to require that after the first five years that the first one-half percent (1/2%) sales tax is in effect, 30% of the revenue must always be used for public school capital outlay or indebtedness.

Second ½ Percent Sales and Use Tax. – Article 42 of Chapter 105 provides counties that levy the one percent (1%) sales tax and the additional first one-half percent (1/2%) sales and use tax the authority to levy a second one-half percent (1/2%) sales and use tax. For the first 25 years of the

tax, 60% of the revenue must be used for public school capital outlay, unless the amount allocated to the county under the first one-half percent (1/2%) is greater than the amount allocated under the second one-half percent (1/2%) sales tax, the difference between the two amounts. This act amends G.S. 105-502 to require that 60% of the revenue from the second one-half percent (1/2%) sales tax, as designated in that section, must always be used for public school outlay purposes or to retire indebtedness incurred for that purpose during the five years before the indebtedness took effect.

SALES TAX: RELIANCE ON WRITTEN ADVICE BY DOR.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-413	**SB 909**	**Senator Clodfelter**

AN ACT EXTINGUISHING THE LIABILITY OF RETAILERS FOR SALES TAX OVERCOLLECTIONS MADE IN RELIANCE ON WRITTEN ADVICE OF THE SECRETARY OF REVENUE.

OVERVIEW: This act provides that if a retailer collects sales tax from a customer in excess of the amount that should have been collected, based on specific written advice it received from the Secretary of Revenue, the retailer is not liable to the customer for the overcollected amount. The act also clarifies that there is no change to the current requirement that a retailer must issue a refund to the customer prior to the retailer obtaining a refund from the Department.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: This act became effective when the Governor signed it into law on August 5, 2009.

ANALYSIS: This act provides that a seller is not liable to a purchaser if the seller collected and remitted sales and use tax in accordance with written advice it received from the Department.

All sales taxes, including over-collections, must be remitted to the Department. In the case of an overcollection, a purchaser's first course of remedy is to seek a refund from the seller who, in turn, may obtain a refund from the Department. A cause of action against the seller does not accrue until a purchaser has provided written notice to a seller, and the seller has had sixty days to respond. If the seller issues a refund or credit to the purchaser, the seller may then apply to the Department for the amount of the refund or credit. A seller is not entitled to a refund or credit unless the purchaser has been refunded or received a credit for the amount of tax erroneously charged.

A taxpayer may request specific advice from the Department. If the Department furnishes erroneous advice and the taxpayer reasonably relies on that advice, the taxpayer is not liable to the Department for any penalty or additional assessment attributable to the erroneous advice to the extent the following conditions are satisfied:

- The advice was reasonably relied upon by the taxpayer.
- The penalty or additional assessment did not result from the taxpayer's failure to provide adequate or accurate information.

- The Department provided the advice in writing or the Department's records establish that the Department provided erroneous verbal advice.

Current law already provides that a taxpayer (in this case, the seller) is not liable to the Department for any penalty or additional assessment if the advice it received from the Department was wrong. Under this act, a seller is immunized from liability with respect to a purchaser from whom it overcollected sales and use tax based on advice the seller relied upon from the Department.

FRANCHISE TAX-OVERBILLING OUT OF CAPITAL BASE.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-422	**SB 367**	**Senator Jenkins**

AN ACT TO REMOVE BILLINGS IN EXCESS OF COSTS FROM THE FRANCHISE TAX CAPITAL BASE FOR TAXPAYERS USING THE PERCENTAGE OF COMPLETION METHOD OF REVENUE RECOGNITION.

OVERVIEW: This act excludes from a corporation's franchise tax base all billings in excess of costs, effective for taxable years beginning on or after January 1, 2010.

FISCAL IMPACT: This act has the potential to impact General Fund revenues. However, according to the Department of Revenue a specific determination was not possible. Currently, the account is either incorrectly included in the liabilities total as definite and accrued, or properly excluded from this amount. Because the exclusion is not specifically reported on the return, it is not possible to quantify the number of taxpayers in compliance with current law or not in compliance. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act becomes effective for taxable years beginning on or after January 1, 2010.

ANALYSIS: This act exempts billings in excess of costs from surplus and undivided profits, thus excluding them from the franchise tax capital base.

The State imposes a franchise tax on C-corporations and S-corporations. The tax rate is $1.50 per $1,000[39] and is applied to a company's capital stock, surplus, and undivided profits.[40] The term "surplus" for franchise tax purposes has a broader and more inclusive meaning than the generally accepted accounting definition. G.S. 105-122(b) provides that surplus and undivided profits includes all liabilities, reserves, and deferred credits unless those items are specifically exempt. One of the exemptions from surplus and undivided profits is "definite and accrued legal liabilities." The Department of Revenue defines a definite and accrued legal liability as one that meets both of the following conditions:

[39] The minimum tax is $35.

[40] A corporation's capital base may not be less than 55% of the appraised value of tangible property in NC, nor less than its actual investment in tangible property in the State.

- The liability is definite in amount, meaning it is exactly determined and not merely accurately estimated.
- The liability will be incurred before the end of the taxable year.

Generally accepted accounting principles require that revenue be recorded in the period it is earned regardless of when it is billed or when cash is received. In long-term construction contracts, there is often a mismatch between actual billed revenue and earned revenue. Sometimes elements of a contract are billed in advance and sometimes they are delayed. The accounting solution to this problem is the percentage of completion method of revenue recognition. Under this method of accounting, where the costs can be reasonably estimated, revenue is recognized as production takes place. This method of accounting may result in "billings in excess of costs" or "cost in excess of billings." Billings in excess of costs is a balance sheet liability because it represents unearned income. Cost in excess of billings is a balance sheet asset. For purposes of the State's franchise tax, the balance sheet liability of "billings in excess of costs" is not considered a definite and accrued legal liability because it is based on estimates; therefore, it is included in a corporation's capital base.

The construction industry sought to change this interpretation because it resulted in contractors having to pay taxes on liabilities and for revenue they had not actually received. The act incorporates the industry position by providing that billings in excess of costs that are determinable using the percentage of completion principles are exempted from surplus and divided profits, and therefore, excluded from the franchise tax base.

REV LAWS TECH, CLARIFYING, & ADMIN. CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-445	**SB 509**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE TAX AND RELATED LAWS.

OVERVIEW: This act makes technical, clarifying, and administrative changes to the following taxes and related laws: privilege license, income, excise and insurance taxes; sales and use taxes and highway use taxes; property taxes; occupancy taxes; and motor fuel taxes.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: Except as otherwise specified, this act became effective when signed into law by the Governor on August 7. 2009.

ANALYSIS:

Section	Explanation
Privilege License, Income, Excise, and Insurance Tax Changes	
1	Clarifies the privilege license tax on home inspectors applies to an individual licensed under the Home Inspector Licensure Act so that associate home

	inspectors will be taxed similarly. S.L. 2008-206 imposed an annual State privilege license tax of $50 on a licensed home inspector but it failed to mention associate home inspectors. Without this change, an associate home inspector would be subject to local privilege license tax in each city that levies the tax.[41]
2	Moves the definitions from subsection (b) to a newly created subsection (b1). The current subsection (b) contains two different subdivision lists. This change puts the defined terms, listed by subdivisions, into a new subsection.
3	Clarifies that a recycling facility[42] that is eligible for the tax credit for investing in large or major recycling facility is not also eligible for the Article 3J tax credit for investing in business property. This section becomes for taxable years beginning on or after January 1, 2007, the year the Article 3J tax credits became effective.
4	Changes the term 'nonbusiness activities' to 'activities producing nonapportionable income', which is a defined term in the statute that sets out the manner in which corporations must allocate and apportion their income to North Carolina for income tax purposes. In 2002, the terms 'business income' and 'nonbusiness income' were replaced by apportionable and nonapportionable. This subsection was missed when those changes were made.
5	Clarifies that a corporate taxpayer may not use an alternative apportionment method unless it receives a written decision from the Secretary authorizing it to do so. A return that is not filed in accordance with the statutes is an improper return. This section specifically states that return prepared using an alternative apportionment formula without the permission of the Secretary is an unlawful return.
6	Corrects an effective date relating to changes made to the statute designating who may sign an income tax return. These changes were originally part of the major rewrite of the tax appeals procedure in 2007 (SB 242).
7	Repeals an unnecessary statute in the corporate and personal income tax laws. The Department of Revenue does not ask taxpayers to file a 'supplemental' return. A taxpayer files either an original return or an amended return. If the Department determines additional tax is due, it proposes an assessment.
8	Clarifies the reporting requirements for the film industry credit. The term 'claimed' may have several different meanings. The Department of Revenue requested clarity as to the meaning of the term.
9	Clarifies the application of the dollar cap amounts under the qualified business investment credit and the credit for certain real property donations in light of the 2009 Court of Appeals decision in the *North Carolina Department of Revenue v. Hudson* case. In that case, the court held that the statutory cap of $50,000 limits the amount a taxpayer may claim in a single tax year and allowed the taxpayer to carry forward amounts in excess of the cap. The change makes

[41] S.L. 2009-509 sunset the associate home inspector license. That legislation provides that the Home Inspector Licensure Board may not accept applications for associate home inspector licensees after April 1, 2011, and it may not renew an associate home inspector license after October 1, 2013.
[42] The General Assembly enacted the credit as a tax incentive for Nucor in 1985.

	clear that an individual may only carry forward unused amounts of the credit up to the cap rather than being able to carry forward amounts in excess of the cap.
10	Changes the date by which the State Treasurer must make a transfer from the General Fund to the North Carolina Health Insurance Risk Pool Fund. The statute provided that *within 75 days after the end of each fiscal year*, the Treasurer must transfer to the Fund an amount equal to the growth in net revenue from the gross premiums tax on insurance companies. Insurance tax returns are due by March 15. Insurance companies are also required to prepay their tax in installments. The first installment of the fiscal year is due by October 15. Therefore, until those installments are remitted, little or no funds are available for transfer. This section changes the date from within 75 days after the end of the fiscal year, or September 14, to November 1, as recommended by the Department of Revenue.
Sales and Use Tax and Highway Use Tax Changes	
11	Updates the reference to the Streamlined Agreement from June 23, 2007 to May 12, 2009. North Carolina does not need to amend its sales and use tax laws to conform to the changes made in the Agreement since June 23, 2007. A copy of the Agreement, as well as a document summarizing the changes made to the Agreement since June 23, 2007, may be found on the Streamlined Sales Tax Project's website: www.streamlinedsalestax.org
12	Makes two conforming changes to the general sales tax sourcing principles. It provides that direct mail is sourced to the location where the property is delivered, and if that is unknown, it is sourced to the location from which the direct mail was shipped. This change ensures compliance with the Streamlined Agreement. This section also codifies the long-standing sourcing method used for florist wire sales: the sale is sourced to the business location of the florist that takes the order for the sale.
13	Reorganizes the statutory subsection without making any substantive changes.
14	Replaces the word 'energy' with the word 'electricity' for consistency. This term appears in the statute enacted last year authorizing a sales tax refund for materials used to build a facility that manufactures solar electricity generating materials. This section is effective July 1, 2008, the effective date of the original provision.
15	Provides a new distribution methodology for the allocation of sales tax collected o modular homes to local governments. The methodology currently references the distribution under the third ½ cent local sales and use tax; but this tax is repealed effective October 1, 2009. A 2.5% State sales tax applies to the sale of a modular home. Twenty percent of the tax collected is distributed to the counties. This amounts to approximately $1 million annually. This section provides that 20% of the sales tax collected on modular homes will be allocated to the counties on a per capita basis, and distributed to the county and its municipalities as provided in the first ½ cent local sales tax.
16	Repeals an unnecessary highway use tax exemption. A transfer of a motor vehicle to a handicapped person from the Department of Health and Human Services after the vehicle is equipped by the Department for use by the

	handicapped is exempt from highway use tax. The exemption is not needed because the Department never takes title to the vehicle.
17	Corrects two incorrect statutory references.
18	Clarifies how a bundled transaction that includes food is taxed under the local option ¼ cent county sales tax article. *See GS 105-164.4D.*
19	Simplifies the Mecklenburg local sales tax in Chapter 1096 of the 1967 Session Laws without making any substantive changes. Currently, the administration of the sales and use tax under the Mecklenburg local act and Article 39 of Chapter 105 are the same with the exception of the distribution formula. Under the local act, proceeds are divided between the county and the cities on an ad valorem basis; Article 39 gives counties a choice between ad valorem and per capita.
Property Tax Changes	
20	Reinserts the word 'shares', which was inadvertently deleted from the definition of 'corporation' when changes were made in 2008 to the property tax homestead circuit breaker.
21	Modernizes the language.
22.(a)	Clarifies that the homestead exclusion applies uniformly to a husband and wife, regardless of how they hold title to the property.
22.(b)	Makes the following clarifying and technical changes to the homestead circuit breaker: • Clarifies that property owned by a qualifying owner must have been the owner's permanent residence for at least five consecutive years but that the owner's five-year occupancy does not have to be consecutive. • Clarifies that the occupancy and ownership requirement refers to 'length' of occupancy and ownership. • Clarifies that the homestead circuit breaker applies uniformly to a husband and wife, regardless of how they hold title to the property. • Removes an unnecessary word. • Clarifies that a person may defer the portion of the principal amount of tax that is imposed for the current tax year on the residence and exceeds the percentage of the qualifying owner's income. • Clarifies that only the deferred taxes for the last three years prior to the disqualifying event become due and payable. • Clarifies that notice of the sum of deferred taxes and interest that are due and payable must be sent annually to the mailing address of the residence subject to the circuit breaker benefit as opposed to mailing notice to each owner of the property.
22.(c)	Makes the following clarifying changes to the disabled veteran homestead exclusion:

	• Replaces the definition of 'owner' with a definition for 'qualifying owner'. • Provides that a disabled veteran must have 'separated' instead of 'been discharged' from a branch of the Armed Forces to reflect more clearly the language used by the Armed Forces. • Provides that the exclusion applies to a disabled veteran whose separation was also under honorable conditions. Prior law applied the exclusion only if the separation was honorable. • Clarifies that the surviving spouse of a disabled veteran is eligible for the exclusion as long as the spouse does not remarry. • Provides that the surviving spouse may also qualify for the exclusion if the Veterans Administration certifies that the veteran's death was the result of a service-connected condition. This new language would apply where the veteran died while on active duty and the death was the result of a service-connected condition or where the veteran died after discharge due to a service connected condition that did not rise to the level of total and permanent disability. • Clarifies that the exclusion is available to a disabled veteran who 'received' instead of 'receives' federal benefits to adapt the veteran's housing, since these benefits are generally a one-time payment. • Clarifies that the exclusion applies uniformly to a husband and wife, regardless of how they hold title to the property.
22.(d)	Section 22 of the act is effective for taxes imposed for taxable years beginning on or after July 1, 2009
23.(a)	Repeals a reference to an incorrect effective date for the wildlife conservation land tax benefit.
23.(b)	Repeals the provision in the working waterfront statute regarding application procedures because there is a general statute governing application procedures for property tax exemptions or exclusions.
23.(c)	Adds drug samples to the list of exempt property not requiring an application, effective for taxes imposed for taxable years beginning on or after July 1, 2008. Adds solar energy electric systems to the list of property excluded from taxation that must file a single application, effective for taxes imposed for taxable years beginning on or after July 1, 2008.
23.(d)	Adds working waterfront property to the list of property classified for taxation at reduced valuation that must file a single application, effective for taxes imposed for taxable years beginning on or after July 1, 2009.
23.(e)	Adds wildlife conservation to the list of property classified for taxation at reduced valuation that must file a single application, effective for taxes imposed for taxable years beginning on or after July 1, 2010.
23.(f)	Sets out the effective dates for section 23, as noted in the subsections above.

24.(a)	Makes the following changes to the combined motor vehicle registration and property tax system which provides for the collection of vehicle property taxes with the issuance and renewal of vehicle registrations. Adds the following definitions to G.S. 105-330: 'registered classified motor vehicle', 'unregistered classified motor vehicle', and 'registration fees'. • Amends G.S. 105-330.1 to add the following to the list of motor vehicles that are exempt from classification under the combined system: motor vehicles issued permanent registration plates and self-propelled property-carrying vehicles issued three-month registration plates at the farmer rate. • Amends G.S. 105-330.2(a) and (a1) to clarify the period in which the value of a classified motor vehicle is determined so that the date of valuation will continue to be January 1. If the value cannot be determined on January 1, then the value will be the most currently available January 1 retail value of the vehicle. Subsection (a) also clarifies that the situs of a vehicle is determined on the date registration is applied for or renewed and may not be changed until the next registration date. • Amends G.S. 105-330.2(b) to add language that the initial appraised value of a vehicle purchased from a dealer is the sales price, including all accessories attached to the vehicle. • Amends G.S. 105-330.2(b1) to clarify the right to appeal the appraised value or taxability of a vehicle as follows: require that the right to appeal must be set out in the combined tax and registration notice or the tax receipt, and require that the lessee of a motor vehicle be given the right to appeal the value if the lessee is required to pay the tax on the vehicle under the terms of the lease. • Amends G.S. 105-330.3 to add subsection (d) setting out the penalty for willfully attempting or aiding or abetting any person to evade or defeat the taxes imposed under the combined system, and to make technical and stylistic changes. • Amends G.S. 105-330.4 as follows: subsection (a) removes unnecessary language and adds language clarifying when taxes are due on an unregistered classified motor vehicle, a classified motor vehicle registered under the staggered system, a classified motor vehicle registered under the annual system, and a classified motor vehicle that has a temporary registration plate or a limited registration plate; subsection (b) deletes unnecessary language; subsection (c) clarifies that the enforcement remedies for unpaid property taxes apply only to unpaid taxes on an unregistered classified motor vehicle. • Amends G.S. 105-330.5 by deleting unnecessary language, making stylistic changes, and adding the following clarifications: subsection (a) authorizes the Department to select a third party contractor to prepare and mail combined tax and registration notices, clarifies the contents

	of the combined notice, clarifies that if there is a pre-payment of taxes then the tax rate will be the rate in effect on the date the taxes are computed, and provides that the combined notice serves as the registration certificate for a vehicle issued a limited registration plate; subsection (b) clarifies that a lessee of a vehicle would receive a combined notice since the definition of 'owner' includes the lessee of a vehicle; subsection (d) clarifies that taxes on motor vehicles be included in the tax levy for the fiscal year in which the taxes are collected; and new subsection (e) describes the method for handling small underpayments and overpayments of taxes. • Amends G.S. 105-330.8 to add the following property tax statutes to the statutes that do not apply to the combined motor vehicle registration and property tax system: G.S. 105-321(f) (governing the collection of minimal taxes charged) and G.S. 105-360 (governing the due date of property taxes, interest for nonpayment of taxes, and discounts for prepayment of taxes). • Amends G.S. 105-330.9 to add subdivision headings. Amends G.S. 105-330.11 by making stylistic changes. Except for changes to G.S. 105-330.9 and G.S. 1-5-330.11, the above changes become effective July 1, 2011, and apply to combined tax and registration notice issued on or after that date, or when the Division of Motor Vehicles and the Department of Revenue certify that the integrated computer system for registration renewal and property tax collection for motor vehicles is in operation, whichever occurs first.
24.(b)	Amends G.S. 20-79.1A to clarify issuance of a limited registration plate as follows: (1) the limited registration plate is issuable to a person who applies for a title to a motor vehicle and a registration plate if the person submits the title and registration fees but does not submit municipal corporation property taxes due on the vehicle; (2) if the municipal corporation property taxes are paid, then the person receives an annual registration plate; (3) a limited registration plate may only be used on the vehicle for which issued and if lost or stolen, a replacement plate must be received and attached to the vehicle before it may be driven. Subsection (b) becomes effective July 1, 2011, and applies to combined tax and registration notices issued on or after that date, or when the Division of Motor Vehicles and the Department of Revenue certify that the integrated computer system for registration renewal and property tax collection for motor vehicles is in operation, whichever occurs first.
24.(b1)	Amends G.S. 20-63(h) to clarify that a contract agent with the Division of Motor Vehicles receives compensation for issuing a vehicle registration card only when property taxes on the vehicle are not paid at the same time.
24.(c)	Sets out the effective dates for section 24 of this act.
25	Moves the effective date of the combined motor vehicle registration and property tax system from July 1, 2010 to July 1 2011, and clarifies that it applies to combined tax and registration notices issued on or after that date, or when

	the DMV and the Department of Revenue certify that the system is in operation, whichever occurs first.
26	Amends G.S. 105-361(a) to make stylistic changes and to clarify that the amount of taxes that a tax collector must report on a tax certificate includes any deferred taxes that would become due if a disqualifying event occurs.
27	Makes the following clarifying changes to G.S. 160A-215.2 (Heavy equipment gross receipts tax in lieu of property tax): • Changes the word 'resolution' to 'ordinance' to reflect that cities adopt ordinances while counties adopt resolutions. • Provides that a tax levied prior to the effective date of this act remains valid and in effect until amended or repealed, regardless of whether the city called the action a resolution or an ordinance. • Removes the reference to 'city finance officer', because the city may contract with the county to collect the gross receipts tax.
Occupancy Tax Changes	
28	Adds a Session Law reference that was inadvertently omitted when the Cherokee County local occupancy tax act was amended last year. In 2007, a number of local occupancy tax local acts were amended to change the due date for remitting occupancy tax proceeds and filing returns from the 15th to the 20th of the month to conform to current sales tax statutes. The Cherokee County local occupancy tax act was one of the acts so amended. However, when the rest of the local act was amended in 2008, the 2007 change was not incorporated. To make this technical change, the entire local act must be set out under drafting convention. However, no substantive change is being made.
29	Corrects an incorrect Session Law reference.
30	Adds to S.L. 2005-68, a Session Law reference to the 2007 act referenced above that made changes to a number of local occupancy tax acts related to the due date of the tax and return. S.L. 2005-68 is the act that authorized the additional occupancy tax to finance the NASCAR Hall of Fame Museum.
Motor Fuel Tax Changes	
31	Provides the Secretary with the ability to mandate electronic filing of motor carrier tax returns. The Secretary may currently mandate electronic filing of motor fuel tax returns. The Department developed an online filing system for motor carrier returns six years ago. To date, voluntary compliance is around 19%. This section becomes effective January 1, 2010.
32	Inserts a missing word.
33	Provides an exception to the requirement that a distributor, importer, or motor fuel transporter must obtain a bond or irrevocable letter of credit when the person is supplying motor fuel into the State because the market for motor fuel has been disrupted and emergency supplies are needed, as identified by an executive order of the Governor. The bonding requirement became an issue during the recent motor fuel supply shortages in the western part of the State.
34	Specifies that the tax on fuel grade ethanol is payable by the refiner or fuel alcohol provider. The difference between a refiner and a fuel alcohol provider is the amount of fuel the person produces. A refiner is a person who produces

	an average of more than 500,000 gallons a month; a person who produces less than this amount is a fuel alcohol provider. This section changes the law enacted last year in S.L. 2008-134 that specified when fuel grade ethanol was subject to tax. Effective January 1, 2009, the fuel is taxable when it was removed from a terminal or when it is produced in the State or imported to the State and not delivered to a terminal. However, the Department has had difficulty administering this provision. Ethanol is primarily shipped by railroad tank car and once imported into the State the ethanol may not be off-loaded for weeks. Since the tax is imposed upon importation, this delay in off-loading creates a loop-hole for filers. This section provides that the ethanol produced in this State is taxable when it is removed from the storage facility at the production location; ethanol produced outside the State is taxable when it is imported to the State. Prior to 2009, fuel grade ethanol was first subject to tax when it was blended. This section becomes effective January 1, 2010.
35	Changes the hold harmless refund from a quarterly one the Department calculates and administers to a monthly one the taxpayer requests. This section becomes effective January 1, 2010, and applies to motor fuel purchased on or after that date.
36	Requires a shipping document to transport fuel grade ethanol since the ethanol is now subject to tax before it is blended. This section accomplishes this change by expanding the statute to include refiners and fuel alcohol providers. This section also recognizes that the content of a shipping document issued for motor fuel transported by railroad tank car differs from a one issued for fuel transported by transport trucks. This section becomes effective January 1, 2010.
37	Corrects a misspelled word.
38	Conforms the tax exemptions for alternative fuel to the tax exemptions for motor fuel.
Other Changes	
39	Amends the tax secrecy provisions to prohibits the disclosure of standards used or to be used for the selection of returns for examination and the disclosure of data used for determining those standards. The Department of Revenue requested this provision.
40	Corrects a statutory reference. The statute cited was repealed in 2006.
41	Repeals the session law that created the Economic Development Reserve and its exemption from rule-making. The Reserve had a one-time appropriation. The money in the fund has been drawn down. The Reserve has served its intended purpose and is no longer necessary.
42	Corrects the prefatory language of Section 28.19.(a) of S.L. 2008-107.
43	Corrects the prefatory language of Section 28.25.(c) of S.L. 2008-107.
44	Corrects an incorrect statutory reference.
45	Corrects the effective date sections in S.L. 2008-146 to refer to 'Parts' rather than 'sections'.
46	Corrects the effective date section in Section 5.4 of S.L. 2008-204 to refer to 'Part' rather than 'section'.

APPROPRIATIONS ACT OF 2009.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-451, as amended by S.L. 2009-575	**SB 202**	**Senator Garrou**

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

OVERVIEW: This act updates the reference to the Internal Revenue Code to May 1, 2009, but decouples from the bonus depreciation provision and the new additional standard deductions for real property taxes and motor vehicle sales taxes. The act adopts the proposal recommended by the Revenue Laws Study Committee to apply the State and local general rate of sales and use tax to audio works (music and ringtones), audiovisual works (movies), books, and computer software that are delivered or accessed electronically to the extent those items would be taxable if sold in a tangible medium and to revise the mail order sale statute to specifically set out certain circumstances that constitute soliciting business in this State for purposes of requiring a remote retailer to collect sales tax. Lastly, the act generates revenue required to balance the 2009-2010 biennium budget by making the following tax law changes:

- Income tax surtax on individuals whose North Carolina taxable income is greater than $100,000[43] and on corporations, for taxable years 2009 and 2010.
- A State sales tax increase of 1%, effective September 1, 2009, until July 1, 2011.
- An increase in the excise taxes on beer, wine, liquor, cigarettes, and other tobacco products. All of the increased tax revenue is distributable to the State.
- Retention by the State of a portion of the distribution of the excise tax on beer and wine that would otherwise be distributable to counties and cities for one year.

The act also authorizes the Finance Committees of the Senate and the House of Representatives to meet during the interim to study and recommend legislation to reform North Carolina's sales and income tax structure in order to broaden the tax base and lower the State's tax rates.

FISCAL IMPACT: The act increases General Fund revenues by approximately $990 million for fiscal year 2009-2010 and $1.3 billion for fiscal year 2010-2011. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: With the exception of the provision related to the real property tax deduction for non-itemizers, which is effective for taxable years beginning on or after January 1, 2008, the remaining IRC conformity provisions are effective for taxable years beginning on or after January 1, 2009. The revision of the statutes relating to remote retailers became effective when signed into law by the Governor on August 7, 2009. The expansion of the sales tax base to digital products becomes effective January 1, 2010. The increase in the excise taxes on beer, wine,

[43] The $100,000 threshold applies to taxpayers filing as married filing jointly. The threshold for taxpayers filing as head of household is $80,000; the threshold is $60,000 for single taxpayers; and the threshold is $50,000 for married filing separately.

liquor, and tobacco products became effective September 1, 2009. The income tax surtax is effective for taxable years 2009 and 2010. The increase in the State sales tax rate became effective September 1, 2009, and expires July 1, 2011.

ANALYSIS: Part XXVIIA of the Current Operations and Capital Improvements Appropriations Act of 2009 made the following tax law changes:

Corporate and Individual Income Tax Surtax. – Section 27A.1 increases General Fund revenues by approximately $196 million in fiscal year 2009-2010 and $202 million in fiscal year 2010-2011, by imposing a temporary income tax surtax on corporate taxpayers and individual taxpayers whose North Carolina taxable income exceeds $100,000. The corporate income tax surtax is equal to 3% of the tax payable by the taxpayer for the taxable year. The individual income tax surtax is also equal to a percentage of the tax payable by the taxpayer.[44] The percentage amount varies depending upon the taxpayer's North Carolina taxable income[45] and the taxpayer's filing status. For married filing jointly, the surtax percentage is zero for taxable incomes up to $100,000; it is 2% for taxable incomes[46] over $100,000 and up to $250,000; and it is 3% for taxable incomes[47] over $250,000. For heads of households, the thresholds are $80,000 and $200,000 respectively; for single taxpayers the thresholds are $60,000 and $150,000 respectively; and for married filing separately the thresholds are $50,000 and $125,000.

The income tax surtaxes imposed by this section are in addition to the corporate income tax and individual income tax owed by the taxpayer. The surtaxes are due at the same time as the filing of the tax return itself. For a corporate taxpayer, the tax is due on or before the fifteenth day of the third month following the close of its income year. For an individual taxpayer, the tax is due on or before April 15th.

The General Assembly made similar income tax adjustments during the budget shortfalls of 1991, 2001, and 2003. During the budget shortfall in 1991, the General Assembly imposed a temporary surtax on corporations in an amount equal to a stated percentage of the corporation's income tax liability.[48] During the budget shortfall in 2001, the General Assembly created a temporary 8.25% individual income tax bracket for incomes that exceeded $200,000 for taxpayers filing as married filing jointly. Under the 2001 legislation, the upper income tax bracket would have expired for taxable years beginning on or after January 1, 2004. In 2003, the General Assembly extended the 2004 sunset until 2006 and in 2005 it extended the sunset until 2007. In 2006, the General Assembly reduced the upper income tax rate from 8.25% to 8% for taxable year 2007. The temporary bracket expired for taxable years beginning on or after January 1, 2008.[49]

Increase Sales and Use Tax By One Percent. – Section 27A.2 increases General Fund revenues by approximately $803 million in fiscal year 2009-2010 and $1.1 billion for fiscal year 2010-2011 by imposing a temporary State sales and use tax increase of one percent, from 4.5% to 5.5%, effective

---

[44] North Carolina income tax is the amount recorded on line 14 of NC D-400 tax form.

[45] North Carolina taxable income is the amount recorded on line 13 of the NC D-400 tax form.

[46] The graduated NC income tax rates are 6%, 7%, and 7.75%. The effective tax rates in the respective tax brackets for taxpayers subject to the 2% surtax are 6.12%, 7.14%, and 7.91% respectively.

[47] The effective graduated tax rates for taxpayers subject to the 3% surtax are 6.18%, 7.21%, and 7.98%. Only nine states have a higher individual income tax rate than 7.98%: Hawaii, Oregon, California, New Jersey, Vermont, Rhode Island, Iowa, New York, and Maine.

[48] The percentage rate of the surtax was 4% for taxable year 1991. The rate fell by 1% each taxable year thereafter until it expired in taxable year 1995. See Chapter 689 of the 1991 Session Laws.

[49] S.L. 2001-424, S.L. 2003-284, S.L. 2205-276, and S.L. 2006-66.

September 1, 2009. The combined State and local tax rate in North Carolina based upon the highest possible county tax rate is 8.25%.[50] As of October 1, 2009, only 11 states have a higher combined sales tax rate than North Carolina.[51]

Effective October 1, 2009, the combined State and local rate will remain the same, but the allocation of the rate between the State and the counties will change based upon legislation enacted in 2007.[52] Effective October 1, 2009, the State sales tax rate is 5.75%. Effective July 1, 2011, the State rate will return to 4.75%.

A sale is complete when delivery is made to a customer. The new tax rate applies to taxable sales and purchases of property or services delivered on or after September 1, 2009, regardless of the date the order was placed, with the following exceptions:

- Gross receipts from the lease of tangible personal property that is delivered to a lessee prior to September 1, 2009, and leased for a definite stipulated period of time.
- Construction materials purchased or sold on and after September 1, 2009, to fulfill a lump-sum or unit-price contract entered into or awarded prior to September 1, 2009.

Section 22 of S.L. 2009-575 provides that a retailer is not liable for an over-collection or under-collection of sales tax for the period beginning September 1, 2009, and ending October 1, 2009, if the retailer made a good faith effort to comply with the law and collect the proper amount of tax and has, due to the increased State rate under this act, over-collected or under-collected the amount of sales tax due.

The General Assembly increased the State sales tax rate from 3% to 4% in 1991. In 2001, it enacted a temporary increase of ½ cent, making the State rate 4.5%. Under the 2001 legislation, the increased rate would sunset effective July 1, 2003. However the General Assembly extended the sunset date in 2003 and 2005, and it maintained ¼ cent of the increased rate in 2007 for a State tax rate of 4.25%.[53] The State rate changed from 4.25% to 4.5% as part of the Medicaid swap on October 1, 2008.[54]

Nexus Clarification and Click Throughs, Use Tax Line on Income Tax Return, Digital Products, Magazines Delivered by Mail. – Section 27A.3, which originated as a Revenue Laws Study Committee recommendation and was included in the House's version of the budget as well as in the proposed

---

50 The local tax rate in most counties is 2.25%, making the combined State and local rate 7.75%. In 2007 the General Assembly authorized counties to impose an additional ¼ cent sales tax. As of October 1, 2009, eight counties have done so. In those counties, the combined rate is 8%. (Alexander, Catawba, Cumberland, Haywood, Martin, Pitt, Sampson, and Surry) Mecklenburg County has an additional ½ cent sales tax for public transit. The combined rate in Mecklenburg County is 8.25%.

51 Kansas, Arizona, New York, Oklahoma, Washington, Missouri, Tennessee, California, Illinois, Arkansas, and Idaho.

52 Section 31.16 of S.L. 2007-323. The State assumed 100% of the nonfederal, non-administrative share of Medicaid costs over a three-year period beginning in 2007. To provide the financial resources to assume these costs, the legislation phased out the third one-half cent local sales tax and made a corresponding increase in the State sales tax rate. Effective July 1, 2009, the State assumed the entire non-administrative, nonfederal share of Medicaid costs. The counties retained responsibility for the costs associated with administering Medicaid at the county level. Effective October 1, 2009, the State sales tax rate increased .25% to 4.75% and the local rate decreased .25%.

53 S.L. 2001-424, 2003-284, 2005-276, 2006-66, 2007-145, and 2007-323.

54 S.L. 2007-323.

Senate tax plan, makes several changes related to the sales tax treatment of digital products and clarifies certain circumstances that satisfy the nexus requirement for purposes of requiring sales tax collection by a remote retailer. This section increases General Fund revenues by approximately $11.8 million in fiscal year 2009-2010 and $24.1 million in fiscal year 2010-2011.

- **Nexus Clarification and Click Throughs. –** This section provides that a remote retailer who enters into a 'click-through' contractual agreement with a North Carolina resident is soliciting business in this State for purposes of requiring a remote retailer to collect sales tax. This provision became effective when the act became law on August 7, 2009.

  G.S. 105-164.8 sets out the circumstances under which a remote retailer is required to collect sales tax on mail order sales. Generally speaking, a remote retailer is one that does not maintain a brick and mortar establishment in this State. This statute reflects principles promulgated in a series of cases that set out circumstances under which a retailer has sufficient nexus with a state to require it to collect sales tax. Several of these cases involved businesses that used independent contractors or other commissioned agents to solicit orders in a state in which the business was not physically located. One of the leading cases in this area is *Scripto v. Carson*, in which the United States Supreme Court held that a state could require tax collection by a remote retailer that had contracts with 10 in-state residents deemed independent contractors who solicited orders for products on its behalf. This principle has been codified in G.S. 105-164.8, which states, in part, that a retailer who makes a mail order sale must collect the sales tax if:

  > "The retailer has representatives in this State who solicit business or transact business on behalf of the retailer, whether the mail order sales thus subject to taxation by this State result from or are related in any other way to such solicitation or transaction of business."

  This case reflected a business model that was common at the time. In recent years, with the growth of the Internet, a new business model has emerged as a way for online retailers to solicit business. Amazon is a prime example of this business model. Under what is referred to as an "affiliate program," Amazon enters into contractual agreements with the owners of other websites and pays a commission for sales that result from a "click-through" to the Amazon website from the other website. Through the operation of this program, Amazon has established nexus in this State by maintaining compensated representatives in the State who solicit business for Amazon. This principle is consistent with the holding of the *Scripto* case.

  This section of the act revises the mail order sales provision in two ways. First, it changes the term "mail order sale" to "remote sale," which covers all transactions that are not face-to-face but reflects more modern terminology and the prevalence of Internet sales. Second, it provides that a retailer is presumed to solicit or transact business in this State and is, therefore, required to collect sales tax if all of the following conditions are met:

  - The retailer has entered into an agreement with a resident of this State.
  - Under the agreement, the resident receives a commission or other consideration in exchange for directly or indirectly referring potential customers, whether by a link on an Internet website or otherwise, to the retailer.

- o The cumulative gross receipts from sales by the retailer to purchasers in this State who are referred to the retailer by all residents with this type of agreement with the retailer is in excess of $10,000 during the preceding four quarterly periods.

This presumption may be rebutted by proof that the resident with whom the retailer has an agreement did not engage in any solicitation in the State on behalf of the retailer that would satisfy the nexus requirement of the United States Constitution.

In a recent New York Supreme Court[55] case, Amazon challenged an identical provision in the New York sales tax statutes alleging that it violates the Commerce Clause of the United States Constitution as well as both the Federal and State Constitutions' Due Process and Equal Protection Clauses. The court dismissed the complaint for failure to state a cause of action. The court disagreed with Amazon's assertion that the commissioned agents were mere advertisers concluding that the provision requires tax collection only when an out-of-state seller avails itself of the benefit of in-state contractors who are compensated for referrals and who generate actual business for the seller. Moreover, the court stated that "Amazon should not be permitted to escape tax collection indirectly, through use of an incentivized New York sales force to generate revenue, when it would not be able to achieve tax avoidance directly through the use of New York employees engaged in the very same activities."

Amazon is still in litigation in New York, but so far the courts have sided with the State and have found that this type of arrangement is sufficient to create nexus. Rhode Island enacted similar legislation during its recent legislative session. California and Hawaii did as well, but the measures were vetoed by their respective Governors. Several other states, such as Connecticut, Illinois, Minnesota, Tennessee, and Wisconsin, had similar legislation introduced but not enacted or are continuing to study the issue.

- **Digital Products. –** This section imposes the State and local general rate of sales and use tax on certain digital goods that are delivered or accessed electronically to the extent those items would be taxable if sold in a tangible medium. It also eliminates the general exemption for prewritten computer software that is delivered electronically with an exception for certain "enterprise" software.

Under current law, the general rate of State and local sales and use tax applies to the sale, lease, or rental of tangible personal property and some services. Tangible personal property is defined as "personal property that may be seen, weighed, measured, felt, or touched, or is in any other manner perceptible to the senses." Digital goods, such as downloaded music and movies, are not tangible personal property, and, therefore, are not taxed. Prewritten computer software is specifically included within the definition of tangible personal property, but it is exempt from sales tax when it is delivered electronically or by load and leave.[56]

When the Revenue Laws Study Committee examined the existing sales tax treatment of digital goods, three primary findings emerged leading to the recommendation of this provision. First, the Committee recognized that the sales and use tax statutes are outdated in relation to today's modern retail economy. The sales and use tax statutes were originally

[55] The New York Supreme Court is a trial-level court.
[56] The term "load and leave" is defined as "delivery to the purchaser by use of a tangible storage media where the tangible storage media is not physically transferred to the purchaser."

enacted in the 1930s and were drafted to apply to sales of tangible personal property because those items constituted the bulk of consumer purchases at that time. Technology and the prevalence of the Internet have transformed society in a number of ways, including the way in which consumers make purchases. Over the last 15 years, more and more consumers shop online and download or stream media in digital format. When the sales tax statutes were enacted, intangible digital goods were not in existence and therefore not contemplated under the tax code. However, purchases of media in digital format are quickly becoming the norm, and many states have been revisiting their sales tax statutes in order to bring them into the 21st Century. Second, the Committee also found that the sales and use statutes are inequitable to the extent that similar, if not identical, items are treated differently based upon the method of delivery or the point of purchase. This unequal treatment impacts consumers as well as retailers. For example, a consumer who purchases a CD in a brick and mortar retail establishment, such as Walmart, pays sales tax on that item. Likewise, a consumer who orders the CD from the Walmart website pays sales tax on that item. However, a consumer who downloads the exact same CD in MP3 format from the Walmart website would not pay any sales tax on the item. In these examples, the consumer purchases the same item, but the tax treatment differs. This differing tax treatment discriminates against consumers who either choose to purchase a tangible format or who do not have the technological capability to download or stream in digital format because they do not have a computer or high-speed Internet access. Moreover, the tax code should not drive consumer choice but it should be neutral as to industry, content, and delivery method. This unequal tax treatment also places brick and mortar retailers, or at least those without an Internet presence, at a competitive disadvantage with Internet retailers. A sound tax structure is one that is fair and neutral. Taxing digital goods in the same manner as their tangible counterparts promotes these principles. Third, the Committee concluded that the State will lose significant sales tax revenue that it is currently collecting as consumers continue to transition from purchases of tangible media to purchases of digital media.

In light of these findings, the General Assembly enacted this provision, which imposes the general rate of sales and use tax on audio works, audiovisual works, books, magazines, newspapers, newsletters, reports, photographs, and greeting cards that are delivered or accessed electronically and that would be taxable if purchased in a tangible format, effective January 1, 2010. The tax applies regardless of whether the purchaser has a right to use it permanently or to use it without making continued payments. The tax does not apply to a service that is already taxed or to an information service. The purchase of a digital code used to obtain one of these items is considered a sale of that item.

The terms "audio work" and "audiovisual work" are defined terms under the Streamlined Sales Tax Agreement. An audio work is a series of musical, spoken, or other sounds and includes items such as recorded or live songs, music, readings of books or other written materials, speeches or ringtones or other sound recordings. An audiovisual work is a series of related images and any sounds accompanying the images that impart an impression of motion when shown in succession and includes movies, music videos, news, and entertainment programs.

This section also eliminates the exemption for prewritten computer software when delivered electronically. Under current law, prewritten computer software purchased in a tangible format is subject to tax. However, prior to this act, there was a specific exemption

for prewritten computer software[57] delivered by load and leave or delivered electronically. In an effort to equalize the treatment of goods that are similar in substance and differ only in format, the General Assembly chose to eliminate this exemption. In doing so, it carved out a "business-to-business" exception for enterprise software, which is software used by large businesses to run office operations, such as billing. Thus, computer software meeting any of the following descriptions is exempt from sales and use tax:

- It is designed to run on an enterprise server operating system.
- It is sold to a person who operates a datacenter and is used within the datacenter.
- It is sold to a person who provides cable service, telecommunications service, or video programming and is used to provide ancillary service, cable service, Internet access service, telecommunications service, or video programming.

- **Magazines Delivered by Mail**. – This section eliminates the sales tax exemption for magazines delivered by mail. Under current law, magazine publishers and other retailers who are engaged in business in this State are liable for State and local sales tax on their over the counter sales of magazines. However, sales of magazines by magazine vendors making door to door sales and retail sales of magazines by subscription delivered through the mail to subscribers inside or outside North Carolina are exempt from tax. In an effort to equalize the sales tax treatment of magazines, this section repeals the exemption for magazines delivered by mail. This section did not, however, change the current exemption for sales of newspapers by newspaper street vendors, by newspaper carriers making door to door deliveries, and by means of vending machines.

- **Use Tax Line on Income Tax Return. –** Finally, this section maintains the requirement that use tax be paid annually with the filing of an individual income tax return, which was set to expire on January 1, 2010. Had the provision expired, an individual still would have been required to pay use tax, but using a separate form and following the schedule for the remittance of sales taxes.

  An individual who purchases tangible personal property, other than boats and aircraft, outside the State for a non-business purpose is required to accrue and remit the use tax due on an annual basis. In 1999, in order to simplify and improve use tax collection, the General Assembly enacted legislation requiring that an individual who owes use tax and who is required to file an individual income tax return must pay the use tax with the individual income tax return. The Secretary is required to provide appropriate space and information on the individual income tax form for the reporting of use tax. By placing the use tax on the individual income tax return, as opposed to a separate return, the hope was to raise taxpayer awareness of the obligation to report and pay the tax.

  In 2000, the General Assembly repealed the requirement that the use tax line be included and paid with the individual income tax return, to become effective January 1, 2003. The rationale for the repeal was that once the Streamlined Sales Tax Project requiring out-of-state retailers to collect sales tax was fully implemented, there would be no need to report use tax. In 2003, the General Assembly delayed the repeal by two years. Then, in 2005, the repeal was delayed again until January 1, 2010, since Congress had not yet acted

[57] This act does not change the treatment of custom computer software, whether in tangible or digital format, which is exempt from sales and use tax.

on this issue. This section of the budget eliminates the repeal set to take place in 2010, which means that the use tax will still be required to be paid annually on an individual's income tax return.

Alcohol Excise Tax Changes. – Section 27A.4 increases General Fund revenues by approximately $57.7 million for fiscal year 2009-2010 and $47 million in fiscal year 2010-2011, by increasing the excise tax rate on alcohol and by retaining part of the beer and wine revenues distributed to local governments. The State shares a percentage of the excise taxes collected on beer and wine with the counties or cities in which the retail sale of these beverages is authorized. The distribution is made annually for the preceding 12-month period ending March 31. Under this section, the State will retain approximately 70% of the revenues for the 12-month period ending March 31, 2010. This section also reduces the percentage of the revenues distributed in the future so that 100% of the revenues derived from the increased tax rates in this section will go to the State.

This section increases the excise tax rate on beer, wine, and liquor as follows:

- The excise tax rate on beer increased from 53.177¢ per gallon to 61.71¢ per gallon effective September 1, 2009. The rate increase means the tax on a can of beer changes from 5¢ a can to 5.8¢ a can, or about a 5¢ increase in the cost of a six-pack. The tax rate has not been increased since 1969. Four states have a higher tax rate on beer.[58] Beer is also subject to a federal excise tax of approximately 5¢ per can.
- The excise tax rate on unfortified wine[59] increased form 21¢ per liter to 26.34¢ per liter, effective September 1, 2009. The excise tax rate on fortified wine increased from 24¢ per liter to 29.34¢ per liter, effective September 1, 2009. The rate increase means the tax on a bottle of wine changes from approximately 16¢ a bottle to 20¢ a bottle. The tax rate does not appear to have been increased since 1969. Twelve states have a higher tax rate on wine.[60] Wine is also subject to a federal excise tax that ranges from 21¢ per bottle to 62¢ per bottle, depending upon the alcohol content.
- The excise tax rate on liquor sold in an ABC store increased from 25% of the taxable sale to 30% of the taxable sale, effective September 1, 2009. North Carolina last changed the taxation of liquor in 2001.[61] Five states have a higher tax rate on liquor.[62] Liquor is also subject to a federal excise tax of approximately $2.14 per bottle.

Tobacco Products Excise Tax Changes. – Section 27A.5 increases General Fund revenues by approximately $38 million for fiscal year 2009-2010 and $54.5 million for fiscal year 2010-2011, by increasing the excise tax rate on tobacco products as follows:

- The excise tax rate on cigarettes increased from 1.75¢ per cigarette to 2.25¢ per cigarette, effective September 1, 2009. This tax rate equates to a 10¢ increase in a pack of cigarettes,

[58] South Carolina, Hawaii, Alabama, and Alaska.

[59] The difference between fortified and unfortified wine is the percentage of alcohol by volume that it contains. Unfortified wine is a wine that has 16% or less alcohol; fortified wine is a wine that has more than 16% but no more than 24% of alcohol.

[60] West Virginia, Montana, Tennessee, Pennsylvania, Hawaii, Georgia, Virginia, Alabama, New Mexico, Iowa, Florida, and Alaska.

[61] Prior to 2001, the excise tax on liquor was in lieu of the sales tax. In S.L. 2001-424, the State began imposing a State sales tax on liquor equal to the combined State and local sales tax rate. To recognize the change in taxation, the General Assembly reduced the excise tax on liquor from 28% to 25%.

[62] Alaska, Virginia, Vermont, Oregon, and Washington.

from 35¢ to 45¢. The General Assembly last increased the excise tax on cigarettes in 2005, when it increased the rate from 5¢ a pack to 35¢ a pack.[63] Only five states have a tax rate lower than 45¢.[64] Cigarettes are also subject to a federal excise tax of $1.01 per pack.

- The excise tax rate on other tobacco products increased 2.8%, from 10% of the cost price of the product to 12.8%. The General Assembly increased the excise tax on other tobacco products from 2% to 3% in 2005.[65] In 2007, it increased the rate from 3% to 10% and earmarked the revenues derived from the increase to the University Cancer Research Fund.[66] The increase in revenues derived from the increase in this section will also be credited to the University Cancer Research Fund. However, the General Fund still benefits from the increased revenue since it will not have to appropriate this amount to the Cancer Research Fund from the State's General Fund.[67] Other tobacco products are also subject to a federal excise tax. The federal government taxes little cigars the same as cigarettes. The federal excise tax on other tobacco products varies depending upon the product.

IRC Conformity. – Section 27A.6 updates from May 1, 2008 to May 1, 2009, the reference to the Internal Revenue Code used in defining and determining certain State tax provisions.

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code by reference to the Code.[68] The General Assembly determines each year whether to update its reference to the Internal Revenue Code.[69] Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law tracks federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made.

Changing the reference date to May 1, 2009, incorporates the majority of changes made by the five federal acts listed below, with several significant exceptions. This conformity will result in a loss to the General Fund of $116.1 million in fiscal year 2009-2010 and $80.9 million in fiscal year 2010-2011. The federal acts are:

---

[63] S.L. 2005-276. The rate increased from 5¢ a pack to 30¢ a pack, effective September 1, 2005, and to 35¢ a pack, effective July 1, 2006.

[64] South Carolina, Missouri, Kentucky, Louisiana, and Georgia.

[65] S.L. 2005-276.

[66] S.L. 2007-323.

[67] G.S. 116-29.1 establishes the University Cancer Research Fund and provides a minimum funding of $50 million for the Fund. Of this amount, $8 million is credited to the Fund from the Tobacco Trust Account. An amount equal to the difference between $50 million and the amounts credited to the Fund from the Tobacco Trust Account and the funds remitted from the OTP tax revenue is appropriated to the Fund from the General Fund.

[68] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[69] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

- Heartland, Habitat, Harvest, and Horticulture Act of 2008 signed into law May 22, 2008 (P.L. 110-234).
- Heroes Earnings Assistance and Relief Tax Act of 2008 signed into law June 17, 2008 (P.L. 110-245).
- Emergency Economic Stabilization Act of 2008 (EESA) signed into law October 3, 2008 (P.L. 110-343).
- Worker, Retiree, and Employer Recovery Act of 2008 signed into law December 23, 2008 (P.L. 110-458).
- American Recovery and Reinvestment Tax Act of 2009 (ARRTA) signed into law February 17, 2009 (P.L. 111-5).

The following is a list of changes to which the General Assembly chose not to conform; below that list begins a description of the major federal tax changes under each of the above-referenced acts to which North Carolina is conforming. The provision related to the real property tax deduction for non-itemizers is effective for taxable years beginning on or after January 1, 2008. The remaining provisions are effective for taxable years beginning on or after January 1, 2009.

- Real property tax deduction for non-itemizers.[70]
- Income tax deduction for sales or excise taxes on new vehicle purchases.
- Extension of bonus depreciation.[71]
- For corporate filers only, the five-year carryback period for net operating losses attributable to a federally-declared disaster occurring during 2009[72] and for net operating losses of small businesses.
- Delayed recognition of certain cancellation of debt income.
- Suspension of applicable high-yield discount obligation rules for certain high-yield obligations.

Heartland, Habitat, Harvest, and Horticulture Act of 2008

- *Endangered species recovery expense.* – This act creates a new deduction for endangered species recovery expenditures for expenses incurred after December 31, 2008. Farmers may currently claim a deduction for qualifying soil and water conservation expenditures and land erosion prevention expenditures. The deduction is limited to 25% of gross income derived from farming during the tax year but can be carried forward indefinitely. This act adds endangered species recovery expenditures to the category of expenditures that qualify for the deduction. The expenditures must be paid or incurred by a farmer after December 31, 2008 for the purpose of site-specific management actions recommended in recovery

[70] This was included in the Housing Assistance Tax Act of 2008 signed into law July 30, 2008 (P.L. 110-289).
[71] See explanation below of modified conformity under *Business Tax Relief* in the section describing changes made by the **American Recovery and Reinvestment Tax Act of 2009**.
[72] This was included in the Emergency Economic Stabilization Act of 2008.

plans approved pursuant to the Endangered Species Act of 1973. Depreciable structures, appliances, or facilities do not qualify for the deduction.

- *Charitable Contributions of Real Property for Conservation Purposes.* – This act extends the increased deduction for charitable contributions of real property for conservation purposes for tax years beginning before January 1, 2009. The deduction for capital gain appreciated real property is generally limited to 30% of the donor's adjusted gross income if the donor uses the fair market value of the donated property. If the donor's basis is used as the value of the property, and the property is donated to a "maximum deduction" organization, the deduction is limited to 50% of the donor's adjusted gross income.[73] Deductions for donations to non-maximum donation organizations are limited to 20% of the donor's adjusted gross income. Contributions that exceed the deduction limit can be carried forward for five years. The Pension Protection Act of 2006 increased the deduction for donations of conservation easements. An individual may deduct the value of the easement, based on fair market value, up to 50% of adjusted gross income, with a 15-year carryforward for any excess. A "qualified farmer or rancher" may deduct the value of the gift up to 100% of adjusted gross income with a 15-year carryforward. A "qualified farmer or rancher" is an individual whose gross income from the trade or business of farming is greater than 50% of the taxpayer's gross income for the tax year. The land donated by a farmer or rancher also must "be available" for agricultural use, but it need not be used for that purpose. This act extends these provisions through December 31, 2009.

Heroes Earnings Assistance and Relief Tax Act of 2008

- *State or Local Bonuses for Combat Veterans.* – The act excludes state or local bonuses for combat veterans from gross income for income tax purposes. Generally all income is included in gross income unless the income is explicitly excluded. "Qualified military benefits" are excluded from gross income. These benefits generally include allowances or in-kind benefits provided to family members and former members of the armed services, or their dependents by reason of the member's service, including housing, moving, and travel allowances. This act expands the definition of "qualified military benefits" to include bonus payments by a state or local government to a member or former member of the armed services, or to a dependent of a member. To qualify for the exclusion, the payment must have been made for the member's service in a combat zone.[74]

- *Contributions of Military Death Gratuities to Roth IRAs and Coverdell ESAs.* – The act allows military death gratuities to be contributed to a Roth IRA or Coverdell ESA regardless of contribution limits and income phase-out limits for Roth IRAs and Coverdell ESAs. Upon notification of the death of military personnel on active duty or on inactive duty training, a death gratuity is paid to or for the person's survivor. The death gratuity is a qualified military benefit and excluded from income. Roth IRAs are subject to annual contribution limits equal to the lesser of the statutory dollar amount or 100% of taxable income. For 2008, the annual limit on contributions is $5,000 for individuals, with an additional catch up contribution of $1,000 allowed for individuals over age 50. Sums may be rolled-over

[73] Maximum deduction organizations include public charities, private operating foundations, private non-operating foundations that distribute contributions within two and one-half months of the year's end, and private non-operating foundations that maintain a common fund.
[74] A combat zone is defined as any area the President has by executive order designated an area in which the Armed Forces are or have engaged in combat.

from eligible retirement plans to Roth IRAs, subject to income-phase out limitations. For 2008, rollovers are allowed for individuals whose gross adjusted income does not exceed $100,000. A Coverdell Education Savings Account is a tax-exempt trust created for paying the education expenses of the trust's designated beneficiary. Annual contributions to Coverdell ESAs may not exceed $2,000. This act allows the gratuity to be contributed to a Roth IRA or Coverdell ESA regardless of contribution limits and income phase-out limits for Roth IRAs and Coverdell ESAs.

Emergency Economic Stabilization Act of 2008

The major provisions of this act that impact North Carolina revenues and to which North Carolina is conforming are as follows:

- *Extension of Income Exclusion for Discharged Indebtedness on Principal Residence.* – The act extends the exclusion from income for discharged indebtedness on principal residences for discharges occurring before January 1, 2013. When a lender forecloses on property, sells the home for less than the borrower's outstanding mortgage and forgives all or part of the unpaid mortgage debt, the canceled debt is considered income under the Code. There is no income limitation, but no more than $2 million in mortgage debt is eligible for exclusion. The exclusion from income for discharged indebtedness related to a principal residence is for the three-year period beginning January 1, 2007 and ending December 31, 2009. This act extends the exclusions for discharged indebtedness related to a principal residence for the period beginning January 1, 2007 and ending on December 31, 2012.

- *Charitable Contributions from IRAs Restored.* – The act extends the favorable treatment of qualified charitable distributions from IRAs for two years, for distributions made in 2008 and 2009. Generally, to make a charitable donation from an IRA, a distribution must be taken and the applicable rules regarding taxable income apply. The distribution is included in taxable income to the extent the distribution is not attributable to a return of a nondeductible contribution. The standard charitable deduction rules then apply to the donation. The Pension Protection Act of 2006 provided that individuals 70 ½ or older could distribute up to $100,000 per taxable year from their IRAs to charitable institutions without recognizing the income. The distribution must be made directly to the charitable organization from the trustee. This distribution counts towards the required minimum distribution. This provision was set to expire in 2007, but the act extends the provision through 2009.

EESA made several changes related to the Modified Accelerated Cost Recovery System (MACRS) as follows:

- *15-Year MACRS Recovery Period for Qualified Leasehold Improvements and Qualified Restaurant Improvements and Buildings.* – The act extends for two years the 15-year Modified Adjusted Cost Recovery System (MACRS) recovery period for qualified leasehold improvements and restaurant improvements and buildings. The 15-year recovery period applies to property placed in service before January 1, 2010. The act also creates a 15-year MACRS recovery period for qualified retail improvement property and applies to property placed in service after December 31, 2007 and before January 1, 2010. The building must be at least three years old when the improvement is placed in service. Before these provisions, the improvements would generally be considered a structural component of the building and would be depreciated over a 39-year period.

- *Seven-Year Depreciation Period for Motorsports Facilities.* – The act extends the 7-year MACRS recovery period for motorsports entertainment complexes to property placed in service in 2008 and 2009. Historically, race tracks and facilities were treated by the IRS the same as theme and amusement parks. The American Jobs Creation Act of 2004 codified this treatment. A "motorsports entertainment complex" is a racing track facility that is permanently situated on land, hosts at least one racing event for cars of any type, trucks, or motorcycles during the 36-month period following the first day of the month in which it is put in service, and is open to the public for an admission fee.

- *Certain Farming Equipment Business Machinery or Equipment Treated as Five-Year Property.* –The act provides that certain machinery or equipment used in a farming business is treated as five-year property for purposes of claiming MACRS depreciation. The equipment does not include grain bins, cotton ginning assets, fences, or land improvements. Property that is used in a farming business can be depreciated under the General Depreciation System (GDS) using the 150-percent declining-balance method. Farm machinery and equipment generally has a recovery period of 10 years and has a straight-line recovery method.

EESA also extended a number of deductions and an expensing election:

- *Deduction for Qualified Tuition and Related Expenses.* – The act extends the deduction for qualified tuition and related expenses for tax years beginning before January 1, 2010. The expenses eligible for the deduction include tuition and fees required for the enrollment or attendance of the taxpayer, the taxpayer's spouse, or dependent at an eligible institution of higher education. The maximum deduction is $4,000 for taxpayers whose AGI does not exceed $65,000 ($130,000 for joint filers) and $2,000 for taxpayers whose AGI does not exceed $80,000 ($160,000 for joint filers).

- *Above-the-Line Deduction for Certain Expenses of School Teachers.* – The act extends the above-the-line deduction for eligible educators for tax years beginning in 2008 and 2009. The $250 deduction is allowed for books, supplies, and computer equipment purchased by an eligible educator for use in the classroom.

- *Enhanced Deduction for Charitable Contributions of Computers.* – The act extends the enhanced deduction for charitable contributions of computers for tax years beginning in 2008 and 2009. C corporations that make qualified contributions of computer technology and equipment may claim an enhanced deduction equal to the corporation's basis in the donated property plus one-half of the ordinary income that would have been realized if the property had been sold. The enhanced deduction may not exceed twice the corporation's basis in the property.

- *Enhanced Deduction for Charitable Contributions of Food Inventory.* – The act extends the enhanced deduction for charitable contributions of food inventory for tax years beginning in 2008 and 2009. Taxpayers may take a deduction for donated food inventory equal to the lesser of (1) the donated item's basis plus one-half of the amount of gain that would be realized if the donated food item was sold at fair market value, or (2) two times the donated item's basis. The deduction is limited to 10% of the taxpayer's net income, however, the 10% limitation is suspended for contributions made by farmers or ranchers between October 3, 2008 and January 1, 2009.

- *Enhanced Deduction for Charitable Contributions of Book Donations.* – The act extends the enhanced deduction for charitable contributions of book donations for tax years beginning in 2008 or 2009. Any corporation, other than an S corporation, can take an enhanced deduction for contributions of book inventory equal to the lesser of (1) the donated inventory item's basis plus one-half of the item's appreciation, or (2) two times the donated inventory item's basis.

- *Deduction for Environmental Remediation Costs.* – The act extends the election to deduct environmental remediation costs to cover expenditures paid or incurred in 2008 and 2009. A taxpayer may elect to deduct certain environmental cleanup costs in the tax year paid or incurred, rather than capitalize them. The election only applies to costs that are incurred in connection with the abatement or control of hazardous substances at a "qualified containment site," also called a "brownfield site."

- *Deduction for Energy Efficient Commercial Buildings.* – The act extends the deduction for energy efficient commercial building property for five years and is available for qualified property placed into service after December 31, 2005 and before January 1, 2014. The deduction applies to "energy efficient commercial building property," which is defined as depreciable property that is installed as part of a building's interior lighting systems, HVAC and hot water systems, or building envelope systems, and is part of a certified plan to reduce the total annual energy and power costs of these systems by at least 50%. The deduction is limited to the product of $1.80 and the total square footage of the building, reduced by the aggregate amount deducted in any prior year.

- *Extend and Modify Treatment of Certain Qualified Film and Television Productions.* – The act extends the expensing election related to film and television productions for one year for productions that begin before January 1, 2010, and allows the election to be made, in part, for productions with aggregate costs over the dollar production limit. A taxpayer may deduct the production costs of a qualifying film or television production. To qualify for the election, the aggregate production cost may not exceed $15 million. This act modifies the provision so that the first $15 million of otherwise qualifying film or television productions may be treated as an expense even if the aggregate cost of production exceeds $15 million.

EESA made the following changes related to disaster relief:

- *Relief for Midwestern Disaster Areas.* – The act modifies and extends many of the tax benefits extended to the victims of Katrina, Wilma, and Rita hurricanes to the victims of storms that hit the Midwest in the summer of 2008. These include the extension of special expensing for qualified property, an enhanced low-income housing credit, and flexible tax-exempt bond financing rules.

- *Casualty Losses Attributable to Federally Declared Disasters.* – The act increases the deduction for casualty losses attributable to federally declared disasters for tax years beginning after December 31, 2007. Personal casualty losses are deductible to the extent the losses exceed $100 per casualty and the sum of the casualty losses exceed 10% of the taxpayer's AGI. For tax years beginning after December 31, 2007, the standard deduction is increased by the amount of any disaster loss amount for casualty losses attributable to a federally declared disaster occurring in 2008 and 2009. The losses are deductible without regard to whether the losses exceed 10% of a taxpayer's adjusted gross income. The deduction for

any casualty attributable to a federally declared disaster occurring in 2009 is limited to the amount of the loss that exceeds $500.

- *Expensing of Qualified Disaster Costs.* – The act allows a taxpayer to elect to expense qualified disaster expenses after 2007 rather than capitalizing them. Qualified disaster expenses include any expenditure that is all of the following:
    1. Paid or incurred in connection with a trade, business, or business-related property.
    2. Otherwise chargeable to a capital account.
    3. Made for any of the following:
        a. The abatement or control of hazardous substances that were released on account of a federally declared disaster.
        b. The removal of debris from, or the demolition of structures on, business-related property that is damaged as the result of a federally declared disaster.
        c. The repair of business-related property damaged as a result of a federally declared disaster.
- *Net Operating Losses Attributable to Federally Declared Disasters.* – The act creates a special five-year carryback period for net operating losses (NOLs) related to qualified disaster loss. In general, NOLs may be carried back and deducted against taxable income in the two tax years before the NOL year, and then carried forward and applied against taxable income for up to 20 years after the NOL year. The bill would allow a taxpayer to take the loss in three equal installments in taxable years 2010, 2011, and 2012.
- *Special Depreciation Allowance for Qualified Disaster Assistance Property.* – EESA allows an additional 50% depreciation allowance to be claimed for real and personal business property that is purchased to rehabilitate or replace similar property that is destroyed or condemned as a result of a residentially declared disaster for property placed in service after December 31, 2007, with respect to disasters declared after that date and occurring before January 1, 2010. North Carolina will conform to this provision in a modified way, just as it has with other bonus depreciation provisions enacted by Congress over the last decade. Like the bonus depreciation provision under ARRTA, a taxpayer will be required to add back 85% of the accelerated depreciation amount[75] in the year that it is claimed for federal purposes. Then, for tax years beginning on or after January 1, 2009, taxpayer may deduct from federal taxable income the total amount of the add-back required for either the 2007 or 2008 tax year, divided into five equal installments.
- *Increased Expensing for Qualified Disaster Assistance Property.* – The act increases the maximum section 179 expense allowance and investment limitation amount for qualified section 179 disaster property placed in service after 2007. In general, a qualifying taxpayer may elect to treat the cost of certain property as an expense and deduct it in the year the property is placed in service instead of depreciating it over several years. This property is frequently referred to as section 179 property, after the relevant section in the Internal Revenue Code. To be eligible, the property must be tangible personal property which is actively used in the taxpayer's business for which a depreciation deduction would be allowed. The property

[75] The accelerated depreciation amount for property placed in service in 2008 is 50%.

must be used more than 50% for business and must be newly purchased property. Generally, taxpayers take expensing first and claim section 168(k) depreciation on any remaining basis. First year expensing and investment are increased for disaster property as follows:

1. The section 179 expense deduction ($250,000 for 2008) is increased by the lesser of $100,000 or the cost of the qualified section 170 disaster assistance property placed in service during the tax year.
2. The amount of the investment limitation ($250,000 for 2008) is increased by the lesser of $600,000 or the cost of qualified section 179 disaster assistance property placed in service during the tax year.

American Recovery and Reinvestment Tax Act of 2009 (ARRTA)

This massive stimulus package, with a total cost of $787 billion, included $300 billion in tax relief. Of the tax provisions that impact North Carolina revenues, this section, except where noted, conforms to the following changes:

INDIVIDUAL TAX RELIEF

- *Increase in EITC.* – Under federal law, a refundable earned income tax credit is available to certain low-income individuals. The amount of credit varies depending on the number of the taxpayer's qualifying children. ARRTA temporarily increases the credit from 40% to 45% of a family's first $12,570 of earned income for families with three or more children and increases the beginning point of the phase-out range for married couples filing a joint return by $1,880. North Carolina piggybacks this federal credit. A taxpayer who claims the federal EITC is allowed a refundable credit against North Carolina taxable income equal to 5% of the amount of credit the individual qualified for at the federal level.[76] Therefore, since the federal benefit is increasing, the State benefit will increase as well for the eligible individuals.

- *Temporary Suspension of Taxation of Unemployment Benefits.* – ARRTA allows an individual to exclude from gross income up to $2,400 of unemployment compensation received for 2009. Any unemployment benefits over $2,400 will be subject to federal income tax. Unemployment benefits include payments under federal or state law, disability payments received as a substitute for unemployment benefits, and payments under certain legislative acts and other benefit programs. Since the starting point for taxable income in North Carolina is federal taxable income, this exclusion will flow through at the State level and the income will not be subject to State income tax.

- *Transit Benefits Parity.* – ARRTA temporarily increases the monthly income exclusion for certain transit benefits accepted by employees between February 17, 2009 and January 1, 2011. Under current law, employers may extend transit benefits to employees as fringe benefits to offset commuting costs. Although compensation for services is generally taxable, qualified transportation fringe benefits provided by an employer to an employee are excluded from an employee's gross income for income tax purposes and from wages for payroll tax purposes. With this new provision, employees may deduct $230 per month (increased from $120) for these expenses through 2010. This provision applies specifically

[76] G.S. 105-151.31

to van pool benefits and transit benefits provided by an employer to an employee, so as to provide parity with an existing deduction for individual parking benefits.

BUSINESS TAX RELIEF

- *Expansion of the Work Opportunity Tax Credit.* – ARRTA extends the existing Work Opportunity Tax Credit to two new targeted groups of prospective employees: (1) unemployed veterans and (2) disconnected youth. Businesses hiring new employees from these targeted groups in 2009 and 2010 will be entitled to claim the credit in an amount equal to 40% of the first $6,000 of wages paid to those employees during the first year of employment. An "unemployed veteran" is one who was discharged or released from active duty from the Armed Forces during the five-year period prior to hiring and received unemployment compensation for more than four weeks during the years before being hired. A "disconnected youth" is one between the ages of 16 and 25 and has not been regularly employed or attended school in the past six months. North Carolina also piggybacks this federal credit. A taxpayer who is allowed the federal credit may take a State credit[77] in an amount equal to 6% of the amount of credit allowed under the Code for wages paid during the taxable year for positions located in this State. A position is located in this State if more than fifty percent (50%) of the employee's duties are performed in the State.

- *Extension of Bonus Depreciation.*[78] –The General Assembly decoupled from the extension of the bonus depreciation provisions in a manner similar to what it has done in the past by delaying the impact of the deduction. Taxpayers will be required to add back 85% of the accelerated depreciation amount[79] in the year that it is claimed for federal purposes. Then, for tax years beginning on or after January 1, 2009, taxpayer may deduct from federal taxable income the total amount of the addback required for either the 2007 or 2008 tax year, divided into five equal installments. This means that for State tax purposes, a taxpayer may deduct a greater depreciation amount in the outlying tax years, which will be the normal depreciation amount plus 20% of the accelerated depreciation amount the taxpayer had to add back. Over the life of an asset placed in service during 2008, taxpayers will be able to deduct the same amount of the asset's basis under both federal and State law; it is just that the timing of the deduction will differ.

- *Extension of Enhanced Small Business Expensing.* – This section conforms to the increased expensing limits authorized under EESA and extended under ARRTA by one year. In general, a qualifying taxpayer may elect to treat the cost of certain property as an expense and deduct it in the year the property is placed in service instead of depreciating it over several years. This property is frequently referred to as section 179 property, after the

[77] G.S. 105-129.16G.

[78] Bonus depreciation allows a business to claim more of a deduction up front and spread the remainder out over the normal depreciation schedule. However, over the life of the asset the taxpayer still receives the same benefit. Congress has authorized bonus depreciation several times to encourage business investment, specifically after September 11, 2001. The Jobs Creation and Worker Assistance Act of 2002 provided a 30% bonus depreciation allowance. The Jobs and Growth Tax Relief Reconciliation Act of 2003 extended the sunset and increased the amount to 50%. There were bonus depreciation provisions in both the Emergency Economic Stabilization Act of 2009 and the American Recovery and Reinvestment Tax Act of 2009.

[79] The accelerated depreciation amount for property placed in service in 2008 is 50%.

relevant section in the Code. To be eligible, the property must be tangible personal property that is actively used in the taxpayer's business for which a depreciation deduction would be allowed. The property must be used more than 50% for business and must be newly purchased property. Generally, taxpayers take the expensing deduction first and claim section 168(k) depreciation on any remaining basis.

Prior to the EESA, the deduction was limited to $128,000 of the cost of the property with a phase-out at $510,000 for 2008. The new law temporarily doubles the limitation to $250,000[80] and increases the phase-out to $800,000. These limitations apply only to property purchased and placed in service in tax years beginning in 2008.

- *Five-Year Carryback of NOL for Small Businesses (for individual filers only).* – Taxpayers that sustain a net operating loss (NOL) for a tax year generally can take an NOL deduction to reduce income in another tax year. Under ARRTA, taxpayers can elect to carry back 2008 NOLs for three, four or five years, instead of the normal two years. An eligible business is defined as a corporation, partnership or sole proprietorship that had average annual gross receipts of no more than $15 million for the tax year of the NOL and the two immediately preceding tax years. A taxpayer may also elect to apply the extended carryback period to NOLs incurred in a tax year beginning in 2008, rather than in a tax year ending in 2008. This section allows individual filers who qualify to take advantage of the five-year carryback period at the State level. North Carolina did not, however, conform to this change for corporate filers. Under current State law, corporations must add back net operating losses. Therefore, nonconformity to this provision under EESA and ARRTA for corporate filers is consistent with current tax treatment.

- *Small Business Capital Relief.* – ARRTA temporarily increases from 50% to 75% the exclusion for qualified small business stock sold by an individual. The increased exclusion percentage is applicable to stock acquired after February 17, 2009 and before January 1, 2011. The percentage exclusion does not apply to the sale or exchange of certain empowerment zone stock. When the stock is issued, the gross assets of the issuing corporation may not exceed $50 million and the corporation must have at least 80% of the value of its assets used in the active conduct of one or more qualified trades or businesses.

- *Modification of § 382 Rules for Business Receiving TARP Funds.* – Under current law, when the ownership of a corporation changes, § 382 may be triggered to limit the use of the corporation's pre-change losses. ARRTA provides a narrow exception to the application of the § 382 limitation, which is normally triggered when ownership change occurs in a corporation that has a net operating loss, a NOL incurred in the year of the change, or a net unrealized built-in loss (NUBIL). ARRTA modifies the limitation so that it does not apply if the ownership change (1) occurs under a restructuring plan required under a loan agreement or a commitment for a line of credit entered into with the U.S. Treasury under EESA, and (2) is intended to result in a rationalization of the costs, capitalization, and capacity of the manufacturing workforce (and suppliers to) the taxpayer and its subsidiaries.

---

[80] The new law does not alter the section 179 limitation imposed on sport utility vehicles, which have an expense limit of $25,000.

Study of North Carolina's Sales and Income Tax Structure. – Section 27A.7 authorizes the Finance Committees of the Senate and House of Representatives to meet during the interim to study and recommend legislation to reform North Carolina's tax structure. The Senate began this study during the legislative session. This study would be a joint effort by both legislative houses to reform North Carolina's tax system to reflect the current economy rather than the 1933 economy and to make the State's tax system more progressive and fairer so that individual taxpayers and business taxpayers who are in similar circumstances to one another are treated similarly by the tax system.

The State's experience with revenue shortfalls over the last 20 years has led to the creation of several study committees, both inside and outside the General Assembly, charged with the task of developing a 21st Century tax policy for the State. The last study committees to consider these issues include the Governor's Commission to Modernize State Finances, the Institute for Emerging Issues, the State and Local Fiscal Modernization Committee, and the Joint Select Committee on Economic Development Incentives. The Senate Finance Committee heard several presentations regarding the work of these committees.[81] The studies all proposed expanding the State's tax bases and eliminating tax exemptions, deductions, and credits. The Senate Finance Committee discussed a 21st Century Tax Modernization Plan based upon the recommendations of these study committees. The plan expands several of the State's tax bases and lowers tax rates. The intent of the plan is to provide the State with a more stable tax structure that balances the different types of taxes and the different groups of taxpayers and to avoid increasing revenues through temporary, expedient changes.

REAL PROPERTY SALES INFORMATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-454	**SB 405**	**Senator Hartsell**

AN ACT TO ASSIST COUNTIES AND THE DEPARTMENT OF REVENUE IN OBTAINING ACCURATE REAL PROPERTY SALES INFORMATION NEEDED FOR PROPERTY TAX APPRAISALS.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, requires that a deed conveying real property and presented for registration before the register of deeds contain the following information:

- The name of each grantor and grantee and the mailing address of each grantor and grantee.
- A statement whether the property includes the primary residence of a grantor.

FISCAL IMPACT: No General Fund impact.

EFFECTIVE DATE: This act becomes effective January 1, 2010.

[81] February 18, 2009; February 25, 2009; March 4, 2009; April 15, 2009; April 22, 2009; June 3, 2009; July 28, 2009.

ANALYSIS: Beginning January 1, 2010, a deed[82] conveying real property and presented for registration with the register of deeds must include the following information on the deed:

- The name and mailing address of each grantor and grantee. This information will assist counties in collecting property taxes.
- A statement whether the property includes the primary residence of the grantor. This information will assist the Department of Revenue in determining whether income taxes are due such as on the sale of a vacation home or rental property.

Failure to provide this information on the deed will not affect the validity of a duly recorded deed. The act also reinstates the duty of the person presenting the instrument for registration to report the correct amount of tax due. An excise tax on conveyances is collected by the register of deeds when a deed is recorded. The rate is $1.00 for each $500 of the value of property conveyed. The correct amount of excise tax will assist the counties in determining accurate appraisals of real property for taxation purposes. This statutory duty was repealed in 2000 when legislation was enacted to eliminate the use of stamps on deeds.[83]

The Revenue Laws Study Committee had recommended to the 2009 General Assembly that a statewide sales information report be filed along with a deed and that this document also contain a brief description of the property conveyed, the total sales price, whether the transaction involved relatives or related businesses, whether personal property was conveyed with the transaction, and whether the transaction was the result of an auction or foreclosure sale. This sales information report was supported by tax assessors from large urban counties and smaller rural counties as well as the Property Tax Division within the Department of Revenue as a tool to assist the counties in meeting the statutory fair market appraisal standards. G.S. 105-283 requires that all property be appraised at its true value or market value for property tax purposes. To assist the counties in determining true value, the Department of Revenue conducts yearly sales assessment ratio studies for every county. These studies compare the appraised value of parcels with the sales price. The closer the comparison is to 100%, the closer the property's appraised value is to its fair market value. It was the opinion of this group that the information in the report would assist the Department in determining the true value of property in the counties while weeding out transfers of property that did not reflect payment of the property for fair market value. The Department of Revenue also noted that fifty counties currently send out letters requesting similar sales information and six counties require either transfer affidavits or copies of the sales contract.[84]

During the 2009 Session, the Revenue Laws Committee proposal was simplified by eliminating a separate report as well as disclosure of certain sales information. The General Assembly decided it was unnecessary to require parties to pay to record a separate document with the register of deeds as long as the required information was on the deed. The General Assembly also felt that a duty to report the correct amount of excise tax on the conveyance was sufficient notice of the sales price to assist the county in meeting the statutory fair market appraisal standards.

---

[82] The act does not apply to deeds of trust, deeds of release, or similar instruments.

[83] Prior to 2000, the registers of deeds affixed tax stamps on a deed to indicate that the excise tax on a conveyance had been paid. The use of these stamps was eliminated when metering machines and similar equipment became available.

[84] The following counties require transfer affidavits: Camden, Chowan, Currituck, Dare, Martin, and Pasquotank.

WITHHOLDING ON CONTRACTORS IDENTIFIED BY ITIN.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-476	**SB 1006**	**Senator Hoyle**

AN ACT TO REQUIRE WITHHOLDING ON CONTRACTORS IDENTIFIED BY AN INDIVIDUAL TAXPAYER IDENTIFICATION NUMBER (ITIN).

OVERVIEW: This act, which was a request of the Department of Revenue, requires a person who pays an Individual Taxpayer Identification Number (ITIN) holder more than $1,500 a year in compensation other than wages to withhold 4% of the compensation.

FISCAL IMPACT: The act is estimated to generate $8 million in fiscal year 2009-2010, and potentially $18 million in subsequent fiscal years. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act is effective for taxable years beginning on or after January 1, 2010.

ANALYSIS: Under current North Carolina law, an employer is required to deduct and withhold from an employee's wages the State income taxes payable by the employee on those wages and deposit the withheld taxes with the Department of Revenue. A person who pays more than $1,500 during a calendar year as compensation other than wages for personal services performed in this State by a nonresident individual or entity must withhold 4% of the payment and remit the withheld taxes to the Department.[85] This act applies the same withholding requirement to compensation other than wages paid to an ITIN holder. An ITIN is issued to a person who is required to have a taxpayer identification number but is not eligible to obtain a social security number. A person may obtain a social security number if the person has been lawfully admitted to the United States for permanent residence or under other immigration categories that authorize employment in the United States.

A payer required to withhold taxes from compensation paid to an ITIN holder must file a return and pay the withheld taxes to the Department. The withheld taxes are payable quarterly, monthly, or semiweekly depending upon the average amount withheld by a payer each month. If the amounts withheld average less than $250 a month, the payments are due quarterly. If the amounts withheld average at least $250 but less than $2,000, the payments are due monthly. All other payments are due by the date set under the Internal Revenue Code for payment of federal employment taxes attributable to the same wages. A payer who withholds taxes from compensation paid to an ITIN holder must give the person a written statement by January 31 following the end of the calendar year that sets out the total amount of compensation paid during the calendar year to the person and the total amount deducted and withheld.

The Department of Revenue requested this change in the law to better enable it to collect State income taxes on amounts paid to ITIN holders who are not employees. The Department reviewed

[85] The withheld taxes are credited to the employee or to the nonresident individual or entity from whom they were withheld. People from whom taxes have been withheld receive credit for the withheld taxes by filing a North Carolina income tax return, and any excess is refunded to the taxpayer.

1099 Forms available through the Federal Data Exchange Program with the Internal Revenue Service. A review of the data indicated a number of North Carolina ITIN holders as the recipients of 1099 miscellaneous payments. Often, the ITIN holder receiving the compensation identified on the 1099 forms were illegal immigrants. Attempted collections of these amounts by the Department resulted in less than 10% of the amount of tax due. The Department believes that a withholding requirement on non-employee compensation paid to ITIN holders will insure the tax is properly paid on income earned in the State. The withholding requirement applies to an array of businesses, but one of the predominant ones is construction.

COMMUNITY LAND TRUST PROPERTY TAXATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-481	**HB 1586**	**Rep. Luebke, Hall**

AN ACT TO CLARIFY THE VALUATION OF COMMUNITY LAND TRUST PROPERTY.

OVERVIEW: This act classifies community land trust (CLT) property as a special class of property and requires resale restrictions to be considered in determining the property tax value.

FISCAL IMPACT: This act will lower the value of land trust property for property tax purposes, potentially lowering the revenues of the cities and counties in which the properties reside. There are currently two qualifying community land trusts active in North Carolina: Durham Community Land Trust, and Orange Community Housing and Land Trust. The changes in this bill will result in a $6,885.15 revenue loss for Durham County beginning in FY 2009-10 and a $5,250.64 revenue loss for the City of Durham beginning in FY 2009-10. The Orange County Board of Equalization and Review is currently conducting a hearing regarding land trust property. Depending on how the Board rules, there could be an additional revenue loss to Orange County, the City of Carrboro, the City of Chapel Hill, and the Carrboro-Chapel Hill School District.

EFFECTIVE DATE: This act is effective for taxable years beginning on or after July 1, 2010.

ANALYSIS: CLT property is a model of home ownership for low- and moderate-income families where the underlying land is owned by a nonprofit and the homes located thereon are owned (or rented for sufficiently long periods that banks treat the leasehold interest as an ownership interest for loan purposes) by the low- or moderate-income individuals or families. Notably, CLT property is subject to restrictions on the sales price in order to ensure the properties are affordable for future, subsequent low- and moderate-income families.

Under North Carolina law, real property must be appraised at its true value, or the value a willing, able, and knowledgeable buyer would give to a willing, able, and knowledgeable seller for the property. In appraising true value, the assessor must "consider … any … factor that may affect its value." Anecdotal evidence suggested inconsistent treatment by counties of the resale restrictions on CLT property and whether those restrictions qualified as as a "factor that may affect [a property's] value" for purposes of establishing a property tax value. Accordingly, some CLT properties were appraised at market value for tax purposes despite resale restrictions that disallowed the homeowner to sell the property at market value.

This act classifies CLT property for special property tax valuation and establishes how resale restrictions should be used by an assessor in establishing property tax values for this type of property. [86] CLT property is an improvement to real property that meets all of the following requirements:

- It is developed by a non-profit 501(c)(3) tax-exempt entity, which retains an interest in the property according to one of the following two models:
  - The improvement is conveyed to the qualifying owner and the land on which the improvement is constructed is leased to the qualifying owner under a 99-year lease, renewable for an additional 99-year term.
  - The improvement and the land on which the improvement is constructed are leased to the qualifying owner under a 99-year lease, renewable for an additional 99-year term.
- An interest in the property is conveyed to a North Carolina resident who occupies the improvement, as owner or lessee, as a permanent residence and who is part of a household with an annual income, at the time of transfer and adjusted for family size, of not more than 100% of the local area median income.
- Its resale value is governed by restrictions contained in the ground lease to ensure low-priced housing to subsequent qualifying owners.

The tax value of CLT property when the property first qualifies for this classification is equal to the actual sales price of the house to the qualifying owner, minus any silent mortgage amount. In subsequent revaluations, the tax value of CLT property is capped at the original sales price plus the amount of capital gain the qualifying owner could realize from the sale.

Under G.S. 105-278.6(e), real property held by a nonprofit organization as a future site for housing for individuals or families with low or moderate incomes qualified for a deferral of property taxes. Those taxes become due and payable if homes for low or moderate income families are not built on the land within five years. In addition to classifying CLT property as a special class of property for property tax purposes, the act also modifies G.S. 105-278.6(e) in order to provide that eligibility for the tax deferral program does not end in situations such as bankruptcy or foreclosure, where the qualifying owner's interest is re-acquired by the CLT and the CLT owns the property, in toto, during the listing period.

DEVELOPMENT TIER DESIGNATION EXCEPTION.

Session Law	*Bill #*	*Sponsor*

[86] This act is not the only preferential tax treatment provided for low-income housing. Last session, the General Assembly enacted S.L. 2008-146, which classified certain low-income rental housing developments as a special class of property for which the value must be assessed by using the income approach to valuation. For such property, the tax assessor must take into account any applicable rent restrictions and may not include any federal tax credits for affordable housing in determining income. The property value determination is limited to actual rental income as opposed to the rental income similarly situated property not subject to rent restrictions would be able to generate as income.

S.L. 2009-505 **HB 1500** **Representative Spear**

AN ACT TO CREATE A NEW DEVELOPMENT TIER DESIGNATION EXCEPTION FOR CERTAIN SEAFOOD INDUSTRIAL PARKS.

OVERVIEW: This act provides that any seafood industrial park has a development tier one designation for purposes of economic development programs, including certain tax credits.

FISCAL IMPACT: There is a potential fiscal impact depending on whether and how many new parks are established, but no estimate is currently available. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on August 26, 2009, and expires on July 1, 2012.

ANALYSIS: This act provides that any seafood industrial park created under Article 23C of Chapter 113 of the General Statutes has a development tier one designation. The North Carolina Seafood Industrial Park Authority (Authority) is an eleven-member board with nine appointments by the Governor and two by the General Assembly. Among its purposes, the Authority is charged with creating jobs and economic growth in the seafood and other marine-related industries.

The tier designations assigned to counties each year by the Secretary of Commerce are designed to measure and rank how economically distressed each county is based on four factors:

- Average rate of unemployment
- Median household income
- Percentage growth in population
- Adjusted assessed property value per capita

Counties designated as tier one are the most economically distressed according to these factors, while counties designated as tier three are the least economically distressed. This tier system is incorporated into various economic development programs, including the Article 3J Tax Credits, to encourage economic activity in the less prosperous areas of the State. The thresholds and credit amounts are more favorable for tier one counties. Under current law, there are exceptions to the tier ranking system in which entities may be given a tier designation different from the county in which they are located. An exemption already exists for an industrial park located in multiple jurisdictions. This act creates a new exception for seafood industrial parks.

Currently, the only Seafood Industrial Park created under Article 23C of Chapter 113 of the General Statutes is located in Wanchese, Dare County,[87] North Carolina. However, since this facility is has no more room for expansion, the Authority is seeking new locations to accommodate future growth and to promote job creation. Of the 26 potential sites in 11 counties that were considered, Perquimans[88] was identified as the number one site. In 2008, Perquimans County and the Authority indicated their intent to enter into a partnership for the development of a 70-acre marine park. The County anticipates that when the park is fully developed it will have over 20 businesses, including six boat builders, boat repair and maintenance, marine engine sales and service, boat sales, upholstery, and cabinet making, with approximately 400 employees, and will

[87] At the time of this publication, Dare County is a tier two county.
[88] At the time of this publication, Perquimans is a tier two county.

be the major economic development initiative within the County. The Authority is also considering the establishment of another seafood industrial park in Hyde County. The lower tier designation may enable seafood industrial parks to obtain more generous tax incentives and federal money that they may not otherwise be able to obtain.

SALES TAX INCENTIVES FOR FLIGHT SIMULATORS.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-511	**SB 1057**	**Senator Dorsett**

AN ACT TO EXPAND THE SALES TAX EXEMPTION FOR AIRCRAFT SIMULATORS.

OVERVIEW: This act extends the sales tax exemption for aircraft simulators to all aircraft simulators used for flight crew training and maintenance training.

FISCAL IMPACT: The act will reduce General Fund revenues by $1.9 million in fiscal years 2009-2010 and 2010-2011. The act will also reduce local revenues by $0.8 million in fiscal years 2009-2010 and 2010-2011. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act is effective October 1, 2009, and applies to sales made on or after that date.

ANALYSIS: In 1999, a sales tax reduction from 6% to 1% with an $80 cap was given to passenger air carriers for purchases of aircraft simulators for flight crew training used at the air carrier's hub. The tax reduction also applied to interstate air couriers.

In 2005, the sales tax reduction was repealed and a sales tax exemption was provided for certain items, including aircraft simulators for flight crew training, for sales to an interstate passenger air carrier for use at its hub.

This act exempts from sales and use tax the sales of all flight simulators used for flight crew training and maintenance training. The changes to the sales tax exemption were requested as part of a development project for the Piedmont Triad International Airport. The Project seeks to promote creation of a flight training hub in the area by extending the credit to all flight simulators.

JMAC MODIFICATIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-520	**HB 884**	**Representative Cole**

AN ACT TO MODIFY THE REQUIREMENTS FOR A GRANT FROM THE JOB MAINTENANCE AND CAPITAL DEVELOPMENT FUND.

OVERVIEW: This act does three things:

- It modifies the investment and employment requirements for a business to qualify for a grant from the Job Maintenance and Capital Development Fund.
- It increases the total aggregate cost of all agreements entered into under the Fund from $60 million to $69 million.
- It increases the total annual cost of any one agreement from $4 million to $6 million.

FISCAL IMPACT: The total impact is $9 million, because it increases the maximum payout from $60 million to $69 million from the Job Maintenance and Capital Development Fund. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act becomes effective July 1, 2010.[89]

ANALYSIS: The General Assembly created the Job Maintenance and Capital Development Fund in 2007 as a non-reverting account in the Department of Commerce.[90] The Fund is similar to the Job Development and Investment Grant Fund created by the General Assembly in 2002, except that the purpose of the Job Maintenance and Capital Development Fund is to maintain jobs while the purpose of the Job Development Grant Program is to create new jobs. In September 2008, two companies each received a 10-year grant from the Job Maintenance and Capital Development Fund for up to $30 million provided they meet job retention, investment, and other performance requirements: the Goodyear Tire and Rubber Company in Fayetteville and the Firestone North American Tire in Wilson.

The legislation enacted in 2007 set a minimum investment requirement of $200 million within five years and a minimum job retention requirement of 2,000 full-time employees or equivalent full-time contract employees.[91] Domtar[92] a company in Washington County in Plymouth, is a manufacturing company converting from paper production to fluff production.[93] The cost of the modernization project is expected to be $69 million. It is anticipated that the modernization project will ensure the future of the mill, but it will reduce the number of full-time equivalent employees from 520 to 320. This company could not meet the minimum investment and job retention requirements needed to receive a grant from the Job Maintenance and Capital Development Fund. This act creates a different level of investment and job retention for a manufacturing business that is converting its manufacturing process to change the product it produces:

- It reduces the minimum investment requirement from $200 million to $65 million. A business must make this investment with private funds and the investment must be made within three years of the time the investment commences.

---

[89] Senate Bill 825 initially contained the contents of this act. That bill failed third reading in the House on August 6, 2009. The contents of the bill were put into House Bill 884. House Bill 884 changed the effective date to July 1, 2010. Under Senate Bill 825, the bill would have become effective when it became law.

[90] S. L. 2007-552, G.S. 143B-437.11; S. L. 2008-187 recodified the statute as G.S. 143B-437.012.

[91] Under its agreements, Goodyear must retain 2, 398 workers and invest $200 million by 2012 at its Fayetteville facility and Firestone must retain 2,083 workers and invest $200 million by 2010 at its Wilson facility.

[92] Domtar was originally part of Weyerhauser.

[93] Fluff is created from loblolly pine and is used in disposable diapers for children and adults.

- It reduces the minimum job retention requirement from 2,000 full-time employees or contract employees to 320 full-time employees. The business must maintain this level of employment for the full term of the grant.

The Department may not enter more than five agreements, and this act does not change that limitation. However, the act does increase the total aggregate cost of all agreements for grants from the Fund from $60 million to $69 million and it increases the annual cost of any one agreement from $4 million to $6 million. A grant agreement obligates the State to make a series of grant payments over a period of time, but it does not authorize the taxing power of the State to be pledged.

The act does not change any of the other following conditions a business must meet to qualify for a grant from the Job Maintenance and Capital Development Fund:

- The project must be located in a development tier one at the time the grant application is made.

- All newly hired employees of the business must be citizens of the United States or have proper identification and documentation of their authorization to reside and work in the United States.

- The business must pay an average weekly wage that is at least equal to 140% of the average wage for all insured private employers in the county.

- The business must make health insurance available for all full-time employees and equivalent full time contract employees of the project for which the grant application is made. This health insurance must pay at least 50% of the premiums for health care coverage that equals or exceeds the minimum provisions of the basic health care plan of coverage under G.S. 58-50-125. The business must provide a certification to the Department showing continuing compliance annually.

- The business, with respect to the location for which the grant is made, has no citations under OSHA that have become a final order within the past three years for willful serious violations or for failing to abate serious violations.

- The business, with respect to the location for which the grant is made, has no pending administrative, civil, or criminal enforcement action based on alleged significant violations of any program implemented by DENR, and has had no final determination of responsibility for any significant administrative, civil, or criminal violation of any program implemented by an agency of DENR within the past three years.

Any business meeting the requirements for a grant from the Job Maintenance and Capital Development Fund may apply for a grant. The Department of Commerce is charged with the responsibility of administering the selection of projects receiving a grant. The Department submits the project applications that it deems eligible and appropriate for a grant to the Economic Investment Committee. The Economic Investment Committee must make the following findings before it can recommend a project receive a grant from the Fund:

- The conditions for eligibility have been met.

- A grant from the Fund for the project is necessary to carry out the public purposes of the Fund.[94]
- The project is consistent with the economic development goals of the State and the area where the project is located.
- Affected local governments have participated in retaining the business and offered incentives appropriate to the project.
- A grant is necessary for the maintenance of the project within the State.

The Economic Investment Committee must recommend the appropriate grant amount for each applicant to whom it believes a grant should be given. The Committee may consider the following factors in determining the amount of the grant:

- 95% of the privilege and sales and use taxes paid by the business on machinery and equipment installed at the project that is the subject of the agreement.
- 95% of the sales and use taxes paid by the business on building materials used to construct, renovate, or repair facilities at the project that is the subject of the agreement.
- 95% of the additional income and franchise taxes that are not offset by tax credits.
- 95% of the taxes paid on electricity, piped natural gas, and other fuel that is consumed at the project that is the subject of the agreement.
- 100% of worker training expenses associated with the project that is the subject of the agreement.
- 100% of any State permitting fees associated with the capital expansion at the project that is the subject of the agreement.

Absent a determination by the Secretary of Commerce that a project is no longer eligible or appropriate to receive a grant, the Department must enter into a binding and continuing contract, not to exceed 10 years, on behalf of the State with the business to provide a grant or series of grants for each project recommended by the Committee. The grant agreement must contain the following:

- All performance criteria, remedies, and other safeguards recommended by the Committee or required by the Department to secure the State's investment.
- A provision prohibiting a recipient business from receiving a payment or benefit under the agreement when it has received a notice of an overdue tax debt that has not been satisfied or resolved.

In order to ensure that public funds are used only for the Fund's public purposes, to protect the State's investment, and to ensure that the projected benefits of the project result, the Department must require each recipient business to agree to meet performance criteria, including maintenance of an appropriate level of employment at specific compensation levels, maintenance of health insurance for all full-time employees, investment of a specified amount over the agreement term,

[94] The public purposes include stimulating economic activity, maintaining high-paying jobs in the State, encouraging capital investment, reducing economic distress, enlarging the tax base, increasing revenue to the State's political subdivisions, and maintaining continued diversity in the State's industrial base.

and any other criteria considered appropriate by the Department. In addition, the agreement must require the business to repay or reimburse an appropriate portion of the grant for any failure to meet the performance criteria.

The Department is charged with monitoring compliance by a recipient business with performance criteria and with administering repayment for failure by a recipient business to meet performance criteria. The Department pays for the administrative costs for these responsibilities from funds appropriated for that purpose or other economic development purposes. Within two months after the end of each calendar quarter, the Department must report to the Joint Legislative Commission on Governmental Operations regarding the Fund, including a listing of each grant awarded and each agreement entered into during the preceding quarter, and detailed information about any defaults and repayment during the preceding quarter. For each grant agreement in the report, the Department must include the name of the business, the cost-benefit analysis by the Committee, a project description, and the projected grant amount to be paid during the current fiscal year. The Department must publish its report on its website and make printed copies available upon request.

REVOLVING LOAN FUND FOR ENERGY IMPROVEMENTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-522	**HB 1389**	**Rep. Fisher, Harrison, Rapp**

AN ACT TO AUTHORIZE CITIES AND COUNTIES TO ESTABLISH LOAN PROGRAMS TO FINANCE THE INSTALLATION OF DISTRIBUTED GENERATION RENEWABLE ENERGY SOURCES OR ENERGY EFFICIENCY IMPROVEMENTS THAT ARE PERMANENTLY AFFIXED TO REAL PROPERTY.

OVERVIEW: This act authorizes cities and counties to establish revolving loan programs to finance energy efficiency improvements and distributed generation renewable energy sources that are permanently affixed to real property.

FISCAL IMPACT: This act has no impact on General Fund revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 26, 2009.

ANALYSIS: North Carolina cities and counties are eligible to obtain federal grant funds under the American Recovery and Reinvestment Act of 2009, P.L. 111-5 (ARRA), during the 2009-2011 biennium to finance certain energy-related programs. The Energy Efficiency Conservation Block Grants Program (EECBG) seeks to assist eligible entities to reduce fossil fuel emissions, to reduce total energy use, and to improve energy efficiency in transportation and buildings.

This act authorizes cities and counties to establish loan programs to finance energy efficiency improvements and the installation of distributed renewable energy sources that are permanently affixed to real property. Cities and counties may use EECBG funds and any other restricted funds

the entity may have. The term of the loan may not be greater than 15 years, and the annual interest rate charged on the loan may not exceed 8%.

The term 'renewable energy source' has the same meaning as renewable energy resource as defined in G.S. 62-133.8. That definition does not include peat, a fossil fuel, or nuclear energy resource but does include all of the following:

- Solar electric.
- Solar thermal.
- Wind.
- Hydropower.
- Geothermal.
- Ocean current or wave energy resource.
- Biomass resource, including agricultural waste, animal waste, wood waste, spent pulping liquors, combustible residues, combustible liquids, combustible gases, energy crops, or landfill methane.
- Waste heat derived from a renewable energy resource and used to produce electricity or useful, measurable thermal energy at a retail electric customer's facility.
- Hydrogen derived from a renewable energy resource.

IDF CHANGES/RESEARCH & PROD. SERV. DISTRICTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-523	**HB 1514**	**Rep. Crawford, Dickson, Gibson**

AN ACT TO EXPAND ECONOMICALLY DISTRESSED COUNTIES TO INCLUDE ALL TIER ONE AND TIER TWO COUNTIES, TO INCREASE THE MAXIMUM EXPENDITURE OF FUNDS FROM THE INDUSTRIAL DEVELOPMENT FUND, TO EXEMPT FROM RULE MAKING THE CUSTOMIZED TRAINING PROGRAM UNDER THE COMMUNITY COLLEGE SYSTEM, AND TO AMEND THE COUNTY SERVICE DISTRICT ACT OF 1973 TO ALLOW ADDITIONAL COUNTY RESEARCH AND PRODUCTION SERVICE DISTRICTS.

OVERVIEW: This act expands the use of the Industrial Development Fund (IDF) and temporarily authorizes the establishment of additional county research and production service districts. The remainder of this act does not affect North Carolina tax laws and is not discussed below.

FISCAL IMPACT: No fiscal impact.

Effective Date: This act became effective when the Governor signed it into law on August 26, 2009. The modification of the qualification of counties for IDF benefits expires in three years on July 1, 2012.

Analysis: The IDF provides funds to assist local governments of the most economically distressed counties in the State in creating jobs in eligible industries. An economically distressed county is a county that has one of the 65 highest rankings under the development tier designation. An 'eligible industry' is defined as a company or person engaged in the business of air courier services, information technology and services, manufacturing, or warehousing and wholesale trade. The IDF funds must be used for (i) installation of or purchases of equipment for eligible industries; (ii) structural repairs and renovations of buildings for expansion of eligible industries; or (iii) construction of or improvements to new or existing utility lines or equipment or transportation infrastructure for existing or new building for the eligible industries. The funds must be used by the city and county governments for projects that directly result in the creation of new jobs and must be expended at a maximum rate of $5,000 per new job created up to a maximum of $500,000 per project.

Within the IDF there is a special account entitled the Utility Account that provides funds to assist the local government units of economically distressed counties. The funds in the Utility Account may only be used for the construction of or improvements to new or existing water, sewer, gas, telecommunications, high-speed broadband, electrical utility distribution lines or equipment, or transportation infrastructure for existing or new or proposed industrial buildings to be used for eligible industrial operations. There is no maximum funding amount per new job to be created or per project under the Utility Account.

Under the development tier designation, the 40 most distressed counties are designated as tier one, the next 40 as tier two, and the 20 least distressed as tier three.

This act makes the following changes related to the IDF:

- Increases the maximum rate by which funds in the IDF are to be expended for jobs from $5,000 to $10,000.
- Authorizes funds from the IDF to be spent for job retention as well as job creation.
- Expands the definition of "economically distressed county" to a county that is a tier one or a tier two county, which consists of the top 80 counties. Prior law defined the term as a county that has one of the 65 highest rankings.
- Provides funds from the Utility Account to tier one or tier two counties instead of only to counties with one of the 65 highest rankings under the development tier designation.

This act also authorizes additional county research and production service districts. Under current law, a board of commissioners may, by resolution, establish a research and production district for any area of the county if it meets the standards listed below. A county may levy property taxes within the district in addition to those levied throughout the county with a cap of 10¢ on each $100 value of property.

This act modifies those standards to allow for the creation of such a district when all of the real property in the district is part of a multijurisdictional industrial park. The maximum property tax rate for a district meeting those criteria would be 15¢ on each $100 value of taxable property.

The current standards for a research and production service district are:

1. All real property in the district is being used for or is subject to covenants that limit its use to research or scientifically-oriented production or for associated commercial or institutional purposes.
2. The district contains at least 4,000 acres.
3. The district includes research and production facilities that in combination employ at least 5,000 persons.
4. All real property located in the district was at one time or is currently owned by a nonprofit corporation, which developed or is developing the property as a research and production park.
5. A petition requesting creation of the district signed by at least fifty percent (50%) of the owners of real property in the district who own at least fifty percent (50%) of total area of the real property in the district has been presented to the board of commissioners. In determining the total area of real property in the district and the number of owners of real property, there shall be excluded (1) real property exempted from taxation and real property classified and excluded from taxation and (2) the owners of such exempted or classified and excluded property.
6. The district has no more than 25 permanent residents.
7. There exists in the district an association of owners and tenants, to which at least seventy-five percent (75%) of the owners of real property belong, which association can make the recommendations provided for in G.S. 153A-313.
8. There exist deed-imposed conditions, covenants, restrictions, and reservations that apply to all real property in the district other than property owned by the federal government.
9. No part of the district lies within the boundaries of any incorporated city or town.

DEVELOPMENT TIER EXCEPTION MODIFICATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-524	**SB 898**	**Senator Soles**

AN ACT TO MODIFY THE EXCEPTION FOR TWO-COUNTY INDUSTRIAL PARKS FOR DEVELOPMENT TIER DESIGNATION PURPOSES.

OVERVIEW: This act reduces the percentage of a two-county industrial park that must be located in the lower tier county to qualify the park for the lower development tier designation.

FISCAL IMPACT: There is a potential fiscal impact to the extent this act expands the scope of eligibility for certain tax credits and other incentives. However, since the Article 3J credits sunset January 1, 2011, it is not known whether any jobs or investment will take place in time for credits to be taken under the act. According to the Department of Commerce and the Columbus County Economic Development Commission, the process of purchasing the land, developing

infrastructure and recruiting businesses for the proposed industrial park will take several years. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on August 26, 2009, and expires on July 1, 2012.

ANALYSIS: This act modifies in two ways the standards that must be met in order for a two-county industrial park to qualify for the tier designation of the lower-tiered county. First, it reduces from one-third to one-fifth, the percentage of property of an industrial park located in two counties that must be located in the lower-tiered county in order to be eligible for the lower tier designation. Second, the counties must have entered into an interlocal agreement providing that the incremental increase in property tax revenues within the park shall be shared equally by the counties.

The Department of Commerce annually ranks the State's 100 counties based on economic well-being and assigns a tier designation to each county. This tier system is incorporated into various State incentive programs to encourage economic activity in the less prosperous areas of the State. The 40 most distressed counties are designated tier one, the next 40 are designated tier two, and the remaining 20 counties are designated tier three. A development tier designation is effective only for the calendar year following the designation.

The ranking system is based upon a county's development factor[95] and statutorily mandated adjustments. One of the statutorily mandated adjustments[96] is for a two-county industrial park. An eligible two-county industrial park has the lower development tier designation of the two counties in which it is located. Prior to this act, an eligible two-county industrial park had to meet all of the following conditions:

- It is located in two contiguous counties.
- At least 1/3 of the park is located in the county with the lower tier designation.
- It is owned by the two counties or a joint agency of the counties, is under contractual control of designated agencies working on behalf of both counties, or is subject to a development agreement between both counties and third-party owners.
- The county with the lower tier designation contributed at least the lesser of one-half of the cost of developing the park or a proportion of the cost of developing the park equal to the proportion of land in the park located in the county with the lower tier designation.

Columbus and Brunswick Counties could benefit from this legislation. They are building a two-county industrial park and desire to take advantage of the lower tier designation of Columbus County. Columbus County is a tier one county and Brunswick County is a tier three county. The two counties are planning to develop the "International Logistics Park of North Carolina." This industrial park would be the first at-port distribution center in North Carolina. The 1000-acre park will be located along Highway 74 (future I-74) and within 16 miles of the Port of Wilmington. The park would house a series of large distribution centers from which goods coming into the State Port at Wilmington could be distributed to retail outlets or regional distribution centers. The ports

[95] A county's development factor is the sum of the county's rank in the following areas: average rate of unemployment for the most recent 12-month period, median household income for the most recent 12-month period, percentage growth in population for the most recent 36 months, and adjusted assessed property value per capita for the most recent taxable year.

[96] Other statutorily mandated adjustments include those for small counties, development tier one areas, and multijurisdictional industrial parks.

located in Charleston, SC, Norfolk, VA, and Savannah, GA all have at-port distribution centers located near them.

The International Logistics Park will straddle the Brunswick and Columbus County line with approximately 200 acres located in Columbus County and the remaining 800 acres or so located in Brunswick County. Prior to the act, the park could not exceed 600 acres to qualify for the adjustment, since at least one-third of the park (200 acres) would need to be in the lower tier area. Under the act, the entire 800 acres could qualify for the adjustment because more than one-fifth of the park (160 acres) would be located in the tier one county.

The counties anticipate that the park will create 4000 new jobs for the area and generate at least $300 million in private investments. The lower tier designation will allow businesses locating in the International Logistics Park to qualify for the larger tax credits available under Article 3J for tier one counties and other incentives available to tier one counties. Those incentives include:

- Credit for creating jobs. – The job threshold and the credit amount per job are determined by the tier designation of the county in which the jobs are created. For a tier one county, the minimum number of jobs that must be created is five and the credit amount per job is $12,500; for a tier two county, the minimum number of jobs is 10 and the credit amount per job is $5,000; for a tier three county, the minimum is 15 and the credit amount is $500.
- Credit for investing in business property. – The credit percentage and threshold are based on the tier designation of the county where the property is placed in service. For a tier one county, there is no threshold and the credit percentage is 7% of the cost of capitalized tangible personal property; for a tier two county, the threshold is $1 million and the credit percentage is 5%; for a tier three county, the threshold is $2 million and the credit percentage is 3.5%.
- Credit for investing in real property. – This credit is only available for an eligible establishment located in a tier one county. To be eligible, the taxpayer must invest at least $100 million in real property within a three-year period and create at least 200 new jobs within two years.
- Credit for research and development. – The credit for expenses for research performed in a tier one county is 3.25% of the expenses, regardless of the amount of expenses incurred. For research performed in a tier two or tier three county, the percentage varies depending upon the amount of expense occurred.
- Job development investment grant. – This discretionary incentive program provides a limited number of cash grants directly to new and expanding businesses. The grants are based on job creation and investment commitment. The minimum number of jobs that must be created to qualify for a grant varies depending upon the development tier designation of the county where the jobs are created: the minimum number of jobs that must be created in a tier one county is 10 and for all other counties the minimum number of jobs that must be created is 20.
- Industrial development fund. – This fund provides grants and loans for infrastructure development in the 66 most distressed counties. There is no local match requirement in the 26 most distressed counties.

CRITICAL INFRASTRUCTURE ASSM'T CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-525	**SB 97**	**Senator Hartsell**

AN ACT TO ALIGN THE AUTHORIZED PURPOSES FOR SPECIAL ASSESSMENTS FOR CRITICAL INFRASTRUCTURE NEEDS WITH THE PURPOSES OF PROJECT DEVELOPMENT FINANCING; TO ADD RENEWABLE ENERGY SOURCES AND ENERGY EFFICIENCY IMPROVEMENTS AS PURPOSES; TO CLARIFY THE LAW CONCERNING FINANCING A PROJECT FOR WHICH ASSESSMENTS MAY BE PLEDGED, TO EXEMPT PRIVATE ENTITIES THAT IMPLEMENT CERTAIN PROJECTS FOR WHICH ASSESSMENTS MAY BE PLEDGED FROM THE COMPETITIVE BIDDING REQUIREMENTS OF LOCAL GOVERNMENTS; AND TO PROVIDE GUIDANCE FOR LOCAL GOVERNMENTS WHEN ISSUING CERTAIN DEBT INSTRUMENTS AND ENTERING INTO CERTAIN AGREEMENTS.

OVERVIEW: This act does all of the following:

- Aligns the purposes for which cities and counties may issue bonds payable from special assessments with the purposes for which project development financing may be used and adds the financing of renewable energy sources and energy efficiency improvements as a purpose for which bonds payable from special assessments may be used.
- Allows a city or county to partner with a private entity to construct a project financed with assessment-based financing.
- Clarifies that a city or county may use one or more financing sources to pay the costs of a project for which a special assessment is imposed and provides that assessments may be used to secure revenue bonds or as additional security for a project development financing debt instrument.
- Provides budgeting guidance to local governments in meeting future project development debt obligations.

FISCAL IMPACT: No fiscal impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on August 26, 2009.

ANALYSIS: Cities and counties use project development financing and special assessments to help finance the cost of long-term capital projects related to economic development projects. The subject of the development typically bears the cost of these financing tools. In the case of project development financing, the source is new property tax revenues generated by the development

and in the case of special assessments, the source is assessments imposed on the property by its owner to fund the costs of infrastructure that will benefit that property. These tools are relatively new in North Carolina.[97] In other areas of the country that have these financing tools, they are frequently used together.

This act modifies these two financing tools to make them more compatible. The act aligns the purposes for which cities and counties may issue bonds payable from special assessments with the purposes for which project development financing may be used under G.S. 159-103. Assessment-based financing may currently be used for water and sewer systems, stormwater systems, public transportation facilities, school facilities, and streets and sidewalks. This change effectively expands the purposes for which assessment-based financing may be used to include the following:

- Airport facilities
- Hospital facilities
- Art galleries, museums, and art centers
- Industrial parks
- Community college facilities
- Improving existing telephone systems
- Parks and recreation facilities
- Auditoriums, coliseums, arenas, stadiums, civic centers, and convention centers
- Parking facilities
- Preservation of railroad corridors
- Low and moderate income housing
- Gas systems
- Electric systems

The act also adds as a purpose for which assessment-based financing may be used the installation of distributed generation renewable energy sources or energy efficiency improvements that are permanently fixed to commercial, industrial, or other real property.[98]

The State Treasurer's office expressed concern about the use of assessments to finance traditional government functions, such as community college facilities and museums. Assessments may only be imposed on property that benefits from a project in some special way that is different from other property that is not assessed. Generally, these types of projects do not provide the kind of special benefit that warrants imposition of an assessment. There may be unusual circumstances where a special benefit could be substantiated, but these circumstances would be exceptional. Before assessment-based financing could be imposed for any of these purposes, the Local Government Commission must approve the proposed revenue bond issuance and one of the conditions that must be met before the Commission may approve such a debt issuance is that the proposed assessment is adequate and not excessive.

The act allows a city or county to implement a project financed in whole or in part by the imposition of assessment-based financing through contracts with public or private entities. The addition of this provision provides flexibility in procurement and greater conformity with project development financing projects. The provision recognizes that many of the local infrastructure

[97] S.L. 2003-403 authorized cities and counties to use project development financing, Article 6 of Chapter 159. S.L. 2008-165 authorized cities and counties to use special assessments, Article 9A of Chapter 153A (counties) and Article 10A Chapter 160A (cities).
[98] The House Judiciary Committee adopted an amendment to add this purpose.

projects associated with assessment-based financing are part of a unified and comprehensive development plan that makes it practical to construct a number of projects together.

The State Treasurer's office also expressed concern that the provision allows a local unit to partner with a private entity and bypass the bidding rules of Article 8 of Chapter 143 of the General Statutes. To address this concern, the act provides that private entities that undertake these projects are not subject to the competitive bidding requirements so long as no more than 25% of the estimated cost of the project is funded by general obligation bonds or general revenue. The act also provides that if the project is on public property and the bidding rules do not apply to the construction on this property, then the county must obtain certification from the private developer to ensure that claims for payment by contractors of the funds derived from the public financing will be met. The certification must be in the form and in an amount acceptable to the city or county. If the entity responsible for disbursing these funds receives notice of a claim from a person who would be entitled to a mechanic's or materialman's lien but for the fact that the claim relates to work performed on or supplies provided to publicly owned property, then either no disbursement of funds may be made until the claim is resolved or funds in an amount necessary to satisfy the claim must be set aside until the claim is resolved.

The act revises the financing provisions to address an interpretation issue raised by the School of Government and to provide that special assessments may be used to secure other obligations, including project development financing debt instruments. The act clarifies that the costs of these projects may be covered by using any combination of the following financing sources:

- Revenue bonds issued under G.S. 153A-210.6.
- Project development financing debt instruments issued under the North Carolina Project Development Financing Act, Article 6 of Chapter 159 of the General Statutes.
- General obligation bonds issued under the Local Government Bond Act, Article 4 of Chapter 159 of the General Statutes.
- General revenues.

The act also provides that special assessments may be pledged as additional security for project development financing debt instruments as well as revenue bond financing debt instruments. If the assessment is pledged to secure financing, the city or county must covenant to enforce the payment of assessments.

Lastly, the act provides three methods for a city or county to provide additional credit support to project development debt obligations. A city or county that issues project development financing debt instruments may agree in the proceedings relating to the issuance, and in the agreements it enters into with property owners in the development financing district,[99] that it will include in its budget an appropriation of the amount due on the debt instrument. A second method is to include in its appropriations the amount necessary to restore the level of funding in a reserve fund to its required level. The third option available is to permit a city or county to use any excess revenues in its general fund to make the required payments.[100] A local unit of government that provides this agreement in its finance-related proceedings or in its increment agreement with property owners must expressly state that the agreement does not create an obligation on the governing board to

[100] See G.S. 159-107.

make the appropriation; the appropriation continues to be subject to the annual budget making process.

CONGESTION RELIEF/INTERMODAL TRANSPORT FUND.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-527	**HB 148**	**Rep. Carney, Allen, Ross, McGee**

AN ACT TO ESTABLISH A CONGESTION RELIEF AND INTERMODAL TRANSPORTATION 21ST CENTURY FUND; TO PROVIDE FOR ALLOCATION OF THOSE FUNDS TO: (1) LOCAL GOVERNMENTS AND TRANSPORTATION AUTHORITIES FOR PUBLIC TRANSPORTATION PURPOSES, (2) SHORT-LINE RAILROADS, FOR ASSISTANCE IN MAINTAINING AND EXPANDING FREIGHT SERVICE STATEWIDE, (3) RAILROADS FOR INTERMODAL FACILITIES, MULTIMODAL FACILITIES, AND INLAND PORTS, (4) MAKE CAPITAL IMPROVEMENTS ON RAIL LINES TO ALLOW IMPROVED FREIGHT SERVICE TO THE PORTS AND MILITARY INSTALLATIONS, (5) EXPAND INTERCITY PASSENGER RAIL SERVICE; TO EXTEND LEVELS OF LOCAL TRANSIT FUNDING AUTHORIZATION TO THREE URBAN REGIONS; AND TO ALLOW OTHER LOCAL GOVERNMENTS OPTIONS FOR LOCAL TRANSIT FUNDING.

OVERVIEW: This act, which was a recommendation of the 21st Century Transportation Committee, does several things designed to provide funding options to improve public transportation and to relieve transportation-related congestion, including:

- Establish a fund to provide grants for public transportation, railroads for Intermodal and multimodal facilities and inland ports, State ports for terminal railroads and improved access to military facilities, and expansion of intercity passenger rail service.
- Authorize certain transportation authorities to levy, with voter approval, a ½% local sales tax to be used only for transportation systems.
- Authorize other counties that operate a public transportation system or have a municipality in the county that operates a public transportation system to levy, with voter approval, a ¼% local sales tax to be used only for public transportation systems.
- Authorize an increase in local vehicle registration taxes.

FISCAL IMPACT: The additional ½% sales tax would generate an estimated $72.7 million for the Triangle Transit Authority, which includes Wake, Durham, and Orange Counties, and $46.6 million for the Piedmont Authority for Regional Transportation (PART), which includes Forsyth

and Guilford Counties. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when the Governor signed it into law on August 11, 2009.

ANALYSIS:

State Grant Program for Intermodal Transit – Section 1 of this act creates the Congestion Relief and Intermodal Transportation 21st Century Fund (Fund) and authorizes the Secretary of Transportation, after consultation with the Board of Transportation, to make grants from the Fund to the entities listed below. The amount of grant funding will depend on the appropriations authorized for the Fund. The 2009 Appropriations Act did not include any appropriations for this Fund. In all cases except for the expansion of intercity rail service, the applicant must provide matching funds in an amount at least equal to the grant amount. The eligible recipient entities are:

- Local governments and transportation authorities for public transportation. The grant requires (i) approval of the application by the Metropolitan Planning Organizations covering the applicant; and (ii) a transit plan covering various planning policies and housing needs. A grant may not exceed 25% of the project cost.
- Short line railroads to assist in economic development and access to ports and military installations. A grant may not exceed 50% of the project cost. The total amount of annual grants for this purpose is limited to $5 million.
- Railroads to assist in rail improvements, intermodal or multimodal facilities or restorations to (i) serve ports, military installations, inland ports or (ii) improve rail infrastructure to reduce or mitigate truck traffic on the highway system. A grant may not exceed 50% of the project cost. The total amount of annual grants is limited to $10 million.
- State ports for terminal railroads and improved access to military facilities and Intermodal or multimodal facilities. A grant cannot exceed 50% of project cost. The total amount of annual grants is limited to $10 million.
- Expansion of intercity passenger rail service.

Sales Tax Authorization. – Section 2 of this act authorizes transportation authorities and counties that operate a public transportation system or have a municipality in that county that operates a public transportation system to levy additional sales and use tax for public transportation purposes. The rate of tax varies as described below. This part also allows special districts that levy a sales tax to receive an annual refund of sales and use tax paid by the district.

- Mecklenburg – In 1997, Mecklenburg County was authorized to levy an additional ½% sales and use tax for the purpose of funding public transportation needs. Under this act, there is no change from current law, except that funds can be used for bicycle and pedestrian infrastructure that supports public transportation.
- Triangle and Triad – A ½% sales tax may be levied in one or more of Durham, Orange and Wake Counties, which operate the Triangle Transit Authority (TTA), or in one or more of Forsyth and Guilford Counties, which operate the Triad's Piedmont Authority for Regional Transportation (PART), to be used only for public transportation.

To authorize the tax, the board of the TTA or PART, and the county board(s) of commissioners of the counties where the tax is to be levied must jointly agree to establish a special tax district and conduct a referendum. The date of the referendum is to be agreed on jointly by the transit authority board, the county board(s) of elections, and the county board(s) of commissioners.

If the tax is approved in all of the counties voting, the tax will apply in all of those counties. If the tax is approved in less than all of the counties voting, the tax may be levied in any county that approves it. If a particular county votes no, the tax cannot be levied in that county. After a successful referendum, the transit authority board may levy the tax.

A financial plan must be approved by the following entities, either before or after the referendum, but prior to the levy of the tax: (i) the transit authority board (ii) the board of commissioners of each county where the tax is to be levied, and (iii) all Metropolitan Planning Organizations whose jurisdiction includes any of the area of the special district.

The financial plan must provide for equitable use of the net proceeds within or to benefit the special district and consider (i) the identified needs of local public transportation systems in the district, (ii) human service transportation systems within the district, and (iii) expansion of public transportation systems to underserved areas of the district. The plan may be revised from time to time. An interlocal agreement between the transportation authority and all of the counties in the special district may require periodic review and approval of the financial plan.

The transit authority board will be the management agency for any multi-county district. The county board of commissioners is the management agency for any single county district, but may contract with the transit authority as needed for operation of the system.

If the district is approved in a referendum and does not consist of all three counties in the Triangle or both Triad counties, it may be expanded to include an additional county or counties by joint action of the transit authority and the board of commissioners of the county or counties to be added, with a favorable referendum in the county or counties to be added.

Repeal of the tax requires the approval of the transit authority and the county boards of commissioners of the counties involved and a referendum. A referendum on repeal can also be forced by a petition of 15% of the registered voters of the district.

- Remaining 94 counties – Section 2 authorizes the remaining 94 counties to levy a sales tax of ¼% with a referendum called by the county board of commissioners, but only if the county or a municipality within that county operates or contracts for the operation of a public transportation system and only if the county has levied the ¼-cent county sales tax authorized under Article 46 of Chapter 105 of the General Statutes. Funds may be used only for public transportation and are allocated between the county and the city under the same formula as for the increased vehicle registration fee set out in Section 4 of the act.

Local Vehicle Registration Charge Increase. – Since 1991, Triangle Transit has been authorized to levy a $5.00 vehicle registration tax, collected by DMV. This authorization was later extended to the Triad. The three Triangle counties are currently at the maximum. In the Triad, only Randolph County is levying the tax. Since legislative authorization in 1991, inflation brings the value of that $5.00 to $7.85. Section 3 of this act authorizes the tax to be increased to a maximum of $7.00, effective immediately and to $8.00, effective July 1, 2010. In the Triangle, a fee increase must be approved by the Triangle Transit Board, the boards of commissioners of all three counties, and by a special tax board consisting of two commissioners from each of the three counties, as

provided by current law. In the Triad, the current fee authorization is on a county-by-county basis with the approval of the PART board and the board of commissioners of the county.

Additional Vehicle Registration Charge. – Section 4 of this act allows all counties in which there is a county or municipal transit system to levy a vehicle registration tax of up to $7.00. The tax will be collected by DMV, as is the current Triangle Transit registration fee. Within the levying county, the tax will be shared by the county and municipalities, with the county receiving funds based on the population in the unincorporated areas and the municipalities based on the population within the corporate limits. If the county does not operate a transit system, it does not get a share of the funds; likewise any municipality not operating a transit system does not get a share of the funds. Those funds will be reallocated to those entities within the county that do operate a transit system. The county or city does not have to operate the system directly. It may contract for operation with another county or city, regional transit agency, or private entity. Funding allocation for human services transportation operating countywide can be determined by interlocal agreement.

Vehicle Registration Tax Conformed to New Registration System Deadlines. – Section 5 of this act conforms the deadlines for changes to the regional authority registration taxes with the Division of Motor Vehicles combined registration/inspection renewal system by increasing the amount of notice the DMV receives before a change goes into effect.

Supplemental Property Tax. – Section 6 of the act authorizes a supplemental property tax in the Research Triangle Park special tax district. Under 1985 legislation, that district may levy a tax up to 10 cents on each $100 value of property for general municipal purposes. The act authorizes an additional 10 cents on each $100 value of property for public transportation with the RTP or to provide for public transportation from RTP to other public transportation systems or to other places outside RTP such as RDU airport. This language was agreed to by a special ballot of property owners in RTP prior to committee consideration of the legislation. Each one cent raises approximately $430,000 per year. The actual tax levy must be agreed upon each year by the special tax district advisory board and the Wake and Durham County Boards of Commissioners.

EXPAND FILM CREDIT.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-529	**SB 943**	**Senator Garrou**

AN ACT TO PROVIDE FOR AN ALTERNATIVE CREDIT FOR QUALIFYING EXPENSES OF A PRODUCTION COMPANY.

OVERVIEW: This act increases the income tax credit for a production company from 15% to 25% of the company's qualifying expenditures. However, in exchange for the higher credit amount, a taxpayer must subtract from the credit amount the difference between the amount of tax paid on purchases subject to the privilege tax on mill machinery under G.S. 105-187.51 and the amount of tax the company would have paid on those purchases if they had been subject to the combined general rate of sales tax under G.S. 105-164.4. A taxpayer may continue to claim the lower 15% credit amount without making this deduction.

FISCAL IMPACT: The act is expected to have minimal fiscal impact in fiscal year 2010-2011. The General Fund revenue loss in fiscal year 2011-2012 and future years is expected to be $40 to

$60 million. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act is effective for taxable years beginning on or after January 1, 2010, and applies to qualifying expenses incurred on or after that date.

ANALYSIS: In 2005, the General Assembly replaced the film industry development grant program with a refundable income tax credit equal to 15% of the qualifying expenses spent by a production company in connection with a production.[101] This act provides a production company with the choice of two different credit amounts. A taxpayer chooses which credit amount to claim when the taxpayer files the return claiming the credit. A taxpayer's election as to which credit amount to claim is binding. The two credit amounts are as follows:

- The current amount, which is equal to 15% of qualifying expenses. Qualifying expenses are the total amount spent in North Carolina on the following:
  - Goods and services leased or purchased by a production company in connection with a production.
  - Compensation and wages paid by a production company on which it remitted withholding payments to the Department of Revenue. An amount paid in excess of $1 million to an individual for compensation may not be included as a qualifying expense.
  - Cost of production-related insurance coverage obtained on the production. Expenses for insurance and coverage purchased from a related member may not be included as a qualifying expense.
- An alternative amount, which is equal to 25% of qualifying expenses, less the difference between the amount of tax paid on purchases subject to the privilege tax on mill machinery under G.S. 105-187.51 and the amount of tax the company would have paid on those purchases if they had been subject to the combined general rate of sales tax under G.S. 105-164.4.[102]

The term 'mill machinery' is not defined. The Department of Revenue has long interpreted the term to include cameras, film, and props and building materials used in the construction of sets that are used in the actual filming of a movie for sale, lease, or rental.[103] Prior to 2006, the sales tax on mill machinery was 1% of the sales price of the machinery, up to a maximum tax of $80 per article. Effective January 1, 2006, this reduced sales tax rate on mill machinery was repealed and

---

[101] The incentive is targeted at feature films, episodic television series, and commercial advertising. The credit does not apply to the following: political advertising, television production of a news program or live sporting event, material that is obscene, or a radio production.

[102] The 1st edition of the bill, as passed by the Senate, increased the credit from 15% to 25% and became effective for taxable years beginning on or after January 1, 2009. The House Finance Committee changed the effective date to 2010 and limited the tax credit increase. The bill was rewritten to make the increased credit amount as an alternate credit because the limitation on the credit would have made the bill roll call in the Senate when it went back to the Senate for concurrence. Since the Senate received the bill from the House on August 8, 2009, the same day it adjourned, the bill could not have been enacted if it had been a roll call bill.

[103] North Carolina Department of Revenue Technical Bulletin, 20-4.

replaced by a privilege tax having the same rate.[104] The General Assembly changed the taxation of mill machinery in response to the requirement of the Streamlined Sales Tax Agreement that states simplify their sales tax laws by having a uniform sales tax rate with no caps or thresholds.

North Carolina's refundable film credit is capped at $7.5 million. In order to obtain the credit, the taxpayer's qualifying expenses must exceed $250,000. The credit may be claimed for the taxable year in which the production activities are completed. The credit is computed based on all of the taxpayer's qualifying expenses incurred with respect to the production, not just the qualifying expenses incurred during the taxable year. If the credit exceeds the amount of tax imposed for the taxable year reduced by the sum of all credits allowable, the Secretary must refund the excess to the taxpayer. A pass-through entity is considered a taxpayer for purposes of claiming this credit; therefore, it does not distribute the credit among its owners.

The North Carolina Film Office commissioned two studies funded in partnership with EUE Screen Gems Studios, IATSE Local 491, Premiere Entertainment Services, Charlotte Regional Film Commission, Piedmont Triad Film Commission, Wilmington Regional Film Commission, Cinelease, and Illumination Dynamics:

- "*Economic and Fiscal Impacts of the North Carolina Film Credit Program",* June 2009, prepared by Ernest & Young. This study presents estimates of the economic and tax impact of three components: film production activities; tourism related to NC films; and capital expenditures in NC film facilities.

- "*Economic Impact Study of the Production of a 'Mid-Major' Motion Picture on the Economy of Southeastern North Carolina",* Summer 2009, prepared by Dr. William Hall of the Cameron School of Business at the University of North Carolina at Wilmington. This study is a case study that identifies the spending impacts of a film on Brunswick, New Hanover, and Pender Counties.

Both studies recognize the number of jobs generated by film production in the State, the direct and indirect spending stimulus on the region's economy, the capital investments made by production companies, the resulting film generated tourism, and the contribution of these activities to the State and local government's tax collections.

The Ernest & Young study estimated the State's return on investment (ROI) from the refundable income tax credit. In forming the ROI estimate, the study analyzed the impact of the credit at the rate of 15% in 2007 and, using projections from the NC Film Office, estimated the impact of the credit at the rate of 25% for 2010 and 2011. The study found that film productions qualifying for the credit in 2007 accrued an estimated net present value of $22 million of refundable tax credit cost to the State and $29 million of State and local tax revenue. In considering State tax ROI, the study estimated the State's ROI was $0.98 for each dollar of tax credit expenditure. This estimate assumes that the film productions qualifying for the credit would not have been produced in the State in absence of the credit. The study estimated that the total State and local tax impacts from film productions, tourism, and capital expenditures related to film production would be $48 million in 2010 and $57 million in 2011 under a 25% tax credit. Under this scenario, the State tax ROI from each dollar of tax credit expenditure would be $0.69 in 2010 and $0.67 in 2011.

---

[104] The 2001 General Assembly enacted Article 5F of Chapter 105 of the General Statutes, the article that imposes a 1%, $80 privilege tax on certain machinery and equipment. The 2001 legislation became effective January 1, 2006.

INCENTIVES FOR ENERGY CONSERVATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-548	**HB 512**	**Rep. Holliman, Harrison, Luebke**

AN ACT TO EXTEND THE CREDIT FOR INVESTING IN RENEWABLE ENERGY PROPERTY TO GEOTHERMAL HEAT PUMPS AND EQUIPMENT, TO ALLOW THE CREDIT TO BE TAKEN AGAINST THE GROSS PREMIUMS TAX, AND TO EXTEND THE SUNSET FOR THE CREDIT.

OVERVIEW: This act expands the renewable energy tax credit to geothermal heat pumps and equipment, allows the credit to be taken against the gross premiums tax, and extends the sunset of the credit.

FISCAL IMPACT: The act will reduce General Fund revenues by $0.4 million in fiscal years 2009-2010 and 2010-2011. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective for taxable years beginning on or after January 1, 2009.

ANALYSIS: Under current law, the credit for investing in renewable energy property applies to any of the following machinery and equipment or real property:

- Biomass equipment that uses renewable biomass resources[105] for biofuel production of ethanol, methanol, and biodiesel; anaerobic biogas production of methane utilizing agricultural and animal waste or garbage; or commercial thermal or electrical generation from renewable energy crops or wood waste materials.
- Hydroelectric generators.
- Solar energy equipment.
- Wind equipment.

The act adds geothermal heat pumps and equipment to the definition of renewable energy property. Geothermal heat pumps use the ground or groundwater as a thermal energy source to heat a structure or as a thermal energy sink to cool a structure. Geothermal equipment uses the internal heat of the earth as a substitute for traditional energy for heating water or active space heating or cooling. The credit is capped at $8,400 per installation of a geothermal heat pump or geothermal equipment for residential property.

Under the current law, the amount of the credit for investing in renewable energy property is 35% of the cost of the property placed in service subject to a cap as set out in the table below. In the case of renewable energy property that services a single-family dwelling, the credit must be taken

[105] Renewable biomass resources are organic matters produced by terrestrial and aquatic plants and animals, such as standing vegetation, forestry and agricultural residues, landfill wastes, animal wastes, and spent pulping liquor.

for the taxable year in which the property is placed in service. For all other renewable energy property, the credit must be taken in five equal installments, beginning with the taxable year in which the property is placed in service.

The credit may not exceed the following amounts:

TYPE OF PROPERTY	MAXIMUM CREDIT
Non-residential property.	The act increases the credit from $250,000 per installation to $2,500,000 per installation.
Residential property – Solar energy equipment for domestic water heating. The act clarifies that the credit also applies to solar energy equipment for pool heating.	$1,400 per dwelling unit.
Residential property – Solar energy equipment for active space heating, combined active space and domestic hot water systems, and passive space heating.	$3,500 per dwelling unit.
Residential property – Geothermal heat pumps and equipment.	$8,400 per installation.
Residential property – All other renewable energy property for residential purposes.	$10,500 per installation.

Under current law, the credit may be taken against the franchise tax or the income tax. The taxpayer must elect the tax against which the credit will be claimed when the credit is taken. The election is binding, and any carryforwards of the credit must be taken against the same tax. This act allows a taxpayer to elect to take the credit against the gross premiums tax as well.

The renewable energy tax credit has the following limitations and conditions:

- The renewable energy tax credit may not exceed 50% of the tax against which it is claimed for the taxable year. Any unused portion of the credit may be carried forward for the succeeding five years.
- A taxpayer that claims any other credit allowed with respect to renewable energy property may not take the renewable energy tax credit with respect to the same property.
- A taxpayer may not take the renewable energy tax credit if the taxpayer leases the property from another person, unless the taxpayer obtains the lessor's written certification that the lessor will not claim a credit with respect to this property.
- The Department of Revenue must report each year on the number of taxpayers claiming the credits, the cost of the property for which the credits were claimed, and the total cost to the General Fund of the credits claimed.

The act also extends the sunset on the renewable energy tax credit from January 1, 2011 to January 1, 2016, and maintains the existing sunsets on the other credits in Article 3B (Business and Energy Tax Credits) of Chapter 105 of the General Statutes.

AFFILIATE LIABILITY FOR OTP EXCISE TAX.

Session Law	*Bill #*	*Sponsor*
S.L. 2009-559	**SB 777**	**Senator Garrou**

AN ACT TO ALLOW AFFILIATES OF A TOBACCO PRODUCTS MANUFACTURER TO BE TREATED THE SAME AS THE MANUFACTURER FOR PURPOSES OF PAYMENT OF THE EXCISE TAX ON OTHER TOBACCO PRODUCTS, TO PROHIBIT INTEGRATED WHOLESALE DEALERS FROM SELLING, BORROWING, LOANING, OR EXCHANGING NON-TAX-PAID TOBACCO PRODUCTS OTHER THAN CIGARETTES TO, FROM, OR WITH OTHER INTEGRATED WHOLESALE DEALERS, AND TO REQUIRE PERSONS TRANSPORTING OTHER TOBACCO PRODUCTS TO FILE A SHIPPING REPORT WITH THE SECRETARY OF REVENUE.

OVERVIEW: This act amends the definition of an 'integrated wholesale dealer' for purposes of the excise tax on other tobacco products (OTP) so that an affiliate of a manufacturer of OTP may be treated the same as the manufacturer for purposes of allowing relief from paying the excise tax. The tax will be payable by the wholesale or retail dealer to whom the integrated wholesale dealer sold the product. The act also makes changes to better enable the Department of Revenue to track OTP sales, as requested by the Department.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2009 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective September 1, 2009.

Analysis: The excise tax rate on OTP is 10% of the cost price of the product. The tax is payable by the wholesale dealer or retail dealer who first acquires or otherwise handles OTP. By definition, all manufacturers are wholesale dealers. A manufacturer who is not a retail dealer and who ships OTP to either a wholesale dealer or a retail dealer may apply to the Secretary of Revenue to be relieved of paying the tax.[106] Once granted permission, a manufacturer may choose not to pay the tax, which would result in the tax being paid by the wholesale or retail dealer to whom the manufacturer sells the product.

In 2007, the General Assembly provided that an integrated wholesale dealer may be treated like a manufacturer for purposes of allowing relief from paying the excise tax on OTP. The statute defines the term 'integrated wholesale dealer' as a wholesale dealer who is an affiliate of a manufacturer of other tobacco products and is the only person to whom the manufacturer sells its products.[107] This act eliminates the requirement in the definition of 'integrated wholesale dealer'

---

106 G.S. 105-113.35(d) establishes the procedure by which a manufacturer can be relieved of payment of the OTP excise tax.

107 The change in 2007, for example, enabled Conwood Sales, an affiliate of Conwood Company, to be relieved of paying the tax on the OTP it received from Conwood Company since Conwood Company could be relieved of paying the tax.

that the manufacturer sells its entire product to its affiliate. This change allows an affiliate of a manufacturer of OTP to be treated the same as the manufacturer with respect to payment of the OTP excise tax, even if the manufacturer sells its products to someone other than the affiliate.[108]

The act also modifies the definition of manufacturer to include a contract manufacturer. Currently, contract manufacturers are not explicitly included in the OTP definition of 'manufacturer', but they are specifically included in the definition of a cigarette distributor.[109]

The act makes several changes at the request of the Department of Revenue to better enable the Department to track OTP purchases:

- It specifies that a contract manufacturer must be the exclusive purchaser of the products under the contract.
- It prohibits integrated wholesale dealers from selling, borrowing, loaning, or exchanging non-tax-paid OTP to, from, or with other integrated wholesale dealers.
- It requires a person who transports OTP upon the public highways, roads, or streets of this State to file a report, upon notice of the Secretary, in a form prescribed by and containing the information required by the Secretary. This requirement is similar to the one imposed under G.S. 105-113.18(3) for the transportation of cigarettes.

2008 Finance Law Changes

DEFERRED PROPERTY TAX PROGRAMS CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-35	**SB 1876**	**Senator Clodfelter**

AN ACT TO MODIFY THE CIRCUIT BREAKER TAX BENEFIT, TO STANDARDIZE ADMINISTRATION OF ALL DEFERRED PROPERTY TAX PROGRAMS, AND TO CORRECT THE EFFECTIVE DATE OF CHANGES TO THE HOMESTEAD EXCLUSION.

OVERVIEW: This act does the following:

- It modifies the property tax homestead circuit breaker program to ease the administration and implementation of the program.
- It consolidates the administrative provisions of North Carolina's property tax deferral programs into one statute.

[108] This change would allow Reynolds Tobacco, an affiliate of Conwood Company, to be relieved of paying the tax on the OTP it received from Conwood Company, even though Conwood sells part of its products to someone other than Reynolds Tobacco.
[109] G.S. 105-113.4(3).

- It simplifies the collection remedies for delinquent property taxes.
- It clarifies the property tax homestead income eligibility amount.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2008 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act is effective for taxes imposed for taxable years beginning on or after July 1, 2008.

ANALYSIS:

Part I: Circuit Breaker Modifications

In 2007, the General Assembly enacted a new property tax deferral program[1] for North Carolina residents who have owned and occupied property located in the State as a permanent residence for at least five years, who are either 65 years of age or older or totally and permanently disabled, and whose income for the preceding year does not exceed 150% of the income eligibility limit for the property tax homestead exclusion.[2] The homestead circuit breaker program becomes effective for taxes imposed for taxable years beginning on or after July 1, 2009. The amount of property tax an eligible owner may defer under the program varies depending upon the owner's income. An owner whose income is less than the income eligibility limit of the property tax homestead exclusion may defer the portion of taxes imposed on the permanent residence that exceeds four percent (4%) of the owner's income. An owner whose income is 100% to 150% of the income eligibility limit of the property tax homestead exclusion may defer the portion of taxes imposed on the permanent residence that exceeds five percent (5%) of the owner's income.

The Revenue Laws Study Committee reviewed the homestead circuit breaker program during the interim. It proposed several changes to the program it received from the Department of Revenue, the School of Government, and county tax assessors and collectors. The act does the following:

- It transfers the responsibility for notifying qualifying owners of the cumulative amount of deferred taxes, including interest, from the tax assessor to the tax collector. The tax collector has all the information needed to make this notification, even in counties where the towns located in it have a separate tax collector. Also, the tax collector is able to include this information on the property tax bills.
- It eliminates the delay in using enforced collection remedies[3] for all disqualifying events other than the owner's death. Taxes deferred under the circuit breaker program become payable upon the occurrence of a disqualifying event: death of the owner, transfer of the residence by the owner, or cessation of use of the residence as a permanent residence by the owner other than a qualifying temporary absence.[4] Upon the occurrence of a disqualifying event, the amount of taxes for the year with no circuit breaker benefit plus those taxes deferred for the preceding three fiscal years, together

---

[1] S.L. 2007-497.

[2] For taxable years beginning on or after July 1, 2008, the homestead exclusion income eligibility amount is $25,000. This amount is indexed annually. The amount for 2009 is $25,600.

[3] An enforced collection remedy is one or more of the collection remedies provided in G.S. 105-266 through 105-375 for delinquent property taxes. The remedies include attachment and garnishment and foreclosure.

[4] An exception to this rule exists, allowing deferral to continue if the residence is transferred to a spouse or qualifying co-owner and that individual qualifies for deferral and elects to continue deferral.

with interest, become due. Under prior law, a tax collector could not enforce the collection of these taxes until nine months after the disqualifying event. This delay was unique among North Carolina's property tax deferral programs. The act eliminates the delay in using the enforced collection remedies for all disqualifying events other than the owner's death, where the nine-month delay remains.

- It converts the application process from a one-time application to an annual application. The application process for the property tax homestead circuit breaker was modeled after the homestead exclusion, which requires a single application. However, while eligibility for both programs is contingent on a taxpayer's income, the actual benefit received under the circuit breaker program is a function of different variables: the property value for the exclusion versus the taxpayer's income for the circuit breaker. Since the amount of the circuit breaker tax benefit is a function of the taxpayer's income, an annual reporting of income is necessary for the county to prepare the tax bill.
- It creates an exception to the tax secrecy provisions to allow agents of a county to disclose on a property tax receipt the amount of property taxes due and the amount of property taxes deferred under the homestead circuit breaker. Since the amount of taxes that can be deferred under the circuit breaker program is a function of income, and since counties make property tax records public, a person could use the amount of deferred taxes to calculate a qualifying owner's income. For this reason, the counties requested an exception to general rule that it cannot publish information about a taxpayer's income.
- It synchronizes the income eligibility limit for the 4% benefit under the homestead circuit breaker with the income eligibility limit for the homestead exclusion. Under prior law, there was a one-penny discrepancy between these income limits.

Part II: Deferral Program Modifications

North Carolina has six property tax deferral programs: (i) historic district property held as future site of historic structures[5] (ii) the circuit breaker tax deferral program[6] (iii) nonprofit property held as future site of low- or moderate-income housing[7] (iv) present-use value (PUV) property[8] (v) working waterfront property[9] and (vi) historic property.[10] The act creates a set of uniform provisions, applicable to all six programs. The provisions, several of which existed under prior law but were scattered among various statutes, are now collected in G.S. 105-277.1D and are as follows:

- Deferred taxes are due and payable on the day the property loses its eligibility for deferral as a result of a disqualifying event. This results in no change from prior law for any of the deferral programs.

[5] G.S. 105-275(29a).
[6] G.S. 105-277.1B.
[7] G.S. 105-278.6(e).
[8] G.S. 105.277.4(c).
[9] G.S. 105-277.14.
[10] G.S. 105-278(b).

- Interest accrues as of the date the taxes would have originally become due without the deferral program. This results in no change from prior law for any of the deferral programs.
- The tax for a year in which a disqualifying event occurs is computed without the benefit of the deferral program. This results in no change from prior law for any of the deferral programs.
- Liens resulting from deferred taxes are extinguished when the taxes are paid. This results in no change from prior law for any of the deferral programs.
- If part of a property on which taxes are deferred loses eligibility, the assessor determines the amount of deferred taxes that apply to that part and that amount is due and payable. Under prior law, the PUV, working waterfront property and historic property programs permitted partial loss of eligibility; the other programs[11] were an all-or-nothing system. The act permits partial loss of eligibility in all programs.
- All or part of taxes deferred may be paid at any time without affecting deferral eligibility, and partial payments are applied first to accrued interest, not the principal. The Department's construction of prior law was that a taxpayer could not make a partial payment of taxes deferred from previous years without withdrawing the property from the deferral program. This effectively forced a taxpayer to choose between paying down any accrued deferred taxes on eligible property and keeping the property in the deferral program. The act eliminates this disincentive and permits payment against accrued taxes and interest.

The act also consolidates the statutory provisions relevant to when and against whom a taxing unit may utilize enforced collection remedies. An enforced collection remedy is one or more of the collection remedies provided in G.S. 105-266 through 105-375 for delinquent property taxes. The remedies include attachment and garnishment and foreclosure. The act provides two sets of rules. The first set of rules provides that collection remedies may be enforced as of the date of delinquency. The date of delinquency is determined as follows:

- For normal taxes, the date of delinquency is the date the tax begins to accrue interest. Under G.S. 105-360, that date is January 6th.
- For deferred taxes other than the circuit breaker where the disqualifying event is the death of the owner, the date of delinquency is the date a disqualifying event occurs.
- For deferred taxes under the circuit breaker where the disqualifying event is the death of the owner, the date of delinquency is the first day of the ninth month following the date of death.

The second set of rules provides against whom enforced collection remedies may be used:

- For delinquent taxes on real property, the taxing unit may proceed against the owner of record as of the date of delinquency and any subsequent owner.

[11] Future historic site, future low- or moderate-income housing site, and the circuit breaker programs.

- For delinquent taxes on personal property, the taxing unit may proceed against the owner of record as of January 1 of the calendar year in which the fiscal year of taxation begins.
- For delinquent taxes on registered motor vehicles, the taxing unit may proceed against the owner of record as of the date on which a new registration is applied for or on which the current vehicle registration is renewed.

Part III: Technical Change

Last year, the General Assembly enacted legislation increasing the income eligibility limit for the property tax homestead exclusion from $20,500 to $25,000.[12] The increase was supposed to take effect for taxable years beginning on July 1, 2008. A drafting error provided a different result. This act corrects the error to accomplish the intent of the original act.

MODIFY APPROPRIATIONS ACT OF 2007.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-107	**HB 2436**	**Rep. Michaux, Adams, Alexander, Crawford**

AN ACT TO MODIFY THE CURRENT OPERATIONS AND CAPITAL APPROPRIATIONS ACT OF 2007.

OVERVIEW, FISCAL IMPACT, AND EFFECTIVE DATES: *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2008 Session. Available in the Legislative Library.)*

Section	*Description & Effective Dates*	*Fiscal Impact*
Part I: Special Indebtedness		
27.8	*Special Indebtedness Projects – Authorizes the issuance of $709,034,944 of special indebtedness to finance various capital projects over the next four fiscal years. Of this amount, no more than $345,866,944 may be issued in fiscal year 2008-2009.*	*General fund debt service for this section and Section 27.9 is $17,500,000 for fiscal year 2008-2009.*
27.9	*Two-Thirds Bonds Act of 2008 – Authorizes the issuance of $107,000,000 of general obligation bonds for the Green Square Project.*	*General fund debt service for this section and Section 27.8 is $17,500,000 for fiscal year 2008-2009.*
Part II: Individual & Corporate Income Tax Changes		

[12] Prior to S.L. 2007-497, the income eligibility amount was statutorily set at $18,000. The statutory amount is indexed annually. In 2007, the indexed income eligibility amount was $20,500. S.L. 2007-497 changed the statutory amount from $18,000 to $25,000.

Section	*Description & Effective Dates*	*Fiscal Impact*
28.1	*IRC Update – Updates the reference to the Internal Revenue Code to May 1, 2008, but decouples from the 50% bonus depreciation provision under the Economic Stimulus Act of 2008. This section is effective for taxable years beginning on or after January 1, 2008.*	*The impact on General Fund revenues is as follows:* *FY 2008-09: No impact* *FY 2009-10: Loss of $1.2 million* *FY 2010-11: Loss of $0.8 million* *FY 2011-12: Gain of $4.3 million* *FY 2012-13: Gain of $4.0 million*
28.7	*Close Franchise Tax Loopholes – Provides that limited liability companies that elect to be taxed as S corporations are subject to the franchise tax in the same manner as other S corporations and that captive REITS are subject to the franchise tax in the same manner as a corporation. This section of the act becomes effective for taxable years beginning on or after January 1, 2009.*	*Minimal impact.*
28.8	*Publicly Traded Partnerships – Requires a publicly traded partnership (PTP) that qualifies as a PTP under section 7704(c) of the Internal Revenue Code to file an informational return with the Secretary of Revenue that lists the partners who received more than $500 of income from the partnership during the taxable year. This section becomes effective for taxable years beginning on or after January 1, 2008.*	*Minimal impact.*
28.9	*Increase Earned Income Tax Credit to Five Percent – Increases the State's refundable earned income tax credit from 3.5% to 5%, effective for taxable years beginning on or after January 1, 2009.*	*Reduces General Fund revenues by $20.9 million beginning in fiscal year 2009-2010.*
28.25	*Expand Renewable Energy Tax Credit – Allows an income tax credit for donating funds to a unit of State or local government for the purpose of enabling that unit to acquire renewable energy property. This section is effective for taxable years beginning on or after January 1, 2008.*	*Reduces General Fund revenues by $100,000 annually.*

Section	Description & Effective Dates	Fiscal Impact
28.27	Tax Deduction for the Sale of a Manufactured Home Community to Manufactured Homeowners – Creates an income tax deduction equal to the taxable gain reported by a taxpayer from the qualified sale of a manufactured home community. This section is effective for taxable years beginning on or after January 1, 2008, and expires for taxable years beginning on or after January 1, 2015.	Reduces General Fund revenues by approximately $100,000 annually.
Part III: Sales Tax Changes		
28.6	Exempt Disaster Assistance Debit Sales – Exempts from sales tax tangible personal property purchased with a client assistance debit card issued for disaster assistance relief by a State agency or a federal agency or instrumentality. This section became effective August 1, 2008, and applies to purchases made on or after that date.	Reduces General Fund revenue by approximately $500,000 annually.
28.12	Sales Tax Holiday for Certain Energy Star Rated Appliances – Creates a sales tax holiday for energy efficient products for the first weekend of November. The holiday applies to the following Energy Star products: clothes washers, freezers and refrigerators, central air conditioners and room air conditioners, air-source heat pumps and geothermal heat pumps, ceiling fans, dehumidifiers, and programmable thermostats. This section became effective July 16, 2008.	Reduces General Fund revenue by $1.4 million annually.
28.19	State Sales Tax Exemption for Baked Goods Sold by Artisan Bakeries – Exempts bakery items sold by an artisan bakery from State sales tax, effective January 1, 2009.	Reduces General Fund revenues by $1.6 million for fiscal year 2008-2009 and by approximately $3.5 million for each year thereafter.
28.20	Prohibit Tax on Interior Design Services – Exempts from sales tax interior design services provided in conjunction with the sale of tangible personal property. This section became effective August 1, 2008.	Reduces General Fund revenues by $100,000 annually.

Section	*Description & Effective Dates*	*Fiscal Impact*
28.21	*1%, $80 Cap on Excise Tax on Machinery Refurbishers – Applies a 1% privilege tax, with an $80 cap, in lieu of sales tax on equipment purchased by an industrial machinery refurbishing company that is used in repairing or refurbishing tangible personal property. This section became effective July 1, 2008, and applies to purchases made on or after that date.*	*Reduces General Fund revenues by $300,000 for fiscal year 2008-2009 and by $500,000 annually each year thereafter.*
28.22	*Clarify 501(c)(3) Sales Tax Refund – Provides a definitive category of the type of nonprofit entity entitled to a semiannual sales and use tax refund. This section became effective July 1, 2008, and applies to purchases made on or after that date*	*Minimal fiscal impact.*
Part IV: Economic Incentives		
28.2	*Extend Credit for Research & Development – Extends from 2009 to 2014 the sunset on the income tax credit for qualified North Carolina research expenses or North Carolina University research expenses.*	*Reduces General Fund revenues as follows:* *FY 2008-09: $1.0 million* *FY 2009-10: $2.1 million* *FY 2010-11: $2.3 million* *FY 2011-12: $2.5 million* *FY 2012-13: $2.6 million*
28.3	*Extend Low-Income Housing Credit – Extends from 2010 to 2015 the sunset on the income tax credit that may be allocated to developers of low-income housing projects by the North Carolina Housing Finance Agency.*	*Reduces General Fund revenues as follows:* *FY 2008-09: -0-* *FY 2009-10: -0-* *FY 2010-11: -0-* *FY 2011-12: $22.1 million* *FY 2012-13: $45.2 million*
28.4	*Extend Mill Rehabilitation Credit – Extends the sunset for rehabilitation projects for which an application for an eligibility certification is submitted on or after January 1, 2011. Under prior law, the credit expired for qualified rehabilitation expenses occurring on or after that date.*	*Reduces General Fund revenues as follows:* *FY 2008-09: -0-* *FY 2009-10: -0-* *FY 2010-11: $1.5 million* *FY 2011-12: $3.4 million* *FY 2012-13: $4.2 million*
28.5	*Extend Sunset for State Ports Tax Credit – Extends from 2009 to 2014 the sunset on the income tax credit allowed to a taxpayer who loads or unloads cargo at either of the State-owned port terminals.*	*Reduces General Fund revenues as follows:* *FY 2008-09: $1.0 million* *FY 2009-10: $2.0 million* *FY 2010-11: $2.0 million* *FY 2011-12: $2.0 million*

Section	Description & Effective Dates	Fiscal Impact
28.10	Extend Sunset for Small Business Employee Health Benefits – Extends from 2009 to 2010 the sunset on the tax credit available to small businesses that provide health benefits to all of their full-time employees.	Reduces General Fund revenues as follows: FY 2008-09: $8.5 million FY 2009-10: $17.7 million FY 2010-11: $10.1 million
28.23	Extend Aviation Fuel Refunds – Extends from January 1, 2009, to January 1, 2011, the sunset on the following two sales tax refund provisions: • Aviation fuel used by an interstate passenger air carrier. • Aviation fuel used by a motorsports racing team to travel to or from a motorsports.	Reduces General Fund revenues as follows: FY 2009-10: $1.6 million FY 2010-11: $3.2 million FY 2011-12: $1.6 million
28.24	Expand Film Industry Credit – Extends from 2009 to 2014 the sunset on the 15% tax credit available for productions over $250,000. The provision also expands the definition of qualifying expenses. This section is effective for taxable years beginning on or after January 1, 2008.	Reduces General Fund revenues as follows: FY 2008-09: $0.1 million FY 2009-10: $8.5 million FY 2010-11: $26.7 million FY 2011-12: $27.5 million FY 2012-13: $28.4 million
28.26	Increase Qualified Business Venture Tax Credit Cap – Increases from $7 to $7.5 million the total amount of all qualified business investments credits that may be taken each year. This section is effective for investments made on or after January 1, 2008.	Reduces General Fund revenues as follows: FY 2009-10: $0.5 million FY 2010-11: $0.5 million FY 2011-12: $0.5 million FY2012-13: $0.5 million
Part V: Estate & Gift Tax Changes		
28.17	Modify Estate Tax Law – Modifies the estate tax law to remove property from the estate tax base that the State cannot tax. This section became effective July 16, 2008, applies retroactively to the estates of decedents for which the statute of limitations for claiming a refund had not expired as of December 28, 2007.	Reduces General Fund revenues by $2 million in fiscal year 2008-2009; reduces revenues by approximately $500,000 annually thereafter.
28.18	Repeal Gift Tax Law – Repeals the gift tax, effective January 1, 2009, and applicable to gifts made on or after that date.	Reduces General Fund revenues by $17.5 million for fiscal year 2009-2010.
Part VI: Property Tax Changes		

Section	Description & Effective Dates	Fiscal Impact
28.9	*Provide a Property Tax Exclusion for Honorably Discharged Disabled Veterans and Their Surviving Spouses – Establishes a property tax homestead exemption for disabled veterans equal to the first $45,000 of the property's appraised value, effective for property tax years beginning on or after July 1, 2009.*	*No impact on State General Fund revenues. Reduces local government revenues by approximately $4.3 million.*
Part VII: Administrative Changes		
28.16	*Small Business Protection Act – Requires the Department to reduce an assessment for sales and use taxes imposed on a small retailer if certain circumstances exist and to document advice given to taxpayers in certain situations. The majority of this section became effective when the Governor signed the act into law on July 16, 2008. The requirement that the Department document advice given to taxpayers related to sales tax application becomes effective January 1, 2009. The requirement that the Department document advice related to whether a taxpayer must register as a retailer or wholesale merchant under Article 5 of Chapter 105 becomes effective July 1, 2009.*	*Reduces General Fund revenues by $2.2 million for fiscal year 2009-2010 and by $500,000 annually thereafter.*
28.28	*Procedure for Tax Class Actions – Establishes a procedure for initiating or joining a tax class action in which a taxpayer is seeking the refund of a tax paid under an alleged unconstitutional statute. This section is effective October 1, 2008, and applies to actions filed on or after that date.*	*Indeterminable.*

ANALYSIS:

Part I: State Indebtedness

Special Indebtedness. – Section 27.8 authorizes the issuance of $709,034,944 of special indebtedness to finance a variety of State capital projects over the next four fiscal years. Of this amount, only $345,866,944 may be issued or incurred during fiscal year 2008-2009. This amount of indebtedness is within the recommended guidelines of the NC Debt Affordability Advisory Committee.[13] The NC Debt Affordability General Fund Model Guidelines recommends that General Fund debt

[13] The 2008 Debt Affordability Study may be accessed at www.nctreasurer.com.

service should be targeted at no more than 4% of General Fund revenues and should not exceed 4.75% of General Fund revenues. Based on projected General Fund revenues, the model calculates that the State could annually authorize $479,700,000 of new tax-supported debt over the next five years and remain within its targeted ratio. This section became effective when the Governor signed the act into law on July 16, 2008.

Special indebtedness[14] is non-voted debt that is typically secured only by an interest in the State property being acquired or improved. The term 'special indebtedness' covers both financing contract indebtedness and limited obligation bond indebtedness. Financing contract indebtedness may take the form of a lease purchase, an installment purchase, or a certificate of participation.[15] The form of debt anticipated for these issuances is limited obligation bonds. Since 2000, the State has relied exclusively on the authorization of special indebtedness to finance capital projects.

The capital projects financed in this section through special indebtedness include the following:

- Facilities for the University of North Carolina.
- Additions to several correctional institutions.
- The purchase of State judicial facilities located at 901 Corporate Drive in Raleigh.
- The acquisition of State park lands and conservation areas for the Land for Tomorrow initiative.
- Various other State capital projects, such as the completion of an oyster hatchery, improvements at the State ports in Morehead City and Wilmington, expansion and renovation to the polar bear exhibit at the N.C. Zoo, and construction of a Southeastern North Carolina Agriculture Center Pavilion.

Two-Thirds Bonds Act of 2008. – Section 27.9 authorizes the issuance of $107,000,000 of non-voted general obligation bond indebtedness to finance the Green Square Project. This section became effective when the Governor signed the act into law on July 16, 2008.
General obligation bond indebtedness is secured by the faith and credit and taxing power of the State. As a general rule, general obligation bond indebtedness must be approved by the voters. However, under Article V, Sec. 3(a)(f) of the North Carolina Constitution, the State may issue non-voted general obligation bonds in an amount not to exceed 2/3 of the amount by which it reduced its outstanding general obligation debt in the preceding biennium. Based upon this

---

[14]Before any type of special indebtedness may be issued or incurred, the State Treasurer must certify that debt financing may be desirable for a specific project presented to it by the Department of Administration. Next, the Council of State must give preliminary approval. If preliminary approval is obtained, the Council of State must give final approval, setting out details such as the maximum amount to be financed, the maximum maturity, and the maximum interest rates. The maximum maturity may not exceed 40 years. The State Treasurer must approve the details of the financing, finding that the amount to be borrowed is adequate and not excessive and will not require an excessive increase in any State revenues to provide for repayment, and that the special indebtedness can be incurred or issued on terms favorable to the State. Finally, the State Treasurer must report to the Joint Legislative Commission on Governmental Operations at least five days before any special indebtedness is issued or incurred.
[15]Certificate of participation indebtedness involves a plan of finance in which a special corporation obtains funds to pay the cost of a capital facility to be financed through the delivery by the special corporation of certificates of participation. Limited obligation bond indebtedness does not require the presence of a special corporation.

formula, the State could have issued up to $125,000,000 of non-voted general obligation bonds for fiscal year 2008-2009.

The Green Square Project consists of an office building for the Department of Environment and Natural Resources, the construction of a Nature Research Center for the NC Museum of Natural Science, and an underground parking deck with 426 spaces. The project also consists of another parking deck, authorized in S.L. 2006-231, which will house up to 900 spaces. The total cost of the project, excluding the parking deck authorized in 2006, is $150,000,000. The General Assembly appropriated $25,000,000 for the project last year. Parking receipts will service the debt for parking construction and the Friends of the Museum of Natural Science have committed $27,500,000 towards the cost of the Nature Research Center and $15,500,000 towards the cost of the exhibits.

Part II: Individual and Corporate Income Tax Changes

IRC Update. – Section 28.1 updates from January 1, 2007, to May 1, 2008, the reference to the Internal Revenue Code used in defining and determining certain State tax provisions. However, this section also requires an 85% addback of the bonus depreciation allowed under the Economic Stimulus Act of 2008 in order to achieve revenue neutrality for fiscal year 2008-2009. The Revenue Laws Study Committee recommended this provision, and the Governor included it in his revenue recommendations. This section is effective for taxable years beginning on or after January 1, 2008.

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code by reference to the Code.[16] The General Assembly determines each year whether to update this reference.[17] Updating the reference makes recent amendments to the Code applicable to the State to the extent that State law tracks federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made. Changing the reference date to May 1, 2008, incorporates, with the one major exception mentioned above, the changes made by the following acts: the Economic Stimulus Act of 2008, the Mortgage Forgiveness Debt Relief Act of 2007, and the Small Business and Work Opportunity Tax Act of 2007.[18]

Enacted on February 13, 2008, the Economic Stimulus Act of 2008[19] (ESA) was a $152 billion package designed to stimulate the economy through rebates for individual taxpayers and incentives for businesses.[20] Those incentives are the 50% bonus depreciation provision for qualifying property placed in service in 2008, the increased limits for section 179 expensing of qualified

---

[16] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[17] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

[18] A more detailed summary of recent amendments to the Code is available upon request.

[19] P.L. 110-185.

[20] The rebates, which are technically "advance credit payments," do not impact State revenues and are not discussed in this analysis.

property in 2008, and increased depreciation limits for 'luxury' autos predominantly used for business. North Carolina is not conforming to the bonus depreciation provision but does conform to the other business incentives.

- **50% Bonus Depreciation Provision**.[21] Under this section, North Carolina decouples from the federal accelerated depreciation schedule allowed under the ESA. Over the life of an asset placed in service during 2008, taxpayers will be able to deduct the same amount of the asset's basis under both federal and State law; it is just that the timing of the deduction will differ. To accomplish this decoupling, the section does two things:
    - It requires a taxpayer to add back to federal taxable income 85% of the accelerated depreciation amount[22] in the year the accelerated depreciation is claimed for federal purposes.[23]
    - In tax years beginning on or after January 1, 2009, it allows a taxpayer to deduct from federal taxable income the total amount of the add-back required for either the 2007 or 2008 tax year, divided into five equal installments.

  This means that for State tax purposes, a taxpayer may deduct a greater depreciation amount in the outlying tax years, which will be the normal depreciation amount plus 20% of the accelerated depreciation amount the taxpayer had to add back. The purpose of this recovery provision is to enable the taxpayer to have the same basis in assets for federal and State purposes. Without this deduction provision, a taxpayer would have a different basis in the depreciable asset for State and federal purposes and would have to keep separate books and records for State and federal purposes until the disposal of the asset. In effect, the add-back and subsequent deduction will affect the timing of the impact of bonus depreciation on the State but it will not increase or decrease the total amount of revenue the State receives over the affected years.

  Under the ESA, a taxpayer is entitled to depreciate in the first year 50% of the adjusted basis of certain qualified property placed in service during the 2008 calendar year.[24] To claim bonus depreciation, the property must be one of the following types:
    - Eligible for the modified accelerated cost recovery system (MACRS) with a depreciation of 20 years or less.
    - Water utility property
    - Off-the-shelf computer software
    - Qualified leasehold property.

---

[21] Bonus depreciation allows a business to claim more of a deduction up front and spread the remainder out over the normal depreciation schedule. However, over the life of the asset the taxpayer still receives the same benefit. Congress has authorized bonus depreciation several times to encourage business investment, specifically after September 11, 2001. The Jobs Creation and Worker Assistance Act of 2002 provided a 30% bonus depreciation allowance. The Jobs and Growth Tax Relief Reconciliation Act of 2003 extended the sunset and increased the amount to 50%.

[22] The accelerated depreciation amount for property placed in service in 2008 is 50%.

[23] The add-back means that for State tax purposes, a taxpayer deducts less in that tax year than the taxpayer would have deducted if the State conformed to the accelerated depreciation provision.

[24] The placed-in-service date is extended one year, through December 31, 2009, for property with a recovery period of 10 years or longer, for transportation property, and for certain aircraft.

Generally speaking, bonus depreciation is available for every item of tangible personal property, except inventory, property used outside the U.S., and property depreciated under the alternative depreciation system. Other than computer software, it is not available for intangibles. Bonus depreciation is not allowed if property is sold in the same year that it is placed in service.

- **Increased Section 179 Expensing Limits. –** This section conforms to the increased expensing limits authorized under the ESA. In general, a qualifying taxpayer may elect to treat the cost of certain property as an expense and deduct it in the year the property is placed in service instead of depreciating it over several years. This property is frequently referred to as section 179 property, after the relevant section in the Code. To be eligible, the property must be tangible personal property that is actively used in the taxpayer's business for which a depreciation deduction would be allowed. The property must be used more than 50% for business and must be newly purchased property. Generally, taxpayers take the expensing deduction first and claim section 168(k) depreciation on any remaining basis.

  Prior to the ESA, the deduction was limited to $128,000 of the cost of the property with a phase-out at $510,000 for 2008. The new law temporarily doubles the limitation to $250,000.[25] The threshold for reducing the deduction is also increased to $800,000 with a complete phase-out once qualifying purchases exceed $1.05 million. These limitations apply only to property purchased and placed in service in tax years beginning in 2008. The limitations will return to the lower levels for tax years beginning in 2009.

- **Increased Depreciation Limits for 'Luxury' Autos.** – This section conforms to the increased the depreciation limits on luxury vehicles under the ESA.[26] A luxury vehicle is one that costs more than the 'luxury auto price floor', which is adjusted annually for inflation along with the depreciation limits. The first-year limit on depreciation for passenger vehicles placed in service in 2008 is projected to be $2,960 for automobiles and $3,160 for vans and trucks. The new law raises the cap by $8,000 for a maximum first-year depreciation of $10,960 for autos and $11,160 for vans and trucks.

Close Franchise Tax Loopholes. – Section 28.7 changes the franchise tax laws as follows to conform with changes the General Assembly made in 2006 and 2007 to the corporate income tax laws:

- It provides that limited liability companies (LLCs) that elect to be taxed as S corporations for income tax purposes are subject to the franchise tax in the same manner as other S corporations

- It provides that captive real estate investment trusts (REITs) are subject to the franchise tax since they are treated as corporations for income tax purposes.

The Revenue Laws Study Committee recommended these changes, upon the suggestion of the Department of Revenue.[27] This section is effective for taxable years beginning on or after January 1, 2009.

---

[25] The new law does not alter the section 179 limitation imposed on sport utility vehicles, which have an expense limit of $25,000.
[26] These limits were increased when bonus depreciation was previously available.
[27] HB 2508 and SB 1755.

Prior to 2006, a LLC did not pay franchise tax. In 2006, the General Assembly amended the definition of 'corporation', as it applies to the franchise tax statutes, to include a LLC that elects to be taxed as a C corporation for federal income tax purposes.[28] The Department of Revenue began to receive questions from S corporations as to whether they could convert to a LLC and elect to be treated as an S corporation for income tax purposes, thereby becoming exempt from franchise tax.[29] To curb this potential franchise tax loophole, this section makes a similar change to the one enacted in 2006; it provides that a LLC that elects to be treated as a corporation for income tax purposes, either a C corporation or a S corporation, is also considered a corporation for franchise tax purposes.

In 2007, the General Assembly limited a corporation's ability to use captive REITs to avoid State taxes by disallowing the dividend paid deduction when a REIT is a captive REIT.[30] The effect of this change is that a captive REIT is treated as a regular corporation for income tax purposes. This section provides that a captive REIT will also be treated as a regular corporation for franchise tax purposes. Under the current franchise tax law, a REIT may, in determining its value for franchise tax purposes, deduct the aggregate market value of its investments in the stocks, bonds, debentures, or other securities or evidences of debt of other corporations, partnerships, individuals, municipalities, governmental agencies or governments. This section changes the statute to provide that this deduction may only be used by a REIT that is not a captive REIT. A REIT is an organization that uses the pooled capital of many investors to purchase and manage real estate. A captive REIT is one that is owned or controlled by a single entity.

Publicly Traded Partnerships. – A partnership doing business in this State must file an information return with the Department of Revenue that gives the name and address of each person who would be entitled to share in the partnership's net income, if distributable, and the amount each person's distributive share would be. A partnership that files a report must also furnish to each partner the information needed by that partner to file a North Carolina income tax return. For nonresident members of a partnership, the partnership must pay income tax for that partner based on the partner's distributive share.

Section 28.8 changes the reporting and payment requirements that apply to a publicly traded partnership (PTP) that is described in section 7704(c) of the Internal Revenue Code. It requires a qualifying PTP to report annually to the Department the partners in the PTP who received more than $500 of income rather than report the income received by every partner. It also exempts qualifying PTPs from the requirement to pay tax on the partnership income received by a nonresident. The Revenue Laws Study Committee recommended this tax law change.[31] In making this recommendation, the Committee sought to strike a balance between the costs and burden of compliance with the reporting requirements for both the PTPs and the Department and the benefits gained by compliance. This section is effective for taxable years beginning on or after January 1, 2008.

A PTP is a limited partnership the interests in which are traded on stock exchanges such as the New York, American, and NASDAQ exchanges. Unlike a traditional partnership, a PTP has tens of thousands, and sometimes hundreds of thousands, of unitholders. A PTP's unitholders can

---

[28] S.L. 2006-66, Section 24A.2.
[29] In 2005, S corporations paid more than $50 million in franchise tax.
[30] S.L. 2007-323, Section 31.18.
[31] HB 2508 and SB 1755.

change daily in trades on public exchanges. A PTP determines who its unitholders are once a year so the PTP can send K-1s to the unitholders.

PTPs initially came into existence during the 1980s as a means for companies to raise large amounts of capital needed to build or buy capital-intensive assets, like pipelines. When initially created, PTPs were taxed as partnerships. Congress began reviewing the PTP structure and its use in 1986. Congress determined that the structure was needed for certain types of entities in energy related businesses and it enacted legislation allowing PTPs described in section 7704(c) of the Code to continue to be treated like a partnership for income tax purposes. All other types of PTPs are taxed as a corporation. A PTP described in section 7704(c) of the Code is one that generates 90% of its income from qualified sources. Qualified sources include real estate activities, mineral or natural resources activities like exploration, production, mining, refining, marketing, and transportation of oil, gas, minerals, geothermal energy, and timber. There are approximately 90 PTPs in the country that meet the description in section 7704(c) of the Code, and 10 of these PTPS are located in North Carolina.

The Multi-State Tax Commission (MTC) adopted a model statute in December 2003 that exempts PTPs described in section 7704(c) of the Code from paying tax on partnership income received by a nonresident member so long as the PTP agrees to file an annual information return reporting the name, address, and taxpayer identification number of each unitholder with an income in the state in excess of $500. This section adopts the substance of the MTC model statute. Twenty-six states have excluded PTPs from tax payment requirements for nonresident partners through either specific legislation or administrative action. Eight states exempt PTPs from reporting distributions to its partners except for distributions of income that exceed $1,000 during the taxable year.

Increase Earned Income Tax Credit to Five Percent. – Section 28.9 increases the amount of the State's refundable earned income tax credit from 3.5% of an individual's federal earned income tax credit amount to 5%, effective for taxable years beginning on or after January 1, 2009.[32] The General Assembly enacted a refundable State earned income tax credit in 2007, effective for taxable years beginning on or after January 1, 2008.

The Internal Revenue Code provides an earned income tax credit for individuals who work and whose adjusted gross income does not exceed a specified amount. The credit is intended to offset some of the increases in living expenses and social security taxes and provide an incentive for low-income families to work instead of collect welfare. The amount of the credit may exceed the amount of tax owed by the taxpayer. If the credit allowed exceeds the amount of tax imposed, the excess is refundable to the taxpayer.

The amount of the federal credit varies depending upon whether the taxpayer has children and the amount of earned income the taxpayer has. The credit is phased out as the taxpayer's earned income rises. The earned income amounts and the credit amounts are indexed annually to inflation.

Tax Deduction for the Sale of a Manufactured Home Community to Manufactured Homeowners.[33] – Section 28.27 allows a taxpayer to deduct from federal taxable income the taxable gain from a qualified sale of a manufactured home community. A 'qualified sale' is a sale of land comprising a manufactured home community that is transferred in a single purchase to a group composed of a majority of the manufactured home community leaseholders, or to a nonprofit organization

[32] HB 2642.

[33] The House Finance Committee originally considered the tax deduction in House Bill 1700.

representing such a group. To qualify for this deduction, the taxpayer must give notice of the sale to the North Carolina Housing Finance Agency.[34] The deduction becomes effective for taxable years beginning on or after January 1, 2008, and expires for taxable years beginning on or after January 1, 2015.

Part III: Sales Tax Changes

Exempt Disaster Assistance Debit Sales. – Section 28.6 exempts from sales tax tangible personal property purchased with a client assistance debit card issued for disaster assistance relief by a State agency or a federal agency or instrumentality. The American Red Cross (ARC) is an instrumentality of a federal agency. Another example of a federal agency or instrumentality that may utilize this exemption would be the Federal Emergency Management Agency (FEMA). This section became effective August 1, 2008, and applies to purchases made on or after that date.

A state may not impose its sales tax on purchases made by the federal government or an instrumentality of the federal government. G.S. 105-164.13(17) specifically exempts from North Carolina sales tax 'sales which a state would be without power to tax under the limitations of the Constitution or laws of the United States or under the Constitution of this State.' Sales made pursuant to a disbursing order issued by a federal governmental agency or instrumentality is considered a sale to the government that is exempt from taxation. However, for purposes of the sales tax exemption, there is a significant difference between a debit card and a disbursing order: the purchaser, for purposes of the sales tax exemption, is the disaster victim when a debit card is used and it is the disbursing entity when the disbursing order is used. This section extends the same sales tax treatment that exists for purchases made through a disbursing order issued by a federal agency or instrumentality to purchases made with a client assistance debit card issued by it. This section became effective August 1, 2008, and applies to purchases made on or after that date.

The Revenue Laws Study Committee recommended this tax law change after representatives of the ARC brought the issue to the Committee's attention.[35] Over the last few years, the ARC has begun giving disaster victims debit cards to purchase tangible personal property. The ARC began using debit cards because it believes they are more efficient, effective, and less bureaucratic for the victim and less administrative effort and expense for the organization. The ARC client assistance card clearly identifies itself as one issued by the ARC. The ARC has the ability to see from its reports of the card's use the amount purchased and the store from which the goods were purchased. Unlike the old disbursing order system, the ARC does not have a cash register receipt describing the specific items purchased. The client assistance card authorization form is a contract between the ARC and the disaster victim. The contract stipulates the types of items the card may be used to purchase. In the event of inappropriate purchases, the card can be suspended.

Sales Tax Holiday for Certain Energy Star-Rated Appliances. – Section 28.12 creates a State and local sales and use tax exemption, applicable during the first weekend in November,[36] for the following Energy Star-rated products: clothes washers, freezers and refrigerators, central air conditioners and room air conditioners, air-source heat pumps and geothermal heat pumps, ceiling fans,

---

[34] G.S. 42-14.3 requires an owner of a manufactured home community to notify the owners of the homes in the community of intent to convert the property to another use.

[35] SB 1703 and HB 2336.

[36] The holiday period begins 12:01 AM on the first Friday of November and ends 11:59 PM on the following Sunday.

dehumidifiers, and programmable thermostats.[37] An Energy Star-rated product is one that meets the energy efficient guidelines set by the United States Environmental Protection Agency (EPA) and the United States Department of Energy and is authorized to carry the Energy Star label. The exemption does not apply to the sale of a product for use in a trade or business or to the rental of a product. This section became effective when the Governor signed the act into law on July 16, 2008.

The EPA introduced Energy Star in 1992 as a voluntary labeling program designed to identify and promote energy-efficient products to reduce greenhouse gas emissions. Energy Star-labeled products deliver the same or better performance as comparable models while using less energy and saving money. The program delivers the technical information and tools that aid in choosing energy-efficient solutions and best management practices. In 1996, EPA began including major appliances, office equipment, lighting, home electronics, and more in its Energy Star program. In 2007, Energy Star products delivered energy and cost savings of about $16 billion, and, over the past decade, the program has encouraged such technological innovations as efficient fluorescent lighting, power management systems for office equipment, and low standby energy use.

North Carolina participates in the Streamlined Sales and Use Tax Agreement. Under that Agreement, a state may not have a sales tax holiday unless the items to be exempted during the holiday are specifically defined in the Agreement's provisions concerning sales tax holidays. Until recently, the Agreement did not have a definition in its provisions governing sales tax holidays for energy efficient products; therefore, North Carolina could not institute a sales tax holiday for these products and remain compliant with the Agreement. As of April 2, 2008, the necessary definitions have been added to the Agreement, thus permitting the establishment of a sales tax holiday for energy efficient products. North Carolina has had a sales tax holiday during the first weekend in August for certain qualifying school supplies and articles of clothing since 2001.[38]

State Sales Tax Exemption for Baked Goods Sold by Artisan Bakeries. – Section 28.19 reduces the sales tax applicable to bakery items sold by artisan bakeries by exempting them from the general State sales tax rate. Effective January 1, 2009, bakery items sold by an artisan bakery will be taxed at the applicable local sales tax rate, as opposed to the combined general rate applicable to prepared foods. An artisan bakery is one that meets both of the following requirements:

- It derives over 80% of its gross receipts from bakery items.
- Its annual gross receipts, combined with the gross receipts of all related persons, do not exceed $1,800,000.

For several years, North Carolina has grappled with the issue of the taxation of bakery items. The term 'bakery item' is a subset of the defined term 'prepared food'. North Carolina imposes a higher sales tax rate on prepared food than food.[39] The distinction between food and prepared food often becomes complex.[40] The Senate Finance Committee heard testimony from many small bakeries

[37] The House first considered the sales tax holiday for energy star products in HB 2605. The Governor included a similar provision in his budget recommendation to the 2008 General Assembly.
[38] G.S. 105-164.13C.
[39] There is a local sales tax of 2% on food while prepared food is subject to the general State sales tax rate of 4.25% and applicable local rates, which range from 2.5% to 2.75%. Several cities and counties impose a prepared food tax, in addition to the State and local sales tax.
[40] Any food item prepared by a retailer and sold by the retailer to a consumer is a prepared food and is subject to the State and local sales tax rates. A similar product produced by someone else, but sold by the

across the State that they received conflicting information about the applicable tax rate they should impose on their bakery items. The conflicting information resulted in many bakeries being assessed additional tax, along with interest and penalties, because they taxed their bakery items at the incorrect, lower rate. The bakeries also argued that the differential tax rates imposed an unfair economic burden on their goods.

North Carolina is one of the 17 member states that have modified their sales and use tax laws to comply with the uniform provisions of the Streamlined Sales and Use Tax Agreement (Agreement). The Agreement is a multistate agreement that seeks to simplify and modernize sales and use tax administration in the member states. The Agreement does not influence whether a state imposes sales and use tax on an item or exempts it from tax. However, if a member state chooses to tax an item or exempt an item, it must adhere to the provisions concerning the definition of an item as defined in the Agreement.

The Agreement, as it existed when North Carolina adopted the uniform definitions for food and prepared food in 2001, did not include a distinction among the types of prepared food. Therefore, the choice before the General Assembly was to either tax all prepared food or exempt all prepared food. The State chose to tax all prepared food.

Later versions of the Agreement included a carve-out for bakery items from the defined term 'prepared food' to address problems some states began encountering in this area. The carve-out provides that bakery items may be taxed differently than other types of prepared food if they are sold without eating utensils provided by the seller. The Agreement defines 'bakery items' as bread, rolls, buns, biscuits, bagels, croissants, pastries, donuts, Danish, cakes, tortes, pies, tarts, muffins, bars, cookies, and tortillas.

This section provides that bakery items, as that term is defined in the Agreement, are taxed as food if the item is sold by an artisan bakery. [41] The section does not lower the tax rate on all bakery items.[42] It also does not change the application of the local meals taxes because the act does not change the definition of prepared food. Therefore, in the applicable jurisdictions, the meals tax will continue to apply to all bakery items, regardless of who sells them.

Prohibit Tax on Interior Design Services. – Section 28.20 eliminates the sales and use tax on interior design services provided in conjunction with the sale of tangible personal property. This section became effective August 1, 2008. Charges for interior design or consulting services by an interior designer or decorator are not subject to sales or use tax. However, charges for services made in conjunction with the sale of tangible personal property are subject to sales or use tax because they are considered part of the sales price of the property. The definition of 'sales price' is the total amount or consideration for which tangible personal property is sold, leased, or rented. The consideration may be in the form of cash, credit, property, or services necessary to complete the sale.[43]

---

same retailer, is food and is exempt from State sales tax. For example, slaw prepared by Harris Teeter and sold in its deli section is prepared food. Slaw produced by someone else and sold at Harris Teeter is food. Likewise, the same product may be taxed differently depending upon where it is purchased. For example, a donut purchased at the place where it is made is prepared food. The same donut purchased at a grocery store is food.

[41] Under the Agreement, a state may enact an entity-based exemption for a product defined in the Agreement so long as the state defines the product consistent with its definition in the Agreement.

[42] SB 1630 would have reduced the sales tax rate applicable to all bakery items, regardless of who sold them.

[43] G.S. 105-164.3(37).

Discerning when services constitute part of the sales price of a product is often difficult with respect to transactions in which the product transferred is largely the result of personal services. At the two extremes, there is no great difficulty. When an attorney draws a will, there is no difficulty in concluding that services have been rendered, even though the document the client receives embodying the services constitutes tangible personal property. At the other extreme, when an artist renders a painting, the sale of the painting is a sale of tangible personal property, even though the value of the painting is attributable to the talent of the artist and not the cost of the canvas and paint. The great difficulty lies with transactions in the middle. Determining the proper treatment of services rendered in connection with the sale of a product is among the most frequently litigated issues in the area of sales tax.

The rule a number of states use to help resolve the difficulty of determining when services rendered should constitute part of the sales price of a product is whether the 'true object' of the buyer was to acquire the finished product or the service rendered. If the true object sought by the buyer is to obtain the property produced by the service, then the services are necessary to complete the sale and should be included in the computation of the sales price of the product.

Over the past several months, the Department of Revenue audited some interior designers and decorators and assessed sales tax on services they found necessary to complete the sale of the tangible personal property sold by the designer or decorator. Many of the interior designers and decorators appealed the assessment of the tax and brought the issue to the attention of legislators.[44] This section does not affect the assessments imposed under the prior law.

This section also does not address other transactions in which the tangible personal property transferred is largely the result of personal services. The Department issued a technical bulletin on May 1, 2008, that provides guidance as to when services and sales are subject to sales or use tax. The bulletin provides the following guidelines:

- Charges for services rendered before the sale of tangible personal property are not subject to sales or use tax. A taxpayer's records must clearly establish that an agreement to sell tangible personal property was made after the completion of interior design services.
- Charges for services unrelated to the sale of tangible personal property are not subject to sales or use tax.
- Charges for services with incidental sales of property are not subject to sales or use tax. An incidental sale is defined as a sale where the charges for the tangible personal property equal 20% or less of the total combined charges for the tangible personal property.

1%, $80 Cap on Excise Tax on Machinery Refurbishers. – Section 28.21 expands Article 5F of Chapter 105 of the General Statutes to provide that the 1% privilege tax, with a cap of $80, applies to an industrial machinery refurbishing company that purchases equipment or an attachment or repair part for equipment used by the company in repairing or refurbishing tangible personal property owned by a third party. Property subject to the excise tax under Article 5F is exempt from sales and use tax. The change from a sales tax to a privilege tax not only means a lower tax rate for the property purchased but also means that retailers are not responsible for collecting and remitting

[44] SB 1657 passed the Senate Finance Committee and became the basis for this section in the budget.

the tax. The change became effective July 1, 2008, and applies to purchases made on or after that date.[45]

The 2001 General Assembly enacted Article 5F in response to the requirement of the Streamlined Sales and Use Tax Agreement that states must simplify their sales tax rates. The 2001 legislation, which became effective January 1, 2006, repealed the 1% sales tax rate, with an $80 cap, imposed on mill machinery purchased by a manufacturing industry or plant and replaced it with a privilege tax having the same rate. The Article has been expanded since its enactment to apply to purchases of fuel and equipment and machinery by a number of different industries, including:

- Fuel, other than electricity or piped natural gas, purchased by a manufacturing industry or plant to operate the industry or plant.
- Certain personal property purchased by a major recycling facility.
- Equipment purchased by a research and development company in the physical, engineering, and life sciences and used by that company in the research and development of tangible personal property.
- Equipment purchased by a software publishing company that is used in the research and development of tangible personal property.
- Equipment purchased by an eligible datacenter.

The Senate Finance Committee originally considered the issue of whether purchases of machinery and equipment by a machine refurbisher should be treated similarly to mill machinery purchased by a manufacturing industry in Senate Bill 1745.[46] For purposes of the mill machinery provision in Article 5F, a "manufacturing industry or plant" is an entity which manufactures articles for sale or some equivalent commercial purpose. The Department of Revenue held in both private letter rulings and at least two final decisions that a business that refurbishes or refinishes items of tangible personal property owned by a third party performs a service and is not engaged in manufacturing. Consequently, the machinery and equipment used in the refurbishing process was not eligible for the 1% privilege tax rate prior to the passage of this legislation. Instead, the purchases were subject to the combined general rate of sales and use tax.

Clarify 501(c)(3) Sales Tax Refund.[47] – Section 28.22 provides objective criteria to determine whether an organization is a nonprofit charitable institution eligible to receive a semiannual refund of sales and use taxes paid by it on direct purchases of tangible personal property and services used to carry on the work of the nonprofit entity. This section became effective July 1, 2008.

Prior to this change, the Department of Revenue had to determine whether a nonprofit entity requesting a sales and use tax refund qualified as a 'charitable institution'.[48] To make its

[45] SB 1745, as passed by the Senate, would have made this provision effective July 1, 2006, and applicable to purchases made on or after that date and to assessments made on or after that date for prior purchases. This bill became the basis for this provision. However, the retroactive effective date was not retained.

[46] Under SB 1743, the change in the law would have become effective July 1, 2006, and applied to purchases made on or after that date and to assessments made on or after that date for prior purchases. The provision enacted in this act did not retain the retroactive effective date.

[47] The Senate Finance Committee originally considered this issue in Senate Bill 2106.

[48] Under prior law, the refund applied to educational institutions, churches, orphanages, and *other charitable or religious institutions* not operated for profit. It continues to apply to nonprofit hospitals and qualified retirement facilities.

determination, the Department relied on past determinations and court decisions. Under *Southmister, Inc. v. Justice*, the court defined a charitable organization as one "engaged in the relief or aid to a certain class of persons, a corporate body established for public use, or a private institution created and maintained for the purposes of dispensing some public good or benevolence to those who require it." In May of 2008, the North Carolina Court of Appeals appeared to expand the definition of charitable organization in *The Lynnwood Foundation v. N.C. Department of Revenue* when it affirmed a trial court's ruling that the Department erred in denying a sales and use tax refund to The Lynnwood Foundation. In 2004, the Department determined that the Lynnwood Foundation[49] no longer qualified[50] as a charitable organization for purposes of the sales and use tax refund for the following reasons: it did not engage in relief or aid to a charitable class; it operated for profit; and it did not use the taxed property for a charitable purpose. The Lynnwood Foundation appealed the decision and the trial court granted summary judgment in the Lynnwood Foundation's favor. The trial court found that the preservation of historic sites was a charitable purpose; that the Lynnwood Foundation's overall expenses exceeded its overall income; and that the Lynnwood Foundation only sought a refund for the sales and use taxes it paid on items that it used in carrying out its charitable work.[51]

This section seeks to clarify the prior law, not to expand it. It provides a bright line test for determining whether a nonprofit entity is a charitable one by relying upon section 501(c)(3) of the Internal Revenue Code (Code) and the National Taxonomy of Exempt Entities (NTEE). The NTEE is a classification system categorizing charitable organizations with 501(c)(3) status by organizational mission into 26 subgroups based on Internal Revenue Service (IRS) activity codes. The activity codes provide detail on the operational activities of an organization that has been granted 501(c)(3) status. The IRS assigns an activity code to a charitable organization based on information provided by the organization at the time of application for 501(c)(3) status.

Effective July 1, 2008, a nonprofit entity may receive a sales tax refund if it is exempt from income tax under section 501(c)(3) of the Code but not designated as one of the following organizations under the NTEE:

- Community improvement, capacity building organization.
- Public, society benefit, multipurpose organization.
- Mutual/membership benefits organization.
- Organization whose mission or purpose is unknown.

According to the National Center for Charitable Statistics, as of November 2006 there were 11,901 active North Carolina based organizations with IRS 501(c)(3) status.[52] Of these 11,901 active

---

[49] The Lynnwood Foundation was incorporated in 1996 as a charitable organization to preserve and restore the Duke Mansion. In 1997 the Department determined that the Lynnwood Foundation was entitled to a refund of a portion of sales and use tax paid.

[50] The Lynnwood Foundation began operating the Duke Mansion as a conference and lodging facility in 1998. The Department reexamined the Lynnwood Foundation's status as a charitable organization within the meaning of the sales and use tax refund statute in 2002.

[51] The Foundation paid more than $239,000 in sales and use taxes from July 2004 through December 2005. It sought to recover $14,700. During the same period, the Foundation expended over $2 million towards preserving the property.

[52] An active organization is one that filed a federal 990 Form with the IRS between November 2004 and November 2006.

organizations, 599 are classified within one of the four NTEE classifications excluded from receiving a sales tax refund. It is not known how many of these organizations received a sales tax refund under the prior law. Likewise, an organization that may have been determined by the Department to be ineligible for a sales tax refund in the past may be eligible under the new law. The Fiscal Research Division expects that the number of organizations and quantity of refunds affected by the change will be minimal.

Expand Renewable Energy Tax Credit. – Section 28.25 expands the income tax credit available to a taxpayer who donates funds to a tax-exempt nonprofit organization for the purpose of providing fund for the organization to invest in renewable energy property[53] to include similar donations made to a unit of State or local government. A taxpayer who claims this credit may not also claim the donation as a charitable contribution. This section became effective for taxable years beginning on or after January 1, 2008.

The amount of the credit is equal to the taxpayer's share of the credit the governmental entity could claim under G.S. 105-129.16A[54] if it was subject to tax. The credit under G.S. 105-129.16A is equal to 35% of the cost of the property placed in service. The taxpayer's share of the credit is equal to the following calculation: (taxpayer's donation / cost of the renewable energy property of governmental entity placed in service that year as a result of the donation) X (the amount of the credit the governmental entity could claim if it were subject to tax). The credit must be taken in the year in which the property is placed in service.[55] The credit may be taken against either the income tax or the franchise tax and it may not exceed 50% of the taxpayer's of the tax against which it is claimed.

A governmental entity must keep a record of all donations it receives for renewable energy property and the amount of the donations used for this purpose. If the entity places renewable energy property in service, it must give each taxpayer who made a donation a statement setting out the amount of the credit the taxpayer qualifies for, a description of the renewable energy property placed in service, the cost of the property, the amount of the credit the entity could claim under G.S. 105-129.16A if it were subject to tax, and the taxpayer's share of the credit allowed. If the donations made for the renewable energy property exceed the cost of the property, the entity must prorate each taxpayer's share of the credit.

Part IV: Economic Incentives

This act extends the sunsets on and, in some instances, expands the scope of several tax credits. Tax credits are one of many economic incentives offered by the State designed to attract and maintain businesses in North Carolina. In 1998, the Revenue Laws Study Committee recommended that sunsets be placed on virtually all of the tax credits as a means to review and reevaluate those credits to determine whether they are accomplishing their intended goal. The Committee engaged in this review process during the 2007 interim and recommended extensions

[53] Renewable energy property includes biomass equipment that uses renewable biomass resources for biofuel production of ethanol, methanol, and biodiesel; anaerobic biogas production of methane utilizing agricultural and animal waste or garbage; commercial thermal or electrical generation from renewable energy crops or wood waste materials; hydroelectric generators; solar energy equipment; and wind equipment. Renewable biomass resources are organic matters produced by terrestrial and aquatic plants and animals.

[54] G.S. 105-129.16A is repealed effective for renewable energy property placed into service on or after January 1, 2011.

[55] The installment requirements in G.S. 105-129.16A for nonresidential property do not apply to this credit.

for the following three credits: the credit for research and development, the credit for the State Ports Authority, and the credit for small business employee health benefits. During the 2008 Session, the General Assembly extended or modified the sunset on three additional credits: the credit for low-income housing, the credit for mill rehabilitation, and the film industry credit. In addition to the extension of these credits, the General Assembly expanded the scope of the film industry and renewable energy tax credit and increased the cap on the qualified business venture tax credit.

These economic incentives are described more fully as follows and appear in the order in which they appear in the budget.

Extend Credit for Research & Development. – Section 28.2 extends for five years, until the year 2014, the sunset on this tax credit. Prior to the enactment of this section, the credit was scheduled to expire for taxable years beginning on or after January 1, 2009. This section became effective when the Governor signed the act into law on July 16, 2008.

In 2004, the General Assembly enacted this credit as an alternative to the Bill Lee research and development credit, which was set to expire along with the entire Bill Lee Act on January 1, 2006. A taxpayer that has qualified North Carolina research expenses or North Carolina university research expenses is allowed a credit. The taxpayer must satisfy Bill Lee Act requirements related to employee wages, the provision of health insurance, the taxpayer's Occupational Safety and Health Act record, and the taxpayer's environmental record. A taxpayer with overdue tax debts is not prohibited from taking this credit.

The credit amount varies. For North Carolina university research expenses, the credit amount is equal to 20% of the amount the taxpayer paid to the university for the research and development. For all other qualified research expenses, the credit is equal to a percentage of the expenses. Specifically, the rate is 3.25% for small businesses[56] and for research and development conducted in a development tier one area. For other research and development expenditures, the rate ranges from 1.25% to 3.25% as the amount of those expenditures increases.

Extend Low-Income Housing Credit. – Section 28.3 extends the sunset on the low-income housing tax credit from January 1, 2010, until January 1, 2015. Although the sunset was not scheduled to expire for two more years, developers of low-income housing begin their work months in advance and need to know what financing will be available as they secure options on sites. This section became effective when the Governor signed the act into law on July 16, 2008.

Congress enacted the federal Low Income Housing Tax Credit in 1986 to fund housing for low- and moderate-income households. Each state receives a limited amount of credit each year. The Internal Revenue Service (IRS) allocates the per capita low-income housing tax credit to state housing agencies such as the North Carolina Housing Finance Agency (HFA), which in turn allocate the credit to project developers who agree to lower project rents for low-income tenants.

In 1999, North Carolina authorized a State income tax credit modeled after the federal housing credit.[57] Under current law, a taxpayer may elect to receive the credit in the form of either a credit

---

[56] A small business is a business whose annual receipts, combined with the annual receipts of all related persons, does not exceed $1,000,000.

[57] Under the original version of the State credit, a project developer had to sell the tax credits to receive funds to finance the project. Developers indicated that the process of selling the credits was complex and that they sold for no more than 45 cents on the dollar. In 2002, the General Assembly modified the way

against tax liability or a loan generated by transferring the credit to the HFA in return for a 0% interest 30-year balloon loan equal to the credit amount. Historically, project developers have almost always elected the loan option. Neither a tax refund generated by the credit, nor a loan received as a result of the transfer of the credit is considered taxable income by the State. Although a State tax refund is considered taxable income by the IRS if the taxpayer itemizes deductions, a private letter ruling from the IRS provides that the loan proceeds are not.

Extend Mill Rehabilitation Tax Credit. – Section 28.4 extends the sunset for rehabilitation projects for which an application for an eligibility certification is submitted on or after January 1, 2011. Under prior law, the credit expired for qualified rehabilitation expenses occurring on or after that date. This section also makes clarifying and stylistic changes. This section is effective for taxable years beginning on or after January 1, 2008.

North Carolina allows a tax credit for rehabilitating vacant historic manufacturing sites if the taxpayer spends at least $3 million to rehabilitate the site. To qualify for the credit, the site must satisfy all of the following conditions:

- The site was used as a manufacturing facility or for purposes ancillary to manufacturing, as a warehouse for selling agricultural products, or as a public or private utility.
- The site is a certified historic structure or a State-certified historic structure.
- The site has been at least 80% vacant for a period of at least two years immediately preceding the date the eligibility certification is made.

The amount of the credit is a percentage of the qualified rehabilitation expenditures, and the percentage varies depending on the enterprise tier location of the site and the eligibility for the federal credit as follows:

- Development tier one or two area – 40% of qualified rehabilitation expenditures or rehabilitation expenses, regardless of whether the taxpayer is allowed a federal credit.
- Development tier three area – 30% of qualified rehabilitation expenditures and the taxpayer is allowed a federal credit. No credit is allowed if the site is located in a development tier three and the taxpayer is not allowed a federal credit.

The credit may be claimed against the franchise tax, the income tax, or the gross premiums tax. If the credit is taken for income-producing property, it may be taken in the year the property is placed in service. If the credit is taken for non-income-producing property, the credit must be taken in five equal installments beginning with the taxable year in which the property is placed in service. The credit may not exceed the amount of the tax against which the credit is claimed for the taxable year reduced by the sum of all credits allowed, except payment of tax made by the taxpayer. Any unused portion of the credit may be carried forward for the succeeding nine years. This credit may be taken in place of the credit for historic rehabilitation, not in addition to it.

A pass-through entity may allocate the credit among any of its owners without limitation as long as the owner's adjusted basis in the pass-through entity is at least 40% of the amount of credit

---

in which developers benefited from the credit to promote efficiency and cost savings while providing the same level of incentives.

allocated to the owner.[58] An owner of a pass–through entity that qualifies for the credit will forfeit a portion of any credit the owner has received if both of the following conditions are met:

- The owner disposed of the interest within five years from the date the eligible site is placed into service.
- The owner's interest in the pass-through entity is reduced to less than two-thirds of the owner's interest in the pass-through entity at the time the eligible site was placed into service.

The forfeiture of an owner's interest is not required if the change in ownership is the result of the owner's death or the merger, consolidation, or similar transaction requiring approval by the shareholders, partners, or members of the entity, to the extent the entity does not receive cash or tangible property in the transaction. A taxpayer or owner of a pass-through entity that forfeits a credit is liable for all past taxes avoided as a result of the credit plus interest computed from the date the taxes would have been due if the credit had not been allowed.

Extend Sunset for State Ports Tax Credit. – Section 28.5 of the act extends for five years, until the year 2014, the sunset on this tax credit. Prior to the enactment of this section, the credit was scheduled to expire for taxable years beginning on or after January 1, 2009. This section became effective when the Governor signed the act into law on July 16, 2008.

In 1992, the General Assembly enacted the State Ports tax credit to encourage exporters to use the two State-owned port terminals in Wilmington and Morehead City. At that time, the credit applied to amounts paid by a taxpayer on any cargo exported at either port. Over the years, the credit has been expanded and the sunset has been extended four times.

Currently, the State Ports tax credit is allowed to a taxpayer who loads or unloads waterborne cargo from an ocean carrier at the State-owned port terminal at Wilmington or Morehead City. The credit is allowed against the taxpayer's income tax. The taxpayer may be either an individual or a corporation. The amount of the tax credit is equal to the amount of wharfage, handling, and throughput charges paid to the North Carolina State Ports Authority in the taxable year that exceeds the average amount of charges paid to the Authority for the current tax year and the two previous tax years. The credit is limited to 50% of the tax imposed on the taxpayer for the taxable year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years. The maximum cumulative credit that one taxpayer may claim is $2 million.

Extend Sunset for Small Business Employee Health Benefits. – Section 28.10 extends from January 1, 2009, to January 1, 2010, the sunset on this tax credit. This section became effective when the Governor signed the act into law on July 16, 2008.

Effective for taxable years beginning on or after January 1, 2007, a small business[59] that provides health benefits to all of its full-time employees[60] is eligible for a tax credit. 'Providing health benefits' means one or more of the following:

---

[58] A pass-through entity may also allocate the credit for rehabilitating an historic structure among its owners in the same manner as provided in this provision.

[59] A 'small business' is a taxpayer that employs no more than 25 full-time employees.

[60] An 'eligible employee' is one that works a normal workweek of 30 or more hours and whose total wages or salary received from the business does not exceed $40,000 on annual basis.

- The taxpayer pays at least 50% of the premiums for health insurance coverage that equals or exceeds the minimum provisions of the basic health care plan of coverage recommended by the Small Employer Carrier Committee.
- The employee has existing coverage under one or more of the following: Medicare; Medicaid; a government funded program; a health insurance or benefit arrangement that provides benefits similar to or in excess of benefits provided under the basic health care plan.

The credit amount is equal to $250 per employee for whom the taxpayer pays the health insurance premium, not to exceed the taxpayer's cost of providing the health insurance benefit. The taxpayer may use the credit against either its income tax or its franchise tax liability. The credit may not exceed 50% of the taxpayer's tax liability. Any unused portions of the credit may be carried forward for five years.

Under the Internal Revenue Code, an employer may deduct premiums paid for health insurance cost of its employees as a business expense. The credit is in addition to any expense deduction the taxpayer claimed on its income tax return for the health insurance costs.

Extend Aviation Fuel Refunds.[61] – Section 28.23 extends the sunset for refunds of the State sales and use tax paid on fuel used by interstate passenger air carriers and on aviation fuel used by a professional motorsports racing team or a motorsports sanctioning body from January 1, 2009, to January 1, 2011.[62] To receive a refund, a taxpayer must submit a refund request in writing and include any information and documentation required by the Secretary of Revenue. The request is due within six months after the end of the calendar year for which the refund is claimed.

In 2005, the General Assembly allowed a sales and use tax refund to an interstate passenger air carrier for the net amount of sales and use tax paid by it on fuel during a calendar year in excess of $2,500,000.[63] The 'net amount of sales and use taxes paid' is the amount of sales tax paid by the interstate passenger air carrier less the refund of that tax allowed to all interstate carriers under subsection (a) of G.S. 105-164.14.[64] The refund for which the sunset provision is being extended is in addition to the refund allowed under G.S. 105-164.14(a).

In that same year, the General Assembly enacted a refund of sales and use taxes paid on aviation fuel by a motorsports racing team or motorsports sanctioning body. In order to qualify for the refund, the fuel must have been used to travel to or from a motorsports event in this State, from this State to a motorsports event in another State, or to this State from a motorsports event in another State. For the purposes of the refund, a 'motorsports event' includes a motorsports race, a motorsports sponsor event, and motorsports testing.

---

[61] The Senate Finance Committee originally considered the sunset extension in Senate Bill 2113.

[62] S.L. 2006-66 extended the sunset on these two sales tax refund provisions from January 1, 2007, to January 1, 2009.

[63] S.L. 2005-435.

[64] Under subsection (a), an interstate carrier is allowed a refund of a portion of the sales and use taxes paid by the carrier on fuel, lubricants, repair parts, and accessories purchased in this State. The refund is equal to a proportion of the sales and use taxes paid by the carrier in this State. The proportion is equal to the proportion of the miles traveled by the carrier in this State to the total miles traveled by the carrier.

Expand Film Industry Credit and Extend Sunset. – Section 28.24 extends for four years, until January 1, 2014, the sunset on this tax credit and makes several other changes to the credit. This section became effective for taxable years beginning on or after January 1, 2008.

This credit is a refundable income tax credit equal to 15% of the qualifying expenses spent by a production company in connection with a production. However, the amount of the credit with respect to a feature film production is capped at $7.5 million. In order to obtain the credit, the taxpayer must have qualifying expenses in excess of $250,000. Qualifying expenses are the total amount spent in North Carolina for the following:

- Goods and services purchased by a production company in connection with a production.
- Compensation and wages paid by a production company on which it remitted withholding payments to the Department of Revenue. Under prior law, any amount paid to an individual who receives in excess of $1 million with respect to a single production may not be included in a qualifying expense. The section modifies this limitation by allowing a production company to include in its qualifying expenses up to $1 million in compensation paid to a highly compensated individual.[65] Any amount paid in excess of $1 million continues to be disallowed.

This section makes three additional changes to the credit. First, it allows a production company to include in its qualifying expenses the cost of insurance coverage for production-related insurance that is obtained on the production. The expenses do not qualify if the insurance coverage is purchased from a related member, which is defined in the current law. Second, it requires a taxpayer who claims the credit to file an intent-to-film notice with the North Carolina Film Office. The notice must include the name of the production, the name of the production company, the name of a financial contact for the production company, the proposed dates on which the production company plans to begin filing the production, and any other information required by the NC Film Office. This provision codifies current administrative practice.[66] Finally, it requires a taxpayer to acknowledge in the production credits both the North Carolina Film Office and the regional film office responsible for the geographic area in which the filming of the production occurred.

Increase Qualified Business Venture Tax Credit Cap. – Section 28.26 increases from $7 to $7.5 million the total amount of all qualified business investment credits that may be taken each year.[67] Demand for the credit exceeded $7 million in 2006 and totaled more than $6.5 million in 2007. This section is effective for investments made on or after January 1, 2008.

The qualified business investment tax credit is allowed for an individual taxpayer who purchases the equity securities or subordinated debt of a qualified business venture, a qualified grantee business, or a qualified licensee business directly from that business. The credit is equal to 25% of

---

[65] 'Highly compensated individual' is defined as 'An individual who directly or indirectly receives compensation in excess of one million dollars ($1,000,000) for personal services with respect to a single production. An individual receives compensation indirectly when a production company pays a personal service company or an employee leasing company that pays the individual.'

[66] A production may not claim the credit until the production is complete. As written, the notification and acknowledgement requirements are conditions to receiving the credit. It would be possible for a company that has begun production to be denied a credit because it failed to meet these requirements, even though the requirements did not exist at the time the company began, or possibly completed, its production.

[67] The Senate considered this issue in Senate Bill 1628.

the amount invested and may not exceed $50,000 per individual in a single taxable year. An individual investor may also claim the allocable share of credits obtained by pass-through entities of which the investor is an owner. Pass-through entities include limited partnerships, general partnerships, S corporations, and limited liability companies. The credit may not be taken in the year the investment is made. Instead, the credit is taken in the year following the calendar year in which the investment was made, but only if the taxpayer files an application with the Secretary of Revenue. Any unused credit may be carried forward for the next five years. The Secretary of Revenue calculates the total amount of tax credits claimed from applications filed. If the amount exceeds the cap, then the Secretary allows a portion of the tax credits claimed by allocating the total amount of credits allowed in proportion to the size of the credit claimed by each taxpayer. In general, a taxpayer forfeits the credit if the taxpayer transfers the securities within one year or the qualified business redeems the securities purchased by the taxpayer within five years after the investment was made. This credit is currently set to expire for investments made on or after January 1, 2011.

Part V: Estate & Gift Tax Changes

Modify Estate Tax Law. – Section 28.17 modifies the formula for calculating North Carolina estate tax on estates that include property located in another state by excluding the value of that property from the estate tax payable to North Carolina, as recommended by the Revenue Laws Study Committee.[68] The section became effective July 16, 2008, and applies retroactively to the estates of decedents for which the statute of limitations for claiming a refund had not expired on December 27, 2007. [69] A personal representative of an estate for which the statute of limitations had not expired may file a claim for refund under G.S. 105-241.6. The statute provides that the general statute of limitations for obtaining a refund of an overpayment of tax is the later of the following:

- Three years after the due date of the return. – A North Carolina estate tax return is due on the date a federal estate tax return is due. A federal estate tax return is due nine months from the date of death. An extension of time to file a federal estate tax return is an automatic extension of the time to file a State tax return.
- Two years after payment of the tax.

For estates with property only in North Carolina, the North Carolina estate tax equals the amount of the credit allowed on the federal estate tax return for state estate tax paid, as the federal law provided in 2001. If an estate has property in more than one state, the federal credit amount must be prorated between North Carolina and the other states in which the estate has property. In 2002, the Estate Tax Section of the North Carolina Bar Association recommended a change in the calculation formula from a net value ratio to a gross value ratio. The recommended change also

[68] SB 1756.

[69] A case has been filed in Mecklenburg County, *Stowe v. Department of Revenue*, to recover North Carolina estate taxes imposed on property located in South Carolina. The plaintiffs argue in their complaint that the formula for calculating North Carolina estate tax due when property is located in more than one state is unconstitutional because it provides less than a full reduction of the tax attributable to the out of state property when the other state does not impose an estate tax, or imposes an estate tax less than the prorated federal credit amount. The plaintiffs filed the complaint on December 27, 2007.

provided that when the estate of a North Carolina decedent included out-of-state property, the North Carolina estate tax would be calculated as the amount of the 2001 tax credit reduced by the lesser of the amount of estate tax paid to the other state or the amount of the 2001 tax credit times the value of the out-of-state property divided by the value of the gross estate.

In calculating the estate tax payable in North Carolina for an estate that includes property located in a state that does not impose an estate tax, the formula, prior to its modification by this section, provided that the North Carolina estate tax would be reduced by zero, because that is the lesser of the amount paid to the state that does not impose an estate tax. This calculation resulted in North Carolina's estate tax being imposed on property that is not located within its taxing jurisdiction. The application of the formula was especially problematic for North Carolina because the states surrounding North Carolina do not have an estate tax. Virginia repealed its estate tax, effective July 1, 2007. Georgia, South Carolina, and Tennessee have not had an estate tax since January 1, 2005, because their estate tax equals the amount of the state estate tax credit allowed on the federal estate tax return. In 2001, Congress phased out the state estate tax credit over four years by reducing it 25% in 2002, 50% in 2003, 75% in 2004, and by repealing it entirely in 2005.[70]

This section modifies the formula for calculating North Carolina estate tax on estates that include property located in another state by prorating the federal credit amount between North Carolina and the other states in which the estate has property. It does so by eliminating the 'lesser of" language that sometimes results in North Carolina's estate tax being imposed on property located in another state.

Repeal Gift Tax Law. – Section 28.18 repeals North Carolina's gift tax law, effective January 1, 2009. The nuances of North Carolina's gift tax laws make the transfer of property through gifts difficult and complicate estate planning. The North Carolina Association of CPAs and the Estate and Gift Tax Section of the North Carolina Bar Association have consistently recommended that North Carolina eliminate or simplify its gift tax law. The Revenue Laws Study Committee recommended legislation to the 2007 General Assembly to reform the State's gift tax to more closely conform to the federal tax, but the General Assembly did not enact the bill. Although the Committee did not recommend legislation on this issue this session, it recognized the need to simplify the State's gift tax laws.

With the repeal of the gift tax in North Carolina, Connecticut and Tennessee remain the only two states in the nation to impose a tax on gifts. Some of the reasons for repealing North Carolina's gift tax law included:

- North Carolina taxes gifts at varying graduated rates based on the relationship between the donor and the donee.[71] It favors transfers between spouses by exempting those transfers from tax. It favors transfers to children and parents by giving those transfers the lowest rates as well as a cumulative exemption amount of $100,000. Transfers to other

---

[70] The federal estate tax changes were part of the Economic Growth and Tax Relief Reconciliation Act of 2001. Under the provisions of that Act, the state estate tax credit phased-out, the federal estate tax exclusion amounts increased gradually, and the top rates decreased gradually until 2010 when the tax is repealed. However, the provisions are currently set to expire for estates of decedents dying after December 31, 2010. Effective January 1, 2011, the federal estate tax law will return to the provisions that existed in the year 2000 unless Congress enacts new legislation. Therefore, effective 2011, the state estate tax credit will exist again and the applicable exclusion amounts and tax rates will return to the amounts that existed in 2000.

[71] North Carolina is the only state whose gift tax rate structure differs depending on the relationship between the donor and the donee.

close family members are taxed at higher rates and do not enjoy the benefit of an exemption. Transfers to more distant relatives or to persons who are not related are taxed at the highest rate.

- North Carolina's gift tax structure does not conform well to the federal gift tax structure.[72] The federal gift tax is part of a somewhat unified gift-estate tax system at the federal level. As part of that system, the federal gift tax has a lifetime exemption amount of $1,000,000. This amount is much larger than the State exemption amount and is available regardless of the relationship between the donor and donee. One result of this difference is that some transfers made while the donor is alive are taxable in North Carolina, although the same transfer made by a decedent would not be taxable.[73]

- There are sometimes differences in the valuation of a gift for State and federal tax purposes. This discrepancy most commonly occurs with respect to the valuation of annuities. For State purposes, statutes mandate an interest rate of 6% be used in determining the value of the annuity; for federal purposes, the current prevailing interest rate is used.

- A donee assumes the donor's basis when property is transferred by gift. A donee assumes a stepped-up basis when the property is transferred through an estate.

Part VI: Property Tax Exclusion for Honorably Discharged Disabled Veterans and their Surviving Spouses.

Section 28.11 repeals the property tax exclusion for the first $38,000 in assessed value of housing for disabled veterans receiving benefits under 38 U.S.C. § 2101 and, in its place, creates a property tax homestead exclusion equal to the first $45,000 in assessed value of a permanent residence owned by an honorably discharged veteran or the unmarried surviving spouse of an honorably discharged veteran. This exclusion does not have an age requirement or an income requirement. The exclusion becomes effective for taxes imposed for taxable years beginning on or after July 1, 2009.

To receive the exclusion, a property owner must file an application[74] with the county tax assessor. To qualify for the exclusion, the property owner must meet one of the following requirements, or be the unmarried surviving spouse of a person who met one of these requirements:

- A disabled veteran who receives benefits under 38 U.S.C. § 2101.

- A disabled veteran certified by the U.S. Government or the U.S. Department of Veterans Affairs as a person with a permanent total disability that is service-connected.

A taxpayer who receives the disabled veteran property tax exclusion may not benefit from any other homestead property tax exclusion. However, if the permanent residence is owned by more than one person who is not the taxpayer's spouse, and a co-owner qualifies for a property tax relief

---

[72] Connecticut's gift tax structure conforms to the federal gift tax system. North Carolina and Tennessee's does not.

[73] Accountants and estate planning attorneys found that the consequences of the gift tax affects the estate planning of middle-income citizens in that it discourages them from transferring a farm or small business to their natural heirs during their lifetime because they cannot afford to pay the applicable State gift tax.

[74] The application need be filed only once.

program, then the co-owner may receive the benefits of that program.[75] The exclusion allowed to either co-owner may not exceed the co-owner's proportionate share of the valuation of the property and the amount of the exclusion allowed to all co-owners may not exceed the greater of two applicable exclusion amounts.

North Carolina also provides the following property tax exclusions for disabled veterans:

- A property tax exclusion for a motor vehicle given by the U.S. Government to veterans on account of disabilities they suffered in WWII, the Korean, Conflict, or the Vietnam War.
- A property tax exclusion for a motor vehicle owned by a disabled veteran if the vehicle has been altered with special equipment to accommodate a service-connected disability. A service-connected disability is an injury incurred or disease contracted in or aggravated by active service. The disability must be loss of one or both hands or feet, permanent loss of use of one or both hands or feet, or permanent impairment of vision of both eyes.

Part VII: Administrative Changes

Small Business Protection Act. – Section 28.16 provides small businesses with certain protections related to their sales and use tax obligations, it requires the Department of Revenue to establish and implement procedures for improving customer service and quality control measures with regard to advice given to taxpayers in certain areas of the tax law, and it directs the Revenue Laws Study Committee to study issues related to the interpretation and application of certain areas of the sales and use tax law.

Under this section, the Secretary is required to reduce an assessment for sales and use taxes made against a small business as the result of an audit and waive any associated penalties if all of the following conditions are met:

- The annual gross receipts of the business and all related persons for the calendar year preceding the year in which the audit period begins do not exceed $1.8 million dollars.
- The business remitted all the sales and use taxes it collected during the audit period.
- The business had not been told by the Department in a prior audit to collect sales and use taxes in the circumstance that is the basis of the assessment.
- The business made a good faith effort to comply with the sales and use tax laws and the assessment is based on the incorrect application of one of the following complex areas of these laws:
    - The rate of tax that applies to prepared food.
    - The distinction between a retailer and a performance contractor.
    - The distinction between a service that is necessary to complete the sale of tangible personal property, which is taxable, and a service that is incidental to the sale of tangible personal property, which is not taxable.
    - The determination of whether a person is a manufacturer.

[75] G.S. 105-277.1 provides a property tax exclusion for elderly or disabled taxpayers who meet an income eligibility limit.

The amount of the reduction is a percentage of the assessment and varies depending on the average monthly gross receipts of the business:

Avg. Monthly Gross Receipts	Reduction of Assessment
$ 0- 50,000	98%
$ 50,001-100,000	95%
$ 100,001-150,000	90%

In addition to applying prospectively to future assessments and claims for the refund of an assessment, this section also has limited retroactive application. Specifically, it applies to assessments that are pending as of July 15, 2008, to assessments that have been identified in a notice of final assessment under former G.S. 105-241.1 prior to July 15, 2008, or to assessments that became collectible but have not been paid as of July 15, 2008. If, however, an assessment was paid within six months after it became collectible, then the taxpayer may also be eligible for a reduction if a timely claim for refund could be filed.

During the 2008 Session, the Senate and House Finance Committees heard from a number of small business owners who expressed concern and confusion regarding the application to their particular businesses of certain sales and use tax provisions and, in some instances, verbal information provided by the Department of Revenue that they believed to be erroneous or unclear. This section attempts to address either the actual or perceived issues of quality control within the Department with respect to verbal advice given to taxpayers. Specifically, this section requires the Department to document certain conversations with taxpayers, regardless of whether the conversation is conducted by phone or in person. Effective January 1, 2009, the Department must document advice given to a taxpayer when the taxpayer provides identifying information, asks about the application of a tax to the taxpayer in specific circumstances, and requests that the Secretary document the advice in the taxpayer's records. The documentation must set out the date of the conversation, the question asked, and the advice given. This requirement does not apply in a conference or presentation-type setting. Effective July 1, 2009, the Department must document in a similar manner a conversation with a taxpayer who is not registered as a retailer or a wholesale merchant under Article 5 of Chapter 105 of the General Statutes when the taxpayer identifies himself, describes the business in which he is engaged, and asks if he is required to be registered under Article 5.

Under current law, a taxpayer may request in writing specific advice from the Department. If the Department furnishes erroneous written advice in response, and the taxpayer reasonably relies on that advice, the taxpayer is not liable for any penalty or additional assessment attributable to the erroneous advice. However, the same protection does not apply with regard to verbal advice. Effective July 16, 2008, when the act became law, this same protection is extended to taxpayers with regard to erroneous verbal advice provided that Departmental records establish that the erroneous advice was given.

This section rewrites the offer and compromise statute so that it more accurately reflects current practice, is adjusted for inflation, and eliminates the requirement that the Department obtain approval from the Attorney General unless the matter is in litigation. It also adds a new condition under which the Department may settle a tax liability for less than that asserted to be due; that is, when the collection of an amount greater than the amount offered would produce an unjust result under the circumstances. The rewrite of this statute is intended, in part, to provide the Department with additional flexibility with regard to offers and compromise.

This section requires the Department to do two things. First, the Department must establish and implement by July 1, 2010, a plan to record telephone calls received at the Taxpayer Assistance Center for training, customer service, and quality control purposes. Second, the Department must report to the Revenue Laws Study Committee, prior to the convening of the 2009 General Assembly, on customer service improvement initiatives.

Finally, it directs the Revenue Laws Study Committee to study the following issues related to the interpretation and application of certain areas of the sales and use tax law that frequently cause confusion among taxpayers and often result in inadvertent noncompliance:

- The taxation of services necessary to complete the sale of tangible personal property and standards for distinguishing between a service that is taxable as one that is necessary to complete the sale and a service that is incidental to the sale of tangible personal property.
- The applicability of the sales and use tax to performance contracts and standards for distinguishing between performance contractors and retailers.
- The distinction between food and prepared food under the sales and use tax laws and whether to eliminate this distinction by applying a uniform, revenue-neutral rate to all food.

Procedure for Tax Class Actions. – Section 28.28, which was a recommendation of the Revenue Laws Study Committee, establishes a procedure for taxpayers seeking to initiate or join a class action in order to obtain a refund of tax paid due to an alleged unconstitutional statute. This section became effective October 1, 2008, and applies to civil actions filed on or after that date.

The Revenue Laws Study Committee spent a significant amount of time examining this issue. Prompted by requests from both the North Carolina Bar Association and the North Carolina Association of Certified Public Accountants, the Committee first examined the issue in 2002. The Committee revisited the issue in 2006 as part of its broader, in-depth study of the procedures related to the review of disputed tax matters. Most recently, in its report to the 2008 Regular Session of the 2007 General Assembly, the Committee determined that the existing law needed to be clarified because of ambiguity surrounding recent judicial interpretations of the 'protest statute', which was the prior mechanism for bringing a civil suit for a refund of tax. The purpose of this legislation is to identify and protect the potential liability of the State for tax refunds and to give taxpayers, the Department, and practitioners clear guidance as to the proper procedure governing tax-related class actions.

- **Authority**. – Neither the law prior to 2007, nor the law in place prior to the effective date of this act expressly allows for a class action for the refund of a tax. However, the North Carolina courts have allowed civil actions brought under the former protest statute[76] to be certified as class actions. Effective January 1, 2008, a new statute governs the conditions under which a civil action may be initiated by a taxpayer for the refund of a tax based on the alleged unconstitutionality of a statute.[77] However, the statute is silent with regard to class actions. This section provides specific statutory authority for tax class actions, which may be brought only on the grounds of an alleged unconstitutional statute.

[76] G.S. 105-267.
[77] G.S. 105-241.17.

- **Bringing a Tax Class Action**. – A taxpayer who wishes to commence a class action challenging the constitutionality of a tax statute and who seeks to represent the class must meet certain requirements. First, the taxpayer must meet the same requirements that any other taxpayer is required to meet in order to bring a civil action. Those requirements are as follows:
    - The taxpayer must receive a final determination from the Department after a review and conference.
    - The taxpayer must commence a contested case at the Office of Administrative Hearings (OAH).
    - OAH subsequently dismissed the case for lack of jurisdiction because the sole issue in the case is the facial constitutionality of a statute.
    - The taxpayer has paid the tax, penalties, and interest due in the final determination.
    - The civil action is filed within two years of the dismissal from OAH.

  Second, the taxpayer must also comply with any requirements under Rule 23 of the North Carolina Rules of Civil Procedure. North Carolina courts have required compliance with Rule 23 in prior tax class actions, so the requirement is not new, but this section sets out the requirement explicitly in statute.

  Finally, this section adds a new requirement for bringing a tax class action. The taxpayer's claims must be typical of the claims of the class members in order for the taxpayer to serve as the class representative. This language mirrors language in Rule 23 of the Federal Rules of Civil Procedure. Whether a claim is 'typical' is an issue for the court to determine when approving the class representative.
- **Joining a Tax Class Action.** – In order to become a member of a tax class action, a taxpayer must be eligible and must affirmatively elect to participate as a member of the class.
    - <u>Eligibility.</u> – A taxpayer is eligible to become a member of the class if the taxpayer could have filed a claim for refund as of the date the class action was commenced or as of a subsequent date set by the court, whether or not the person actually filed a claim. For purposes of determining this eligibility, a class action 'commences' upon the later of the date a complaint is filed alleging the existence of a class or the date a complaint is amended to allege the existence of a class.
    - <u>Affirmative Election.</u> – An eligible taxpayer becomes a member of a class by affirmatively indicating a desire to be included in the class in response to a notice of the class action. A taxpayer who joins a class is not required to exhaust the administrative review process; only the class representative must do so.
- **Procedure. –** The procedure for notifying potential class members, the content of the notice, and the method by which potential class members indicate a desire to be included in the class in response to the notice must be approved by the court. This procedure may include ordering the Department of Revenue to provide the class representative with a list of names and last known addresses of all taxpayers who are readily determinable by the Department and are eligible to become a member of the class. The class representative must advance the costs of notification.

- **Statute of Limitations.** – The general statute of limitations for obtaining a refund of overpayment of tax is the later of three years after the due date of the return or two years after payment of the tax. Without a class action mechanism, each taxpayer seeking a refund of a tax paid under an alleged unconstitutional statute would have to file a claim for refund within the statute of limitations period and exhaust the administrative and judicial review process.

  One general principle of class actions is that the filing of a suit tolls the statute of limitations for all prospective class members until class certification is denied. If certification is denied, the limitations period begins to run again and plaintiffs may file their own individual claims. This same principle applies to tax class actions. The statute of limitations for filing a claim for refund on the grounds of an unconstitutional statute is tolled for a taxpayer who is eligible to become a member of a class action. The tolling begins on the date the class action is commenced. For a taxpayer who does not join the class, the tolling ends when the taxpayer does not affirmatively indicate a desire to be included in the class as provided by the court.

  For a taxpayer who does join the class, the tolling ends when the court enters any of the following:

  - A final order denying certification of the class.
  - A final order decertifying the class.
  - A final order dismissing the class action without an adjudication on the merits.
  - A final judgment on the merits.

- **Effect on Nonparticipating Taxpayers.** – Class actions are designed to adjudicate, in a single action, the claims of numerous parties with similar claims. One objective of a class action judgment is to prevent future litigation of claims that were, or could have been, litigated in the class action. Thus, the legal principles of 'claim preclusion' and 'issue preclusion' arise in the class action context. Claim preclusion means that a final judgment on the merits in a case is conclusive as to the rights of the parties to that case and bars them from bringing a subsequent action involving the same claim. In the class action context, the application of claim preclusion means that the judgment applies to the entire certified class. In certain instances, it can also bind nonparties. It does not, however, bar an individual who elects not to participate in the class action from bringing his or her own claim. Issue preclusion bars the same parties from relitigating in a subsequent action an issue that was litigated in a prior action. Courts have generally held that a successful defendant in a prior class action suit may not assert issue preclusion in a subsequent suit against a plaintiff who opted out of the earlier class action. Similarly, when a class prevails in an earlier action, an individual who opted out of that class who now chooses to bring his or her own individual claim against the same defendant may not assert issue preclusion in that case.

  This section provides that the principles of claim preclusion and issue preclusion apply to tax class actions in the same manner in which they apply to class actions generally. It further specifies that if a final judgment on the merits is entered in a class action in favor of the class, the following applies to an eligible taxpayer who did not become a member of the class:

- The taxpayer is not entitled to share in any monetary relief awarded to the class.
- If the taxpayer has been assessed for failure to pay the tax at issue in the class action and the taxpayer has not paid the assessment, then the assessment is abated.
- The taxpayer is relieved of any future liability for the tax that is the subject of the class action.

2008 BUDGET TECHNICAL CORRECTIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-118	**HB 2438**	**Rep. Michaux, Tolson, Yongue**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND OTHER MODIFICATIONS TO THE STATE BUDGET.

OVERVIEW: Section 3.10 of this act allows an annual sales and use tax refund for materials used to build a facility that manufactures solar electricity generating materials. The remainder of this act does not impact the tax laws and is not discussed below.

FISCAL IMPACT: This section is expected to reduce General Fund revenues by $348,813 in fiscal year 2010-2011.

EFFECTIVE DATE: Section 3.10 of this act became effective July 1, 2008, applies to purchases made on or after that date, and expires for purchases made on or after January 1, 2013.

ANALYSIS: Section 3.10 of this act adds 'solar electricity generating materials manufacturing' to the list of industries entitled to an annual refund of the sales and use tax paid by the owner of the industry on building materials and supplies, fixtures, and equipment used to construct a facility that will be used primarily to manufacture solar electricity generating materials. Solar electricity generating materials manufacturing is defined as the development and production of one or more of the following:

- Photovoltaic materials or modules used in producing electricity.
- Polymers or polymer film primarily intended for incorporation into photovoltaic materials or modules used in producing electricity.

The industries currently eligible for the refund include the following: air courier services; aircraft manufacturing; bioprocessing; computer manufacturing; financial services, securities operations, and related systems development; motor vehicle manufacturing; pharmaceutical and medicine manufacturing and distribution of pharmaceuticals and medicines; and semiconductor manufacturing.

Photovoltaics (PV) are solar cells made and composed of semiconductor materials that are used to convert sunlight directly into electricity. The current solar industry in the United States employs some 20,000 employees in high value, high tech jobs and is expected to grow toward a workforce of 150,000 by the year 2020.[78] DuPont is a materials and technology supplier to the PV industry.

[78] "Energy Alternatives and Jobs." 2000. Renewable Energy World, 3(6): November/December, pp. 26 32.

It offers products needed for PV module production, such as polymer films, resins, sheets, and conductive pastes. DuPont has one facility in Bladen County and another in Kentucky that produce polymers needed to manufacture polymer film. The company is looking to expand this industry. United Solar Ovonic is a company headquartered in Michigan that specializes in thin film solar technologies and the manufacture of thin film solar electric modules and laminates. It, too, is looking to expand its operations.

To be eligible for this refund, the Secretary of Commerce must certify that the owner of the facility will invest at least $50 million of private funds in the construction of the facility, if the facility is located in a development tier one area, and at least $100 million if the facility is located elsewhere in the State. In addition to the investment requirement, a solar electricity generating materials manufacturing business must also meet a wage standard in order to qualify for the sales tax refund. A business meets the wage standard if it pays the lesser of an average weekly wage that is equal to or greater than 110% of the average weekly wage for the State or the average weekly wage for the county.

If the owner does not make the required minimum investment within 5 years after the first refund is received, the owner forfeits all refunds already received. Upon forfeiture, the owner is liable for not only the tax due, but also interest computed from the date each refund was received. A person that fails to pay the tax and interest due within 30 days after the date of forfeiture is subject to the penalties provided in G.S. 105-236. A request for a refund must be in writing and must be submitted within six months after the end of the State's fiscal year. A refund applied for after the due date is barred. The refund provision expires for purchases made on or after January 1, 2013.

REV LAWS TECH., CLARIFYING, & ADMIN CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-134	**SB 1704**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE TAX AND RELATED LAWS.

OVERVIEW: This act makes technical, clarifying, and administrative changes to the revenue laws, the motor fuel tax laws, and related statutes, as recommended by the Revenue Laws Study Committee.

FISCAL IMPACT: No impact.

EFFECTIVE DATE: Except as otherwise provided, these changes became effective when the act was signed into law by the Governor on July 28, 2008.

ANALYSIS:

Part I: 911 Technical Changes

Section	Explanation

1.(a)	Allows the 911 Board to adjust allocations to ensure local governments receive, at a minimum, the same revenues the local government collected in 911 fees for the fiscal year ending June 30, 2007.
1.(b)	Changes from calendar year to fiscal year the time frame in which the Board can make changes in allocation percentages to conform to the Board's accounting practices.
1.(c)	Clarifies that the Eastern Band of the Cherokee Nation is an eligible PSAP and can receive disbursements from the 911 Fund, even though the Nation is exempt from Chapter 159, the Local Government Finance Act. Its per capita distribution amount will be based upon the most recent federal census estimates of the population living on the Qualla Boundary.
1.(d)	Extends the moratorium on the collection of the 911 fee from prepaid wireless providers from the 2008 calendar year to the first nine months of the 2009 calendar year.

Part II: Work Opportunity Tax Credit (WOTC) Changes

2.(a)	Clarifies that the WOTC is limited to 6% of the federal credit for wages paid in the same taxable year for positions located in North Carolina. Places a sunset on the credit effective for taxable years beginning on or after January 1, 2012. These changes are effective for taxable years beginning on or after January 1, 2008.
2.(b) &(c)	Clarifies that an employer cannot deduct the wages paid as a business expense from state taxable income if the employer takes the WOTC for those wages.

Part III: Reform Tax Appeal Changes

3	Conforms the due date of the franchise tax return and the corporate tax return. Section 10 of S.L. 2007-491 extended by one month the due date for filing a franchise tax return. Section 14 of that act made a corresponding change for corporate income tax returns. Since franchise tax and corporate income tax are reported on the same form, the effective dates must conform. However, the way the act was drafted, the one-month extension for franchise tax would occur in 2008 while the one-month extension for corporate income would take place in 2009. This section corrects the inconsistency by repealing Section 10, effective retroactively to January 1, 2008, and by reenacting the provision, effective January 1, 2009. With this change, the one-month extension will take effect for both taxes beginning in 2009. Inserts language inadvertently omitted in a rewrite of the franchise tax statute in 2007. Section 10 of S.L. 2007-491 rewrote for clarity the subsection imposing the franchise tax. The rewrite inadvertently omitted existing language requiring a corporation to determine its tax liability based on "the books and records of the corporation at the close of the income year." This section puts this language back in the statute.
4	Conforms the corporate tax return to the franchise tax return. S.L. 2007-491 added chief financial officers to the list of corporate officers authorized to sign franchise tax returns and deleted the secretary, the assistant secretary,

	and the assistant treasurer. However, similar changes were not made in the corresponding corporate income tax statute. Since the franchise tax return and the corporate income tax return are on the same form, the statutes need to match. This section makes that conforming change to the corporate tax statute.
5	Provides that a taxpayer may file a request for review of the Department of Revenue's proposed denial of a refund at any time by the date that inaction by the Department is considered a proposed denial of the refund but within 45 days of receiving actual notice of a proposed denial by the Department. This section addresses that concern, as recommended by the Department, and is effective for taxable years on or after January 1, 2008. Under the new administrative review process, the Department of Revenue is required to take action on a request for a refund within six months after the request has been filed. If the Department denies the request, it must send a notice to the taxpayer, and the taxpayer has 45 days to request a review of the proposed denial. However, if the Department fails to take any action within six months, the request is considered denied, and the taxpayer has 45 days from that point to request review. The purpose of this provision is to allow a taxpayer to move forward in the administrative review process despite inaction by the Department. However, concerns have been raised that the running of this 45-day period without actual notice from the Department may create a potential trap that bars taxpayers from appealing the denial.
6	Clarifies that the validity of a proposed denial of refund is not affected by the Department's failure to timely issue a notice of final determination. The Department must issue a final determination within nine months after the taxpayer requests a review of a proposed denial of a refund or a proposed assessment of tax. The relevant statute specifically provides that failure to timely issue a notice of final determination does not affect the validity of a proposed assessment but is silent as to the impact on a proposed denial of refund.
7	Replaces the word 'tax,' which is a defined term, with the word 'amount' for consistency. The purpose of this change is to clarify that if a taxpayer does not send in the amount shown due with a return, the Department can collect the principal amount of the tax, any applicable penalties, such as failure to pay, and interest.
8	Makes a conforming change in the motor fuel tax law regarding the new administrative review process.
9	Allows government agency lab reports to be admitted into evidence in a contested tax case hearing without requiring agency personnel testimony. S.L. 2007-491 made special provisions for contested tax cases heard at the Office of Administrative Hearings. Among them, a law enforcement report may be admitted into evidence without the testimony of personnel from the law enforcement agency. The Motor Fuels Tax Division of the Department requested a similar provision for government agency lab reports used in the enforcement of the motor fuel tax laws.

Part IV: Collection Changes

10	Adds partners and managers of a partnership (who may or may not be a partner) to the list of officers or, as rewritten, 'responsible persons' whom the Department may assess. The Department requested this change. This section also rewrites the section for clarity and style and places the statute in a more logical location within the Article. Individual officers and directors of a corporation are usually not liable for corporate debts or obligations. This is in contrast to partnership debts and liabilities, which are chargeable personally to the individual partners. However, by statute, a 'responsible officer' of a corporation or a limited liability company may be held personally liable for certain unpaid trust taxes owed by the business entity. These taxes include sales and use, motor fuels, and income withholding taxes. A 'responsible officer' is defined as the president, treasurer, and the CFO of a corporation, the manager of a LLC, and any other officer of a corporation or a member of a LLC who has a duty to pay taxes on behalf of the entity. The Department is authorized to enforce collection by proposing an assessment against the officer. Under prior law, there was no similar statutory authorization to assess partners for these taxes. Instead, the Department, like any other creditor of a partnership, would be required to sue in order to collect this liability. Once a judgment was obtained, the Department could seek to execute the judgment. This section became effective July 1, 2008, and applies to taxes that become collectible on or after that date.

Part V: Sales Tax Changes

11	Specifies how the tax on gross receipts from periodic payments made pursuant to agreements entered into before the effective date of the sales tax rate changes is to be reported. This section is a transitional provision for the 'Medicaid swap' enacted in the 2007 Session by S.L. 2007-323. Under the swap, the local sales and use tax rate decreases by ¼ cent in 2008-09 and again in 2009-10, and the State sales and use tax rate increases by the same amount. The combined State and local rates do not change; instead, the allocation of the combined rate between the State and the counties changes. Periodic payments consist of lease and rental payments and installment sale payments. Sales and use tax is due on lease and rental payments when the payments are billed. For installment sales, the tax application differs depending on whether the retailer reports on an accrual basis or a cash basis. A retailer on an accrual basis reports all the sales tax due on an installment sale when the sale is made. A retailer on a cash basis reports sales tax when each installment payment is received. This provision requires retailers who receive periodic payments from existing contracts to report them at the current State and local rates. This eliminates confusion about what to report and how to report it. Without this provision, a retailer who receives periodic payments will have receipts from

	existing contracts that are reportable at State and local rates that differ from the State and local rates that apply to periodic payments from new contracts.

Part VI: Occupancy Tax Changes

12.(a)	Provides that an interpretation by the Department of Revenue of a State sales tax law provision applies to a local law that references that provision. As the result of an independent audit by at least one county, questions arose among local governments and within the tourism industry regarding what constitutes 'gross receipts' for occupancy tax purposes. Most local occupancy tax acts state that a county or city may levy a room occupancy tax on "the gross receipts derived from the rental of any room…that is subject to sales tax imposed by the State under G.S. 105-164.4(a)(3)." Therefore, if an item of tangible personal property or a fee associated with the rental of an accommodation is subject to sales tax under G.S. 105-164.4(a)(3), then it is also subject to the local occupancy tax. While the Department can offer an interpretation of the State sales tax laws, it does not have statutory authority to offer an interpretation of the application of local occupancy tax laws, which it does not administer.
12.(b) & (c)	Provides that collectors of occupancy tax may allocate revenues for vacation packages that do not otherwise meet the definition of a bundled transaction. In January of 2008, the Department issued a technical bulletin related to the rentals of accommodations. In that bulletin, the Department clarified that the bundling provisions in G.S. 105-164.4D apply to vacation packages. For example, a vacation package may include lodging, meals, and greens fees for one price. The lodging is subject to sales and local occupancy tax, the meals are subject only to sales tax, and the greens fees are not subject to either sales or occupancy tax. The bundling provisions allow a hotel operator to allocate the revenues between taxable and exempt portions of the package. The allocation may be part of a hotel's internal records and is not required to appear on the customer's bill. A 'bundled transaction' is defined as a sale that includes at least one taxable item and at least one exempt item. Since the release of the bulletin, the tourism industry has sought clarification of whether the allocation rules apply to vacation packages consisting only of taxable items, since those packages do not otherwise meet the definition of a bundled transaction. The clarification is needed because although the entire vacation package may be subject to sales tax, not all items may be subject to occupancy tax. The collectors would like the ability to allocate those revenues.

Part VII: Medicaid Technical Changes

13	Ensures that counties spend as much on public school capital outlay as they would have in the absence of the Medicaid swap. Part of the swap changes the distribution of taxes imposed under Article 42 from a per capita basis to a point of collection basis. A county whose sales tax revenue decreases as a result of this conversion is required to continue to fund public school capital outlay at the amount that would be required in the absence of the conversion.

14	Makes two clarifying changes to the hold harmless calculation. The first is a technical change that describes the hold harmless calculation in a way that does not require a reference to local sales taxes on food. The change in the description does not change the amount of the hold harmless. The local sales taxes on food are administered as if they were State taxes and are included, in part, in the amount distributed under Article 40 but are not part of the amount allocated under G.S. 105-486. The second change eliminates a potentially circular calculation of the amount of local sales and use tax revenue to be distributed. It does not change the amount of any tax or hold harmless payment. The prior law could be construed to calculate the amount of various hold harmless payments on the basis of an amount that includes a deduction for the payment that is attempted to be calculated, which is circular. The hold harmless payments are now both pegged, in part, on amounts distributed under Article 39 of Chapter 105 of the General Statutes and deducted from those amounts. This section resolves the problem by making it clear that the hold harmless payments are calculated on the basis of amounts allocated for distribution before any subtraction for the hold harmless payments. References in Article 39 and Chapter 1096 of the 1967 Session Laws are replaced with a direction in G.S. 105-522(b) to deduct the city hold harmless payment from the amount of local sales and use tax revenue otherwise allocated under those provisions for distribution to a county. Subsection (a) adds an instruction in G.S. 105-522(b) to deduct the payment. Subsection (b) removes the instruction from Article 39 of Chapter 105. Subsection (c) removes the instruction from Chapter 1096.
15	Makes three changes to the hold harmless calculation. First, it inserts the city hold harmless amount into the calculation of the county hold harmless payment, thereby ensuring that the intent of the General Assembly is fulfilled. G.S. 105-523(a) states that each county is to benefit from the Medicaid swap by at least $500,000. The current calculation for determining a county's hold harmless payment, however, does not include the amount a county is required to give to its cities in order to hold them harmless from the repealed local sales taxes. Subsection (a) adds the cost of the city hold harmless to the calculation of the county hold harmless payment. Subsections (d) and (f) repeal changes to G.S. 105-523 that were to take effect in 2009, and subsection (h) reinserts those same changes into the amended G.S. 105-523 while preserving the amendments added by subsection (a) Second, it makes the same technical change to G.S. 105-523(b)(3) that Section 14 makes to G.S. 105-522(a)(2). The technical change describes the hold harmless calculation in a simpler way that does not require a reference to local sales taxes on food. The change in the description does not change the amount of the hold harmless. The local sales taxes on food are administered as if they were State taxes and are included, in part, in the

	amount distributed under Article 40 but are not part of the amount allocated under G.S. 105-486. Third, it changes the city hold harmless formula and the county hold harmless formula that apply to fiscal years beginning in 2009-2010 to match these formulas to the ones used in the tables that calculated the impact of the swap. The prior law incorrectly included a ¼% tax distributed on the basis of point of origin as one of the elements of the formulas. The Medicaid swap is based on the repeal of ½% local sales and use taxes distributed on a per capita basis and the conversion of a ¼% per capita tax to a ¼% point of origin tax. To reflect this, the reimbursement formula needed to be changed to delete the reference to a ¼% point of origin tax and replace it with a ¼% per capita tax. Subsections (c), (d), and (f) of this section repeal the provisions that contain the incorrect reference and subsections (g) and (h) insert the correct reference in the formulas. Subsections (b), (e), and (i) make conforming changes; they repeal sections that use terminology that does not match the revised reimbursement sections and replace them with a provision that uses terminology that is consistent with the revised sections.

Part VIII: Motor Fuel Tax Law Changes

The changes made by this part are effective January 1, 2009.

16	Makes clarifying and conforming changes and numbers the definitions sequentially. Adds definitions for terms used in the motor fuel tax statutes. Under IFTA, a 'qualified motor vehicle' is one used, designed, or maintained for transportation of persons or property that meets one or more of the following conditions: has two axles and a gross vehicle weight or registered gross vehicle weight exceeding 26,000 pounds; has three or more axles regardless of weight; or has a gross vehicle weight or registered gross vehicle weight exceeding 26,000 pounds when it is combined with another vehicle
17	Corrects a punctuation error.
18	Changes the statute to reflect current practice. Provides that the Department may include information received from the State Highway Patrol when determining the potential liability of a motor carrier. The SHP used to be located within the DMV. Incorporates defined terms.
19	Incorporates defined terms. Clarifies that recreational vehicles that are qualified motor vehicles under the IFTA would need to be registered. Also, the use of the defined term 'qualified motor vehicle' means that special mobile equipment would need to be registered. Although the law's definition of 'motor vehicle' arguably included special mobile equipment, the Department has not been requiring the registration of special mobile equipment. However, other IFTA states do require the registration of special mobile equipment.
20	Incorporates the commonly used term 'decal' for 'identification marker'.

21	Repeals an unnecessary statute. G.S. 105-252 and G.S. 105-254 give the Secretary the authority to prepare the appropriate forms and require the necessary information on those forms.
22	Incorporates the commonly used term 'decal' for 'identification marker'. Modernizes the language.
23	Incorporates the commonly used term 'decal' for 'identification marker'.
24	Revises the definitional statute to define commonly used terms, to incorporate definitions from other statutes, and to refer to federal regulations. It numbers the definitions sequentially.
25	Incorporates into the licensing statute the requirement that a for hire transporter have a license and specifies that a biodiesel provider is not required to have a separate license as a blender.
26	Makes conforming and grammatical changes. It removes definitions that have been incorporated into the definitional statute and it corrects the spelling of the term 'bulk end-user'.
27	Corrects the spelling of the term 'bulk end-user'.
28	Incorporates the defined term 'supplier'.
29	Incorporates the defined term 'in-State supplier'.
30	Provides that an importer's license must indicate the category of the importer, just like a supplier's license must indicate the category of the supplier.
31	Clarifies the payment responsibilities of all license holders.
32	Specifies when the tax is payable on fuel grade ethanol. Effective January 1, 2009, the tax is payable when it is removed from a terminal or is produced in the State or imported to the State and not delivered to a terminal. Under law, it is taxable when it is blended. Specifies that a tax is payable when motor fuel is transferred 'behind-the-rack' to a person who is not licensed as a supplier, as required by law.
33	Provides that the supplier who sold motor fuel to an unlicensed exporter is jointly and severally liable for the tax imposed on that fuel. The statute provides similar joint and several liability for motor fuel sold to an unlicensed distributor; for motor fuel sold by an unlicensed supplier; and for dyed diesel fuel.
34	Makes a conforming change to the change made in Section 32 concerning taxation of fuel grade ethanol.
35	Makes a conforming change to the change made in Section 32 concerning transfers to unlicensed persons.
36	Corrects a grammatical error.
37	Corrects the spelling of the term 'bulk end-user'.

38	Corrects the spelling of the term 'bulk end-user' and 'end-seller'.
39	Corrects the spelling of the term 'bulk end-user'. Prohibits a supplier from transferring motor fuel from a terminal to a marine vessel unless the person to whom the fuel is transferred is a licensed supplier.
40	Identifies the tax responsibility of purchasers to the supplier.
41	Removes the requirement to sort the fuel by type on the reporting form; the requirement is not longer necessary due to electronic filing. It provides the Department with the ability to sort.
42	Corrects the spelling of the term 'bulk end-user'.
43	Makes a conforming change to administrative practice. It provides that terminal operators who are required to be licensed in this State must report transactions from out-of-state terminals with this State as its destination. It also changes the structure of the statute for uniformity purposes.
44	Requires only motor fuel transporters who transport motor fuel for hire to file reports of fuel movements. This reverses a change made last year that required all distributors and others who transport motor fuel for themselves and not for hire to file the reports.
45	Changes the structure of the statute for uniformity purposes.
46	Changes the catchline of the statute to more accurately reflect the contents of the statute. It specifies that the refunds are monthly refunds; this change reflects current practice. It also provides that an out-of-state bulk end-user must be registered as an exporter if requesting a refund for exports from a North Carolina bulk plant.
47	Specifies that the refund is a monthly refund; this change reflects current practice.
48	Corrects the spelling of the term 'end-user'.
49	Deletes the provisions for refunds filed upon application because all refunds are filed on an annual basis, a quarterly basis, or a monthly basis.
50	Clarifies the content of the shipping document.
51	Makes a conforming change to administrative practice and terminology.
52	Uses the defined term 'person'; that term incorporates a distributor.
53	Corrects the spelling of the term 'bulk end-user'. Cross-references the definition of highway to the defined term in the definitional statute.
54-58	Corrects the spelling of the term 'bulk end-user'.
59	Cross-references the defined terms in the definitional statute and renumbers the subdivisions sequentially.
60	Makes a conforming change to add the defined terms of aviation gasoline and jet fuel to the statute that imposes the ¼-cent inspection tax and

	provides that the tax on these two types of fuel are payable as specified by the Secretary of Revenue.

Part IX: Combined Motor Vehicle and Property Tax Registration System

61	Repeals current statutory provisions on the required memorandum of understanding because they are recodified in G.S. 105-330.11 as enacted by § 64 of this act.
62	Clarifies that an application for property tax exemption or exclusion is not required for vehicles qualifying for an exemption or exclusion listed in G.S. 105-282.1(a)(1). This change prevents the need to apply for an exemption for government owned vehicles and vehicles listed as inventory.
63	Clarifies the statute. Directs the Treasurer to report to Revenue Laws annually instead of semiannually.
64	Recodifies the provisions on the memorandum of understanding required between the Departments of Revenue and Transportation with respect to implementation of the combined collection system for vehicle registrations and property taxes.
65, 66	Delays the effective date of the combined system from July 1, 2010, to July 1, 2011.

Part X: Other Changes

67	Removes a provision that refers to a repealed statute for subdivision.
68	Allows an unauthorized substance tax officer to testify in court concerning an offense committed against that individual in the course of administering the Article. Currently, information obtained under Article 2D (Unauthorized Substance Taxes) is confidential and may not be disclosed, unless the disclosure is made to exchange information with certain law enforcement agencies concerning a tax imposed by the Article. The information may also not be used in a criminal prosecution, other than for a prosecution for a violation of the Article or unless the information is independently obtained. The Department requested this change due to a specific incident involving an officer who was assaulted but was prohibited from testifying about the incident.
69	Corrects an incorrect citation.
70	Clarifies a reference to a 'year' in a tax credit statute is a reference to a 'taxable year.'
71	Codifies the long-standing practice of the Department that it is able to correct errors concerning a taxpayer's liability whenever they are brought to the Department's attention.
72	Makes a clarifying change to the property tax exemption for historic preservation property.
73	Repeals the North Carolina Rural Redevelopment Authority (NCRRA). The NCRRA is an inactive entity. It was created by S.L. 2000-148 but was never

	appointed or funded. Creation of the Authority was a recommendation of the 1999 North Carolina Rural Prosperity Task Force, which was established by Governor Jim Hunt and chaired by Erskine Bowles. As envisioned by the Task Force, the Authority would administer a revolving loan fund, the Rural Investment Fund, as well as an investment fund, the Long-Term Rural Development Fund. No money was ever appropriated to these funds. Subsection (a) repeals the statutes that create the Authority and set out its duties. Subsections (b) through (e) make conforming changes. Specifically, subsection (b) repeals the Authority's exemption from the general prohibition against a State agency competing with private enterprise. Subsection (c) deletes the Authority from the list of boards and commissions on which legislators may not serve. Subsection (d) repeals the Authority's exemption from the State Personnel Act. Subsection (e) changes a cross-reference to a definition of regional partnership that is now set out in a statute that is repealed in subsection (a); it replaces the cross-reference with the substance of the definition and updates the definition to reflect the accurate names of the regional economic development partnerships.
74	Clarifies that the ½% sales tax for transit purposes authorized for Mecklenburg County exempts purchases of food.
75	Corrects a statutory reference.
76	Provides for the proration of taxation when property in a county law enforcement service district is annexed by a municipality.
77	Corrects proper name of one of the regional partnerships.
78	Provides that information concerning tax credits may be provided to consultants for the Joint Select Committee on Economic Development Incentives to compile statistical data. The consultants are employees of the University of North Carolina at Chapel Hill and are subject to the same confidentiality requirements as an employee of the State of North Carolina.

TAX ON SHORT-TERM HEAVY EQUIPMENT RENTALS.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-144	**SB 1852**	**Senator Brunstetter**

AN ACT TO RESOLVE PROBLEMS WITH APPLYING PROPERTY TAX TO HEAVY EQUIPMENT RENTED ON A SHORT-TERM BASIS BY REPLACING THE PROPERTY TAX ON THIS EQUIPMENT WITH A TAX ON THE GROSS RECEIPTS FROM RENTING THE EQUIPMENT.

OVERVIEW: This act replaces the property tax on certain heavy equipment that is offered at retail for short-term lease[79] or rental with a local option gross receipts tax for certain heavy equipment that is offered at retail for short-term lease or rental.

FISCAL IMPACT: No General Fund impact. The act is revenue neutral for local governments overall, however, individual jurisdictions will experience changes in revenue depending on where sales occur.

EFFECTIVE DATE: The property tax exemption for heavy equipment becomes effective for taxes imposed for taxable years beginning January 1, 2009. A local option gross receipts tax on heavy equipment may not become effective before January 1, 2009.

ANALYSIS: This act excludes from property tax certain heavy equipment that is offered at retail for short-term lease or rental, if the heavy equipment is leased or rented by a person whose principal business is the short-term lease or rental of heavy equipment, effective for taxes imposed for taxable years beginning on or after January 1, 2009. It replaces the property tax on heavy equipment with a local option gross receipts tax. A local option tax may not become effective before January 1, 2009. The act clarifies that short-term heavy equipment is exempt from property tax regardless of whether a county or city imposes a gross receipts tax. In recent years, several owners of heavy equipment rental businesses expressed concerns about the unfairness and administrative inconsistencies of levying and collecting property tax on this equipment.

The local option tax applies to the gross receipts derived from the short-term rental or lease of earthmoving, construction, or industrial equipment that is mobile, weighs at least 1,500 pounds, and meets one or more of the following requirements:

- It is a self-propelled vehicle that is not designed to be driven on a highway.
- It is industrial lift equipment, industrial material handling equipment, industrial electrical generation equipment, or similar piece of industrial equipment.

The gross receipts tax rate that may be imposed by counties is 1.2% and the rate that may be imposed by cities is 0.8% for a combined rate of 2.0% if the heavy equipment rental business is located in a city. The gross receipts are subject to the local tax only if they are subject to the sales tax.

The gross receipts tax is paid quarterly and is due on the last day of the month following the end of the quarter. The tax is sourced based on the place from which the equipment is delivered and is intended to be added to the amount charged for the rental and paid to the heavy equipment business by the lessee.

The Department of Revenue is authorized to disclose otherwise confidential taxpayer information to counties and cities when it relates to the administration of the heavy equipment rental tax.

PROPERTY TAX MODIFICATIONS.

Session Law	*Bill #*	*Sponsor*

[79] A short-term lease is a lease or rental for a period of less than 365 days. (G.S. 105-187.1). Under current law, a long-term lease agreement generally requires the lessee to list and pay the property taxes due on the heavy equipment.

S.L. 2008-146, as amended by S.L. 2008-187[80] | SB 1878 | Senator Clodfelter

AN ACT TO MODIFY THE SCHEDULE FOR GENERAL REAPPRAISALS OF REAL PROPERTY IN THE STATE TO REDUCE THE DISCREPANCY BETWEEN THE PROPERTY TAX VALUE OF PROPERTY AND ITS MARKET VALUE, TO MODIFY THE OWNERSHIP REQUIREMENTS OF PRESENT-USE VALUE PROPERTY TO REFLECT COMMON FORMS OF LAND OWNERSHIP, TO ALLOW PROPERTY TO REMAIN IN PRESENT-USE VALUE WHEN THE DEFERRED TAXES ARE PAID AT THE TIME OF TRANSFER AND THE NEW OWNER CONTINUES TO FARM THE PROPERTY, TO CLASSIFY LOW-INCOME HOUSING PROPERTY, TO EXCLUDE FROM PROPERTY TAX PRESCRIPTION DRUGS GIVEN AS FREE SAMPLES, TO EXCLUDE FROM PROPERTY TAX EIGHTY PERCENT OF THE APPRAISED VALUE OF A SOLAR ELECTRIC SYSTEM, AND TO DIRECT THE REVENUE LAWS STUDY COMMITTEE TO STUDY THE EFFECT THAT THIS ACT HAS ON STAFFING NEEDS OF THE DEPARTMENT OF REVENUE AND THE DEFINITION OF INCOME AS IT APPLIES TO THE HOMESTEAD EXCLUSION.

OVERVIEW: This act makes the following changes to the property tax laws:

- Part I of the act retains the octennial schedule for reappraisal of real property but requires counties with a population of 75,000 or greater to advance the general reappraisal if the sales assessment ratio for the county drops below .85 or becomes greater than 1.15.[81] This part becomes effective July 1, 2009.
- Part II of the act modifies the present-use value ownership requirements to reflect modern estate planning and allows property to remain in present-use value when deferred taxes are paid at the time of transfer and the new owner continues to farm the land and files an application for present-use value status. This part is effective for taxable years beginning on or after July 1, 2008.
- Part III of the act classifies qualified North Carolina low-income housing developments as a special class of property and requires valuation of the property to be based on the

[80] Section 47.6 of S.L. 2008-187, the 2008 technical corrections bill, eliminates a codification conflict created in House Bill 1889 and Senate Bill 1878.

[81] The Senate version of SB 1878 required counties to advance the general reappraisal if the sales assessment ratio for the county dropped below .90 for the previous year. The House version required counties to advance the general reappraisal if the sales assessment ratio for the county dropped below .70 or became greater than 1.10 for the previous year. The conference report required the advanced general reappraisal only for a county whose population is 75,000 or greater and when the county's sales assessment ratio dropped below .85 or became greater than 1.15.

actual (rent-restricted) income. This part is effective for taxes imposed for taxable years beginning on or after July 1, 2009.

- Part IV of the act exempts from property tax free samples of prescription drugs given to physicians and other medical practitioners to dispense free of charge in the course of their practice. This part is effective for taxable years beginning on or after July 1, 2008.
- Part V of the act excludes 80% of the appraised value of a solar energy electric system from property tax. This part of the act is effective for taxable years beginning on or after July 1, 2008.
- Part VI of the act directs the Revenue Laws Study Committee to study the following: whether the Department of Revenue needs positions to perform sales assessment ratio studies in additional counties and other functions related to the act, and the definition of income as it applies to the homestead exclusion. This part became effective when the act was signed into law by the Governor on August 2, 2008.

FISCAL IMPACT: There is minimal impact on local government revenue associated with the changes to the reappraisal schedule, the PUV ownership requirements, the property tax exemption for sample prescription drugs, and the partial property tax exclusion for solar energy electric systems. The valuation change for low-income housing is estimated to reduce local government revenues by $21 million. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2008 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: See **OVERVIEW.**

ANALYSIS: The act makes the following changes to the property tax laws:

Part I: Reappraisal Schedule

Counties are required to reappraise real property at least once every eight years. The law allows counties to advance the octennial schedule by adopting a shorter cycle, such as every four or six years. Each year, the Department of Revenue studies property values in every county and compares the value of the parcels as a function of their sales price with the value of the parcels as indicated by their assessed tax value. The Department notifies each county of the resulting sales assessment ratio on April 15 of the year following the study.

The act requires a county with a population of 75,000 or greater to advance its octennial reappraisal schedule if its sales assessment ratio drops below .85 or becomes greater than 1.15 in the previous year.[82] This change would occur when the assessed value differs from the sales price of the property by more than 15%. A county required to conduct a new reappraisal under this act must implement the new values by January 1 of the third year following the year the notification of the triggering sales assessment ratio was made. The act retains the octennial reappraisal schedule for all other counties. This part of the act becomes effective July 1, 2009, and applies to notices sent on or after that date.

---

[82] According to the most recent annual population estimates as certified by the State Budget Officer, each of the following counties has a population of 75,000 or greater: Alamance, Brunswick, Buncombe, Burke, Cabarrus, Caldwell, Catawba, Cleveland, Craven, Cumberland, Davidson, Durham, Forsyth, Gaston, Guilford, Harnett, Henderson, Iredell, Johnston, Mecklenburg, Moore, Nash, New Hanover, Onslow, Orange, Pitt, Randolph, Robeson, Rockingham, Rowan, Union, Wake, Wayne, and Wilson.

The genesis for this Part came from a recommendation of the Revenue Law Study Committee. The act directs the Revenue Laws Study Committee to study the effect of the changes to the reappraisal schedules in this Part. Its study of the issue should consider whether new positions within the Department of Revenue are needed to perform sales assessment ratio studies in additional counties each year. This directive to the Committee was prompted by concerns raised by some of the smaller counties regarding whether they could handle the expense of more frequent reappraisals.

Part II: Present-Use Value Property Changes

Part II of the act makes changes to the present-use value (PUV) program, as recommended by the Revenue Laws Study Committee. These recommendations were proposed to the Committee by representatives of county tax assessors, the North Carolina Association of County Commissioners, the UNC School of Government, the North Carolina Farm Bureau, and the Department of Revenue. The changes are effective for taxes imposed for taxable years beginning on or after July 1, 2008.

The General Assembly created the PUV program in 1973. The program provides that farmland meeting certain ownership, size, and use requirements will be provided special property tax treatment.[83] The land is appraised and taxed at its PUV as opposed to its fair market value.[84] The difference between the taxes due on the PUV and taxes that would have been payable in the absence of the special tax treatment is known as 'deferred taxes'. When the land no longer qualifies for PUV treatment, the taxpayer is liable for the property taxes due in the year of disqualification plus the deferred taxes for the three previous years, with interest.[85]

In recent years, taxpayers as well as county tax assessors have voiced concerns about the complexities of the ownership requirements, and taxpayers have raised concerns about the perceived unfairness of these requirements. For example, qualifying land had to be individually owned, which meant that the land could be owned by a natural person, a business entity, a tenancy in common, a trust or a testamentary trust. If the land was owned a business entity or trust, all members of the business entity had to be natural persons, and beneficiaries of a trust had to be

---

[83] The farmland must be used for agricultural, horticultural, or forest purposes and be engaged in commercial production under a sound management program. Agricultural and horticultural land are also required to have one tract that produces at least $1,000 average gross income for the three years preceding the year the tax benefit is claimed. During the 2007 Session, the agricultural land classification was amended to include agricultural land used as an aquatic species farm, effective in the 2008-2009 tax year. During the 2008 Session, the PUV statutes were amended to allow property appraised at PUV and subject to a conservation easement to continue to qualify for use value appraisal if the taxpayer received no more than 75% of the fair market value of the donated property as compensation. Also wildlife conservation land was designated a special class of property for property tax purposes and authorized to be appraised and taxed as if it were classified as agricultural land under the PUV system. See S.L. 2008-171

[84] PUV is usually much less than market value.

[85] No deferred taxes are due if the property loses its classification for one of the following purposes: (1) the land is enrolled in the federal Conservation Reserve Program and is no longer in production and therefore does not meet the income requirement, (2) the land is conveyed by gift to certain exempt organizations and governmental entities. This applies to conveyances by gift to nonprofit organizations where the property will qualify for exclusion from the tax base because it is real property that will be exclusively used for educational and scientific purposes as a protected natural area, or where the property will be exclusively used for nonprofit historic preservation purposes, or (3) the property is conveyed by gift to the State, political subdivisions of the State, or the United States.

natural persons. If the land was owned by tenants in common, then a tenant in common could be a natural person or a business entity but not a trust. These restrictions did not allow for the use of modern estate planning vehicles such as a family limited partnership or family limited liability company. There was also no rationale for excluding certain trusts as a tenant in common.

The act addresses some of these concerns by changing the definition of 'individually owned' as follows:

- The awkward reference to 'owned by a natural person' is changed to 'owned by an individual'.
- Members of a business entity are no longer restricted to individuals and now include trusts and other business entities. A qualified business entity, however, may not be a corporation whose shares are publicly traded and none of its members may be corporations whose shares are publicly traded. When the membership of a business entity includes a business entity or a trust, then all members of the business entity and all beneficiaries of the trust must be individuals. These individuals are deemed to be indirect members of the qualified business entity.[86] The law continues to require the principal business of the business entity to be in agriculture, horticulture, or forestry, and each member must be actively engaged in one of these activities or related to a member who is actively engaged in one of these activities. Also, if the land is leased, all members of the business entity must be individuals and relatives.
- Beneficiaries of a trust may be a business entity as long as the members of the business entity are individuals who either created the trust or who are relatives of the creator. These individuals are deemed to be indirect beneficiaries.
- A tenant in common may include a trust in addition to an individual and business entity.

The following are examples of land that now qualify for PUV under the act, but would not have qualified under the prior law:

- A corporation applies for PUV. Four shareholders of the corporation are individuals who are actively engaged in farming the land and one shareholder is an LLC. The members of the LLC are all relatives of one of the individual shareholders. Under prior law, the corporation would not qualify because it has an LLC as a member.
- A tenancy in common applies for PUV, and one of the tenants is a trust. Under prior law, the property would not qualify because all tenants were required to be individuals or business entities.
- An LLC applies for PUV, and one of the members of the LLC is a trust. All beneficiaries of the trust are children of the individual members of the LLC that owns

[86] The indirect ownership determination does not stop at the first tier of the business entity that owns farmland. For example, if a business entity has as one of its members an LLC and one of the members of the LLC is another LLC, then the indirect ownership will apply to any member of the second LLC if the member is an individual who is actively engaged in farming the land or a relative of an individual who is actively engaged in farming the land.

the land. Under prior law, the LLC would not qualify because the trust was not an individual.

There has been a long-standing exception to the standard ownership requirement that a person must own the land for four years. Under the exception, land may continue to be appraised at its PUV value when it is transferred to a new owner and the new owner (i) continues to use the land for its current PUV classification, (ii) files an application for PUV, and (iii) assumes the deferred taxes. This exception has been interpreted not to apply when the seller pays more than the current year's taxes at the time of transfer. In this situation, the seller is deemed to have voluntarily removed the property from the PUV program, and the new owner may have to wait four years to qualify for PUV. The act allows the land to remain in PUV when the deferred taxes are paid at the time of transfer. The new owner will become liable for subsequent deferred taxes when the land no longer qualifies for the PUV program. [87]

Part III: Low-Income Housing Property

Part III of the act provides an additional property tax incentive for owners of low-income housing developments to which the North Carolina Housing Finance Agency has allocated a federal tax credit, effective for taxes imposed for taxable years beginning on or after July 1, 2009. Under prior law, an assessor appraised low-income qualified property using one of the following three generally accepted methods of appraisal:

- Cost approach - estimates property value by summing the land value and the depreciated value of any improvements.
- Income approach - estimates value by capitalizing an income stream into present value through the use of capitalization rates of the net operating income[88] which is usually by dividing the annual NOI by the capitalization rate.
- Sales comparison approach – estimates value by comparing a property's characteristics with those of comparable properties which have recently sold in similar transactions.

The act requires the assessor to use the income approach to determine the tax value of property allocated housing tax credits. The tax assessor must take into account any applicable rent restrictions and may not include tax credits as income of the property if those credits result from section 42 of the Internal Revenue Code or G.S. 105-129.42. In so doing, the property value determination is constrained solely to the use of the actual rental income as opposed to what a similarly situated property would be able to generate in rental income if the property were not subject to rent restrictions.

In 1986, Congress enacted the federal Low Income Housing Tax Credit to fund housing for low- and moderate-income households. Each state receives a limited amount of credit each year. The Internal Revenue Service (IRS) allocates the per capita low-income housing tax credit to state housing agencies such as the North Carolina Housing Financing Agency (HFA), which in turn allocate the credit to project developers who agree to lower project rents for low-income tenants. In 1999, North Carolina authorized a State income tax credit modeled after the federal housing credit. The State credit permits a taxpayer to receive the credit in the form of either (i) a credit

---

[87] See Section 2.2 of S.L. 2008-35.

[88] The capitalization rate is a measure of the ratio between the cash flow produced by an asset and either the price paid for the asset or its current market value. The Net Operating Income (NOI) equals gross potential income minus vacancy minus operating expenses (excluding debt service or depreciation charges).

against tax liability or (ii) a loan generated by transferring the credit to the HFA in return for a 0% interest 30-year balloon loan equal to the credit amount.[89] Neither a tax refund generated by the credit, nor a loan received as a result of the transfer of the credit is considered taxable income by the State.

Part IV: Prescription Drugs Given as Free Samples

Part IV of the act exempts from property tax free samples of drugs that are required by federal law to be dispensed only on prescription and are given to physicians and other medical practitioners to dispense free of charge in the course of their practice, effective for taxable years beginning on or after July 1, 2008. Under prior law, drug samples in doctors' offices were treated as business personal property or supplies and subject to property tax. These drug samples do not come under the definition of inventory, which is exempt from property tax, because they are not goods held for sale in the regular course of business.

Part V: Solar Energy Electric Systems

Part V of the act exempts 80% of the appraised value of a solar energy electric system from property tax, effective for taxable years beginning on or after July 1, 2008. A solar energy electric system converts solar energy into electricity.[90] Currently, there are no solar energy electric systems being taxed. However, there are plans to construct a massive solar power plant in Davidson County which is expected to provide enough power for 2,600 homes. Also, two systems were built this year in Asheboro and Raleigh.

North Carolina provides other tax incentives for solar energy. G.S. 105-277(g) designates buildings equipped with solar energy heating and cooling systems as a special class of property and, for property tax purposes, assesses the buildings as if they are equipped with a conventional heating or cooling system rather than assign an additional value for the difference in cost between the solar energy or cooling system and a conventional system typically found in the county.[91] G.S. 105-129.16A and G.S. 105-129.16H provide an income tax credit for investing in renewable energy property, which would include a solar energy electric system. The credit is equal to 35% of the cost of the property placed in service. For non-residential property the maximum credit is $2.5 million per installation.

ECONOMIC DEVELOPMENT MODIFICATIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-147	**SB 2075**	**Senator Berger of Franklin**

AN ACT TO CLARIFY QUALIFICATIONS FOR THE EXCEPTION FOR MULTIJURISDICTIONAL INDUSTRIAL PARKS TIER DESIGNATION AND TO PROVIDE FOR A TEMPORARY INCREASE

[89] Owners of all but one of the 51 rental developments awarded federal credits in 2003 elected to use the State credit as part of their funding. All 50 project developers chose the loan option.
[90] S.L. 2007-307 requires utilities to provide a designated amount or percentage of power from renewable energy resources as a portion of their overall provision of electricity.
[91] This classification does not include solar energy electric systems.

IN THE CAP ON AMOUNTS COMMITTED UNDER THE JOB DEVELOPMENT INVESTMENT GRANT PROGRAM.

OVERVIEW: This act clarifies that the sale of parcels of land from a multijurisdictional industrial park (MIP) for industrial or commercial purposes does not change the original tier status of the MIP or the availability of the incentives to successive purchasers based on its original tier status. It also increases the cap on amounts committed under the Job Development Investment Grant Program (JDIG).

FISCAL IMPACT: The total maximum cost of increasing the JDIG cap will be $120 million, or $10 million per year for the next 12 years. This estimate assumes that the maximum amount of total annual liability is awarded.

EFFECTIVE DATE: This act became effective when signed by the Governor on August 2, 2008.

ANALYSIS: Any two or more units of local government may enter into contracts or agreements to jointly undertake the development of an industrial or commercial park or site. The lowest development tier incentive status is granted to the entire MIP, regardless of the tier designation of each individual county, if certain criteria are met. One of the criteria is that there be 250 developable acres in each county where the park is located. As a county sells property in the MIP to businesses to carry out the purposes of the MIP, a county may not be able to meet the prerequisite number of acres it must own in the MIP. This act clarifies that the sale of parcels of land from a MIP for industrial or commercial purposes does not change the original tier status of the MIP or availability of the incentives to successive purchasers based on its original tier status.

The act also temporarily raises the maximum amount of total annual liability for grants for agreements entered into in calendar year 2008 under the Job Development Investment Grant Program from fifteen million dollars ($15,000,000) to twenty-five million dollars ($25,000,000).

SUPPLEMENTAL PEG SUPPORT.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-148	**SB 1716**	**Senator Clodfelter**

AN ACT TO CLARIFY THE DISTRIBUTION OF SUPPLEMENTAL PEG SUPPORT FUNDING AND TO CLARIFY THAT THE SERVICE AREA OF A CITY INCLUDES ANY AREA SUBSEQUENTLY ANNEXED BY THAT CITY.

OVERVIEW: This act does the following:

- It clarifies the distribution of supplemental PEG channel support funding. This part of the act was a recommendation of the Revenue Laws Study Committee, the League of Municipalities, and the Southeast Association of Telecommunications Officers and Advisors.
- It amends the video franchising statutes to clarify that, if the stated boundary of a cable service district is the boundaries of a city, the service area includes any subsequent annexations by the city.

<u>FISCAL IMPACT:</u> This act is expected to have no fiscal impact on General Fund revenues.

<u>EFFECTIVE DATE:</u> This act became effective when the Governor signed it into law on August 2, 2008, and affects distributions made in fiscal year 2008-2009.

<u>ANALYSIS:</u> In 2006, the General Assembly established uniform taxes for video programming services by applying the combined general rate of sales tax to all video programming services and by repealing the authority local governments had to impose a local franchise tax. It preserved the local government revenue stream by distributing part of the sales tax revenues from telecommunications and video programming services to the counties and cities, based on the amount of cable franchise tax imposed during the first six months of fiscal year 2006-2007 plus any subscriber fees imposed during that same period.[92]

Of the revenue distributable to local governments, $2 million a year is allocated for supplemental PEG channel support. A PEG channel is a public, educational, or governmental access channel provided to a county or city. The $2 million allocation is distributed to counties and cities with qualifying PEG channels. The annual amount per qualifying PEG channel is $25,000. A county or city may not receive supplemental PEG channel support for more than three PEG channels. The amount distributed to a county or city as supplemental PEG channel support must be used by it for the operation and support of PEG channels. If the total amount distributed for qualifying PEG channels in a fiscal year is less than $2 million, the Secretary must credit the excess amount to the PEG Channel Fund to be used for matching local grants for PEG channel support.

When the General Assembly considered the legislation in 2006, the available data indicated there would be 36 qualifying PEG channels. For the March 2008 distribution, the Department of Revenue received PEG channel certifications for 276 channels. Some of the discrepancy is believed to be due to confusion on the form used by the Department which may have resulted in some channels being double counted or receiving a distribution when they did not qualify.

The act clarifies the distribution requirements, reduces the number of channels receiving the distribution, and provides that all qualifying PEG channels receive supplemental PEG support funding. The act defines in the distribution statute what constitutes a 'qualifying PEG channel' (a channel with character generated programming that does not exceed 15% of eight hours of scheduled programming and is operated for at least 90 days during the year). A county or city must certify all qualifying PEG channels and allocate the proceeds it receives equally among all of its certified PEG channels. A distribution must be made to the PEG channel within 30 days of the county or city's receipt of the supplemental PEG support revenue. This modifies the prior law, in which a county or city could only receive supplemental funding for three PEG channels. These changes address the concerns of some qualifying PEG channels regarding whether supplemental funding is being distributed fairly among the channels by ensuring (i) that each qualifying PEG channel receives supplemental funding, even if a county or city has more than three qualifying channels; (ii) that each qualifying PEG channel receives an equal amount of funding; and (iii) that each qualifying PEG channel receives the funding in a timely manner.

The act also defines a PEG channel operator, requires a county or city to include the name of the PEG channel operator for each qualifying PEG channel it certifies, and requires the county or city to distribute the proceeds to the PEG channel operator. This change better ensures that the money

---

[92] The purpose of using the 'first six months of fiscal year 2006-2007' was to capture the most recent local franchise tax rates imposed on cable companies and the most recent subscriber fees imposed on consumers of cable service.

is distributed by the local government for the use of the PEG channels. In addition, where a single PEG channel has more than one operator or the PEG channel is claimed by more than one local government, the change ensures that the funds go to the operator of the PEG channel. It limits a PEG channel operator from being included in multiple certifications for the same PEG channel, which should reduce the number of qualifying PEG channels by eliminating much of the double counting that currently occurs. The act also provides a method to account for revenues that are distributed in error by requiring any county or city that received a distribution in error to submit a revised certification and return all funds received in error. Such funds are added to the amount to be distributed in the following year as supplemental PEG support funding.

Finally, the act allows the Secretary of Revenue to request additional information and extends from July 15, 2008, to September 15, 2008, the period of time a county and city has to make its certification in 2008. The act permits the Department to make the distribution of supplemental PEG channel support for the quarter ending June 30, 2008, based upon the qualifying PEG channel certifications in effect for fiscal year 2007-2008 distributions.

The Senate added a provision to the enacted legislation to address an issue with the video franchising statutes. The act amends the video franchising statutes to clarify that, if the stated boundary of a cable service district is the boundaries of a city, the service area includes any subsequent annexations by the city. Prior law was interpreted as requiring a new notice of franchise to be filed for the newly annexed area. The act requires a new filing only if the original notice of franchise stated that the boundaries of the service area were the boundaries of the city, as those boundaries existed on a day certain.

SALES TAX REFUND FOR CERTAIN NONPROFITS.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-154	**HB 2509**	**Representative Gibson**

AN ACT TO AUTHORIZE A SEMIANNUAL SALES AND USE TAX REFUND TO A NONPROFIT ORGANIZATION THAT PROCURES, DESIGNS, CONSTRUCTS, OR PROVIDES FACILITIES TO A CONSTITUENT INSTITUTION OF THE UNIVERSITY OF NORTH CAROLINA.

OVERVIEW: This act allows a semi-annual refund of sales and use taxes paid by a nonprofit organization that procures, designs, constructs, or provides facilities to a constituent institution of The University of North Carolina.

FISCAL IMPACT: The act is estimated to reduce General Fund revenues by more than $1.5 million in fiscal year 2008-2009 and by approximately $450,000 in each year thereafter. The act will also reduce local revenues by $810,000 in fiscal year 2008-2009 and by approximately $190,000 each year thereafter. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2008 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act is effective retroactively to January 1, 2004, and applies to purchases made on or after that date. A refund claim for the period January 1, 2004 through

December 31, 2007, will be considered timely filed if it is submitted to the Department of Revenue by October 15, 2008.

ANALYSIS: Direct purchases by a State agency, which by definition includes The University of North Carolina, may be exempt from State and local sales and use tax.[93] A State agency may also receive a quarterly refund of local sales and use taxes paid by it indirectly on building materials, supplies, fixtures, and equipment that become part of a facility owned or leased by the agency.[94] This act provides similar sales and use tax treatment to a nonprofit entity that procures, designs, constructs, or provides facilities to a constituent institution of The University of North Carolina[95] by expanding the list of nonprofit organizations allowed a semi-annual refund of sales and use tax to include this type of nonprofit organization. The act specifically allows the refund to an entity exempt from taxation as a disregarded entity of such a nonprofit organization.

The act provides a refund to a type of nonprofit entity that was denied a sales tax refund from the Department of Revenue in 2004 on the grounds that the nonprofit organization did not qualify as one of the statutorily eligible entities.[96] One such entity, Affinity Housing LLC, filed a lawsuit against the Department challenging the Department's denial of its refund claim. Affinity Housing LLC is a single-member LLC of Western Carolina University Research and Development Corporation, a section 501(c)(3) nonprofit entity formed to aid and promote the educational and charitable purposes of Western Carolina University. Affinity Housing LLC constructs housing facilities for WCU. The act makes the application of the change retroactive to January 1, 2004, and applicable to purchases made on or after that date. This time period will allow Affinity Housing LLC to receive the refund it originally sought.

Constituent institutions of The University of North Carolina have begun to use nonprofit organizations to procure, design, and construct facilities, such as student housing and dining facilities, on their behalf. An institution leases property to a nonprofit organization and the nonprofit organization constructs the facility on the property. The institution leases the facility from the nonprofit and usually operates and manages the facility. The lease payments made by the institution, recouped through rents charged to students, enable the nonprofit to pay the indebtedness on the facility. At the conclusion of the lease and the retirement of the debt, the ownership of the facility lies with the institution. The General Assembly recognized the trend in 2004 when it expanded the property tax exemption for educational property[97] by exempting property held by a nonprofit entity for the sole benefit of a university located in the State and by expanding the definition of educational purposes to include the operation of a student housing facility or a student dining facility.[98]

The above process has continued to evolve. The institutions have found that privatized facility projects cost less to construct and are completed sooner than traditional facility projects, primarily because the projects are not subject to the State's bidding laws and construction process. At its

[93] G.S. 105-164.13(52).

[94] G.S. 105-164.14(e).

[95] A constituent institution would include the universities as well as the North Carolina School of the Arts and the North Carolina School of Science and Mathematics. See G.S. 116-4.

[96] See analysis of Section 28.22 of S.L. 2008-107. It specifies the type of nonprofit entities entitled to a sales and use tax refund. The nonprofit entity described in this act does not meet the criteria developed by that act.

[97] G.S. 105-278.4

[98] S.L. 2004-173

inception, some of the financing was private financing. Increasingly, the financing is secured through self-liquidating revenue bonds. Today, most of these projects are included in the bond projects submitted to the General Assembly for its approval by The University of North Carolina. The Treasurer's Office exercises oversight of the lease agreements between the institutions and the nonprofit entities.

RESALE OF TICKETS VIA INTERNET.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-158	**SB 1407**	**Senator Hartsell**

AN ACT TO PROTECT CUSTOMERS WHEN PURCHASING TICKETS VIA THE INTERNET AND TO PROHIBIT THE USE OF SOFTWARE TO UNFAIRLY PURCHASE TICKETS OVER THE INTERNET.

OVERVIEW: The act allows the Internet resale of admission tickets in excess of the price printed on the ticket unless the venue where the event occurs prohibits resale, and it prohibits the use of software to unfairly purchase tickets.

FISCAL IMPACT: No fiscal impact estimate is available at this time.

EFFECTIVE DATE: The act became effective when signed into law by the Governor on August 3, 2008, and expires June 30, 2009. Liability and duty to report are not affected by the expiration date of the act.

ANALYSIS: Under current law, it is a Class 2 misdemeanor for a seller or reseller of an admission ticket to charge more than "…the combined face value of the ticket, tax,[99] and the authorized service fee.[100] Because reselling tickets online is a new and growing business, the act provides an exception to the prohibition against admission tickets being resold on the Internet at a price greater than the price printed on the face of the ticket.

The act includes a number of provisions designed to protect the customer and the venue. First, the act makes it an unfair and deceptive trade practice for a person to knowingly sell, give, transfer, use, distribute, or possess software that is primarily designed or produced for the purpose of interfering with the operation of a ticket seller who, pursuant to a written agreement with the venue, sells admission tickets over the Internet. A ticket seller, as well as the venue, has standing to bring a private right of action under the Unfair and Deceptive Trade Practice Act. Under G.S. 75-1.1, each individual violation of the statute constitutes a separate violation. If a person is found to have violated the statute, the aggrieved person is entitled to treble the amount of damages fixed by the verdict. The act requires a person who resells admission tickets to report to the Department of Revenue by the 10th day after the end of each month on the gross receipts received during the previous month from reselling admission tickets for events in the State. The report must include the total amount of gross receipts derived from resell activity (minus the face value on the tickets), the event and venue for which each ticket was sold, the entity from which the reseller purchased

---

[99] The tax on the sale of admission prices for entertainment events is a gross receipts tax of 3%. See G.S. 105-37.1.

[100] The service fee is limited to no more than $3.00 unless the promoter of the event and the ticket sales agency, in writing, agree to and make known to the public a different amount.

each ticket, the amount the reseller paid for each ticket, the price received by the reseller for each ticket, the name and address of reseller-purchasers of each ticket, and any other information required by the Department.

In addition, the act requires a person who resells admission tickets online to provide a ticket guarantee that must be conspicuously displayed on the person's Website and to direct a prospective purchaser to the ticket guarantee before completion of a resale transaction. Additionally, the ticket guarantee must provide a purchaser with a full refund of the amount paid for the ticket if the event is cancelled, the purchaser is denied admission through no fault of the purchaser, or the ticket is not delivered to the purchaser and the failure to receive the ticket results in the purchaser's inability to attend the event. A person may withhold handling and delivery fees from a refunded amount if the Website informs the purchaser of this policy. Finally, a venue may prohibit a person from reselling tickets to an event it sponsors if it files a notice of prohibition with the Secretary of State and posts the notice on its Website and on the Website of the primary ticket seller. A prohibition may not become valid until 30 days after the notice is posted on the Website. The prohibition expires on December 31 of each year unless the venue renews its prohibition.

The bill, as originally introduced in the Senate, provided for the imposition of a 3% gross receipts privilege tax on the difference between the price of the ticket sold and the face price on the ticket.[101] This provision was deleted from the bill when the bill was in the House Finance Committee. The sunset date will necessitate the General Assembly revisiting this issue during the 2009 Session.

FUTURE CONVEYANCES/SPECIAL ASSESSMENTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-165, as amended by S.L. 2008-187	**HB 1770**	**Representative McComas**

AN ACT TO CLARIFY THE AUTHORITY OF THE PARTIES TO CONSERVATION AND PRESERVATION AGREEMENTS TO INCLUDE PROVISIONS IN THE AGREEMENTS FOR THE PAYMENT OF FEES UPON FUTURE CONVEYANCE OF PROPERTY SUBJECT TO THE AGREEMENTS AND TO ALLOW SPECIAL ASSESSMENTS TO BE PAID IN MORE THAN TEN ANNUAL INSTALLMENTS AND TO BE PLEDGED TO THE REPAYMENT OF REVENUE BONDS ISSUED FOR CRITICAL INFRASTRUCTURE NEEDS.

OVERVIEW: Sections 2 and 3 of this act give counties and cities an opportunity to finance long-term capital projects related to water and sewer infrastructure, stormwater infrastructure, public transportation, schools, and roads through the issuance of revenue bonds that will be paid

---

[101] The gross receipts tax is currently imposed on the face price of the ticket when it is originally sold.

by levying special assessments on the affected properties. The remainder of this act does not affect North Carolina tax laws and is not discussed below.

FISCAL IMPACT: There is no impact on General Fund revenues.

EFFECTIVE DATE: These sections became effective when signed into law by the Governor on August 3, 2008, and expire on July 1, 2013. The expiration does not affect the validity of assessments imposed or bonds issued or authorized under the provisions of this act prior to the effective date of the expiration.

ANALYSIS: Sections 2 and 3 of this act give counties and cities an opportunity to use assessments as a financing tool for long-term capital projects related to water and sewer infrastructure, stormwater infrastructure, public transportation, schools, and roads. The act accomplishes this goal by enacting new articles within Chapter 153A and Chapter 160A supplementing the current authority counties and cities have to levy assessments and issue revenue bonds.[102] Counties and cities will be able to pay for a project for which an assessment is imposed solely with revenue bonds to be paid from the assessments or from a combination of financing sources that include revenue bonds, general obligation bonds, and general revenue. This change will particularly aid counties and cities that face increased demands for infrastructure improvements as a result of rapid growth and development. The act gives counties and the cities located within the counties the authority to impose assessments for the following projects:

- Providing sanitary sewer systems, including community sewerage facilities for the collection, treatment, and disposal of sewage or septic tank systems and other on-site collection and disposal facilities or systems.
- Providing storm sewers and flood control facilities, including levees, dikes, diversionary channels, drains, catch basins, and other facilities for storm water drainage.
- Providing water systems, including facilities for the supply, storage, treatment, and distribution of water.
- Providing public transportation facilities, including equipment for public transportation, buses, surface and below ground railways, ferries, and garage facilities.
- Providing school facilities, including schoolhouses, buildings, plants and other facilities, physical and vocational educational buildings and facilities, including in connection therewith classrooms, laboratories, libraries, auditoriums, administrative offices, gymnasiums, athletic fields, lunchrooms, utility plants, garages, and school buses and other necessary vehicles.
- Providing streets and sidewalks, including bridges, viaducts, causeways, overpasses, underpasses, and alleys; paving, grading, resurfacing, and widening streets; sidewalks, curbs and gutters, culverts, and drains; traffic controls, signals, and markers; lighting; and grade crossing and the elimination thereof and grade separations.

The governing body of a county or city may not impose assessments under the new articles unless it receives a petition for the project to be financed through assessments signed by at least a majority of the owners of the property assessed. The county board of commissioners or city council must

---

[102] See Article 9A of Chapter 153A (Counties) and Article 10A of Chapter 160A (Cities and Towns) of the act.

establish an assessment method that will most accurately assess property according to the benefits conferred upon it by the project for which the assessment is made. In establishing the assessment method, the county board of commissioners or city council must first determine the project's total estimated cost, and a preliminary assessment roll may then be prepared before the costs of the project are incurred based on the estimated cost of the project.[103] Unlike assessments currently imposed under Article 9 of Chapter 153A and Article 10 of Chapter 160A, the cost of assessments imposed for these infrastructure projects may include any expenses allowed under the State and Local Government Revenue Bond Act. The primary expense allowed under the Revenue Bond Act that is not considered under Article 9 and Article 10 is interest on the bonds or notes issued in anticipation of the revenue bond issuance during construction and an establishment of debt service reserves. Also, unlike assessments the county or city may currently impose, assessments issued for long-term infrastructure projects under the act must be paid in annual installments over a period not to exceed 30 years.[104] These annual payments are due on the date property taxes are due.

In addition to other financing tools available for infrastructure projects, the act provides that an infrastructure project for which an assessment may be imposed under the new articles may be considered a revenue bond project for purposes of the State and Local Government Revenue Bond Act, and that the assessments imposed under the new articles may be considered revenues for purposes of the Act. All of the provisions governing revenue bonds in Article 5 of Chapter 159 apply to the new articles. To issue revenue bonds, a county or city must first apply to the Local Government Commission (LGC) for approval of the revenue bond issue. The State and Local Government Revenue Bond Act sets forth the matters the LGC must consider before giving a county or city approval to issue revenue bonds. It must determine that the proposed revenue bond issue is necessary, that the amount proposed is adequate and not excessive, that the proposed project is feasible, that the county's or city's debt management procedures and policies are good, and that the proposed revenue bonds can be marketed at reasonable interest costs.

Except as otherwise provided under these new articles, the provisions for imposing special assessments under Article 9 of Chapter 153A and Article 10 of Chapter 160A apply to the special assessments imposed under these new articles. Under Article 9 and Article 10, when a county or city decides to finance all or part of a project by special assessments, it must first adopt a preliminary assessment resolution that describes the project, the proposed basis for making the assessment, and information concerning the cost of the work and the terms of payment of the assessment. If the basis for making the assessment is either the area of land benefited by the project or the valuation of the land benefited by the project, then the resolution must contain a description of the boundaries of the area benefited. The county or city must hold a public hearing on the matter, prepare a preliminary assessment roll, and publish a confirmation of the assessment roll once it is adopted. An owner of property against which an assessment is made may file a notice of appeal to the General Court of Justice if the owner is dissatisfied with the amount of the assessment. Unpaid assessments bear interest at a rate fixed in the assessment resolution. A county or city may foreclose assessment liens under procedures provided by law for the foreclosure of property tax liens.

---

[103] Sections 47.5.(a) and (b) of S.L. 2008-187, the 2008 technical corrections bill, clarify that a preliminary assessment roll may be prepared based on the estimated cost of the project, corrects a statutory reference, and adds a phrase that was inadvertently omitted.

[104] Assessments under Articles 9 and 10 must be paid in full unless the county or city provides that they may be paid in annual installments, which may not be more than 10 years.

WILDLIFE LAND PROPERTY TAX CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-171	**HB 1889**	**Rep. Harrison, Gibson, Hill, Brubaker**

AN ACT TO PROVIDE PROPERTY TAX RELIEF FOR QUALIFYING WILDLIFE CONSERVATION LAND, TO CLARIFY THE PRESENT-USE VALUATION OF PROPERTY SUBJECT TO A CONSERVATION EASEMENT, AND TO PROVIDE A PROPERTY TAX EXEMPTION FOR LEASEHOLD INTEREST IN CERTAIN EXEMPTED PROPERTY.

OVERVIEW: This act does three things:

- It designates wildlife conservation land as a special class of property for property tax purposes and provides that it may be appraised and taxed as if it were classified as agricultural land under the present-use value system. This part of the act becomes effective for taxes imposed for taxable years beginning on or after July 1, 2010.
- It provides that property appraised at its present-use value will continue to qualify for present-use value when the owner donates the property for conservation purposes so long as the property is subject to a conservation easement that qualifies for the conservation income tax credit for donated lands and the owner received no more than 75% of the fair market value of the donated property as compensation. This part of the act becomes effective for taxes imposed for taxable years beginning on or after July 1, 2010.
- It exempts from property tax a leasehold interest in property if the property itself is exempt from property tax because it is owned by a unit of government and the property is used to provide affordable housing for employees of the unit of government that owns the property. This part of the act became effective for taxes imposed for taxable years beginning on or after July 1, 2008.

FISCAL IMPACT: The fiscal impact of this act will affect local government revenues. The North Carolina Wildlife Commission has indicated that no reliable data is available regarding the number of acres that may qualify for the wildlife conservation classification; therefore, no estimate is available for this part of the act. The difference in the assessed value of property subject to a conservation easement and property in the present-use value program do not significantly differ; therefore this part of the act is expected to have minimal impact. Lastly, the act provides a property tax exemption for certain leasehold interests in exempt property. At the present time, Dare County is the only county that has property that will be impacted by this change and the impact is expected to be minimal.

EFFECTIVE DATE: See the **OVERVIEW**.

ANALYSIS: The act establishes a new property tax classification for property used for wildlife conservation and values that property at its value as agricultural land rather than its fair market value. It clarifies the present-use valuation of property subject to a conservation easement, and it

exempts from property tax a leasehold interest in certain property used to provide affordable housing.

Wildlife Conservation Land. – Since 1973, the General Assembly has provided special property tax treatment for farmland that is classified and used for agricultural, horticultural, or forest purposes. If the farmland meets certain ownership and size requirements and is engaged in commercial production under a sound management program, the land may be appraised and taxed at its present-use value (PUV) as opposed to its fair market value. Agricultural land and horticultural land must also meet an income requirement: the land must have one tract that produced at least $1,000 average gross income over the three preceding years. The difference between the taxes due on the PUV and the taxes that would have been payable in the absence of the special tax treatment are known as deferred taxes. When the land becomes disqualified for PUV, the land is taxed at its fair market value for the year in which it loses its classification and the deferred taxes for the three previous years become due and payable, with interest.

During the 2007 session, the General Assembly extended PUV treatment and classification to land used as an aquatic species farm[105] and to working waterfront property.[106] This act extends PUV treatment to property used for wildlife conservation. To be eligible for this classification, the property must meet the following size, ownership, and use requirements:

- **Size.** – The land must consist of at least 20 contiguous acres. An owner may not classify more than 100 acres of land as wildlife conservation land within a county.
- **Ownership.** – The land must be owned by an individual, a family business entity[107] or a family trust[108] and it must have been owned by the same owner for the previous five years. Land owned by a business entity[109] is not eligible for PUV classification if the business entity is a corporation whose shares are publicly traded or one of its members is a corporation whose shares are publicly traded. The act provides these exceptions to the ownership requirements:
    - The 5-year time period is considered met if the land has been owned by a member of the family business for five years or if owned by a beneficiary of the family trust for five years.[110]

[105] Part III, S.L. 2007-497.

[106] Part I, S.L. 2007-485.

[107] A family business entity is defined as a business entity whose members are, directly or indirectly, individuals and relatives. An individual is indirectly a member of a business entity if the individual is a member of a business entity or a beneficiary of a trust that is part of the ownership structure of a business entity.

[108] A family trust is defined as a trust that was created by an individual and whose beneficiaries are, directly or indirectly, individuals who are the creator of the trust or a relative of the creator. An individual is indirectly a beneficiary of a trust if the individual is a beneficiary of another trust or a member of a business entity that has a beneficial interest in the trust.

[109] A business entity is defined as a corporation, a general partnership, a limited partnership, or a limited liability company.

[110] These are the PUV ownership changes enacted in S.L. 2008-146. The members of a business entity would no longer be restricted to individuals but would include trusts and other business entities as long as a member was not a corporation whose shares are publicly traded and none of its members are corporations whose shares are publicly traded.

- The 5-year time period is waived if the property acquired was classified as wildlife conservation land in the hands of the previous owner and the current owner continues to use the land as wildlife conservation land. To classify property under this exception, the new owner must file an application for PUV and must sign the wildlife habitat conservation agreement in effect for the property within 60 days after acquiring it.

- **Use.** – The land must meet both of the following use requirements:
  - The land is managed under a wildlife habitat conservation agreement[111] with the North Carolina Wildlife Resources Commission and the agreement is in effect as of January 1 of the year for which the benefit is claimed. The agreement must require the owner to manage the land to protect an animal species that lives on the land and is on a North Carolina protected animal list published by the Commission[112] or to conserve one of the following priority animal wildlife habitats: longleaf pine forest, early successional habitat, small wetland community, stream and riparian zone, rock outcrop, or bat cave.
  - The land must have been classified as either agricultural, horticultural, or forest land under the PUV classification when the wildlife conservation agreement was signed. This requirement may be waived if the owner can demonstrate to both the Wildlife Resources Commission and the county tax assessor that the owner used the land for a purpose specified in the signed wildlife conservation agreement for three years preceding the year for which the benefit of this special tax treatment is desired.

Property classified as wildlife conservation property under the PUV system loses its eligibility for the special tax treatment whenever it fails to meet one or more of the size, ownership, and use requirements. The owner of property classified as wildlife conservation property must notify the county assessor whenever there is a change in the size, ownership, or use of the property that necessitates a review of the exclusion. An owner who fails to do so is subject to a penalty equal to 10% of the amount of the deferred taxes and interest for each listing period that the owner fails to report.[113]

As with other property in the PUV classification, property that loses its eligibility for the classification will be taxed at its fair market value for the year in which it loses its eligibility and

[111] The North Carolina Wildlife Resources Commission does not currently have a wildlife habitat conservation agreement. It will develop this agreement.

[112] The North Carolina Wildlife Action Plan, developed in compliance with a Congressional mandate, was submitted in 2005 to provide a conservation blueprint to advance the sound management of fish and wildlife resources in the future. The Plan identifies fish and wildlife resources and priority conservation needs associated with those resources. There are currently about 12 identified priority wildlife habitats in the State. There are a number of federally-listed threatened or endangered animal species and State listed animal species. There are also State and federal natural resource management plans for which wildlife habitat is its primary objective, such as Forest Stewardship, Cooperative Upland Habitat Restoration and Enhancement Program (CURE), and Wildlife Habitat Incentives Program. Link to North Carolina State and Federally listed wildlife species: www.ncwildlife.org/fs_index_07_conservation.htm

[113]G.S. 105-282.1 requires an owner of any property eligible to be exempted or excluded from property tax to notify the county tax assessor of any change in the property's value or property's eligibility for the exemption or exclusion.

the deferred taxes for the three previous years will become due and payable, with interest. The act provides several exceptions to this rule:

- No deferred taxes are due, and the lien for deferred taxes is extinguished, when the owner conveys the property by gift to a nonprofit organization for educational and scientific purposes as a protected natural area or for nonprofit historic preservation purposes; or to the State, a political subdivision of the State, or the United States.
- No deferred taxes are due, but the deferred taxes remain a lien on the property, when the property reverts back to its original farmland use under the PUV program. This exception requires that the property was previously classified under the PUV program and that the ownership of the property does not change. Similarly, no deferred taxes are due on property originally classified as farmland if the property is reclassified as wildlife conservation land.[114]
- No deferred taxes are due, but the deferred taxes remain a lien on the property, when the property is transferred to an owner who signs the wildlife habitat conservation agreement in effect for the land at the time of the transfer and the land remains classified as wildlife conservation property.[115]

The issue of classifying wildlife conservation property as a special class of property whose value may be partially excluded from taxation has been discussed for several years. This part of the act represents the collaborative work of representatives from the North Carolina Association of County Commissioners, various conservation groups, county tax assessors, the Forestry Association, the Wildlife Resources Commission, and the North Carolina Farm Bureau. The act directs the Revenue Laws Study Committee to study the three-year impact of the wildlife conservation land classification and its fiscal impact on local governments. The Committee is to report its findings to the 2015 General Assembly.

Land Subject to a Conservation Eeasement. – North Carolina provides an income tax credit to individual and corporate taxpayers who donate an interest in real property for conservation purposes to the State, a local government, or a body that is organized to receive and administer lands for conservation purposes and qualified to receive charitable contributions.[116] The property tax value determination of property subject to a conservation easement must take into consideration the advantages and disadvantages of the conditions of the easement on the market value of the property. In some instances, the value of property subject to an easement is greater than the value that property would be if it was classified as farmland under the PUV program.

Prior to 2002, property classified within the PUV program that became subject to a conservation easement lost its PUV assessment because the property could no longer meet the use and income-producing requirements for PUV classification. Whenever property becomes ineligible for the program, the current year's taxes, as well as the three years of deferred taxes, become due and

---

[114] See Section 5 of the act.

[115] This exception to the payment of the deferred taxes coincides with the waiver of the 5-year ownership requirement when the property acquired was classified as wildlife conservation land in the hands of the previous owner and the current owner continues to use the land as wildlife conservation land.

[116] The property interest must be donated in perpetuity and be useful for public beach access or use, public access to public waters or trails, fish and wildlife conservation, forestland or farmland conservation, watershed protection, conservation of natural areas, conservation of natural or scenic rivers areas, conservation of predominantly natural parkland, or historic landscape conservation.

payable. In 2002, the General Assembly created an exception to the use and income-producing requirements for PUV by allowing property subject to a conservation easement to remain in the PUV program.

The Property Tax Division within the Department of Revenue interprets this exception to the PUV program narrowly to allow property to remain in the program only when the entire conservation easement is donated. In contrast, the Income Tax Division within the Department has allowed an income tax credit for any percentage of the easement value that is donated. For example, if a taxpayer donates an easement for conservation purposes to the State valued at $100,000 and receives $60,000 for the easement, the taxpayer has donated an easement worth $40,000. The taxpayer is then allowed an income tax credit equal to 25% of the donated value, or $10,000. However, because the taxpayer received some compensation for the easement, the property becomes ineligible for special property tax treatment under the PUV program. This act specifies that property may remain in the PUV program as long as it is subject to an enforceable conservation easement and the taxpayer received no more than 75% of the fair market value of the donated property interest in compensation. This part of the act becomes effective for taxable years beginning on or after July 1, 2010.

Property Tax Exemption of Certain Leasehold Interests. – This act exempts from property tax a leasehold interest in exempt property, effective for taxes imposed for taxable years beginning on or after July 1, 2008, if the following two conditions are met:

- The property itself is exempt from property tax because it is owned by a unit of government.
- The property is used to provide affordable housing for employees of the unit of government that owns the property.

An example of this property tax exemption is the leasehold interest of the Dare Education Foundation in property that is exempt in the hands of its owner, the Dare County Board of Education and used to provide affordable housing for teachers. An application for this exemption is timely if filed on or before September 1, 2008. Prior to this change, a leasehold interest in exempted property was subject to property tax.

UNC NONAPP. CAP. PROJECTS/AIRPORT AUTHORITY.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-204	**SB 1925**	**Senator Kerr**

AN ACT TO AUTHORIZE THE CONSTRUCTION AND THE FINANCING, WITHOUT APPROPRIATIONS FROM THE GENERAL FUND, OF CERTAIN CAPITAL IMPROVEMENTS PROJECTS OF THE CONSTITUENT INSTITUTIONS OF THE UNIVERSITY OF NORTH CAROLINA; TO REVISE UNIVERSITY GENERAL OBLIGATION INDEBTEDNESS; TO ALLOW THE UNIVERSITY OF NORTH CAROLINA TO CREATE AIRPORT AUTHORITIES TO

SUPPORT THE MISSION OF THE UNIVERSITY, ITS CONSTITUENT INSTITUTIONS, OR THE UNIVERSITY OF NORTH CAROLINA HEALTH CARE SYSTEM; TO AUTHORIZE THE STATE EDUCATION ASSISTANCE AUTHORITY TO SET THE INTEREST RATE FOR THREE SCHOLARSHIP LOAN PROGRAMS AT A RATE NOT TO EXCEED TEN PERCENT PER ANNUM; AND TO MODIFY THE RESPONSIBILITIES OF THE NORTH CAROLINA FEDERAL TAX REFORM ALLOCATION COMMITTEE.

OVERVIEW: This act does the following:

- Authorizes the construction of numerous projects by The University of North Carolina using revenue bonds and special obligation bonds.
- Revises a UNC Bond Project from the 2000 Higher Education Bond Program by reducing a portion of the 2000 general obligation bond issuance for 'Berryhill Laboratory Building' at UNC-Chapel Hill by $8.6 million and using the money to fund a new project, 'Division of Laboratory Animal Medicine – Upfits'.
- Exempts the purchase, construction, and operation of capital facilities by Gateway University Research Park, Inc., a joint Millennial Campus in Greensboro, from the procurement provisions required for capital facilities financed through the State Capital Facilities Financing Act, except for the procurement provisions in Article 8 (Public Contracts) of the Act.
- Authorizes the Board of Governors to create one airport authority in Orange County for the sole purpose of resiting and operating the Horace Williams Airport. The authorized airport authority must support the mission of the University of North Carolina at Chapel Hill or the University of North Carolina Health Care System.
- Authorizes the State Education Assistance Authority to set the interest rate for three scholarship programs in an amount not to exceed 10% a year instead of the current fixed rate of 10%.
- Allows North Carolina to issue tax-exempt qualified educational facility bonds, the proceeds of which are used by a private for-profit corporation that has entered into a public-private partnership agreement with a local school administrative unit to construct, rehabilitate, refurbish, or equip an elementary or secondary public school.

FISCAL IMPACT: There is no impact on General Fund revenues. The self-liquidating projects are financed with funds available to the institutions from gifts, grants, receipts, self-liquidating indebtedness, or other funds or a combination of these funds, but not including funds received for tuition or appropriated from the General Fund.*(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2008 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: Except at otherwise specified, this act became effective when signed into law by the Governor on August 8, 2008.

ANALYSIS:

Part I: Self-Liquidating Projects

Each year the University of North Carolina requests legislative authorization for needed capital projects at its constituent or affiliated institutions. These projects are funded by two types of self-liquidating bonds that may be issued by the University's Board of Governors.[117] Section 1.2 of the act authorizes 31 projects on nine campuses.[118] The Chancellors and Boards of Trustees for the listed campuses, as well as the President and the Board of Governors have approved these projects. Construction of these projects is expected to begin before June 30, 2009. The maximum principal amount of bonds to be issued for the projects will not exceed the specified costs of the projects plus $25 million for related additional costs for which bond proceeds are routinely used, such as issuance expenses, funding of reserve funds, and capitalized interest. Section 1.3 of the act authorizes planning money for five projects on three campuses. Sections 1.6 and 1.9 of the act exempt the following projects from the statutory requirement regarding location of special obligation projects: UNC-Chapel Hill's Research Resource Facility – Phase III capital project, UNC-Chapel Hill's Cogeneration and Steam Infrastructure Improvement and Expansion capital project, ECU's Athletic Facilities Expansion and Improvement capital project, and NCSU's Avent Ferry Administration Center Renovation capital project. Sections 1.7 and 1.8 of the act authorize UNC-Chapel Hill and Appalachian State University to construct and finance the expansion and renovation of their football stadiums through lease arrangements to and from a third party. Once constructed and approved by the State reviewing agencies, these improvements would transfer to the State. Section 1.7 of the act also provides that after the property is transferred to the State, UNC-Chapel Hill may provide for the operation and maintenance of the facilty through a contractual or lease agreement with a third party.

Part II: Revise University General Obligation Indebtedness

This part of the act modifies a UNC bond project authorized in the 2000 Higher Education Bond Program by transferring up to $8.6 million of the 2000 bond funding for the Berryhill Hall Laboratory Building to a related project called 'Division of Laboratory Animal Medicine – Upfits'. Berryhill Hall is the primary education building for the UNC School of Medicine. The Hall is not large enough to support the planned enrollment expansion in the medical program. UNC-Chapel Hill will recommend replacement of Berryhill Hall and seek needed funding in the future. The new project, Division of Laboratory Animal Medicine – Upfits, will use the balance of the Berryhill Hall renovation funds to renovate other related teaching and research support space in existing campus facilities. These renovated facilities will provide the necessary space for those displaced during the construction of the new medical education building and future projects.

Part III: Procurement Modifications

This part of the act removes the purchase, construction, and operation of capital facilities by Gateway University Research Park, Inc. (hereinafter Gateway) from all procurement provisions required for capital facilities financed through the State Capital Facilities Financing Act, except for

---

[117] Article 21 of Chapter 116 of the General Statutes authorizes the Board to issue revenue bonds for educational buildings, dormitories, recreational facilities, dining facilities, student centers, health care buildings, parking decks, etc. These revenue bonds are payable from rentals, charges, fees, and other revenues generated by the facility but not from tax revenues. Article 3 of Chapter 116D of the General Statutes authorizes the Board to issue special obligation bonds payable with any sources of income or receipts of the Board or a constituent or affiliated institution, but not including tuition payments or appropriations from the General Fund. These bond proceeds can be used for construction, improvement, and acquisition of any capital facilities located at UNC constituent and affiliated institutions.

[118] These projects include academic, research, clinical and administrative space and improvements to student services, residential living, dining, recreation, and athletic facilities.

those provisions in Article 8 of the Act.[119] Article 8 requires separate contract specifications, adherence to minority business participation goals, and bidding requirements. Gateway is a 501(c)(3) organization controlled by North Carolina A & T and UNC-G to manage construction projects at the Gateway University Research Park, a joint millennial campus created by the Board of Governors. This statutory change codifies Gateway's authority to manage construction projects in accordance with Gateway's Management Services and Development Agreement with North Carolina A & T and UNC-G and its Ground Lease Agreement with the State approved by the Council of State in 2007. The change to G.S. 142-94 allows Gateway to continue to follow its streamlined bidding and procurement process for construction of all facilities located on the Joint Millennial Campus. This process is explicitly described and included in the Ground Lease Agreement, which also incorporates substantial oversight protections. Currently, this statutory change affects two projects.

Part IV: Allow the University of North Carolina to Create an Airport Authority

This part of the act establishes a new article in Chapter 116 of the General Statutes authorizing the Board of Governors to create one airport authority in Orange County for the sole purpose of resiting and operating the Horace Williams Airport.[120] The airport authority must support the mission of UNC-Chapel Hill or the UNC Health Care System. Horace Williams Airport is a university-owned airport that opened in 1940. The Airport is the hub for planes serving the North Carolina Area Health Education Centers (AHEC) Program based in the UNC School of Medicine. AHEC transports UNC medical faculty across the State to provide specialty clinics and educational programs in underserved areas. The Airport also houses private planes. As early as 2002, the University announced plans to close the Airport and use the site for a planned satellite research campus, Carolina North. After much debate among the University, the Town of Chapel Hill, supporters of AHEC, and private pilots, the General Assembly authorized the Board of Governors to create the airport authority.

An airport authority authorized by the Article must consist of 15 appointed members and may be created to support the mission of UNC-Chapel Hill, one constituent institution and the UNC Health Care System, or the UNC Health Care system. In August, the Board of Governors decided to create an airport authority to support the mission of the constituent institution, UNC-Chapel Hill, and the University of North Carolina Health Care System. Pursuant to the Article, the 15 appointed members must consist of the following: one member appointed by the General Assembly upon the recommendation of the Speaker of the House, one member appointed by the General Assembly upon the recommendation of the President Pro Tempore of the Senate, eight members appointed by the Board of Governors (four members upon the recommendation of the UNC-Chapel Hill Board of Trustees and four members by the UNC Health Care System), three members appointed by the Orange County Board of Commissioners, and one member appointed by the Chapel Hill Town Council. No member of the General Assembly may serve on an airport authority created under the Article.

The general powers of an airport authority created under the Article include the following: powers that a city or county has over airports; powers regarding financing capital expenditures and operations that are delegated to or conferred upon constituent institutions or the UNC Health Care System; to sue and be sued; to establish, operate, and maintain an airport; to expend funds for these purposes; to lease property; to receive a sales tax refund; to borrow money; and to

[119] G.S. 142-94 of Article 9, Chapter 142.

[120] Article 13 of Chapter 116 (Higher Education) of the General Statutes.

acquire property by eminent domain, except over property held on July 1, 2008 by a 501(c)(3) organization organized for educational purposes. If regulations adopted by the airport authority and development regulations adopted by Orange County or a municipality in the County apply to land owned by and the approaches to land owned by the airport authority, then the more restrictive regulations apply.

If the airport authority created under the Article ceases its operation, then the title to the authority's property shall vest in The University of North Carolina. The proceeds of the sale of the property must first be distributed pro rata to the constituent university member or to the UNC Health Care System for reimbursement purposes.

Part V: Interest Rate for Scholarship Loan Programs[121]

This part of the act authorizes the State Education Assistance Authority (SEAA) to set the interest rate for the following three scholarship programs at a rate not to exceed 10%: the Nursing Scholars Program, the Graduate Nurse Scholarship Program for Faculty Production, and Principal Fellows Program. A loan under each of these scholarship programs is a free grant if the student fulfills the service commitment, and the intent of the loan is for the recipient to serve the State as opposed to repaying in cash. This part of the act becomes effective January 1, 2009, and applies to loans issued on or after July 1, 2009.

The responsibility for establishing the interest rate for the State scholarship loan programs differs according to the program. In some cases, the SEAA has the responsibility to set the rate, in others, such as these three programs, the interest rate is set by statute at 10%. According to the SEAA, the statutorily set 10% rate has been a promotional obstacle for these scholarship programs because it is significantly higher than federal loan rates, such as the Stafford Loan, which has a rate of 6.8%. The SEAA requested this change to encourage students to apply for the programs. Below are descriptions of the three programs:

- **Nursing Scholars Program** - This program offers scholarship loans of up to $6,500 per year with a maximum of four years per recipient to North Carolina residents interested in preparing to become registered nurses through an associate or baccalaureate degree program. If also offers up to $6,500 per year per recipient for two years of study leading to a master of science in nursing. The loan is forgiven if, within seven years after graduation, the recipient practices nursing in North Carolina for one year for each year of aid received. While the statutory maximum was increased to $6,500 in 2006, the current award amounts actually offered are $3,000 per year for applicants pursuing an associates degree or hospital diploma in nursing and $5,000 per year for applicants pursing a bachelor of science degree in nursing.
- **Graduate Nurse Scholarship Program for Faculty Production** – This program offers scholarship loans in the amount of $15,000 per year per recipient for the following: (1) students enrolled in a masters program in nursing education; (2) students enrolled in a doctoral degree program in nursing education; and (3) nursing faculty in the North Carolina Community College System enrolled in a masters degree program in nursing education. The loan is forgiven if, within seven years after graduation, the recipient teaches in a public or private nursing education program in a public or private educational

[121] Part V of the act was initially introduced in Senate Bill 1070, which passed the Senate. The substance of SB 1070 was put in Part V of the act, because it did not appear that the bill was eligible for consideration during the Short Session.

institution in North Carolina for one year for every year of aid received. If the recipient was a nursing faculty member of a community college, the loan will be forgiven if the recipient teaches in a community college nursing education program in North Carolina one year for each year of aid received.

- **Principal Fellow Program** – This program requires, within six years after graduation, a four-year commitment to serve as a school administrator in a North Carolina public school to receive the $30,000 first-year stipend and the second-year loan in the amount of 60% of the beginning salary for an assistant principal plus $4,100 for tuition, fees, and books.[122]

Part VI: Modify TRAC Responsibilities[123]

This part of the act enables North Carolina to issue tax-exempt qualified educational facility bonds, the proceeds of which may be used by a private for-profit corporation that has entered into a public-private partnership agreement with a local school administrative unit to construct, rehabilitate, refurbish, or equip an elementary or secondary public school.

Qualified private activity bonds are tax-exempt bonds[124] issued by a state or local government, the proceeds of which are used for a defined qualified purpose by an entity other than the government issuing the bonds. A qualified private activity bond is secured by the financed project's revenues rather than the full faith and credit of the governmental unit. Qualified private activity bonds enable the private sector to access tax-exempt capital markets, thereby reducing a project's financing costs. Federal law limits the aggregate amount of private activity bonds that may be issued by a state.

In the Economic Growth and Reconciliation Act of 2001, Congress expanded the purpose for which qualified private activity bonds could be issued to include qualified public educational facilities. A qualified educational facility is a public elementary or secondary school owned by a private, for-profit corporation pursuant to a public-private partnership agreement with a State or local educational agency. The expansion of a qualified purpose to include educational facilities allows more tax-exempt financing of public school construction. In 2006, the General Assembly enacted legislation to facilitate the building of public school facilities through public-private partnerships.[125] The authorization allowing local school administrative units to use capital lease financing expires July 1, 2011. To date, no school facilities have been financed through this authority.

North Carolina cannot currently avail itself of the use of qualified educational facility bonds because the statutes do not authorize their allocation or issuance. The General Assembly created the North Carolina Federal Tax Reform Allocation Committee in 1987 to manage the allocation of tax exempt private activity bonds and low-income housing credits. This act expands the authority of the Committee to include the allocation and issuance of qualified public educational

---

[122] These amounts may be adjusted to take into account increases in tuition, fees, and the cost of books; increases in the State principal assistant salary schedule; and changes in the stipend paid to participants in the program during the second-year internship.
[123] Part VI of the act was initially introduced in Senate Bill 1902, which passed the Senate, and House Bill 2724. The substance of these bills was put in Part VI of the act, because it did not appear that these bills were eligible for consideration during the Short Session.
[124] The interest paid to the bondholder is not includable in their taxable income.
[125] S.L. 2006-232, as amended by S.L. 2006-259.

facility bonds. This legislation, together with the legislation enacted in 2006[126], provides another financing alternative for public school construction.

Federal law limits an issuing authority to a maximum amount of tax-exempt bonds that may be issued to finance a qualified educational facility to the greater of $5 million or $10 multiplied by a state's population. Based upon North Carolina's population, its 2008 allocation is $90.6 million and its 2007 allocation was $88 million. A state may elect to carry forward the unused bond volume cap for any calendar year for three years following the calendar year in which the unused volume cap arose. This election is made by filing IRS Form 8328. The Treasurer's Office filed a carryforward for 2007. On the effective date of the act, North Carolina had two years of allocation, or approximately $178 million, to allocate for qualified educational facility bonds.

HOME INSPECTOR PRIVILEGE LICENSE.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-206	**HB 2558**	**Representative Ross**

AN ACT TO REQUIRE LICENSED HOME INSPECTORS TO OBTAIN A PRIVILEGE LICENSE.

OVERVIEW: This act imposes a $50 State privilege license tax on individuals licensed under the Home Inspector Licensure Act.

FISCAL IMPACT: The act increases General Fund revenues by $77,000.

EFFECTIVE DATE: This act became effective when signed into law by the Governor, August 9, 2008, and applies to taxable years beginning on or after July 1, 2008.

ANALYSIS: This act imposes an annual State privilege license tax of $50 on an individual licensed under the Home Inspector Licensure Act.[127] The State's privilege license tax is imposed on a fiscal year basis and is due by July 1 of each year. The full amount of the tax applies to a person who, during the fiscal year, begins to engage in an activity for which a privilege license is required. Since the act became effective after July 1, 2008, it includes a provision extending the time in which a person engaged in the business of home inspection has to obtain the required State license for fiscal year 2008-2009, from July 1, 2008, until October 1, 2008.

By imposing a State license tax on this profession, the act repeals the authority of cities to impose a local license tax on this profession.[128] Under the general authority of G.S. 160A-211, several cities impose a privilege license tax on home inspectors. Since many of these cities have already collected the tax for fiscal year 2008-2009, the act specifically authorizes its imposition and collection by those cities for this fiscal year. A city cannot impose a license tax on this profession for fiscal years beginning on or after July 1, 2009.

An individual required to have a State privilege license may not engage in the licensed activity until a license is obtained. To obtain a license, an individual must file a completed application with the

Department of Revenue and pay the required tax. An application for a license is considered a return. The license does not of itself authorize the practice of a profession, business, or trade for which a State qualification license is required.

SOLID WASTE TAX CHANGES/UNSALABLE OTP REFUND.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-207	**HB 2530**	**Rep. Harrison, T. Harrell, Luebke, Thomas**

AN ACT TO MAKE ADMINISTRATIVE CHANGES TO THE SOLID WASTE DISPOSAL TAX AND TO ALLOW A REFUND FOR ALL UNSALABLE OTHER TOBACCO PRODUCTS.

OVERVIEW: This act does two things:

- It makes changes the Solid Waste Disposal Tax that became effective July 1, 2008.
- It allows a refund of the tax paid on unsalable tobacco products other than cigarettes (OTP).

FISCAL IMPACT: This act is expected to reduce General Fund Revenues by approximately $9,000 annually.

EFFECTIVE DATE: The provisions allowing a refund of the tax paid on unsalable OTP became effective October 1, 2008, and apply to products returned on or after that date. The remainder of the act became effective when signed into law by the Governor on August 9, 2008.

ANALYSIS: The act makes certain administrative changes to the solid waste disposal tax. First, it clarifies that the tax and the return are due on a quarterly basis. Second, if a third party fails to pay the amount charged for the disposal of waste tonnage and an owner or operator has deducted that amount from gross income as a bad debt, then the owner or operator may deduct the amount of that tonnage if the tax was paid on the tonnage. If the owner or operator is not subject to income tax, the owner or operator may take the deduction when it is determined that the charges are not collectible. Finally, the act excludes a city or county from receiving proceeds if it does not provide solid waste management programs and services and is not responsible by contract for payment, unless the city or county is served by a regional solid waste management authority. If the city or county is served by the authority, then the city or county must forward the amount of proceeds it receives to that authority. To assist the Department with distribution, the Department of Environment and Natural Resources must provide the Department with a list of cities and counties that are excluded by May 15 of each year.

In S.L. 2007-323, the General Assembly increased the excise tax levied on OTP from 3% to 10%, effective October 1, 2007, with the Secretary of Revenue remitting the additional tax to the University Cancer Research Fund. This act permits wholesale and retail dealers who possess unsalable OTPs to return them to the manufacturer and apply for a refund of the excise tax paid on them. A similar provision already exists for cigarettes and cigars. The act also conforms the discount and refund provisions for OTPs and cigarettes.

TOLL ENFORCEMENT AUTHORITY CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2008-225	**SB 1697**	**Senator Jenkins**

AN ACT TO PROVIDE FOR THE ENFORCEMENT OF TOLLS ON TURNPIKE PROJECTS OF THE NORTH CAROLINA TURNPIKE AUTHORITY, TO MODIFY LAWS APPLICABLE TO THE NORTH CAROLINA TURNPIKE AUTHORITY, AND TO CLARIFY THE AUTHORIZATION MADE IN A PRIOR LAW TO TOLL AN EXISTING SEGMENT OF N.C. 540.

OVERVIEW: This act provides for the enforcement of tolls at toll facilities operated by the North Carolina Turnpike Authority and clarifies the authorization made in a prior law to toll an existing segment of NC 540.

FISCAL IMPACT: No estimate available.

EFFECTIVE DATE: The majority of the provisions of the act became effective when the act was signed into law by the Governor on July 18, 2008.

ANALYSIS: This act addresses four areas pertaining to the North Carolina Turnpike Authority. First, it clarifies the authority to toll the specific segment of NC 540 for which the prohibition on tolling was lifted in 2006. Second, it establishes the procedure for the collection and enforcement of tolls by the Authority. Third, it treats documents and bids on contracts for a toll road the same as those for other roads with respect to confidentiality, registration of maps, and resolution of construction claims. Fourth, it exempts the Authority from the purchase and contract statutes that apply to other State agencies and from rulemaking, except as provided for contesting liability for unpaid tolls.

In 2002, the General Assembly established the North Carolina Turnpike Authority as an independent agency responsible for toll roads and designated the toll road projects. Current law enables the Turnpike Authority to set and collect tolls on Turnpike projects, but it does not establish any procedures for the collection or enforcement of the tolls.

The method by which the Authority plans to impose tolls is through an 'open road' tolling system. Under this system, there are no toll booths and drivers do not have to stop to pay the toll. Vehicles are identified electronically by means of transponders[129] and cameras. Tolls are collected by debiting a prearranged account, by payment by the driver at a facility off the tolled roadway, or by sending the driver a bill for the unpaid toll. The act requires the Authority to post signage notifying drivers that they are approaching a highway for which a toll is required and indicating the methods by which the toll must be paid. The Authority must also operate a facility within the immediate vicinity of the Turnpike project that accepts cash payment of the toll.

The act requires tolls for the same class of vehicle to be the same, but allows a discount of up to 35% of the amount of the toll for vehicles that have transponders. The person who is the

[129]An automatic device that transmits a predetermined message or generates a signal in response to a predefined signal.

registered owner of a vehicle is responsible for a toll unless the owner can establish that the vehicle was in the care, custody, or control of another when the vehicle incurred the toll.

If a toll is not paid within 15 days of when it is incurred, the Authority sends the owner of the vehicle a bill for the toll. The owner has 30 days to pay the bill. If the bill is not paid within 30 days, a processing fee is added to the amount the person owes. The Authority must set the processing fee at an amount that does not exceed the costs of identifying the owner of a motor vehicle that is subject to an unpaid toll and billing the owner for the unpaid toll. The maximum processing fee for a billing period may not exceed $6. A person may not be charged more than $48 in processing fees in a calendar year. A person who receives one or more bills for unpaid tolls during a six-month period and who has not paid the amount due on those bills within 30 days after the end of the six-month period is subject to a civil penalty of $25. Only one civil penalty may be assessed for a six-month period.

If the amount of unpaid tolls remains unpaid after 30 days, the Authority will notify the Division of Motor Vehicles that the toll, fee, and penalty have not been paid and the Division will block the renewal registration of the vehicle until the amount is paid. A person whose motor vehicle registration renewal is blocked due to unpaid tolls, processing fee, or civil penalties may pay the amount due to the Division when renewing the vehicle's registration so that the block may be removed. The Division must remit the revenue received to the Authority. The Division's costs of collecting the tolls, fees, and penalties are considered a necessary expense of the operation of the Authority and the Authority must reimburse the Division for these costs.

The act establishes an administrative review process for contested tolls. A person who disputes liability for a toll may, within 30 days after receiving the bill, request a review by the Authority. If after the informal review process, the Authority determines the person is liable for the toll, the person may contest this determination by filing a petition for an administrative hearing at the Office of Administrative Hearings (OAH). Judicial review of an administrative decision by OAH is on the record.

Under current law, it is an infraction for the operator of a motor vehicle to willfully cover or conceal the numbers on a registration plate for the purpose of interfering with the taking of a clear photograph by a traffic control system, such as the 'red-light cameras'. This act adds toll collection systems to this offense, effective December 1, 2008.

In 2006, the General Assembly removed the prohibition on tolling existing roads with respect to a segment of existing NC 540. The 2006 change, however, did not include the identified segment of NC 540 in the group of 'Turnpike Projects' for which a toll can be imposed. Therefore, this act also clarifies the authority of the Turnpike Authority to toll a segment of NC 540 in Wake County that has already been constructed.

2007 Finance Law Changes

BONDS - EXPAND SPECIAL PURPOSE PROJECTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-128	**SB 966**	**Senator Cowell**

AN ACT TO AUTHORIZE THE NORTH CAROLINA CAPITAL FACILITIES FINANCE AGENCY TO ISSUE BONDS FOR SALVAGE CENTERS, CERTAIN RESEARCH FACILITIES, AND INTERNATIONAL HEADQUARTERS OF NONPROFIT SCHOLARLY SOCIETIES.

OVERVIEW: This act adds three projects to the list of special projects for which the North Carolina Capital Facilities Financing Agency may issue bonds:

- Facilities for the provision of material salvage and recycling services, the proceeds of which are used to provide for low, moderate, or affordable housing.
- Facilities for the provision of research conducted by a nonprofit corporation organized by two or more accredited universities whose main campuses are located in North Carolina.
- Facilities for housing the international headquarters of a nonprofit scholarly society that is a member of the Scholarly Societies Project.

FISCAL IMPACT: Minimal impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on June 27, 2007.

ANALYSIS: A private entity may obtain conduit financing under the Private Capital Facilities Finance Act from the North Carolina Capital Facilities Finance Agency[1] in order to acquire, construct, and improve a qualifying project. In a conduit financing, a governmental entity issues its bonds to finance facilities for a private party, then receives payments from the private party to service the bonds. The interest on the financing to the investor may be exempt from income tax under federal law if the entity is a 501(c)(3) organization and is exempt from income tax under State law under G.S. 159D-55. The advantage to private entities of tax-exempt financing is that interest rates on tax-exempt financing are significantly lower than on taxable financing. The financing agreement could include revenue bonds or some other forms of debt. The private entity must pay for the entire cost of the financing and of the facility being financed. In no event may the financing pledge the faith or credit of the State, a local government, or any political subdivision.

Projects that qualify for conduit financing under the Act include educational facilities, student housing facilities and special purpose projects as defined in G.S. 159C-3(15a). The term 'special purpose projects' includes water systems, sewage disposal systems, public transportation systems, public parking lots, auditoriums, convention centers, recreational facilities, solid waste disposal

---

[1] Conduit financing is administered by the North Carolina Capital Facilities Financing Agency. The Agency is composed of seven members and is located in the Treasurer's Office. The Agency is audited annually and submits an annual report to the Governor and the General Assembly.

and recycling facilities, housing facilities for children or disabled persons, and facilities for rehabilitation services for disable persons. This act adds the following three projects to the list of projects defined as 'special purpose projects' under G.S. 159C-3(15):

- Facilities for the provision of material salvage and recycling services, the proceeds of which are used to provide for low, moderate, or affordable housing. Habitat for Humanity would meet this description. It operates Reuse Centers across the State where it sells new, used, and recycled building materials to the public and uses the proceeds for low, moderate, and affordable housing. There are five major reuse centers in the State. The reuse center in Wake County is planning to construct a reuse center, which includes administrative offices. The cost of the center is anticipated to be at least $4 million. If Habitat for Humanity is able to finance the construction of the facility through the North Carolina Capital Facilities Financing Agency, it will save tens of thousands of dollars. A similar organization, The Goodwill Industries, is already included in the list of special projects for which the Agency may issue bonds.
- Facilities for the provision of research conducted by a nonprofit corporation organized by two or more accredited universities whose main campuses are located in North Carolina. RTI International would meet this description. Currently, RTI International rents facility space. In the long-term, RTI will save money if it purchases its own facilities.
- Facilities for housing the international headquarters of a nonprofit scholarly society that is a member of the Scholarly Societies Project.[2] To be included in the Project, a society must generally be a membership-based society that has scholarly, academic, or research goals. The only scholarly society that is a member of the Project and has its international headquarters located in North Carolina is Sigma Xi. Sigma Xi, founded in 1886, is the international honor society of research scientists and engineers. The society currently owns a 52,000 square foot facility in the Research Triangle Park.

2007 CONTINUING BUDGET AUTHORITY.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-145	**HB 2044**	**Rep. Luebke, Gibson, Wainwright, Weiss**

AN ACT AUTHORIZING THE DIRECTOR OF THE BUDGET TO CONTINUE EXPENDITURES FOR THE OPERATION OF GOVERNMENT AT THE LEVEL IN EFFECT ON JUNE 30, 2007; APPROPRIATING FUNDS FOR INCREASES IN THE AVERAGE DAILY MEMBERSHIP IN THE PUBLIC SCHOOLS; EXTENDING THE PROVISION THAT PERMITS RETIRED TEACHERS TO RETURN TO THE CLASSROOM WITHOUT A LOSS OF RETIREMENT BENEFITS; DELAYING THE EFFECTIVE DATE OF

[2] The Scholarly Societies Project provides access to information about a significant number of scholarly societies worldwide.

CHANGES TO THE MEDICAID ESTATE RECOVERY PLAN; AND EXTENDING THE SUNSET ON THE ADDITIONAL ONE-QUARTER CENT STATE SALES AND USE TAX FROM JULY 1, 2007, UNTIL AUGUST 1, 2007.

OVERVIEW: Among other things, this act extended the sunset on the additional ¼ cent State sales tax rate from July 1, 2007, until August 1, 2007.

FISCAL IMPACT: The one-month extension of the sales tax rate at 4.25% resulted in an increase to the General Fund of roughly $20 million. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective when signed into law by the Governor on July 29, 2007.

ANALYSIS: Section 9 of the act extended the sunset on the additional ¼ cent State sales tax rate until August 1, 2007. The extension kept the State sales tax rate at 4.25% until August 1, 2007. S.L. 2007-323 repealed the August 1, 2007, sunset, thus retaining the 4.25% State sales tax rate permanently.

The General Assembly increased the State sales tax rate from 4% to 4.5% in 2001. The increase was to sunset July 1, 2003. S.L. 2003-284 extended the sunset for two years to July 1, 2005. S.L. 2005-276 extended the sunset an additional two years to July 1, 2007. S.L. 2006-66 reduced the rate by ¼ cent earlier than was required under S.L. 2005-276 so that the State sales tax rate became 4.25%, effective December 1, 2006, with the tax rate expected to return to 4%, effective July 1, 2007. This act extended the 4.25% rate until August 1, 2007.

REVISED DIST. OF SCRAP TIRE DISPOSAL TAX.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-153	**SB 1472**	**Senator Albertson**

AN ACT TO AMEND THE DISTRIBUTION OF THE PROCEEDS OF THE SCRAP TIRE DISPOSAL TAX TO INCREASE FUNDS ALLOCATED TO COUNTIES FOR THE DISPOSAL OF SCRAP TIRES, TO INCREASE FUNDS ALLOCATED TO THE SOLID WASTE MANAGEMENT TRUST FUND, AND TO DECREASE FUNDS ALLOCATED TO THE SCRAP TIRE DISPOSAL ACCOUNT.

OVERVIEW: This act, which was a recommendation of the Department of Environment and Natural Resources, amends the distribution of the net proceeds of the Scrap Tire Disposal Tax; it does not change the tax rate. It increases the percentage of net tax proceeds distributed to the Solid Waste Management Trust Fund from 5% to 8%, decreases the percentage distributed to the Scrap Tire Disposal Account from 27% to 22%, and increases the percentage distributed among the counties on a per capita basis from 68% to 70%.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective July 1, 2007.

ANALYSIS: In the late 1980s, the General Assembly banned the landfilling of whole scrap tires and required each county to develop disposal procedures for scrap tires located within its

boundaries. The Scrap Tire Disposal Tax, enacted in 1991, is a privilege tax levied on the retail sales of new tires for the purpose of providing a source of revenue to assist with their disposal.[3] The rate of tax depends upon on the size of the tire. It is 2% for tires that have a bead diameter of less than 20 inches and 1% for tires that have a bead diameter of 20 inches or more.[4] Sales of bicycle tires, recapped tires, and tires sold for placement on newly manufactured vehicles are exempt from the tax.

The net proceeds[5] of the tax are distributed among the Solid Waste Management Trust Fund, the Scrape Tire Disposal Account, and the counties. This act changes the distribution of the net proceeds of the tax revenue to more accurately reflect the current needs for the funding: less funding is needed for the cleanup of illegal or nuisance dump sites and more funding is needed by the Solid Waste Management Trust Fund to encourage market development and by counties to improve their ongoing disposal programs.

The act changes the distribution as follows:

- Increases from 5% to 8% the amount of the net tax proceeds credited to the Solid Waste Management Trust Fund. Monies in the Fund are used to promote waste reduction and recycling, research on the solid waste stream in North Carolina, and activities related to the development of secondary materials markets.
- Decreases from 27% to 22% the amount of the net tax proceeds credited to the Scrap Tire Disposal Account. Monies in the Account may be used to provide grants to local governments to assist them in disposing of scrap tires[6] provide grants to encourage the use of processed scrap tire materials, and clean up scrap tire collection sites.
- Increases from 68% to 70% the amount of the net tax proceeds distributed to the counties on a per capita basis, based on the most recent annual population estimates certified by the State Budget Officer.

STREAMLINED SALES TAX CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-244	**HB 257**	**Representative Hill**

AN ACT TO AMEND THE SALES TAX DEFINITIONS TO COMPLY WITH THE STREAMLINED SALES TAX AGREEMENT AND TO MAKE OTHER SALES TAX CHANGES.

[3] The tax is administered in the same manner as the State sales and use tax. The tax is also imposed on sales to wholesale merchants or retailers for placement of tires on a vehicle offered for sale, lease, or rental.
[4]The bead is that part of the tire that contacts the wheel. The bead is reinforced with steel wire, and compounded from high strength, low flexibility rubber. The bead seats against the wheel tightly to ensure that the tire holds air without leakage.
[5] The Department of Revenue retains $425,000 annually from the proceeds of the tax for administrative expenses. (S.L. 2007-323 increased this amount from $225,000 to $425,000, effective July 1, 2007.)
[6] By providing additional funding to the counties directly, the adjustment will also reduce the need for supplemental grants from the Scrap Tire Disposal Account.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, does the following:

- It defines 'bundled transactions' and modifies the definition of 'sales price' to keep North Carolina in compliance with the national Streamlined Sales Tax Agreement.
- Recognizes for-hire boats as commercial fishing operations eligible for the sales tax exemption for items sold for use in commercial fishing.
- Makes conforming and technical changes.

FISCAL IMPACT: Minimal impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective October 1, 2007.

ANALYSIS: This act makes two definitional changes in the sales tax laws to maintain compliance with the latest amendments to the Streamlined Sales and Use Tax Agreement (Agreement). First, it adds a definition of 'bundled transaction' and specifies how these transactions are to be taxed. Second, it modifies the definition of 'sales price' to clarify how third-party discounts, such as a manufacturer's coupon, affect the sales price of an item.

Bundled Transactions

The lack of uniformity among states in the taxation of bundled transactions led to the development of principles of taxation for bundled transactions in the Agreement. A 'bundled transaction' is the sale of an exempt product and a taxable product for one price.[7] It does not include a sale of two or more products whose combined price varies, or is negotiable, depending on the products a purchaser selects. For tangible products, the bundle is taxable based on the sales price of the bundle unless it meets either the 50% test or the 10% test.

The 50% test applies to bundles of tangible products that include food or medical items that are exempt from State tax. Under the 50% test, if at least 50% of the price of the products in the bundle is attributable to food or medical items that are exempt from State tax, then the bundle is not subject to State sales tax. The bundle is also exempt from local sales tax unless more than 10% of the bundle's price is attributable to food. In this circumstance, the bundle containing food is taxable under the local sales tax at the rate of 2%, which is the rate that applies to food that is not part of a bundle.

The 10% test applies to all other bundles of tangible products. Under the 10% test, if no more than 10% of the price of the products in the bundle is attributable to taxable items, then the bundle is not subject to State or local sales tax.

For services, the bundle is subject to the 10% test, but it can be subject to tax based on the allocated price of the taxable services in the bundle. To be taxed based on part of the sales price, the retailer's accounting records must allocate revenue to the services in the bundle and provide a basis for determining the proportion of the bundle's price that is attributable to each service in the bundle. If the records do not provide for this, the sales price of the bundle is taxable, assuming the taxable services exceed the *de minimus* 10% threshold.

---

[7] Under previous law, the sales price of a bundle of tangible products was taxable. With respect to services, previous law permitted the application of tax to part of the sales price, based on the allocation of revenue to the taxable services in the bundle.

Sales Price

The act amends the definition of 'sales price' to specify when a manufacturer's discount or other discount is considered part of the sales price. Previous law excluded some discounts from the definition of sales price but did not address the subject as fully as the change in the act. A price discount is part of the sales price if the retailer receives reimbursement from a third-party in the amount of the discount. The act does not change the application of the law on this subject.

Commercial Fishing

The act allows the holder of a commercial fishing license, the holder of commercial shellfish license, and the operator of a for-hire boat to qualify for a sales tax exemption for items sold for use in commercial fishing. While for-hire boat operators were not referenced specifically in the prior statute, the administrative practice of the Department of Revenue had been to allow their use of the exemption.

Clarifying and Technical Changes

Section 1 of the act updates the reference to the Streamlined Sales Tax Agreement to June 23, 2007, to include the latest amendments of the Agreement. Section 5 clarifies that anyone who relies on the taxing jurisdiction database developed by the Department to determine the rate of sales tax applicable in a jurisdiction is not liable for any tax underpayments attributable to reliance on that database.[8]

MODIFY TAX ON PROPERTY COVERAGE CONTRACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-250	**SB 238**	**Senator Kerr**

AN ACT TO ADJUST THE ADDITIONAL TAX RATE ON PROPERTY COVERAGE CONTRACTS TO BE REVENUE NEUTRAL BASED ON AN EXPANSION OF THE TAX BASE ENACTED IN S.L. 2006-196, TO INCREASE THE DISTRIBUTION OF THE TAX PROCEEDS TO THE VOLUNTEER FIRE DEPARTMENT FUND, TO AMEND THE VOLUNTEER FIRE DEPARTMENT GRANT PROGRAM TO ALLOW MORE DEPARTMENTS TO QUALIFY FOR GRANTS, AND TO MODIFY THE DISTRIBUTION OF TAX PROCEEDS TO THE LOCAL FIREMEN'S RELIEF FUNDS.

OVERVIEW: This act does four things:

- It reduces the additional tax rate applicable to gross premiums on insurance contracts for property coverage from 0.85% to 0.74%, effective January 1, 2008.

---

[8] This is the same result as under previous law because the database is a written statement of the Department under G.S. 105-264.

- It increases from 20% to 50% the percentage of the tax proceeds derived from the additional fire and lightning tax rate allocated to the Volunteer Fire Department Fund. This change reduces the amount of the tax proceeds allocated to the General Fund.
- It increases the cap on the grants from the Volunteer Fire Department Fund and it changes the qualifications for grants from the Volunteer Fire Department Grant Program to enable more volunteer fire departments to qualify.
- It modifies the distribution of money to the local firemen's relief grant funds so that the distribution more closely resembles the current distribution.

FISCAL IMPACT: The act increases the amount of funds allocable to the Volunteer Fire Department Fund and reduces accordingly the funds credited to the General Fund. The estimated loss to the General Fund, and consequential gain to the Volunteer Fire Department Fund, is $1.49 million for FY07-08 and $3.07 million for FY08-09. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective January 1, 2008.

ANALYSIS: North Carolina imposes a 1.9% tax rate on the gross premiums of most insurance policies.[9] In addition to the general rate, there is a 1.33% rate applied to the gross premiums on insurance policies that provide fire and lightning coverage. The taxable percentage of the different types of policies varies. Twenty-five percent of the net proceeds of this additional tax are credited to the Volunteer Fire Department Fund,[10] and the remainder is credited to the General Fund. There is also a 0.5% rate applied to gross premiums on insurance policies that provide fire and lightning coverage within fire districts. The statute authorizing the 0.5% rate does not provide any exceptions from this tax.[11] The net proceeds of this tax are credited to the Department of Insurance and most of the proceeds are distributed to the fire districts.[12]

Last session, in S.L. 2006-196, the General Assembly changed the law, effective January 1, 2008, upon the recommendation of the Revenue Laws Study Committee. The Committee recommended a change in the law because the Department of Revenue informed the Committee that the taxable percentages applied under the previous law were neither statutory nor imposed by administrative rule. S.L. 2006-196 set the percentages for the 2007 taxable year in the statute[13] and it established a new method of taxing insurance policies that provide property coverage effective for taxable years beginning on or after January 1, 2008. Effective 2008, there will be one additional rate applicable to policies covering all types of property damage, not just fire and lightning coverage. The reason for expanding the base to include all types of property coverage is that volunteer fire

[9] Workers' compensation policies are taxed at 2.5%.

[10] Funds in the Volunteer Fire Department Fund provide matching grants to volunteer fire departments to purchase equipment and make capital improvements. In 2005, the Department received 567 applications for grants requesting matching funds of $6,577,455. The available monies in the Fund totaled only $4,369,976. The Department approved 500 applications totaling $4,365,489.

[11] Prior to January 1, 2008, the 1.33% State rate did not apply to marine and automobile policies.

[12] Three percent (3%) of the tax proceeds are credited to the State Firemen's Association for general purposes. Two percent (2%) of the proceeds are used by the Department of Insurance for the purpose of administering the disbursement. The remaining funds are allocated among the fire districts in proportion to the amount of business done in the district and used by the local district for firemen's local relief purposes. *See Article 84 of Chapter 58 of the General Statutes.*

[13] Fire loss, 100% of policy taxable; homeowners, 50% taxable; farm owners, 30% taxable; non-liability portion of commercial multiple peril, 100%, liability portion of commercial multiple peril, 0%.

departments must respond to more than just fire calls; they are often the first responders to many types of calls that involve property damage. To keep the changes revenue neutral, the legislation reduced the tax rate from 1.33% to 0.85%, and it directed the Revenue Laws Study Committee to continue studying this issue to ensure a revenue neutral tax rate.

The base broadening of the 2006 legislation also eliminated the 0.5% tax imposed on contracts of insurance applicable to fire and lightning coverage within fire districts. By applying the tax broadly, it made unnecessary the accounting by insurance companies of the amount of premiums written in fire districts. The removal of this accounting greatly reduces the administrative compliance burden for the companies. The 2006 legislation established a new method of distribution based upon a per capita allocation among fire districts, effective January 1, 2008, and directed the Revenue Laws Study Committee to study the distribution to the local fire districts.

Based upon the recommendation of the Revenue Laws Study Committee to the 2007 General Assembly, this act makes the following changes to the law:

- It reduces the additional tax rate on property coverage contracts from 0.85% to 0.74% to ensure a revenue neutral tax rate. It also clarifies that the tax rate includes wind-only premiums.
- It changes the distribution formula for the funds distributed to local fire districts. The 2006 legislation provided that the funds would be distributed on a per capita basis. Further study revealed that this distribution formula would result in fire districts receiving significantly different distribution amounts. The act changes the distribution formula so that the amounts distributed under it more closely follow the current distribution patterns. Under the new distribution formula, the Insurance Commissioner will allocate to each county the amount of tax proceeds it received in the previous year. From that amount, the Commissioner will distribute to each fire district in the county the amount it received in the previous year. If the amount of proceeds to be allocated varies from the amount allocated the previous year, then the amount allocated to a county will be either reduced or increased by a percentage, the numerator of which is the population of the county and the denominator of which is the population of the State. If the amount to be distributed to the fire districts differs from the amount distributed the previous year, then the amount distributed will be either reduced or increased by a percentage, the numerator of which is the tax value of the property located in the district and the denominator of which is the tax value of all property located in any fire district in that county.
- It increases the percentage of the tax proceeds allocated to the Volunteer Fire Department Fund from 20% to 30%. This change reduces the amount allocated to the General Fund from 55% to 45%.
- It increases from $20,000 to $30,000 the cap on the grants from the Volunteer Fire Department Fund. It also changes in the following ways the qualifications for grants from the Fund so that more volunteer fire departments may qualify for grants:
    - It provides that a volunteer fire department may qualify for a grant if it serves a response area of no more than 12,000 people (was 6,000).
    - It provides that a volunteer fire department may qualify for a grant if it has no more than six full-time paid positions (was three).

PROPERTY TAX COMMISSION TERMS.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-308	**HB 1555**	**Representative Owens**

AN ACT PROVIDING FOUR-YEAR TERMS FOR ALL APPOINTMENTS TO THE PROPERTY TAX COMMISSION.

OVERVIEW: This act provides that the terms of the members of the Property Tax Commission are for four years and expire on June 30.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on July 28, 2007, and applies to appointments made on or after July 1, 2007.

ANALYSIS: This act provides that all members appointed to the Property Tax Commission will serve four-year terms expiring on June 30. The Property Tax Commission consists of five members, three of whom are appointed by the Governor and two of whom are appointed by the General Assembly. Of the two appointments by the General Assembly, one is made upon the recommendation of the Speaker of the House and the other is made upon the recommendation of the President Pro Tempore of the Senate. Prior to this act, all appointees served four-year terms, except the member appointed upon the recommendation of the Speaker of the House. That member served a two-year term.

The Property Tax Commission is the five-member State board of equalization and review that hears and decides taxpayers' administrative appeals from decisions concerning the listing, appraisal, or assessment of property made by county boards of equalization and review and boards of county commissioners. The Commission also hears appeals from orders of boards of county commissioners adopting schedules of values, standards, and rules. The Commission must meet at least once in each quarter and may hold special meetings at any time and place within the State at the call of the Chair or upon the written request of at least three members. The Chair is designated by the Governor and serves at the pleasure of the Governor. The expenses of the Commission do not come from the General Fund but are paid by local governments.[14] The Commission is authorized to set the salary for its members. Currently, members receive $400 a day for their work on the Commission, and the Chair receives $450 a day.[15]

CONSERVATION TAX CREDIT MODIFICATIONS.

Session Law	*Bill #*	*Sponsor*

[14] The Department of Revenue collects local sales taxes on behalf of local governments and distributes the proceeds quarterly. In making these distributions, the Department is required under G.S. 105-501 to deduct the State's costs relating to local property tax administration, the Property Tax Commission, the School of Government's property tax training program, and the Local Government Commission.

[15] Section 7.11 of S.L. 2000-67 provides that members receive travel, subsistence, and salary while being trained and clarifies that those members should receive salary and reimbursement while deciding, as well as hearing, cases.

S.L. 2007-309	HB 463	Representative Luebke

AN ACT TO MODIFY THE CREDIT FOR CERTAIN REAL PROPERTY DONATIONS.

OVERVIEW: This act does four things:

- It equalizes the cap for the conservation tax credit for corporations and pass-through entities at $500,000.
- It requires a taxpayer claiming the credit to support the claim's represented value of the real property donation.
- It narrows the conservation purposes that qualify property for the credit.
- It provides that a married couple filing jointly is entitled to the same tax credit cap as two unrelated individuals making an equivalent donation of property.

FISCAL IMPACT: There is not sufficient data available for an accurate assessment of the overall fiscal impact from the changes in this act. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act is effective for taxable years beginning on or after January 1, 2007.

ANALYSIS: The General Assembly first enacted the conservation income tax credit in 1983. The credit is allowed to a taxpayer that donates real property useful for public beach access or use, public access to public waters or trails, fish and wildlife conservation, or other similar land conservation purposes. To qualify for the credit, the land must be donated in perpetuity to and accepted by the State, a local government, or a body organized to receive and administer lands for conservation purposes and qualified to receive charitable contributions. The amount of the credit is 25% of the fair market value of the donated property interest, capped at $250,000 for individuals and $500,000 for corporations.[16]

The Revenue Laws Study Committee reviewed the credit. This act addresses some of the issues identified by the Committee.

Application of dollar limitation. – The act makes two adjustments to the tax credit cap:

- Pass-through entities. – The act equalizes the cap for the conservation tax credit for corporations and pass-through entities at $500,000 by increasing the existing dollar limitation for pass-through entities from $250,000 to $500,000.[17] The higher dollar limitation for a pass-through entity will provide a greater incentive for the multiple owners of a pass-through entity to donate property. Each individual who is an owner of a pass-through entity is allowed a credit equal to the owner's allocated share of the credit to which the pass-through entity is eligible, subject to the individual credit cap of $250,000. When an owner's share of the pass-through entity's credit is limited due to the $250,000

[16] The higher dollar limitation for corporations reflects the fact that corporations are prohibited from claiming both a tax deduction and a tax credit for the same donation. However, individuals may take a charitable contribution deduction as well as the tax credit for the same donation.

[17] The act makes a technical change to the language of G.S. 105-130.34 to refer specifically to C Corporations, since G.S. 105-151.12 deals with pass-through entities, including S Corporations.

individual credit cap, the pass-through entity and its owners may not reallocate the unused credit among the other owners.

- Married couples. – The act clarifies that the dollar limitation for a married couple filing jointly is $500,000.

The dollar limitation for the initial credit in 1983 was $5,000 for all taxpayers. In 1997, the General Assembly created two different caps: $100,000 for individuals and $250,000 for corporations. In the case of a pass-through entity, the dollar limitation applied to each individual member of the pass-through entity rather than to the pass-through entity itself. The General Assembly increased the dollar limitations to their current amounts in 1999: $250,000 for individuals and $500,000 for corporations.

In 2001, the Revenue Laws Study Committee proposed that North Carolina begin applying dollar amount limitations of most tax credits to pass-through entities as a whole rather than as to each individual member.[18] The bill enacted by the General Assembly, S.L. 2001-335, excluded the conservation tax credit from the general rule found in G.S. 105-269.15 and preserved the historic treatment of pass-through entities taking the tax credit by applying the cap only to the individual members of the pass-through entity. This exception for the conservation tax credit was originally set to expire in 2005; however, the sunset was extended twice, preserving the unique application of the cap for the conservation tax credit until it expired on January 1, 2007. Prior to the enactment of this act, a pass-through entity claiming the conservation tax credit in 2007 would have been limited to a cap of $250,000 and that amount would have been allocable among its owners in proportion to their ownership interest.

Accuracy of valuation. – The act addresses valuation concerns of donated property by requiring the use of certain types of supported appraisal reports or the county's appraisal value. These concerns, reported by the Department of Revenue, stem from the use of restricted appraisal reports that are compiled specifically for one person and contain little or no information relied upon by the appraiser to formulate the property's value and the lack of any requirement under the prior law of specific documentation useful for establishing the fair market value of the donation. Under prior law, a taxpayer was required to file with the income tax return a certification by the Department of Environment and Natural Resources (DENR) that the property is suitable for the statutorily listed conservation purposes. DENR did not review the documentation in an effort to verify the taxpayer's representation as to the fair market value of the donated property interest.

The act addresses this valuation concern by requiring a taxpayer to support a claim for a credit with either a self-contained or a summary appraisal report, which are two types of reports defined by Standards Rule 2-2 of the Uniform Standards of Professional Appraisal Practice and required to have certain information included supporting the valuation determination. A taxpayer may elect, for fee simple donations of property only, to use the county's appraised value of the property as adjusted by the sales assessment ratio.

Clarification of conservation purposes. – The act reduces uncertainty with respect to the types of uses that qualify for conservation purposes by substituting specific uses in place of the catch-all phrase 'other similar land conservation purposes'. Differences in the statutory construction of the phrase, 'other similar land conservation purposes' developed between DENR and the Department of Revenue. The act eliminates the phrase and substitutes six new, specific conservation purposes:

---

[18] Doing so brought North Carolina into conformity with how federal law allowed pass-through entities to take tax credits. See G.S. 105-269.15.

forestland or farmland conservation, watershed protection, conservation of natural areas as that term is defined in G.S. 113A-164.3(3), conservation of natural or scenic river areas as those terms are used in G.S. 113A-34, conservation of predominantly natural parkland, or historic landscape conservation.

2007 APPROPRIATIONS ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-323, as amended by S.L. 2007-345	**HB 1473, as amended by HB 714**	**Rep. Michaux, Crawford, Yongue**

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

OVERVIEW: This act authorizes special indebtedness for various higher education and State facilities, increases various fees to provide revenue necessary to fund receipt-supported services, and makes the following tax law changes:

Section & Effective Dates	Description	Fiscal Impact
Individual & Corporate Income Tax Changes		
31.1 *Effective 1/1/2007*	**IRC Update** – Updates the reference to the Internal Revenue Code to January 1, 2007, which effectively makes the following changes: • Extends the enhanced small business expensing thresholds. • Extends the deduction for higher education expenses. • Extends the deduction for qualified expenses of elementary and secondary school teachers. • Excludes up to $3,000 of otherwise taxable distributions from a government pension plan of retired public safety officers when the money is used to pay for health insurance premiums.	FY 2007-08 $56.9 million loss FY 2008-09 $49.1 million loss FY 2009-10 $14.4 million loss FY 2010-11 $14.1 million loss
31.4 *Effective 1/1/2008* *Expires 1/1/2013*	**Earned Income Tax Credit** – Establishes a refundable State EITC equal to 3.5% of an individual's federal EITC.	FY 2008-09 $48.3 million loss FY 2009-10 $48.3 million loss FY 2010-11 $48.3 million loss FY 2011-12 $48.3 million loss

Section & Effective Dates	Description	Fiscal Impact
31.5 *Effective 1/1/2007* *Expires 1/1/2013*	**Reenact Long-Term Care Credit** - Subject to an income limitation, allows a taxpayer to receive a credit equal to 15% of the premium paid each year on a long-term care insurance policy, with a cap of $350 per policy. The prior credit expired in 2004.	FY 2007-08 $7.0 million loss FY 2008-09 $7.2 million loss FY 2009-10 $7.3 million loss FY 2010-11 $7.5 million loss FY 2011-12 $7.7 million loss
31.6 *Effective 1/1/2007* *Expires 1/1/2013*	**Adoption Tax Credit** – Establishes a nonrefundable credit for adoption-related expenses equal to 50% of the federal adoption credit amount. The amount is reduced based upon a taxpayer's modified AGI.	FY 2007-08 $3.0 million loss FY 2008-09 $3.0 million loss FY 2009-10 $3.0 million loss FY 2010-11 $3.0 million loss FY 2011-12 $3.0 million loss
31.18 *Effective 1/1/2007*	**REIT Provision** - Limits a corporation's ability to use captive real estate investment trusts (REITs) to avoid State taxes by disallowing the dividend paid deduction when a REIT is a captive REIT.	No discernible impact.
31.19 *Effective 1/1/2007*	**Enhance 529 Plan Income Tax Deduction** -Changes the current income tax deduction for contributions to the Parental Savings Trust Fund as follows: • It removes the January 1, 2011 sunset. • It increases the maximum annual deduction amount allowable from $2,000 to $2,500 single filers and from $4,000 to $5,000 for married couples filing jointly. • It removes the income limitations for taxable years 2007 through 2011.	FY 2007-08 $0.2 million loss FY 2008-09 $0.2 million loss FY 2009-10 $0.2 million loss FY 2010-11 $0.2 million loss FY 2011-12 $0.2 million loss
31.21 *Effective 1/1/2007*	**Work Opportunity Tax Credit** – Establishes an income tax credit for a taxpayer who is allowed a Work Opportunity Tax Credit (WOTC) under the IRC. The amount of the credit is equal to 6% of the amount of credit allowed under the Code. The credit allowed may not exceed 50% of the tax against which it is claimed, and any unused portion of the credit may be carried forward for five years.	FY 2007-08 $3.0 million loss FY 2008-09 $3.0 million loss FY 2009-10 $3.0 million loss FY 2010-11 $3.0 million loss FY 2011-12 $3.0 million loss
31.24 *Effective 1/1/2007*	**Firefighter/Rescue Squad Tax Deduction** – Establishes a $250 income tax deduction for a person who works as an unpaid member for a volunteer fire department, volunteer rescue department, or an EMS squad and attends at least 36 hours of training during the year.	FY 2007-08 $10.5 million loss FY 2008-09 $10.7million loss FY 2009-10 $10.8 million loss FY 2010-11 $11.0 million loss FY 2011-12 $11.2 million loss

Section & Effective Dates	Description	Fiscal Impact
Effective 1/1/2008	**Expiration of Upper Income Tax Bracket**[19] **–** Under current law, the upper income tax rate is 8% for tax year 2007. This rate is scheduled to be eliminated in 2008. As part of its overall budget package, the General Assembly decided not to extend the sunset. Thus, the current 8% upper income tax bracket will expire in 2008. Beginning with tax year 2008, the top rate will be 7.75%.	The fiscal impact of this item is considered to be zero since it is allowing a tax to sunset.
Sales Tax Changes		
31.2 *Effective 7/31/2007*	**Maintain Current Sales Tax Rate** – Makes permanent the State sales tax rate at 4.25%.	FY 2007-08 $258.4 million gain FY 2008-09 $285.9 million gain FY 2009-10 $299.2 million gain FY 2010-11 $312.6 million gain FY 2011-12 $326.7 million gain
31.14 *Effective 10/1/2007*	**Amend Sales Tax Holiday –** Provides that school instructional materials with a sales price of $300 or less are exempt from sales tax during the first weekend of August.	
Economic Incentives		
31.7 *Effective 10/1/2007*	**Privilege Tax on Software Publishers' Machinery & Equipment** – Reduces the tax paid on certain purchases of machinery and equipment by software publishing companies by exempting those purchases from the 6.75% sales tax and imposing a 1% privilege tax on the sales prices, subject to an $80 cap.	FY 2007-08 $2.8 million loss FY 2008-09 $4.0 million loss FY 2009-10 $4.0 million loss FY 2010-11 $4.0 million loss FY 2011-12 $4.1 million loss
31.8 *Effective 1/1/2007*	**Enhance Tax Credit for R & D Expenditures** – Expands the existing tax credit for taxpayers with qualified research and development expenses. The amount of the credit is equal to a percentage of the qualifying expenses and varies depending upon the size and tier location of the business.	FY 2007-08 $0.4 million loss FY 2008-09 $0.8 million loss FY 2009-10 $1.2 million loss FY 2010-11 $1.2 million loss FY 2011-12 $1.2 million loss

[19] There was no legislative action taken during the 2007 Session to effectuate this change.

Section & Effective Dates	Description	Fiscal Impact
31.9 *Effective 1/1/2007*	**Modify Tax Credit for Constructing Renewable Fuel Facilities** – Modifies the enhanced credit for constructing renewable fuel production facilities as follows: • The credit may be claimed against the franchise tax as well as the income tax. • A taxpayer who claimed the enhanced tax credit and later fails to meet the requirements of the enhanced credit may take the non-enhanced credit for constructing renewable fuel production facilities. A taxpayer who forfeits the enhanced credit must pay the additional avoided taxes and interest on the avoided taxes from the original due date of the taxes.	FY 2007-08 No impact FY 2008-09 $2.3 million loss FY 2009-10 $4.8 million loss FY 2010-11 $6.8 million loss FY 2011-12 $6.8 million loss
31.10 *Effective 7/31/2007*	**Expand Sales and Use Tax Refund for Certain Aircraft Manufacturers** – Expands the definition of 'aircraft manufacturing' and allows aircraft manufacturers to qualify for a refund of sales and use taxes paid on building materials and supplies, fixtures, and equipment that are installed in the construction of and become part of the real property of the aircraft manufacturing industrial facility. The taxpayer must meet minimum investment thresholds to qualify.	FY 2007-08 $0.8 million loss FY 2008-09 $0.8 million loss FY 2009-10 $0.8 million loss FY 2010-11 $0.8 million loss FY 2011-12 $0.8 million loss
31.20 *Effective 7/31/2007*	**Sales Tax Refund – Research Supplies** – Provides a sales and use tax refund to a taxpayer who is engaged in analytical services in the State. The amount of the refund depends upon the amount by which the tax paid in the fiscal year exceeds the amount paid in fiscal year 06-07.	FY 2007-08 No impact FY 2008-09 $2.6 million loss FY 2009-10 $5.4 million loss FY 2010-11 $5.7 million loss FY 2011-12 $6.0 million loss
31.22 *Effective 10/1/2007*	**Datacenter Sales Tax Exemption** – Reduces the tax paid on certain purchases of machinery and equipment located and used at eligible datacenters by exempting the purchases from the 6.75% sales tax and imposing a 1% privilege tax on the sales price, subject to an $80 cap.	FY 2007-08 No impact FY 2008-09 No impact FY 2009-10 $5.2 million loss FY 2010-11 $7.0 million loss FY 2011-12 $8.7 million loss

Section & Effective Dates	Description	Fiscal Impact
31.23 *Effective 1/1/2007*	**Tax Incentive for Railroad Intermodal Facility** – Establishes a new income tax credit and new sales and use tax exemptions and refunds for a taxpayer who constructs or leases and puts into operation an eligible railroad intermodal facility. To be eligible, the cost of construction of the facility must exceed $30 million.	FY 2007-08 $0.2 million loss FY 2008-09 $0.3 million loss FY 2009-10 $0.9 million loss FY 2010-11 $2.0 million loss FY 2011-12 $2.0 million loss
Excise Taxes		
6.23 *Effective 10/1/2007*	**University Cancer Research Fund** – Increases from 3% to 10% the excise tax on OTP to fund, in part, the University Cancer Research Fund.	FY 2007-08 $11.4 million gain FY 2008-09 $16.5 million gain FY 2009-10 $17.0 million gain FY 2010-11 $17.5 million gain FY 2011-12 $18.1 million gain
31.15 *Effective 7/31/2007*	**Cap the Variable Wholesale Component of the Motor Fuels Tax Rate for Two Years** – Extends the existing cap for two years, capping the variable wholesale component of the motor fuels tax rate at 12.4¢ per gallon for the period July 1, 2007, through June 30, 2009, for a maximum possible rate of 29.9¢ per gallon.	FY 2007-08 $85.8 million loss FY 2008-09 $54.3 million loss
General State & Local Changes		
31.16 *Effective over 3-year period, beginning 10/1/2007*	**State Assume Medicaid Responsibilities** – Provides that the State assumes the counties' share of the nonfederal share of Medicaid costs over a three-year period as set out below. To offset the cost to the General Fund, the third one-half cent local sales tax is phased out and the State sales tax rate is increased by the same amount. 10/1/2007 = 25% 7/1/2008 = 50% 7/1/2009 = 100%	FY 2007-08 $60.8 million loss FY 2008-09 $91.9 million loss FY 2009-10 $146.7 million loss FY 2010-11 $149.5 million loss FY 2011-12 $184.1 million loss

Section & Effective Dates	Description	Fiscal Impact
31.17 *Effective 7/31/2007*	**Local Option County Taxes** – Provides authority for two new local taxes, of which counties may choose to levy only one if a majority of those voting in a referendum vote for the levy of the tax: • Land transfer tax on transfers of land within the county. The rate of tax may be up to .4% of the greater of the value of or consideration paid for the property, and the rate must be an increment of .1%. • A ¼-cent sales and use tax. The rate of tax is .25% of the sales price of the item, in addition to all other State and local sales and use taxes, except for purchases of food exempt from tax under G.S. 105-164.13B. The adoption, levy, collection, administration, and repeal of this sales and use tax are in accordance with the first one-cent local sales and use tax.	No State impact.

FISCAL IMPACT: See **ANALYSIS**. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: See **ANALYSIS.**

ANALYSIS: The 2007 Appropriations Act made many tax law changes and appropriated funds to be used for economic development, authorized special indebtedness for various higher education and State facilities, and increased various fees to provide revenue necessary to fund receipt-supported services.

Part I: Individual and Corporate Income Tax Changes

IRC update. – Section 31.1 of the act updates the reference to the Internal Revenue Code used in defining and determining certain State tax provisions from January 1, 2006, to January 1, 2007. The section became effective when the Governor signed the act into law on July 31, 2007. The provision is a recommendation of the Revenue Laws Study Committee and was included in the Governor's revenue recommendations. Fiscal Research estimates that conforming to the Code will reduce General Fund availability by $56,900,000 in FY07-08 and by $49,100,000 in FY08-09. Updating the reference to the Code effectively made the following tax policy changes:

- It extends the enhanced small business expensing thresholds.
- It extends the deduction for higher education expenses.

- It extends the deduction for qualified expenses of elementary and secondary school teachers.
- It authorizes the exclusion of up to $3,000 of otherwise taxable distributions from a government pension plan of retired public safety officers when the money is used to pay for health insurance premiums.

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code by reference to the Code. The General Assembly determines each year whether to update its reference to the Internal Revenue Code. Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law tracks federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made. Changing the reference date to January 1, 2007, incorporates the changes made in the following acts: the Deficit Reduction Act of 2005, the Tax Increase Prevention and Reconciliation act of 2005, the Heroes Earned Retirement Opportunities Act, the Pension Protection Act of 2006, and the Tax Relief and Health Care Act of 2006.[20]

Earned income tax credit. – Section 31.4 of the act establishes a refundable State earned income tax credit.[21] The credit is equal to 3.5% of an individual's federal earned income tax credit. It becomes effective for taxable years beginning on or after January 1, 2008, and expires for taxable years beginning on or after January 1, 2013. Fiscal Research estimates that the earned income tax credit will reduce General Fund availability by $48,300,000 in FY08-09.

The Internal Revenue Code provides an earned income tax credit for individuals who work and whose adjusted gross income does not exceed a specified amount. The credit is intended to offset some of the increases in living expenses and social security taxes and provide an incentive for low-income families to work instead of collect welfare. The amount of the credit may exceed the amount of tax owed by the taxpayer. If the credit allowed exceeds the amount of tax imposed, the excess is refundable to the taxpayer.

To be eligible for the credit, an individual must meet the following requirements:

- Have a valid social security number.
- Have earned income from employment or self-employment.
- Be a U.S. citizen, a resident alien all year, or a nonresident alien married to a U.S. citizen or resident alien and filing a joint return.
- Is not a qualifying child of another person.
- Have a qualifying child OR meet the following requirements:
  - Age 25 but under age 65 at the end of the year.
  - Live in the U.S. for more than half the year.

---

[20] A more detailed summary of the recent amendments to the Code is available upon request.
[21] As of 2006, 20 states offer an earned income tax credit. In most instances, the credit is refundable. North Carolina has three other refundable tax credits: the credit for qualifying expenses of a production company, the credit for low-income housing, and the credit for reinvestment by major recycling facilities.

The amount of the federal credit varies depending upon whether the taxpayer has children and the amount of earned income the taxpayer has. The credit is phased out as the taxpayer's earned income rises. To qualify for the credit in 2006, an individual's earned income may not exceed $38,348 for an individual who is married filing jointly with two or more qualifying children. The maximum federal credit amount allowed in 2006 is $4,536 for an individual with two or more qualifying children; for North Carolina, the maximum credit amount would be approximately $159. The maximum federal credit amount in 2006 for an individual with no children is $412; for North Carolina the maximum credit amount would be approximately $14. The earned income amounts and the credit amounts are indexed to inflation.

In the 2005 tax year, more than 22 million individuals received $41.4 billion in the federal earned income tax credit. However, the IRS estimates that 20 to 25% of people who qualify for the credit do not claim it. To better ensure taxpayers in North Carolina receive the benefits of the earned income tax credit, Section 24.3 of this act, as amended by Section 14.3 of S.L. 2007-345 (Section 14.3 of HB 714) [22] does two things:

- It requires the Department of Revenue to include information on the earned income tax credit in its printed booklets for the individual income tax return.
- It requests that software companies producing computer programs for tax calculation in North Carolina design the programs to automatically compute an individual's eligibility for the State and federal credit.

Reenact long-term care credit. – Long-term care insurance is designed to protect individuals against the high costs of long-term care. The General Assembly enacted a long-term care insurance tax credit in 1998. It expired in 2004.[23] Section 31.5 of this act reenacts the individual income tax credit for premiums paid on long-term care insurance, effective for taxable years beginning on or after January 1, 2007. The credit expires for taxable years beginning on or after January 1, 2013. Fiscal Research estimates that the credit will reduce General Fund revenues by $7,000,000 in FY07-08 and by $7,200,000 in FY08-09.

The credit amount is equal to 15% of the premium paid each year on a long-term care insurance policy. The credit may not exceed $350 for each policy for which the credit is claimed. The credit differs from the former credit in that to be eligible to claim it a taxpayer's adjusted gross income must not exceed the following amount:

Filing Status	AGI
Married filing jointly	$100,000
Head of Household	$ 80,000
Single	$ 60,000
Married filing separately	$ 50,000

A taxpayer may claim a credit for policies that provide coverage for either the taxpayer, the taxpayer's spouse, or a family member for whom the taxpayer provides over half of the support and whose income is below an exemption amount. The credit may not exceed the amount of tax

[22] Section 14.3 of S.L. 2007-345 changes the effective date of this administrative provision from January 1, 2007, to January 1, 2008 to conform to the effective date of the new State earned income tax credit.
[23] The Department of Revenue reported in 2001 that 90% of the taxpayers who claimed the credit were not eligible for it. The error rate declined to 27% in 2002 and to 15% in 2003.

owed by the taxpayer, and there is no provision to allow unused portions of the credit to be carried forward.

Under federal law, premiums paid on long-term care insurance contracts are treated as deductible medical expenses. Under the medical expense itemized deduction, unreimbursed medical expenses may be deducted to the extent that the expenses exceed 7.5% of adjusted gross income. To the extent a taxpayer will receive a deduction for long-term care insurance premiums under the Code, the taxpayer will receive a deduction for State income tax purposes as well since North Carolina uses federal taxable income as the starting point for calculating State taxable income. To prevent a double tax benefit in those cases, the credit is limited to those expenses for which a deduction has not been claimed.

Since 2003, bills to reinstate the credit have been introduced, but until this act, those bills were not enacted. In S.L. 2006-66, the General Assembly directed the Department of Health and Human Services to develop a North Carolina Long-Term Care Partnership Program as an alternative to the tax credit to encourage people to purchase long-term care insurance. This program is a joint effort between states and private insurance companies with a goal of reducing Medicaid expenditures. The Program allows those that purchase long-term care insurance policies to protect some or all of their assets and still qualify for Medicaid. This Program remains in effect.

Adoption tax credit. – Section 31.6 of this act creates an individual income tax credit for adoption related expenses. The amount of the credit is equal to 50% of the taxpayer's federal adoption tax credit amount. The federal adoption tax credit amount may be up to $10,960 per eligible child for the 2006 taxable year. The amount of the credit is reduced based upon the taxpayer's modified adjusted gross income. For the 2006 taxable year, the tax credit phase-out ranges from $164,410 to $204,410. Both the credit amount and the income phase-out ranges are indexed to inflation. The credit may not exceed the amount of tax owed by the taxpayer. However, like the federal tax credit, the State tax credit may be carried forward for five years. The credit is effective for taxable years beginning on or after January 1, 2007, and expires for taxable years beginning on or after January 1, 2013. The Governor included this provision in his budget recommendations. Fiscal Research estimates that the credit will reduce General Fund availability by $3,000,000 in FY07-08 and in FY08-09.

To be eligible for the federal adoption tax credit, a taxpayer must adopt an eligible child and pay qualified adoption expenses. An eligible child is a child 17 years of age or younger or a child of any age who is a U.S. citizen or resident alien and who is physically or mentally incapable of caring for himself or herself. Qualified adoption expenses are calculated by adding up all the expenses directly related to the adoption that are reasonable and necessary for the adoption and subtracting any amounts reimbursed or paid for by an employer, government agency, or other organization. Taxpayers who adopt a special needs child may claim the full amount of the credit without regard to the actual expenses paid.

The year in which a taxpayer may claim the credit depends on when the adoption was finalized and whether the adopted child is a U.S. citizen, resident alien, or a foreign national. If the child is a U.S. citizen or a resident alien, the adoption credit may be claimed for expenses incurred before the adoption is final in the year after the expenses are incurred; it may be claimed in the same year for expenses incurred in the year the adoption is final; and it may be claimed in the year the expenses are incurred if they are incurred in the year after the adoption is final. For a child who is a foreign national, the credit may be claimed in the year the adoption becomes final, or in the year the expenses are incurred if they are incurred in the year after the adoption becomes final. The

dollar limit for a particular year must be reduced by the amount of qualifying expenses taken into account in previous years for the same adoption effort.

Alternative for addressing a corporation's attempt to avoid State taxes through the use of a REIT. – Section 31.18 of this act limits a corporation's ability to use captive real estate investment trusts (REITs) to avoid State taxes by disallowing the dividend paid deduction when a REIT is a captive REIT. A REIT is an organization that uses the pooled capital of many investors to purchase and mange real estate. A REIT that is owned or controlled by a single entity is commonly referred to as a captive REIT. Two common types of captive REITs are rental REITs and mortgage REITs.

Under federal and State law, a REIT is taxable only on income that is not distributed to shareholders. The amount of income a REIT distributes is not subject to tax because the REIT is allowed a deduction for the dividends it pays. The amounts received by the shareholders of the REIT are taxable.

In a rental REIT, a corporation that owns real property and uses the property in its business, such as a retail store, forms a REIT and transfers ownership of the property to the REIT. The corporation that operates the store and uses the property makes rental payments to the REIT, which reduces the State income tax liability of the corporation. The REIT is not taxed on the rental income because it is allowed a dividend paid deduction under federal law.

If the corporation receives dividends from the REIT directly, the corporation will pay tax on the dividends it receives. If, however, an affiliated corporation receives the dividends from the REIT and then transfers the dividends to the corporation, the corporation will not pay tax on the amount it receives because it will be able to deduct the amount received from the affiliated corporation under another deduction allowed under federal and state law — the dividend received deduction. If the affiliated company that receives the dividends from the captive REIT is outside the State and has no nexus with the State, the out-of-state holding company will pay no State tax on the income.

As a result of this chain of transfers, the corporation is allowed a deduction for rental expenses, the REIT that receives the rental income is allowed a dividend paid deduction when it distributes the rental income, the out-of-state affiliate that receives the dividend from the REIT is not subject to tax in North Carolina (because of lack of nexus), and the corporation that receives the dividend from its affiliated out-of-state holding company is not subject to tax on the amount it receives because of the dividend received deduction. The corporation has, in effect, been allowed a deduction for its rental expenses and been able to receive the amount it deducted as tax-free income in the form of a dividend received.

In a mortgage REIT, a financial institution forms a REIT and transfers to the captive REIT mortgages or mortgage-backed securities originated by the financial institution. The interest income that would have accrued to the financial institution now accrues to the REIT. The REIT takes the dividend paid deduction when it distributes its income.

The Department of Revenue is aggressively pursuing the closure of this tax avoidance strategy. The Secretary of Revenue has the statutory authority to require a corporate taxpayer to file a consolidated return if the Secretary finds that a separate return filed by the taxpayer does not disclose the true earnings on its business carried on in this State. The Secretary also has the authority to determine the net income of a corporate taxpayer properly attributable to this State if the Secretary has reason to believe the taxpayer's report does not do so. In most instances, this

method of addressing a corporation's attempt to use a captive REIT to shift income between entities and avoid State taxes is arduous and litigious.

Section 31.18 of this act provides another method to prevent this tax avoidance strategy. Effective for taxable years beginning on or after January 1, 2007, a captive REIT is not allowed to take the dividend paid deduction under State law.[24] Instead, the captive REIT is subject to tax on those dividends and the entity that received the dividend from a captive REIT is allowed a dividend received deduction so that the dividend is not taxed twice.

A 'captive REIT' is defined as a REIT whose shares or certificates of beneficial interest are not regularly traded on an established securities market and are owned or controlled, at any time during the last half of the tax year, by a person that is subject to tax under this Part and is not one of the following:

- A REIT.
- A listed Australian property trust. A listed Australian property trust is Australia's version of a U.S. publicly traded REIT.

This section also directs the Department of Revenue to report to the Revenue Laws Study Committee by May 1, 2009, on the amount of corporate income tax revenue generated by closing the captive REIT loophole. Based upon this report, the Revenue Laws Study Committee must determine the revenue-neutral corporate income tax rate and include this information in its report to the 2010 Session of the 2009 General Assembly.

<u>*Enhance 529 Plan income tax deduction.*</u> – Section 31.19 of this act makes the following three changes to the income tax deduction for contributions made to the Parental Savings Trust Fund, created by the General Assembly last session in S.L. 2006-66:

- It removes the January 1, 2011 sunset of the deduction.
- It increases the maximum annual deduction amount allowable to an individual taxpayer for contributions to the Parental Savings Trust Fund from $2,000 to $2,500. In the case of a married couple filing a joint return, it increases the maximum deduction amount from $4,000 to $5,000.
- It removes the income limitations for taxable years 2007 through 2011.

The changes become effective for taxable years beginning on or after January 1, 2007. Fiscal Research estimates that the changes will reduce General Fund availability by $200,000 for FY07-08 and FY08-09.

In 1996, the General Assembly established the Parental Savings Trust Fund. The Fund is maintained by the State Education Assistance Authority, a political subdivision of the State, and is administered by the College Foundation of North Carolina as agent of the Authority. The Fund was established to enable qualified parents to save funds to meet the costs of the postsecondary education expenses of eligible students. Anyone may contribute to the Fund. Because the Fund meets the qualifications of a qualified tuition program under Section 529 of the Internal Revenue Code, distributions from the Fund are excludable from taxable income to the extent the

---

[24] Several states have enacted captive REIT legislation similar to these provisions. The states are: Maryland (HB 1257 of the 2007 Session), Kentucky, Indiana, Pennsylvania, Louisiana, and Mississippi.

distributions are used to pay for qualified higher education expenses. Interest earned on the Fund is also tax-exempt.

Every state offers a state Section 529 plan, and at least twenty-five states allow for a full or partial income tax deduction for contributions to the state's own plan. Last session, effective for the 2006 taxable year, the General Assembly enacted legislation that allows an individual taxpayer to deduct from the taxpayer's taxable income an amount contributed by a taxpayer to an account in the State's plan: the Parental Savings Trust Fund. The maximum amount that may be deducted by an individual in the 2006 taxable year was $750; the maximum amount for a married couple filing jointly was $1,500. The maximum deductible amount for the 2007 taxable year was $2,000 for an individual taxpayer and $4,000 for a married couple filing jointly. This act increases the amounts deductible for taxable years beginning on or after January 1, 2007, by $500 to $2,500 and $5,000 respectively.

To qualify for the deduction, the adjusted gross income of the individual taxpayer or married couple filing jointly may not exceed the stated statutory amount. The income limitations of the deduction are the same income limitations a taxpayer must meet to qualify for the higher personal exemption amount and the $75 tax credit for each dependent child. This act removes the income limitation for five years: taxable years 2007 through 2011. Effective for taxable years beginning on or after January 1, 2012, an individual will not qualify for the State tax credit unless the individual's adjusted gross income falls below the statutory limitations.

The Parental Savings Trust Fund deduction must be added back to taxable income if the amount withdrawn from the Fund was not used to pay for qualified higher education expenses of the designated beneficiary. An exception is made if the withdrawal was made due to the death or permanent disability of the beneficiary.

Work Opportunity Tax Credit. – Section 31.21 of this act provides a State income tax credit to a taxpayer who is allowed a Work Opportunity tax credit (WOTC) under the Internal Revenue Code. The amount of the credit is equal to 6% of the amount of credit allowed under the Code. The credit may be claimed against the franchise tax or the income tax. The taxpayer must elect the tax against which a credit will be claimed when filing the return; the election is binding. The credit allowed may not exceed 50% of the tax against which it is claimed. Any unused portion of the credit may be carried forward for five years. The carryforwards must be claimed against the same tax. The credit is effective for taxable years beginning on or after January 1, 2007. The federal credit expires December 31, 2007. Fiscal Research estimates that the credit will reduce General Fund availability by $3,000,000 for FY07-08 and FY08-09.

The WOTC is designed to help move people from welfare into gainful employment and obtain on-the-job experience. On December 20, 2006, the President signed into law the Tax-Relief and Health Care Act of 2006 (P.L. 109-432). This legislation merged the Welfare-to-Work Tax Credit into the WOTC and extended the WOTC program for a two-year period, through December 31, 2007. The current credit applies only to new employees hired on or after January 1, 2007, and before January 1, 2008. The new employee must belong to one of the following nine target groups:

- A member of a family that is receiving or recently received Temporary Assistance to Needy Families (TANF) for at least 18 consecutive months ending on the hiring date.
- A member of a family that is receiving or recently received TANF benefits for any 9-month period during the 18-month period ending on the hiring date.
- An 18 to 39 year old member of a family that is receiving or recently received food stamps.

- An 18 to 24 year old resident of one of the federally designated Empowerment Zones (EZ), Enterprise Communities (EC), or Renewal Communities (RC).
- A 16 to 17 year old EZ/EC/RC resident hired between May 1 and September 15 as a Summer Youth Employee.
- A veteran who is a member of a family that is receiving or recently received food stamps.
- A Vocational Rehabilitation Referral who completed or is completing rehabilitation services from a State certified agency, an Employment Network, or the U.S. Department of Veterans Affairs.
- An ex-felon who has been convicted of a felony and has a hiring date which is not more than one year after the last date on which he was so convicted or released from prison.
- A recipient of Supplemental Security Income benefits.

A new adult employee must work a minimum of 120 or 400 hours and individuals hired as Summer Youth employees must work at least 90 days, between May 1 and September 15, before an employer is eligible to claim the credit. The credit may be as much as $2,400 for each new adult hire, $1,200 for each new Summer Youth hire, and $9,000 for each new long-term family assistance recipient hired over a two-year period. To claim the credit, an employer must seek and receive certification from the IRS that the new employee qualifies the employer for the tax credit.

Firefighter/Rescue Squad Deduction. – Section 31.24 of this act creates a State income tax deduction for an individual who meets all three of the following conditions:

- Works as an unpaid member,
- For a volunteer fire department, a volunteer rescue squad, or an emergency medical services squad,
- And attends 36 hours of training during the taxable year.

The amount of the deduction is $250. An individual may only claim one deduction in a single taxable year.[25] In the case of a married couple filing a joint return, each spouse must qualify separately for the deduction. The deduction is effective for taxable years beginning on or after January 1, 2007. There is no sunset on the deduction. Fiscal Research estimates that the deduction will reduce General Fund availability by $1,000,000 in FY07-08 and in FY08-09.

Expiration of Upper Income Tax Bracket. – In 2001, the General Assembly created a fourth income tax bracket that imposed an additional ½-percent income tax (a total rate of 8.25%) on certain North Carolina taxable income for three years. The change was estimated to affect approximately 2% of North Carolina taxpayers. In 2003, the General Assembly extended the tax rate for two years. In 2005, the General Assembly extended the tax rate for an additional two years. In 2006, the General Assembly reduced the top individual income tax rate by ¼ percent a year earlier than required by law. Thus, the upper income tax rate is 8% for tax year 2007. This rate is scheduled to be eliminated in 2008. While the Governor proposed extending the upper rate for an additional two years, the General Assembly took no legislative action on this issue during the 2007 session, effectively allowing the current 8% upper income tax bracket to expire. Beginning with the 2008 tax year, the top rate will be 7.75%.

---

[25] An individual may not claim a deduction as both a firefighter and a rescue squad worker in a single taxable year.

Part II: Sales Tax Changes

Maintain Current Sales Tax Rate. – Section 31.2 of this act maintains the current sales tax rate at 4.25%. Prior to October 16, 2001, the general rate of State sales tax was 4%. Effective October 16, 2001, the general rate was raised to 4.5%. The increase was to sunset July 1, 2003. S.L. 2003-284 extended the sunset for two years to July 1, 2005. S.L. 2005-276 extended the sunset an additional two years to July 1, 2007. S.L. 2006-66 reduced the rate by ¼ cent earlier than was required under S.L. 2005-276 so that the State sales tax rate became 4.25%, effective December 1, 2006. S.L. 2007-145 extended the sunset of the remaining ¼ cent additional State sales tax rate from July 1, 2007, to August 1, 2007. This section eliminates the scheduled reduction, making the 4.25% State sales tax rate permanent. The change became effective when the Governor signed the act into law on July 31, 2007.

Amend Sales Tax Holiday. – Section 31.14 of this act makes substantive and conforming changes to enhance the sales tax holiday for school instructional material. The act does this by separating 'school instructional material' from 'school supply'. School instructional material is defined in accordance with the Streamlined Sales and Use Tax Agreement as: 'written material commonly used by a student in a course of study as a reference and to learn the subject being taught'. Practically speaking, the term encompasses primarily textbooks and workbooks. Under prior law, school instructional materials were exempt from sales tax if they had a sales price of $100 or less per item. This section expands that exemption to include any item of school instructional material with a sales price of $300 or less per item. This section became effective October 1, 2007, and applies to sales made on or after that date.

Part III: Economic Incentives

One North Carolina Fund. – The act appropriates $14 million to the One North Carolina Fund, administered by the Department of Commerce. These funds are used to offer economic development incentive grants to businesses creating new jobs in the State for infrastructure, repair and renovation, and machine or equipment purchases.

Temporary expansion of JDIG cap. – Section 13.1A of the act temporarily increases from $15 million to $25 million the maximum amount of total annual liability that may be incurred under the Job Development Investment Grant Program for 2007.

Privilege tax on software publishers' machinery and equipment. – Section 31.7 of this act subjects certain purchases of machinery and equipment by software publishing companies to a privilege tax under Article 5F of Chapter 105 of the General Statutes and exempts those purchases from sales tax. The amount of the privilege tax is 1% of the sales price of each article of machinery and equipment, limited to $80 per article. To qualify for the preferential tax rate, the following conditions must be met: (1) the purchase must be by a software publishing company in industry group 5112 of NAICS, and (2) the purchase must be of equipment or an attachment or repair part for equipment that is capitalized by the company for tax purposes under the Code, that is used by the company for research and development of tangible personal property, and that would be considered mill machinery under G.S. 105-187.51. This section became effective October 1, 2007, and applies to sales occurring on or after that date.

Enhance tax credit for research and development expenditures. – Section 31.8 of this act expands the existing tax credit for taxpayers with qualified research and development expenses. In order to be eligible for the credit, the taxpayer must satisfy the wage standard, health insurance, environmental impact, and safety and health record requirements under Article 3J. The amount of the credit is equal to a

percentage of the qualifying expenses. For small business taxpayers, the applicable percentage is increased from 3% to 3.25% of the qualifying expenses. For expenses with respect to research performed in a development tier one area, the applicable percentage is increased from 3% to 3.25% of the qualifying expenses. For expenses other than those incurred by small business taxpayers or incurred for research performed in a development tier one area, the applicable percentage (i) for expenses up to $50 million is increased from 1% to 1.25% of the qualifying expenses (ii) for expenses over $50 million and up to $200 million is increased from 2% to 2.25% of the qualifying expenses, and (iii) for expenses over $200 million is increased from 3% to 3.25% of the qualifying expenses. Finally, for North Carolina university research expenses, the applicable percentage is increased from 15% to 20% of the qualifying expenses. For each expense, only one credit is allowed; therefore, if an expense qualifies under more than one subdivision and for more than one percentage, only the higher percentage for that expense is allowed. This section is effective for taxable years beginning on or after January 1, 2007.

Modify tax credit for constructing renewable fuel facilities. – In 2004, the General Assembly created a credit for constructing renewable fuel production facilities. The credit is equal to 25% of the costs of constructing the facility. The credit may be claimed against income tax or franchise tax, is limited to 50% of the amount of tax liability against which it is claimed, and has a carryforward period of five years. That credit was set to sunset for taxable years beginning on or after January 1, 2008. In 2006, the General Assembly modified the credit by extending the sunset until 2011 and by creating an enhanced credit if the taxpayer invests at least $400 million in three separate facilities over a five-year period. As with the existing credit, the enhanced credit cannot exceed 50% of the amount of tax liability. Unlike the existing credit, the enhanced credit is equal to 35% of the costs of constructing the facility and may be claimed only against the income tax with a carryforward period of 10 years. A taxpayer may not claim both credits with respect to the same facility.

Section 31.9 of the act modifies the enhanced credit in two ways. First, the credit may be claimed against income tax or franchise tax. Second, a taxpayer who claimed the enhanced tax credit and later fails to meet the requirements of the enhanced credit may take the non-enhanced credit for constructing renewable fuel production facilities. A taxpayer who forfeits the enhanced credit must pay the additional avoided taxes and interest on the avoided taxes from the original due date of the taxes. Taxpayers have 30 days after the date the taxpayer no longer qualifies for the enhanced credit to pay the additional taxes, otherwise the total amount is subject to the penalties provided in G.S. 105-236. The modifications to the tax credit become effective for taxable years beginning on or after January 1, 2007.

Expand Sales and Use Tax Refund for Certain Aircraft Manufacturers. – Section 31.10 of this act expands the sales and use tax refund for qualifying aircraft manufacturers. This section became effective July 1, 2007, and applies to purchases made on or after that date.

The owner of an aircraft manufacturing industrial facility is allowed an annual refund of sales and use taxes paid, including those indirectly incurred, on qualified building materials and supplies, fixtures, and equipment that are installed in the construction of and become part of the real property of the facility. A written request for a refund is due within six months of the end of the State's fiscal year.

An aircraft manufacturing industrial facility is eligible for the refund if the Secretary of Commerce has certified that the owner of the facility will invest, in the construction of a facility located within the State. The taxpayer must invest at least $50 million for facilities located in development tier one areas or at least $100 million for all other facilities.

Under prior law, an aircraft manufacturing industry that qualified for the refund was limited to manufacturing or assembling complete aircraft. This section of the act expands the definition of that industry to also include the manufacturing or assembling of aircraft engines, blisks, fuselage sections, flight decks, flight deck systems or components, wings, fuselage fairings, fins, wing edges (moving, leading, and trailing), wing boxes, nose sections, tailplanes, passenger doors, nacelles, thrust reversers, landing gear, braking systems, or any combination.

Sales tax refund for research supplies. – Section 31.20 of this act, as amended by Section 14.6 of S.L. 2007-345 (Sec. 14.6, HB 714)[26] expands the authorized sales and use tax refunds contained in G.S. 105-164.14. The new refund is limited to taxpayers who (i) are engaged in analytical services within the State and (ii) increase, in comparison to their 06-07 State fiscal year expenditures, the amount of sales and use tax paid by it in this State on tangible personal property consumed or transformed in analytical service activities. The amount of the refund is 50% of the increased amount of sales and use taxes. A taxpayer must submit a written request to the Secretary of Revenue within six months after the end of the State's fiscal year, including any required documentation and information, in order to receive a refund. This section became effective when the Governor signed it into law on July 31, 2007.

Datacenter sales tax exemption. – Section 31.22 of the act substitutes a privilege tax for the sales and use tax on certain sales of purchases of machinery and equipment located and used at eligible datacenters. This section became effective October 1, 2007, and applies to sales made on or after that date.

Generally, sales of machinery and equipment are taxed at the State rate and the applicable county rate. This section imposes a privilege tax in lieu of the sales and use tax to eligible datacenters for certain purchases. For purposes of this section, an 'eligible datacenter' is a facility (1) that provides infrastructure for hosting or data processing services, (2) that has power and cooling systems that are concurrently maintainable with redundant capacity components and multiple distribution paths serving the facility's computer equipment, (3) that satisfies the wage standard and health insurance requirements of Article 3J, and (4) that the Secretary of Commerce has made a written determination that, at the time of application for the determination, $150 million in private funds has been or will be invested in improvements to real property, machinery, or equipment within five years for development tier one areas. The investment threshold is $300 million for facilities not located in a development tier one area.

Purchases of machinery and equipment by eligible datacenters are subject to the privilege tax in lieu of the sales and use tax where the machinery and equipment (1) is located and used at the datacenter, (2) is capitalized for tax purposes under the Code, and (3) is used to provide datacenter services or for the generation, transformation, transmission, distribution or management of electricity. The rate of tax is 1% of the sales price of the eligible equipment and machinery, capped at $80 per article.

A taxpayer who fails to make the level of investment required for qualification forfeits the application of the privilege tax in lieu of the sales tax and is required to pay all sales and use taxes, with interest, that would have been due on ineligible purchases. Similarly, a taxpayer who does satisfy the investment amount, but fails to use the equipment or machinery at the eligible facility forfeits the application of the privilege tax in lieu of the sales tax with respect to that particular

[26] The amendment clarifies the intent of the provision which is to provide an incentive to existing companies to increase their work performed in the State. As originally written, the provision rewarded new businesses to the detriment of existing ones.

property. A credit, in the amount of the privilege tax paid, is allowed against the sales and use taxes due following forfeiture, and interest is not computed against the amount of this offset. The past taxes and interest are due 30 days after the date of forfeiture.

Tax incentive for railroad intermodal facility. – Section 31.23 of this act, as amended by Section 14.7 of S.L. 2007-345 (Sec. 14.7, HB 714) establishes a tax credit and sales and use tax exemptions and refunds for a taxpayer who constructs or leases and puts into operation an eligible railroad intermodal facility. A railroad intermodal facility is a facility whose primary purpose is to transfer freight between a railroad and another mode of transportation. An 'eligible' railroad intermodal facility is one whose cost of construction[27] exceeds $30 million. Fiscal Research estimates that the tax incentives provided in this section will reduce General Fund availability by $200,000 in FY07-08 and by $300,000 in FY 08-09.

Effective for taxable years beginning on or after January 1, 2007, a taxpayer who constructs or leases an eligible railroad intermodal facility in this State and places it in service during the taxable year is allowed a tax credit. The cost of construction includes the cost of constructing and equipping rail tracks to the facility that are necessary to access and support facility operations.[28] The tax credit is equal to 50% of all amounts payable by the taxpayer towards the costs of construction or under the lease. The tax credit may be taken against either the franchise tax or the income tax. The credit amount taken may not exceed 50% of the tax against which it is applied. Any unused portion of the credit may be carried forward for 10 years. The carryforwards must be claimed against the same tax. The Department of Revenue must report annually on the number of taxpayers claiming this credit, the amount of each credit claimed and the taxes against which it was applied, and the total cost of the credits claimed. The credit expires for taxable years beginning on or after January 1, 2038.

Effective for sales made on or after January 1, 2007, sales to the owner or lessee of an eligible railroad intermodal facility of intermodal cranes, hostler trucks, and locomotives located and used at the facility are exempt from State and local sales and use tax. An owner or lessee of an eligible railroad intermodal facility may also apply for an annual refund of sales and use taxes paid by it on building materials, supplies, fixtures and equipment that become a part of the real property of the railroad intermodal facility. A request for a refund of taxes paid must be submitted within six months after the end of the State's fiscal year (June 30). A refund request received after the due date is barred. Unlike the tax credit, the sales and use tax exemption and refund for an eligible railroad intermodal facility do not have an expiration date.

Part IV: Excise Taxes

University Cancer Research Fund. – Section 6.23 of the act raises the excise tax levied on tobacco products other than cigarettes from 3% to 10%, with the Secretary of Revenue remitting the additional tax to the University Cancer Research Fund (Fund). The increase in the excise tax is effective October 1, 2007, and applies to products acquired on or after the effective date and to taxes paid on or after the effective date. A wholesale or retail dealer of tobacco products other than cigarettes with an inventory of these products as of the effective date are required to file a

---

[27] S.L. 2007-345 amended the definition of 'costs of construction', as enacted by this section, to clarify that the term includes constructing and equipping rail tracks to the facility that are necessary to access and support facility operations.

[28] This clarifying language was added to the provision by Section 14.7 of S.L. 2007-345.

report of the inventory within 20 days of the effective date with the Secretary and pay the additional tax on the inventory.

This Fund is a special revenue fund in the Office of the President of UNC. Allocations from the Fund are made in the discretion of the Cancer Research Fund Committee but may be used only for the purpose of cancer research under UNC Hospitals or the Lineberger Comprehensive Cancer Center. In the act, the General Assembly found that the State needed to provide at least $50 million per year to the Fund. Each July 1, this sum is transferred to the Fund as follows: (1) $8 million is transferred from the Tobacco Trust Account; (2) all revenue generated by the additional excise tax levied on tobacco products other than cigarettes; and (3) any additional amount needed to raise the total amount to $50 million is appropriated from the General Fund.[29]

The Cancer Research Fund Committee is a seven-member committee with five ex officio members and two appointed members. The five standing members are (i) the President of UNC, who serves at the chair of the committee, (ii) the Director of the Lineberger Comprehensive Cancer Center, (iii) the Dean of the School of Medicine at UNC, (iv) the Dean of the School of Public Health at UNC, and (v) the Dean of the School of Pharmacy at UNC.[30] The five standing members appoint the remaining two members by majority vote. Each appointed member must hold a leadership position in a nationally prominent cancer program. A majority of the committee constitutes a quorum, and the Committee must meet at least once quarterly, with special meetings at the call of the chair or with the written request of a majority of the members.

Cap the variable wholesale component of the motor fuels tax rate for two years. – A motor fuel excise tax is imposed on all motor fuels sold, distributed, or used in the State. The rate of tax consists of a flat rate of 17.5¢ per gallon plus a variable wholesale component equal to the greater of 7% of the average wholesale price of motor fuel during a base six-month base period or 3.5¢ per gallon. In 2006, the General Assembly capped the variable wholesale component of the motor fuels tax at 12.4¢ per gallon, the wholesale rate for the period of January 1, 2006, through January 30, 2006, for a maximum possible rate of 29.9¢ per gallon.

Section 31.15 of the act extends the existing cap for two years, capping the variable wholesale component of the motor fuels tax rate at 12.4¢ per gallon for the period July 1, 2007, through June 30, 2009, for a maximum possible rate of 29.9¢ per gallon.[31] This section became effective when the Governor signed the act into law on July 31, 2007.

Part V: General State & Local Changes

State Assume Medicaid Responsibilities. – Under section 31.16 of the act, as amended by Section 14.4 of S.L. 2007-345 (Section 14.4 of HB 714), the State assumes the counties' share of the nonfederal share of Medicaid costs over a three-year period. To provide the financial resources to assume these costs, this section phases out the third one-half cent local sales tax and makes a corresponding increase in the State sales tax rate. In addition, the legislation changes the distribution of the second one-half cent local sales tax from per capita to point-of-origin. Finally,

[29] The amount appropriated from the General Fund to the Fund for the 2007-08 fiscal year is $5.6 million, and the amount appropriated from the General Fund to the Fund for the 2008-09 fiscal year is $15.5 million.

[30] If any specified position ceases to exist, the successor position, and the person holding it, is deemed substituted.

[31] In addition to the motor fuels tax, the State also charges a motor fuel inspection fee of .25¢ per gallon. The fee increases the motor fuels tax rate from 29.9¢ to 30.15¢ per gallon.

the section provides for a State hold harmless so that every county will benefit from these changes by at least $500,000 annually.

Under previous law, the State was responsible for 85% of the non-administrative, nonfederal share of Medicaid and the counties were responsible for the remainder. This act phases out the county responsibility over three years. Effective October 1, 2007, the State will assume 25% of the counties' share of the non-administrative, nonfederal share of Medicaid costs. Effective July 1, 2008, the State will assume 50% of the counties' share of the non-administrative, nonfederal share of Medicaid costs. Effective July 1, 2009, the State will assume the entire non-administrative, nonfederal share of Medicaid costs. The counties retain responsibility for the costs associated with administering Medicaid at the county level.

To offset the additional costs assumed by the State with respect to Medicaid, the State adjusts the amount distributed from corporate income tax receipts under the Public School Building Capital Fund and gradually assumes one-half cent of local sales and use tax. The adjustment to the ADM funding formula for the Public School Building Capital Fund is for fiscal year 2007-2008 only. If the State assumes more Medicaid payments for FY 07-08 than the county would receive from ADM funding, the amount of the allocation from the Public School Building Capital Fund is reduced by 60%. If the State assumes less Medicaid payments for FY 07-08 than the county would receive from ADM funding, the amount of the allocation from the Fund is reduced by 60% of the county's Medicaid payments assumed by the State for FY 07-08.[32] Effective October 1, 2008, the State begins assuming the third one-half cent local sales and use tax. The act repeals the per capita portion (¼-cent) of the local third one-half cent sales tax, effective October 1, 2008. It increases the State sales tax rate by 0.25%, effective October 1, 2008. Effective October 1, 2009, the act repeals the remaining one-quarter cent of the third one-half-cent local sales tax rate and increases the State sales tax rate by 0.25%.

Effective October 1, 2009, the act changes the allocation of the second one-half cent local sales tax from per capita to point of collection. Beginning July 1, 2009, 1½% of the 2% local tax will be allocated on a point of collection basis and ½% will be allocated on a per capita basis.

The act includes two separate hold harmless provisions. First, counties are required to hold cities harmless with respect to the reduction in local sales and use tax revenue. Second, the State is required to make hold harmless payments to counties to ensure that each county benefits by at least $500,000 as a result of the provisions of this section. In paying this hold harmless amount, the Secretary estimates the repealed sales tax amount, the Medicaid expenditures, and the adjusted ADM payments to determine an estimated hold harmless payment for a county for a fiscal year. The State sends 90% of the estimated hold harmless payment to the county with the March distribution of the local government sales and use taxes. The remainder would be sent no later than August 15th after the Secretary determines the difference between the county's repealed sales tax amount and its hold harmless threshold for the year.

[32] In order to lessen the impact on local school administrative units, the act provides that a county must use a portion of the funds available to it, as a result of the assumption by the State of part of the county's Medicaid payments, for public school capital outlay purposes or to implement an approved local school technology plan. The amount it must use for these purposes is the difference between what it would receive from the Fund based on its ADM and the adjusted amount it actually received.

The act makes conforming changes to the transitional hold harmless for repealed reimbursement amounts and to the sales tax distribution to local governments of the State sales tax collected on telecommunications services and video programming services.

Local Option County Taxes. – Section 31.17 of this act, as amended by Section 14.5 of S.L. 2007-345 (Section 14.5 of HB 714), creates two new taxes, of which counties may choose one to levy if a majority of those voting in a referendum vote for the levy of the tax. This section became effective when the Governor signed it into law on July 31, 2007.

The first option is a land transfer tax on transfers of land within the county. The rate of tax may be up to .4% of the greater of the value of or consideration paid for the property, and the rate must be an increment of .1%. The land transfer tax is in addition to the excise stamp tax on conveyances of land, and land exempt from the stamp tax is also exempt from the land transfer tax. The tax is administered in the same manner as the stamp tax. The tax becomes effective on the first day of the month specified in the resolution but may not be earlier than the first day of the month that is two months after the resolution is adopted. Proceeds of the transfer tax may be used for any lawful purpose, and repeal or reduction of the tax may be by resolution, effective the first day of the month but not until the end of the fiscal year. Repeal or reduction does not affect a then-existing liability or right to a refund.

As an alternative to the land transfer tax, Section 31.17 also authorizes a second option, a one-quarter cent sales and use tax. The rate of tax is .25% of the sales price of the item, in addition to all other State and local sales and use taxes, except for purchases of food exempt from tax under G.S. 105-164.13B. The adoption, levy, collection, administration, and repeal of this sales and use tax are in accordance with the first one-cent local sales and use tax (Article 39 of Chapter 105 of the General Statutes). The amount collected within the county goes solely to the county; no amount is allocated to the municipalities within the county.

Finally, this section resolves administrative concerns regarding when the combined general rate increases. Cable and satellite services, telecommunications, ancillary services, and liquor are subject to the combined general rate, all of which the State retains. During discussion on this provision, questions arose as to when the combined general rate would change relative to the adoption or levy of the quarter-cent local sales and use tax authorized by this section. Accordingly, G.S. 105-164.15A makes clear that the combined general rate change occurs for increases in authorization for local sales and use taxes on the date when local sales and use taxes become effective in the first county or group of counties to levy the authorized tax. For repeals of the authorization for local sales and use taxes, the change is effective on the effective date of the repeal. The effective date of a change in the State general rate of tax would also be the effective date for a change in the combined general rate.

Part VII: Capital Appropriations

Special Indebtedness Projects. – Section 29.13 of the act authorizes approximately $550,000,000 of special indebtedness to pay the capital facility costs of various University and State facilities over the next three fiscal years.

Land for Tomorrow and Waterfront Access and Marine Industry Fund. – Section 29.14 of the act authorizes $120,000,000 of special indebtedness to finance the costs of land acquisitions, waterfront properties, and the development of facilities for the purposes of providing and improving public and commercial waterfront access. Of this amount, $50,000,000 is allocated for land acquisitions for the expansion of the State Park System; $50,000,000 is allocated for land acquisition to

conserve ecological diversity of the State; and $20,000,000 is allocated for waterfront access and the development of facilities to provide waterfront access. The Parks and Recreation Trust Fund will reimburse the General Fund for debt service on special indebtedness issued to acquire land for the State Park System and to acquire waterfront access. The Natural Heritage Trust Fund will reimburse the General Fund for debt service on special indebtedness issued to acquire land to conserve ecological diversity.[33]

SALES TAX EXEMPTION FOR BAKED GOODS.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-368	**SB 1240**	**Senator Kerr**

AN ACT TO ENSURE THAT ALL BREAD SOLD AT A BAKERY THRIFT STORE IS TAXED AT THE SAME SALES TAX RATE.

OVERVIEW: This act exempts bread, rolls, and buns sold at a bakery thrift store from State sales tax.

FISCAL IMPACT: This act will have a minimal impact on State and local government sales tax revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective October 1, 2007, and applies to sales made on or after that date.

ANALYSIS: The Streamlined Sales Tax Agreement (Agreement) requires member States to treat terms defined under the Agreement consistently. For items that are not defined, a State may enact entity-based exemptions, notwithstanding that the items might be included in a broader product definition under the Agreement.

Prepared food, a defined term under the Agreement, is taxed at the combined State and local sales tax rate in North Carolina irrespective of whether it is intended for home consumption. If a baked good[34] meets the definition of a prepared food, it is subject to the combined rate; if not, it is exempt from State tax and subject only to the local sales tax on food.

This act exempts bread, rolls, and buns that otherwise meet the definition of a prepared food from the State sales tax when sold at a bakery thrift store, which is defined as a retail outlet of a bakery that sells at wholesale over 90% of the items it makes and sells at the retail outlet day-old bread, rolls, and buns returned to it by retailers that acquired those items from the bakery.

INTEREST ON ILLEGALLY LEVIED EXACTIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-371	**SB 1152**	**Senator Hoyle**

[33] G.S. 113-77.9(b3) is amended to increase the percentage of money in the Natural Heritage Trust Fund that may be used to reimburse the General Fund for debt service from 50% to 60%.
[34] The term 'baked goods' includes bread, rolls, buns, biscuits, bagels, croissants, pastries, donuts, danish, cakes, tortes, pies, tarts, muffins, bars, cookies, and tortillas when those goods are prepared by the retailer by mixing or combining two or more foods for sale as a single item.

AN ACT TO REQUIRE COUNTIES AND CITIES TO PAY INTEREST ON ILLEGALLY EXACTED TAXES, FEES, OR MONETARY CONTRIBUTIONS FOR DEVELOPMENT THAT ARE NOT SPECIFICALLY AUTHORIZED BY LAW.

OVERVIEW: This act requires cities and counties to pay 6% annual interest on any illegally exacted tax, fee, or monetary contribution for development or a development permit.

FISCAL IMPACT: No impact on State revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 19, 2007, and applies to actions filed on or after that date.

ANALYSIS: The genesis of this act was a ruling by the North Carolina Court of Appeals in the case of *Durham Land Owners Association v. County of Durham*[35] in which the Court invalidated a local ordinance authorizing the assessment of school impact fees on developers for new home construction.[36] The plaintiffs, a group of developers and homebuilders, challenged the ordinance on the grounds that Durham County did not have proper enabling legislation from the General Assembly. The County argued that it had general authority to levy 'fees and commissions' to carry out duties required by law and did not need specific legislative authority to levy the impact fees. The trial court agreed with the plaintiffs and ordered that the County refund the payments, totaling approximately $8 million, with interest.

While the North Carolina Court of Appeals upheld the trial court's decision to invalidate the ordinance and refund the money collected, it reversed the award of interest. In reaching this decision, the Court examined the relevant statute and prior case law and concluded that there was no precedent for changing the 'long standing rule' that the State and its political subdivisions do not pay interest under G.S. 24-5 on judgments against it. G.S. 24-5 sets out the rate of interest and the manner in which it accrues on judgments. The statute does not specifically authorize the accrual of interest on judgments against the State or its political subdivisions. Without specific authorization, governmental immunity precludes the accrual of interest when the unit of government is engaged in a governmental function. In this case, Durham County was exercising a governmental function when it imposed a school construction fee without appropriate authority.

In response, the General Assembly passed this act granting specific statutory authority for the accrual of interest at the rate of six percent (6%) per annum on judgments entered against a city or county for the illegal exaction of a tax, fee, or monetary contribution for development or a development permit not specifically authorized by law. However, the act does not apply to the *Durham* case because the effective date makes it clear that the act applies only to actions filed on or after the effective date of August 19, 2007.

---

[35] 177 N.C.App. disc. review denied, 629, 360 N.C. 532.

[36] Between 1985 and 1991, the General Assembly gave three counties and several municipalities the authority to implement impact fees. Impact fees are charged by local governments to developers who wish to construct new properties. The revenue from the impact fees are used to pay for the construction of public facilities necessitated by the development. Since 1991, the General Assembly has not given any local government new impact fee authority. In 2003, Durham became the first North Carolina county to create impact fees without a specific legislative mandate.

MODIFICATIONS TO PROJECT DEV. FINANCING ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-395	**SB 1196**	**Senator Clodfelter**

AN ACT TO MODIFY THE PROJECT DEVELOPMENT FINANCING ACT.

OVERVIEW: This act does two things:

- It allows local governments to use the proceeds of project development financing debt instruments to provide parks and recreation facilities, community college facilities, and school facilities.
- It removes the requirement that the base valuation of a development financing district be increased as the result of an increase in valuation due to revaluation.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 20, 2007.

ANALYSIS: In November 2004, the voters approved a constitutional amendment that has enabled counties, cities, and towns to use project development financing for the public portion of certain economic development projects within a defined territorial area. Project development financing, also known as tax increment financing, allows a local government to issue bonds secured by the incremental property tax increase generated by the development financed. This financing mechanism can be used for airports, auditoriums and arenas, hospitals, museums, parking facilities, sewer systems, storm sewers and flood control facilities, water systems, street improvements, public transportation facilities, railroads, affordable housing, land development for industrial or commercial purposes, utilities, and redevelopment. Prior to the bonds being issued, the local government must adopt a development financing plan describing the projects to be financed and how the tax proceeds will be used. The local government must also obtain approval from the Local Government Commission.

Once the district has been established and the project development financing debt instruments have been approved, the local government must notify the county tax assessor who must determine the base valuation of the district. The base valuation is the assessed value of all taxable property located in the district on the January 1 immediately preceding the effective date of the district. The base valuation may be adjusted if property is removed or added to the district. The base value may also be increased if the property values of the district increase as the result of a revaluation. Each year the tax assessor must determine the current assessed value of taxable property in the district. To the extent the current value exceeds the base value, the difference is the incremental valuation of the district. Property taxes levied on the incremental valuation of the district are placed in a separate fund and may be used to finance capital expenditures in the district, to meet principal and interest requirements on project development financing debt instruments, to repay moneys expended on debt service of project development financing debt instruments, and to establish and maintain debt service reserves.

This act makes the following changes to the project development financing act:

- It includes parks and recreation facilities, excluding stadiums, arenas, golf courses, swimming pools, wading pools, or marinas, among the purposes for which project development financing may be used. Included in this category, by reference, are the following: athletic fields, parks, playgrounds, recreation centers, shelters, permanent and temporary stands, and lighting.[37]
- It includes community college facilities[38] and school facilities[39] among the purposes for which project development financing may be used.
- It allows project development financing to be used for services and facilities authorized to be provided in a municipal service district without the creation of such a district. Under prior law, the proceeds of project development financing could be used for any service or facility authorized by G.S. 160A-536 and provided in a municipal service district. The act provides that no municipal service district needs to be created for the purpose of expending the funds. The formation of a municipal service district requires substantially the same steps as are required in the creation of a development financing district and is unnecessary duplication.
- It removes the requirement to increase the base valuation of a development financing district if property values of the district as they existed on the January 1 immediately preceding the effective date of the district are increased by a revaluation. The rationale for the removal of this requirement is that the statute already requires any excess revenues be paid to the taxing entity and that the benefit, if any, to the taxing entity as the result of the adjustment is outweighed by the complicated and unclear procedure regarding how the adjustment should be made.

PROMOTE RENEWABLE ENERGY/BASELOAD GENERATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-397	**SB 3**	**Senator Albertson**

AN ACT TO: (1) PROMOTE THE DEVELOPMENT OF RENEWABLE ENERGY AND ENERGY EFFICIENCY IN THE STATE THROUGH IMPLEMENTATION OF A RENEWABLE ENERGY AND ENERGY EFFICIENCY PORTFOLIO STANDARD (REPS), (2) ALLOW RECOVERY OF CERTAIN NONFUEL UTILITY COSTS THROUGH THE FUEL CHARGE ADJUSTMENT PROCEDURE, (3) PROVIDE FOR ONGOING REVIEW OF CONSTRUCTION COSTS AND FOR RECOVERY OF COSTS IN RATES IN A GENERAL RATE CASE, (4) ADJUST THE PUBLIC UTILITY AND ELECTRIC MEMBERSHIP

[37] G.S. 159-48(b)(13).
[38] G.S. 159-48(c)(1).
[39] G.S. 159-48(c)(4).

CORPORATION REGULATORY FEES, (5) PROVIDE FOR THE PHASEOUT OF THE TAX ON THE SALE OF ENERGY TO NORTH CAROLINA FARMERS AND MANUFACTURERS, AND (6) ALLOW A TAX CREDIT TO CONTRIBUTORS TO 501(C)(3) ORGANIZATIONS FOR RENEWABLE ENERGY PROPERTY.

OVERVIEW: This act makes the following tax related changes. The remainder of this act does not affect North Carolina tax laws and is not discussed below.[40]

- It phases out the sales taxes paid by farmers and manufacturers for electricity, piped natural gas, and other fuels.
- It establishes a tax credit for entities that provide funds to a 501(c)(3) for renewable energy property.

FISCAL IMPACT: Sections 10 through 12 of the act, which phase out the tax on electricity, piped natural gas, and fuel used by manufacturers to operate their industries, and by farmers in their farming operations, over a four-year period, have the following fiscal impact:

FY 2007-08	$(10.0 million)
FY 2008-09	$(20.0 million)
FY 2009-10	$(30.0 million)
FY 2010-11	$(45.0 million)
FY 2011-12	$(44.0 million)

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The sales tax changes are effective over a three-year period, beginning October 1, 2007. The tax credits become effective for taxable years beginning on or after January 1, 2008.

ANALYSIS: This act establishes Renewable Energy Portfolio Standards (REPS) for North Carolina utilities. A REPS require utilities to provide a designated amount or percentage of power from renewable energy resources as a portion of their overall provision of electricity. Iowa enacted the first REPS in 1991 and as of June 2007, REPS have been enacted by the majority of the 24 states and the District of Columbia that have adopted standards requiring electric utilities to generate electricity from renewable resources. Over half of the American public lives in a state in which a REPS is in effect. States have adopted or expanded their REPS for many reasons including: economic development benefits through the promotion of a state's renewable energy resources; potential for jobs creation; prospect of increased reliability in electricity supply; and reduction of conventional air pollutants and greenhouse gases.

Phase Out-of-State Taxes Paid by Farmers and Manufacturers on Electricity, Piped Natural Gas, and Other Fuels

[40] For a summary of those provisions, see Chapter 11 of the *Summaries of Substantive Ratified Legislation* publication available online and in the Legislative Library.

Section 10 of the act phases out the current sales tax rate of 2.83%[41] on sales of electricity to manufacturing industries and manufacturing plants[42] for use in connection with their operations and to farmers when used by them for farming purposes. Effective October 1, 2007, the rate is reduced to 1.8%. Effective July 1, 2008, the rate is reduced to 1.4%. Effective July 1, 2009, the rate is reduced to .8%, and effective July 1, 2010, the sales tax on these sales is entirely eliminated.

Section 11 of the act phases out the sales tax imposed on piped natural gas[43] received by a manufacturer for use in connection with the operation of a manufacturing facility and on piped natural gas received by a farmer to be used for any farming purpose other than preparing food, heating dwellings, and other household purposes. The tax is phased out over a four-year period, beginning October 1, 2007, with end-users being exempt as of July 1, 2010.

Section 12 of the act phases out the current privilege tax rate of 1%, subject to an $80 cap, of the sales price of fuel imposed on a manufacturing industry or plant that purchases fuel to operate the industry or plant.[44] Effective October 1, 2007, the rate is reduced to .7%. Effective July 1, 2008, the rate is reduced to .5%. Effective July 1, 2009, the rate is reduced to .3%, and effective July 1, 2010, the privilege tax is entirely eliminated.

Renewable Energy Tax Credits

Current law provides a tax credit for investing in renewable energy property. However, a nonprofit corporation cannot take advantage of this credit when it invests in renewable energy property because the nonprofit organization does not owe any tax. Section 13 of this act allows a tax credit to a taxpayer who donates money to a tax-exempt nonprofit organization[45] for the purpose of providing funds for the organization to construct, purchase, or lease renewable energy property[46] where the nonprofit organization uses the donated funds to invest in renewable energy property. The tax credit may be taken against either the franchise tax or the income tax of the taxpayer. A taxpayer who claims this credit may not also claim the donation as a charitable contribution. Moreover, the total amount of the credit may not exceed the amount of the credit the nonprofit organization could claim under G.S. 105-129.16A if it were subject to tax, which for non-residential property, is capped at $2,500,000.[47]

---

[41] The general rate of tax on sales of electricity is 3%. Sales of electricity to an aluminum smelting facility are taxed at a rate of 1%, but that rate expires for sales made on or after October 1, 2007.

[42] In S.L. 2006-66, the tax on sales of electricity to manufacturing industries and manufacturing plants was reduced from 2.83% to 2.6%, effective July 1, 2007. This act repeals that reduction and replaces it with the 1.8% rate, as provided.

[43] The tax on piped natural gas applies uniformly to all users but is structured as a declining block that decreases as the amount of therms of piped gas consumed in a month increases. Thus, low-volume users pay a higher effective rate of tax than high-volume users.

[44] Manufacturers and farmers are exempt from sales tax on purchases of fuel.

[45] A tax-exempt, nonprofit organization is one that is exempt from tax under section 501(c)(3) of the Code.

[46] Renewable energy property includes biomass equipment that uses renewable biomass resources for biofuel production of ethanol, methanol, and biodiesel; anaerobic biogas production of methane utilizing agricultural and animal waste or garbage; commercial thermal or electrical generation from renewable energy crops or wood waste materials; hydroelectric generators; solar energy equipment; and wind equipment. Renewable biomass resources are organic matters produced by terrestrial and aquatic plants and animals.

[47] The maximum credit amount is less for residential property. For residential property, the following ceilings apply: $1,400/dwelling for solar energy equipment for domestic water heating; $3,500/dwelling

The amount of the credit is equal to the taxpayer's share of the credit the nonprofit organization could claim under G.S. 105-129.16A if the nonprofit organization were subject to tax or 35% of the cost of the property placed in service. The taxpayer's share of the credit is equal to the following calculation: (taxpayer's donation/cost of the renewable energy property of the nonprofit organization placed in service that year as a result of the donation) X (the amount of the credit the nonprofit organization could claim if it were subject to tax). The credit must be taken in the year in which the property is placed in service.[48]

A nonprofit organization must keep a record of all donations it receives for renewable energy property and the amount of the donations used for this purpose. If a nonprofit organization places renewable energy property in service, the nonprofit organization must give each taxpayer who made a donation a statement setting out the amount of the credit the taxpayer qualifies for, a description of the renewable energy property placed in service, the cost of the property, the amount of the credit the nonprofit organization could claim under G.S. 105-129.16A if it were subject to tax, and the taxpayer's share of the credit allowed. If the donations made for the renewable energy property exceed the cost of the property, the nonprofit organization must prorate each taxpayer's share of the credit.

EXTEND QUALIFIED BUSINESS VENTURE TAX CREDIT.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-422	**HB 1598**	**Rep. Gibson, Owens, Daughtridge, Wainwright**

AN ACT TO EXTEND THE SUNSET ON THE TAX CREDITS FOR QUALIFIED BUSINESS INVESTMENTS AND TO EXTEND THE TIME FOR FILING AN APPLICATION TO OCTOBER 15.

OVERVIEW: This act extends the sunset on the tax credits for qualified business investments from January 1, 2008, to January 1, 2011. It also extends the time for which a credit application may be filed from September 15 to October 15.

FISCAL IMPACT: The total amount of all tax credits for qualified business investments may not exceed $7,000,000 a year. Demand for the credit exceeded $7,000,000 in 2006 and is expected to continue to be equal to, or greater, than the cap in future years. The fiscal impact of extending the tax credit through tax year 2010 is $7,000,000 for each of the respective fiscal years. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The extension of the application filing deadline became effective January 1, 2008, and applies to applications filed on or after that date. The remainder of the act became effective when signed into law by the Governor on August 23, 2007.

---

for solar energy equipment for active space heating, combined active space and domestic hot water systems, and passive space heating; and $10,500/installation for any other renewable energy property.

[48] The installment requirements in G.S. 105-129.16A for nonresidential property do not apply to this credit.

ANALYSIS: This act extends the qualified business investment tax credit through tax year 2010. The qualified business investment tax credit is allowed for an individual taxpayer who invests in a qualifying small business. A qualifying small business is one of the following:

- Qualified business venture. – A business that engages primarily in manufacturing, processing, warehousing, wholesaling, research and development, or a service-related industry.[49] Its annual gross revenues may not exceed $5,000,000.
- Qualified grantee business. – A business that has received during the current year or any of the preceding three years a grant, an investment, or other funding from a federal agency under the Small Business Innovation Research Programs. Its annual gross revenues may not exceed $1,000,000.
- Qualified licensee business. – A business that has been certified by a constituent institution of The University of North Carolina or a research university as currently performing under a licensing agreement with the institution or university for the purpose of commercializing technology developed at the institution or university.

The credit is equal to 25% of the amount invested and may not exceed $50,000 per individual in a single taxable year. If the investor is a husband and wife, the $50,000 limitation applies to the couple as one entity if the investment is made from joint funds and the stock certificate is issued in both names. However, if the couple made separate investments, as indicated by the use of separate funds and by the issuance of stock certificates in separate names, then the $50,000 limitation applies to each individual. An individual investor may also claim the allocable share of credits obtained by pass-through entities[50] of which the investor is an owner.

The credit may not be taken in the year the investment is made. Instead, the credit is taken in the year following the calendar year in which the investment was made, but only if the taxpayer files an application with the Secretary of Revenue. Prior to January 1, 2008, an application for the credit had to be filed on or before April 15 of the year following the calendar year in which the investment is made. The Secretary could grant extensions of this deadline, so long as the application was filed on or before September 15. The Secretary could not accept an application for the credit filed after September 15. The act provides that the application should be filed by April 15, but may be filed on or before October 15. This change removes the requirement that a taxpayer request an extension of time to file an application if the application is filed after April 15. The date of October 15 coincides with the income tax extension date.

The amount of credit a taxpayer may claim may not exceed the taxpayer's tax liability. Any unused credit may be carried forward for the next five years. The total amount of credits allowed to all taxpayers for investments made in a calendar year may not exceed $7 million.[51] The Secretary of

---

[49] A qualified business venture does not include a real estate-related business, a business that was formed for the primary purpose of acquiring all or part of the stock or assets of one or more existing businesses, or a business that is substantially engaged in one or more of the following: providing a professional service; construction or contracting; selling or leasing at retail; the purchase, sale, or development of commercial paper, notes, other indebtedness, securities, or real property, otherwise makes investments; providing personal grooming or cosmetics services; or offering any form of entertainment, amusement, recreation, or athletic or fitness activity for which an admission or a membership is charged.

[50] Pass-through entities include limited partnerships, general partnerships, S corporations, and limited liability companies.

[51] The General Assembly increased the cap from $6 million to $7 million in 2004 (S.L. 2004-124, Part 32C).

Revenue calculates the total amount of tax credits claimed from applications filed. If the amount exceeds the cap, then the Secretary allows a portion of the tax credits claimed by allocating the total of $7 million in tax credits in proportion to the size of the credit claimed by each taxpayer. A taxpayer forfeits the credit if the taxpayer transfers the securities within one year or the qualified business redeems the securities purchased by the taxpayer within five years after the investment was made.

The purpose of the credit is to stimulate early stage investments that help move new technologies from universities and other research laboratories to commercialization. Since 1999, investors using the North Carolina qualified business venture tax credit have claimed approximately $48 million in credits and generated more than $274 million in credit-eligible capital contributions to qualifying small companies. Demand for the credit exceeded $7 million in 2006.

QTRLY ESCROW DEPOSITS/AFFILIATED DEALERS.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-435	**HB 1460**	**Representative Cole**

AN ACT TO ALLOW THE ATTORNEY GENERAL TO REQUIRE CERTAIN CIGARETTE MANUFACTURERS TO MAKE QUARTERLY ESCROW DEPOSITS, TO TREAT CERTAIN AFFILIATES OF A MANUFACTURER OF OTHER TOBACCO PRODUCTS AS IF THEY WERE THE MANUFACTURER FOR PURPOSES OF ADMINISTRATION OF THE EXCISE TAX ON OTHER TOBACCO PRODUCTS, AND TO PROVIDE THAT THE PERMISSION GRANTED TO A CIGARETTE MANUFACTURER TO BE RELIEVED OF PAYING THE CIGARETTE EXCISE TAX APPLIES TO ALL TOBACCO PRODUCTS DISTRIBUTED BY THE MANUFACTURER.

OVERVIEW: This act does two different things.

- It requires certain tobacco product manufacturers who chose not to participate in the Master Settlement Agreement (NPM) to make their escrow deposits on a quarterly basis rather than an annual basis.
- It defines the term 'integrated wholesale dealer' as a wholesale dealer who is an affiliate of a manufacturer of other tobacco products and is the only person to whom the manufacturer sells its products. The act also provides that an integrated wholesale dealer is treated like a manufacturer for purposes of allowing relief from paying the excise tax on other tobacco products (OTP).

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The requirement that NPM make escrow payments quarterly became effective January 1, 2008. The remainder of the act becomes effective October 1, 2007.

ANALYSIS: This act does two different things. First, it requires certain tobacco product manufacturers who chose not to participate in the Master Settlement Agreement (NPM) to make their escrow deposits on a quarterly basis rather than an annual basis. Requiring more frequent payments from a free cash flow standpoint puts pressure on NPMs to make sure they are collecting enough revenue from their cigarette sales to be able to comply with the escrow payment obligations. Several states have begun to require NPMs to make quarterly payments to better ensure compliance with the MSA. The quarterly escrow payment obligation applies to the following NPMs:

- A NPM that has not previously established and funded a qualified escrow fund in NC.
- A NPM that has not made any escrow deposits for more than one year.
- A NPM that has failed to make a timely and complete escrow deposit in any prior calendar year.
- A NPM that has failed to pay any judgment.
- Any NPM that the Attorney General has reasonable cause to believe may not make its full required escrows deposit by April 15 of the year following the year in which the cigarette sells are made.

Second, the act defines the term 'integrated wholesale dealer' as a wholesale dealer who is an affiliate of a manufacturer of other tobacco products and is the only person to whom the manufacturer sells its products. The act also provides that an integrated wholesale dealer is treated like a manufacturer for purposes of allowing relief from paying the excise tax on other tobacco products (OTP). The excise tax on OTP is paid by the wholesale dealer or retail dealer who first acquires or otherwise handles OTP. A manufacturer who is not a retail dealer and who ships other tobacco products to either a wholesale dealer or a retail dealer may apply to the Secretary to be relieved of paying the tax. Once granted permission, a manufacturer may choose not to pay the tax, which would result in the tax being paid by the wholesale or retail dealer. This part of the act became effective October 1, 2007.

An example of an integrated wholesale dealer is Conwood Sales, which is an affiliate of Reynolds American, Inc., and one of its subsidiaries, Conwood Company. Under prior law, Conwood Sales would be required to pay the excise tax on the products it receives from Conwood Company because it is a wholesale dealer and the first company in the State to handle the products produced by its affiliate, Conwood Company. Accordingly, if Conwood Company, as the manufacturer, were granted permission by the Secretary of Revenue to be relieved of paying the excise tax on the products it produces, this permission would not apply to Conwood Sales. Under this act, Conwood Company and Conwood Sales would be considered the same entity for purposes of paying the excise tax on OTP. Therefore, if Conwood Company receives permission to be relieved of paying the excise tax on other tobacco products, then that permission applies to Conwood Sales as well because Conwood Sales is an integrated wholesale dealer of Conwood Company. The result is that the wholesale and retail dealers who purchase products from Conwood Sales would pay the excise tax.

HISTORIC REHABILITATION TAX CREDIT.

Session Law	*Bill #*	*Sponsor*

S.L. 2007-461	HB 1259	Representative Howard

AN ACT TO REMOVE THE SUNSET ON THE PASS-THROUGH ENTITY ALLOCATION PROVISIONS OF THE HISTORIC REHABILITATION TAX CREDIT.

OVERVIEW: This act allows a pass-through entity to continue to allocate the historic rehabilitation tax credit among its owners in its discretion.

FISCAL IMPACT: Minimal impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective when signed into law by the Governor on August 28, 2007.

ANALYSIS: North Carolina allows an income tax credit[52] to taxpayers that qualify for the federal historic rehabilitation tax credit.[53] The amount of the credit is equal to 20% of the expenses of rehabilitating an income-producing historic structure.[54] A pass-through entity may qualify for the rehabilitation credit and pass the credit on to its owners.[55]

For most State tax credits, a pass-through entity is required to allocate the credit among its owners in the same proportion that other items, such as the federal rehabilitation credit, are allocated under the Internal Revenue Code. Under the Internal Revenue Code, tax credits are allocated among S corporation shareholders in accordance with their pro rata share of the corporation, which is determined on the basis of stock ownership,[56] and tax credits are allocated among partners in a partnership in accordance with the partnership agreement.[57]

However, in 1999, the General Assembly allowed a pass-through entity to allocate the historic tax credit for income-producing property among its owners in its discretion. The allocation of the credit allows the tax credit to be utilized more fully since it can be redistributed to North Carolina investors with State income tax liability. The provision of State law allowing this allocation would have expired for taxable years beginning on or after January 1, 2008.[58] This act repeals the sunset so that the credit may continue to be allocated among the owners of a pass-through entity in the

[52] G.S. 105-129.35. The credit may not be taken for the tax year the property is placed in service but must be taken in installments over five years after the historic structure is placed in service. Any unused portion of a credit may be carried forward for a five-year period.
[53] The federal tax credit is available for rehabilitating only income-producing historic structures. The federal credit amount is equal to 20% of the rehabilitation expenses.
[54] North Carolina also allows an income tax credit of 30% of the expenses of rehabilitating an historic structure that is not income-producing, and thus not eligible for the federal income tax credit.
[55] A pass-through entity is an entity, such as a partnership, a limited liability company, or a Subchapter S corporation, that is treated as owned by individuals or other entities under federal tax law and whose income, losses, and credits are reported by the owners on their State income tax returns.
[56] State law provides that the tax credit allowed a shareholder in a Subchapter S corporation is based on the percentage of stock held by the shareholder in the corporation. G.S. 105-131.8.
[57] State law provides that the tax credit allowed a partner is based on the partnership agreement, which must have substantial economic effect, which means that the allocation agreement must reflect the economic interest of the partners in the partnership and cannot be based solely on tax consequences. G.S. 105-269.15.
[58] The original provision enacted in 1999 would have expired in 2002. S.L. 2001-476 extended the provision for two years and S.L. 2003-415 extended it for four years.

entity's discretion. The credit itself has no sunset. Each year an allocated credit is claimed, the pass-through entity and its owners must include a statement with their tax return showing both the allocation made and the allocation that would otherwise have been required under G.S. 105-131.8 or G.S. 105-269.15. The owner's adjusted basis in the pass-through entity must be equal to at least 40% of the amount of credit allocated to the owner.[59]

AMEND COMBINED MV REGISTRATION AND PT SYSTEM.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-471	**HB 1688**	**Representative Folwell**

AN ACT TO AUTHORIZE THE DIVISION OF MOTOR VEHICLES TO CREATE A LIMITED REGISTRATION PLATE, TO EXEMPT MOTOR VEHICLES REGISTERED UNDER THE INTERNATIONAL REGISTRATION PLAN FROM THE COMBINED REGISTRATION AND PROPERTY TAX SYSTEM, TO PROVIDE THAT INTEREST GENERATED BY FUNDS IN THE COMBINED MOTOR VEHICLE AND REGISTRATION ACCOUNT BE CREDITED TO THE ACCOUNT, TO AUTHORIZE THE OFFICE OF STATE BUDGET AND MANAGEMENT TO DIRECT THE TREASURER TO DISTRIBUTE THE FUNDS IN THE ACCOUNT TO IMPLEMENT THE INTEGRATED COMPUTER SYSTEM, TO DISTRIBUTE ANY REMAINING FUNDS IN THE ACCOUNT TO THE LOCAL GOVERNMENTS, AND TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE COMBINED MOTOR VEHICLE REGISTRATION RENEWAL AND PROPERTY TAX COLLECTION SYSTEM.

OVERVIEW: This act makes the following changes to the combined motor vehicle registration and property tax collection system that was created in S.L. 2005-294:

- Creates a limited registration plate designed and issued by the Division of Motor Vehicles (DMV). A licensed motor vehicle dealer will be authorized to issue this limited plate to a purchaser of a motor vehicle after the dealer submits an application for title and registration fees to the DMV. Persons buying vehicles from someone other than a dealer may also obtain the limited plate upon submitting an application for title and payment of registration fees. The limited plate may allow a purchaser of a motor vehicle up to 90 days to pay property taxes on the vehicle.

- Exempts all motor vehicles registered under the International Registration Plan from the combined motor vehicle registration renewal and property tax collection system.

[59] S.L. 2003-415. Prior to 2003, the amount of credit allocated to an owner could not exceed the owner's adjusted basis in the entity.

- Provides that the interest generated by the funds in the Combined Motor Vehicle and Registration Account located in the Treasurer's Office shall be credited to the Account. These funds will not be transferred by the Office of State Budget and Management and appropriated by the General Assembly until the Department of Transportation and the North Carolina Association of County Commissioners reach agreement on a project plan for an integrated computer system. Any funds remaining in the Account after the system is in operation will be distributed to the local governments on a pro rata basis.
- Makes technical and conforming changes to the combined motor vehicle registration renewal and property tax collection system.

FISCAL IMPACT:

Description	*Local Government Impact*
IT and Computer System Modifications	$794,000 costs for 2009-2010
Limited Registration Plates / Temporary Stickers	$854,545 costs for 2009-2010 $854,545 costs for 2010-2011 $854,545 costs for 2011-2012
Mailing notice of limited plate expiration date / Notice to renew	$1,860,429 costs for 2009-2010 $1,860,429 costs for 2010-2011 $1,860,429 costs for 2011-2012
Local Plate Agency Fee for Collecting Payment	No estimate available at this time
Other Costs associated with implementation of S.L. 2005-294 and HB1688	No estimate available at this time
New Positions	No estimate available at this time

The above costs will be covered through the Combined Motor Vehicle and Registration Account that local governments pay into, held within the State Treasurer's Office. These funds will not be utilized until the North Carolina Association of County Commissioners approves DMV's plan of expenses and the General Assembly appropriates the funds. This Account currently has approximately $6 million for the program. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: Unless otherwise stated in the Analysis below, this act becomes effective July 1, 2010, or when the Division of Motor Vehicles and the Department of Revenue certify that the integrated computer system for registration renewal and property tax collection for motor vehicles is in operation, whichever occurs first.

ANALYSIS: In 2005, the General Assembly enacted legislation that will combine the registration for and the property tax billing and collection of motor vehicles into a combined process beginning July 1, 2010, or earlier if a combined registration and tax collection computer system is in operation before that date.[60] Instead of the Division of Motor Vehicles (DMV) sending a statement and collecting annual registration fees on one date and the county sending a statement and collecting annual property taxes on a different date, the combined system will require one statement containing all registration fees and property taxes due on the vehicle. The

[60] S.L. 2005-294, as amended by Section 31.5 of S.L. 2006-259.

fees and taxes may be paid to the DMV or a DMV agent on the same date. Until the combined system is in operation, the county in which the motor vehicle is registered will continue to assess the vehicle for property taxes on a revolving, year-round basis, and the DMV will continue to collect vehicle registration fees. The goals of the combined system are to reduce the number of taxpayer interactions with government, save money, increase the overall efficiency of both functions, and improve the property tax collection rate on motor vehicles.

The act makes several changes to the combined motor vehicle registration renewal and property tax collection system described as follows:

Creation of Limited Registration Plates

The act creates a new limited registration plate that will give motor vehicle dealers the option of collecting property taxes on a vehicle sold by them and allow the purchaser of the motor vehicle up to 90 days in some cases to pay the property taxes due on the motor vehicle. A purchaser of a motor vehicle from anyone other than a dealer will also be allowed to obtain the new limited registration plate. Under the combined system, which goes into effect July 1, 2010, or earlier if the integrated computer system is in operation before this date, property taxes on a motor vehicle are due at the time of vehicle registration or renewal of registration. The combined system will require a dealer, who is authorized to issue a 30-day temporary registration plate under G.S.20-79.1[61] to collect property taxes on a vehicle when a customer purchases a vehicle from the dealer and does not transfer his or her tag. The act makes the collection of property taxes by a dealer voluntary. Under the act, a dealer, who is authorized to issue a 30-day temporary tag under current law, must also provide a purchaser of a motor vehicle with a subsequent limited registration plate designated 'temporary', if the dealer does not want to collect the property taxes from the purchaser. After collecting an application for title and the registration fees from the purchaser, the dealer must provide the purchaser with the 30-day temporary tag and submit the title application and registration fees to the DMV or its authorized agent. The dealer must then provide the purchaser with the limited plate. The limited plate will expire on the last day of the second month following the date of the application of the limited registration plate. The Property Tax Division within the Department of Revenue must mail a notice to the purchaser indicating the date on which the limited plate will expire, that registration fees have been paid, and that the registration becomes valid for the remainder of the year upon payment of county and municipal taxes and fees due in the current year.

Exempt International Registration Plan Vehicles

The act exempts all classified motor vehicles registered under the International Registration Plan (IRP) from the combined motor vehicle registration and property tax collection system. The IRP is a registration reciprocity compact among 48 states, the District of Columbia, and 10 Canadian Provinces, and provides for the payment of license fees for vehicles based upon the total distance operated in all jurisdictions.[62] Under current law, fleet vehicles owned by public service companies are exempt from the definition of classified motor vehicles and, therefore, are exempt from the

[61] G.S. 20-79.1 requires a dealer, who is authorized to issue a temporary registration plate to a purchaser, to first obtain a written application for titling and collect the registration fees from the purchaser, before providing the purchaser with the temporary plate.

[62] The IRP applies to any of the following vehicles: (a) a vehicle having two axles and a gross vehicle weight in excess of 26,000 pounds, (b) a vehicle having three axles or more regardless of weight, or (c) a vehicle when the combination exceeds 26,000 pounds gross vehicle weight and the vehicle travels in two or more jurisdictions.

combined system. The Department of Revenue determines the assessed value of these fleet vehicles by apportioning a fair and reasonable share of the value of the company using property, business, and mileage factors, and allocating the valuations of the property among the local taxing units. Each local taxing unit then applies its tax rate to the apportioned valuation just as it does for any other type of property. Other vehicles registered under the IRP but not owned by public service companies are billed for property taxes like other classified motor vehicles. Once the combined system is in place, the valuation of IRP vehicles owned by public service companies will continue to be assessed by the Department of Revenue. All other IRP vehicles will be listed by the owner during the regular January listing period in the county in which the vehicle is located, and taxes will be due at the same time as taxes on other personal property.

Interest Credited to Combined Motor Vehicle and Registration Account

The act provides that interest generated by the funds in the Combined Motor Vehicle and Registration Account shall be credited to the Account. This Account was created within the Treasurer's Office, effective January 1, 2006, and holds funds generated by 60% of the first month's interest collected on unpaid taxes on motor vehicles registered under the current staggered system.[63] This interest accrues at the rate of 5%, and the funds generated by the interest are to be used for the purpose of developing and implementing the integrated computer system necessary to implement the combined motor vehicle registration and property tax collection system.

This portion of the act became effective when signed into law by the Governor on August 29, 2007.

Transfer of Funds in Combined Motor Vehicle and Registration Account

The 2005 legislation authorized the North Carolina Association of County Commissioners to direct the State Treasurer to distribute the funds in the Combined Motor Vehicle and Registration Account to the DMV for the purpose of developing and implementing the integrated computer system. The act gives the Office of State Budget and Management (OSBM) this authority; however, the funds in the Account may not be transferred by the OSBM and appropriated by the General Assembly until the Department of Transportation and the North Carolina Association of County Commissioners reach agreement on a project plan for the integrated system. Any funds remaining in the Account after the integrated system has been certified to be in operation must be distributed to the local governments on a pro rata basis.

This portion of the act became effective when signed into law by the Governor on August 29, 2007.

PROPERTY TAX - SCHOOL CAPITAL LEASES.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-477	**HB 63**	**Rep. Yongue, Johnson, Jones, Lucas**

[63] Under the current system, property taxes for the 12-month period that begins the first month following vehicle registration or renewal become due four months after the registration or renewal.

AN ACT TO EXCLUDE FROM PROPERTY TAX REAL AND PERSONAL PROPERTY THAT IS SUBJECT TO A CAPITAL LEASE WITH A LOCAL SCHOOL ADMINISTRATIVE UNIT.

OVERVIEW: This act excludes from property tax all real and personal property that is subject to a capital lease and used as a public school facility. The act was a recommendation of the House Select Committee on Public School Construction.

FISCAL IMPACT: This act does not impact State revenues and is expected to have no significant fiscal impact on local revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act is effective for taxes imposed for taxable years beginning on or after July 1, 2007.

ANALYSIS: This act excludes from property tax all real and tangible personal property that is subject to a capital lease and is used as a public school facility.[64]

In 2006, the General Assembly expanded the financing authority of local school administrative units by allowing them to enter into capital leases for school facilities.[65] These leases may relate to an existing building or new construction. Capital leases differ from operating leases in several respects. In general, a capital lease is one that is considered to have the economic characteristics of ownership. To determine whether a lease is a capital lease or an operating lease, one must look at a number of different provisions in the lease. Under generally accepted accounting principles, a capital lease is a non-cancelable contract satisfying one or more of the following conditions:

- Legal title to the property is transferred to the lessee.
- The lease contains bargain or nominal purchase options.
- The lease term equals or exceeds 75% of the asset's useful life.
- The present value of the minimum lease payments equals or exceeds 90% of the asset's fair market value.

Because a capital lease is generally considered to have the economic characteristics of ownership, the current practice of counties has been to treat the lessee in a capital lease as the responsible party for the payment of property taxes. Therefore, in the case of a school capital lease, the local school administrative unit is considered the owner for tax purposes and the property subject to the capital lease is excluded from property taxes. Generally, property owned by a unit of local government is not subject to property tax, and a local school administrative unit is a unit of local government. This act does not affect the current practice of counties.

ENACT WASC RECOMMENDATIONS.

Session Law	*Bill #*	*Sponsor*

[64] The most common type of tangible personal property that is subject to a capital lease by a school facility is its stadium lighting system.

[65] S.L. 2006-232, as amended by S.L. 2006-259. Prior to 2006, school boards were allowed to enter into operating leases for school facilities, but the property on which the facilities were located had to be owned in fee simple by the local unit. In addition, all construction and repairs were required to be performed under the control and direction of the local board of education.

S.L. 2007-485	SB 646	Senator Albertson

AN ACT TO PROVIDE PROPERTY TAX RELIEF FOR WORKING WATERFRONT PROPERTY, TO ESTABLISH THE ADVISORY COMMITTEE FOR THE COORDINATION OF WATERFRONT ACCESS, TO MAKE EXPANDED PUBLIC ACCESS TO COASTAL WATERS A PRIORITY IN PLANNING STATE ROAD PROJECTS, TO INCREASE FEES FOR VESSEL TITLING, TO WAIVE PERMIT FEES FOR EMERGENCY COASTAL AREA MANAGEMENT ACT PERMITS, AND TO DIRECT A STUDY OF CONSTRUCTION AND REPAIR IN REGULATED FLOOD ZONES, AS RECOMMENDED BY THE WATERFRONT ACCESS STUDY COMMITTEE.

OVERVIEW: Section 1 of the act provides property tax relief to working waterfront property by classifying the property as a special class of property to be appraised, assessed, and taxed on the basis of its value in its present use as opposed to its true value. The remainder of this act does not affect North Carolina tax laws and is not discussed below.

FISCAL IMPACT: Section 1 of the act does not impact State revenues. No estimate is available for the impact on local revenues, since there is no available data regarding the acreage or value of working waterfront property. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: Section 1 of the act is effective for taxes imposed for taxable years beginning on or after July 1, 2009.

ANALYSIS: The act classifies working waterfront property as a special class of property that must be appraised, assessed and taxed at its present use value as opposed to its true value. Working waterfront property is any of the following property that has, for the most recent three-year period, produced an average gross income of at least $1,000:

- A pier that extends into coastal fishing waters[66] and limits access to those who pay a fee.
- Real property that is adjacent to coastal fishing waters and is primarily used for a commercial fishing operation[67] or fish processing, including adjacent land that is under improvements used for one of these purposes.

Working waterfront property also includes land reasonably necessary for the convenient use of the property. In order for the land to be classified as working waterfront property, the owner must

[66] 'Coastal fishing waters' are defined in G.S. 113-129 as the Atlantic Ocean; the various coastal sounds; and estuarine waters up to the dividing line between coastal fishing waters and inland fishing waters agreed upon by the Marine Fisheries Commission and the Wildlife Resources Commission.

[67] 'Commercial fishing operation' is defined in G.S. 113-168 as any activity preparatory to, during, or subsequent to the taking of any fish, the taking of which is subject to regulation by the Marine Fisheries Commission, either with the use of commercial fishing equipment or gear, or by any means if the purpose of the taking is to obtain fish for sale. It does not include (i) the taking of fish as part of a recreational fishing tournament, unless commercial fishing equipment or gear is used, (ii) the taking of fish under a Recreational Commercial Gear License, or (iii) the taking of fish as provided in G.S. 113-266 (Taking fish and wildlife for scientific purposes; permits to take in normally unauthorized manner; cultural and scientific operations).

submit an application to the tax assessor of the county in which the property is located and the assessor must approve the application. A new application is not required to be submitted unless the property is transferred or the property loses its eligibility for classification as working waterfront property. Deferred taxes become due on the property when it no longer qualifies as working waterfront property. At that time the owner must pay the deferred taxes for the preceding three fiscal years. In addition, the tax on the property for the fiscal year that opens in the calendar year that the deferred taxes become due is computed as if the land had not been classified as working waterfront property. Deferred taxes are the difference between the taxes due on the property taxed at its present use value and the taxes that would be due if the property were taxed at its true value.

Since 1973, the General Assembly has established only three classifications of property that are eligible for present-use value tax treatment. Agricultural land, horticultural land, and forestland that meet certain size and ownership requirements and that are actively engaged in commercial production are eligible for this property tax benefit. Agricultural land and horticultural land must also meet the following minimum income requirement: for the preceding three years: an average gross income of at least $1,000. The purpose of these classifications was to help preserve farmland by insulating it from the rising property tax values caused by competing market pressure to develop farmland for commercial and residential purposes.

REFORM TAX APPEALS.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-491	**SB 242**	**Senator Clodfelter**

AN ACT TO REFORM THE PROCESS FOR ADMINISTRATIVE AND JUDICIAL REVIEW OF DISPUTED TAX MATTERS.

OVERVIEW: This act substantially revises the process for the review of disputed tax matters to provide taxpayers with the opportunity for an independent hearing outside the Department prior to paying the tax. These revisions include administrative review by the Office of Administrative Hearings, the elimination of the Tax Review Board, and the referral of tax cases to Business Court. With the elimination of the Tax Review Board, the act authorizes the Secretary of Revenue to approve a multistate corporation's request to use an alternative apportionment formula for franchise and corporate income tax purposes. It also extends by one month the due date for filing corporate income and franchise tax returns and makes various changes to the tax collection statutes.

FISCAL IMPACT: No impact.

EFFECTIVE DATE: Generally, the new procedures for disputing tax matters become effective January 1, 2008, and apply to assessments that are not final as of that date and to claims for refund pending on or filed on or after that date. The provisions relating to a federal determination are effective for taxable years beginning on or after January 1, 2007. The corporate income and franchise tax filing extension is effective for taxable years beginning on or after January 1, 2008.[68]

ANALYSIS:

[68] See Part III. of the Analysis for an explanation of a technical correction that is needed.

Prior Law

Before turning to an explanation of the new act, the following is an explanation of the prior law.[69] The prior tax appeals system was divided among assessments, refund claims for overpayments, and refund claims for the payment of an unconstitutional tax. Each type of claim involved a different procedure.

Assessments. – Upon receipt of a notice of a proposed assessment, a taxpayer could request a hearing before the Secretary of Revenue. Prior to scheduling a hearing, the Department attempted to resolve the matter informally through phone conversations, letters, and conferences. If those negotiations were unsuccessful, the case proceeded to a hearing at the Department. In practice, the Secretary did not hold the hearing. Instead, the Secretary exercised the authority given in G.S. 105-260.1 and delegated the responsibility of conducting the hearing and making a decision to an Assistant Secretary of the Department, who served as the Department's hearings officer. As an Assistant Secretary of the Department, this hearings officer was located within and employed by the Department. At the hearing, a taxpayer could be represented by an attorney, an accountant, or any person who has power of attorney for the taxpayer. The rules of evidence did not apply. The hearings officer had no authority to decide constitutional issues. The hearings officer was required to issue a written decision within 90 days of the hearing. This decision was considered the Secretary's decision.

A taxpayer who was dissatisfied with the Secretary's decision had two options. One option was to obtain an administrative review of the decision by the Tax Review Board, which was a three-member board consisting of the State Treasurer, the Chair of the North Carolina Utilities Commission, and an appointee of the Governor. The Tax Review Board held a hearing, but based its review on the record established at the Department. The Tax Review Board issued a decision within 90 days after the hearing, and the decision could be appealed to superior court. Under this option, the superior court reviewed the Tax Review Board's decision based on the record created at the Department. A taxpayer did not have to pay the proposed assessment while the case was under review. The other option was to bring an action in superior court within 30 days after notification of the Secretary's hearing decision. Under this option, the action in superior court was *de novo*.

Decisions of the superior court may be appealed to the North Carolina Court of Appeals and then to the North Carolina Supreme Court. The procedures for appeal from the superior court were the same, regardless of whether the action in superior court was based on the record established at the Department or was a *de novo* action.

Refunds. – The procedure for obtaining a refund of tax paid by a taxpayer differed depending on the nature of the claim. A taxpayer challenging the constitutionality of a tax had to follow the procedure set out in G.S. 105-267, known as the 'payment under protest rule'. If the taxpayer claimed that the tax paid was incorrect or excessive, then G.S. 105-266.1 governed the refund procedure. Under both statutes, the taxpayer was required to apply to the Secretary in writing for a refund. Under G.S. 105-267, the refund request had to be made within three years

[69] As used in this Analysis, 'prior law' refers to the law that is in effect until January 1, 2008, when S.L. 2007-491 becomes effective.

after payment.[70] Under G.S. 105-266.1, the refund request had to be made within three years after the filing date of the return or within six months after payment of the tax, whichever was later.[71] At this stage, the procedure varied as follows:

1. *Payment under protest (G.S. 105-267).* – When a refund request was made, the Secretary had 90 days to issue a decision and refund the tax in accordance with the decision. If the tax was not refunded within 90 days, the taxpayer could file a civil action at any time within three years after the expiration of the 90-day period allowed for making the refund. Thus, the three-year period for requesting a refund when coupled with the period for filing an action gave a taxpayer a maximum of six years and 90 days to contest the tax. If upon trial it was determined that all or part of the tax was levied for an 'illegal or unauthorized purpose', judgment was entered for the taxpayer, and the State refunded the amount of the judgment.

2. *Refunds for overpayment (G.S. 105-266.1).* – The appeals route for overpayment claims was similar to the route for assessments. When a refund request was made, the Secretary reviewed the request and notified the taxpayer of the decision. If the refund was reduced or disallowed, the taxpayer could request a hearing. The Department was required to schedule a hearing within 90 days, unless the taxpayer and the Secretary agreed to a later date. Within 90 days of the hearing, the Secretary made a decision, notified the taxpayer, and adjusted the tax in accordance with the decision. A taxpayer aggrieved by the Secretary's decision could, within 90 days after notification of the decision, either petition for administrative review before the Tax Review Board, followed by appeal to superior court on the record, or bring a *de novo* civil action against the Secretary for recovery of the alleged overpayment. Either party could appeal to the appellate division from the judgment of the superior court.

The New Law

Effective January 1, 2008, Session Law 2007-491 repeals the current statutes governing the process for administrative and judicial review of disputed tax matters and replaces them with a new procedure. Under this act, the procedure for the review of a proposed assessment and a request for a refund are substantially the same. The key features of the new procedure are as follows:

Claims for refunds. – The prior procedure required a taxpayer who was requesting a refund either for an overpayment or for a tax paid under protest to apply to the Secretary in writing. However, the prior statutes did not provide any guidance on the format or the content of the request. In addition, the statute of limitations for requesting a refund differed depending on the nature of the claim.

Under the act, all requests for refunds are treated the same. A taxpayer may request a refund either by filing an amended return or by filing a written claim for a refund within the appropriate statute of limitations. The claim must identify the taxpayer, the type and amount of tax overpaid, the filing period to which the overpayment applies, and the basis for the claim. The statement of the basis does not limit the taxpayer from changing the basis. The act changes the

---

[70]The protest period for taxes paid on alcoholic beverages, tobacco products, and controlled substances is only 30 days after payment.

[71]The statute of limitations period varies for overpayments associated with worthless debts or securities, capital losses and net operating losses, and returns reflecting a federal determination.

statute of limitations to mirror federal law, which is the later of three years after the due date of the return or two years after payment of the tax.[72] The Department must take action on the refund claim within six months. If it does not, the inaction is considered a proposed denial of the refund claim. Under prior law, there was no time limitation on the Department of Revenue for responding to a refund claim.

Proposing assessments. – For the most part, the procedure by which the Department proposes an assessment is substantially the same under the act as under prior law. If the Department discovers that tax is due, it may propose an assessment within the statute of limitations by sending written notice to the taxpayer stating the basis for the assessment. Language has been added to provide that the statement of basis does not limit the Department from changing the basis at a later time. The statute of limitations for proposing an assessment is also the same in this act as under prior law, which is also the same as federal law.

Departmental review. – As a general matter, when a taxpayer objects to a proposed assessment or a denial of a refund claim, the administrative practice of the Department has been to work with the taxpayer in an attempt to resolve the matter informally. However, this practice has not been codified in statute until now. Senate Bill 242 sets out a review and conference procedure and establishes a specific time frame by which certain actions must occur. Codifying the procedure in this manner is designed to provide taxpayers with more guidance, more transparency, and more predictability with regard to the process.

Under the new process, a taxpayer who objects to a proposed denial of a refund or a proposed assessment may, within 45 days from the notice, file a request for review by the Department. This time limit provides the taxpayer with an additional 15 days compared to prior law.[73] If a taxpayer fails to request a review of a proposed denial of a refund or a proposed assessment, then the proposed actions of the Department become final. Once a proposed denial of a refund becomes final, the taxpayer may not file another amended return or claim for refund to obtain the denied refund. Once a proposed assessment becomes final, a taxpayer may not seek further administrative or judicial review of the assessment. However, the taxpayer may pay the tax and seek a refund. The Department is required to send the taxpayer a 'notice of collection' indicating that the assessment is final and collectible and stating the collection options available to the Department.

A taxpayer who requests a review initiates a two-step process consisting of an initial review followed by an informal conference. If the initial review results in the Department granting the refund or removing the assessment, the matter ends there. If the initial review does not resolve the dispute, the Department may request additional information from the taxpayer and must schedule a conference with the taxpayer. With regard to a refund claim, if a taxpayer does not respond to the Department's request for additional information, the Department may deny the claim and send a notice of proposed denial. If the taxpayer provides the information, then the Department has additional time to take action on the request, including a time period mutually agreed upon by the parties. The conference is intended to be an informal process in which the

---

[72] The Department of Revenue has indicated that if a taxpayer's right to receive a refund expired under the prior six-month statute of limitations, the new two-year statute of limitations does not reopen the taxpayer's right to a refund. (See the Department of Revenue's *2007 Tax Law Changes.*)

[73] The Department has indicated that taxpayers who filed timely protests of proposed assessments or denials of refunds before January 1, 2008 and that are still pending as of that date are not required to submit a new request. (See the Department of Revenue's *2007 Tax Law Changes.)*

Department and the taxpayer attempt to resolve the matter. The taxpayer does not need to appear in person and may designate a representative to appear with the taxpayer or on the taxpayer's behalf. If the Department and the taxpayer are unable to resolve the matter at conference, the Department issues a final determination.

Final determination. – A final determination represents the Department's decision regarding a proposed denial of a refund or a proposed assessment. It must be issued within nine months after the date the taxpayer filed a request for review.[74] Once issued at the conclusion of the Departmental review process, it triggers the taxpayer's ability to seek further review. The final determination must state the basis for the determination and inform the taxpayer of the procedure for contesting it. A final determination regarding a proposed assessment must state the tax, interest, and penalties payable by the taxpayer, inform the taxpayer that the tax liability is due and collectible, unless the taxpayer contests the final determination, and explain the collection options available to the Department. This process of Departmental review, which may include a conference and concludes with the issuance of a final determination, is considered a taxpayer's 'prehearing remedy'. A taxpayer must exhaust this prehearing remedy before seeking review of an adverse final determination by the Department.

Contested case hearing. – The act establishes OAH as the independent forum for the review of contested tax matters. Under prior law, the Department of Revenue was exempt from the contested case hearing procedures of the Administrative Procedure Act. Instead, the administrative review of a disputed tax matter was conducted by a hearings officer within the Department followed by appeal to the Tax Review Board. A taxpayer also had the option of bypassing this administrative review process by paying the tax and filing a civil action in the superior court. Under the new system, this option is eliminated. There are several reasons why allowing a taxpayer to bypass the administrative review process and proceed directly to court is not a desirable feature of a fair and efficient tax administration system. First, it is contrary to the fundamental principle of administrative law that one must exhaust his or her administrative remedy before filing suit. Second, allowing a taxpayer to use judicial resources to develop a record, when that record could be developed at a lower level, is in inefficient use of judicial resources. Third, allowing a taxpayer to bypass the Departmental review process may adversely impact the Department's ability to have its best case prepared. Finally, it encourages forum shopping. Taxpayers with the financial ability to pay the tax should not be able to seek review in a different forum than a taxpayer who does not have the financial ability to pay. For these reasons, the new process requires taxpayers to exhaust the prehearing remedy and then file a contested case with OAH before filing suit.

The contested case follows the procedure set forth in Article 3 of Chapter 150B of the North Carolina General Statutes, which is the same procedure for virtually all other agency-citizen disputes. This includes a fact-finding hearing before an administrative law judge (ALJ) who issues a decision. The ALJ decides the case based on a preponderance of the evidence, giving due regard to the demonstrated knowledge and expertise of the agency with respect to facts and inferences within the specialized knowledge of the agency. The ALJ's decision is returned to the agency for

---

[74] With regard to requests for review that are pending as of January 1, 2008, the Department has nine months from January 1, 2008 to conclude its review and issue a final determination. (See the Department of Revenue's *2007 Tax Law Changes*.)

a final decision. The Department of Revenue must publish final decisions in contested tax cases in redacted form to remove identifying taxpayer information.

In 2000, the General Assembly made significant changes to the APA, which included strengthening the weight that must be given to ALJ decisions by agencies when making final decisions. Specifically, the agency must adopt each of the ALJ's findings of fact unless the finding is "clearly contrary to the preponderance of the admissible evidence giving due regard to the opportunity of the administrative law judge to evaluate the witnesses' credibility." In addition, the agency may not reject, substitute, or make new findings of fact unless it specifically states the reason for not adopting the ALJ's finding of fact and cites the evidence in the record on which it relied.

The agency must adopt the ALJ's decision unless it demonstrates that the decision is clearly contrary to the preponderance of the evidence in the admissible record. If the agency does not adopt the ALJ's decision, the agency must set forth its reasoning in light of the findings of fact and conclusions of law, including any exercise of discretion by the agency.

The act includes some special provisions for contested tax cases heard at OAH. First, it gives the Chief Administrative Law Judge general authority to simplify the procedures that apply to a contested tax case involving a taxpayer who is not represented by an attorney. It also requires an ALJ assigned to a contested tax case to make reasonable efforts to assist unrepresented taxpayers. Second, it requires the venue for all contested tax cases to be Wake County, unless the parties agree otherwise. Third, it provides that the record, the proceedings, and the decision are confidential until the final decision is issued in the case. Fourth, it allows a law enforcement report to be admitted into evidence without the testimony of personnel from the law enforcement agency. Finally, it creates an exemption in the confidentiality statute regarding taxpayer information for purposes of complying with an order of an ALJ in a contested tax case.

Judicial review of final decision. – Article 4 of Chapter 150B of the North Carolina General Statutes authorizes a person who is aggrieved by a final decision in a contested case to seek judicial review in the Superior Court of Wake County or in the county in which the person resides by filing a petition within 30 days after being served with the decision. This act allows a taxpayer to seek judicial review of a final decision by the Department in accordance with that Article. Prior to seeking judicial review, the taxpayer is required to pay the tax, penalties, and interest due. The prior option of posting a bond in lieu of paying the tax, penalties, and interest is repealed by this act. Also, the taxpayer is limited to filing a petition in the Superior Court of Wake County, but the taxpayer may request referral to the Business Court. A taxpayer may appeal a decision of the Superior Court, which includes decisions of the Business Court, to the North Carolina Court of Appeals.

When the General Assembly amended the APA in 2000, those changes included changing the court's standard of review of final agency decisions to reflect the higher standard to which agencies are held in order to reject an ALJ's decision. If the agency rejects an ALJ's decision, the court must review the record *de novo* and make its own findings of fact and conclusions of law. The court may not give deference to any prior decision in the case, nor is it bound by the agency's findings of fact or conclusions of law.

Tax cases in Business Court. – The North Carolina Business Court is a specialized forum of the North Carolina State Court's trial division. Currently, the Business Court handles only cases that involve complex and significant issues of corporate and commercial law, which are assigned by the Chief Justice of the North Carolina Supreme Court and designated 'complex

business cases'. This act adds tax cases to the list of matters that may be designated as complex business cases and taken up by the Business Court. This change is designed to provide both taxpayers and the State with a specialized forum for tax cases where it is anticipated that the court will develop expertise in this often complex area of the law.

Civil actions and constitutional claims. – With some limitation, prior law allowed a taxpayer to pay a disputed tax and bring a civil action in the superior court in lieu of administrative review. Under the new law, a taxpayer is required to exhaust the administrative remedy first by seeking Departmental review and commencing a contested case hearing at OAH. All matters, except for a challenge to the constitutionality of a statute on its face, are resolved through judicial review of the record created at OAH.

Generally speaking, the constitutionality of a statute may be subject to a 'facial' or an 'as applied' challenge. With an as applied challenge, the plaintiff contends that the application of a statute to the person's particular facts and circumstances is unconstitutional. The practical effect of holding a statute unconstitutional, as applied, is to prevent its future application in a similar context, but it does not render the statute utterly inoperative. With a facial challenge, the plaintiff contends that no set of circumstances exists in which the statute may be constitutionally applied.

If the only basis for disputing a tax is that the statute imposing the tax is unconstitutional on its face, the matter may only be resolved by the judicial branch. Neither executive agencies nor OAH, which is a quasi-judicial body within the executive branch, has authority to determine the facial validity of a statute. However, this act does not allow a taxpayer to bypass the Departmental review process or OAH altogether and proceed directly to court when the matter involves a constitutional claim. Under this act, a taxpayer is required to exhaust the administrative remedy before going to court. Therefore, constitutional claims may follow one of two paths under this act:

1. *Application of statute*. – If the claim involves a constitutional challenge to the application of a tax statute, then the taxpayer proceeds with a contested case at OAH. OAH serves as the fact-finding body and establishes the record in the case. The ALJ makes a decision regarding the application of the statute based on the facts elicited at the hearing. If the final decision is adverse to the taxpayer, the taxpayer has 30 days to file a petition with the Superior Court of Wake County seeking judicial review of the decision. The taxpayer may simultaneously file a Notice of Designation seeking designation as a mandatory complex business case to be heard in the Business Court.
2. *Facial challenge*. – If the claim involves a challenge to the facial validity of the statute, OAH would dismiss the case for lack of jurisdiction. At this point, the tax is collectible. The taxpayer may, within 30 days, seek judicial review of the dismissal. The taxpayer may also, within two years, file a new civil action. In either case, the taxpayer must pay the tax immediately upon conclusion of the case at OAH. A taxpayer who files a civil action in this circumstance may also seek designation of the case as a complex business case to be heard in the Business Court.

Elimination of Tax Review Board. – The act eliminates the Tax Review Board and, by extension, the augmented Tax Review Board.[75] Under the revised review and appeals process, the

[75] The effect of eliminating the augmented Tax Review Board is discussed in more detail in *Part IV*. of this summary.

role of the Tax Review Board is no longer needed because OAH is the independent arbiter of disputed tax matters, and the superior court is the forum for review of final decisions.

Report by Attorney General's Office. – The act directs the Office of the Attorney General to report on or before January 1, 2009, to the Revenue Laws Study Committee concerning the staffing needs of the Revenue Section as the result of the tax hearings being conducted at OAH.

Part II: Changes Relating to Federal Corrections

When the federal government corrects or otherwise determines the amount of an estate, a gift, or income that is subject to tax, the taxpayer must file a State return that reflects the change. This is so because the State estate, gift, and income taxes are, to varying degrees, based on amounts determined with respect to federal law. The change is referred to as a 'federal determination' or a 'federal correction'. This act makes three changes in the law relating to federal corrections, effective for taxable years beginning on or after January 1, 2007.

Limits on refunds and assessments. – The act creates a new provision with respect to claims for refund and to proposed assessments when a federal determination is involved. If a taxpayer files a return reflecting a federal determination that affects the amount of State tax payable and the general statute of limitations for requesting a refund or proposing an assessment has expired, then a request for refund or proposed assessment is limited to the adjustment in State tax payable reflecting the federal determination. In other words, filing a return reflecting a federal determination does not open up a taxpayer's return to all items on that return, but only to those items that changed as a result of the federal determination. Similarly, a taxpayer may not request a refund for items beyond the scope of the federal determination.

Withholding tax. – In 2006, the General Assembly reduced from two years to six months the period of time in which a taxpayer must report a federal change based on a model uniform statute adopted by the Multistate Tax Commission. The model statute was intended to bring uniformity to this area among the states. Currently, there is a great deal of variety with some states requiring changes to be reported in as little as 90 days to as much as two years. The 2006 change inadvertently omitted the statute requiring employers to report federal changes to withholding tax. Section 17 of this act makes that conforming change by reducing from two years to six months the time period that an employer has to report federal changes.

Estate tax. – A taxpayer who fails to file an amended State return reflecting federal changes is subject to the general administrative penalties in G.S. 105-236 and forfeits the right to a refund due as the result of the federal changes. However, a taxpayer who fails to file an amended estate tax return reflecting federal changes is subject only to the loss of the refund. Section 6 of this act makes the federal correction statute for estate tax returns consistent with all of the other federal correction statutes by making failure to file subject to the general penalty provisions.

Part III: Extension of Corporate Income and Franchise Tax Filing Deadline

Sections 10 and 14 of the act extend by one month the due date for filing corporate income and franchise tax returns. With this change, the returns are due on the 15th day of the fourth month following the end of the corporation's tax year rather than on the 15th day of the third month. The change is effective for returns filed in 2009.[76]

---

[76] A corporation's franchise tax liability is paid for a given tax year in the same year in which the return is filed. Unlike franchise tax, a corporate income tax return reflects the tax due for the preceding year.

Part IV: Alternative Apportionment Formula Requests

With the elimination of the augmented Tax Review Board, a new procedure is established for multistate corporations seeking an alternative apportionment method to determine their North Carolina corporate income and franchise tax liability. The new procedure applies to requests filed on or after January 1, 2008.

Under prior law, if a corporation believed that the statutory apportionment formula subjected the corporation to more tax than is reasonably attributable to its business within the State, it filed a petition with the Tax Review Board. The Tax Review Board, whose membership was augmented by the addition of the Secretary of Revenue, held a hearing, considered the evidence, and rendered a decision by majority vote. Prior to the passage of this act, North Carolina was the only state where this decision-making authority lay outside the Department. If the Tax Review Board concluded that the statutory formula subjected the corporation to more tax than is reasonably attributable to the State, it authorized allocation by an alternative method. The Tax Review Board's decision was not subject to appeal.

Under the new procedure, this role of the Tax Review Board is replaced by the Secretary of Revenue. Just like the prior law where the Tax Review Board's decision could not be appealed, the Secretary's decision may not be appealed either. The inability to appeal this decision is consistent with the procedure in the vast majority of other states. If the Secretary authorizes an alternative apportionment method, it applies for no more than three tax years. At the end of the authorization, the taxpayer may renew the request in the same manner as an original request.

Part V: Modifications to Collection Procedures

The Department of Revenue has various collection tools available to it to recover an assessment of tax, including the levy and sale of real and tangible personal property, the attachment and garnishment of intangible property, the filing of a certificate of liability, and the filing of a civil action. This act makes several substantive, clarifying, and technical changes to those collection statutes.

When Tax Is Collectible. – Under prior law, a tax was generally collectible when the Department issued a notice of final assessment. Under the revised review and appeals process, the Department does not issue a final assessment. Therefore, the act sets out the various conditions under which a tax becomes collectible. One of those conditions is when a taxpayer files a return showing tax due but fails to remit the tax due. Under prior law, the Department was required to issue a notice of proposed assessment and follow the procedures for the assessment to become final in order for the tax to become collectible. Under this act, the tax is collectible immediately upon the filing of the return.

The other circumstances under which the Department may collect a tax are as follows: (1) when the Department sends a notice of collection after a taxpayer does not file a timely request for review of a proposed assessment; (2) when a taxpayer and the Department agree

---

However, franchise tax and corporate income tax are reported on the same form. Therefore, the due date of those returns must be the same. Questions have been raised with regard to the effective date in Senate Bill 242 for the one-month extension of franchise and corporate income tax returns. Returns filed in 2008 will be due on the 15th day of the third month following the end of the corporation's income year. Effective for taxable years beginning January 1, 2009, returns will be due on the 15th day of the fourth month. However, legislation will likely be introduced during the 2008 Regular Session to make any necessary conforming changes.

on a settlement concerning tax due; (3) when the Department sends a notice of final determination concerning an assessment and the taxpayer does not file a petition for a contested case hearing; (4) when a final decision is issued on a proposed assessment after a contested case hearing; and (5) when OAH dismisses a petition for a contested case for lack of jurisdiction because the sole issue is the constitutionality of a statute on its face.

Garnishment Procedure. – Section 30 rewrites the garnishment statute to make clarifying changes and to more accurately reflect current practice. Under prior law, the Department was required to serve both the taxpayer and the garnishee with a notice of garnishment in accordance with Rule 4 of the North Carolina Rules of Civil Procedure. Under the revised statute, the Department need only send notice by United States mail. Under prior law, a garnishee had 10 days to respond to the notice of garnishment, either by offering a defense or remitting payment due. Under the new procedure, the garnishee has 30 days to comply or file a response. Another new feature is that the Department must send a garnishment release letter that includes identifying information, such as a Social Security number, in the notice. This change will address a concern expressed by employers who are often unable to identify when an employee has satisfied his obligation and is no longer subject to garnishment.

Certificates of Liability. – A certificate of tax liability (CTL) is similar to a civil judgment. Docketed with the clerk of superior court, it acts as a lien on real and personal property. Section 31 of the act makes the following changes:

- Clarifies that CTLs are subject to the legal rate of interest, which is 8%, and not the interest rate set by the Secretary applicable to assessments of tax. This codifies current practice.
- Authorizes the Department to file a CTL in Wake County against a nonresident to assist with collection in a foreign state.
- Provides that a CTL is a lien on both real and personal property from the date it is recorded. Under prior law, a CTL was a lien on real property from the date of docketing and a lien on personal property from the date of levy.
- Provides that the 10-year period in which the CTL is enforceable is tolled if the taxpayer waives the 10-year period. It is tolled until the end of the period extended by the waiver.

Civil Action. – Under prior law, there were two statutes authorizing the Department of Revenue, through the Attorney General's Office, to bring a civil action against a taxpayer to recover a tax debt, one of which applied only with regard to corporations. The act consolidates these two statutes through a rewrite of G.S. 105-243. The revised statute applies to all taxpayers in the same manner. The Department is no longer required to issue a civil execution against a corporation prior to bringing a civil action. Also, the action may be brought in the taxpayer's county of residence or in a court of competent jurisdiction in another state and changes the 'doing business' provision to a county in which the taxpayer has its principal place of business.

Part VI: Refunds of Land Transfer Tax

Section 24 of the act modifies the procedure for a taxpayer seeking a refund for overpayment of the excise stamp tax on conveyances, which is commonly referred to as the 'land transfer tax'. A taxpayer who wishes to request a refund must file a written request with the board of county commissioners of the county where the tax was paid. Under current law, the Secretary

of Revenue reviews the board's decision. This act provides for review by the Property Tax Commission. A Property Tax Commission decision may be appealed directly to the North Carolina Court of Appeals.

Part VII: Corporate Officer Authority and Liability

Currently, the following individuals are authorized to sign a corporation's income and franchise tax returns: its president, vice-president, treasurer, assistant treasurer, secretary, or assistant secretary. Section 10 of this act, which applies to franchise tax, adds chief financial officers and deletes the secretary, the assistant secretary, and the assistant treasurer.[77] Section 34 also adds chief financial officers to the list of officers who may be held personally liable for failure to properly remit sales and use, motor fuels, and withholding taxes.

Part VIII: Class Actions Study

Section 45 of the act directs the Revenue Laws Study Committee to study whether any legislative changes should be made regarding the use and scope of class actions to challenge the constitutionality of a tax in light of the decision reached by the North Carolina Supreme Court in *Dunn v. North Carolina*. The Committee must report its findings to the 2007 General Assembly, 2008 Regular Session.

PROPERTY TAX AND PUV CHANGES AND STUDIES.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-497, as amended by S.L. 2007-484[78]	**HB 1499**	**Rep. Martin, Holliman, R. Warren, Braxton**

AN ACT TO INCREASE THE BENEFIT OF THE PROPERTY TAX HOMESTEAD EXCLUSION BY RAISING BOTH THE INCOME ELIGIBILITY LIMIT AND THE AMOUNT EXCLUDED FROM TAXATION; TO AUTHORIZE THE REVENUE LAWS STUDY COMMITTEE TO STUDY WHETHER AND HOW TO INDEX THE MINIMUM AMOUNT THAT IS EXCLUDED FROM TAX; TO CREATE A SENIOR CIRCUIT BREAKER PROPERTY TAX BENEFIT; TO MODIFY THE PRESENT-USE VALUE REQUIREMENTS FOR AGRICULTURAL LAND USED AS AN AQUATIC SPECIES FARM; AND TO AUTHORIZE THE REVENUE LAWS STUDY COMMITTEE TO STUDY VARIOUS MODIFICATIONS AND EXPANSIONS TO THE PRESENT-USE VALUE SYSTEM.

OVERVIEW: This act provides the following residential property tax relief:

[77] Conforming changes were not made to the corresponding corporate income tax statute. Since the franchise tax return and the corporate income tax return are on the same form, the statutes need to match. This change will likely be corrected during the 2008 Regular Session.
[78] Section 43.7T.(a) through (e) of S.L. 2007-484 made technical corrections only.

- It increases the amount of the appraised value excluded from the property tax homestead exclusion from the greater of $20,000 or 50% of the appraised value of the residence to the greater of $25,000 or 50% of the appraised value of the residence.
- It increases the income eligibility limit of the property tax homestead exclusion to $25,000 and clarifies the definition of 'income' used to determine this limit.
- It creates a property tax homestead circuit breaker system that defers property taxes on certain owner-occupied homes. An owner who qualifies for both the property tax homestead exclusion and the property tax homestead circuit breaker may elect to take only one of these forms of property tax relief.

The act also provides present-use value property tax status to agricultural land that is used as an aquatic species farm.

Lastly, the act authorizes the Revenue Laws Study Committee to study the following issues:

- Whether to index the excluded appraised value limit in the property tax homestead exclusion and, if so, which index to use.
- Ways to address the inability of landowners to pay escalating property taxes while continuing to use their property for farming or other non-developmental purposes.

FISCAL IMPACT:

Description	*Local Government Impact*
Property Tax Homestead Exclusion Changes	$16.5 million loss for 2008-2009 $17.6 million loss for 2009-2010 $18.9 million loss for 2010-2011 $20.1 million loss for 2011-2012
Senior Circuit Breaker Property Tax Benefit	$7.8 million loss for 2009-2010 $7.2 million loss for 2010-2011 $6.8 million loss for 2011-2012
Present-Use Value Changes	No data available; however, the fiscal impact is expected to be minimal.

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Except as provided in the Analysis, the act became effective when signed into law by the Governor on August 30, 2007.

ANALYSIS: This act enhances residential property tax relief and modifies the requirements in order for agricultural land used as an aquatic species farm to qualify for present-use value property tax status. The act also authorizes the Revenue Laws Study Committee to study certain aspects of the property tax homestead exclusion and expansion of the present-use value statutes.

Part I: Residential Property Tax Relief

Property Tax Homestead Exclusion. – The property tax homestead exclusion applies to the permanent home of a North Carolina resident who (i) is at least 65 years of age or totally and permanently disabled and (ii) has income not exceeding the income eligibility limit. The amount of the appraised value of the home excluded from property tax is the greater of $20,000 or 50% of the tax value of

the home.[79] The income eligibility limit was $18,000 until July 1, 2003. For taxable years beginning on or after July 1, 2003, this limit has been adjusted yearly by a cost-of-living adjustment (COLA) percentage used to increase Social Security benefits for the preceding calendar year. The 2007 income limit is $20,500. The income used to determine the income eligibility limit is a homeowner's adjusted gross income, as defined in the Internal Revenue Code, plus all other moneys received from every source other than gifts or inheritances received from a spouse, lineal ancestor, or lineal descendant.[80] For married applicants residing with their spouses, the income of both spouses is included, whether or not the property is in both names.

The act increases the amount excluded from property tax due on a permanent home from the greater of $20,000 or 50% of the tax value of the home to the greater of $25,000 or 50% of the tax value of the home. The income eligibility limit is increased to $25,000, and is indexed for taxable years beginning on or after July 1, 2009.[81] The definition of 'income' used to determine the income eligibility limit is amended by changing the starting point when determining income from adjusted gross income as defined in the Internal Revenue Code to all moneys received from every source other than gifts or inheritances received from a spouse. The amended definition of income prevents a taxpayer from reducing his or her income by net business or other losses subtracted from income on a federal income tax return to arrive at an adjusted gross income figure. The removal of the adjusted gross income as the starting point should affect only a small percentage of taxpayers.

The changes to the property tax homestead exclusion are effective for taxes imposed for taxable years beginning on or after July 1, 2008.

Senior Circuit Breaker Property Tax Benefit. – The act creates a new class of property that qualifies for property tax relief, known as the property tax homestead circuit breaker. The relief is in the form of a deferral of property taxes on the permanent residence owned by a North Carolina resident and becomes effective for taxes imposed for taxable years beginning on or after July 1, 2009.

- Qualifications. The North Carolina resident must have owned and occupied the property located in North Carolina as a permanent residence for at least five years and must be at least 65 years of age or totally and permanently disabled. If the residence is owned and occupied by persons other than husband and wife, the benefit is not allowed unless all of the owners qualify and elect to seek the deferral. An owner qualifying for the circuit breaker property tax benefit and the property tax homestead exclusion must elect which benefit to use.

---

[79] A residence owned by husband and wife as tenants by the entirety is entitled to the full exclusion notwithstanding that only one spouse meets the age or disability requirements. If a residence is owned by two or more persons other than husband and wife, each owner who meets the eligibility requirements is entitled to the full exclusion not to exceed the owner's proportionate share of the valuation of the residence.

[80] Section 62 of the IRC defines adjusted gross income as a taxpayer's gross income (all income received from any source other than tax-free income) minus a number of deductions such as capital losses, business expenses, net operating losses, and IRA contributions.

[81] The act states that the income eligibility limit is $25,000 until July 1, 2008, and is indexed beginning on or after July 1, 2008. This is contradictory since this portion of the act is effective for taxes imposed for taxable years beginning on or after July 1, 2008. A technical correction will need to be made during the 2008 Session to clarify that the income eligibility limit is $25,000 for tax year July 1, 2008, and indexed for taxable years beginning on or after July 1, 2009.

- Amount Deferred. The amount of property taxes deferred is based on the income eligibility limit of the property tax homestead exclusion. If the owner's income is less than this income eligibility limit, then the portion of property taxes imposed on the residence that exceeds 4% of the owner's income may be deferred. If the owner's income is between 100% and 150% of the income eligibility limit, then the portion of the property taxes on the residence that exceeds 5% of the owner's income may be deferred. The deferred taxes become a lien on the residence. Once a tax deferral has been granted, the county tax assessor must notify the owner each year of the accumulated sum of deferred taxes and interest.

- Disqualifying Event. If the owner transfers the residence, dies, or ceases to use the home as a permanent residence, the deferred taxes for the year in which the transfer, death, or change in use occurs plus the taxes deferred for the preceding three fiscal years become due. The deferred taxes together with interest must be paid within nine months after the disqualifying event occurs. Prepayment of all or part of deferred taxes may be made to the tax collector at any time, with partial payments applied first to accrued interest.

- Exceptions. The deferral is allowed to continue if the owner transfers the residence as part of a divorce proceeding to a spouse who qualifies for tax deferral, the owner transfers the residence to a co-owner of the residence, or the owner dies and passes his or share to a spouse or co-owner. The spouse or co-owner must use the residence as his or her permanent residence and elect to continue deferring payment of the tax. Also, the deferral continues if a qualifying owner ceases to use the residence because of a temporary absence for health reasons or because of an extended absence while confined to a rest home or nursing home, so long as the residence is unoccupied or occupied by the owner's spouse or other dependent. If the owner of a tax-deferred residence does not qualify for the deferral for reasons other than a disqualifying event or if the owner revokes an application for deferral, the owner may not defer any additional property taxes without submitting a new application. The interruption in qualification does not trigger payment of deferred taxes; however, the deferred taxes existing at the time of the interruption will become due when there is a disqualifying event.

Part II: Present-Use Value Changes

Present-Use Value Taxation of Aquatic Species Farms. –The act establishes different production and acreage requirements that must be met in order for agricultural land used as an aquatic species farm to qualify for present-use value taxation. Under the current property tax statutes, agricultural land is one of three classifications that qualify for land taxable at its present-use value (PUV) as opposed to its market value. Agricultural land is defined as land that is a part of a farm unit that is actively engaged in the commercial production of growing of crops, plants, or animals. In order to qualify as agricultural land taxed at its PUV, the land must (i) be individually owned, (ii) consist of one or more tracts, one of which consists of at least 10 acres that are in actual production, and (iii) for at least three years prior to January 1 for the year in which the landowner is claiming PUV, produce an average gross income of at least $1,000.

The act modifies the classification of 'agricultural land' in the property tax statutes to allow different production and acreage requirements for agricultural land used as an aquatic species farm. The tract qualifies for PUV if it meets the existing $1,000 income requirement and either consists of at least five acres in actual production or produces at least 20,000 pounds of aquatic species for commercial sale annually, regardless of acreage. 'Aquatic species' is defined as any species of

finfish, mollusk, crustacean, or other aquatic invertebrate, amphibian, reptile, or aquatic plant, and including but not limited to fish and fishes as defined in G.S. 113-129(7).[82]

This change is effective for taxes imposed for taxable years beginning on or after July 1, 2008.

Part III: Revenue Laws Study Committee

The act authorizes the Revenue Laws Study Committee to study the following issues:

- Whether to index the minimum excluded appraised value limit in the property tax homestead exclusion and, if so, which index to use.[83]
- Ways to address the inability of landowners to pay escalating property taxes while maintaining non-developmental uses of their land such as farming. The study may include a review of implementing tax benefits for donating perpetual easements on property to ensure continuation of non-developmental uses, extending PUV benefits to property that is used for wildlife conservation, and other ways to reduce property taxes to preserve property used for farmland and other non-developmental uses. Any findings, recommendations, or legislative proposals may be reported to the 2008 Regular Session of the 2007 General Assembly.

EXEMPTION FOR BALER TWINE FROM SALES TAX.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-500	**HB 487**	**Representative Hill**

AN ACT TO EXEMPT BALER TWINE FROM THE SALES AND USE TAX

OVERVIEW: This act exempts baler twine used by a farmer for certain statutory purposes from State and local sales and use tax.

FISCAL IMPACT: Minimal impact on the State and local government revenues. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective October 1, 2007, and applies to sales made on or after that date.

ANALYSIS: Under current law, the following items are exempt from sales and use tax if they are sold to a farmer[84] for use by the farmer in the planting, cultivating, harvesting, or curing of farm crops or in the production of dairy products, eggs, or animals:

- Commercial fertilizer
- Lime

[82] G.S. 113-129(7) defines 'fish' and 'fishes' as all marine mammals, shellfish, crustaceans, and other fishes.
[83] Existing law indexes only the income eligibility limit of the homestead exclusion. (See G.S. 105-277.1(a2)).
[84] A 'farmer' includes a dairy operator, poultry farmer, egg producer, livestock farmer, farmer of crops, and farmer of an aquatic species as defined by G.S. 106-758.

- Land covers
- Potting soil
- Seeds
- Farm machinery; attachment and repair parts for farm machinery; lubricants applied to farm machinery.
- Horses
- Mules
- Fuel other than electricity.

The act adds baler twine to this list of items exempt from sales and use tax.

ECONOMIC DEVELOPMENT MODIFICATIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-515	**HB 1595**	**Rep. Gibson, Owens, Daughtridge, Wainwright**

AN ACT TO CLARIFY PROVISIONS IN THE LOCAL DEVELOPMENT ACT, TO CLARIFY URBAN PROGRESS ZONES AND AGRARIAN GROWTH ZONES, TO ALLOW MORE THAN ONE AGRARIAN GROWTH ZONE IN A COUNTY, TO CLARIFY WHEN THE LAST REPORT IS DUE FOR THE REPEALED LEE ACT CREDITS, TO MAKE TECHNICAL CHANGES CONCERNING THE TAX CREDITS FOR GROWING BUSINESSES; TO PROVIDE FOR PUBLICATION, MONITORING, AND REPORTING ON ECONOMIC DEVELOPMENT INCENTIVE CLAWBACKS; AND TO REQUIRE CLAWBACK PROVISIONS IN LOCAL ECONOMIC DEVELOPMENT AGREEMENTS.

OVERVIEW: This act does the following:

- It clarifies in the Local Development Act a local government's authority to acquire, construct, convey, or lease buildings for industrial or commercial use.
- It clarifies certain criteria for urban progress zones. It also expands the urban progress zones to address districts that have experienced massive layoffs.
- It allows more than one agrarian growth zone in a county.
- It requires a final Bill Lee Act report by the Department of Commerce on June 1, 2007, which is consistent with the Act's repeal.
- It clarifies the effective date for tax credits available under the new Article 3J, Tax Credits for Growing Businesses.

- It provides for publication, monitoring, and reporting on economic development incentive clawbacks.
- It requires clawback provisions in local economic development agreements.*

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective when signed into law by the Governor on August 30, 2007.

ANALYSIS: The act modifies various economic development incentives.

Authority to acquire, construct, convey, or lease certain buildings. – The Local Development Act of 1925 authorizes counties and cities to undertake specific economic development activities to be funded by the levy of property taxes and by the allocation of other revenues whose use is not otherwise restricted by law. Among those activities is the acquisition, construction, conveyance, or lease of 'shell buildings', which are structures of flexible design adaptable for use by a variety of industrial or commercial businesses. In light of a concern that the term 'shell building' implies or is limited to buildings for general, nonspecific use only, Section 1 of this act eliminates that term. It clarifies that a local government may acquire, construct, convey, or lease any building for industrial or commercial use, regardless of whether the local government has a specific business entity in mind when it acquires, constructs, conveys, or leases a building.

Clarification of criteria for urban progress zones. – In 2006, the General Assembly created a new package of State tax incentives to replace the Bill Lee Act for most taxpayers. As part of that package, the new Article 3J replaced development zones with urban progress zones. Development zones were intended to be areas of high poverty within cities. Over the years it became clear that the development zones often included areas that were neither high poverty nor particularly urban. Under Article 3J, the intent is for urban progress zones to be more narrowly focused and subject to more stringent guidelines with respect to poverty.

Article 3J provides enhanced tax credits in urban progress zones. An urban progress zone is an area that meets certain conditions. One of the conditions seemed to require that the area of the zone zoned as nonresidential could not exceed 35% of the total area of the zone. However, the original intent was not to limit zones to only those areas that have less than 35% nonresidential development, but rather to restrict the size of the zone that did not meet the poverty requirements. According to the Department of Commerce, this wording made it very difficult to create a workable zone. The Department requested that the definition be revised to more accurately reflect the original intent when the act passed last year.

This act addresses the Department of Commerce's concerns by clarifying the definition of an urban progress zone. The act also expands the purpose of an urban progress zone so that it can be used to address districts that have experienced massive layoffs. As amended by this act, an urban progress zone is an area comprised of one or more contiguous census tracts, census block groups, or both, or parts thereof, in the most recent federal decennial census that meets all of the following conditions:

- All land within the zone is located in whole within the primary corporate limits of a municipality with a population of more than 10,000 according to the most recent annual population estimates certified by the State Budget Officer.

- Every census tract and census block group that composes part of the zone meets at least one of the following conditions:
    - More than twenty percent (20%) of its population is below the poverty level according to the most recent federal decennial census.
    - At least fifty percent (50%) of the area of the portion that is within the primary corporate limits of the municipality is zoned as nonresidential and the census tract or census block group is adjacent to a census tract or block group of which at least twenty percent (20%) of the population is below the poverty level. This portion of the zone cannot exceed 35% of the total area of the zone.
    - Its population has a poverty level greater than the poverty level of the population of the State, it population has a per capita income that is at least 10% below the per capita income of the State, and it has experienced a major plant closing and layoff within the past 10 years. A major plant closing and layoff has occurred if an industry has closed one or more facilities in the zone resulting in a layoff of at least 3,000 employees, so long as the number of employees laid off is greater than 7% of the population of the municipality.

Agrarian growth zone changes. – The 2006 legislation that created a new package of State tax incentives also created a new type of zone called an agrarian growth zone, which provides those areas with the enhanced tax credits provided to urban progress zones. The 2006 legislation restricted a county to one agrarian growth zone. This act removes that restriction. An agrarian growth zone must satisfy all of the following conditions:

- It must be composed of contiguous census tracts or block groups located within a single county that does not have any municipality with a population in excess of 10,000.
- Each census tract or block group in the zone must have more than 20% of its population below the poverty level.
- The area of the zone, less its smallest census tract, may not exceed 5% of the total area of the county.

Final Bill Lee Act report. – The Department of Commerce is required to make biennial reports on tax equity and the impact of the Bill Lee Act. With limited exception applicable to four specific industries, the Bill Lee Act is repealed effective for business activities that occur on or after January 1, 2007. The act requires the Department of Commerce to provide a final report on June 1, 2007. Since there are only a few specific businesses that may continue to take Bill Lee credits until 2010, an study of those credits after 2007 would not be representative of the credits' impact or equity.

Clarify effective date of Article 3J. – The repeal of the Bill Lee Act applies to 'business activities' occurring on or after January 1, 2007. The effective date of Article 3J, Tax Credits for Growing Businesses, is for 'taxable years' beginning on or after January 1, 2007. The act clarifies the effective date for Article 3J to avoid any possible gap where, for example, a business with its taxable year beginning on July 1 engaged in otherwise eligible 'business activities' after January 1, 2007.

Clawback provisions. – The act requires the Department of Commerce to publish, monitor, and report on economic development incentive clawbacks. Specifically, it must catalog all clawbacks in the State and federal programs it administers, including a description of each clawback, the program to which it applies, and a citation to its source. The report must be published and updated every six months.

The act also requires economic development agreements entered into between a local government and a private enterprise to contain clawback provisions allowing the local government to recapture amounts appropriated or expended if certain events occur. These events must be specified in the agreement and would include the creation of fewer jobs, the investing of less capital, or the failure to maintain operations at a specified level.

MOTOR FUEL TAX EXEMPTION FOR BIODIESEL.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-524	**SB 1272**	**Senator Snow**

AN ACT TO EXEMPT BIODIESEL THAT IS PRODUCED BY AN INDIVIDUAL FOR PERSONAL USE IN A PRIVATE PASSENGER VEHICLE FROM THE MOTOR FUEL EXCISE TAX.

OVERVIEW: This act does two things:

- It exempts biodiesel that is produced by an individual for use in a private passenger vehicle from the excise tax on motor fuel.
- It directs a study of transportation funding by the Revenue Laws Study Committee and the Joint Legislative Transportation Oversight Committee.

FISCAL IMPACT: Minimal impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The motor fuel tax exemption became effective October 1, 2007. The study authorization became effective when the bill was signed into law by the Governor on August 31, 2007.

ANALYSIS: A motor fuel excise tax is imposed on all motor fuels sold, distributed, or used in the State. The rate of tax consists of a flat rate of 17.5¢ per gallon plus a variable wholesale component equal to the greater of 7% of the average wholesale price of motor fuel during a base six-month base period or 3.5¢ per gallon. The wholesale component of the motor fuels tax rate is capped at 12.4¢ per gallon for the period July 1, 2007, through June 30, 2009.

The following are exempted from the excise tax:

- Motor fuel in transport, if the fuel is transported by a licensed distributor or licensed exporter and the supplier of the fuel collects a tax on the fuel at the rate of the motor fuel's destination state.
- Motor fuel sold to the State, the federal government, a county, or a municipality for use by the unit of government.
- Motor fuel sold to local boards of education, charter schools, and community colleges for use by the schools.
- Diesel, in the form of kerosene, when sold to an airport.

The act creates an additional exemption for biodiesel that is produced by an individual for use in a private passenger vehicle that is registered in the individual's name. Biodiesel is any fuel or

mixture of fuels derived in whole or in part from agricultural products or animal fats or wastes from these products or fats.

The act also directs the Revenue Laws Study Committee and the Joint Legislative Transportation Oversight Committee to study the issue of providing adequate funding for transportation infrastructure development and improvement. The Committees must report on this issue, including any recommendations or legislative proposals, to the 2008 Regular Session of the 2007 General Assembly.

REVENUE LAWS & MOTOR FUELS TAX TECH. CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-527	**SB 540**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE REVENUE LAWS, MOTOR FUELS TAX LAWS, AND RELATED STATUTES.

OVERVIEW: This act makes technical, clarifying, and administrative changes to the revenue laws, the motor fuels tax laws, and related statutes. These changes were a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: No impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: Except as otherwise specified, this act became effective when signed into law by the Governor on August 31, 2007.

ANALYSIS:

Part I: Technical Changes

Section	Explanation
1	Deletes reference to a repealed statute.
5	Substitutes the defined term 'apportionable' for the term 'business'.
7	Substitutes the defined term 'business property' for term 'machinery and equipment'. (See additional explanation for this section in *Part II: Clarifying Changes*).
8	Substitutes the appropriate reference 'out of', for the prior reference 'to'.
19	Substitutes the correct statutory reference.
20	Repeals an unnecessary statute. Article 3 of Chapter 119 directs the Commissioner of Agriculture to inspect alternative fuel, motor fuel, and kerosene to protect the public. This statute says that various fuels are subject to inspection. It does not appear to be a necessary statute because the provisions of Article 3 govern what fuel is inspected and what standards the fuel must meet. The terms 'alternative fuel', 'motor fuel', and 'kerosene' are defined terms in Article 3.
23	Corrects a statutory reference.

27	Corrects a statutory reference.
30	Repeals an obsolete statute. The statute was enacted to facilitate a transition from the sales tax imposed on the gross receipts of motor vehicle leases prior to 1989 and the highway use tax.
32	Repeals an obsolete statute. These reimbursements were repealed in 2001 as part of the agreement on the third one-half cent local option sales tax.
36	Removes an unnecessary citation that is in the statute due to redlining errors.
37	Inserts the correct corporate name of the North Carolina State Art Society, Incorporated.
42	Corrects a statutory reference.

Part II: Clarifying Changes

2	Clarifies the term 'nonprofit arts organization' in the area of exemptions from the gross receipts tax on amusements.
3	Clarifies the duration of an arts festival and a community festival, for purposes of the exemption from the gross receipts tax on amusements. Under current law, the festival may not last more than seven days. This provision clarifies that the festival may not last more than seven *consecutive* days.
4	Clarifies that the allocation of tax proceeds from the excise tax on fortified wine to the NC Wine and Grape Growers Council occurs before the revenues are distributed to counties and cities in which the retail sale of alcoholic beverages are authorized to be sold.
6-7	Clarifies that for the purposes of granting credits for the creation of new jobs, urban progress and agrarian growth zones should be treated separately from other eligible establishments.
10	Adds ancillary services to items for which the sales tax exemption for State agencies does not apply, in order to conform to the changes made in S.L. 2006-33. S.L. 2006-33 separated ancillary services from telecommunications services to conform to the Streamlined Sales Tax Agreement. The change does not alter the taxation of these services.
11	Clarifies the dollar threshold for filing monthly sales tax returns.
12	Clarifies that the payment of use tax on purchases of boats and airplanes is not made on the use tax line of the income tax return. The payment of use tax on these items is due by the 20th day of the month following the purchase. Boats and aircraft are registered, and the Department examines information on registration to verify that use tax has been paid.
13	Clarifies that the 1% privilege tax on the purchase of equipment by a research and development company applies to equipment that would be considered mill machinery parts and accessories as well as mill machinery itself. The tax was intended to correspond to the property used by manufacturers for research and development. This section became effective July 1, 2007, which is the date that the 1% privilege tax began to apply to equipment purchased by a research and development company. Prior to this date, the equipment was subject to the State and local sales tax.
14	Exempts State agencies from the privilege tax imposed on mill machinery. The Department has interpreted the sales tax exemption for State agencies to also apply to this tax since the tax was established when these products were

	exempted from the sales tax in January 2006 to conform with the Streamlined Sales Tax Agreement. Under the Agreement, the State must have uniform rates. Rather than increase the tax rate on these items, they were exempt from sales tax and subject to this new privilege tax. The Department of Correction industries constitute manufacturing plants and thus purchase equipment subject to this tax.
22	Rewrites G.S. 105-330.10 to incorporate changes made in S.L. 2006-30.

Part III: Administrative Changes

9	Alters the documentation process for the credit for recycling oyster shells to reflect the current Department of Revenue practice. DENR maintains the information for the Department so that this general requirement is not necessary.
21	Conforms the date a local occupancy tax return and tax is due to the date that the sales and use tax is due. This section became effective January 1, 2008.
24	Conforms the effective date for a 2006 change to the confidentiality provisions to administrative practices.
25	Repeals the sunset of the highway use tax provisions contained in the 1989 session law. When the highway use tax was enacted, it was believed the highway projects could be completed in 13 years. It has been 18 years. The 1989 session law would repeal the highway use tax, the Transportation Oversight Committee, and various motor vehicle fees when contracts for all projects specified in Article 14 of Chapter 136 have been let and sufficient revenue has been accumulated to pay the contracts. The various fees have been amended several times since 1989. Based upon this sunset language, the fees would revert to their pre-1989 amounts at some undetermined point in the future. At this point, the sunset creates a 'trap for the unwary'.
26	Makes a change in the reporting requirements for the State Ports Tax credit. Based upon conversations with the Tax Research Division, the change will better enable it to report information to the General Assembly for purposes of determining the credit's effectiveness. The report language was added in S.L. 2005-429.
28	Allows local governments to correct errors in their certification of cable television revenues submitted to the Department of Revenue. The certification of the amount of cable franchise tax imposed had to be made by March 15, 2007. Many local governments are in the process of auditing their cable franchise taxes. As a result of those audits, many are discovering errors in their certifications. This provision allows local governments to submit a new certification on or before April 1, 2008. This provision has been requested by the League of Municipalities and agreed upon by the Department of Revenue.
31	Conforms the provisions for making an electronic funds transfer to the changes made in S.L. 2006-66. Last session, the General Assembly replaced the semimonthly sales tax payment for franchise tax and sales tax with a single monthly payment and a prepayment of the next month's liability due on the same day as the monthly payment. The change was made at the request of several large retailers in the Streamlined Sales Tax Project.

33-35	Makes two changes to the tax secrecy provisions at the request of the Tax Research Division of the Department of Revenue. Section 33 allows the Division to share information with other governmental units outside this State for the purpose of statistical reports and revenue estimates. Section 34 allows the Department of Revenue to share information with the Joint Operations Center for National Fuel Tax Compliance (JOC) to better enable the Department to enforce motor fuel tax laws and identify motor fuel tax evasion. The JOC is a partnership of dedicated federal and state fuel tax administration resources. Its membership consists of the Internal Revenue Service, the Federal Highway Administration, and state agencies that are signatories to the Memorandum of Understanding executed to form this organization. The founding membership of the JOC is the IRS, the FHWA, the California Board of Equalization, the NC Department of Revenue, and the Texas Comptroller of Public Accounts. The mission of the JOC is to facilitate state and federal motor fuel tax compliance activities, foster interagency and multi-national cooperation, and provide strategic analyses of domestic and foreign motor fuel distribution trends and patterns. It will work toward these goals through the use of technology to collect, analyze, and share information. Section 35 allows the Division to provide information needed by the Fiscal Research Division of the General Assembly to determine the fiscal impact of proposed legislation. Sometimes, if the fiscal effects of legislation apply only to a limited number of taxpayers, the Division is unable to share the information with Fiscal Research because to do so may, by virtue of the small taxpayer pool, indicate the tax liability of a particular group of taxpayers. The Division would continue to be required to remove any identifying information from the data shared.
39	Repeals the statute that authorizes real estate certificates of participation. RECOP indebtedness is a form of special indebtedness that is intended to be structured so that the principal and a portion of the interest are not paid in installments over the term of the debt. That portion of the interest compounds and is payable, along with the principal, only at maturity. The provision was enacted in 2004. The 2004 legislation directed the State Treasurer to conduct a study of RECOP indebtedness and to report to the Joint Legislative Commission on Governmental Operations by February 1, 2005. The Treasurer's Office reported that it did not recommend the State using this form of indebtedness.
40	Repeals the Article creating the Life Sciences Revenue Bond Authority. The Authority was created in 2003. The purpose of the Authority was to determine the best way to establish a credit enhancement program for construction of infrastructure for life sciences manufacturing facilities. The Authority is not functioning. Proponents in the life sciences area agree that the Authority is not needed at this time.
43	Inserts Swain County into the uniform occupancy tax provisions. S.L. 2007-23 amended Swain County's occupancy tax statutes to conform to the uniform law, but it failed to include the county in the list of counties for which the uniform law is applicable.

15	Provides that the Secretary of Revenue's authority to summon records also applies to the motor fuel tax statutes. The section makes this change by using the defined term 'tax'. G.S. 105-228.90 defines 'tax' includes all of the State levied taxes.
16	Provides that a civil penalty imposed under the motor fuel statutes is payable to the agency that assessed the penalty. In addition to the Department of Revenue, G.S. 105-269.3 provides that the State Highway Patrol, law enforcement officers, and other appropriate personnel in the Department of Crime Control and Public Safety may enforce the motor fuel tax laws. The reorganization of the Division of Motor Vehicles in 2003 moved the State Highway Patrol from DMV to the Department of Crime Control and Public Safety. This substantive change in 2003 necessitated technical, conforming changes to the tax statutes. This section eliminates the need for similar conforming changes in the future.
17	Provides that a fuel alcohol provider and a biodiesel provider need only post a bond to receive a license as a supplier[85] if its annual motor fuel tax liability is at least $2,000. Under current law, to be licensed as a supplier, a fuel alcohol provider or a biodiesel provider must post a bond in an amount that is two times the applicant's average expected monthly tax liability. The amount may not be less than $2,000 and may not be more than $500,000. Under this section, if a fuel alcohol provider or biodiesel provider must post a bond, then the amount would be the same as the current law bond requirement. This section becomes effective October 1, 2007.
18	Modifies the defense to imposition of a penalty for failure to obtain a diversion number for motor fuel delivered to a state other than the destination state printed on the shipping document. Under current law, the defense is that the person notified the Secretary of the diversion within seven days after the diversion occurred and timely paid the tax on the diverted fuel.[86] This section removes the seven-day time period by providing that the notification must have occurred prior to the imposition of the penalty. It also removes the requirement that the tax be timely paid if the person assessed with the penalty is the motor fuel transporter because it is not the motor fuel transporter's responsibility to pay the tax. This section became effective when signed into law by the Governor on August 31, 2007, and applies to penalties assessed on or after that date and to refund requests that have not been finally determined as of that date.
38	Repeals a conflicting subdivision. This subdivision imposes the excise tax on motor fuel that is fuel alcohol or biodiesel when it is sold for use. However, these fuels are included in the definitions of gasoline and diesel and should be taxed at the same point in the distribution chain as gasoline and diesel. Current law conflicts as to the point at which these fuels should be taxed. The repeal

[85] A supplier is defined as any of the following: a position holder or a person who receives motor fuel pursuant to a two-party exchange, a fuel alcohol provider, a biodiesel provider, or a refiner. (G.S. 105-449.60)

[86] The General Assembly established this defense in 2005. (S.L. 2005-435.)

	of this subdivision clarifies that they will be taxed at the terminal rack or at importation. This section became effective January 1, 2008.
41	Corrects an unintended consequence of a motor vehicle law change. S.L. 2007-194 exempted certain trucks from vehicle registration requirements. In so doing, it also exempted them from the requirement that they use tax-paid fuel and from the penalty and enforcement of the motor fuel tax laws. This section provides that although the vehicles do not have to be registered, they still must abide by the motor fuel tax laws.

SOLID WASTE MANAGEMENT ACT OF 2007.

Session Law	*Bill #*	*Sponsor*
S.L. 2007-550, as amended by S.L. 2007-543	**SB 1492, as amended by SB 6**	**Senator Clodfelter**

AN ACT TO: (1) TO REPEAL THE EXEMPTION FOR SANITARY LANDFILLS OPERATED BY LOCAL GOVERNMENTS FROM THE REQUIREMENTS FOR ENVIRONMENTAL IMPACT STATEMENTS UNDER THE NORTH CAROLINA ENVIRONMENTAL POLICY ACT OF 1971; (2) CLARIFY THE CIRCUMSTANCES UNDER WHICH AN APPLICATION FOR A SOLID WASTE MANAGEMENT PERMIT MAY BE DENIED; (3) PROVIDE THAT SOLID WASTE MANAGEMENT PERMITS ARE NOT TRANSFERABLE WITHOUT THE APPROVAL OF THE DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES; (4) INCREASE THE PENALTIES THAT MAY BE IMPOSED FOR SOLID WASTE VIOLATIONS; (5) REQUIRE THAT AN APPLICANT FOR A PERMIT AND A PERMIT HOLDER ESTABLISH FINANCIAL RESPONSIBILITY TO ENSURE THE AVAILABILITY OF SUFFICIENT FUNDS FOR PROPER DESIGN, CONSTRUCTION, OPERATION, MAINTENANCE, CLOSURE, AND POST-CLOSURE MONITORING AND MAINTENANCE OF A SOLID WASTE MANAGEMENT FACILITY; (6) CLARIFY AND EXPAND THE SCOPE OF ENVIRONMENTAL COMPLIANCE REVIEW REQUIREMENTS; (7) CLARIFY THAT A PARENT, SUBSIDIARY, OR OTHER AFFILIATE OF THE APPLICANT OR PARENT, INCLUDING ANY BUSINESS ENTITY OR JOINT VENTURER WITH A DIRECT OR INDIRECT INTEREST IN THE APPLICANT IS SUBJECT TO FINANCIAL RESPONSIBILITY AND ENVIRONMENTAL COMPLIANCE REVIEW; (8) PROVIDE FOR SITING OF COMBUSTION PRODUCTS LANDFILLS IN AREAS THAT HAVE BEEN FORMERLY USED FOR THE STORAGE OR DISPOSAL OF COMBUSTION PRODUCTS FROM COAL-FIRED GENERATING UNITS AT THE SAME FACILITY THAT

GENERATED THE COMBUSTION PRODUCTS, AND TECHNICAL REQUIREMENTS FOR THESE LANDFILLS; (9) AUTHORIZE UNITS OF LOCAL GOVERNMENT TO HIRE LANDFILL LIAISONS; (10) DIRECT THE DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES TO DEVELOP A PROPOSED RECYCLING PROGRAM FOR FLUORESCENT LAMPS; (11) DIRECT THE ENVIRONMENTAL REVIEW COMMISSION TO STUDY ISSUES RELATED TO THE FRANCHISE OF SOLID WASTE MANAGEMENT FACILITIES BY UNITS OF LOCAL GOVERNMENT, TRANSPORTATION OF SOLID WASTE BY RAIL AND BARGE, AND SITING AND TECHNICAL STANDARDS FOR SOLID WASTE MANAGEMENT FACILITIES; AND (12) MAKE RELATED CLARIFYING, CONFORMING, AND TECHNICAL CHANGES.

OVERVIEW: Section 14 of the act establishes a solid waste disposal tax to help offset the cost of the assessment and remediation of pre-1983 landfills and to provide additional resources for solid waste management programs and services. The remainder of this act does not affect North Carolina tax laws and is not discussed below.[87]

FISCAL IMPACT: The new solid waste disposal tax of $2.00 per ton is estimated to generate $25 million annually. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2007 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This tax becomes effective July 1, 2008.

ANALYSIS: Prior to 1983, landfills were not regulated. There exist more than 700 pre-1983 landfills in need of assessment and remediation. Among other things, this act establishes a solid waste disposal tax of $2.00 per ton of waste to be imposed on the disposal of municipal solid waste in landfills in the State and on the transfer of municipal solid waste for disposal outside the State. As amended by S.L. 2007-543, the act allocates the tax proceeds as follows:

- 50% to the Inactive Hazardous Sites Cleanup Fund for the assessment and remediation of pre-1983 landfills.
- 18.75% to cities in the State on a per capita basis to be used solely for solid waste management programs and services.
- 18.75% to counties in the State on a per capita basis to be used solely for solid waste management programs and services. Persons who reside in a city are not counted in the population of the county or counties in which the city is located.
- 12.5% to State agencies and units of local government to initiate or enhance local recycling programs and to provide for the management of difficult to manage solid waste, including abandoned mobile homes and household hazardous waste.

[87] For a summary of those provisions, see Chapter 11 of the *Summaries of Substantive Ratified Legislation* publication available online and in the Legislative Library.

2006 Finance Law Changes

S CORP INCOME TAX ADJUSTMENTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-17	**HB 1898**	**Representative Wilkins**

AN ACT TO MAKE CORPORATE INCOME TAX ADJUSTMENTS INAPPLICABLE TO S CORPORATIONS.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, provides that an individual's pro rata share of income from an S Corporation is subject only to individual income tax adjustments, rather than being subject to both individual and corporate income tax adjustments. The act also preserves an addition to federal taxable income for a shareholder's share of the built-in gains tax paid by an S Corporation at the federal level for purposes of determining State taxable income, since North Carolina does not assess a built-in gains tax.

FISCAL IMPACT: Minimal impact.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act is effective for taxable years beginning on or after January 1, 2006.

ANALYSIS: The act provides that an individual's pro rata share of income from an S Corporation is subject only to individual income tax adjustments, rather than being subject to both individual and corporate income tax adjustments. Prior to this act, an individual's pro rata share of S Corporation income attributable to North Carolina was subject to corporate income tax adjustments, while S Corporation income not attributable to North Carolina was subject to individual income tax adjustments. This change, which was recommended to the Revenue Laws Study Committee by the Department of Revenue, will provide consistency in the tax treatment of S Corporations since S Corporation income flows through to its shareholders who are required to be individuals or trusts and who are taxed at the individual level as opposed to the corporate level. The change also simplifies tax form preparation. Section 3 of the act, however, preserves an addition to federal taxable income for a shareholder's share of the built-in gains tax paid by the corporation at the federal level for purposes of determining State taxable income. This add-back to federal taxable income is required under current law.

The 'built-in gains tax' in Section 1374 of the Internal Revenue Code imposes a corporate-level tax on S Corporations that dispose of assets that appreciated in value during the years when the corporation was a C Corporation. The built-in gains tax applies only to assets that are disposed of within 10 years of the date on which S Corporation status is chosen. The shareholders of the S Corporation are also taxed on the gains. To provide some measure of relief from double taxation, each shareholder's share of income from the S Corporation is reduced by the shareholder's proportionate share of the built-in gains tax paid by the S Corporation.[1] The built-in gains tax is designed to prevent corporations that have unrecognized gain on assets during the years the

[1] IRC Section 1366(f)(2).

corporation is a C Corporation from converting to S status and then distributing the assets tax free.

North Carolina does not assess a built-in gains tax. Therefore, there is no double taxation at the State level and no reason to allow the deduction for the shareholder's share of the built-in gains tax. Under existing law, there is a corporate income tax provision requiring an add-back for the built-in gains tax deduction. Since this act subjects S Corporations to individual income tax adjustments only, the act modifies existing law to require an S Corporation shareholder to add to taxable income the amount by which the shareholder's share of the S Corporation's income was reduced for federal purposes by the amount of the built-in gains tax imposed on the S Corporation.

An S Corporation is a corporation that has elected to have the corporation's income pass through to the shareholders. Thus, the business profits are taxed at individual tax rates. An S Corporation election allows the shareholders to preserve the benefit of limited liability for the corporate form while at the same time being treated as partners for federal income tax purposes. The S Corporation itself does not pay any income tax, but an S Corporation is required to file an informational return with the IRS, similar to a partnership tax return, to inform the IRS of each shareholder's ownership interest in the S Corporation. To be eligible for S Corporation status, a corporation must meet all of the following requirements:

- The corporation may have no more than 75 shareholders.
- The corporation may have only one class of stock, although different voting rights among shareholders are allowed.
- All shareholders must be individuals or trusts.
- The corporation must be formed in the United States.
- No shareholder may be a non-resident alien.
- The corporation may not be an insurance company or a domestic international sales corporation.

A C Corporation, on the other hand, assumes a separate legal and tax life distinct from its shareholders. It pays taxes at its own corporate income tax rates and files its own corporate tax forms each year. C Corporations may choose to retain their profits and earnings as part of their operating capital, or they may choose to distribute some or all of their profits and earnings as dividends paid to shareholders. Dividends paid to shareholders are essentially taxed twice, once at the corporate level and again at the individual level.

As previously noted, C Corporations cannot be shareholders of an S Corporation. All S Corporation shareholders must be individuals or trusts and are taxed at the individual income tax rates.

IRC UPDATE.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-18	**HB 1892**	**Rep. Wainwright; Luebke; Carney; Wilkins; (Primary Sponsors)**

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS AND TO MAKE OTHER CHANGES TO MORE CLOSELY CONFORM TO FEDERAL TAX LAW.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, does the following:

- Updates the reference to the Internal Revenue Code used in defining and determining certain State tax provisions.
- Shortens the time span which a taxpayer has to file an amended estate, income, or gift tax return when the federal government corrects or otherwise determines the amount on which the tax is based.
- Conforms the filing date for income tax returns for a nonresident alien to the federal dates.
- Conforms the amounts for the credit for child care and certain employment-related expenses to the amounts allowed for the corresponding federal credits.

FISCAL IMPACT: Annual revenue loss is estimated to be $5.1 million in 2006-07 and 2007-08. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)*

EFFECTIVE DATES: The update to the reference to the Internal Revenue Code became effective when signed into law by the Governor on June 21, 2006. The part of the act concerning federal determinations became effective July 1, 2006, and applies to federal determinations made on or after that date. The parts of the act conforming the filing date for tax returns for nonresident aliens and the credit amounts for child care are effective for taxable years beginning on or after January 1, 2006.

ANALYSIS: The act makes the following changes to the revenue laws.

Federal Determinations

This act reduced the period of time in which a taxpayer must report a federal change from two years to six months. When the federal government corrects or otherwise determines the amount of an estate, gift, or income that is subject to tax, the taxpayer must file a State return that reflects that change. This is so because the State estate, gift, and income taxes are, to varying degrees, based on amounts determined with respect to federal law. The Multistate Tax Commission has adopted a model uniform statute for reporting federal changes. That model uniform statute requires a taxpayer to report those changes within six months. The model statute is intended to bring uniformity to this area among the states. Currently there is a great deal of variety with some states requiring changes to be reported in as little as 90 days to as much as two years. This provision became effective July 1, 2006, and applies to federal determinations made on or after that date.

Filing Period for Nonresident Aliens

Section 6072(c) of the Code requires a nonresident alien to file an income tax return on or before the fifteenth day of the sixth month following the close of the taxable year (June 15th for taxpayer whose taxable year is the calendar year). Under previous State law, nonresident alien corporate taxpayers were required to file a State return by the fifteenth day of the third month following the close of the taxable year (March 15th for a calendar year taxpayer) and nonresident alien individual

taxpayers were required to file a State return by the fifteenth day of the fourth month following the close of the taxable year (April 15th for a calendar year taxpayer). Thus, under previous State law a nonresident alien was required to file a State income tax return before the federal tax return was due. This provision conforms the State filing deadlines to the federal filing deadlines for nonresident aliens and eases compliance burdens on those taxpayers. These provisions are effective for taxable years beginning on or after January 1, 2006.

Credit for Child-Care and Certain Employment-Related Expenses

Previous State law allowed a credit to a taxpayer who was eligible for the federal credit for child-care and employment-related expenses. The amount of the credit is based on a percentage of those expenses up to a certain amount. For the State credit, the amount of expenses that were taken into consideration when computing the credit were capped at $2,400 when there was one qualifying individual in the household and $4,800 when there was more than one qualifying individual in the household. Until 2003, these limits were the same as those at the federal level. In 2003, the federal limits increased to $3,000 and $6,000 respectively. This provision conforms the State limits to the federal limits. This provision also clarifies that the amount of expenses used in calculating the credit may not include any amount excluded from gross income. This provision is effective for taxable years beginning on or after January 1, 2006.

Updated References to Internal Revenue Code

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code by reference to the Code.[2] The General Assembly determines each year whether to update its reference to the Internal Revenue Code.[3] Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law tracks federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made. This act changes the reference date from January 1, 2005, to January 1, 2006.

Between January 1, 2005, and January 1, 2006, there were four major pieces of federal legislation that made changes to the Internal Revenue Code. This federal legislation includes the Energy Tax Incentive Act of 2005 (P.L. 109-58) signed into law on August 8, 2005, the Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005 (P.L. 109-59) signed into law on August 10, 2005, the Katrina Emergency Tax Relief Act of 2005 (P.L. 109-73) signed into law on September 23, 2005, and the Gulf Opportunity Zone Act of 2005 (P.L. 109-135) signed into law on December 21, 2005.

- Energy Tax Incentive Act of 2005 (P.L. 109-58) (hereinafter Energy Act): Many of the changes made in this act involve tax credits for various activities. Because they are tax

---

[2] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[3] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would be invalidated as an unconstitutional delegation of legislative power."

credits, these provisions do not have a direct impact at the State level. There are, however, several provisions that could have an impact at the State level, most of which involve the depreciation, amortization, or expensing of certain items.

- *Elimination of deduction for clean-fuel vehicles.* Under previous law, a taxpayer was allowed a deduction for the purchase of a qualified clean-fuel vehicle. A 'qualified clean-fuel vehicle' is any motor vehicle that may be propelled by a clean-burning fuel such as natural gas, liquefied natural gas, liquefied petroleum gas, hydrogen, electricity, or any other fuel at least 85% of which is methanol, ethanol, or other alcohol or ether. The maximum amount of the deduction varied depending on the type of vehicle purchased. The deduction began to be phased out in 2004, and was set to be eliminated after the 2006 taxable year. This act moves up the phase-out so that the deduction is eliminated after the 2005 taxable year. In place of the deduction, this act creates a new federal credit for alternative fuel motor vehicles.
- *Tax deferral for gains on electric transmission assets.* Under previous law, a taxpayer could elect to recognize qualified gain from a qualifying electric transmission transaction over an eight-year period. In order for a transaction to be a 'qualifying electric transmission transaction', numerous conditions had to be satisfied, one of which was that the transaction must have been completed before January 1, 2007. This act extends that date by one year to January 1, 2008.
- *Deduction for nuclear decommissioning costs.* Utilities that own or operate a nuclear power plant are required by law to decommission the plant at the end of its useful life. A utility may elect to deduct contributions it makes to a nuclear decommissioning reserve fund established to help pay the costs associated with the eventual decommissioning. For previous tax years, contributions to such a reserve fund were limited to the lesser of the amount of nuclear decommission costs allocable to the fund that is included in the taxpayer's cost of services for ratemaking purposes for the taxable year and the ruling amount. The 'ruling amount' is a schedule obtained from the IRS that specifies the annual payments that must be made into the fund to cover the amount of the decommission costs allocable to the fund over its existence. This act eliminates the 'lesser of' test for taxable years beginning on or after January 1, 2006, and instead limits the deduction to the ruling amount.
- *Energy efficient commercial buildings property deduction.* Despite the fact that large commercial buildings use approximately one-fourth of the electrical energy consumed in the nation, there was previously no federal tax incentive to encourage the use of energy-efficient property in the construction or renovation of commercial buildings. This act allows taxpayers to claim a deduction (as opposed to depreciation or amortization) with respect to costs associated with energy-efficient commercial building property placed into service between January 1, 2006, and January 1, 2008. The maximum amount that may be deducted is $1.80 per square foot of the building, less any amount deducted under this provision with respect to the same building in previous tax years. In order to qualify for the deduction, the following conditions must be satisfied: 1) the costs must be associated with depreciable or amortizable property that is installed in a commercial building that meets certain standards for energy efficiency; 2) the property is installed as part of the interior lighting, heating, cooling, ventilation, or

hot water systems or the building envelope; and 3) the property is installed as part of a plan to reduce the total annual energy costs of the building with respect to the interior lighting, heating, cooling, ventilation, and hot water systems by at least 50% as compared to a similar building that meets certain minimum standards for energy efficiency. The IRS is required to issue regulations relating to eligibility for a partial deduction and to the transfer of a deduction from a public entity (like the State) to the person responsible for designing the property.

- *Recapture of section 197 amortization.* Generally, property subject to amortization under section 197 of the Code is intangible property that is purchased and held by a taxpayer in the course of a business. Section 197 property includes goodwill, covenants not to compete, patents, copyrights, trademarks and certain licenses. The cost of section 197 property is recoverable over fifteen years using straight-line depreciation. Under general rules, gain on the sale of depreciable property must be recaptured as ordinary income to the extent of depreciation deductions previously claimed. Under general rules, the recapture amount is computed separately for each piece of property. This act provides that if multiple pieces of section 197 property are sold or disposed of in a single transaction or series of transactions, then the taxpayer must compute the recapture as if all of the property were a single asset. The effect of this change is to maximize the amount of income treated as recapture, and thus as ordinary income, and to lessen the amount treated as a capital gain, which is taxed at a lower rate.

- *Depreciation of electric transmission property.* Generally, under the modified accelerated cost recovery system (MACRS), assets used in the transmission and distribution of electricity for sale have a 20-year recovery period. This act allows the costs of certain electric transmission property placed into service after April 11, 2005, to be recovered over 15 years instead of 20.

- *Expensing liquid fuel refineries.* Under previous law, petroleum refining assets were depreciated over a 10-year recovery period using the double declining balance method. Petroleum refining assets are assets used for distillation, fractionation, and catalytic cracking of crude petroleum into gasoline and other petroleum products. This acts allows a taxpayer to make an election to expense 50% of the cost of qualified refinery property in the year in which the property is placed into service. 'Qualified refinery property' includes any portion of a qualified refinery that satisfies the following conditions: 1) The original use of the property commences with the taxpayer; 2) The property is placed in service between August 8, 2005, and January 1, 2012; 3) The property satisfies certain production capacity requirements; 4) The property satisfies all applicable environmental laws in effect when it is placed into service; 5) No written binding contract for the construction of the property was in effect on or before June 14, 2005; and 6) The construction of the property is subject to a written binding contract entered into before January 1, 2008. A 'qualified refinery' is one that is located in the United States and that is designed to serve the primary purpose of processing liquid fuel from crude oil or qualified fuels (including shale and tar sands and coal seams). The expensing election is not available with respect to a refinery that is used primarily as a topping plant, asphalt plant, lube oil facility, crude or product terminal, or blending facility.

- *Depreciation of natural gas distribution lines*. Under previous law, natural gas distribution lines installed by a gas company were depreciated over a 20-year period. This act allows natural gas depreciation lines placed in service between April 11, 2005, and January 1, 2011, to be depreciated over a 15-year period.
- *Depreciation of natural gas gathering pipelines*. Prior to the enactment of this act, there was a disagreement among the courts as to what asset class natural gas gathering pipelines owned by a nonproducer belonged. The IRS maintained, and this position was supported by the Tax Court, that these pipelines belonged to an asset class subject to depreciation over 15 years. The Courts of Appeals in the Sixth, Eighth, and Tenth Circuits, however, held that these pipelines belonged to an asset class subject to depreciation over seven years. There was agreement that natural gas gathering pipelines owned by a producer were part of the asset class subject to depreciation over seven years. This act clarifies that all natural gas gathering pipelines, regardless of ownership, are subject to depreciation over seven years. This provision applies to natural gas gathering pipelines placed in service after April 11, 2005.
- *Geological and geophysical costs amortized over two years*. Geological and geophysical costs are those incurred for the purpose of accumulating data that serves as the basis for the decision about acquisition or retention of mineral rights by taxpayers in the business of exploring for minerals (including gas and oil). Courts have held these costs to be capital in nature and allocable to the property acquired or retained. If no property was acquired or retained, the costs were treated as a capital loss. This act provides that these costs, when incurred in the United States for oil or gas exploration, shall be amortized ratably over a 24-month period beginning on the mid-point of the taxable year in which the costs were incurred. The act does not affect the treatment of costs incurred outside of the United States or with respect to exploration for minerals other than oil or gas.
- *84-month amortization of air pollution control facilities*. Previous law allowed taxpayers to amortize over a 60-month period a certified pollution control facility used in connection with a plant that was in operation before January 1, 1976. For certified pollution control facilities placed in service after April 11, 2005, this act eliminates the requirement that the property be used in connection with a plant that was in operation before 1976 if the plant is an electric generation plant that is primarily coal fired. For property that satisfies this criteria, the amortization period is 84 months. The act does not lengthen the amortization period for property that was covered by previous law, it provides a favored, though not as generously favored, method of depreciation for another class of property.

- Safe, Accountable, Flexible, Efficient Transportation Equity Act of 2005 (P.L. 109-59) (hereinafter SAFE Act): Although this act makes numerous tax changes at the federal level, these changes have little to no direct impact at the State level.
- Katrina Emergency Tax Relief Act of 2005 (P.L. 109-73) (hereinafter Katrina Act): 2005 was a record-setting year on the meteorological front. Not only did the year see a record number of named storms (27) and a record number of hurricanes (14), the year also included the costliest Atlantic hurricane on record and one of the deadliest, Hurricane Katrina. Hurricane Katrina made landfall along the Gulf Coast on August 29, 2005, as a

Category 3 storm. Hurricane Katrina resulted in the deaths of more than 1,400 people and caused over $80 billion in property damage. In the aftermath of Hurricane Katrina, Congress took action to assist taxpayers in the affected region. On September 21, 2005, Congress passed the Katrina Emergency Tax Relief Act of 2005, which was signed into law by President Bush on September 23, 2005. The act is a collection of tax relief provisions for individuals and businesses. Below, the key provisions of this act that could have an impact on State revenues are summarized.

- *General Provisions.* The act contains definitions of several key phrases that are used throughout the act. Under the act, 'Hurricane Katrina disaster area' means an area with respect to which a major disaster has been declared by the President before September 14, 2005, with respect to Hurricane Katrina. The states of Alabama, Florida, Louisiana, and Mississippi comprise the Hurricane Katrina disaster area. The act also defines the term 'core disaster area.' The core disaster area is a subset of the Hurricane Katrina disaster area that has been determined by the President to warrant individual or individual and public assistance from the federal government. The core disaster area covers certain counties and parishes in Alabama, Louisiana, and Mississippi.
- *Retirement Funds.* The act contains a number of special rules related to retirement funds for people who lived in the Hurricane Katrina disaster area or the core disaster area. Generally, these provisions allow for a more liberal use of retirement funds for emergency needs than would otherwise be allowed without subjecting the taxpayer to some sort of penalty or disincentive. These provisions include the following:
    - *Tax favored withdrawals from retirement plans for relief relating to Hurricane Katrina.* Generally, a withdrawal from a qualified retirement plan, a tax-sheltered annuity, an IRA, or an eligible deferred compensation plan maintained by a state or local government is included in taxable income in the year in which it is made. In addition, a distribution that is received before death, disability, or the age of 59 ½ is generally subject to a 10% early withdrawal tax. Some distributions are known as eligible rollover distributions and are not included in taxable income or subject to the 10% penalty tax. These distributions must be rolled over into another qualified retirement account within 60 days. This act provides an exception to the 10% early withdrawal tax in the case of a qualified Hurricane Katrina distribution[4] from a qualified retirement plan, tax-sheltered annuity, or IRA. In addition, any amount required to be included in income as a result of a qualified Hurricane Katrina distribution is included in income in installments over the three-year period beginning with the year in which the distribution is made rather than entirely within the year that the distribution is made. Finally, any amount of a qualified Hurricane Katrina distribution that is

[4] A 'qualified Hurricane Katrina distribution' is a distribution made from an eligible retirement plan on or after August 25, 2005, and before January 1, 2007, to an individual whose primary place of abode on August 28, 2005, is located in the Hurricane Katrina disaster area and who has sustained an economic loss due to Hurricane Katrina. The total amount of qualified Hurricane Katrina distributions to a taxpayer from all accounts may not exceed $100,000.

recontributed to an eligible retirement account within the three-year period is treated as a roll-over distribution and is not included in income.

- *Recontribution of withdrawals for home purchases cancelled due to Hurricane Katrina.* There is an exception to the 10% early withdrawal tax discussed above in the case of a qualified first-time homebuyer distribution from an eligible retirement account. A qualified first-time homebuyer distribution is one that does not exceed $10,000 and that is used within 120 days of the distribution for the purchase or construction of a principal residence of a first-time homebuyer. If the distribution is not used for the purchase of the home within 120 days or is not rolled over into an eligible retirement account within 60 days, the distribution is included in income and is subject to the 10% early withdrawal tax. This act allows a taxpayer who received a qualified distribution from a retirement account to recontribute that amount to an eligible retirement account without penalty. For the purposes of this provision, a 'qualified distribution' is a distribution that was received after February 28, 2005, and before August 29, 2005, and that was to be used to purchase or construct a principal residence in the Hurricane Katrina disaster area, but the residence is not purchased or constructed because of Hurricane Katrina. Any portion of a qualified distribution may be contributed to an eligible retirement account and treated as a roll-over if it is recontributed between August 25, 2005, and February 28, 2006. Because it is treated as a roll-over, that portion will not be included in income or subject to the 10% early withdrawal tax.

- *Loans from qualified plans for relief relating to Hurricane Katrina.* An individual is allowed to borrow from a qualified employer plan in which the individual participates provided the loan satisfies certain conditions. Generally, a loan from a qualified employer plan is treated as a taxable distribution of plan benefits. A loan is not treated as a tax distribution of benefits to the extent that the loan, when added to the outstanding balance of all other loans to the individual from all plans maintained by the employer, does not exceed the lesser of 1) $50,000 reduced by the excess of the highest outstanding balance of loans from such plans during the one-year period ending on the day before the date the loan is made over the outstanding balance of loans from the plan on the date the loan is made or 2) the greater of $10,000 or one half the individual's accrued benefit under the plan. For this exception to apply, the loan must have a repayment period of five years or less, must be amortized in level payments, and must have payments due at least quarterly. This act provides special rules in the case of a loan from a qualified plan to a qualified individual. For the purposes of this provision, a 'qualified individual' is one whose principal place of abode on August 28, 2005, is located in the Hurricane Katrina disaster area and who has sustained an economic loss because of Hurricane Katrina. Under this provision, the loan limit discussed above is increased to the lesser of 1) $100,000 reduced by the excess of the highest outstanding balance of loans from such plans during the one-year period ending on the day before the date the loan is made over the outstanding balance of loans from the plan on the date the loan is made or 2) the greater of $10,000 or the individual's

accrued benefit under the plan. In addition, this act provides that in the case of a qualified individual with an outstanding loan from a qualified plan on or after August 25, 2005, if the due date for any repayment with respect to the loan occurs during the period from August 25, 2005, to December 31, 2006, the due date is delayed for one year.

- *Charitable Giving Incentives*. In the wake of Hurricane Katrina, people from around the nation rushed to the aid of people in the affected areas with unprecedented amounts of charitable giving. As part of this act, Congress further encouraged and rewarded charitable giving.

  - *Temporary suspension of limitations on charitable contributions*. In general, the income tax deduction allowed for charitable contributions is subject to limitations based on the type of taxpayer, the property contributed, and the donee organization. Subject to certain limitations, discussed further below, the following general rules apply: 1) Contributions of cash are deductible in the amount contributed; 2) Contributions of capital gain property[5] to a qualified charity are deductible at fair market value; 3) Contributions of other appreciated property are deductible at the donor's basis in the property; and 4) Contributions of depreciated property are deductible at the fair market value of the property. Most contributions are subject to percentage limitations. For individuals, the amount deductible is limited to a percentage of the taxpayer's contribution base[6] The percentage varies depending on the type of donee organization and the type of property contributed. Contributions by an individual of property other than appreciated capital gain property to a charitable organization described in section 170(b)(1)(A) of the Code (public charities, private foundations other than private non-operating foundations, and certain governmental units) are deductible up to 50% of the contribution base. Contributions of this type of property to nonoperating private foundations and certain other organizations are deductible up to 30% of the contribution base. Contributions of appreciated capital gain property to an organization described in section 170(b)(1)(A) of the Code are generally deductible up to 30% of the contribution base. A taxpayer may elect to bring all of these contributions of appreciated capital gain property under the 50% limitation by reducing the amount of the deduction by the amount of the appreciation of the property. Contributions of appreciated capital gains property to a private nonoperating foundation are deductible up to 20% of the contribution base. For corporations, charitable contributions are deductible up to 10% of the corporations taxable income computed without regard to net operating loss or capital loss carrybacks. For both individuals and corporations, excess charitable contributions may be carried forward for up to five years. There is also an overall limitation on

[5] 'Capital gain property' means any capital asset or property used in the taxpayer's trade or business the sale which at its fair market value, at the time of contribution, would have resulted in a gain that would have been a long-term capital gain.
[6] The 'contribution base' is the taxpayer's adjusted gross income computed without regard to any net operating loss carryback.

most itemized deductions for individuals. The total amount of otherwise allowable itemized deductions is reduced by three percent of the amount of the taxpayer's adjusted gross income in excess of a certain threshold. However, the otherwise allowed deductions may not be reduced by more than 80%. This reduction is reduced to two percent for the 2006 and 2007 taxable years and to one percent for the 2008 and 2009 taxable years, is repealed for the 2010 taxable year, and is reinstated for the 2011 taxable year. This act provides several exceptions to the limitations on charitable contribution deductions. For individuals, the deduction for qualified contributions is allowed up to the amount by which the taxpayer's contribution base exceeds the taxpayer's deductions for other charitable contributions. In most cases, this means that an individual may deduct charitable contributions up to 100% of the taxpayer's adjusted gross income computed without regard to any net operating loss carryback. For corporations, the deduction for a qualified contribution is allowed up to the amount by which the corporation's taxable income exceeds the deduction for other charitable contributions. For the purposes of these provisions, a 'qualified contribution' is a cash contribution that is made between August 28, 2005, and December 31, 2005, to an organization described in section 170(b)(1)(A) of the Code. The term does not include a contribution of noncash property or one that is for the establishment or maintenance of a segregated fund or account with respect to which the donor reasonably expects to have advisory privileges with respect to the fund or account because of his status as donor. In the case of a corporation, the contribution must be for relief efforts related to Hurricane Katrina in order to be a qualified contribution. In addition, for individuals the charitable deduction contribution, up to the amount of qualified contributions, is not treated as an itemized deduction and is not subject to the reduction for higher-income taxpayers.

- *Additional exemption for housing Hurricane Katrina displaced individuals.* In the aftermath of Hurricane Katrina, hundreds of thousands of residents of the affected areas were displaced. During this time of displacement, many individuals opened their homes to those who had been displaced. Generally, individuals are allowed personal exemptions in computing taxable income. Personal exemptions are allowed for the taxpayer, the taxpayer's spouse, and the taxpayer's dependents. Personal exemptions are phased out for higher-income taxpayers. This act allowed a taxpayer an additional $500 exemption for each Hurricane Katrina displaced individual of the taxpayer, up to a maximum additional exemption of $2,000. The additional exemption is not subject to the phase out for higher-income taxpayers. For the purposes of this provision, a 'Hurricane Katrina displaced individual' is a person 1) whose principal place of abode on August 28, 2005, was in the Hurricane Katrina disaster area, 2) who was displaced from the abode, 3) who is provided housing free of charge in the taxpayer's principal place of residence for a period of 60 consecutive days that ends in the taxable year in which the exemption is claimed, and 4) who is not the spouse or dependent of the taxpayer. For a person whose

principal place of abode on August 28, 2005, was outside of the core disaster area, the person's abode must have been damaged by Hurricane Katrina or the person must have been evacuated from the abode by reason of Hurricane Katrina.

- *Increase in standard mileage rate for charitable use of vehicles.* In determining the amount of the charitable contribution deduction when a taxpayer operates a vehicle in providing donated services to a charity, the taxpayer may either deduct actual operating expenditures or use the charitable standard mileage rate. The charitable standard mileage rate, 14 cents per mile, is significantly less than the business standard mileage rate[7] The charitable rate is less than the business rate because it is meant to offset direct operating expenses only, such as gas, and not other expenses, such as a depreciation, insurance, or general maintenance. This act allows a taxpayer who uses a vehicle in providing donated service to charity for Hurricane Katrina relief only to compute the charitable mileage deduction at a rate equal to 70% of the business standard mileage rate, rounded to the next highest cent, on the date of the contribution. In the alternative, the taxpayer may continue to use actual operating expenditures to determine the amount of the deduction.

- *Mileage reimbursement to charitable volunteers excluded from gross income.* Volunteer drivers who are reimbursed for mileage expenses have taxable income to the extent that the reimbursement exceeds deductible expenses computed using either direct expenses or the charitable standard mileage rate. Under this act, reimbursement for mileage expenses by a charitable organization described in section 170(c) of the Code to a volunteer for the costs of using a passenger vehicle for Hurricane Katrina relief only is not included in income to the extent that the reimbursement does not exceed the amount that would be allowed using the business standard mileage rate. A taxpayer may not claim a deduction or credit for amounts excluded under this provision.

- C*haritable deduction for contribution of food inventories.* A taxpayer's deduction for charitable contributions of inventory is generally limited to the lesser of the taxpayer's basis in the inventory (usually cost) or the fair market value of the inventory. For certain contributions of inventory, a C corporation may claim an enhanced deduction equal to the lesser of 1) basis plus one-half of the item's appreciation or 2) two times basis. To be eligible for the enhanced deduction, the contributed property must generally be inventory of the corporation, contributed to a charitable organization described in section 501(c)(3) of the Code, and the donee must 1) use the property consistent with the donee's exempt purpose only for the care of the ill, the needy, or infants, 2) not transfer the property in exchange for money, other property, or services, and 3) provide the taxpayer with a

[7] For expenses incurred between January 1, 2005, and September 1, 2005, the standard business mileage rate was 40.5 cents per mile. For expenses incurred between September 1, 2005, and January 1, 2006, the standard business mileage rate was 48.5 cents per mile.

written statement attesting to the proper use of the property. This act allows the enhanced deduction to any taxpayer engaged in a trade or business that makes a donation of food inventory. For taxpayers other than C corporations, the total deduction for contributions of food inventory may not exceed 10% of the taxpayer's income from all business entities from which a contribution of food inventory is made. The enhanced deduction is available only for food that qualifies as 'apparently wholesome food,' – food intended for human consumption that meets all quality and labeling standards imposed by federal, state, and local laws even though the food may not be readily marketable for any number of reasons.

- *Charitable deduction for contribution of book inventories.* As with contributions of food inventories above, this act extends the enhanced deduction for C corporations to qualified book contributions. A 'qualified book contribution' is a charitable contribution of books to a public school that provides elementary education or secondary education, that is an educational organization that normally maintains a regular faculty and curriculum, and that normally has a regularly enrolled body of pupils in attendance at the place where its education activities are regularly conducted.

- *Miscellaneous Provisions.*
  - *Exclusion for certain cancellations of indebtedness by reason of Hurricane Katrina.* Gross income includes income that is realized by a debtor for the discharge of indebtedness, subject to certain exceptions. This act provides that the gross income of a qualified individual does not include any amount which would otherwise by includible in gross income by reason of a discharge of nonbusiness debt if the indebtedness is discharged by an applicable entity. The relief allowed under this provision does not apply to any indebtedness to the extent that real property outside of the Hurricane Katrina disaster area serves as security for the debts. For the purposes of this provision, a 'qualified individual' is any natural person whose principal place of abode on August 25, 2005, was located 1) in the core disaster area or 2) in the Hurricane Katrina disaster area and the person suffered economic loss as a result of Hurricane Katrina. An 'applicable entity' includes the following: a financial institution; a credit union; a corporation that is a direct or indirect subsidiary of a financial institution or credit union and as such is subject to regulation by federal or state agencies; the Federal Deposit Insurance Corporation, the Resolution Trust Corporation, the National Credit Union Administration, and certain other federal executive agencies; an executive, judicial, or legislative agency; and any other organization for whom the lending of money is a significant trade or business.
  - *Suspension of certain limitations on personal casualty losses.* A taxpayer may generally claim a deduction for any loss sustained during the taxable year for which he is not compensated by insurance or otherwise. For individuals, the loss must be incurred in a trade or business or consist of property loss attributable to casualty or theft. Losses are deductible only if they exceed $100 per casualty or theft and total casualty and theft losses

exceed 10% of the taxpayer's adjusted gross income. This act removes the $100 and 10% limitations on casualty and theft losses to the extent those losses are in the Hurricane Katrina disaster area on or after August 25, 2005, and are attributable to Hurricane Katrina.

- *Required exercise of IRS administrative authority.* In general, the Secretary of the Treasury may grant reasonable extensions of time to taxpayers to perform certain acts. In addition, for certain military personnel, the time period for performing certain acts (such as filing returns, paying taxes, bringing suit) is automatically suspended. In the case of a Presidentially declared disaster or terroristic or military action, the Secretary has the authority to prescribe a period of up to one year in which the time period for the same actions is suspended. This act requires the Secretary to suspend those time periods at least until February 28, 2006, for taxpayers determined to have been affected by the Presidentially declared disaster relating to Hurricane Katrina. In addition, this act adds employment and excise taxes to the list of taxes for which the Secretary may extend filing and payment time periods.

- *Special rules for mortgage revenue bonds.* A qualified mortgage bond is a type of private activity bond for which interest is excluded from gross income. Qualified mortgage bonds are issued to make mortgage loans to qualified mortgagors for the purchase, improvement, or rehabilitation of owner-occupied residences and to finance qualified home improvement loans. There are several limitations on qualified mortgage bonds, including income limitations for homebuyers, purchase price limitations, and the requirement that the mortgagor be a 'first-time homebuyer' – one that did not have any ownership interest in a primary residence for the previous three years. The first-time home buyer requirement does not apply to targeted area residences – one that is located in an area of chronic economic distress or a census tract in which at least 70% of the families have an income that is 80% or less of the statewide median income. A qualified home improvement loan may not exceed $15,000. This act eliminates the first-time homebuyer requirement with respect to qualified Hurricane Katrina recovery residences. A 'qualified Hurricane Katrina recovery residence' is one that is financed before January 1, 2008, and is either 1) located in the core disaster area or 2) the mortgagor of which owned a principal residence in the Hurricane Katrina disaster area that was rendered uninhabitable by Hurricane Katrina and the residence financed is in the same state as the previous residence. The act also increases the maximum amount of a qualified home improvement loan to $150,000 for residences located in the Hurricane Katrina disaster area to the extent that the loan is for repair of damage caused by Hurricane Katrina.

- *Extension of replacement period for nonrecognition of gain.* A taxpayer generally realizes gain to the extent the sales price of property exceeds the taxpayer's basis in the property. The realized gain is subject to taxation unless it is deferred or not recognized under some special provision. Gain realized by a taxpayer from an involuntary conversion of property is deferred to the

extent the taxpayer replaces the property within the applicable period. The applicable period begins when property is converted and ends two years after the close of the first taxable year in which the gain is realized. This act extends the applicable period from two years to five years for property that is located within the Hurricane Katrina disaster area that is compulsorily or involuntarily converted after August 25, 2005, by reason of Hurricane Katrina. Substantially all of the use of the replacement property must be in this area for this provision to apply.

- *Secretarial authority to make adjustments regarding taxpayer and dependency status for taxpayers affected by Hurricane Katrina.* This provision allows the Secretary of the Treasury to make adjustments to the tax laws to ensure that taxpayers do not lose eligibility for credits or deductions or experience a change in filing status due to temporary relocations caused by Hurricane Katrina. An example of such an adjustment would be allowing a parent to claim a personal exemption for a child even if the child did not satisfy the residency requirement as a result of a relocation due to Hurricane Katrina. Any adjustment must ensure that an individual is not taken into account by more than one taxpayer with respect to the same benefit.

- Gulf Opportunity Zone Act of 2005 (P.L. 109-135) (GO Act): The Gulf Opportunity Zone Act of 2005 expanded upon the relief offered in the Katrina Emergency Tax Relief Act of 2005. In some instances, this expansion meant extending the additional benefits allowed under the Katrina Act to taxpayers affected by Hurricanes Rita or Wilma. In other cases, the expansion created new tax benefits for taxpayers in one or more of the disaster areas. The act also made numerous technical corrections.
    - *General Provisions.* First, the GO Zone Act added several new definitions. First, the 'Gulf Opportunity Zone' or 'GO Zone' is a subset of the Hurricane Katrina disaster area that has been determined by the President to warrant individual or individual and public assistance from the federal government and is the same as the 'core disaster area' under the Katrina Act. The 'Hurricane Rita disaster area' means an area with respect to which the President has declared a major disaster before October 6, 2005, with respect to Hurricane Rita. The 'Hurricane Wilma disaster area' means an area with respect to which the President has declared a major disaster before November 14, 2005, with respect to Hurricane Wilma. The 'Rita GO Zone' and 'Wilma GO Zone' are, respectively, the portions of the Hurricane Rita disaster area and Hurricane Wilma disaster area that have been determined by the President to warrant individual or individual and public assistance from the federal government.
    - *Extensions of Hurricane Katrina benefits.* The GO Zone Act extended some of the benefits of the Katrina Act to areas affected by Hurricanes Rita and Wilma. The following changes fall into this category.
        - *Retirement plans.* The specific provisions discussed under the Katrina Act were repealed and replaced with more general provisions relating to all of the hurricanes. The provisions under this act were substantively identical to those discussed under the Katrina Act with some timing differences related to the different dates of the three storms.

- *Casualty losses.* The specific provisions discussed under the Katrina Act were repealed and replaced with more general provisions relating to all of the hurricanes. The provisions under this act were substantively identical to that discussed under the Katrina Act with some timing differences related to the different dates of the three storms.

- *Secretarial authority to make adjustments.* The specific provisions discussed under the Katrina Act were repealed and replaced with more general provisions relating to all of the hurricanes. The provisions under this act were substantively identical to those discussed under the Katrina Act with some timing differences related to the different dates of the three storms.

- *Mortgage revenue bonds.* The first-time homebuyer requirement is eliminated for residences in the Rita GO Zone or the Wilma GO Zone. In addition, the increased maximum amount of a qualified home improvement loan is applied to residences in the Rita GO Zone and the Wilma GO Zone.

- *Housing relief for Hurricane Katrina.* As discussed above, the Katrina Act provided some relief to individuals who provided housing for Hurricane Katrina evacuees. In this act, Congress provided further tax relief relating to housing expenditures. Employer-provided housing is generally included in income as a form of compensation. An exception to this general rule exists when an employee is required to accept the lodging on business premises as a condition of employment. This act provides that a qualified employee's gross income does not include the value of any in-kind lodging furnished to the employee, the employee's spouse, or the employee's dependents by or on behalf of the qualified employer. The exclusion applies only to lodging furnished during the six-month period beginning January 1, 2006, and may not exceed $600 for any month in which lodging is furnished. For the purposes of this provision, a 'qualified employee' is an individual who on August 28, 2005, had a principal residence in the GO Zone and who performs substantially all of his or her employment services in the GO Zone for a qualified employer. For the purposes of this provision, a 'qualified employer' is an employer with a trade or business located in the GO Zone.

- *Depreciation and expensing.*

  - *Bonus depreciation for Gulf Opportunity Zone property.* In 2002 and 2003, Congress acted to allow for bonus depreciation (either 30% or 50% depending on when the property was purchased) for property that was purchased after September 10, 2001. In order to qualify for the bonus depreciation, the property had to have been placed into service before January 1, 2005. For certain transportation property, noncommercial aircraft, or property with a long production period, the property must have been placed into service before January 1, 2006. This act allows a taxpayer to claim an additional first-year depreciation allowance equal to 50% of the adjusted basis of qualified Gulf Opportunity Zone property acquired on or after August 25, 2005, and placed into service before January 1, 2008 (the sunset date is January 1, 2009, for nonresidential real property and residential rental property). 'Qualified Gulf Opportunity Zone' property must satisfy all of the following conditions: 1) It must be depreciable

modified accelerated cost recovery systems (MACRS) recovery property with a recovery period of 20 years or less, MACRS water utility property, qualified leasehold improvement property, off-the-shelf computer software, residential rental property, or nonresidential real property; 2) Substantially all use of the property must be in the active conduct of a trade or business of the taxpayer in the GO Zone; 3) The original use of the property in the GO Zone must commence with the taxpayer on or after August 25, 2005; 4) The property must be purchased on or after August 25, 2005; 5) No written binding contract for the purchase of the property may be in effect before August 25, 2005; and 6) The property must be placed in service before January 1, 2008 (January 1, 2009 for nonresidential real property and residential rental property). The term does not include property that is 1) mandatory alternative depreciation system (ADS) property; 2) tax-exempt bond-financed property; 3) qualified revitalization buildings or rehabilitation expenditures for which a deduction under section 1400I of the Code is claimed; or 4) property used in connection with a private or commercial golf course, a country club, a massage parlor, a hot tub facility, a suntan facility, a liquor store, or a gambling or animal racing property. In addition, this act allows the Secretary to extend the placed-in-service date for noncommercial aircraft and property with longer production periods for up to one year. This extension is granted on a case-by-case basis and may only be granted if the delay in placing the property into service was caused by one of the three hurricanes and the property is placed in service in the GO Zone, the Rita GO Zone, or the Wilma GO Zone.

- *Increase in limits on section 179 deductions.* Certain taxpayers may elect to claim a section 179 expense deduction on the cost of qualifying property rather than depreciating the property over time. For the 2003 through 2007 tax years, the maximum amount of the deduction is limited to $100,000, indexed for inflation.[8] This limitation is increased by $35,000 for property that is placed in service in the New York Liberty Zone, an empowerment zone, or a renewal community. The amount of the section 179 deduction is reduced to the extent that the total amount of property placed into service exceeds an investment threshold, currently set at $400,000, indexed for inflation.[9] The section 179 deduction may not exceed a taxpayer's taxable income from the active conduct of a trade or business. This act increases the maximum section 179 deduction for qualified GO Zone property by the lesser of $100,000 or the amount of property placed into service in the GO Zone. In addition it increases the total investment limitation by the lesser of $600,000 or the amount of property placed into service in the GO Zone. The increased amounts apply to property acquired on or after August 25, 2005, and placed into service before January 1, 2008. 'Qualified GO Zone property' must satisfy all of the following conditions: 1) It must be depreciable modified accelerated cost recovery systems

[8] The adjusted dollar limitation is $105,000 for 2005 and $108,000 for 2006.

[9] The adjusted investment limitation is $420,000 for 2005 and $430,000 for 2006.

(MACRS) recovery property with a recovery period of 20 years or less; 2) Substantially all use of the property must be in the active conduct of a trade or business of the taxpayer in the GO Zone; 3) The original use of the property in the GO Zone must commence with the taxpayer on or after August 25, 2005; 4) The property must be purchased on or after August 25, 2005; 5) No written binding contract for the purchase of the property may be in effect before August 25, 2005; and 6) The property must be placed in service before January 1, 2008. The term does not include property used in connection with a private or commercial golf course, a country club, a massage parlor, a hot tub facility, a suntan facility, a liquor store, or a gambling or animal racing property.

- *Deduction for demolition and clean-up costs.* Under general law, demolition costs are capitalized and added to the basis of the land on which the demolished building was located. The tax treatment of debris removal costs depends on the nature of the costs incurred. Debris removal costs that are in the nature of replacement must be capitalized and added to the basis of the property damaged. Other times, debris removal costs may be used to show a decrease in the fair market value of property which could be used to determine the amount of a casualty loss. This act allows a taxpayer to claim a current deduction for 50% of any qualified Gulf Opportunity Zone clean-up costs paid between August 25, 2005, and January 1, 2008. For the purposes of this provision, a 'qualified Gulf Opportunity Zone clean-up cost' is an amount paid for the removal of debris, or the demolition of structures, on real property located in the GO Zone if the real property is either held by the taxpayer for use in a trade or business or is inventory in the hands of the taxpayer.
- *Environmental remediation costs.* Under previous law, a taxpayer may elect to deduct, rather than capitalize, certain environmental remediation expenditures incurred in connection with property used in a trade or business for the production of income. This provision expired for expenditures incurred after December 31, 2005. This act extends the expiration date for that provision until December 31, 2007, for qualified environmental remediation expenditures incurred in connection with a qualified site in the GO Zone. In addition, expenditures incurred on or after August 25, 2005, with respect to petroleum products in the GO Zone are included in the deduction.

AMEND TAXATION OF LOGGING MACHINERY.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-19	**HB 1938**	**Rep. Wainwright; Church; McComas; Underhill; (Primary Sponsors)**

AN ACT TO TREAT COMMERCIAL LOGGING MACHINERY THE SAME AS FARM MACHINERY UNDER THE SALES TAX.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, exempts from the 1% privilege tax, with an $80 maximum tax per article, commercial logging machinery, attachments, repair parts for commercial logging machinery, lubricants applied to commercial logging machinery, and fuel to operate commercial logging machinery for use in commercial logging operations.

FISCAL IMPACT: Annual revenue loss is estimated to be $2.87 million.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act became effective when signed into law by the Governor on June 21, 2006, and applies to purchases made on or after July 1, 2006.

ANALYSIS: For years, State tax law has provided that the sales and use tax rate on mill machinery is 1%, with an $80 maximum tax per article. There has never been a specific reference in the sales tax statutes to machinery used in the forestry and logging business; however, based on a long-standing interpretation by the Department of Revenue, logging firms that had contracts with wood product manufacturers to cut timber were deemed entitled to the 1% rate, $80 cap based on the preferential rate afforded to manufacturing industries and plants.
For several years, North Carolina has worked toward simplifying its sales and use tax statutes in an effort to conform to the Streamlined Sales and Use Tax Agreement. One of the conforming changes the State had to make was to simplify its sales tax rates. Under the Streamlined Sales and Use Tax Agreement, a state must have one rate, with no caps or thresholds, as of January 2006.

Prior to January 1, 2006, North Carolina had several different rates, including this 1% rate with an $80 cap. To conform to the Streamlined Sales and Use Tax Agreement, the General Assembly changed how the State taxes items previously taxed at the 1% sales tax rate with an $80 cap:

- In 2001, at the request of North Carolina Citizens for Business and Industry, the General Assembly maintained the preferential tax rate on mill machinery by removing it from the sales tax statutes to the privilege tax statutes. By changing the nature of the tax from a sales tax to a privilege tax, the industry kept its preferential rate and the State conformed to the Streamlined Sales and Use Tax Agreement. The change from a sales tax to a privilege tax means that retailers are not responsible for collecting and remitting the tax. The change in the law, made in 2001, became effective January 1, 2006. Based upon the long-standing interpretation by the Department, this change encompassed machinery used in the forestry and logging business.

- In 2005, the General Assembly exempted from tax sales to farmers of machinery, attachments and repair parts for the machinery, and lubricants applied to the machinery. It also expanded the 1% privilege tax with an $80 cap, originally enacted in 2001, to include manufacturing fuel and major recycling equipment.

Thus, as of January 1, 2006, purchases of mill machinery, which includes commercial logging equipment, and mill machinery parts or accessories and manufacturing fuel, became exempt from sales and use tax, but were subject to the new privilege tax. The privilege tax is imposed on the purchaser of qualifying property, and the purchaser is liable for accruing and remitting the tax to the Department of Revenue. Examples of qualifying commercial logging equipment include log skidders, log carts, tree shears, feller bunchers, winches, chain saws, tractors, axes, and mallets when the items are used to cut and transport timber to a wood products manufacturer.

This act treats commercial logging machinery and related items the same as farm machinery under the current sales tax laws. First, the act exempts commercial logging items from the 1%/$80 maximum privilege tax, to which they are currently subject. The act also creates a new exemption in the sales and use tax statutes for commercial logging machinery, attachments and repair parts, lubricants, and fuel used to operate commercial logging machinery. The language of the exemption tracks the current exemption for farm machinery, as enacted in S.L. 2005-276.

PROPERTY TAX CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-30	**HB 2097**	**Representative Brubaker**

AN ACT TO MAKE CLARIFYING CHANGES TO THE PROPERTY TAX LAWS.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, makes the following changes to the property tax laws:

- It allows the electronic listing of individual as well as business personal property.
- It clarifies that 60% of only the first month's interest collected on delinquent registered motor vehicle taxes is transferred to the Combined Motor Vehicle and Registration Account, not the total interest collected on the unpaid taxes.
- It gives a county board of equalization and review the authority to approve late applications for present use-value appraisal of property.
- It validates the current practice of allowing tax collectors to receive tax receipts for assessments that have been or are subsequently appealed to the Property Tax Commission and to send the taxpayer an initial bill for those taxes.

FISCAL IMPACT: This act does not impact State revenues and does not have a significant impact on local revenues.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The act became effective when signed into law by the Governor on June 26, 2006.

ANALYSIS: This act makes several changes to the property tax statutes.

Electronic Listing

The General Assembly enacted legislation in 2001 to allow counties to adopt a resolution providing for the electronic listing of business personal property.[10] This act extends a county's authority to provide electronic listing to include individual personal property[11] as well as business personal property. If the county commissioners adopt such a resolution, then the assessor must include information on how to list electronically in the listing notice sent to taxpayers. An abstract submitted by electronic listing is considered filed when received in the office of the assessor.

---

[10] S.L. 2001-279.

[11] Examples of individual personal property include automobiles, boats, and mobile homes.

This act does not extend the listing deadline for individual personal property. The listing period begins on January 1 and ends on January 31. A county may, for good cause, give an individual taxpayer an extension until April 15 to list personal property. Under current law, a county may extend the period for electronic listing of business personal property until June 1.

Clarifying Change

The act makes a clarifying change to legislation enacted during the 2005 Session. S.L. 2005-294 created a combined system for the registration and taxation of motor vehicles, effective July 1, 2009.[12] Under the new combined system, consumers will receive one statement per registered vehicle containing all the registration fees and property taxes due on the vehicle. The Division of Motor Vehicles, or its agent, will be responsible for collecting the fees and taxes due.

To pay for the new system, the 2005 legislation increased the first month's interest on delinquent registered motor vehicle taxes from 2% to 5%, effective January 1, 2006, and required that 60% of the interest collected on unpaid taxes be transferred on a monthly basis to the Combined Motor Vehicle and Registration Account in the Treasurer's Office. Funds in this Account may only be transferred to the DMV for the purpose of implementing the combined system, at the direction of the North Carolina Association of County Commissioners. The intent of the sponsors of the 2005 legislation was that 60% of only the first month's interest would be transferred to the Account, not the total interest collected on unpaid taxes. This act clarifies this intent.[13]

Late Application for Present Use-Value

The act gives a county board of equalization and review the authority to approve a late application for present use-value appraisal of property if the applicant demonstrates good cause for the delay.[14] If the county board of equalization and review is not in session, then the late filing may be approved by the board of county commissioners. Existing law provides for similar approval for late applications for property tax exemptions or exclusions.[15]

Tax Receipts for Assessments

Each year the county board of commissioners or the municipal governing body directs the tax collector to collect taxes charged in the tax records and receipts. The tax receipt sets out the name and address of the taxpayer, the assessment of the taxpayer's property, the rate of tax levied, and the amount of property taxes and any penalties due. Prior law stated that no tax receipts could be delivered to the tax collector for any assessment appealed to the Property Tax Commission until the appeal had been finally adjudicated. In practice, boards of equalization and review often adjourn on June 30, except to hear appeals filed prior to June 30. The tax collector receives the tax receipts by August 1.

This act validates the current practice of allowing tax collectors to receive tax receipts for assessments that have been or are subsequently appealed to the Property Tax Commission, but

---

[12] Section 31.5 of S.L. 2006-259 changed this effective date to July 1, 2010.

[13] In December 2005, the North Carolina Department of State Treasurer issued a memorandum directing counties to only remit 60% of the first month's interest to the Treasurer. The memorandum stated that this was the true intent of the legislation and that it anticipated that language clarifying this intent would be enacted during the 2006 Session. The memorandum was sent to all county managers, finance officers, tax administrators, tax assessors, tax collectors, and certified public accountants.

[14] Generally, an application for present-use value must be filed during the regular listing period: January 1 through January 31.

[15] G.S. 105-282.1(a1).

clarifies that the tax collector may not seek any remedies for collection of the taxes or enforcement of the tax lien pending final adjudication of appeal from the assessment. The tax collector may, however, send an initial bill or notice to the taxpayer pending final adjudication. By providing notice pending appeal, the taxpayer may choose to avoid the amount of interest that accrues while the appeal is pending. If the taxpayer wins on appeal, the taxpayer receives a refund of any taxes paid plus interest. The current practice also puts a potential buyer of property on notice of a tax bill if the property is transferred pending the appeal.

The act also makes a conforming change in the law concerning the annual settlement the tax collector makes with the governing body of its taxing unit. A tax collector is liable for the faithful performance of his or her collection duties. Each year, a tax collector must make a sworn report to the governing body of the taxing unit showing what taxes remain unpaid at the end of the fiscal year. In this final settlement for the preceding fiscal year, a collector is charged with the total amount of taxes for collection, less any amounts that may be credited to the collector in the settlement. [16] This act adds to the list of items that may be credited to the collector the principal amount of taxes for any assessment appealed to the Property Tax Commission when the appeal has not been finally adjudicated.

SSTA SALES TAX DEFN/SALES TAX PAYMENTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-33	**HB 1915**	**Representative Hill**

AN ACT TO INCORPORATE THE STREAMLINED SALES TAX DEFINITIONS CONCERNING TELECOMMUNICATIONS, TO SIMPLIFY THE TAX PAYMENT REQUIREMENTS FOR SEMIMONTHLY TAXPAYERS, AND TO TREAT TANGIBLE PERSONAL PROPERTY USED IN MODULAR HOMES THE SAME AS TANGIBLE PERSONAL PROPERTY USED IN OTHER HOMES.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, does three things:

- Incorporates several definitions from the Streamlined Sales Tax Agreement into North Carolina law.
- Changes the tax payment requirements for semi-monthly sales tax payers.
- Allows a credit for sales tax paid on tangible personal property that is added to a modular home and sold with the modular home.

---

[16] Charges include the total amount of all taxes placed in the collector's hands for collection for the year, all late-listing penalties and costs collected by the collector, all interests on taxes collected by the collector, and any other sums collected or received by the tax collector. Credits include all sums deposited by the collector to the credit of the taxing unit, releases allowed by the governing body, discounts allowed for early payment of taxes, the principal amount of taxes constituting liens against real property, the principal amount of taxes determined to be insolvent and to be allowed as credits, and any commission the collector is entitled to deduct from amounts collected.

FISCAL IMPACT: The changes made with respect to definitions under the Streamlined Sales Tax Agreement have no fiscal impact on the State, but the changes with respect to sourcing of prepaid wireless may have a minimal impact on local governments. Minimal to no fiscal impact is expected from the changes regarding tax payment schedules.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Different parts of the act have different effective dates as described below.

ANALYSIS: The act makes the following changes to the revenue laws.

Streamlined Sales Tax Agreement

Sections 1 through 8 of the act modify the definitions that apply to telecommunications services for sales and use tax purposes. The changes were made to adopt the definitions in the Streamlined Sales Tax Agreement (hereinafter Streamlined Agreement). These changes become effective January 1, 2007.

Section 1 of the act makes the following changes in G.S. 105-164.3, the definitions section of the sales and use tax laws:

- Adds a definition of the term 'ancillary service' because the definitions in the Streamlined Agreement separate ancillary services from telecommunications services. Previous North Carolina law considered ancillary services to be part of telecommunications services. All of the ancillary services were taxed under previous law and will continue to be taxed.
- Modifies the definition of 'prepaid telephone calling service' to include the newly defined terms for 'prepaid wireless calling service' and 'prepaid wireline calling service'. Previous law did not distinguish between prepaid wireline and prepaid wireless. The definition of prepaid wireless was added to recognize that prepaid wireless includes whatever other services can be obtained with the same card used to obtain wireless telecommunications service. Prepaid cards are taxed at the point of sale rather than as telecommunications service when the minutes are used. Some services that are not within the definition of telecommunications service can be purchased with the card that authorizes prepaid wireless use. The current definition of prepaid telephone calling service has an exclusive use requirement that conflicts with the practice for prepaid wireless.
- Converts the current definition of prepaid telephone calling service into the definition of 'prepaid wireline calling service'. This change is technical.
- Adds a definition for 'prepaid wireless calling service'. This definition does not have an exclusive use requirement, in contrast to prepaid wireline.
- Updates the definition for 'Streamlined Agreement' to include the latest amendments made January 13, 2006.
- Conforms the definition of 'telecommunications service' to the Streamlined definition and incorporates into the definition the appropriate inclusions and exclusions that are now in G.S. 105-164.4C(b) and (c). As changed, the definition is the same as previous law with two exceptions. The first exception relates to Universal Service Fund surcharges. The second exception is related to paging service. With these changes, these charges are part of the sales price and will be subject to tax. Universal Service

> Fund surcharges could not be 'carved out' and remain as under previous law because there is no Streamlined carve out in sales price or telecommunications service for this surcharge. Paging service may be carved out because there is a Streamlined definition for this, but this act does not include that carve out.

Section 2 of this act changes the tax imposition statute to add the now separate category of 'ancillary service' and to include non-telecommunications services that are sold as part of a prepaid wireless calling service.

Section 3 of this act makes a conforming change to the sourcing statute to apply the new definition of prepaid wireless call service.

Section 4 of this act makes conforming changes to the separate statute on telecommunications to include ancillary service and to apply the new definition of prepaid wireless calling service.

Section 5 of this act moves to the exemption statute the items that were formerly excluded from the definition of telecommunications and are not intended to be taxed. This change maintains the current tax treatment of these services.

Sections 6 through 8 of this act add the now separate category of 'ancillary service' in the exemption statute, in the direct pay permit statute, and in the local distribution statute.

Section 12 of this act repeals the requirement that a certified automated system must be able to determine whether an exemption certificate offered by a purchaser is a valid certificate based upon a State registry because the Streamlined Agreement does not require this determination. The section became effective June 1, 2006, because the first certification of an automated system under the Streamlined Sales Tax Act occurred around that date. Under the Streamlined Sales Tax Act, a seller may collect and remit the sales and use tax due a state through either a certified service provider or it may do it itself through the use of a certified automated system. A certified automated system is a software program certified by the Secretary of Revenue as being able to correctly determine the applicable State and local sales tax rate. G.S. 105-164.44H(a) lists the specific requirements a certified automated system must meet to be certified. This section removes one of the requirements because it is not a requirement under the Agreement.

Sales Tax on Modular Homes

Previous law stated that the retail sale of a modular home was the sale of the home to a modular homebuilder. It assumed that a manufacturer would sell to a modular homebuilder who would then enter into a performance contract with a customer to construct the home. This assumption was not accurate when the manufacturer sold the modular home directly to the customer who would occupy the home.

Section 13 of the act addresses two issues. First, it clarifies the law concerning a retail sale of a modular home by including within the scope of a retail sale all sales to the customer who will occupy the home. It does this by removing the previous limitation that defined a retail sale as a sale to a modular homebuilder. Second, it allows a credit for sales and use tax paid on materials used in the home. G.S. 105-164.6 allows a credit against this State's sales tax for any sales or use tax paid in another state on the same item. This provision does not apply, however, to taxes paid in another state on materials that are included in a modular home that is taxed when it is sold to a modular homebuilder because the taxes paid to the two states are on different items. This section allows credit for sales tax paid on the items that are included in the home.

This part of the act became effective July 1, 2006, and applies to purchases made on or after that date.

Simplify Semi-Monthly Tax Payments

Under previous law, taxpayers that were liable for at least $10,000 a month in sales tax, electric utility tax, or piped natural gas excise tax were required to pay tax twice a month. For these taxpayers, the month was split into two periods – the first day of the month through the 15th of the month, and the 16th of the month through the end of the month. The tax payment for the 1st through 15th period was due by the 25th of the same month and the tax payment for the 16th through the end of the month was due by the 10th day of the following month. Therefore, taxpayers had 10 days after the end of a semimonthly period to make a payment. In addition to the payments, these taxpayers also were required to file a return. The sales tax return was due monthly by the 20th and the electric utility and piped gas returns were, and remain, due quarterly by the end of the month after the close of the quarter.

Several large retailers in the Streamlined Sales Tax project asked North Carolina to look at its payment schedule to determine if it could require payments to be made only once a month. North Carolina is one of only a few states that require payments twice a month.

Sections 9, 10, and 13 of the act replace the semimonthly payment schedule with a single monthly payment and a prepayment of the next month's liability due on the same day as the monthly payment. The result is that taxpayers will have more time to gather data before filing a return and will make payments on only one day of the month. Under the act, the taxpayer makes one payment on the 20th of the month. That payment includes any amount remaining due for the preceding month and 65% of the amount estimated to be due for the current month. The State will experience a slight one-time increase in revenue in the first month that the prepayment schedule takes effect.

The prepayment must equal at least 65% of one of three thresholds:

- The current month's liability.
- The liability for the same month the preceding year.
- The average monthly liability for the past calendar year.

These thresholds are easily determined and eliminate the need for the taxpayer to calculate actual liability for periods of less than a month. The 65% threshold was chosen because it was suggested by the retailers who requested North Carolina to review its law and the prepayment date is about 2/3 of the time in a month. A similar method and threshold are already in place in Florida and Arkansas.

The act eliminates the provisions concerning penalty relief for small underpayments because the relief is no longer needed. The relief was provided under previous law because the law required taxpayers to calculate liability for short periods within 10 days after the end of the period. Under this act, sales tax taxpayers have 20 days after the end of the month to file a return and electric utility and piped gas taxpayers have a full month after the end of a quarter to file a return.

This part of the act becomes effective October 1, 2007.

MILL REHABILITATION TAX CREDIT.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-40	**HB 474 As amended by S.L. 2006-252**[17]	**Rep. Ross, Howard, Brubaker, Goodwin**

AN ACT TO PROVIDE A TAX CREDIT FOR REVITALIZATION OF HISTORIC MILL FACILITIES AND TO PROVIDE AN ENHANCED HISTORIC REHABILITATION CREDIT FOR REHABILITATION EXPENSES WITH RESPECT TO A FACILITY THAT WAS ONCE A STATE-OWNED TRAINING SCHOOL FOR JUVENILE OFFENDERS.

OVERVIEW: This act does three things:

- It provides an enhanced credit for rehabilitating a facility that at one time was a State-owned training school for juvenile offenders.
- It provides an income tax credit for rehabilitating vacant historic manufacturing sites if the taxpayer spends at least $3 million to rehabilitate the site. The credit is a percentage of the qualified rehabilitation expenditures or rehabilitation expenses. The percentage amount of the credit varies depending on the development tier location of the site and its eligibility for the federal credit.
- It eliminates the requirement that in order for a project to be eligible for a credit for rehabilitating non-income producing property it must receive the certification of the State Historic Preservation Officer before the commencement of work.

FISCAL IMPACT: The act is expected to decrease General Fund revenues $2.8 million in fiscal year 2006-07. This loss grows to an anticipated $14.7 million in fiscal year 2008-09 before beginning to decline. Preservation NC estimates there are approximately 30 to 35 mill properties out of more than 200 eligible properties throughout North Carolina likely to be rehabilitated as a result of this tax credit.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The act is effective for taxable years beginning on or after January 1, 2006, and applies to eligible sites placed into service on or after July 1, 2006. The act expires for qualified rehabilitation expenditures and rehabilitation expenses incurred on or after January 1, 2011.

ANALYSIS: North Carolina has two income tax credits for rehabilitating an historic structure. One credit is allowed to taxpayers that qualify for the federal historic rehabilitation credit. The federal tax credit is available for rehabilitating only income-producing historic structures, and is equal to 20% of the rehabilitation expenses. The amount of the North Carolina credit is 20% of the expenses that qualify for the federal credit. The second credit is allowed to taxpayers that rehabilitate an historic structure that is not income producing, and thus not eligible for the federal

[17] S.L. 2006-252 replaced the tax credits under the Bill Lee Act with more narrowly focused credits. The act replaced 'enterprise tiers' with 'development tiers' and reduced the number of tiers from five to three. S.L. 2006-252 made changes to this act to conform to the changes made in it.

credit. The credit is equal to 30% of the rehabilitation expenses. To qualify for the credit for rehabilitating a non-income producing historic structure, the taxpayer must spend more than $25,000 within a 24-month period. The North Carolina credit for both income-producing structures and non-income producing structures must be taken in installments over five years after the structure is placed in service, and any unused portion of the credit may be carried forward for five years. A pass-through entity may allocate the credit to an owner if an owner's adjusted basis in the pass-through entity is at least 40% of the amount allocated to that owner.

Enhanced Credit

The act amends the tax credit allowed for rehabilitating an historic structure by increasing the credit amount for rehabilitating a facility that was once a State-owned training school for juvenile offenders. The amount of credit such a facility may be eligible to receive is increased to 40% of the qualified rehabilitation expenditures or rehabilitation expenses rather than 20% or 30%, respectively. This provision allows for an enhanced credit for a rehabilitation of the facilities of the former Stonewall Jackson Manual Training and Industrial School in Cabarrus County.

Mill Rehabilitation Credit

The act also establishes an enhanced tax credit for rehabilitating vacant historic manufacturing sites. This credit may be taken in place of the existing credit for historic rehabilitation, not in addition to it. The tax credit enacted by this act for rehabilitating historic manufacturing sites differs from the tax credit for historic rehabilitation in several ways. The amount of the credit is larger, the credit may be taken against one of three taxes, in some instances the credit may be taken in the year the property is placed into service, and any unused portion of the credit may be carried forward for nine years.

To be eligible to claim the credit for rehabilitating a vacant historic manufacturing site, a taxpayer must spend at least $3 million to rehabilitate the site. To qualify for the credit, the site must satisfy all of the following conditions:

- The site was used as a manufacturing facility or for purposes ancillary to manufacturing, as a warehouse for selling agricultural products, or as a public or private utility.
- The site has been at least 80% vacant for a period of at least two years immediately preceding the date the eligibility certification is made.
- The site is a certified historic structure or a State-certified historic structure.

The amount of the credit depends upon the development tier in which the site is located and the eligibility of the site for a federal credit as follows:

- 40% of qualified rehabilitation expenditures or rehabilitation expenses – If the site is located in a development tier one or two, regardless of whether the taxpayer is allowed a federal credit.
- 30% of qualified rehabilitation expenditures – If the site is located in a development tier three and the taxpayer is allowed a federal credit.
- No credit is allowed if the site is located in a development tier three and the taxpayer is not allowed a federal credit.

If the credit is taken for income-producing property, it may be taken in the year the property is placed in service. If the credit is taken for non-income-producing property, the credit must be taken in five equal installments beginning with the taxable year in which the property is placed in service.

The credit allowed may be claimed against the income tax, the franchise tax, or the gross premium tax. The taxpayer must elect the tax against which the credit will be claimed, and this election is binding.

The credit may not exceed the amount of the tax against which the credit is claimed for the taxable year reduced by the sum of all credits allowed, except payment of tax made by the taxpayer. Any unused portion of the credit may be carried forward for nine years.

A pass-through entity may allocate the credit among any of its owners without limitation as long as the owner's adjusted basis in the pass-through entity is at least 40% of the amount of credit allocated to the owner.[18] An owner of a pass–through entity that qualifies for the credit will forfeit a portion of any credit the owner has received if both of the following conditions are met:

- The owner disposed of the interest within five years from the date the eligible site is placed into service.
- The owner's interest in the pass-through entity is reduced to less than two-thirds of the owner's interest in the pass-through entity at the time the eligible site was placed into service.

The forfeiture of an owner's interest is not required if the change in ownership is the result of the owner's death or the merger, consolidation, or similar transaction requiring approval by the shareholders, partners, or members of the entity, to the extent the entity does not receive cash or tangible property in the transaction. A taxpayer or owner of a pass-through entity that forfeits a credit is liable for all past taxes avoided as a result of the credit plus interest computed from the date the taxes would have been due if the credit had not been allowed.

Certification by the State Historic Preservation Officer

To qualify for either the historic rehabilitation tax credit or the mill rehabilitation tax credit, the State Historic Preservation Officer must certify that the facility comprises an eligible site and that the rehabilitation is a certified rehabilitation. A taxpayer must provide the Secretary of Revenue with documents showing that the State Historic Preservation Officer certifies the site and rehabilitation and showing the amount of rehabilitation expenditures or expenses. Under prior law, the certification of the repairs or alterations had to be obtained by the taxpayer from the State Historic Preservation Officer prior to the commencement of the work. This act eliminates the timing of this requirement for both the credit enacted by this act and for the pre-existing credit for rehabilitating an historic structure.[19]

[18] A pass-through entity may also allocate the credit for rehabilitating an historic structure among its owners in the same manner as provided in this provision.

[19] The taxpayer is still required to receive certification from the State Historic Preservation Officer that the repairs or alterations comply with federal standards, but the timing of that certification is immaterial.

MODIFY APPROPRIATIONS ACT OF 2005.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-66	**SB 1741**	**Senator Garrou**

AN ACT TO MODIFY THE CURRENT OPERATIONS AND CAPITAL APPROPRIATIONS ACT OF 2005, TO INCREASE TEACHER AND STATE EMPLOYEE PAY, TO REDUCE THE SALES TAX RATE AND THE INCOME TAX RATE APPLICABLE TO MOST SMALL BUSINESSES, TO CAP THE VARIABLE WHOLESALE COMPONENT OF THE MOTOR FUEL TAX RATE AT ITS CURRENT RATE, TO ENACT OTHER TAX REDUCTIONS, AND TO PROVIDE FOR THE FINANCING OF HIGHER EDUCATION FACILITIES AND PSYCHIATRIC HOSPITALS AND OTHER CAPITAL PROJECTS.

OVERVIEW: This act is The Current Operations and Capital Improvements Appropriations Act of 2006. In addition to the budget provisions, the act makes many tax law changes and authorizes the issuance of special indebtedness to finance several capital projects across the State. The tax law changes made in this act include the following:

- It reduces the sales tax rate from 4.5% to 4.25%, effective December 1, 2006.
- It reduces the upper individual income tax bracket from 8.25% to 8%, effective for taxable years beginning on or after January 1, 2007, and from 8% to 7.75%, effective for taxable years beginning on or after January 1, 2008.
- It caps the variable wholesale component of the motor fuels tax rate for one year and holds the Highway Fund harmless for any potential revenue loss.
- It creates a new tax credit for small businesses that provide health benefits to their eligible employees, effective for taxable years beginning on or after January 1, 2007, and expiring for taxable years beginning on or after January 1, 2009.
- It extends the sunset for refunds of the State sales and use tax on fuel used by interstate passenger air carriers and on aviation fuel used by a motorsports racing team or a motorsports sanctioning body. The refunds were scheduled to expire for purchases made on or after January 1, 2007; the act extends the date of expiration to January 1, 2009.
- It extends the sunset on the tax credit for constructing renewable fuel production facilities from January 1, 2008, to January 1, 2011, and it creates an enhanced credit if the taxpayer invests at least $400 million in three separate facilities over a five-year period.
- It creates a tax credit for certain biodiesel providers, effective January 1, 2007, and expiring January 1, 2010.
- It exempts qualifying research and development equipment from State and local sales and use tax and imposes a 1% privilege tax with an $80 cap, effective July 1, 2007.

- It provides a sales and use tax refund for a professional motorsports racing team for purchases of professional motor racing vehicle component parts other than tires or accessories made by it, effective July 1, 2007.
- It provides a married couple with the option of filing jointly if they file a federal joint return and if one spouse is a nonresident with no income from North Carolina, effective for taxable years beginning on or after January 1, 2006.
- It allows an individual taxpayer to deduct a maximum amount of $750 contributed by the taxpayer to an account in the Parental Savings Trust Fund. A married couple filing jointly may deduct a maximum of $1,500. To qualify for the deduction, the adjusted gross income of the individual taxpayer or married couple filing jointly must not exceed a specified amount. The deduction is effective for taxable years beginning on or after January 1, 2006. The deductible amount increases for taxable years beginning on or after July 1, 2007. The deduction is repealed for taxable years beginning on or after January 1, 2011.
- It provides an exemption from the sales and use tax on sales of tangible personal property and electricity to an eligible Internet data center, effective for sales made on or after October 1, 2006.
- It amends the definition of 'corporation', as it applies to the franchise tax statutes, to include a limited liability company (LLC) that elects to be taxed as a C Corporation for federal income tax purposes. The effect of this change is that the corporate franchise tax will apply to these LLCs. The change is effective for taxable years beginning on or after January 1, 2007.
- It expands the royalty payment reporting option for corporations and their related members to include payments received for use of patents and copyrights, effective for taxable years beginning on or after January 1, 2006.

FISCAL IMPACT: The tax changes enacted in this act reduce General Fund revenues by approximately $193.5 million for fiscal year 2006-2007. The act authorizes approximately $254 million in special indebtedness for the fiscal year 2006-2007, and another $419 million in the future.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The act contains varying effective dates.

ANALYSIS: The act makes the following finance law changes.

Transfer of Tax Proceeds from Highway Trust Fund to General Fund.

Each fiscal year, a certain sum of highway use tax proceeds is transferred from the Highway Trust Fund to the General Fund. The first amount is equal to $1.7 million. In 2005, the General Assembly altered that amount for fiscal years 2005-2006 and 2006-2007 by requiring a transfer of $250 million in each of those fiscal years. Section 2.2(e) of the act reduces the transfer amount to $55 million for fiscal year 2006-2007 only.

The second amount required to be transferred annually from the Highway Trust Fund to the General Fund is determined by a formula. The formula is determined by adjusting the amount distributed in the previous fiscal year, which began as a base of $2.4 million in fiscal year 2002-2003, plus or minus a percentage of this sum equal to the percentage by which tax collections

have increased or decreased for the most recent 12-month period for which data is available. Using this formula, the second amount transferred to the General Fund for fiscal year 2006-2007 is $2,486,602.

Consultation Not Required Prior to Establishing or Increasing Fees pursuant to the Executive Budget Act Section 6.3 of the act provides that an agency is not required to consult with the Joint Legislative Commission on Governmental Operations pursuant to G.S. 12-3.1[20] prior to establishing or increasing a fee authorized or anticipated in the Current Operations and Capital Improvements Appropriations Act of 2006, or in the Senate and House of Representatives Appropriations Committee Reports on the Continuation, Expansion and Capital Budgets, that were distributed in the Appropriations and Base Budget Committees and used to explain this act. The statutory consultation requirement is unnecessary since the General Assembly already considered these fees in the Appropriation Act of 2006 and Committee Reports.

No Increases that the General Assembly has Rejected

Section 6.4 of the act amends the Executive Budget Act by adding a statute prohibiting a fee increase if the General Assembly has rejected an increase in that fee for the current fiscal period. For purposes of this section, the General Assembly has rejected a fee increase when that fee is included in a bill which fails a reading or is in a version of a bill that passes one house but is enacted without the fee increase.

Refund of Local Sales and Use Taxes to a Local School Administrative Unit

Prior to the 2006-2007 fiscal year, local school administrative units were eligible for an annual refund of sales and use taxes paid by the unit. In 2005, the General Assembly repealed the provision which authorized the refund for local school administrative units in an attempt to redirect estimated State sales tax revenues refundable to LEAs to the State Public School Fund for allotment through State position, dollar, and categorical allotments. However, the amount that was transferred to the State Public School Fund was sufficient to offset only the State portion of the taxes that were previously refunded. The effect of this was to reduce the amount going to the public schools. Section 7.20 of the act maintains the repeal of the refund of the State taxes, but allows local school administrative units to apply for a refund of the local sales and use taxes paid by the unit. As before, the refund applies to sales and use taxes paid on direct purchases of tangible personal property, other than telecommunications and electricity, and indirect purchases of building materials. Also as before, the request for a refund must be in writing and is due within six months after the end of the entity's fiscal year. This is the only instance in which a taxpayer is eligible for a refund of local sales and use taxes when the taxpayer is not also eligible for a refund of State sales and use taxes. This change is effective retroactive for purchases made on or after July 1, 2005.

Revised Maximums for Collection Assistance Fees

Section 19.2 of the act increases the maximum amount of collection assistance fee proceeds that the Department of Revenue may apply to taxpayer locator services from $100,000 to $150,000 per year and adds a yearly limit of $353,000 to the amount of the fees that may be applied towards postage or other delivery charges for correspondence related to collecting overdue tax debts. In

[20] G.S. 12-3.1 provides that before an agency's rule to establish or increase a fee can become effective, the agency must consult with the Joint Legislative Commission on Governmental Operations on the amount and purpose of the fee to be established or increased. If the Commission does not hold a meeting to hear the consultation request within a specified time, then the consultation requirement is deemed satisfied.

2001, the General Assembly established a system under which the cost of collecting overdue tax debts is to be borne by the delinquent taxpayers, not by the taxpayers who pay their taxes on time. The collection assistance fee is 20% of the overdue tax debt and is a receipt of the Department.[21] The proceeds of the fee are credited to a special, non-reverting account to be used only for collecting overdue tax debts. The Department of Revenue may apply the fee proceeds for the following purposes:

- To pay contractors for collecting tax debts.
- To pay the fee charged by the federal government for collecting tax debts by offset.
- To pay for taxpayer locator services. Section 19.2 increases the dollar amount that may be used to pay for these services from a maximum of $100,000 a year to a maximum of $150,000 a year.
- To pay for postage or other delivery charges for correspondence relating to collecting overdue tax debts. Section 19.2 sets a dollar limit of $353,000 a year on the amount that may be used to pay for postage and delivery charges.
- To pay operating expenses for Project Collection Tax and the Taxpayer Assistance Call Center.
- To pay the expenses of the Examination and Collection Division related to collecting overdue tax debts.

Consolidate Tax Project Reports

Section 19.3 of the act moves the statutory requirement that the Department of Revenue report on its efforts to collect tax debts and on its use of the proceeds of the collection assistance fee from G.S. 105-243.1 to G.S. 105-256. G.S. 105-256(a) contains a list of the reports the Department must provide. This section adds the report of its collection efforts to this list.

Special Indebtedness Projects

Section 23.12 of the act authorizes the issuance of special indebtedness to finance the capital facility costs, including construction or renovation, of the following projects and in the following amounts:

- North Carolina Museum of Art - $40 million.
- Central Regional Psychiatric Hospital for the Department of Health and Human Services - $20 million.
- A new Secondary State Data Center - $24,841,300.
- A new Center City Classroom Building at the University of North Carolina-Charlotte - $45,827,400.

---

[21] Section 22.6 of S.L. 2005-276 amended the law to provide that the amount of the collection assistance fee would be the actual cost of collection, not to exceed 20% of the amount of the overdue tax debt. However, Section 37 of S.L. 2005-345 subsequently repealed this section, leaving the amount of the collection assistance fee at 20% of the amount of the overdue debt.

- The Department of Health and Human Services Public Health Laboratory and Office of Chief Medical Examiner - $101 million.
- The Eastern Regional Psychiatric Hospital for the Department of Health and Human Services - $145 million. The indebtedness must be incurred over a period of time: no more than $20 million may be incurred prior to July 1, 2007; and no more than $100 million may be incurred prior to July 1, 2008.
- The Regional Medical Center and Mental Health Center of the Department of Correction - $132,200,000. The indebtedness must be incurred over a period of time: no more than $8.2 million may be incurred prior to July 1, 2007; no more than $58.2 million may be incurred prior to July 1, 2008; and no more than $98.2 million may be incurred prior to July 1, 2009.
- The Western Regional Psychiatric Hospital for the Department of Health and Human Services - $162.8 million. However, no indebtedness may be incurred prior to July 1, 2008.

Reduce Sales Tax Rate Early

Section 24.1 of the act provides for an earlier reduction of the State sales tax rate from 4.5% to 4.25%, effective December 1, 2006. Prior to October 16, 2001, the general rate of State sales tax was 4%. Effective October 16, 2001, the general rate was raised to 4.5%. The general rate was set for reduction back to 4% on July 1, 2007. This section moved up the date of reduction of the State sales tax to 4.25% from July 1, 2007, to December 1, 2006. The remaining quarter-cent will expire as scheduled on July 1, 2007. The cost of the early sales tax reduction is estimated at $140.1 million for 2006-07.

Reduce Income Tax Rate Applicable to Most Small Businesses Early

Section 24.2 of the act provides for an earlier reduction in the upper-income individual tax bracket rate than provided under previous law. The rate will be reduced from 8.25% to 8%, effective for taxable years beginning on or after January 1, 2007.[22] The rate will then be further reduced to 7.75% in 2008 as provided under previous law. In 2001, the General Assembly added a new tax bracket that imposed an additional one-half percent income tax (a total rate of 8.25%) on certain North Carolina taxable income for three years. In 2003 the General Assembly extended the rate to 2006[23] and in 2005 the General Assembly extended the rate until 2008.[24] The change was estimated to affect approximately 2% of North Carolina taxpayers. The anticipated impact of this change on General Fund revenues is a one-time reduction of $28.6 million in non-recurring revenues in FY 2006-07.

---

[22] The Governor's budget recommended a phase down of the upper income tax rate to 8% in 2006 and the elimination of this bracket in 2007.

[23] S.L. 2003-284, Section 39.1.

[24] S.L. 2005-276, Section 36.1.

Prior to 2001, tax was imposed at the following rates on individuals' North Carolina taxable income:

Tax Rate	Married filing jointly	Heads of household	Single filers	Married filing separately
6%	Up to $21,250	Up to $17,000	Up to $12,750	Up to $10,625
7%	Over $21,250 and up to $100,000	Over $17,000 and up to $80,000	Over $12,750 and up to $60,000	Over $10,625 and up to $50,000
7.75%	Over $100,000	Over $80,000	Over $60,000	Over $50,000

The 2001 law created a fourth tax bracket for North Carolina taxable income as follows:

Tax Rate	Married filing jointly	Heads of household	Single filers	Married filing separately
8.25%	Over $200,000	Over $160,000	Over $120,000	Over $100,000

Cap Variable Wholesale Component of Motor Fuels Tax Rate and Hold Highway Fund Harmless

A motor fuel excise tax is imposed on all motor fuel sold, distributed, or used in the State. The rate of tax consists of a flat rate of 17.5¢ per gallon plus a variable wholesale component equal to the greater of 7% of the average wholesale price of motor fuel during a base six-month base period or 3.5¢ per gallon. The variable wholesale rate for the period of January 1, 2006, through June 30, 2006 was 12.4¢ per gallon, and the total rate was 29.9¢ per gallon. One-half cent per gallon of the excise tax is allocated to various environmental funds. Of the remaining excise tax revenue, 75% goes to the Highway Fund and 25% goes to the Highway Trust Fund.

Section 24.3 of the act caps the variable wholesale component of the motor fuel excise tax rate at its current rate of 12.4¢ per gallon for the period of July 1, 2006, through June 30, 2007. In addition, Section 2.2(g) of the act provides a reserve in the General Fund for the purpose of holding harmless the Highway Fund and the Highway Trust Fund in the event that the variable wholesale component of the excise tax would have exceeded 12.4¢ per gallon, if it were not capped.[25] If the calculated variable component of the motor fuel excise tax rate exceeds the cap, the State Treasurer is directed to transfer funds, on a monthly basis, from the reserve account to the Highway Fund and the Highway Trust Fund. The amount transferred is the difference between the amount of motor fuel excise tax revenue allocated to each of those funds for a month and the amount that would have been allocated to it if the variable wholesale component were not capped at 12.4¢ per gallon. The total amounts that may be transferred to the Highway Fund and the Highway Trust Fund are limited to $17.6 million and $5.7 million, respectively. Funds remaining in the Reserve for Motor Fuels Tax Ceiling on June 30, 2007 revert to the Savings Reserve Account within the General Fund on that date.

These two sections became effective July 1, 2006.

---

[25] The amount allocated to the environmental funds is not affected because that amount depends on the number of gallons sold.

Small Business Health Insurance Tax Credit

Section 24.4 of the act creates a new tax credit for small businesses that provide health benefits to their eligible employees. A 'small business' is defined as a taxpayer that employs no more than 25 full-time employees. An 'eligible employee' is one that works a normal workweek of 30 or more hours. In order to be eligible for the credit, either (1) the business must pay at least 50% of the premiums for health insurance coverage that equals or exceeds the minimum provisions of the basic health care plan of coverage recommended by the Small Employer Carrier Committee, or (2) the employee has existing coverage under one or more of the following: Medicare; Medicaid; a government funded program; or a health insurance or benefit arrangement that provides benefits similar to or in excess of benefits provided under the basic health care plan.

The credit amount is equal to $250 per employee whose total wages or salary received from the business does not exceed $40,000 annually, not to exceed the taxpayer's cost of providing the health insurance benefit. The taxpayer may use the credit against either its income tax or its franchise tax liability. The credit may not exceed 50% of the taxpayer's tax liability. Any unused portions of the credit may be carried forward for five years. The credit is effective for taxable years beginning on or after January 1, 2007, and it expires for taxable years beginning on or after January 1, 2009.

Under the Internal Revenue Code, an employer may deduct premiums paid for health insurance cost of its employees as a business expense. This credit would be in addition to any expense deduction the taxpayer claimed on its income tax return for health insurance costs.

Expand Definition of Development Zone

Section 24.5 of the act expands the definition of a development zone to include an economic development and training district. Location in a development zone leads to more favorable treatment for the taxpayer under the Bill Lee Act with respect to the wage standard, the credit for creating new jobs, the credit for investing in machinery and equipment, and the credit for worker training and could result in extending the availability of the credits if certain other criteria are met with respect to a project. The effective date of this change is retroactive for taxable years beginning on or after January 1, 2004.

The General Assembly provided for the creation of economic development and training districts in 2003.[26] An economic development and training district may be created for the purpose of providing a skills training center to prepare county residents to perform manufacturing, research and development, and related service and support jobs in the pharmaceutical, biotech, life science, chemical, telecommunications, and electronics industries. A county may levy property taxes within a district, in addition to those levied throughout the county, in order to finance the skills training center. A municipality cannot annex property within a district. The 2003 legislation provided that if the Board of Commissioners of Johnston County elected to establish an economic development and training district, then the district as initially established would consist of certain described real property owned by Bayer Corporation, Novo Nordisk Pharmaceutical Industries, Inc., Fresenius Kabi Clayton, L.P., and the Johnston County Airport Authority. The Johnston County commissioners created such a district.

The companies expanding in that economic development and training district understood they would be eligible for the Bill Lee tax credits applicable to a development zone. In retrospect, the

---

[26] S.L. 2003-418.

property included in the district did not meet the requirements of a development zone. This act expands the definition of a development zone to include this property.

Extend Sunsets on Sales and Use Tax Refunds for Aviation Fuel

Section 24.6 of the act extends the sunset for refunds of the State sales and use tax on fuel used by interstate passenger air carriers and on aviation fuel used by a professional motorsports racing team or a motorsports sanctioning body from January 1, 2007, to January 1, 2009. This section became effective when the Governor signed it into law on July 10, 2006. The extension of the sunset is expected to reduce General Fund revenues by $90,000 in fiscal year 2006-2007.

In 2005, the General Assembly added a new refund allowable to interstate passenger air carriers for the net amount of sales and use tax paid by them on fuel during a calendar year in excess of $2,500,000. That same year, the General Assembly enacted a refund for motorsports racing teams and motorsports sanctioning bodies of the sales and use tax paid by them on aviation fuel used to travel to/from a motorsports event in this State, to travel to a motorsports event in another state from a location in this State, or to travel to this State from a motorsports event in another state. Those refunds became effective on January 1, 2005, and applied to purchases made on or after that date; they were scheduled to expire for purchases made on or after January 1, 2007. Section 24.6 of the act extends the date of expiration to January 1, 2009.

Ethyl Alcohol Tax Credit

Although the title of this section refers to ethyl alcohol, the credit itself applies to either ethyl alcohol or biodiesel. In 2004, the General Assembly created a credit for constructing renewable fuel production facilities. The credit is equal to 25% of the costs of constructing the facility. The credit may be claimed against income tax or franchise tax, is limited to 50% of the amount of tax liability against which it is claimed, and has a carryforward period of five years. That credit was set to sunset for taxable years beginning on or after January 1, 2008.

Section 24.7 of the act does two things. First, it extends the sunset on the credit for constructing renewable fuel production facilities and a related credit for constructing a renewable fuel dispensing facility until 2011. Second, it creates an enhanced credit if the taxpayer invests at least $400 million in three separate facilities over a five-year period. As with the current credit, the enhanced credit cannot exceed 50% of the amount of tax liability. Unlike the current credit, the enhanced credit may be claimed only against the income tax, but has a carryforward period of 10 years. A taxpayer may not claim both credits with respect to the same facility.

Tax Credit for Biodiesel Producer

Section 24.8 of the act provides for a tax credit for certain biodiesel providers. In order to qualify for the credit, the provider must be a producer of biodiesel[27] (as opposed to an importer) that produces at least 100,000 gallons of biodiesel during the taxable year. The amount of the credit is equal to the per gallon excise tax (currently 29.9 cents per gallon) paid by the producer on the biodiesel. The credit may be claimed against income tax or franchise tax, is limited to 50% of the amount of tax liability against which it is claimed, and has a carryforward period of five years. The credit is repealed for taxable years beginning on or after January 1, 2010.

---

[27] For the purposes of this provision, biodiesel is liquid fuel derived in whole from agricultural products, animal fats, or wastes of agricultural products or animal fats. This differs from the definition of biodiesel for motor fuels excise tax purposes in that for motor fuel excise tax purposes the fuel may be derived <u>in part</u> from one of those substances.

Research and Development Sales Tax Changes

Mill machinery is taxed at a 1% rate with an $80 cap per article.[28] Research and development equipment is subject to the 7% State and local sales tax rate. Section 24.9 of this act, as amended by Section 12 of S.L. 2006-196, exempts research and development equipment from State and local sales and use tax and imposes a 1% privilege tax with an $80 cap, thus affording this type of equipment the same tax treatment as mill machinery. In order to qualify, the equipment must meet all of the following requirements:

- Purchased by a research and development company in the physical, engineering, and life sciences that is included in industry 54171 of NAICS.[29]
- Capitalized by the taxpayer for tax purposes under the Code.
- Used by the taxpayer in the research and development of tangible personal property.
- Would be considered mill machinery if it were purchased by a manufacturing industry and is used in the research and development of tangible personal property manufactured by the industry.

This section becomes effective July 1, 2007.

Sales and Use Tax Refund for Motorsports Racing Teams

Section 24.10 of the act provides a sales and use tax refund for a professional motorsports racing team for purchases of professional motor racing vehicle component parts other than tires or accessories. The amount of the refund is equal to 50% of the sales and use tax paid. This section becomes effective July 1, 2007, and applies to purchases made on or after that date. A professional motorsports racing team is a racing team (1) operated for profit (2) that obtains the majority of its revenue from sponsorship of the racing team and prize money and (3) that competes in at least 66% of the races per season sponsored by a motorsports sanctioning body. In 2005, the General Assembly enacted a refund for motorsports racing teams[30] and motorsports sanctioning bodies of the sales and use tax paid by them on aviation fuel used to travel to or from a motorsports event in this State, to travel to a motorsports event in another state from a location in this State, or to travel to this State from a motorsports event in another state.

Joint Filing Options

Prior to this act, a married couple who filed a federal joint return was required to file a North Carolina joint return if each spouse was either a resident or had North Carolina income. If one spouse was a nonresident and had no North Carolina income, that spouse was not subject to North Carolina income tax and the other spouse was required to file a separate return. This requirement is based on the fact that North Carolina has no jurisdiction to tax a person who is not a resident and does not have income from North Carolina sources. However, this approach

---

[28] Prior to January 1, 2006, mill machinery was subject to a 1% State sales tax with an $80 cap per article. Last session, to comply with the uniform rate requirements of the Streamlined Sales and Use Tax Agreement, the General Assembly exempted mill machinery from the sales tax and began imposing a 1% privilege tax with an $80 cap.

[29] 'NAICS' is the North American Industrial Classification System. It divides businesses into categories based on the primary activity that occurs at an establishment.

[30] Section 24.6 of this act inserts the defined term 'professional motorsports racing team' in the refund provisions for aviation fuel.

can be burdensome and complicated because the couple must recompute their income separately in order to file a North Carolina return.

Section 24.11 of the act, which originated as a Revenue Laws recommendation[31] provides a married couple with the option of filing jointly if they file a federal joint return and if one spouse is a nonresident with no income from North Carolina. Because North Carolina does not have jurisdiction over the nonresident spouse, the act permits, but does not require, a joint return.[32] This option would also allow North Carolina residents to file jointly in Georgia and South Carolina. Currently, these two states do not allow nonresident joint filing for residents of states that do not allow joint filings for Georgia and South Carolina residents.

This provision is effective for taxable years beginning on or after January 1, 2006.

Parental Savings Trust Fund Tax Deduction

Section 24.12 of the act allows an individual taxpayer to deduct from the taxpayer's taxable income a maximum amount of $750 contributed by the taxpayer to an account in the Parental Savings Trust Fund. A married couple filing jointly may deduct a maximum of $1,500. To qualify for the deduction, the adjusted gross income of the individual taxpayer or married couple filing jointly must not exceed a specified amount.[33] The deduction is effective for taxable years beginning on or after January 1, 2006, and is repealed for taxable years beginning on or after January 1, 2011. For taxable years beginning on or after January 1, 2007, the deduction for an individual taxpayer is increased to a maximum of $2,000 and the deduction for a married couple filing jointly is increased to a maximum of $4,000.[34] The Parental Savings Trust Fund Tax deduction is repealed for taxable years beginning on or after January 1, 2011.
