In 1996, the General Assembly established the Parental Savings Trust Fund. The Fund is maintained by the State Education Assistance Authority, a political subdivision of the State, and is administered by the College Foundation of North Carolina as agent of the Authority. The Fund was established to enable qualified parents to save funds to meet the costs of the postsecondary education expenses of eligible students. Anyone may contribute to the Fund. Because the Fund meets the qualifications of a qualified tuition program under Section 529 of the Internal Revenue Code, distributions from the Fund are excludable from taxable income to the extent the distributions are used to pay for qualified higher education expenses.[35] Interest earned on the Fund is also tax exempt. Currently every state offers a state Section 529 plan, and twenty-five states allow for a full or partial income tax deduction for contributions to the state's own plan.

The Parental Savings Trust Fund deduction allowed by Section 24.12 of this act must be added back to taxable income if the amount withdrawn from the Fund was not used to pay for qualified

---

[31] Senate Bill 1552, 2006 Regular Session of the 2005 General Assembly.

[32] A New York court found that a provision, which required married nonresidents to file a joint nonresident tax return in New York if they filed a joint federal return, was unconstitutional. The court explained that the provision exposed a nonresident spouse with no New York connections to civil and criminal liability in New York by virtue of that spouse's signature on the State tax return.

[33] The deduction from taxable income is allowed for taxpayers with adjusted gross income below the following amounts: $60,000 for a single taxpayer, $100,000 for married, filing jointly, $80,000 for head of household, or $50,000 for married, filing separately.

[34] Section 27 of S.L. 2006-198.

[35] Qualified higher education expenses are: (1) tuition fees, books, supplies, equipment required for the enrollment or attendance of a beneficiary at an eligible educational institution, and expenses for special needs services; and (2) room and board costs.

higher education expenses of the designated beneficiary. An exception is made if the withdrawal was made due to the death or permanent disability of the beneficiary.

The Parental Savings Trust Fund deduction is estimated to reduce General Fund revenues by $1 million in fiscal year 2006-2007, and $1.6 million in fiscal year 2007-2008.

Sales Tax on Railroad Cars

Section 24.13(a) of the act provides that when a lease or rental agreement requires periodic payments for a railway car that is leased by a utility company and the railway car would be considered transportation equipment if it were in interstate commerce, the periodic payments are sourced according to the following general sourcing principles set out in G.S. 105-164.4B(a) for sales tax purposes:

- When a purchaser receives the product at the business location of the seller, the sale is sourced to that business location.
- When the product is delivered to an address specified by the purchaser, the sale is sourced to the location where the purchaser received the product.
- When the delivery address is unknown, the sale is sourced to the first address or location listed below that is known to the seller:
    - The business or home address of the purchaser.
    - The billing address of the purchaser.
    - The address from which tangible personal property was shipped.

Section 24.13.(a) became effective July 1, 2006, and applies to lease or rental payments made on or after that date.

Section 24.13.(b) of the act provides utility companies with the same refund for a portion of sales and uses taxes paid on purchases of railway cars and accessories that is currently available to interstate carriers for those same purchases.[36] The formula for calculating the refund is based on the number of miles that the applicant operated the railway cars in the State as compared to the total miles, both inside and outside the State, multiplied by the purchase price. The product is then multiplied by the tax rate that would have applied if all of the items had been purchased in this State. The formula for calculating the refund and the procedures for claiming the refund are identical to the formula and procedures set out for interstate carriers in the current law. Section 24.13(b) became effective July 1, 2006, and applies to purchases made on or after that date.

Section 24.13 is estimated to reduce General Fund revenue by $370,000 in fiscal year 2006-2007.

During the 2005 Session, the General Assembly increased the sales and use tax rate of railway cars and locomotives from a 3% rate, with a cap of $1,500 per item, to the 7% general rate in order to comply with the Streamlined Sales Tax Agreement. At the same time the General Assembly authorized interstate carriers to receive a refund of a portion of the sales and use taxes paid on purchases of railway cars and locomotives, as well as fuel, lubricants, repair parts, and accessories for these vehicles. Prior to Section 24.13 of this act, utility companies were not considered

[36] G.S. 105-164.14 defines an 'interstate carrier' as a person who is engaged in transporting persons or property in interstate commerce for compensation.

interstate carriers for purposes of this refund, even though utility companies often purchase railway cars to transport coal used to generate electricity.

Wage Standards – Certain Manufacturers

Section 24.14 of the act alters the definition of 'location' with respect to certain manufacturers for the purpose of meeting the wage standard under the Bill Lee Act. This change is effective retroactively for taxable years beginning on or after January 1, 1996.

A taxpayer is eligible for a credit under the Bill Lee Act only if the jobs provided by the taxpayer meet a wage standard.[37] For the credit for job creation, the average weekly wage of the jobs for which the credit is claimed and the average weekly wage of all jobs at the location with respect to which the credit is claimed must meet the relevant wage standard. For the other credits, the average weekly wage of all jobs at the location with respect to which the credit is claimed must meet the relevant wage standard. The term 'location' is not defined in the statute, but the Department of Revenue has interpreted 'location' to be synonymous with 'establishment' for the purpose of applying the wage standard.

This section modifies the definition of 'location' with respect to certain manufacturers. For a fiber, yarn, or thread mill that uses a sequential manufacturing process, the term could mean either a single facility or all facilities located within a single county that were part of the sequential manufacturing process. At least one taxpayer that qualifies as a fiber, yarn, or thread mill that uses a sequential process would become eligible for credits under the Bill Lee Act based on this change. American & Efird, located in Gaston County, undertook activities for which it would have been eligible for credits during the 1996 tax year if it had met the wage standard. The company failed to satisfy the wage standard at each individual facility, but would have satisfied the standard if all the facilities were treated as one location. There are no other known taxpayers that will benefit from this change.

Real Property Tax Donation Credit

In 2001, the General Assembly moved to conform North Carolina law to federal law regarding a partnership's eligibility for certain tax credits. Now, North Carolina law states that a dollar amount limitation on a tax credit applies to a partnership as a whole as well as to each individual partner. When this change was made, the General Assembly voted to delay its imposition of the dollar amount limitation on the credit allowed for real property donations. The credit for real property donations is allowed when a person makes a qualified donation of an interest in real property that is useful for public beach access, public access to public waters or trails, fish and wildlife conservation, or other similar land conservation purposes. The credit is equal to 25% of the fair market value of the donated property interest. To be eligible for the credit, the interest in property must be donated to and accepted by the State, a local government, or a body that is both organized to receive and administer lands for conservation purposes and qualified to receive charitable contributions under the Internal Revenue Code. The credit amount may not exceed $250,000. Originally, that delay was set to expire in 2005. In 2004, the time period for that delay was extended by one year. Section 24.15 of the act extends that delay another year until 2007. This act also directs the Revenue Laws Study Committee to study this issue before the 2007 General Assembly.

[37] Legislation in 2002 eliminated the wage standard in enterprise tier one and two areas. Because the wage standard for a business located in a development zone is the same as for tier one counties, that legislation also eliminated the wage standard for a development zone area.

Agrarian Growth Zones – Bill Lee

Section 24.16 of the act authorizes the creation of agrarian growth (AG) zones and provides for favorable treatment of the zones under the Bill Lee Act. This section is effective for taxable years beginning on or after January 1, 2006, and applies to business activities occurring on or after that date.

An AG zone must satisfy the following conditions: it must be composed of contiguous census tracts or block groups located within a single county that does not have any municipality with a population in excess of 10,000; each census tract or block group in the zone must have more than 20% of its population below the poverty level; the area of the zone, less its smallest census tract, may not exceed 5% of the total area of the county. The Department of Commerce must designate an area as an AG zone upon the request of a local government.

For the most part, the benefits of an AG zone are the same as the benefits of a development zone. For activities that are performed in an AG zone, the taxpayer does not have to meet the wage standard requirement, receives an additional credit of $4,000 per job created, and is treated as an enterprise tier one area for purposes of the credit for investing in machinery and equipment and the credit for worker training. There are several provisions of the Bill Lee Act which refer to development zones that were put into place for specific projects; those provisions are not repeated for AG zones. [38]

Internet Data Center Facilities – Tax Exemption

Section 24.17 of the act provides an exemption from the sales and use tax on sales of tangible personal property and electricity to an eligible Internet data center. The section is effective for sales made on or after October 1, 2006.[39]

Generally, sales of tangible personal property are taxed at a State rate of 4.5% and the applicable county rate (generally 2.5%, but 3.0% in Mecklenburg County). Sales of electricity are taxed at rates varying from 0.17% to 3.0% depending on the purchaser of the electricity. Sales of electricity to an Internet data center would be taxed at 3.0%.

This section allows for an exemption from the sales and use tax for sales of electricity and eligible business property to an eligible Internet data center. For the purposes of this exemption, 'eligible business property' is property that is capitalized for tax purposes under the Internal Revenue Code and is used for one or more of the following:

- The provision of Internet service or Web search portal services, including equipment cooling systems for managing the performance of the property.
- The generation, transformation, transmission, distribution, or management of electricity.
- To support related computer engineering or computer science research.

[38] AG zones are included in the replacement of the Bill Lee Act but the incentives offered under it differ from the incentives available under the current Bill Lee Act. The replacement of the Bill Lee Act becomes effective for taxable years beginning on or after January 1, 2007. See the summary of S.L. 2006-252 for an explanation of how AG zones will be treated under the new law.

[39] S.L. 2006-168 made technical changes to this section of the act.

In order to qualify as an eligible Internet data center, a facility must satisfy each of the following conditions:

- The facility is used primarily by a business engaged in Internet service providers and Web search portals industry 51811 as defined by NAICS.[40] Under NAICS, establishments in this industry provide clients access to the Internet or operate Web sites that use a search engine to provide Internet search services. These establishments generally provide related services such as Web hosting, Web page design, and additional Internet services such as email, connections to other Web sites, auctions, news, and other limited content.
- The facility is comprised of a structure or series of structures on a single parcel of land or on contiguous parcels of land owned by the operator of the facility.
- The facility is located in an enterprise tier one, two, or three area at the time of the application for the required determination by the Department of Commerce.[41]
- The Department of Commerce has made a written determination that at least $250 million in private funds has been or will be invested in real property, eligible business property, or both at the facility within five years after the commencement of construction of the facility.

A taxpayer that fails to make the level of investment required for qualification forfeits the exemption and is required to repay all taxes, with interest, avoided as a result of the forfeited exemption. Similarly, a taxpayer that does satisfy the investment amount, but fails to use the property or electricity at the eligible facility forfeits the exemption with respect to that particular property or electricity. The past taxes and interest are due 30 days after the date of the forfeiture.

Oyster Shell Tax Credit

Currently, there is a voluntary oyster shell donation program operated by the Division of Marine Fisheries of the Department of Environment and Natural Resources. The Division of Marine Fisheries purchases oyster shells in very large quantities from shucking houses at a negotiated price of 50¢ per bushel. Recycled oyster shells offer the following value: (1) their placement in sanctuaries and/or estuaries aid in the restoration of oyster populations; (2) landscaping purposes; and (3) nutritional supplements. Beginning October 1, 2009, oyster shells may not be disposed in landfills.

Section 24.18 of the act provides for a nonrefundable income tax credit of one dollar for each bushel[42] of oyster shells that a taxpayer donates to the Division of Marine Fisheries of the Department of Environment and Natural Resources. To be eligible for the credit, the taxpayer must provide the Department of Revenue with documentation, supplied by the Division of Marine Fisheries, verifying the donation and the number of bushels donated. The credit may be carried

---

[40] NAICS is the North American Industrial Classification System and divides businesses into categories based on the primary activity that occurs at an establishment.

[41] Effective January 1, 2007, S.L. 2006-252 changes the references to enterprise tiers one, two, or three areas to development tier one and two areas.

[42] The Division of Marine Fisheries has determined that the average weight of a bushel of oyster shells is 55 pounds. The net weight of a load of shells is divided by 55, which provides the number of bushels contained in the load.

forward for five years. The taxpayer may not claim a deduction for any oyster shells for which a credit is claimed.

Reduce Sales Tax on Electricity Sold to Manufacturers

Effective for sales made on or after July 1, 2007, Section 24.19 of the act replaces the current sales tax rate of 2.83% on sales of electricity to manufacturing industries and manufacturing plants for use in connection with their operation, with a sales tax rate of 2.6%. As under current law, the reduced rate will be applied to the sales price of electricity that is measured by a separate meter or another separate device.

Under current law, the following sales of electricity are subject to a sales and use tax rate of 2.83%:

- Sales to farmers to be used for any farm purposes other than preparing food, heating dwellings, and other household purposes.
- Sales to manufacturing industries and manufacturing plants for use in connection with their operation.
- Sales to commercial laundries or to pressing and dry-cleaning establishments for use in machinery used in the direct performance of their service.

Sales of electricity to an aluminum smelting facility are taxed at the rate of 1%, but this rate expires for sales made on or after October 1, 2007.

No Sales Tax Refund for Alcohol Purchases

Section 24A.1 of the act disallows sales and use tax refunds for purchases of alcoholic beverages, effective July 1, 2006. The impact on General Fund revenues is expected to be negligible. North Carolina has authorized certain sales and use tax refunds if qualifying requirements are met. These refunds are codified in G.S. 105-164.14. This section of the act removes purchases of alcoholic beverages from those purchases that qualify for a refund. An alcoholic beverage is one that contains at least one-half of 1% alcohol by volume, including malt beverages, unfortified wine, fortified wine, spirituous liquor, and mixed beverages.

Franchise Tax Loophole Closing

Section 24A.2 of the act adds language to the revenue statutes to close another franchise tax loophole.[43] Subsection (a) of Section 24A.2 amends the definition of 'corporation', as it applies to the franchise tax statutes, to include a limited liability company[44] (LLC) that elects to be taxed as a C Corporation for federal income tax purposes. The effect of this change is that the corporate franchise tax will apply to these LLCs.[45] Subsection (b) makes conforming changes to the LLC

[43] The North Carolina franchise tax is among the oldest taxes in North Carolina. It is a tax on S Corporations and C Corporations for the privilege of doing business in the State. The tax rate is $1.50 per $1,000 of value of the greatest of (1) apportioned net book value of the corporation; (2) 55% of appraised value of real and tangible personal property in the State; or (3) total actual investment in tangible property in the State.

[44] A limited liability company is a business entity that is essentially a hybrid of a partnership and a corporation. Like a corporation, an LLC limits the liability of its owners. Like a partnership, an LLC is usually not subject to entity-level taxation.

[45] Section 9 of S.L. 2006-196 makes a conforming change to the definition of 'holding company' to recognize that LLCs do not have voting stock but capital interests. Prior to this change, a holding company was defined as a corporation that receives during its taxable year more than 80% of its gross income from

statute, G.S. 105-114.1, to provide that LLCs that do not elect to be taxed as a C Corporation will be considered 'noncorporate LLCs' and will be subject to the attribution rules in this statute for franchise tax purposes. Subsection (c) provides LLCs that elect to be taxed as a C Corporation a nonrefundable credit for the difference between the annual report fee for corporations, which is $20, and the annual report fee for LLCs, which is $200.

The above changes were a recommendation of the Revenue Laws Study Committee and originated as the result of at least one request for a private ruling from a major accounting firm. Based on this request, the Department of Revenue identified another scenario that could result in a corporation's avoidance of paying franchise tax. This scenario would involve a corporation headquartered in North Carolina, but whose parent company is domiciled outside the State. In addition, the parent's only contact with North Carolina is its ownership of the corporation. This corporation, which already files as a C Corporation for federal tax purposes, could convert to an LLC but make an election to continue being taxed as a C Corporation and avoid franchise tax because the parent has no nexus with this State and thus the 'constructive ownership' attribution rules do not apply.[46]

Previous law provided that an LLC could be disregarded and treated as a division of its parent. The parent company was then considered to own property in this State and therefore had nexus, making it subject to income and franchise tax. The constructive ownership rules, therefore, applied for attributing the LLC's assets to the parent's franchise tax calculation. However, when an LLC elects to be taxed as a C Corporation, nexus is not conferred on the parent, and the attributes of the LLC do not flow to the parent. Prior to this act, companies operating in this State as C Corporations could convert to an LLC, make an election to file as a C Corporation, as they always have, and eliminate their North Carolina franchise tax obligations.

This section is effective for taxable years beginning on or after January 1, 2007. The fiscal impact cannot be determined.

Expansion of Royalty Reporting Option

---

corporations in which it owns more than 50% of the outstanding stock. Section 9 adds language to the definition to include a corporation that receives more than 50% of the outstanding voting capital interests, since the holding company cap was intended to apply to LLCs that elect to be treated as C Corporations.

[46] Under current law, the franchise tax extends to all LLC assets that a corporation controls through trusts and other entities, with some limitation. Specifically, a corporation (or an affiliated group of corporations) must own more than 50% of the capital interest in an LLC for the attribution rules to apply, and LLCs whose assets do not exceed $150,000 are exempt. The concept of control is determined by tracing ownership of the capital interests in the LLCs assets. A capital interest is the right to receive some or all of the assets under the LLC's governing law if the LLC was dissolved. Ownership of the capital interests in an LLC is traced, using the principles of constructive ownership, through any noncorporate entities. The chain of constructive ownership can run through layers of noncorporate entities but not through individuals. The franchise tax is payable by corporation or affiliated group of corporations to which ownership of the capital interests is traced. Ownership of capital interests in an LLC is determined as of the last day of the LLC's tax year. If an LLC and a corporation engage in a pattern of trading assets back and forth so that neither owns them on the respective trigger date, the Secretary may require the determination to be made as of the last day of the corporation's tax year. If the capital interests in an LLC are owned by an affiliated group of corporations, the value of the assets is allocated among the members of the group for franchise tax purposes so that there will not be double taxation of any assets. The allocation is in proportion to each affiliate's ownership interest.

In 2001, the General Assembly enacted G.S. 105-130.7A to enhance corporate compliance with taxes on trademark income. This statute did not change what was already considered taxable but merely enhanced compliance with the State tax on income generated from using trademarks and added a reporting option to the income tax statute. Specifically, G.S. 105-130.7A restates that a company's receipts from royalty payments for the use of trademarks in North Carolina are income from doing business in North Carolina. It provides adjustments to assure full and fair accountability of this income in relationship to where it is actually earned. In cases where the recipient of the North Carolina royalty income is unrelated to the payer, the recipient is required to pay tax on the income to North Carolina. In cases where the recipient and the payer are related, they have an option on how the income is reported to North Carolina. Either the payer can deduct the North Carolina royalty payments on its North Carolina return and the recipient can include them on its North Carolina return, or the payer can add them to its North Carolina income and the recipient can deduct them on its North Carolina return.

This provision solved the problem as it relates to trademarks and trade names, but it did not address other types of intellectual property, such as patents[47] and copyrights.[48] Section 24A.3 of the act expands the royalty payment reporting option for corporations and their related members to include payments received for use of patents and copyrights. As with the changes that occurred in 2001, this provision does not subject any income to tax that was not already taxable, it gives taxpayers an option of how to pay the tax. This provision is effective for taxable years beginning on or after January 1, 2006.

FRANCHISE TAX BASE CALCULATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-95	**SB 1283**	**Senator Hartsell**

AN ACT TO CLARIFY THE TREATMENT OF DEFERRED TAX ASSETS IN THE COMPUTATION OF THE FRANCHISE TAX CAPITAL BASE AND TO INCREASE THE ADMINISTRATIVE EFFICIENCY OF THE UNIVERSITY OF NORTH CAROLINA BY EXEMPTING IT FROM LAWS GOVERNING CONSULTANT SERVICES, ALLOWING THE BOARD OF GOVERNORS TO DELEGATE MORE AUTHORITY TO THE PRESIDENT OF THE UNIVERSITY OF NORTH CAROLINA, AND CHANGING ITS REPORTING DATES.

OVERVIEW: This act seeks to clarify the treatment of deferred tax assets in the computation of the franchise tax capital base. It also increases the efficiency of The University of North Carolina

[47] A patent for an invention is the grant of a property right to the inventor that gives the inventor the right to exclude others from making, using, offering for sale, selling or importing the invention for a specified period of time.

[48] Copyright is a form of protection provided under federal law to the authors of original works of authorship, including literary, dramatic, musical, artistic, and certain other intellectual works, both published and unpublished.

by exempting it from laws relating to consultant services and allowing the Board of Governors to delegate more authority to the President of The University of North Carolina.

FISCAL IMPACT: Discussions with the Department of Revenue indicate that the impact of this act will be minimal.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act became effective when signed into law by the Governor on July 10, 2006. The portions of this act relating to the franchise are effective for taxable years beginning on or after January 1, 2007.

ANALYSIS: The act clarifies the franchise tax base calculation, based upon a recommendation of the Revenue Laws Study Committee. The act also seeks to increase the administrative efficiency of The University of North Carolina, at the request of the University system.

Franchise Tax Base Calculation

A corporation's determination of its capital base for purposes of the franchise tax is not the same as the calculation of its capital base for financial reporting purposes. Most public corporations compute their capital base for financial reporting purposes. Public corporations must comply with the requirements of the Financial Accounting Standards Board (FASB) when reporting the results of their operations and financial positions. Under FASB, corporations are required to accrue certain liabilities and the related deferred tax assets[49] which are applicable to those accrued liabilities in order to accurately reflect the financial position of the corporation.

The calculation of a corporation's capital base for franchise tax purposes is determined by G.S. 105-122(b), not by the requirements of FASB. The statute refers to book value as 'issued and outstanding capital stock, surplus, and undivided profits'[50] This is similar to net book value, which is used in computing the capital base under FASB, with certain adjustments. The principal adjustment is for contingent or deferred liabilities.

Under FASB, deferred tax liabilities are recognized as liabilities for accounting purposes. However, deferred liabilities are not recognized for franchise tax purposes because they are not 'definite and accrued'. Therefore, deferred tax liabilities must be added back to a corporation's capital base for franchise tax purposes.

Frequently, a taxpayer that has a deferred liability will also have a deferred tax asset. The issue is whether the deferred liability that must be added-back can be reduced by the amount of the deferred tax asset. In 1996, the Department of Revenue issued a TAM (technical advice memorandum) that permitted the netting of deferred liability accounts and deferred tax asset accounts. The TAM provided that the deferred tax asset account had to be clearly identified with the deferred tax liability account and the deferred tax asset could not reduce the related deferred liability below zero.

---

[49] Deferred tax assets and deferred tax liabilities are accounts carried on the books of a corporation for financial reporting purposes. They represent timing differences in the recognition of income and deductions for income tax purposes and for financial accounting purposes. Deferred tax liability typically arises where income has been recognized on the corporation's books but not for tax purposes. For example, where a gain is reflected on the books but reported for tax purposes on the installment basis.

[50] In addition, for franchise tax purposes, the corporation's capital base may not be less than 55% of the appraised value of all the real and tangible personal property owned by the corporation in the State nor less than its total actual investment in tangible property in the State.

The statute, the 1996 TAM, and generally accepted accounting principles differ on how to account for deferred tax assets as follows:

- The franchise tax statute began the calculation of a corporation's franchise tax capital base with the 'total amount of its issued stock, surplus, and undivided profit'. The statute provided that "no reservation or allocation from surplus or undivided profits shall be allowed other than for definite and accrued legal liabilities, except as herein provided: taxes accrued, dividends declared and reserves for depreciation of tangible assets as permitted for income tax purposes shall be treated as deductible liabilities."
- In 1992, FASB Statement No. 109 established financial accounting and reporting standards for the effects of income taxes that result from an enterprise's activities during the current and preceding years. The statement resulted in deferred tax assets being separately stated from deferred tax liabilities. When the two accounts were netted, a smaller net tax liability account was added back to the franchise tax base. When the accounts had to be separately stated, the Department did not permit the netting of the two accounts. This resulted in the add-back of the deferred tax liability unreduced by the amount of the deferred tax asset.
- Taxpayers having deferred tax asset accounts contended that they should be allowed to reduce their capital stock bases by the balances in those accounts. Since the asset and liability accounts are reciprocal concepts, they argued that it was inequitable to include a deferred tax liability in the capital stock base without decreasing it by the deferred tax asset.
- The TAM appears to contradict the plain meaning of the statute because it permits the deferred liability accounts to be reduced by deferred tax asset accounts.[51] In explaining the change, the TAM states that a more equitable and consistent position is to recognize that net worth is incorrectly stated when the total amount of a deferred liability is included without a netting adjustment for the deferred tax benefit resulting directly from such liability. The TAM provides that the inclusion of a deferred liability in the computation of the net worth base should permit an offset or adjustment for the deferred tax asset required to be computed under the accounting standards without regard to how the deferred tax asset is reflected on the financial statement.

The FASB change in 1992 concerned the accounting for income taxes. Arguably, the TAM written in 1996 attempted to address the accounting changes precipitated by that FASB change. The wording of the TAM, however, refers to deferred liabilities as a whole instead of just deferred tax liabilities. Any deferred liability may create a corresponding deferred tax asset. Taxpayers contend that the TAM permits them to reduce the amount of any deferred liability required to be added back to its net book value for franchise tax purposes by the amount of a deferred tax asset. Examples of the types of contingent and deferred liabilities that have been reduced include post retirement benefits, loan loss reserves, credit card reserves, and litigation reserves.

This act changes the law to allow deferred tax liabilities to be reduced by their corresponding deferred tax assets. This clarification adopts the policy of the Department of Revenue set out in the TAM in 1996.

Increase Administrative Efficiency of The University of North Carolina

---

[51] In response to taxpayer concerns, the Department of Revenue issued TAM-CF-96-1 in August of 1996. The TAM became effective for tax years ending on or after July 1, 1996.

The changes in this part of the act do the following:

- Exempt The University of North Carolina from the statutes governing contracts for consultant services. The Board of Governors will now be required to establish its own rules governing these contracts.
- Allow the Board of Governors to delegate more authority to the President of The University of North Carolina.
- Change the reporting date of several studies that must be submitted to the Joint Legislative Oversight Committee from March 1 to December 1.

DELINQUENT PROPERTY TAX/INVENTORY/STUDY.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-106	**SB 1451**	**Senator Hartsell**

AN ACT TO ENFORCE COLLECTION OF PROPERTY TAXES ON REAL PROPERTY AGAINST THE RECORD OWNER AS OF THE DATE THE TAXES BECOME DELINQUENT, TO CODIFY THE PRORATION OF TAXES ON REAL PROPERTY, TO REQUIRE A TAX COLLECTOR TO TAKE REASONABLE ADDITIONAL STEPS TO NOTIFY A PROPERTY OWNER OF A TAX SALE UNLESS THE TAX COLLECTOR HAS AFFIRMATIVE KNOWLEDGE THAT THE MAILED NOTICE REACHED THE RECIPIENT, TO AMEND THE DEFINITION OF INVENTORIES TO INCLUDE DISPLAY MODULAR HOMES, AND TO STUDY THE VALUATION OF PROPERTY AT ITS PRESENT-USE VALUE FOR PROPERTY TAX PURPOSES.

OVERVIEW: This act, part of which was a recommendation of the Revenue Laws Study Committee, makes several changes to the property tax laws to facilitate the collection of delinquent property taxes, to provide a standard for prorating property taxes in real estate closings, and to clarify that certain modular homes qualify as inventory and are, therefore, not subject to tax as real estate. In addition, this act directs the Revenue Laws Study Committee to study issues related to the present-use value property tax system.

FISCAL IMPACT: The act is expected to have minimal to no impact on local revenues and no impact on State revenues.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: In general, this act is effective for taxes imposed for taxable years beginning on or after July 1, 2006, except that Section 7 of this act is effective for contracts entered into on or after October 1, 2006, and Section 9 of this act became effective when signed into law by the Governor on July 12, 2006.

ANALYSIS: Under North Carolina property tax laws, January 1 is the applicable date for each of the following events: determination of the value of real property for tax purposes, listing of the property in the name of the owner on that date, and attachment of a tax lien to the real property.

The owner of property as of January 1 generally receives a property tax bill in July or August for property taxes due on the property for the fiscal year that runs from July 1 of the year the property is required to be listed to the following June 30. Taxes become due and payable on September 1, and are payable at face amount if paid before January 6 following the due date. Taxes are delinquent if paid on or after January 6 following the due date and are subject to interest charges.[52] For example, if a taxpayer lists his or her property on January 1, 2006, then taxes on the property become due on September 1, 2006, for the fiscal year beginning July 1, 2006, and ending June 30, 2007. Taxes on the property are delinquent beginning January 6, 2007.[53]

In February of each year, the tax collector must report to the governing body the total amount of unpaid taxes for the current fiscal year that are liens on real property. After the governing body orders the tax collector to advertise tax liens, the tax collector must send a notice to the record owner of each affected parcel as determined as of December 31 of the fiscal year for which taxes are due. If the property was transferred during the one-year period beginning on the listing date preceding the fiscal year in which the taxes become due, then the notice of tax lien on the property must be sent to each listing owner and to each record owner of the parcel as determined as of December 31 of the fiscal year for which taxes are due. The notice must inform the owners that their names will appear in a newspaper advertisement of delinquent taxes if the taxes are not paid before the publication date. If the listing owner transferred the property after the listing date, the advertisement will state the record owner's name followed by a notation that the property was transferred to the record owner and a notation of the name of the listing owner.

In addition to the remedy of foreclosing on the real property, the taxing unit may also attach and garnish the wages and other compensation, rents, bank deposits, and other intangible personal property of the listing owner of the property. Attachment and garnishment may only be enforced against the listing owner because the pertinent statutes provide that the remedy may be enforced against the taxpayer. Taxpayer is defined in G.S. 105-273(17) as the person whose property is subject to property tax by a county or municipality and any person who has a duty to list property for taxation.

Section 1 of the act amends the definition of 'taxpayer' in the property tax laws so that for purposes of collecting delinquent property taxes assessed on real property, the remedies against personal property may be enforced only against the record owner of the real property on the date the taxes become delinquent and against any subsequent record owner of the real property if conveyed after the delinquent date. This change means that the tax collector would have the authority to garnish the wages, bank account, or other intangible property of the owner of the property at the time the taxes on that property become delinquent and any subsequent record owner instead of the listing owner of the property.

---

[52] For the period January 6 to February 1, interest rate accrues at 2%. For the period February 1 until the date the principal amount of taxes, the accrued interest, and any penalties are paid, interest accrues at the rate of ¾% a month or fraction thereof.

[53] When real property is acquired after January 1, but prior to July 1, and the property was not subject to taxation on January 1 on account of its exempt status, it is listed for tax by the transferee as of the date of acquisition and is appraised at its true value as of January 1 preceding the date of acquisition. The property is taxed for the fiscal year of the taxing unit beginning on July 1 of the year in which it is acquired.

Section 2 of the act provides that the notice of the tax lien be sent to the record owner of the real property as of the date the taxes became delinquent instead of the listing owner. The advertisement of the tax lien would not set out the name of the listing owner, unless the listing owner and owner of record on the delinquent date is the same person.

Sections 3 and 4 of the act make conforming changes to the statutes regarding the change in definition of 'taxpayer' for collection purposes.

Sections 5 and 6 of the act add language to the notice requirements for a tax lien foreclosure and execution sale of property in order to comply with the notice requirements of *Jones v. Flowers,* decided by the U.S. Supreme Court in April, 2006. In that case, mailed notice of a tax sale was returned unclaimed. The Government then published a notice of public sale in the newspaper. The U.S. Supreme Court held that when the government becomes aware prior to selling the property that its notice attempt has failed, then it must take additional reasonable steps to attempt to provide notice to the property owner before selling his property, if it is practicable to do so. The Court suggested that the Government could have mailed the notice by regular mail or posted notice on the property. Sections 5 and 6 of this act require the tax collector to take additional reasonable steps to notify a taxpayer of a pending tax lien foreclosure if the tax collector is aware that the previous notice attempt failed.

Section 7 of the act codifies the practice of prorating property taxes between the seller and buyer of real property on a calendar-year basis, unless the contract states otherwise. It has become common practice in real estate closings to prorate taxes on a calendar year basis rather than a fiscal year basis despite the fact that the taxes are imposed on a fiscal year basis.

Section 8 of the act amends the definition of inventory to include a modular home that is used exclusively as a display model and held for eventual sale at the retail merchant's place of business. 'Modular home' is defined as a factory-built structure that is designed to be used as a dwelling, is manufactured in accordance with the specifications for modular homes under the North Carolina State Residential Building Code, and bears a seal or label issued by the Department of Insurance pursuant to G.S. 143-139.1. This language clarifies that a modular home satisfying the proposed language will be classified as inventory and not taxed as real property.

Section 9 of the act directs the Revenue Laws Study Committee to study the present-use value system. Specifically, this section directs the Committee to study the issue of adding new types of property to the present-use value system and adding additional requirements relating to sound management for property enrolled in the present-use value system.

VIDEO SERVICE COMPETITION ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-151	**HB 2047**	**Rep. Carney, Luebke, McComas, Wainwright**

AN ACT TO PROMOTE CONSUMER CHOICE IN VIDEO SERVICE PROVIDERS AND TO ESTABLISH UNIFORM TAXES FOR VIDEO PROGRAMMING SERVICES.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, provides for equal taxation of video programming services regardless of how the service is delivered and it replaces locally negotiated franchises of cable service provided over a cable system with a State-issued franchise.

FISCAL IMPACT: This legislation does not change the amount of tax assessed on telecommunications, cable, or satellite television services. All these services remain subject to the sales tax at the combined general rate, which is currently 7%. However, this act significantly alters the calculation of the local share of shared sales tax and creates an entirely new distribution method for the local share of shared sales tax collections.

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act becomes effective January 1, 2007.

ANALYSIS: North Carolina began taxing communication services when the technologies enabling the services were separate and distinct technologies and the providers of the services were separate and distinct taxpayers. Over the past several years, the technology used to provide these services has converged so that the line between the services is no longer separate and distinct. The Current Operations and Capital Improvements Appropriations Act of 2005 directed the Revenue Laws Study Committee to study the equity of taxation of providers of cable service, direct-to-home satellite service, satellite digital audio radio service, video programming service, and data service.

The Revenue Laws Study Committee spent a considerable amount of time on this issue.[54] The Committee found that the State taxes these services based upon who provides the service rather than the service itself. Despite the General Assembly's repeated attempts to provide tax equity among these providers, it is debatable whether that has been accomplished. Prior to this act, the following describes how the State taxed various types of communications.

- The State imposes a 7% State sales tax on telecommunication services and it earmarks a percentage of the revenues to cities. The amount each city receives is based upon a per capita statutory formula. State law prohibits counties and cities from imposing local taxes on this service.
- The State imposes a 7% State sales tax on direct-to-home satellite service. Federal law prohibits a local tax on this service and it prohibits local regulation of this service. The tax revenue is not shared with local governments.
- The State imposes a 4.5% State sales tax and a 2.5% local sales tax on digital audio radio service.
- The State imposes a 7% State sales tax on cable service, with a credit equal to the amount of local franchise tax paid on the service. Counties and cities may impose a local franchise tax on this service; the tax may not exceed 5% of gross receipts. Cable service has been subject to local regulation since 1973. The local regulation of cable

[54] The Revenue Laws Study Committee staff met separately with representatives of the cable industry, the telephone industry, the cable administrators, and the counties and cities. It also held a series of four meetings with all the affected parties and solicited comments from the parties on numerous occasions. The staff prepared a survey given to all the local governments in the State to determine their franchise fee collections and other nonmonetary contributions received in accordance with their cable franchise agreements.

service varies from county to county and from city to city, depending on the terms of the locally negotiated agreements. The definition of 'gross receipts' may also vary from agreement to agreement. The cable boxes rented to customers are subject to the State and local sales tax. The gross receipts from the rental of these boxes may also be included in the company's gross receipts for local franchise tax purposes, depending upon how the term is defined in the local agreement.

The Revenue Laws Study Committee acknowledged that the method of taxation should not provide one provider of a service with a competitive advantage over another. The Committee expressed a goal to establish a method of taxation that applies equally to the same service, regardless of who provides it, based on the following principles:

- Equal taxation of the same service.
- A tax system that is easy to administer.
- A tax and regulatory system that does not impede competition.
- Equal compensation to cities for the use of their public rights-of-way.
- Support of PEG (Public access, Education, and Government) channels as a public purpose.

Based upon those principles, it desired a bill that met the following goals:

- Applies the principles stated above.
- Contains no tax or fee increase.
- Preserves local government revenue streams.
- Promotes competition in the marketplace.
- Promotes deployment of broadband as a basic communication tool.

North Carolina is not alone in grappling with the issue of how to tax and regulate telecommunications and video programming services. Congress and other states are considering legislation on this issue. At this time, at least four states have enacted legislation changing the regulation and taxation of telecommunications and video programming services and at least eight other states have legislation pending on the issue.

This act establishes uniform taxes for video programming services and seeks to promote consumer choice. It establishes equal taxation of the same service by applying a State sales tax at the combined general rate to all video programming services, repealing the local authority to impose a local franchise tax, and repealing the sales tax credit allowed to cable companies for local franchise tax paid. It preserves the local government revenue stream by distributing part of the sales tax revenues from telecommunications and video programming services to the counties and cities. The distribution formula is based upon the amount of cable franchise tax imposed during the first six months of fiscal year 2006-2007 plus any subscriber fees imposed during that same period.

The act promotes competition by providing a State franchise process, in lieu of the current locally negotiated franchise agreements. It seeks to ensure competitive neutrality by allowing cable providers to opt-out of existing local agreements when one or more households in the franchise area may be served by both the existing provider and the holder of a State-issued franchise. The

act specifically prohibits discrimination in the provision of video programming services and declares a violation of this law to be an unfair or deceptive trade practice. The holder of a State-issued franchise must comply with customer service and emergency alert requirements established by the Federal Communications Commission. The act designates the Consumer Protection Division of the Attorney General's Office as the State agency to receive customer complaints regarding video programming services.

The act preserves local regulation of public rights-of-way and provides for PEG channel support and growth. The act requires local governments that imposed subscriber fees to use a portion of the amount of revenue distributed to it for PEG channel operation and support and it requires local governments that appropriated money for PEG channels in fiscal year 2005-2006 to continue appropriating that amount of money for PEG channel support. In addition to this mandated funding, the act provides $2 million for supplemental PEG support through direct appropriation for PEG channel support and operation and through grants. The act provides that existing franchise agreements will determine the number, service tier placement, and transmission quality required of PEG channels under a State-issued franchise. In the absence of an existing agreement, the number of PEG channels a county or city may have is determined by the area's population. A local entity may acquire additional PEG channels, with the maximum number of channels set at seven. The act also requires cable service providers to provide free basic service to local public buildings.

State issued franchise. – Section 1 of the act replaces the authorization to counties and cities to award a franchise for cable service with a State franchising authority, effective January 1, 2007. The act provides that a county or city may not award or renew a franchise for cable service after this date. The act designates the Secretary of State as the exclusive franchising authority in the State for cable service provided over a cable system. The terms 'cable service' and 'cable system' track the definitions in federal law. The act requires the franchising of cable service that is required to be franchised under federal law. The act does not expand the services that need to be franchised beyond those currently required to be franchised under federal law.

The State franchise process is one of notice, not regulation. To receive a State-issued franchise, a person must file a notice of franchise with the Secretary of State and pay a fee of $125.[55] A person who files a notice of franchise with the Secretary must begin providing cable service within 120 days after the notice is filed. If service is not provided within this period, the notice of franchise terminates 130 days after it was filed. The notice of franchise must include all of the following:

- The applicant's name, principal place of business, mailing address, physical address, telephone number, and e-mail address.
- A description and map of the area to be served.
- A list of each county and city in which the described service area is located.
- A schedule indicating when service is expected to be offered in the service area.

Notice of Service. – Once cable service is provided, the holder of a State-issued franchise must file a notice of service with the Secretary within 10 days after the cable service begins. The notice of

[55] Fee amount is the same as the filing fee for articles of organization of a limited liability company under G.S. 57C-1-22.

service must include the effective date of the notice of franchise for that area, a description and map of the service area, and a statement that cable service has begun in the service area.

Annual Service Report. – The holder of a State-issued franchise must also file an annual service report on or before July 31 of each year and pay a fee of $200.[56] The annual service report must include all of the following:

- The effective date of a notice of franchise for that area.
- A description and map of the service area.
- The approximate number of households in the service area.
- A description and map of the households passed[57] in the service area as of July 1.
- The percentage of households passed in the service area as of July 1.
- The percentage of households passed in the service area as of July 1 of any preceding year for which a report was required.
- A report indicating the extent to which the holder has met the customer service requirements.
- A schedule indicating when service is expected to be offered in the service area, to the extent the schedule differs from one included in the notice of franchise or in a report previously submitted, and an explanation of the reason for the new schedule.

General filing and reporting requirements. – A person who files a notice of franchise or an annual service report with the Secretary of State must send a copy of the document to any county or city included in the service area described in the document as well as to the registered agent of any cable service provider that is providing cable service under an existing agreement in the service area. The provisions of Article 2 of Chapter 55D of the General Statutes apply to the submission of documents.[58] The Secretary must either post to its Internet Web site the document filed or indicate on its Internet Web site that the document has been filed and is available for inspection.

A person who offers cable service over a cable system without filing a notice of franchise or a notice of service is subject to forfeiture of the revenue received from subscribers to the cable service during the period of noncompliance. A cable service provider whose area includes the area in which a person is providing cable service without complying with the notice requirements may bring a civil action for forfeiture.

Existing agreements. – An existing agreement is defined as a local franchise agreement that is in effect on January 1, 2007, or as one that expired before January 1, 2007, and the cable service provider

[56] Fee amount is the same as the filing fee for an annual report of a limited liability company under G.S. 57C-1-22.

[57] A household is 'passed' if service is available to that household, regardless of whether the household subscribes to the service.

[58] This Article contains several provisions: To be filed, a document must contain all the required information and be accompanied by the filing fee. The Secretary of State's filing of a document does not relate to the veracity of the document. A person who knowingly signs a false document filed with the Secretary is guilty of a Class 1 misdemeanor.

under the agreement provides cable service to subscribers in the franchise area on January 1, 2007. The State franchising authority does not affect an existing agreement, except as follows:

- Effective January 1, 2007, gross revenue used to calculate the payment of a local franchise tax does not include gross receipts from cable service subject to the State sales tax.
- A local franchise agreement may be terminated in any one of the following circumstances:
  - When a notice of service indicates that one or more households in the franchise area of the existing agreement are passed by both the cable provider under the existing agreement and the holder of a State-issued franchise.
  - As of January 1, 2007, a county or city has an existing agreement with more than one cable service provider and at least 25% of the households in the franchise areas of the existing agreements are passed by more than one cable service provider.
  - A person provides wireline competition in the franchise area of the existing agreement by offering video programming, as defined in G.S. 105-164.3, over wireline facilities by a method that does not require a State-issued franchise. To terminate an existing agreement under this circumstance, a cable service provider must include evidence of the competition. A county or city is allowed 60 days to review the evidence. The termination becomes effective at the end of this 60-day period unless the county or city brings an action to stay the termination.

Termination of existing agreements. – To terminate an existing agreement, a cable service provider must file a notice of termination with the affected county or city and file a notice of franchise with the Secretary of State. A notice of termination becomes effective at the end of a month. A termination of an existing agreement ends the obligations under the agreement and under any local cable regulatory ordinance as of the effective date of the termination.

Service standards and requirements. – The act specifically prohibits discrimination in the provision of the cable service. A violation of the law is an unfair and deceptive trade practice under G.S. 75-1.1. In determining whether a cable service provider has violated the law, the following factors may be considered: the length of time since the provider filed the notice of service for the area, the cost of providing service to an area, technological impediments to providing service to an area, the inability to obtain access to property required to provide service to an area, and competitive pressure to respond to service offered by another cable provider. The information in the annual service reports may be used to help determine whether a violation of the law has occurred.

A cable service provider must comply with the customer service requirements and emergency alert requirements established by the Federal Communications Commission. The Consumer Protection Division of the Attorney General's Office is designated as the State agency to receive and respond to consumer complaints. In addition to any other authority the Attorney General has to respond to consumer complaints, the act provides that persistent or repeated violations of the federal customer service requirements or the terms and conditions of the cable service provider's agreement with customers is an unfair and deceptive trade practice under G.S. 75-1.1. Each individual violation of the federal requirements or the provider's agreement constitutes a separate

violation. In a suit instituted by the Attorney General's office, the court may impose a civil penalty of up to $5,000 a day for each violation if it finds the cable service provider violated G.S. 75-1.1. In a suit instituted by a person where the cable service provider is found to have violated G.S. 75-1.1, the person is entitled to treble the amount of damages fixed by the verdict.

PEG channels. – The act requires a cable service provider operating under a State-issued franchise to include the transmission of PEG channels. A county or city may make a written request for PEG channel capacity and the cable service provider must provide the requested capacity within 120 days after it receives the request. A city with a population of at least 50,000 is allowed a minimum of three PEG channels and a city with a population of less than 50,000 is allowed a minimum of two PEG channels. A county is allowed a minimum of two PEG channels. This minimum number of initial PEG channels may be increased by the number of channels in excess of this minimum that are activated as of July 1, 2006, under the terms of an existing agreement whose franchise area includes the city or county.

The maximum number of PEG channels a cable service provider must provide to a county or city is seven. If a county or city does not have seven PEG channels, including the initial PEG channels, it may request additional channels. The additional channels may be provided on any service tier and the transmission quality of the additional channels must be at least equivalent to the transmission quality of the other channels provided. The PEG channels operated by a county or city must meet the following programming requirements in order for the county or city to obtain additional channels:

- All of the PEG channels must have scheduled programming for at least 8 hours a day.
- The programming content of each PEG channel must not repeat more than 15% of the programming content on any of the other PEG channels.
- No more than 15% of the programming content on any PEG channel may be character-generated programming.[59]

A cable service provider is responsible only for the transmission of a PEG channel. A county or city to which the PEG channel is provided is responsible for the operation and content of the channel.

PEG channel grants. – The act establishes the PEG Channel Fund as an interest-bearing special revenue fund. The purpose of the Fund is to provide matching grants to counties and cities for PEG channel support. The e-NC Authority administers the Fund.[60] A grant may only be used for capital expenditures necessary to provide PEG channels. The size of a grant may not exceed $25,000 and an applicant may receive no more than one grant per fiscal year. The applicant must match the grant on a dollar-for-dollar basis. The Authority must publish an annual report on the grants awarded from the Fund.

Service to public buildings. – At the written request of a county or city, a cable service provider operating under a State-issued franchise must provide cable service without charge to a public building located within 125 feet of the provider's cable system. The required service is the basic, or lowest-priced, service the provider offers to customers. Only one service outlet is required for a building. A public building is a building used as a public school, a charter school, a library, or for

---

[59] 'Character-generated programming' is programming that consists of text messages. Examples of character-generated programming include menus and bulletin boards.

[60] The e-NC Authority is charged with managing and promoting high-speed broadband Internet access.

a function of the county or city. A cable provider is not required to provide service that conflicts with restrictions that apply in a program licensing agreement or another contract.

State sales tax. – Sections 2 and 3 of the act apply the State sales tax equal to the combined general rate[61] equally to all video programming services, regardless of who provides the service. Section 2 defines the term 'video programming' to be programming provided by, or generally considered comparable to programming provided by, a television broadcast station, regardless of the method of delivery. The term is broader than 'cable service provided over a cable system'. It would include cable services offered over private rights-of-way as well as those offered over public rights-of-way. Section 3 imposes a State sales tax at the combined general rate on the gross receipts derived from providing video programming to a subscriber in this State.[62]

Local distribution. – Sections 7 and 8 of the act distribute a share of the sales tax revenues imposed on video programming to counties and cities. The legislature finds that the revenue distributed is local revenue, not a State expenditure. Thus, the Governor may not reduce or withhold the distribution.[63]

Section 7 increases the amount of the sales tax revenue derived from telecommunication services distributed to cities and counties. Section 8 distributes the following portion of the gross receipts derived from video programming to counties and cities: 22.61% of the net proceeds collected on video programming, other than on direct-to-home services and 37% of the net proceeds collected on direct-to-home satellite service.[64] The distributions will be made quarterly.
The amount distributed will be allocated as follows:

- Two million dollars ($2,000,000) a year will be distributed as supplemental PEG channel support. A portion of this amount will be distributed to counties and cities with qualifying PEG channels.[65] The amount per qualifying PEG channel is $25,000. A county or city cannot receive supplemental PEG channel support for more than three PEG channels. The amount distributed to a county or city as supplemental PEG channel support must be used by it for the operation and support of PEG channels. If the amount to be distributed for qualifying PEG channels in a fiscal year is less than $2,000,000, the Secretary must credit the excess amount to the PEG Channel Fund to be used for matching local grants for PEG channel support.

- The remainder of the revenues to be distributed will be allocated between the counties and cities on a proportional basis. The proportionate share of a county or city is the base amount for the county or city compared to the base amount for all counties and cities. The base amount for a county or city that did not impose a cable franchise tax

---

[61] The combined general rate is the State sales tax rate set in G.S. 105-164.4(a) plus the sum of the rates of the local sales and use taxes.

[62] Although the term video programming includes broadcast services, the provision of these services would not be taxed unless the provider sells the service to subscribers and thus realizes gross receipts from the provision of the services.

[63] It is debatable whether a legislative finding that the revenue is a local revenue rather than a State expenditure would be adopted by a court if challenged. However, such a finding is not unprecedented as the legislature enacted several such findings in 2002 after the Governor withheld certain funds generally distributed to local governments.

[64] This percentage distribution from satellite TV services mirrors the 2.5% local sales tax on satellite radio services.

[65] A "qualifying PEG channel' is a channel that meets the programming requirements under G.S. 66-357(d).

before July 1, 2006, is two dollars ($2) times the most recent annual population estimate for that county or city. The population of the county is the population of its unincorporated areas plus the population of an ineligible city in the county. The base amount for a county or city that imposed a cable franchise tax before July 1, 2006, is the amount of cable franchise tax and subscriber fee revenue the county or city certifies to the Secretary it imposed during the first six months of fiscal year 2006-2007. For subsequent fiscal years, the amount each county or city receives will be adjusted based upon its percentage change in population.

A county or city that imposed subscriber fee revenue must use a portion of the amount distributed to it for PEG channel operation and support. The amount it must use for this purpose is two times the amount of revenue it certified to the Secretary it imposed as subscriber fees during the first six months of fiscal year 2006-2007. A county or city that appropriated funds for PEG channel operation and support during fiscal year 2005-2006 must continue appropriating that amount of funding for PEG channels. The remainder of the money distributed to counties and cities may be used for any public purpose.

Conforming and technical provisions. – Sections 4 through 6 of the act make technical and conforming changes to the provisions governing bundled transactions.

Section 9 repeals the credit against the State sales tax on cable services for local franchise tax paid because the local franchise tax is repealed in Section 13.

Section 10 repeals the county's authority to franchise cable television services.

Section 11 repeals the county's authority to impose a franchise tax on cable services. Unlike a city, a county may only levy a privilege tax to the extent it is authorized by law. This section repeals the county's authorization.

Section 12 specifically prohibits a city from imposing a tax on video programming services under the statute that gives cities the general authority to levy a privilege license tax on businesses and franchises unless prohibited from doing so by law. This section contains such a prohibition.

Section 13 repeals the city's specific statutory authority to impose a franchise tax on cable services.

Section 14 clarifies that a city may not impose a fee or charge for use of the public right-of-way unless the fee or charge applies uniformly to all non-municipal users of the public right-of-way.

Section 15 repeals the city's authority to franchise cable television services.

Section 16 requires a county or city desiring to receive a distribution for supplemental PEG channel support under G.S. 105-164.44I(b) to certify to the Secretary of Revenue by March 15, 2007, the number of qualifying PEG channels it operates.

Studies. – Section 17 recognizes that the staffing needs of the Consumer Protection Division of the Attorney General's Office may change with the passage of this act. However, the section also finds that the impact of this act on the staffing needs of the Division is not clear. This section requests the Office of the Attorney General to monitor the number and type of cable service complaints it receives from customers and to determine whether the Division needs additional staff to fulfill the duty imposed by this act on it. The Office of the Attorney General must make a report concerning its staffing needs to the Fiscal Research Division by April 1, 2007.

Section 18 directs the Consumer Protection Division of the Attorney General's Office to report to the Revenue Laws Study Committee on or before April 1 of each year, beginning April 1, 2008,

on the number of customer complaints it has received regarding cable service, the types of complaints, and the different means it has used to resolve those complaints.

Section 21 directs the Revenue Laws Study Committee to review the effects of this act on competition in video programming services, the number of cable service subscribers, the price of cable service by service tier, the technology used to deliver the service, and the deployment of broadband in the State. The Committee may recommend any changes to the law it believes are necessary to the North Carolina General Assembly.

Severability. – Section 19 provides that an award of a State-issued franchise does not affect a determination of whether video programming provided by the holder of the franchise is considered cable service provided over a cable system under federal law.

Section 20 provides that the provisions of this act are severable.

REVENUE LAWS TECH. & MOTOR FUEL TAX CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-162	**HB 1963**	**Representative Luebke**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE REVENUE LAWS AND RELATED STATUTES, TO IMPROVE THE COLLECTION AND ADMINISTRATION OF THE MOTOR FUEL TAX, AND TO AUTHORIZE A COUNTY THAT IMPOSES A SALES TAX FOR PUBLIC TRANSPORTATION TO LEVY A VEHICLE RENTAL TAX.

OVERVIEW: This act makes technical, clarifying, and administrative changes to the revenue laws and related statutes and to the motor fuel tax laws to improve collection and administration. These changes were a recommendation of the Revenue Laws Study Committee. The act also authorizes counties that impose an additional one-half cent sales and use tax for public transit to also levy a vehicle rental tax.

FISCAL IMPACT: Parts I. through IV. of this act have no fiscal impact. Part V. has no fiscal impact on the General Fund, and the impact to local government revenue cannot be determined. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: Except as otherwise specified, this act became effective when signed into law by the Governor on July 24, 2006.

ANALYSIS:

Part I: Technical Changes.

Section	Explanation
1	Corrects a departmental reference since S.L. 2005-380 transferred the NC Grape Growers Council from the Department of Agriculture and Consumer Services to the Department of Commerce.

2	Removes obsolete language and makes other stylistic changes. This statutory subsection makes two obsolete references to the appraised value of intangible property in the appraised value base. This language became obsolete with the repeal of the intangibles tax effective for tax years beginning on or after January 1, 1995. The Department of Revenue does not require intangible property to be included in the appraised value base.
7	Makes a grammatical change to the statute.
19	Amends the caption of the statute to reflect what the statute actually provides.
21	Corrects an incorrect statutory reference.
22	Corrects an incorrect statutory reference.
23	Corrects introductory language from a 2005 session law.
24	Corrects an incorrect statutory reference within a local session law.
27	Repeals a reporting requirement related to sales and use tax refunds allowed to local school administrative units. This reporting requirement is unnecessary since the General Assembly changed the law in 2005 to redirect State sales and use tax revenues refundable to LEAs to the State Public School Fund.
28	Corrects an incorrect statutory reference.
31	Corrects an incorrect statutory reference.

Part II: Clarifying Changes

Section	Explanation
3(a) & (b)	Defines the term 'gross income' in the corporate income tax law by reference to Section 61 of the Internal Revenue Code, which is the same definition that is currently found in the individual income tax law. Section 3(b) is a conforming change.
5(a) & (b)	In 2005, the General Assembly made the use tax applicable to services sourced to this State. Section 5(a) is a conforming change which amends the definition of 'use' to include services. Section 5(b) is a conforming change to the statute regarding use tax returns.
6	Corrects an inadvertent omission. In the 2005 budget bill, there was a rewrite of this statutory section on use tax. A credit should be allowed for both sales and use tax paid to another state, but the revised statute only provided a credit for sales tax paid. There was no intent to change the application of the tax, so this section adds the phrase 'or use' back into the statute.
8(a) & (b)	Clarifies that the exemption from sales tax for sales of grain, feed, or soybean storage facilities and accessories only applies to sales made to farmers. This was one of the items previously subject to the 1%, $80 maximum rate of tax. The 1% rate was imposed on sales to farmers of grain, feed, or soybean storage facilities and accessories. In 2005, in order to conform to the Streamlined Agreement, the General Assembly exempted these items from sales tax. However, the new exemption did not limit the exemption to farmers.
12	Section 12(a) makes changes to various penalty statutes. Section 12(a) repeals two misdemeanor statutes relating to the willful failure to comply with the tax laws and aiding and abetting in the violation of the tax laws. These violations are covered by G.S. 105-236(9), so the two statutes are unnecessary.

	Section 12(b) reorganizes the penalties statute and makes some technical and clarifying changes. It divides the former statutory section into three subsections: subsection (a) lists the various penalties available to the Department of Revenue for violations of the tax laws; subsection (b) is a recodification of the principle previously set out in subdivision (11), which states that a violation of a tax law is considered an act committed in part at the office of the Secretary in Raleigh; and subsection (c) restates language previously found at the beginning of the statute directing the disposition of the penalty proceeds to the Civil Penalty and Forfeiture Fund. Subsection (c) also deletes an obsolete requirement to avoid the penalty for a bad check, which states that a person had sufficient funds in a bank account 'in this State'. Since the Department does not follow this requirement, it is deleted. Section 12(c) repeals G.S. 105-449.127, which provides that civil penalties assessed for violation of the motor fuels tax laws be credited to the Highway Fund. Section 12(c) also repeals G.S. 105-449.48, which provides that fees collected for the issuance of temporary permits for motor carriers and all civil penalties collected for violations of the motor carrier laws be credited to the Highway Fund. Section 12(d) moves the fee disposition language in repealed G.S. 105-449.48 to G.S. 105-449.49. The repeal of these two statutes redirects from the Highway Fund to the Civil Penalty and Forfeiture Fund any civil penalty proceeds collected under these two statutes as required by *North Carolina School Boards Assn. v. Moore*. In July of 2005, the North Carolina Supreme Court in the above referenced case held that the penalties assessed under Chapter 105 are imposed as a monetary payment for a taxpayer's noncompliance with a mandate of the Revenue Act, that they are punitive in nature, and, as such, they are subject to Article IX, Section 7 of the North Carolina Constitution requiring these funds be remitted to the Civil Penalty and Forfeiture Fund for use by the schools.
18	Amends the caption of G.S. 105-249.2 by replacing the word 'individuals' with the word 'persons'. This statute provides, in part, that no penalties may be assessed for any period in which the time for filing a federal return or for paying a federal tax is extended because of a presidentially declared disaster. The relief provided by this statute is applied by the Department of Revenue equally to all tax entities, including businesses, and not just individuals.
26	Amends the State estate tax statute by clarifying that State estate tax liability may not exceed federal estate tax liability determined without regard to the deduction for State death taxes or certain federal credits. Prior to this act the Department of Revenue interpreted the statute as limiting the State estate tax in this way, but the Estate Planning Section of the NC Bar Association requested that clarifying language be put in the statute. This change does not change the way in which estate tax is calculated.

Part III: Administrative Changes

Section	Explanation
4	Section 4 relates to the new film incentives tax credit enacted in 2005.

	Subsections (a) and (b) make clarifying changes to the film incentives in both the corporate and individual provisions. First, the term 'highly compensated individual' is limited to individuals who are compensated for services and does not include individuals who may sell goods in excess of the one-million-dollar limitation. Second, the exclusion of amounts paid to highly compensated individuals is clarified so that it is clear that the exclusion applies whether the individual is paid directly by the production company or by an unrelated third-party. It is not uncommon for a production company to contract with a separate entity for the services of actors or other professionals involved in a production. Third, the statutes are amended so that withholdings must be remitted in order for compensation to qualify as a qualifying expense, but that withholding does not necessarily have to be performed by the production company. Subsection (c) makes changes to G.S. 105-259(b) of the confidentiality statute, one of which is related to the film incentives tax credit. It adds a new subdivision (36), which allows the Department of Revenue to provide to a production company claiming a film production credit information used by the Department to adjust the amount of the credit claimed by the production company. It also repeals subdivision (32), which allows the Department of Revenue to provide to the Department of Public Instruction and the Fiscal Research Division reports regarding sales and use tax refunds received by school administrative units. This provision was enacted last year. However, Section 32(b) of S.L. 2005-435 amended the definition of tax information to exclude governmental agency refunds. Therefore, an exception is not needed in the confidentiality statute since the information is no longer confidential tax information. It also rewrites subdivision (27) to create a generic exception to allow disclosure of reports required by law rather than listing out specific statutes and makes conforming changes. This section became effective for taxable years beginning on or after January 1, 2006.
9	In 2005, the General Assembly authorized a sales and use tax refund for the purchase of fuel by interstate passenger air carriers and by motor sports racing teams or sanctioning bodies. Under current law, the Department of Revenue is required annually to publish the number of taxpayers claiming certain sales and use tax refunds. This section adds these categories of refunds to the reporting requirement.
10	Clarifies the effective date for a rate increase with regard to prepayments of service. In 2005, the General Assembly enacted G.S. 105-164.15A, which addresses the effective date for rate increases and decreases to taxable services, but the statute does not specifically address prepayments of service.
11	Provides a credit against the privilege tax for sales and use tax, or a similar type of tax, paid to another state. Under prior law, there was no specific provision for credits in the newly enacted Article 5F. *Manufacturing Fuel and Certain Machinery and Equipment.*

20	Section 20(a) and (b) conform the date an occupancy tax return is due to the date that the occupancy taxes are due.
25	Allows a municipality to create a municipal service district effective upon the adoption of the resolution creating it, rather than waiting for the first day of the next fiscal year, if general obligation bonds are anticipated to be authorized for the project. However, it provides that no ad valorem tax may be levied for the partial year.
29	Repeals G.S. 106-452, which sets the maximum charges for handling and selling tobacco on the floor of tobacco warehouses.
32	Conforms the language in G.S. 105-467(b) to changes made by S.L. 2006-33, that exclude ancillary service from the refund of sales and use taxes paid by certain local school administrative units for tangible personal property and services. Effective January 1, 2007

Part IV. Motor Fuel Tax Changes

Section	Explanation
13(a) & (b)	Section 13 gives the Department of Revenue the ability to cross match all motor fuel to ensure compliance with the motor fuel tax laws. Under current law, the Department may cross-match information regarding fuel entering the State and fuel leaving the State, but it cannot cross-match information regarding the intrastate movement of motor fuel. The Department has a new fuel tracking system that will better enable it to monitor the movement of fuel. The Department expects the system to be operational by the last quarter of this fiscal year. Section 13 makes the statutory changes necessary to enable the Department to review intrastate movements of fuel by providing that anyone who transports fuel must be licensed as a transporter and that all transporters must file informational returns on all movements of motor fuel. Section 13(a) provides that all people who transport motor fuel will be licensed as a motor fuel transporter. Under current law, a person licensed as a distributor or blender is considered to be licensed as a motor fuel transporter if the person transports the fuel for others for hire. This section removes the exception for persons who transport their own fuel so that any distributor or blender who transports fuel – whether for hire or for their own use – would also be considered licensed as a transporter. Section 13(b) provides that a transporter must file an informational return showing deliveries of motor fuel. Under current law, only interstate movements of fuel must be reported on a monthly informational return. The change in this section of the bill will require such a return for all deliveries of fuel. Section 13 becomes effective July 1, 2007, and applies to motor fuel transported on or after that date.
14	Section 14 provides that all motor fuel leaving the terminal rack is subject to the motor fuel excise tax. The Department requested this change to reduce the areas of evasion and inadvertent duplicate refunds. Under current law, a licensed distributor or importer may remove fuel from a terminal without paying the tax if the person has an exempt card issued by the supplier. This

	section removes the ability of distributors and importers to use exempt cards at the terminal rack. Instead, they will be able to obtain a monthly refund on any sales of fuel to exempt entities.[66] This change conforms North Carolina's law to the laws of the surrounding states who do not allow untaxed gasoline or undyed fuel to leave their terminals without the imposition of the tax. Section 14(a) puts the definition of 'exempt card or code' in the definitional statute for the motor fuel article. Section 14(b) repeals the portion of the statute that allows fuel to be removed from the terminal without paying the tax. Section 14(c) repeals the requirement of a quarterly return and makes conforming changes. Section 14(d) removes the deduction a licensed distributor or importer may make for tax exempt fuel taken from the terminal rack because the ability to obtain the fuel without paying the tax is repealed in section 14(b). Section 14(e) repeals the statute requiring a licensed distributor or importer who obtains fuel at the terminal rack with an exempt card to file a quarterly reconciling return. Section 14(f) makes conforming changes. Section 14(g) provides a monthly refund procedure for a distributor who sells diesel fuel to an airport. A refund procedure already exists for sales of motor fuel to the other listed exempt entities. Section 14 becomes effective January 1, 2007, and applies to motor fuel purchased on or after that date. An exempt card or code will not be valid for sales of motor fuel at the terminal rack on or after January 1, 2007.
15	Section 15 establishes a common due date for all motor fuel tax and informational returns. Under current law, most of the monthly tax returns are due on the 22nd day of the month following the month covered by the return. Informational returns are due on the 25th day of the month following the month covered by the return. These sections provide that all monthly returns are due on the 22nd day of the month following the month covered by the return. Section 15 becomes effective January 1, 2007, and applies to motor fuel purchased on or after that date.
16	Section 16 adds a reference to the privilege tax imposed under Article 5F, which was enacted last year, with respect to refunds of motor fuels tax allowed for nonhighway use of a vehicle. A refund of motor fuels tax allowed for the nonhighway use of a vehicle is to be reduced by the amount of sales and use tax owed based on the method set out in G.S. 105-449.107. Prior to January 1, 2006, the amount of sales tax due was based on either the general State and local rates of tax or the 1% rate imposed on sales of fuel to farmers and manufacturers. Effective January 1, 2006, sales of fuel to farmers and manufacturers are subject to the new 1% privilege tax. Currently, these two statutes refer only to the sales and use taxes levied in Article 5.

[66] G.S. 105-449.88 exempts the following entities from the motor fuel excise tax if it is sold to them for their use: the federal government, the State, local boards of education, charter schools, community colleges, counties, municipalities, and airports.

17	Section 17 removes the misdemeanor for taxpayers failing to pay the destination state taxes collected to that state. This provision was put into the law when North Carolina first moved to tax-at-the-rack. Today, all of the surrounding states have destination state tax laws. North Carolina does not collect and remit the taxes to those states, therefore this misdemeanor is no longer needed. Section 17 becomes effective January 1, 2007, and applies to motor fuel purchased on or after that date.

Part V: Expansion of Tax Authority for Certain Counties.

Section	Explanation
30	Section 30 authorizes a county that imposes an additional ½ cent sales and use tax for public transportation to also levy a vehicle rental tax. In 1997, the General Assembly authorized a regional public transportation authority to levy a gross receipts tax of up to 5% on retailers within the region engaged in the business of renting private passenger vehicles and motorcycles. The tax applies only to short-term rentals which are rentals for a period of less than one year. Each authority may use the proceeds of the tax for its public transportation purposes. Section 30 provides that a county that imposes the additional ½ cent sales and use tax is considered an authority under the 1997 legislation and may also levy a vehicle rental tax. The county must allocate the proceeds of any vehicle rental tax it imposes to the largest city in the county that operates a public transportation system. The city must use the money to finance, construct, operate, and maintain local public transportation systems. However, unlike the tax proceeds from a vehicle tax levied by a public transportation authority, the proceeds of a vehicle tax levied by a county may be used to supplant and replace existing general fund revenues allocated for a public transportation system. Under current law, this section applies only to Mecklenburg County, since that county is the only one that imposes an additional ½ cent sales and use tax for public transportation. If the Mecklenburg County Board of Commissioners decides to levy a vehicle rental tax of 5%, then the annual proceeds generated from the tax are estimated to be $7.4 million.

ECONOMIC DEVELOPMENT PROGRAM MODIFICATIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-168	**HB 2744**	**Rep. Owens, Daughtridge**

AN ACT TO MAKE MODIFICATIONS TO THE JOB DEVELOPMENT INVESTMENT GRANT PROGRAM, TO EXTEND THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT FOR

CERTAIN TAXPAYERS, AND TO EXTEND CERTAIN SALES AND USE TAX REFUNDS.

OVERVIEW: This act makes numerous changes to the Job Development Investment Grant Program, it extends by two years the time period in which eligible major industries can qualify for the extension of the Bill Lee Act, and adds financial services, securities operations, and related systems development as an industry that is eligible for the sales and use tax refund related to certain building materials.

FISCAL IMPACT: The act could reduce General Fund revenues by as much as $570,000,000 over a 12-year period.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Except as otherwise noted, this act became effective when signed into law by the Governor on July 27, 2006.

ANALYSIS:

Part I: JDIG Changes

The Job Development Investment Grant (JDIG) Program was created in 2002 as a new economic development tool for new and expanding businesses in North Carolina. JDIG is used to attract businesses to the State by allowing a five-member committee to award grants to businesses. The amounts of the grants are based on income tax withholdings from new jobs created by the businesses.

This act makes numerous changes to the JDIG program. Some of these changes significantly expand or extend the program, whereas other changes are intended to streamline the administration of the program, clarify certain aspects of the program, or reduce penalties for failure to comply with agreements under the program.

There are two changes in the act that may significantly add to the cost of the program over the next 12-13 years. First, the act increases the maximum amount of total annual liability for agreements entered into during the 2006 calendar year from $15 million to $30 million. This change is effective for agreements entered into during 2006 only; for agreements entered into in later years, the maximum amount of the total annual liability returns to $15 million. Under the JDIG program, agreements entered into in one calendar year may result in annual grant payments for the succeeding 12 years. Therefore, an increase in the maximum amount of the total annual liability of $15 million for one year may have a fiscal impact of up to $180 million over a 12-year period. Second, the act extends the sunset on the JDIG program by an additional two years, through the end of the 2009 calendar year. As with the increase discussed above, this two-year extension of the program could have a significant fiscal impact stretching out for a dozen years or more.

The act makes significant changes to the clawback provisions under the JDIG program. Under the JDIG program, the Economic Investment Committee (EIC), the entity that administers the JDIG program, is required to amend or terminate the agreement and to recapture all or part of a grant made in previous years under certain circumstances. If the business fails to comply with any term of the agreement or with criteria developed by the EIC, the EIC must amend the agreement and may terminate the agreement. This amendment may take the form of a lower percentage being used to determine the amount of the grant or of a shorter term for the agreement. The reduction must be proportional to the failure to comply with the agreement. If the business fails to comply with any term of the agreement or with criteria developed by the EIC for two consecutive years,

the EIC must terminate the agreement. In addition, in each agreement the EIC must include a provision describing the conditions that will lead to recapture of a grant made in an earlier year.

Under this act, the provisions relating to failure to comply with the agreement for two consecutive years are changed so that termination of the agreement is not required in all cases. Under this act, if the business is still in the base period established by the EIC, the EIC may withhold the grant for any consecutive year remaining in the base period in which the business fails to comply with the agreement. The EIC also has the option of extending the base period by up to 24 months over the amount specified in the original agreement in these cases. If the business does not come into compliance by the end of the base period, the agreement must be terminated. If the business is no longer in the base period established by the EIC, the EIC must terminate the agreement. The effect of these changes is to allow a company more leeway in meeting the terms of an agreement in the early years of the agreement.

This act also expands the types of entities that are eligible to enter into agreements under the program. When the JDIG program was originally created, all but two specific industries were eligible for grants under the program. Those two industries were retail operations and professional and semiprofessional sports teams and clubs. The exclusion of professional sports was put into place, in part, due to concerns that the intent behind the program was to attract one or more major league sports teams to the State. This act provides an exception to that exclusion by allowing professional motorsports racing teams to be eligible for grants under the program.

The act also makes the following changes:

- Changes references to 'base years' to 'base period' and allows the EIC to set the base period. Under current law, the base years are the first two years, unless the EIC decides on a different period. This clarifies that the EIC has authority to set that base period. The base period may not contain more than 5 years in which grant payments are to be made.

- Changes the definition of 'new employee.' Under prior law, a 'new employee' could include an employee that was originally hired in the base period, was subsequently laid off, and then was subsequently rehired by the company during the term of the agreement. The act changes the law to exclude these rehires from the definition of new employee.

- Clarifies that the $6,500 cap per new employee and the 75% cap on the amount of a grant apply to the total amounts and not just the amount that flows to the business. This is important because the amount of a grant is reduced by 25% for a position located in a development tier three area[67] with that portion instead being directed to the Utility Account of the Industrial Development Fund. This clarifies that the two caps apply to both the amount that flows to the business and the amount that flows to the Utility Account.

- Clarifies that social security numbers related to the positions on which a grant is based must be included with annual reports to the EIC. The change further clarifies that the social security numbers and State and federal tax returns are tax information, which is protected from disclosure under general laws related to public records.

[67] See S.L. 2006-252, Section 2.9(b).

- Removes the State Controller from the disbursement process. In 2004, a JDIG Reserve was created within the Department of Commerce. Due to the manner in which that Reserve was established, the State Controller is not directly involved with disbursements to businesses from the JDIG Reserve. This act relieves the State Controller of certain duties related to certification of grant amounts and remittance of payments to grantees and transfers those duties to the Department of Commerce.
- Clarifies that the tier designation that determines whether a grant payment is subject to reduction is the designation that is in effect in the year in which the application is filed. Under prior law, the amount of a grant was reduced by 25% if the position with respect to which the grant was awarded was located in an enterprise tier four or five area. Under that law, it was not clear when that determination was supposed to be made – at the time the business applied for a grant, at the time a grant agreement was entered into, or at the time the grant payment was made.

Lastly, this part of the act directs the Department of Commerce to conduct a comprehensive study of the costs of the JDIG Program in relation to other State economic development incentive programs. The study should also include information on the use of the program in urban, suburban, and rural areas throughout the various geographic regions of the State. The Department must submit the report to the chairs of the House and Senate Finance Committees by February 1, 2007.

Part II: Bill Lee Act Changes

The William S. Lee Quality Jobs and Business Expansion Act (hereinafter Bill Lee Act) was enacted in 1996, effective beginning with the 1996 tax year with a 2002 sunset. The Act is a package of State tax incentives and has been modified in each subsequent year. The incentives are primarily in the form of tax credits for investment in machinery and equipment and real property, for job creation, and for worker training. In 2000, the General Assembly extended the sunset on the Act until January 1, 2006. During the 2005 Regular Session, the General Assembly further extended the Act until January 1, 2008. However, the General Assembly changed the effective date from January 1, 2008, to January 1, 2007, in Section 1.3 of S.L. 2006-252.

There are several exceptions to the sunset date, one of which involves eligible major industries. Eligible major industries that qualify as such before January 1, 2006, are allowed to claim credits for business activity that occurs on or before January 1, 2010. A taxpayer is an eligible major industry if it will invest at least $100 million in acquiring, constructing, and equipping a facility and it is engaged in bioprocessing, the manufacture or distribution of pharmaceuticals or medicines, aircraft manufacturing, computer manufacturing, motor vehicle manufacturing, or semiconductor manufacturing.

The definition of eligible major industries for the purposes of the Bill Lee Act largely conforms to the list of taxpayers who are eligible for a refund on the sales and use taxes paid by the taxpayer on building materials for construction of a new facility in this State. Taxpayers that are eligible for the refund of sales and use taxes are not required to qualify as such by a specific date, but the refund provision does expire for purchases made on or after January 1, 2010.

Part II of this act extends by two years the time period in which eligible major industries may qualify for the extension of the Bill Lee Act. This provision allows for an extension of the Bill Lee Act to the taxpayers that qualify as an eligible major industry by January 1, 2008, rather than 2006.

Part III: Sales Tax Refund Changes

Part III of this act adds financial services, securities operations, and related systems development as an industry that is eligible for the sales and use tax refund related to certain building materials, effective July 1, 2006. The effect of this change is to make these types of taxpayers eligible for the extension of the Bill Lee Act discussed in Part II above. In addition, this part extends the sunset on the sales and use tax refund for all eligible industries by three years, until January 1, 2013.

Part IV: Internet Data Center Tax Exemption Changes.

Part IV of the act makes technical changes to the sales and use tax exemption for Internet data center facilities enacted as part of the 2006 Appropriations Act (S 1741, S.L. 2006). The changes were requested by the industry whose recruitment was the catalyst for the exemption.

SIMPLIFY FIRE TAX RATE/OTHER TAX CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-196	**HB 1891**	**Rep. Wainwright, Luebke, Church, Hill**

AN ACT TO CLARIFY AND SIMPLIFY THE APPLICATION OF THE ADDITIONAL GROSS PREMIUMS TAXES ON FIRE AND LIGHTNING COVERAGE AND TO MAKE TECHNICAL AND CLARIFYING TAX LAW CHANGES.

OVERVIEW: This act does the following:

- Clarifies and simplifies the application of the additional gross premiums taxes on fire and lightning coverage. This part of the act was a recommendation of the Revenue Laws Study Committee.
- Makes a conforming change to the definition of 'holding company' for purposes of the franchise tax.
- Clarifies the application of the royalty reporting option when one of the related members is in a foreign country.
- Allows the Department of Revenue to share information with a county or city on a room occupancy tax to the same extent as a prepared food and beverage tax.
- Directs the Revenue Laws Study Committee to study various issues.

FISCAL IMPACT: Effective January 1, 2008, the act combines the statewide and local rates for insurance policies providing fire and lightning coverage and establishes a new statewide rate of 0.85% for the supplemental tax. The tax will apply to 100% of premiums for property coverage and 10% of premiums for automobile physical damage. Because the new statewide rate is calculated to be revenue neutral, it is estimated that the rate change will have no fiscal impact. The remaining sections of the act also have no fiscal impact.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: There are various effective dates.

ANALYSIS: This act makes several changes to the State and local tax laws.

Additional Gross Premiums Taxes on Fire and Lightning Coverage

North Carolina imposes a 1.9% tax rate on the gross premiums of most insurance policies.[68] In addition to the general rate, there is a 1.33% rate applied to the gross premiums on insurance policies that provide fire and lightning coverage. The statute specifically excludes marine and automobile policies from this additional tax. Twenty-five percent of the net proceeds of this additional tax are credited to the Volunteer Fire Department Fund,[69] and the remainder is credited to the General Fund. There is also a 0.5% rate applied to gross premiums on insurance policies that provide fire and lightning coverage within fire districts. The statute authorizing the 0.5% rate does not provide any exceptions from this tax. The net proceeds of this tax are credited to the Department of Insurance.[70]

The General Assembly enacted the additional statewide fire and lightning tax in 1959. Although the statute does not provide that the tax will apply differently to different types of policies, the Department of Revenue has administered the tax this way. The additional tax has been imposed on 100% of premiums from insurance that covers only fire losses and on a percentage of premiums from insurance that covers multiple risks. The percentages applied are neither statutory nor imposed by administrative rule. Within the past few years, the Department has been informally advised by both the Department of Insurance and the Attorney General's Office that the statute as written does not provide for assessing the tax against only a percentage of a policy's premium. Rather, without a statutory change, it is their opinion that the tax should be applied to 100% of the premiums of any policy that includes fire and lightning coverage.

Section 1 of this act codifies the current administrative practice of the Department by setting in statute the percentage of an insurance policy's gross premiums to which the additional tax applies. It provides that policies covering fire loss would be taxable at 100%. It sets by statute the taxable percentages for the following types of policies:

Type of Insurance Policy	Taxable Percentage
Non-liability portion of a Commercial Multiple Peril policy	100%
Homeowner's Policy	50%
Farm Owner's Policy	30%

Section 3 of the act also establishes a new method of taxing insurance policies that provide property coverage, effective for taxable years beginning on or after January 1, 2008. The act

---

[68] Workers' compensation policies are taxed at 2.5%. HMO policies are currently taxed at a rate of 1%; however, effective January 1, 2007, these policies will be taxed at the general rate of 1.9%.

[69] Funds in the Volunteer Fire Department Fund provide matching grants to volunteer fire departments to purchase equipment and make capital improvements. In 2005, the Department received 567 applications for grants requesting matching funds of $6,577,455. The available monies in the Fund totaled only $4,369,976. The Department approved 500 applications totaling $4,365,489.

[70] Three percent (3%) of the tax proceeds are credited to the State Firemen's Association for general purposes. Two percent (2%) of the proceeds are used by the Department of Insurance for the purpose of administering the disbursement. The remaining funds are allocated among the fire districts in proportion to the amount of business done in the district and used by the local district for firemen's local relief purposes. *See Article 84 of Chapter 58 of the General Statutes.*

broadens the base and lowers the rate applicable to insurance contracts that provide property coverage. The revenue-neutral tax rate is 0.85%. The revenue generated by the tax is distributed in the same proportion as the current State and local fire and lightning tax revenue is distributed. Under the current method of taxation, the local tax is applied to contracts of insurance applicable to fire and lightning coverage within fire districts. A portion of the revenue from this tax is distributed to these fire districts. The act does not limit the application of the tax to fire districts. It also does not require the accounting by insurance companies of the amount of premiums written in fire districts. Section 7 of the act establishes a new method of distribution based upon a per capita allocation among fire districts, effective January 1, 2008. However, this new method of distribution needs further review. Given that, the act directs the Revenue Laws Study Committee to study the new method of taxation as well as the distribution of the revenues.

'Holding Company' Definition

Section 9 of this act makes a technical change to the definition of a 'holding company' for franchise tax purposes. This change corresponds with a substantive provision in the budget which eliminates a franchise tax loophole that existed for LLCs that elect to be taxed as C Corporations. This section is effective for taxable years beginning on or after January 1, 2007. For a more detailed explanation of this provision and the corresponding technical change, see the analysis of Section 24A.2 of S.L. 2006-66.

Royalty Reporting Option

Section 10 of this act clarifies the application of the royalty reporting option when one of its related members is in a foreign country. This change corresponds to a substantive provision enacted in the budget expanding the scope of the royalty reporting option. This section is effective for taxable years beginning on or after January 1, 2006. For a more detailed explanation, see the analysis of Section 24A.3 of S.L. 2006-66.

Tax Sharing

Current law allows the Department of Revenue to share tax information with a county or city if the information is relevant to the administration of the county's or city's food and beverage tax. Section 11 of this act expands the provision to include the administration of a county's or city's room occupancy tax. This section became effective when the act became law on August 3, 2006.

Effective Date Correction of Research & Development Sales Tax Changes

Section 12 of this act changes the effective date of a budget provision exempting research and development equipment from State and local sales tax and imposing a 1% privilege tax, with an $80 cap from January 1, 2007, to July 1, 2007,. For a more detailed explanation, see the analysis of Section 24.9 of S.L. 2006-66.

Revenue Laws Study

Effective when the act became law on August 3, 2006, Section 13 of this act directs the Revenue Laws Study Committee to study the following issues:

- Distribution of the additional gross premiums tax on property coverage.
- Use of consolidated corporate returns.
- Replacement of the corporate income and franchise tax with a commercial activity tax.
- Revision of the administrative process for the review of disputed tax matters.

LOCAL GOVERNMENT DEBT REVISIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-211	**SB 1436**	**Senator Garrou**

AN ACT TO ALLOW REGIONAL COUNCILS OF GOVERNMENT TO FINANCE REAL PROPERTY ACQUISITIONS AND IMPROVEMENTS AND TO MAKE REVISIONS RELATED TO TAX INCREMENT FINANCING.

OVERVIEW: This act does three things:

- It gives regional planning commissions the same authority to acquire real property for office space that the General Assembly gave regional councils of government last session.
- It authorizes regional councils of government and regional planning commissions to finance real property purchases or improvements by pledging the real property as security for the debt, subject to approval by the Local Government Commission.
- It exempts a private agency that enters into a contract with a local government unit for the implementation of a development financing plan from the statutes governing government contracts to the extent specified in the contract.

FISCAL IMPACT: The act does not affect the General Fund.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The act became effective when signed into law by the Governor on August 8, 2006.

ANALYSIS: Last session, the General Assembly gave regional councils of government the power to acquire real property by purchase, gift, or otherwise, and to improve that property for the purposes of meeting a council's office space and program needs.[71] A regional planning commission is very similar to a regional council of government. Both may be formed by a concurrent resolution adopted by one or more units of local government and both study regional problems and develop coordinated plans to address those problems. This act gives regional planning commissions the same authority to acquire real property as regional councils of governments.

The authority given to regional councils of government last year to own property did not include the authority to finance the purchase of the property. This act gives both regional councils of government and regional planning commissions the authority to pledge the real property as security in order to purchase the property or to make improvements to the property, subject to approval by the Local Government Commission.[72]

Project development financing, also known as tax increment financing, allows a local government to issue bonds to finance the public portion of certain economic development projects. The bonds

---

[71] S.L. 2005-290.
[72] The incurrence of indebtedness by an entity created by any action of a unit of local government must be approved by the Local Government Commission under G.S. 159-153.

are secured by the incremental property tax increase generated by the development financed. This type of financing can be used for airports, auditoriums and arenas, hospitals, museums, parking facilities, sewer systems, storm sewers and flood control facilities, water systems, street improvements, public transportation facilities, railroads, affordable housings, land development for industrial or commercial purposes, utilities, and redevelopment.

The Local Government Commission must approve the issuance of project development financing debt instruments. Before it can approve an issuance requested by a city, the governing body of the city must adopt a development financing plan. In implementing the plan, a city may act directly, through a redevelopment commission, through one or more contracts with private agencies, or by any combination of these. A city is subject to the public contract provisions of Article 8 of Chapter 143. This act provides that a private agency that enters into a contract with a city for the implementation of a development financing plan is subject to the statutory provisions governing public contracts ONLY to the extent specified in the contract.[73]

EXEMPT AGRI-TOURISM FROM PRIVILEGE TAX.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-216	**HB 143**	**Representative Coates**

AN ACT TO EXEMPT AGRI-TOURISM ACTIVITIES FROM THE PRIVILEGE TAX ON AMUSEMENTS.

OVERVIEW: This act exempts from the 3% gross receipts privilege tax all farm-related exhibitions, shows, attractions, or amusements offered on land used for farm purposes, including hayrides, animal exhibitions, and farm pond fishing.

FISCAL IMPACT: According to the Department of Revenue, a State privilege tax is not collected for activities such as hayrides and farm pond fishing because these activities are participatory in nature as opposed to other types of amusements subject to the tax. Animal exhibitions are considered to be taxable under current law. The Department is aware of only two instances in which current taxpayers would be affected by the act. It is unclear whether other businesses would be affected by the exemption. Because the act is retroactive to January 1, 1999, the first-year impact of the act would include any refunds to qualifying businesses that have paid the tax since that date.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act is effective retroactively to January 1, 1999, and applies to agri-tourism activities occurring on or after that date.

ANALYSIS: Under North Carolina law, amusements are generally subject to a privilege tax equal to 3%. Certain amusements are exempt from the imposition of a privilege tax. This act adds 'all farm-related exhibitions, shows, attractions, or amusements offered on land used for bona fide farm purposes as defined in G.S. 153A-340' to the list of exemptions from the privilege tax on amusements. The exemption would apply to hayrides, animal exhibitions, farm pond fishing, corn

[73] The City of Kannapolis plans to use project development financing to convert old Pillowtex factory buildings into research labs. It plans to enter into a contract with a private entity to implement its development financing plan.

mazes, and other such attractions. The term 'bona fide farm purposes', as defined in G.S. 153A-340, includes the production of and activities relating or incidental to the production of crops, fruits, vegetables, ornamental and flowering plants, dairy, livestock, poultry, and all other forms of agricultural products having a domestic or foreign market.

FILM INCENTIVE CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-220	**HB 1522**	**Representative McComas**

AN ACT TO CONFORM THE TAX CREDIT FOR PRODUCTION COMPANIES TO THE STANDARD TAX TREATMENT WITH RESPECT TO THE DEDUCTION OF BUSINESS EXPENSES.

OVERVIEW: This act eliminates the prohibition against claiming both an income tax deduction and an income tax credit for the same qualifying expenses spent by a production company with regard to the film incentives tax credit.

FISCAL IMPACT: The act is estimated to reduce General Fund revenues by $8.1 million in FY 2007-2008, $8.5 million in FY 2008-2009, $9.0 million in FY 2009-2010, and $9.5 million in FY 2010-2011.

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act is effective for taxable years beginning on or after January 1, 2007.

ANALYSIS: This act repeals the sections of the State's tax laws that prohibit a film and television production company from claiming both an income tax credit and deduction with respect to the same qualifying expenses. This means that a company claiming the film incentives tax credit no longer has to add back the qualifying expenses that form the basis of the credit to its taxable income, to the extent these expenses were not included in taxable income.

During the 2005 Session, the General Assembly replaced the film industry development grant program with a refundable income tax credit equal to 15% of the qualifying expenses spent by a production company in connection with a production.[74] A production company is defined as a person engaged in the business of making original motion picture, television, or radio images for theatrical, commercial, advertising, or educational purposes. In order to qualify for the credit, the production company must have qualifying expenses of at least $250,000 with respect to the production.[75] The credit expires for qualifying expenses occurring on or after January 1, 2010. This tax incentive benefits feature films, episodic television series, and commercial advertising. Qualifying expenses are the total amount spent in North Carolina for the following:

- Goods and services purchased by a production company in connection with a production. For goods with a purchase price of $25,000 or more, the amount included in qualifying expenses is the purchase price less the fair market value of the goods at the time the production is completed.

[74] S.L. 2005-276.

[75] In the case of an episodic television series, an entire season of episodes is considered one production.

- Compensation and wages paid by a production company on which it remitted withholding payments to the Department of Revenue. Any amounts paid to an individual whose compensation is in excess of $1 million with respect to a single production cannot be included as a qualifying expense.

In order to claim the credit, the taxpayer must provide on its return a detailed accounting of the qualifying expenses. The credit may be claimed for the taxable year in which the production activities are completed. The credit is computed based on all of the taxpayer's qualifying expenses incurred with respect to the production, not just the qualifying expenses incurred during the taxable year. If the credit exceeds the amount of tax imposed for the taxable year reduced by the sum of all credits allowable, the Secretary of Revenue must refund the excess to the taxpayer. A pass-through entity is considered a taxpayer for purposes of claiming this credit; therefore, it does not distribute the credit among its owners.

As indicated, this act repeals the prohibition against claiming both a deduction and a credit for the same qualifying expenses, but the following limitations on the credit will continue. First, the amount of the credit with respect to a feature film production is capped at $7.5 million. Second, the production may not be any of the following: political advertising, television production of a news program or live sporting event, a radio production, or a production containing obscene material.[76]

VARIOUS ABC LAW CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-227	**HB 1025**	**Representative Luebke**

AN ACT TO MAKE VARIOUS CHANGES TO THE ALCOHOL BEVERAGE CONTROL LAWS.

OVERVIEW: Section 14 of this act requires the Secretary of Revenue to credit the Department of Commerce $200,000 quarterly from the net proceeds of the excise tax collected on unfortified wine.

FISCAL IMPACT: The impact on General Fund revenues is negligible.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Section 14 of this act is effective July 1, 2007.

ANALYSIS: Under current law, the Secretary of Revenue is directed to credit, on a quarterly basis, the total of the net proceeds of the excise tax collected on unfortified wine bottled in North Carolina during the previous quarter to the Department of Commerce for use by the North Carolina Wine and Grape Council. The amount to be credited is capped at $500,000 per fiscal year. Under this act, the cap is removed and the source of the funds is changed to unfortified wine

---

[76] G.S. 14-190.1 defines "obscene material" as material that meets all of the following conditions: the material depicts or describes in a patently offensive way sexual conduct; the average person applying contemporary community standards relating to the depiction or description of sexual matters would find that the material taken as a whole appeals to the prurient interest in sex; the material lacks serious literary, artistic, political, or scientific value; and the material as used is not protected or privileged under the Constitution of the United States or the Constitution of North Carolina.

without regard to where it was bottled. Accordingly, the Secretary is directed to credit a flat amount of $200,000 per quarter, derived from the net proceeds of the excise tax collected on unfortified wine, to the Department of Commerce.

SPECIAL INDEBTEDNESS PROJECTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-231	**SB 1621**	**Senator Hoyle**

AN ACT TO AUTHORIZE ADDITIONAL SPECIAL INDEBTEDNESS FOR THE CONSTRUCTION OF UP TO FIVE YOUTH DEVELOPMENT CENTERS; TO AUTHORIZE SPECIAL INDEBTEDNESS FOR THE PURCHASE OF STATE GAME LANDS; TO AUTHORIZE SPECIAL INDEBTEDNESS FOR A PARKING FACILITY IN DOWNTOWN RALEIGH; AND TO EXEMPT SALES OF TIMBER FROM THE SERVICE CHARGE IMPOSED BY THE DEPARTMENT OF ADMINISTRATION.

OVERVIEW: This act authorizes an additional $7 million in special indebtedness to complete five youth development centers for which special indebtedness was originally authorized in 2004. It authorizes the issuance of $20 million in special indebtedness to finance the purchase of land by the Wildlife Resources Commission to be used as State game lands. To assist with the repayment of this indebtedness, the act also exempts sales of timber on land owned by the Wildlife Resources Commission from the service charge imposed by the Department of Administration. Lastly, it authorizes the issuance of $20 million in special indebtedness to finance the construction of a new parking deck in downtown Raleigh.

FISCAL IMPACT: (For a complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The authorization of additional special indebtedness for the construction of youth development centers is effective January 1, 2007. The remainder of this act became effective August 10, 2006.

ANALYSIS: This act authorizes the issuance of special indebtedness for various projects. Commonly referred to as 'certificates of participation', special indebtedness is nonvoted debt that is typically secured only by an interest in State property being acquired or improved. The term 'special indebtedness' covers the various forms this type of debt can take: installment purchase (with or without certificates of participation), lease-purchase (with or without certificates of participation), or bonds.

Before any type of special indebtedness may be issued or incurred, the State Treasurer must certify that debt financing may be desirable for a specific project presented to it by the Department of Administration. Next, the Council of State must give preliminary approval. If preliminary approval is obtained, the Council of State must give final approval, setting out details such as the maximum amount to be financed, the maximum maturity, and the maximum interest rates. The maximum maturity may not exceed 40 years. The State Treasurer must approve the details of the financing,

finding that the amount to be borrowed is adequate and not excessive and will not require an excessive increase in any State revenues to provide for repayment, and that the special indebtedness can be incurred or issued on terms favorable to the State. Finally, the State Treasurer must report to the Joint Legislative Commission on Governmental Operations at least five days before any special indebtedness is issued or incurred.

In 2004, the General Assembly authorized the State to issue or incur up to $35 million of special indebtedness for five youth development centers with a total of 224 beds to be operated by the Department of Juvenile Justice. This act authorizes an additional $7 million of special indebtedness to complete the construction of five youth development centers for which special indebtedness was originally authorized in 2004. The increase in the amount of the authorization is due to bids on the projects coming in higher than anticipated in 2004.

This act also authorizes the issuance of up to $20 million of special indebtedness to finance the purchase of land by the Wildlife Resources Commission to be used as State game lands.

The proposed land acquisition involves a total of 77,090 acres currently owned by the International Paper Corporation and located in four separate tracts. The total estimated cost for purchasing the lands is $80 million, and the Nature Conservancy has approached the State to fund the purchase in the following manner:

- $45 million from the Clean Water Management Trust Fund
- $10 million from the Natural Heritage Trust Fund
- $5 million from the Parks and Recreation Trust Fund
- $20 million from the Wildlife Resources Commission

With the authorization provided by this act, the Wildlife Resources Commission would purchase roughly 66,000 acres of International Paper lands through a land deal brokered by the Nature Conservancy. The purchase of all 77,090 acres would occur over three years. It is anticipated that timber receipts from the land will be sufficient to repay the indebtedness.

The Department of Administration may assess and collect a service charge when a State agency transfers or sells any State surplus property or recyclable material. This act creates an exception to the service charge for sales of timber on land owned by the Wildlife Resources Commission. The effect of this would be to free up resources to repay the indebtedness.

Finally, this act authorizes the issuance of $20 million of special indebtedness to construct a parking deck in downtown Raleigh. The act does not, however, specify where in downtown Raleigh the deck will be located. The deck is expected to serve State employees and visitors to the State government complex. The act also requires the Department of Administration to report to the Joint Legislative Commission on Governmental Operations by September 1, 2006, on how this parking deck fits with the Green Square Project. The Green Square Project, authorized by S.L. 2005-255, is a proposal involving the sale by the State to the State Employees' Credit Union of land on which the credit union is currently situated. The property is located on the corner of Jones and Salisbury Streets, next to the Museum of Natural Sciences across from the Department of Administration. The State Employees' Credit Union intends to use the land to construct a building and parking deck for various uses.

PUBLIC-PRIVATE PARTNERSHIPS FOR SCHOOLS.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-232, as amended by S.L. 2006-259	**SB 2009**	**Senator Malone**

AN ACT TO ALLOW CAPITAL LEASE FINANCING FOR PUBLIC SCHOOLS.

OVERVIEW: This act allows local school administrative units to enter into capital leases for school facilities and allows for those leases to contain an agreement relating to construction, repairs, or renovations.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 12, 2006, and will be repealed on July 1, 2011.

ANALYSIS: Local school administrative units are responsible for providing for adequate public school facilities. Local governments have several options for financing the provision of public school facilities, including direct appropriations for construction, the issuance of special indebtedness or general obligation indebtedness (provided that the general obligation indebtedness is approved by a voter referendum), and the use of operating leases. Under prior law, a local board of education was prohibited from contracting for the erection of a school facility unless the property on which the building was to be located was owned in fee simple by the local unit. In addition, all construction and repairs were required to be performed under the control and direction of the local board of education.

This act expands the financing authority of local school administrative units by allowing them to enter into capital leases for school facilities. The lease may relate to an existing building or new construction. The lease may also contain an agreement relating to construction, repairs, or renovations. Under a capital lease, the local school board is not required to own the property and the lease may provide that the lessor is responsible for repairs and renovations.

Capital leases differ from operating leases in several respects. In general, a capital lease is one that is considered to have the economic characteristics of ownership. To determine whether a lease is a capital lease or an operating lease, one must look at a number of different provisions in the lease. Under generally accepted accounting principles, a capital lease is a non-cancelable contract satisfying one or more of the following conditions:

- Legal title to the property is transferred to the lessee.
- The lease contains bargain or nominal purchase options.
- The lease term equals or exceeds 75% of the asset's useful life.
- The present value of the minimum lease payments equals or exceeds 90% of the asset's fair market value.

Under this act, all capital leases are subject to the following limitations:

- The lease cannot contain a clause that restricts the right of the local board to continue to provide a service or activity or to replace or provide a substitute for any property financed or purchased by a capital lease.
- Each capital lease is required to contain a clause specifying that it does not constitute a pledge of the taxing power or full faith and credit of the local board of education or board of county commissioners. This provision clarifies that a capital lease is not a general obligation of the local unit. Further, the act provides that no deficiency judgment can be rendered against a local board of education or other local government unit under the lease.
- A capital lease is considered a continuing capital outlay and is subject to the provisions of G.S. 115C-441(c1). That statute generally allows a local board of education to enter into a contract for continuing capital outlay provided that the budget resolution includes an appropriation for the current fiscal year, an unencumbered balance remains in the appropriation sufficient to pay in the current fiscal year the sums authorized under the contract, and the contracts are approved by the board of county commissioners in a resolution that binds the board to appropriate sufficient sums in later fiscal years. For capital leases, however, the resolution by the board of county commissioners requires only that the board make appropriations in later years in the board's discretion.
- A capital lease is subject to approval by the Local Government Commission (LGC) to the extent that the lease satisfies one or more of the conditions relating to financing agreements requiring approval by the LGC. These conditions are:
    - The agreement extends for at least five years.
    - The agreement obligates the unit to pay sums of money to another, regardless of whether the other is a payee, or the agreement obligates the unit to payments of over $500,000.
- A capital lease cannot contain any agreement with respect to student assignment.
- The property subject to a capital lease is subject to all laws relating to liens on private property.

In addition to the general provisions listed above, numerous additional provisions apply to a 'build-to-suit capital lease.' A build-to-suit capital lease is defined as a lease that provides for construction or renovation, the cost of which is estimated to exceed $300,000. The following provisions apply to build-to-suit capital leases.

- Before entering into a build-to-suit capital lease, the local board of education is required to adopt a resolution approving the lease. The board is required to provide at least 10 days' notice of the meeting at which the board plans to adopt the resolution approving the lease. The notice is required to include a brief description of the lease and the name of the other party to the lease. The resolution adopted by the board must include a finding that the capital lease is in the best interests of the unit and that the private developer (the lessor) is qualified to provide the products and services called for under the lease.

- All architectural, engineering, and survey services must be procured in accordance with the provisions of Article 3D of Chapter 143 of the General Statutes. Article 3D provides requirements to ensure that public entities procure qualified professionals when contracting for architectural, engineering, or surveying services.
- Private developers are required to seek competition and minority business participation in connection with the construction work. The private developer is required to conduct a competitive bidding process which could include prequalification of subcontractors. The private developer is required to comply with general law regarding minority business participation in public projects, and is required to adopt the minority business participation goals of the local board of education. The local board of education is required to approve of the private developer's plan for compliance with minority business participation prior to the private developer seeking bids.
- The board of education may require the private developer to provide performance or payment bonds in accordance with the provisions of Article 3 of Chapter 44A of the General Statutes. That Article provides for model provisions for performance bonds related to public construction contracts.
- A local board of education may enter into a predevelopment agreement with a private developer. Predevelopment agreements are required to be approved by the board of county commissioners and may involve such areas as site selection or building design.
- A local government unit is authorized to sell, lease, or otherwise transfer real property to a private developer for construction, repair, or renovation of a school facility under a capital lease without following general procedures related to the disposition of property.
- Each capital lease requires that the private developer provide an irrevocable letter of credit of not less than 5% of the total costs of the improvements for the benefit of laborers and materialmen.

BILL LEE CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2006-252	**HB 2170**	**Rep. Harrell, Daughtridge, Gibson, Owens**

AN ACT TO REPLACE THE TAX CREDITS GENERALLY AVAILABLE UNDER THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT WITH MORE NARROWLY FOCUSED CREDITS FOR JOB CREATION AND BUSINESS INVESTMENT.

OVERVIEW: This act creates a new Article under Chapter 105 to provide tax credits to new and expanding businesses, effective for taxable years beginning on or after January 1, 2007; sunsets the

Bill Lee Act for activities occurring on or after January 1, 2007, rather than January 1, 2008; and makes conforming changes to other statutes that refer to provisions of the Bill Lee Act.

FISCAL IMPACT: The act does not have a fiscal impact in fiscal year 2006-2007, and a minimal impact on the State's General Fund in fiscal year 2007-08.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2006 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The new tax credits and the sunset of the existing Bill Lee Act become effective January 1, 2007.

ANALYSIS: The William S. Lee Quality Jobs and Business Expansion Act was enacted in 1996, effective beginning with the 1996 tax year with a 2002 sunset. The Act is a package of State tax incentives and has been modified in each subsequent year. The incentives are primarily in the form of tax credits for investment in machinery and equipment and real property, for job creation, and for worker training. Counties are divided into five enterprise tiers based on the unemployment rate, per capita income, and population growth of the county. For many of the credits, the lower the tier of a county, the more favorable the incentive. The Act requires the Department of Commerce and the Department of Revenue to report periodically on the credits allowed by the Act.

Before 1996, North Carolina had made little use of tax incentives to lure businesses to the State. Even without incentives, North Carolina was consistently one of the top states in attracting industry. The array of credits authorized by the Bill Lee Act was viewed as an experiment, to be evaluated in five years to determine whether the incentives were cost effective and actually affected behavior or merely provided tax reductions to businesses that would have located or expanded in any case. In 2000, the General Assembly extended the sunset on the Act until January 1, 2006. In 2005, the General Assembly approved a two-year extension of the Act, until January 1, 2008, in order to provide additional time to study alternatives to the Act. This act changes the sunset for the Bill Lee Act from January 1, 2008, to January 1, 2007. [77]

Part 1: Tax Credits for Growing Businesses

This act creates a new package of State tax incentives to replace the Bill Lee Act for most taxpayers. These incentives become effective January 1, 2007, and expire January 1, 2011. Taxpayers that are eligible for the later repeal date of the Bill Lee Act may choose to take credits under the current

---

[77] There are several exceptions to the 2007 sunset date. Interstate air couriers are eligible to claim the credits for business activity that occurs on or before January 1, 2010, provided that the interstate air courier entered into a real estate lease on or before January 1, 2006, with an airport authority that provides for the lease of at least 100 acres of land for a term of at least 15 years. 'Eligible major industries' that qualify as such before January 1, 2008, are also allowed to claim credits for business activity that occurs on or before January 1, 2010. A taxpayer is an eligible major industry if it will invest at least $100 million in acquiring, constructing, and equipping a facility and it is engaged in bioprocessing, the manufacture or distribution of pharmaceuticals or medicines, aircraft manufacturing, computer manufacturing, motor vehicle manufacturing, semiconductor manufacturing, or financial services, securities operation, or related systems of development. (See Part III of S.L. 2006-168) In addition, projects that are located in development zones are eligible for credits for business activities occurring before January 1, 2010, if all of the following conditions are met: before January 1, 2006, the taxpayer signs a letter of commitment with the Department of Commerce; the Secretary of Commerce makes a written determination that the taxpayer will invest $10 million and create at least 300 new jobs at the facility within a three-year period; and the taxpayer invests at least $4 million and creates at least 20 new jobs at the facility before January 1, 2006.

Act or under the new provisions of Article 3J of Chapter 105[78] Many of the provisions of Article 3J are similar or identical to the provisions of the Bill Lee Act. There are some significant differences however.

General administration. – By November 30 of each year, the Department of Commerce must assign a tier designation to each of the 100 counties in the State. In order to make these assignments, the Department must give each county a 'development factor'. A county's development factor is determined by ranking all counties based on the following factors: unemployment, median household income, percentage population growth, and per capita adjusted assessed property value. Regardless of the development factor, any county with a population of less than 12,000 is automatically included in the counties with the 40 highest rankings, any county with a population of less than 50,000 is automatically included in the counties with the 80 highest rankings, and any county with a population of less than 50,000 and more than 19% of its population below the federal poverty level is automatically included in the counties with the 40 highest rankings. Regardless of the development factor, a county first designated as a tier one area in one of the two previous years is included in the counties with the 40 highest rankings. The 40 counties with the highest ranking will be designated as development tier one,[79] the next 40 highest counties will be designated as development tier two, and the remaining counties will be designated as development tier three.

This tier designation differs in several keys ways from the Bill Lee Act. First, under the Bill Lee Act, counties are divided into five tiers rather than three. Second, in order to make the Bill Lee Act tier designations, the Department of Commerce ranks all 100 counties based on the following three factors: unemployment, average per capita income, and percentage growth in population. The tier designation under the new Article substitutes median household income for per capita income and adds the new factor related to adjusted assessed property value per capita. Third, under the new Article, the number of counties in a tier would be fixed. If one county received a lower tier designation because of the population or low-tier status exception, another county would be moved to a higher tier. Under the Bill Lee Act, the adjustments may move a county to a lower tier, but they do not result in any county being assigned to a higher tier. And last, the tier designation is made by November 30 of each year as opposed to December 31.

The Bill Lee Act also contains exceptions to the tier designation structure for certain multi-jurisdictional industrial parks. Under those exceptions, taxpayers located in certain industrial parks that are owned by multiple jurisdictions are eligible for credits as if they were located in the lower-tiered jurisdiction. The new Article retains these exceptions.

Development zones are another key feature of the Bill Lee Act. [80] Development zones were intended to be areas of high poverty within cities. Over the years, it has become clear that the

---

[78] The legislation created a new Article 3I. However, the codifier codified the new Article as 3J to avoid any potential confusion since the Article could easily be misinterpreted as Article 31.

[79] For the 2007and 2008 taxable years, there will be 41 counties in development tier one.

[80] Under the Bill Lee Act, the Department of Commerce is also responsible for designating development zones. Development zones were intended to be areas of higher poverty within urban centers. In order to be designated as a development zone, the area must satisfy all of the following conditions: every census tract or block group in the zone is located in a city with a population of at least 5,000, the zone has a population of at least 1,000, more than 20% of the population of the zone is below the poverty level, every census track or block group in the zone has more than 10% of its population below the poverty level or is immediately adjacent to a census tract or block group that has more than 20% of its population below the poverty level, and no census tract or block group in the zone is located in another development zone.

development zones often include areas that are neither high-poverty nor particularly urban. The new Article replaces development zones with urban progress (UP) zones. UP zones are more narrowly focused than development zones. First, an UP zone must be entirely within the corporate limits of a municipality with a population of at least 10,000. Development zones are located, at least partially, in a municipality with a population of at least 5,000. Second, UP zones must meet more stringent guidelines with respect to poverty within the zone. Third, the total area of all UP zones in a municipality may comprise no more than 15% of the area of a municipality. There is no similar restriction on development zones.

The new Article also creates a new type of zone in which the credits are enhanced. The Article authorizes the creation of agrarian growth (AG) zones and provides those areas with the same benefits provided to UP zones. An AG zone must satisfy the following conditions: it must be composed of contiguous census tracts or block groups located within a single county that does not have any municipality with a population in excess of 10,000; each census tract or block group in the zone must have more than 20% of its population below the poverty level; and the area of the zone, less its smallest census tract, may not exceed 5% of the total area of the county. The Department of Commerce shall designate an area as an AG zone upon the request of a local government.[81]

Under the new Article, all of the credits may be taken against the franchise tax levied in Article 3 of Chapter 105, the income taxes levied in Article 4 of Chapter 105, the gross premiums tax levied in Article 8B of Chapter 105, or a combination of these taxes. The credits allowed under the Bill Lee Act are also allowed against these taxes; however, unlike this new Article, under the Bill Lee Act, a taxpayer may take a credit against only one of the three taxes.

Under the new Article created by this act, the total amount of credits allowed may not exceed 50% of the amount of the taxpayer's combined tax liability for franchise, income, and gross premiums taxes. Under the Bill Lee Act, the credits are limited to 50% of the taxpayer's tax liability for the one tax against which the taxpayer chooses to apply it. As with the Bill Lee Act, this cap applies to the cumulative amount of credits for the current year and carryforwards of credits from previous years. Under the new Article, any unused portion of a credit with respect to the credit for creating jobs or investing in business property may be carried forward for the succeeding five years. This is also the standard carryforward period for the Bill Lee Act. Any unused portion of a credit with respect to the credit for investing in real property may be carried forward for the succeeding 15 years, as compared to the succeeding 20 years under the Bill Lee Act. Finally, as with the Bill Lee Act, credits with respect to a large investment (at least $150 million) may be carried forward for 20 years. The new Article shortens the carryforward period for some credits and eliminates some enhanced carryforward provisions altogether.

When filing a return for a taxable year in which the taxpayer engaged in activity for which the taxpayer is eligible for a credit, the taxpayer is required to submit a fee of $500 for each type of

---

Designation as a development zone is effective for two years. Location in a development zone leads to more favorable treatment for the taxpayer with respect to the wage standard, the credit for creating new jobs, the credit for investing in machinery and equipment, and the credit for worker training.

[81] S.L. 2006-66, Section 24.16, created AG zones under the Bill Lee Act. The AG zones under S.L. 2006-66 became eligible for Bill Lee credits in taxable year 2006. Under this act, the Bill Lee Act expires for taxable years beginning on or after January 1, 2007.

credit the taxpayer intended to claim with respect to an establishment.[82] The Bill Lee Act contains a similar fee requirement. Under the Bill Lee Act, there is a maximum fee of $1,500 per taxable year. Article 3J does not have a maximum fee amount.

As under the Bill Lee Act, each taxpayer claiming a credit under the new Article must provide any information required by the Secretary of Revenue to evaluate the eligibility of the taxpayer for the credit claimed.

As under the Bill Lee Act, the Department of Revenue and the Department of Commerce must report on various facets of the business tax incentives allowed under this new Article. By each May 1, the Department of Revenue must publish information itemized by credit and by taxpayer relating to the amount and tier designation of new jobs, new real property investment, and new business property. The Department of Commerce is required to make biennial reports on tax equity and the effectiveness of the tax incentives provided under this new Article. In addition to these periodic reports, the Department of Commerce, in consultation with the North Carolina Rural Center, Inc. and the lower-tiered counties, must develop additional strategies to enhance economic growth and development in enterprise tier one areas. The Department must report on the results of this study to the Joint Legislative Economic Development Oversight Committee by January 1, 2007.

As with the Bill Lee Act, credits under the new Article may not be taken more than six months after the deadline for filing the tax return (including extensions) on which they were claimed. This is more restrictive than is generally the case under North Carolina law. In general, an overpayment may be refunded only if the discovery is made or the written request for a refund made within 3 years of the date set by statutes for filing the return or within 6 months of the date of the overpayment, whichever is later.

Basic eligibility. – To be eligible for a credit under this new Article, a taxpayer must meet eligibility requirements with respect to type of business as well as established standards with respect to wages, health insurance, environmental impact, and health and safety programs. A taxpayer cannot claim the credit if the taxpayer has an overdue tax debt.

A business type generally is determined solely by reference to the primary activity of the particular establishment.[83] The following types of businesses are eligible for credits under the new Article:

- Aircraft maintenance and repair.
- Air courier services hub.

[82] The fee revenue is credited to the General Fund. Under the Bill Lee Act, three-fourths of the fees collected are retained by the Department of Revenue to administer and audit the credits and the remaining fee amounts are retained as departmental receipts by the Department of Commerce to administer the act. This act recognizes that the cost of administering the act extends years beyond the filing of the actual tax return and that the costs of adequately administering and auditing the credits exceeds the amount of fee revenue.

[83] The definition of 'establishment' under the new Article is different from the definition of 'establishment' under the Bill Lee Act. Generally, under the new Article, an establishment means a single physical location. Under the Bill Lee Act, an 'establishment' is defined by NAICS (North American Industry Classification System) as the smallest operating entity for which records provide information on the cost of resources – materials, labor, and capital – employed to produce the units of output. Under NAICS, an establishment is generally a single physical location; although there are many exceptions to this generality.

- Corporate headquarters, but only if additional eligibility requirements related to job creation are satisfied.
- Customer service call centers.
- Electronic shopping and mail order houses.
- Information technology and services.
- Manufacturing.
- Motorsports facilities.
- Motorsports racing teams.
- Research and development.
- Warehousing.
- Wholesale trade.

Business-type eligibility under the new Article is substantially different than under the Bill Lee Act. Under the Bill Lee Act, business type eligibility depends on several factors including the primary business of the taxpayer as a whole, the primary activity of the particular establishment, the location of the establishment, and the number of new jobs created. The following types of business are eligible under the Bill Lee Act:

- Air courier services, if the primary business of the taxpayer is air courier services.
- Data processing, if the primary business of the taxpayer is data processing.
- Manufacturing, if the primary business of the taxpayer is manufacturing, warehousing, or wholesale trade and the primary activity of the establishment is manufacturing.
- Warehousing, if the primary business of the taxpayer is manufacturing, warehousing, or wholesale trade and the primary activity of the establishment is warehousing, or if the primary activity of an establishment is warehousing, the establishment is located in an enterprise tier 1-3 area, and the establishment serves 25 or more establishments of the taxpayer.
- Wholesale trade, if the primary business of the taxpayer is manufacturing, warehousing, or wholesale trade and the primary activity of the establishment is wholesale trade.
- Computer services, if the primary activity of the establishment is computer services.
- Electronic mail order house, if the primary activity of the establishment is an electronic mail order house and the electronic mail order house is located in an enterprise tier one through three area and creates at least 250 new jobs.
- Customer service center, if the primary business of the taxpayer is financial services or telecommunications, the primary activity of the establishment is a customer service center, and the center is located in an enterprise tier 1-3 area.

- Central office or aircraft facility, if the primary activity of the establishment is a central administrative office or a training or maintenance center for an interstate air passenger carrier and the establishment creates at least 40 new jobs.

Under Article 3J, motorsports facilities and motorsports racing teams are eligible for credits whereas they are not currently eligible under the Bill Lee Act. A larger group of manufacturers, warehousers, wholesale traders, electronic mail order houses, and customer service centers are eligible for credits under the new Article than under the Bill Lee Act. Under the new Article, credits for central administrative office facilities are restricted to those facilities that are corporate headquarters, and the credit for information technology and services replaces the Bill Lee Act credits for data processing and computer services.

In order for a corporate headquarters to qualify for credits under the new Article, the establishment must create at least 75 new jobs within a 24-month period. A taxpayer that satisfies this job creation requirement is eligible for credits in the year in which the requirement is satisfied and the two succeeding years. A taxpayer that later creates an additional 75 new jobs in a 24-month period may be eligible for an additional three-year period of eligibility, but only if the job creation occurred outside of any other period of eligibility.

A taxpayer is eligible for a credit under the new Article 3J only if the jobs provided by the taxpayer meet a wage standard. As with the Bill Lee Act, no wage standard applies in the lower-tiered areas.[84] For development tiers two and three, the jobs provided by the taxpayer must pay at least the lower of 90% of the average county wage or 110% of the average State wage to qualify for a tax incentive. This differs significantly from the manner in which the wage standard is calculated under the Bill Lee Act. Under the Bill Lee Act, for enterprise tier areas three through five, the jobs provided by the taxpayer must pay at least 110% of the applicable average weekly wage. The applicable average weekly wage of the county is the lowest of the following: the average weekly wage for all insured private employers in the county, the average weekly wage for all insured private employers in the State, and the average weekly wage for all insured private employers in the county multiplied by the county income/wage adjustment factor.[85] Under the new Article, for activities that occur in UP zones or AG zones, the wage standard is lower than for activities that occur in development tiers two and three outside of UP zones or AG zones. For UP zones or AG zones, the wage standard is 90% of the lesser of the average county wage and the average State wage. Under the Bill Lee Act, there is no wage standard for activities occurring in development zones.

Under the new Article, the wage standard is calculated in different ways for the credit for creating jobs and the credit for investing in business property. For the credit for creating jobs, the average weekly wage of the jobs for which the credit is claimed and the average weekly wage of all jobs at the establishment with respect to which the credit is claimed will be required to meet the relevant wage standard. For the credit for investing in business property, the average weekly wage of all jobs at the establishment with respect to which the credit is claimed must meet the relevant wage standard. This is equivalent to how the wage standard is applied under the Bill Lee Act for the credits for creating jobs and for investing in machinery and equipment. As with the Bill Lee Act,

---

[84] Legislation enacted in 2002 eliminated the wage standard in enterprise tiers one and two under the Bill Lee Act. Under the new Article, no wage standard applies in development tier one. Development tier one under the new Article is roughly equivalent to enterprise tiers one and two under the Bill Lee Act.

[85] The county income/wage adjustment factor is the county income/wage ratio divided by the State income/wage ratio. The income/wage ratio is determined by dividing the average per capita income in the relevant jurisdiction by the annualized average wage for all insured private employers in the jurisdiction.

there is no wage standard for the credit for investing in real property because that credit is available only in the lower-tiered counties where the wage standard requirement does not apply.

Under the Bill Lee Act, all jobs, including part-time jobs, must be included in the wage standard calculation. However, part-time jobs that also provide health insurance are considered to have an average weekly wage at least equal to the relevant wage standard. For the purpose of calculating the wage standard, the weekly wage of a part-time job is converted to a full-time equivalency. Under the new Article, part-time jobs are not included in the calculation of the wage standard. As under the Bill Lee Act, all jobs that were filled for at least 1600 hours during the year in which the taxpayer engaged in the activity for which a credit was claimed would be included in the wage standard calculation under the new Article even if those jobs were not filled at the time the taxpayer claimed the credit.

As under the Bill Lee Act, a taxpayer is required to provide health insurance for all full-time jobs at the establishment in order to be eligible for a credit under the new Article. The taxpayer must pay at least 50% of the premiums for health insurance that met at least the minimum provisions of the basic health care plan of coverage recommended by the Small Employer Carrier Committee. Each year that a taxpayer claims an installment or carryforward of a credit, the taxpayer must provide certification that it continues to provide health insurance for all full-time employees. If the taxpayer ceases to provide health insurance, the credit expires and the taxpayer is not allowed to take any remaining installment or carryforward of the credit.

As under the Bill Lee Act, a taxpayer is ineligible for a credit under the new Article if the taxpayer has any pending administrative, civil, or criminal enforcement action based on alleged significant violation of any program implemented by an agency of the Department of Environment and Natural Resources or if the taxpayer has had any final determination of responsibility for any significant administrative, civil, or criminal violation of any program implemented by an agency of the Department of Environment and Natural Resources in the last five years. The Secretary of Environment and Natural Resources is required to notify the Department of Revenue of all persons who currently have any of these pending actions or who have had any of these final determinations in the past five years.

As under the Bill Lee Act, a taxpayer is ineligible for a credit under the new Article if the taxpayer had any outstanding violations under the Occupational Safety and Health Act that had become a final order for 'willful serious' or 'failure to abate serious' violations within the past three years. The Department of Labor must notify the Department of Revenue of all employers who have had these citations become final orders in the past three years.

As under the Bill Lee Act, a taxpayer is ineligible for a credit under the new Article if the taxpayer has any overdue tax debts. An overdue tax debt is any part of a tax debt that remains unpaid 90 days or more after a notice of final assessment was mailed to the taxpayer. A tax debt is a final assessment after all possibilities for appeal have been exhausted.

Expiration. – Under the Bill Lee Act, credits may expire for several reasons. If the taxpayer is no longer engaged in an eligible type of business or if the number of jobs of an eligible business falls below the minimum number required, the credit expires. Generally, if a credit expires, the taxpayer may not continue to take installments of the credit, but may continue to take carryforwards of installments that accrued in previous years.[86] The credit for creating jobs and the credit for

[86] Expiration of a credit because the taxpayer ceases to provide health insurance is an exception to this general rule. In that case, the taxpayer may not claim installments or carryforwards after the credit expires.

investing in machinery and equipment expire if the jobs are no longer filled or if the machinery and equipment are taken out of service used in an eligible business. The credit does not expire if the enterprise tier designation of an eligible taxpayer changes after the credit is first claimed. The credits under the new Article retain these expiration provisions.

Forfeiture. – Under the Bill Lee Act, a taxpayer forfeits a credit if the taxpayer was not eligible for the credit in the year in which the taxpayer engaged in the activity for which the credit was claimed. A taxpayer that forfeits a credit is liable for all past taxes avoided as a result of the credit plus interest. The past taxes and interest are due 30 days after the date the credit is forfeited. The credits under the new Article retain these forfeiture provisions.

Credit for creating jobs. – A taxpayer is allowed a credit for creating new full-time jobs. In order to be eligible for this credit, the taxpayer must meet a job creation threshold based on the development tier designation of the location where the jobs are created.[87] If the taxpayer creates jobs in more than one county during a year, the threshold applies separately to each county. If the taxpayer creates jobs at more than one establishment in a single county during a year, the threshold applies jointly to all establishments within the county. In addition, the amount of the credit varies depending on the development tier designation of the area in which the job is located. A job is located in an area if 50% or more of the employee's duties are performed in the area. The full amount of the credit cannot be taken in the first year, but instead must be taken in four equal installments beginning with the taxable year following the year in which the employee was hired. Jobs transferred from one part of the State to another do not qualify for the credit. In addition, jobs transferred within the State from a related member of the taxpayer to the taxpayer do not qualify for the credit. The amount of the credit and the job creation threshold are equal to the amounts in the following table based on the development tier area in which the job is located. In addition, a job created in an UP zone or an AG zone is eligible for an additional credit of $1,000 and if that job is filled by a resident of the zone or a long-term unemployed worker,[88] it would be further increased by an additional $2,000.

Area Development Tier	Amount of Credit	Threshold
Tier One	$12,500	5
Tier Two	5,000	10
Tier Three	750	15

Under the new Article, if in one of the four years in which the installment of a credit accrues, the jobs with respect to which the credit was taken were unfilled, the credit related to those specific jobs would expire and the taxpayer would not be allowed to take any remaining installments of the credit. If, in one of the four years in which the installment of a credit accrues, the total number of jobs fell below the sum of the applicable job creation threshold and the number of jobs existing in the year before the new jobs were created, the credits with respect to all the new jobs would expire and the taxpayer would not be allowed to take any remaining installments of the credits. If, in one of the four years in which an installment of the credit accrued, a job that qualified for the credit was subsequently transferred to another area, the remaining installments of the credit would be calculated as if the job had been initially located in the later area.

[87] For jobs created in an UP zone or an AG zone, the threshold applicable to development tier one would apply.
[88] A 'long-term unemployed worker' is defined as an individual that has been totally unemployed for at least the preceding 26 consecutive weeks.

Under the new Article, a taxpayer that plans to create new jobs in a specific area during the next two years may sign a letter of commitment with the Department of Commerce in order to lock-in the current year's development tier designations for the purposes of this credit. If the taxpayer created the jobs within the next two years, the taxpayer would be allowed to compute the amount of the credit based on the designations in effect in either the year in which the letter of commitment was signed or the year in which the jobs were created. If the taxpayer did not create the jobs in the next two years, the taxpayer could still claim a credit under the existing tier designation if the jobs were later created.

A taxpayer cannot claim a credit under the new Article and under the Bill Lee Act with respect to the same job. This restriction is important because the Bill Lee Act will remain in effect for a limited group of taxpayers until 2010.

There are several significant differences between the new credit for creating jobs and the credit that currently exists under the Bill Lee Act. First, the Bill Lee Act credit does not require the taxpayer to meet a job creation threshold whereas the new credit does. Second, the amount of the credit per job is more generous for some taxpayers under the new credit than under the existing Bill Lee Act credit. And third, the credit is based on the average number of jobs filled during the year rather than the year-end total.

Credit for investing in machinery and equipment. – Under this act, a taxpayer is allowed a credit for the amount by which the cost of the eligible investment amount of business property placed into service during a taxable year exceeds a threshold. The eligible investment amount is the lesser of (i) the cost of the eligible business property and (ii) the net increase in eligible business property over the base year (the year of the preceding three years in which the taxpayer had the largest amount of business property in service in the State). In order to be eligible for the credit, the taxpayer must place new business property into service in excess of a threshold based on the development tier designation. The credit is taken in four equal installments, beginning the year after the equipment is placed in service. The amount of the credit is equal to a percentage of the eligible investment amount of the business property. If the taxpayer places eligible business property into service in more than one county during a year, the threshold applies separately to each county. If the taxpayer places eligible business property into service at more than one establishment in a single county during a year, the threshold applies jointly to all establishments within the county. The following table sets out the relevant percentage and threshold for each development tier area:

Area Development Tier	Threshold	Credit Percentage
Tier One[89]	$ – 0 –	7%
Tier Two	1,000,000	5%
Tier Three	2,000,000	3.5%

If in one of the four years in which the installment of a credit accrues, the business property with respect to which the credit was taken is disposed of, moved out of State, or taken out of service, the credit expires and the taxpayer may not take any remaining installments of the credit unless the cost of that business property is offset in the same taxable year by the taxpayer's new investment in business property. If eligible business property that qualifies for a credit is

[89] For the purposes of this credit, investment that occurs in an UP zone or an AG zone is subject to the threshold and percentage applicable to activity that occurs in a development tier one area.

subsequently transferred to another area, the remaining installments of the credit are calculated as if the business property had been initially located in the later area.

A taxpayer that plans to place specific business property in service at a specific location within the next two years may sign a letter of commitment with the Department of Commerce in order to lock-in the current year's development tier designation for the purposes of this credit. If the taxpayer places the eligible business property in service within the next two years, the taxpayer may compute the amount of the credit based on the designations in effect in either the year in which the letter of commitment was signed or the year in which the business property is placed in service. If the taxpayer does not place the business property in service in the next two years, the taxpayer may still claim a credit under the existing tier designation if the business property is later placed in service.

A taxpayer cannot claim a credit under the new Article 3J and under the Bill Lee Act with respect to the same business property. This restriction is important because the Bill Lee Act will remain in effect for a limited group of taxpayers until 2010.

There are significant differences between the new credit for investing in business property and the credit currently allowed under the Bill Lee Act for investing in machinery and equipment. First, the thresholds under the new credit differ from the thresholds under the existing credit. Second, the definition of 'business property' under the new credit is broader than the definition of 'machinery and equipment' under the existing credit. Third, the percentage that determines the amount of the credit under the new credit differs from the percentage for the existing credit for some taxpayers. And lastly, the new credit is taken in equal installments over four years rather than seven.

Credit for substantial investment in other property. – Under this act, a taxpayer that is located in a development tier one area is eligible for a credit for investment in real property. In order for the taxpayer to claim this credit, the Secretary of Commerce must make a written determination that the taxpayer is expected to invest at least $10 million in real property at a location within a three-year period and that the taxpayer will create at least 200 new jobs at the location within two years of the time that the property is first used in an eligible business. The taxpayer may begin to claim the credit once the property is first used in an eligible business. The amount of the credit is equal to 30% of the eligible investment amount and must be taken in installments over a seven-year period. The new credit does not have a ceiling on the amount of credit that may be taken. The credit for investment in real property expires if the number of people employed at the location falls below 200.

A taxpayer cannot claim both the new credit for investment in real property and either of the existing Bill Lee Act credits for investment in real property with respect to the same property. This restriction is important because the Bill Lee Act will remain in effect for a limited group of taxpayers until 2010.

The only significant difference between the new credit for investment in real property and the Bill Lee Act credit for substantial investment in other property is the carryforward period. Under the Bill Lee Act, unused portions of the credit can be carried forward for up to 20 years. Under the new Article, unused portions of the credit may be carried forward for up to 15 years.

Expiring credits. – The Bill Lee Act contains five credits that do not have a counterpart in this new Article. Those credits are as follows:

- Technology commercialization credit. The technology commercialization credit is essentially an enhanced version of the credit for investing in machinery and equipment for taxpayers that are making significant investments in certain types of machinery and equipment. There is no similar enhancement in the new Article; however, the technology commercialization credit was designed with a specific project in mind that never came to fruition and, therefore, the credit has never been claimed.
- Credit for research and development. The Bill Lee Act contained a credit for research and development expenditures. In 2004, the General Assembly created a new, stand-alone credit for research and development (See Article 3G of Chapter 105 of the General Statutes). Therefore, no similar credit is included in the new Article.
- Credit for worker training. The Bill Lee Act contains a credit with which a taxpayer could offset certain worker training expenses. There is no similar credit in the new Article.
- Credit for investing in central office or aircraft facility property. The Bill Lee Act contains a credit for investing in central office or aircraft facility property. The credit is equal to 7% of the eligible investment amount and is capped at $500,000. There is no similar credit in the new Article though a business that would have been eligible for this credit under the Bill Lee Act is eligible for the credit for investing in real property under the new Article if the requirements of that credit are satisfied.
- Credit for development zone projects. This credit allows a taxpayer to claim a credit equal to 25% of a donation to a development zone agency for an improvement project in a development zone. There is no similar credit in the new Article.

Extension of Bill Lee Act for taxpayers signing a letter of commitment. – This act allows certain taxpayers to claim credits under the Bill Lee Act rather than the new Article in certain circumstances. There are any number of companies that are currently considering expanding in or relocating to North Carolina. Many of the expansions or relocations have been considered assuming that the credits allowed under the Bill Lee Act would be available through at least its current repeal date, 2008. For some taxpayers, the Bill Lee Act would allow for more generous credits, whereas for other taxpayers the credits under the new Article 3J would be more generous. The act allows taxpayers that sign a letter of commitment with the Department of Commerce on or before December 31, 2006, that describes the specific project to claim credits under the Bill Lee Act for the 2007 taxable year rather than under the new Article. The legislation clarifies that if a taxpayer elects to take any credit under the Bill Lee Act during the 2007 taxable year, the taxpayer may not take any credit under the new Article with respect to the same establishment for that taxable year. This restriction prevents a taxpayer from picking and choosing which Article would be more beneficial for each particular credit.

Part 2: Conforming Changes

Part II of the act makes a number of conforming changes. Since the creation of the Bill Lee Act in 1996, many other programs have adopted the enterprise tier designation as a proxy for the economic viability or the available resources of a county. Many of these programs deal with economic development, but the tier structure has also been adopted as a proxy in areas such as animal control and wetlands mitigation. In addition, some programs refer to other aspects of the Bill Lee Act such as development zones or the wage standard. Because the Article created in Part I of this act largely replaces the Bill Lee Act, the changes in Part II of this act should help to lessen

confusion that would be inherent in the use of two different tier systems. Because the tier structures are not equivalent, the changes in this Part will benefit some areas while reducing benefits to other areas. The changes are briefly summarized below.

Research & development expenses. – Section 2.1 conforms the credit for research and development expenses to the new tier structure. Under current law, the credit for research and development expenses is more generous if the research is conducted in an enterprise tier one, two, or three area. Under this act, research conducted in a development tier one area will be eligible for the more generous credit. Because development tier one will contain fewer counties than enterprise tiers one, two, and three combined, this change could result in some taxpayers being eligible for a smaller credit.

Section 2.20 conforms eligibility requirements for the credit for research and development to the new Article. Under current law, in order to be eligible for that credit the taxpayer must satisfy the wage standard, health insurance, environmental impact and safety and health record requirements under the Bill Lee Act. This section changes the reference to those requirements under the new Article. This change could have the effect of making more taxpayers eligible for the credit because the wage standard requirement under the new Article is less strenuous than the requirement under the Bill Lee Act.

Sales & use tax refund for low enterprise tier machinery and equipment. – Section 2.2 conforms the sales and use tax refund for low enterprise tier machinery and equipment to the new tier structure. Under current law, a taxpayer is eligible for a refund of sales and use tax paid at the general rate on machinery and equipment put into service in enterprise tier one and two areas. This section adds a reference to development tier one. Because development tier one is expected to be roughly equivalent to, though including more counties than, enterprise tiers one and two combined, this change should have limited effect.

Sales & use tax refund on building materials for major eligible industrial facilities. – Section 2.3 conforms the sales and use tax refund on building materials for major eligible industrial facilities to the new tier structure. Under current law, a taxpayer must invest at least $50 million in an eligible facility in an enterprise tier one, two, or three area or $100 million in an eligible facility in an enterprise tier four or five area to be eligible for the refund. This section changes the requirement so that the $50 million threshold applies to facilities in development tier one and the $100 million threshold applies to facilities in tiers two and three. Because development tier one will contain fewer counties than enterprise tiers one, two, and three combined, this change could result in some taxpayers being ineligible for a refund.

Industrial Development Fund. – Section 2.4 makes changes to the Industrial Development Fund to conform to the tier designation changes. Local government units in enterprise tiers one, two, and three are eligible for grants from the Fund to help create jobs. The grant funds may be used in limited ways mostly related to the provision of infrastructure, equipment, or building repairs. Generally, a local match is required unless the local government unit is in an enterprise tier one area. This provision would make the counties that have the 65 highest rankings (development tier one and slightly more than half of development tier two) eligible for grants from the Fund. In addition, no local match could be required for the counties that have the 25 highest rankings (slightly more than half of development tier one). The intent was to maintain the status quo with respect to the Industrial Development Fund.

Community Development Block Grant funds. – Section 2.4 conforms the guidelines adopted by the Department of Commerce relating to community development block grant funds to the new tier

structure. Under current law, those guidelines must ensure that grants awarded in enterprise tier one areas do not require a local match and that priority is given to projects in enterprise tier one areas and development zones. This section changes those references. The reference to enterprise tier one is changed to the counties that have the 25 highest rankings (slightly more than half of development tier one) and the reference to development zones is changed to UP zones. Because the counties that have the 25 highest rankings would be roughly equal to enterprise tier one, this change should maintain the status quo with respect to enterprise tier one areas. On the other hand, because UP zones are more restrictive than development zones, this change could have the effect of eliminating some projects from priority consideration.

Jobs Development Incentive grants. – Section 2.6 changes a definitional reference under the JDIG statutes.

Section 2.7 conforms the JDIG job creation requirements to the new tier structure. Under current law, a business must create at least 10 new jobs in an enterprise tier one, two, or three area or 20 new jobs in an enterprise tier four or five area to be eligible for consideration for JDIG. This section changes those requirements so that a business must create at least 10 new jobs in a development tier one area or 20 new jobs in a development tier two or three area to be eligible for consideration. Because development tier one will contain fewer counties than enterprise tiers one, two, and three combined, this change could result in some taxpayers being ineligible for consideration for JDIG. However, all businesses that have received JDIG grants have created far more jobs than the minimum required; therefore, this change will not likely have any practical effect.

Section 2.8 conforms a reference to tiers under the JDIG reporting requirements.

Section 2.9 conforms the JDIG grant reduction requirements to the new tier structure. Under current law, a business that is located in an enterprise tier four or five area when the grant is awarded would have the amount of a grant reduced by 25%, with that reduction flowing to the Utility Account of the Industrial Development Fund rather than to the business. This section changes that reference. Under this provision, for development tier three, the amount of the reduction remains at 25% and for development tier two, the reduction is equal to 15%. This section roughly maintains the status quo in enterprise tier five, provides a benefit to enterprise tier four, and lessens the amount of the grant for enterprise tier three.

Tax increment financing. – Section 2.10 conforms a provision relating to tax increment financing to the new tier structure. This section expands an exception created for financing districts related to tourism-related economic development projects. Under current law, this exception is allowed only in an enterprise tier one area. This section allows that exception in a development tier one area. Because development tier one would contain more counties than enterprise tier one, this change expands the exception.

Spay/Neuter Account. – Section 2.11 conforms provisions dealing with the Spay/Neuter Account to the new tier structure. Under existing law, there is an account that helps offset the cost incurred by cities and counties for the spaying and neutering of animals. Fifty percent of the funds in the account are reserved for cities and counties in enterprise tiers one, two, and three. The remaining 50% is reserved for cities and counties in enterprise tiers four and five. If there are excess funds after all needs have been met in enterprise tier one, two and three areas, those funds are transferred and used in enterprise tier four and five areas. The funds designated for a group of tier areas are then allocated based on population. This section changes this breakdown so that the division is between development tier one areas and development tier two and three areas. Because

development tier one will contain fewer counties than enterprise tiers one, two, and three combined, this change could result in some cities and counties getting more assistance and some cities and counties getting less assistance.

Farmland Preservation Trust Fund. – Section 2.12 conforms a provision relating to agricultural easements and the Farmland Preservation Trust Fund to the new tier structure. Under current law, enterprise tier one, two, and three counties that have prepared countywide farmland protection plans are not required to match funds from the Farmland Preservation Trust Fund used to purchase agricultural easements. This section changes that reference to development tier one. Because development tier one will contain fewer counties than enterprise tiers one, two, and three combined, this change could result in some counties being newly subject to the match requirement.

Clean Water Management Trust Fund. – Section 2.13 corrects a definition relating to the Clean Water Management Trust Fund. The Article establishing the Fund refers to an "economically distressed county as defined by G.S. 105-129.3". Although G.S. 105-129.3 is the statute that specifies tier designation under the Bill Lee Act, there is no definition in that statute of an 'economically distressed county'. There is, however, a definition of an economically distressed county under the statute dealing with the Industrial Development Fund. This provision corrects that statutory reference. As discussed above, the definition under the Industrial Development Fund was changed in section 2.4 of this act, but that change roughly maintained the status quo.

Wetlands mitigation. – Sections 2.14 through 2.17 conform provisions dealing with wetlands mitigation to the new tier structure. Under current law, when the State purchases land for wetlands mitigation it is required to make a payment in lieu of taxes to the county in which the land is located if the county is an enterprise tier one or two area. These sections change those references to development tier one area. Because development tier one would have slightly more counties than enterprise tiers one and two combined, this change would require the State to make these payments in more instances.

Condemnation of unsafe buildings. – Sections 2.18 and 2.19 conform provisions dealing with condemnation of unsafe buildings to the new tier structure. Under current law, cities have more flexibility in condemning nonresidential buildings as unsafe if the building is located in a 'community development target area'. A community development target area is one that has characteristics of a development zone or similar characteristics. These sections change the references from development zone to UP zone. Because of the amorphous nature of the definition of 'community development target area', this change should not have any impact.

Tax secrecy statute. – Section 2.21 amends the statutes relating to tax secrecy to ensure that the Department of Revenue may share information that is needed to administer the new Article with the Department of Commerce.

Mill rehabilitation tax credit. – Sections 2.22 through 2.24 amend the statutes relating to the mill rehabilitation tax credit passed earlier this year by the General Assembly in S.L. 2006-40. The mill rehabilitation tax credit is larger if the eligible site is located in an enterprise tier one, two, or three area. These sections change those references to development tiers one and two. Because development tiers one and two include more counties than enterprise tiers one, two, and three, these sections effectively allow for more generous credits at more sites.

Internet data centers. – Section 2.25 conforms the provisions of the sales and use tax exemption for eligible Internet data centers to the new tier structure. S.L. 2006-66, the 2006 Appropriations Act,

created a sales and use tax exemption for certain Internet data service centers. In order to be eligible for that exemption, the center has to be located in an enterprise tier one, two, or three area. This section changes that reference to development tiers one and two, thereby enlarging the number of counties in which the center could be located and remain eligible for the exemption. In addition, this section makes technical changes requested by the industry for which the exemption was requested.

Definition of NAICS. – Section 2.26 cross references the definition of NAICS for sales and use tax purposes to the definition used under the Article created by this act.

2005 Finance Law Changes

COMPUTER MANUFACTURING TAX INCENTIVES.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-204	**S 2 Extra Session**	**Sen. Hoyle**

AN ACT TO PROVIDE A TAX CREDIT FOR CERTAIN MAJOR COMPUTER MANUFACTURING FACILITIES AND TO ENHANCE CERTAIN EXISTING TAX INCENTIVES FOR THOSE FACILITIES.

OVERVIEW: The act provides the following income, franchise, and sales tax incentives for a computer manufacturing facility that, along with related parties and strategic partners, is expected to invest at least $100 million of private funds in a facility in the State over a five-year period and employ at least 1,200 people within five years after the facility is used as a computer manufacturing and distribution facility:

- A new tax credit based upon the unit output and increased employment level of a major computer manufacturing and distribution facility. This credit may be used to eliminate 100% of a taxpayer's income and franchise tax liability. Any unused portion of the credit may be carried forward for the next succeeding 25 years.
- Enhanced Bill Lee Act tax credits that entitle a taxpayer to claim the credit amounts allowed for facilities located in a development zone regardless of the county in which the facility is located. The act also provides that the wage standard does not apply to the activities of a taxpayer at a major computer facility.
- An expansion of the sales tax refund, enacted by the 2003 General Assembly[1] for building materials purchased to build a computer manufacturing facility.

FISCAL IMPACT:

Description	*General Fund Impact*
Computer Manufacturing Credit	$10 million loss for 2005-2006 $10 million loss for 2006-2007 $20 million loss for 2007-2008 $20 million loss for 2008-2009 $20 million loss for 2009-2010
Bill Lee Act Changes Jobs Credit	 $600,000 loss for 2008-2009 $1 million loss for 2009-2010
Machinery/Equipment Credit	$300,000 loss for 2007-2008 $500,000 loss for 2008-2009 $900,000 loss for 2009-2010

[1] S.L. 2003-435

Worker training Credit Real property Credit	$500,000 loss for 2007-2008 $400,000 loss for 2008-2009 $600,000 loss for 2009-2010 $1.3 million loss for 2006-2007 $1.3 million loss for 2007-2008 $2.6 million loss for 2008-2009 $2.6 million loss for 2009-2010
Sales Tax Refund Expansion	No fiscal impact anticipated
Grand Total of losses	$11.3 million loss for 2006-2007 $22.1 million loss for 2007-2008 $24.1 million loss for 2008-2009 $25.1 million loss for 2009-2010

The amount of the computer manufacturing credit expected to be taken between 2005 and 2020 is $450 million. The amount of the Bill Lee Act credits expected to be taken between 2005 and 2020 is $42.8 million.

(For a more complete fiscal analysis, see Overview Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library)

EFFECTIVE DATE: See Analysis for effective dates.

ANALYSIS: The Governor convened the Extra Session of the 2004 General Assembly to consider new and enhanced incentives for an eligible computer manufacturing and distribution facility. The following incentives were enacted by the General Assembly to persuade Dell Computer Corporation to locate a manufacturing facility in North Carolina:

Tax Credit based upon Unit Output of a Computer Manufacturing and Distribution Facility

Section 1 of the act creates a new tax credit for an eligible computer manufacturing and distribution facility.[2] The amount of the credit is based upon the facility's unit output and increased employment level. The credit is effective for business activities occurring on or after November 1, 2004, and for taxable years beginning on or after January 1, 2005. The credit expires for business activities occurring in taxable years beginning on or after January 1, 2020.

The tax credit may be taken against the taxpayer's franchise tax or income tax. The taxpayer must elect the percentage of the credit to be applied against the franchise tax with any remaining percentage to be applied against the taxpayer's income tax liability. Unlike other incentive tax credits, the election is NOT binding for either the year in which it is taken or for any carryforwards of the credit. A taxpayer may elect a different allocation for each year the taxpayer qualifies for a credit. A taxpayer may not claim a credit that exceeds 100% of the taxpayer's tax liability. Most other tax incentives allow the taxpayer to offset no more than 50% of its tax liability. Any unused portion of a credit may be carried forward for the next succeeding 25 years.

Credit Eligibility – To be eligible for this credit, the taxpayer must meet the following employment conditions:

- The Department of Commerce must make a written determination that the taxpayer has or is expected to have an increased employment level of at least 1,200 new full time jobs

[2] "Computer manufacturing" is defined in G.S. 105-164.14, as amended by this act. "Facility" is also defined in the act.

OR new permanent part-time jobs converted into full-time equivalences within five years after the facility is operational.

- The taxpayer may meet this employment threshold either directly or indirectly through one or more related entities and strategic partners.[3] In order for a taxpayer to include jobs created by related entities and strategic partners in its increased employment level, the taxpayer must obtain their written consent to do so. Once granted, this consent is irrevocable. A job may not be included in the increased employment level of more than one entity. This credit is the first one the State has enacted that allows a taxpayer to meet an employment threshold indirectly through related entities and strategic partners.

- The taxpayer and the taxpayer's related entities and strategic partners must provide health insurance[4] for all of the full-time jobs each year it claims a credit or carryforward of a credit. The taxpayer does not have to provide health insurance for its part-time jobs. This condition is the same as the health insurance condition under the Bill Lee Act.

To be eligible for this credit, the taxpayer must meet the following investment condition:

The Secretary of Commerce must make a written determination that the taxpayer has invested or is expected to invest at least $100 million of private funds in a computer manufacturing and distribution facility over a five-year period. The investments may be made either directly or indirectly through related entities and strategic partners.

To be eligible for the credit, the taxpayer must also meet the following conditions that are typically required under other State tax incentives:

- The taxpayer and the taxpayer's related entities and strategic partners have no pending administrative, civil, or criminal enforcement actions based on alleged significant environmental violations, nor have they had a final determination of responsibility for any significant environmental violation within the past five years.

- The taxpayer and the taxpayer's related entities and strategic partners have no citations under the Occupational Safety and Health Act that have become a final order within the past three years for willful serious violations or for failing to abate serious violations.

- The taxpayer and the taxpayer's related entities and strategic partners have no overdue tax debts that have not been satisfied or otherwise resolved.

The taxpayer must apply to the Secretary of Commerce for the required eligibility determinations. The application must be made under oath. The determination is a question of fact and must be made whenever a taxpayer can demonstrate performance or provide a credible plan for performance. If the taxpayer does not perform as promised, the taxpayer does not forfeit any of

[3] The act defines a "related entity" as an entity for which the taxpayer possesses directly or indirectly at least 80% of the control and value. The act defines "strategic partner" as a business that is engaged in activities at the facility that directly contribute to the manufacture and distribution of computers and computer peripherals and with whom the taxpayer has contracted to provide those activities at the facility in direct support of its manufacturing and distribution activities.

[4] An entity provides health insurance if it pays at least 50% of the premiums for health care coverage that equals or exceeds the minimum provisions of the basic health care plan of coverage recommended by the Small Employer Carrier Committee pursuant to G.S. 58-50-125. This provision is the same as the insurance provisions of the Bill Lee Act.

the credits already taken, unless the assertions of the taxpayer can be proven to have been false when made.[5]

Credit Amount - The credit amount and conditions vary from year to year based on complicated formulas. The actual amount of the credit is computed in two steps. First, one must determine the lesser of the cap and an amount determined by multiplying the number of units produced at the facility by a dollar amount. In some cases, this amount would be adjusted downward based on how much the actual increased employment level is below certain targets. In other situations, no downward adjustment is made for reductions in increased employment level.

If the amount of the credit computed in the first step is less than the cap, then the amount can be brought up to the cap by using amounts in a make up account. The make up account includes amounts by which prior year formula calculations exceeded the applicable caps. These amounts must be used within seven years. This credit is the first one the State has enacted that allows a taxpayer to carry forward credit amounts that could not be used because they exceeded the caps. It is also the first time the State has allowed a taxpayer to meet a cap by using prior year excesses.

In 2005, the taxpayer may claim a credit equal to $10 million if the taxpayer has invested at least $25 million by the end of the taxable year to construct a computer manufacturing and distribution facility. The investment may be made either directly by the taxpayer or indirectly through related entities.

For taxable years 2006 - 2009, the maximum credit allowed is $10 million. The actual amount of the credit is determined by the increased employment level of the taxpayer at the facility and the number of consumer-ready computers and computer peripherals produced, assembled, or manufactured by the facility during that taxable year, hereinafter referred to as 'unit output of facility'. The formula is as follows:

Credit amount = (Employment level adjustment factor)(Production factor)(Unit output of facility)

The employment level adjustment factor is the lesser of 1 or the increased employment level for the year divided by the applicable target increased employment level. Assuming the taxpayer meets the increased employment levels stated in the act, the adjustment factor would be 1. If the taxpayer fails to meet the targeted increased employment levels, then the factor would be a percentage less than 1, thereby reducing the amount of credit available to the taxpayer for that taxable year. The target increased employment level and the production factor vary for tax years 2006-2009 as follows:

Year	Increased employment level	Production factor
2006	600	$15
2007	1,000	$6.25
2008	1,100	$6.25
2009	1,500	$6.25

[5] One could argue that there is the potential for a court to find that allowing a credit for nothing more than a finding by the Secretary of Commerce violates the constitutional provision prohibiting the General Assembly from delegating the taxing authority because it potentially gives the executive branch the authority to pick and choose which taxpayers will receive credits. Under current law, when a taxpayer receives a tax benefit based on a determination by the Secretary regarding expected future activity, the tax benefits are subject to forfeiture if the taxpayer does not perform as expected. Because there is no forfeiture under the credit created in this act, if the taxpayer does not produce the expected jobs or make the expected investment, one could argue that the General Assembly has delegated its taxing authority to the Secretary.

For taxable years 2010-2014, the maximum credit amount depends upon the increased employment level attained by the taxpayer at the facility for which the credit is claimed.

- If the taxpayer has EVER attained an increased employment level of at least 1,500 at the facility for which the credit is claimed, then the credit amount for taxable years 2010-2014 is the unit output of the facility multiplied by $6.25 or $15 million, whichever is less. The credit amount would be reduced if the taxpayer's increased employment level decreased by more than 40% from that of the previous year. The reduction would be a percentage reduction equal to the increased employment level for the taxable year divided by 1,500.

- If the taxpayer never attained an increased employment level of at least 1,500, then the maximum credit amount remains at $10 million and the amount of the credit is reduced for any year the taxpayer does not reach an increased employment level of 1,500. The formula for determining the credit amount is:

  Credit = (Employment level adjustment factor)(Unit output of facility)($6.25)

  The employment level adjustment factor is the lesser of one and the number derived by dividing the taxpayer's increased employment level for the taxable year by 1,500.

For taxable years 2015-2019, the maximum credit amount may be increased to $20 million if the taxpayer has in ANY year attained an increased employment level of 2,500 at the facility for which the credit is claimed. The credit amount continues to vary depending upon the maximum increased employment level EVER attained and the current increased employment level.

- If the taxpayer has EVER attained an increased employment level of 2,500 AND the taxpayer's increased employment level for the current year is at least 1,500, then the credit amount is the unit output of the facility multiplied by $6.25 or $20 million, whichever is less.

- If the taxpayer has EVER attained an increased employment level of 2,500 BUT the taxpayer's increased employment level for the current year is less than 1,500, then the credit amount is the unit output of the facility multiplied by $6.25 or $15 million, whichever is less. The credit amount would be reduced if the taxpayer's increased employment level decreased by more than 40% from that of the previous year AND the increased employment level of the previous year was 1,500 or less or the increased employment level for the current year is 900 or less.

- If the taxpayer has EVER attained an increased employment level of 1,500, but has never attained an increased employment level of 2,500, then the credit amount is the unit output of the facility multiplied by $6.25 or $15 million, whichever is less. The credit amount would be reduced if the taxpayer's increased employment level decreased by more than 40% from that of the previous year AND the increased employment level of the previous year was 1,500 or less or the increased employment level for the current year is 900 or less.

- If the taxpayer has never attained an increased employment level of at least 1,500, then the maximum credit amount remains at $10 million and the amount of the credit is reduced for any year the taxpayer does not reach an increased employment level of 1,500.

Constitutional Concerns - The credit set out in Section 1 of the act would be vulnerable to attack under the reasoning of the *Cuno* decision because it evinces a clear preference for in-State economic activity at the expense of out-of-state development. On September 2, 2004, the Sixth

Circuit Court of Appeals issued its decision in *Cuno v. DaimlerChrysler*, 386 F.3d 738, (2004, 6th Cir. (Ohio)). In that decision, the Court found that Ohio's investment tax credit violated the Commerce Clause of the United States Constitution because it (a) encouraged in-state economic development at the expense of out-of-state economic development and (b) allowed the taxpayer to reduce pre-existing income tax liability by investing in-state but not by investing out-of-state.

Although the Sixth Circuit's decision is not binding in North Carolina[6] and is subject to further review[7] a similar case could be brought in this jurisdiction. If a decision applicable in this jurisdiction followed the reasoning of the Sixth Circuit opinion, the credit set out in Section 1 of the act would be ruled unconstitutional. If that happened, it is uncertain what the remedy would be. Possible remedies could include ordering the State to provide retroactive credits to otherwise similarly situated taxpayers who had made similar investments in other states.

The credit could also be vulnerable to attack on equal protection grounds because the amount of the credit is based, in part, on the maximum increased employment level ever attained by the taxpayer and not just on the current increased employment level of the taxpayer. Under this proposal, two companies that have identical output and increased employment levels in the current year could be eligible for substantially different credits based on the increased employment level attained in an earlier year.

For example, consider two companies – CorpA and CorpB. In 2010, CorpA has an increased employment level of 1,500 and CorpB has an increased employment level of 1,200. In that year, CorpA is eligible for a maximum credit of $15 million and CorpB is eligible for a maximum credit of $8 million. Further assume that in 2011, CorpA reduces its increased employment level to 1,200 and CorpB maintains its increased employment level at 1,200. CorpA remains eligible for a maximum credit of $15 million while CorpB remains eligible for a maximum credit of $8 million. Under this example, in 2011, two corporations with identical output and increased employment levels would be eligible for vastly different credits. A court could find that there is no rational basis for awarding CorpA almost double the amount of credit just because it once had an increased employment level of 1,500. In fact, one could argue that the distinction is irrational because the company that has laid off employees is the one that qualifies for the larger credit.

This problem is exacerbated in certain situations. Once a taxpayer has attained an increased employment level of 1,500, it can reduce its labor force by up to 40% a year without a reduction in the maximum amount of credit for which it is eligible. Continuing the example cited above, CorpA could reduce its increased employment to 900 in 2011 and still be eligible for a maximum credit of $15 million. In that case, CorpA would have less of a positive impact (i.e. 900 new jobs as opposed to 1,200 new jobs) in 2011 than CorpB, but be eligible for a much larger credit.

Other Considerations – The credit, as enacted raises the following additional issues:

- The method for calculating the amount of a credit for which a taxpayer is eligible is extremely complicated. This may result in additional compliance and auditing burdens.
- There is no provision regarding expiration of a credit if the increased employment level is not maintained. Generally under prior law, when a taxpayer was allowed a credit for a certain activity, the credit expired if the activity was not maintained. For example, in order

[6] The decision is binding only in the states that compose the Sixth Circuit: Kentucky, Michigan, Ohio, and Tennessee.
[7] The United States Supreme Court will hear this case during the 2005-2006 Term.

for a taxpayer to take full advantage of the credit for creating jobs under the Bill Lee Act, those jobs must be maintained for a number of years.

The credit in this act is designed in a way that allows the taxpayer, under certain circumstances, to take the full benefit of a credit even if increased employment levels are not maintained. Once a taxpayer has attained an increased employment level of at least 1,500, the taxpayer may reduce its increased employment level by up to 40% each year without being subject to a reduction in the maximum amount of the credit for which it is eligible. For example, if a taxpayer has an increased employment level of 1,500 in 2010, the taxpayer would be eligible for a maximum credit of $15 million per year. In 2011, the taxpayer could reduce its increased employment level to 900 while maintaining eligibility for up to $15 million per year in tax credits. Then, in 2012, the taxpayer could reduce its increased employment level to 540 while still maintaining eligibility for a maximum credit of $15 million.

Taken to the mathematical extreme, it is theoretically possible for a taxpayer to reduce its increased employment level by almost 99% over nine years while maintaining eligibility for the maximum amount of the credit. Continuing the example cited above, a taxpayer that had an increased employment level of 1,500 in 2010 that took the 40% reduction each year would have an increased employment level of just 16 by 2019 and would still be eligible for a maximum credit of $15 million.[8]

- There is no wage standard associated with this credit. The Bill Lee Act generally requires that jobs at the relevant facility satisfy a wage standard in order for the taxpayer to be eligible for a credit under that Act. A wage standard does not apply in tiers one and two or in development zones. Although there was no wage standard requirement for the alternative credit for cigarette exportation enacted in 2003, it was understood at the time that those jobs would easily satisfy the Bill Lee wage standard.
- The 25-year carryforward period for credits under this act is extremely long, although not unprecedented.
- This credit is the first one the State has enacted that would give one entity a credit for activity undertaken by another. North Carolina has struggled for years with companies using related entities as a tax avoidance mechanism. Companies create related Delaware holding companies and use accounting tricks to eliminate their North Carolina taxable income. Companies create complex chains of related companies to shift property into LLCs and avoid franchise tax. Shifting income and expenses between and among various related entities is the essence of tax avoidance. North Carolina is a separate entity filing state; therefore the Department of Revenue cannot view the entire web of inter-related entities to determine the real economic effect of the actions of related entities.

Bill Lee Incentive Enhancements

Section 2 of the act provides that a taxpayer who is otherwise eligible for one of the tax credits under the Bill Lee Act and who qualifies for the tax credit for major computer manufacturing facilities is eligible for the following major computer facility enhancements under the Bill Lee Act,

[8] The amount of the credit is also based on output at the facility. It is likely that a taxpayer that greatly decreased its employment level at a facility would also decrease output, so the taxpayer may not be able to take advantage of the maximum amount of the credit.

regardless of the enterprise tier designation of the county in which it is located. The taxpayer may include employees of or investments made by related entities or strategic partners to meet its Bill Lee eligibility requirements. The Bill Lee Act expires for computer manufacturing facilities in 2009.

- Wage Standard. – The wage standard does not apply to the activities of the taxpayer at the major computer facility. Under prior law, the wage standard was inapplicable only in tiers one and two or in development zones.
- Credit for Creating Jobs. – The amount of the credit for creating jobs is increased by $4,000 per job for jobs at the major computer facility. For jobs created at other facilities, the amount of the credit remains at $500 per job in a tier five county; $1000 in tier four; $3,000 in tier three; $4,000 in tier two; and $12,500 in tier one.
- Credit for Investing in Machinery and Equipment. – The threshold investment a taxpayer must meet to qualify for the credit and the amount of credit the taxpayer is allowed under the Bill Lee Act is the same as allowed under current law for a tier one county: a threshold amount of zero and a credit amount equal to 7% of the eligible investment. Under current law, the threshold for a tier five county is $2 million and the applicable credit percentage is 4%.
- Credit for Worker Training. – The maximum amount of the credit is $1,000 per worker. This is the same credit amount allowed to other taxpayers for jobs in a tier one area. If the jobs are not in a tier one area, then other taxpayers are allowed a $500 credit for worker training.
- Credit for Substantial Investment in Other Property. – Under prior law, this 30% credit was available only for property located in a tier one or two area. The credit in the act is available to a taxpayer who qualifies as a major computer manufacturing facility regardless of the enterprise tier area in which the property is located.

Sales Tax Incentives

In 2003, the General Assembly provided that the owner of an eligible facility that invests at least $100,000,000 of private funds to acquire, construct, and equip a facility in North Carolina was allowed an annual refund of sales and use taxes paid by it on building materials, building supplies, fixtures, and equipment that become a part of the real property of the eligible facility. An eligible facility includes computer manufacturing. If the owner of an eligible facility does not make the required minimum investment within five years after the first refund is allowed, the facility loses its eligibility and the owner forfeits all refunds already received. Upon forfeiture, the owner is liable for tax equal to the amount of all past taxes refunded plus interest. The tax and interest are due 30 days after the date of the forfeiture.

Section 3 of the act makes several changes to the sales tax refund statute as it applies to computer manufacturing. These changes are effective January 1, 2005, and apply to sales made on or after that date:

- It provides that the investment may be made directly by the taxpayer or indirectly through a related entity.
- It clarifies that a 'computer facility' may include multiple buildings on a single campus.

- It provides that the term 'computer manufacturing' includes peripheral equipment if the manufacture or assembly of this peripheral equipment occurs at the facility or campus at which the taxpayer also manufactures or assembles electronic computers.

Section 4 of the act adds an exemption to the confidentiality of tax information statute so that the State may verify information received by a taxpayer claiming the credit under the act with a related entity or strategic partner.

HURRICANE RECOVERY ACT OF 2005.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-1	**SB 7**	**Senator Nesbitt**

AN ACT TO ENACT THE HURRICANE RECOVERY ACT OF 2005, MAKING FINDINGS AS TO DAMAGE CAUSED BY THE HURRICANES THAT STRUCK NORTH CAROLINA IN 2004, CONCERNING ESTABLISHMENT OF THE DISASTER RELIEF RESERVE FUND, MAKING APPROPRIATIONS TO THE DISASTER RELIEF RESERVE FUND, DIRECTING THE REESTABLISHMENT AND MODIFICATION OF HURRICANE FLOYD RECOVERY PROGRAMS, AUTHORIZING ESTABLISHMENT OF NEW PROGRAMS, EXPANSION OF EXISTING PROGRAMS, AND MODIFICATION OF EXISTING PROGRAMS TO IMPLEMENT THIS ACT, AUTHORIZING TRANSFER OF FUNDS TO FEDERAL AGENCIES AND LOCAL GOVERNMENTS, AUTHORIZING TIME-LIMITED POSITIONS TO IMPLEMENT THIS ACT, PROVIDING FOR SUBROGATION BY THE STATE OF CERTAIN INSURANCE CLAIMS, AUTHORIZING ADVISORY COUNCILS TO ADVISE STATE AGENCIES ON RECOVERY EFFORTS, PROVIDING FOR TAX EXEMPTION OF BENEFITS, DIRECTING THE MAPPING OF FLOOD PLAINS AND THE IDENTIFICATION OF POTENTIAL LANDSLIDE AREAS AND STREAM BANK EROSION, DIRECTING THE DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES TO STUDY THE CAUSES OF FLOODING IN CERTAIN AREAS AND DETERMINE MEASURES TO PREVENT OR MITIGATE FUTURE FLOODING, DIRECTING THE GOVERNOR TO MAINTAIN THE REDEVELOPMENT OFFICE IN WESTERN NORTH CAROLINA, APPROPRIATING FUNDS TO RESTORE AND REPAIR CERTAIN PUBLIC BUILDINGS IN HYDE COUNTY DAMAGED BY HURRICANE ISABEL AND ESTABLISHING REPORTING REQUIREMENTS.

OVERVIEW: This act provides disaster assistance to individuals, businesses, and public agencies that sustained damage from one or more of the six hurricanes that struck North Carolina during the late summer and early fall of 2004. The Governor has established the Disaster Relief Reserve Fund in the Office of State Budget and Management, and this act makes appropriations to this Fund. It also provides greater income tax relief for recipients of disbursements from the Disaster Relief Reserve Fund than current law allows.

FISCAL IMPACT: The act appropriates $247,541,447 to the Disaster Relief Reserve Fund. The State income tax deduction is expected to result in a one-time loss of General Fund revenues of $1,575,000.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The tax deduction became effective for taxable years beginning on or after January 1, 2004; the remainder of the act became effective when it became law, February 25, 2005.

ANALYSIS: North Carolina was struck by six hurricanes in 2004. Hurricanes Alex, Bonnie, Charlie, and Jeanne brought flooding and wind damage to the Eastern Region of the State. Hurricanes Frances and Ivan dumped heavy rains in the Western Region of the State resulting in landslides, flooding, and the death of at least 11 people. Forty-five counties in western North Carolina were included in federal disaster declarations as a result of Hurricanes Frances and Ivan. Nineteen of those counties were designated by FEMA as eligible for individual assistance and public assistance. Another twenty-six counties were designated as eligible for individual assistance. The damage in the Eastern Region resulted in State disaster declarations.

This act is known as the 'Hurricane Recovery Act of 2005'. It sets forth detailed findings regarding the impacts of the many hurricanes on individuals, businesses, and local governments in the affected areas. One of the findings states that further deterioration of the economy, environment, public health and safety, and quality of life in the State is likely to occur unless significant additional State assistance is allocated to the areas affected.

The act establishes the following 47 counties as eligible to receive assistance under the Act:

- The 19 counties that were designated as eligible for federal individual assistance and public assistance: Alleghany, Ashe, Avery, Buncombe, Burke, Caldwell, Haywood, Henderson, Jackson, Macon, Madison, McDowell, Mitchell, Polk, Rutherford, Swain, Transylvania, Watauga, and Yancey.
- The 26 counties that were eligible for federal public assistance: Alamance, Alexander, Bladen, Cabarrus, Caswell, Catawba, Cleveland, Columbus, Cumberland, Davidson, Forsyth, Gaston, Graham, Guilford, Hoke, Iredell, Lincoln, Mecklenburg, Randolph, Robeson, Rockingham, Rutherford, Scotland, Stokes, Union and Wilkes.
- The two counties that were not included in a federal disaster declaration but were included in a State disaster declaration as a result of the damages sustained by one of the hurricanes that occurred in 2004: Hyde and Dare.

The act notes that the Governor has established the Disaster Relief Reserve Fund for the purpose of providing necessary and appropriate assistance and relief needed as a result of natural disasters. Funds in the Disaster Relief Reserve Fund may be used for a variety of purposes such as housing buyout and relocation assistance, loans, infrastructure repair, studies, and federal matches. The Governor must report periodically to the Appropriations Committees and to the Joint Legislative

Commission on Governmental Operations on the use of the money in the Fund. The act appropriates $247,541,447 to the Fund. This amount comes from the following sources:

- $91 million from unexpended General Fund appropriations for fiscal year 2004-2005.
- $153,541,447 million from the Savings Reserve Account. Of this amount, $30,000,000 must be used to implement the recommendations of the study on flood prevention and mitigation.
- $3 million in reversions from the NC Community Development Initiative for Hurricane Floyd recovery programs. (These are unused Hurricane Floyd Recovery funds)

The act also provides a State income tax deduction equal to the amount paid to the taxpayer, either individual or business, during the taxable year from the Disaster Relief Recovery Fund. The deduction does not apply to amounts received as payments for goods and services provided by the taxpayer. Under current State and federal law, payments received to replace property lost in a federally declared disaster are exempt from tax. However, payments received to replace income are not exempt. Payments to farmers for crop losses would be an example of a taxable payment, as the crops are assumed to be converted into income. The General Assembly provided similar tax relief to Hurricane Floyd victims in 1999. The deduction is effective for taxable years beginning on or after January 1, 2004.

NASCAR HALL OF FAME FINANCING.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-68	**SB 525**	**Senator Clodfelter**

AN ACT RELATING TO NASCAR HALL OF FAME FINANCING.

OVERVIEW: This act authorizes the Mecklenburg County Board of Commissioners to levy an additional 2% occupancy tax upon receiving written confirmation from NASCAR that it will locate the NASCAR Hall of Fame Museum facility in Charlotte. The net proceeds of the additional 2% occupancy tax can be used only for the acquisition, construction, repair, maintenance, and financing of the NASCAR Hall of Fame Museum facility and an adjacent NASCAR convention center ballroom facility. The additional 2% tax would bring the occupancy tax rate to 8% in Mecklenburg. No other county or city in North Carolina currently has an occupancy tax rate in excess of 6%.

FISCAL IMPACT: The act does not impact State revenues. The additional 2% occupancy tax rate will generate an additional $5.8 million in 2005-06 fiscal year for Mecklenburg County; the amount is projected to increase to $7 million by fiscal year 2009 - 2010.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The act became effective when it became law, May 26, 2005.

ANALYSIS: NASCAR plans to locate a NASCAR Hall of Fame Museum in one of five cities. The City of Charlotte is one of the five locations being considered.[9] To finance the capital costs of building the facility, the City of Charlotte and Mecklenburg County requested, and the General Assembly enacted, authorization for Mecklenburg County to levy an additional 2% occupancy tax.

---

[9] The other cities are Daytona Beach, FL; Atlanta, GA; Richmond, VA; and Kansas City, KS.

Mecklenburg County currently has the authority to levy a 6% occupancy tax. Of the more than 74 counties and 65 cities authorized to levy a room occupancy tax, no locality has the authority to levy an occupancy tax in excess of 6%.[10]

In authorizing Mecklenburg County to levy an 8% occupancy tax, the General Assembly set strict parameters around the levy, use, and repeal of the tax. The act authorizes Mecklenburg County to levy an additional 2% room occupancy tax upon receiving written confirmation from NASCAR that it will locate the NASCAR Hall of Fame Museum facility in Charlotte. The proceeds of the additional 2% occupancy tax must be distributed to the City of Charlotte and used only for the acquisition, construction, repair, maintenance, and financing of a NASCAR Hall of Fame Museum facility and an ancillary and adjacent NASCAR convention center ballroom facility. By using the term 'proceeds' instead of the defined term 'net proceeds', the bill ensures that all of the proceeds of the additional 2% tax will be used for the stated purposes and that none of the proceeds will be used for administrative expenses associated with collecting and administering the additional 2% tax. Lastly, the act provides that the Mecklenburg County Board of Commissioners must repeal the tax effective the earlier of July 1, 2038, or July 1 following the date of final satisfaction of all debt instruments or obligations issued by the City of Charlotte (or a related special purpose entity) in connection with the financing or refinancing of the NASCAR Hall of Fame Museum facility.

ALLOW PAYMENT OF TAX BY OFFSET.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-134	**SB 537**	**Senator Clodfelter**

AN ACT TO ALLOW THE PAYMENT OF TAXES IN LIMITED CIRCUMSTANCES BY OFFSET OF AN OBLIGATION OWED TO THE TAXPAYER BY THE TAXING UNIT.

OVERVIEW: This act provides that a taxing unit may, under limited circumstances, collect taxes through offset of an obligation owed to the taxpayer by the taxing unit.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on June 29, 2005.

ANALYSIS: G.S. 105-357 provides that taxes owed to local taxing authorities are payable in existing national currency. A taxing unit is specifically prohibited from accepting the following as payment of taxes: deeds to real property; notes of the taxpayer; bonds or notes of the taxing unit; or payments in kind.[11] Prior to the enactment of this act, G.S. 105-357 also specifically prohibited a taxing unit from permitting the payment of taxes by offset of any bill, claim, judgment, or other obligation owed to the taxpayer by the taxing unit. This act provides that the prohibition against

[10] In 1993, a House Finance Subcommittee on Occupancy Tax established uniform guidelines for the occupancy tax legislation it considered. As a general rule, the House Finance Committee continues to follow these guidelines. One of those guidelines is that the combined city and county tax rate cannot exceed 6%.

[11] G.S. 105-241 provides that taxes owed to the State are payable in national currency. However, the statute does not specifically prohibit the right of setoff.

payment of taxes by offset does not apply to an offset of an obligation that arose under a lease or another contract entered into before July 1 of the fiscal year for which the taxes are levied.

This change was intended to facilitate the collection of taxes when a taxpayer has declared bankruptcy. When a taxpayer declares bankruptcy, the bankruptcy laws generally operate as a stay for all actions to collect pre-petition debts.[12] However, a creditor's right of setoff under non-bankruptcy law is preserved when the right of setoff arose before the commencement of the bankruptcy case.[13] To affect a setoff, a 'party in interest' must seek court approval from the automatic stay. The court will generally allow the setoff if the debt is a pre-petition debt and if the right of offset existed under applicable non-bankruptcy law. Prior to the enactment of this act, G.S. 105-357 prevented local taxing authorities from utilizing this form of collection in bankruptcy cases because, as applicable non-bankruptcy law, it forbid such an offset.

2005 CONTINUING BUDGET AUTHORITY/REVENUE.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-144	**HB 1630**	**Representative Luebke**

AN ACT AUTHORIZING THE DIRECTOR OF THE BUDGET TO CONTINUE EXPENDITURES FOR THE OPERATION OF GOVERNMENT AT THE LEVEL IN EFFECT ON JUNE 30, 2005; EXTENDING THE FINAL MATURITY OF CERTAIN GLOBAL TRANSPARK DEBT FROM JULY 1, 2005, UNTIL JULY 31, 2005; EXTENDING THE SUNSET ON RETIRED TEACHERS RETURNING TO THE CLASSROOM UNTIL JULY 31, 2007; CONFORMING THE STATE ESTATE TAX TO THE FEDERAL ESTATE TAX SUNSET; AND EXTENDING THE SUNSET ON THE ADDITIONAL ONE-HALF CENT STATE SALES AND USE TAX FROM JULY 1, 2005, UNTIL THE 2005 APPROPRIATIONS ACT BECOMES LAW.

OVERVIEW: Part VIII of the act conforms the repeal of the North Carolina estate tax to the repeal of the federal estate tax. Part IX of the act extends the sunset of the additional one-half cent State sales and use tax until the date that the Current Operations and Capital Improvements Appropriations Act of 2005 (hereinafter 2005 Appropriations Act) becomes law, but in no event is the tax extended beyond December 31, 2005.[14]

The remaining parts of the act set out temporary year-end transitional provisions that were in effect until the passage of the 2005 Appropriations Act, extended the maturity date of certain debt

[12] 11 U.S.C. § 362.
[13] 11 U.S.C. § 553.
[14] The 2005 Appropriations Act became law on August 13, 2005, and extended the sunset on the additional one-half cent State sales and use tax to July 1, 2007. (See Section 33.1 of S.L. 2005-276).

of the Global Transpark Authority, and extended the sunset on retired teachers returning to the classroom.[15]

FISCAL IMPACT: The extension of the estate tax sunset is estimated to generate gains to the General Fund of $30.6 million in FY 2005-06 and $121.6 million in FY 2006-07. See the summary of S.L 2005—276 (2005 Appropriations Act) for the fiscal impact of the extension of the one-half cent state sales tax.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Parts VIII and IX of the Act became effective when signed into law by the Governor on June 30, 2005.

ANALYSIS: Part VIII of the act conforms the repeal of the State estate tax to the repeal of the federal estate tax, which is scheduled to become effective for deaths occurring on or after January 1, 2010. The State continues to conform to the increasing federal exemption amounts.[16] The amount of the State estate tax remains at the amount of the State death tax credit allowed under the Internal Revenue Code in 2001. The Governor and the Senate, in Senate Bill 622, also recommended continuing the State estate tax.

North Carolina repealed its inheritance tax in 1998, effective for deaths occurring on or after January 1, 1999. It replaced the inheritance tax with an estate tax that was equivalent to the federal state death tax credit allowed on a federal estate tax return. This type of state estate tax was known as a "pick-up" tax because it picked up for the state the amount of federal estate tax that would otherwise be paid to the federal government. In 2001, Congress increased the exclusion amount for the federal estate tax and phased out the state death tax credit over four years by reducing it 25% in 2002, 50% in 2003, and 75% in 2004%, and by repealing it entirely in 2005.

In 2002, the General Assembly enacted legislation not to conform to the phase-out of the state death tax credit. In other words, North Carolina began tying the amount of the State estate tax owed to the federal credit as it existed in 2001 rather than as it currently exists. The 2002 legislation was set to sunset for estates of decedents dying on or after January 1, 2004. S.L. 2003-2004 extended the sunset to July 1, 2005, meaning that the estate tax would continue to be based on the federal credit as it existed in 2001. This act removes the sunset. The result of the removal of the sunset is that so long as there is a federal estate tax, there will be a North Carolina estate tax. The amount of the State estate tax will be equal to the amount of the federal state death tax credit as it existed in 2001.

Part IX of the act extends the sunset on the additional one-half percent State sales and use tax rate to the date that the 2005 Appropriatons Act became law. The General Assembly increased the State sales and use tax rate in S.L. 2001-424 from 4% to 4.5%. This increase was to sunset July 1, 2003. S.L. 2003-284 extended the sunset for two years to July 1, 2005. The 2005 Appropriations Act extends the additional one-half per cent rate to July 1, 2007.

Before 2001, the State sales and use tax rate had last been increased in 1991 from 3% to 4%. The Governor's 2005 budget (House Bill 719) recommended removal of the sunset on the ½% additional State sales and use tax, and the Senate passed his recommendation in Senate Bill 622.

---

[15] S.L. 2005-201 extended the maturity date of certain Global Transpark debt to August 31, 2005.
[16] North Carolina conforms to the following federal exemption amounts: 100% exemption for property passing to a surviving spouse; $1.5 million exemption for other estates. Under current federal law, this exemption amount rises to $2 million in 2006, $3.5 million by 2009, and the tax is fully repealed in 2010.

PUBLIC FINANCE CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-238	**HB 1117**	**Representative Ross**

AN ACT TO MAKE CHANGES TO STATE AND LOCAL GOVERNMENT FINANCE LAWS AND TO AUTHORIZE PUBLIC HOSPITAL AUTHORITIES TO GRANT MORTGAGES TO FINANCE OR REFINANCE HOSPITAL FACILITIES AND EQUIPMENT.

OVERVIEW: This act makes various amendments to statutes dealing with public finance. The act contains a severability clause so that if any provision of the act is found invalid, the invalidity will not affect other provisions of the act.

FISCAL IMPACT: No impact.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The act became effective August 1, 2005.

ANALYSIS: This act makes various changes to State and local government finance laws.

Project Development Financing. – In 2003, the General Assembly passed an act authorizing the voters of the State to vote in the November 2004 statewide general election on an amendment to the North Carolina Constitution that would allow local governments to finance development within defined districts by issuing tax increment financing bonds without a local referendum. The ballot measure passed. This development tool, known as 'project development financing', allows local governments to set aside the additional property taxes that are generated by a new investment to pay for public facilities that support that new investment. Under current law, the total land area of the defined district, known as the 'development financing district', may not exceed 5% of the total land area of the unit creating the district. The district also must be comprised of property that is one or more of the following:

- Blighted, deteriorated, deteriorating, undeveloped, or inappropriately developed from the standpoint of sound community development and growth.
- Appropriate for rehabilitation or conservation activities.
- Appropriate for the economic development of the community.

The act provides that land in a district created by a county that subsequently becomes part of a municipality does not count against the five-percent (5%) limit for the municipality unless the municipality has entered into an agreement with the county under which the city taxes on the incremental valuation of the property in the district will secure the bonds issued by the county.[17]

The act makes one other change to the project development financing statutes. Under prior law, units of local government could issue project development financing debt instruments, and agree to repay the debt with any available revenues of the unit, provided the agreement did not constitute a pledge of the unit's taxing power. The act expands the sources of revenue that may be pledged as security for the bond to include revenues to be raised from any special assessment, provided it did not constitute a pledge of the unit's taxing power, and the encumbrance of any real or personal

[17] Sections 1, 5, and 12 of the act.

property being financed or improved by the project. Any property so encumbered could be sold in accordance with the encumbering document and would not fall under any disposition of governmental property statutes. The act also allows cities and towns to pledge local sales tax revenues. Those revenues do not constitute a pledge of the taxing power of a city or town because local sales tax is a county tax that is shared with the municipalities, not a tax levied by a city or town.[18]

Revenue Bonds. – The State and units of local government are authorized to issue revenue bonds, but prior law specifically prohibited them from encumbering the related real property. This act allows the State and units of local government, including hospital facilities, to pledge, mortgage, or grant a security interest in real and personal property, whether owned or leased, comprising the utility or public enterprise project affected by the bond issuance. Any property so encumbered could be sold in accordance with the encumbering document and would not fall under any disposition of governmental property statutes. The act authorizes the same encumbrance of property in connection with the issuance of revenue bonds made through the Medical Care Commission that could occur through the Revenue Bond Act. The act also makes a similar change in the NC Clean Water Revolving Loan and Grant Act by permitting an applicant for clean water revolving grants and loans to grant a mortgage on the assets being financed.[19] Local government units and certain non-profit water corporations may apply for clean water revolving grants and loans.

General Changes. – The act makes the following general changes to the State and local finance laws:

- Local governments are required to appoint a finance officer to carry out certain statutorily required duties.[20] Under prior law, the finance officer was required to have a performance bond of at least $10,000 and no more than $250,000, payable to the local government. The act increased the minimum bond amount to $50,000 and removed the cap.[21]
- Under prior law, the public notification and hearing requirements for refunding bonds were the same as for the original issuance. The act provides that if refunding bonds do not extend the maturity of, or increase the aggregate debt service on, the debt being refunded, then a new public hearing is not required, the bond order may be introduced and adopted in one day, and various restrictions about installments, issues, series, and redemption do not apply.[22]
- The act removes the requirement that all bonds of a particular maturity must bear interest at the same rate and clarifies that the interest rate restrictions do not apply to private negotiated sales.[23]
- The act eliminates the 2% deposit on the bids for general obligation bonds and in its place permits the Local Government Commission to set an appropriate bid deposit or to determine no bid deposit is required.[24]

---

[18] Section 6 of the act.
[19] Sections 4, 11, 13, and 14 of the act.
[20] G.S. 159-24 and G.S. 159-25.
[21] Section 2 of the act.
[22] Section 3 of the act.
[23] Section 7 of the act.
[24] Section 7 of the act.

- Bonds sold at public sale must be awarded to the bidder offering to purchase the bonds at the lowest interest cost. The act replaces the current statutory language used to determine the lowest interest cost for bond bid purposes with Local Government Commission authority to establish the appropriate calculation method in the notice of sale.[25]
- The act replaces the antiquated system for destroying cancelled bonds. It permits cancelled bonds to be destroyed by being marked cancelled in the manner determined by the finance officer with an entry of the destruction or cancellation entered in the government's official records. Under the prior law, the cancelled debt instrument had to be burned or shredded and the appropriate entry made in a 'substantially bound book'.[26]
- Lastly, the act expands the purposes for which the North Carolina Capital Facilities Financing Agency and local industrial development authorities may issue bonds to include museums and orphanages and similar housing facilities for children or disadvantaged or disabled persons.[27]

EXTEND JDIG AND BILL LEE ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-241	**HB 1004**	**Rep. Gibson, Grady**

AN ACT TO EXTEND THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT AND THE JOB DEVELOPMENT INVESTMENT GRANT PROGRAM; TO ALTER THE MANNER IN WHICH ENTERPRISE TIERS ARE DESIGNATED; TO AMEND THE HEALTH INSURANCE REQUIREMENTS FOR THE JOB DEVELOPMENT INVESTMENT GRANT PROGRAM; AND TO CREATE AN ECONOMIC DEVELOPMENT OVERSIGHT COMMITTEE TO PERFORM A COMPREHENSIVE STUDY OF THE ECONOMIC DEVELOPMENT INCENTIVES.

OVERVIEW: This act makes the following changes to the William S. Lee Quality Jobs and Business Expansion Act (hereinafter the Bill Lee Act) and the Job Development Investment Grant Program (hereinafter the JDIG Program):

- Extends the sunset for the Bill Lee Act and the JDIG Program until January 1, 2008. For certain projects located in development zones, the sunset of the Bill Lee Act is extended until January 1, 2010.
- Amends and adds exceptions to the tier designation formula under the Bill Lee Act as follows:

[25] Section 8 of the act.
[26] Section 9 of the act.
[27] Section 10 of the act.

- Adds an exception to designate a county as a tier one area if the county's rate of unemployment was one of the ten highest in the State for the most recent 12-month period preceding the designation.
- Amends the exception for certain small counties that have a population of less than 12,000 and that meet a certain poverty level, by requiring that the counties only meet the population requirement to be designated a tier one area.

- Amends the JDIG Program so that an eligible business no longer is required to provide health insurance for **all** full-time employees. The eligible business must provide health insurance only to a full-time employee who earns less than $150,000 in taxable compensation annually or three and one-half times the annualized average wage for all private insured employers in the State employing between 250 and 1,000 people.
- Creates an Economic Development Oversight Committee.

FISCAL IMPACT: Changes to the Bill Lee Act are estimated to reduce General Fund revenues by $2.03 million in FY 2006-07, $7.22 million in FY 2007-08, $5.47 million in FY 2008-09, and $5.64 million in FY 2009-10. The extension of the JDIG sunset is estimated to reduce General Fund revenues by $4.50 million in FY 2006-07, $9 million in FY 2007-08, $9 million in FY 2008-09, and $6 million in FY 2009-10.

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act became effective when signed into law by the Governor on July 29, 2005. The sections of the act amending and adding exceptions to the tier designation formula of the Bill Lee Act apply to designations made on or after July 29, 2005.

ANALYSIS:

Extension of Sunsets for Bill Lee Act and JDIG Program

This act extends the sunsets on both the Bill Lee Act and the JDIG Program generally from January 1, 2006 to January 1, 2008.[28] In addition, the act extends the Bill Lee Act until January 1, 2010, for projects located in development zones if all of the following conditions[29] are met:

- Before January 1, 2006, the taxpayer must sign a letter of commitment with the Department of Commerce describing the proposed new or expanding project.

[28] There are several exceptions to the 2006 sunset date: Interstate air couriers are eligible to claim the credits for business activity that occurs on or before January 1, 2010, provided that the interstate air courier entered into a real estate lease on or before January 1, 2006, with an airport authority that provides for the lease of at least 100 acres of land for a term of at least 15 years. Taxpayers that qualify as "eligible major industries" before January 1, 2006, are also allowed to claim credits for business activity that occurs on or before January 1, 2010. A taxpayer is an eligible major industry if it will invest at least $100 million in acquiring, constructing, and equipping a facility and it is engaged in bioprocessing, the manufacture or distribution of pharmaceuticals or medicines, aircraft manufacturing, computer manufacturing, motor vehicle manufacturing, or semiconductor manufacturing. Also the credit for research and development under the Bill Lee Act would still expire effective January 1, 2006. During the 2004 Regular Session, the research and development credit under the Bill Lee Act was replaced with a stand-alone credit for research and development under Article 3F of Chapter 105. (See Part 32D of S.L. 2004-124) This stand-alone credit sunsets January 1, 2009.

[29] Only two projects qualified for this extension at the time this act was enacted: The Cheesecake Factory in Nash County and the Dole plant in Gaston County.

- Before January 1, 2006, the Secretary of Commerce must make a written determination that the taxpayer is expected to place in service at least $10 million of new machinery and equipment in a development zone over a three-year period and that the taxpayer will create at least 300 new jobs at the location over a three-year period.
- Before January 1, 2006, the taxpayer must place in service at least $4 million of real property and machinery and equipment in service at the location and must create at least 20 new jobs.

In 1998, the General Assembly amended the Bill Lee Act to provide additional incentives for businesses that locate or expand in development zones, which are economically distressed areas located within cities. In order to be designated as a development zone by the Department of Commerce, the area must satisfy all of the following conditions: (1) every census tract or block group in the zone is located at least partially in a city with a population of at least 5,000, (2) the zone has a population of at least 1,000, (3) more than 20% of the population of the zone is below the poverty level, (4) every census tract and census block group in the zone has more than 10% of its population below the poverty level, or is immediately adjacent to a tract or group that has more than 20% of its population below the poverty level, and (5) no census tract or block group in the zone is located in another development zone. Designation as a development zone is effective for two years.

Location in a development zone leads to enhanced tax incentives. For example, if a business locates in a development zone, its maximum worker training credit is $1,000 rather than $500, it receives an additional $4,000 per job on its jobs tax credit, and the credit for investing in machinery and equipment is calculated as if the zone were a tier one county. Finally, a business located in a development zone does not have to meet a wage standard to be eligible for the credits.

Exceptions to Tier Formula in Bill Lee Act[30]

Under the Bill Lee Act, counties are divided into five enterprise tiers based on the unemployment rate, per capita income, and population growth of the county. For many of the credits, the lower the tier of a county, the more favorable the incentive. By December 31 of each year, the Department of Commerce is required to assign a tier designation to each of the 100 counties in the State. In order to make these assignments, the Department of Commerce must rank all 100 counties based on the following factors: the rank of the county in a ranking of counties by average rate of unemployment over the preceding 12 months from lowest to highest, the rank of the county in a ranking of counties by average per capita income over the preceding 12 months from highest to lowest, and the rank of the county in a ranking of counties by percentage growth in population over the preceding 12 months from highest to lowest. Each of these factors is given equal weight. The Secretary of Commerce is required to use the latest data available in making these calculations. Counties with one of the 10 highest rankings are designated enterprise tier one, the next 15 counties are enterprise tier two, the next 25 counties are enterprise tier three, the next 25 counties are enterprise tier four, and the remaining counties are enterprise tier five.

There are several exceptions to the tier formula. Once exception provides that any county that has a population of less than 12,000 and more than 16% of its population living below the federal

[30] S.L. 2005-406 also amends the tier designation formula by allowing certain industrial parks located in higher-tiered counties to be treated as if they were located in an enterprise tier one area if the parks meet conditions related to government ownership, size, population of the counties, and Medicaid eligibility within the counties.

poverty level is automatically a tier one county. This act eliminates the requirement related to the percent living below the poverty level. If this provision had been in effect for the 2005 designations, two counties would have been affected: Camden and Clay Counties would have been designated as enterprise tier one areas rather than enterprise tier three areas.

This act also creates a new exception for counties with particularly high rates of unemployment. Any county whose rate of unemployment was one of the ten highest in the State for the most recent 12-month period preceding the designation is automatically designated an enterprise tier one area. If this new exception had been in effect for the 2005 designation, five counties would have been affected: Anson, Cleveland, Rockingham, and Rutherford Counties would have fallen from tier two to tier one; Wilson County would have fallen from tier three to tier one.

Health Insurance Requirement for JDIG Program

In 2002, the General Assembly created a new economic development tool for new and expanding businesses in North Carolina, the Job Development Investment Grant (JDIG) Program. The JDIG Program is used to attract businesses to the State by allowing a five-member committee to award grants to businesses. The grants may be awarded over as many as 12 years and the amounts of the grants are based on income tax withholdings from new jobs created by the businesses. The committee may enter into no more than 25 agreements per calendar year and may commit no more than $15 million in any fiscal year under all agreements entered into during a single calendar year. In order to be eligible for a grant under the JDIG Program, a business must provide health insurance for all full-time jobs associated with the project. The test is the same as under the Bill Lee Act – the business must, for all full-time employees of the project, pay at least 50% of the premiums for health insurance that meets at least the minimum provisions of the basic health care plan of coverage recommended by the Small Employer Carrier Committee.

This act eliminates the requirement that the business provide health insurance for any individual whose taxable compensation from the business exceeds the greater of $150,000 on an annualized basis or 3.5 times the average wage for all private insured employers in the State employing between 250 and 1,000 people.

Creation of Economic Development Oversight Committee.

This act creates an Economic Development Oversight Committee.[31] This standing committee consists of twelve members: six appointed by the Speaker of the House of Representatives and six appointed by the President Pro Tempore of the Senate. The act directs the Committee to study the budgets, programs, and policies of various State, regional, and local entities involved with economic development; to analyze legislation from other states regarding economic development; and to analyze proposals of the Economic Development Board. Before the 2006 Regular Session, the Committee must complete a comprehensive study of the Bill Lee Act and JDIG Program. The Committee is also required to hold at least one joint meeting with the Revenue Laws Study Committee before issuing a report on the comprehensive study. The act states that it is the intent of the General Assembly to replace the Bill Lee Act and to revamp the JDIG Program based on the recommendations of the Committee.

[31] House Bill 1365, introduced by Rep. Daughtridge, also established an Economic Development Oversight Committee. This bill was in the House Rules Committee at the end of the Session.

2005 APPROPRIATIONS ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-276	**SB 622**	**Senator Garrou**

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

OVERVIEW, EFFECTIVE DATES, AND FISCAL IMPACT:

Part	Description and Effective Dates	Fiscal Impact
7	**LEA Sales Tax Refund Reporting & Redirect Refundable Sales to State Public School Fund** Section 7.27 authorizes the Department of Revenue to release sales tax refund data for individual LEAs. Section 7.51 redirects sales and use tax refunds payable to LEAs to the State Public School Fund.	No impact. $33,300,000 recurring General Fund Revenue, beginning with the 2006-07 fiscal year.
8	**Extend the Sunset on Training & Reemployment Contributions made by Employers** Section 8.8 extends for an additional five years the expiration of a tax, known as a "training and reemployment contribution" paid by employers in lieu of part of the unemployment taxes they would otherwise owe.	No impact.
11	**Increase Funds for North Carolina Grape Growers Council** Section 11.4 expands the quarterly distribution of a portion of the excise tax on wine to the North Carolina Grape Growers Council by raising the annual cap from $350,000 to $500,000, effective October 1, 2005.	
22	**Department of Revenue Debt Fee for Taxpayer Locater Services and Collection and Property Tax Commission Per Diem** Section 22.1 adds three more purposes to the list of purposes for which the collection assistance fee may be used.	

	Section 22.5 authorizes the Property Tax Commission to set the salary for its members, effective September 1, 2005.	
33	**Sales Tax Changes** This part makes the following changes to the State sales and use tax laws:	
	• Section 33.1 extends the one-half cent State sales tax to July 1, 2007, effective August 13, 2005.	FY 2005-06 $417.1 million gain FY 2006-07 $462.7 million gain FY 2007-08 $31.6 million gain
	• Section 33.11 taxes railway cars and locomotives at the general rate (was 3% State rate with cap of $1,500 per item), effective January 1, 2006. Section 33.12 provides interstate carriers a refund of a portion of the taxes paid.	Minimal fiscal impact expected
	• Section 33.4 taxes telecommunications at the combined general rate (was 6%), effective October 1, 2005.	FY 2005-06 $32.1 million gain. The gain is estimated at $51.7 million for a full fiscal year.
	• Section 33.6 includes voicemail as part of the gross receipts of telecommunications service, effective October 1, 2005.	Minimal fiscal impact.
	• Section 33.4 taxes direct-to-home satellite service at combined general rate (was 5%), effective October 1, 2005.	FY 2005-06 $6.5 million gain. The gain is estimated at $10.5 million for a full fiscal year.
	• Sections 33.4 and 33.14 tax cable service at combined general rate, and allow a cable service provider a credit for the local franchise taxes paid on cable service (was no sales tax), effective January 1, 2006.	FY 2005-06 $10.9 million gain FY 2006-07 $26.1 million gain
	• Section 33.4 taxes satellite digital audio radio service at general rate (was no sales tax), effective January 1, 2006.	No fiscal information available, but a revenue gain is expected in future years.
	• Section 33.4 taxes spirituous liquor at combined general rate (was 6%), effective October 1, 2005.	FY 2005-06 $2.9 million gain

	• Section 33.10 taxes candy at general rate (was exempt), effective October 1, 2005.[32]	FY 2005-06 $9.8 million gain FY 2006-07 $15.8 million gain
	• Section 33.4 taxes mobile classrooms and mobile offices at the general rate (was taxed at 3% State rate with cap of $1,500 per item), effective January 1, 2006.	FY 2005-06 $0.1 million gain FY 2006-07 $0.3 million gain
	• Section 33.9 exempts the following items currently taxed at special 1% State rate, effective January 1, 2006: o Horses and mules sold to farmers o Animal semen o Fuel, other than electricity, sold to farmers for farm purposes, to manufacturers, and to laundries and dry cleaners o Wrapping paper, cartons, and supplies sold to freezer locker plants	The exemption of items taxed at 1% is expected to reduce the General Fund by $0.95 million in FY 2005-06 and thereafter by $2.0 million annually.

[32] Prior to 2003, candy was subject to State and local sales tax unless it was purchased for home consumption. S.L. 2003-284 exempted candy from sales tax. The taxation of candy brings it in line with the taxation of soft drinks.

	• Section 33.9 exempts the following items currently taxed at the special State rate of 1%, with an $80 cap per item, effective January 1, 2006: o Sales to farmers of machinery, attachments and repair parts for the machinery, and lubricants applied to the machinery. o Sales to farmers of containers for use in planting, harvesting, marketing, packaging, or transporting farm products. o Bulk tobacco barns or racks, parts, and accessories attached to the barns. o Grain, feed, or soybean storage facilities. o Sales to laundries and dry cleaners of machinery, parts, and accessories attached to the machinery. o Sales to an interstate passenger air carrier of aircraft simulators for flight crew training. o Sales to an interstate air courier of materials handling equipment and racking systems used at an airport or in a warehouse or distribution facility. o Central office equipment, switchboard equipment, private branch exchange equipment, and terminal equipment sold to telephone companies. o Towers and broadcasting equipment sold to a radio or television company licensed by the FCC; and broadcasting equipment (excluding cable) sold to a cable service provider.	The exemption of sales to farmers of machinery and containers and of sales of storage facilities and tobacco barns is estimated to reduce the General Fund by $1.5 million for FY 2005-06 and thereafter, by $3.1 million annually. The exemption of sales of equipment to laundries, telephone companies, radio and television companies, and air couriers is estimated to reduce the General Fund by $0.9 million for FY 2005-06 and thereafter, by $2.0 million annually.

	• Section 33.9 exempts funeral services, but taxes tangible property such as caskets and monuments at the general rate, effective January 1, 2006. Current law exempts funeral expenses, including coffins and caskets, not to exceed $1,500. • Sections 33.8 and 33.24 make the use tax applicable to taxable services sourced to the State, effective October 1, 2005, and extend the sunset on the use tax line item on the individual income tax return from January 1, 2005 to January 1, 2010. • Section 33.3 adds new definitions to the sales tax laws in order to conform to the Streamlined Sales and Use Tax Agreement, effective October 1, 2005. <u>Revenue Laws Study Committee</u> Section 33.32 directs the Revenue Laws Study Committee to study the following issues and make a final report to the 2007 General Assembly: o Equity of taxation on video, cable, satellite, and data service providers. o Impact of taxing maintenance agreements. (It is the intent of the General Assembly to apply the sales and use tax to maintenance agreements beginning July 1, 2006). Section 33.33 reenacts and limits S.L. 2004-123 so that it applies to Dare County only. The 2004 legislation authorized counties to levy an additional 1% sales and use tax for beach nourishment. The legislation, as the title indicates, was meant to apply to Dare County only.	FY 2005-06 $1.7 million gain FY 2006-07 $2.7 million gain
34	**Tobacco Tax Rate Changes** Effective September 1, 2005, increased the tax on cigarettes from 5 cents a pack to 30 cents a pack. Effective July 1, 2006, increases the tax on cigarettes to 35 cents a pack.	FY 2005-06 $117.2 million gain FY 2006-07 $187.3 million gain FY 2007-08 $184.0 million gain FY 2008-09 $179.1 million gain FY 2009-10 $173.7 million gain

	Effective September 1, 2005, increased the tax on other tobacco products from 2% to 3%. Effective August 13, 2005, authorized a tobacco product manufacturer that elects to place funds into a qualified escrow fund in lieu of participating in the Master Settlement Agreement to assign its interest in the funds to the benefit of the State.	FY 2005-06 $1.6 million gain FY 2006-07 $2.1 million gain FY 2007-08 $2.2 million gain FY 2008-09 $2.3 million gain FY 2009-10 $2.4 million gain
35	**IRC Update** Effective August 13, 2005, changed the State tax law reference to the Internal Revenue Code from May 1, 2004, to January 1, 2005. However, any amendments to the Internal Revenue Code enacted after May 1, 2004, that would have increased North Carolina taxable income for the 2004 taxable year are effective for 2005 taxable year.	The partial conformance to the Code results in a loss to the General Fund of $8 million for FY 2005-06 and $10.7 million for FY 2006-07.
36	**Individual Income Tax Changes** Extends the 8.25% upper-income individual income tax rate for two more taxable years: 2006 and 2007.	FY 2005-06 $39.8 million gain FY 2006-07 $89.7 million gain FY 2007-08 $50.18 million gain
38	**Corporate, Excise, and Insurance Tax Changes** Equalize Gross Premiums Tax Effective for taxable years beginning on or after January 1, 2007, taxes health maintenance organizations (HMOs) at the general gross premiums tax rate of 1.9% and repeals the special 1% rate for HMOs.	FY 2005-06 no impact FY 2006-07 $13.4 million gain FY 2007-08 $3.94 million gain FY 2008-09 $13.4 million gain FY 2009-10 $13.4 million gain
39	**Tax Incentives/Film Industry Jobs Incentives** Film Industry Jobs Incentives Effective for taxable years beginning on or after January 1, 2005, provides a refundable income tax credit equal to 15% of the production expenses for film and television production companies that spend at least $250,000 in North Carolina in connection with certain productions.	FY 2005-06 $3.5 million loss FY 2006-07 $3.5 million loss FY 2007-08 $3.5 million loss FY 2008-09 $3.5 million loss FY 2009-10 $3.5 million loss

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

ANALYSIS: This act is known as the 'Current Operations and Capital Improvements Appropriations Act of 2005.' The act contains several tax provisions that are summarized below.

Part 7: Public Schools

Part VII of the act contains two provisions related to the sales and use tax refund allowed to local school administrative units. LEAs are among the list of entities that may apply to the Secretary of Revenue for an annual refund of State and local sales and use taxes paid by it on direct purchases of tangible personal property and services, other than electricity and telecommunications service. A request must be in writing and is due within six months after the end of the LEA's fiscal year.

The first provision can be found in Section 7.27. It allows the Department of Revenue to release sales tax refund information on a per LEA basis and it makes a corresponding change in the tax secrecy statute. This information will be useful in providing complete budget oversight. Since the refund is received outside of the appropriations and budgetary process, the LEA could spend the money in whatever manner it chose. The act requires the Department to make an annual report to the Department of Public Instruction and to the Fiscal Research Division of the General Assembly by March 1 of the amount of refunds claimed by taxpayer. The act directs the Department to also provide this information for the past three fiscal years: 2002-03, 2003-04, and 2004-05.

The second provision can be found in Section 7.51. It redirects estimated State sales tax revenues refundable to LEAs to the State Public School Fund for allotment through State position, dollar, and categorical allotments. The effect of this provision is to funnel all State monies for public education through the budgetary process by eliminating the State monies going directly to LEAs through the refund process.

The provision accomplishes this redirection in three steps:

- It repeals the ability of individual LEAs to obtain an annual refund of the State and local sales and use tax monies paid, effective July 1, 2005, and applicable to sales made on or after that date.[33] LEAs have had the ability to request an annual refund of State and local sales and use taxes paid since July 1, 1998.[34] The provision also repeals the ability of school board cooperatives to obtain a refund; they have had the ability to request annual refunds since July 1, 2003.[35] The LEAs will be able to obtain a refund for sales and use taxes paid by them during the fiscal year 2004-05. The request for the refund must be made on or before December 31, 2005, and the amount will be refunded during fiscal year 2005-06.
- For fiscal year 2006-07, the provision directs the Secretary of Revenue to transfer quarterly a calculated amount from the State sales and use tax net collections to the State Public School Fund. The quarterly amount will be equal to one-fourth of the amount refunded to LEAs and school board cooperatives[36] during the 2005-06 fiscal year plus or minus the percentage of that amount by which the total collection of State sales and use tax increased

---

[33] The intent of the legislation, as reflected by the Committee Report, was to repeal the ability of school boards to obtain a refund of State sales and use taxes paid, not State and local. It is anticipated that a provision will be introduced in the 2006 legislative session to reinstate the refund of local sales and use taxes.

[34] S.L. 1998-212.

[35] S.L. 2003-431.

[36] S.L. 2003-345 corrected a statutory reference made in this provision of the act.

or decreased during the preceding fiscal year. The Fiscal Research Division estimates that the total amount of this annual earmarking will be $33,000,000.[37]

- For subsequent fiscal years, the provision directs the Secretary to transfer quarterly an amount equal to one-fourth of the amount refunded to LEAs and school board cooperatives during the preceding fiscal year plus or minus the percentage of that amount by which the total collection of State sales and use taxes increased or decreased during the preceding fiscal year.

Part 8: Community Colleges

In 1999, the General Assembly temporarily reduced unemployment insurance taxes for most employers by 20% and levied a corresponding contribution to be used for enhanced reemployment services and worker training programs, effective January 1, 2000.[38] While the unemployment insurance taxes fund the unemployment insurance fund, the training and reemployment contribution is credited to a special account in the State Treasury to be appropriated annually by the General Assembly to the Department of Community Colleges for various worker-training programs. Thus, the training and reemployment contribution program has the effect of redirecting payments from the unemployment insurance fund to appropriations for State worker training programs The training and reemployment contribution program was originally set to expire in 2002. S.L. 2001-424 extended the expiration date to 2006. Section 8.8 of this act extends the sunset date to 2011.

The law, as written in 1999, automatically suspends the training and reemployment contribution any time the unemployment insurance fund falls to $900 million or less or any time the State unemployment rate rises above 4.3%.[39] The training and reemployment contribution was suspended shortly after it was enacted because the unemployment insurance fund balance fell below $900 million. The unemployment insurance fund currently has a balance of roughly $20 million and the State unemployment rate is 5.1%.

Part 11: Department of Agriculture and Consumer Services

The first $350,000 of the net proceeds of the excise tax on fortified and unfortified wine is credited to the Department of Agriculture and Consumer Services.[40] The funds credited to the Department from this tax must be allocated to the North Carolina Grape Growers Council and used to promote the North Carolina grape and wine industry and to contract for research and development services to improve viticultural and enological practices in North Carolina. If any of the earmarked funds are not expended during the fiscal year, they do not revert to the General Fund but remain available to the Grape Growers Council.

Section 11.4 of the act expands the quarterly distribution of a portion of the excise tax on wine to the North Carolina Grape Growers Council by raising the annual cap from $350,000 to $500,000. Prior to 2001, the Council received 94% of the net tax proceeds from the excise tax on unfortified wine and 95% of the tax collected on fortified wine, up to $175,000 a year. In 2001, the General Assembly allocated 100% of the net tax revenues from unfortified and fortified wine to the

[40] S.L. 2005-380 transferred the North Carolina Grape Growers Council from the Department of Agriculture and Consumer Services to the Department of Commerce.

Council and increased the cap from $175,000 to $350,000 in 2001.[41] The amount distributed to the Council reached the $350,000 cap in fiscal year 2002-03. The net proceeds from the tax in fiscal year 2004-05, and the amount the Council would have received but for the cap, totaled $473,343.

Part 22: Department of Revenue

In 2001, the General Assembly established a system under which the cost of collecting overdue tax debts is to be borne by the delinquent taxpayers, not by the taxpayers who pay their taxes on time. The collection assistance fee is 20% of the overdue tax debt and is a receipt of the Department.[42] The proceeds of the fee are credited to a special, non-reverting account to be used only for collecting overdue tax debts. The Department of Revenue may apply the fee proceeds to pay contractors for collecting tax debts and to pay the fee charged by the federal government for collecting tax debts by offset. The remaining proceeds of the fee may be spent for collecting overdue tax debts only pursuant to appropriation by the General Assembly. In 2004, the General Assembly enacted legislation stating that the proceeds of the fee could not be used for any purpose that is not directly and primarily related to collecting overdue tax debts. In addition to the two expenditures specifically authorized in 2001, the General Assembly added 'taxpayer locater services' to the list of purposes directly and primarily related to collecting overdue tax debts.

Section 22.1 of this act adds three more purposes to which the fee proceeds may be applied:

- Postage or other delivery charges for correspondence relating to collecting overdue tax debts.
- Operating expenses for Project Collection Tax and the Taxpayer Assistance Call Center.
- Expenses of the Examination and Collection Division relating to collecting overdue tax debts.

The provision also requires the Department to account for all expenditures using accounting procedures that clearly distinguish costs allocable to collecting overdue tax debts from costs allocable to other purposes and it must demonstrate that none of the fee proceeds are used for any purpose other than collecting overdue tax debts. This section became effective July 1, 2005.

Section 22.5 authorizes the Property Tax Commission to set the salary for its members, effective September 1, 2005. Under prior law, the Commission members were compensated $200 a day for their work on the Commission.[43] In the fourth edition of Senate Bill 622, this provision changed the salary of the Commission members from $200 a day to $400 a day and it also set the salary for the chair of the Commission at $450 a day. Although the final budget act did not set the salaries at this amount, S.L. 2005-345, 'Modify 2005 Budget Appropriations Act', amended this act to

[41] S.L. 2001-475.

[42] Section 22.6 of S.L. 2005-276 amended the law to provide that the amount of the collection assistance fee would be the actual cost of collection, not to exceed 20% of the amount of the overdue tax debt. However, section 37 of S.L. 2005-345 subsequently repealed this section, leaving the amount of the collection assistance fee at 20% of the amount of the overdue tax debt.

[43] S.L. 2000-67 provided that members of the Commission would receive travel, subsistence, and salary while being trained and clarified those members should receive salary and reimbursement while deciding, as well as hearing, cases.

appropriate additional funds to the Department of Revenue to be used to pay the increased salaries of the Commission members at that amount.

The Property Tax Commission is the five-member State board of equalization and review that hears and decides taxpayers' administrative appeals from decisions concerning the listing, appraisal, or assessment of property made by county boards of equalization and review and boards of county commissioners. It consists of five members, three of whom are appointed by the Governor, one of whom is appointed by the General Assembly upon the recommendation of the Speaker of the House of Representatives, and one of whom is appointed by the General Assembly upon the recommendation of the President Pro Tempore of the Senate. The members serve staggered, four-year terms.

The expenses of the Property Tax Commission do not come from the General Fund but are paid by local governments. The Department of Revenue collects local sales taxes on behalf of local governments and distributes the proceeds quarterly. In making these distributions, the Department is required under G.S. 105-501 to deduct the State's costs relating to local property tax administration, the Property Tax Commission, the School of Government's property tax training program, and the Local Government Commission.

Part 33: Sales Tax Changes

Part 33 makes a number of changes to the sales tax laws that are necessary to conform to the Streamlined Sales and Use Tax Agreement. The Streamlined Sales Tax Project is an effort by states, with input from local governments and the private sector, to simplify and modernize sales and use tax collection and administration. The Project began in March 2000, and has the goal of achieving sufficient simplification and uniformity to encourage sellers without nexus in states to voluntarily collect use tax in participating states. In November 2002, the implementing states approved the Streamlined Sales and Use Tax Agreement. The Agreement contains the uniformity and simplification provisions developed by the Project. On July 1, 2005, eleven states, including North Carolina, were determined to be in substantial compliance with terms of the Agreement. The Agreement becomes effective when at least 10 states representing 20% of the population of all states with a sales tax are in compliance with the provisions of the Agreement. As of October 2005, these requirements were met and the Agreement became effective.

Over the past several years, the Revenue Laws Study Committee has recommended, and the General Assembly has enacted, changes to North Carolina sales tax laws to bring it into compliance with the Agreement. As set out in the OVERVIEW, the act makes the following changes to the sales and use tax laws:

- Section 33.3 defines a number of terms. "Combined general rate" is defined as the State's general rate of tax plus the sum of the rates of the local sales and use taxes. The act defines "Streamlined Agreement" and conforms the definition of "food" to the Agreement by removing "alcoholic beverage" from the definition of food. The act also defines the terms "cable service" and "satellite digital audio radio service".

- Amends the sales tax holiday statute to include definitions for "computer supplies" and "school supplies". A State has the option of allowing a sales tax holiday, but the items included in the holiday must be defined terms under the Agreement. The act includes computer supplies in the sales tax holiday. Computer supplies include computer storage media, printers, printer supplies, hand-held electronic schedulers, and personal digital assistants. Prior to August 2004, the State's sales tax holiday included most of these items.

The General Assembly changed the law in 2003 to except these items from the holiday in 2004, in conformity with the Streamlined Agreement. Section 33.11, based upon amendments to the Agreement in November 2004, expands the sales tax holiday to include these items once again so long as the sales price does not exceed $250.

- Sections 33.4 and 33.9 amend the taxation of a number of items as set out in the OVERVIEW by either exempting the item from the sales tax or taxing the item at the combined general rate. These changes satisfy the requirement of the Streamlined Agreement that states must have one tax rate with no caps or thresholds.
- Sections 33.20 and 33.21 expand Article 5F of Chapter 105 to provide that the privilege tax will apply to manufacturing fuel and certain machinery and equipment, effective January 1, 2006. The 2001 General Assembly enacted Article 5F in response to the requirement of the Streamlined Agreement that states must simplify their sales tax rates. The 2001 legislation, which becomes effective January 1, 2006, repealed the 1% sales tax rate and $80 cap imposed on mill machinery and replaced it with a privilege tax having the same rate. Sections 33.20 and 33.21 of the act continue the sales tax rate simplification requirement by imposing a 1% privilege tax on a manufacturing industry or plant that purchases fuel, other than electricity or piped natural gas, to operate the industry or plant. The act also imposes a 1% privilege tax with a cap of $80 per article on a major recycling facility that purchases certain personal property used at the facility. The privilege tax becomes effective January 1, 2006, and replaces the current sales tax imposed on these taxpayers. There will be no fiscal impact because the privilege tax rates will be the same as the current sales and use tax rates. The change from a sales tax to a privilege tax means that retailers are not responsible for collecting and remitting the tax.
- Section 33.13 clarifies the effective dates for sales tax rate increases and decreases on services, effective October 1, 2005. For a rate increase, the new rate applies to the billing period that starts on or after the effective date. For a rate decrease, the new rate applies to bills rendered on or after the effective date. For prepayments of telecommunications and direct-to-home satellite services, the billing period starts on or after November 1, 2005. For prepayments of satellite digital audio radio services, the first billing period starts on or after February 1, 2006.
- Section 33.15 conforms the statutory language in G.S. 105-164.28 to the information actually requested on a certificate of resale, effective October 1, 2005.
- Section 33.17 provides an amnesty provision as required by the Streamlined Sales Tax Agreement for sellers who register with the State within 12 months after the State becomes a member of the Agreement, effective October 1, 2005.
- Section 33.18 clarifies that a seller who relies on the Secretary of Revenue for information concerning the boundaries of taxing jurisdictions and the tax rates applicable to those jurisdictions is not liable for any underpayments of tax attributable to erroneous information provided by the Secretary, effective October 1, 2005.
- Sections 33.8 and 33.24 provide that the use tax applies to taxable services sourced to the State, effective October 1, 2005, and extend the sunset on the use tax line item on the individual income tax return from January 1, 2005 to January 1, 2010. The use tax is owed by the consumer, and unlike sales tax, the consumer must remit it to the State. To simplify

use tax collection, the General Assembly established an annual filing period in 1997 for the payment of use taxes owed by consumers on mail order and other out-of-state purchases. In 1999, it simplified use tax collection by providing that the use tax will be paid on taxpayers' income tax returns. In 2000, the General Assembly sunset this provision in anticipation that use tax collection would be handled by retailers by 2003, as a result of the Streamlined Sales Tax Agreement. The 2003 sunset was overly optimistic. The General Assembly extended the sunset to 2005 in S.L. 2003-284. The act extends it for five more years.

Part 34: Tobacco Tax Changes

Part 34 makes the following three changes to the tobacco tax:

- Effective September 1, 2005, it increased the tax on cigarettes from five cents a pack to 30 cents a pack. Effective July 1, 2006, it increases the tax on cigarettes an additional five cents to 35 cents a pack. The General Assembly last increased the cigarette tax in 1991 from two cents a pack to five cents a pack. The Governor, in his 2005 budget, recommended increasing the tax on cigarettes from five cents a pack to 40 cents a pack from the period between September 1, 2005, and June 30, 2006, and then to 50 cents a pack.
- Effective August 13, 2005, it increased the tax on other tobacco products, such as cigars and snuff, from 2% of the cost price of the product to 3%. The General Assembly first imposed a tax on other tobacco products in 1991 at the rate of 2%. The Governor, in his 2005 budget, recommended increasing the tax from 2% to 15% for the period between September 1, 2005 and June 30, 2006, and then to 18%.
- Effective August 13, 2005, it authorized a tobacco product manufacturer that elected to place funds into a qualified escrow fund in lieu of participating in the Master Settlement Agreement, to assign its interest in the funds to the benefit of the State. Under G.S. 66-291, a tobacco product manufacturer that places funds in escrow is allowed to receive the interest or other appreciation on such funds as earned. This act would allow the manufacturer to assign its interest in the funds, including any earning and appreciation in the escrow account, to the benefit of the State. The assignment is irrevocable and must be in writing. The benefit of this legislation is that a nonparticipating manufacturer that makes an assignment can claim an income tax deduction. The act provides that this legislative authorization is repealed and any assignment of the funds is void if (1) a court finds the new legislation invalid or unenforceable, or (2) a court finds that the new legislation would subject participating manufacturers under the Master Settlement Agreement to a nonparticipating manufacturer adjustment under the Agreement.

Part 35: IRC Update

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code, by reference to the Code.[44] The General Assembly determines each year whether to update its reference to the Internal Revenue Code.[45] Updating the Internal Revenue Code reference makes

[44] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.
[45] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of

recent amendments to the Code applicable to the State to the extent that State law tracks federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made.

Part 35 of this act changed the reference date from May 1, 2004 to January 1, 2005. Changing the reference date to January 1, 2005, incorporates federal changes made in the Working Families Tax Relief Act of 2004 (P.L. 108-311) and the American Jobs Creation Act of 2004 (P.L. 108-357). In addition, in early 2005 Congress enacted an act to enhance the tax benefit for certain charitable contributions made in January 2005 for tsunami relief (P.L. 109-1). That act did not amend the Code, but rather used uncodified language to bring about that result. The 2005 Appropriations Act conforms to that legislation as well. A detailed summary of these federal tax law changes is set out below:

Working Families Tax Relief Act (WFTRA) of 2004 (P.L. 108-311)

The Working Families Tax Relief Act of 2004 was signed into law by President Bush on October 4, 2004. Despite its title, the act provides tax benefits for businesses as well as individuals and families. The following features of the act are important for State tax purposes:

- *Creation of a more uniform definition of "child" throughout the Code starting with the 2005 taxable year.* At the federal level, the definition of "child" is important in five areas: the dependency exemption, the child credit, the earned income credit, the dependent care credit, and head of household filing status. The WFTRA creates a more uniform definition of "child" that applies to each of these areas. Under the new definition, a child is a qualifying child if the child satisfies three separate conditions. First, the child must have the same principal place of abode as the taxpayer for more than one half the tax year (residency test). Temporary absences due to special circumstances are not included. Second, the child must be the child, stepchild, sibling, stepsibling, or a descendant of any of these relations of the taxpayer (relationship test). Third, the child must satisfy an age condition to be deemed a qualifying child. In general, a child must be under age 19, or under age 24 if a full-time student, to be a qualifying child. However, lower age limits were retained for the dependent care credit (under 13 years of age unless disabled) and the child tax credit (under 17 years of age). For State tax purposes, the changes are important in so far as they relate to the dependency exemption, the child tax credit, and head of household filing status. The new definition of qualifying child for the dependency exemption may result in a change of status of some children – where the new law has a residency test, the old law had a support test (the taxpayer claiming the child as a dependent had to provide at least 50% of the child's support). For the federal child tax credit, some taxpayers may become eligible to claim the credit due to the elimination of some restrictions related to foster children. This is important because eligibility for the State child tax credit is dependent on the taxpayer's eligibility for the federal credit. In general, the uniform definition should not affect head of household filing status.

---

taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

- *Extension of the above-the-line deduction for educators.* Under previous law, an eligible educator was allowed an above-the-line deduction of up to $250 for amounts paid by the teacher for books or supplies used in the classroom. This provision was set to expire with the 2003 taxable year. The WFTRA extended this provision for the 2004 and 2005 taxable years.
- *Extension of elective expensing of qualified environmental remediation expenditures.* Under previous law, a taxpayer could elect to treat qualified environmental remediation expenditures that would normally be charged to a capital account and depreciated over time as deductible in the current year. To be deductible currently, the expenditure must be paid or incurred with the abatement or control of hazardous substances at a qualified contaminated site. This provision would have expired with the 2003 tax year. The WFTRA extended this provision for the 2004 and 2005 taxable years.
- *Extension of enhanced deduction for qualified computer contributions.* Under previous law, corporations were allowed an enhanced charitable contribution deduction for contributions of computer technology or equipment to schools or public libraries that would use the computer equipment for educational purposes. This provision would have expired with the 2003 tax year. The WFTRA extended this provision for the 2004 and 2005 taxable years.
- *Elimination of the phase down of the deduction for qualified clean fuel property.* Under previous law, a taxpayer was allowed a specified deduction for clean fuel vehicles or refueling property placed into service before January 1, 2007. The amount of that deduction was to be reduced by 25% in 2004, 50% in 2005, and 75% in 2006, and was to be completely phased out in 2007. The WFTRA eliminated the phase down in the 2004 and 2005 taxable years. Without further action, the phase down will resume at 75% in 2006.
- *Extension of Archer Medical Savings Accounts (MSAs).* Archer MSAs were designed to give small employers, their employees, and self-employed individuals a way of creating tax-deferred savings to offset qualifying medical expenses. The program was designed to be limited in scope: no new Archer MSAs could be set up after a certain threshold had been met or after the end of 2003. The WFTRA extends the period in which new Archer MSAs may be created until the end of 2005.

American Jobs Creation Act (AJCA) of 2004 (P.L. 108-357)

The American Jobs Creation Act of 2004 was signed into law by President Bush on October 22, 2004. The bill makes many substantial changes in many different areas of tax law. The act conforms to all but the following three federal tax law changes:

- It does not create a tonnage tax in lieu of an income tax on qualifying shipping activities.
- It does not create a deduction for income attributable to domestic production activities.
- It does not allow a deduction of state and local sales taxes in lieu of a deduction for state income taxes for the 2004 taxable year. The act conforms to this change for the 2005 taxable year, but requires an add back of the amount of sales taxes deducted.

The act does conform to the following changes for State tax purposes listed below:

- *Repeal of the exclusion for extraterritorial income (ETI).* Under previous law, U.S. exporters were eligible for an exclusion from gross income for qualifying extraterritorial income. In 2000,

the World Trade Organization declared this exclusion an illegal trade subsidy. Congress did not take action regarding this finding until the European Union (EU) began placing sanctions on U.S. exports. At the time Congress acted, those sanctions were at 12% and were rising by one percentage point per month. This exclusion will be phased out over several years. The ETI exclusion will be reduced by 20% in 2005 and by 40% in 2006. The ETI exclusion will be eliminated altogether beginning in 2007. Based on Congress's enactment of this law, the EU has indicated it will drop sanctions on U.S. imports beginning January 1, 2005.

In part to replace the ETI exclusion, Congress created a new deduction for domestic production activities.[46] "Domestic production activities" is defined fairly broadly and includes the following:

- sale, lease, or license of property manufactured or produced by the taxpayer in significant part in the United States,
- sale, lease, or license of United States produced motion pictures and video tapes,
- sale of electricity, natural gas, or potable water within the United States,
- construction activities performed in the United States, and
- engineering or architectural services performed in the United States for construction projects occurring in the United States.

For taxable years beginning in 2009, the amount of the deduction is equal to nine percent (9%) of the lesser of the domestic production activities income of the taxpayer or taxable income without regard to the deduction. This deduction will be phased in over several years beginning in 2005. For the 2005 and 2006 taxable years the deduction will be limited to three percent (3%). This amount will grow to six percent (6%) for the 2007 and 2008 taxable years.

- *Extension of 179 expensing limit increase/revisions regarding SUVs.* Section 179 of the Code allows a taxpayer to treat the cost of certain property as an expense which is not chargeable to a capital account. This allows the taxpayer to take a deduction for the property in the year in which it is placed into service rather than depreciating the property over a number of years. In 2003, Congress increased the amount that could be expensed under Section 179 of the Code from $25,000 to $100,000.[47] The federal change was originally set to expire after the 2005 taxable year. The AJCA extends this provision through the 2007 taxable year.

  One frequent complaint about the federal provision was that it allowed expensing of costs associated with the purchase of a sports utility vehicle (SUV) by a small business. General rules relating to the depreciation of motor vehicles did not apply to many large SUVs because those rules applied only to vehicles weighing 6,000 pounds or less. The effect of this provision was to allow an immediate write-off for the purchase price of a large SUV, but to require more gradual depreciation for the purchase of most other passenger vehicles. Taxpayers thus had a greater incentive to purchase a large SUV. The AJCA limits the amount of the purchase price that may be expensed under Section 179 with respect to

[46] As previously noted, the act does not create a deduction for income attributable to domestic production activities.
[47] The General Assembly conformed to this federal change as part of the 2003 Budget Act (S.L. 2003-284).

a vehicle weighing less than 14,000 pounds to $25,000[48] The federal legislation made this change effective when it became law, October 22, 2004.

- *Establishment of 15-year straight line cost recovery for qualified leasehold improvements and qualified restaurant property.*. The AJCA provides for 15-year straight-line depreciation for qualified leasehold improvements to nonresidential real property placed into service after the date of enactment (October 22, 2004) and prior to January 1, 2006. A qualified leasehold improvement is an improvement made to the interior of a building by either the lessor or lessee and placed in service more than three years after the building is placed in service. Under prior law, a qualified leasehold improvement was depreciated using straight-line depreciation over a 39-year period – the same period as for depreciation of nonresidential property in general.

  A similar depreciation schedule is put into place for qualified restaurant property placed into service after the date of enactment (October 22, 2004) and prior to January 1, 2006. In order to qualify as "qualified restaurant property", the property must be a building improvement placed in service more than three years after the building is placed in service and the restaurant must use more than half of the square footage of the building.

  If the leasehold improvement or restaurant property contains tangible personal property that may be segregated from the cost of other improvements and that tangible personal property has a shorter depreciation period, then the taxpayer may depreciate that property separately using the shorter period.

- *Modification of deduction for charitable contribution of used motor vehicles.* The AJCA limits the amount of the deduction for contributions of motor vehicles to charity. Vehicle donation programs have become popular in recent years. Generally, the taxpayer who has donated the motor vehicle has claimed a deduction for the full "blue book" value of the vehicle. The new law will limit the amount of the deduction based on how the donee organization uses the vehicle. If the charitable organization sells the vehicle without using it in any significant way, the amount of the deduction cannot exceed the gross proceeds of the sale. If the charity retains the vehicle for its own use, the taxpayer must receive an acknowledgment from the charity as to the value of the vehicle. The deduction may not exceed the acknowledged value of the vehicle to the charity. These changes become effective with the 2005 taxable year.

- *Establishment of an above-the-line deduction for certain attorney fees and court costs.* The AJCA allows an individual taxpayer an above-the-line deduction (i.e. from gross income) for attorney fees and court costs associated with certain civil rights actions, claims against the government, and Medicare fraud claims. Under previous law, these costs were deductible only as an itemized deduction, meaning that they were deductible only if the taxpayer itemized deductions and only to the extent aggregate itemized deductions exceeded 2% of the taxpayer's adjusted gross income. This provision became effective when the legislation became law, October 22, 2004.

- *Modification of deduction for automobile expenses of United States Postal Service employees.* The AJCA allows United States Postal Service employees who deliver and collect mail on rural routes

[48] There are some exceptions to this rule for certain vehicles. These exceptions were put in place to ensure that the legislation would apply only to SUVs and not other types of heavy motor vehicles (such as delivery trucks) that have a weight greater than 6,000 pounds but less than 14,000 pounds.

and receive qualified reimbursements of automobile expenses involving these duties to deduct their actual automobile expenses that exceed the reimbursement amount. This is an itemized deduction and therefore may be claimed only to the extent aggregate deductions exceed 2% of the taxpayer's adjusted gross income. Under previous law, the deduction could not exceed the amount of the qualified reimbursements, regardless of actual expenditures. As under previous law, reimbursements in excess of the amount of actual expenditures do not have to be included in gross income.

- *Exclusion of National Health Service Corps Loan Program repayments from gross income and from employment taxes.* The National Health Service Corps is an agency housed within the U.S. Department of Health and Human Services and has as its mission improving the health of the nation's underserved populations. Under the National Health Service Corps Loan Repayment Program, participants in the program may receive up to $25,000 per year for two years to pay off qualified educational loans. The loan repayment is in addition to any salary the participant receives from the employing community site. Under previous law, the amount of loan repayment was included in taxable income and was also subject to employment taxes (i.e. FICA). Under the AJCA, these loan repayments are to be excluded from both gross income and from employment taxes. This provision became effective with the 2004 taxable year.
- *Creation of a deduction for start-up costs and amendments to the expensing schedule for such costs.* Under the AJCA, a taxpayer may take a deduction of up to $5,000 for start-up and organization expenses of the taxpayer's trade or business. However, the amount of the deduction is reduced by the amount by which those expenses exceed $50,000. Any expenses in excess of $5,000 must be amortized over a 15-year period. Under previous law, no current expensing was allowed, the full amount of the start-up and organizational expenses would be amortized over 5 years. This provision is effective for expenses that occur on or after the date the legislation became effective, October 22, 2004.
- *Modification regarding the treatment of gain on the sale of a principal residence when the residence was acquired in a like-kind exchange.* Under current law, a taxpayer is allowed to exclude up to $250,000 of gain from the sale of a residence ($500,000 if a married couple filing jointly) if the taxpayer owned and used the residence as a principal residence for at least two of the last five years. The AJCA makes a change to this provision when the home was acquired as part of a like-kind exchange.[49] Under the AJCA, a residence received in a like-kind exchange must be owned by the taxpayer for at least five years and must be used as a principal residence of the taxpayer for at least two of the last five years in order to qualify for the exclusion from gross income of the gain on the sale of the residence. This provision became effective for residences sold on or after the date the legislation was enacted, October 22, 2004.

As previously noted, the act does not conform to three aspects of the federal tax law changes in the AJCA:

- It does not create a tonnage tax in lieu of an income tax on qualifying shipping activities. – The AJCA provides that a corporation can elect to be subject to a tonnage tax rather

---

49 A like-kind exchange is an exchange of property held for productive use in a trade or business or for investment for similar property. Unless cash is received as part of the trade, the exchange is not a taxable event.

than an income tax on its qualified shipping activities. The tonnage tax is based on the taxpayer's "notional shipping income." Notional shipping income is determined by reference to a monetary rate per ton shipped. The rate is 40 cents per 100 tons per day for the first 25,000 tons shipped per vessel and 20 cents per 100 tons per day for the amount shipped in excess of 25,000 tons per vessel. Once notional shipping income has been determined, tax is computed on that amount at the rate of 35%. In exchange for electing to be subject to the tonnage tax, the taxpayer may exclude from its gross income any amount resulting from its qualifying shipping activities. Conforming to this exclusion would result in income from shipping activities being excluded from taxation in North Carolina. In effect, it would result in a loss of tax revenues at the State level without a corresponding loss at the federal level. In order to maintain this revenue source, this act requires the taxpayer to add back the amounts deducted from gross income because of this new provision.

- It does not create a deduction for income attributable to domestic production activities. The AJCA phases out the exclusion for extraterritorial income: 20% in 2005, 40% in 2006; eliminated in 2007. Congress created a new deduction for domestic production activities to replace the ETI. "Domestic production activities" is defined fairly broadly. For taxable years beginning in 2009, the amount of the deduction is equal to 9% of the lesser of the domestic production activities income of the taxpayer or taxable income without regard to the deduction. This deduction will be phased in over several years beginning in 2005. For the 2005 and 2006 taxable years the deduction will be limited to 3%: this amount will grow to 6% for the 2007 and 2008 taxable years. In order to maintain this revenue source, this act requires the taxpayer to add back the amounts deducted from gross income because of this new provision.

- It does not allow a deduction of state and local sales taxes in lieu of a deduction for state income taxes for the 2004 taxable year. The act does conform to this change for the 2005 taxable year, but requires an add back of the amount of sales taxes deducted. The AJCA allows taxpayers to deduct state and local sales taxes in lieu of deducting state and local income taxes. This provision became effective with the 2004 taxable year and is set to expire for taxes beginning in 2006 and thereafter. Taxpayers that elect to deduct state and local sales taxes instead of state and local income taxes will have two options for determining the deductible amount: a) they may accumulate receipts for the actual amount of sales and use tax paid, or b) they may refer to tables prepared by the Secretary of the Treasury which estimate the amount of taxes paid based on average consumption and other factors.

  This federal provision is of particular benefit to taxpayers who reside in states that do not impose a personal income tax. For most North Carolina taxpayers, the greater benefit would come from deducting state income taxes rather than from deducting state and local sales taxes. Some exceptions to this general statement would include the following:

  - Nonresidents or part-year residents who reside in a state that does not impose an income tax and who have relatively low income tax liability in North Carolina or other states.
  - Taxpayers who may have a low tax liability due to eligibility for a significant amount of tax credits.

- North Carolina residents for whom a large portion of income is not subject to taxation. This class of taxpayers would include many government retirees whose government pensions are not subject to State income tax under the decisions in *Bailey* and the related cases and whose Social Security payments are not subject to State income tax under G.S. 105-134.6.

North Carolina law currently requires taxpayers to add back the amount of the deduction allowed under the Code for state, local, and foreign income taxes. In order to treat the deduction for state and local sales taxes equivalent to the deduction for state, local, and foreign income taxes, the General Assembly would have to have required the add back of the deduction for state and local sales taxes if it had decided to conform to the federal change. This conformance would have been problematic, however, given that the federal legislation is effective for the 2004 taxable year and the General Assembly could not conform to the federal legislation and require the add back unless it acted before the end of the year. Although the practical effect of conforming to the change and requiring the add back is the same as not conforming to the change at all, a court could find that requiring an add back would in effect be a retroactive tax increase. Therefore, the act does not conform to the change allowing a deduction of state and local sales taxes in the 2004 taxable year, but does conform to that change and require an add back for the 2005 taxable year.

An Act to accelerate the income tax benefits for charitable cash contributions for the relief of victims of the Indian Ocean tsunami (P.L. 109-1).

On December 26, 2004, a large earthquake centered in the Indian Ocean unleashed a catastrophic tsunami that resulted in widespread devastation in 11 countries in South Asia, Southeast Asia, and Africa. The disaster is estimated to have caused billions of dollars in damages and produced a death toll in excess of 270,000.

On January 6, 2005, the first act of the 109th Congress was to approve accelerated tax benefits for charitable cash contributions for the relief of victims of the Indian Ocean tsunami. President Bush signed the act into law the following day. The act allows a taxpayer to treat a cash contribution for tsunami relief efforts made in January 2005, as if it were made on December 31, 2004. Thus, the taxpayer would be able to take a deduction in the 2004 taxable year rather than the 2005 taxable year. In order to qualify for the accelerated benefit, the contribution must be cash. Donations of property or cash substitutes, such as marketable securities, are not eligible for the accelerated benefits. In addition, the contribution must be specifically designated to be for tsunami relief. A contribution that is made to a charitable organization that is assisting in relief efforts but that is not specifically designated to relief efforts is not eligible for the accelerated benefits. For example, a donation to the Red Cross would be eligible for the accelerated benefit only if the donation were specifically designated for tsunami relief efforts; a general donation to the Red Cross would not be eligible for the accelerated benefit.

Part 36: Individual Income Tax Changes

Part 36 of the act extends the 8.25% upper-income individual income tax rate for tax years 2006 and 2007. The Governor's budget recommended a phase down of the upper income tax rate to 8% in 2006, and the elimination of the bracket in 2007.

In 2001, the General Assembly added a new tax bracket that imposed an additional one-half percent income tax (a total rate of 8.25%) on certain North Carolina taxable income for three

years. The change was estimated to affect approximately 2% of North Carolina taxpayers. In 2003, the General Assembly extended the tax rate for two more years. This act retains the upper bracket for two additional years.

Under prior North Carolina law, tax was imposed at the following rates on individuals' North Carolina taxable income:

Tax Rate	Married filing jointly	Heads of household	Single filers	Married filing separately
6.0%	Up to $21,250	Up to $17,000	Up to $12,750	Up to $10,625
7.0%	Over $21,250 and up to $100,000	Over $17,000 and up to $80,000	Over $12,750 and up to $60,000	Over $10,625 and up to $50,000
7.75%	Over $100,000	Over $80,000	Over $60,000	Over $50,000

The 2001 law created a fourth tax bracket for North Carolina taxable income as follows:

Tax Rate	Married filing jointly	Heads of household	Single filers	Married filing separately
8.25%	Over $200,000	Over $160,000	Over $120,000	Over $100,000

This part of the act was later amended in section 46 of S.L. 2005-345 (Modify 2005 Appropriations Act) to increase from $1 to $3 the amount that an individual income taxpayer may designate on the taxpayer's return to be allocated to the North Carolina Political Parties Financing Fund. The amount is for use by the political party designated by the taxpayer.

Part 38: Corporate, Excise, and Insurance Tax Changes[50]

This part equalizes the gross premiums tax on insurance companies by taxing health maintenance organizations (HMOs) at the same rate as other insurers. HMOs are currently taxed at 1%. This part repeals the special 1% rate for HMOs and taxes HMOs at 1.9%, effective for taxable years beginning on or after January 1, 2007. Prior to 2001, HMOs did not pay a gross premiums tax.[51]

In 2001, the General Assembly enacted legislation subjecting all insurance carriers to the gross premiums tax in lieu of the State's corporate income and franchise tax. However, the rate continued to vary depending upon the type of insurer. The 2001 legislation taxed HMOs and Article 65 corporations, such as Blue Cross/Blue Shield and Delta Dental Corporation, at the rate of 1%. Effective January 1, 2004, the General Assembly increased the gross premiums tax on

[50] The Senate version of Senate Bill 622 would have reduced the corporate income tax rate from 6.9% to 6.4% and repealed the earmarking of a percentage of the corporate income tax collections to the Public School Building Capital Fund. The House version would have equalized the privilege tax on entertainment by taxing all forms of entertainment at a rate equal to the combined State and local sales tax rate, and would have provided an income tax credit to a small business that provides health insurance to its full-time employees.

[51] Prior to 2001, HMOs were subject to corporate income and franchise taxes. Companies that pay a gross premiums tax are exempt from State corporate income and franchise taxes.

Article 65 corporations from 1% to 1.9%. This act increases the rate on HMOs to 1.9%, effective for taxable years beginning January 1, 2007. For the 2007 tax year only, HMOs are directed to make the following estimated payments of the tax: 50% on April 15 and 50% on June 15, with true-up the following March 15. For subsequent tax years, the general law on installment payments of gross premiums tax applies. This change accelerates the timing of the tax payment to move the revenue gain to an earlier fiscal year.

Part 39: Tax Incentives/Film Industry Jobs Incentives

This part replaces the current film industry development grant program[52] with a refundable income tax credit equal to 15% of the qualifying expenses spent by a production company in connection with a production. However, the amount of the credit with respect to a feature film production is capped at $7.5 million. The credit is effective for taxable years beginning on or after January 1, 2005, and applies to qualifying expenses occurring on or after July 1, 2005. The credit expires for qualifying expenses occurring on or after January 1, 2010. The incentive is targeted at feature films, episodic television series, and commercial advertising. The Governor's budget exempted from sales and use tax, sales to a production company of film or video production equipment.

Under G.S. 105-164.3, a production company is defined as a person engaged in the business of making original motion picture, television, or radio images for theatrical, commercial, advertising, or educational purposes. However, for the purposes of the new credit, the production may not be any of the following: political advertising, television production of a news program or live [53] sporting event, a radio production, or a production containing obscene material.[54] In the case of an episodic television series, an entire season of episodes is considered one production.

In order to obtain the credit, the taxpayer must have qualifying expenses in excess of $250,000 with respect to a production and provide on its return a detailed accounting of qualifying expenses. Qualifying expenses are the total amount spent in North Carolina for the following:

- Goods and services purchased by a production company in connection with a production. For goods with a purchase price of $25,000 or more, the amount included in qualifying expenses is the purchase price less the fair market value of the goods at the time the production is completed.
- Compensation and wages paid by a production company on which it remitted withholding payments to the Department of Revenue. Any amounts paid to an individual who receives in excess of $1 million with respect to a single production cannot be included in a qualifying expense.

---

[52] Section 39.1(d) of this part repeals G.S. 143B-434.4, which creates the Film Industry Development Account. The General Assembly has not appropriated money to this account for the past couple of years.
[53] Section 47 of S.L. 2005-345 amended this part to clarify that the sporting event ineligible for the credit is a "live" sporting event and to define the term "live sporting event".
[54] G.S. 14-190.1 defines "obscene" material as material that meets all of the following conditions: the material depicts or describes in a patently offensive way sexual conduct; the average person applying contemporary community standards relating to the depiction or description of sexual matters would find that the material taken as a whole appeals to the prurient interest in sex; the material lacks serious literary, artistic, political, or scientific value; and the material as used is not protected or privileged under the Constitution of the United State or the Constitution of North Carolina.

The taxpayer must maintain and make available for inspection any information or records required by the Secretary of Revenue or the regional film commissions. The taxpayer has the burden of proving eligibility for the credit and the amount of the credit. The Secretary of Revenue may consult with the North Carolina Film Office of the Department of Commerce and the regional film commissions in order to determine the amount of qualifying expenses.

The credit may be claimed for the taxable year in which the production activities are completed. The credit is computed based on all of the taxpayer's qualifying expenses incurred with respect to the production, not just the qualifying expenses incurred during the taxable year. If the credit exceeds the amount of tax imposed for the taxable year reduced by the sum of all credits allowable, the Secretary must refund the excess to the taxpayer. A pass-through entity is considered a taxpayer for purposes of claiming this credit; therefore, it does not distribute the credit among its owners. The taxpayer may not claim the credit for qualifying expenses for which it claimed a deduction under the Internal Revenue Code.

The Department of Revenue must publish by May 1 of each year the following information, itemized by taxpayer for the 12-month period ending the preceding December 31:

- The location of the sites used in a production for which a credit was claimed.
- The qualifying expenses for which a credit was claimed, classified by whether the expenses were for goods, services, or compensation.
- The number of people employed in the State with respect to the credits claimed.
- The total cost to the General Fund of the credits claimed.

Finally, this part amends the tax secrecy statutes to allow the exchange of information concerning the credit with the North Carolina Film Office of the Department of Commerce and the regional film commissions.

PRESENT-USE VALUE BUYOUT CREDITS.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-293	**HB 705**	**Representative Hill**

AN ACT TO ALLOW BUYOUT PAYMENTS TO COUNT TOWARDS THE ONE THOUSAND DOLLAR GROSS INCOME REQUIREMENT FOR AGRICULTURAL LAND FOR PRESENT-USE VALUE TAX EXEMPTIONS.

OVERVIEW: This act allows payments received under the tobacco quota buyout program to be counted towards the $1,000 income requirement which must be met before agricultural land can be assessed at present-use value for property tax purposes.

FISCAL IMPACT: The Department of Revenue does not expect that this act will result in any significant amount of additional acreage being assessed at present-use value.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act is effective for taxes imposed for taxable years beginning on or after July 1, 2005.

<u>ANALYSIS:</u> Agricultural land, horticultural land and forestland have been designated as a special class of property and are appraised and assessed at present-use value, instead of market value, for property tax purposes if the land meets certain statutory requirements. Agricultural land must be part of a farm unit, under a sound management program, individually owned, consist of one or more tracts (one of which must consist of at least 10 acres that are in actual production) and for the three years preceding January 1 of the year for which the present-use value benefit is claimed, have produced an average gross income of at least $1,000. Counted income includes the following:

- Income from the sale of agricultural products produced from the land, and
- Payments received under a governmental soil conservation or land retirement program

This act allows payments received under the Fair and Equitable Tobacco Reform Act of 2004 to be included as income when determining the present-use value eligibility of agricultural land. The agricultural land must continue to meet the ownership and actual production requirements.

Congress passed the Fair and Equitable Tobacco Reform Act of 2004 in October, 2004. That act repeals the federal tobacco price support and quota programs, provides compensation payments to tobacco quota owners and growers, and provides an assessment mechanism for tobacco manufacturers and importers to pay for the buyout. An eligible quota owner is the owner of a farm on the date the federal legislation was enacted, October 22, 2004, for which a basic tobacco quota/allotment was established for the 2004 marketing year. An eligible quota grower is an owner, operator, landlord, tenant or sharecropper who shared in the risk of producing tobacco in the 2002, 2003, or 2004 marketing year. Quota owners will be paid $7 per pound for the basic quota they owned in 2002. Growers will be paid $3 per pound for their 2002 effective quota.[55] These payments will be distributed equally over 10 years, beginning with the 2005 fiscal year and ending in 2014. The initial payment was made by the beginning of October 2005. The buyout is funded by quarterly assessments on tobacco manufacturers and importers. Because the buyout is funded by manufacturer and importer assessments, future Phase II payments will be terminated. For federal tax purposes, quota owner payments are treated as capital gains and grower payments are expected to be treated as ordinary income. As of October 2005, the I. R. S. had not ruled on the tax status of these payments.

<u>PROPERTY TAX PAID WITH VEHICLE REGISTRATION.</u>

Session Law	*Bill #*	*Sponsor*
S.L. 2005-294	**HB 1779**	**Rep. Folwell, Insko, Justice, Walker**

AN ACT TO CREATE A COMBINED MOTOR VEHICLE REGISTRATION RENEWAL AND PROPERTY TAX COLLECTION SYSTEM.

[55] The payment is $2 per pound if the grower participated in two of the three marketing years, and $1 per pound if the grower participated in only one of the three marketing years.

OVERVIEW: This act creates a combined system for motor vehicle registration renewal and property tax collection. Currently, the two systems, though interrelated, are run separately and administered by different entities.

FISCAL IMPACT: The NC Association of Tax Assessors estimates that this act will result in collection of approximately $72 million annually in additional motor vehicle property taxes that currently go uncollected. Counties will also likely experience savings from the elimination of resources devoted to collection of property taxes on motor vehicles, including staff time and mailings for delinquent notices. An administrative fee equal to the cost of preparing and mailing notices will be retained by the Department of Revenue. A second fee for the cost of collection of taxes and fees will be retained by the Division of Motor Vehicles and tag agents. The bill will require significant changes in DMV operations and significant costs for changing DMV computer systems. The full extent of these changes and costs is not currently known.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Different portions of the act have different effective dates as specified in the analysis. Most of the act becomes effective on the earlier of January 1, 2009, or the date when the Department of Revenue and the Division of Motor Vehicles have certified that an integrated computer system is in operation. The act became law when signed by the Governor on August 22, 2005.

ANALYSIS: Since 1993, all motor vehicles, except public service company vehicles appraised by the Department of Revenue and manufactured homes, are classified for listing, assessment, and taxation separately from other classes of property. The classified motor vehicles consist of two groups; those that are registered with the Department of Transportation's Division of Motor Vehicles (DMV) and those that are not registered with the DMV.[56]

The county in which the motor vehicle is registered assesses the vehicle for property taxes on a revolving, year-round basis. To accomplish this, DMV gives each county a monthly list of all the motor vehicles in the county for which the registration was renewed or obtained two months earlier. The county then lists and appraises each vehicle and sends the owner of the vehicle a bill for the county, municipal, and special district property taxes due. The result is that a motor vehicle owner receives a tax bill for the vehicle approximately three months after the vehicle is registered or the registration is renewed. Each month, the county tax collector collects taxes on approximately one-twelfth of the motor vehicles having a tax situs in the county. If the taxes on the registered motor vehicle are not paid within one month after they become due, then the motor vehicle owner is liable for interest at the rate of 2% a month for the first month following the date the taxes were due and ¾ % for each month thereafter. In addition, if the taxes are not paid, the county includes the motor vehicle on a list that is sent to the DMV. The DMV then refuses to renew the vehicle's registration the following year unless the taxpayer obtains a receipt showing that the previous year's taxes have been paid.[57] Unpaid taxes may also be collected by levying on the motor vehicle or other personal property of the owner, but the unpaid taxes do not become a lien on the owner's real property.

The DMV requires motor vehicles to be registered annually. Under G.S. 20-66, the registration of a vehicle that is renewed by means of a registration renewal sticker expires at midnight on the last

---

[56] A vehicle is not registered with the DMV either because it is a tractor, an earthmover, or some other type of vehicle that cannot be registered with the DMV or it is a car or truck and could be, but for some reason is not, registered with the DMV.
[57] Vehicle owners may get around this block by buying a new tag on the vehicle.

day of the month designated on the sticker. It is lawful, however, to operate the vehicle on a highway until midnight on the fifteenth day of the month following the month in which the sticker expired. The DMV varies the expiration dates of registration renewal stickers for a type of vehicle so that an approximately equal number expires at the end of each month, quarter, or other period consisting of one or more months. The $28 fee[58] is paid to the DMV and credited to the Highway Fund.

This act combines the motor vehicle registration and property tax billing and collection into a combined process. The goals of the combined process are to reduce the number of taxpayer interactions with government, save money, increase the overall efficiency of both functions, and improve the property tax collection rate on motor vehicles.

Beginning January 1, 2006, the interest rate on unpaid taxes on classified motor vehicles will increase from 2% for the first month to 5% for the first month following the date the taxes were due. Instead of going to the taxing unit that is the situs of the motor vehicle, 60% of the interest collected on unpaid taxes on registered vehicles will be transferred on a monthly basis to a special account created within the Treasurer's Office. The North Carolina Association of County Commissioners will direct the Treasurer to distribute funds from the account for the purpose of developing and implementing an integrated computer system within the DMV. The system will allow for the combined assessment, billing, and collection of property taxes on motor vehicles and the issuance of registration plates.

Beginning July 1, 2009, or when the Division of Motor Vehicles and the Department of Revenue certify that the integrated computer system for registration renewal and property tax collection for motor vehicles is in operation, whichever occurs first, the following changes will occur:

- Property tax on registered motor vehicles will be due on the date that a new registration is applied for or the fifteenth day of the month following the month in which the registration renewal sticker expired pursuant to G.S. 20-66(g).
- The Property Tax Division of the Department of Revenue shall prepare and mail a combined tax and registration notice for each registered vehicle. The notice will contain the date of the notice, the appraised value of the vehicle, the tax rate of the taxing units, a statement that the appraised value of the motor vehicle may be appealed to the assessor before the taxes and fees become delinquent, and the registration fee imposed by the DMV.
- The Department of Revenue may receive a fee for each combined notice generated for a registered vehicle. The fee must be equal to the actual cost of printing and sending the combined notice and will be subtracted from the taxes and fees remitted to the county or municipal corporation in which the vehicle is registered.
- The property taxes and registration fees must be paid either to the DMV or an agent contracting with the DMV. The taxes and fees do NOT have to be paid in the county that is the situs of the vehicle.
- The DMV or its agent may retain a fee for collecting the county and municipal taxes and fees. This fee must be an amount equal to at least 1/3 of the compensation paid for registration renewals conducted by contract agents under Chapter 20 of the General

[58] This fee was raised from $20 to $28 in the 2005 Appropriations Act, S.L. 2005-276.

Statutes. This fee is in addition to the $1.43 that is currently paid to contract agents for each registration renewal.

- The DMV or its agent must provide a weekly financial report containing information required by the Property Tax Division to the taxing units and the DMV to enable them to account for payments received.
- G.S. 105-330.7 is repealed. It will no longer be necessary for the tax collector to send a monthly list to the DMV of classified vehicles on which taxes remain unpaid, because the taxes and registration fees will be paid to the same entity at the same time.
- Interest at the rate of 5% for the remainder of the month following the month in which the registration renewal sticker expired will also accrue on unpaid registration fees on classified motor vehicles. Interest collected on unpaid registration fees will be transferred on a monthly basis to the North Carolina Highway Fund for technology improvements within the DMV. The interest collected on unpaid property taxes will no longer go into the special account in the Treasurer's office but will remain with the taxing units.
- G.S. 20-50.3 is repealed. Once the computer system is in operation, the DMV will no longer need to furnish county tax assessors a list of registered vehicles.

Effective when the act became law, August 22, 2005, the Property Tax Division within the Department of Revenue and the DMV shall jointly study and develop a plan for determining the method of valuation of vehicles to be taxed and for implementing an integrated computer system needed to combine the registration renewal and property tax collection for motor vehicles in the State. The Divisions shall consult with representatives from the following organizations: the North Carolina Association of County Commissioners, the North Carolina League of Municipalities, the North Carolina Association of Assessing Officers, the North Carolina Automobile Dealers Association, the North Carolina Independent Automobile Dealers Association, and the North Carolina Tax Collectors Association.

The Treasurer must report to the Revenue Laws Study Committee semi-annually, with the first report due by April 30, 2006. The report must contain a detailed description of the moneys transferred and distributed from the special account.

The Property Tax Division within the Department of Revenue and the DMV must report findings and recommendations of its joint study to the Revenue Laws Study Committee, the Joint Legislative Transportation Oversight Committee, and the Fiscal Research Division by April 30, 2006.

PROPERTY TAX % VALUE OF MOTOR VEHICLES.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-303	**HB 988**	**Rep. Blackwood, Church**

AN ACT TO EXCLUDE HIGHWAY USE TAXES AS A FACTOR IN DETERMINING THE TRUE VALUE IN MONEY OF MOTOR VEHICLES FOR PROPERTY TAX PURPOSES.

<u>OVERVIEW:</u> This act provides that when a tax assessor considers the sales price of a motor vehicle in determining the true value of the vehicle for property tax purposes, the assessor may not consider the highway use tax as part of the sales price.

<u>FISCAL IMPACT:</u> According to the North Carolina Department of Revenue, there are no counties currently using the sales price to determine the value of motor vehicles. Most counties use pricing guides developed by Tax Equity Consultants (TEC) or the National Automobile Dealers Association to determine the average retail prices paid for motor vehicles. In some instances in which the assessed value of a vehicle is appealed by the taxpayer, assessors may use the bill of sale that includes highway use tax as documentation for changing the assessed value. To the extent that this occurs, this act will result in lower revenue for local governments. It is expected that the revenue impact would be small; however, the exact amount is not known.
(For a more complete fiscal analysis, see <u>Overview: Fiscal and Budgetary Actions, 2005 Session</u>. Available in the Legislative Library.)

<u>EFFECTIVE DATE:</u> This act is effective for taxes imposed for taxable years beginning on or after July 1, 2005. The act became law when signed by the Governor on August 22, 2005.

<u>ANALYSIS:</u> By statute, a county must appraise motor vehicles at their true value in money for property tax purposes. True value is defined as the price at which property would change hands between a willing and financially able buyer and a willing seller. In practice, assessors use a pricing guide developed by TEC Data Systems to determine the value of vehicles for property tax purposes. The pricing guide reflects the average retail price paid for motor vehicles. In determining retail prices, all costs that are necessary to acquire and operate a motor vehicle are considered. If an assessor believes the values developed in the guide are too low or too high, the assessor may consult with TEC Data Systems about the values and have a different set of values computed for use in that assessor's county. If a taxpayer disagrees with the appraised value, the taxpayer has 30 days after the date the tax notice was prepared to appeal the value. Counties will adjust an appraised value for reasons such as the vehicle's condition or excessive mileage.

Counties typically do not begin their appraisal of a new motor vehicle based on the vehicle's bill of sale. However, there are instances where a taxpayer may bring in a bill of sale to show that he or she paid less than the value at which the vehicle is assessed. A vehicle's bill of sale includes the 3% highway use tax paid on the vehicle. This act provides that when an assessor considers the sales price of a motor vehicle in determining its true value, the assessor must not consider the highway use tax paid on the vehicle.

<u>PROPERTY TAX CHANGES.</u>

Session Law	*Bill #*	*Sponsor*
S.L. 2005-313	**HB 116**	**Representative Brubaker**

AN ACT TO CLARIFY PRESENT-USE VALUE ELIGIBILITY, TO AMEND THE PERIOD FOR APPEAL OF A PRESENT-USE VALUE DETERMINATION OR APPRAISAL, TO MODIFY THE TAX YEAR FOR MOTOR VEHICLES THAT ARE TO BE SWITCHED FROM AN ANNUAL SYSTEM OF REGISTRATION TO A STAGGERED SYSTEM EFFECTIVE JANUARY 1, 2006, AND TO APPLY THE SAME PENALTY

THAT CURRENTLY APPLIES TO PAYMENTS BY CHECK TO PROPERTY TAX PAYMENTS MADE BY ELECTRONIC PAYMENTS.

OVERVIEW: This act makes clarifying and technical changes to the present-use value statutes, clarifies the tax year for motor vehicles that are to be switched from an annual system of registration to a staggered system, and imposes a penalty for nonpayment of property taxes on an electronic funds transfer that cannot be completed because of insufficient funds.

FISCAL IMPACT: This act would only impact local revenues and no fiscal impact is expected. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The changes made by the act to the motor vehicle property tax statutes become effective January 1, 2006. The other provisions are effective for taxes imposed for taxable years beginning on or after July 1, 2005. The act itself became law when the Governor signed it into law on August 25, 2005.

ANALYSIS: This act makes changes in three different parts of the property tax statutes.

Present-Use Value. – Since 1973, the General Assembly has provided that farmland may be appraised, assessed, and taxed at its present-use value, as opposed to its fair market value. The present-use value classification helps preserve farmland by insulating it from the rising property tax values cause by competing market pressures to develop farmland for commercial and residential purposes. In 2002, the General Assembly provided an updated method for calculating the value of farmland in its present use. In 2004, the Department of Revenue indicated to the Property Tax Subcommittee of the Revenue Laws Study Committee that the present-use value statutes needed to be clarified to help the counties and the Department with their administration of the classification. Sections 1 through 7 of this act make those changes. These changes codify existing practices among county assessors.
The act provides that certain land defined as horticultural land may be treated as agricultural land when there is no significant difference in the cash rental rates for the land.[59] This provision applies to land used to grow horticultural and agricultural crops on a rotating basis and to land used to grow a horticultural crop that is set out or planted and harvested within one growing season.

Under the present-use value system, farmland must be part of a unit engaged in commercial production. A 'unit' is one or more tracts of farmland. Under this act, multiple units must be under the same ownership and be of the same type of classification. If the multiple tracts are located within different counties, then the tracts must be within 50 miles of a qualifying tract. Prior to this act, multiple tracts in different counties could be considered part of the same unit if they either shared the same classification or shared the same equipment or labor force. This act removes the latter condition and requires that multiple tracts in different counties must share the same classification to qualify as a unit.

For property to qualify for present-use value classification, it must meet certain ownership requirements in addition to use and income requirements. Generally speaking, a qualifying owner must own the property for four years or the property must be the home of the qualifying owner. Prior to 2002, there existed an exception to the ownership requirement that allowed an owner to immediately qualify newly acquired property for use value classification if the property was

[59] Effective with the 2003 property tax year, the value of agricultural and horticultural land is determined by the estimated cash rental rates for the land. Prior to 2003, the value of agricultural land was determined by the income of corn and soybean yields and the value of horticultural land was determined by horticultural product yields.

appraised at its present use value at the time title to the land passed to the new owner or the property *was eligible for appraisal* at its present use value so long as the new owner continued to use the property for farm purposes. In 2002, the General Assembly amended this exception to require the new owner to file a timely application for the newly acquired property and to agree to accept liability for the deferred taxes. The new condition of accepting liability for the deferred taxes conflicts with the old condition that the property *be eligible for* use value classification since there would be no deferred taxes to assume unless the property was currently appraised at its present-use value when the property was transferred. This act removes this ambiguity by setting forth two different exceptions to the ownership requirements:

- It removes the phrase 'or was eligible for appraisal at its present use value' from the first exception.
- It creates a new exception for property for which there are no deferred taxes. It will allow property *eligible for* use value classification to immediately qualify in the hands of a new owner if the new owner has other property classified at present use and files a timely application for use-value classification.

Lastly, the act establishes 60 days as the time within which a taxpayer (1) must appeal an assessor's decision regarding the qualification or appraisal of the taxpayer's property as use value property and (2) may submit additional information to reverse a disqualification of property for present-use value classification or for exemption or exclusion because of failure to submit additional information. Current law provides no time limit for presenting additional information after the assessor has disqualified the property. The 60-day time limit corresponds to the current timeframe a new owner has to file an application for use value treatment after acquiring the property. [60]

Motor Vehicles. – Sections 8 and 9 of the act clarify how the motor vehicle property tax year will be accomplished for commercial vehicles that are converting from an annual registration system to a staggered registration system. Most vehicles registered with the Division of Motor Vehicles are taxed for property tax purposes on a revolving, year-round basis that corresponds with their vehicle registration and renewal. Commercial trucks are registered under the annual system. However, in 2004 the General Assembly enacted legislation that provides for the staggered issuance of commercial vehicle and dealer license plates, effective January 1, 2006. The Department of Revenue estimates this change will affect approximately 500,000 annually registered motor vehicles. To accomplish this transition, this act provides for a motor vehicle tax year greater than 12 months during the period that the vehicles are converting from annual registration to staggered registration. This change will allow the Division to issue one-time 7- to 18-month registrations for these vehicles, resulting in an approximate equal number of expiring registrations throughout a 12-month period. Upon renewal of these one-time registrations, the subsequent registrations will be 12-month registrations. The act specifies how the tax calculation is made for tax bills when the registration cycle is not 12 months.

Electronic Funds Transfer. – Section 10 of the act provides that the same penalty and penalty waiver provisions that apply to payments of property taxes by check also apply to payment of property taxes by electronic funds transfer. If a worthless check is given for payment of property taxes, the penalty is $25 or 10% of the amount of the check, whichever is greater, subject to a maximum of

[60] G.S. 105-277.4(a). The General Assembly enacted the provision requiring a new owner to submit an application for use-value classification for newly acquired property within 60 days after its purchase in 2002.

$1,000. The penalty does not apply if the tax collector finds that the taxpayer inadvertently failed to draw the check on the taxpayer's account that had sufficient funds.

ADD AGENCIES TO SET-OFF DEBT COLLECT.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-326	**SB 682**	**Senator Holloman**

AN ACT TO EXTEND TO PUBLIC HEALTH AUTHORITIES, SANITARY DISTRICTS, AND METROPOLITAN SEWERAGE DISTRICTS THE SET-OFF DEBT COLLECTION PROCEDURES CURRENTLY AVAILABLE TO COUNTIES AND CITIES.

OVERVIEW: This act adds public health authorities, metropolitan sewerage districts, and sanitary districts to the list of agencies authorized under the Setoff Debt Collection Act to collect debts owed to them by obtaining a setoff against a debtor's North Carolina income tax refund.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: This act becomes effective January 1, 2006, and applies to income tax refunds determined on or after that date.

ANALYSIS: The Setoff Debt Collection Act authorizes State and local agencies to collect debts by diverting part or all of an individual's income tax refund to pay a debt the individual owes to a particular agency. Thus, the debt the individual owes the agency is set off against the individual's income tax refund. Before January 1, 2000, the setoff program was open only to State agencies. Since 2000, authorized local agencies[61] participate through a clearinghouse. Because there are so many local agencies, funneling their claims through a clearinghouse avoids an undue administrative burden on the Department of Revenue. A $15.00 collection assistance fee is added to each local agency debt submitted for setoff, which is remitted to the clearinghouse that submitted the debt. In addition, a $5.00 collection fee is added to each debt, State or local, that is submitted for setoff, which is retained by the Department of Revenue. The fees do not, however, apply to child support debts. While the use of debt setoff for State agencies is mandatory, usage by local agencies is optional. The Act only applies to debts that are at least $50 and to a refund that is at least this same amount.

[61] In 1997, the General Assembly extended the Setoff Debt collection act to counties and municipalities, effective in 2000. In 2003, the General Assembly added water and sewer authorities to the list of entities eligible to participate in debt setoff. In 2004, regional joint agencies created by interlocal agreement were added.

This act allows public health authorities,[62] metropolitan sewerage districts,[63] and sanitary districts[64] to participate under the Setoff Debt Collection Act in the same manner as other authorized local agencies. Like other authorized local agencies, these agencies would be authorized to submit their debts for collection by setoff through a local clearinghouse only after providing the debtor with notice, an opportunity to be heard before the authority, and an appeal process pursuant to the Administrative Procedure Act.

FUEL TAX REFUND FOR PUMPERS AND SWEEPERS.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-377	**SB 356**	**Senator Hoyle**

AN ACT TO ALLOW A FUEL TAX REFUND FOR OFF-ROAD FUEL USE BY PUMPER TRUCKS AND SWEEPERS.

OVERVIEW: This act adds the following two vehicles to the list of vehicles that are allowed an annual refund of the motor fuel taxes paid on fuel consumed by the vehicles:

- A commercial vehicle that uses a power takeoff to remove and dispose of septage and for which an annual fee is paid to the North Carolina Department of Environment and Natural Resources under the septage management program.
- A sweeper.

---

[62] Although a public health authority functions similarly to a county agency, it is a separate legal entity created under G.S. 130A-45.02. A public health authority is created by joint resolution of a county board of commissioners and the local board of health. It functions as a policy-making, rule-making, and adjudicatory body designed to protect and promote the public health. Among its powers, a public health authority may establish a fee schedule for services received from public health facilities. Currently, there is only one public health authority, created under this authorizing legislation, and it is the Hertford County Public Health Authority.

[63] Any two or more political subdivisions in one or more counties, or any political subdivision and any unincorporated area within one or more counties, may petition for the creation of a metropolitan sewerage district by filing a resolution with the boards of county commissioners of the county or counties within which the proposed district will lie. A public hearing is then held where the Environmental Commission and board of county commissioners determine whether the creation of the metropolitan sewerage district would preserve and promote the public health and welfare of the area. A sewerage district board has the authority to levy taxes on property within the district and impose charges for the services furnished. The district board may provide methods for collection of charges and measures for enforcement of collection, including penalties and the denial or discontinuance of service.

[64] The Commission for Health Services may create sanitary districts for the purpose of preserving and promoting the public health and welfare. A sanitary district is incorporated if 51% of the freeholders in the proposed district petition the county board of commissioners of the county in which all or the largest portion of the land of the proposed district is located. A sanitary district board has the authority to levy property taxes within the district and apply service charges and rates based on the benefits provided. Sanitary districts that maintain and operate a sewage system may bring suit for overdue sewer charges and disconnect the sewer lines. This remedy is not sufficient when the customer moves out of the district. The charges also become a lien on the property served and the property may be sold.

FISCAL IMPACT: The fiscal impact for allowing a fuel tax refund for off-road fuel used by pumper trucks is estimated to result in the following gains to the General Fund and Local Governments and the following losses to the Highway Fund and Highway Trust Fund. There is no estimate available for sweepers.

	FY 2005-06	FY 2006-07	FY 2007-08	FY 2008-09	FY 2009-10
GF	$124,461	$122,369	$118,142	$113,016	$111,109
HF	($458,067)	($460,701)	($461,680)	($461,084)	($464,837)
HTF	($152,689)	($153,567)	($153,893)	($153,695)	(154,946)
LG	$ 77,788	$ 76,481	$ 73,839	$ 70,635	$ 69,443

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act became effective when it was signed into law by the Governor on September 8, 2005, and applies to motor fuel and alternative fuel consumed on or after January 1, 2006.

ANALYSIS: Certain vehicles that use motor fuel to conduct their work, as distinguished from propelling them on the highway, are allowed an annual refund of a portion of the motor fuel taxes paid. The amount of the refund is equal to 33 1/3% of the sum of the flat cents-per-gallon rate in effect during the year for which the refund is claimed and the average of the two variable cents-per-gallon rates in effect during the year. The amount of sales tax due on the fuel is deducted from the refund.

The act adds the following two types of vehicles to the list of vehicles that are eligible for this fuel tax refund:

- A commercial vehicle that uses a power takeoff to remove and dispose of septage and for which an annual fee is required to be paid to the Department of Environment and Natural Resources (DENR) under its septage management program.[65] In order to issue the refund, the Department of Revenue is not required to verify the payment of the permit fee as required by G.S. 130A-291.1.[66] If the Department, however, discovers through its auditing or investigatory procedures that those permit fees have not been paid, it may refuse to issue a refund or seek a return of the refund.

- Sweeper. A sweeper is a vehicle that vacuums up and hauls away litter in parking lots. A sweeper vehicle has an auxiliary engine that runs only when the vehicle is performing its sweeping function. A factory-installed meter gauges how much fuel is being used for that function.

The other vehicles eligible for this refund include concrete mixing vehicles; solid waste compacting vehicles; bulk feed vehicles that deliver feed to poultry or livestock and use power takeoffs to unload the feed; vehicles that deliver lime or fertilizer in bulk to farms and use power takeoffs to unload the lime or fertilizer; tank wagons that deliver alternative fuel, motor fuel, or another type of liquid fuel into storage tanks and use power takeoffs to make the deliveries; and commercial

---

[65] Under G.S. 130A-291.4, DENR is responsible for administering a septage management program which includes establishing standards for transportation, storage, treatment, and disposal of septage; operator registration and training; the issuance, suspension, and revocation of permits; and procedures for the payment of annual fees.

[66] An earlier version of Senate Bill 356 allowed a refund to a vehicle for which an annual fee is "paid" to DENR, while the ratified version allows a refund to a vehicle for which an annual fee is "required to be paid" to DENR.

vehicles that deliver and spread mulch, soils, compost, sand, sawdust, and similar materials and that use power takeoffs to unload, blow, and spread these materials.

GARVEE BOND ISSUANCE.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-403	**HB 254**	**Representative Crawford**

AN ACT TO AUTHORIZE THE STATE TREASURER TO ISSUE "GARVEE" GRANT ANTICIPATION REVENUE VEHICLE BONDS ON BEHALF OF THE DEPARTMENT OF TRANSPORTATION, TO REQUIRE "GARVEE" FUNDS TO BE DISTRIBUTED IN ACCORDANCE WITH THE EQUITY DISTRIBUTION FORMULA, AND TO DIRECT THE SECRETARY OF THE DEPARTMENT OF TRANSPORTATION AND THE STATE TREASURER TO DEVELOP AN IMPLEMENTATION PLAN FOR ISSUANCE OF THE BONDS, AS RECOMMENDED BY THE JOINT LEGISLATIVE TRANSPORTATION OVERSIGHT COMMITTEE, AND TO CLARIFY THE DEFINITION OF GOVERNMENTAL UNIT FOR PURPOSES OF INTEREST RATE SWAP AGREEMENTS.

OVERVIEW: This act does two things:

- It authorizes the use of GARVEE bonds to finance projects in the Intrastate Highway System and the Transportation Improvement Program.
- It modifies the definition of 'governmental unit' for purposes of interest rate swap agreements to mirror the language in the statute authorizing swap agreements.

FISCAL IMPACT: This act is not projected to impact State revenues since the debt service for the bonds will be paid by federal funds.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: The authority to issue GARVEE bonds becomes effective February 1, 2006. The remainder of the act became effective when the Governor signed it into law on September 20, 2005.

ANALYSIS: GARVEEs, Grant Anticipation Revenue Vehicles, represent one of the tools Congress provides to the states to facilitate the development and acceleration of highway projects. With GARVEEs, states may issue bonds secured by future federal highway funds. The debt itself is a state responsibility; a GARVEE does not carry with it any guarantee for repayment from the federal government. However, the federal aid highway program represents a long-standing source of transportation revenue and many investors appear willing to accept the risk that Congress will continue to authorize highway funds for the full term of the bonds.

This act authorizes the Department of Transportation to issue GARVEE bonds to finance federal-aid highway projects. A state may elect to pledge their obligations of future federal-aid funds as the only security backing the federal share of the obligation to investors (non-recourse GARVEES) or to pledge other sources of revenue as a back-stop for the future federal-aid funds

(back-stopped GARVEES). The GARVEE bonds issued under this act's authority must be non-recourse GARVEES. The notes issued under this authority are not supported by a pledge of the taxing power of the State and they must contain on their face a statement to the effect that the State of North Carolina is not obligated to pay the principal or the interest on the notes, except from the federal transportation fund revenues. The act also specifies that the bond revenues must be distributed in accordance with the equity distribution formula under G.S. 136-17.2A.[67] This part of the act becomes effective February 1, 2006; DOT may not issue GARVEE bonds before that date.

The act directs the Department of Transportation and the State Treasurer to form a committee to develop a plan to address the issues involved in issuing GARVEE bonds. The plan must be submitted to the Board of Transportation for review and comment. The final plan must be submitted by December 1, 2005, to the cochairs of the Transportation Appropriations Subcommittee and the Joint Legislative Transportation Oversight Committee.

The act limits the amount of GARVEE bonds that may be issued by requiring the State Treasurer to determine one of the following before the bonds are issued:

- That the total outstanding principal of the debt does not exceed the total amount of federal transportation funds authorized to the State in the prior federal fiscal year.
- That the maximum annual principal and interest payment of the debt does not exceed 15% of the expected average annual federal revenue for the 7-year period in the most recently adopted Transportation Improvement Program.

In federal fiscal year 2004, the amount of federal transportation funds authorized for the State was $950 million.[68] Therefore, this act would allow the State to borrow roughly $950 million. The fiscal note assumes that DOT would issue $475 million of debt in February 2006, and $475 million of debt in the spring of 2007. It also assumes that the interest rate would be 4.5% on each of the bond issues and that each bond issue would be paid off over 12 years. Based upon these assumptions, the payments on this debt would be about $1.25 billion.[69] These debt service payments would be funded from federal aid available to the State, and would displace the use of this federal aid for other projects or purposes.

Candidate projects for GARVEE financing are typically larger projects that have the following characteristics:

- They are large enough to merit borrowing rather than pay-as-you-go grant funding, with the costs of delay outweighing the cost of financing.
- They do not have access to a revenue stream (such as local taxes or tolls) and other forms of repayment (such as state appropriations) are not feasible.
- The sponsors (generally state DOTs) are willing to reserve a portion of future year federal-aid highway funds to satisfy debt service requirements.

---

[67] The 100 counties in the State are divided into seven distribution regions. G.S. 136-17.2A seeks to ensure that all the regions of the State have a percentage share of the transportation funds as determined by the formula set forth in this statute.

[68] The actual federal aid received by the State usually amounts to less than the federal aid authorized. For federal fiscal year 2004, the State received roughly $830 million in federal highway funds.

[69] Based upon an interest rate of 4.5%, roughly $300 million of this amount would be for interest expenses.

Unrelated to the GARVEE bond authorization, the act clarifies that the State Treasurer can enter into interest rate swap agreements between bond issues. Under G.S. 159-194, the State Treasurer can enter into swap agreements; however, the language in the definitional part of the article does not mirror the language in the authorizing statute itself. Section 4 of this act modifies the definition of 'governmental unit' to mirror the language in the statute authorizing swap agreements. The State's bond counsel requested this change.

BILL LEE / EXCISE TAX REFUND.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-406	**SB 868**	**Senator Berger of Franklin**

AN ACT TO AMEND THE ENTERPRISE TIER STRUCTURE UNDER THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT AND TO ALLOW FOR A REFUND OF EXCISE TAX ON UNSALABLE CIGARS.

OVERVIEW: The act provides an exception to the tier designation formula under the William S. Lee Quality Jobs and Business Expansion Act, by allowing certain industrial parks located in higher-tiered counties to be treated as if they were located in an enterprise tier one area if the parks meet conditions related to government ownership, size, population of the counties, and Medicaid eligibility within the counties.

The act also gives tobacco products dealers a refund of the excise tax paid on stale or otherwise unsalable cigars returned to the manufacturer.

FISCAL IMPACT: No estimate available.

EFFECTIVE DATE: Changes to the Bill Lee Act are effective for taxable years beginning on or after January 1, 2005. The refund for unsalable cigars became effective September 1, 2005.

ANALYSIS:

The William S. Lee Quality Jobs and Business Expansion Act (hereinafter Bill Lee Act) was enacted in 1996, effective beginning with the 1996 tax year with a 2002 sunset.[70] The Bill Lee Act is a package of State tax incentives and has been modified in each subsequent year. The incentives are primarily in the form of tax credits for investment in machinery and equipment and real property, for job creation, for worker training, and for research and development. Counties are divided into five economic distress tiers based on the unemployment rate, per capita income, and population growth of the county. For many of the credits, the lower the tier of a county, the more favorable the incentive. The Bill Lee Act requires the Department of Commerce and the Department of Revenue to report periodically on the credits allowed by the Act.

By December 31 of each year, the Department of Commerce is required to assign a tier designation to each of the 100 counties in the State. In order to make these assignments, the Department of Commerce must rank all 100 counties based on the following three factors: the rank of the county in a ranking of counties by average rate of unemployment over the preceding 12 months from

[70] See summary of S.L. 2005-241, Extend JDIG and Bill Lee Act, for discussion of the extension of the Act's sunset.

lowest to highest, the rank of the county in a ranking of counties by average per capita income over the proceeding 12 months from highest to lowest, and the rank of the county in a ranking of counties by percentage growth in population over the preceding 12 months from highest to lowest. [71] Each of these factors is given equal weight. The Secretary of Commerce is required to use the latest data available in making these calculations. Counties with one of the 10 highest rankings are designated enterprise tier one, the next 15 counties are designated enterprise tier two, the next 25 counties are enterprise tier 3, the next 25 counties are enterprise tier 4, and the remaining counties are enterprise tier 5. There are numerous exceptions to this formula.[72] A county designated as enterprise tier one or two may not be designated a higher tier until it has been at its current tier for at least two consecutive years. Certain lower-population counties also enjoy exceptions that could result in those counties receiving a lower tier designation. Finally, certain industrial parks that are located at one site in two or more counties receive the tier designation of the lower-ranked county. This last exception was added in 1998 (S.L. 1998-55) to promote regional cooperation in industrial development and to avoid an industrial park that is split into two tier designations.

Exception to Tier Structure under Bill Lee Act

Section 1 of this act creates a new exception to the Bill Lee Act tier designation formula. Under this act, sites within certain industrial parks will be able to qualify for enterprise tier one status. In order to take advantage of this exception, all of the following conditions must be satisfied:

- The site is located in an industrial park created by interlocal agreement pursuant to G.S. 158-7.4.
- The industrial park is located, at one or more sites, in at least four contiguous counties.
- At least two of the counties in which the industrial park is located are designated as enterprise tier one areas.
- Four or more units of local government, or a nonprofit corporation owned and controlled by four or more units of local government, own the industrial park.
- In each county in which the industrial park is located, the park has at least 300 developable acres. The term "developable acres" includes acreage that is owned directly by the industrial park or its owners or that is the subject of a development agreement between the industrial park or its owners and a third-part owner.
- The total population of all the counties in which the industrial park is located is less than 200,000.
- In each county in which the industrial park is located, at least 16.8% of the population was Medicaid eligible for the 2003-2004 fiscal year based on 2003 population estimates.

---

[71] Prior to the designations for the 2005 calendar year, these ranking were based on longer time periods. Unemployment and per capita income were averaged over three years rather than 12 months. There was no time period specified for measuring population growth, but it was the practice of the Department of Commerce to measure population growth by comparing the most recent estimates of population in the county with the figures derived from the last decennial federal census. See S.L. 2004-202.

[72] S.L. 2005-241 creates an exception for counties with particularly high rates of unemployment and amends the current exception for counties with small populations and high rates of poverty by eliminating the requirement related to the percent of the population living below the poverty level.

As of the time the bill was signed into law by the Governor on September 20, 2005, the industrial park in the Kerr-Tar region is the only industrial park that was known to meet the above criteria. It is possible that other counties could enter into similar agreements in order to take advantage of the exception in the future, but the restrictions are so stringent as to make it unlikely that a significant number of high-tiered counties could qualify under this act. The four counties involved in the Kerr-Tar industrial park project are Franklin, Granville, Vance, and Warren. In 2005, Franklin County was an enterprise tier five area; Granville County was an enterprise tier three area; and Vance and Warren Counties were enterprise tier one areas.

Refund of Excise Tax on Unsalable Cigars

Section 2 of this act allows a wholesale dealer or retail dealer who has paid the 2% excise tax on cigars to apply for a refund of the excise tax if the cigars are stale or otherwise unsalable. To obtain the refund, the dealer must return the cigars to the manufacturer and send an application to the Secretary of Revenue accompanied by an affidavit from the manufacturer stating the number of cigars returned to the manufacturer. The amount of the refund is the excise tax paid less the 2% discount.[73] Similar treatment is allowed to a distributor of cigarettes. If the distributor of cigarettes is in possession of stale or otherwise unsalable cigarettes, the distributor may apply for a refund of the tax paid, less the discount allowed on the unsalable cigarettes. This act gives the same refund to dealers in possession of unsalable cigars, but not to other tobacco products.

Before August 1, 2003, distributors and wholesalers who timely paid the excise taxes on cigarettes, other tobacco products, wine, beer, and liquor were eligible for a discount equal to 4% of the tax due. In 2003, the General Assembly eliminated these discounts. (S.L. 2003-284). In 2004, the General Assembly reinstated the discounts, but at a rate of 2% of the tax due. (S.L. 2004-84)

TAX INCREMENT FINANCING CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-407	**SB 528**	**Senator Clodfelter**

AN ACT TO ALLOW A MUNICIPALITY TO USE PROJECT DEVELOPMENT FINANCING FOR TOURISM-RELATED DEVELOPMENT PROJECTS LOCATED IN AN ENTERPRISE TIER ONE AREA.

OVERVIEW: This act allows a municipality to use project development financing for a tourism-related development project located outside its central business district if the project is located in an enterprise tier one area.

FISCAL IMPACT: The act does not affect General Fund revenues.

EFFECTIVE DATE: The act became effective when it was signed into law by the Governor on September 20, 2005.

[73] Under current law, a wholesale dealer or retail dealer of tobacco products who timely pays the excise tax on tobacco products at the rate of 2% of the cost price is eligible for a discount equal to 2% of the tax due. This discount is intended to cover expenses incurred in preparing tax reports and the expense of furnishing a bond.

ANALYSIS: In November 2004, the voters approved a constitutional amendment that has enabled counties, cities, and towns to use project development financing for the public portion of certain economic development projects within a defined territorial area. Project development financing, also known as tax increment financing, allows a local government to issue bonds secured by the incremental property tax increase generated by the development financed. This financing mechanism can be used for airports, auditoriums and arenas, hospitals, museums, parking facilities, sewer systems, storm sewers and flood control facilities, water systems, street improvements, public transportation facilities, railroads, affordable housing, land development for industrial or commercial purposes, utilities, and redevelopment. The prior law restricted the amount of retail development that could be considered as a 'development project' if the project was located outside a municipality's central business district. Under that restriction, no more than 20% of a project's square footage may be proposed for use in retail sales, hotels, and other commercial uses other than office space.

The act enables municipalities to use project development financing for tourism related development in an enterprise tier one area by eliminating the 20% limitation on commercial uses for tourism-related economic development, such as developments that would feature facilities for exhibitions, athletic and cultural events, show and public gatherings, racing facilities, parks and recreation facilities, art galleries, museums, and art cents.

The act was enacted to give the City of Roanoke Rapids the opportunity to develop a music theater and entertainment district that could become a nationally recognized travel destination in North Carolina. The proposed district will encompass over 700 acres, represents an investment of an estimated $129 million, and should create over 2,595 new jobs. The district will consist of music theaters, shopping, hotels, motels, restaurants, and family recreational activities. The City of Roanoke Rapids has agreed to provide certain improvements in the proposed district and believes project development financing will be a desirable vehicle for it to use to finance these improvements. However, because the project will be located on I-95, outside the City's central business district, the 20% limitation on commercial development prevented the City from using this financing tool. The act alleviates this problem by eliminating the 20% limitation.

ENERGY CREDIT BANKING/SELLING PROGRAM/FUND.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-413	**SB 1149**	**Senator Jenkins**

AN ACT TO ESTABLISH A BANKING AND SELLING PROGRAM FOR CREDITS ISSUED UNDER THE FEDERAL ENERGY POLICY ACT IN ORDER TO GENERATE FUNDS FOR THE USE OF ALTERNATIVE FUELS AND ALTERNATIVE FUELED VEHICLES BY STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES AND TO EXTEND AND EXPAND THE CREDIT FOR INVESTMENT IN RENEWABLE ENERGY PROPERTY.

OVERVIEW: This act[74] extends and expands the tax credit for investing in renewable energy property as follows:

- Expands the definition of renewable energy property in G.S. 105-129.15(7) to include any biomass equipment that uses renewable biomass resources for commercial thermal or electrical generation.
- Expands the definition of renewable biomass resources in G.S. 105-129.15(6) to include spent pulping liquor.
- Increases the ceiling on the tax credit for placing renewable energy property in service for nonresidential property from $250,000 to $2.5 million.
- Includes pool heating in the residential property ceiling for solar energy equipment.
- Extends the sunset on the tax credit for investing in renewable energy property from January 1, 2006, to January 1, 2011.

FISCAL IMPACT: The following General Fund loss is estimated as a result of the extension and expansion of the renewable energy tax credit:

Fiscal Year	Business	Individuals	Total
2005-06	$0.00	$0.00	$0.00
2006-07	$0.02 million	$0.08 million	$0.10 million
2007-08	$0.92 million	$0.13 million	$1.05 million
2008-09	$1.95 million	$0.18 million	$2.13 million
2009-10	$3.53 million	$0.27 million	$3.80 million
2010-11	$5.36 million	$0.29 million	$5.65 million

The category "business" includes non-profit organizations with participating private entities. The above revenue losses reflect current usage of the credit. The loss is expected to be higher in the future if energy costs continue to rise.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Sections 4 and 5 of the act are effective for taxable years beginning on or after January 1, 2006.

ANALYSIS: In 1977, the General Assembly enacted legislation to provide tax credits for the construction or installation of a solar energy system to a building in North Carolina. In subsequent years tax credits encouraging the installation and use of equipment that takes advantage of other renewable energy resources were enacted. Renewable energy property is equipment that uses the renewable energy sources such as solar radiation, vegetation, organic wastes, moving water, or wind for the following purposes: to heat or cool buildings; to produce hot water, thermal, or process heat; or to generate electricity.

Under current law, the credit for investing in renewable energy property applies to any of the following machinery and equipment or real property:

- Biomass equipment that uses renewable biomass resources for biofuel production of ethanol, methanol, and biodiesel; anaerobic biogas production of methane utilizing

[74] Changes to the tax credit for investing in renewable energy property are set out in sections 4 and 5 of the act.

agricultural and animal waste or garbage; or commercial thermal or electrical generation from renewable energy crops or wood waste materials. Renewable biomass resources are organic matters produced by terrestrial and aquatic plants and animals, such as standing vegetation, forestry and agricultural residues, landfill wastes, and animal wastes.

- Hydroelectric generators
- Solar energy equipment
- Wind equipment

The act adds spent pulping liquor to the definition of renewable biomass resources. Spent pulping liquor is a byproduct of pulp and paper processing. To accommodate this addition to the definition of renewable biomass resources, the act also expands the definition of renewable energy property to include any biomass equipment that uses renewable biomass resources (not just renewable energy crops or wood waste materials) for commercial thermal or electrical generation.

The amount of the credit for investing in renewable energy property is 35% of the cost of the property placed in service. In the case of renewable energy property that services a single-family dwelling, the credit must be taken for the taxable year in which the property is placed in service. For all other renewable energy property, the credit must be taken in five equal installments, beginning with the taxable year in which the property is placed in service. The credit may not exceed the following amounts:

TYPE OF PROPERTY	MAXIMUM CREDIT
Non residential property	The act increases the credit from $250,000 per installation to $2,500,000 per installation
Residential property – Solar energy equipment for domestic water heating. The act clarifies that the credit also applies to solar energy equipment for pool heating.	$1,400 per dwelling unit
Residential property – Solar energy equipment for active space heating, combined active space and domestic hot water systems, and passive space heating.	$3,500 per dwelling unit
Residential property – All other renewable energy property for residential purposes	$10,500 per installation

The renewable energy tax credit has the following limitations and conditions:

- The renewable energy tax credit may not exceed 50% of the tax against which it is claimed for the taxable year. Any unused portion of the credit may be carried forward for the succeeding five years.
- A taxpayer that claims any other credit allowed with respect to renewable energy property may not take the renewable energy tax credit with respect to the same property.
- A taxpayer may not take the renewable energy tax credit if the taxpayer leases the property from another person, unless the taxpayer obtains the lessor's written certification that the lessor will not claim a credit with respect to this property.
- The Department of Revenue must report each year on the number of taxpayers claiming

the credits, the cost of the property for which the credits were claimed, and the total cost to the General Fund of the credits claimed.

The act extends the sunset on the renewable energy tax credit from January 1, 2006 to January 1, 2011, and maintains the existing sunsets on the other credits in Article 3B (Business and Energy Tax Credits) of Chapter 105 of the General Statutes.

ECONOMIC DEVELOPMENT - PUBLIC RECORDS.

Session Law	*Bill #*	*Sponsor*
S.L. 2005-429	**SB 393**	**Senator Hoyle**

AN ACT TO CLARIFY THE PUBLIC RECORDS LAWS WITH RESPECT TO ECONOMIC DEVELOPMENT AND TO REQUIRE THE DEPARTMENT OF REVENUE TO PUBLISH ANNUAL REPORTS REGARDING USE OF ECONOMIC DEVELOPMENT TAX INCENTIVES.

OVERVIEW: This act requires the Department of Revenue to annually publish a list, itemized by taxpayer, disclosing information about certain tax incentives. In addition, the act clarifies that public records created with respect to a proposed location or expansion of a specific business or industrial project must be released once the project has been announced, that certain types of information are public records, and that an agency must notify applicants for and recipients of economic development incentives about public records requirements.

FISCAL IMPACT: No impact.

EFFECTIVE DATE: The annual reporting required by the Department of Revenue becomes effective January 1, 2007; the remainder of the act became effective when the Governor signed it into law on September 22, 2005.

ANALYSIS: Generally, documents prepared or received by State agencies in the transaction of public business are public records and must be made available to the public for inspection. There are several important exceptions to the public records law that allow for withholding certain public records from disclosure. One of these exemptions is for tax information, which may be disclosed only as specifically authorized by law. Another of these exceptions relates to the location or expansion of business or industrial projects. Prior to this act, public records relating to the location or expansion of specific business or industrial projects could be withheld from disclosure so long as that disclosure would frustrate the purpose for which the public records were created. Arguably, the release of public records related to a specific project could "frustrate the purpose for which they were created" long after the project was announced.

This act clarifies that public records created with respect to the location or expansion of a specific business or industrial project may not be withheld once the project location or expansion has been announced. The act provides for a 25-business-day period for the State agency to gather and review the records before making them public. The act also specifies that when an agency is required to perform a cost-benefit analysis or similar assessment with respect to economic development incentives offered to a specific business, the assumptions and methodologies used in completing that analysis are public records and must be disclosed in the same fashion as other

public records. The act requires an agency to notify the applicant or recipient of economic development incentives about these public records law requirements.

In addition to clarifying the public records law as it pertains to economic development incentives, the act creates and expands reporting requirements surrounding economic development incentives. Under the act, the Department of Commerce must make an annual report on all grant programs administered by the Department; it must specifically disclose the amount transferred to the Utility Account of the Industrial Development Fund under the JDIG Program[75] each year; and it must report employment levels for businesses receiving grants under the JDIG Program.

The Department of Revenue currently publishes an annual report, itemized by taxpayer, on credits claimed under the Bill Lee Act. It also makes annual reports on other credits to either the Revenue Laws Study Committee or the Fiscal Research Division. This act requires the Department to annually publish a report on economic development tax incentives authorized by the State. The act modifies the Department's current reporting requirements so that all reports prepared by it on credits and refunds have identical reporting dates and data periods. It amends the existing reporting requirements for the following credits to require that they be itemized by taxpayer:

- Tax incentives for recycling facilities under Article 3C of Chapter 105.
- Research and development under Article 3F of Chapter 105.

It creates new reporting requirements for the following tax incentives:

- Historic rehabilitation tax credits under Article 3D of Chapter 105.
- Tax incentives for major computer manufacturing facilities under Article 3G of Chapter 105.
- Credit for North Carolina State Ports Authority wharfage, handling, and throughput charges.
- Credit for manufacturing cigarettes for exportation.
- Sales tax refunds for building materials of certain industrial facilities.

Lastly, the act directs the newly formed Economic Development Oversight Committee[76] to study the issue of public disclosure as it relates to economic development efforts. Specifically, the Committee shall study ways of providing the public information about employment levels at businesses that receive economic development incentives.

MOTOR FUEL TAX CHGS & REV LAWS TECHNICAL CHGS.

Session Law	*Bill #*	*Sponsor*

[75] Job Development Investment Grant Program. Part 2G of Article 10 of Chapter 143B of the North Carolina General Statutes.

[76] Created by S.L. 2005-241.

S.L. 2005-435	HB 105	Representative Luebke

AN ACT TO MODIFY THE TAXATION OF MOTOR FUELS, TO MAKE TECHNICAL, CLARIFYING, AND ADMINISTRATIVE CHANGES TO THE REVENUE LAWS AND RELATED STATUTES, AND TO ALLOW INTERSTATE PASSENGER AIR CARRIERS A REFUND OF SALES AND USE TAXES ON FUEL.

OVERVIEW: This act makes numerous changes to the motor fuels tax laws as recommended by the Revenue Laws Study Committee, makes technical and clarifying changes to the revenue laws[77] and allows for a refund of sales and use taxes paid on certain aviation fuel.

FISCAL IMPACT:

Provision	*Fiscal Impact*
Part I. Motor Fuel Tax Changes	
Penalty provisions.	Generally, no estimate is available of the fiscal impact of the various penalties authorized or increased in this Part, but the effect is expected to be minimal.
Red Cross exemption from motor fuels tax.	Since this section conforms statute to department policy, no fiscal impact is expected.
Refund conformity.	No fiscal impact is expected.
IRP audit responsibility.	No additional funding required for the positions with auditing responsibility. Additionally, there is no increase in receipts needed for the department to administer the new or revised statutory requirements resulting from this legislation. The remaining sections deal with record keeping requirements and have no fiscal impact.
Part II. Revenue Laws Technical Changes	A review of the language of the changes to the tax law indicates that they are purely technical in nature. In many cases the new language conforms to the current administrative interpretation. No fiscal impact is expected.
Part III. Refund of Sales and Use Taxes on Fuel	
Interstate air passenger carriers.	Based on historic fuel refund data and projected fuel costs, Tax Research and Fiscal Research agree that the provision is likely to cost the State between $3.0 and $5.0 million each year the program is in effect. The change is expected to impact a fairly limited number of air carriers.
Motorsports racing teams and sanctioning bodies.	Based on data provided by some of the motorsports teams, and information gleaned from recent industry impact studies by UNC Charlotte, Fiscal Research estimates the annual State cost of this portion of the bill as approximately $1.1 million for

[77] The Revenue Laws Study Committee recommended numerous technical corrections on S 159 that were incorporated into this bill.

	each of the two years. The local cost is expected to be $0.6 million.

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2005 Session. Available in the Legislative Library.)

EFFECTIVE DATE: Except as otherwise specified, this act became effective when signed into law by the Governor on September 27, 2005.

ANALYSIS:

Part I: Motor Fuel Tax Changes.

Section	Explanation
1	Penalty for failure to obtain a license. – Allows the Secretary to impose a $1,000 penalty for failure to obtain a license under G.S. 105-449.65 or G.S. 105-449.131[78] Under existing law, the Secretary has general authority to impose a penalty for failure to obtain a license. Under that general authority, the amount of the penalty imposed is equal to 5% of the amount prescribed for the license for each month the taxpayer fails to obtain the license, with a maximum penalty of 25% of the amount prescribed for the license. Because this general authority limits the penalty to a percentage of the amount prescribed for the license, it effectively bars assessing a penalty when there is no charge to obtain a license. There is no charge for the licenses issued pursuant to G.S. 105-449.65 or G.S. 105-449.131. This provision becomes effective January 1, 2006.
2	Electronic funds transfer. – Enables the Motor Fuels Division to move towards a paperless return by requiring those taxpayers who file electronically to also pay electronically. By statute the Secretary can require motor fuels taxpayers to file returns electronically. The Division plans to require motor fuel taxpayers that have schedule data information to file their returns electronically. "Schedule data information" is a separate schedule that lists all bills of lading for the fuel being reported. The information enables the Department to track fuel on a load-by-load basis. The Secretary will not require electronic filing from taxpayers who make a written request for relief from this requirement.

[78] G.S. 105-449.65 is contained in the Article dealing with gasoline, diesel fuel, and blended fuel, and requires the following to have a license: refiners, suppliers, terminal operators, importers, exporters, blenders, motor fuel transporters, and distributors who purchase motor fuel from an elective or permissive supplier at an out-of-state terminal for import into this State. G.S. 105-449.131 is contained in the Article dealing with alternative fuels and requires the following to have a license: providers of alternative fuel, bulk-end users, and retailers.

3	Conform refund provisions. – Conforms the refund statute applicable to motor carriers to the general rule applicable to tax refunds of overpaid taxes. Under the general administrative provisions of G.S. 105-266(a)(3), the Secretary does not have to refund a tax overpayment of less than $3.00 unless the taxpayer makes a written request for the refund. A motor carrier is entitled to a credit on its quarterly report for tax paid by the carrier on fuel purchased in this State. If the credit exceeds the amount of tax owed, the statute provides that the Secretary must refund the excess to the carrier. The statute does not set a minimum amount. This statute appears to conflict with the general administrative provision. This section clarifies that the general administrative law applicable to refunds applies to refunds payable to motor carriers.
4	Technical change. – Removes obsolete language to conform to current administrative practice. G.S. 105-449.44 establishes the calculation by which a motor carrier determines the amount of fuel used in North Carolina. The formula under previous law had not been used since 1991. In 1992, North Carolina became a participant in the International Fuel Tax Agreement. The method specified by this section conforms to the IFTA agreement and is the method motor carriers have been using to determine the amount of fuel used in this State since 1992.
5 and 22	Conforming change. – Transfers audit functions related to the International Registration Plan from the Department of Transportation, Division of Motor Vehicles to the Department of Revenue, Motor Fuels Tax Division. The International Registration Plan is the mechanism through which interstate motor carriers are licensed. It helps to ensure that the proper amount of motor fuels tax is credited to each jurisdiction in which the motor carrier travels. It has been suggested that the Department of Revenue has more expertise in auditing taxpayers and would be a more appropriate home for these audit functions. The positions associated with these audit functions were transferred July 1, 2004, through an administrative transfer.
6	Technical change. – Removes language that is no longer applicable. G.S. 105-449.47 provides that the Secretary must issue identification markers to motor carriers. Under previous law, the statute provided that the Secretary could withhold an identification marker if a motor carrier failed to comply with former Article 36 or 36A. The General Assembly repealed those articles in 1996. The authority of the Department to issue an assessment under one of those articles has expired and any uncollectible assessments issued under those articles has been written off. Therefore, the language repealed by this section is obsolete.
7	Reasons to refuse to register and issue identification marker to motor carrier. – Sets forth the reasons the Secretary could refuse to register and issue an identification marker to a motor carrier. The Department requested this change to enable it to register only applicants that are in good standing with North Carolina and other taxing jurisdictions. The statute created in this section is very similar to G.S. 105-449.73, which sets forth the reasons the Secretary may refuse to issue a license to an applicant under the motor fuel statutes. This provision becomes effective January 1, 2006.

8	Simplify criminal penalty. – Simplifies the criminal penalty imposed on persons who operate as a motor carrier in this State without obtaining the necessary registration and identification markers. A violation of the motor carrier requirements is a Class 3 misdemeanor. Under previous law it was punishable by a fine that was no less than $10 nor more than $200. This section sets the amount of the fine at $200. The civil penalty for this offense is $100. This provision becomes effective January 1, 2006.
9	Clarification of licensing requirements for multiple activities. – Clarifies the current licensing requirements by conforming them to the current Department policy and practice. This provision becomes effective January 1, 2006.
10	Technical change. – Removes obsolete language. In 1999, the General Assembly removed the licensing requirements for bulk-end users and retailers of undyed diesel fuel. The legislation did not include a conforming change to G.S. 105-449.69(b).
11	Clarifying change. – Changes the defined term "overdue tax debt" to the appropriate defined term "tax debt". Under the general administrative provisions in G.S. 105-243.1, a tax debt is defined as the total amount of tax, penalty, and interest due for which a notice of final assessment has been mailed to the taxpayer after the taxpayer no longer has the right to contest the debt. An "overdue tax debt" is any part of a tax debt that remains unpaid 90 days or more after the notice of final assessment was mailed to the taxpayer. A collection assistance fee is imposed on an overdue tax debt that remains unpaid 30 days or more after the appropriate fee notice is mailed to the taxpayer. G.S. 105-449.73 sets forth the reasons the Secretary can deny a license to an applicant. One of the reasons is failure to remit taxes that remain due after a taxpayer no longer has the right to contest the tax debt. Since G.S. 105-449.73 has nothing to do with the imposition of the collection assistance fee, the term "overdue tax debt" is not the appropriate term to use.
12	Conforming change. – Exempts motor fuel acquired to operate a highway vehicle owned by or leased to the American Red Cross from the motor fuel excise tax. In Department of Employment v. United States, 385 U.S. 355, 87 S.Ct. 464 (1966), the United States Supreme Court ruled that the Red Cross is an instrumentality of the United States for state tax immunity purposes. This provision codifies the current administrative practice of the Department of Revenue. This section makes another conforming change by recognizing that federal law no longer allows dyed diesel fuel to be used in intercity buses. Dyed diesel fuel indicates that the fuel is used for a nontaxable purpose under federal law. Because dyed diesel fuel may no longer be used in intercity buses under federal law, there is no need to specifically apply the State tax to dyed diesel fuel used in intercity buses. This amendment does not change the taxation of the fuel used in intercity buses: the State tax continues to apply.
13	Repeal obsolete payment procedure. – Removes the ability of a person exporting motor fuel to another state to pay the tax directly to the Department if the person is not licensed in the destination state of the motor fuel. The provision is repealed because it is no longer necessary. This provision was included in the statutes in 1996 when North Carolina first adopted "tax at the

	rack" to accommodate persons exporting products to a state that was not a "tax at the rack" state. Today, with the exception of Georgia, all of the surrounding states have adopted "tax at the rack". The Georgia border in the western part of the State would not be affected by this repeal because the closest terminal to the Georgia line is in Charlotte.
14	Conforming change. – Provides that a supplier must list on its return to the Secretary the number of gallons of motor fuel the supplier exchanged with another licensed supplier pursuant to a two-party exchange agreement. The Secretary currently requires this information on the supplier return.
15	Technical change. – Removes obsolete language from the catch line of G.S. 105-449.106. In 2003, the General Assembly exempted motor fuel sold to a county or city for its use from the motor fuel tax. Although the legislation authorizing the exemption made the appropriate conforming change to the refund statute, it failed to amend the catch line. This provision becomes effective when it becomes law.
16	Shipping document. – Allows the Secretary of Revenue to assess a penalty of $5,000 on a terminal operator who intentionally fails to issue a shipping document that satisfies the requirements for the shipping document. Under G.S. 105-449.115, shipping documents issued by a terminal operator must contain the following information: 1) identification of the terminal or bulk plant from which the fuel was received, 2) the date the fuel was loaded, 3) the gross gallons loaded, 4) the destination state of the motor fuel, 5) the net gallons loaded, and 6) a tax responsibility statement indicating the name of the supplier that is responsible for the tax. The Motor Fuels Tax Division has noticed a problem with some terminal operators failing to issue proper shipping documents. Without an accurate shipping document, it is difficult, if not impossible, for the Department to ensure that the proper amount of tax is being paid. This provision becomes effective January 1, 2006. This section also adds a defense to imposition of a penalty for failure to obtain a diversion number for motor fuel delivered to a state other than the destination state printed on the shipping document. In order for this defense to be applicable, the person must notify the Secretary of the diversion within 7 days after the diversion occurred and must have timely paid the tax on the diverted fuel. This part of the section becomes effective when it becomes law and applies to penalties imposed on or after January 1, 2005. Finally, this section also specifies that a civil penalty assessed against a transporter is to be paid to the Department of Crime Control and Public Safety or the Department of Revenue. Previously, the penalty could be paid to the Division of Motor Vehicles of the Department of Transportation rather than the Department of Crime Control and Public Safety. This change reflects a recent realignment of enforcement responsibilities.
17	Documentation for tank wagon. –Requires the same documentation requirements for a person who operates a tank wagon into which motor fuel is loaded at the terminal as for a person who operates a transport truck into which motor fuel is loaded at the terminal. It would also require that a copy of

	the invoice be kept at a centralized place of business for at least three years from the date of delivery.
18	Penalty for failing to properly mark storage facility. – Imposes a civil penalty on a person who intentionally does not properly mark the storage facility of motor fuel. Undyed fuel is subject to the motor fuel tax; dyed fuel is not. This section also specifies that a civil penalty assessed against the person failing to properly mark a storage facility is to be paid to the Department of Crime Control and Public Safety or the Department of Revenue. Previously, the penalty could be paid to the Division of Motor Vehicles of the Department of Transportation rather than the Department of Crime Control and Public Safety. This change reflects a recent realignment of enforcement responsibilities. This section becomes effective January 1, 2006
19 and 20	Conforming change. – Makes changes to Chapter 119 necessitated by legislation enacted in 2003. In 2003, the General Assembly voted to apply the inspection tax to dyed diesel fuels. The inspection tax is imposed on all fuel types at the rate of ¼¢ per gallon. Proceeds of the tax are used to offset the expenses of administering the motor fuels taxes. The changes in these two sections are needed to apply the tax to distributors who purchase only dyed diesel fuel.
21	Technical change. – The law provides that an applicant for a license as a kerosene supplier, kerosene distributor, or a kerosene terminal operation may file either a bond with the Secretary of Revenue or an irrevocable letter of credit. Section 21 inserts the phrase "irrevocable letter of credit" in a sentence in which it was inadvertently omitted.
23	Effective date section for this part.

Part II. Revenue Laws Technical Changes.

Section	Explanation
24	Technical change. – Adds language regarding a federal determination of gross estate tax that changes the amount of tax payable to the State. The current statute refers only to a federal correction or determination made with regard to the maximum state death tax credit allowed. As of January 1, 2005, there is no state death tax credit allowed under federal law so language needs to be added regarding gross estate tax changes.
25	Technical change. – Section 25(a) conforms the definition of "unfortified wine" in Chapter 18B to the definition in G.S. 105-113.68. The General Assembly changed the definition of "unfortified wine" in S.L. 2004-135. The definition in Chapter 18B inadvertently included an unnecessary word. Section 25(b) cross-references the applicable definitions in the Alcoholic Beverage License and Excise Tax Article to the definitions in Chapter 18B and makes stylistic changes. In addition, the change made to "wholesaler or importer" conforms to a change made in Chapter 18B in the 2003 Regular Session.
26	Clarifying change. – Clarifies that the excise tax on wine shippers is imposed only on wine shipped to North Carolina consumers.
27	Clarifying change. – Clarifies the scope of authorized disclosure of information obtained by the Secretary of Revenue under Article 2D, Unauthorized

	Substance Taxes. Under previous law, information obtained under article 2D was confidential and could not be disclosed, unless the disclosure was made to exchange information with certain law enforcement agencies concerning a tax imposed by the Article. The information could also not be used in a criminal prosecution, other than for a prosecution for a violation of the Article or unless the information was independently obtained. However, the law was somewhat ambiguous about when this disclosure between the Division and law enforcement could take place. Since the Division needs to be able to exchange information with law enforcement in order to assist with the collection of the tax and the intent of the statute was to allow such communication, this section clarifies when this information may be disclosed while preserving a person's Fifth Amendment and double jeopardy protections.
28	Clarifying change. – Clarifies that the jobs tax credit installments end if the number of jobs in this State fall below the number the taxpayer had in this State when the taxpayer claimed the credit.
29	Technical change. – Substitutes the appropriate reference to "Article, " as opposed to "section."
30	Technical change. – Repeals the sales tax exemption for sales to the North Carolina Museum of Art of paintings and other objects or works of art for public display, the purchases of which are financed in whole or in part by gifts or donations. Effective July 1, 2004, the sales tax refund for State agencies was replaced with a sales tax exemption for all State agencies. Since the NC Museum of Art is a State agency under G.S. 140-5.12, the specific exemption in Chapter 105 is unnecessary. Those sales will be covered by the broader exemption for all State agencies.
31	Clarifying change. – Clarifies that the sales and use tax exemption for free distribution periodicals, which became effective July 1, 2005, is limited to a publication that is continuously published on a periodic basis monthly or more frequently. The exemption does not apply to publications that are published monthly part of the year and less than monthly the rest of the year.
32	Administrative change. – Section 32(a) authorizes cities to receive the same information available to counties regarding claims for sales tax refunds filed under G.S. 105-164.14, which authorizes refunds for various types of entities, including interstate carriers, nonprofit organizations, certain governmental entities, State agencies, major recycling facilities, nonprofit insurance companies, and certain industrial facilities. These changes were recommendations of a joint county and city task force organized to improve the administration of local sales tax. Section 32(b) excludes from the definition of otherwise confidential tax information, information concerning sales tax refunds paid to governmental entities. It also deletes a reference to information submitted on a master application for a business license since this master application system has been eliminated now that the Business License Information Office has been moved from the Secretary of State to the Department of Commerce.
33	Administrative change. – Section 33(a) provides a sales tax refund for certain building materials used by an air courier. This section allows Fed Ex, which plans to construct a facility in North Carolina, to apply for a sales tax refund

	on its purchases of building materials. The airport authority was going to construct the facility, and it would have been entitled to a refund. However, Fed Ex now plans to construct the facility. This section entitles Fed Ex to the same exemption to which the airport authority would have been entitled. This section became effective August 1, 2005, and applies to sales made on or after that date. Section 33(b) extends the sunset date by six months from July 1, 2009, to January 1, 2010. Section 33(c) removes the sunset language from the effective date part of the 2004 law. Placing the sunset date in the statute reduces the possibility of errors and confusion when and if the relevant subdivisions are amended. This section became effective August 1, 2005.
34	Technical change. – Corrects a grammatical mistake in G.S. 105-113.82(h), 105-116.1(e), and 105-164.44F(e).
35	Technical change. – Deletes the definition of "chlorofluorocarbon refrigerant" from the White Goods Disposal Tax Article because the white goods disposal tax is no longer based on the presence of these materials.
36	Technical change. – Inserts a statutory reference due to a previous recodification. Effective January 1, 1999, the General Assembly repealed the inheritance tax (Article 1, G.S. 105-2 through G.S. 105-32) and replaced it with the current State estate tax system (Article 1A, G.S. 105-32.1 through G.S. 105-32.8.) The new G.S. 105-32.8 preserved the provisions on federal determinations, which had previously been in G.S. 105-29. However, G.S. 105-241.1(e), which sets out the statute of limitations for the Secretary to propose an assessment of tax due, was not updated to include a reference to G.S. 105-32.8.
37	Administrative change. – Makes two changes to G.S. 105-259(b). G.S. 105-259(b) prohibits State employees with access to tax information from disclosing that information to any other person unless the disclosure is for one of the reasons enumerated in that subsection. First, it corrects an agency reference in the tax information confidentiality statute to reflect that the Business License Information Office was moved from the Secretary of State to the Department of Commerce. Second, it adds a new subdivision to allow the Department of Revenue to share with a taxpayer claiming a tax credit under Article 3G (Tax Incentives for Major Computer Manufacturing Facilities), tax information about its related entities and strategic partners.
38	Technical change. – Corrects a statutory reference due to a recodification.
39	Technical change. – Corrects two statutory references due to recodifications.
40	Technical change. – Corrects a statutory reference.
41	Administrative change. – Changes the way in which local sales tax revenues are reported to more accurately account for how the proceeds are distributed. This is a reporting change only and does not change the distribution amounts. Under existing law prior to this act, the first 2% of the local sales taxes on food were considered Article 39 distributions. This section clarifies that the taxes

	distributed on a per capita basis are to be allocated as distributions under Articles 40 and 42, and that the taxes distributed on a point of delivery basis are to be allocated under Article 39. This administrative change makes it easier for local governments to track local sales tax proceeds.
42	Technical change. – Corrects a subsection reference.
43	Technical change. – Deletes an obsolete reference.
44	Clarifying change. – Clarifies reimbursement language with regard to the requirement that State and local agencies that acquire land for wetlands mitigation reimburse the county in which the land is located for its lost taxes due to the acquisition.
45	Administrative change. – Corrects the dates an occupancy tax return is due and the taxes are due.
46	Administrative change. – Increases the fees for obtaining paper and electronic certificates provided by the Secretary of State's Office for certifying a copy of any filed document relating to a domestic or foreign limited partnership. Prior to the enactment of this act, the fee was $5.00. This section increases the fee to $15.00 for a paper certificate and $10.00 for an electronic certificate. In 2002, the General Assembly increased several fees assessed by the Corporations Division of the Secretary of State's Office, including the fee for obtaining certificates and certified copies of records. In part, the new fee schedule was designed to encourage customers to use the online ordering system. Although the fee change was made for corporations and limited partnerships, a corresponding fee change was not made in the Partnership Act, which has resulted in an inconsistency. This fee increase resolves that inconsistency and makes the fees for corporations and partnerships the same.
47	Clarifying change. – Section 47(a) clarifies that the authorization for the additional local sales tax enacted in S.L. 2004-123 applies only to Dare County. Section 47(b) provides that the original bill, as amended by this act, is effective when it becomes law.
48	Technical change. – Provides that the exception in the tax secrecy statute created to correspond with a change in the law sunsets at the same time as that tax law change.
49	Technical change. – Corrects a session law reference.
50	Technical change. – Corrects the proper name for the National Association for Stock Car Auto Racing, Inc. by substituting "for" for "of."
51	Administrative change. – Repeals the conditional sunset on the gross premiums tax rate on medical service corporations. In 2003, the General Assembly increased the gross premiums tax rate on medical service corporations from 1% to 1.9%, effective January 1, 2004. The legislation also provided a conditional sunset on the increased tax rate once there were no longer any medical service corporations offering anything other than dental service plans. There are only two Article 65 medical service corporations in North Carolina – Blue Cross/Blue Shield and Delta Dental. At the time, Blue Cross/Blue Shield was contemplating converting to for-profit status. In doing so, it would have been subject to the 1.9% rate as well. The conditional sunset would have reduced the rate on medical service

	corporations back to 1%, thus reducing the rate for Delta Dental. In July 2003, Blue Cross/Blue Shield announced its intention not to pursue conversion at this time. Therefore, the conditional sunset language, which was intended to address that issue, is no longer necessary.
52	Technical change. – Reenacts S.L. 2005-120 (House Bill 1056). This bill extended the period of time allowed for the Carteret Board of County Commissioners to develop a plan and sign a contract for the construction of a convention center. It also extends by one year the date for the Board to levy the one percent (1%) room occupancy tax to the year 2008. This bill passed both the House and Senate and was enacted on June 28, 2005. However, the bill was not read on three separate days in the House. The session law is being reenacted in this bill, which is also a roll-call bill, to assure that the bill meets the constitutional roll-call requirement.
53	Technical change. – Corrects a typographical error by replacing the word "of" with the word "or."
54	Technical change. – Corrects a reference in S.L. 2005-233 to "tourism promotion" by changing it to "promote travel and tourism," which is a defined term in the statute.
55	Technical change. – Corrects incorrect statutory reference.
56	Technical change. – Inserts a sentence inadvertently omitted. This section becomes effective January 1, 2006.
57	Clarifying change. – Clarifies that HMOs are taxed at the rate of 1.9%. This section becomes effective January 1, 2007.
58	Clarifying change. – Provides that for prepayments of cable services, the first billing period is considered to start on or after February 1, 2006.
59	Clarifying change. – Clarifies the drama portion of the literary purpose for the property tax exemptions. This change was made in order to clarify the tax status of institutions such as the Carolina Theater in Guilford County.
59.1	Technical change. – Corrects incorrect statutory reference. This section becomes effective January 1, 2006.
59.2	Clarifying change. – Clarifies the application of the franchise tax to a corporation who must include in its franchise tax base the assets of a LLC that pays a franchise tax as an electric power company. Under previous law, G.S. 105-114 provided that a corporation subject to the general franchise tax was liable for the tax only to the extent that the tax exceeded the amount of tax paid by the corporation under any other section of the Article. This limitation did not apply when the taxes were paid indirectly by the corporation through a LLC whose assets were required to be included in the corporation's franchise tax base. This provision allows those taxes paid by the LLC to be treated in the same manner as taxes paid directly by the corporation. This change was made at the request of Duke Power in order to main the current tax treatment of the company once it has completed a corporate merger and restructuring. This section is effective for taxable years beginning on or after January 1, 2006.
60	Effective date section for this part.

Part III: Aviation Fuel Sales Tax Refund.

61	Interstate Passenger Air Carriers. – Under current law, interstate carriers are allowed a refund of a portion of the sales and use taxes paid by the carrier on fuel, lubricants, repair parts, and accessories purchased in this State. The refund is equal to a proportion of the sales and use taxes paid by the carrier in this State. The proportion is equal to the proportion of the miles traveled by the carrier in this State to the total miles traveled by the carrier. This act allows for an additional refund for interstate passenger air carriers.[79] The act allows for a refund of any amount of sales and use taxes paid by the taxpayer on fuel that exceeds $2.5 million, after taking into consideration the other refund allowed to the interstate passenger air carrier. The refund allowed by this section must be claimed on an annual basis on a form developed by the Secretary of Revenue. The change was made to encourage US Airways to maintain a hub at Charlotte Douglas International Airport. It is unknown if other airlines will benefit from this refund as well. The refund applies to purchases of fuel made on or after January 1, 2005, but before January 1, 2007.
61.1	Motorsports. – This section allows for a refund of sales and use taxes on aviation fuel paid by a motorsports racing team or motorsports sanctioning body. In order to qualify for the refund, the fuel must have been used to travel to or from a motorsports event in this State, from this State to a motorsports event in another State, or to this State from a motorsports event in another State. For the purposes of the refund, a "motorsports event" includes a motorsports race, a motorsports sponsor event, and motorsports testing. The refund allowed by this section must be claimed on an annual basis on a form developed by the Secretary of Revenue. The refund applies to purchases of fuel made on or after January 1, 2005, but before January 1, 2007.
62	Effective date section for this part.

[79] An interstate passenger air carrier is defined as "a person whose primary business is scheduled passenger air transportation, as defined in the North American Industry Classification system adopted by the United States Office of Management and Budget, in interstate commerce."

2004 Finance Law Changes

JOB GROWTH AND INFRASTRUCTURE ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-435	**HB 2**	**Representative G. Allen**

AN ACT TO MAKE THE FOLLOWING CHANGES RECOMMENDED BY THE GOVERNOR: (1) APPROPRIATE TWENTY-FOUR MILLION DOLLARS FOR INDUSTRIAL SITE INFRASTRUCTURE FOR MAJOR PROJECTS; (2) MODIFY THE JOB DEVELOPMENT INVESTMENT GRANT PROGRAM; (3) PROVIDE INCENTIVES FOR MAJOR PHARMACEUTICAL AND BIOPROCESSING FACILITIES BY EXTENDING THE BILL LEE ACT SUNSET FOR THESE INDUSTRIES AND AUTHORIZING SALES TAX REFUNDS FOR CONSTRUCTION MATERIALS FOR THESE INDUSTRIES; (4) EXTEND THE SUNSET ON AND MODIFY THE CIGARETTE EXPORTATION TAX CREDIT AND MODIFY THE BASE YEAR, (5) CREATE AN ENHANCED TAX CREDIT FOR CIGARETTE EXPORTATION, AND (6) CREATE A LIFE SCIENCES REVENUE BOND AUTHORITY.

OVERVIEW: This act makes the following economic development changes:

- Appropriates $24 million to a nonreverting fund to be used for site infrastructure for major industrial projects.
- Makes various changes to the Job Development Investment Grant (hereinafter JDIG) Program.
- Extends the William S. Lee Quality Jobs and Business Expansion Act (hereinafter Bill Lee Act) sunset and other deadlines for major pharmaceutical manufacturing and bioprocessing facilities.
- Authorizes annual sales tax refunds for construction materials for major pharmaceutical manufacturing and bioprocessing facilities.
- Extends the sunset on the cigarette exportation tax credit from 2005 to 2018 with the additional requirement that the taxpayer use the North Carolina State Ports. This part also allows the credit to be claimed by successors in business and modifies the base year determination.
- Allows a corporate income tax credit for tobacco manufacturers who export cigarettes to foreign countries, who use the North Carolina State Ports, and who maintain employment levels in this State that exceed the corporation's employment level in this State at the end of 2004.

- Establishes the Life Sciences Revenue Bond Authority to study and make recommendations for creating a credit enhancement program for financing construction of infrastructure for life sciences manufacturing facilities.

FISCAL IMPACT:

Description and Effective Dates	*General Fund Impact*
Expansion of Bill Lee Credits	$1 million loss beginning in 2007-2008
Major Industrial Facility Sales Tax Refunds	$1.5 million loss for 2005-2006 $2.3 million loss for 2006-2007 $2.6 million loss for 2007-2008 Will also create local government revenue losses
Changes to the existing cigarette exportation tax credit	$12 million loss for 2005-2006 $12 million loss for 2006-2007 $12 million loss for 2007-2008
New enhanced cigarette exportation tax credit	$4 million loss for 2006-2007 $4 million loss for 2007-2008.

(For a more compete fiscal analysis, see Overview Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library)

EFFECTIVE DATE: *See Analysis for effective dates.*

ANALYSIS: The Governor convened the Second Extra Session of the 2003 General Assembly to consider specific economic development changes. The following changes were enacted:

Major Industrial Site Infrastructure

Part 1 of the act creates a nonreverting Site Infrastructure Development Fund in the Department of Commerce to fund site acquisition and development and other capital expenses related to major industrial development.[1] The act appropriates $24 million to the Fund for the 2003-2004 fiscal year. A Site Infrastructure Development incentive may be in the form of a restricted grant or forgivable loan directly to a business or a grant to a government or nonprofit agency to administer the incentive.

Projects built with this appropriation are exempted from State construction requirements and State purchase requirements, with one exception. When public funds are expended, the State's policy of minority participation and the State's minority participation goal of 10% apply. Projects are also exempted from the part of the State Environmental Policy Act that requires detailed environmental impact statements when public funds or public lands are used for projects and programs significantly affecting the quality of the environment.

Eligible businesses may apply for site development incentives. To qualify for the incentive, a business must employ at least 100 new full-time employees and invest at least $100 million of private funds in the project. A business must also provide health insurance for its full-time employees and have a history of compliance with the Occupational Safety and Health Act and programs implemented by the Department of Environment and Natural Resources.

---

[1] Section 6.26 of S.L. 2004-124, the 2004 Appropriation Act, amended the Fund to also allow moneys in the Fund to be used to acquire options and hold options for the purchase of land for an anticipated industrial site if certain conditions are met.

The Department of Commerce and the Economic Investment Committee[2] will administer the selection process, including developing appropriate criteria for evaluating applicants. Section 1.3 of the act exempts them from rulemaking procedures in administrating the site infrastructure development program. Before recommending a project for site development, the Committee must make several findings, including a finding that site development is necessary for completion of the project in this State and a finding that the price to be paid for the site is appropriate and not excessive. Section 1.4 of the act provides that the JDIG conflict of interest restrictions will apply to the site infrastructure development program as well.[3]

Once an incentive is awarded, the Department will enter into an agreement with the business to provide site development within available funds. The agreement must include a provision prohibiting a business from receiving a payment or other benefit under the agreement when the business has received notice of an overdue tax debt and the overdue tax debt has not been satisfied or otherwise resolved. The agreement is binding on both parties. The agreement must include performance criteria, remedies, and other safeguards to protect the State's investment. The Attorney General must review and approve each agreement.

After a site development incentive is in effect, the Department of Commerce is responsible for monitoring the business' compliance with performance criteria and for administering the repayment of State funds by a business that has failed to meet these criteria. The Department of Commerce is required to report quarterly to the Joint Select Commission on Governmental Operations on the details of the program, including projects that receive incentives and any defaults and repayments. This report must also be made available to the public.

Part 1 of the act became effective when signed into law by the Governor on December 16, 2003.

Job Development Investment Grant Changes

Part 2 of the act makes several changes to the JDIG program.[4] Section 2.2 provides that, in determining whether a business has increased or maintained employment, the Economic Investment Committee can decide to look at a division or unit of a business rather than the entire business. Choosing this option means that if the entire business decreases employment, it may still qualify for a grant for a division or unit within the business that increases employment. The Committee can choose this option only if it is necessary to secure the project and the community economic development agreement contains terms to assure that the business does not create eligibility by transferring existing jobs to the project.

---

[2] The Economic Investment Committee, which administers the JDIG program, is a five-member committee consisting of the Secretary of Commerce, the Secretary of Revenue, the Director of the Office of State Budget and Management, one member appointed by the General Assembly upon the recommendation of the Speaker of the House of Representatives, and one member appointed by the General Assembly upon the recommendation of the President Pro Tempore of the Senate.

[3] Members of the Economic Investment Committee are forbidden to work for a business that receives a grant or loan under the program for at least two years after the member is no longer on the Committee. A former member of the Committee who violates this prohibition must forfeit any compensation received for that work and is prohibited for an additional two years from working for a business that receives a grant under the program.

[4] The 2004 Appropriation Act made subsequent changes to the JDIG program. A description of the program and the changes made by the 2004 Act are described in the analysis of S.L. 2004-124, the 2004 Appropriations Act.

Section 2.3 of the act repeals the wage standard as it applies to the JDIG program. There were several reasons for this change. First, at the time a business applies for a JDIG grant, the wages to be paid are just projections. Second, the law had been interpreted to require the jobs to meet not only the current wage standard, but also future wage standards, which can fluctuate annually. This interpretation created a great deal of uncertainty as to the prospect of actually receiving a grant in future years of the agreement. Third, while there is no wage standard for tiers one and two and the wage standard is set below the county average for prosperous tier five counties, the mid-range counties had to meet the actual county average. With sudden and severe dislocation, the wage standard could have blocked incentives for a project that would be vital to economic recovery for a county suffering from the loss of manufacturing industries. Finally, because grants are awarded at the discretion of the Committee, the Committee can use its judgment to assure that grants are not awarded to inappropriate, low-wage projects.

Sections 2.1, 2.4, and 2.5 of the act are more technical. Section 2.1 clarifies that the base period for measuring performance under a grant agreement can be any 24 months starting when performance begins. This base period is not limited to calendar years. Section 2.1 also adds the definition of enterprise tier to the statute. Section 2.4 clarifies the procedure for public notice and public comment on proposed changes to the JDIG criteria. Section 2.5 clarifies that payments under a grant can begin on a future date after it is awarded, as long as they begin within six years.

Part 2 became effective when the act was signed into law by the Governor on December 16, 2003.

Extend Bill Lee Credits for Certain Major Industries

In 2002, the General Assembly extended the sunset date on the Bill Lee Act until January 1, 2010, for certain interstate air couriers and also increased various time frames in the Bill Lee Act from two years to seven years.[5] The rationale for these extensions was that the interstate air courier industry and the construction of a hub in particular, face many regulatory, administrative, and legal hurdles not generally faced by other industries. Due to these extra burdens, there is generally a longer period between the time a project is announced and a location is selected and the time the facility is placed in service.

Part 3 of the act makes the same extensions for eligible major industries, effective beginning with the 2004 taxable year. An eligible major industry is either of the following two industries if the taxpayer will invest at least $100 million in acquiring, constructing, or equipping a facility to engage in the industry:

- Bioprocessing
- Pharmaceutical and Medicine Manufacturing and the Distribution of Pharmaceuticals and Medicines.

If the taxpayer does not in fact invest the required amount, the taxpayer forfeits the benefits of the extensions and must repay the credits.

Major Industrial Facility Sales Tax Refunds[6]

Part 4 of the act creates an annual refund of State and local sales taxes paid on construction materials and fixtures for facilities that involve the investment of more than $100 million by the taxpayer and are primarily used for either of the following two industries:

[5] See S.L. 2002-146.
[6] S.L. 2004-124, the 2004 Appropriations Act, expanded this provision.

- Bioprocessing
- Pharmaceutical and Medicine Manufacturing and the Distribution of Pharmaceuticals and Medicines.

The taxpayer must apply for the sales tax refund within six months after the end of the State's fiscal year. The refund is effective for sales taxes paid on or after January 1, 2004. If, after obtaining a refund, the taxpayer does not end up investing the required amount, the taxpayer forfeits the refund.

Cigarette Exportation Tax Credit

Part 5 of the act extends for thirteen years the sunset of the corporate income tax credit for manufacturing cigarettes for exportation. As enacted in 1999, this credit is a dollar amount per cigarette exported for those manufacturers who export at least 50% as many cigarettes in the taxable year as they did in calendar year 1998. The dollar amount ranges from forty cents to twenty cents per 1,000 cigarettes exported. The credit is capped at the lesser of $6 million per year or 50% of the manufacturer's corporate tax liability for any given year. The credit was set to sunset for cigarettes exported on or after January 1, 2005. Part 5 of the act changes the sunset to 2018.

Part 5 of the act also makes five other substantive changes to the credit for manufacturing cigarettes for exportation:

- It changes the base year for determining the exportation volume from 1998 to 2003, effective for cigarettes exported on or after January 1, 2005.
- It provides that the taxpayer must export cigarettes through the North Carolina State Ports, effective for cigarettes exported on or after January 1, 2005.
- It allows a successor in business to a corporation that claimed the credit to continue to claim the credit. In this case, the amount of the credit allowed is determined by comparing the exportation volume of the corporation in the year for which the credit is claimed with all of the corporation's predecessor corporations' combined base year exportation volume. This provision is effective for cigarettes exported on or after January 1, 2005.
- It expands the credit by allowing the credit to be claimed for the exportation of cigarettes to a possession of the United States or a commonwealth of the United States that is not a state. This provision is effective for taxable years beginning on or after January 1, 2004.
- It increases the carryforward period of any unused portion of the credit from five to ten years, effective for cigarettes exported on or after January 1, 2005.

Enhanced Cigarette Exportation Tax Credit

Part 6 of the act creates a new, alternative corporate tax credit for tobacco manufacturers who export cigarettes to foreign countries, who use the North Carolina State Ports, and who maintain employment levels in this State that exceed the manufacturer's employment level in this State at the end of 2004 by at least 800 full-time employees.[7] The credit is effective for taxable years

[7] Section 16 of S.L. 2004-170 amended the new credit to provide that in determining whether a taxpayer is eligible for the credit, positions located within North Carolina for six months or less are not considered to be part of the taxpayer's employment level.

beginning on or after January 1, 2006, and expires for exports occurring on or after January 1, 2018.

This new credit is a dollar amount per cigarette exported for those manufacturers who meet the above eligibility requirements. The credit amount is 40¢ per 1,000 cigarettes exported. The credit is capped at the lesser of $10 million per year or 50% of the manufacturer's tax liability for any given year. The credit may be taken against the corporate income tax or the franchise tax, or a combination of the two, at the election of the taxpayer. Once made, an election is binding and applies to all carryforwards of the credit. The taxpayer may, however, make a different election each year for credits earned during that year. Unused portions of a credit may be carried forward for 10 years. Part 6 of the act would also allow a partial credit for taxpayers who had previously met all eligibility requirements but who fail to maintain the required employment level. In computing the partial credit, the credit that would otherwise have been allowed is reduced in proportion to the amount by which the taxpayer's employment level is below the required level.

The credit created in Part 6 of the act differs from the credit allowed under G.S. 105-130.45 in several key ways. This new credit has a higher cap ($10 million as opposed to $6 million) and may be taken against the income tax and/or franchise tax (as opposed to only the income tax). In addition, the new credit requires job creation whereas the credit allowed under G.S. 105-130.45 does not. The new credit applies to cigarettes exported only to foreign countries (as opposed to foreign countries, to possessions of the United States, or to United States commonwealths that are not states) and requires the taxpayer to "export" through the North Carolina Ports (as opposed to "waterborne export" through the North Carolina Ports). A taxpayer may take either the new credit in this part or the original credit in G.S. 105-130.45, but may not claim both credits for the same activity.

While the original cigarette exportation tax credit was being considered during the 1999 Session, the issue was raised as to whether the credit would violate the General Agreement on Tariffs and Trade (GATT). The General Assembly staff was of the opinion that the tax credit would violate GATT, while counsel for one of the four tobacco manufacturers disagreed. This issue has not been resolved with respect to the original credit, and the new tax credit added by this part presents the same issue. It is clear, however, that any challenge to either the original credit or the new credit must come from a foreign government. If a foreign government were to challenge the credit, then the United States Justice Department could sue North Carolina. If the State were to lose, the federal statute provides that relief would be prospective only and persons who had already used the credit could not be required to repay it. Private citizens have no cause of action on the issue.

Life Sciences Revenue Bond Authority

Part 7 of the act creates a Life Sciences Revenue Bond Authority in the Department of State Treasurer, effective when signed into law by the Governor on December 16, 2003.[8] This provision is step one of a two-step process. First, the Authority will study the best method for establishing a credit enhancement program for construction of infrastructure for life sciences manufacturing facilities. After the Authority reports its findings and recommendations to the

[8] Senate Bill 75, introduced by Senator Rand during the 2003 Session, would also have created the Life Sciences Revenue Bond Authority. The bill was in a conference committee at the end of the 2003 Session.

General Assembly by May 1, 2004, the act anticipates that in the second stage the Authority would administer any program enacted by the General Assembly.[9]

This Part of the act does not require an appropriation. The Authority is expected to perform its duties during the first phase using funds raised from private sources. In addition, the Authority is authorized to charge fees for one part of the study, in which it will accept test applications (pro forma applications) to evaluate the need for the proposed credit enhancement program. The act directs the Authority to cooperate with appropriate government agencies, the University of North Carolina system, the Biotechnology Center, and others in developing its recommendations.

One example of a credit enhancement vehicle would be revenue bonds. Under existing law, the State and local governments can issue tax-exempt industrial revenue bonds for manufacturing and pollution control facilities. The bonds are retired with payments from the private business that will use the facility. The private business benefits from paying tax-exempt rates, rather than the taxable rates it would pay if it borrowed the money itself. Under Part 7 of the act, the Authority will consider using industrial revenue bonds and other approaches to credit enhancement in order to encourage the expansion of the life sciences manufacturing industry in this State.

The findings portion of Part 7 of the act identifies the life sciences as including biology, zoology, agronomy, biochemistry, genetics, and molecular biology. The commercialization of life sciences products to diagnose and treat diseases and provide other benefits is identified as having significant economic benefit to the State. The stated intent is to encourage the development of the bioprocess manufacturing industries in order to achieve a position of national leadership and innovation in this field.

ALLOW FAMILY BUSINESS TO LEASE FARMLAND.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-8	**HB 1465**	**Representative Brubaker**

AN ACT TO ALLOW FARMLAND OWNED BY A FAMILY BUSINESS TO KEEP ITS PRESENT-USE VALUE TAX STATUS WHEN LEASED FOR FARM USE.

OVERVIEW: This act allows farmland owned by a business entity to keep its present-use value status when the land is leased to a nonmember of the entity, as long as all members of the business entity are relatives and the land is leased for agricultural, horticultural, or forestry purposes.

FISCAL IMPACT: This act addresses a property tax issue, thus no General Fund impact is expected. The act will result in a loss of revenue to local governments; the loss of revenue is expected to be fairly small because of the limited nature of the tax law change. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

[9] As of August 2004, no report had been made because the members of the Authority's Board of Directors had not been appointed.

EFFECTIVE DATE: The act is effective for taxes imposed for taxable years beginning on or after July 1, 2004.

ANALYSIS: Agricultural land, horticultural land, and forestland that meet certain size, income, and ownership requirements may qualify as a special class of property subject to taxation at its present-use value rather than its fair market value. If the property is owned by a business entity, then the members of the business entity or their relatives must be actively engaged in the business of farming for the property to qualify for the use value program. By contrast, the law does not require a natural person who owns farmland to be actively engaged in the business of farming. In 1987 the Property Tax Commission determined that leasing land in and of itself does not qualify as 'actively engaged' in the business of farming.[10] This distinction has resulted in a different tax treatment of leased farmland owned by a person and farmland owned by a family business. For example, an individual who owns farmland may negotiate a lease for the land to be farmed by another but a limited liability company's land would lose it use-value status if it were leased to a non-relative.

This act removes this distinction and allows property owned by a family business to keep its present-use value tax status if the members do not want to physically participate in farming the land or to make decisions about the farming activity. The act specifies that the terms "having as its principal business" and "actively engaged in the business of the entity" include the leasing of land for agriculture, horticulture, or forestry as long as all members of the business entity are relatives. As a result of this tax law change, farmland owned by a limited liability company whose members are all related will not lose its present-use value status if one family member, who has been physically farming the land, dies and the surviving relatives decide to lease the land to a nonmember to handle all farming activity.

Under the existing law, a person must file for preferential property tax classifications during the regular listing period, which ends January 31. A county may extend the listing period up to 30 days in nonrevaluation years and 60 days in revaluation years.[11] In addition, for good cause, a county may extend the listing period for a specific taxpayer until April 15. The legislation, which became law on June 17, 2004, did not extend the application deadline. Any application filed after the act became law would be untimely and of no effect for the 2004 tax year. Thus, a taxpayer must have applied for the preferential treatment before the act became law in order to take advantage of the act for the 2004 tax year.[12]

---

[10] The case before the Property Tax Commission in 1987 involved agricultural land owned by a corporation. The corporation leased the property to a non-member who provided the capital equipment, bore the risks associated with the farming operation, and made the decisions as to the crops to be planted, the equipment needed, and the labor to be hired. The Commission concluded the corporation was engaged in the business of leasing land and was not in the principal business of and actively engaged in the commercial production of growing crops, plants, or animals. The Commission found that the county in that case correctly denied present-use value status to the property.

[11] If a county allows electronic listing of business personal property, it may extend the period for electronic listing until as late as June 1. G.S. 105-307(b).

[12] The use-value law provides an exception to the application deadline in cases where a transfer of property results in eligibility. In those cases, the application may be filed at any time within 60 days after the transfer. G.S. 105-277.4.

ADOPT FLAT FEE FOR DEBT COLLECTION.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-21	**HB 1497**	**Representative Wainwright**

AN ACT TO ADOPT A FLAT COLLECTION ASSISTANCE FEE UNDER THE SETOFF DEBT COLLECTION ACT.

OVERVIEW: This act, which was a recommendation of the Revenue Laws Study Committee, adopts a flat collection assistance fee of $5.00 for debts collected by the Department of Revenue under the Setoff Debt Collection Act.

FISCAL IMPACT: Not determined. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act is effective for fees assessed on or after January 1, 2005.

ANALYSIS: This act modifies the Setoff Debt Collection Act by imposing a flat $5.00 collection assistance fee on each debt collected through setoff. Under that Act, if an individual owes money to a State or local agency, the Department of Revenue sends the individual's income tax refund to that agency in payment of the debt rather than to the individual. Thus, the debt the individual owes to the agency is set off against the individual's income tax refund.

The Department of Revenue recovers its costs of running the program by charging a collection assistance fee as a percentage of each debt collected. The fee is added to the debt and paid by the debtor from the refund. Before this act went into effect, the Department would calculate its actual costs for the previous year and adjust the fee amount to reflect those costs.

The change to a flat fee of $5.00 was recommended to the Revenue Laws Study Committee by the Department of Revenue. According to the Department, the process to determine "actual cost" is tedious and quite cumbersome because many different areas of the Department are affected. Thus, the "actual cost" is an estimate at best. The collection assistance fee determined by the Department for the four latest calendar years has been less than $5.00, and collection costs are not expected to grow.

NOTICE PERIOD FOR SALES AND USE TAX REFUNDS.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-22	**HB 1448**	**Representative Luebke**

AN ACT TO REQUIRE THAT SELLERS BE PROVIDED WITH NOTICE AND A SIXTY-DAY PERIOD TO RESPOND TO A REQUEST FOR A REFUND OF OVER-COLLECTED SALES OR USE TAXES

BEFORE A PURCHASER MAY BRING A CAUSE OF ACTION AGAINST THE SELLER.

<u>OVERVIEW:</u> This act, which is a recommendation of the Revenue Laws Study Committee, requires a purchaser seeking a refund of over-collected sales or use tax to provide written notice to the seller and to allow the seller 60 days to respond before the purchaser may bring a cause of action against the seller. This requirement is necessary to conform to the Streamlined Sales Tax Agreement.

<u>FISCAL IMPACT:</u> No impact.

<u>EFFECTIVE DATE:</u> This act became effective when signed into law by the Governor on June 25, 2004.

<u>ANALYSIS:</u> Under the Streamlined Sales Tax Agreement, purchasers seeking a refund of over-collected sales or use taxes must give the seller written notice and allow the seller 60 days in which to respond before bringing a cause of action against the seller.

Earlier in 2004, the Department of Revenue adopted this provision as part of a technical bulletin. However, the retailers expressed a preference for having the provision codified in statute. Therefore, the act codifies the Department's policy regarding refund procedures for over-collected sales and use tax.

AMEND FRANCHISE TAX LOOPHOLE.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-74	**SB 51**	**Senator Clodfelter**

AN ACT TO CLOSE A LOOPHOLE THAT ALLOWS CORPORATIONS TO CONTINUE AVOIDING FRANCHISE TAXES AND TO REMOVE PROVISIONS THAT COULD RESULT IN FRANCHISE TAXES ON UNRELATED LIMITED LIABILITY COMPANIES.

<u>OVERVIEW:</u> This act makes several changes to the 2001 and 2002 legislation that established attribution rules intended to close a loophole that allows corporations to escape franchise tax by having a controlled limited liability company (LLC) hold their assets.

- It removes attribution rules for certain related members and for individuals. Ownership interests in LLC assets would be attributed to corporations and to and from partnerships, estates, trusts, LLCs, and other entities.
- It provides that federal rules relating to constructive ownership of stock govern attribution of ownership interests in LLC assets.
- It attributes only a proportion of the LLC assets to the controlling corporation, rather than all of the assets.
- It exempts LLCs that have no more than $150,000 of assets.

- It simplifies and corrects the test for determining whether an LLC's assets are attributable to a corporation.
- Beginning in 2005, it reduces from "70% or more" to "more than 50%" the minimum percentage of an LLC's assets a corporation must control to trigger the franchise tax requirement.
- It removes membership in the LLC as an additional condition for attribution.

FISCAL IMPACT: No estimate available. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The changes become effective for taxes due on or after January 1, 2003.

ANALYSIS: Under North Carolina law, limited liability companies (LLCs) [13] are not subject to the franchise tax.[14] In 1997, the North Carolina law regarding LLCs was changed to allow for a single-member LLC. This change had the unintended consequence of allowing a corporation subject to North Carolina franchise tax to set up an LLC and transfer assets to the LLC in a tax-free transfer. The assets then held by the LLC would not be subject to the franchise tax. Thus, the corporation could avoid a significant portion of its franchise tax liability by transferring assets into a wholly owned LLC without affecting its income tax liability.

In 2001, the General Assembly enacted S.L. 2001-327 to close this loophole. The 2001 legislation tried to address the problem by requiring a corporation to pay tax on assets owned by a LLC if the corporation, including its affiliated corporations, indirectly owned[15] at least 70% of the LLC's assets. Unfortunately, tax planners found that the tax could still be avoided by using an additional paper transaction. If the corporation interposed a partnership between itself and the LLC holding its assets, then technically the 2001 legislation would not apply and the assets would continue to escape franchise tax.

In 2002, the General Assembly enacted S.L. 2002-126 to tighten the 2001 law. The 2002 legislation required attribution through "related members" (other entities and individuals) who may cooperate with one or more corporate entities to own the LLC that will hold the corporate assets. "Related members" is a defined term and includes certain shareholders, partnerships, estates, trusts, and corporations. If a corporation and its related members together indirectly own at least 70% of an LLC's assets, the 2002 legislation provided that each corporation would pay franchise tax on its relative share of the LLC's assets. The relative share was calculated after excluding those related members that are not corporations. Thus, the entire assets were subject to franchise tax, with the tax burden shared proportionally by the corporations involved in the ownership scheme.

After the 2002 legislation was enacted, it became apparent that it not only failed to close the loophole but also extended the franchise tax to situations that did not involve corporate control

---

[13] A limited liability company is a business entity that is essentially a hybrid of a partnership and a corporation. Like a corporation, an LLC limits the liability of its owners. Like a partnership, an LLC is usually not subject to entity-level taxation.

[14] The franchise tax is a tax on S Corporations and C Corporations for the privilege of doing business in the State. The tax rate is $1.50 per $1,000 of value of the greatest of (1) apportioned net book value of the corporation; (2) 55% of appraised value of real and tangible personal property in North Carolina; or (3) total actual investment in tangible property in North Carolina.

[15] Indirect ownership of an LLC's assets is determined based on who is entitled to receive those assets upon dissolution of the LLC.

of LLC assets. The loophole remained open because there were additional paper transactions that can be interposed between the corporation and the LLC in order to circumvent the attribution of the LLC's assets to the corporation. For example, control could be passed through a business trust.[16] The 2002 legislation apparently went too far because it extended the franchise tax to assets owned by individuals or entities over which the corporation has no control.

The 2003 Revenue Laws Study Committee recommended legislation to the 2003 legislative session to correct the LLC franchise tax loophole.[17] The proposal was introduced as Senate Bill 51. Each house passed a version of Senate Bill 51 but they were unable to resolve the differences between the two versions. After the 2003 session adjourned, the Revenue Laws Study Committee appointed a working group including the Department of Revenue, certified public accountants, and tax attorneys, which recommended a new approach that they thought would be effective, workable, and fair. During the 2004 Session, the recommendation was enacted as a conference committee substitute for the 2003 bill, Senate Bill 51.

This act closes the LLC franchise tax loophole by extending the franchise tax to all LLC assets the corporation controls through trusts and other entities. The Revenue Laws Study Committee determined that franchise tax is appropriate if a corporation controls assets owned by a related LLC, but not if the corporation gives up both control and ownership of the assets. By limiting the scope of the 2002 legislation to only those LLC assets the corporation controls, the act also has the effect of removing it from situations where it went too far. The act further limits the reach of the 2002 act by exempting small LLCs. These changes are retroactive to 2003.

The concept of control is determined by tracing ownership of the capital interests in the LLC's assets. A capital interest is the right to receive some or all of the assets under the LLC's governing law if the LLC were dissolved. Ownership of the capital interests in an LLC is traced, using the principles of constructive ownership, through any noncorporate entities. The chain of constructive ownership can run through layers of noncorporate entities but not through individuals. The franchise tax is payable by the corporation or affiliated group of corporations to which ownership of the capital interests is traced.

Ownership of capital interests in an LLC is determined as of the last day of the LLC's tax year. If an LLC and a corporation engage in a pattern of trading assets back and forth so that neither owns them on its respective trigger date, the determination must be made as of the last day of the corporation's tax year.

If the capital interests in an LLC are owned by an affiliated group of corporations, the value of the assets is allocated among the members of the group for franchise tax purposes so that there will not be double taxation of any assets. The allocation is in proportion to each affiliate's ownership interest.

---

[16] A business trust is not considered a related member, as that term is defined in G.S. 105-130.7A, because it would be the corporation, not the shareholders, that would form the trust.

[17] The Department of Revenue, in its 2003 reports to the Revenue Laws Study Committee, noted that there exists a general franchise tax inequity because the imposition of the tax depends on the type of entity. The Governor's Commission to Modernize State Finances recommended that the State impose the franchise tax on all types of business entities, not just on traditional corporations. The Commission recommended that the revenues generated from this base broadening could be used to establish a minimum net worth threshold for payment of the tax.

The act exempts from the attribution rules those LLCs whose total assets do not exceed $150,000. Under the laws governing business entities, an LLC pays an annual report fee of $200 while corporations pay an annual report fee of $20. The approximate threshold at which there would be no tax advantage from transferring corporate assets to an LLC is $130,000.

The act also makes a number of other changes to the law. It reduces the threshold percentage of an LLC's assets that a corporation must control before the franchise tax is triggered. The current threshold is 70% or more but applies to a much broader realm of parties through whom ownership may be attributed. This act sets the threshold percentage at more than 50% beginning in 2005. The act also corrects the formula for tracing ownership to remove the 2002 law's potential effect of attributing 100% of an LLC's assets when the corporation controls less than 100%. Finally, the act removes membership in the LLC as an additional condition for attribution. That condition created a loophole and served no purpose.

REDUCE PRIVILEGE AND EXCISE TAXES.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-84	**HB 1303**	**Representative Starnes**

AN ACT TO REDUCE PRIVILEGE AND EXCISE TAXES.

OVERVIEW: This act reduces certain privilege and excise taxes as follows:

- It exempts two additional types of activities from the 3% privilege tax on amusements:
  - A youth athletic contest with an admission price that does not exceed $10, with participating athletes younger than 20 years of age, and that is sponsored by a person exempt from income tax.
  - All exhibitions, performances, and entertainments promoted and managed by a nonprofit arts organization that is exempt from income tax.
- It reduces the excise tax on cigarettes, other tobacco products, wine, beer, and spirituous liquor by allowing a 2% discount on the tax due.

FISCAL IMPACT: No exact fiscal estimate is possible with regard to the privilege license tax exemptions because the Department of Revenue cannot estimate how many organizations would be affected and is not certain that all potentially affected organizations have been paying the tax owed. The 2% excise tax discount results in a loss to the General Fund of $760,000 from tobacco products and $1.8 million from alcoholic beverages for fiscal year 2004-2005. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The section regarding the privilege license tax exemptions for certain amusements became effective July 1, 2004. The section allowing the excise tax discounts became effective for reporting periods beginning on or after August 1, 2004. The act was signed into law by the Governor on July 8, 2004.

ANALYSIS:

Privilege Tax Exemptions

The State levies a privilege tax at the rate of 3% on the gross receipts derived from amusements that a person gives, offers, or manages unless the amusement is exempted by statute.[18] G.S. 105-40 exempts several forms of amusements from the privilege tax, including local talent shows, elementary and secondary school athletic contests and dances, and certain arts and community festivals.

The act creates two new exemptions from the amusements tax. First, the act exempts a youth athletic contest with an admission price that does not exceed $10 and that is sponsored by a person exempt from income tax. Each participating athlete must be younger than 20 years of age. Second, the act exempts all exhibitions, performances, and entertainments promoted and managed by a nonprofit arts organization that is exempt from corporate income tax.. This exemption does not apply to athletic contests, but applies regardless of where the amusement is held, the amount of compensation paid to provide the amusement, or the amount of the receipts derived from the amusement. The amusement tax exemptions became effective July 1, 2004.

Excise Tax Reductions

Before August 1, 2003, distributors and wholesalers who timely paid the excise taxes on cigarettes, other tobacco products, wine, beer, and liquor were eligible for a discount equal to 4% of the tax due. In 2003, the General Assembly eliminated these discounts (S.L. 2003-284). This act reinstates the discounts, but at a rate of 2% of the tax due. The cigarette and tobacco discounts are intended to cover expenses incurred in preparing tax reports and the expense of furnishing a bond. The discounts for alcoholic beverages are intended to cover these expenses and also losses due to spoilage or breakage. The discounts became effective for reporting periods beginning on or after August 1, 2004.

EMERGENCY FUNDING/CONTINUING PROVISIONS.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-88	**HB 1352**	**Representative Owens**

AN ACT TO PROVIDE EMERGENCY FUNDING FOR THE ONE NORTH CAROLINA FUND AND THE NEW AND EXPANDING INDUSTRY TRAINING PROGRAM, TO CODIFY PROVISIONS RELATED TO THE ONE NORTH CAROLINA FUND, TO APPROPRIATE FUNDS TO THE RURAL ECONOMIC DEVELOPMENT CENTER TO BE USED FOR ECONOMIC INFRASTRUCTURE, AND TO MAKE NECESSARY TRANSITIONAL ADJUSTMENTS TO THE STATE BUDGET.

[18] The amusement tax was originally intended to piggyback the sales tax. The law taxed entertainment "at the rate of tax levied" by the sales tax statutes. In 1989, when the sales tax rate was 3%, the piggyback language was changed to a stated 3% rate. When the sales tax was increased from 3% to 4%, the amusement tax should have been increased as well, but due to oversight, the change was not made.

OVERVIEW: The act establishes funding programs and makes appropriations as follows:

- Establishes the One North Carolina Fund as a special reserve fund, codifies the provisions related to the Fund, and appropriates $20 million to the Fund for the 2003-2004 fiscal year.
- Appropriates $4.1 million to the Community Colleges System for the 2003-2004 fiscal year for new and expanding industry training.
- Appropriates $20 million to the Rural Economic Development Center for the 2003-2004 fiscal year to:
  - Establish the North Carolina Infrastructure Program.
  - Provide matching grants to local governments in distressed areas and equity investments in public-private ventures that will reuse vacant buildings.
  - Provide research and demonstration grants.
- Appropriates $20 million to the Teachers' and State Employees' Retirement System Fund in the 2003-2004 fiscal year to partially pay back the debt owed to the Fund.

The remainder of the act sets out temporary year-end transitional provisions that were in effect until the passage of The Current Operations and Capital Improvements Appropriations Act of 2004.

FISCAL IMPACT: There are no finance provisions in this act. The appropriations in the act reduced the 2003-2004 end-of-year General Fund balance because they were made for the 2003-2004 fiscal year. Due to the late passage of the act, the appropriated moneys will be expended beginning in the 2004-2005 fiscal year. See the Analysis for further explanation of these appropriations.

EFFECTIVE DATE: The sections of the act dealing with the One North Carolina Fund, the New and Expanding Industry Training Program, the Rural Economic Center, and the Teachers' and State Employees' Retirement System Fund became effective June 30, 2004.

ANALYSIS:

One North Carolina Fund

Section 1 of the act appropriates $20 million in non-reverting funds to the One North Carolina Fund for the 2003-2004 fiscal year. The Department of Commerce may use up to $300,000 of this appropriation for administering the Fund and other economic development incentive grant programs during the 2004-2005 fiscal year. The act also expresses the intent of the General Assembly that there be an annual recurring appropriation of $10 million beginning in the 2006-2007 fiscal year. The codification of and appropriation to the One North Carolina Fund were proposed by the Joint Select committee on Economic Growth and Development, except that the Committee proposed appropriating $10 million to the Fund for the 2004 2005 fiscal year.[19]

[19] The Joint Select Committee on Economic Growth and Development is an interim committee consisting of 28 members appointed by the President Pro Tempore of the Senate and the Speakers of the House of Representatives. The Committee issued a report to the 2003 General Assembly and is to terminate upon the convening of the 2005 General Assembly.

The One North Carolina Fund was created in 1993 and was originally known as the Industrial Recruitment Competitive Fund. The Fund was established in order to provide a source of funding to be used by the Governor and the Department of Commerce in recruiting or retaining new and expanding businesses. Moneys in the Fund may be used only for the following purposes:

1. Installation or purchase of equipment.
2. Structural repairs, improvements, or renovations to existing building to be used for expansion.
3. Construction of or improvements to new or existing water, sewer, gas, or electric utility distribution lines or equipment for existing buildings.
4. Construction of or improvements to new or existing water, sewer, gas, or electric utility distribution lines or equipment for new or proposed buildings to be used for manufacturing and industrial operations.
5. Any other purposes specifically provided for by an act of the General Assembly.

Appropriations to the Fund have been sporadic since its inception in 1993. The Fund received a $5 million appropriation in 1993-1994 and a $7 million appropriation in 1994-1995. Over the next six fiscal years, the Fund received an appropriation of either $1 million or $2 million each year. For the 2001-2002 fiscal year, the General Assembly appropriated $15 million to the Fund. No appropriations to the Fund were made in the 2002-2003 or 2003-2004 fiscal years. Although the Fund was never set up as a non-reverting account, each year the General Assembly allowed the moneys remaining in the Fund to be carried over to the next fiscal year.

Moneys from the Fund are allocated only to local governments for use in connection with securing commitments for the recruitment, expansion, or retention of new and existing businesses. Over the years, the Department of Commerce has developed a set of guidelines relating to disbursements from the Fund. These guidelines include the following:

- Any disbursement of State funds must be matched by a local contribution. The local contribution can take the form of cash, fee waivers, in-kind services, donation of assets, provision of infrastructure, or a combination of these.
- Grants are made from the Fund only as certain performance goals are met, generally in four installments.
- Funds are disbursed only in accordance with two separate agreements: a company performance agreement entered into by the grantee business and the local government and a local government grant agreement entered into by the Department of Commerce and the local government.
- Receipt of a grant under the Fund generally requires job creation, but may be based on retention of existing jobs.
- Generally, jobs that are to be created or retained must meet the William S. Lee Act wage standard and provide health insurance.

The act codifies the One North Carolina Fund in the General Statutes as a special revenue fund in the Department of Commerce. Special revenue funds are non-reverting funds that are tracked differently for budgetary purposes. The act further codifies the purposes of the Fund as well as the existing guidelines regarding local match, job creation or retention, written agreements,

disbursement only following performance, and purposes for which grants may be made. The wage standard and health insurance guidelines were not codified.

The act also provides that the Department of Commerce and the Governor's Office will develop program guidelines for the funds, as was done under prior law, and provides an exemption from the Administrative Procedure Act's rulemaking procedures in developing these guidelines. Guidelines that are in effect for the Fund when this act became law will continue in effect until the new guidelines are adopted.

The Department of Commerce must publish a report at the end of each fiscal quarter providing information on the commitment, disbursement, and use of funds allocated under the Fund. This report must be submitted to the Joint Legislative Commission on Governmental Operations, the House of Representatives and Senate Finance Committees and Appropriations Committees, and the Fiscal Research Division of the General Assembly.

New and Expanding Industry Training Program

Section 1 of the act appropriates $4.1 million in non-reverting funds to the Community Colleges System Office for the 2003-2004 fiscal year for new and expanding industry training. The New and Expanding Industry Training (NEIT) Program, started in 1958, supports the economic development efforts of the State by providing education and training opportunities for new and expanding businesses. Companies creating 12 or more production jobs in excess of their previous 3-year maximum employment level are eligible for assistance through the NEIT Program.

Rural Economic Development Center

Section 2 of the act appropriates $20 million to the Rural Economic Development Center for the 2003-2004 fiscal year to be allocated as follows:

- To establish the North Carolina Infrastructure Program. This Program will provide grants to local governments to construct critical water and wastewater facilities and to provide other infrastructure needs, including technology needs, to sites where these facilities will generate private job-creating investment. At least $15 million of the appropriated funds must be used to provide these grants. The Center must make annual reports of the Program's progress to the Joint Legislative Commission on Governmental Operations. The initial report is due no later than January 15, 2005. The Joint Select Committee on Economic Growth and Development had proposed that $15 million be appropriated to the Center to establish the North Carolina Infrastructure Program for the 2004-2005 fiscal year.
- To provide matching grants to local governments in distressed areas and equity investments in public-private ventures that will productively reuse vacant buildings, with priority given to towns with a population of less than 5,000.
- To provide research and demonstration grants.

Teachers' and State Employees' Retirement System Fund

Section 3 of the act appropriates $20 million to the Teachers' and State Employees' Retirement System Fund for the 2003-2004 fiscal year to partially pay back the debt owed to this Fund. In the 2000-2001 fiscal year, the Governor took $130 million from this Fund to help cover the budget shortfall.

The remaining sections of the act make necessary transitional adjustments to the State Budget pending the passage of The Current Operations and Capital Improvements Appropriations Act of 2004.

IRC UPDATE AND OTHER TAX CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-110	**HB 1430**	**Representative Miner**

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS, TO SET THE PUBLIC UTILITY AND INSURANCE REGULATORY FEES, TO EXTEND THE SUNSET ON THE LOW-INCOME HOUSING TAX CREDIT, TO CLARIFY THE SALES TAX INCENTIVES FOR MAJOR PROJECTS, TO MAINTAIN THE CURRENT SALES TAX RATES ON ELECTRICITY USED BY MANUFACTURERS, AND TO ESTABLISH FAMILY COURT FEES.

OVERVIEW, EFFECTIVE DATES, AND FISCAL IMPACT:

Part	*Description and Effective Dates*	*General Fund Impact*
1	**IRC Update** Changes the reference date to the Internal Revenue Code from June 1, 2003, to May 1, 2004. This part became effective when signed into law by the Governor on July 17, 2004. However, any amendments to the Internal Revenue Code enacted after June 1, 2003 that would have increased North Carolina taxable income for the 2003 taxable year are effective beginning with the 2004 taxable year.	**Military Family Tax Relief Act of 2003** $1.2 million loss in 2004-2005 700,000 annual loss thereafter **Medicare Prescription Drug, Improvement, and Modernization Act of 2003** $1.4 million loss in 2004-2005 $4.3 million loss in 2005-2006 **Pension Funding Equity Act of 2004** No Revenue Estimate Available
2	**Regulatory Fee for Utilities Commission** Sets the electric membership corporation regulatory fee at $200,000 and the percentage to be used in calculating the public utility regulatory fee at 0.12%. This part became effective July 1, 2004	$12.6 million gain in 2004-2005
3	**Insurance Regulatory Charge** Sets the percentage to be used in calculating the insurance regulatory	$24.1 million gain in 2004-2005

Part	*Description and Effective Dates*	*General Fund Impact*
	charge at 5%. This part is effective for the 2004 calendar year.	
4	**Extend Low-Income Housing Credit Sunset** Extends the Low-Income Housing Tax Credit Program from 2006 to 2010. This part became effective when signed into law by the Governor on July 17, 2004.	$18.6 million loss in 2007-2008 $37.5 million loss in 2008-2009 $38.7 million loss in 2009-2010 $40.4 million loss in 2010-2011 $20.7 million loss in 2011-2012
5	**Sales Tax Clarification** Clarifies that the sales tax refund for purchase of building materials on certain industrial projects applies only to materials purchased for initial construction. This part became effective July 1, 2004.	No fiscal impact.
6	**Maintain Current Sales Tax Rates on Electricity Used by Manufacturers** Repeals the graduated sales tax rate on electricity used by manufacturers and enacts a lower rate for electricity used in an aluminum smelting facility. This part becomes effective October 1, 2004.	**Repealing Graduated Rate** $9.6 million gain beginning with the 2005-2006 fiscal year. **Lower Rate for Aluminum Smelting Facilities** No estimate available, possible annual losses of $800,000.
7	**Family Court Fees** Allows the Administrative Office of the Courts to establish a fee of up to $30 for the use of supervised custody/exchange centers. This part became effective when signed into law by the Governor on July 17, 2004.	No estimate available

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)

ANALYSIS:

Part 1: IRC Update

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code, by reference to the Code.[20] The General Assembly determines each year whether to update its reference to the Internal Revenue Code.[21] Updating the Internal Revenue Code reference makes

[20] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[21] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which

recent amendments to the Code applicable to the State to the extent that State law tracks federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made. Under North Carolina law prior to the enactment of this act, the reference date to the Code was June 1, 2003. Part 1 of this act changes the reference date to May 1, 2004. Changing the reference date to May 1, 2004, incorporates federal changes made in the three following acts: the Military Family Tax Relief Act of 2003 (P.L. 108-121), the Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (P.L. 108-173), and the Pension Funding Equity Act of 2004 (P.L. 108-218).

Military Family Tax Relief Act of 2003 (MFTRA), (P.L. 108-121). – The Military Family Tax Relief Act of 2003 made numerous changes to federal tax laws. These changes include the following:[22]

- Adoption of special rules regarding the exclusion of gain on sale of a principal residence by a member of the uniformed services or the Foreign Service, effective for sales occurring on or after May 6, 1997.[23]
- Exclusion from gross income of certain death gratuity payments.
- Exclusion from gross income of amounts received under the Department of Defense Homeowners Assistance Program
- Expansion of combat zone filing rules to contingency operations.
- Modification of veterans' organizations' membership requirements for tax-exempt status.
- Exclusion from gross income of Dependent Care Assistance Program payments to members of the uniformed services.
- Suspension of tax-exempt status of terrorist organizations.
- Above-the-line deduction of overnight travel expenses of National Guard and Reserve members.
- Extension of certain tax relief provisions to astronauts.

Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (P.L. 108-173). – The Medicare Prescription Drug, Improvement, and Modernization Act of 2003 (P.L. 108-173) contained one significant tax provision. As part of that law, Congress created Health Savings Accounts (HSAs). The federal legislation allows a person to accumulate funds on a tax-preferred basis to pay for certain medical expenses. An employer, an eligible individual, or both may make contributions to the account. The earnings in the account grow tax-free. Employer contributions to an HSA are

---

adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

[22] A more detailed analysis of these provisions may be obtained from *Technical Explanation of H.R. 3365, The "Military Family Tax Relief Act of 2003," as Passed by the House of Representatives and the Senate*, Joint Committee on Taxation, November 7, 2003, JCX-99-03.

[23] The federal legislation provided a one-year period for taxpayers to file an amended return that would otherwise have been barred by the statute of limitations. That one-year period will end on November 11, 2004. This act allows a taxpayer an exception to the State statute of limitations as long as the taxpayer files the claim by the same date, November 11, 2004.

excludable from gross income and contributions by an eligible individual are deductible in computing adjusted gross income.

Distributions from an HSA for medical expenses are excludable from income, except for amounts distributed to pay most health insurance premiums. However, tax-free distributions from an HSA may be used to pay the following health insurance premiums: retiree health insurance premiums for individuals who have reached Medicare eligibility; premiums for COBRA coverage; premiums for qualified long-term care insurance contracts; and premiums for a health plan during a period in which an individual is receiving unemployment. Distributions from an HSA for non-medical expenses are includible in gross income.

Pension Funding Equity Act of 2004 (P.L. 108-218). – The Pension Funding Equity Act of 2004, signed by the President on April 10, 2004, made changes to the Internal Revenue Code and the Employee Retirement Income Security Act (ERISA). The federal legislation allows employers (both pension plan sponsors across the board as well as those in specifically targeted industries) to lower the amount of both their pension contributions and premiums paid to the Pension Benefit Guaranty Corporation (PBGC). By lowering the amount of required payments to pension plans and to the PBGC, the federal legislation could result in higher taxable income for the affected companies. The PBGC is the government agency that insures certain underfunded benefits in defined benefit plans. Underfunded single employer defined benefit plans, those plans that do not have sufficient assets to pay benefits if the plan were to terminate, provide the greatest risk to the PBGC. Sponsors of plans that are considered underfunded must make contributions to their plans in addition to paying variable-rate premiums to the PBGC based on the amount of underfunding. Pension plan benefits promised to employees remain the same. The federal legislation specifically provides the following temporary relief for many pension plans:

- For years 2004 and 2005, the federal legislation replaces the 30-year Treasury bond rate used to calculate employer's pension contributions and premiums paid to the PBGC with a long-term corporate bond rate. The 30–year Treasury bond, last issued in 2001, has had an historically low interest rate. A lower interest rate requires pension plans to make higher contributions because they are assuming a lower rate of return. The new rate is based on the four-year weighted average of high quality bond yields. Plans with funded current liabilities of less than 100% must estimate quarterly payments for the plan year. Failure to make required payments subjects the employer to excise taxes. If a plan's assets are not sufficient to cover at least 90% of its current liability, it is subject to additional funding requirements. The federal legislation will allow more plans to meet the 90%-funded threshold and avoid additional contributions.

- The federal legislation provides deficit reduction contribution (DRC) relief to under-funded plans in the airline and steel industries and to the Transportation Communications Union plan. The DRC is a payment required from pension plans that are significantly underfunded. Plans that are less than 90% funded on a current liability basis generally are subject to an additional minimum funding requirement. A DRC payment is required in addition to the pension plan sponsor's normal annual contribution. The federal legislation allows plan sponsors that would normally be subject to DRC liability to reduce their payments by 80% for two years. During the two years of DRC relief, plan sponsors are precluded from increasing benefits for those two years except for benefit increases required by collective bargaining agreements and increases that will be paid for by increased contributions. Plan sponsors are required to notify plan participants

> that the sponsor has taken DRC relief within 30 days of filing that election, thereby putting the employees on notice that the plan sponsor is not fully funding the plan. Any plan that takes DRC relief must also report to the PBGC the amount of DRC contributions the sponsor was spared, how long it would take the company to become fully funded if only regular, required contributions were made, and how the amount by which the plan is underfunded compares with the capitalization of the company.

In addition, the federal legislation allows an eligible multi-employer plan to elect to defer amortization of up to 80% of the 2002 net experience losses for two plan years. Under previous law, if a multi-employer plan had a net experience loss for a plan year, the plan's funding standard account was charged with the amount needed to amortize the net experience loss over 15 years. The federal legislation defers funding of 80% of the 2002 actuarial loss for up to two years. It is expected that very few of the 1,600 plus multi-employer plans will meet the eligibility requirements for this relief.[24] If the eligible plan elects to defer charges attributable to its 2002 net experience loss, the plan must provide written notice of the election within 30 days to participants and beneficiaries, to each labor organization representing participants and beneficiaries, to each employer that has an obligation to contribute under the plan, and to the PBGC.

Part 2: Regulatory Fee for Utilities Commission

Part 2 of this act sets the rate for the public utility regulatory fee for the 2004-2005 fiscal year at 0.12%**.** The rate for 2003-2004 was the same. The rate for this fee must be set each year by the General Assembly. The utility regulatory fee is a tax that was first imposed in 1989. The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating public utilities. The regulatory fee is imposed on all utilities that are subject to regulation by the North Carolina Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenues. In general, jurisdictional revenue is derived from providing utility service in North Carolina.

In addition to funding the State's cost in regulating public utilities, the money in the Utilities Commission and Public Staff Fund is currently used to finance the work of the Study Commission on the Future of Electric Service in North Carolina. The General Assembly established the Commission in 1997 to examine the cost, adequacy, availability, and pricing of electric service in North Carolina to determine whether legislation is necessary to assure an adequate and reliable source of electricity and economical, fair, and equitable rates for all consumers of electricity in North Carolina. Section 14.10 of S.L. 2000-67, the Current Operations and Capital Improvements Appropriations Act of 2000, extended the life of the Study Commission and its funding from the Utilities Commission and Public Staff Fund through June 30, 2006.

Part 2 of this act also sets at $200,000 for the 2004-2005 fiscal year the annual public utility regulatory fee imposed on electric membership corporations whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale**.** The new rate is the same as the rate in effect for the preceding three fiscal years. The proceeds of the fee are credited to the Utilities

[24] Eligible multi-employer plans are those that experienced an investment loss of at least 10% of assets in the plan year beginning in 2002 and for which the negotiated contributions are expected to be insufficient to satisfy minimum funding requirements in a plan year beginning after June 30, 2003 and before July 1, 2006. Multi-employer plans are not subject to the DRC. Instead, employers paying into a multi-employer plan are subject to excise taxes if the multi-employer plan is not fully funded.

Commission and Public Staff Fund and used to defray the State's cost in regulating electric membership corporations.

The 1999 General Assembly enacted S.L. 1999-180, which authorized electric membership corporations to form subsidiary corporations that may provide energy services and products, telecommunications services and products, and water and wastewater collection and treatment. The subsidiary must fully compensate the electric membership corporation for its use of the corporation's personnel, services, equipment, and property. The Utilities Commission is charged with regulating this aspect of the subsidiary's business and, to pay for this regulation, S.L. 1999-180 levied a flat-rate regulatory fee to be paid annually by the North Carolina Electric Membership Corporation. The General Assembly must establish the fee amount each year. The North Carolina Electric Membership Corporation is the only electric membership corporation whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale as provided in G.S. 117-16. It is a "generation and supply cooperative" owned by its members. Its members are all but one of the existing North Carolina electric membership corporations, which are "distribution cooperatives." Thus, the fee imposed on the North Carolina Electric Membership Cooperation will be passed on to its member electric membership corporations.

Part 3: Insurance Regulatory Charge

Part 3 of this act sets the insurance regulatory charge at 5% for the 2004 calendar year, the same as the rate set for the 2003 calendar year. The insurance regulatory charge was first enacted in 1991 to defray the State's cost of regulating the insurance industry. The charge is a percentage of each insurance company's gross premiums tax liability. The insurance regulatory charge is imposed on insurance companies that pay the gross premiums tax and, beginning in 2000, on health maintenance organizations and medical service corporations. Insurance companies and medical service corporations pay a 1.9% gross premium tax rate.[25] For health maintenance organizations, the charge is levied on each organization's hypothetical gross premiums tax liability determined at the 1.9% gross premiums tax rate applied to its premiums base. The hypothetical calculation is necessary because health maintenance organizations pay premiums tax at the lower rate of 1%.

Part 4: Extend Low-Income Housing Credit Sunset

Part 4 of this act extends the sunset on the low-income housing tax credit from January 1, 2006, until January 1, 2010. Developers of low-income housing begin their work months in advance and need to know what financing will be available as they secure options on sites. This act also makes a technical correction to the credit by replacing the term 'eligible basis' with the term 'qualified basis'.

Congress enacted the federal Low Income Housing Tax Credit in 1986 to fund housing for low- and moderate-income households. Each state receives a limited amount of credit each year. The Internal Revenue Service (IRS) allocates the per capita low-income housing tax credit to state housing agencies such as the North Carolina Housing Financing Agency (HFA), which in turn allocate the credit to project developers who agree to lower project rents for low-income tenants.

In 1999, North Carolina authorized a State income tax credit modeled after the federal housing credit. To benefit from the credit, a project developer had to sell the tax credits to receive funds to finance the project; developers indicated that the State tax credit sold for no more than 45 cents on the dollar. In 2002, the General Assembly changed the State credit so that a taxpayer may elect

[25] The premium tax rate for medical service corporations was increased from 1% to 1.9%, effective January 1, 2004. (S.L. 2003-284)

to receive the credit in the form of either a credit against tax liability or a loan generated by transferring the credit to the HFA in return for a 0% interest 30-year balloon loan equal to the credit amount.[26] Neither a tax refund generated by the credit nor a loan received as a result of the transfer of the credit is considered taxable income by the State. Although a State tax refund would be considered taxable income by the IRS if the taxpayer itemizes deductions, a private letter ruling from the IRS provides that the loan proceeds would not.

The purpose of the 2002 changes was to promote efficiency and cost savings. The modified credit eliminated the need to sell the credit and ensured that each State dollar dedicated for low-income housing is used to develop that housing. It is saving the State revenue over a five-year period while maintaining the same level of investment in low-income housing developments.[27] The innovative approach adopted by the General Assembly in 2002 has received a national award. The HFA found that in 2003 the percentage of federal credits used to develop projects in rural counties rose from about 25% to about 50% and it found that all urban projects have some units affordable to families below 30% of the median income for the area. The HFA also notes that the federal credits have become attractive to more purchasers since the buyer does not need to also purchase a state credit. The resulting higher prices for federal credits increase the amount affordable housing for North Carolina.

Part 5: Sales Tax Clarification

During the 2nd Extra Session of 2003[28] the General Assembly created an annual refund of State and local sales taxes paid on construction materials and fixtures for facilities that involve the investment of more than $100 million by the taxpayer and are primarily used for either of the following two industries:

- Bioprocessing
- Pharmaceutical and Medicine Manufacturing and the Distribution of Pharmaceuticals and Medicines.

The refund became effective for sales taxes paid on or after January 1, 2004. The taxpayer must apply for the refund within six months after the end of the State's fiscal year. If, after obtaining a refund, the taxpayer does not end up investing the required amount, the taxpayer forfeits the refund.

Part 5 of this act clarifies that the sales tax refund is allowed only for materials and fixtures purchased during the initial construction of the facility and not for purchases made for subsequent repairs, renovation, or equipment replacement.

Part 6: Maintain Current Sales Tax on Electricity Used by Manufacturers

Generally, electricity that is sold to a manufacturer for use at a manufacturing facility and is separately metered or measured is subject to the sales and use tax at a rate of 2.83%. Most other

---

[26] Owners of all but one of the 51 rental developments awarded federal credits in 2003 elected to use the State credit as part of their funding. All 50 project developers chose the loan option.

[27] From 2000 to 2002, the State housing credit leveraged $420 million of rental development. A total of 120 projects with 5,900 units were awarded $140 million of State housing credits for an average of $24,000 per unit in State investment. In 2003, the credit leveraged $197 million of rental development. A total of 49 projects with 2,336 units were awarded $33.2 million of State housing credit for an average of $14,200 per unit of State investment.

[28] S.L. 2003-435.

sales of electricity are taxed at the rate of 3%. In 2001, the General Assembly reduced to 0.17% the sales tax rate on electricity sold to manufacturers that use more than 900,000 megawatt-hours of electricity annually, effective January 1, 2002.[29] As part of the 2001 legislation, the General Assembly also established a rate schedule that would reduce the sales tax on electricity sold to manufacturers who use more than 5,000 megawatt-hours annually but less than 900,000, effective July 1, 2005.[30]

Part 6 of this act repeals the 2001 legislation, effective October 1, 2004. The taxation of electricity used by manufacturers will remain at the rate of 2.83%. At the time this act was enacted, there were no manufacturers in the State that used a volume of electricity annually to qualify for the 0.17% rate.[31] This part also provides that electricity sold to an aluminum smelting facility for use in connection with the operation of that facility and measured by a separate meter or measuring device would be taxable at 0.17%. The provision establishing the lower rate for an aluminum smelting facility sunsets for sales made on or after October 1, 2007. At this time this act was enacted, the State did not have an aluminum smelting facility. Aluminum smelting facilities use a high volume of electricity and would have been eligible for the former 0.17% rate repealed by this part. Thus, the retention of a lower sales tax rate for an additional three years encourages the operation of such a facility in North Carolina.

Part 7: Family Court Fees

Part 7 of this act authorizes the Administrative Office of the Courts (AOC) to charge a fee to persons receiving services of a supervised visitation and exchange center through a family court program. These centers provide a safe pick-up and drop-off place for custody exchanges between estranged parents. There are only a few of these centers in North Carolina. Before the enactment of this act, the programs were funded by federal Violence Against Women Act funds. With that funding, the centers were able to serve only families with a history of domestic violence. This act will allow some centers to broaden their reach to serve other clients involved with custody issues.

The fee may not exceed $30 per hour and the Director of the AOC may establish a procedure for a person to apply for a reduction in the fee, based upon the person's ability to pay as a result of indigence, status as a victim of domestic violence, or other circumstances. The fee revenue will be used to support the continued operation of these centers. The use of the services is permissive.

[30]

Megawatt-hours used annually	Rate
5,000 or less	2.83%
Over 5,000 and up to 250,000	2.25%
Over 250,000 and up to 900,000	2.0%
Over 900,000	.17%

[31] The only manufacturer that used this volume of electricity at the time the General Assembly changed the law in 2001 was the aluminum manufacturer, Alcoa.

AN ACT TO MODIFY THE CURRENT OPERATIONS AND CAPITAL APPROPRIATIONS ACT OF 2003 AND TO MAKE OTHER CHANGES IN THE BUDGET OPERATIONS OF THE STATE.

OVERVIEW, EFFECTIVE DATES, AND FISCAL IMPACT:

Part	*Description and Effective Dates*	*Fiscal Impact*
32B	**Sales Tax Refunds and Exemptions** **Refunds –** Expands the refund of State and local sales and use taxes paid on construction materials and fixtures for certain industrial facilities in three ways: • Reduces from $100 million to $50 million the required investment amount for refund eligibility if the facility is located in a tier one, two, or three area, effective January 1, 2004. • Expands the list of eligible industries to include manufacturing of aircraft, computers, motor vehicles, and semiconductors, effective July 1, 2004, until July 1, 2009. • Clarifies what items are eligible for the sales and use tax refund, effective October 1, 2004. **Exemptions** – Exempts the following items from the sales and use tax. Except as otherwise noted, each exemption is effective October 1, 2004. (1) Tangible personal property sold to interstate air business that becomes component part or is dispensed into commercial aircraft. (2) Plastic mulch and plant bed covers sold to a farmer for agricultural purposes. (3) Delivery charges for direct mail. (4) Sales to a professional land surveyor of tangible personal property on which custom aerial data is stored. (5) Free distribution periodicals, effective July 1, 2005.	**Refunds** – The expansion of this refund will reduce General Fund revenues by $2.4 million in FY 2004-05 and by $4.6 in FY 2005-06. **Exemptions** - (1) FY 2004-05: -$2 million FY 2005-06: -$2.7 million (2) FY 2004-05: -$400,000 FY 2005-06: -$500,000 (3) FY 2004-05: -$300,000 FY 2005-06: -$400,000 (4) FY 2004-05: -$100,000 FY 2005-06: -$100,000 (5) FY 2005-06: -$4.6 million The total loss to the General Fund for these sales tax refunds and exemptions will be $4.7 million in FY 2004-05 and $7.4 million in FY 2005-06.

Part	*Description and Effective Dates*	*Fiscal Impact*
32C	**Qualified Business Investment Credit** Increases from $6 to $7 million the total amount of all qualified business investment credits that may be taken each year and extends the sunset on the credit from 2007 to 2008. Effective for investments made on or after January 1, 2004.	There is no fiscal impact in FY 2004-05, but the change will reduce General Fund revenues by $1 million in FY 2005-06.
32D	**Research and Development Tax Credit** Creates a new research and development tax credit as an alternative to the Bill Lee R&D credit. Effective May 1, 2005 and sunsets in 2009.	This new credit will reduce General Fund revenues as follows: FY 2004-05: $4.5 million FY 2005-06: $18.5 million FY 2006-07: $22 million FY 2007-08: $23.4 million FY 2008-09: $24.7 million
32F	**Insurable Interest of Charitable Organizations** Deems certain entities that are formed, in part, for the purpose of generating funds for charitable organizations to have an insurable interest in an individual's life and allows those entities to invest in pools of life insurance, as long as at least part of the proceeds is directed to charitable organizations. Effective July 20, 2004 and sunsets October 1, 2007.	No fiscal information available.
32G	**Job Development Investment Grant Program** • Extends from 2005 to 2006 the sunset of the Job Development Investment Grant (JDIG) Program. • Increases from 15 to 25 the number of agreements that the Economic Investment Committee (EIC) may enter into each year, effective July 20, 2004. • Increases from $10 million to $15 million the maximum annual availability that the EIC may commit under the program, effective January 1, 2004. • Makes various administrative changes such as clarifying that the	The expected reduction in General Fund revenues is $500,000 for FY 2004-05 and approximately $20 million in FY 2005-06.

Part	Description and Effective Dates	Fiscal Impact
	JDIG agreements are binding, changing the date and required contents of annual reports, and requiring that agreements include a provision encouraging the use of small businesses headquartered in North Carolina. Except for the clarification that the agreements are binding, which is retroactive to October 1, 2002, these changes became effective July 20, 2004.	

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)

ANALYSIS:

Part 32B: Sales Tax Refunds and Exemptions

During the 2003 2nd Extra Session, the General Assembly created an annual refund of State and local sales taxes paid on construction materials and fixtures for facilities that involve the investment of more than $100 million by the taxpayer and are primarily used for either of the following two industries:

- Bioprocessing
- Pharmaceutical and Medicine Manufacturing and the Distribution of Pharmaceuticals and Medicines.

The taxpayer must apply for the sales tax refund within six months after the end of the State's fiscal year. The refund became effective for sales taxes paid on or after January 1, 2004. If, after obtaining a refund, the taxpayer does not end up investing the required amount, the taxpayer forfeits the refund.

Section 32B.1 of this act expands that refund in three ways. First, if the facility is located in an enterprise tier one, two, or three area, a taxpayer is eligible for the refund if the taxpayer had an investment of at least $50 million in the facility rather than $100 million as was required under the 2003 law. This change is effective for sales occurring on or after January 1, 2004. Second, this act expands the list of eligible industries to include aircraft manufacturing, computer manufacturing, motor vehicle manufacturing, and semiconductor manufacturing, effective July 1, 2004, and sunset effective July 1, 2009. Third, the act makes some clarifying changes regarding what items are eligible for the sales tax refund, effective January 1, 2004.

Part 32B of this act also contains numerous sales and use tax exemptions. This act exempts the following things from the sales and use tax effective October 1, 2004:

- Tangible personal property that is sold to an interstate air business and becomes a component part of or is dispensed as a lubricant into commercial aircraft during its maintenance, repair, or overhaul. This exemption supplements an existing sales tax exemption for sales of aircraft lubricants, aircraft repair parts, and aircraft accessories to an interstate air courier or a passenger air carrier for use at the courier's or carrier's hub. The new exemption is broader in that it (1) eliminates the requirement that the items be for use at a hub, (2) allows the exemption for sales to an interstate freight carrier, and (3)

expands the types of property that are exempt. The new exemption is narrower in that it is limited to items related to commercial aircraft, which are large aircraft regularly used for carrying for compensation passengers, freight, or packages and letters.

- Plastic mulch and plant bed covers that are sold to a farmer for agricultural purposes.
- Delivery charges for delivery of direct mail if those charges are separately stated. Delivery charges, including postage, are taxable in North Carolina.[32] "Delivery charges" are those charges imposed by the retailer for preparation and delivery of personal property services to a location designated by the consumer. The proposed exemption is not required by the Streamlined Sales Tax Agreement for compliance, but is a permissible exemption. Before 2002, delivery charges were not taxable for in-state transactions subject to sales tax where the title to the property passed at the point of origin. Under the Streamlined Agreement, all delivery charges are included in the sales price of an item and therefore subject to tax. In order to conform to the Agreement, the General Assembly removed the sales tax exemption for delivery charges on in-state transactions, effective January 1, 2002.
- Sales to a professional land surveyor of tangible personal property on which custom aerial data is stored in digital form or is depicted in graphic form.

Section 32B.4 exempts certain free distribution periodicals from sales tax effective July 1, 2005. To qualify for the exemption, the periodical must be a publication that is published on a periodic basis at recurring intervals monthly or more frequently, is free, and is distributed in any manner other than by mail.

Under current law, supplies (paper, ink, and other tangible personal property) sold for free publications are subject to sales and use tax. Before October 1, 1999, a sales tax exemption was given for sales of paper, ink, and other tangible personal property to commercial printers and publishers for use as component parts in free circulation publications that contained advertising of a general nature. The exemption applied to general shoppers guides, but not to more specialized guides, such as real estate guides, because the statute specifically required that the free circulation publication contain advertising of a general nature. The exemption was repealed because it was believed to be unconstitutional. The first amendment of the United States Constitution generally does not allow a state to discriminate between publications based on content. A 1987 U.S. Supreme Court decision held that a similar tax provision was unconstitutional.[33]

Part 32C: Qualified Business Investment Credit

The qualified business investment tax credit is allowed for an individual taxpayer who purchases the equity securities or subordinated debt of a qualified business venture, a qualified grantee business, or a qualified licensee business directly from that business. The credit is equal to 25% of the amount invested and may not exceed $50,000 per individual in a single taxable year. An

[32] At least one state Supreme Court has found that the United States Constitution prohibits the taxation of pass-through postage charges on catalogs and fliers mailed by a retailer (*H.J. Wilson Co. Inc. v. Mississippi State Tax Commission*). The court held that postage is an obligation of the federal government and that the state is constitutionally prohibited from taxing postage charges.

[33] In *Arkansas Writer's Project, Inc. v. Ragland*, 481 US 221, the United States Supreme Court invalidated an Arkansas sales tax scheme that taxed general interest magazines but exempted single topic printed material. The North Carolina tax exemption operated in the opposite manner: it taxed component parts used in single topic advertising publications but exempted component parts used in advertising publications that contained advertising of a general nature. Constitutionally, these distinctions appear meaningless.

individual investor may also claim the allocable share of credits obtained by "pass-through entities" of which the investor is an owner. Pass-through entities include limited partnerships, general partnerships, S corporations, and limited liability companies. The credit may not be taken in the year the investment is made. Instead, the credit is taken in the year following the calendar year in which the investment was made, but only if the taxpayer files an application with the Secretary of Revenue. Any unused credit may be carried forward for the next five years.

The total amount of credits allowed to all taxpayers for investments made in a calendar year may not exceed a maximum amount set in the statute. Part 32C of this act increases the maximum amount from $6 million to $7 million. The Secretary of Revenue calculates the total amount of tax credits claimed from applications filed. If the amount exceeds the maximum, then the Secretary allows a portion of the tax credits claimed by allocating the statutory maximum amount in tax credits in proportion to the size of the credit claimed by each taxpayer.

The credit was set to expire as of January 1, 2007. Part 32C of this act extends one year, until January 1, 2008.

Part 32D: Research and Development Tax Credit

Part 32D of this act creates a new research and development tax credit as an alternative to the Bill Lee research and development credit, which is set to expire along with the entire Bill Lee Act as of January 1, 2006. A taxpayer is not allowed to take both the new credit and the Bill Lee Act credit for the same activity.

The Bill Lee research and development tax credit uses the federal credit for research and development as its starting point. In order to be eligible for the research and development credit under the Bill Lee Act, a taxpayer must meet all of the general eligibility requirements of that Act. These include satisfying requirements related to employee wages, the principal activity of the establishment, the provision of health insurance, the taxpayer's Occupational Safety and Health Act record, the taxpayer's environmental record, and the absence of overdue tax debts. Under the Bill Lee Act, the research and development credit may be applied against the income tax, the franchise tax, or the gross premiums tax. The amount of credit taken in a particular year may not exceed 50% of the liability for the tax against which it is claimed and any excess may be carried forward for 15 years.

The alternative credit created in this part, which becomes effective for expenses on or after May 1, 2005, differs from the research and development credit allowed under the Bill Lee Act in the following ways:

- Bill Lee limitations on the principal activity of the establishment at which the research and development is conducted do not apply. This change will make more taxpayers eligible for the new credit for research and development expenditures than for the existing Bill Lee Act credit.
- The taxpayer is not required to have no overdue tax debts. The taxpayer must still satisfy Bill Lee Act requirements related to employee wages, the principal activity of the establishment, the provision of health insurance, the taxpayer's Occupational Safety and Health Act record, and the taxpayer's environmental record.
- In the case of research and development conducted in North Carolina by a research university, the new credit is 15% of the amount the taxpayer paid to the university for the research and development.

- For other research and development, the new credit is based on North Carolina research and development expenditures rather than on an apportioned share of nationwide increases in expenditures. The rate is determined as follows:
    - For small businesses, the rate is 3%.
    - For research and development conducted in enterprise tiers one, two, or three, the rate is 3%.
    - For other research and development expenditures, the rate ranges from 1% to 3% as the amount of those expenditures increases.
- The new credit will sunset with the 2009 taxable year, rather than with the 2006 taxable year.

This part specifically sunsets the existing Bill Lee research and development credit January 1, 2006. Although the entire Bill Lee Act is set to sunset January 1, 2006, if that date is extended, this part provides that the Bill Lee Act research and development credit will nonetheless be repealed, allowing only one year of overlap with the new credit.

This part requires the Department of Revenue to make annual reports regarding the new credit to the Revenue Laws Study Committee and the Fiscal Research Division.

Part 32F: Insurable Interest of Charitable Organizations

In general, one must have an insurable interest in the life of another in order to purchase a life insurance contract on the life of that person. An "insurable interest" is a reasonable expectation of pecuniary benefit from the continued life of another. The concept of insurable interest has been developed, in part, in response to public policy concerns about wagering on the life or well-being of strangers or mere acquaintances. Under North Carolina law, an organization described in section 501(c)(3) of the Internal Revenue Code may have an insurable interest in an individual if that individual consents to the purchase or assignment of life insurance proceeds to that organization. This conclusion is supported by the argument that a charity could face a significant loss of revenue at the time of death of a key donor.

Part 32F of this act deems certain entities to have an insurable interest in an individual's life. In order to be deemed to have an insurable interest in an individual's life, an entity must satisfy all of the following conditions:

- The entity is a trust, business trust, corporation, limited liability company, or similar entity that is approved in writing by the individual as the beneficiary and owner of a life insurance policy and annuity contract on the life of the insured.
- The entity is formed for the purpose, in part, of generating funds for one or more charitable organizations described in section 501(c)(3) of the Internal Revenue Code.
- The payments to the entity under the annuity contract must be reasonably anticipated to fund the premiums on the life insurance policy beginning with the second year.
- Either each benefited charitable organization provides an affidavit to the entity stating that it has been in existence for at least three years and has at least $5 million in assets or the insured provides an affidavit to the entity stating that he or she is an accredited investor.

- The insured has provided an affidavit to the entity that neither the insured, a relative, or an entity controlled by the insured or a relative has received any monetary remuneration in connection with the consent to purchase the life insurance policy and annuity contract.
- Prior to the ownership or purchase of the life insurance policy and annuity contract, each benefited charitable organization is provided a written description of the minimum percentage or amount of the life insurance proceeds that is reasonably anticipated to be paid to the organization.

In essence, this change allows individual and institutional investors the opportunity to invest in pools of life insurance, as long as at least a portion of the proceeds is to be directed to charitable organizations. The provision will expire on October 1, 2007.

Supporters of this type of arrangement have argued that it provides a low cost, or no cost, way of directing current or future income to charitable organizations. Opponents of this type of arrangement have argued that it could pose a threat to the stability of the life insurance industry, that it is against public policy in that it promotes wagering on human life, and that the arrangement may harm individuals in that they may later be unable to obtain enough life insurance to meet their own personal needs.

Part 32G: Job Development Investment Grant Program

Part 32G of this act extends the sunset of the Job Development Investment Grant (JDIG) Program and allows the Economic Investment Committee to enter into more agreements and commit more funds under the program. It also clarifies that the JDIG agreements are binding, adds a requirement for an additional provision in each agreement, makes two technical corrections, and changes the date and required contents of annual reports.

The JDIG Program is an economic development incentive program that was created by the General Assembly in 2002. Under the program, grantee businesses are given a grant paid for a period of up to 12 years. The grant is based on a percentage of personal income tax withholdings from new positions created by the grantee business.

When the JDIG Program was created in 2002, the General Assembly put some significant limitations on the program in order to give the General Assembly time to evaluate it before a significant amount of funds had been committed. First, the General Assembly put a sunset on the ability of the Economic Investment Committee (EIC) to enter into new agreements under the program. The authority of the EIC to enter into new agreements did not begin until January 1, 2003, and was set to expire January 1, 2005. Second, the EIC could enter into no more than 15 new agreements each year. Third, the maximum annual liability for agreements entered into during any calendar year could not exceed $10 million.

Part 32G eases these three restrictions. First, the act extends the authority of the EIC to enter into new agreements by one year – until January 1, 2006. Second, the EIC is allowed to enter into a maximum of 25 new agreements a year rather than 15. Third, the cap on the maximum annual liability from grants entered into during any particular year is increased from $10 million to $15 million. These changes became effective July 20, 2004, when the bill was signed into law by the Governor.

In addition, this part makes several administrative changes requested by the Department of Commerce. It changes the date upon which reports under the program are due from the grantee business and the requirement that the grantee business submit a copy of its State and federal

returns each year. The reporting date is changed from February 1 to March 1. The grantee business is required to submit a copy of its State and federal tax returns only upon request of the EIC. The Department of Commerce has found that the federal and State tax returns provide little information that is directly relevant to the administration of the program. In addition, some grantee businesses have reported that their tax returns, particularly federal tax returns, are extremely voluminous. The Department felt that in most cases this requirement would be a burden on both the grantee business and the EIC and that it would yield little, if any, relevant information.

This part makes two technical corrections to the way employment is measured. In addition, it clarifies that commitments made under the JDIG program are binding commitments of the State and are not subject to annual appropriations.

This part requires each community economic development agreement to include a provision encouraging the business to contract with small businesses headquartered in North Carolina. The 2002 law already required agreements to contain several provisions encouraging, but not requiring, grantee businesses to act in certain ways. This provision expresses the desire of the State that the grantee businesses contract with local small businesses. This provision was a recommendation of the Joint Select Committee on Small Business Economic Development.

This part also contains language expressing the intent of the General Assembly that the EIC should give priority consideration for grants to projects located in less prosperous parts of the State. Finally, the part directs the chairs of the House and Senate Finance Committees to conduct a comprehensive, systematic study of the JDIG program and to report by April 1, 2005.

MODIFY YOUTH FACILITY DEBT AUTHORIZATION.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-126	**HB 1795**	**Representative Luebke**

AN ACT TO MODIFY THE AUTHORIZATION FOR SPECIAL INDEBTEDNESS FOR YOUTH DEVELOPMENT CENTERS.

OVERVIEW: This act modifies the 2003 authorization[34] for special indebtedness for youth development centers to reflect the changes in the project's scope and reduces the amount authorized from $6,780,000 to $4,460,000.

FISCAL IMPACT: The act generates General Fund savings because it reduces the debt amount authorized in 2003 by $2,320,000. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective when it was signed into law by the Governor on July 22, 2004.

ANALYSIS: Section 46A.2 of the 2003 Budget Act authorized issuance of up to $6,780,000 in special indebtedness[35] for the cost of design, construction drawings, and administrative funds for

[34] Section 46A.2 of S.L. 2003-284, the 2003 Budget Act.
[35] See the summary for S.L. 2004-179 for an explanation of special indebtedness.

solicitation of bids for up to three new juvenile Youth Development Centers and up to 500 beds and for utility work and site preparation for one of the three centers. The Department of Juvenile Justice and Delinquency Prevention (DJJDP) began preliminary planning using funds on hand soon after the 2003 Session. This planning process resulted in a consensus finding of DJJDP and its Advisory Council that the State should build smaller facilities located closer to a juvenile's family and local services. In 2004, DJJDP changed its recommendation to construction of up to 512 beds at up to 13 facilities.

The debt authorized in 2003 had not been issued when the 2004 Regular Session convened because DJJDP used internal funds to complete its preliminary planning. The Department of the State Treasurer and the State Bond Counsel indicated that before debt could be issued to continue the planning process, the language in the 2003 provision would have to be modified to reflect any expansion in project scope. This act makes those modifications by expanding the maximum number of facilities from 3 to 13 and the maximum number of beds from 500 to 512.[36]

This act does not authorize any new debt. It reauthorizes the same type of debt but at a lower amount due to the change in project scope and schedule. The act reduces the amount authorized from $6,780,000 to $4,460,000. The act restricts the use of these funds to design, construction drawings, and bid solicitation, repealing the original authorization for utility infrastructure and site work for one of the centers.[37] The reduced amount of $4,460,000 is the actual amount needed to complete all planning and design steps prior to starting construction according to the State Construction Office.

ELIMINATE IRB WAGE STANDARD.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-132	**SB 1063**	**Senator Hartsell**

AN ACT TO ELIMINATE THE WAGE STANDARD FOR INDUSTRIAL REVENUE BONDS.

OVERVIEW: This act eliminates the wage standard for industrial revenue bonds and directs the North Carolina Department of Commerce to encourage projects applying for these bonds to locate the projects in development zones. The Act was recommended by the Joint Select Committee on Economic Growth and Development.

FISCAL IMPACT: The Department of Commerce believes that the impact of the additional financing on State personal income tax collections (from the tax-exempt interest) will be insignificant, because practically all of the industrial revenue bonds are purchased by large nationwide mutual funds. Consequently, the share of the new projects held in mutual funds by North Carolina residents will be small.

[36] Section 16.3 of S.L. 2004-124, the 2004 Budget Act, outlines the type of planning and design information that DJJDP is required to submit to various committees before starting construction.

[37] The General Assembly determined that the cost of site work and infrastructure should not be authorized at the planning stage; it felt these costs should be included as part of construction costs. In S.L. 2004-179, the General Assembly authorized $35 million of special indebtedness for the construction of up to five youth development centers totaling up to 224 beds.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on July 29, 2004.

ANALYSIS: Industrial revenue bonds offer manufacturing companies long-term debt financing at interest rates substantially below the prime rate. Under the industrial revenue bond program in North Carolina, a local financing authority may enter into a financing agreement to provide revenue bond proceeds to a company engaged in some manner of manufacturing to be used only to finance capital expenditures such as fixed assets, land, buildings, new equipment, existing equipment, architects and engineer's fees, and issuance costs. The amounts payable by the company to the authority under the financing agreement must be sufficient to pay all of the principal and interest on the bonds. The bonds are tax-exempt, and do not constitute a debt of the State.

Prior to this act, the manufacturing company for whom the bonds were to be issued was required to pay an average weekly manufacturing wage that was either above the average weekly manufacturing wage in the county or was at least 10% above the average weekly wage in the State.[38] Upon the recommendation of the Joint Select Committee on Economic Growth and Development, the act eliminates this wage standard for industrial revenue bonds.[39] Several local economic developers, as well as the North Carolina Department of Commerce, recommended this change to the Joint Select Committee. Manufacturers and economic developers reported that it is often difficult to meet the wage standard because the companies that can most benefit from industrial revenue bond financing are often those in manufacturing sectors that pay lower wages than manufacturers as a whole. The Joint Select Committee believed that the removal of the wage standard from the industrial revenue bonds would help support small and medium-sized manufacturing companies that need to retool to remain competitive in the global market.

The act also directs the North Carolina Department of Commerce to encourage projects applying for industrial revenue bonds to locate the projects in development zones. Development zones are economically distressed areas located within cities.

DELAYS $ LIMIT ON CREDIT FOR PARTNERSHIPS.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-134	**HB 1602**	**Representative McComas**

AN ACT TO DELAY THE IMPOSITION ON PARTNERSHIPS OF THE DOLLAR AMOUNT LIMITATION ON THE CREDIT ALLOWED FOR REAL PROPERTY DONATIONS.

[38] The William S. Lee Quality Jobs and Business Expansion Act also requires certain taxpayers to meet a wage standard to be eligible for the credits under the Act. A taxpayer located in enterprise tiers three through five must pay at least 110% of the applicable weekly wage to be eligible for a credit.

[39] The Joint Select Committee on Economic Growth and Development is an interim committee consisting of 28 members appointed by the President Pro Tempore of the Senate and the Speakers of the House of Representatives. The Committee issued a report to the 2003 General Assembly and is to terminate upon the convening of the 2005 General Assembly.

Overview: This act was a recommendation of the Environmental Review Commission. It postpones from 2005 until 2006 the imposition on partnerships and limited liability companies of the dollar amount limitation on the credit allowed for real property donations and provides that the Revenue Laws Study Committee should study the credit.

Fiscal Impact: Assuming 20 donations per year, this act would result in a General Fund revenue loss of approximately $3.7 million annually. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

Effective Date: This act became effective when signed into law by the Governor on July 29, 2004.

Analysis: The income tax credits in G.S. 105-151.12 and G.S. 105-130.34 are allowed to individual and corporate taxpayers who make a qualified donation of an interest in North Carolina real property that is useful for conservation purposes. The tax credit is equal to 25% of the fair market value of the property donated to the State, a local government, or an entity that is both organized to receive and administer lands for conservation purposes and qualified to receive tax deductible charitable contributions. The credit for a corporation may not exceed $500,000. The credit for an individual may not exceed $250,000. Both corporate and individual taxpayers are allowed to carry forward for five years any unused portion of the credit.

In S.L. 2001-335, the General Assembly corrected and clarified the law governing allocation of partnerships' tax credits, so that any dollar amount limitation on a credit applies to the total credit allowed to a partnership. The limited amount is then allocated by the partnership among the partners on a proportional basis. Before this change, the limit applied separately to each partner. The 2001 act delayed this dollar amount limitation until 2005 for partnerships that are allowed a credit for real property donations. This act postpones for one more year the imposition of the dollar amount limitation on partners taking this credit. As a result, the maximum dollar amount limits on this credit will continue to apply separately to each partner until 2006.

This act also authorizes the Revenue Laws Study Committee to study the credit and report its findings to the 2005 General Assembly by February 1, 2005.

N.C. VINEYARD AMENDMENTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-135	**SB 74**	**Senator Rand**

AN ACT CONCERNING WINERY PERMITS.

Overview: This act redefines the terms "fortified wine" and "unfortified wine" and provides that ABC stores may continue to sell those wine products that met the definition of "fortified wine" before the change. This act also allows unfortified wineries to receive and sell wine produced under contract with the winery and allows those wineries to sell the contract wine at affiliated retail outlets.

Fiscal Impact: No estimate available. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

Effective Date: This act becomes effective October 1, 2004

<u>ANALYSIS:</u> Under North Carolina law before the enactment of this act, "unfortified wine" was defined as a wine that has an alcoholic content produced only by natural fermentation or by the addition of pure cane, beet, or dextrose sugar. "Fortified wine" was defined as any wine made by fermentation from grapes, fruits, berries, rice, or honey, to which nothing had been added other than pure brandy made from the same type of grape, fruit, berry, rice, or honey that is contained in the base wine, and which had an alcoholic content of not more than 24% alcohol by volume. The law made no distinction between unfortified wine and fortified wine on the basis of alcoholic content. This act changes the definitions of "unfortified wine" and "fortified wine" so that the distinction between the two is based solely on alcoholic content. Under this act, both unfortified wine and fortified wine are defined as any wine made by fermentation from grapes, fruit, berries, rice, or honey regardless of whether pure cane, beet, or dextrose sugar is added and regardless of whether pure brandy from the same type of grape, fruit, berry, rice or honey is added. Under the new definitions, the distinguishing feature between fortified and unfortified wine is the alcoholic content. Unfortified wine has an alcoholic content of less than 16% whereas fortified wine has an alcoholic content of between 16% and 24%. A wine that has an alcoholic content in excess of 24% continues to be classified as a spirituous liquor.

In North Carolina, unfortified wine is taxed at a rate of 21 cents per liter whereas fortified wine is taxed at a rate of 24 cents per liter. This act will change the classification of some products, resulting in a different rate of tax being imposed on those products.

Under North Carolina law before the enactment of this act, ABC stores were allowed to sell fortified wine in addition to spirituous liquor. This act contains a savings clause that allows ABC stores to continue to carry products that were classified as fortified wine by the ABC Commission prior to July 7, 2004, regardless of whether the products would have a sufficient alcoholic content to meet the new standard for fortified wine.

This act also allows the holder of an unfortified winery permit to receive and sell at the winery and at certain affiliated retail outlets unfortified wine produced under contract with the winery. The winery must also make this wine available to wholesalers. In general, the holder of an unfortified winery permit may manufacture unfortified wine and may sell, deliver, and ship the wine in closed containers to licensed wholesalers. The winery is allowed to make retail sales of wine "owned" by the winery if it obtains the appropriate permits. This act expands the class of wine that a winery may own and sell at retail and wholesale. Before the enactment of this act, under limited circumstances, the winery could also receive and sell at wholesale unfortified wine produced under the winery's label outside North Carolina from fruits owned by the winery.

Finally, this act restricts the ability of a holder of an unfortified winery permit to obtain a wine wholesaler permit. Under North Carolina law prior to the enactment of this act, the holder of an unfortified winery permit could obtain a wine wholesaler permit when that permittee had annual sales of less than 300,000 gallons of wine manufactured by it at the winery to people other than exporters or nonresident wholesalers. This act tightens that restriction by allowing a wine wholesaler permit only to those permittees that have annual sales of less than 100,000 gallons of wine manufactured by it at the winery to people other than exporters or nonresident wholesalers.

<u>RENEWABLE FUEL TAX CREDITS.</u>

Session Law	*Bill #*	*Sponsor*

S.L. 2004-153	HB 1636	Representative Tolson

AN ACT TO PROVIDE TAX CREDITS FOR DISPENSING AND PROCESSING RENEWABLE FUELS.

OVERVIEW: This act creates two new income or franchise tax credits for constructing renewable fuel facilities effective beginning in 2005: a 15% credit for a facility to dispense renewable fuel and a 25% credit for a facility to produce renewable fuel. Renewable fuel is defined as biodiesel or ethanol.

FISCAL IMPACT: Not determinable. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act is effective for taxable years beginning on or after January 1, 2005.

ANALYSIS: Article 3B of Chapter 105 of the General Statutes allows an income or franchise tax credit of 35% of the cost of constructing or purchasing renewable energy property, up to $250,000 per installation for non-residential property. Renewable energy property may include equipment for producing biodiesel or ethanol.

This act adds two new credits to Article 3B, a 15% credit for the costs of constructing a facility for dispensing renewable fuel and a 25% credit for the costs of constructing a facility for producing renewable fuel. Unlike the other Article 3B renewable energy property credit, these credits are not limited to a certain amount per facility. The dispensing credit must be taken in three annual installments and the production credit must be taken in seven annual installments. There is no double credit – the taxpayer must choose between any available credits and take only one with respect to the same costs.

Like the other credits in Article 3B, the new credits enacted by this act may be claimed against income tax or franchise tax. Each credit is limited to 50% of the amount of tax liability against which it is claimed. Any excess may be carried forward for up to five years. Although Article 3B is set to sunset January 1, 2006, the sunset for these two new credits would be 2008.

REVENUE LAWS TECHNICAL CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-170	**SB 1145**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL AND CONFORMING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES, TO CLARIFY THAT THE CREDIT FOR CREATING JOBS IS ALLOWED ONLY FOR NEW JOBS CREATED IN THIS STATE, AND TO PROHIBIT THE USE OF FUTURE ROOM TAX COLLECTIONS IN CERTAIN COUNTIES AND CITIES TO DEVELOP OR CONSTRUCT A HOTEL OR SIMILAR LODGING FACILITY.

OVERVIEW: This act makes three substantive changes and many technical and clarifying changes to the revenue laws and related statutes.

<u>FISCAL IMPACT:</u> The estate tax clarification in Section 4 is expected to cause a General Fund revenue gain of $5.4 million in fiscal year 2005-2006. *(For a more complete fiscal analysis, see Overview: <u>Fiscal and Budgetary Actions</u>, 2004 Session. Available in the Legislative Library.)*

<u>EFFECTIVE DATE:</u> Except as otherwise provided, the act became effective when signed into law by the Governor on August 3, 2004.

<u>ANALYSIS:</u> This act makes three substantive changes and makes the following technical and clarifying changes to the revenue laws and related statutes. The substantive changes are in Sections 16, 42, and 43. The Revenue Laws Study Committee recommended the changes in Sections 1-8, 9-22, and 33-39.

Section	Explanation
1	Clarifies that estate tax changes have uniform sunset date.
2	Supplies a missing cross-reference in the University of North Carolina self-liquidating bond legislation.
3	Reenacts the 2003 session law relating to ESC surtax delay, in order to correct a technical omission. Effective as of date 2003 act became law, August 12, 2003, and repealed when the 2003 act is repealed.
4	Clarifies that calculation of State estate tax without regard to federal phase-out and termination of federal credit for state death taxes includes disregarding the federal deduction that replaces the federal credit January 1, 2005. North Carolina's estate tax is calculated based upon the federal estate tax base. Effective January 1, 2005, federal law will allow a deduction for State death taxes paid in lieu of the previously allowed credit for State death taxes paid. To prevent a circular calculation for State estate tax purposes, Section 4 clarifies that the State estate tax is calculated without regard to the federal deduction. This clarification results in an addition to the federal taxable estate for North Carolina estate tax purposes that is equal to the amount of the federal deduction for State death taxes paid. The estates affected by the enactment of this section are those for deaths occurring between January 1, 2005, and June 30, 2005. Effective July 1, 2005, the North Carolina will estate tax will sunset unless the General Assembly enacts legislation.
5	Deletes obsolete provisions.
6	Deletes definition of term no longer used in statutes.
7	Corrects grammatical issue.
8	Updates terminology in controlled substance tax law and clarifies provision complying with Fifth Amendment protection against self-incrimination.
8.1	Clarifies the mechanism for calculating the franchise tax on LLC assets attributed to a controlling corporation.
9	Adds cross-reference to defined term.
10	Provides that Bill Lee Act health insurance requirement begins when jobs are created or when qualifying investment is made and continues when credit, installment, or carryforward is claimed. Before this change, the statute referred only to when installment or carryforward is claimed. This change conforms to the current practice of the Department.
11	Clarifies that Bill Lee Act tax debt requirement begins when credit is claimed and continues when installment or carryforward is claimed. Before this change, the statute referred only to when installment or carryforward is claimed.

Section	Explanation
12	Delays report deadline by one month in order to allow time for quality of report to be improved.
13	Clarifies that loss of the Bill Lee machinery and equipment tax credit because property is disposed of is the same if the property is taken out of service or moved out of state.
14	Corrects incorrect cross-reference
15	Updates terminology. In 1977, the Federal Energy Regulatory Commission replaced the Federal Power Commission established in 1920. It is responsible for issuing licenses for the development of water and electrical power and prohibiting operators from restricting output or restraining trade in electrical energy.
16	Provides that in determining whether a taxpayer is eligible for the new tobacco export credit, positions located within North Carolina for six months or less are not considered to be part of the taxpayer's employment level. Eligibility is based on maintaining an employment level that exceeds by a certain amount the taxpayer's employment level at the end of 2004. Also corrects cross-references. Effective on the same dates as the new credit it amends.
17	Deletes cross-reference to repealed statute.
18	Clarifies the prepared food definition exception for food that is sliced, repackaged, or pasteurized by the retailer.
19	Restores provision inadvertently deleted in earlier legislation.
20	Corrects erroneous language.
21	Removes extraneous language that resulted from redlining conflicts between two laws enacted in 2003. Effective on same date as 2003 laws, July 1, 2004.
22	Corrects cross-reference.
22.5	Clarifies prohibition against using debt collection fee for any purpose not directly related to collecting overdue tax debts. If the fee were used for another purpose, it would be a penalty and all proceeds would be required by the Constitution to go to public schools.
23	Restores reference to the Division of Motor Vehicles that was inadvertently deleted from secrecy provision by 2003 legislation.
24	Removes administration option that is not used and is not allowed by the International Fuel Tax Agreement, which North Carolina has followed since 1992.
25	Clarifies when penalty applies and expands who the penalty is paid to, in order to reflect recent reorganization of the Division of Motor Vehicles.
26	Modernizes language.
27	Adds additional examples of fuels included in definition of diesel fuel. This definition applies in the fuel tax and inspection tax statutes.
28	Extends to letters of credit the condition requirements that apply to bonds.
29	Provides that licensee rather than Department of Revenue will make extra copies of license when there is more than one place of business.
30	Clarifies that biodiesel and all fuel alcohols are treated the same as fuel grade ethanol. This change conforms to the practice of the Department of Revenue.
31	Corrects incorrect terminology.
32	Adds missing reference to Mecklenburg one-cent sales tax.
33	Corrects incorrect terminology.
34	Conforms cross-references to reflect statutes repealed and added in 2003.

Section	Explanation
35	Provides that the property tax subcommittee of the Revenue Laws Study Committee may consist of up to eight members.
36	Conforms the date for filing a local occupancy tax return to the recently amended date for filing a monthly sales tax return. The provision is intended to conform both the filing date and the payment date. Effective October 1, 2004.
37	Conforms title of Article to reflect addition of Part 3 in 2003.
38	Clarifies that county economic development and training districts are special tax areas authorized by Section 2(4) of Article V of the N.C. Constitution.
39	Conforms purposes for which economic development and training district taxes may be levied to match the purposes for which the districts may be created.
40, 41	Codifies uncodified portions of a 1987 Session Law and reorganizes the codified portions of the same law.
42	For local occupancy taxes subject to the uniform provisions for occupancy taxes, this section prohibits the use of the tax proceeds to develop or construct a hotel or similar facility.[40] The rationale for this change is that local occupancy taxes collected by hotels and motels should not be used to subsidize their competitors. This change applies only to future collections of tax. The change does not affect Wake or Mecklenburg County. It affects only those local governments that are subject to the uniform provisions governing occupancy taxes. The governments covered by the uniform provisions as of August 2004 are listed below: Anson, Brunswick, Buncombe, Cabarrus, Camden, Carteret, Craven, Cumberland, Currituck, Dare, Davie, Durham, Granville, Madison, Montgomery, Nash, New Hanover, Pender, Person, Randolph, Richmond, Rowan, Scotland, Stanly, Transylvania, Tyrrell, Vance, and Washington Counties. The Cities of Gastonia, Goldsboro, Greensboro, High Point, Kings Mountain, Lexington, Lincolnton, Lumberton, Monroe, Mount Airy, Shelby, Statesville, Washington, and Wilmington, the Towns of Beech Mountain, Blowing Rock, Carolina Beach, Carrboro, Kure Beach, Jonesville, Mooresville, North Topsail Beach, Selma, Smithfield, St. Pauls, Wilkesboro, and Wrightsville Beach, and the municipalities in Avery and Brunswick Counties.
43	Amends the Bill Lee Act credit for creating new jobs to allow the credit only for jobs created in a taxable year that represent a net increase over the number of North Carolina employees the taxpayer had during the 12 months preceding the taxable year. If the taxpayer cut jobs in one year and then added jobs in the next year, the credit would be allowed only to the extent of a net increase over the previous year. Effective beginning with the 2004 tax year.

EXEMPT HIGHER ED. PROPERTY.

Session Law	*Bill #*	*Sponsor*

[40] Section 60 of S.L.2004-199, 2004 Technical Corrections, amended this section by deleting the phrase 'directly or indirectly'.

S.L. 2004-173	SB 277	Senator Rand

AN ACT TO EXEMPT FROM PROPERTY TAX EDUCATIONAL PROPERTY HELD BY A NONPROFIT ENTITY FOR A PUBLIC OR PRIVATE UNIVERSITY OR COMMUNITY COLLEGE LOCATED IN NORTH CAROLINA.

OVERVIEW: This act expands the property tax exemption for educational property by (1) exempting property held by a nonprofit entity for the sole benefit of a public or private university located in the State, a community college, or a combination of these entities and (2) expanding the definition of educational purposes to include the operation of a student housing facility or a student dining facility.

FISCAL IMPACT: The act does not affect General Fund revenues. It may result in a local government revenue loss. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act is effective for taxes imposed for taxable years beginning on or after July 1, 2004.

ANALYSIS: This act expands the property tax exemption for educational institutions to include real property owned by a non-profit entity for the sole benefit of any one or more of the following:

- A constituent or affiliated institution of The University of North Carolina.
- An institution as defined in G.S. 116-22 which includes an institution with a main permanent campus in the State that is not owned or operated by the State and is accredited by the Southern Association of Colleges and Schools, awards a postsecondary degree, and is not a seminary, Bible school, Bible college or similar religious institution.
- A community college.

To be exempt, the property must be exclusively used for an educational purpose. An "educational purpose" is defined as one that has as its objective the education or instruction of human beings, or comprehends the transmission of information and the training or development of knowledge or skills of individual persons. The term specifically includes the operation of a golf course, tennis court, sports arena, similar sports property, or similar recreational sport property for the use of students or faculty, regardless of the extent to which the general public uses the property. This act amends the definition of "educational purpose" to include the operation of a student housing facility or a student dining facility.

FINANCE VITAL PROJECTS/STUDIES.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-179	**HB 1264**	**Representative Miner**

AN ACT TO AUTHORIZE THE ISSUANCE OF SPECIAL INDEBTEDNESS TO FINANCE VITAL STATE FACILITIES FOR HEALTH CARE AND BIOTECHNOLOGY RESEARCH, TO CREATE

THE DEBT AFFORDABILITY ADVISORY COMMITTEE, AND TO DIRECT THE BOARD OF GOVERNORS OF THE UNIVERSITY OF NORTH CAROLINA AND THE STATE BOARD OF COMMUNITY COLLEGES TO CONTRACT WITH A PRIVATE CONSULTING FIRM TO STUDY UNIVERSITY AND COMMUNITY COLLEGE PROGRAMMING AND CAPITAL NEEDS.

OVERVIEW: This act does all of the following:

- Authorizes the State to use special indebtedness to finance construction of five new projects in the University of North Carolina (UNC) system and land acquisition and planning for five other projects in the UNC system.
- Authorizes the State to use special indebtedness to finance construction of up to five youth development centers.
- Requires the Health and Wellness Trust Fund and the Tobacco Trust Fund[41] each to transfer to the General Fund annually one-half the estimated debt service on the UNC and youth facility indebtedness. The amount transferred each fiscal year is capped at 30% of the trust fund's receipts through 2006-2007 and 65% beginning in 2007-2008.
- Authorizes the State to use special indebtedness for capital projects (1) for the State Parks System, (2) for parks, recreation, and the preservation of natural heritage, and (3) for clean water conservation. Repayment of the debt for these purposes would be made from existing revenue streams dedicated to the Parks and Recreation Trust Fund, the Natural Heritage Trust Fund, and the Clean Water Management Trust Fund, respectively. The authorization is limited to a total of $45 million: $20 million to acquire land near military bases and $25 million for land acquisition for new and existing State parks and gamelands and capital improvements for existing State parks.
- Requires the Parks and Recreation Authority to allocate funds from the Trust Fund with a geographic distribution across the State to the extent practicable.
- Clarifies that revenue in the trust funds is annually appropriated for the purposes for which expenditures are authorized.
- States the intent of the General Assembly that the purposes for which parks, heritage, and clean water indebtedness may be incurred include, as a high priority, acquiring land near military bases to prevent encroachment.

---

[41] In late 1998, forty-six states and several U.S. territories reached an agreement to settle the lawsuits they had filed against the major cigarette manufacturers. The terms of the settlement were incorporated into an agreement known as the Master Settlement Agreement. The Master Settlement Agreement contractually imposes some restrictions on tobacco marketing and requires the tobacco companies to make annual payments to the states. As part of the North Carolina consent decree, the judge (at the request of the Attorney General) awarded 50% of the settlement funds to the State's Settlement Reserve Fund and 50% to a nonprofit corporation, the Golden L.E.A.F. Foundation, that will assist tobacco-dependent and economically-affected communities. The 50% that is paid to the Settlement Reserve Fund is divided equally between the Health and Wellness Trust Fund and the Tobacco Trust Fund.

- Provides that none of the parks, heritage, and clean water debt proceeds may be used to acquire property by eminent domain.
- Creates a Debt Affordability Advisory Committee, which would be responsible for preparing an annual debt affordability study and establishing guidelines for evaluating the State's debt burden.
- Directs the UNC Board of Governors and the State Board of Community Colleges to contract with a consultant to study higher education program and facility needs.[42]
- Enacts a statutory framework for a new type of State special indebtedness called "RECOP indebtedness," which would involve lower debt service payments during the term of the debt in exchange for a larger payment due at maturity. RECOP indebtedness could not be issued unless the General Assembly enacted legislation specifically providing for the projects or refunding to be financed with RECOPs.
- Directs the Treasurer to study RECOP indebtedness and report to the Joint Legislative Commission on Governmental Operations by February 1, 2005.

FISCAL IMPACT: The net General Fund cost is expected to be zero because the act requires the annual transfer of revenue from other sources to the General Fund in an amount to cover the estimated debt service. The maximum annual debt service is $47.4 million in fiscal year 2010-2011. The total interest on the $468 million of debt is $310.2 million. The annual debt service amounts are affected by the cash flow needs of each project as well as the $310 million limit on the amount of debt that may be issued during the 2004-2005 fiscal year. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: Except as otherwise indicated, this act became effective when signed into law by the Governor on August 5, 2004.

ANALYSIS: This act authorizes the State to issue up to $468 million of special indebtedness to finance various capital projects; no more than $310 million of the special indebtedness may be issued during the 2004-2005 fiscal year. The debt service for the UNC System facilities and the Youth Development Centers will be reimbursed from the Health and Wellness Trust Fund and the Tobacco Trust Fund. The debt service for the Parks, Natural Heritage, and Clean Water management projects is fully funded by the streams of revenue available to the Parks and Recreation Trust Fund, the Natural Heritage Trust Fund, and the Clean Water Management Trust Fund.

Health, Education, and Youth Facilities

This act authorizes the issuance of special indebtedness for constructing the following capital projects:

Purpose	Amount in Millions
Cancer Center at UNC-Chapel Hill	$180
Cardiovascular Institute at Eastern Carolina University	60
Bioinformatics Center at UNC-Charlotte	35

[42] See Section 51 of S.L.2004-199, the 2004 Technical Corrections.

Facility for Pharmacy Program at Elizabeth City State University	28
UNC-Asheville Health Center	35

It also authorizes the issuance of special indebtedness for land acquisition, site preparation, and planning for the following capital projects:

Purpose	Amount in Millions
Fayetteville State University Teaching/Nursing Center	$10
North Carolina A&T/UNC-Greensboro Millennial Campus	10
Optometry School at UNC-Pembroke	10
Western Carolina University for joint Health & Aging Center	10
Winston-Salem State University/School of Arts Design Center	10

In addition to the issuance of $388 million of special indebtedness authorized for higher education projects, the act authorizes the issuance of up to $35 million of special indebtedness to construct up to five youth development centers. The timing for the issuance of the debt for these purposes is limited so that no more than $278 million in debt can be issued before July 1, 2005. The remainder can be issued on or after that date.

The act provides that a portion of the funds available to the Health and Wellness Trust Fund[43] and the Tobacco Trust Fund[44] will be used to reimburse the General Fund each year for debt service on the UNC and youth facility debt. Each trust fund is required to transfer to the General Fund annually one-half of the debt service amount certified by the Treasurer. The required transfer from each trust fund is capped, however, at a percentage of current year receipts. The percentage is 30% through 2006-2007 and then increases to 65% in 2007-2008. The cap allows the trust funds to retain a portion of their funding to develop future programs and award grants.[45] These provisions became effective July 1, 2004.

Commonly referred to as "certificates of participation," special indebtedness is nonvoted debt that maybe secured only by an interest in State property being acquired or improved. There is no pledge of the State's faith and credit or taxing power to secure the debt. Thus, voter approval is not necessary for the borrowing. If the State defaulted on its repayments, no deficiency judgment could be rendered against the State, but the State property that serves as security could be disposed of to generate funds to satisfy the debt. The State could choose not to appropriate funds to repay the debt, but such a decision would have negative consequences for the State's credit rating.

The term "special indebtedness" is employed to cover the three forms that this type of debt can take: installment purchase (with or without certificates of participation), lease-purchase (with or

[43] The Health and Wellness Trust Fund receives annual tobacco settlement payments to be used to improve the health and wellness of North Carolinians. In order to build up a fund reserve for future projects, the governing body of the Trust Fund has been required to reserve 50% of each annual payment since 2001. This act eliminates the requirement that 50% of the Trust Fund's annual receipts be reserved.

[44]The Tobacco Trust fund receives annual tobacco settlement payments to be used to assist tobacco producers, tobacco allotment holders, and persons engaged in tobacco related businesses.

[45] The Tobacco Trust Fund awards grants on an annual basis based on availability of funds. The bulk of the Heath and Wellness Trust Fund's current commitments is the Senior Cares prescription drug program; this program is scheduled to terminate in fiscal year 2005-2006 at which time the Medicare senior prescription drug program will be available for seniors.

without certificates of participation), and bonds. The particular form to be used for a given project will depend on its size, the nature of the property and the improvement, and other circumstances. Based on these circumstances, one form or another of special indebtedness may be the least expensive and most practical for the State to utilize. Article 9 of Chapter 142 of the General Statutes prohibits the issuance of special indebtedness except for projects specifically authorized by the General Assembly.

Before special indebtedness could be issued or incurred, the State Treasurer must certify that debt financing may be desirable for a specific project presented to it by the Department of Administration. Next, the Council of State must give preliminary approval. If preliminary approval is obtained, the Council of State must give final approval, setting out details such as the maximum amount to be financed, the maximum maturity, and the maximum interest rates. The maximum maturity may not exceed 40 years. The State Treasurer must approve the details of the financing, finding that the amount to be borrowed is adequate and not excessive and will not require an excessive increase in any State revenues to provide for repayment, and that the special indebtedness can be incurred or issued on terms favorable to the State. Finally, the State Treasurer must report to the Joint Legislative Commission on Governmental Operations at least five days before any special indebtedness is issued or incurred.

Parks Renovation and Acquisition

The act authorizes the State to issue or incur up to $45 million of special indebtedness to finance the acquisition of property for three programs:

- The Parks and Recreation Trust Fund for repairs and renovations of park facilities and capital projects and land acquisition for the State Parks System.
- The Natural Heritage Trust Fund to acquire land that represents the ecological diversity of the State and land for State parks, wildlife areas, and similar public purposes.
- The Clean Water Management Trust Fund for capital projects to acquire riparian buffers, acquire property interests to conserve surface water and drinking water supplies, coordinate with other public programs for lands adjoining water bodies, and restore the ability of degraded lands to protect water quality.

The proceeds of the indebtedness may not be used to acquire property by eminent domain. The act states the intent of the General Assembly that the purposes for which the debt proceeds may be used include, as a high priority, acquiring land near military bases to prevent encroachment.

The amount of debt that may be incurred is limited to the lesser of a dollar amount for each purpose authorized and the amount that can be supported by the funds set aside from the three Trust Funds for annual debt service payments. The three trust funds will have to work together to keep the total debt below the maximum dollar amounts for the authorized projects, which are as follows:

$20 million	Acquire property near military bases to prevent encroachment
$25 million	Land acquisition for existing and new State parks and capital projects for an existing State park

The timing for the issuance of the debt for these purposes is limited so that no more than $32 million in debt can be issued before July 1, 2005. The remainder can be issued on or after that date.

These three Trust Funds have dedicated revenue sources. The Parks Fund and the Natural Heritage Fund both receive a stream of revenue from the State excise tax on conveyances (the "deed stamp tax") and from vanity license plate fees. The Clean Water Management Trust Fund receives a statutory annual appropriation of $100 million. This act authorizes the governing body of each Fund to allocate a portion of its stream of income for debt service on debt incurred to acquire property.[46]

In the case of the Parks and Recreation Trust Fund, the Authority can allocate up to 50% of the two-thirds portion of their income designated for repairs and renovations of park facilities and capital projects and land acquisition for the State Parks System for debt service. The Authority may not allocate any of the income currently designated for local government grants or for beach access. In addition to authorizing use of a portion of the Fund for debt service, the act also requires any allocations from the Fund to be geographically distributed across the State to the extent practicable. Under prior law, the governing body of the Fund had to 'consider' geographic distributions across the State to the extent practicable.

In the case of the Natural Heritage Trust Fund, up to 50% of the annual receipts may be allocated for debt service. In the case of the Clean Water Management Trust Fund, the $45 million cap on outstanding debt automatically limits the allocation to a small fraction of the annual income stream.

The governing body of each trust fund can select a project and allocate a portion of the fund's revenue stream for special indebtedness to finance the project. Once the debt is issued, the governing body is required to credit the debt service amount to the General Fund each year.

Debt Affordability Advisory Committee

The act creates a Debt Affordability Advisory Committee to annually advise the Governor and the General Assembly on the estimated debt capacity of the State for the upcoming 10 fiscal years. The Committee must undertake an annual debt affordability study and establish guidelines for evaluating the State's debt burden.

The Committee consists of the State Treasurer, the Secretary of Revenue, the State Budget Officer, the State Auditor, the State Controller, and four members of the public – two appointed by the President Pro Tempore of the Senate and two appointed by the Speaker of the House of Representatives. The State Treasurer serves as the chair of the Committee and the Committee meets upon the call of the chair. The Committee must report its findings and recommendations to the Governor, the General Assembly, and the Fiscal Research Division by February 1 of each year.

In March 2003, the State Treasurer presented to the House and Senate Finance Committees a debt affordability study for North Carolina. The study evaluated the State's current and projected debt burden using indicators such as tax-supported debt to personal income, debt per capita, debt service to tax revenue, and rapidity of principal repayment ratios. The study recognizes that debt capacity is a limited and scarce resource and that an evaluation of the State's debt position can help policymakers evaluate the long-term impact of financing decisions and assist in prioritizing

[46]The three Trust Funds receive annual statutory transfers and/or appropriations that they are authorized to use for the purposes provided by statute. The Parks and Recreation Trust Fund statute specifically provides that the moneys in the trust fund are annually appropriated for those purposes. This act adds similar language to clarify that the moneys in the Natural Heritage Trust Fund and the Clean Water Management Trust Fund are also annually appropriated for the purposes authorized by statute.

capital spending. The State Treasurer also noted in the report that credit rating agencies consider a debt affordability study as a positive factor when they evaluate issuers and assign credit ratings. The State Treasurer published a revised debt affordability study in 2004.

Study of Higher Education Program and Facility Needs

The act directs the UNC Board of Governors and the State Board of Community Colleges to contract with a consultant to conduct a comprehensive study of the mission and programming needs for the UNC system and the Community Colleges system, and to study facility needs related to the identified program needs. The act specifically states that the historically Black colleges and universities and UNC-Pembroke are valuable and indispensable assets of the UNC system and should not be diminished or eliminated. The boards and their consultant are required to make periodic reports to a subcommittee created by the Joint Legislative Education Oversight Committee and submit to the Committee and the General Assembly a preliminary report by April 15, 2005, and a final report by December 31, 2005.

Statutory Framework for RECOPS

The act establishes the statutory framework for a new type of special indebtedness to be called Real Estate Certificates of Participation (RECOP) indebtedness. RECOP indebtedness is a form of special indebtedness that is intended to be structured so that the principal and a portion of the interest are not paid in installments over the term of the debt. That portion of the interest compounds and is payable, along with the principal, only at maturity or earlier redemption. This structure is intended to reduce ongoing debt service payments and provide for payment of the remaining obligation at a time when the property securing the debt will most likely have appreciated substantially in value.

Like other special indebtedness, RECOP indebtedness may be incurred only if the amount and specific purposes have been authorized in an act of the General Assembly. RECOP indebtedness differs from traditional special indebtedness in several ways:

- Special indebtedness may be incurred only for capital projects. RECOP indebtedness may be incurred to retire existing State debt as well as for capital projects.
- Special indebtedness may be secured only by the capital facilities being constructed, renovated, or repaired with the proceeds of the debt. RECOP indebtedness may be secured by these projects but may also be secured by any other State property. The property to serve as collateral would be selected by the Governor after first consulting with the Joint Governmental Commission on Governmental Operations. The choice of collateral must also be approved by the Council of State.
- State property law does not apply to a transfer of an interest in State property to secure special indebtedness or, in the case of default, to repay special indebtedness. With RECOP indebtedness, there is an additional exemption from State property law for transfers when the proceeds are used first to pay RECOP indebtedness, even if there is no default.

A major difference between RECOP indebtedness and the types of debt the State and local governments normally incur involves the payment of principal and interest. The usual practice is for the governmental entity to pay off the principal during the term of the debt while also paying interest. Normally, the outstanding principal balance declines relatively steadily during the term of the debt. With RECOP indebtedness, it is intended that no principal would be paid off during the term of the debt. In addition, it is intended that only part of the interest would be paid during the

term of the debt. Postponing these payments until maturity makes the debt service payments during the life of the debt much lower than with traditional debt. The entire principal becomes due at maturity along with that portion of the interest that was not paid in installments.

Treasurer Study

The act requires the State Treasurer to conduct a study of RECOP indebtedness. The act states that there may be circumstances in which the State would benefit from taking advantage of flexible financing tools such as RECOPs, but that more information is needed for the General Assembly to consider such a policy decision. The act directs the State Treasurer to study the effects of using RECOPs either for new projects or refunding outstanding debt and to report the results of the study and any recommendations by February 1, 2005, to the Joint Legislative Commission on Governmental Operations.

WETLANDS REIMBURSEMENT/LOCAL TAX BASE.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-188	**SB 933**	**Senator Hargett**

AN ACT TO REQUIRE STATE AND LOCAL GOVERNMENT AGENCIES THAT ACQUIRE LAND FOR WETLANDS MITIGATION TO REIMBURSE THE COUNTY IN WHICH THE LAND IS LOCATED FOR ITS LOST TAXES DUE TO THE ACQUISITION.

OVERVIEW: This act requires State and local government agencies that acquire land for wetlands mitigation in an enterprise tier one or tier two county to reimburse the county in which the land is located a sum equal to the estimated amount of property taxes that would have accrued to the county for the next 20 years. The requirement does not apply when the land purchased and the wetlands permitted to be lost are located in the same county.

FISCAL IMPACT: No General Fund impact. The Fiscal Research Division estimates the costs associated with this act to be $137,088 annually. Approximately 75% of this amount is expected to come from the Department of Transportation, with the balance drawn from the Wetlands Trust Fund. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective when it was signed into law by the Governor on August 17, 2004. It applies to transfers made on or after that date.

ANALYSIS: The Wetlands Restoration Program and Wetlands Trust Fund were established by the General Assembly in 1996 to restore wetlands[47] lost or impaired through human activities and to assist those who must meet wetlands mitigation requirements imposed by the United States Army Corps of Engineers as a condition of obtaining Section 404 permits for wetlands alteration.[48] Under federal environmental regulations, when wetlands are lost or impaired, other land in the

---

[47] Wetlands include pocosins, freshwater marshes, swamp forests, and bottomland hardwood forests.

[48] Section 404 of the United States Clean Water Act, which controls the placement of dredged or fill materials in the waters of the United States and adjoining wetlands, is the nearest thing to a national wetlands law.

same river basin or sub-river basin must be set aside to "make up" for the lost wetlands. This practice is referred to as compensatory wetland mitigation, and the State is subject to these federal requirements.

When a State agency or local government acquires wetlands for wetlands mitigation, that property becomes exempt from tax and is removed from the county's tax base. This act requires that the State and local governments reimburse a tier one or two county when they acquire[49] property within the county for the purpose of wetlands mitigation. The reimbursement amount is a sum that is equal to the estimated amount of property taxes that would have accrued to the county for the next 20 years had the land not been acquired by the State agency or local government. If a State agency acquires property in a county for future wetlands mitigation and later uses the property to mitigate wetlands permitted to be lost in the same county, then the county must return a portion of the reimbursement payment to the State. The amount reimbursed to the State agency is a percentage based upon the number of years the State agency held the land before the wetlands were lost.

The requirement for reimbursement does not apply to the condemnation or acquisition of land by a city or special district if the land is located in the corporate limits of the city or special district, or within the county where the city or special district is located. The reimbursement requirement also does not apply to land acquired by a State agency when the land purchased by the State agency and the wetlands permitted to be lost are located in the same county. Lastly, the governing board of the county and the State agency may agree in writing to waive the payment.

The act further provides that if a State agency acquires wetlands in a tier one or two county from a private mitigation banking company, the agency must pay a sum in lieu of property tax to the county where the wetlands are located. However, as a condition of accepting the donation from the private mitigation banking company, the State agency may require the company to make adequate provisions for the long-term maintenance and management of wetlands. These provisions may include reimbursement to the agency for payment of a sum in lieu of property taxes. A private mitigation banking company trades in properties that may be eligible as mitigation lands.

Historically, the primary State agency purchasers of wetlands mitigation properties have been the North Carolina Department of Transportation, making purchases to mitigate road activity, and the Wetlands Restoration Program. In 2003, the compensatory mitigation efforts of these two agencies were joined through a Memorandum of Agreement between the parties and renamed the "Ecosystem Enhancement Program".

NC CEMETERY ACT/FEES/BILL LEE TIERS.

Session Law	*Bill #*	*Sponsor*
S.L. 2004-202	**SB 1244**	**Senator Hoyle**

AN ACT AUTHORIZING THE NORTH CAROLINA CEMETERY COMMISSION TO INCREASE CERTAIN FEES, MAKING CLARIFYING CHANGES UNDER THE NORTH CAROLINA

[49] The acquisition may be made through condemnation or by purchase.

CEMETERY ACT, AND MODIFYING THE FORMULA USED TO DETERMINE THE ENTERPRISE TIER DESIGNATION OF A COUNTY.

OVERVIEW: This act gives the North Carolina Cemetery Commission the authority to increase several fees and increases the amounts that must be deposited into care and maintenance trust funds. This act also modifies the tier structure in the Bill Lee Act to be more responsive to changes in a county's economic outlook by ranking a county's unemployment rate and per capita income annually as opposed to using a 3-year average.

FISCAL IMPACT: It is not possible to determine the impact of this act on the General Fund.
(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2004 Session. Available in the Legislative Library.)

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 17, 2004.

ANALYSIS: This act gives the North Carolina Cemetery Commission the authority to increase the following fees:

- Annual renewal fee for licensed cemeteries.
- Inspection fee for each grave space, niche, or mausoleum crypt.
- Inspection fee for each vault, belowground crypt, memorial, or opening and closing of a grave space included in a preneed cemetery contract.
- Initial application and filing fee for cemetery company.
- Initial application and filing fee for cemetery sales organizations and cemetery management organizations.
- Initial application and filing fee for cemetery brokers.
- Annual renewal fee for cemetery sales organizations, cemetery management organizations, and cemetery brokers.
- Initial application and filing fee for persons selling preneed grave space.
- Biennial renewal fee for persons selling preneed grave space.
- Application and filing fee for approval of a change of control.

The Cemetery Commission is receipt supported and receives no State General Fund appropriations. At the time this act was enacted, the Commission had a negative fund balance. Therefore, the fee increases were necessary to fund continuing operations of the Commission.

To increase a fee amount, the North Carolina Cemetery Commission must go through the administrative rules process. In addition to the notice and public comment provided for under the administrative rules process, the Commission must also appear before the Joint Legislative Commission on Governmental Operations before an increased fee amount may become effective.

Cemetery companies must make timely deposits to a care and maintenance trust fund and must file with the North Carolina Cemetery Commission annual financial reports of the funds. This act increases the amounts that must be deposited into a care and maintenance trust fund for each

grave space, niche, or mausoleum that is sold or is converted from a public or nonprofit cemetery to a private cemetery.

The act also changes the consequences of failing to make timely deposits or file timely financial reports. Under law prior to the enactment of this act, a cemetery company that failed to make a timely deposit in a trust fund was subject to a penalty of $1.00 per day for each day the deposit was delinquent and a cemetery company that failed to file timely annual financial reports was subject to a penalty of $25 per day for each day of delinquency. The proceeds of these penalties were not retained by the Cemetery Commission because under Article IX, Section 7 of the North Carolina Constitution, the clear proceeds of all penalties must be credited to the county's school fund. The Cemetery Commission incurs additional expenses when a person fails to submit deposits and reports in a timely fashion. Before the enactment of this act, this expense was borne by the Commission through the general licensing revenues. This act changes each penalty to a late filing fee. As a result, the Commission will be able to retain the fee proceeds to recover its additional expenses from the person who creates the need for the expense. This act also changes the late fee for failure to file timely financial reports from $25 a day to $25 a month.

Section 10 of the act modifies the formula used to determine the enterprise tier designation of a county under the Bill Lee Act. By December 31 of each year, the Department of Commerce is required to assign a tier designation to each of the 100 counties in the State. In order to make these assignments, the Department must rank all counties based on three factors, average rate of unemployment over the preceding three years, average per capita income over the preceding three years, and percentage growth in population. Each of these factors is given equal weight. Tier designations are assigned based on the ranking, although there are numerous exceptions to this formula. A county designated as enterprise tier one or two may not be designated a higher tier until it has been at its current tier for at least two consecutive years. There are also exceptions for certain lower-population counties that could result in those counties receiving a lower designation.

This act changes the time frames for measuring each of the three factors. Under this act, in ranking counties on the basis of unemployment and per capita income, the Department will use the average figure over the last 12 months rather than over the past three years. In ranking the counties on the basis of population growth, the Department will use the population growth percentage over the past 12 months. Previously the statute specified no time frame for measuring population growth. In ranking counties on the percentage of population growth, the Department had compared the most recent estimate of population to the last decennial census figure. Thus, the period of time over which population growth was measured varied each year.

It is believed that these changes will make the Bill Lee tier designation more sensitive to changes in economic conditions in the counties. Because of various exceptions to the ranking formula, the distribution of counties will still be skewed toward the lower tiers.

Bill Lee tier designation affects a number of different State programs, including the following: Job Development Investment Grant (JDIG) Program, One North Carolina Fund, Industrial Development Fund, Community Development Block Grant funds, certain sales tax refunds, low-income housing tax credits, purchase of agricultural conservation easements, and distributions from the Spay/Neuter Account.

2003 Finance Law Changes

ONE-TIME RENTAL CAR TAX ELECTION EXCEPTION.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-5	**SB 235**	**Senator Hoyle**

AN ACT TO ALLOW A RETAILER THAT LEASES MOTOR VEHICLES AND THAT HAS PAID THE HIGHWAY USE TAX ON THE MOTOR VEHICLES TO PAY AN ADDITIONAL GROSS RECEIPTS TAX ON THE MOTOR VEHICLES.

OVERVIEW: This act allows a retailer who leases motor vehicles to elect to begin paying the highway use tax on the gross receipts derived from leasing the vehicles even though the retailer has previously paid the 3% highway use tax on these vehicles. The retailer's election to begin paying the gross receipts tax must have been made by July 1, 2003 and if made, is irrevocable. The election does not relieve the retailer of liability from a tax previously imposed.

FISCAL IMPACT: This act has no fiscal impact. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on March 28, 2003. An election to pay the gross receipts tax must have been made by the retailer by July 1, 2003.

ANALYSIS: In 1989, the General Assembly enacted the highway use tax to provide a major source of revenue for the Highway Trust Fund. The tax rate is 3% of the retail value of a motor vehicle for which a certificate of title is issued. The Division of Motor Vehicles collects the tax. A retailer that leases or rents motor vehicles may elect not to pay the highway use tax. Instead, the retailer may elect to pay an 8% tax on the gross receipts of the short-term lease or rental and a three percent (3%) tax on the gross receipts of long-term rentals. Although the gross receipts tax is imposed on the retailer, it is added to the lease or rental price of the vehicle and is ultimately paid by the person who leases or rents the vehicle. The gross receipts tax is collected by the Department of Revenue. The tax levied at 3% is credited to the Highway Trust Fund and the tax levied at 8% is credited to the General Fund.

This act allows a retailer who leases motor vehicles and who elected to pay the highway use tax on the retail value of the vehicles at the time the retailer obtained a certificate of title for those vehicles to collect the alternate gross receipts tax. In order to collect the gross receipts tax on these vehicles, a retailer must have submitted a written request to the Division of Motor Vehicles and the Department of Revenue by July 1, 2003. The retailer was required to specifically identify the vehicles to which the election applied, the date upon which the retailer would begin collecting the additional taxes, and any additional information needed to collect the tax. If a retailer elected to pay the gross receipts tax under this act, that election is irrevocable and does not relieve the taxpayer of liability for any tax previously imposed.

Typical practice throughout the rental car industry is for the highway use tax to be paid on the receipts of the rentals. Typically states that impose a tax on the leasing of vehicles impose a gross receipts tax. However, in North Carolina, at least one rental car retailer elected to pay the highway use tax at the time the retailer obtained the certificates of title for its fleet. To be consistent with other companies in the industry and to be consistent among the various states in which the retailer leases its motor vehicles, the retailer requested authorization to collect the gross receipts tax on its rentals.

IRC UPDATE.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-25	**HB 320**	**Rep. McComas**

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS.

OVERVIEW: This act rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from May 1, 2002 to January 1, 2003. Part XXXVII-A of S.L. 2003-284 updated the reference date to June 1, 2003. (See summary for S.L. 2003-284 for more details.) Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law previously tracked federal law.

FISCAL IMPACT: This act results in a revenue gain of less than $30,000 per year. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on April 24, 2003.

ANALYSIS: Congress enacted the Clergy Housing Allowance Clarification Act of 2002 (P.L. 107-181) which clarifies the amount that may be excluded from gross income by a minister for a rental allowance paid to the minister as part of the minister's compensation. Under previous federal law, the rental allowance was excluded to the extent the allowance was used to rent or provide a home for the minister. Specifically, new la provides that the rental allowance is excluded to the extent that it is used to rent or provide a home for the minister but only to the extent that it does not exceed the fair market rental value of the home.

This legislation originated as an effort to head off a constitutional challenge to the clergy housing exclusion in a case before the Ninth Circuit Court of Appeals, *Warren v. Commissioner of Internal Revenue*, 282 F.3d 1119 (9th Cir. 2002). In this case, Reverend Rick Warren had purchased a home and for three years excluded a portion of his compensation from his church on the basis of the rental allowance exclusion. The IRS determined that, pursuant to a 1971 Revenue Ruling, the amount excluded should have been limited to the fair market rental value of his home and assessed a deficiency. Rev. Warren contested the deficiency. In May 2000, the United States Tax Court ruled that the IRS erred in finding Rev. Warren's housing allowance exclusion was limited to the fair market rental value of his home. The government appealed the Tax Court decision to the Ninth Circuit Court of Appeals. Although neither party raised a constitutional issue on appeal, the Ninth Circuit, on its own, queried whether the rental allowance exclusion for ministers of the

Code violated the Establishment Clause of the United States Constitution and requested the parties to submit briefs on that issue. This prompted the introduction of the Clergy Housing Allowance Clarification Act of 2002 as an effort by Congress to preserve the 81-year-old law exempting from federal income tax the provision of residential housing for clergy. The legislation moved swiftly thorough Congress, and two days after the President signed the measure, both parties in the case requested a dismissal of the appeal.

MODIFY COUNTY TAX CERTIFICATION AUTHORITY.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-72	**HB 393**	**Representative Stam**

AN ACT TO MODIFY THE AUTHORITY OF THE BOARD OF COUNTY COMMISSIONERS IN CERTAIN COUNTIES TO REQUIRE THE REGISTER OF DEEDS IN THE COUNTY NOT TO ACCEPT ANY DEED TRANSFERRING REAL PROPERTY FOR REGISTRATION UNLESS THE COUNTY TAX COLLECTOR CERTIFIES THAT NO DELINQUENT TAXES ARE DUE ON THAT PROPERTY.

OVERVIEW: This act provides that a register of deeds serving in a county where tax collector certification of a deed is normally required prior to registration must accept an uncertified deed if the closing attorney states the intent to pay any delinquent taxes from the closing proceeds. It also adds Hyde County to the list of counties that have the authority to require tax certification of a deed prior to registration.

FISCAL IMPACT: This act does not affect State revenues.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on May 20, 2003.

ANALYSIS: G.S. 161-31 provides that in certain counties, the board of county commissioners may adopt a resolution to require the register of deeds to refuse to register a deed unless the county tax collector has certified that no delinquent taxes are due on the property. Before the 2003 Session, this provision applied to the following 45 counties: Alleghany, Anson, Beaufort, Bertie, Cabarrus, Camden, Carteret, Cherokee, Chowan, Clay, Cleveland, Currituck, Davidson, Durham, Forsyth, Gaston, Graham, Granville, Harnett, Haywood, Henderson, Hertford, Iredell, Jackson, Lee, Macon, Madison, Martin, Montgomery, Northampton, Pasquotank, Perquimans, Person, Pitt, Polk, Rockingham, Rowan, Rutherford, Stanly, Swain, Transylvania, Vance, Warren, Washington, and Yadkin Counties. This act adds Hyde County to the list. S.L. 2003-189 added Gates County and S.L. 2003-354 added Duplin County to the list, to bring the total to 48.

In addition to G.S. 161-31, the General Assembly has enacted similar laws that prohibit a register of deeds from registering a deed unless the tax collector has certified that no delinquent taxes are due. These provisions apply to the following local governments: Avery County (1963); Mitchell

County (1987); Ashe County (1993); the Towns of Newland and Spruce Pine and Alleghany County (1997);[1] the Town of Banner Elk (1998); and the Town of Bakersville (1999).

In a county or local government where G.S. 161-31 and other similar State laws do not apply, the register of deeds registers deeds regardless of whether delinquent taxes are due on the property.

The purpose of G.S. 161-31 is to provide certain counties an additional tool to collect delinquent property taxes. This act amended G.S. 161-31 to provide that if the board of county commissioners has adopted a resolution to require the register of deeds to refuse to register a deed without the certification of the county tax collector, the register of deeds must still accept an uncertified deed that is submitted for registration under the supervision of a closing attorney and containing the statement, "This instrument prepared by: ________________, a licensed North Carolina attorney. Delinquent taxes, if any, to be paid by the closing attorney to the county tax collector upon disbursement of closing proceeds." The change is intended to provide the same level of protection for counties while reducing the paperwork burden associated with transfers of real property.

PUBLISH REVENUE-NEUTRAL PROPERTY TAX RATE.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-264	**SB 511**	**Senator Rucho**

AN ACT TO REQUIRE LOCAL GOVERNMENTS TO PUBLISH THE REVENUE-NEUTRAL TAX RATE IN YEARS WHEN THERE IS A GENERAL REVALUATION OF REAL PROPERTY.

OVERVIEW: This act requires counties to state the revenue-neutral property tax rate in their budgets in a year in which a general reappraisal of real property takes place.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on June 26, 2003.

ANALYSIS: The amount of property tax due is dependent upon two factors: the property tax rate and the value of the property to which the rate is applied. Property is to be appraised for tax purposes at its true value or market value.[2] To ensure that property is appraised at its true value, the law requires that a county conduct a general reappraisal of real property at least once every eight years.[3] Typically, the value of the tax base increases in revaluation years, especially in urban areas. This increase in value may result in a decreased tax rate, if the county seeks to maintain revenue neutrality with regard to the stream of revenue derived from property taxes.

[1][1] Although Allegheny County had a local provision, it was added to G.S. 161-31 in 2001 because that provision allows the county to decide what form the certification will take.

[2] Agricultural, horticultural, and forestland property, upon proper application, are appraised at present-use value.

[3] G.S. 105-286.

This act requires a county, in the year in which it conducts a general reappraisal of property, to include in its budget a statement of the revenue-neutral property tax rate for the budget. The revenue-neutral tax rate is the rate that is estimated to produce revenue for the next fiscal year equal to the revenue that would have been produced for the next fiscal year by the current tax rate if no reappraisal had occurred. To calculate the revenue-neutral tax rate, the budget officer must first determine a rate that would produce revenues equal to those produced for the current fiscal year and then increase the rate by a growth factor equal to the average annual percentage increase in the tax base due to improvements since the last general reappraisal. This growth factor should represent the expected percentage increase in the value of the tax base due to improvements during the next fiscal year. The budget officer must further adjust the rate to account for any annexation, deannexation, merger, or similar event.

2003 BUDGET ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-284	**HB 397**	**Rep. Crawford, Sherrill (Primary Sponsors)**

AN ACT TO APPROPRIATE FUNDS FOR CURRENT OPERATIONS AND CAPITAL IMPROVEMENTS FOR STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES, AND TO IMPLEMENT A STATE BUDGET THAT ENABLES THE STATE TO PROVIDE A SUSTAINABLE RECOVERY THROUGH STRONG EDUCATIONAL AND ECONOMIC TOOLS.

OVERVIEW, EFFECTIVE DATES, AND FISCAL IMPACT:

Part #	*Description and Effective Dates*	*Fiscal Impact*
37	**Adjust Local Government Hold-Harmless** Effective June 30, 2003, changed the date that sales tax hold-harmless payments are made to local governments each year, from September 15 to August 15. It also provided that the payments will be made in 2003 and 2004, with intent language for the payments to continue through 2012. This part also provided that the estimates used to calculate the hold-harmless payments must be updated to reflect legislative changes.	No significant fiscal impact on the General Fund in the 2003-05 fiscal biennium.

Part #	*Description and Effective Dates*	*Fiscal Impact*
37-A	**Update Internal Revenue Code Reference and Adjust Bonus Depreciation and Estate Tax** Effective June 30, 2003, changed the State tax law reference to the Internal Revenue Code from January 1, 2003 to June 1, 2003. In May 2003, Congress enacted the Jobs and Growth Tax Relief Reconciliation Act of 2003. That legislation increased from 30% to 50% the bonus depreciation allowance originally enacted in March 2002 in response to the September 11 terrorist attacks and moved the sunset for bonus depreciation from September 10, 2004 to December 31, 2004. In addition, the package increased the amount of investment in capital equipment that a business can expense during the acquisition year (instead of depreciating over many years) from $25,000 to $100,000. Continued technical conformity to bonus depreciation so that taxpayers do not have to keep a separate depreciation schedule for State tax purposes for each piece of equipment in addition to the federal schedule. Extended until July 1, 2005, the partial conformity of the State estate tax to changes in the federal estate tax.	The update in the Code reference fully conforms North Carolina law to the federal expensing limit increase at a cost to the General Fund of $29.2 million in FY 2003-04 and $18.0 million in FY 2004-05. This will reduce state revenues in FY 2003-04 by $40.8 million (due to the increase in bonus depreciation from 30% to 50%) but increase revenues by $18.0 million in FY 2004-05. This provision has no impact for the 2003-04 fiscal year because estates have 9 months after a death to file a return. For FY 2004-05, the proposal saves $70.8 million of General Fund revenue that would have disappeared if the 2002 partial conformity had been allowed to sunset on January 1, 2004.
38	**Temporarily Maintain State Sales Tax Rate** Effective June 30, 2003, extended sunset on the half-cent state sales tax enacted in 2001 from July 1, 2003 to July 1, 2005.	Joint estimates provided by Fiscal Research and the Office of State Management and Budget suggest the following revenue stream from this tax extension. FY 2003-04 $341.7 million FY 2004-05 $388.2 million FY 2005-06 $26.5 million

Part #	*Description and Effective Dates*	*Fiscal Impact*
39	**Temporarily Maintain Upper Income Tax Rate** Effective June 30, 2003, extended the sunset of the 8.25% individual income tax bracket from January 1, 2004 to January 1, 2006.	The additional revenue from this extension is calculated using the North Carolina Individual Income Tax Model. The model estimates that $83.3 million in individual income tax payments will be generated in tax year 2004 and $104.2 million in revenue in tax year 2005. This revenue is divided into fiscal years as follows: FY 2003-2004: $37.5 million FY 2004-2005: $92.7 million FY 2005-2006: $57.3 million
39-B	**Conform Child Tax Credit to Federal Credit** Effective for the 2003 tax year, conformed the State definition of a dependent child to the federal definition for purposes of the individual income tax credit for children.	The change will increase General Fund revenue by $16.8 million in FY 2003-04 and by $17 million in FY 2004-05.
43	**Equalize Insurance Tax Rates on Article 65 Corporations** Raised the insurance premiums tax rate on Article 65 corporations from 1.0% to 1.9%, effective for the 2004 tax year. In addition, for the 2004 and 2005 tax years, this act required the affected companies to make estimated tax payments in April and June of each year equal to 50% of the annual liability for that tax year.	This change will increase General Fund revenue by $18.6 million for the 2003-04 fiscal year and $13.9 million for FY 2004-05.
43-A	**Clarify Property Tax Exclusion for Property Used to Reduce Cotton Dust** Clarified a property tax exclusion	No impact on General Fund. No estimate on the fiscal impact on local governments is possible, but the impact is expected to be small.
44	**Continue Use Tax Line Item on Income Tax Form** Effective June 30, 2003, this act extended for two years the law that provides that consumer use tax is payable on the individual income tax return.	This extension will increase General Fund revenue by $3.1 million in both FY 2003-04 and FY 2004-05.

Part #	*Description and Effective Dates*	*Fiscal Impact*
45	**Conform to Streamlined Sales and Use Tax Agreement** This act made numerous changes to the sales and use tax statutes to bring North Carolina into conformity with the Streamlined Sales Tax Agreement. Various effective dates.	The tax on soft drinks will increase sales tax revenues by $41.4 million in FY 2003-04 and by $45.1 million in FY 2004-05. Conversely, the 50% vending machine exemption will reduce sales tax revenue by $4.05 million in FY 2003-04 and $8.6 million in FY 2004-05. The tax on prepared food will increase revenue by $3.05 million in FY 2003-04 and by $3.3 million in FY 2004-05. The candy exemption will reduce revenue by $400,000 in FY 2003-04 and by $800,000 in FY 2004-05.
45-A	**Eliminate Tobacco and Alcohol Discounts** Effective August 1, 2003, eliminated tax reductions that were allowed to distributors and wholesalers who pay the excise taxes on cigarettes and other tobacco products. Effective August 1, 2003, eliminated tax reductions that were allowed to distributors and wholesalers who pay the excise taxes on wine, beer, and spirituous liquor.	The change will increase General Fund revenue by $1.74 million in FY 2003-04 and by $1.9 million in FY 2004-05. The change will increase General Fund revenue by $3.67 million in FY 2003-04 and by $4.0 million in FY 2004-05.
46	**Repairs and Renovations** Effective July 1, 2003, enacts the procedural and regulatory provisions governing the State's issuance of security interest indebtedness. It also provides the specific legislative authorization for up to $300 million of special indebtedness to be used for the repair and renovation of State facilities and related infrastructure.	The expected debt service is $35 million for 2004-05, $32.5 million for 2005-06, and $31.6 million for 2006-07.
46-A	**State Capital Facilities Finance** Effective July 1, 2003, provides specific legislative authorization for three projects: The purchase of two private prisons currently leased by the State.	The amount of the issuance is to be negotiated. No other fiscal information available.

Part #	*Description and Effective Dates*	*Fiscal Impact*
	Up to $6,780,000 for the design, construction drawings, and solicitation of bids for three youth development centers. The construction of a structural pest control training facility to be located at NCSU.	No fiscal information available, in planning stage. No fiscal information available.
47	**Lease-Purchase Three New Prisons** Effective July 1, 2003, provides specific legislative authorization for the lease-purchase of three new prisons.	The cost of constructing the prisons is expected to be between $344 and $364 million. The annual operating cost is expected to be $18 million.

(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)

ANALYSIS:

Part 37: Adjust Local Government Hold-Harmless

Part 37 of this act changes the date that sales tax hold-harmless payments are made to local governments each year, from September 15 to August 15. It also provides that the payments will be made in 2003 and 2004 only, but includes intent language for the payments to continue through 2012. The Governor's budget would have eliminated the hold harmless payments beginning in 2003.

In 2001, the General Assembly gave local governments the authority to increase their local sales tax by one-half percent, effective upon the repeal of the State's additional half-percent sales tax on July 1, 2003. Also effective July 1, 2003, the State's reimbursements to local governments were repealed, and the State was directed to provide hold-harmless payments to those local governments whose potential gain from the half-cent local sales tax increase would be less than their loss from the repealed State reimbursements. State reimbursements were for losses due to the repeal of the property tax on inventories and on poultry and livestock, the repeal of the intangibles tax, the "homestead exclusion" from property tax, and the repeal of local sales and use taxes on food purchased with food stamps. In 2002, the General Assembly accelerated the repeal of the State reimbursements from July 1, 2003, to July 1, 2002, and accelerated the effective date that local governments could begin levying the additional half-cent local tax from July 1, 2003, to December 1, 2002.

This part also provides that the estimates used to calculate the hold-harmless payments must be updated to reflect legislative changes.

This part became effective when the act was signed into law by the Governor on June 30, 2003.

Part 37-A: Update Internal Revenue Code Reference And Adjust Bonus Depreciation And Estate Tax

This part makes three changes relating to conformity of State tax laws to federal tax laws. These provisions were not in the House or Senate budgets.

Section 37A.1 of this act updates to June 1, 2003, the date used in defining and determining certain State tax provisions. In May 2003, Congress enacted the Jobs and Growth Tax Relief

Reconciliation Act of 2003. That act contained two tax changes that affect federal taxable income, which is the starting point for determining State taxable income, and became effective for the 2003 tax year. The two changes were an increase in the bonus depreciation allowance first enacted after the September 11, 2001, terrorist attacks and an increase in the amount that can be expensed under section 179 of the Internal Revenue Code[4] Section 37A.1 of the act conforms to both of these provisions. Sections 37A.2 and 37A.3 of the act would provide for a bonus depreciation add-back for the 2004 taxable year to offset the second-year losses from the depreciation and expensing provisions.

Sections 37A.4 and 37A.5 delay until July 1, 2005, the phase-out and elimination of the State estate tax that would otherwise occur due to the phase-out and elimination of the federal credit for State death taxes. North Carolina repealed its inheritance tax in 1998, effective for deaths occurring on or after January 1, 1999. It replaced the inheritance tax with an estate tax that is equivalent to the federal state death tax credit allowed on a federal estate tax return. This type of state estate tax is known as a "pick-up" tax because it picks up for the state the amount of federal estate tax that would otherwise be paid to the federal government. In 2001, Congress increased the exclusion amount for the federal estate tax and phased out the state death tax credit over four years by reducing it 25% in 2002, 50% in 2003, and 75% in 2004, and by repealing it entirely in 2005. In 2002, the General Assembly enacted legislation not to conform to the phase-out of the state death tax credit. In other words, the amount of the State estate tax is tied to the federal credit as it existed in 2001 rather than as it currently exists. The 2002 legislation was set to sunset for estates of decedents dying on or after January 1, 2004. This part extends the sunset to July 1, 2005, meaning that the estate tax will continue to be based on the federal credit as it existed in 2001. This part became effective when the act signed into law by the Governor on June 30, 2003.

Part 38: Temporarily Maintain State Sales Tax Rate

Part 38 of this act delays the sunset of the one-half-percent increase in the State sales tax from July 1, 2003, to July 1, 2005. This part became effective when the act was signed into law by the Governor on June 30, 2003. In the 2001 Appropriations Act, S.L. 2001-424, the General Assembly increased the State sales tax by one-half percent, from 4% to 4.5%, effective October 16, 2001. This State sales tax increase was to sunset July 1, 2003. Before 2001, the State sales tax rate had last been increased in 1991 from 3% to 4%.

Part 39: Temporarily Maintain Upper Income Tax Rate

Part 39 of this act delays the sunset of the upper-income individual income tax bracket from January 1, 2004, to January 1, 2006. In 2001, the General Assembly added a new tax bracket that imposed an additional one-half percent income tax (a total rate of 8.25%) on certain North Carolina taxable income for three years. Under prior North Carolina law, tax was imposed at the following rates on individuals' North Carolina taxable income:

Tax Rate	Married filing jointly	Heads of household	Single filers	Married filing separately
6.0%	Up to $21,250	Up to $17,000	Up to $12,750	Up to $10,625

[4] Section 179 of the Code allows a taxpayer to treat the cost of certain property as an expense which is not chargeable to a capital account. This allows the taxpayer to take a deduction for the property in the year in which it is placed into service rather than depreciating the property over a number of years.

7.0%	Over $21,250 and up to $100,000	Over $17,000 and up to $80,000	Over $12,750 and up to $60,000	Over $10,625 and up to $50,000
7.75%	Over $100,000	Over $80,000	Over $60,000	Over $50,000

The 2001 law created a fourth tax bracket for North Carolina taxable income as follows:

Tax Rate	Married filing jointly	Heads of household	Single filers	Married filing separately
8.25%	Over $200,000	Over $160,000	Over $120,000	Over $100,000

This change was estimated to affect approximately 2% of North Carolina taxpayers. This provision extending the tax rate for two more years was recommended by the Governor.

This part became effective when the act was signed into law by the Governor on June 30, 2003.

Part 39-B: Conform Child Tax Credit To Federal Credit

Part 39-B of this act conforms the State credit for children to the federal definition of whether a dependent child is eligible for the federal credit for dependent children. The effect of this change is to limit the credit to children below 17 years of age. The federal credit is limited to dependent children under age 17 but the North Carolina credit previously applied to 17-year-olds as well as to children over 17 up to age 23 if they are in college. This provision was part of a provision that was in the Senate budget that would have also delayed the scheduled increase in the credit. This change is effective beginning with the 2003 tax year.

Part 43: Equalize Insurance Tax Rates On Article 65 Corporations

Before 2004, nonprofit medical service corporations, such as Blue Cross/Blue Shield and Delta Dental Corporation, and HMOs paid a gross premiums tax of 1%. Other insurance providers pay a gross premiums tax of 1.9% on most insurance contracts. Companies that pay a gross premiums tax are automatically exempt from corporate income and franchise taxes. This part increases the gross premiums tax rate on medical service corporations from 1% to 1.9% effective January 1, 2004. The tax rate for HMOs (including HMOs directly operated by medical service corporations) remains at 1%.

This part also provides that for the 2004 and 2005 tax years only, medical service corporations will make the following estimated payments of the tax: 50% on April 15 and 50% on June 15, with true-up the following March 15. For subsequent tax years, the general law on installment payments of gross premiums tax will apply. This change accelerates the timing of the tax payment to move the revenue gain to an earlier fiscal year.

This part provides a conditional sunset of the increased tax rate. It requires the Commissioner of Insurance to make a certification to the Department of Revenue and the Revisor of Statutes when there are no longer any medical service corporations that offer anything other than dental service plans. Beginning with the first taxable year after that certification is made, this part will expire and the gross premiums tax rate applied to medical service corporations will revert to 1%. The effect of this provision would be to reduce the rate on medical service corporations if Blue Cross/Blue

Shield completes its conversion to for-profit status. In July 2003, Blue Cross/Blue Shield announced its intention not to pursue conversion at this time.

The insurance gross premiums taxes are taxes based on the amount of insurance premiums that are paid or, for certain self-insurers, would have been paid during the year. Before the effective date of this part, they consist of the following:

- A 1.9% tax on most insurance contracts.
- A 1% tax on HMOs and on nonprofit medical service companies, such as Blue Cross/Blue Shield and Delta Dental, that provide hospital, medical, and dental service plans.
- A 2.5% tax on workers' compensation premiums and workers' compensation self-insurers.
- An additional 1.33% tax on premiums for fire and lightening coverage of property other than motor vehicles and boats.
- An additional 0.5% tax on premiums for fire and lightening coverage of property within a fire district.

Part 43-A: Clarify Property Tax Exclusion For Property Used To Reduce Cotton Dust

Part 43A amends the existing property tax exclusion for property exclusively used to reduce or prevent cotton dust in textile plants in accordance with OSHA standards. The new law provides that if parts of a ventilating or air conditioning system are integrated with the cotton dust equipment, the entire system benefits from the tax exclusion, except for the chillers and cooling towers. Because it apparently reflects the previous practice in some counties, the provision became effective when the act was signed into law by the Governor on June 30, 2003.

Part 44: Continue Use Tax Line Item On Income Tax Form

Part 44 extends for two years the law that provides that consumer use tax is payable on the individual income tax return. The law would otherwise sunset for the 2003 taxable year.

North Carolina has State and local sales and use taxes. The sales tax is paid on purchases made in this State. It is collected by the retailer and remitted to the State. The use tax complements the sales tax by taxing transactions that are not subject to the sales tax because of movement in interstate commerce. The use tax is imposed on the purchaser. Unlike the sales tax, the responsibility for remitting the use tax to the Department of Revenue is also on the purchaser. The 1997 General Assembly established an annual filing period for the payment of use taxes owed by consumers on mail-order and other out-of-state purchases. This change relieved consumers of the duty to file either monthly or quarterly returns.

In 1999, the General Assembly further simplified use tax collection by providing that the use tax will be paid on taxpayers' income tax returns. An individual who owes use tax on nonbusiness purchases and who must remit a State income tax return must pay the use tax with the income tax return. The income tax return has space on it to indicate the amount of use tax owed. Placing the use tax on the individual income tax return, as opposed to a separate use tax return sent to the taxpayer with the income tax return, is intended to increase taxpayers' awareness of their responsibility to pay the tax. In 2000, the General Assembly sunset this provision in anticipation that use tax collection would be handled by retailers by 2003 as a result of the Streamlined Sales Tax Agreement. The 2003 sunset date may have been overly optimistic; this part extends it for

two more years. This part became effective when the act was signed into law by the Governor on June 30, 2003.

Part 45: Conform To Streamlined Sales And Use Tax Agreement

In November 2002, the Streamlined Sales Tax implementing states[5] approved a final version of an historic multistate agreement designed to simplify and modernize sales and use tax collection and administration. One objective of the Streamlined Sales and Use Tax Project is to encourage remote vendors to voluntarily collect use tax owed to the states, thereby increasing their collections. A study issued in September 2001 by Bruce and Fox of the University of Tennessee, Knoxville estimated the state and local government revenue loss from sales made through the Internet at $7 billion in 2001 and increasing to $24.2 billion by 2006. The study estimates that North Carolina is currently losing $200 to $300 million a year in uncollected use tax revenues.

A second objective of the Project is to convince Congress or the U.S. Supreme Court to grant collection authority over remote sales to the states that enact the streamlined system embodied in the multistate agreement, on the premise that the system eliminates the burdens on interstate commerce that have been the justification for denying states that authority. If federal legislation is enacted granting states this authority, it is likely to be linked with proposals to extend the Internet Tax Freedom Act moratorium, which expires on November 1, 2003.

To participate in the Streamlines Sales and Use Tax Agreement (Agreement), a state must amend or modify its sales and use tax law to conform to the simplifications and uniformity in the Agreement. The Agreement becomes effective when at least 10 states representing at least 20% of the total population of all states imposing a state sales tax have petitioned for membership and have been found to be in compliance with the requirements of the Agreement. A certificate of compliance will document each state's compliance with the provisions of the Agreement. As of July 7, 2003, 19 states, with more than 20% of the total population of all states, were in compliance with the Agreement.

Part 45 makes changes to the sales and use tax statutes to bring North Carolina into conformity with the Agreement.

*Uniform local sales tax base***.** – Under the Agreement, all local jurisdictions in a state must have a common tax base. The base for the most recent ½% local sales tax and the ½% Mecklenburg local transit tax does not include food while the other local sales and use taxes do. To conform to the Agreement, the base must be consistent. The State is allowed to tax food at a different rate than its general rate of tax. Section 45.6A of this part finesses the non-uniform local base effective October 1, 2003, by stating that the taxes will be administered as if the local tax on food were zero and the State had a 2% tax on food. This change complies with the Agreement without changing the amount of tax. The State will collect and distribute the 2% local tax on food. Under this act, the distribution with respect to food tax proceeds would have be in proportion to other local sales tax proceeds rather than based on the actual county of collection. This would have resulted in a shifting of revenue among counties, in favor of counties that are retail centers. However, this part was amended by Section 27 of S.L. 2003-416. Half of these proceeds will now be distributed based on population with the remaining half being distributed based on the proportion of sales taxes on food collected under Article 39 of Chapter 105 of the General Statutes within the county in the 1997-98 fiscal year in relation to the total collections under that Article.

---

[5] Currently, 40 states plus the District of Columbia are involved in the Streamlined Sales Tax Project. In November 2002, 35 states plus the District of Columbia were involved in the Project.

Candy, soft drinks, and prepared food. – Under the Agreement, if there is a uniform definition for a type of product, a state may not exempt only part of the items included in the definition. Candy, soft drinks, and prepared foods have uniform definitions in the Agreement. Under previous law, North Carolina exempted those items as food only to the extent they were purchased for home consumption. To conform to the Agreement, the products must be treated consistently whether or not they are intended for home consumption. This part removed soft drinks and prepared foods from the exemption for food effective July 15, 2003. It offsets the impact of this change by extending to vending machine soft drinks the 50% sales tax reduction currently allowed to other products sold in vending machines, effective January 1, 2004. This part exempts all candy as if it were food, effective January 1, 2004.

Definitions. – The Agreement mandates that a state that uses any of the terms defined in the Agreement in its sales and use tax laws must define the terms in substantially the same language as the Agreement uses. To conform to the Agreement, this part modifies and defines the following terms: computer, computer software, custom computer software, prewritten computer software, delivered electronically, load and leave, direct mail, drug, durable medical equipment, durable medical supplies, electronic, lease or rental, mobility enhancing equipment, over-the-counter drug, prepared food, prescription, prosthetic device, and tangible personal property. This provision became effective July 15, 2003.

Modifications to prewritten software. – As discussed above, the Agreement mandates that a state must either tax or exempt all products within a given uniform definition. Previously, North Carolina taxed prewritten computer software that had not been modified and it exempted both custom computer software and prewritten computer software that had been modified. To conform to the Agreement, the State will tax the prewritten portion of modified computer software and it will exempt the modifications to it if the charges for the modifications are separately stated. Through the use of defined terms, computer software that is delivered electronically or by "load and leave" will remain exempt from tax. This provision became effective July 15, 2003.

Mobility enhancing equipment. – To provide consistent treatment of products within a uniform definition, this part provides that mobility enhancing equipment must be sold on a prescription to be exempt from tax. Under previous law, a few items that come within this defined term, such as crutches, did not need to be sold on a prescription to be exempt. However, to preserve the previous tax treatment as much as possible, this part requires mobility enhancing equipment to be sold on a prescription in order to be exempt since previous law required most items in this category to be sold on prescription in order to be exempt. This provision became effective July 15, 2003.

Uniform sourcing rules. – North Carolina adopted many of the uniform sourcing principles in 2001. This part codifies additional sourcing principles for periodic rental payments. The codified principles reflect previous practice. This provision became effective July 15, 2003.

Uniform returns and remittances and notices. – North Carolina adopted many of the uniform provisions governing returns, remittances, and notices in 2001. This part adds a few more provisions:

- The collection period for a seller that collects less than $1,000 in State sales tax during a calendar year cannot be more often than annually. This provision became effective October 1, 2003.
- Monthly returns are due by the 20th day of the month, instead of the 15th day of the month. This provision became effective October 1, 2003.

- Catalog sellers must be given at least 120 days' notice of tax changes and tax rate changes. This provision became effective July 15, 2003.

Sales tax holiday. – The Agreement sets forth certain conditions that sales tax holidays must meet after December 31, 2003. One of the conditions is that the items to be exempt must be specifically defined in the Agreement. North Carolina's sales tax holiday exempts printers, printer supplies, educational computer software, and school supplies. None of these terms are defined in the Agreement. The implementing states are currently working on a definition of "school supplies". This act makes the following changes to the Sales Tax Holiday effective October 1, 2003: It removes printers, printer supplies, and educational computer software from the exemption. It also extends the exemption to layaway sales.

In addition to the sales and use tax modifications made by this part, North Carolina will need to address the following issue in the near future to remain in conformity with the Agreement:

Multiple rates, caps, and thresholds. – The Agreement mandates the elimination of caps and thresholds under most circumstances after December 31, 2005. It also mandates a single tax rate per taxing jurisdiction after December 31, 2005. North Carolina currently has a 1% tax rate on certain items and a 1% rate with a $80 cap on some other items. It has a 3% rate with a $1,500 cap on mobile classrooms and offices. It also has a different rate on telecommunications, satellite TV, and spirituous liquor and it has a $1,500 threshold for the sales tax applicable to funeral expenses.

Part 45-A: Eliminate Tobacco And Alcohol Discounts

Part 45A of this act eliminates tax reductions that were previously allowed to distributors and wholesalers who pay the excise taxes on cigarettes, other tobacco products, wine, beer, and spirituous liquor. These discounts were equal to 4% of the tax due. The cigarette and tobacco discounts were intended to cover expenses incurred in preparing tax reports and the expense of furnishing a bond. The discounts for alcoholic beverages are intended to cover these expenses and also losses due to spoilage or breakage. This part became effective August 1, 2003.

An amendment to House Bill 1303 would have partially restored these discounts. On July 19, 2003, the Senate passed an amendment that would have reinstated these discounts at a rate of 2% rather than 4%. That bill then passed the Senate and was sent to the House for concurrence. The House adjourned without voting on concurrence.

Part 46: Repairs And Renovations

Part 46 enacts the procedural and regulatory provisions governing the State's issuance of security interest indebtedness by creating the "State Capital Facilities Financing Act".[6] Security interest indebtedness, commonly referred to as "certificates of participation", is debt that is secured by an interest in the property being financed, repaired, or renovated. Since the property serves as the security for the indebtedness, there is no pledge of the State's faith and credit or taxing power. Thus, voter approval is not necessary for the borrowing. If the State defaulted on its repayments, no deficiency judgment could be rendered against the State, but the capital facilities that serve as security could be disposed of to generate funds to satisfy the debt. The State could choose not to appropriate funds to repay the debt, but such a decision would have negative consequences for the State's credit rating.

---

[6] This act rewrites the "State Capital Facilities Financing Act" contained in S.L. 2003-314. In that legislation, the procedural and regulatory provisions applied only to the financing of a new psychiatric hospital.

The Act uses the term "special indebtedness" to cover the three forms that this type of debt can take: installment purchase (with or without certificates of participation), lease-purchase (with or without certificates of participation), and limited obligation bonds. The particular form to be used for a given project will depend on its size, the nature of the property and the improvement, and other circumstances. Based on these circumstances, one form or another of security interest debt may be the least expensive and most practical for the State to utilize. (*For a more extensive summary of the "State Capital Facilities Financing Act", see the summary for S.L. 2003-314.*)

Part 46 also provides the specific legislative authorization for up to $300 million of special indebtedness to be used for the repair and renovation of State facilities and related infrastructure that are supported from the General Fund. The proceeds of the obligations would be used to repair and renovate State buildings in the same manner as funds in the Reserve for Repair and Renovations are used. Funds in that Reserve may be used for structural and roof repairs, repairs to heating, air conditioning and related equipment, repairs needed for health and safety or to comply with standards imposed by law, and repairs for energy efficiency and to improve the usage of space. Funds may not be used for new buildings or to increase the footprint of a building unless required to comply with standards imposed by law. Except in the case of an emergency, the Director of the Budget is required to consult with the Joint Legislative Commission on Governmental Operations before incurring debt for specific repair and renovation projects.

Part 31.5 of this act modifies how the funds in the Repairs and Renovations Reserve Account can be used for the 2003-04 fiscal year; it did not amend G.S. 143-15.3A, the statute that governs the Reserve Account. Under Part 31.5, 46% of the funds in the Reserve for the 2003-04 fiscal year is allocated to the Board of Governors of The University of North Carolina for repairs and renovations and the remaining 54% is allocated to the Office of State Budget and Management. Notwithstanding G.S. 143-15.3A, Part 31.5 provides that the Board of Governors may use the funds allocated to it for repairs and renovation of facilities not supported by the General Fund if the Board determines that sufficient funds are not available from other sources and that conditions warrant General Fund assistance. Part 31.5 also provides that the Office of State Budget and Management can use the funds allocated to it during the 2003-04 fiscal year to complete the construction of State-owned facilities that are partially completed.

The bond proceeds authorized to be issued by this Part will not go directly into the Repairs and Renovations Reserve Account; they will go into a trust account and, according to this Part, be used "for the purposes and in accordance with the procedures provided in G.S. 143-15.3A". Because the modifications made by Part 31.5 of this act to the purposes for which the funds in the Reserve Account could be used were not made to the statute itself, it is unclear whether the bond proceeds authorized by this Part may be used in accordance with the modifications made by Part 31.5 of this act. Section 98 of the technical corrections bill, House Bill 281, 6th edition, sought to clarify this issue by providing that the debt issued during the 2003-04 fiscal year for repairs and renovations be spent in accordance with the modifications to G.S. 143-15.3A made by Part 31.5 of this act. However, the General Assembly did not enact House Bill 281.

Part 46-A: State Capital Facilities Finance

Part 46A authorizes the State to incur security interest indebtedness for three projects. The first is to purchase two private prisons currently being leased and operated by the State.[7] The Office of

[7] Pamlico County Correctional Facility and the Mountain View Correctional Facility located in Avery County. The prisons are owned by a private vendor and were originally operated by the vendor.

the State Treasurer estimates that the annual debt payments will be lower than the annual lease payments. The Treasurer's Office has been advised by bond counsel that under the terms of the lease it may be possible to purchase these prisons during the 2003-2004 fiscal year, possibly during the first six months of the fiscal year. For that reason, the bond counsel advised that the authorization be included within the budget for the upcoming fiscal year. The provision states that the amount that the Department of Correction would otherwise pay for property taxes on the facilities during the 2004-2005 biennium will be paid to the counties in lieu thereof if the purchase is made at a time that will result in no taxes being due for either year of the biennium.

Second, Part 46A authorizes the State to incur up to $6,780,000 in security interest indebtedness for design, construction drawings, and solicitation of bids for construction of three youth development centers to be operated by the Department of Juvenile Justice and Delinquency Prevention and for infrastructure and site work at one of the three centers. The Office of State Construction will manage the design process. Section 15.7 of this act allows the Department for Juvenile Justice and Delinquency Prevention to continue planning for the new centers but requires a quarterly status report on the planning and design to the JPS Appropriations Chairs and the Joint Legislative Corrections, Crime Control, and Juvenile Justice Oversight Committee. The design phase should be completed by April 15, 2004, and a final report should be issued that includes the anticipated total cost of each proposed center and the recommended locations.

Third, Part 46A authorizes the State to incur security interest indebtedness for the construction of a structural pest control training facility to be located at North Carolina State University.

Part 47: Lease-Purchase Three New Prisons

Part 47 would authorize the State to enter into lease-purchase contracts to build three new prisons. In 2001, the General Assembly authorized lease-purchase financing of three new 1000-cell close security prisons. Section 47.1 would authorize three more substantially identical prisons. Section 47.2 provides that if construction begins before January 1, 2004, and the plans have been approved by the Department of Insurance, the 1996-1999 version of the Building Code applies to the first two of the three prisons.

The State may first try to negotiate a contract for these new prisons with the same company that is building the 2001 prisons. If the Secretary of Administration and the Council of State find that the negotiations have failed to produce a reasonable price, the State would solicit proposals for the projects using a similar procedure as for the 2001 prisons. Unlike with the 2001 prisons, the initial construction loan will not be obtained by the vendor on a private, taxable basis. The entire cost, including construction, will be financed by the State with tax-exempt obligations. The prisons are exempt from property taxes both during and after construction.

Part 47 provides that a nonprofit corporation controlled by the State will work with the Department of Correction to contract directly with the construction contractor for construction of the prisons and will lease the prisons to the State under a lease-purchase agreement. The nonprofit corporation would finance the costs by selling tax-exempt obligations known as certificates of participation (COPs). The COPs would represent interests in the nonprofit corporation's rights to receive the lease payments under the lease-purchase agreement with the State. The COPs would be secured by a lien on the property, not by a pledge of the State's full faith and credit. The COPs would be paid from the State's lease-purchase payments over the course of 20 years.

Because the construction contract is technically between a private, nonprofit corporation and the construction contractor, the Attorney General's Office has determined that requirements for public bidding of construction would not apply. The new prisons are to be substantially identical to the 2001 prisons, so the State and the nonprofit corporation will first try to negotiate a contract with the existing construction contractor to build the new prisons. If, in the opinion of the Secretary of Administration and the Council of State, the terms of the proposed negotiated contract are not favorable to the State, the Department of Correction will solicit for the construction of the new prisons. In this situation, the Department of Correction would be required to consult with the Joint Legislative Commission on Governmental Operations before making a final award decision. The final award decision would also be subject to the approval of the Council of State.

The prisons would be required to be built in accordance with plans and specifications developed by the Department of Correction, and the Department of Correction and the State Construction Office would inspect and review the facilities during construction to ensure that they are suitable for use and acquisition by the State. The minority participation requirements of G.S. 143-128.2 apply to these projects.

The lease-purchase agreement would be between the nonprofit corporation and the State. Under the agreement, which must be approved by the Council of State and the State Treasurer, the State would make lease-purchase payments to the nonprofit corporation, which would use the funds to retire the COPs. The COPs would be secured by a lien on the property and the State's failure to make payments could result in its eviction from the property. The State Treasurer would determine the price to be paid for the COPs and the rate of interest to be paid on them. The State would retain the option of refinancing the debt if interest rates fall. The State would also retain the option of paying off its obligations and purchasing the property before the end of the lease-purchase period. Under the lease-purchase agreement, the State will own the facilities at the end of the lease term. The nonprofit corporation that issues the COPs would be subject to the Public Records Act and the Open Meetings Law.

WAIVE DEADLINES FOR TROOPS.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-300	**SB 936**	**Senator Kerr**

AN ACT TO WAIVE VARIOUS DEADLINES, FEES, AND PENALTIES FOR DEPLOYED MILITARY PERSONNEL.

OVERVIEW: This act provides assistance to military personnel called to active duty in support of Operation Iraqi Freedom on or after January 1, 2003 as follows:

- Authorizes the Governor to allow military personnel 90 days from the end of their deployment to renew their driver's license, renew their motor vehicle liability insurance, or renew an occupational license.
- Allows military personnel 90 days from the end of their deployment to pay current year's property taxes or list property for next year's property taxes.

- Authorizes the Governor to waive civil penalties and restoration fees for military personnel whose motor vehicle liability insurance lapsed during the period of deployment or within 90 days after the member returned to North Carolina if the member certifies that the motor vehicle was not driven during the period in which the vehicle was uninsured and that the vehicle is now insured.
- Directs community colleges to grant full refunds of tuition to military reserve and National Guard personnel called to active duty and to active personnel, who because of their reassignments, are unable to complete courses. The community colleges must buy back textbooks to the extent possible.
- Authorizes the constituent institutions of The University of North Carolina to issue refunds of tuition and required fees and to determine whether to give full or pro rata refunds of housing, parking and other optional fees to students to whom they give tuition and required fee refunds. The refunds may be issued to students who are involuntarily called to active duty, who volunteer for military service, or who withdraw because of circumstances related to a national emergency.
- Waives repayment of the North Carolina Legislative Tuition Grant for any semester that the student loses full-time student status due to a call to active military duty.

FISCAL IMPACT: The act does not affect the State General Fund, but it may delay revenue collection in the 2003-2004 fiscal year for driver's licenses (Highway Fund), occupational licenses (Licensing Board Special Accounts), and property tax collections (local governments). It is not possible to estimate this temporary fiscal impact, because the General Assembly's Fiscal Research Division does not have access to records of military personnel assigned to Operation Iraqi Freedom. Even if such records were accessible, the Division could not easily match driver records, local tax records, and occupational license records to military personnel. *(For a more complete fiscal analysis, see the Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on July 4, 2003.

ANALYSIS: This act provides relief to deployed military personnel by extending certain deadlines, waiving penalties and fees, and allowing tuition refunds. The term "deployed military personnel" is defined as a member of any of the following that are on active duty in support of Operation Iraqi Freedom on or after January 1, 2003:

- Armed forces or armed forces reserves of the United States.
- The North Carolina Army National Guard or the North Carolina Air National Guard, but only if called to active duty in support of the Operation on or after January 1, 2003.

Verification by the military member's command specifying deployment is conclusive evidence of the soldier's deployment.

Extend Deadlines and Waive Penalties and Fees

The act allows the Governor to extend deadlines and waive penalties and fees for deployed military personnel. These extensions and waivers include the following:

- Extend for up to 90 days from the end of deployment the validity of a driver's license or temporary driver's license.[8]
- Extend for up to 90 days the validity of an occupational license and allow for the prorating of any renewal fee associated with an occupational license.[9]
- Waive any civil penalty and restoration fees associated with motor vehicle liability lapses if the soldier certifies that the motor vehicle was not driven during the period in which the vehicle was insured and that the vehicle is now insured. The Division of Motor Vehicles already has policies and procedures in place to handle military personnel on a case-by-case basis. Fines, penalties, and revocations are waived if a person is deployed or unable to handle his or her business due to military actions.

Extend Property Tax Listing and Payment

The act extends property tax deadlines for deployed military personnel by allowing them 90 days after the end of their deployment to pay property taxes that become due or delinquent during the deployment. If the taxes are paid within this 90-day period, no interest is due. The act also provides that deployed military personnel are allowed 90 days after the end of their deployment to list for taxation property that was otherwise required to be listed during their deployment. If the property is listed within this 90-day period, no penalties for failure to list apply.[10]

Refund Community College and UNC System Tuition and Fees

The act requires community colleges to grant a full refund of tuition and fees to deployed military reserve and national guard personnel who request a refund because their deployment makes it impossible to complete course requirements. The community colleges must also buy back textbooks to the extent possible and use distance-learning technologies to help these students complete their course requirements. This section of the act applies to the 2002-2003 and 2003-2004 academic years only.

The act authorizes the constituent institutions of The University of North Carolina to grant a full refund of tuition and required fees to students who request a refund because of involuntary or voluntary service in the military or because of circumstances related to national emergencies. The constituent institutions should determine whether to give full or pro rata refunds of housing,

---

[8] S.L. 2003-152 establishes a military designation for a driver's license issued to a person on active duty and to the person's spouse and dependent children. The military designation allows the holder of the license to renew by mail no more than two times during the holder's lifetime. A license renewed by mail is considered a permanent license and does not expire when the holder returns to the State. The military designation also allows the person on active duty to renew the license up to one year prior to its expiration. A license holder who is serving in a combat zone or a qualified hazardous duty zone may renew by mail without having to take an eye exam.

[9] Section 3 of the act refers to the definition of "occupational license" as defined in G.S. 93B-1. Although that definition does not specifically preclude occupational licenses issued by State agencies, such as a license to sell insurance, the term "occupational licensing board" in G.S. 93B-1 specifically excludes State agencies. House Bill 281 would have amended this portion of the act to clarify that the authority of the Governor to extend the validity of occupational licenses for deployed military personnel includes occupational licenses issued by a State agency. House Bill 281 was sent to a conference committee but was never ratified.

[10] Under G.S. 105-360, property taxes are due September 1 of the fiscal year, and interest begins to accrue on the taxes on or after January 6 following the due date. Under G.S. 105-307, the regular listing period for property taxes ends on January 31.

parking, and other optional fees to students to whom they give tuition and required fee refunds. The act recommends that every campus review its policy on tuition refunds and make modifications to cover the circumstances described in the act.

Legislation similar to this part of the act was enacted for military personnel deployed or called to active duty during Operation Desert Storm, S.L. 1991-160, and during Operation Enduring Freedom and Noble Eagle, S.L. 2001-508. As a result of the 2001 legislation, the State Board of Community Colleges and the UNC System now have policies on refunds of tuition and fees. The State Board of Community Colleges authorized the initiation of the rule-making process to make permanent military tuition refunds when students are unable to complete their course requirements because they were called to active duty in September 2001.[11] Effective October 12, 2001, the UNC Policy Manual has guidelines for refunds of tuition and fees for students requesting refunds due to military service or national emergencies.[12]

Waive Legislative Tuition Grants

The act waives repayment of the North Carolina Tuition Grant by students who lose their full-time student status due to active military duty or circumstances related to national emergencies. This section of the act applies to the 2002-2003 and 2003-2004 academic years only.

PSYCHIATRIC HOSPITAL FINANCING.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-314, as amended by S.L. 2003-284	**HB 684**	**Rep. Crawford, G. Allen, Fox, Luebke (Primary Sponsors)**

AN ACT TO PROVIDE FOR FINANCING THE CONSTRUCTION OF A NEW PSYCHIATRIC HOSPITAL TO BE LOCATED IN BUTNER.

OVERVIEW: This act, as rewritten by S.L. 2003-284, authorizes the issuance of up to $110 million in security interest debt to finance the acquisition, construction, and equipping of an approximately 450,000 square foot, 432-bed new psychiatric hospital to be located in Butner. The act also enacts the procedural and regulatory provisions governing the State's issuance of security interest indebtedness by creating the "State Capital Facilities Financing Act".[13] Security interest indebtedness is debt that is secured by an interest in the property being financed, repaired, or

[11] 23 NCAC 02D.0202(f) and 23 NCAC 02D.0203(e). The wording of this rule is almost verbatim the language in Sections 5(a) and (b) of the act.
[12] The wording of the policy is almost verbatim the language in Section 6(a) of the act.
[13] The bill as enacted provided procedural and regulatory provisions only for security interest indebtedness for the psychiatric hospital. The Current Operations and Capital Improvements Appropriations Act of 2003, S.L. 2003-284, rewrote this act to extend the procedural and regulatory framework to any State security interest indebtedness. Under S.L. 2003-284, the State may employ security interest indebtedness for the following projects: $300,000,000 for repairs and renovations of State facilities and related infrastructure that are supported from the General Fund; the acquisition of two private prisons in Pamlico and Avery Counties; $6,780,000 for the design and planning of three youth development centers; $310,000 for a structural pest control training facility at North Carolina State University; and the lease purchase of three new prisons.

renovated. The act uses the term "special indebtedness" to cover the three forms that this type of debt can take: installment purchase, lease-purchase, and bonds. In each case, the debt is non-voted.

FISCAL IMPACT: Debt service for the construction of the new psychiatric hospital is anticipated to cost the State from $12.1 million to $5.83 million a year. It is anticipated that the cost savings from the closure of both Dorothea Dix Hospital and John Umstead Hospital will be sufficient to offset the cost of these debt service payments. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective when signed into law by the Governor on July 10, 2003. S.L. 2003-284 became effective June 30, 2003. Therefore, the limited scope of the State Capital Facilities Financing Act as enacted by this act was superseded from the beginning by the broader rewrite of the Act in S.L. 2003-284.

ANALYSIS: The North Carolina Constitution[14] and the North Carolina General Statutes restrict the General Assembly's authority to issue debt. Except in limited circumstances, [15] the General Assembly does not have the power to authorize the issuance of bonds secured by a pledge of the faith and credit of the State without a referendum approved by a majority of the voters voting in an election. These bonds are referred to as general obligation bonds because the general taxing power of the State secures the bonds. Article 5 of Chapter 159 of the General Statutes authorizes the State to use revenue bonds to finance a project without voter approval, but authorization by specific legislation is required under G.S. 159-88(c). Revenue bonds involve the pledge of non-tax revenues related to the project, such as parking fees for parking decks and water and sewer charges for water and sewer projects. In recent years, the State has used security interest indebtedness as a financing tool on a project-by-project basis.[16] This act provides the procedural and regulatory provisions needed to carry out security interest indebtedness. As with revenue bonds, authorization to use security interest indebtedness must be given by the General Assembly through specific legislation under G.S. 142-83, as enacted by this act.

Security interest indebtedness is commonly referred to as "certificates of participation". The act employs the term "special indebtedness" to cover the three forms that this type of debt can take: installment purchase (with or without certificates of participation), lease-purchase (with or without certificates of participation), and limited obligation bonds. In each case, the debt is non-voted. The particular form to be used for a given project[17] will depend on its size, the nature of the

---

[14] Article V, Sec. 3 of the North Carolina Constitution.
[15] The North Carolina Constitution allows the General Assembly to issue non-voted general obligation bonds in an amount not to exceed 2/3 of the amount by which it reduced its outstanding general obligation debt in the preceding biennium. Other Constitutional exceptions for non-voted general obligation debt include the following: to fund or refund an existing debt; to supply an unforeseen deficiency in the revenue; to borrow in anticipation of the collection of taxes due and payable within the current fiscal year to an amount not exceeding 50% of the taxes due; to suppress riots or insurrections, or to repel invasions; and to meet emergencies immediately threatening the public health or safety, as conclusively determined in writing by the Governor.
[16] S.L. 2000-143 authorized installment contract financing for a $13.5 million office building and wildlife education center for the Wildlife Commission and a $4 million Eastern Wildlife Education Center. S.L. 2001-84 authorized the State to enter into lease-purchase contracts to finance three prisons. S. L. 2002-161 authorized installment-financing contracts for guaranteed energy savings contracts for State buildings.
[17] The Act specifically defines the capital expenditures that may be financed as any combination of buildings, utilities, structures, and other facilities and property developments, including streets, landscaping, equipment and furnishing in connection with a building project; additions, renovations, and improvements

property and the improvement, and other circumstances. Based on these circumstances, one form or another of security interest debt may be the least expensive and most practical for the State to utilize.

Under security interest indebtedness, the debt is secured by a lien on or security interest in all or any part of the capital facilities to be financed, including all or part of any land on which improvements are to be constructed. If the project is a renovation, the entire existing facility as well as the improvement could serve as security. The value of the property securing the debt may exceed the amount of the debt and the financing of several capital projects may be jointly secured by liens on some or all of the capital facilities being financed.

Because the property serves as the security for the indebtedness, there would be no pledge of the State's faith and credit or taxing power. Thus, voter approval is not necessary for the borrowing. If the State defaulted on its repayments, no deficiency judgment could be rendered against the State, but the capital facilities that serve as security could be disposed of to generate funds to satisfy the debt. The State could choose not to appropriate funds to repay the debt, but such a decision would have negative consequences for the State's credit rating.

Before special indebtedness can be issued or incurred, the State Treasurer must certify that debt financing may be desirable for a specific project presented to it by the Department of Administration. Next, the Council of State must give preliminary approval. If preliminary approval is obtained, the Council of State must give final approval, setting out details such as the maximum amount to be financed, the maximum maturity, and the maximum interest rates. The maximum maturity may not exceed 40 years. The State Treasurer must approve the financing, finding that the amount to be borrowed is adequate and not excessive and will not require an excessive increase in any State revenues to provide for repayment, and that the special indebtedness can be incurred or issued on terms favorable to the State. Finally, the State Treasurer must report to the Joint Legislative Commission on Governmental Operations at least five days before any special indebtedness is issued or incurred.

Once it is determined that special indebtedness can be issued or incurred, the funds can be borrowed from a single entity in an installment purchase or lease purchase contract, generated by the issuance of limited obligation bonds, or borrowed under an installment financing contract by the sale of certificates of participation. A certificate of participation represents the holder's undivided interest in the right to receive the installment payments to be made by the State. If certificates of participation are issued, a nonprofit corporation will act as a straw person to facilitate the financing.

This act not only provides the statutory framework for special indebtedness as a financing tool of the State, but also provides the specific legislative authorization for up to $110 million of this type of indebtedness to be used for a new psychiatric hospital to be located in Butner. The new facility will consist of approximately 450,000 square feet and contain 432 beds. The indebtedness for this project cannot be incurred prior to July 1, 2004.

The new psychiatric hospital to be built in Butner will replace the current John Umstead Hospital in Butner and Dorothea Dix Hospital in Raleigh. These two psychiatric hospitals are outdated facilities that need extensive repairs and renovations. Even with significant repairs and renovations, the Secretary of Health and Human Services says that they would still be unable to

---

to existing facilities; land acquisition; infrastructure; and furniture, equipment, vehicles, machinery, and similar items.

support the latest mental health treatments. The Secretary believes that replacing the two hospitals with one regional facility will save an estimated $40.9 million a year by reducing costs. The act directs that any nonrecurring savings in State appropriations realized from the closure of the two current facilities that are in excess of the cost of operating and maintaining the new hospital will be credited to the Trust Fund for Mental Health, Developmental Disabilities, and Substance Abuse Services and Bridge Funding Needs. The act also directs that any recurring savings realized from the closure of the existing two hospitals shall be used for the payment of debt service on financing contract indebtedness for the construction of the new hospital. The act provides that the State Treasurer may require one or more reports evidencing the savings expected to be realized from the closure of existing psychiatric hospitals that are to be replaced by the project and the feasibility of the financing of the project.

The act also makes the following changes:

- Requires DHHS to maintain research programs currently being conducted at Dorothea Dix hospital and John Umstead hospital by the UNC Medical School and the UNC-Chapel Hill Psychology Department.
- Authorizes the county chosen as the site for the hospital to acquire the land by eminent domain and to convey the land to the State.
- Creates a study commission to consider the potential disposition of the State-owned real property encompassing the Dorothea Dix Hospital campus. The Dorothea Dix Hospital Property Study Commission must make recommendations on the options for sale of the property to the Joint Legislative Commission on Governmental Operations before any part of the property may be sold to a nongovernmental entity.

WATER & SEWER AUTHORITY SETOFF.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-333	**SB 529**	**Senator Hartsell**

AN ACT TO AUTHORIZE WATER AND SEWER AUTHORITIES TO USE THE SETOFF DEBT COLLECTION ACT.

OVERVIEW: This act adds water and sewer authorities to the list of local governments allowed to submit debts to the Department of Revenue for collection under the Setoff Debt Collection Act.

FISCAL IMPACT: This act has no impact on the State General Fund, and any fiscal impact on water and sewer authorities cannot be determined.

EFFECTIVE DATE: This act is effective January 1, 2004, and applies to income tax refunds determined on or after that date.

ANALYSIS: The act adds water and sewer authorities to the Setoff Debt Collection Act, under which the Department of Revenue diverts part or all of an individual's income tax refund to pay

a debt the individual owes to a State or local agency.[18] Thus, the debt the individual owes the agency is set off against the individual's income tax refund. Before January 1, 2000, the setoff program was open only to State agencies.[19] Now, counties and municipalities participate through a clearinghouse that submits debts on their behalf to the Department of Revenue. The clearinghouse was established pursuant to an interlocal agreement adopted under Article 20 of Chapter 160A of the General Statutes. Because there are so many local agencies, funneling their claims through a clearinghouse avoids placing an undue administrative burden on the Department of Revenue.

The act allows water and sewer authorities to participate in the setoff program through the clearinghouse in the same manner as counties and cities. Like counties and cities, a water and sewer authority will be authorized to submit its debts for collection by setoff only after providing the debtor with notice, an opportunity to be heard before the water and sewer authority, and an appeal process under the Administrative Procedure Act.

The creation of a water and sewer authority is one mechanism a county and city can use to address water and sewer needs. One or more counties, cities, sanitary districts, and other political subdivisions may create a water and sewer authority by adopting resolutions stating their intent to do so.[20] Each resolution must be adopted after notice is published and a public hearing is held on the issue. A political subdivision can withdraw from the authority at any time before obligations of the authority have been incurred. A water and sewer authority may issue revenue bonds; enter into installment finance contracts; impose rates, fees, and charges; and levy special assessments. Water and sewer authorities may also apply for grants from the Clean Water Revolving Loan and Grant Fund.

Currently there are fewer than a dozen water and sewer authorities in the State. A water and sewer authority may discontinue services to a customer whose account is delinquent for 30 days or more. However, this remedy is not sufficient when the customer moves out of the authority's service district or when the amount due is large enough that discontinuing the service would not result in the payment of the amount due.

REVENUE ADMINISTRATIVE CHANGES.

Session Law	Bill #	Sponsor
S.L. 2003-349	**SB 236**	**Senator Kerr**

AN ACT TO MODIFY THE DIVIDEND RECEIVED DEDUCTION FOR REGULATED INVESTMENT COMPANIES AND REAL ESTATE INVESTMENT TRUSTS TO ENSURE THAT ALL DIVIDENDS ARE

[18] The Setoff Debt Collection Act applies only to a debt that is at least $50 and to a refund that is at least $50. Debts collected through the Setoff Debt Collection Act are subject to both a State collection assistance fee and a local collection assistance fee. The amount of the local fee is $15. The amount of the State collection assistance fee is based on the Department's actual cost of collection debts under the Act during the preceding year. The current amount of that fee is $4.32.
[19] S.L. 1997-490.
[20] In certain circumstances, a nonprofit water company may also be a part of a water and sewer authority. See G.S. 162A-3.

TREATED UNIFORMLY, TO EXTEND FOR TWO YEARS THE DEPARTMENT OF REVENUE'S AUTHORITY TO OUTSOURCE THE COLLECTION OF IN-STATE TAX DEBTS, TO AMEND THE MOTOR FUEL TAX LAWS, AND TO MAKE VARIOUS ADMINISTRATIVE CHANGES IN THE TAX LAWS.

OVERVIEW: This act makes the following changes:

- It modifies the dividends received deduction for regulated investment companies and real estate investment trusts to ensure that all dividends are treated uniformly, effective for taxable years beginning on or after January 1, 2003, as recommended by the Revenue Laws Study Committee.
- It amends the reporting requirements regarding sales of seized property by the Secretary of Revenue to avoid duplicative filing of reports, as recommended by the Revenue Laws Study Committee.
- It extends until October 1, 2005, the Department of Revenue's authority to continue using private collection agencies for the collection of in-state tax debts, as recommended by the Revenue Laws Study Committee.
- It revises the secrecy provision regarding the disclosure of tax information to reflect the transfer of certain functions and personnel from the Division of Motor Vehicles to the Division of the State Highway Patrol of the Department of Crime Control and Public Safety, as recommended by the Revenue Laws Study Committee.
- It ensures that the monthly distribution of local sales and use tax proceeds is based on taxpayer data from filed returns, effective July 1, 2003, as recommended by the Revenue Laws Study Committee.
- It simplifies the process for making the local sales tax hold-harmless calculation by requiring the Department of Revenue, rather than the Office of State Budget and Management, to make the required projection of estimated tax proceeds, as recommended by the Revenue Laws Study Committee.
- It clarifies that the $20 filing fee for corporate annual reports is nonrefundable, as recommended by the Revenue Laws Study Committee.
- It clarifies the Research and Development tax credit, as requested by the Department of Commerce and the Department of Revenue.
- It directs the Revenue Laws Study Committee to form a group of tax professionals to work with the Department of Revenue to gather appropriate data to support an estimate of the fiscal impact of allowing corporations to file consolidated tax returns.
- It makes various changes to the motor fuel laws, as requested by the Motor Fuels Tax Division of the Department of Revenue. These changes include technical changes, conforming changes, and substantive changes.
- It codifies the administrative practice of allowing municipalities that sell electricity to exempt from their gross receipts for sales tax purposes those customer accounts that have

been determined to be worthless. The sales tax law clearly allows this exemption for other taxpayers.

FISCAL IMPACT: This act has no impact on the General Fund. Part 10 of this act is expected to affect the Highway Fund and other funds, as described in the analysis of Part 10, below. *(For a more complete fiscal analysis, see the Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: See Analysis.

ANALYSIS:

Part 1: Modify Dividends Received Deduction for RICs and REITs

Part 1 of this act repeals the dividend deduction provisions that previously applied to regulated investment companies (RICs) and real estate investment trusts (REITs), effective beginning with the 2003 tax year. The effect of the repeal is to conform to the federal dividend deduction for RICs and to the federal disallowance of any dividend deduction for REITs.

The federal dividends received deduction[21] is meant to reduce the negative effects of the double tax on C corporation profits distributed as dividends to corporate shareholders. Subject to certain exceptions and limitations, corporations may deduct 70% of the dividends received from another domestic corporation if the receiving corporation owns less than 20% of the distributing corporation. The deduction rises to 80% of dividends if the corporation owns 20% or more of the corporation paying the dividends, and to 100% if the corporations are "affiliated" under the Internal Revenue Code.

Certain investment companies, including mutual funds, may elect to be taxed as RICs. There are several conditions that must be satisfied to qualify for the election, including (i) 90% of gross income must be derived from dividends, interest, and gains on the sale of stock or securities and (ii) the corporation's investments must be diversified as prescribed by Section 851 of the Internal Revenue Code. A qualified RIC is taxed only on its undistributed income and is treated as a partial conduit for the income it earns. The fundamental premise of conduit treatment is that the RIC's income should be taxed only once, at the shareholder level, rather than to the RIC. Dividends received from RICs are eligible for the federal deduction, subject to additional limitations.[22]

A REIT is a corporation or trust that uses the pooled capital of many investors to purchase and manage real estate. REITs are traded on major exchanges just like stocks and are granted special tax considerations. A REIT pays yields in the form of dividends. It is required to pay out at least 90% of its income to shareholders and deducts the amount paid out, so there is no taxation at the REIT level. The shareholders pay tax on the dividends they receive.

Under prior law, G.S. 105-130.7 provided that a corporation may deduct the proportionate part of dividends received by it from a RIC or a REIT as corresponds to income received by the company or trust that would not be taxed by North Carolina if received directly by the corporation. In other words, dividends received by a corporation from a RIC or REIT were deductible to the extent that income received by that corporation from a RIC or a REIT would not be taxable by North Carolina.

---

[21] 26 U.S.C. § 243.
[22] Capital gain dividends received from a regulated investment company do not qualify for the deduction.

Section 1.1 of the act repeals G.S. 105-130.7.[23] In 2001, the General Assembly piggybacked the federal law with regard to the corporate dividends received deduction, by repealing G.S. 105-130.7(b) and G.S. 105-130.5(a)(7), which had provided corporations with an income tax deduction for dividends received by their subsidiaries. Adopting the federal approach simplified tax administration and compliance because the taxpayer is required to make fewer adjustments to taxable income in order to calculate State net income. The repeal under Section 1.1 of this act is consistent with this philosophy.

Dividends received from a RIC qualify for the federal dividends received deduction. Therefore, despite the repeal of G.S. 105-130.7 by this act, dividends received from RICs will continue to be deductible. The repeal of G.S. 105-130.7 also ensures that dividends received from a RIC are subject to the same rules concerning attribution of expenses as dividends received from other corporations.

Dividends from REITs do not qualify for the federal dividends received deduction. Therefore, under past law, dividends from REITs were taxed more favorably for State tax purposes than under federal law. The repeal of G.S. 105-130.7 ensures that the State treatment of dividends from REITs is the same as under federal law.

Part 2: Avoid Duplicative Reporting Requirements Regarding Sales of Seized Property

If any tax levied by the State and payable to the Department of Revenue has not been paid within 30 days after the taxpayer was given a notice of final assessment of the tax, the Department is authorized to collect the tax through the levy upon and sale of the taxpayer's real or personal property. The Department may direct the sheriff to levy upon and sell property or it may levy upon the property itself through one of its employees.

Most personal property seized by the Department of Revenue is for the payment of unauthorized substance taxes. When the Department employees levy upon the property without the use of the sheriff, the actual sale of the property is conducted by the Department of Administration's State Surplus Property section in accordance with the same notice and bidding procedures that apply to surplus property. The State Surplus Property section posts information related to bids and sales of seized property both online and in written format, which is available to the public.

The laws in Article 29B of Chapter 1 of the General Statutes, which apply to the sheriff when conducting the levy and sale of property, also apply to the Department of Revenue when it conducts the levy and sale of property. Among those provisions is G.S. 1-339.63, which states that the sheriff must file a report of sale with the clerk of superior court. Because the Department is subject to the same laws governing execution sales, it had construed this provision to mean that the Department must file a report of all sales of seized property with the clerk of superior court.

Because the Department of Administration makes a report of all property sold through the surplus property sales, the Department of Revenue did not see a need to file a report of sale with the clerk of court as well. Therefore, Section 2 of the act amends G.S. 105-242 to provide that the Department of Revenue is not required to file a report of sale of seized property with the clerk of superior court as long as the sale is otherwise publicly reported. This change became effective when the act was signed into law by the Governor on July 27, 2003. In addition to improving

[23] The repeal of G.S. 105-130.5(b)(3) and the changes in Sections 1.2 and 1.3 of the act are conforming changes.

efficiency by avoiding duplicative reporting, this change should also reduce costs since several clerks of court have begun charging a fee for filing these reports.

Part 3: Extend Authority to Use Collection Agencies to Collect In-state Tax Debts

Part 3 of this act extends for two years the Department of Revenue's authority to use private collection agencies to collect in-state tax debts. The Department of Revenue has permanent authority to use private collection agencies to collect out-of-state tax debts. The authority to outsource in-state debts was scheduled to expire on October 1, 2003. This act extends it to October 1, 2005. A tax debt is the amount of tax, interest, and penalties due for which a final notice of assessment has been mailed to the taxpayer after the taxpayer no longer has the right to contest the debt.

In 1999, the General Assembly authorized the Department of Revenue to initiate a pilot program whereby the Department would contract for the collection of tax debts owed by nonresidents and foreign entities. In September 2000, the Department, in conjunction with the Office of the State Auditor, began outsourcing some of its out-of-state tax debts. Between September 2000 and May 2001, it collected in excess of $12 million in out-of-state receivables using a combination of outsourcing and in-house collection techniques.

In 2001, the Department of Revenue was authorized to outsource out-of-state tax debts permanently and to outsource in-state tax debts for two years. When outsourcing tax debts, the Department is required to notify the taxpayer prior to submitting the debt to a collection agency. The taxpayer has 30 days after the notice is sent to pay the tax debt. If the debt remains unpaid at the end of the 30 days, then the debt may be outsourced to a collection agency. The collection agencies that contract to collect tax debts are prohibited from revealing confidential tax information. If a contractor reveals tax information, it is subject to a misdemeanor penalty, its contract is terminated, and it is barred from contracting again for five years.

Part 4: Revise Secrecy Provision To Reflect Transfer of DMV Enforcement to the State Highway Patrol

Under the tax secrecy law (G.S. 105-259(b)), an officer, employee, or agent of the State who has access to tax information in the course of service or employment by the State may not disclose the information to any other person except for the purposes expressly authorized by statute. One of the allowed purposes is to exchange information with the Division of Motor Vehicles of the Department of Transportation when the information is needed to fulfill a duty imposed on the Department of Revenue or the Division of Motor Vehicles.

In 2002, the General Assembly enacted legislation[24] that transferred to the Department of Crime Control and Public Safety the personnel and functions of the Department of Transportation Division of Motor Vehicles Enforcement Section for the regulation and enforcement of commercial motor vehicles, oversize and overweight vehicles, motor carrier safety, and mobile and manufactured housing. The transfer became effective January 1, 2004. In order to preserve the secrecy provision in existing law, Section 4 of the act replaces the phrase "Division of Motor Vehicles of the Department of Transportation" with the phrase "Division of the State Highway Patrol of the Department of Crime Control and Public Safety" because the State Highway Patrol will be performing the functions of the prior DMV Enforcement Section. This change became effective when the act was signed into law by the Governor on July 27, 2003.

Part 5: Base Local Sales Tax Distributions on Taxpayer Data

[24] S.L. 2002-190, as amended by Section 31.5 of S.L. 2002-159.

Pursuant to G.S. 105-472, the Secretary of Revenue makes distributions of local sales and use tax proceeds to cities and counties. In 2001, the General Assembly accelerated these distributions from quarterly to monthly, effective July 1, 2003. This Part provides that each monthly distribution will include tax proceeds for which a return has been filed. Proceeds received the month before the related return is expected to be filed will be held until the month the return is filed. Because the return contains information necessary for determining the distribution formula, distributing some taxes before the related return is filed would result in misallocation of the tax proceeds. This Part became effective July 1, 2003.

As of January 1, 2002, the threshold for taxpayers required to make semimonthly payments of sales and use tax was lowered from $20,000 to $10,000, substantially increasing the total amount of revenues received for processing by the Department on a semimonthly basis. For semimonthly filers, sales and use tax revenues collected between the 1st and 15th of the month must be paid by the 25th of the same month and sales and use tax revenues collected the remainder of the month must be paid by the 10th of the following month. The return for the two semimonthly periods is due 10 days later, on the 20th of the month. Consequently, for revenues received for the first half of each month, the return indicating where the funds should be distributed will not be received until the following month.

Section 5 of the act amends the local government sales and use tax distribution statute by stating that amounts collected by electronic funds transfer payments are included in the distribution for the month in which the return that applies to the payment is due. Semimonthly taxpayers are required to pay by electronic funds transfer. This amendment ensures that the Department of Revenue will distribute local sales and use tax proceeds only after they have the necessary information provided on semimonthly returns.

Part 6: Simplify the Procedure for Hold-Harmless Calculation

In 2001, the General Assembly authorized all counties of the State to levy a third one-half cent sales tax.[25] The same legislation also provided local governments an annual hold-harmless distribution from the State's General Fund to ensure that none of them would lose money when the local government reimbursements are repealed.[26] The hold-harmless distribution provides that if a county or city's estimated proceeds from the third half-cent tax would be less than the amount it would have gotten under the repealed reimbursements, it will receive a payment equal to the difference. If a county or city's estimated gain from the third half-cent tax exceeds its repealed reimbursement amount, it does not receive a hold-harmless payment from the State. The hold-harmless payment would be the same even if a county had not levied the new tax.

Under prior law, G.S. 105-521(b) directed the Office of State Budget and Management (OSBM) and the Fiscal Research Division of the General Assembly to each submit to the Secretary of Revenue and the General Assembly, by May 1 of each year, a projection of the estimated amount that local governments would be expected to receive from the levy of the third one-half cent local sales and use tax during the upcoming fiscal year. Then, by September 15 of each year, the Secretary of Revenue is required to calculate the hold-harmless distribution amounts, if any, based on the projections and to distribute the funds. If the Secretary does not use the lower of the two projections when making the calculation, the Secretary must report the reasons for this decision

---

[25] Effective July 1, 2004, all 100 counties will have adopted the local option third one-half cent sales tax authorized by Section 34.14 of S.L. 2001-424.

[26] The 2003 General Assembly limited this distribution to two years, 2003 and 2004, but stated the intent that it would continue through 2012. *Part 37 of S.L. 2003-284*.

to the Joint Legislative Commission on Governmental Operations within 60 days after receiving the projections.

Part 6 of the act requires the Department of Revenue, rather than the OSBM, to provide the estimate. From a practical standpoint, the data needed to make the projections are housed within the Department of Revenue. Making this change simplifies the process by eliminating the need for the OSBM to first obtain the data from Revenue and then make the necessary projection. This change became effective when the act was signed into law by the Governor on July 27, 2003.

Part 7: Clarify That the Filing Fee for an Annual Report is Nonrefundable

G.S. 55-1-22 sets out the fees for filing certain documents with the Secretary of State, including documents such as corporations' articles of incorporation, articles of dissolution, designation of a registered agent, etc. Included on the list is a $20.00 fee for filing an annual report. Each corporation authorized to do business in this State is required to file an annual report, which, unlike the other documents in G.S. 55-1-22, must be delivered to the Secretary of Revenue. [27] The annual report contains the name of the corporation, its address, the name and address of its registered agent, the names and addresses of its principal officers, and a brief description of the nature of its business. Annual reports are due by the due date for filing the corporation's income and franchise tax return. As a practical matter, the annual reports are typically attached to the return along with a check for the filing fee.

Part 7 of the act amends G.S. 55-1-22 by adding a new subsection stating that the annual report fee of $20.00 is nonrefundable. This change became effective when the act was signed into law by the Governor on July 27, 2003. The purpose of this change is to codify the Department of Revenue's existing policy that annual report fees are not refundable. G.S. 55-1-22 does not address whether or under what circumstances the filing fees are refundable. However, it is the policy and practice of the Secretary of State to issue refunds for those fees, if requested and depending on the circumstances. Specifically, if the Secretary of State's office has not begun to process or review the document for which the refund is requested, then it will usually refund the filing fee at the filer's request, regardless of whether the fee has been deposited. The Department of Revenue's policy with regard to the annual report is that the fee is nonrefundable.

Part 8: Clarify Eligibility for R&D Credit

The William S. Lee Quality Jobs and Business Expansion Tax Credits, in Article 3A of Chapter 105 of the General Statutes, are allowed only to certain types of businesses.[28] For most of the eligible business types, the law specifies that the taxpayer's primary business must be the designated business. For a few of the business types, including computer services, the law requires only that the taxpayer's primary activity at an establishment be the designated business. In addition, to qualify for the credits, the jobs, investment, or activity must be used in the designated business or activity.

One of the credits under the Bill Lee Act is for research and development. Generally, a taxpayer that claims a federal income tax credit for increasing research activities under section 41 of the Internal Revenue Code is allowed a State credit as well for the eligible research activities conducted

---

[27] Nonprofit corporations are exempt from this requirement and insurance companies are required to deliver their annual reports to the Secretary of State.

[28] Central office or aircraft facility; air courier services or data processing; manufacturing, warehousing, or wholesale trade; computer services or electronic mail order house; customer service center; or warehousing at an establishment.

in North Carolina. The amount of the credit varies, depending upon which type of federal credit is claimed.[29] Under the Department of Revenue's interpretation of the Bill Lee Act, to satisfy the eligible business requirements, the jobs, investment, and activity must be located at an establishment where the primary activity is an eligible business or eligible activity.

The question arose whether a taxpayer's qualified research expenditures must have occurred on the premises of an establishment that performed an eligible industry activity. Under the Department's past interpretation of the law, the answer was yes. Part 8 of the act purports to clarify the original intent of the General Assembly that research and development activities need not be on the same premises as an eligible activity. It extends this clarification to the legislature's recent relaxation of the eligible business requirements surrounding computer services. The act provides that if the primary activity of an establishment of the taxpayer in this State is computer services, then the taxpayer's qualified research expenditures in this State are considered to be used in computer services. For all other taxpayers, the expenditures are considered to be used in the primary business of the taxpayer. The changes are retroactive to the years the related provisions were effective, 2001 and 1996, respectively.

Part 9: Revenue Laws to Study Data Needed to Estimate Impact of Consolidated Returns

Whenever study committees discuss tax modernization, one of the issues that arises is the State's corporate income tax structure. The corporate tax structure has remained substantially unchanged for years. In the course of these discussions, the Fiscal Research Division and the Tax Research Division of the Department of Revenue have been asked what the fiscal consequences would be if the State allowed consolidated corporate income tax returns. Currently, neither has enough information to form a credible estimate.

Part 9 of the act directs the Revenue Laws Study Committee to establish a study group composed of tax professionals and representatives of the Department of Revenue to gather appropriate data that will allow the Department to estimate the fiscal impact of consolidated returns. Part 9 becomes effective with the 2003 tax year and expires in two years.

Part 10: Motor Fuel Tax Changes

This Part makes several changes to the motor fuel tax laws, effective January 1, 2004. It provides the Department of Revenue with greater enforcement capabilities, it protects the State's interest with a shorter temporary permit for motor carriers and a higher bond requirement for distributors, and it makes the motor fuel statutes more equitable by extending the inspection tax to dyed diesel fuel. It also makes several technical and administrative changes.

This Part strengthens the Division of Motor Fuel's enforcement capabilities in the following ways:

- Sections 10.3 and 10.4 require a taxpayer that imports motor fuel from an out-of-state terminal into North Carolina to be licensed as a distributor. Past statutes made the distributor's license optional. If the product was being imported, the taxpayer was required to register as a licensed importer but none of the importer categories fit a taxpayer obtaining tax-paid fuel from an out-of-state terminal. For example, the taxpayer would not owe tax directly to the Department, but an importer's license requires the taxpayer to file a return on a monthly basis. The Department of Revenue had determined that a

[29] The credit amount is 5% of the State's apportioned share if the taxpayer claims the credit under section 41(a) of the Code or 25% if the taxpayer claims the alternative incremental credit under section 41(c)(4) of the Code.

distributor's license, which allows the taxpayer to import and export the product but does not require periodic returns, was more appropriate. The Department had implemented this change administratively; Sections 10.3 and 10.4 change the statutes accordingly. Section 10.5 removes the requirement that an applicant for licensure as a distributor or an importer notify the Department of any states to which it plans to export or from which it plans to import motor fuel, because there is no means for tracking this information.

- Section 10.7 enables the Department to deny a motor fuel license to a taxpayer that fails to file a return or pay any tax debt due under Chapter 105 or 119 of the General Statutes.
- Section 10.10 clarifies the Department's authority to investigate illegal use of non-tax-paid fuel for highway use. One way the Department investigates alleged violations is through undercover operations. Investigators will film an operation in which an agent will drive a State truck to a retailer and ask to fill it with dyed (non-tax-paid) fuel. It would be a violation for the retailer to permit the purchase of non-tax-paid fuel for highway use. Technically, however, the fuel in this situation is not taxable because G.S. 105-449.88 exempts motor fuel sold to the State for its use. This section specifies that it is not a valid defense to a violation of the motor fuel tax statutes that the State is exempt from motor fuel tax.
- Sections 10.12 through 10.14 require kerosene terminal operators to be licensed and to file reports. Currently, jet fuel and kerosene are being delivered from the pipeline directly to airports. This method of delivery bypasses the motor fuels terminals and thereby bypasses the record-keeping requirements that help ensure that the Department can uniformly enforce the tax statutes. Kerosene terminal operators are currently subject to tax. The Internal Revenue Service licenses these terminals and the terminal operators must report deliveries to the airports. These sections do not subject the airports to greater tax liability, but require them to be licensed and to file reports so the Department can identify the taxpayers and ensure that they are paying the requisite amount of tax. As a result, the State should begin collecting an unknown amount of inspection tax revenue that was otherwise falling through the cracks. Section 10.16 provides a licensed kerosene distributor the same benefits of deferred payments and discounts that a licensed motor fuel distributor receives. Finally, these sections reorganize and modernizes the language of the kerosene licensing statutes.

Section 10.1 reduces from 20 days to 3 days the maximum time a motor carrier can operate in the State using a temporary permit, rather than obtaining a license. A licensed motor carrier pays tax based on the number of miles driven in the State. The cost of a temporary permit is $50. It would take approximately 1,000 miles to exceed the $50 temporary permit fee in taxes. A motor carrier can drive far more than 1,000 miles in 20 days and thus could get many "free" miles by obtaining a temporary permit. Three days is a better approximation of the time in which a motor carrier would use $50 worth of miles. The Department surveyed numerous states and determined that, of the 26 states where permit information was available, 7 states issued 3-day permits, 5 states issued permits for between 4 and 7 days, 5 states issued 10-day permits, 1 state issued a 13-day permit, and 1 state issued a 20-day permit. Seven states did not issue temporary permits. Section 10.1 could increase Highway Fund revenues by increasing the number of permits issued or the number of permanent licenses issued. No estimate is available for the permit volume.

Section 10.6 increases the cap on the bond amount of motor fuel licensees to $500,000. The most recent bond cap amount of $250,000 was last adjusted in January 1991. The Department believes

the maximum bond amount should be increased to $1 million. Since 1991, licensees' tax liabilities have increased to a point that 28% of the current licensees have a monthly tax liability of over $250,000, 18.3% over $500,000, 13.17% over $750,000, and 8.48% over $1 million. In the last six months there have been four bankruptcy cases, two of which exceeded the taxpayer's bond amount. In one of these cases, the potential loss to the State is in excess of $1 million after payment from the surety company. A survey of the surrounding states shows that South Carolina, West Virginia, Kentucky, and Louisiana do not have a cap; Florida has a $100,000 cap; Virginia has a $300,000 cap; Georgia has a $150,000 cap; and Maryland has a $500,000 cap.

Section 10.15 imposes the inspection tax on dyed diesel. The Department of Revenue estimates that this change will yield an additional $1.2 million of inspection tax a year. The inspection tax is currently imposed on all other fuel types at the rate of one-fourth of one cent per gallon[30] including dyed kerosene, which, like dyed diesel, is used for heating and other non-highway purposes. The Department conducts monthly on-road investigations for the misuse of dyed fuels, including dyed diesel. Each sample of fuel withdrawn must be tested by the Department of Agriculture for evidence of dye in the fuel.

Lastly, Part 10 makes the following technical and administrative changes:

- Section 10.2 clarifies that the definition of a tank wagon includes vehicles designed to carry at least 1,000 gallons of motor fuel. The past definition appeared to exclude those vehicles that can carry a total of more than 1,000 gallons but have individual tanks that are less than 1,000 gallons each.
- Section 10.8 conforms the statutes with the legislative change made last session to exempt local governments from the motor fuel tax.
- Section 10.9 removes the requirement that shipping documents must be machine-printed by the operator of a bulk plant. This requirement was imposed inadvertently when the statutes were reorganized. Bulk plant operators do not have the necessary equipment and the Department does not need them to provide machine-printed documents. The act does not change the requirement that terminal operators must machine-print shipping documents.
- Section 10.11 clarifies that storage facilities for dyed kerosene must be clearly marked for non-tax use only, just like the storage facilities for dyed diesel fuel. It also provides that the dispensing device for dyed fuel must be clearly marked as non-tax use only.

Part 11: Charge-off of Bad Debts

Retailers pay sales tax on their gross sales. If accounts of purchasers are found to be worthless and are charged off for income tax purposes, then the retailer may deduct those sales from its gross sales. Municipalities that sell electricity are considered to be retailers and pay State sales tax on their gross sales of electricity. The practice of the Department of Revenue was to allow the municipalities to charge-off their bad debts as other retailers are allowed to do. However, municipalities could not technically meet the conditions of the statute because they do not pay federal income tax. This Part conforms the statute to the Department's practice by clarifying that

[30] The inspection tax is imposed regardless of whether the fuel is exempt from the per-gallon excise tax. The proceeds of the tax are applied first to the cost of administering the Motor Fuels Tax Division. The remainder is credited to the Commercial Leaking Petroleum Underground Storage Tank Cleanup Fund and the Noncommercial Leaking Petroleum Underground Storage Tank Cleanup Fund.

municipalities that sell electricity may deduct worthless accounts from their gross sales for sales tax purposes. Worthless accounts are determined in the same way as they would be determined under the Internal Revenue Code if municipalities were taxed. As under current law, the accounts that are collected afterwards must be added back to gross sales. Part 11 became effective when the act was signed into law by the Governor on July 27, 2003.

MODIFY UNC BOND LAW.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-357	**SB 633**	**Senator Clodfelter**

AN ACT TO REVISE THE UNIVERSITY OF NORTH CAROLINA SPECIAL OBLIGATION BOND LAW.

OVERVIEW: This act modifies the special obligation bond law that applies to The University of North Carolina system (UNC). It makes the maximum maturity for special obligation bonds more consistent with other University debt obligations by increasing the maximum maturity of special obligation bonds from 25 years to 30 years. It also increases the maximum maturity for special obligation bond notes from 2 years to 30 years, which provides UNC with greater flexibility to provide interim financing at lower costs.

FISCAL IMPACT: This act does not have an impact on the General Fund.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 1, 2003.

ANALYSIS: In 2000, the General Assembly authorized the UNC Board of Governors to issue special obligation bonds payable from any sources of income or receipts of the Board of Governors or a constituent or affiliated institution, but not including tuition payments or appropriations from the General Fund from State revenues. The bond proceeds can be used for construction, improvement, and acquisition of capital facilities located at UNC constituent and affiliated institutions. The maximum maturity on the bonds was set at 25 years. Special obligation bonds are not general obligation bonds and thus are not required to be approved by the voters. They are not secured by the full faith and credit or the taxing power of the State; a statement to this effect appears on the face of the bonds. Property cannot be pledged to secure the bonds.

The UNC special obligation bonds can be issued only for projects specifically authorized by the General Assembly. In submitting proposed special obligation bond projects to the General Assembly for approval, the Board of Governors is required to justify the need for each project and to itemize the cost of the project, the estimated operating costs upon completion, and the sources and amounts of resources to be pledged for repayment of the bonds. The Board of Governors can issue special obligation bonds for a project only if the board of trustees of the institution at which the project will be located has approved the project.

This act provides UNC with greater flexibility in amortizing its debt obligations and in structuring interim financing debt obligations. The act does not authorize the University to issue additional debt beyond currently authorized levels and it maintains the requirement that the University obtain explicit approval from the General Assembly to issue debt.

The act changes the maximum maturity on special obligation bonds from 25 years to 30 years. This change makes the maximum maturity of special obligation bonds more consistent with other University debt obligations. The maximum maturity for University revenue bond debt issued for student housing and activities, physical education, and recreation[31] is 50 years. The maximum maturity for University revenue bond debt issued for the Centennial Campus, the Horace Williams Campus, and Millennial Campuses[32] is 40 years.

The act also makes it easier and less costly to provide short-term, interim financing for bond projects authorized by the General Assembly. Under prior law, interim financing was provided through a bond anticipation note that would be issued for each individual project. A bond anticipation note could not exceed two years. The University proposed a less costly method of interim financing under which there would be a one-time issuance of notes. Under the program, interim financing for projects would be drawn down from a line of credit as needed and repaid by draws from the permanent, long-term bond proceeds. This approach creates a pool of resources to provide interim financing that can be used multiple times for many projects. To accomplish this method of pooled financing, the act extends the maximum maturity of bond anticipation notes from 2 to 30 years. Longer-term bond anticipation notes reduce the issuance costs associated with notes that must be reauthorized every two years and allow for better interest rates to be obtained through the long-term market. To ensure that the bond anticipation note proceeds are used for short-term, interim financing needs only, the act provides that if the Board of Governors issues a bond anticipation note for a term in excess of three years, no individual project may be funded from the proceeds of the note for longer than three years.

UNC - NONAPPROPRIATED CAPITAL PROJECTS.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-360	**SB 705**	**Senator Kerr**

AN ACT TO AUTHORIZE THE CONSTRUCTION AND THE FINANCING, WITHOUT APPROPRIATIONS FROM THE GENERAL FUND, OF CERTAIN CAPITAL IMPROVEMENTS PROJECTS OF THE CONSTITUENT INSTITUTIONS OF THE UNIVERSITY OF NORTH CAROLINA.

OVERVIEW: This act authorizes the construction of numerous projects by The University of North Carolina. The projects will be financed through revenue bonds and special obligation bonds. No funds from the General Fund will be appropriated to finance the projects. In addition to bond-financing, the act authorizes the construction and financing of three capital projects at UNC-Chapel Hill through lease arrangements with nonprofit corporations.

FISCAL IMPACT: This act will require 12 new positions at a cost to the General Fund of roughly $500,000 a year beginning January 1, 2005. These positions are required for increased

[31] Article 21 of Chapter 116 of the General Statutes.
[32] Article 21B of Chapter 116 of the General Statutes.

operating costs resulting from The Rizzo Center Expansion and the McColl Building Addition at UNC-Chapel Hill.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 1, 2003.

ANALYSIS: The Board of Governors of The University of North Carolina can issue two types of self-liquidating bonds, revenue bonds and special obligation bonds. Tax revenues may not be used to pay back either type of bond. Article 21 of Chapter 116 of the General Statutes authorizes the Board of Governors to issue revenue bonds for the types of projects enumerated in the Article. The types of projects for which revenue bonds may be issued include educational buildings, dormitories, recreational facilities, dining facilities, student centers, health care buildings, parking decks, etc. The revenue bonds are payable from rentals, charges, fees, and other revenues generated by the facility. Article 21B of Chapter 116 of the General Statutes authorizes the Board of Governors to issue revenue bonds for projects at the Centennial Campus, the Horace Williams Campus, and Millennial Campuses. The revenue bonds are payable from rentals, charges, fees, and other income generated by the facility. Article 3 of Chapter 116D of the General Statutes authorizes the Board of Governors to issue special obligation bonds payable with any sources of income or receipts of the Board of Governors or a constituent or affiliated institution, but not including tuition payments or appropriations from the General Fund from State revenues. In this instance, the bond proceeds could be used for construction, improvement, and acquisition of any capital facilities located at UNC constituent and affiliated institutions.

The purpose of this act is to authorize the construction and financing of the capital improvements projects at various constituent institutions of The University of North Carolina. The projects authorized in the act may not be financed with funds appropriated from the State's General Fund, but may be financed with gifts, grants, receipts, self-liquidating indebtedness, other funds available to the constituent institutions, or a combination of any of those financing methods. The new self-liquidating projects that the Board of Governors may finance with revenue bonds, special obligation bonds, or both are listed in Section 2 of the act. Section 3 authorizes revenue bonds and special obligation bonds to be used for eight capital improvements projects for which general obligation bond financing was previously authorized in S.L. 2000-3. This act provides additional options for financing the projects.

Section 4 authorizes the Director of the Budget, at the request of the Board of Governors, to authorize cost increases or decreases, or changes in the method of financing for the projects authorized by the act. The Director of the Budget may consult with the Joint Legislative Commission on Governmental Operations, but consultation is not required.

The current law governing UNC special obligation bonds requires that the specific projects and their costs be set forth in legislation approved by the General Assembly and that the maximum amount of special obligation bonds to be issued to finance the specific projects listed be stated. Sections 2 and 3 set forth the specific projects and their costs. Section 5 expressly states that the maximum principal amount of special obligation bonds to be issued shall not exceed the amounts listed in Sections 2 and 3 plus $15 million for related additional costs for which bond proceeds are routinely used, such as issuance expenses, funding of reserve funds, and capitalized interest.

Section 6 authorizes the financing of three projects at UNC-Chapel Hill through lease arrangements with nonprofit corporations. Over the years, the University system has used lease arrangements with nonprofit corporations to construct facilities necessary to academic life, student

support services, physical education and recreation, athletics, and other programs when the facilities are financed by major gifts. The process followed by the State is as follows:

- The State, following guidelines established by the Department of Administration and with Council of State approval, leases land to the nonprofit corporation for the period of time required for the construction of the facility.
- The nonprofit corporation, after review and approval of construction plans by the State Construction Office, builds the facility. Each project is subject to review by the Department of Insurance to ensure that it meets State Building Code requirements.
- When construction is completed and the facility has been deemed acceptable to the State, the lease expires and the land returns to the State's control, along with the newly constructed facility.

The difference between the three projects named in Section 6 of the act and other projects constructed in this manner is that the act authorizes the University to issue long-term debt as a means of financing the indebtedness.

MODIFY STATE FINANCING LAWS.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-388	**SB 679**	**Senator Hoyle**

AN ACT TO MODIFY THE PUBLIC FINANCING LAWS OF THE STATE.

OVERVIEW: This act makes the following changes to the State public financing laws, as requested by the State Treasurer's Office:

- Authorizes the use of out-of-state banks as well as in-state banks as trustee under a revenue bond order or a trust agreement securing revenue bonds
- Allows term bonds with sinking fund redemptions to satisfy the statutory requirements for maturities
- Exempts refunding bonds from the "four times" rule
- Allows local governments to use installment purchase debt to refinance debt for purposes for which installment debt is currently authorized
- Clarifies and regulates the authority of a local government to enter into an interest rate swap agreement in connection with bond issuance

FISCAL IMPACT: No impact.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 7, 2003.

ANALYSIS: Section 1 of the act is in response to the recent decline in the number of North Carolina financial institutions offering trustee services as a result of mergers and financial institutions selling their trust businesses. Allowing financial institutions outside of North Carolina

to serve as trustee under a revenue bond order or a trust agreement securing revenue bonds gives issuers more choices and also would allow issuers to continue doing business with the same trustee staff person who becomes employed by an out-of-state trustee as a result of a merger or sale of a North Carolina financial institution's trust business. Revenue bonds are bonds that are secured by and repaid from revenues generated by the facility being financed. For example, parking lots generate parking fees, dorms generate dorm fees, and water and sewer infrastructure generate water and sewer fees.

Under current law, the Local Government Bond Act requires each issue of bonds to mature in annual installments with the first installment being paid no more than three years after the date of the bonds. This means that the only type of bonds that can be issued is serial bonds, in which some mature each year. Section 2 of the act would change the requirement so that the bonds themselves do not have to mature in annual installments as long as the principal is paid in annual installments beginning within three years after the date of the bonds. Thus, the purpose of the requirement, to provide for regular payments on the debt, is still met. This will allow a choice between serial bonds as under current law and term bonds with "sinking fund" redemptions. Underwriters have indicated that allowing term bonds in addition to serials would expand the investor base by attracting more institutional investors, thereby possibly resulting in lower rates to the issuer.

Section 2 also exempts refunding bonds from the four-times rule and makes clarifying changes to the statute. The four-times rule provides that no principal installment may be more than four times as great as the smallest prior principal installment. The application of this rule to advance refundings where the refunded bonds are scheduled to mature several years from the issue date means that issuers are often forced to start the maturity of the refunding bonds sooner than would otherwise be required and also may be required to refund some non-callable bonds. This results in increased and unnecessary costs to issuers.

Section 3 of the act amends the language of the local government installment purchase statute to clarify that local governments may use installment contracts to refinance debt originally incurred for purposes for which installment contracts are currently authorized. Installment purchase financing is a type of debt in which a government enters into an installment contract secured by a security interest in the building constructed or renovated. Unlike the issuance of general obligation bonds, installment purchase financing is not subject to a vote of the people. Certificates of participation may be issued as part of the installment purchase financing. A certificate of participation is a document setting out the share of the government's debt that is owed to the holder of the certificate. In practice, the holder receives interest and principal payments in a manner similar to interest and principal payments on a bond issued by the borrowing unit.

According to the State Treasurer's Office, some North Carolina local governmental units have entered into interest rate swap agreements in connection with the issuance of bonds. While there is no express statutory authority, most, if not all, law firms with a North Carolina bond counsel practice have concluded that local governmental units are authorized to enter into these agreements based on their general power to contract. Several questions have remained, however, with respect to certain terms of the swap documentation required by financial institutions. Section 4 of the act makes the following changes:

- Specifically authorizes governmental units to enter into swap agreements in connection with the issuance of obligations, including the details of the terms and conditions.

- Authorizes local governmental units to pledge collateral (concurrently with the entry into the swap transaction or in the future) to secure the local governmental unit's obligations under the swap agreement.

The act provides that a swap agreement is subject to Local Government Commission approval if a local government or other entity that is under the supervision of the Commission enters into it, or if the underlying debt to which it relates is subject to approval by the Commission. Approval is not required for swap agreements relating to conduit financing, where a government incurs debt on behalf of a private entity.

PROPERTY TAX CERTIFICATION PROCEDURE.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-399	**HB 972**	**Representative Culpepper**

AN ACT TO ALLOW AN INTERNET-BASED ALTERNATIVE TO PROPERTY TAX CERTIFICATION PROCEDURES.

OVERVIEW: This act authorizes the governing body of a county or municipality to adopt an ordinance allowing a person to rely on information as to the amount of taxes due on real property obtained from the taxing unit's Internet website to the same extent as a written certification issued by the tax collector.

FISCAL IMPACT: This act has no fiscal impact.

EFFECTIVE DATE: The act became effective when signed into law by the Governor on August 7, 2003.

ANALYSIS: G.S. 105-361 provides that upon request of specified persons - including an owner or occupant of real property, a person holding a lien or legal interest in the property, a person with a contract to purchase or lease the property, or a person or firm that has contracted to make a loan secured by the property – the tax collector must furnish a written certificate stating the amount of any taxes and special assessments for the current year and any amounts still pending collection from prior years. When the certificate is issued, all taxes and special assessments that have accrued against the property for the period covered by the certificate cease to be a lien against the property, except to the extent of taxes and special assessments stated to be due in the certificate. This is applicable to all persons and entities who obtain the certificate and who rely on the certificate by either paying the amount of taxes and assessments stated in the certificate to be a lien on the real property, purchasing or leasing the real property, or lending money secured by the real property. The tax collector is liable on the collector's bond for any loss to the taxing unit arising from an understatement of the tax and special assessment obligations in the preparation of a certificate.

This act amends the existing statute concerning the tax collector's statement of the amount of taxes due on real property by adding a provision that allows a person to rely on information obtained from an Internet website maintained by the taxing unit if the governing body adopts an ordinance allowing it. If an ordinance is adopted, then a person may rely on information obtained from the website as if it were a traditional certificate. The ordinance may provide for procedural provisions by which the tax collector may ensure full and accurate payment of all taxes,

assessments, and obligations certified via the Internet website. The ordinance may also include disclaimers and the person may only rely on the information obtained from the website to the extent allowed by the disclaimers. The disclaimers must be posted on the website and could include such matters as the date on which the information was posted, the date as of which the information is current, and any special instructions and procedures for accessing complete and accurate information. If the ordinance adopted provides for disclaimers, then the tax collector would not be liable for any loss to the taxing unit arising from an understatement of the tax or special assessment obligations contained in the information available on the website. A person who relies on the website information must keep and present a copy of the information as if the copy were a traditional written certificate issued by the tax collector.

MANUFACTURED HOUSING.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-400	**HB 1006**	**Rep. Hunter, Barnhart, (Primary Sponsors)**

AN ACT TO GRANT GREATER CONSUMER PROTECTION TO RESIDENTS OF MANUFACTURED HOUSING IN NORTH CAROLINA, TO CLARIFY THE SALES TAX ON MODULAR HOMES, AND TO ESTABLISH MINIMUM CONSTRUCTION AND DESIGN STANDARDS FOR SINGLE-FAMILY MODULAR HOMES.

OVERVIEW: This act makes the following changes to laws affecting manufactured homes and modular homes:

- Expands the definition of manufactured homes that qualify as real property under the property tax laws to include manufactured homes on land leased by the manufactured homeowner for a term of at least 20 years and where the lease expressly provides for disposition of the manufactured home upon termination of the lease. This change makes it easier for the owners of manufactured homes placed on the leased land to qualify for Freddie Mac mortgages.
- Authorizes the Division of Motor Vehicles to charge a $5.00 fee for the cancellation of a certificate of title to a manufactured home that qualifies as real property.
- Requires the owner of a manufactured housing community to give prior notice to each owner of a manufactured home in the community if the community owner intends to convert the community to another use that would require movement of the homes.
- Expands consumer protections for purchasers of manufactured homes.
- Requires a criminal history check on an applicant for licensure as a manufactured home manufacturer, dealer, salesperson, or set-up contractor.
- Imposes a 2.5% sales and use tax rate on the sales price of each modular home. This replaces the current practice of applying two different sales tax rates based on whether the modular home is built on a steel frame or a wood frame. This change in sales and use tax

treatment of modular homes was proposed by the North Carolina Manufactured Housing Institute (NCMHI) and approved by the Department of Revenue. Both the NCMHI and the Department agreed that the change would simplify the administration of sales and use tax on modular home transactions. The act does not amend the sales and use tax treatment of manufactured homes.

- Amends the definitions of manufactured home and modular home. A manufactured home is a dwelling manufactured to meet or exceed the specifications contained in the Federal Manufactured Housing Code issued by the United States Department of Housing and Urban Development. A modular home is a factory-built dwelling that must (1) be manufactured to meet or exceed the specifications contained in the North Carolina Residential Building Code, and (2) bear a seal or label issued by the Department of Insurance that the modular home meets or exceeds statutory minimum standards for modular homes as enacted in the act.
- Imposes minimum standards for modular homes.

FISCAL IMPACT: The change in the sales tax treatment of modular homes and the $5.00 fee imposed by the North Carolina Division of Motor Vehicles (DMV) are expected to increase revenues to the General Fund and the DMV as follows:

	FY 2003-04	FY 2004-05	FY2005-06	FY 2006-07	FY 2007-08
REVENUES					
General Fund	$579,425	$1,279,488	$1,279,488	$1,279,488	$1,279,488
DMV	17,075	17,075	17,075	17,075	17,075

The change in the sales tax treatment of modular homes is expected to increase sales tax revenues to local governments over the same period as follows:

	FY 2003-04	FY 2004-05	FY 2005-06	FY 2006-07	FY 2007-08
REVENUES					
Local Gov.	$59,125	$119,712	$119,712	$119,712	$119,712

These numbers assume that 70% of current modular homes are sold "on-frame."[33] If the actual "on-frame" percentage is below approximately 50%, the State and local governments will see a net loss. In addition, if growth in the "on-frame" home market occurs at a faster rate than the "off-frame" market, the State will also see a revenue loss. *(For a more complete fiscal analysis, see the Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: See Analysis.

ANALYSIS:

Expansion of Definition of Manufactured Homes that Qualify as "Real Property"

Under prior law, a manufactured home was considered real property for property tax purposes only if it was a residential structure; had the moving hitch, wheels, and axles removed; and was

[33] An explanation of "on-frame" modular homes is under the subheading, *Sales and Use Tax Treatment of Modular Homes*, found in the analysis of the act.

placed upon land owned by the owner of the manufactured home. The owner of a manufactured home that had been placed on property owned by that owner could convey or encumber the property and manufactured home by a mortgage. If the manufactured home had not yet been placed upon the property and the owner desired to convey or encumber the property with a mortgage, the owner could record in the county register of deeds office a declaration of intent to affix the manufactured home to the real property. If the owner of a manufactured home did not own the land on which the home was located, then the manufactured home was considered tangible personal property for property tax purposes.

If a manufactured home qualifies as tangible personal property, then it is subject to the same registration and certificate of title requirements that apply to motor vehicles. If a certificate of title has been issued for a manufactured home and the home subsequently qualifies as real property, the owner must surrender the certificate of title and file an affidavit with the Division of Motor Vehicles (DMV) indicating that the home meets the statutory definition of real property. The DMV must cancel the title to the manufactured home once the affidavit is filed. The owner of the manufactured home must also file a copy of the affidavit with the register of deeds in the county where the real property and affixed manufactured home are located.[34]

Section 4 of the act expanded the definition of a manufactured home that qualifies as real property to include a manufactured home on land leased by the manufactured homeowner for a term of at least 20 years if the lease expressly provides for disposition of the manufactured home upon termination of the lease. Sections 1, 2, and 3 of the act made conforming changes to the motor vehicle laws and the register of deed laws that require the manufactured homeowner to file an affidavit with the DMV and register of deeds when the manufactured home meets this expanded definition. Section 1 of the act authorizes the DMV to charge a $5.00 fee for the cancellation of a certificate of title to a manufactured home.

Sections 1 through 4 of the act became effective when signed into law by the Governor on August 7, 2003.

Notice of Conversion of Manufactured Home Communities

Section 5 of the act adds a new section to the laws governing landlords and tenants in Chapter 42 of the General Statutes. This new section requires the owner of a manufactured housing community to give 180 days prior notice to each owner of a manufactured home in the community if the community owner intends to convert the community to another use that would require removal of the homes. If the closure is due to a valid order of the State or a local government, then notice of the closure must be given within three days after the date of the order. A manufactured home community is defined as a parcel of land designed to accommodate at least five manufactured homes.

Section 5 of the act is effective October 1, 2003.

Consumer Protections for Purchasers of Manufactured Homes

Section 7 of the act expands the protections afforded purchasers of manufactured homes as set out in Article 9A of Chapter 143 of the General Statutes. These new protections are:

---

[34] S.L. 2001-506 codified the policy of the DMV requiring a manufactured homeowner to submit an affidavit and surrender the certificate of title to the DMV when the manufactured home becomes real property. That legislation also required the owner to file the affidavit with the county register of deeds.

- If the manufacturer of a manufactured home publishes the suggested retail price, then that price must also be displayed near the front entrance of the manufactured home.
- A manufactured home dealer must display a sign and provide each buyer with information about the North Carolina Manufactured Housing Board, the procedure for filing a consumer complaint with the Board, and the warranties and protections provided for each new manufactured home under federal and State law.
- A purchase agreement must contain a statement that the purchaser has the right to cancel the purchase within three days after the purchaser has signed the agreement, and that the agreement is canceled if the dealer changes any of the material terms of the agreement. The return of any deposit must be made if either of these actions occurs. Each time the dealer gives the purchaser a new set of financing terms that are less favorable to the purchaser, the purchaser is given another three-day cancellation period.
- The Board must adopt rules concerning deposits, including rules protecting the deposits from the claims of a dealer's creditors in bankruptcy and rules providing for the prompt return of deposits if the purchasers are entitled to their return. These rules may exempt deposits of less than $2,000.

Section 7 of the act became effective October 1, 2003.

Criminal Record Checks

Sections 8 through 11 of the act require applicants for licensure from the North Carolina Manufactured Housing Board to consent to a criminal record check. This requirement applies to a manufactured home manufacturer, dealer, salesperson, or set-up contractor. Refusal of the applicant to consent to a criminal history record check may constitute grounds for the Board to deny licensure. Conviction of a crime specified in the act does not automatically bar licensure, but it is one of the factors the Board must consider when determining whether to grant or deny licensure. The Board may require that the applicant pay a fee to cover the cost of the criminal history record check. Section 12 of the act requires the Board to provide to the Department of Justice the fingerprints of the applicant and a form signed by the applicant consenting to the record check. The State Bureau of Investigation, located within the Department of Justice, will conduct the record check.

Sections 8 through 12 of the act are effective January 1, 2004.

Sales and Use Tax Treatment of Modular Homes

Under the law before January 1, 2004, the sales and use tax treatment of modular homes depended upon the type of frame of the modular home. According to industry representatives, there are two types of modular homes. "On-frame" modular homes are built on a steel chassis and are typically delivered to the home site by means of wheels and axles attached to the steel frames. On-frame modular homes, which are generally sold pursuant to sales contracts, were taxed at the same sales and use tax rate as manufactured homes: 2%, with a maximum tax of $300 per section. The tax derived from these sales goes to the General Fund. "Off-frame" modular homes are typically delivered to the site on a flatbed truck or other carrier and are generally sold pursuant to "performance contracts" in which the seller constructs the home for the buyer. Off-frame modular homes were not taxed to the ultimate consumer, but instead the general sales tax rate of 7% (4 ½% State and 2 ½% local) applied to the cost of the materials used by the seller to create the home.

Section 15 of the act removes this tax distinction and taxes the sales price of both types of modular homes at a rate of 2.5% with no cap.[35] To offset the loss of local sales tax revenue, Section 16 of the act requires that 20% of the taxes collected on modular homes must go to counties and be distributed with local sales tax revenue that is not attributable to a particular county. Section 14 of the act defines a modular home, for sales and use tax purposes, as a factory-built structure that is designed to be used as a dwelling, is manufactured in accordance with the specifications for modular homes under the North Carolina State Residential Building Code, and bears a seal or label issued by the Department of Insurance. The act defines a modular homebuilder as a person who furnishes for consideration a modular home to a purchaser that will occupy the modular home. The purchaser can be a person that will lease or rent the unit as real property. Section 13 of the act amends the definition of "manufactured home" by deleting the reference to modular homes.

Sections 13 through 16 of the act are effective January 1, 2004, and apply to sales of modular homes on and after that date.

Minimum Construction Standards for Modular Homes

Manufactured buildings bearing a label or seal acceptable to the Building Code Council are deemed to meet the requirements of the State Building Code and Article 9 of Chapter 143 of the General Statutes.[36] Section 17 of the act adds new language to Article 9 providing that a single-family modular home will qualify for the label or seal if it meets the following construction and design standards:

- A roof pitch of at least five feet rise for every 12 feet of run.
- Eave projections of at least 10 inches.
- Exterior wall height of at least seven feet six inches for the first story.
- Siding and roofing material commonly used in standard residential construction.
- Foundation supports around the perimeter of the home.

Section 17 of the act is effective January 1, 2004.

WINE SHIPPERS PERMITS.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-402	**SB 668**	**Senator Metcalf**

AN ACT TO AUTHORIZE THE ALCOHOLIC BEVERAGE CONTROL COMMISSION TO ISSUE WINE SHIPPERS PERMITS TO ALLOW THE DIRECT SHIPMENT OF WINES TO RESIDENTS OF NORTH

[35] Manufactured homes will continue to be taxed at 2% with a $300 cap.

[36] Article 9, *Building Code Council and Building Code*, describes the organization and duties of the Council and the requirements of the Code. The Council's main duty is to prepare and adopt the Code.

CAROLINA AND TO ESTABLISH A MECHANISM FOR COLLECTING THE TAXES DUE ON WINE SHIPPED TO NORTH CAROLINA.

OVERVIEW: This act remedies an unconstitutional exception in the State's ABC laws that allowed only in-state wineries to ship wine to North Carolina residents. The United States Court of Appeals for the Fourth Circuit recently held that the exception violated the Commerce Clause of the United States Constitution; the court left the task of fashioning the appropriate remedy to the General Assembly. This act creates a new permit under the ABC laws that would allow any winery to ship wine directly to individuals in North Carolina and it provides a mechanism for the collection of excise and sales and use taxes on direct shipments of wine.

FISCAL IMPACT: There will be some General Fund revenue gain from the imposition of the wine shipper permit and from the collection of additional excise and use taxes. However, the amount is undeterminable. Although the potential applicant pool for a wine shipper permit is large (between 1,500 and 3,000 wineries), the actual number that will seek a permit is expected to be small.[37] *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act becomes effective October 1, 2003.

ANALYSIS: After the end of Prohibition in the 1930s, North Carolina adopted laws to prohibit the importation of wine and other alcoholic beverages except through a highly regulated system. The structure of the ABC system is a three-tiered system. Under this system, an out-of-state producer of wine may sell its products in North Carolina to licensed wholesalers only. Wholesalers may in turn sell the products to other wholesalers or to licensed retailers. Only licensed retailers may sell the products to consumers.

In 1981, the General Assembly enacted an exception to this three-tiered structure. Under that exception, North Carolina wineries were allowed to sell and ship wine directly to North Carolina consumers. This exception did not extend to out-of-state wineries. In 2002, a federal district court held in *Beskind v. Easley*,[38] that this exemption violated the Commerce Clause of the United States Constitution because it clearly favored in-state economic interests over out-of-state interests. The court further held that North Carolina's regulatory interests protected under the Twenty-first Amendment did not outweigh the federal government's interest in regulating interstate commerce in this instance. That court ordered the State not to enforce the ban on out-of-state shipments and to collect the excise tax due on the wine shipped from out of state. North Carolina appealed this decision to the federal Court of Appeals. That court upheld the holding that the exemption violates the Commerce Clause but allowed the General Assembly to fashion an appropriate remedy. *Beskind v. Easley*, 325 F.3d 506 (4th Cir., 2003). In essence, the General Assembly was left with the option of repealing the exemption for in-state wineries or allowing shipments from out-of-state wineries on the same basis as for in-state wineries.

This act establishes a structure through which out-of-state wineries, as well as in-state wineries, may ship wine directly to consumers in North Carolina. Under this act, any winery that holds a federal basic wine manufacturer permit may apply for a North Carolina wine shipper permit for a

---

[37] New Hampshire approved a $228 wine shipment permit on July 1, 1998, and had issued only 189 as of May 23, 2003.

[38] 197 F.Supp.2d 464 (W.D. NC, 2002).

fee of $100. The annual renewal fee is $25.[39] The permit authorizes the shipment of brands of wine identified in the permit application. The wine shipper permittee may amend the brands identified in the permit at any time. The wine shipper permittee is required to notify any wholesale permittee that had been authorized to distribute those brands in this State of its application to become a wine shipper permittee. If the wine shipper permittee ships more than 1000 cases[40] of wine to addresses in the State during a calendar year, the permittee is required to appoint a North Carolina wholesaler if any North Carolina wholesaler wishes to sell the products.[41] A winery would not be required to obtain a wine shippers permit to ship to addresses in North Carolina wine that was bought on the premises of the winery.

A wine shipper permittee may ship up to two cases of wine per month to any person in North Carolina to whom alcoholic beverages may be sold. Shipment of wine may be made by common carrier only. The common carrier is required to have the recipient demonstrate that he or she is over the age of 21 and sign an acknowledgement of receipt. The common carrier must refuse delivery when the recipient appears to be below 21 years of age and fails to provide sufficient identification.

The act also establishes a mechanism for collecting the excise[42] and use[43] taxes due on the wine. Under the prior law, the direct shipment of wine escaped the imposition of the State excise tax[44] because the tax was payable by the resident wholesaler or importer. Although the consumer is liable for the use tax due on the purchase of the wine, the winery shipping the wine had no affirmative duty to collect and remit the tax if it does not have nexus in this State. Under this act, a wine shipper is required to pay the excise tax due on the wine and to collect the use tax due on the wine. Under the Twenty-first Amendment to the United States Constitution, the State has more authority to regulate alcoholic beverages than it generally has to regulate interstate commerce. Because of the greater authority granted to states under the Twenty-first Amendment, it is not as difficult to establish nexus when the product to be taxed is an alcoholic beverage. Because the State would be requiring the out-of-state wineries to obtain a permit to ship to North Carolina addresses, the State would have sufficient nexus with the winery to force the collection of the taxes.

---

[39] G.S. 18B-903 provides that ABC permits are valid for one year, May 1 to April 30, and that the renewal fee is 25% of the original application fee.

[40] A case is defined as any combination of packages that contains not more than nine liters of wine. Wine purchased by a resident of the State at the premises of the wine shipper permittee and shipped to an address in the State is not included in calculating the total of 1,000 cases.

[41] The wine shipper permittee does not have to appoint the wholesaler that originally contacted it to serve as its appointee.

[42] The excise tax on unfortified wine is 21¢ and the excise tax on fortified wine is 24¢.

[43] Wine is subject to a 4.5% State sales and use tax and a 2.5% local sales and use tax in every county but Mecklenburg County; in Mecklenburg County, the local sales and use tax is 3%.

[44] Although the State collects the excise tax, the State shares the revenues with the counties and cities in which the retail sale of wine is authorized in the entire county or city: these local governments receive 62% of the excise tax collected on unfortified wine and 22% of the tax collected on fortified wine.

LOCAL OPTION PROJECT DEVELOPMENT FINANCING.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-403	**SB 725**	**Senator Clodfelter**

AN ACT TO AMEND THE NORTH CAROLINA CONSTITUTION TO PERMIT CITIES AND COUNTIES TO INCUR OBLIGATIONS TO FINANCE THE PUBLIC PORTION OF CERTAIN ECONOMIC DEVELOPMENT PROJECTS.

OVERVIEW: This act authorizes the voters of the State to vote in the November 2004 statewide general election on an amendment to the North Carolina Constitution that would allow local governments to finance development within defined districts by issuing tax increment financing bonds without a local referendum.

FISCAL IMPACT: This act has no fiscal impact on the General Fund. It could potentially result in a cost of $100,000 to the State Board of Elections, which will reimburse the counties for the cost of the required notices, advertisements, and publications concerning the statewide referendum. If the constitutional amendment passes, local governments would have additional revenues available to them through the use of this financing tool. *(For a more complete fiscal analysis, see the Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 7, 2003. However, the proposed constitutional amendment to authorize local option project development financing will be subject to voter approval in a statewide general election in November 2004. If a majority of the votes are in favor of the amendment, then the amendment and the corresponding statutory changes would become effective upon certification of the constitutional amendment by the Secretary of State.

ANALYSIS:

Authorization for Local Option Project Development Financing

This act will permit the voters of the State to vote on a constitutional amendment that would allow the General Assembly to enact general laws authorizing counties, cities, and towns to borrow money, without voter approval, to finance the public portion of certain economic development projects within a defined territorial area.[45] This development tool, generally known as tax increment financing but referred to as "project development financing" in the act, would allow local governments to set aside the additional property taxes that are generated by a new investment to pay for public facilities that support that new investment.

The financing, issued in the form of bonds or other debt instruments, could be used for airports, auditoriums and arenas, hospitals, museums, parking facilities, sewer systems, storm sewers and

[45] A similar proposed constitutional amendment has been defeated by the voters twice before, on November 2, 1993, and November 2, 1982. In 1993, more than 78% of the voters voted against the constitutional amendment. It failed in every county except Northampton, where the vote was 1,253 for and 1,226 against.

flood control facilities, water systems, street improvements, public transportation facilities, railroads, affordable housing, land development for industrial or commercial purposes, utilities, and redevelopment. Redevelopment includes purchasing and improving property to help local redevelopment commissions. The bonds may also be issued for municipal service district projects.

Constitutional Amendment Required

The Constitution would have to be changed to allow project development financing because under the Constitution as it now reads the General Assembly does not have the power to authorize any unit of local government to issue bonds secured by its property tax revenue without a vote of the people. An amendment is also needed to allow property owners within the development area to agree to a minimum tax assessment on their property. The project development financing constitutional amendment will be placed before the voters in the next statewide general election, to be held in November 2004.

Development Financing District

If the amendment is approved, counties, cities, and towns could create a development financing district and adopt a development financing plan for that district. The total land area of the district may not exceed 5% of the total land area of the unit creating the district. The district also must be comprised of property that is one or more of the following:

- Blighted, deteriorated, deteriorating, undeveloped, or inappropriately developed from the standpoint of sound community development and growth.
- Appropriate for rehabilitation or conservation activities.
- Appropriate for the economic development of the community.

Development Financing Plan

The development financing plan describes the projects the unit of local government desires to finance and how the tax proceeds from the project development financing bonds will be used. The plan must include the costs of the proposed public activities, the sources and amounts of funds to pay for the proposed public activities, the base valuation of the district, the projected incremental valuation of the district, and the estimated duration of the district. The plan must also include a description of how the proposed development, both public and private, will benefit the residents and business owners of the district in terms of jobs, affordable housing, and services. The plan must contain a requirement that initial users of a new manufacturing facility located in the district pay employees of the facility an average weekly manufacturing wage that is either above the average weekly manufacturing wage paid in the county where the district is located or is at least 10% above the average weekly manufacturing wage paid in the State. A plan may be exempt from the wage requirement if the Secretary of Commerce finds that unemployment in the county in which the district is located is especially severe.

Before adopting a plan for a development financing district, the unit of local government must do all of the following:

- If the unit is a city, town, or incorporated village, send notice of the plan to the board of county commissioners, which has 28 days after the date the notice is mailed to disapprove the plan. The unit may proceed with the plan unless the county disapproves it within 28 days.

- Submit the plan to the Secretary of Environment and Natural Resources for review to determine if the construction and operation of any new manufacturing facility will have a materially adverse effect on the environment and whether the company operating the facility has operated in substantial compliance with environmental requirements.
- Hold a public hearing on the plan after providing public notice, including written notice to all property owners within the proposed district.

Approval by Local Government Commission

If a local government wants to issue project development financing bonds to finance the public portion of economic development projects within a development financing district, it must have the approval of the Local Government Commission. The Commission cannot approve an application until the development financing plan is adopted. Before approving the bond issuance, the Commission must find, among other things, that the proposed project development financing bond issue is necessary to secure significant new project development for a development financing district and that the private development forecast in the development financing plan would likely not occur without the public projects to be financed by the bonds. The Commission must also find that the taxes on the incremental valuation, together with any proceeds that may be realized from the sale of property in the district and any revenues that may be realized from a public facility in the district, will be sufficient to service the project development financing bonds.

Determination of Base Value and Incremental Value

Once the district has been established and the project development financing debt instruments have been approved by the Local Government Commission, the local government unit must notify the county tax assessor who must determine the base valuation of the district. The base valuation is the assessed value of all taxable property located in the district on the January 1 immediately preceding the effective date of the district. The base valuation may be adjusted if property is removed from or added to the district. Each year the development financing district is in existence, the tax assessor must determine the current assessed value of taxable property located in the district. The assessor must also compute the difference between this current value and the base valuation of the district. If the current value exceeds the base value, the difference is the incremental valuation of the district.

Security for Bonds

The tax assessor must establish a separate fund, known as the Revenue Increment Fund, to account for the proceeds paid to the unit from taxes levied on the incremental valuation of the district. After certain deductions are made from the Fund and transferred to the local government unit, any remaining money in the Fund may be used to finance capital expenditures in the district, to meet principal and interest requirements on project development financing debt instruments, to repay moneys expended on debt service on project development financing debt instruments, and to establish and maintain debt service reserves.

To provide additional security for the bonds, the unit of local government issuing the bonds may pledge the proceeds from the sale of property in the development financing district and the net revenues from public facilities in the development financing district constructed or improved under the development financing plan. The unit of local government may also pledge any other available sources of revenue as long as the agreement to use the sources to make payment does not constitute a pledge of the unit's taxing power. Other available sources of revenues that do not constitute a pledge of a local government's taxing power include taxes levied by the State that are

transferred to the local government, such as beer and wine tax revenues, utilities franchise tax revenues, and intangibles tax revenues.

The unit of local government may also enter into agreements with the owners of real property in the development financing district for which the bonds were issued under which the owners agree to a minimum value at which their property will be assessed for taxation. Such an agreement may extend for the life of the development financing district or for a shorter period agreed to by the parties. The agreement may vary the agreed-upon minimum assessed value from year to year. The purpose of such an agreement is to provide additional security for the bonds by assuring that the property tax base in the district would not fall below a certain level.

Duration of District and Term of Bonds

The district may remain in effect for 30 years or until the bonds are retired. The bonds must be retired within 30 years or within the useful life of the projects financed, whichever is shorter. After that, all taxes are paid into the local general fund.

ESC SURTAX DELAY.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-405	**HB 1241**	**Representative Luebke**

AN ACT TO DELAY THE REINSTATEMENT OF THE TWENTY PERCENT UNEMPLOYMENT INSURANCE SURTAX.

OVERVIEW: The purpose of S.L. 2003-405 is to defer imposition of the 20% surtax on employer unemployment insurance contributions if, as of August 1 of the preceding year, the balance in the State Unemployment Insurance Fund is $500 million or less. The delay of the surtax applies only to the 2004 tax year.

FISCAL IMPACT: The State General Fund is not affected. Only the Reserve Fund in the unemployment insurance system will be affected. *(For a more complete fiscal analysis, see the Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: The act became effective when signed into law by the Governor on August 12, 2003, and is repealed for taxes imposed in the 2005 and subsequent calendar years.

ANALYSIS: Unemployment insurance taxes or contributions are paid by employers on a quarterly basis and deposited into the Unemployment Insurance Fund. Pursuant to G.S. 96-6, the Unemployment Insurance Fund is administered by the Employment Security Commission, and disbursed by the State Treasurer under the direction of the Commission. The following three separate accounts are maintained within the Fund: a clearing account, an unemployment trust fund account, and a benefit account. The moneys payable to the Fund are initially deposited in the clearing account. After deducting any refunds payable from the Fund pursuant to G.S. 96-10(f), the money is deposited with the secretary of the treasury of the United States to the credit of this State's account in the unemployment trust fund.[46] Funds in the State's account earn interest that is also credited to the account. As money in the State's account is needed to pay benefits, it is

[46] G.S. 96-10(f) provides for the refund of contributions if a court determines that the contributions were invalid, excessive, or contrary to the provisions of Chapter 96 of the General Statutes.

transferred to the State and credited to the benefits account of the State Unemployment Insurance Fund to be used to pay benefits to people who lose their job through no fault of their own. Federal law prohibits transfer of or payment of refunds from money in the unemployment trust fund account.

There is also an Employment Security Commission Reserve Fund, created in the State treasury, and used by the Commission to bolster the Unemployment Insurance Fund. The moneys in the Reserve Fund consist of proceeds from the 20% surtax on contributions due.[47] This surtax was suspended in 1992, but the surtax is automatically triggered when the balance of the Reserve Fund falls below $163 million. Also, under G.S. 96-9(b)(3)d5, the regular unemployment insurance tax or contribution rate of an employer is reduced by 50% for any year in which the balance in the Unemployment Insurance Fund equals or exceeds $800 million. After a number of years paying the contributions at the 50% rate, employers began paying at the full rate in 2003. The tax will remain at the full rate until the Unemployment Insurance Fund again reaches $800 million, thereby triggering the half rate.

S.L. 2003-405 states that the 20% surtax will not be imposed as long as the Unemployment Insurance Fund balance is at or below $500 million. When the contributions replenish the Fund balance to $500 million, then the 20% surtax will be triggered to start refilling the Reserve Fund. When the Reserve Fund reaches $163 million, the surtax will trigger back off. The intended effect is that the 20% surtax, originally scheduled to go into effect January 1, 2004, because the balance in the Reserve Fund is under $163 million, will not be imposed during the 2004 calendar year.

QUALIFIED BUSINESS CREDIT/PORTS CREDIT.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-414	**HB 1294**	**Representative G. Allen**

AN ACT TO EXPAND THE QUALIFIED BUSINESS INVESTMENTS TAX CREDIT AND TO EXTEND THE SUNSET ON THE STATE PORTS TAX CREDIT.

OVERVIEW: This act does the following:

- Extends the sunset on the State Ports Tax Credit from 2004 to 2009.
- Amends the Qualified Business Investment Tax Credits to:
  - Extend the sunset from 2004 to 2007.
  - Expand the definition of a qualified grantee business to include those that receive grants from entities such as MCNC-Research and Development Institute, a nonprofit corporation formed to enhance economic development in North Carolina through applied research and technology development and commercialization of these technologies.

[47] G.S. 96-5(f) provides that the moneys in the Reserve Fund may be used by the Commission for loans to the Unemployment Insurance Fund, as security for loans from the federal Unemployment Insurance Trust Fund, and to pay any interest required on advances under Title XII of the Social Security Act.

- Add a new type of qualified business: a small business that is commercializing technology developed by a research university.

FISCAL IMPACT: The extension of the sunset on the Qualified Business Investment Tax Credit will cost the General Fund an estimated $6 million a year beginning in 2005-2006. The extension of the State Ports Tax Credit will cost the General Fund an estimated $650,000 a year beginning in 2004-2005. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATES: The portions of the act dealing with the qualified business venture tax credits became effective for taxable years beginning on or after January 1, 2004. The portion of the act dealing with the State ports tax credit became effective when the act was signed into law by the Governor on August 14, 2003.

ANALYSIS:

Qualified Business Tax Credits

The qualified business investment tax credit is allowed for an individual taxpayer who purchases the equity securities or subordinated debt of a qualified business venture or a qualified grantee business directly from that business. The credit is equal to 25% of the amount invested and may not exceed $50,000 per individual in a single taxable year. An individual investor may also claim the allocable share of credits obtained by "pass-through entities" of which the investor is an owner. Pass-through entities include limited partnerships, general partnerships, S corporations, and limited liability companies. The credit may not be taken in the year the investment is made. Instead, the credit is taken in the year following the calendar year in which the investment was made, but only if the taxpayer filed an application with the Secretary of Revenue. Any unused credit may be carried forward for the next five years. The total amount of credits allowed to all taxpayers for investments made in a calendar year may not exceed $6 million. The Secretary of Revenue calculates the total amount of tax credits claimed from applications filed with the Secretary of Revenue. If the amount exceeds the cap, then the Secretary allows a portion of the tax credits claimed by allocating the total of $6 million in tax credits in proportion to the size of the credit claimed by each taxpayer. In general, a taxpayer forfeits the credit if the taxpayer transfers the securities within one year or the qualified business redeems the securities purchased by the taxpayer within five years after the investment was made.

Qualified business tax credit sunset. – The qualified business investment tax credit was enacted in August 1987 to promote economic development for North Carolina businesses. The original credits applied to both corporations and individual taxpayers, and there was a $12 million cap on the total amount of all tax credits. In response to a 1996 United States Supreme Court decision in *Fulton Corp. v. Faulkner*, 516 U.S. 325, (1996), which raised the issue of whether the credits unconstitutionally discriminated against out-of-state businesses, the General Assembly reduced the $12 million cap to $6 million, removed the requirement that the qualified businesses be headquartered or operating in North Carolina, and limited the credit to individuals and small pass-through entities. The latter change was based on the theory that these investors are not likely to invest outside a 50-mile radius of their homes.

One of the purposes of the sunset was to determine if the credit is being allowed for investments in non-North Carolina businesses. Because the Constitution does not allow the credit to be restricted to North Carolina businesses, there is the possibility that North Carolina tax dollars may actually be subsidizing investments in out-of-State corporations. The Secretary of State's Office is required to publish a periodic list of businesses that have registered as qualified businesses. The

most recent version of this list indicates that most registered businesses are North Carolina businesses.

This act extends the sunset on the qualified business tax credit from January 1, 2004 until January 1, 2007. The credit was originally set to expire for investments made on or after January 1, 1999. In 1998, the credit was extended for four additional years until January 1, 2003. Then, in 2002, it was extended for one additional year, until 2004.

Expand types of qualified businesses. – Under current law, in order to be a business in which investments are eligible for a credit, the business must be either a *qualified business venture* or a *qualified grantee business*. Both types of businesses must be registered with the Secretary of State. The definition of *qualified business venture* includes several general requirements related to the line of business, gross revenues of the business, and the organization date of the business. A *qualified grantee business* is one that has received a grant or other funding in at least one of the three previous years from one of several types of entities that are generally described in the statute. Those descriptions would encompass the following entities that, before 2002, were specifically named in the statute: the North Carolina Biotechnology Center, MCNC, and the Kenan Institute for Engineering, Technology, and Science.

This act further expands one of these descriptions, which currently applies to nonprofits organized to stimulate microelectronics and communications industries, to also apply to nonprofits and their affiliates organized to conduct research and development in, or stimulate the development of, technologies. This language is designed to bring in a new entity called MCNC-Research and Development Institute, which is a nonprofit corporation formed to enhance economic development in North Carolina through applied research and technology development and commercialization of these technologies. The new language will also cover the MCNC Enterprise Fund, which is owned 50% by MCNC and 50% by MCNC-RDI.

Additional type of qualified business. – This act also adds a third category of qualified businesses: a *qualified licensee business*. These businesses must have no more than $1 million in gross revenues annually and must be performing under a contract with a UNC system institution or a doctoral research university to commercialize technology developed by the institution or university.

State Ports Tax Credit

The State Ports tax credit is allowed to a taxpayer who loads or unloads waterborne cargo from an ocean carrier at the State-owned port terminal at Wilmington or Morehead City. The credit is allowed against the taxpayer's income tax. The taxpayer may be either an individual (G.S. 105-151.22) or a corporation (G.S. 105-130.41). The amount of the tax credit is equal to the amount of wharfage, handling, and throughput charges paid to the North Carolina State Ports Authority in the taxable year that exceeds the average amount of charges paid to the Authority for the current tax year and the two previous tax years. The credit is limited to 50% of the tax imposed on the taxpayer for the taxable year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years. The maximum cumulative credit that one taxpayer may claim is $2 million.

In 1992 the General Assembly enacted the State Ports tax credit to encourage exporters to use the two State-owned port terminals in Wilmington and Morehead City. When enacted, the credit applied to amounts paid by a taxpayer on any cargo exported at either port. In 1994, the General Assembly expanded the credit to include all amounts assessed on exported cargo, regardless of who paid the shipping costs. In 1995, the General Assembly expanded the credit to include some

imports by allowing a credit for break-bulk cargo and container cargo imported at either Wilmington or Morehead City and for bulk cargo imported at Morehead City. It did not allow a credit for bulk cargo imported at Wilmington. In addition, the credit for bulk exports was then limited to bulk exports at only the Morehead City terminal. In 1996, the General Assembly expanded the State Ports tax credit to include the importing and exporting at either terminal of one specific type of bulk cargo: forest products. All imports and exports of bulk cargo at the Morehead City terminal were already covered, so the effect of this change was to allow a credit for forest product imports and exports at the Wilmington terminal. In 1997, the General Assembly increased the maximum cumulative credit from $1 million to $2 million per taxpayer.

Although not defined by the relevant statutes, the various types of cargo differ as follows:

- Bulk cargo is a type of commodity that is loose and usually stockpiled. Typically, bulk is considered material that is picked up in "scoops" and not in a bag or some other type of binding. Examples of this type of commodity include cement, coal, fertilizer, fishmeal (used for making pet food), grain, salt, sand (used for golf courses and during ice storms), soybean meal, and wood chips.
- Break-bulk cargo consists of commodities that are packaged and stored on pallets or in cases that must be handled and stacked onto a ship by hand, crane, etc. Break-bulk cargo also includes machinery. Some examples of break-bulk cargo include cotton, lumber, paper, and rubber.
- Container cargo consists of commodities that are packaged in a metal trailer box that can be locked onto a tractor-trailer chassis and then detached and put on a ship without any other handling. Some examples of container cargo include clothing, electronics, frozen poultry, furniture, housewares, meat, seafood, and tobacco.

When first enacted, this credit was to sunset for taxable years ending on or before February 28, 1996. In 1995, the General Assembly extended the sunset date to February 28, 1998. In 1997, the General Assembly extended the sunset date to February 28, 2001. In 2001, the General Assembly extended and conformed the sunset to apply to taxable years beginning on or after January 1, 2003. In 2002, the General Assembly extended the sunset date to January 1, 2004. This act extends the sunset for five years, to January 1, 2009.

EXPAND HISTORIC PRESERVATION CREDIT.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-415	**SB 119**	**Senator Horton**

AN ACT TO EXPAND THE TAX CREDITS FOR HISTORIC REHABILITATION BY EXTENDING THE SUNSET ON A PROVISION ALLOWING A PASS-THROUGH ENTITY TO ALLOCATE AMONG ITS OWNERS THE TAX CREDIT FOR INCOME-PRODUCING STRUCTURES AND INCREASING THE AMOUNT THAT MAY BE ALLOCATED TO AN OWNER UNDER THIS PROVISION.

OVERVIEW: This act amends the historic preservation tax credit as follows:

- It extends the sunset on the provision that permits a pass-through entity to allocate among its owners the tax credit for income-producing property from January 1, 2004, to January 1, 2008.
- It amends the above-described provision to permit a pass-through entity to allocate the credit to an owner if an owner's adjusted basis in the pass-through entity is at least 40% of the amount of the credit allocated to that owner.

The act also directs the Department of Revenue to modify the income tax forms to provide separate lines for each tax credit claimed by the taxpayer.

FISCAL IMPACT: No estimate can be made of the actual revenue impact of this act. The changes made by this act are intended to increase the likelihood that the historic rehabilitation credits will be fully utilized by taxpayers. However, the General Assembly's Fiscal Research Division has assumed since 1997, the year the credit was increased to 20%, that 100% of the tax credits have been used and has built into the General Fund availability forecast 100% utilization of the historic credit. *(For a more complete fiscal analysis, see Overview: Fiscal and Budgetary Actions, 2003 Session. Available in the Legislative Library.)*

EFFECTIVE DATE: This act became effective when signed into law by the Governor on July 10, 2003. The 2003 individual income tax forms will be modified according to the provisions of this act.

ANALYSIS: North Carolina allows an income tax credit[48] to taxpayers that qualify for the federal historic rehabilitation tax credit.[49] The amount of the credit is equal to 20% of the expenses of rehabilitating an income-producing historic structure.[50] A pass-through entity may qualify for the rehabilitation credit and pass the credits on to its owners.[51]

For most State tax credits, a pass-through entity is required to allocate the credit among its owners in the same proportion that other items, such as the federal rehabilitation credit, are allocated under the Internal Revenue Code. Under the Internal Revenue Code, tax credits are allocated among S corporation shareholders in accordance with their pro rata share of the corporation, which is determined on the basis of stock ownership, [52] and tax credits are allocated among partners in a partnership in accordance with the partnership agreement.[53] However, in 1999, the

---

[48] G.S. 105-129.35. The credit may not be taken for the tax year the property is placed in service but must be taken in installments over five years after the historic structure is placed in service. Any unused portion of a credit may be carried forward for a five-year period.

[49] The federal tax credit is available for rehabilitating only income-producing historic structures. The federal credit amount is equal to 20% of the rehabilitation expenses.

[50] North Carolina also allows an income tax credit of 30% of the expenses of rehabilitating an historic structure that is not income-producing, and thus not eligible for the federal income tax credit.

[51] A pass-through entity is an entity, such as a partnership, a limited liability company, or a Subchapter S corporation, that is treated as owned by individuals or other entities under federal tax law and whose income, losses, and credits are reported by the owners on their State income tax returns.

[52] State law provides that the tax credit allowed a shareholder in a Subchapter S corporation is based on the percentage of stock held by the shareholder in the corporation. G.S. 105-131.8.

[53] State law provides that the tax credit allowed a partner is based on the partnership agreement, which must have substantial economic effect, which means that the allocation agreement must reflect the economic interest of the partners in the partnership and cannot be based solely on tax consequences. G.S. 105-269.15.

General Assembly amended the law to provide for the separate sale of the historic tax credit for income-producing property by allowing a pass-through entity to allocate the tax credit among its owners at its discretion. The allocation of the credit allows the tax credit to be utilized more fully since it can be redistributed to North Carolina investors with State income tax liability. Each year an allocated credit is claimed, the pass-through entity and its owners must include a statement with their tax return that shows both the allocation made and the allocation that would otherwise have been required under G.S. 105-131.8 and G.S. 105-269.15. This change in the law would have expired for taxable years beginning on or after January 1, 2002. S.L. 2001-476 extended the provision for two years and this act extends it for four more years, until January 1, 2008.

To further maximize the use of the State historic rehabilitation tax credit for income-producing property, this act increases the amount of the credit that a pass-through entity may allocate among its owners. Prior law provided that the credit could be allocated to an owner of the pass-through entity, as long as the amount of the credit allocated to the owner did not exceed the owner's adjusted basis in the entity, [54] as determined under the Code. This act provides that the owner's adjusted basis must be at least 40% of the credit allocated to that owner. The General Assembly enacted a similar change in the low-income housing tax credit in 2002.[55]

During the finance committee deliberations, the Department of Revenue was asked to report on the amount of income-producing historic rehabilitation tax credits taken in tax years 2000 and 2001. Although the Department could extrapolate from outside data the amount of tax credits taxpayers were eligible for each year, it could not determine the percentage of tax credits actually claimed each year. The Department's Tax Research Division responded that it could only determine the number of corporate taxpayers that claimed the historic rehabilitation credit because the agency's computer system does not contain information on the individuals that claim the credit. The computer system does not capture data on individual historic rehabilitation credits because the credit is one of a number of credits combined on Form D-400TC as a miscellaneous credit. To remedy this data problem, the act directs the Department of Revenue to change the income tax forms to provide separate lines for each tax credit claimed by a taxpayer, effective for tax years beginning on or after January 1, 2003. This change will provide valuable information to legislative and executive branch analysts tasked with evaluating and estimating the General Fund revenue loss of tax credits.

REVENUE LAWS TECHNICAL CHANGES.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-416	**SB 97**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

OVERVIEW: This act makes technical and clarifying changes to the revenue laws and related statutes.

[54] The adjusted basis is determined at the end of the taxable year in which the historic structure is placed in service.
[55] S.L. 2002-87.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: Section 27, which modifies a distribution of local sales tax revenue initially included in the 2003 Budget Act, becomes effective October 1, 2003. The remainder of the act became effective when signed into law by the Governor on August 14, 2003.

ANALYSIS: S.L. 2003-416 makes technical and clarifying changes to the revenue laws and related statutes, as outlined in the following chart:

Section	Explanation
1 & 3	Section 1 clarifies that the 2002 law modifying the estate tax formula for estates with property in more than one state does not apply to the extent it would create a retroactive increase for estates of decedents dying between January 1, 2002, and the date the act became law. Sections 1 and 3 clarify the effective date of the low-income housing tax credit.
2	Re-enacts a session law that did not receive three roll-call readings on adoption of the conference report.
4	Moves the definition of "pass-through entity" to the general definitions section and makes appropriate cross-reference changes.
5	Modernizes terminology by changing the word "business" to "apportionable" as it relates to the apportionment of corporate income tax.
6	Corrects capitalization.
7	Makes a grammatical change.
8	Clarifies that interest, not the interest rate, for the low-income housing tax credit is computed from the date the Secretary transferred the credit amount to the Housing Finance Agency.
9	Makes a punctuation change.
10	Clarifies that the entire penalty may be waived for the nonpayment of taxes. G.S. 105-357(b)(2) imposes a penalty for nonpayment of taxes of the greater of 10% or $25. However, the prior wording of G.S. 105-358(a) authorized waiver of only the 10% penalty.
11	Supplies missing language.
12	Clarifies that the North Carolina Constitution prohibits the General Assembly from contracting away its taxing power.
13	Conforms effective date language to reflect that adoption of the Streamlined Sales Tax Agreement may be other than by signature.
14	Conforms local law relating to local sales tax distribution to reflect additional local option sales tax enacted in 2001.
15	Undoes drafting error that substituted for a stock ownership test the similar requirements for controlled group membership. The substituted language is not workable because, unlike the stock ownership test, it does not cover

Section	Explanation
	non-corporate entities. This corrects a definition in the statute dealing with royalty income reporting option.
16	Conforms terminology to reflect definition changes enacted in 2002.
17	Restores a provision that was deleted in 1997.
18	Conforms sales tax exemption and refund statutes to reflect that exemptions and refunds extend to some taxable services.
19	Sets out in statute the prohibition against levying the scrap tire, white goods, or dry-cleaning solvent tax on sales the State cannot constitutionally tax.
20	Deletes a provision regarding the property tax value of cotton. The provision is obsolete because cotton is covered by the exemption for inventories.
21	Corrects a cross-reference.
22	Adds "G.S." before a statutory citation.
23	Corrects name of UNC Health Care System.
24	Amends the captions to fit the text of the statutes.
25	Clarifies that the conflict of interest language applies to current members as well as former members of the Economic Investment Committee. This committee administers the Job Development Investment Grant Program.
26	Corrects an effective date for a section of the streamlined provisions in the 2003 Budget Act.
27	Revises the distribution formula for the local sales tax on food effective October 1, 2003, as requested by the NC League of Municipalities and the NC Association of County Commissioners. The modified distribution formula will more accurately reflect the current distribution of those revenues. (*For a more detailed explanation of the distribution, see the summary for S.L. 2003-284, 2003 Budget Act)*
28	Allows a one-time withholding of $25,000 from the local taxes collected on food in order to cover the Department of Revenue's programming costs associated with the distribution of the local taxes collected on food.
29	The 2003 Budget Act transferred all receipts of the Wireless 911 Fund for the 2003-04 fiscal year (estimated at $33 million) and $25 million of the receipts for the 2004-05 fiscal year to the General Fund. Subsection (a) of this section limits that transfer for the 2003-04 fiscal year to $33 million, or the actual fund receipts for 2003-04 less the 1% administrative fee the Wireless 911 Board is authorized to deduct, *whichever is less*. Subsection (b) of this section amends a provision allowing the Wireless 911 Board to reallocate the 60-40% split between the wireless phone service providers and the 911 centers. Prior law allowed that reallocation by the Board when it adjusts the service charge, with the reallocation affecting the subsequent receipts. The amendment allows the reallocation at any time, and allows the reallocation to affect money already in the Fund balance, as well as subsequent receipts. This change allows the Board greater flexibility to

Section	Explanation
	meet the financial needs of the wireless providers and the 911 centers as the wireless 911 system is deployed in accordance with the FCC order and in light of the diversion of Wireless 911 Fund receipts in the 2003-05 biennium. When fully deployed, the wireless 911 system will allow automatic location of a person calling 911 with a wireless phone.
30	Section 27 becomes effective October 1, 2003. The remainder of the act became effective when it became law, August 14, 2003.

ECONOMIC DEVELOPMENT DISTRICT.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-418	**SB 168**	**Senator Smith**

AN ACT TO PROVIDE FOR THE CREATION OF ECONOMIC DEVELOPMENT AND TRAINING DISTRICTS.

OVERVIEW: This act authorizes counties to create special tax areas under Section 2(4) of Article V of the North Carolina Constitution. These areas, called economic development and training districts, would be for the purpose of providing a skills training center to prepare county residents to perform manufacturing, research and development, and related service and support jobs in the pharmaceutical, biotech, life science, chemical, telecommunications, and electronics industries. A county may levy property taxes within the district, in addition to those levied throughout the county, in order to finance the skills training center.

The act also defines the property that may be initially included within an economic development and training district located in Johnston County should the board of commissioners of Johnston County elect to establish one. The act states that a municipality cannot annex property within a district located in Johnston County.

FISCAL IMPACT: This act does not affect State revenues.

EFFECTIVE DATE: This act became effective when signed into law by the Governor on August 14, 2003.

ANALYSIS: Section 1 of the act adds a new Part to the county service district Article in Chapter 153A of the General Statues. It authorizes a county to establish an "economic development and training district." Such a district would be a special tax area pursuant to Section 2(4) of Article V of the North Carolina Constitution. That section authorizes the General Assembly to enact general (statewide) laws giving local governments the authority to establish these areas. A local act would be unconstitutional.

The new law applies statewide but the conditions imposed for creation of a district are so specific that the law is unlikely to apply anywhere but in the intended location, Johnston County. These conditions include the requirement that all of the property in the district be used for specific types of manufacturing, including at least two pharmaceuticals manufacturing or bioprocessing facilities with sites aggregating at least 425 acres owned by publicly held corporations. In addition, the

district must include an industrial park of at least 60 acres within a noncontiguous 625-acre parcel now or formerly owned by an airport authority. Section 2 of the act provides that no municipality may annex, other than by voluntary annexation, any property in Johnston County that is located within an economic development and training district. Section 2 of the act also provides that if the board of commissioners of Johnston County elect to establish an economic development and training district, then the district as initially established will consist of certain described real property owned by Bayer Corporation, Novo Nordisk Pharmaceutical Industries, Inc., Fresenius Kabi Clayton, L.P., and the Johnston County Airport Authority.

There are three stated purposes for an economic development and training district: (1) to finance and maintain a skills training center to prepare local residents to perform jobs related to the types of industries within the district; (2) to provide education and related services and facilities; and (3) to provide economic development in the county. The act authorizes the county to levy property taxes within the district at a rate of up to 8¢ per $100 to provide the skills training center, but does not authorize the levy of property taxes for the other two purposes of the district. It goes on, however, to state that the proceeds of the district taxes may be used to pay annual debt service on the skills training center of up to $1.2 million and also to pay "any other services or facilities" provided in response to a recommendation of an advisory committee required to be set up to represent district property owners as well as the county.

The act provides the following procedural requirements relating to an economic development district:

- Creation of District. – Before a district can be created, there must be presented to the board of commissioners a petition signed by the owners of real property in the district representing at least 50% of the total assessed value of real and personal property in the district. Before establishing a district, the county must provide notice to the public and to affected property owners, prepare a report including a map and a plan for the district, hold a public hearing, and make findings that support the need for the district.

- Advisory Committee. – In the resolution establishing an economic development and training district, the board of commissioners must create a five-member advisory committee with three members representing an association of owners and tenants in the district and two members representing the county. The purpose of the committee is to make recommendations to the county on the type and level of services, facilities, or functions to be provided for the district.

- Enlargement of District. – The board of commissioners would be authorized to annex territory to the district subject to conditions and procedural requirements similar to those that apply to establishing the district. If any of the area proposed to be annexed is within the extraterritorial jurisdiction of a municipality, then a majority of the members of the governing body of the municipality must vote in favor of annexation.

- Abolition of District. – The board of commissioners may abolish a district if there is no longer a need for the district and the board has received a petition requesting abolition signed by at least 50% of real property owners in the district who own at least 50% of the real and personal property in the district. There must be notice and a public hearing prior to the adoption of a resolution abolishing a district.

STATE GOVT SALES TAX EXEMPT/SCH COOP REFUND.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-431	**SB 100**	**Senator Kerr**

AN ACT TO PROMOTE EFFICIENCY IN STATE GOVERNMENT BY ALLOWING A SALES AND USE TAX EXEMPTION FOR STATE AGENCIES INSTEAD OF A SALES AND USE TAX REFUND TO STATE AGENCIES AND TO ALLOW A SALES AND USE TAX REFUND TO SCHOOL BOARD COOPERATIVES.

OVERVIEW: This act allows a sales and use tax exemption, instead of a sales and use tax refund, for purchases by State agencies. The act also allows a refund of State and local sales and use taxes by a joint agency created by interlocal agreement among local school administrative units to jointly purchase food service-related materials, supplies, and equipment on their behalf.

FISCAL IMPACT: The primary impact of the legislation on expenditures is the reduction in agency budgets to reflect the sales tax exemption. The act requires the Office of State Budget and Management to reduce each agency's certified budget by an amount that will offset the reduction to the General Fund from the loss of sales tax revenue. Some organizational efficiencies are also expected. Therefore, the net impact of the act is no significant change to the General Fund.

The annual revenue loss associated with the second part of the bill, which authorizes a refund of state and local sales tax for school board cooperatives, is expected to be less than $20,000 annually. However, no impact is expected until FY 2004-05. *(For a more complete fiscal analysis, see the Overview: Fiscal and Budgetary Actions, 2003 Session. Available in Legislative Library.)*

EFFECTIVE DATE: The exemption from State and local sales tax for State agencies becomes effective July 1, 2004. The refund of State and local sales and use taxes for school board cooperatives became effective for taxes paid on or after July 1, 2003.

ANALYSIS:

State Government Exemption

Currently, all major State agencies except the Department of Transportation[56] are subject to State and local sales taxes. However, the State receives a quarterly refund of the local sales taxes paid by its agencies[57] with the proceeds of the refund going to the General Fund.

The current refund process is time-consuming for the Office of the State Controller, the agencies, and the Department of Revenue. To relieve the agencies of this burden, the Office of the State Controller recommended changing the refund process to a sales and use tax exemption for State

[56] The Department of Transportation is exempt from State and local sales and use tax.

[57] Each State agency is suppose to file with the Secretary of Revenue a written application for a refund of the local sales taxes paid by it. The application is due within 15 days after the end of each calendar quarter. *G.S. 105-164.14(e)*.

agencies.[58] The term "State agency" is currently defined for sales and use tax purposes as a unit of the executive, legislative, or judicial branch of State government, such as a department, commission, board, council, or The University of North Carolina. The term does not include local boards of education[59] or local boards of trustees for the community college system.

This act changes the current refund process to an exemption for State agencies. To qualify for the exemption, the items must be purchased by a State agency and the purchase must meet one of the following conditions:

- The items are purchased pursuant to a purchase order of the State agency that contains the exemption number of the agency and a description of the items purchased.
- The items purchased are paid for by a State-issued check, electronic deposit, credit card, procurement card, or credit account of a State agency and the agency provides to or has on file with the retailer the agency's exemption number.

The act incorporates all of the various payment and purchase mechanisms where accounting system controls are in place to verify purchases and prevent possible misuse of the agency's sales tax exemption by its employees. The only type of direct purchases not included within this exemption is employee expense reimbursements.

The sales tax exemption applies only to direct purchases of tangible personal property. State agencies will continue to apply for refunds of local taxes paid on indirect purchases of building materials, supplies, fixtures, and equipment that become a part of a structure owned or leased by the State.

A State agency will be liable for items purchased with its exemption number that it does not use. The liability will include not only the tax that should have been paid on the items purchased, but also interest calculated from the date the tax would otherwise have been paid.

To be eligible for the sales and use tax exemption, a State agency must obtain from the Department of Revenue a sales tax exemption number through an application process. The part of the act that provides for this application process becomes effective January 1, 2004, so that State government agencies can begin the process of obtaining their exemption certificates from the Department of Revenue. The section of the act granting the exemption becomes effective July 1, 2004, and applies to sales made on or after that date.

The act also provides that the Office of State Budget and Management must reduce each State agency's certified budget for fiscal years 2003-04 and 2004-05 by an appropriate amount to reflect the tax savings generated by the sales and use tax exemption allowed under this act.

Sales Tax Refund for School Board Cooperatives

[58] Refunds for purchases by the North Carolina Low Level Radioactive Waste Management Authority, the North Carolina Hazardous Waste Management Commission, the constituent institutions of the University of North Carolina paid for with contract and grant funds, and The University of North Carolina Hospitals at Chapel Hill are made on an annual basis and are refunded directly to the state agency. The act does not change the refund status of these purchases at the suggestion of the Office of State Budget and Management.

[59] Local school administrative units are allowed an annual refund of State and local sales taxes paid.

Under Chapter 160A of the General Statutes, units of local government[60] may enter into contracts or agreements with each other in order to execute any undertaking. Since 1996, several boards of education in the eastern part of the State have participated in an agreement under the authority of Part 1 of Chapter 160A in order to operate a cooperative program known as the Southeast Cooperative Utilizing Resources Efficiently (SECURE). The purpose of SECURE is to coordinate the acquisition of food service-related materials, supplies, equipment, and services. The school districts in SECURE now are Wayne, Pitt, Greene, Lenoir, Onslow, Sampson, New Hanover, Guilford, and Cumberland Counties.

Local school boards are allowed to seek an annual refund of State and local sales and use taxes. Since SECURE serves as a conduit for several local school boards to join together to increase their buying power, it applied for a sales tax refund on behalf of the school boards. However, the Department of Revenue found that it was not included in the list of entities entitled to a refund: SECURE is not a local board of education and it is not a charitable nonprofit organization.

This act allows SECURE and any other joint agency created by interlocal agreement among local school administrative units to jointly purchase food service-related materials, supplies, and equipment on their behalf to qualify for an annual refund of State and local sales and use taxes paid by it. The refund request must be made in writing and must include any information and documentation required by the Secretary. This section of the act became effective for taxes paid on and after July 1, 2003.

JOB GROWTH & INFRASTRUCTURE ACT.

Session Law	*Bill #*	*Sponsor*
S.L. 2003-435	**HB 2 2nd Extra Session**	**Rep. G. Allen**

AN ACT TO MAKE THE FOLLOWING CHANGES RECOMMENDED BY THE GOVERNOR: (1) APPROPRIATE TWENTY-FOUR MILLION DOLLARS FOR INDUSTRIAL SITE INFRASTRUCTURE FOR MAJOR PROJECTS; (2) MODIFY THE JOB DEVELOPMENT INVESTMENT GRANT PROGRAM; (3) PROVIDE INCENTIVES FOR MAJOR PHARMACEUTICAL AND BIOPROCESSING FACILITIES BY EXTENDING THE BILL LEE ACT SUNSET FOR THESE INDUSTRIES AND AUTHORIZING SALES TAX REFUNDS FOR CONSTRUCTION MATERIALS FOR THESE INDUSTRIES; (4) EXTEND THE SUNSET ON AND MODIFY THE CIGARETTE EXPORTATION TAX CREDIT AND MODIFY THE BASE YEAR, (5) CREATE AN ENHANCED TAX CREDIT FOR CIGARETTE EXPORTATION, AND (6) CREATE A LIFE SCIENCES REVENUE BOND AUTHORITY.

<u>**OVERVIEW AND EFFECTIVE DATES:**</u> makes the following economic development changes:

[60] G.S. 160A-460 includes a local board of education within its definition of "unit of local government."

- Appropriates $24 million to a nonreverting fund to be used for site infrastructure for major industrial projects, effective when the act becomes law.
- Makes various changes to the Job Development Investment Grant (JDIG) program, effective when the act becomes law.
- Extends the Bill Lee Act sunset and other deadlines for major pharmaceutical manufacturing and bioprocessing facilities, effective beginning in 2004.
- Authorizes annual sales tax refunds for construction materials for major pharmaceutical manufacturing and bioprocessing facilities, effective January 1, 2004.
- Extends the sunset on the cigarette exportation tax credit from 2005 to 2018 with the additional requirement that the taxpayer use the North Carolina State Ports. This part also allows the credit to be claimed by successors in business and modifies the base year determination.
- Allows a corporate income tax credit for tobacco manufacturers who export cigarettes to foreign countries, who use the North Carolina State Ports, and who maintain employment levels in this State that exceed the corporation's employment level in this State at the end of 2004.
- Establishes an Authority to study and make recommendations for creating a credit enhancement program for financing construction of infrastructure for life sciences manufacturing facilities.

FISCAL IMPACT:

ANALYSIS:

Major Industrial Site Infrastructure

Part 1 of the act creates a nonreverting Site Infrastructure Development Fund in the Department of Commerce to fund site acquisition and development and other capital expenses related to major industrial development. The act would appropriate $24 million to the new Fund for the 2003-2004 fiscal year. A Site Infrastructure Development incentive may be in the form of a restricted grant or forgivable loan directly to a business or a grant to a government or nonprofit agency to administer the incentive.

Projects built with this appropriation are exempted from State construction requirements and State purchase and contract requirements, with one exception. When public funds are expended, the State's policy of minority participation and State's minority participation goal of 10% applies. Projects are also exempted from the part of the State Environmental Policy Act that requires detailed environmental impact statements when public funds or public lands are used for projects and programs significantly affecting the quality of the environment.

Eligible businesses may apply for site development incentives. To qualify for a site development incentive, a business must employ at least 100 new fulltime employees and invest at least a $100 million of private funds in the project. A business must also provide health insurance for its full-time employees and have a history of compliance with the Occupational Safety and Health Act and programs implemented by the Department of Environment and Natural Resources.

The Department of Commerce and the Economic Investment Committee[61] will administer the selection process, including developing appropriate criteria for evaluating applicants. Section 1.3 of the act exempts them from rulemaking procedures in administering this program. Site development incentives can be awarded only if necessary to secure the project in this State. The before approving an application, the Committee must find that the price to be paid for the site is appropriate and not excessive. Section 1.4 of the act provides that the JDIG conflict of interest restrictions will apply to the site infrastructure development program as well.

Once an incentive is awarded, the Department will enter into an agreement with the business to provide site development within available funds. The agreement must include a provision prohibiting a business from receiving a payment or other benefit under the agreement when the business has received notice of an overdue tax debt and the overdue tax debt has not been satisfied or otherwise resolved. The agreement is binding on both parties. The agreement must include performance criteria, remedies, and other safeguards to protect the State's investment. The Attorney General must review and approve each agreement.

After a site development incentive is in effect, the Department of Commerce is responsible for monitoring the business's compliance with performance criteria and for carrying out the clawback process if there is a default. The Department of Commerce is required to report quarterly to Governmental Operations on the details of the program, including projects that receive incentives and any defaults and repayments. This report must also be made available to the public.

Job Development Investment Grant Changes

Part 2 of the act makes several changes to the JDIG program. These changes would be effective when the act becomes law.

Section 2.2 provides that, in determining whether a business has increased or maintained employment, the Committee can decide to look at a division or unit of a business rather than the entire business. Choosing this option means that if the entire business decreases employment, it may still qualify for a grant for a division or unit within the business that increases employment. The Committee can choose this option only if it is necessary to secure the project and the contract contains terms to assure that the business does not create eligibility by transferring existing jobs to the project.

Section 2.3 of the act repeals the wage standard as it applies to the JDIG program. This proposal arises due to several concerns. First, at the time a business applies for a JDIG grant, the wages to be paid are just projections. Second, the law has been interpreted to require the jobs to meet not only the current wage standard, but also future wage standards, which can fluctuate annually. This creates a great deal of uncertainty as to the prospect of actually receiving a grant in future years of the contract. Third, while there is no wage standard for tiers one and two and the wage standard is set below the county average for prosperous tier five counties, the mid-range counties must meet the actual county average. With sudden and severe dislocation, the wage standard may block incentives for a project that would be vital to economic recovery for a county suffering from dislocation of manufacturing industries. Finally, because grants are awarded at the discretion of

[61] The Economic Investment Committee, which administers the JDIG program, is a five-member committee consisting of the Secretary of Commerce, the Secretary of Revenue, the Director of the Office of State Budget and Management, one member appointed by the General Assembly upon the recommendation of the Speaker of the House of Representatives, and one member appointed by the General Assembly upon the recommendation of the President Pro Tempore of the Senate

the Committee, the Committee can use its judgment to assure that grants are not awarded to inappropriate, low-wage projects.

Sections 2.1, 2.4, and 2.5 are more technical. Section 2.1 clarifies that the base period for measuring performance under a grant agreement can be any 24 months starting when performance begins – it is not limited to calendar years. Section 2.1 also adds the definition of enterprise tier to the statute. Section 2.4 clarifies the procedure for publication and public comment on proposed changes to the JDIG criteria. Section 2.5 clarifies that payments under a grant can begin on a future date after it is awarded, as long as they begin within six years.

Extend Bill Lee Credits for Certain Major Industries

In 2002, the General Assembly extended the sunset date on the Bill Lee Act until January 1, 2010, for certain interstate air couriers and also increased various time frames in the Bill Lee Act from two years to seven years. The rationale for these extensions was that the interstate air courier industry, and the construction of a hub in particular, face many regulatory, administrative, and legal hurdles not generally faced by other industries. Due to these extra burdens, there is generally a longer period between the time that a project is announced and a location is selected and the time the facility is placed in service.

Effective beginning with the 2004 tax year, Part 3 of the act makes the same extensions for eligible major industries. An eligible major industry is either of the following two industries if the taxpayer will invest at least $100 million in acquiring, constructing, or equipping a facility to engage in the industry:

- Bioprocessing
- Pharmaceutical and Medicine Manufacturing and the Distribution of Pharmaceuticals and Medicines

If the taxpayer does not in fact invest the required amount, it forfeits the benefits of the extensions and must repay the credits.

Major Industrial Facility Sales Tax Refunds

Part 4 of the act creates an annual refund of State and local sales taxes paid on construction materials and fixtures for facilities that involve the investment of more than $100 million by the taxpayer and are primarily used for either of the following two industries:

- Bioprocessing
- Pharmaceutical and Medicine Manufacturing and the Distribution of Pharmaceuticals and Medicines

The taxpayer must apply for the sales tax refund within six months after the end of the State's fiscal year. The refund would become effective for sales taxes paid on or after January 1, 2004. If, after obtaining a refund, the taxpayer does not end up investing the required amount, the taxpayer forfeits the refund.

Cigarette Exportation Tax Credit

Part 5 of the act extends for thirteen years the sunset of the corporate income tax credit for manufacturing cigarettes for exportation, G.S. 105-130.45, which was enacted in 1999. The credit is a dollar amount per cigarette exported for those manufacturers who export at least 50% as many cigarettes in the taxable year as they did in calendar year 1998. The dollar amount ranges from

forty cents to twenty cents per 1,000 cigarettes exported. The credit is capped at the lesser of $6 million per year or 50% of the manufacturer's corporate tax liability for any given year. The credit is set to sunset for cigarettes exported on or after January 1, 2005. Part 5 of the act would change the sunset to 2018.

Part 5 also makes four other substantive changes to the credit for manufacturing cigarettes for exportation:

- It changes the base year for determining the exportation volume from 1998 to 2003, effective for cigarettes exported on or after January 1, 2005.
- It provides that the taxpayer must export cigarettes through the North Carolina State Ports, effective for cigarettes exported on or after January 1, 2005.
- It allows a successor in business to a corporation that claimed the credit to continue to claim the credit. In this case, the amount of credit allowed is determined by comparing the exportation volume of the corporation in the year for which the credit is claimed with all of the corporation's predecessor corporations' combined base year exportation volume. This provision becomes effective for cigarettes exported on or after January 1, 2005.
- It expands the credit by allowing the credit to be claimed for the exportation of cigarettes to a possession of the United States or a commonwealth of the United States that is not a state. This provision becomes effective for taxable years beginning on or after January 1, 2004.

Prior to enactment of the cigarette exportation tax credit during the 1999 Session, the issue was raised as to whether or not that tax credit would violate GATT, one of the international trade agreements. The General Assembly staff was of the opinion that the tax credit would violate GATT, while counsel for one of the four tobacco manufacturers disagreed. This issue has not been resolved, and the proposed credit in this act presents the same issue. It is clear, however, that any challenge to either the current credit or the credit created in Part 6 of this act must come from a foreign government. If a foreign government were to challenge the credit, then the U.S. Justice Department could sue North Carolina. If the Department were to win, the federal statute provides that relief would be prospective only and persons who had already used the credit could not be required to repay it. Private citizens have no cause of action on the issue.

Enhanced Cigarette Exportation Tax Credit

Part 6 of the act allows a corporate income tax credit for tobacco manufacturers who export cigarettes to foreign countries, who use the North Carolina State Ports, and who maintain employment levels in this State that exceed the corporation's employment level in this State at the end of 2004 by at least 800 full-time employees. The credit would become effective with the 2006 tax year and would expire for exports made on or after January 1, 2018.

The credit is a dollar amount per cigarette exported for those manufacturers who meet the eligibility requirements. The credit amount is equal to forty cents per 1,000 cigarettes exported. The credit is capped at the lesser of $10 million per year or 50% of the manufacturer's tax liability for any given year. The credit may be taken against the corporate income tax or the franchise tax, or a combination of the two, at the election of the taxpayer. Once made, an election is binding and applies to all carryforwards of the credit. The taxpayer may however make a different election each year for credits earned during that year. Unused portions of a credit may be carried forward for 10 years. Part 6 would also allow a partial credit for taxpayers who had previously met all

eligibility requirements but who fail to maintain the required employment level. In computing the partial credit, the credit that would otherwise have been allowed would be reduced in proportion to the failure to the maintain the required employment level

The credit created in Part 6 differs from the credit allowed under G.S. 105-130.45 in several key ways. This credit has a higher cap ($10 million as opposed to $6 million), a longer carryforward period (10 years as opposed to five years), and may be taken against the income tax and/or the franchise tax (as opposed to only the income tax). In addition, the credit requires job creation whereas the credit allowed under G.S. 105-130.45 does not. The credit allowed under G.S. 105-130.45 applies to cigarettes exported to foreign counties, to possessions, or to U.S. commonwealths that are not states (as opposed to just to foreign countries) and requires the taxpayer to "waterborne export" through the N.C. Ports (as opposed to "export"). A taxpayer may take either this credit or the one in G.S. 105-130.45; a taxpayer may not claim both credits for the same activity.

Life Sciences Revenue Bond Authority

Part 7 of the act creates a Life Sciences Revenue Bond Authority in the Department of State Treasurer, effective when the act becomes law. It is step one of a two-step process. First, the Authority will study the best method for establishing a credit enhancement program for construction of infrastructure for life sciences manufacturing facilities. After the Authority reports its findings and recommendations to the General Assembly by May 1, 2004, the act anticipates that in the second stage the Authority would administer any program enacted by the General Assembly.

This Part of the act does not require an appropriation. The Authority is expected to perform its duties during the first phase using funds raised from private sources. In addition, the Authority is authorized to charge fees for one part of the study, in which it will accept test applications (pro forma applications) to evaluate the need for the proposed credit enhancement program. The act directs the authority to cooperate with appropriate government agencies, the UNC system, the Biotechnology Center, and others in developing its recommendations.

One example of a credit enhancement vehicle would be revenue bonds. Under existing law, the State and local governments can issue tax-exempt industrial revenue bonds for manufacturing and pollution control facilities. The bonds are retired with payments from the private business that will use the facility. The private business benefits from paying tax-exempt rates, rather than the taxable rates it would pay if it borrowed the money itself. Under Part 7, the Authority will consider using industrial revenue bonds and other approaches to credit enhancement in order to encourage the expansion of the life sciences manufacturing industry in this State.

The findings portion of Part 7 identifies the life sciences as including biology, zoology, agronomy, biochemistry, genetics, and molecular biology. The commercialization of life sciences products to diagnose and treat diseases and provide other benefits is identified as having significant economic benefit to the State. The stated intent is to encourage the development of the bioprocess manufacturing industries in order to achieve a position of national leadership and innovation in this field.

2002 Tax Law Changes

Remove Scrap Tire Tax Sunset

Session Law	*Bill #*	*Sponsor*
S.L. 2002-10	**HB 1578**	**Representative Gibson**

AN ACT TO REMOVE THE SUNSET ON THE SCRAP TIRE DISPOSAL TAX.

OVERVIEW: This act removes the sunset on a 1993 provision that increased the scrap tire disposal tax from 1% to 2% for tires for car, vans, and pick-up trucks, as recommended by the Environmental Review Commission.

FISCAL IMPACT: Because none of the tax proceeds go to the General Fund, this act has no impact on the General Fund. Removing the sunset is expected to generate about $5.35 million annually that would have otherwise been eliminated by the sunset on the higher tax rate. The tax proceeds are distributed among the Scrap Tire Disposal Account, the Solid Waste Management Trust Account, and counties.

EFFECTIVE DATE: June 27, 2002.

ANALYSIS: The scrap tire disposal tax was enacted in 1989. It applies to tires sold at retail and to tires sold for placement on vehicles to be sold or leased at retail. In 1993, the tax rate on tires with a bead diameter of less than 20 inches was increased from 1% to 2%. Bead diameter is the width of the inside opening of the tire. Tires for cars, vans, and pick-up trucks have a bead diameter of less than 20 inches.

The increase in the tax rate for these smaller tires was set to sunset on June 30, 2002, which would have reduced the rate back to 1%. This act deleted the sunset so the tax rate will remain at 2% on tires with a bead width of less than 20 inches.

The net proceeds of the scrap tire disposal tax are distributed as follows: 27% to the Scrap Tire Disposal Account[1], 5% to the Solid Waste Management Trust Fund, and 68% to the counties on a per capita basis. Counties may use the proceeds of the scrap tire disposal tax distributed to them only for the disposal of scrap tires or for the abatement of nuisance tire collection sites. The Department of Environment and Natural Resources may use up to 50% of the revenue in the Scrap Tire Disposal Account for grants to local governments to assist in the disposal of scrap tires and may use up to 40% of the amount in the Account for grants to encourage the use of processed scrap tire materials. The remaining funds in the Account may be used for assistance to local governments in managing scrap tire programs, and to clean up nuisance scrap tire collection sites if no other funds are available for that purpose. The Department of Environment and Natural Resources must report to the Environmental Review Commission each year on the balances in the Account and the use of the money in the Account. The money in the Solid Waste Management

[1] Section 2.2(j) of the Current Operations and Capital Improvement Appropriations Act of 2001 provided that the net proceeds of the Scrap Tire Disposal tax collected in 2001-02 would be credited to the General Fund instead of the Scrap Tire Disposal Account.

Trust Fund is used to fund activities of the Department of Environment and Natural Resources to promote waste reduction and recycling, to fund research on the solid waste stream in North Carolina, to fund activities related to the development of secondary materials markets, to fund demonstration projects, and to fund research by in-State colleges and universities.

Conform Mobile Telecommunications Sourcing

Session Law	*Bill #*	*Sponsor*
S.L. 2002-16	**HB 1521**	**Representative Allen**

AN ACT TO CONFORM SOURCING OF MOBILE TELECOMMUNICATIONS SERVICES TO THE FEDERAL MOBILE TELECOMMUNICATIONS SOURCING ACT AND TO CODIFY THE SOURCING PRINCIPLES FOR OTHER TELECOMMUNICATIONS SERVICES.

OVERVIEW: This act conforms State sales tax law to the federal Mobile Telecommunications Sourcing Act and codifies the sourcing rules for other types of telecommunications, as recommended by the Revenue Laws Study Committee.

FISCAL IMPACT: While this legislation may redistribute tax revenue between jurisdictions because of changes in sourcing, the total amount available to local governments will not change.

EFFECTIVE DATE: Most of the act became effective for taxable services reflected on bills dated on or after August 1, 2002. This effective date corresponds with the effective date of the federal Mobile Telecommunications Sourcing Act. Two provisions are delayed until January 1, 2004: a new sourcing principle for private lines and a requirement that postpaid calling service be sourced based on the origination point of the signal.

ANALYSIS:

Prior Law: In 2001, the General Assembly simplified the taxation of telecommunications services by providing one tax at one rate for all telecommunication services, including interstate telecommunications service. Under the law, mobile telecommunications service is considered to be taxable in this State if the customer's service address is in this State and the call originates or terminates in this State. However, under the federal Mobile Telecommunications Act, mobile telecommunications service is taxable by the state of the customer's place of primary use, regardless of whether or not the call originates or terminates in the state. A mobile customer's service address and place of primary use are the same: the residential street address or the primary business street address of the customer that is within the licensed service area of the service provider. Therefore, it is the requirement that the call originate or terminate in the State that must be changed to conform to the federal mobile telecommunications sourcing rules.

Background: "Sourcing" is the determination of the jurisdiction within which a transaction is considered to take place for tax purposes. Jurisdictions that tax interstate and international telecommunications generally follow the "*Goldberg* Rule", which is based on an Illinois tax that was upheld by the U.S. Supreme court in *Goldberg v. Sweet*, 488 U.S. 252 (1989). Under the *Goldberg* Rule a jurisdiction may tax a telephone call if the call meets one of the following two criteria:

- It both originates and terminates in that jurisdiction.
- It originates *or* terminates in that jurisdiction *and* is charged to a service address in that jurisdiction.

Because of the complexity of identifying the source of mobile telecommunications, federal legislation was enacted effective August 1, 2002, that sources mobile telecommunications transactions at the place of primary use, which is the same as the service address – the residential address or business premises of the purchaser.

Under the federal legislation, states may furnish service providers with a database[2] matching street addresses with taxing jurisdictions.[3] Service providers would be held harmless for any errors resulting from their use of the database. If a database is not provided for a state, then the service provider may determine the appropriate taxing jurisdiction by using an enhanced zip code[4] to assign each street address to a specific taxing jurisdiction in that state. Service providers would be held harmless from any tax liability that otherwise would be incurred solely as a result of an assignment of a street address to an incorrect taxing jurisdiction under this method. The accuracy of the method used is important to protect the tax base of local taxing jurisdictions. The hold harmless provision is important to service providers who provide service in a state with multiple taxing jurisdictions.

The Streamlined Sales Tax Project is working with the telecommunications industry on uniform provisions for sourcing as well as refund limitation provisions based upon the hold harmless provisions in the federal Mobile Telecommunications Sourcing Act. The Streamlined Sales Tax Project and the implementing states[5] have adopted principles for sourcing. The principles do not differ from North Carolina's current sourcing principles. This act codifies those principles. The Streamlined Sales Tax Project has not yet completed its work on the refund limitation provisions. Since North Carolina does not have multiple taxing jurisdictions[6], it does not currently need these provisions. Therefore, this act does not include any provisions on this issue.

SECTION-BY-SECTION ANALYSIS: This act conforms North Carolina's sourcing of mobile telecommunications to the federal Mobile Telecommunications Sourcing Act and codifies the sourcing principles adopted by the Streamlined Sales Tax Project and the 27 implementing states, as follows:

Sections 1, 3, and 15:	Replace the term "service address" and "billing address" with the term "place of primary use" because that is the terminology used in the federal Mobile Telecommunications Sourcing Act.

[2] The Multi-State Tax Commission and the Federation of Tax Administrators are currently involved in a project to specify the format of the database.
[3] Some states allow local governments to impose a tax on telecommunications services, resulting in multiple taxing jurisdictions within a state.
[4] The level of accuracy for the nine-digit zip code ranges from 85% to 99%. A more accurate system may be developed using a geographic mapping system. The federal law gives each state the ability to develop a more accurate system if it so chooses.
[5] There are 27 states that have enacted legislation based on either the Uniform Sales and Use Tax Administration Act or the Simplified Sales and Use Tax Administration Act: AR, FL, IL, IN, KY, LA, ME, MD, MI, MN, NE, NV, NJ, NC, ND, OH, OK, RI, SD, TN, TX, UT, WA, WI, WV, WY, and the District of Columbia.
[6] North Carolina distributes a portion of the State-imposed telecommunications tax to the cities.

Sections 2, 8, 12, and 13:	Change the term "prepaid telephone calling arrangement" to the term "prepaid telephone calling service" so that the terminology is consistent with the other forms of telecommunication services.
Sections 4 and 5:	Prepaid telephone calling services are taxed as tangible personal property, not as a telecommunications service. Section 4 removes the sourcing language from the statute that sets the sales tax rates and Section 5 modifies the sourcing principles that apply to tangible personal property to accommodate the taxation of prepaid telephone calling services.
Section 6:	Deletes the sentence that sources mobile telecommunications based on the call originating or terminating in this State because it conflicts with the sourcing principle in the federal Mobile Telecommunications Sourcing Act. It also specifies that mobile telecommunications services are taxed in accordance with federal law. This reference alerts the reader that there is applicable federal law on this issue.
Sections 7 and 11:	Under the federal Mobile Telecommunications Sourcing Act and the Streamlined Sales Tax Project, telecommunications service is sourced based on the type of service provided rather than the type of call. These sections define the different types of services and repeal the terms associated with the types of calls.
Sections 9 and 10:	Set forth the mobile telecommunications sourcing principle in the federal Mobile Telecommunications Sourcing Act, and codify the principles currently used by the State to source other telecommunications services. Section 10 rewrites the sourcing principles for private telecommunications service in a more understandable format and adds a sourcing principle that is not currently applicable to private lines in the State, but may be applicable in the future. The principles codified are the same principles adopted by the Streamlined Sales Tax Project and the implementing states in March of 2002. Under the act, at the request of the telecommunications industry, the new sourcing principle applicable to private telecommunications service does not become effective until January 1, 2004.
Sections 9 and 14:	Under the Streamlined Sales Tax Project, postpaid calling service will be sourced based on the origination point of the telecommunications signal as first identified by the seller's telecommunications system. However, not every company in the telecommunications industry has the capability to determine the origination point of the signal. The act gives the seller two options to source postpaid calling service until 2004; beginning in 2004, the seller must source based on the origination point of the telecommunications signal.

Certain Counties Delinquent Taxes

Session Law	*Bill #*	*Sponsor*
S.L. 2002-51	**HB 1533**	**Representative Hunter**

AN ACT TO AUTHORIZE CERTAIN COUNTIES TO REQUIRE THE PAYMENT OF DELINQUENT PROPERTY TAXES BEFORE RECORDING DEEDS CONVEYING PROPERTY AND TO MODIFY THE TIMETABLE FOR STOKES COUNTY OR ANY OF ITS MUNICIPALITIES TO ADOPT A SCHEDULE OF DISCOUNTS FOR PREPAYMENT OF PROPERTY TAXES.

OVERVIEW: S.L. 2002-51 authorizes the county commissioners in Bertie, Clay, Durham, Henderson, Hertford, Macon, Northampton, Polk, Rutherford, and Transylvania Counties to require the register of deeds to refuse to register a deed unless the county tax collector has certified that no delinquent taxes are due on the property. In addition, this act allows the governing body of Stokes County or any of its municipalities to provide a schedule of discounts for property taxes paid prior to November 1, 2002.

FISCAL IMPACT: This act has no impact on the General Fund.

EFFECTIVE DATE: This act became effective when it became law, July 30, 2002.

ANALYSIS: Since 1963, the General Assembly has prohibited the register of deeds in several counties and municipalities from recording deeds unless the tax collector certifies that no delinquent taxes are due: Avery County (1963); Mitchell County (1987); Ashe County (1993); the Towns of Newland and Spruce Pine and Alleghany County (1997); the Town of Banner Elk (1998); and the Town of Bakersville (1999).

In 2001, the General Assembly gave the county commissioners in 35 counties the authority to adopt a resolution requiring the county tax collector to certify that no delinquent taxes the collector is charged to collect are due on the property before a deed transferring the property can be recorded. S.L. 2001-464 gave this authority to the following 25 counties: Alleghany, Anson, Beaufort, Cabarrus, Camden, Cherokee, Chowan, Currituck, Forsyth, Graham, Granville, Harnett, Haywood, Jackson, Lee, Madison, Montgomery, Pasquotank, Perquimans, Pitt, Stanley, Swain, Vance, Warren, and Yadkin Counties. S.L. 2001-513 gave this authority to the following 10 counties: Carteret, Cleveland, Davidson, Gaston, Iredell, Martin, Person, Rockingham, Rowan, and Washington Counties. Unlike the previous local acts, the authority given by these two 2001 acts is permissive. To use this collection tool, the board of county commissioners must adopt a resolution on the matter. The resolution may describe the form the certification must take.

S.L. 2002-51 extends to the following 10 counties the permissive authority given to the 35 counties in 2001: Bertie, Clay, Durham, Henderson, Hertford, Macon, Northampton, Polk, Rutherford, and Transylvania Counties.

In addition, S.L. 2002-51 allows Stokes County and it municipalities to institute, without the approval of the Department of Revenue, a schedule of discounts to be applied to property taxes paid prior to November 1, 2002. The governing body that adopts the resolution must submit a certified copy to the Department of Revenue and must publish the discount schedule at least once in a newspaper of general circulation in the taxing unit. In general, under G.S. 105-360(c), a county or municipality that levies a property tax may adopt a resolution or ordinance to establish a schedule of discounts for taxes paid prior to the due date. In order to exercise this authority, the county or municipality must 1) adopt the resolution or ordinance specifying the schedule of discounts prior to May 1, 2) submit the resolution or ordinance to the Department of Revenue

for approval, and 3) upon approval of the resolution or ordinance, publish the discount schedule at least once in a newspaper of general circulation in the taxing unit.

Revenue Laws Technical Changes

Session Law	*Bill #*	*Sponsor*
S.L. 2002-72	**SB 1160**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES AND TO PROVIDE A ONE-TIME EXTENSION TO THE TIME PERIOD IN WHICH A TAXPAYER MAY SIGN A LETTER OF COMMITMENT WITH THE DEPARTMENT OF COMMERCE TO QUALIFY FOR A LOWER TIER DESIGNATION.

OVERVIEW: Senate Bill 1160 makes numerous technical and clarifying changes to the revenue laws and related statutes. It also makes one substantive change. The original bill was a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: Section 1 of this act, which allows a one-time exception to the requirement that a letter of commitment be signed before year's end, has an annual cost to the General Fund of $725,000 through the 2006-2007 fiscal year and an annual cost of $25,000 for three years thereafter. The remainder of this act has no fiscal impact.

EFFECTIVE DATE: Except for Section 9 of the bill, which conforms the payment date for the insurance regulatory charge on HMOs to the date they file their premium tax returns and which becomes effective for taxable years beginning on or after January 1, 2003, this act became effective when it became law on August 12, 2002.

ANALYSIS:

SUBSTANTIVE CHANGE: Section 1 of the bill was introduced by Senator Soles as Senate Bill 1344. It allows a taxpayer that signed a letter of commitment with the Department of Commerce on or before February 28, 2002, to calculate its Bill Lee jobs creation tax credit and machinery and equipment investment tax credit based on the location's enterprise tier and development zone designation for 2001 rather than 2002. This change would benefit taxpayers creating jobs or making eligible investments in areas whose tier designations increased for the calendar year 2002.

Under the Bill Lee Act, all counties are divided into five enterprise tiers, ranked by economic distress as measured by a formula that combines unemployment, per capita income, and population growth. The Department of Commerce must designate the counties' tier designations for the following year on or before December 31 of each year, based on the most recent data available. The Department of Commerce did not make the counties' tier designations for the 2002 calendar year until April 2002. It appears some taxpayers signed letters of commitment by February 28, 2002, under the belief they would be able to calculate the credit for which they qualified based on the location's enterprise tier designation for 2001. However, this was not possible under then existing law for locations whose tier designation changed for 2002.

Section 1 of this bill allows a taxpayer that signed a letter of commitment with the Department of Commerce during January or February 2002 for future planned expansion to calculate its Bill Lee jobs creation tax credit and investment tax credit based on the location's enterprise tier designation for 2001 rather than 2002. Because this section is permissive, its effect is to benefit taxpayers creating jobs or making eligible investments in areas whose designations increased for the calendar year 2002. The Department of Commerce reports that it has eight letters of commitment signed on or before February 28, 2002, in counties whose tier designations increased from 2001 to 2002.[7] The following chart shows the counties that will be affected by this section and the difference the section will make in the credit amounts the taxpayers qualify for:

COUNTY[8]	**LOC's SIGNED BY 02/28/02**	**2001 TIER DESIGNATION** *The credit and threshold amounts the taxpayer will receive under this section.*	**2002 TIER DESIGNATION** *The credit and threshold amounts the taxpayer would have received if this act had not been enacted.*
Columbus	3	Tier 1: Jobs tax credit = $12,500 Threshold amount = $0	Tier 2: Jobs tax credit = $4,000 Threshold amount = $100,000
Richmond	1	Tier 1: Jobs tax credit = $12,500 Threshold amount = $0	Tier 2: Jobs tax credit = $4,000 Threshold amount = $100,000
Montgomery	1	Tier 2: Jobs tax credit = $4,000 Threshold amount = $100,000	Tier 3: Jobs tax credit = $3,000 Threshold amount = $200,000
Cumberland	1	Tier 3: Jobs tax credit = $3,000 Threshold amount = $200,000	Tier 4: Jobs tax credit = $1,000 Threshold amount = $500,000
Franklin	2	Tier 4: Jobs tax credit = $1,000 Threshold amount = $500,000	Tier 5: Jobs tax credit = $500 Threshold amount = $1,000,000

TECHNICAL CHANGES: The Revenue Laws Study Committee recommended The Revenue Laws Technical Changes bill. The following table provides a section-by-section analysis of the technical changes.

SEC.	G.S./S.L.	EXPLANATION
2	S.L. 1967-1096,	Corrects a grammatical error.

[7] Although the bill also applies to areas designated as a development zone, it has no practical application for development zones because there were no letters of commitment signed with the Department of Commerce for a project in a development zone on or before February 28, 2002.

[8] Onslow County moved from a Tier 2 county designation in 2001 to a Tier 3 county designation in 2002. However, it is not affected by this act because there were no letters of commitment signed with the Department of Commerce for a project located in that county on or before February 28, 2002.

SEC.	G.S./S.L.	EXPLANATION
	as amended by S.L. 2001-414	
3	S.L. 2001-264	Clarifies S.L. 2001-264, An Act To Provide Uniform Penalties For Local Meals Taxes. That act made all local meals tax penalties uniform by applying the existing State sales and use tax penalties to meals taxes. The act was intended to improve tax administration by making uniform the tax penalties for each local meals tax. After the act became law, staff noticed that its language might not be sufficiently clear to assure that the penalties will be uniform in each jurisdiction. This section adds language to clarify that additional or higher local penalties are repealed.
4	S.L. 2001-414	Corrects an incorrect cross-reference.
5	S.L. 2001-472	Corrects a typographical error. Although Section 3(a) of S.L. 2001-427 purports to amend just subsection (a) of G.S. 105-472, it actually amends the entire statute. This section conforms the law to accurately state that it amends the entire statute.
6	G.S. 20-10.1	Updates a cross-reference to a definition.
7	G.S. 20-17.4	Adds a missing phrase.
8	G.S. 20-87	Restores language intended to be enacted in 2001 but omitted due to a redlining error.
9	G.S. 58-6-25	Conforms the payment date of the insurance regulatory charge on HMOs to the date they file their premiums tax return. This has no substantive effect because the dates are the same in current law.
10	105-116	Deletes an obsolete cross-reference to a tax credit that is no longer allowed against franchise tax.
11	G.S. 105-127	Repeals two obsolete subsections. These subsections exempt certain stock from property tax. All stock is now exempt from property tax under G.S. 105-275(31).
12	G.S. 105-129.4	Corrects an incorrect word.
13	G.S. 105-129.12A	Conforms terminology to a change in procedure that was enacted in 2001.
14	G.S. 105-130.5	Clarifies that the corporate income tax deduction for 911 charges applies only if the taxpayer included the charges in federal taxable income. Without this correction, there could be an unintended double deduction for these charges.

SEC.	G.S./S.L.	EXPLANATION
15	G.S. 105-130.34 G.S. 105-151.12	Clarifies that the credit for conservation donations applies only if the interest in real property is donated in perpetuity. This conforms the statute to interpretations by DOR and DENR[9]. Comparable federal law requires that a donation be (1) the entire interest of the donor, (2) a remainder interest, or (3) a restriction in perpetuity. This provision was introduced as Sections 1 and 2 of Senate Bill 1252, recommended by the Environmental Review Commission.
16	G.S. 105-163.7	Repeals an obsolete subsection. The Industrial Commission receives the same information from another source now and no longer wants to get it from the Department of Revenue
17	G.S. 105-164.23	Conforms and updates language.
18	G.S. 105-164.27A	Deletes extra language intended to be deleted in 2001 but retained due to a redlining error.
19	G.S. 105-187.1, G.S. 20-4.01, G.S. 20-116, G.S. 20-305.2	Conforms the definition of "recreational vehicle" in the highway use tax to the definition in the motor vehicles law, and eliminates inconsistent usage of the term. Also, clarifies and reorganizes the statute governing vehicle length.
20	G.S. 105-269.14	Conforms the use tax distribution percentage to reflect past and future rate changes.
21	G.S. 159I-1	Conforms the statutory short title in G.S. 159I-1 to match the title of G.S. Chapter 159I, which was amended in 2001.

Housing Tax Credit Chngs/Estate Tax Chngs

Session Law	*Bill #*	*Sponsor*
S.L. 2002-87	**SB 1416**	**Senator Kerr**

AN ACT TO IMPROVE THE LOW-INCOME HOUSING TAX CREDIT BY MAKING IT SIMPLER AND LESS COSTLY WHILE PROVIDING THE SAME LEVEL OF INCENTIVES FOR THE CONSTRUCTION OF LOW-INCOME HOUSING AND TO MODIFY THE FORMULA FOR CALCULATING NORTH CAROLINA ESTATE TAX ON ESTATES WITH PROPERTY IN MORE THAN ONE STATE.

OVERVIEW: This act modifies the low-income housing tax credit to make it simpler and more efficient and modifies the formula for calculating estate tax on estates with property in more than one state.

FISCAL IMPACT:

[9] Under 15A NCAC 1F .0001 through .0006, DENR will certify donated property for the credit only if it provides a perpetual public benefit.

The projected revenue impact of the housing tax credit changes are as follows:

FY 2004-05	- $8 million
FY 2005-06	- $9.8 million
FY 2006-07	$2.9 million
FY 2007-08	$24.5 million

The other sections of the act are assumed to have little or no impact on the General Fund.

EFFECTIVE DATE: The low-income housing tax credit changes became effective beginning with the 2002 tax year for the existing credit and in 2003 for buildings that are awarded a federal credit allocation on or after January 1, 2003. The estate tax change became effective for the estates of decedents dying on or after January 1, 2002.

ANALYSIS:

LOW-INCOME HOUSING TAX CREDIT: Congress enacted the Low Income Housing Tax Credit in 1986 to fund housing for low- and moderate-income households. Each state receives a limited amount of credit each year. The IRS allocates the per capita low-income housing tax credit to state housing agencies, such as the North Carolina Housing Financing Agency, who in turn allocate the credit to project developers who agree to lower project rents for low-income tenants. In 1999, North Carolina authorized a State income tax credit equal to a percentage of the developer's federal tax credit for low income housing constructed in North Carolina. A project developer sells the tax credits to receive funds to finance the project. Developers indicate that the State tax credit sells for no more than 45 cents on the dollar.

During the 2002 session, the General Assembly became aware of several concerns with the low-income housing tax credit:

- The sale of a dollar tax credit for less than 45 cents is an inefficient use of State tax expenditures.
- The process of selling the tax credits is complex. It involves finding investors, negotiating prices, and completing legal documents.
- The pool of investors interested in purchasing the credit is limited and is diminishing.

This act addresses these concerns in two ways:

- To address the short-term problem of utilizing the tax credits allocated to developers, the act reduces the tax basis required of a purchaser from 100% to 40%.
- To address the long-term problem of the complexity and inefficiency of the credit, the act converts the State credit, which is sold to investors, to a refundable credit, received directly by the owner and invested directly in the project.

New, Refundable Credit for Housing with Federal Allocations beginning 1/1/03: A taxpayer who is allocated a federal low-income housing tax credit is allowed a credit equal to a percentage of the development's eligible basis. Unlike the existing credit that must be taken over five years, the new refundable credit is taken in one year. The existing State credit is a percentage of the federal credit and the percentage varies depending on the tier designation of the county. The new refundable credit is a percentage of the basis for which a federal credit is allowed and the

percentage varies depending on the type of development. The eligibility of a development is based upon two factors:

- Income designation of the county or city in which it is located. – The designation of a county or city as "low income", "moderate income", or "high income" is made by the North Carolina Housing Finance Agency ("HFA") in accordance with the Qualified Allocation Plan in effect as of the time the federal credit is allocated. The Qualified Allocation Plan is adopted annually. The Governor must approve it after a public hearing and publication in the North Carolina Register. A change in the income designation does not affect the developer's eligible basis for which a credit is allowed.

- Affordability requirements. – The affordability requirements are set in the statute and apply for the duration of the federal tax credit compliance period. If in any year a taxpayer fails to meet these affordability requirements, the credit is forfeited.

The chart below sets out the percentage of the developer's eligible basis for which a credit is allowed:

Type of Development	Percentage of Basis for which Credit is Allowed
• Units are in a "low income" county or city • 40% of the qualified residential units are affordable to households whose income is 50% or less of area median income	30%
• Units are in a Moderate Income county or city • 50% of the qualified residential units are affordable to households whose income is 50% or less of the area median income	20%
• Units are in a High Income county or city • 50% of the qualified residential units are affordable to households whose income is 40% or less of the area median income	10%
• Units are in a High Income county or city • 25% of the qualified residential units are affordable to households whose income is 30% or less of the area median income	10%

Credit Election: A taxpayer entitled to the new, refundable low-income housing tax credit may elect to receive the credit in the form of either a direct tax refund or a loan generated by transferring the credit to the HFA. Neither a direct tax refund nor a loan received as a result of the transfer of the credit is considered taxable income by the State. The IRS would consider a direct tax refund taxable. A letter ruling will be submitted to the IRS to clarify whether the loan proceeds would be taxable. The initial indication is that the proceeds would not be taxable.

If a taxpayer chooses the loan method for receiving the credit, the Secretary must transfer to the HFA the amount of credit allowed the taxpayer. The HFA must loan the amount of the credit to the taxpayer on terms consistent with the Qualified Allocation Plan. The HFA is not required to make the loan until the Secretary transfers the credit amount to it.

If a taxpayer chooses the direct tax refund method for receiving the credit, the Secretary must transfer to the HFA the refundable excess of the credit allowed the taxpayer. The HFA holds the refund in escrow, with no interest accruing to the taxpayer during the escrow period. The HFA must release the refund to the taxpayer upon the occurrence of the earlier of the following:

- The HFA determines that the taxpayer has complied with the Qualified Allocation Plan and has completed at least 50% of the activities included in the development's eligible basis.
- The expiration of 30 days after the development's placed in service date.

Forfeiture: If a taxpayer fails to meet the State's affordability requirements for the duration of the federal tax credit compliance period, the State credit is forfeited. If the taxpayer is required to recapture all or part of the federal credit with respect to a qualified North Carolina low-income development, the State credit is also forfeited. A taxpayer that forfeits all or part of the State credit is liable for all past taxes avoided and any refund claimed as a result of the credit plus interest. This amount is payable 30 days after the date the credit is forfeited. The interest is computed from the date the Secretary transferred the credit amount to the HFA.

A taxpayer that is required to recapture all or part of the federal credit with respect to a qualified North Carolina low-income development does not forfeit the corresponding State credit amount in the following circumstances:

- The recapture is the result of an event that occurs in the sixth or subsequent calendar year after the calendar year in which the development was awarded a federal credit allocation.
- The taxpayer elected to transfer the State credit amount to the HFA and received a loan from the HFA for that amount.

Report: The Department of Revenue must report to the Revenue Laws Study Committee and the Fiscal Research Division of the General Assembly by May 1 of each year the following information for the 12-month period ending the preceding April 1:

- The number of taxpayers that claimed the low-income housing credit.
- The location of each qualified North Carolina low-income building or housing development for which a credit was claimed.
- The total cost to the General Fund of the credits claimed.

Sunset: Like the existing low-income housing tax credit, this new refundable credit is repealed effective January 1, 2006.

Modifications for Existing Credit for Housing with Federal Allocations before 1/1/03: Often the investment group financing a low-income housing project is a pass-through entity. In 2001, the General Assembly provided that the low-income housing credit could be allocated among any of the entity's owners, in the entity's discretion, as long as the amount of credit allocated did not exceed the owner's adjusted basis in the pass-through entity. This tax basis requirement means the investor must invest $1 into the project for each $1 of the State credit received.

However, the General Assembly determined in 2002 that the market rate for the credit was about 45 cents for each $1 of State credit. The pool of investors willing and able to meet the tax basis requirement was smaller than the need for investment. Without a change in the tax basis requirement, many developers with projects underway may have lost money on those projects. To encourage more investment immediately, the act reduced the tax basis required of a purchaser from 100% to 40%.

The act also addresses the issue of forfeiture of the existing credit by providing that the taxpayer does not forfeit the State credit if a recapture of the federal credit occurs after the State five-year credit period has expired. The federal credit is taken over a 10-year period.

ESTATE TAX CHANGES: Section 9 of the act incorporates a proposal from the Estate Tax Section of the North Carolina Bar Association.[10] It changes the calculation of estate tax due when property is located in more than one state from a net value ratio to a gross value ratio. Before this act became law, North Carolina was one of only three states that prorated based on the net value of the federal taxable estate. At least 36 states prorate based on gross values, including the neighboring states of South Carolina and Virginia.

For estates with property only in North Carolina, the North Carolina estate tax equals the credit for state death taxes allowed on the federal estate tax return.[11] If an estate has property in more than one state, the federal credit must be prorated between North Carolina and the other states in which the estate has property. Under prior law, the percentage of the federal credit allocated to North Carolina was determined by dividing the net value of the property in North Carolina by the total net value of the property in the estate.

Net value equals the gross value of the property less any debts associated with the property, such as a mortgage. The prior law was attempting to allocate the credit based on the value of the property that was includible in the taxable estate for federal purposes. The federal estate tax is calculated on the taxable estate, which is the gross estate less allowable deductions such as debts.

The Estate Tax Section of the North Carolina Bar Association asserted that a state's share of federal estate tax is more appropriately based on the gross property located in a state whether or not the property generates any federal estate tax. It proposed that this approach is fair because each state has a responsibility for protecting and supervising the distribution of property regardless of whether it generates federal tax. Also, the use of a net value calculation sometimes results in a North Carolina resident paying more tax than 100% of the amount of the credit.[12] In other instances it may result in a loss of revenue to North Carolina[13]; this may be particularly true in estates in which property qualifies for the marital deduction.

---

[10] Representative Haire introduced a bill on this issue in 2001, House Bill 276.

[11] The credit for state death taxes allowed on the federal estate tax return is being phased out over the next four years. As a result of legislation enacted in 2002 (S.L. 2002-126), North Carolina does not conform to the phase-out of this credit for 2002 and 2003.

[12] A Charlotte resident has a gross estate worth $10,000,000, including a $2,000,000 home in South Carolina with a $1,000,000 mortgage. The South Carolina portion of the credit is 20% because South Carolina uses a gross value calculation: 2,000,000 divided by 10,000,000. The North Carolina portion of the credit is 88%: 8,000,000 divided by 9,000,000.

[13] A Charlotte resident has a gross estate worth $10,000,000, including a $2,000,000 home in South Carolina. The North Carolina property has a $1,000,000 mortgage. The South Carolina portion of the credit continues to be 20%. However, the North Carolina portion of the credit is reduced to 77%: 7,000,000 divided by 9,000,000.

Extend Qualified Business Venture Tax Credit

Session Law	*Bill #*	*Sponsor*
S.L. 2002-99	**HB 1520**	**Representative Allen**

AN ACT TO EXTEND THE SUNSET ON TAX CREDITS FOR QUALIFIED BUSINESS INVESTMENTS, TO AMEND THE DEFINITION OF QUALIFIED GRANTEE BUSINESS, TO EXTEND THE SUNSET ON THE STATE PORTS TAX CREDIT, AND TO CLARIFY AND AMEND THE NORTH CAROLINA STATE PORTS AUTHORITY'S FEE-SETTING AUTHORITY.

OVERVIEW: This act extends the tax credit on qualified business investments and the State ports tax credit from January 1, 2003 to January 1, 2004, and revises the definition of "qualified grantee business" to alleviate a constitutional concern by replacing specific named entities with general descriptions of entities. The act also clarifies that the North Carolina State Ports Authority has fee-setting authority for its rates and tariffs, gives the Authority guidelines to use in setting those fees, requires the Authority to report to the Joint Legislative Commission on Governmental Operations no later than 30 days after it establishes or increases a fee, and exempts the Authority's fee-setting from the rule-making portion of the Administrative Procedure Act.

FISCAL IMPACT: The amount of the tax credit on qualified business investments that is given each year is capped at $6 million. Because requests for credits have exceeded this cap for four out of the last five years, it is likely that the $6 million annual cost of the program will continue until its sunset in 2004. The General Fund impact due to the extension of this tax credit will occur in the 2003-2004 fiscal year because the investments made in 2003 will be awarded credits on returns filed in the spring of 2004. The extension of the State Ports Authority tax credit is estimated to cost the General Fund $650,000 in the 2003-2004 fiscal year. The changes to the State Ports Authority fee-setting power have no fiscal impact.

EFFECTIVE DATE: The change to the definition of "qualified grantee business" is effective January 1, 2003. The remainder of this act became effective August 29, 2002.

ANALYSIS:

QUALIFIED BUSINESS INVESTMENT TAX CREDIT: The qualified business investment tax credit was enacted in August 1987 to promote economic development for North Carolina businesses. The initial credits applied to both corporations and individual taxpayers, and there was a $12 million cap on the total amount of all tax credits. In response to a 1996 United States Supreme Court decision in Fulton Corp. v. Faulkner, the General Assembly reduced the $12 million cap to $6 million, limited the credit to individuals and small pass-through entities, and removed the requirement that the qualified businesses be headquartered or operating in North Carolina. The credit was to expire for investments made on or after January 1, 1999. In 1998, as part of the appropriations bill, the credit was extended for four additional years until January 1, 2003. This act extends the sunset for one additional year until January 1, 2004.

Explanation of the credit: The qualified business investment tax credit is allowed for an individual taxpayer who purchases the equity securities or subordinated debt of a qualified business venture or a qualified grantee business directly from that business. The credit is equal to 25% of

the amount invested and may not exceed $50,000 per individual in a single taxable year. An individual investor may also claim the allocable share of credits obtained by "pass-through entities" of which the investor is an owner. Pass-through entities include limited partnerships, general partnerships, S corporations, and limited liability companies. The credit may not be taken in the year the investment is made. Instead, the credit is taken in the year following the calendar year in which the investment was made, but only if the taxpayer filed an application with the Secretary of State. The unused credit may be carried forward for the next five years. The total amount of credits allowed to all taxpayers for investments made in a calendar year may not exceed $6 million. The Secretary of Revenue calculates the total amount of tax credits claimed from applications filed with the Secretary of State. If the amount exceeds the cap, then the Secretary allows a portion of the tax credits claimed by allocating the total of $6 million in tax credits in proportion to the size of the credit claimed by each taxpayer. In general, a taxpayer forfeits the credit if the taxpayer transfers the securities within one year or the qualified business redeems the securities purchased by the taxpayer within five years after the investment was made.[14]

Impact of Fulton Corp. v. Faulkner: Under the 1996 Fulton case, the original credit provisions clearly violated the interstate commerce clause of the federal constitution because they reduced a taxpayer's tax liability by an amount equal to 25% of the cost of purchasing stock in either a North Carolina business or an investment company whose purpose is to invest in North Carolina businesses, while no tax reduction was allowed for purchasing similar stock in out-of-state businesses or investment companies whose purpose is to invest in businesses that may not be North Carolina businesses. In response to the Fulton case, the Revenue Laws Study Committee discussed this credit, along with several others, at great length. The original proposal of the Committee was to repeal all qualified business investment credits, effective January 1, 1997. In response to appeals to the Committee and to the General Assembly, the credit was expanded to include investments in businesses located both inside and outside North Carolina. However the credit was no longer allowed for investments in investment companies and was limited to investments made by individuals and small pass-through entities under the theory that these investors are not likely to invest outside a 50-mile radius of their homes.

Amendment to definition of "qualified grantee business": In order to be a business in which investments are eligible for a credit, the business must be either a "qualified business venture" or a "qualified grantee business." Both types of businesses must be registered with the Secretary of State. The definition of "qualified business venture" includes several general requirements related to the line of business, gross revenues of the business, and the organization date of the business. Prior to this act, the definition of "qualified grantee business" included a requirement that the business have received a grant or other funding in at least one of the three previous years from one of several named entities. Arguably, this definition violated the rule of uniformity since a credit is allowed only for investments in businesses that have received a grant from one of several specifically named entities, and not for investments in similar businesses that have received grants from similar entities. To address this constitutional issue, the act amends the definition of "qualified grantee business" by replacing the named entities with descriptions that would encompass the following previously named entities: the North Carolina Biotechnology

[14] There are two exceptions to this forfeiture provision. First, if the transfer occurs as a result of the death of the taxpayer, the liquidation of the taxpayer, or certain reorganizations of the qualified business, within the one-year period, the transfer does not require forfeiture. Second, the 1998 legislation created an exception to this forfeiture provision for projects in the film industry, since it is unusual for a project in that industry in which a person might invest to last for more than five years.

Center, MCNC, and the Kenan Institute for Engineering, Technology, and Science. The only previously named entity that these descriptions do not encompass is the Technological Development Authority. It is unknown if any other entity qualifies under these descriptions.

STATE PORTS TAX CREDIT: This act extends the sunset on the tax credit for North Carolina State Ports Authority wharfage, handling, and throughput charges for one year, from January 1, 2003 to January 1, 2004. When first enacted, this credit was effective for taxable years beginning on or after March 1, 1992, and ending on or before February 28, 1996. The sunset has been extended four times.

Explanation of the credit: The State Ports Authority tax credit is allowed to a taxpayer who loads or unloads waterborne cargo from an ocean carrier at the State-owned port terminal at Wilmington or Morehead City. The credit is allowed against the taxpayer's income tax. The taxpayer may be either an individual (G.S. 105-151.22) or a corporation (G.S. 105-130.41). The amount of the tax credit is equal to the amount of wharfage, handling, and throughput charges paid to the North Carolina State Ports Authority in the taxable year that exceeds the average amount of charges paid to the Authority for the current tax year and the two previous tax years. The credit is limited to 50% of the tax imposed on the taxpayer for the taxable year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years. The maximum cumulative credit that one taxpayer may claim is $2 million.

In 1992 the General Assembly enacted the State Ports income tax credit to encourage exporters to use the two State-owned port terminals in Wilmington and Morehead City. When enacted, the credit applied to amounts paid by a taxpayer on any cargo exported at either port. In 1994, the General Assembly expanded the credit to include all amounts assessed on exported cargo, regardless of who paid the shipping costs. In 1995, the General Assembly expanded the credit to include some imports by allowing a credit for break-bulk cargo and container cargo imported at either Wilmington or Morehead City and for bulk cargo imported at Morehead City. It did not allow a credit for bulk cargo imported at Wilmington. In addition, the credit for bulk exports was then limited to bulk exports at only the Morehead City terminal. In 1996, the General Assembly expanded the State ports income tax credit to include the importing and exporting at either terminal of one specific type of bulk cargo: forest products. All imports and exports of bulk cargo at the Morehead City terminal were already covered, so the effect of this change was to allow a credit for forest product imports and exports at the Wilmington terminal. In 1997, the General Assembly extended the sunset of the State ports income tax credit from February 28, 1998 to the taxable year ending on or before February 28, 2001, and increased the maximum cumulative credit from $1 million to $2 million per taxpayer. In 2001, the General Assembly extended the sunset to January 1, 2003.

Although not defined by the relevant statutes, the various types of cargo differ as follows:

- Bulk cargo is a type of commodity that is loose and usually stockpiled. Examples of this type of commodity include coal, grain, salt, and wood chips.
- Break-bulk cargo consists of commodities that are packaged and stored on pallets or in cases that must be handled and stacked onto a ship by hand, crane, etc. Break-bulk cargo also includes machinery.
- Container cargo consists of commodities that are packaged in a metal trailer box that can be locked onto a tractor-trailer chassis and then detached and put on a ship without any other handling.

NORTH CAROLINA STATE PORTS AUTHORITY: This act clarifies and amends the fee-setting power of the North Carolina State Ports Authority in the following ways:

- Clarifies that the Authority has fee-setting authority for its services.
- Sets out statutory guidelines that the Authority must consider in setting fees for its services. These guidelines include the cost of providing service, revenue requirements, the cost of similar services at other seaports in the South Atlantic region, and any other factors the Authority considers relevant.
- Requires the Authority to report to the Joint Legislative Commission on Governmental Operations no later than 30 days after the Authority establishes or increases a fee.[15]
- Exempts the Authority's fee-setting power from the rulemaking portion of the Administrative Procedure Act.

Amend Pollution Abatement Tax Exclusion

Session Law	*Bill #*	*Sponsor*
S.L. 2002-104	**SB 1253**	**Senator Odom**

AN ACT TO PROVIDE THAT CERTAIN ANIMAL WASTE MANAGEMENT SYSTEMS SHALL NOT QUALIFY FOR SPECIAL PROPERTY CLASSIFICATION AND EXCLUSION FROM THE TAX BASE PURSUANT TO G.S. 105-275(8) AND TO DIRECT THE REVENUE LAWS STUDY COMMITTEE TO STUDY ISSUES RELATED TO THE TAX EXCLUSION, AS RECOMMENDED BY THE ENVIRONMENTAL REVIEW COMMISSION.

OVERVIEW: This act provides that an animal waste management system may not qualify for property tax exclusion as a pollution control device unless it eliminates or substantially eliminates certain discharges, emissions, and contamination. The act also requires the Revenue Laws Study Committee to study property tax exemptions for pollution control equipment. The act was recommended by the Environmental Review Commission.

FISCAL IMPACT: The State General Fund is not affected. The legislation will affect revenue from the property tax base in each county. There are currently no exclusions that have been granted to facilities, thus there are no changes in current county revenues. However, had the legislation not been enacted, potential revenue losses would have been split among counties based on the number of animal waste management systems maintained in each county. Potential losses were estimated using the total property value of the swine, poultry, and turkey facilities in a county.

[15] In S.L. 2001-427, the General Assembly increased its oversight of agency setting and raising of fees by requiring an agency that wishes to establish or increase any fee to have either express authorization from the General Assembly for the amount of the fee or general authorization and to consult the Joint Legislative Commission on Governmental Operations **prior** to putting the new fee into effect. S.L. 2002-99 allows the State Ports Authority to report to Governmental Operations **after** increasing or establishing a fee.

The potential property tax revenue losses statewide could have totaled approximately $9.9 million per fiscal year.

EFFECTIVE DATE: Property tax years beginning on or after July 1, 2002.

ANALYSIS: Since 1955, North Carolina has excluded from property taxes property used exclusively for pollution control or waste disposal. The statute specifies waste lagoons as one type of property that may qualify for property tax exclusion. Before property could qualify for exclusion, the law as of 2001 required that the Environmental Management Commission (EMC) certify that the property complies with all EMC requirements, is operated in accordance with its permit, and has as its primary purpose the reduction of pollution.

As the entity responsible for certifying property for the tax exclusion, the EMC approached the Environmental Review Commission requesting clarification of the policy conflict between the potential property tax exclusion for swine waste lagoons and spray fields and the moratorium the General Assembly has placed on constructing swine waste lagoons and spray fields unless they comply with strict environmental standards. The Environmental Review Commission recommended that the General Assembly act on this issue in 2002.

To evaluate the issue, the General Assembly sought input from the EMC, individual taxpayers, the Attorney General's Office, the Department of Revenue, and other interested parties. There was testimony from experts that in the 1950s when the statute was enacted, there was much less use of animal waste lagoons and spray fields than there is today, indicating that the policy established in the 1950s may no longer be appropriate. The Department of Revenue noted that spray fields are not used exclusively for waste disposal and thus appear to be ineligible for the property tax exclusion. The Southern Environmental Law Center commented that, because waste lagoons do not reduce pollution and in fact accelerate air pollution, they do not meet the statutory requirement for exclusion that their primary purpose is the reduction of pollution. The EMC pointed out that since 1997 the General Assembly has maintained a moratorium on the construction of swine waste lagoons and spray fields with an exception only for swine waste management systems that meet the following environmental performance standards:

1. Eliminate the discharge of animal waste to surface waters and groundwater through direct discharge, seepage, or runoff.
2. Substantially eliminate atmospheric emissions of ammonia.
3. Substantially eliminate the emission of odor that is detectable beyond the boundaries of the parcel or tract of land on which the farm is located.
4. Substantially eliminate the release of disease-transmitting vectors and airborne pathogens.
5. Substantially eliminate nutrient and heavy metal contamination of soil and groundwater.

The General Assembly resolved the conflict between the moratorium and the tax exclusion by providing in this act that an animal waste management system may not qualify for the property tax exclusion unless the EMC determines that it meets the same five standards listed above. This requirement will ensure that the property tax exclusion is allowed only for animal waste management systems that meet strict environmental performance standards. This change becomes effective beginning with the 2002 property tax year.

The act also directs the Revenue Laws Study Committee to study the property tax exclusions for various types of property used for environmental reasons, in consultation with representatives of

cities and counties. The Committee is directed to report the results of its study to the 2003 General Assembly.

Revenue Law Enforcement Enhancements

Session Law	*Bill #*	*Sponsor*
S.L. 2002-106	**SB 1218**	**Senator Dalton**

AN ACT TO IMPROVE THE ENFORCEMENT OF TAX LAWS BY CRIMINALIZING OR INCREASING THE PENALTY FOR CERTAIN FORMS OF TAX FRAUD AND BY ALLOWING THE DEPARTMENT OF REVENUE TO DISCLOSE CERTAIN INFORMATION TO LAW ENFORCEMENT AGENCIES.

OVERVIEW: This act improves the enforcement of tax laws by allowing for enhanced punishment when an income tax return preparer aids or assists in the filing of false or fraudulent documents with the Department of Revenue, by creating an offense for fleecing taxpayers, and by allowing the Department of Revenue to share information concerning the commission of any offense with appropriate state or federal law enforcement agencies. This act was a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: The cost of additional court trials and prison beds due to the increased felonies is as follows:

FISCAL YEAR	COST
2002-2003	$ 9,035
2003-2004	$ 94,395
2004-2005	$204,839
2005-2006	$294,200
2006-2007	$388,752

EFFECTIVE DATE: The sections allowing for enhanced punishment and creating a new offense become effective December 1, 2002, and apply to actions committed on or after that date. The section allowing disclosure between the Department of Revenue and appropriate State or federal law enforcement agencies became effective September 6, 2002.

ANALYSIS: Under sections 1 through 3 of this act, beginning December 1, 2002, an income tax return preparer who aids or assists in the filing of false or fraudulent documents will be guilty of a Class F felony, if the amount of tax fraudulently avoided in one taxable year on all returns is less than $100,000. If the total amount of tax fraudulently avoided in one taxable year on all returns equals or exceeds $100,000, the income tax return preparer will be guilty of a Class C felony. These punishments are the same as the punishments for embezzlement under Article 18 of Chapter 14 of the General Statutes. The act incorporates the definition of "income tax return preparer" used under the Internal Revenue Code, and makes a conforming change in G.S. 105-159.1(e) to incorporate this definition.

Under the law in effect until December 1, 2002, it is a Class H felony to aid, assist, procure, counsel, or advise the preparation, presentation, or filing of a return, affidavit, claim, or other document that is fraudulent or false as to any material matter. The Department of Revenue requested the enhanced punishment because of the increasing number of fraudulent return cases involving an income tax return preparer. According to the Department, these cases generally involve income tax return preparers that intentionally inflate the itemized deductions claimed on a return or include fictitious business losses on the return. This fraud is carried out in order to reduce taxable income, thereby reducing tax liability. The Department has also noticed an increase in the number of fictitious returns. These are returns that are based on fictitious wage and tax statements.

Under section 4 of this act, beginning December 1, 2002, it will be a Class F felony for a person to receive money from a taxpayer with the understanding that the person would remit the money to the Secretary of Revenue for application on a tax liability and then willfully fail to remit the money to the Secretary. The Department reported that several times a year it will have a situation where an accountant receives money from a taxpayer to satisfy a sales or withholding tax liability. The accountant then files a fraudulent return showing reduced or zero tax due and then pockets the taxpayer's money. Although the Department can and does bring charges against the accountant for filing a fraudulent return, the taxpayer still owes the money that he or she has lost. The taxpayer must then get the local district attorney to file embezzlement charges. The district attorneys have indicated that they prefer that the Department handle this situation since it involves taxes and since the Department is already involved. By creating the offense for fleecing taxpayers, this act places the remedy with the Department. The penalty is the same as for embezzlement totaling less than $100,000.

Section 5 of this act allows the Department of Revenue to share information it discovers during a criminal investigation of a taxpayer with appropriate State or federal law enforcement agencies. Under prior law, the Department could only provide information concerning a tax imposed by Article 2A, 2C, or 2D of the revenue laws to law enforcement agencies. These Articles deal with the tobacco products tax, alcoholic beverage license and excise taxes, and unauthorized substance taxes. However, the Criminal Investigation Division of the Department occasionally discovers evidence of criminal activity unrelated to the taxes imposed in these Articles. Under prior law, the Department was not allowed to disclose that information to law enforcement. This act alleviates this prohibition.

Contracts to Reimburse Fuel Tax/Fuel Tax Chg.

Session Law	*Bill #*	*Sponsor*
S.L. 2002-108	**SB 1407**	**Senator Kerr**

AN ACT TO ESTABLISH A CONTRACT RIGHT REGARDING THE TIMING OF PAYMENTS UNDER CONTRACTS REQUIRING REIMBURSEMENT OF FEDERAL FUEL EXCISE TAXES AND TO MAKE VARIOUS MOTOR FUEL EXCISE TAX CHANGES.

OVERVIEW: This act gives local distributors a contract right to delay reimbursing federal fuel tax to the supplier until one day before the supplier is required to remit the tax to the federal government. The act also converts the local government fuel tax refund to an exemption and makes several other changes to the motor fuel tax laws.

FISCAL IMPACT: The only provision with a fiscal impact is the one converting the local government fuel tax refund to an exemption. The exemption will be slightly revenue positive for local governments because of the interest earned on funds that once went to fuel tax payments before being refunded. Based on refund amounts for past years, Fiscal Research estimates the annual float gain for locals would have been $227,030 for fiscal year 2000-01 and $252,860 for fiscal year 1999-00.

EFFECTIVE DATE: The contract right provision became effective September 1, 2002. The motor fuel tax provisions become effective January 1, 2003.

ANALYSIS:

Contract Rights Regarding Tax Reimbursements

The State and federal motor fuel excise taxes are payable by the distributor, but collected and remitted to the respective tax collection agencies by the supplier. G.S. 105-449.91 gives the distributor the right to defer the remittance of any state tax to the supplier until the date the supplier, as trustee, must pay the tax to this State or to another state. This allows the distributor to retain the interest on the state tax monies until they are due for payment. Federal law does not address the distributor's right to defer the remittance of any federal tax due. The distributor's right as to the timing of the remittance of the federal tax due to the supplier is subject to the terms of the contract between the distributor and the supplier.

Section 1 of this act provides that a contract subject to North Carolina law must afford the distributor the same election for the timing of federal tax remittance that the distributor has for state tax remittance. It provides that the distributor may elect to remit the federal tax due to the supplier one day before the tax is due to the federal Internal Revenue Service. Exercising this option allows the distributor to receive the benefit of any float associated with the federal tax monies. To exercise this right, the distributor must notify the supplier in writing of the intent to make this election and the effective date of the election. The effective date cannot be earlier than the beginning of the next federal tax quarter or 30 days after the notice of intent is received, whichever is later. To secure the receipt of the tax monies, the supplier can require security for the payment of the taxes in proportion to the amount the taxes represent compared to the security required on the contract as a whole.

In practice, this change in the law will not affect contracts between suppliers and distributors for branded fuel[16] when the contract names another state as the controlling state law. Currently, Georgia, Alabama, Mississippi, and Tennessee[17] have similar statutes. If no particular state's law is designated as controlling in the contract, then this State's law will control. If a supplier offers unbranded fuel[18] at a North Carolina terminal and a distributor lifts from that terminal rack, North Carolina law will control because the contract for the fuel is accepted in North Carolina.

---

[16] Branded fuel is fuel supplied to a distributor pursuant to a contract.

[17] Tennessee collects federal and state excise tax at the rack like North Carolina.

[18] Unbranded fuel is fuel offered by a supplier at the terminal rack to any distributor who wishes to purchase it.

This section of the act became effective September 1, 2002, and applies to contracts entered into or renewed on or after that date and to all continuing contracts that are in effect on that date and have no expiration date. It does not apply to a contract in effect on September 1, 2002 that, by its terms, will terminate on a later date; nor does it impair the obligation arising under any contract executed before September 1, 2002. Because the act did not become law until September 6, the constitutional prohibition against impairing contracts would prevent it from applying to contracts executed between September 1 and September 6 that have an expiration date.

Motor Fuel Enforcement Tax Changes

Section 2 of this act repeals the Class 1 misdemeanor for willfully and knowingly making a false statement for the purposes of obtaining or assisting someone else to obtain a credit, refund, or reduction of motor fuel tax liability. Repeal of this statute means that the general penalties in G.S. 105-236 will apply. It is a Class H felony under G.S. 105-236(7) to attempt to willfully evade a tax and it is a Class H felony under G.S. 105-236(9a) to willfully help someone else evade a tax.

A motor carrier subject to the International Fuel Tax Agreement must register with the carrier's base state and a motor carrier not subject to that Agreement must register with the Secretary of Revenue. It is unlawful for a motor carrier to operate motor vehicles in the State unless the motor carrier is registered. To indicate to enforcement officers that the carrier is properly registered, the vehicles must display identification markers, or decals. Section 3 of this act requires a motor carrier to keep records of the decals issued to it and to be able to account for those decals. Section 4 of this act establishes a civil penalty for unaccounted for decals and for decals unlawfully obtained. The penalty for being unable to account for decals is $100 per decal. The penalty for displaying a decal unlawfully obtained is $1,000 per decal. The motor carrier whose vehicles display the decal and the motor carrier who obtained the decals are jointly and severally liable for the penalty.

Section 15 of this act simplifies the penalty for transporting motor fuel without a shipping document or with a false or an incomplete shipping document and the penalty for delivering motor fuel to a destination state other than the one shown on the shipping document. Under prior law, the amount of the penalty depended on whether the person against whom the penalty is assessed had previously been assessed a penalty under this statute. If the answer is "no", the amount of the penalty was $1,500. If the answer is "yes", the amount of the penalty was $7,500. To determine whether the person has previously been assessed a penalty under this statute required the enforcement officer to obtain detailed information, which the officer forwarded to the Motor Fuels Tax Division so that the Division could check its records and then assess the correct penalty. The penalty was seldom imposed because the enforcement officers could not enforce the penalty at the time the offense occurred. This section enables the enforcement officer to immediately assess the penalty by providing a flat penalty amount of $5,000.

Section 16 of this act will enable the Motor Fuels Tax Division to be able to track motor fuel transported by a tank wagon after the fuel has left the terminal. A tank wagon is a truck that has a compartment designed or used to carry at least 1,000 gallons of motor fuel.[19] Under this section, a person may not transport motor fuel by tank wagon unless the person has an invoice, bill of sale, or shipping document that contains the following information: the name and address of the person from whom the motor fuel was received, the date the fuel was loaded, the type of fuel, and the gross number of gallons loaded. The person must carry this documentation when transporting

[19] Section 6 amends the term "tank wagon" to require that it be used to carry at least 1,000 gallons of motor fuel. This modification exempts trucks carrying less than that amount from the requirements imposed by this Section 16.

the fuel and show the documentation upon request. These requirements are similar to, but less onerous than, the requirements for motor fuel transported by a railroad tank car or transport truck.[20] A violation of this statute would be grounds for a civil penalty in the amount of $1,000.

Section 17 simplifies the penalty for dispensing, or allowing to be dispensed, non-tax-paid fuel into a highway vehicle. Currently, the amount of the penalty varies depending upon the number of gallons dispensed. However, it is often impossible to know how many gallons have been dispensed. This section simplifies the penalty by providing a fixed penalty amount of $250 per occurrence.

Biodiesel and Fuel Alcohol Tax Law Changes

Before this act went into effect, North Carolina's motor fuel tax laws addressed fuel alcohol, but not biodiesel. Both types of fuel are special fuels that may be used to operate a motor vehicle. Biodiesel fuel is a mixture of fuels derived in whole or in part from agricultural products or animal fats or wastes from these products or fats. The General Assembly became aware of a person planning to produce biodiesel fuel in North Carolina using, among other fats, discarded french fry grease from fast food restaurants. Sections 6 and 7 make existing fuel tax provisions applicable to biodiesel, and also provide that small providers of biodiesel and fuel alcohol are not subject to the bonding requirements applicable to refiners.

Under existing law, a person who produces fuel that can be used to operate a motor vehicle is considered a refiner and is subject to a $2 million bonding requirement. There are no refiners in North Carolina. However, it was anticipated that this definition and the large bonding requirement might become applicable to providers of fuel alcohol and biodiesel because it is possible that a vehicle can be operated with biodiesel alone or with fuel alcohol alone. To avoid subjecting small producers of biodiesel and fuel alcohol to the large surety bond requirements for refiners, this act provides a smaller surety bond requirement for smaller producers of biodiesel and fuel alcohol. To accomplish this, Section 6 defines a biodiesel provider and a fuel alcohol provider as a person who produces an average of no more than 500,000 gallons of biodiesel or fuel alcohol a month during a calendar year. It also excludes from the definition of "refiner" these biodiesel providers and fuel alcohol providers. Under Section 7, biodiesel providers and fuel alcohol providers are subject to a bonding requirement of no less than $2,000 and no more than $250,000. The amount of the bond is determined by the provider's average expected monthly tax liability.

Section 6 adds biodiesel to the definition of diesel fuel and adds biodiesel providers to the definition of supplier. These changes bring biodiesel within the scope of the existing fuel tax laws.

Special Mobile Equipment

Special mobile equipment is a vehicle that has a permanently attached crane, mill, ditch-digging apparatus, or similar attachment. The vehicle is driven on the highway only to get to and from a non-highway job. It is not designed or used primarily for the transportation of persons or property. Under prior State law, special mobile equipment was allowed to use dyed (untaxed) diesel fuel. However, federal law prohibited special mobile equipment from using dyed diesel fuel. This contradiction caused confusion and, as a result, operators of special mobile equipment were sometimes assessed federal penalties. Section 10 conforms North Carolina law to the federal law.

[20] Tank wagons would not be required to be registered, to have a tax responsibility statement, to have a machine-printed shipping document, or to have a destination state. Also, the penalty imposed on a tank wagon for failure to have the proper documentation is $1,000 as opposed to $5,000.

Special mobile equipment will continue to be entitled to a quarterly refund of motor fuel tax paid to operate the equipment off-highway.[21]

Diverted Fuel

A person may not transport motor fuel by railroad tank car or by truck unless the person has a shipping document indicating, among other things, the destination state of the motor fuel. The tax on the motor fuel is collected at the rack based on the motor fuel tax rate of the state named on the shipping document as the destination state. The person transporting the motor fuel must deliver it to the state printed on the shipping document.

If the fuel is diverted to another state, the person transporting the fuel must notify the Secretary of Revenue of the diversion and receive a confirmation number authorizing the diversion. The state tax is owed on the fuel changes when the fuel is diverted to a different state. Under prior law, the distributor would notify the supplier of the diversion and the supplier would make the correction based on its business practices. The diversion could be accounted for in several different ways on one of four different motor fuel tax forms. The supplier's responsibility for making the correction was inconsistent with the fact that the supplier is not the party responsible for paying the tax; the supplier's tax collection obligations ended once the fuel left the terminal.

Section 10 clarifies that North Carolina motor fuel excise tax is due on motor fuel that is diverted to this State. It also specifies that the person who authorizes the fuel to be diverted to a different state is liable for the tax owed to that state; likewise the person is entitled to a refund of the North Carolina tax paid on the fuel. The diversion corrections must be made on the backup tax form.

Motor Fuel Tax Exemption for Local Governments

Under prior law, counties and municipalities were entitled to a quarterly refund of motor fuel excise taxes paid by them during the preceding quarter. The refund was calculated at the rate equal to the amount of the flat cents-per-gallon rate plus the variable cents-per-gallon rate in effect during the quarter for which the refund was claimed, less one-cent per gallon. This act gives counties and cities an exemption in lieu of a refund. Section 11 removes counties and municipalities from the list of entities entitled to a refund and Section 13 adds them to the list of entities exempted from the motor fuel excise tax. Other entities exempted from the tax include the federal government, the State government, local boards of education, charter schools, and community colleges.

Administrative and Technical Changes

A refiner, a terminal operator, a supplier, an importer, a blender, a permissive supplier, and a distributor must file a bond with the Secretary in order to be licensed. The bond is conditioned upon compliance with the motor fuel tax laws. Whenever a license holder changes bonding companies or decides to go out of business, the license holder must notify the Secretary. After determining that all taxes and penalties due under the motor fuel tax laws have been paid, the Secretary must return the previously filed bond and notify both the bonding company and the license holder that the person is released from liability on the bond. The Motor Fuels Tax Division often receives returned mail on the notice sent to the license holder because the license holders have moved. Section 8 relieves the Division from the requirement that it notify the license holder; it need only return the previously filed bond and the notice of release from liability to the bondholder.

---

[21] G.S. 105-449.106(c).

The Motor Fuels Tax Division must keep a record of all the license holders under the fuel tax statutes and it must send this list to all the license holders along with a monthly update. Many license holders have expressed a desire not to receive the list this often. Section 9 relieves the Division of the necessity of sending the monthly updates to all license holders. Under this section, the Division must send an annual list to each license holder of all the license holders. Thereafter, the Division need send a monthly update only to each licensed refiner or licensed supplier and to any other license holder that requests a copy of the list.

Section 6 includes within the definition of "motor fuel transporter" a person who transports motor fuel by pipeline. Sections 12 and 14 correct incorrect terminology.

Secure Local Revenues

Session Law	*Bill #*	*Sponsor*
S.L. 2002-120, as amended by Section 65 of S.L. 2002-159	**HB 1490**	**Representative Gibson**

AN ACT TO PROVIDE THAT LOCAL REVENUES MAY NOT BE WITHHELD OR IMPOUNDED BY THE GOVERNOR AND TO CLARIFY THE FRANCHISE TAX ON ELECTRIC POWER COMPANIES.

OVERVIEW: This act provides that certain shared tax revenues are local revenues and may not be withheld or reduced by the Governor and that funds otherwise committed to local governments may not be reduced unless all other revenue sources, including treasury surplus, have been exhausted. The act also clarifies that an electric power company that pays the annual franchise or privilege tax is not subject to an additional franchise or privilege tax imposed by a city or county.

FISCAL IMPACT: No estimate available. This legislation has no direct impact on the budget passed by the General Assembly, as these shared revenues have not been used in the legislative process for state expenditures. However, the legislation could limit the options available to the Governor in future years.

EFFECTIVE DATE: This act became effective September 24, 2002. It applies prospectively only and does not apply to pending litigation or claims that accrued prior to September 24, 2002.

BACKGROUND: For the last two years, the Governor has withheld reimbursement funds from local governments, and he recommended suspending additional reimbursement funds for fiscal year 2002-03 as well. Specifically, in fiscal year 2000-2001 the Governor placed in escrow $95 million of inventory tax reimbursement funds, representing one-half of the total annual payment, in anticipation of a budget shortfall. These funds were later released, however, to local governments. In fiscal year 2001-2002, the Governor again withheld $95 million in inventory tax reimbursement funds plus $114 million in state-shared taxes and the homestead reimbursement in order to balance the budget as of June 30, 2002.

By withholding these funds despite the statutory directive to distribute the funds to local governments, the Governor has invoked his constitutional authority pursuant to Section 5(3) of Article III of the North Carolina Constitution to balance the budget. Section 5(3) of Article III of

the North Carolina Constitution sets out the Governor's budgetary duties. Specifically, it directs the Governor to prepare and recommend to the General Assembly a comprehensive budget of the anticipated revenue and proposed expenditures of the State for the ensuing fiscal period. Furthermore, it provides that the State may not operate at a deficit during the fiscal period covered by a budget. To ensure that the State does not incur a deficit, the Constitution requires the Governor to continually survey the collection of revenue. If, as a result of his surveys, he determines that actual receipts for the fiscal period, when added to the surplus remaining in the State Treasury, will not be sufficient to pay budgeted expenditures, the Governor must effect the necessary economies in State expenditures to keep the deficit from occurring. Arguably, the distribution of monies to local governments is a "State expenditure," and the Governor's constitutional obligation to maintain a balanced budget overrides the statutory directive to distribute the funds.

Based on the current information available, it is unclear whether this legislation will be effective in preventing the Governor from withholding these funds from local governments. If the Governor withholds the funds despite the enactment of this legislation, enforcement of this limitation on the Governor's authority may have to be resolved by a court. As of October 2002, several counties and municipalities have initiated or are considering initiating lawsuits challenging the Governor's withholding of funds.[22]

ANALYSIS: Sections 1 through 7 of this act limit the Governor's budgetary authority to withhold or reduce local revenues and to reduce certain State expenditures as follows:

Tax-Sharing Statutes

Sections 1 through 6 of this act amend the tax-sharing statutes by characterizing the portion of the revenue distributed to cities and counties as distributions of "local revenue" rather than "State expenditures" for purposes of interpreting Section 5(3) of Article III of the North Carolina Constitution. Section 5(3) of Article III of the North Carolina Constitution sets out the Governor's duties and the scope of authority with regard to balancing the budget. Arguably, since the Constitution authorizes the Governor to reduce only "State expenditures," the classification of these shared tax revenues as "local revenues" prohibits the Governor from reducing or withholding the distributions. Moreover, each of the tax-sharing statutes has been amended to expressly state that the Governor may not reduce or withhold these distributions.

Tax-sharing statutes are a source of "financial aid" for local governments. Under these tax-sharing statutes, cities or counties, or both, receive a portion of certain taxes levied by the State. The shared tax revenues are derived from the levy of the following taxes:

- Beer and wine taxes[23]

---

[22] As of November 2002, one of the pending cases is *Cabarrus County, et al. v. Tolson*, Wake County Superior Court Case No. 02 CVS 12518.

[23] Cities and counties in which beer and wine may be sold receive a portion of the State excise tax levied on beer and wine. They receive a percentage of the net amount of excise taxes collected, and the percentage depends on the type of beverage sold: 23 ¾% for beer, 62% for unfortified wine, and 22% for fortified wine. The local governments that share in the proceeds do so on a per capita basis, with counties receiving credit for their nonmunicipal population only.

- Franchise gross receipts tax[24]
- Piped natural gas tax[25]
- Sales tax on telecommunications[26]
- Powell bill funds[27]

Funds Appropriated or Otherwise Committed to Local Governments

Section 7 of the act limits the Governor's authority to reduce funds that the General Assembly has "appropriated or otherwise committed to local governments" by amending the Executive Budget Act to require that the Governor exhaust all other sources of revenue first, including any surplus in the treasury at the beginning of the fiscal period. This section takes a different approach than the sections dealing with the tax-sharing statutes. Under this section, the Governor is required when balancing the budget to prioritize the reduction of certain State expenditures by reducing the funds distributed to local governments only as a last resort. Under the previous sections, the General Assembly removed the local portion of shared tax revenues from the scope of the Governor's budgetary authority by stating they are not "State expenditures," and thus not capable of being reduced by the Governor under any circumstances.

Section 7 of this act was primarily intended to restrict the Governor's ability to withhold reimbursement money. State reimbursements are amounts distributed to local units to compensate them for revenue lost as the result of the removal by the General Assembly of property from the local sales and use tax base, the property tax base, or the intangibles tax base. The reimbursement programs include reimbursements for the repeal of the property tax on inventories and on poultry and livestock, the repeal of the intangibles tax, the homestead exemption from property tax, and the repeal of local sales and use taxes on food purchased with food stamps. However, Section 30A.1 of The Current Operations, Capital Improvements, and Finance Act of 2002. (S.L. 2002-126) repeals all of the State reimbursement payments to local governments, effective July 1, 2002.

---

[24] The State levies a gross receipts tax on electric power companies at a rate of 3.22%. From these proceeds, each city or town is entitled to an amount equal to 3.09% of gross receipts arising from sales within that city or town. Most cities receive their share of franchise tax revenue under G.S. 105-116.1. However, there are approximately 51 cities that own their own electric generation and distribution systems. These cities pay tax and receive their distribution under a separate statute – G.S. 159B-27 – but at the same rate as other cities.

[25] The State levies an excise tax on piped natural gas, and the rate is based on the monthly volume of natural gas received by the final user. The rate decreases as the amount of therms of piped gas consumed in a month increases. Cities receive 50% of the proceeds of the tax attributable to that city.

[26] The State imposes a 6% sales tax on telecommunications. The cities receive 18.26% of the net proceeds of the taxes collected minus a "freeze deduction" amount totaling $2,620,948.

[27] North Carolina's state gasoline tax is 17 ½ cents per gallon, plus the greater of 7% of the average wholesale price or 3.5 cents per gallon. Of this, an amount equal to the proceeds of 1.75 cents per gallon plus an additional 6.5% of the net proceeds of the North Carolina Highway Trust Fund is distributed among North Carolina's cities and towns. The legislation that first established this distribution system is known as the *Powell Bill*, after its principal sponsor, and the monies distributed to the cities and towns are generally known as Powell Bill funds. The use of these funds by municipalities is restricted to maintaining, repairing, constructing, reconstructing or widening streets, sidewalks, bridges, curbs and gutters, bikeways, and other necessary appurtenances within the corporate limits of the municipality.

Nevertheless, funds "appropriated or otherwise committed to local governments" would also include:

- Low wealth school money.
- Earmarking of corporate income tax money for Public School Building Capital Fund.
- Scrap tire disposal tax.
- White goods disposal tax proceeds.
- Aid to public libraries.
- Certain grant monies.

Clarify Taxation of Electric Power Companies

Section 8 of this act clarifies that an electric power company that has collected and remitted to the State the annual franchise gross receipts tax may not be subject to any additional franchise or privilege tax imposed upon it by any city or county.

This clarification was primarily the result of responses by some cities to the seizure by the Governor of funds that would have otherwise been distributed to the cities as shared tax revenues. In response to the seizure, some cities enacted ordinances imposing their own franchise or privilege tax on electric power companies to recapture their lost revenue. This provision is intended to prevent the electric power companies from being taxed by both the State and the municipalities.

Local Sales Tax Acceleration

Session Law	*Bill #*	*Sponsor*
S.L. 2002-123	**SB 1292**	**Senator Kerr**

AN ACT TO ACCELERATE THE ADDITIONAL ONE-HALF CENT LOCAL OPTION SALES AND USE TAX AND TO MAKE CONFORMING AND TECHNICAL CHANGES.

OVERVIEW: This act accelerates the effective date of the third half-cent local option sales tax from July 1, 2003, to December 1, 2002.

FISCAL IMPACT: There is no General Fund impact. The total estimated potential revenue available to local governments from this additional half-cent if all 100 counties were to enact the tax in December 2002 is approximately $188.1 million. After deductions for administration by the Department of Revenue, the amount is reduced to $187.8 million. However, since the act is permissive and counties can decide to enact the tax at any time, no exact fiscal estimate is possible.

EFFECTIVE DATE: The act became effective September 26, 2002, but local units cannot levy the sales tax itself until December 1, 2002.

ANALYSIS: In 2001, the General Assembly authorized counties to levy additional local sales taxes of ½%, effective July 1, 2003. Under this act, the tax may become effective as early as December 1, 2002. To accomplish the sales tax acceleration, the act provides for the following:

- It allows the counties to enact the tax for the first two months (December 2002 and January 2003) with a shortened notice to the Department of Revenue. Under general law, a county must give the Secretary of Revenue at least 90 days' advance notice of a new tax levy or tax rate change; and a new tax levy or a tax rate change may become effective only on January 1 or July 1. This act provides for an expedited levy. If the county enacts the tax to become effective on or before January 1, 2003, the county must give the Secretary only 30 days' advance notice of the tax levy. Thereafter, the current law requirements of 90 days' notice and a January 1 or July 1 effective date are reinstated.
- It authorizes the Department of Revenue to withhold up to $275,000 for 2002-2003 to cover its excess nonrecurring costs for implementing the new sales tax on short notice.
- It exempts the Department of Revenue from the public contract bidding requirements for the procurement of supplies, materials, equipment, and contractual services related to the provision of notice and the development of computer software necessitated by the expedited provisions of the act.
- It provides that a retailer is not liable for the additional ½% tax levied by counties effective December 1, 2002, that it fails to collect from purchasers due to an inadvertent error during the month of December 2002 if the retailer can demonstrate to the Secretary the reason for the inadvertent error.

The act does not make the following changes to the law:

- It does not accelerate the State ½% sales tax repeal that is effective July 1, 2003. Therefore, there may be a 7% sales and use tax rate in counties that impose the additional ½% sales tax rate from December 1, 2002, until July 1, 2003.
- It does not accelerate the local sales tax distributions from quarterly to monthly. Under current law, counties are authorized to levy up to 2% local sales and use taxes[28]. All counties levy the maximum rate. The State collects the tax and distributes it quarterly to the counties and municipalities. In 2001, the General Assembly provided that local sales taxes must be distributed monthly rather than quarterly, effective July 1, 2003.
- This act does not provide a local government hold-harmless provision. Section 30A.1 of The Current Operations, Capital Improvements, and Finance Act of 2002. (S.L. 2002-126) repealed all of the State's reimbursement payments to local governments, effective beginning with the 2002-2003 fiscal year.[29] The 2001 legislation provided local governments "hold harmless" payments beginning in 2003-2004 if the amount they could potentially realize from the levy of the half-cent sales tax was less than the amount they would lose from the reimbursements. This act neither accelerates the hold harmless provision nor provides another.

---

[28] Mecklenburg County is authorized to levy up to 2 ½% local sales and use taxes.

[29] The Appropriations Act of 2001 (S.L. 2001-424, Section 34.15) provided that the reimbursements would be repealed effective for the 2003-04 fiscal year. The Current Operations, Capital Improvements, and Finance Act of 2002 (S.L. 2002-126, Section 30A.1) accelerated that repeal.

Current Operations, Capital Improvements, and Finance Act of 2002

Session Law	*Bill #*	*Sponsor*
S.L. 2002-126	**SB 1115**	**Senator Plyler**

AN ACT TO MODIFY THE CURRENT OPERATIONS APPROPRIATIONS ACT OF 2001 AND TO MAKE OTHER CHANGES IN THE BUDGET OPERATION OF THE STATE.

OVERVIEW, DESCRIPTION, EFFECTIVE DATES, AND FISCAL IMPACT:

Section	*Description and Effective Dates*	*Fiscal Impact*
30A.1	**Local Government Revenues** Accelerates the repeal of the tax reimbursements from July 1, 2003, to July 1, 2002. Also authorizes local governments to raise or lower property taxes between July 1 and the following January 1 to account for unanticipated revenue increases or decreases.	This will produce a General Fund revenue gain of $333.4 million per year beginning in FY 2002-03.
30B.1	**Delay 2001 Tax Break: Elimination of Marriage Penalty for Standard Deduction** Delays the enactment by one year of the tax break enacted in 2001 eliminating the marriage penalty in the standard deduction, originally effective beginning with the 2002 tax year. Now, the standard deduction for married filing jointly taxpayers will increase from $5,000 to $5,500 in tax year 2003, and then to $6,000 in tax year 2004.	The net gain to the General Fund as the result of delaying the first $500 increase is $31.9 million for FY 2002-03. For the $6,000 standard deduction delayed until 2004, the General Fund will gain $12.6 million that year.
30B.2	**Delay 2001 Tax Break: Increase of Tax Credit for Children** Delays the enactment by one year of the increased tax credit for children enacted in 2001. Beginning with tax year 2003, the tax credit for children is increased from $60 to $75 per child and then to $100 in tax year 2004.	The delay will eliminate the $19.8 million General Fund loss originally projected for FY 2002-03 and result in a General Fund revenue gain of an equal amount. There will be a revenue gain of $34.9 million in FY 2003-04.

Section	*Description and Effective Dates*	*Fiscal Impact*
30C.1	**Update IRC Reference** Updates the Internal Revenue Code reference from January 1, 2001 to May 1, 2002, with exceptions for accelerated depreciation and the estate tax credit. This update conforms North Carolina law to federal law with regard to recent pension tax changes, education initiatives, the increased estate tax exemption limitations, and the extension of the carryback period for net operating losses for tax years ending 2001 and 2002.	The following General Fund revenue loss is expected[30]: FY2002-03 $16.9 million FY2003-04 $25.5 million FY2004-05 $49.7 million FY2005-06 $76.9 million FY2006-07 $77.3 million
30C.2	**Accelerated Depreciation Provisions** Decouples North Carolina law from federal law by requiring taxpayers to add back to federal taxable income a percentage of the additional 30% accelerated depreciation allowed under federal law, effective for taxable years beginning on or after January 1, 2002. Taxpayers will continue to be able to deduct the same amount of an asset's basis under both federal and State law, but the timing of the deduction will differ.	The impact of the changes is essentially revenue neutral over the long-term since the conformity deals with an acceleration of depreciation, not the total amount of the deduction over the life of an asset. Thus, there will be substantial revenue losses starting in FY 2006-07. The General Fund impact is estimated as follows: FY2002-03 $38.2 million FY2003-04 $8.6 million FY2004-05 -$60.8 million FY2005-06 - 0 - FY2006-07 - 0 -

[30] These estimates do not reflect conformity to the increased estate tax exemption limitations. See summary for Section 30C.3 of S.L. 2002-126 for fiscal impact of the estate tax law changes.

Section	*Description and Effective Dates*	*Fiscal Impact*
30C.3	**Estate Death Tax Credit Provision** Decouples North Carolina law from the phase-out of the state death tax credit under federal law, effective for estates of decedents dying on or after January 1, 2002. This provision sunsets for decedents dying on or after January 1, 2004.	Although decoupling from the phase-out of the state death tax credit avoids the loss of revenue from full conformity to the federal phase-out of the credit for state death taxes, there is an overall net loss because the act conforms North Carolina estate tax law to the increased federal estate tax exemptions: FY2002-03 $5.5 million FY2003-04 $7.3 million FY2004-05 $3.8 million FY2005-06 $0
30C.5	**Federal Gift Tax Annual Exclusion** Conforms the North Carolina gift tax exclusion to the federal inflation-adjusted gift tax exclusion used by the federal government, effective January 1, 2002.	The General Fund revenue loss is estimated as follows: FY2002-03 $0.2 million FY2003-04 $0.2 million FY2004-05 $0.2 million FY2005-06 $0.4 million FY2006-07 $0.4 million
30D.	**Unauthorized Substance Tax Expenses** Provides that local governments will bear 70% of the State's expenses in collecting the unauthorized substance tax, effective June 30, 2002. The expenses are drawn from local sales tax distributions. This section does not, however, change the amounts that are distributed to local law enforcement agencies.	The General Fund will be reimbursed for 70% of the Unauthorized Substance Tax Division's operating expenses resulting in an annual gain of $900,000.
30E.	**Insurance Regulatory Charge** Sets the insurance regulatory charge, which is assessed on the premiums tax paid by insurers, at 6.5% for the 2002 calendar year. The revenue generated by this charge is used to reimburse the General Fund for appropriations to the Department of Insurance to pay expenses incurred in regulating the industry.	The charge is expected to generate $25 million for FY 2002-03.

Section	*Description and Effective Dates*	*Fiscal Impact*
30F.	**Regulatory Fee for Utilities Commission** Sets the public utility regulatory fee at 0.1% for FY 2002-03. It also sets the electric membership corporation regulatory fee at $200,000 for FY2002-03. These are the same as the 2001 rates.	This fee, which funds the operations of the Utilities Commission and the Public Staff, is expected to produce $11,700,238 for FY 2002-03.
30G.1	**Close Corporate Tax Loophole: Broaden Definition of Business Income** Broadens the definition of "business income" to include all income that states can apportion for corporate income tax purposes under the U.S. Constitution, effective with taxable years beginning on or after January 1, 2002.	The General Fund revenue gain is estimated as follows: FY2002-03 $70.0 million FY2003-04 $50.0 million FY2004-05 $53.7 million FY2005-06 $56.7 million FY2006-07 $59.5 million
30G.2	**Close Corporate Tax Loophole: Equalize Franchise Tax on Corporate-Affiliated LLCs** Tightens 2001 legislation intended to close a loophole that allows corporations to escape franchise tax by transferring assets to a controlled LLC, effective beginning with payments due in March 2003.	The General Fund revenue gain is estimated as follows: FY2002-03 $20.0 million FY2003-04 $21.2 million FY2004-05 $22.5 million FY2005-06 $23.8 million FY2006-07 $25.2 million
30H.	**Housing Tax Credit** Enlarges the class of taxpayers eligible for an enhanced credit for investing in low-income housing in a county that sustained severe or moderate damage from a hurricane in 1999 by backdating the effective date for eligibility from 2001 to 2000.	Assuming the project investors use 100% of the available tax credit, the annual General Fund loss is $2.15 million for Fiscal Years 2002-03 to 2006-07.
30I.	**No Estimated Income Tax Penalty for 2002 Tax Year** Provides that no estimated income tax penalty applies for the 2002 tax year to the extent the underpayment was created or increased by a provision of this act	

ANALYSIS:

LOCAL GOVERNMENT REVENUES

In 2001, the General Assembly repealed all of the State's reimbursement payments to local governments, effective beginning with the 2003-2004 fiscal year. Part 30A accelerates the repeal, effective July 1, 2002.

State reimbursements are amounts distributed to local units to compensate them for revenue lost as a result of the removal by the General Assembly of property from the local sales and use tax base, the local property tax base, or the intangibles tax base. State reimbursements consist of reimbursements for the repeal of the property tax on inventories and on poultry and livestock, the repeal of the intangibles tax, the "homestead exclusion" from property tax, and the repeal of local sales and use taxes on food purchased with food stamps. This act does not repeal or reduce the distribution of local government tax-sharing revenues: excise tax on beer and wine, franchise tax on electricity, gross receipts tax on piped natural gas, sales tax on telecommunications service, and the Powell bill revenues.

Part 30A also allows counties and cities to amend their budget ordinances between July 1st and the following January 1st to increase or reduce their property tax levy to account for unanticipated revenue increases or decreases.

DELAY 2001 TAX BREAKS

In 2001, the General Assembly enacted two income tax breaks to become effective for the 2002 tax year[31]: elimination of the marriage tax penalty in the standard deduction[32] and an increased tax credit for children. Part 30B of this act delays the enactment of these tax benefits.

Delay Elimination of Marriage Tax Penalty for the Standard Deduction: In 2001, the General Assembly reduced North Carolina income taxes on married couples that claim the standard deduction[33] by increasing the amount of the standard deduction for married filers so that it would be twice that of a single taxpayer. Since 1989, the basic standard deduction for a single person in North Carolina has been $3,000 while that for a married couple filing jointly has been $5,000. The increase in the deduction enacted in 2001 was to be phased in over the 2002 and 2003 tax years. The standard deduction for married persons filing separately is one-half that for a married couple filing jointly, so the 2001 act also phased it up from $2,500 to $3,000 over the 2002 and 2003 tax years. Part 30B of this act delays by one year the phase-in of the increased deduction, so that it will occur over the 2003 and 2004 tax years.

Delay Increase in Tax Credit for Children: In 2001, the General Assembly increased the $60 tax credit per child to $75 for the 2002 tax year and to $100 for the 2003 tax year. Part 30B of this act delays the phase-in of the credit increase until the 2003 and 2004 tax years. The 1995

---

[31] S.L. 2001-424, as amended by S.L. 2001-476, 2001-497, and 2001-489.

[32] The so-called married tax penalty is the result of a tax system that recognizes that a married couple's living expenses are less than the expenses of two single people living separately but more than the expenses of one single person. In addition, if one spouse is not employed full-time, a married couple's income would be less than that of two comparable single people who work full-time, but more than that of one single person. The tax law addresses these situations through the tax brackets, the personal exemptions, and the standard deduction. The result of these tax provisions is that a married couple with only one spouse working experiences a tax reduction when they marry, a married couple where one spouse earns substantially more than the other experiences no tax reduction or increase when they marry, and a married couple with both spouses earning roughly the same amount experience a tax increase when they marry.

[33] Roughly 70% of North Carolina taxpayers claim the standard deduction.

General Assembly enacted the tax credit of $60 per child for taxpayers who have dependent children and have family adjusted gross income below $100,000 for a married couple and $80,000 for a head of household. Neither the 2001 act nor this act changes the income thresholds. The credit is in addition to the federal and state tax credits or exclusions for child care expenses. The credit is allowed for each dependent child for whom the eligible taxpayer could take a federal personal exemption under section 151(c)(1)(B) of the Internal Revenue Code. That Code section allows an exemption for each dependent child who either is less than 19 years old at the end of the taxable year or is a student and is less than 24 years old at the end of the taxable year. A child is a son, stepson, daughter, or stepdaughter. A dependent child is a child over half of whose support is provided by the taxpayer.

UPDATE IRC REFERENCE

North Carolina's tax law tracks many provisions of the federal Internal Revenue Code, by reference to the Code.[34] The General Assembly determines each year whether to update its reference to the Internal Revenue Code.[35] Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law previously tracked federal law. The General Assembly's decision whether to conform to federal changes is based on the fiscal, practical, and policy implications of the federal changes and is normally enacted in the following year, rather than in the same year the federal changes are made.

Congress enacted two bills that have changed the Code significantly since January 1, 2001:

The Economic Growth and Tax Relief Reconciliation Act of 2001 (EGTRRA), enacted on June 7, 2001, includes numerous changes to the taxation of pension benefits, accounts, distributions, and rollovers; of education initiatives; and of estates. All of the provisions of EGTRRA will expire on December 31, 2010, unless the provisions are renewed or modified by Congressional action.[36]

The federal Job Creation and Worker Assistance Act of 2002, enacted March 9, 2002, includes an accelerated 30% bonus depreciation allowance for certain assets placed in service after September 10, 2001, and before September 11, 2004, and an extension of the carryback period for net operating losses occurring in tax years ending in 2001 and 2002 from two years to five years.

Both of these acts will substantially affect a taxpayer's federal taxable income. Since North Carolina begins its corporate and individual income tax calculations with federal taxable income, these acts also have a substantial impact on North Carolina's tax revenues to the extent the State chooses to conform to those changes.

Part 30C of this act rewrites the definition of the Code to change the reference date from January 1, 2001, to May 1, 2002. It then provides that a taxpayer must add to federal taxable income the

---

[34] North Carolina first began referencing the Internal Revenue Code in 1967, the year it changed its taxation of corporate income to a percentage of federal taxable income.

[35] The North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

[36] The Congressional Budget Act of 1974 mandates this sunset provision.

amount allowed as an accelerated depreciation deduction under section 168(k) or 1400L of the Code and that a taxpayer's estate tax liability is determined without regard to the phase-out of the state death tax credit. In effect, Part 30C would do the following:

- Conform to all of the pension tax changes in the Code.
- Conform to all of the education initiatives in the Code.
- Conform to the increased estate tax exemption limitations.
- Not conform to the phase-out of the state death tax credit.
- Conform to the extension of the carryback period for net operating losses occurring in tax years ending in 2001 and 2002.
- Delay the accelerated 30% bonus depreciation allowance.

<u>Pension Tax Provisions:</u> Part 30C conforms North Carolina's tax treatment of pension benefits and distributions to federal law. EGTRRA made the following notable changes to the pension laws:

- It allows taxpayers to contribute more to their tax-deferred retirement accounts. It gradually increases the amount that may be contributed to a 401(k), 403(b), and 457 accounts between 2002 and 2006. The contribution limit will increase to $15,000 in 2006. Starting in 2007, the limit will be indexed for inflation in $500 increments. It also allows persons who are 50 or older to make an additional catch-up contribution to their tax-deferred retirement accounts.
- It increases the amounts that may be contributed to both traditional IRAs and Roth IRAs from $2,000 in 2001 to $3,000 in 2002. This amount gradually increases to $5,000 for 2008. After 2008, this amount will be indexed annually for inflation. It also allows people over the age of 50 to make catch-up contributions to an IRA.
- It modifies the distribution rules for governmental 457 plan participants so that their deferred compensation funds will be taxed when they receive the distribution, not when it is made available to them.
- It repeals the coordination of deferrals between 457 and other elective deferral plans. Under former law, the maximum deferral amount for a 457 plan was reduced dollar for dollar by any contribution made to other types of retirement plans. The tax law change means that a person may defer the maximum annual contribution limit to a 457 plan as well as the maximum amount in a 401(k) or 403(b) plan.
- It expands the types of eligible tax-free rollover distributions to include distributions from qualified plans, 403(b) annuities, and 457 plans to other such plans and distributions from IRAs to qualified plans, 403(b) annuities, and 457 plans.
- It allows a surviving spouse to roll over distributions from a deceased spouse's plan to his or her own plan. Prior to this change, the tax-free rollover had to be made to an IRA.

<u>Education Tax Provisions:</u> Part 30C conforms North Carolina tax law on education incentives to the federal changes enacted last year. The more notable tax changes affecting education incentives include:

- It increases the annual maximum contribution limit to an Education IRA from $500 to $2,000 per beneficiary.
- It allows education IRA dollars to be used to cover expenses of students in grade, middle, and high schools.
- It eases the restrictions and limitations when using an Education IRA with other education initiatives, such as the Hope or Lifetime Learning tax credit.
- It moves the annual contribution deadline for Education IRAs from December 31 to April 15 of the following year.
- It provides that distributions from Section 529 Plans will be income-tax free up to the amount that is used to pay qualified higher education expenses.[37] Under former law, participants enjoyed only the benefit of tax-deferred contributions and investment growth.
- It allows a person to transfer 529 plan credits from one program to another for the benefit of the same beneficiary without incurring a taxable event.
- It extends the deduction for employer-paid college expenses to include graduate courses.

Estate Tax Provisions: North Carolina repealed its inheritance tax in 1998, effective for deaths occurring on or after January 1, 1999. It replaced its inheritance tax with an estate tax that is equivalent to the federal state death tax credit allowed on a federal estate tax return. This type of state estate tax is known as a "pick-up" tax because it picks up for the state the amount of federal estate tax that would otherwise be paid to the federal government.[38] EGTRRA made two changes that affect the estate tax:

- It phases out the estate tax over the next eight years by increasing the exclusion amount from $675,000 in 2001 to $1 million in 2002-03, $1.5 million in 2004-05, $2 million in 2006-08, and $3.5 million in 2009. There is no need for an exemption amount after 2009 since the tax is repealed in 2010. However, the tax is scheduled to reapply in 2011 unless a future Congress makes the repeal permanent. If the tax were reinstated in 2011, the exclusion amount would be $1 million. This act conforms North Carolina's exemption limits to the federal exemption limits to ensure that estates in North Carolina do not have to pay State tax if there is no federal tax due.
- It phases out the state death tax credit over the next four years by reducing it 25% in 2002, 50% in 2003, and 75% in 2004, and by repealing it entirely in 2005. This act does NOT conform to the phase out of the state death tax credit for two years.[39] Therefore, under this act an estate of a decedent dying on or after January 1, 2002, and before January 1, 2004, would owe North Carolina estate tax to the same extent that it would be owed

---

[37] North Carolina currently allows tax-free distributions for North Carolina plans. Section 30C.4 of this act repeals the State deduction.

[38] As of July 1, 2002, 37 other states, plus the District of Columbia, impose only the "pick-up tax".

[39] As of October 2, 2002 the following 10 states, in addition to North Carolina, have acted to decouple from the phase-out of the state death tax credit: Maine, Maryland, Massachusetts, Minnesota, Nebraska, New Jersey, Pennsylvania, Rhode Island, Vermont, and Wisconsin. The following 5 states, plus the District of Columbia, will remain decoupled automatically under their current law unless they take legislative action: Kansas, New York, Oregon, Virginia, and Washington.

without regard to the phase-out of the credit. The January 1, 2004, sunset ensures that the State will have to revisit this issue next year.

Because North Carolina's estate tax is based upon the federal credit for state death taxes, the repeal of the state death tax credit in 2005 and the ultimate repeal of the federal estate tax in 2010 will mean that the State must decide whether to replace or repeal its estate tax in the future.

Accelerated Depreciation Provisions: Under the Job Creation and Worker Assistance Act of 2002, a taxpayer is allowed an accelerated 30% bonus depreciation allowance for certain assets placed in service after September 11, 2001, and before September 11, 2004. The taxpayer is still entitled to the normal first-year depreciation on the remaining basis of the asset after reducing the basis by the bonus depreciation. This provision affects both corporate and individual income taxpayers.

The change in federal law results in a taxpayer recovering the basis in the asset sooner than under former law; however, over the life of the asset the taxpayer still receives the same benefit. This act does not conform State law to the accelerated depreciation schedule allowed under federal law.[40] However, under this act a taxpayer will continue to be able to deduct the same amount of an asset's basis under both federal and State law; it is just that the timing of the deduction will differ. To accomplish this decoupling from the federal accelerated bonus depreciation, the act does two things:

- For the first three years of the federal accelerated depreciation, it provides that a taxpayer must add back to federal taxable income a percentage of the additional 30% accelerated depreciation in the year the accelerated depreciation is claimed for federal purposes.[41] The percentage is 100% for the 2001 and 2002 taxable years and 70% for the 2003 taxable year. There is no add-back for the 2004 taxable year. The add-back for the first three years of the accelerated depreciation means that for State tax purposes, a taxpayer would deduct less in tax years 2001-2003 than the taxpayer would have deducted if the State conformed to the accelerated depreciation law. The amount of the deduction will be the normal first year depreciation on the remaining basis of the asset after reducing the basis by the bonus depreciation amount allowed under federal law plus 30% of the bonus depreciation in 2003. In 2004, the State will have in effect conformed to the federal law and the entire bonus depreciation may be deducted.
- In tax years beginning on or after January 1, 2005, it provides that the taxpayer may deduct from federal taxable income the total amount of the add-backs required in earlier years, divided into five equal installments. This means that for State tax purposes, a taxpayer would be allowed to deduct a greater depreciation amount in the outlying tax years – the

[40] As of September 26, 2002, the following 23 states, plus the District of Columbia, which previously followed federal depreciation rules, are now decoupled as the result of explicit legislative action: Arizona, Connecticut, Georgia, Hawaii, Illinois, Indiana, Iowa, Maryland, Massachusetts, Minnesota, Mississippi (per ruling of state tax commissioner), Missouri (for one year), Nebraska, New Jersey, Ohio, Oklahoma, Pennsylvania, Rhode Island, South Carolina, Tennessee, Vermont (for corporate income tax filers only), Virginia, and Wisconsin. In addition, New York City has decoupled from the bonus depreciation allowance. Six other states are decoupled automatically under pre-existing tax law: Arkansas, Idaho, Kentucky, New Hampshire, South Dakota, and Texas.

[41] For tax years beginning before January 1, 2002, the add-back must be taken in the first taxable year beginning on or after January 1, 2002, so that the taxpayer will not recognize any retroactive tax increase.

normal depreciation amount plus 20% of the accelerated depreciation amount the taxpayer had to add back. The purpose of this recovery provision is to enable the taxpayer to have the same basis in assets for federal and State purposes. Without this deduction provision, a taxpayer would have a different basis in the depreciable asset for State and federal purposes and would have to keep separate books and records for State and federal purposes until the disposal of the asset. In effect, the add-back and subsequent deduction will affect the timing of the impact of bonus depreciation on the State but it will not increase or decrease the total amount of revenue the State receives over the affected years.

Gift Tax Change: North Carolina imposes a gift tax on property transferred during the life of a donor. Gifts to a spouse are exempt from tax. The gift tax law allows an annual exclusion of $10,000.

The federal gift tax annual exclusion is more complex. Since 1998, the $10,000 federal gift tax annual exclusion has been subject to an inflation adjustment. The adjustment happens only in increments of $1,000 however. From 1998 until 2001, inflation had not grown enough to reach the first $1,000 increment. In 2002, that threshold was reached and the federal annual exclusion increased to $11,000. This amount won't increase to $12,000 until the cumulative inflation adjustment is at least 20%.

Part 30C amends North Carolina's gift tax annual exclusion to piggyback the federal amount, effective January 1, 2002.

UNAUTHORIZED SUBSTANCE TAX EXPENSES

Part 30D of this act allocates to local governments 70% of the State's expenses in collecting the unauthorized substance tax. The expenses would be drawn from local sales tax revenues. Under existing law, the following expenses are deducted from local sales tax distributions: costs of the Property Tax Division within the Department of Revenue, costs of the Property Tax Commission, the costs of the Institute of Government in operating a training program in property tax appraisal and assessment, and the costs of the Local Government Commission.

The General Assembly first imposed the unauthorized substances tax in 1989 to generate revenue for State and local law enforcement agencies and for the General Fund. Seventy-five percent of the tax collected is distributed to the State or local law enforcement agency that conducted the investigation that led to the tax assessment. The remaining 25% is credited to the General Fund. This act does not change this revenue allocation.

INSURANCE REGULATORY CHARGE[42]

Part 30E of this act sets the insurance regulatory charge at the same rate as last year's rate: 6.5% for the 2002 calendar year. The insurance regulatory charge is a fee that was enacted in 1991 to defray the State's cost of regulating the insurance industry. The charge is a percentage of each insurance company's premiums tax liability. The insurance regulatory charge is imposed on insurance companies, health maintenance organizations, and medical service corporations. For health maintenance organizations and medical service corporations, the fee is levied on each company's hypothetical gross premiums tax liability determined at the 1.9% gross premiums tax rate applied to its premiums base. The hypothetical calculation is necessary because medical service corporations and health maintenance organizations pay premiums tax at a lower rate.

[42] See the summary for S.L. 2002-144 for additional changes made to the insurance regulatory charge.

REGULATORY FEE FOR UTILITIES COMMISSION

Part 30F of this act sets the tax rate for the public utility regulatory fee for the 2002-2003 tax year at the same rate as last year's rate: 0.1%. This rate must be set by the General Assembly each year. The utility regulatory fee is a tax that was first imposed in 1989. The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating public utilities. The regulatory fee is imposed on all utilities that are subject to regulation by the North Carolina Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenues. In general, jurisdictional revenue is revenue derived from providing utility service in North Carolina.

In addition to funding the State's cost in regulating public utilities, the money in the Utilities Commission and Public Staff Fund is currently used to finance the work of the Study Commission on the Future of Electric Service in North Carolina. The General Assembly established the Commission in 1997 to examine the cost, adequacy, availability, and pricing of electric rates and service in North Carolina to determine whether legislation is necessary to assure an adequate and reliable source of electricity and economical, fair, and equitable rates for all consumers of electricity in North Carolina. Section 14.10 of S.L. 2000-67, the Current Operations and Capital Improvements Appropriations Act of 2000, extended the life of the Study Commission and its funding from the Utilities Commission and Public Staff Fund through June 30, 2006.

Part 30F also sets at $200,000 for the 2002-2003 fiscal year the annual public utility regulatory fee imposed on electric membership corporations whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale. This is the same rate that was in effect for the 2001-2002 fiscal year. The North Carolina Electric Membership Corporation is the only electric membership corporation that fits this description. The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating electric membership corporations.

The 1999 General Assembly authorized electric membership corporations to form subsidiary corporations that may provide energy services and products, telecommunications services and products, and water and wastewater collection and treatment. The subsidiaries must fully compensate the electric membership corporation for its use of the corporation's personnel, services, equipment, and property. The Utilities Commission is charged with regulating this aspect of the subsidiary's business and, to pay for this regulation, the 1999 legislation levied a flat-rate regulatory fee to be paid annually by the North Carolina Electric Membership Corporation. The General Assembly must establish the fee amount each year. The North Carolina Electric Membership Corporation is the only electric membership corporation whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale, as provided in G.S. 117-16. It is a "generation and supply cooperative" owned by its members. Its members are all but one of the existing North Carolina electric membership corporations, which are "distribution cooperatives." Thus, the fee imposed on the North Carolina Electric Membership Corporation will be passed on to its member electric membership corporations.

CLOSE CORPORATE TAX LOOPHOLES

This Part closes two corporate tax loopholes that allow some corporate profits to escape taxation and give corporate tax planners an opportunity to avoid existing taxes on corporate income and assets. The first loophole is caused by the definition of business income used in the corporate

income tax law; the second loophole is caused by the different franchise tax treatment of corporations and limited liability companies.

Definition of Business Income: The first section of this Part amends the definition of "business income" to include all income that is apportionable under the U.S. Constitution, effective for taxable years beginning on or after January 1, 2002.

Corporations that do business in more than one state divide up their income among those states for income-tax purposes. Business income is apportioned based on a formula that takes into account how much sales, property, and payroll the corporation has in each state. Nonbusiness income is allocated to a state based on its connection with that state. In the most basic terms, nonbusiness income could be described as income that is earned in an unrelated sideline activity of the corporation.

As an analogy, each interstate corporation's income is in two "pies" – a business income pie that is divided up among the states in which it does business, and a nonbusiness income pie that is given entirely to the state it is connected to.

In an ideal system, all states would follow the same rules for dividing up interstate corporations' income for tax purposes, so that no more and no less than 100% of every corporation's net income would be subjected to state income tax. However, different states have different laws and even when the laws are the same, they may be interpreted differently. In theory, this can result in the taxation of more than 100%, as well as less than 100%, of a corporation's net income. In practice, corporate tax planners take the opportunity to create "nowhere" income – income that no state can tax. Instead of each state receiving its piece of the business income pie, some pieces are thrown away. Thus, although a corporation may do substantial business in North Carolina, much of its otherwise taxable business income may be characterized as nonbusiness, so that North Carolina gets no piece of it.

These tax avoidance schemes are possible not only because different states have different laws, but also because states have laws that are vague or too narrow. In North Carolina, before this act, income was defined as business income if it related to the regular trade or business of the taxpayer. This definition is vague and narrower than what is allowed under the United States Constitution. If North Carolina was entitled to tax a significant percentage of a corporation's business income, the corporation could try to shift much of its income into the nonbusiness pie, which North Carolina does not share in. This could be true even though the corporation had deducted as a business expense the same items that it later claimed were not business items when the time came to pay tax on profits. Court decisions in North Carolina upheld this tax avoidance technique under the law prior to this act. Examples of the types of business income that corporations most often recharacterize are rents, royalties, gain or loss from the sale of property, interest, and dividends.

This Part changes the definition of business income to include any income that the United States Constitution allows a state to treat as business income. This change eliminates the prior statute's vagueness and narrowness, which allowed it to be used by corporations to create "nowhere" income that should otherwise be taxable in North Carolina. One effect of this change is to include income from extraordinary events, such as a liquidation of a division, in apportionable income. This effect is consistent with the Department of Revenue's historical position, as illustrated by its administrative rules, before the North Carolina Supreme Court's decision in *Lenox v. Tolson*.[43] A

[43] 353 N.C. 659, 548 S.E.2d 513 (S.Ct. 2001). In this case, Lenox, a New Jersey-based corporation, disposed of a subsidiary, ArtCarved, by selling all of its assets. Lenox did not retain any of the liquidation proceeds

corporation's income earned out of state from unrelated business activity that makes up a discrete business enterprise will continue to be nonbusiness income that cannot be apportioned – it would continue to be allocated to the state to which it is connected.

Before this act, North Carolina was one of 26 states that used the vague, unnecessarily narrow definition of business income. Eighteen states have a broader definition of business income. Five other states have the same law as enacted by this Part (define business income as all that the U.S. Constitution allows state to apportion). Thirteen states apportion all corporate income. A state using this approach receives less revenue than if it used the approach taken by this Part, because it relinquishes the right to tax true nonbusiness income of businesses headquartered in the state. The 13 states include Georgia, South Carolina, and Virginia.

LLC Franchise Tax: In 2001, the General Assembly enacted S.L. 2001-327 to close a loophole that allowed corporations to avoid franchise tax on their assets by transferring their assets to a controlled limited liability company (LLC). Corporations pay franchise tax on their assets but LLCs do not pay franchise tax on their assets. Tax planners helped many corporations avoid most of the franchise tax they would otherwise owe by setting up an LLC for the purpose of holding the assets on behalf of the corporation. Although the corporation's business continued in the same way, the corporation eliminated most of its franchise tax through this paper transaction.

The 2001 legislation tried to address this problem by requiring a corporation to pay tax on assets owned by the LLC if the corporation, including its affiliated corporations, indirectly owned[44] at least 70% of the LLC's assets. Unfortunately, tax planners found that the tax could still be avoided by using an additional paper transaction. If the corporation interposed a partnership between itself and the LLC holding its assets, then technically the 2001 legislation would not apply and the assets would continue to escape franchise tax.

The second section of this Part broadens the approach of the 2001 legislation to include "related members" (other entities and individuals) who may partner with one or more corporate entities to own the LLC to which the corporate assets are transferred. This section is effective beginning with payments due in March 2003. "Related members" is a defined term and includes shareholders, partnerships, etc.

If a corporation and its related members together indirectly own at least 70% of an LLC's assets, this Part provides that each corporation pays franchise tax on its relative share of the LLC's assets. The relative share is calculated after excluding those related members who are not corporations.

---

for use in its ongoing operations but distributed all of those proceeds to its sole shareholder. Lenox classified the gain from the sale as "nonbusiness income" on its North Carolina tax return and therefore did not pay taxes on the gain. The NC Department of Revenue reclassified the gain as business income and assessed corporate income tax. Lenox paid the tax under protest and sought a refund. Of the two tests used to determine business income, only the "functional test" applied to this transaction. The functional test focuses on income from property if the acquisition, management, and/or disposition of the property was an integral part of the corporation's regular business operations. The Court concluded that, under this test, a liquidation was an extraordinary event and not a recurring transaction made in the regular course of business. The Court further held that when a transaction involves a complete or partial liquidation and cessation of a company's particular line of business, and the proceeds are distributed to shareholders rather than reinvested in the company, any gain or loss generated from that transaction is nonbusiness income. In so holding, the Court expressly disavowed statements by the Court three years earlier in *Polaroid v. Offerman* with regard to its interpretation of the functional test.

[44] Indirect ownership of an LLC's assets is determined based on who is entitled to receive those assets upon dissolution of the LLC.

Thus, the entire assets are subject to franchise tax, with the tax burden shared proportionally by the corporations that are involved in the ownership scheme.

Here is an example:

A parent corporation, its subsidiary, and a major shareholder of the parent form a partnership to own an LLC that will own assets on behalf of the parent and subsidiary. The LLC's documents provide that upon dissolution its assets are distributed as follows:

Parent Corporation:	20%
Subsidiary Corporation:	45%
Shareholder:	35%

Under prior law, the assets would remain free of franchise tax. Under the changes in this Part, the parent corporation will pay franchise tax on 31% of the assets and the subsidiary corporation will pay franchise tax on 69% of the assets. Those are their relative shares of the total once you exclude the non-corporate owner.

The approach taken by this Part is much broader than the 2001 legislation and is intended to anticipate the creative paper relationships tax planners may devise to try and avoid the franchise tax. The breadth of the provision is such that it could apply to a "legitimate" situation, such as an individual who is the sole shareholder of a corporation and who later forms an LLC with an associate. Under this Part, the corporation would pay tax on the LLC's assets. Unfortunately, there does not appear to be a way to distinguish this type of situation from one in which the corporation is manipulating relationships to avoid its franchise tax. With different tax treatment of similar entities, tax planners can try to manipulate relationships to fall into the untaxed category. Because corporations and LLCs are similar, there may not be a strong policy reason to treat them differently for franchise tax purposes.

HOUSING TAX CREDIT EFFECTIVE DATE CHANGE[45]

Part 30H of this act enlarges the class of taxpayers eligible for an enhanced credit for investing in low-income housing in a county that sustained severe or moderate damage from a hurricane in 1999. In 1999, the General Assembly enacted a new tax credit for rehabilitating or constructing low-income housing. The credit is equal to a percentage of the amount of the taxpayer's federal credit for low-income housing with respect to eligible North Carolina low-income housing. The credit is 75% for buildings located in tier one or two counties and 25% for buildings located in other tiers. In 2000, the General Assembly enacted legislation providing that the 75% credit is also allowed for buildings located in one of 26 counties that sustained severe or moderate damage from a hurricane in 1999. This increase in the amount of the credit was made effective for buildings that are allocated a federal credit on or after January 1, 2001. The federal tax credits are allocated in December of each year. Thus, those taxpayers who made investments in hurricane counties and were allocated federal credits in December 2000 are not eligible for the enhanced State credit. This act backdates the effective date for eligibility for the enhanced State credit from 2001 to 2000, thereby including those who were allocated federal credits for investments in hurricane counties during 2000.

[45] See the summary for S.L. 2002-87 for a more complete explanation of the substantive changes made to the housing tax credit.

Subsidiary Dividend Changes

Session Law	*Bill #*	*Sponsor*
S.L. 2002-136	**HB 1670**	**Representative Luebke**

AN ACT TO CLARIFY THE EXPENSE ATTRIBUTION LAW AS IT APPLIES TO DEDUCTIBLE DIVIDENDS AND TO PROVIDE LIMITS ON THE POTENTIAL TAX LIABILITY.

OVERVIEW: This act provides certainty and clarity to the expense attribution law as it applies to deductible dividends and provides limits on the potential tax liability.

FISCAL IMPACT: The act assures the State of the revenues relied upon in its budget availability estimates for 2001 and 2002. Under the act, the State may expect to receive approximately $57 million a year for 2001, 2002, and 2003 from the taxation of subsidiary dividends. Of this amount, the State expects to receive approximately $80 million in availability for the 2002-03 budget.

EFFECTIVE DATE: The act becomes effective for taxable years beginning on or after January 1, 2001.

BACKGROUND: The 2001 General Assembly enacted legislation conforming State law to the federal rules for the deduction of dividends received. This change eliminated the adjustments that had previously been required to reflect differences between the federal and State dividends deduction. Eliminating the adjustments also made the dividends subject to the general State law that expenses related to untaxed income cannot be deducted from taxable income. As a result, expenses related to deductible dividends must be netted from those dividends.[46] The law did not provide guidelines for calculating the amount of expenses that are related to deductible dividends.

Without knowing exactly how to determine the amount of related expenses, taxpayers were faced with uncertainty and potentially greater liability than they had anticipated when the legislation was debated. The new law was expected to have an especially significant impact on bank holding companies and electric power holding companies, because federal law requires them to have multiple subsidiaries.

ANALYSIS: The act provides clarity to the expense attribution law as it applies to deductible dividends and provides limits on the additional tax liability. These limits were calculated so that the act should yield revenue at least equal to what had been included in budget availability estimates based on the 2001 law.[47] The act states the intent of the General Assembly that it will be effective

---

[46] North Carolina has an exception to its general law where federal and State laws differ regarding the taxability of an income item. Prior to the 2001 changes, companies were able to use the exception to deduct expenses associated with deductible dividends earned from subsidiaries. The 2001 tax law change effectively eliminated the deduction of expenses associated with subsidiary dividends.

[47] After many discussions with the Department of Revenue and the interested parties about the impact of the expense attribution rules, it became clear that the 2001 estimate of $32.8 million understated the impact of the indirect change in the expense attribution rules. The reason for the under-estimate is that the Department of Revenue's analysis of the 2001 legislation, which used confidential tax returns for the 1994 tax year and an update of the 1994 data, did not include financial institutions. The budget enacted by the 2002 General Assembly included $50 million in additional budget availability from a re-estimate of the 2001 legislation.

during 2001 and 2002 but will be studied and may be revised effective beginning with the 2003 tax year. However, the act does not sunset.

In summary, the act limits tax liability as follows:

- There are caps on the amount of related expenses that must be netted from deductible dividends as follows:
    - Most companies: 15% of dividends
    - Bank holding companies: 20% of dividends
    - Electric power holding companies: 15% of total interest expenses
- The additional tax that a bank holding company and its related companies must pay as a result of the expense netting is subject to a maximum of $11 million per corporate family.
- Bank holding company corporate families also receive a credit beginning in 2003. For bank corporate families that reach the $11 million maximum, the credit is $2 million. For other bank corporate families, the credit is equal to the amount of tax reduction that would result if bank holding companies were subject to a 15% cap rather than a 20% cap. These credits may be taken against income tax or franchise tax and are spread out over four tax years beginning in 2003.
- Electric power holding companies receive a credit equal to one-half of the additional tax that each must pay as a result of the expense netting. The credit is taken in the following year. The credit may be taken against income tax or franchise tax. As an alternative, an electric power holding company may elect to allocate the credit among the members of its affiliated group. If the electric power company makes this election, then the credit is spread out over four tax years, beginning in 2003.

Section-By-Section Analysis:

Section 1:	For federal tax purposes, dividends are deductible with no adjustment for related expenses. For State tax purposes, no deduction is allowed for expenses related to nontaxable income. Therefore, for State tax purposes, an adjustment must be made to federal taxable income to add-back any related expenses that were included in the federal deduction. This section provides that not all of the expenses must be added back by establishing a different adjustment for expenses related to dividends received that are not taxed.
Section 2:	This section establishes the adjustment for expenses related to dividends received that are not taxed, by providing a cap on the amount of tax payable: 15% of nontax dividends for most companies; 20% of nontax dividends for bank holding companies; and 15% of total expenses for electric power holding companies. The act also provides a credit for bank holding companies and electric power companies. Any unused portion of the credit may be carried forward to succeeding taxable years.
Section 3:	A conforming change to ensure that related expenses are deducted only once when calculating a corporation's net economic loss.

Section 4:	A conforming change that provides the same tax treatment for foreign source dividends as domestic source dividends.
Section 5:	States the intent of the General Assembly to address the issues raised by this act during the 2003 Regular Session. The Revenue Laws Study Committee is to study the treatment of expenses related to dividends received and other income not taxed, and the taxation of affiliated corporations, of holding companies, and of financial institutions under current law. The Committee must report its recommendations to the 2003 General Assembly.
Section 6:	Provides that a taxpayer will not be subject to additional tax or to penalties for underpayment of a tax to the extent the underpayment was created or increased by Section 3 of S.L. 2001-327 if the taxpayer pays all tax due that was created or increased by Section 3 of S.L. 2001-327 within 15 days after the date this act became law, October 3, 2002.

Insurance Regulatory Fund Changes

Session Law	*Bill #*	*Sponsor*
S.L. 2002-144	**HB 1105**	**Representative Hurley**

AN ACT TO FUND THE OPERATIONS OF THE DEPARTMENT OF INSURANCE FOR THE FISCAL YEAR 2002-2003 THROUGH THE INSURANCE REGULATORY FUND BY EXPANDING THE PURPOSES FOR WHICH THE FUND MAY BE USED AND BY CREDITING VARIOUS FEES COLLECTED BY THE DEPARTMENT AND OTHER AGENCIES UNDER THE DEPARTMENT INTO THE FUND FOR FISCAL YEAR 2002-2003, AND TO RESTORE THE 2002-2003 BUDGET REDUCTIONS SUSTAINED BY THE DEPARTMENT OF INSURANCE.

OVERVIEW: This act makes two changes relating to the Department of Insurance:

- It restores the $1.8 million budget cut the Department sustained for the 2002-2003 fiscal year in the Current Operations, Capital Improvements, and Finance Act of 2002. The increased appropriation from the General Fund will be reimbursed from the Insurance Regulatory Fund, which has a sufficient surplus.
- It provides that for the 2002-2003 fiscal year, certain fees collected by the Department of Insurance will no longer be retained as part of the Department's budget but will be credited to the Insurance Regulatory Fund and used to reimburse the General Fund for the Department of Insurance's expenses. The act was intended to appropriate to the Department for 2002-2003 the amount by which the fee changes reduce its budget, $3.2 million, but the appropriation was omitted by oversight. The Department is expected to receive these funds, however, through authorization from the legislative leadership.

FISCAL IMPACT: See Overview.

EFFECTIVE DATE: The act is effective for the 2002-2003 fiscal year only.

ANALYSIS: The two changes made by this act are not related, although both affect the Department of Insurance. Sections 9 and 10 of the act restore the $1.8 million budget cut the Department sustained for the 2002-2003 fiscal year in the Current Operations, Capital Improvements, and Finance Act of 2002. This restoration does not affect the General Fund. Although the Department of Insurance's budget is appropriated from the General Fund, the Insurance Regulatory Fund reimburses the General Fund for the appropriation. The additional $1.8 million is available as a surplus in the Insurance Regulatory Fund to reimburse the General Fund for the additional appropriation. Thus, neither the cut nor its restoration affected the General Fund.

The Department of Insurance regulates the insurance industry and other industries. Insurance companies pay an annual insurance regulatory charge that is measured as a percentage of each company's gross premiums tax. The proceeds of the charge are credited to the Insurance Regulatory Fund. Other industries regulated by the Department of Insurance also pay fees that are credited to the Insurance Regulatory Fund. The Fund is used to pay for the part of the Department's budget that goes to regulating the insurance industry and other industries. The funds are not paid to the Department of Insurance directly from the Insurance Regulatory Fund. Instead, the Department's budget is appropriated from the General Fund, and the Insurance Regulatory Fund reimburses the General Fund for the Department's costs of regulating the industries whose fees are credited to the Insurance Regulatory Fund.

In addition to regulating industries, the Department of Insurance has other functions relating to various State boards and commissions: the North Carolina Manufactured Housing Board, the State Fire and Rescue Commission, the Building Code Council, the North Carolina Code Officials Qualification Board, the Public Officers and Employees Liability Insurance commission, the North Carolina Home Inspector Licensure Board and the Volunteer Safety Workers Compensation Board. The Department's budget for these activities is supported by fees. The fees are collected and retained by the Department and used to cover these costs – there is no General Fund appropriation for these costs.

Sections 1 through 8 of this act change the way this part of the Department's budget is handled for the 2002-2003 fiscal year. Instead of retaining the fees, the Department of Insurance will deposit the fees in the Insurance Regulatory Fund. This eliminates the fee proceeds that would have been available to the Department to support these activities. The act was intended to appropriate additional funds from the General Fund to the Department of Insurance to support these activities. The additional appropriation would have been reimbursed to the General Fund from the Insurance Regulatory Fund, so there would have been no net fiscal impact, just an accounting change. Due to an oversight, the act failed to appropriate the additional funds to the Department of Insurance. The Department is expected to receive these funds, however, through authorization from the legislative leadership.

The act amends the Insurance Regulatory Fund statute to expand the purposes for which the Fund can be used for the 2002-2003 fiscal year, to cover not just regulating the insurance industry and other industries, but also carrying out other functions relating to boards and commissions. The insurance regulatory charge and the other fees paid into the Fund are not segregated from one another. Thus, a fee paid by one industry may end up being used for a function of the Department

that relates to another industry. This pooling of the fees calls into question whether they can continue to be characterized legally as fees.

The issue of whether the insurance regulatory charge is a fee or a tax was raised in a recent case, *State Farm Mut. Auto. Ins. Co. v. Long*, 129 N.C.App. 164, 497 S.E.2d 451 (1998), aff'd 350 N.C. 84, 511 S.E.2d 303 (1999). In this case, the court evaluated the insurance regulatory charge under a three-part test used to distinguish a tax from a fee: (1) is it imposed by a legislative body or an administrative body; (2) is it imposed on a broad class or a narrow class of citizens; and (3) is it used for general public purposes, or used for the regulation or benefit of the parties upon whom the assessment is imposed. The court found that under the first two factors, the insurance regulatory charge could be either a fee or a tax. It held that the third factor was dispositive: the charge was a fee because it was credited to a segregated account and used only to regulate the insurance industry. Because this act broadens the purposes for which the charge may be used to include activities of the Department of Insurance that are not related to regulating the insurance industry, if the issue is raised in subsequent litigation, a court may find that the act changed the nature of the charge from a fee to a tax.

If the charge were ruled to be a tax rather than a fee, it would reduce the amount of revenue North Carolina receives as a result of the retaliatory premiums tax. The retaliatory premiums tax is imposed on foreign insurance companies doing business in North Carolina and is equal to the amount by which the NC premiums tax imposed on the company is less than the amount of premiums tax the company's home state would impose on an equivalent NC company doing business there. Because the insurance regulatory charge is considered a fee and not a tax, it is not added to the amount of NC tax used to calculate the retaliatory tax due. The lower the NC tax, the more retaliatory tax due.

Interstate Air Couriers – Bill Lee

Session Law	*Bill #*	*Sponsor*
S.L. 2002-146	**HB 1665**	**Representative Gray**

AN ACT TO AMEND TAX LAWS RELATED TO INTERSTATE AIR COURIERS AND TO AMEND THE WAGE STANDARD UNDER THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT TO ACCOUNT FOR THE VALUE OF HEALTH INSURANCE TO PART-TIME JOBS.

OVERVIEW: This act rewrites the wage standard under the William S. Lee Quality Jobs and Business Expansion Act (hereinafter Bill Lee Act) to allow part-time jobs for which the taxpayer provides health insurance to be counted as having wages at least equal to the standard multiplied by the applicable average weekly wage for the county in which the jobs will be located. The act also makes the following changes to the Bill Lee Act as it applies to air courier hubs:

- Rewrites the definition of interstate air courier hub to conform to industry practice.
- Extends the Bill Lee Act sunset of January 1, 2006, to January 1, 2010, for an interstate air courier that enters into a major real estate lease on or before January 1, 2006, with an airport authority.

- Allows an interstate air courier that has, or is constructing, a hub in North Carolina to qualify for enhanced incentives if the courier makes an investment of $150 million or more within a seven-year period.
- Extends the sunset on the Piedmont Triad Airport Authority's exemption from the bidding laws from January 1, 2008, to January 1, 2010.

FISCAL IMPACT: The initial estimates of the impact of the Fed Ex incentives in 1998 have not changed with the delay in the project. The 1998 estimates indicated that the lower sales tax rate on handling and storage equipment would amount to $.4 million for the first two years that the project is getting started and $.1 million per year thereafter. The impact of the sales tax exemption for lubricants and repair parts comes into play after the facility is up and running. The estimate for this incentive is $.2 million a year. The uncertainty surrounding the timing of the project means that it is impossible to predict which year the impacts begin. Under current scheduling, the first year of the handling and storage equipment incentive could be 2005-06. The costs of the sales tax incentives will not occur until at least 2005-06.

In addition, the extension of the Bill Lee Act's sunset from 2006 to 2010 for interstate air couriers will allow Fed Ex and other eligible taxpayers to take tax credits under the Act during the 2006-09 period. Data from the State's 1998 offer of financial benefits to Fed Ex indicated that Bill Lee Act credits of $2 million would be taken over a four-year period.

EFFECTIVE DATE: The air courier hub definition rewrite became effective October 1, 2002, and applies to sales made on or after that date. The bidding law exemption effective date change became effective when the act became law, October 7, 2002. The remaining provisions in the act are effective for tax years beginning on or after January 1, 2002.

BACKGROUND: The Bill Lee Act was enacted in 1996, effective beginning with the 1996 tax year with a 2002 sunset. The Act is a package of State tax incentives and has been modified in each subsequent year. The incentives are primarily in the form of tax credits for investment in machinery and equipment and real property, for job creation, for worker training, and for research and development. Counties are divided into five economic distress tiers based on the unemployment rate, per capita income, and population growth of the county. For many of the credits, the lower the tier of a county, the more favorable the incentive. The Act requires the Department of Commerce and the Department of Revenue to report periodically on the credits allowed by the Act.

Before 1996, North Carolina had made little use of tax incentives to lure businesses to the State. Even without incentives, North Carolina was consistently one of the top states in attracting industry. The array of credits authorized by the Bill Lee Act was viewed as an experiment, to be evaluated in five years to determine whether the incentives were cost effective and actually affected behavior, or merely provided tax reductions to businesses that would have located or expanded in any case. In 1997, the General Assembly amended the Bill Lee Act to make interstate air couriers[48] an eligible business under the Act. In 1999, the General Assembly extended the 2002 sunset to 2006.

---

[48] An air courier is an air carrier that delivers individually addressed letters, parcels, and packages. Examples of air couriers include UPS and Federal Express.

To be eligible for the credits under the Bill Lee Act, jobs must meet the applicable wage standard. There is no wage standard for jobs located in tiers one and two.[49] The wage standard for tiers three through five is 110% of the applicable average weekly wage for the county. For the credit for worker training or the credit for creating new jobs, the average wage of the jobs for which a credit is claimed and the average wage of all jobs at the location are required to meet the applicable wage standard. For the credit for investing in machinery and equipment, the credit for research and development, and the credit for investing in central office and aircraft facility property, the average wage of all jobs at the location with respect to which a credit is claimed are required to meet the applicable wage standard.

In 1998, the General Assembly provided sales tax and property tax reductions for interstate air couriers in order to encourage the development of air courier hubs in North Carolina. Effective January 1, 2001, sales to an interstate air courier of equipment for handling and storing materials at its hub became subject to a reduced sales tax of 1%, capped at $80 per item. In addition, interstate air couriers enjoy a sales tax exemption for purchases of aircraft lubricants, aircraft repair parts, and aircraft accessories for use at the air courier's hub in this State. Effective beginning with the 2001 property tax year, there is a property tax exemption for aircraft owned by an air courier and apportioned for property tax purposes to the courier's hub in this State.

ANALYSIS: Section 1 of this act amends the definition of "hub" for interstate air couriers and recodifies the definition of "interstate air couriers" for sales tax purposes. The amendment to the definition of "hub" was needed because the prior definition did not accurately describe hubs. The prior definition stated, in part, that a hub is the airport in the State where the air courier has allocated at least 60% of its aircraft value apportioned to this State. Aircraft value is apportioned based on revenues generated and on the amount of time the aircraft is on the ground. In the case of air couriers, revenue is generated at the customer site, not at the hub. Additionally, aircraft spend very little time on the ground at the hub. For these two reasons, the definition of an air courier hub formerly in the statutes did not fit the factual situation. This act defines a hub as the primary airport in the State for sorting and distributing packages from which the air courier has, or expects to have, at least 150 departures a month. This definition is similar to the definition of "hub" under South Carolina law, but is a more stringent test as South Carolina requires only 25 departures a month.

The definition of "interstate air courier" is not substantively amended. Currently, for sales tax purposes, the definition of interstate air courier refers to the definition used in the Bill Lee Act. In this act, the definition of "interstate air courier" for sales tax purposes is made a stand-alone definition. There is no substantive change to the definition.

Section 2 of this act extends the sunset date on the Bill Lee Act until January 1, 2010, for certain interstate air couriers and Sections 4 through 7 of the act increase various time frames in the act from two years to seven years. The interstate air courier industry, and the construction of a hub in particular, face many regulatory, administrative, and legal hurdles not generally faced by other industries. Due to these extra burdens, time frames in this industry are generally longer than in other industries. There is generally a longer period between the time that a project is announced and a location is selected and the time the facility is placed in service. Due to these longer time frames, it was argued that an extension of the sunset and extensions of various time frames are needed to accommodate these projects.

[49] S.L. 2002-172 eliminated the wage standard in tiers one and two.

Section 3 of this act amends the wage standards under the Bill Lee Act for all taxpayers. Currently, in order to be eligible for any of the credits under the Bill Lee Act, the average wage of all jobs at the location must meet or exceed the wage standard for the county in which the jobs are located.[50] Included in this calculation are part-time jobs, converted to a full-time equivalency. Some interested parties argued that because part-time jobs are not eligible for a credit for job creation, they should not be considered in this calculation. The inclusion of part-time jobs can disqualify a project since part-time jobs generally pay less than full-time jobs.

This act takes a middle ground. All part-time jobs must still be considered when the wage calculation is made. However, any part-time job for which the taxpayer provides health insurance will be considered to have a wage that at least meets the applicable average weekly wage. If a part-time job with health insurance has a wage that is less than the applicable average weekly wage, the applicable average weekly wage will be used in making the calculation. If a part-time job with health insurance has a wage that is greater than the applicable average weekly wage, the actual wage of the job will be used in making the calculation.

Section 8 of this act provides an extension of the bidding law exemption for the Piedmont Triad Airport Authority. When the General Assembly enacted certain tax incentives for interstate air couriers in 1998, one provision of that act granted a bidding law exemption for the Piedmont Triad Airport Authority. The exemption became effective beginning January 1, 1999, and applies to design and construction of an air freight distribution facility on airport property, and related supplies, equipment, and services. S.L. 2001-476 (Senate Bill 748) provided an extension of this exemption from January 1, 2004, to January 1, 2008. Upon the request of Fed Ex, this act extends the exemption to January 1, 2010. With this extension, the bidding law exemption would sunset at the same time as the Bill Lee Act for certain interstate air couriers.

Amend Property Tax Laws

Session Law	*Bill #*	*Sponsor*
S.L. 2002-156	**HB 1523**	**Representative Hill**

AN ACT TO AMEND VARIOUS PROPERTY TAX LAWS.

OVERVIEW: This act is a recommendation of the Revenue Laws Study Committee based on proposals by the North Carolina Association of Assessing Officers and the Department of Revenue. It makes the following changes to the property tax law:

- Increases the minimum penalty for a worthless check from $1 to $25 and provides that the tax collector may waive or reduce the penalty. This change became affective when the act became law, October 9, 2002.
- Provides a uniform procedure for appeals regarding taxation of personal property and authorizes the board of equalization and review to meet year round to hear these appeals. These changes are effective beginning with the 2003 property tax year.

[50] As mentioned above, for the credits for job creation and for worker training, the average wage of the particular jobs for which the credit is claimed must also meet or exceed the applicable average weekly wage.

- Delays from 2002 until 2003 the effective date of a 2001 law that defined certain single-section manufactured homes as real property for tax purposes.
- Adds an additional collection assistance fee of $15 to debts owed to local governments and collected by the Department of Revenue through tax refund setoff, effective January 1, 2003. The fee will be used to pay local governments' costs of submitting debts for collection by setoff.

FISCAL IMPACT: Two provisions of the act are likely to have a fiscal impact. Increasing the minimum charge for a returned check will likely increase local fee revenues. However, granting the assessor the authority to waive the fee will offset some of the increase. The exact amount of this revenue change is unknown. The second potential impact relates to the debt setoff program. The act will reduce the cost of debt collection for local governments and will likely increase program usage. However, no firm estimate is available on the total financial impact for local governments.

EFFECTIVE DATE: See Overview.

ANALYSIS: This act makes a number of changes to the property tax laws. First, it modifies the penalty for giving a worthless check. It increases the minimum penalty from $1 to $25. The penalty is 10% of the amount of the check, subject to the minimum and to a maximum of $1,000. It also authorizes the tax collector to waive the worthless check penalty. Tax collectors do not have the general authority to waive property tax penalties. By comparison, the Secretary of Revenue has general authority to waive tax penalties.

Second, the act provides a uniform procedure and timetable for appeals relating to personal property, effective beginning with the 2003 property tax year. Under prior law, the statutes specified the procedure and timetable for real property appeals but not for personal property appeals; as a result, different counties had adopted different procedures and timetables. This act provides a uniform system: the taxpayer may appeal value, situs, or taxability within 30 days after receiving notice of value. The notice must inform the taxpayer of the 30-day period. The assessor is required to respond to each appeal and the taxpayer has 30 days to appeal the assessor's final decision to the board of equalization and review or the board of county commissioners. The act authorizes boards of equalization and review to sit year-round to hear personal property appeals. In 2001, the General Assembly authorized boards of equalization in review to sit year-round to hear appeals relating to discovered property, motor vehicle taxation, and annual audits of whether property qualifies for special tax treatment.

Third, the act delays from 2002 to 2003 the effective date of 2001 legislation that changed the way manufactured homes are classified for property tax purposes. A manufactured home is defined in G.S. 143-143.9 as:

> A structure, transportable in one or more sections, which, in the traveling mode, is eight feet or more in width or is 40 feet or more in length, or when erected on site, is 320 or more square feet, and which is built on a permanent chassis and designed to be used as a dwelling with or without a permanent foundation when connected to the required utilities, and includes the plumbing, heating, air conditioning and electrical systems contained therein.

Since 1987, North Carolina law had provided that a manufactured home was considered real property for property tax purposes if it (i) consisted of two or more sections; (ii) had its hitch, wheels, and axles removed; and (iii) was placed upon a permanent foundation on land owned by

the owner of the manufactured home. In 2001, the General Assembly removed the requirement that the home consist of two or more sections, effective beginning with the 2002 tax year. After the 2001 act became law, county assessors realized they would not have time to review all the manufactured homes in each county to determine which ones should be reclassified as real property for the 2002 tax year. The assessors had requested an extension until the 2004 tax year, but this act delays the change only until the 2003 tax year.

Fourth, the act imposes an additional collection assistance fee of $15 on debts owed to local governments and collected by the Department of Revenue through tax refund setoff. Under the Setoff Debt Collection Act, the Department of Revenue diverts the income tax refund of an individual who owes money to a State or local agency to pay the debt owed to that agency. The debt the individual owes the agency is set off against the individual's income tax refund. Under existing law, a collection assistance fee of no more than $15 is imposed on debts (other than child support debts) collected by setoff, to reimburse the State for its costs of operating the setoff debt collection program. This act adds an additional collection fee of $15 for debts (other than child support debts) owed to local governments and collected by setoff, effective January 1, 2003. The Department of Revenue will collect the fee as part of the setoff process and remit the fee to the clearinghouse that submits local debts on behalf of local governments. The purpose of the fee is to recover the cost to local governments of submitting debts for collection by setoff. The clearinghouse that submits debts on behalf of local governments was created through a joint agreement between cities and counties; the local governments have also contracted with a third party to process and compile local debts for setoff.

GUARANTEED ENERGY SAVINGS CONTRACTS

Session Law	*Bill #*	*Sponsor*
S.L. 2002-161	**HB 623**	**Representative McMahan**

AN ACT TO PROMOTE ENERGY EFFICIENCY IN STATE-OWNED BUILDINGS.

OVERVIEW: Authorized the State to enter into up to $50 million of installment finance contracts to finance guaranteed energy savings measures. Under prior law, only local governments had the authority to enter into these contracts.

ANALYSIS: Since 1994, local governments have had the authority to enter into financing contracts to finance the cost of energy conservation measures. This authority is in Part 2 of Article 3B of G.S. Chapter 143. An energy conservation measure is an alteration, training, or services that will provide anticipated energy savings with respect to a facility. The financing contracts are known as guaranteed energy savings contracts. Under the contract to implement energy conservation measures, all payments, except obligations on early termination, are to be made over time and energy cost savings are guaranteed to exceed the cost of the contract. Local governments use installment purchase contracts to finance these expenditures. The authority for this type of local government debt is found generally in G.S. 160A-20 and, specifically with respect to guaranteed energy savings contracts, in G.S. 143-64.17C. The law provides that a guaranteed energy savings contract is not a pledge of the government's taxing power.

This act extended to State agencies the authority to enter into guaranteed energy savings contracts. The act provides that the State will use generally the same procedures for soliciting the contracts that apply to local governments under current law. The State Energy Office of the Department of Administration is required to adopt rules for agencies to follow in evaluating the contracts, subject to approval by the State Treasurer. State agencies that enter into guaranteed energy savings contracts are required to report to the State Energy Office which in turn reports annually to the Joint Legislative Commission on Governmental Operations. The act clarifies that State energy conservation measures are subject to inspection and compliance.

Unlike local governments, State agencies do not have general authority to enter into debt in the form of installment purchase contracts. For this reason, Section 9 of the act added a new Article to Chapter 142 of the General Statutes providing the authority for State agencies to incur this type of debt. The aggregate principal amount payable by the State under these contracts is limited to $50 million. The debt is secured by a lien on or a security interest in any part of the property with respect to which an energy conservation measure is undertaken and/or the land upon which the property is or will be located.

There is no pledge of the State's faith and credit or taxing power. Thus, voter approval is not necessary for the borrowing. If the State defaulted on its repayments, no deficiency judgment could be rendered against the State, but the property that serves as security could be disposed of to generate funds to satisfy the debt. The State could choose not to appropriate funds to repay the debt, but such a decision would have negative consequences for the State's credit rating.

Under the act, the funds can be borrowed from the vendor with whom the agency contracts, or can be borrowed through the sale of certificates of participation (COPs). In a typical COPs transaction, a State-controlled nonprofit corporation acts as a straw person for the purpose of entering into the installment purchase contract with the State. The nonprofit corporation then raises capital for the energy conservation measure being purchased by the State by assigning or participating out its rights to receive the installment payments to be made by the State pursuant to the contract. COPs are certificates that evidence that assignment of the rights to receive these installment payments; and it is through the sale of COPs to investors that capital is raised to acquire or construct the item being financed.

Before a guaranteed energy savings contract can be entered into, the Office of State Budget and Management must certify that resources are expected to be available to pay the amounts due under the contract. Next, the Council of State must approve the contract by resolution that sets out the maximum maturity, and the maximum interest rates. The maximum maturity may not exceed 12 years. The State Treasurer also must approve the financing, finding that the amount to be borrowed is adequate and not excessive and will not require an excessive increase in any State revenues to provide for repayment, and that the special indebtedness can be incurred or issued on terms favorable to the State.

NC Economic Stimulus and Job Creation Act

Session Law	*Bill #*	*Sponsor*
S.L. 2002-172	**HB 1734**	**Representative Owens**

AN ACT TO ESTABLISH AND MODIFY VARIOUS ECONOMIC INCENTIVE PROGRAMS FOR BUSINESS AND INDUSTRY; TO AMEND PROVISIONS RELATING TO INDUSTRIAL AND POLLUTION CONTROL FACILITIES FINANCING; TO AUTHORIZE PLANNING AND DEVELOPMENT FOR A BIOPHARMACEUTICAL TRAINING CENTER AND A CANCER REHABILITATION TREATMENT CENTER; AND TO MAKE TECHNICAL AND CONFORMING CHANGES.

OVERVIEW: There are six parts to this act. Part 1 of this act amends the Bill Lee Act by scaling back the credit for machinery and equipment in tiers three, four, and five, by eliminating the wage standard in tiers one and two and in development zones, and by eliminating the wage standard for the credit for worker training. Part 2 of the act creates the Jobs Development Investment Grant Program, a discretionary program that awards grants to businesses based on a percentage of employee withholdings over a number of years. Part 3 of the act requires production companies to spend at least $1 million in North Carolina to be eligible for a grant from the Film Industry Development Account. Part 4 of the act makes a technical change to the North Carolina Railroad's condemnation authority. Part 5 of the act eases the public hearing requirements for Industrial Development Bonds to facilitate bonds for smaller manufacturers. Part 6 of the act provides authorization to initiate planning and development of a new biopharmaceutical training center and a cancer rehabilitation treatment center.

FISCAL IMPACT: The Bill Lee Act changes will generate approximately $3.45 million for fiscal year 2003-04, $7 million for fiscal year 2004-05, and $10.56 million for fiscal year 2005-06. No fiscal impact is expected from the changes to the film industry incentives. The Jobs Development Investment Grant Program represents a significant change from the structure of the Bill Lee Act incentives. It is impossible to determine the exact dollar cost of the Program. However, the Program is limited to 15 projects per year and $10 million in grants per year, and it sunsets on January 1, 2005. Thus the maximum grant amount that may be awarded during the 13 years the Program is in effect is $240 million.

EFFECTIVE DATE: See Analysis.

ANALYSIS: There are six main components to this act: changes to the William S. Lee Quality Jobs and Business Expansion Act (hereinafter Bill Lee Act)[51], the establishment of a new economic development grant program for new and expanding businesses, changes to film industry incentives, changes to the condemnation authority of a railroad company, changes to industrial and pollution control facilities financing law, and authorization to initiate planning and development of a new biopharmaceutical training center and a cancer rehabilitation treatment center.

Part 1. Bill Lee Act: Part 1 makes the following substantive changes to the Bill Lee Act:

Machinery and Equipment. A taxpayer is allowed a credit for the cost of machinery and equipment placed into service during a taxable year that exceeds the applicable threshold based on the location where the machinery and equipment are placed into service. Under prior law, the amount of the credit was equal to 7% of the cost of the machinery and equipment in excess of the applicable threshold. Section 1.1 of this act makes two changes to this credit. First, the amount of the credit

[51] For background on the Bill Lee Act, see the summary for S.L. 2002-146.

is reduced in enterprise tiers three, four, and five. In those areas, the amount of the credit is reduced to 6%, 5%, and 4%, respectively, of the cost of the machinery and equipment in excess of the applicable threshold. Second, the amount of the threshold is increased in enterprise tiers four and five. In enterprise tier four, the threshold is increased from $500,000 to $1,000,000. In enterprise tier five, the threshold is increased from $1,000,000 to $2,000,000. This section is effective for taxable years beginning on or after January 1, 2003, and applies to business activities that occur on or after that date, but does not apply to business activities that occur on or after January 1, 2003, that are subject to a letter of commitment signed before January 1, 2003.

Overdue Tax Debts. If the Secretary of Revenue discovers that any tax is due from a taxpayer, the Secretary must notify the taxpayer in writing of the Secretary's intent to assess the taxpayer for the tax. The notice must describe the basis for the assessment, the amount of tax to be assessed and any interest and penalties due. If the taxpayer disagrees with the assessment, the taxpayer has 30 days to request a hearing before the Secretary. The Secretary must then schedule a hearing to occur within 90 days of the request. Within 90 days after the hearing, the Secretary must issue a decision on the hearing. If the taxpayer does not request a hearing within the 30 days allowed, or if the Secretary finds that the tax is due after the hearing, the proposed assessment becomes a final assessment. If a taxpayer disagrees with a final assessment, the taxpayer may appeal the decision to the Tax Review Board, and then on to superior court, the Court of Appeals, and the Supreme Court. A tax debt is a final assessment after all possibilities for appeal have been exhausted. An overdue tax debt is any part of a tax remaining after 90 days. Section 1.2 would make a taxpayer ineligible for a credit under the Bill Lee Act if the taxpayer had any overdue tax debts. Section 1.5 defines an overdue tax debt. These two sections are effective for taxable years beginning on or after January 1, 2003.

Wage Standard. A taxpayer is eligible for a credit under the Bill Lee Act only if the jobs provided by the taxpayer meet a wage standard. Under prior law, the wage standard was 110% (100% in an enterprise tier one area or a development zone) of the applicable average weekly wage. The jobs that are included in calculating the wage standard vary depending on the particular credit.

Section 1.3 of this act makes three substantive changes to the wage standard. The changes are effective for taxable years beginning on or after January 1, 2003. First, this section eliminates the wage standard in enterprise tier one and two areas. Since the wage standard for a business located in a development zone is the same as for tier one counties, this section also eliminates the wage standard for a development zone area.

Second, this section eliminates the wage standard for the credit for worker training. In order to be eligible for the credit for worker training, the employee who is being retrained must either (i) occupy a job for which the taxpayer is eligible to claim a credit for creating jobs, or (ii) be trained to operate machinery and equipment for which a taxpayer is eligible to claim a credit for investing in machinery and equipment. Thus, the jobs for which the credit for worker training may be claimed have already been included in a larger group of jobs that has met the wage standard. Often the specific jobs for which worker training is required are lower-paying jobs that could not themselves meet the wage standard. This change allows the credit for worker training to be taken by more taxpayers.

Third, this section makes an allowance for a taxpayer that has a taxable year other than a calendar year. To perform the wage standard test, the taxpayer compares the average weekly wage of certain jobs to the wage standard determined on an annual basis. The test is performed for the calendar year that jobs are created or for which worker training is provided. However, performing a wage

standard test based on a calendar year is not feasible because many companies have taxable years that do not coincide with the calendar year. Consequently, the taxpayer can engage in activity that qualifies for a credit during a taxable year that spans two calendar years. If the taxpayer creates jobs in different calendar years, it must compute the combined average weekly wage of the jobs created during its taxable year and compare this average to the county wage standard to determine if it qualifies for a tax credit. It cannot, however, compute this average "for the calendar year the jobs are created" as required by the prior law because the jobs are created over the course of two calendar years. Under this act, the wage standard test is based on the taxpayer's taxable year and not the calendar year. When a taxable year spans two calendar years, the applicable wage standard is that of the earlier calendar year. In addition to correcting a practical problem, this change generally will be favorable for taxpayers because county wage standards generally trend upward.

Development Zones. In 1998, the General Assembly amended the Bill Lee Act to provide additional incentives for businesses that locate or expand in development zones, which are economically distressed areas located within cities. The statutory conditions for qualifying as a development zone are designed to target only these relatively small, economically distressed areas.

A development zone is defined as an area that meets all of the following conditions: (1) it consists of one or more contiguous census tracts, block groups, or both, (2) it has a population of 1,000 or more, at least 20% of whom are below the poverty level, (3) it is located at least partly in a city with a population over 5,000, (4) every census tract and census block group in the zone is located in whole or in part within the primary corporate limits of the city, (5) every census tract and census block group in the zone has more than 10% of its population below the poverty level, or is immediately adjacent to a tract or group that has more than 20% of its population below the poverty level, and (6) none of the census tracts or census block groups is located in another development zone.

This act expands this definition of development zone to include all of a parcel of land that is located partially within the zone if all of the following conditions are met:

- At least 50% of the parcel is located within the zone.
- The parcel was in existence and under common ownership prior to the previous decennial federal census.
- The parcel is a portion of land made up of one or more tracts or tax parcels of land that is surrounded by a continuous perimeter boundary.

The following enhanced incentives apply in development zones: If a business locates in a development zone, its maximum worker training credit is $1,000 rather than $500, it receives an additional $4,000 per job on its jobs tax credit, and the credit for investing in machinery and equipment is calculated as if the zone were in a tier one county. In addition, a business located in a development zone does not have to meet a wage standard to be eligible for the credits. This section is effective for taxable years beginning on or after January 1, 2003.

Part 2. Job Development Investment Grant Program. Part 2 of this act creates a new economic development tool for new and expanding businesses in North Carolina. This tool would be used to attract businesses to the State by allowing a five-member committee to award grants to businesses. The amount of the grants would be based on income tax withholdings from new jobs created by the businesses. This part became effective October 31, 2002.

Which projects are eligible for a grant? In order to be eligible for a grant under this program, the business must create a minimum number of new jobs. The number of new jobs that must be created varies based on the enterprise tier designation of the location where the jobs will be located. For projects located in enterprise tiers one through three, the project must create at least 10 new full-time positions. For projects located in enterprise tiers four and five, the project must create at least 20 new full-time positions. If a project is located in more than one location, the enterprise tier designation of the location in the highest enterprise tier area determines the number of new jobs that must be created.

As with the Bill Lee Act, a business must provide health insurance for all full-time jobs associated with the project in order to be eligible for this new program. The test is the same as under the Bill Lee Act – the business must, for all full-time employees of the project, pay at least 50% of the premiums for health insurance that meets at least the minimum provisions of the basic health care plan of coverage recommended by the Small Employer Carrier Committee. In addition, the average wage of all jobs at the location with respect to which a grant is sought must meet the Bill Lee wage standard, as amended by this act. Finally, as with the Bill Lee Act, the business must have no citations under the Occupational Safety and Health Act that have become a final order within the previous three years for willful serious violations or for failing to abate serious violations with respect to the location for which the grant is made.

Unlike under the Bill Lee Act, there are few restrictions based on the industry in which the business is engaged. There are only two types of projects that are ineligible for consideration under this program: retail facilities and professional and semiprofessional sports teams and clubs.

More generally, the project must satisfy the following conditions in order to be eligible for a grant:

- The project will result in net new employment in the State by the business.
- The project will benefit the people of the State by increasing employment opportunities and strengthening the State's economy.
- The project is consistent with economic development goals for the State.
- A grant is needed in order to secure the project for the State.
- The total benefits of the project to the State outweigh the costs associated with the project.

How a grant is obtained? In order to obtain a grant under this program, the business must apply to the Economic Investment Committee for consideration. The Economic Investment Committee is a five-member committee consisting of the Secretary of Commerce, the Secretary of Revenue, the Director of the Office of State Budget and Management, one member appointed by the General Assembly upon the recommendation of the Speaker of the House of Representatives, and one member appointed by the General Assembly upon the recommendation of the President Pro Tempore of the Senate[52]. The members appointed by the General Assembly serve two-year terms. The Committee may act only upon a decision of at least three of its five members. The Committee is subject to the open meetings law and the public records law. Members of the Committee are forbidden to work for a business that receives a grant under this program for at least two years after the member is no longer on the Committee. A former member of the Committee who violates this prohibition against working for a business that receives a grant

[52] The members of the Committee appointed by the General Assembly may not be members of the General Assembly.

under this program must forfeit any compensation received for that work and is prohibited for an additional two years from working for a business that receives a grant under this program.

The application for a grant must be under oath, be on a form prescribed by the Committee, and contain any information required by the Committee. At a minimum, the application must contain the following information:

- The name of the business, the proposed location of the project, and the type of activity in which the business will engage at the project site.
- The names and addresses of the principals or management of the business, and the nature of the business, and the form of business organization under which the business is operated.
- The financial statements of the business prepared by a certified public accountant.
- The number of new jobs proposed to be created by the project.
- An estimate of the withholdings of personal income tax of employees of the project.
- Information concerning other possible locations of the project, and the benefits, including tax benefits or grants, associated with locating the project at that other location.
- Information concerning other State grants for which the business is applying or that it expects to receive.
- Certification that the project will provide health insurance to all full-time employees.

A group of related businesses involved in a project may submit a joint application for a grant under this program.

Any application for a grant must be accompanied by a fee in the amount of $5,000. This fee will be allocated by the Secretary of Commerce, the Secretary of Revenue, and the Director of the Office of State Budget and Management among their agencies.

The Committee will evaluate applications to determine which businesses will receive grants under this program. The awarding of a grant is solely in the discretion of the Committee. The Committee is required to develop criteria for evaluating applications. These criteria must take into consideration the economic impact of the project; the strategic importance of the project to the State, region, or locality; the quality of the jobs to be created; the quality of the industry and the project; the environmental impact of the project; and the degree to which the use of the program has been geographically dispersed throughout the State.

The Committee is required to be somewhat selective in choosing projects to receive a grant. The Committee may not enter into more than 15 agreements in any calendar year. However, there may be significantly more than 15 agreements outstanding at any time because the term of an agreement may be as long as 12 years. In addition, the Committee may not commit more than $10 million dollars annually with agreements entered into in any calendar year[53].

[53] The total annual commitment may be much more than $10 million dollars. For example, agreements entered into during each of the 2003 and 2004 calendar years could each make commitments of up to $10 million annually, for a total annual commitment of up to $20 million.

How is the amount of a grant determined? If the Committee approves a business's application, the Committee will then negotiate and enter into a community economic development agreement with the business. The agreement is a binding commitment on the part of the State to provide the grant for a set number of years, subject to the Committee's right or duty to amend or terminate the agreement under certain circumstances. Each agreement must include a description of the project, the term of the agreement, the number of positions expected to be subject to the grant and a method for determining the number of positions that are subject to the grant, and the amount of the grant as a percentage of the withholdings of personal income tax from eligible positions. The Committee has wide discretion in setting the percentage that determines the amount of a grant under an agreement. The Committee must develop criteria to be used when negotiating the appropriate percentage. At a minimum, the following conditions apply:

- The amount of the grant may not be less than ten percent (10%) or more than seventy-five percent (75%) of the withholdings associated with new jobs at the project.
- The term of the grant cannot exceed 12 years.
- The percentage used to determine the amount of the grant must be reduced by one-fourth for any eligible position located in an enterprise tier four or five area.
- Unless the Committee makes a specific determination that the grant should be calculated based on eligible positions created in additional years during the term of the agreement, the amount of the grant is calculated based only on eligible positions created during the base years (the first two years) of the agreement.
- Unless the Committee makes an explicit finding otherwise, the total amount of all grants provided by the State may not exceed seventy-five (75%) of the withholding of eligible positions.
- The amount of a grant associated with any specific position may not exceed $6,500 in a year.

In addition, the Committee must consider at least the following factors when negotiating a percentage to be used in determining the amount of a grant:

- The number of eligible positions to be created.
- The expected duration of those positions.
- The type of contribution the business can make to the long-term growth of the State's economy.
- The amount of other financial assistance the project will receive from the State or local governments.
- The total dollar investment the business is making in the project.
- Whether the project utilizes existing infrastructure.
- Whether the project is located in a development zone.
- The number of eligible positions that will be filled by residents of a development zone.
- The extent to which the project will mitigate unemployment in the State and locality.

Use of funds? There are no restrictions on the use of the grant fund by the business. South Carolina has a similar grant program. Under the South Carolina program, grant funds may be used for certain specific purposes only, such as worker training, worker relocation, purchase or construction of real property, and construction or repairs to certain transportation-related real property.

The withholdings retained by the State would be used in two different ways. First, the withholdings in excess of the percentage negotiated in the agreement would flow to the General Fund.[54] Second, the withholdings that are included in the agreement, but that are excluded from the grant because the percentage was reduced by one-fourth because the eligible position is located in an enterprise tier four or five area, would be transferred to the Utility Account of the Industrial Development Fund.[55] Funds in the Utility Account may be used to assist local governments in tiers one, two, and three in constructing or improving utility lines or equipment, including telecommunications and high-speed, broadband lines and equipment.[56]

Terms of agreement. The Committee has a great deal of flexibility in negotiating agreements. However, the legislation does require the agreements to include certain provisions, such as information on the new jobs created and a method to verify the positions, reporting requirements, and the reasons for which an agreement may be amended or terminated and the benefits recaptured. In addition, the Attorney General must review the terms of all proposed agreements and must personally sign each agreement.

Follow-up on grantee businesses. This act provides for monitoring of grantee businesses in several ways and requires the Committee to amend or terminate agreements if the business fails to live up to the terms of the agreement or the requirements of this new program.

The business must submit annual reports to the Committee. In addition, the Committee may audit at any time a business receiving a grant. At a minimum, the business must submit a copy of its federal and State income tax returns which show business and nonbusiness income, a report that shows withholdings, and a payroll report. This annual submission must also include any additional information the Committee considers necessary to implement the grant program.

This annual submission must be accompanied by a fee of $1,500. The Committee shall allocate the fee among the agencies responsible for evaluating the submission.

---

[54] Even though the maximum percentage that may be used to determine the amount of a grant is 75%, there may be no additional revenue from these positions that would flow to the General Fund. This is because most taxpayers over-withhold, meaning that more taxes are withheld than are actually due, resulting in a refund to the taxpayer. Because of this, a grant based on the maximum percentage of 75% could result in a net loss to the General Fund.

[55] The following example will clarify this. Assume a project that is located in an enterprise tier five area is allowed a grant based on 75% of the withholdings of the eligible positions. Because those positions are located in an enterprise tier five area, that percentage is reduced by one-fourth, so that the business is allowed a grant equal to 56.25% of the withholdings of eligible positions. (75% multiplied by ¾ equals 56.25%.) Twenty-five percent of the withholdings of eligible positions would flow to the General Fund, 56.25% would be given to the business in the form of a grant, and 18.75% would be transferred to the Utility Account of the Industrial Development Fund.

[56] Part 2 of this act amended the law regarding the Industrial Development Fund and the Utility Account.

The Committee must also obtain information from the Department of Revenue before the disbursement of a grant. The Department of Revenue must certify the amount of withholdings from the eligible business.

The Committee is required to amend or terminate the agreement and to recapture all or part of a grant made in previous years under certain circumstances. If the business fails to meet or comply with any term of the agreement or with criteria developed by the Committee, the Committee must amend the agreement and may terminate the agreement. This amendment may take the form of a lower percentage being used to determine the amount of the grant or of a shorter term for the agreement. The reduction must be proportional to the failure to comply with the agreement. If the business fails to meet or comply with any term of the agreement or with criteria developed by the Committee for two consecutive years, the Committee must terminate the agreement. In addition, the Committee must include a provision in each agreement describing the conditions that will lead to recapture of a grant made in an earlier year.

As with the Bill Lee Act, as amended by this act, a business that has an overdue tax debt is penalized. A business that has an overdue tax debt may not receive an annual disbursement of a grant so long as that overdue tax debt is not satisfied or otherwise resolved.

Program evaluation. The act requires the Committee to report quarterly and annually.[57] The annual report must include information on the agreements entered into during the year as well as an update on the status of projects for which an agreement was entered into in the past. Additionally, the reports must provide information on the number of jobs created and the tax benefit derived from those positions, the types of jobs created, and the geographic distribution of the grants.

The authority of the Committee to enter into additional agreements begins as of January 1, 2003, and expires as of January 1, 2005. This sunset will allow the General Assembly an opportunity to review the program after it has been in effect for a few years in order to determine if the program is meeting its objectives.

Miscellaneous changes associated with the program. Section 2.2 of this act makes two significant changes to the Industrial Development Fund and to the Utility Account, which is part of that Fund. The Industrial Development Fund provides assistance to local governments for improvements to infrastructure to enable the locality to attract new businesses. Usually, this assistance is provided to make general improvements, such as improvements to or development of industrial parks, and is not tied to luring a specific project.

First, the purposes for which funds in both the Fund and the Account may be used are expanded to allow expenditures for telecommunications and high-speed broadband lines and equipment. Currently, funds under both the Fund and the Account may be used for construction of and improvements to water, sewer, gas, and electricity lines and equipment. This change recognizes the growing importance to industry of telecommunications and high-speed broadband.

Second, under current law, funds in the Utility Account may be used to assist local governments located in enterprise tiers one and two only. This act would expand the focus of the Account to allow funds in the Account to be used to assist local governments in enterprise tier three as well.

Section 2.3 allows an exemption from the confidentiality requirements of the Department of Revenue. Generally, the Department of Revenue must keep confidential all information it receives

[57] The Committee must report by April 30th of each year.

in the course of administering the tax laws. There are numerous, specific exceptions to this requirement. This act would allow the Department of Revenue to share information with the Economic Investment Committee relating to businesses that are applying for a grant or that are subject to an agreement.

Section 2.4 of this act corrects a statutory reference in two laws dealing with the purposes for which a local government may levy a property tax.

Section 2.5 prohibits a member of the General Assembly from serving on the Economic Investment Committee. Under the constitutional doctrine of separation of powers, legislators cannot serve on executive boards exercising executive functions.

Section 2.6 of this act exempts the Economic Investment Committee from the rule-making process under the Administrative Procedure Act. However, Section 2.1, in G.S. 143B-437.48(d) as enacted by this act, requires the Committee to publish the proposed criteria on the Department of Commerce's web site at least 15 business days prior to the adoption of or an amendment to any proposed criteria. The Committee must also provide notice to persons who have requested notice of proposed criteria and it must accept oral and written comments on the proposed criteria.

Section 2.7 of this act requires the Revenue Laws Study Committee to study the use, the effectiveness, and the cost versus benefit of the Job Development Investment Grant Program, the Bill Lee Act, and the Industrial Recruitment Competitive Fund. Given that the Job Development Investment Grant Program is just starting up, the time frame for the study is longer than usual. Revenue Laws may report to the 2004 Regular Session of the General Assembly and a final report is due by March 15, 2005, to the 2005 General Assembly.

Part 3. Film Industry Incentives. Part 3 of this act amends the Film Industry Development Account to require a minimum expenditure in North Carolina before a project may be eligible for a grant from the Account. The Film Industry Development Account was established in 2000 with the intent of providing economic incentives to production companies for operations in North Carolina. Under the account, a production company is eligible for a grant based on expenditures made in the State. The grant may not exceed fifteen percent of those expenditures. The grant is not available for political or issue advertising or for any production that is considered obscene under G.S. 14-190.1. The amount of the grant may not exceed $200,000. This section adds an additional requirement that the production company have expenditures of at least $1 million in the State. This more narrowly targets this incentive to large productions.

Section 3.2 directs the Revenue Laws Study Committee to study other incentives for the film industry and to report to the 2003 General Assembly. This part became effective October 31, 2002.

Part 4. North Carolina Railroad Condemnation Authority. Part 4 of this act makes a technical correction to the condemnation authority of a railroad. In 1998, State responsibility for railroad regulation was moved from the Utilities Commission to the Department of Transportation. At that time, G.S. 62-232 was repealed. This section deletes a cross-reference to that statute. This does not appear to have any substantive effect on the power of a railroad to condemn property. This part became effective October 31, 2002.

Part 5. Industrial and Pollution Control Facilities Financing. The Department of Commerce hopes to reinstate a program begun in the late 1980's that would permit small companies to take advantage of industrial development bond financing by grouping several small loans into a single bond issue. In order to make that program workable, the process needs to be

as streamlined as much as possible. As currently written, bonds issued under Article 1 of Chapter 159D (for industrial projects) require a public hearing at the local level - that is, by the county commissioners of the county in which the facility will be located. In addition, for those bonds the federal tax exemption rules require a hearing at the state level by the agency, with the result that there would be two public hearings. Bonds issued under Article 2 of Chapter 159D (which are special purpose projects and educational facilities) require a public hearing by the North Carolina Capital Facilities Finance Agency (NCCFFA), with notice to the governing bodies of the localities in which the facilities will be located.

Part 5 of this act modifies Article 1 of Chapter 159D so that the public hearing for a bond issue dealing with multiple projects would take place at a location determined by the NCCFFA – most likely at its headquarters in Raleigh. This change simply removes the requirement of multiple public hearings throughout the State for one bond issue. The local government would still have to approve the project in its jurisdiction under a different section of the statute. This change would not affect bond issues involving a single project.

This part also makes a conforming change to Article 1 of Chapter 159D. In both Chapter 159C (relating to industrial development bonds through local authorities) and Chapter 159D, Article 2 (relating to special purpose projects and educational facilities) the Local Government Commission is permitted to take into consideration credit enhancement when determining whether a project is feasible. That language was omitted from Article 1 of Chapter 159D. There appears to be no reason to treat an industrial development project differently when it comes through a local authority rather than the NCCFFA. Part 5 of this act becomes effective January 1, 2003.

Part 6. Capital Planning Costs for Biopharmaceutical Training Center and Cancer Rehabilitation Treatment Center. Part 6 of the act authorizes the initial planning and development of two capital projects, effective October 31, 2002. It authorizes the State Board of Community Colleges, the Board of Governors of the University of North Carolina, and the North Carolina Biotechnology Center to initiate planning and development of a new biopharmaceutical/bioprocess manufacturing training center to be centrally located and of related training facilities to be located at various community colleges. The State has invested greatly through the North Carolina Biotechnology Center to bring close to 150 biotechnology companies to the State over the past 15 years. The biopharmaceutical and bioprocessing industry anticipates the need for 3,000 to 5,000 new employees each year for the foreseeable future. These workers will require training and education at a variety of levels in biotechnology, bioprocessing, and biomanufacturing. An Alliance Council, representing the universities, community colleges, and biomanufacturing companies, will develop a comprehensive training and education program capable of training 3,000 to 5,000 people for the industry annually through a combination of large-scale equipment training and academic programs at a Central Training Center and programs at the Regional Training Centers.

It also authorizes the Board of Directors of the University of North Carolina Health Care System to initiate planning and development of a new cancer rehabilitation and treatment center to be located at the University of North Carolina Hospitals at Chapel Hill. The UNC Health Care System provides services for patients with cancer in the Gravely Building, a building that opened in 1953 as a tuberculosis sanitarium. This nearly 50-year-old facility has been remodeled to its fullest extent, and can no longer meet the needs of modern-day programs and services required to treat patients with cancer. The Gravely Building is also inadequate for the support of UNC's clinical research mission for clinical trials and for testing new medications that are essential for enhancing treatment options and increasing the knowledge base for new treatment opportunities.

The UNC Health Care System proposes a replacement to the North Carolina Clinical Cancer Center to address these deficiencies and to provide a more appropriate environment for patients with cancer.

Amend Use Value Statutes and Other Tax Laws

Session Law	*Bill #*	*Sponsor*
S.L. 2002-184	**SB 1161**	**Senator Hartsell**

AN ACT TO AMEND THE PRESENT-USE VALUE STATUTES, TO CREATE A PROPERTY TAX SUBCOMMITTEE OF THE REVENUE LAWS STUDY COMMITTEE, TO CLARIFY THE SALES AND USE TAX EXEMPTION REGARDING CERTAIN AGRICULTURAL SUBSTANCES, AND TO MAKE VARIOUS ADMINISTRATIVE CHANGES IN THE TAX LAWS.

OVERVIEW: Sections 1 through 7 of this act amend the present-use value law to provide an updated method for calculating the value of farmland in its present use, to clarify the sound management requirement for qualifying for use value taxation, to allow land subject to a conservation easement to continue to qualify for use value taxation, and to make numerous clarifying and procedural changes. Most of the changes to the use value law were recommended by the Revenue Laws Study Committee.

Section 8 of the act establishes a property tax subcommittee of the Revenue Laws Study Committee.

Sections 9 through 12 of the act make changes to the administration of various sales tax laws. These changes were recommended by the Revenue Laws Study Committee.

FISCAL IMPACT: The provision related to the sales taxes on plant inhibitor equipment is likely to create a small but undefined revenue gain. The change in sales tax payment dates will result in a small revenue loss due to the loss of the float, but no exact estimate is possible. The use value changes will affect local governments, but data are not available to calculate the amount of the impact. The remaining items will all result in a slight but undefined loss or no loss to the General Fund.

EFFECTIVE DATE: The changes to the present-use value law are effective beginning with the 2003 property tax year. The remaining changes became effective in October 2002.

ANALYSIS:

Use Value Changes. This act provides for more accurate determination of the present use value of farmland. Since 1973, the General Assembly has provided that farmland (agricultural land, horticultural land, and forestland) may be appraised, assessed, and taxed at its present-use value, as opposed to its fair market value. The present-use value classification helps preserve farmland by insulating it from the rising property tax values caused by competing market pressures to develop farmland for commercial and residential purposes.

The difference between the taxes due based on the present use value and the taxes that would have been payable based on market value, together with any interest, penalties, or costs, are a lien on the property. This difference in taxes is carried forward in the records of the taxing unit as deferred taxes. The deferred taxes for the preceding three years become payable whenever the property loses its eligibility for the benefit of the special use value law.

In 1985, the General Assembly enacted the most recent methodology for calculating present-use value: The value was required to be based on capitalization of net income at the rate of 9%; for agricultural land, the net income was to be based on average corn and soybean yields. The Department of Revenue was required to prepare and distribute annually to each tax assessor a present-use value manual to assist in appraising and assessing farmland. A four-member Use-Value Advisory Board, under the supervision of the Agricultural Extension Service of North Carolina State University, would submit a recommended manual to the Department each year. The present-use value manual is advisory only, and each county remains free to develop its own present-use value schedules. Until several years ago, all counties used the manual. By 2002, an increasing number of counties were not using the manual because the present-use values in the manual could not be supported by credible market evidence. For example, corn and soybeans, which are used to determine net income for agricultural land, no longer represent the typical crops grown in the State and are not the major money crops. Using a method that did not result in realistic values was eroding the intent to foster uniformity and creating equity problems between similar types of properties.

This act updates the method of determining the present-use value of farmland in several ways. First, it changes the capitalization rate used to capitalize net income into value for agricultural and horticultural land. Instead of 9%, the rate to be used will be set by the Use-Value Advisory Board at a level between 6% and 7%. The Board will also recommend annually to the General Assembly whether this range should be changed. The capitalization rate for forestland will stay at 9%.

Second, the act changes the method the Board will use to set the net income for farmland. Instead of corn and soybean yields for agricultural land and horticultural product yields for horticultural land, the Board is required to use estimated cash rental rates for various classes of soil or for geographic areas. The Department of Revenue is given the responsibility of conducting studies of cash rents for agricultural land on a regional basis and providing this information to the Board. For forestland, the Board is required to use ranges furnished by the NC Cooperative Extension Service based on up to six classes of land within each region designated by the federal Soil Conservation Service. This requirement reflects the current practice of the Board with respect to forestland.

Third, the act caps the value the Board may establish for the best agricultural land at a maximum of $1,200 per acre. The Board will recommend annually to the General Assembly whether this maximum should be changed.

Fourth, the act adds five new members to the Use-Value Advisory Board. Under existing law, there were four members: The director of the Agricultural Extension Service at NCSU, a Department of Agriculture representative, a Forest Resources Division representative, and a representative of the Agricultural Extensions Service at N.C.A.&T. This act adds the director of the Property Tax Division of the Department of Revenue and one representative of each of the following four groups: the Farm Bureau, the Association of Assessing Officers, the Association of County Commissioners, and the Forestry Association.

To qualify for use value taxation, farmland must be in active commercial production under a sound management program, which is defined as a program of production designed to obtain the greatest net return from the land consistent with its conservation and long-term improvement. The act makes two changes relating to sound management. First, it provides that woodland that is part of agricultural or horticultural land is not required to be under a sound management program if it meets either of the following conditions:

1. It is less than 20 acres.
2. Its best use is as a barrier to wind erosion, a natural water purifier, or a buffer for hog or poultry operations.

Second, it specifies factors any one of which is sufficient to demonstrate that farmland is under a sound management program. For agricultural or horticultural land, these factors include compliance with an agency-administered management program, with a set of best management practices, or a minimum gross income test; evidence of net income from farming or that farming is the operator's principal source of income; and certification by a recognized local agency. For forestland, compliance with a written sound forest management plan for production and sale of forest products is sufficient.

In order to qualify for use value taxation, in addition to being in active production, the land must meet minimum income requirements and must satisfy certain conditions regarding ownership. This act creates an exception to these requirements and conditions for property that was being taxed at its present use value as farmland and then becomes subject to a conservation easement that dedicates it for conservation purposes in the hands of the State, a local government, or a nonprofit conservation organization.

The remaining changes the act makes relating to use value are procedural and technical.

County assessors are required to annually review 1/8 of the county's use value parcels to verify that they continue to qualify for use value taxation. This act clarifies that the 1/8 is a minimum – an assessor may review more than 1/8 in a year. This act also authorizes the assessor to request assistance in carrying out the review, clarifies the information that the assessor may require the owner to submit and the information that the assessor must consider as part of the review, and clarifies that the review is based on data for a three-year period. In addition, this act authorizes the county to assign county agencies or contract with federal agencies for any duties relating to use value accounts.

In order to qualify for use value taxation, the farmland must be owned by certain qualifying individuals, family business entities, or trusts. This act clarifies that the farmland may qualify if it is owned jointly by any of these owners as tenants in common. The act also clarifies an exception to the ownership requirements. Individual owners must live on the land or have owned the land in their family for four years. There is an exception if use value land is transferred to a person who continues to use it as farmland and meets the other conditions for use value treatment. This act clarifies that the deferred taxes that accrued while the land was owned by the first owner continue as a lien on the property in the hands of the new owner. In addition, the new owner must file an application for use value treatment within 60 days after acquiring the land, certifying that the present use will continue and that the new owner will be liable for the deferred taxes if the land is later disqualified. The act makes technical and conforming changes relating to the application for use value treatment.

To qualify for use value treatment, farmland must be part of a farm unit. This act defines the term "unit" to include one or more tracts under common ownership. If the tracts are in separate counties, they must share the same type of classification or the same equipment or labor force, and must be within 50 miles of a tract that meets the minimum size and income requirements for use value treatment.

Property Tax Subcommittee. Section 8 of the act creates a property tax subcommittee of the Revenue Laws Study Committee. The subcommittee will have six members and will study use value taxation and existing and potential tax incentives for farm use, conservation, and environmental protection of land.

Administrative Changes. The remaining sections of this act are administrative changes to the sales tax law. These changes were originally introduced in House Bill 1509 as a recommendation of the Revenue Laws Study Committee.

Section 9 of the act clarifies the sales and use tax exemption for certain agricultural substances. Included among the agricultural group of sales and use tax exemptions is an exemption for plant growth inhibitors, regulators, or stimulators when purchased for use on plants held or produced for commercial purposes. In a recent case, *American Ripener Company, Inc. v. Secretary of Revenue,*[58] the court ruled that the exemption for these substances could extend to generators used to control the release of the substance. The Department requested that the statute be clarified because the exemption was not intended to include any hardware or machinery, such as generators, used to apply the exempted substances. Section 9 clarifies that the exemption does not apply to any equipment or devices used to dispense the substances listed in the exemption.

Section 10 of this act changes the due date for quarterly sales tax returns from the 15th of a month to the end of a month. In 2001, the General Assembly lowered the threshold for monthly payments of withheld taxes from $500 to $250. Monthly withholding returns are due on the 15th of the month, the same day as monthly and quarterly sales and use tax returns. The withholding tax threshold change moved approximately 25,000 employers from a quarterly to a monthly filing status. As a result, the Department was receiving 25,000 additional returns in eight of the twelve months of the year. This act's change of the sales tax due date from the 15th to the end of the month will enable the Department to spread its work more evenly throughout the month. As of 2002, there were 91,000 quarterly sales tax filers. The change also makes the due date for quarterly sales tax returns consistent with the due date for quarterly withholding tax returns. This change went into effect October 1, 2002; it does not affect the timing of local sales and use tax distributions, nor does it shift any funds from one fiscal year to the next.

Section 11 of the act amends the method for calculating the underpayment penalty for semimonthly sales taxpayers, to conform to the requirements of the Streamlined Sales Tax Project. A taxpayer who is consistently liable for at least $10,000 a month in State and local sales and use taxes must pay the tax twice a month and file a return on a monthly basis. A payment is required for each semimonthly period. The first semimonthly payment covers the period from the first day of the month through the 15th day of the month, and the second semimonthly payment covers the period from the 16th day of the month through the last day of the month. The monthly return covers both semimonthly payment periods including any additional amount due and must be filed by the 20th day of the following month. Under prior law, a taxpayer was not subject to interest or penalties for an underpayment for a semimonthly payment period if the taxpayer timely paid at

[58] 147 N.C. App. 142 (2001), cert. denied, 355 N.C. 210 (2002)

least 95% of the amount due for that payment period and included the underpayment with the monthly return for both payment periods.

A requirement of the Streamlined Sales Tax Project, in which North Carolina has participated since 2000, is that if the State requires more than one remittance per return, the amount of the additional remittance must be determined through a calculation method rather than actual collections. Effective October 1, 2002, Section 11 brings the underpayment penalty calculation for semimonthly sales taxpayers in line with the Project by providing an additional method of calculating the estimated tax liability: neither interest nor penalties will apply to the underpayment of sales tax remitted on a semimonthly basis if the taxpayer timely pays at least 95% of the lesser of (i) the amount due for the semimonthly payment period; or (ii) the average semimonthly payment for the prior calendar year. Just as under the prior law, the taxpayer must also include the underpayment with the monthly return for those semimonthly payment periods.

Section 12 of the act codifies a longstanding practice of the Department of Revenue which requires that a purchaser of tangible personal property that is exempt from sales tax or subject to a preferential rate of sales tax must obtain an exemption certificate from the Department in order to receive the exemption or preferential rate. The Department of Revenue administers many of the sales and use tax exemptions and preferential rates targeted at certain industries, such as farming and manufacturing, through the use of an exemption certificate. Prior to this change, the statutes did not address exemption certificates, except in the penalty provisions in G.S. 105-236(5a), which authorize the Secretary to assess a penalty for the misuse of an exemption certificate. The Department recommended that the practice of using exemption certificates be incorporated into the statutes to avoid any questions about the ability of taxpayers to claim exemptions through this method.

Securities Fraud Protections & Study

Session Law	*Bill #*	*Sponsor*
S.L. 2002-189	**SB 1455**	**Senator Rand**

AN ACT TO AUTHORIZE THE GENERAL STATUTES COMMISSION AND OTHER INTERESTED PARTIES TO STUDY THE PROVISIONS OF SENATE BILL 1455, 4TH EDITION, STRENGTHEN SECURITIES FRAUD ENFORCEMENT LAWS, INTRODUCED IN THE 2001 GENERAL ASSEMBLY, AND TO MAKE RECOMMENDATIONS TO THE 2003 REGULAR SESSION OF THE 2003 GENERAL ASSEMBLY; TO INCREASE CERTAIN FILING AND RENEWAL FEES WITH THE SECRETARY OF STATE; TO FUND ADDITIONAL SECURITIES INVESTIGATOR POSITIONS; TO PROHIBIT THE STATE FROM CONTRACTING WITH BUSINESSES THAT HAVE ANY OFFICERS OR DIRECTORS WHO HAVE BEEN CONVICTED OF SECURITIES FRAUD; TO PROHIBIT THE STATE FROM CONTRACTING WITH VENDORS THAT ARE INCORPORATED IN A TAX HAVEN COUNTRY BUT THE UNITED STATES IS THE PRINCIPAL MARKET

FOR THE PUBLIC TRADING OF THEIR CORPORATION'S STOCK; AND TO AUTHORIZE THE STATE TREASURER, IN CONSULTATION WITH THE SECRETARY OF STATE, AND THE LEGISLATIVE RESEARCH COMMISSION TO STUDY THE CREATION OF A PENSION ASSURANCE FUND TO PROTECT THE RETIREMENT SAVINGS AND INVESTMENTS OF THE CITIZENS OF NORTH CAROLINA.

Section 6 of the act prohibits the Secretary of Administration from entering into a contract with a vendor or an affiliate of a vendor if the vendor or affiliate is incorporated in a tax haven country after December 31, 2001, but the United States is the principal market for the public trading of the corporation's stock. The vendor is required to certify, upon submitting a bid or contract, that it does not violate the provisions of this section. The definition of "tax haven country" is identical to the definition of the same term found in federal legislation currently before Congress that would prohibit the federal government from using defense-spending funds as payment on any new contracts with "corporate expatriates."

2001 Tax Law Changes[1]

Retirement Home Tax Change

Session Law	*Bill #*	*Sponsor*
S.L. 2001-17	**HB 193**	**Representative Jarrell**

AN ACT TO PROVIDE A PROPERTY TAX EXCLUSION FOR CERTAIN QUALIFIED RETIREMENT FACILITIES THAT PROVIDE CHARITY CARE AND/OR COMMUNITY BENEFITS.

OVERVIEW: This act provides a property tax exclusion for certain qualified retirement facilities that provide charity care and/or community benefits. The percentage of the exclusion depends upon the percentage of the facility's resident revenue that is provided in charity care, in community benefits, or in both. This act was the result of a compromise reached by representatives from the continuing care retirement communities (CCRCs), the NC Department of Revenue, the NC Association of County Commissioners, and the NC Tax Assessors and Collectors.

FISCAL IMPACT: There is no fiscal impact on the General Fund. Estimates based on the best information available suggest this act could result in a loss of county revenues of $1.7 million to $2.5 million. Fiscal Research believes the actual cost of the exemptions could be higher. As a result, the range listed is actually a minimum estimate.

EFFECTIVE DATE: Effective for taxes imposed for taxable years beginning on or after July 1, 2001. In addition, an application for the benefit provided in this act for the 2001-2002 tax year is timely if it is filed on or before September 1, 2001.

ANALYSIS: Under G.S. 105-278.6, property owned by a nonprofit home for the aged, sick, or infirm is exempt from property tax if used for a charitable purpose. A charitable purpose is defined as "one that has humane and philanthropic objectives; it is an activity that benefits humanity or a significant rather than limited segment of the community without expectation of pecuniary profit or reward." From 1999 to 2001, G.S. 105-278.6A allowed an additional property tax exclusion to certain nonprofit CCRCs that did not meet the definition of "charitable purpose", but did meet all of the following conditions:

- The facility owns the property and uses it for a retirement community that includes a skilled nursing facility or an adult care facility and also includes independent living units. The community's grounds and buildings must be at a single site.
- The facility must be nonprofit and exempt from income tax, and its assets upon dissolution must revert to a 501(c)(3) charitable organization.
- The facility must have an active fund-raising program to assist it in providing services to those who do not have the financial resources to pay fees.

---

[1]

- The governing body of the facility must be selected by a charitable nonprofit that is exempt under section 501(c)(3) of the Internal Revenue Code and is a publicly supported charity. (A publicly supported charity is not a private foundation under section 509 of the Code.)

This property tax exclusion for CCRCs expired on July 1, 2001.

This act creates a permanent, complete or partial exclusion for CCRCs that provide minimum amounts of charity care and/or community benefits. First, this act modifies the language describing the property that is eligible for the exclusion. This was done to conform this description to the language in the statutes allowing property tax exemptions for property used for religious purposes, for educational purposes, and for religious educational purposes. This provision exempts the buildings, the land they actually occupy, and additional land reasonably necessary for the convenient use of these buildings if the buildings and land meet the conditions for eligibility described below.

Second, this act adds several new definitions to the statute. The new definitions define charity care, community benefits, financial reporting period, resident revenue, and unreimbursed costs.

Third, this act amends the current definition of "retirement facility" in two ways. It deletes the condition that the facility's grounds and buildings be at a single site. This change will allow a CCRC to expand without requiring the purchase of contiguous land. In addition, it requires that the facility be licensed as a continuing care retirement community by the Department of Insurance. A licensed facility must provide a contract for continuing care that sets out provisions such as the total consideration to be paid and the services to be provided. The licensed facility must also give each prospective resident a detailed disclosure statement, and must maintain operating reserves equal to 50% of the total operating costs projected for the 12-month period following the period covered by the most recent annual statement filed with the Department of Insurance. G.S. 58-64-1 defines "continuing care" as "the furnishing to an individual other than an individual related by blood, marriage, or adoption to the person furnishing the care, of lodging together with nursing services, medical services, or other health related services, under an agreement effective for the life of the individual or for a period longer than one year."

Fourth, the act allows a total property tax exclusion for a retirement facility that satisfies each of the following conditions:

- It meets the new definition of a retirement facility.
- It meets the current conditions for a retirement facility; except that the facility's governing board does not have to be selected by a charitable nonprofit that is exempt under section 501(c)(3) of the Code.
- It either (a) serves all residents without regard to the residents' ability to pay, or (b) provides at least 5% of the facility's resident revenue for the financial reporting period in charity care to its residents, in community benefits, or in both. The financial reporting period is the calendar year or tax year ending before the date the retirement facility applies for exclusion under this section. This is the same reporting period covered in IRS Form 990. The Internal Revenue Code requires 501(c) organizations to file 990s in order to receive tax-exempt status.

Fifth, the act allows a partial property tax exclusion for a retirement facility that satisfies each of the following conditions:

- It meets the new definition of a retirement facility.
- It meets the current conditions of a retirement facility, except that the facility's governing board does not have to be selected by a charitable nonprofit that is exempt under 501(c)(3) of the Code.
- It provides at least 1% of its resident revenue for the financial reporting period in charity care to its residents, in community benefits, or in both.

The partial exclusion in based on a sliding scale. The exclusion is equal to 80% of the assessed value if the facility provides a minimum of 4% of the facility's resident revenue in charity care and community benefits. The amount of the exclusion decreases by 20 percentage points for each percentage point decrease in resident revenue used to provide charity care and community benefits. The minimum partial exclusion is 20% of the assessed value if the facility provides a minimum of 1% of the facility's resident revenue in charity care and community benefits.

Sixth, this act clarifies that the owner of the facility must file annually for the property tax exclusion as required by G.S. 105-282.1. The application must contain the facts that entitle the owner to the exclusion.

Lease-Purchase up to Three Prisons

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-84	**SB 25**	**Senator Jordan**

AN ACT TO CLARIFY THE STATE'S AUTHORITY TO LEASE-PURCHASE THREE CLOSE SECURITY CORRECTIONAL FACILITIES.

OVERVIEW: This act clarifies the procedure and financing for the State's authority to lease-purchase up to three close security correctional facilities. The initial construction loan for the prison must be obtained by the vendor on a private, taxable basis, and the State's acquisition of the constructed prisons will be financed with tax-exempt obligations. The act will save the State millions of dollars by clarifying the authorization of tax-exempt financing.

FISCAL IMPACT: The overall fiscal impact of the act is expected to be as follows:

	FY 2001-02	*FY 2002-03*	*FY 2003-04*	*FY 2004-05*	*FY 2005-06*
General Fund Revenues*	0	0	$800,000 to $2,981,250	0	0
General Fund Expenditures	0	0	$2,008,700 to $6,010,200	$6,236,980 to $18,664,538	$6,237,827 to $18,663,007

*Revenues are investment earnings from the unspent "bond" proceeds in the year of issuance. (certificates of participation). Expenditures are based on the price range of leasing one to three

prisons, and a 5.3% interest rate at the time the certificates of participation are issued (assuming a September 1, 2003 issuance date). The actual interest rate will affect fiscal impact.

EFFECTIVE DATE: This act became effective May 17, 2001.

BACKGROUND: In Section 18.20.(a) of S.L. 1999-237, the General Assembly enacted G.S. 148-37(b1) authorizing the Department of Correction to contract with private firms for the construction of prisons totaling up to 3000 cells, to be operated by the State under a lease with a schedule for purchase of the prisons over a period of up to 20 years.[2] The Department of Correction was required to consult with legislative leaders before entering into a contract. This 1999 legislation, effective July 1, intended that the State construction requirements, such as the multiple prime contractors rule, would not apply because the construction would be financed by private parties. It also intended that the State would begin leasing the prisons only after they had been completed, approved, and accepted.

The question of whether the prisons could be financed tax-exempt did not arise until after the 1999 legislation was enacted. The Department of Correction issued a request for proposals (RFP) requiring that the financing must not involve the State's credit (and thus must be taxable), consistent with an interpretation by the Attorney General's Office. After the RFP was issued, it was determined that the State could save millions of dollars if the prisons were financed on a tax-exempt basis. The Justice and Public Safety Subcommittee of the Joint Legislative Commission on Governmental Operations recommended that a new RFP be issued in accordance with proposed legislation to authorize tax-exempt financing.

ANALYSIS: This act clarifies that the initial construction loan must be obtained by the vendor on a private, taxable basis, and that the State's acquisition of the constructed prisons will be financed with tax-exempt obligations. The act provides that after the prisons are completed, approved, and accepted by the State, a nonprofit corporation controlled by the State would purchase the prisons from the vendor and lease them to the State under a lease-purchase agreement. The nonprofit corporation would finance its purchase price for the prisons by selling tax-exempt obligations known as certificates of participation (COPs). The COPs represent interests in the nonprofit corporation's rights to receive the lease payments under the lease-purchase agreement with the State. The COPs are secured by a lien on the property, not by a pledge of the State's full faith and credit. The COPs are paid from the State's lease-purchase payments over the course of 20 years.

In January 2001, the Department of Correction issued a new RFP consistent with the financing arrangement clarified in this act. The RFP anticipated that vendors would provide separate bids for one, two, or three 1000-bed facilities. The bill had to be enacted in order for the contract to be awarded. The deadline for vendors to submit proposals was April 10, 2001, and three proposals were received. The Department of Correction was required to consult with the Joint Legislative Commission on Governmental Operations before making a final award decision. The final award decision was also subject to the approval of the Council of State.[3]

---

[2] Projections of prison population by the Sentencing and Policy Advisory Commission indicate population will exceed prison bed capacity by 2002 and could exceed capacity by at least 3000 beds in 2005, without additional prison beds or changes in prison population.

[3] S.L. 2001-424 (SB 1005) and S.L. 2001-322 (SB 34) authorized the Department of Correction to contract for three prisons if approved by the Council of State. Approvals were received and construction began on two of the prisons in November 2001.

Under the plan of finance clarified in the act, there are separate contracts for construction, purchase, and lease-purchase of the prisons. The construction contract is between the vendor and the State. It requires the vendor to obtain its own construction financing, which must be derived solely from private funds. Because only private funds would be involved during the construction phase, and because the vendor is at risk for that construction financing until the completed facilities are delivered, requirements for public bidding of construction do not apply. While the facilities are being constructed, title will be in the vendor. The facilities will not be subject to local property taxes during this stage, however, because Section 15.(a) of S.L. 2001-427 enacted an exemption for correctional facilities being constructed on State land. The prisons are required to be built in accordance with plans and specifications developed by the Department of Correction, and the Department of Correction and the State Construction Office will inspect and review the facilities during construction to ensure that they are suitable for use and acquisition by the State.

The purchase agreement will be between the vendor and the State-created nonprofit corporation that will sell the tax-exempt COPs. The nonprofit corporation that sells the COPs is subject to the Public Records Act and the Open Meeting Laws. The purchase will take place only after the facilities are completed and accepted by the State. It is expected that the construction period will last two or two and one-half years. After the nonprofit corporation purchases the facilities, they remain exempt from local property taxes. The nonprofit corporation pays for the purchase with funds derived from the sale of the COPs. It is expected that the COPs will be sold close to the time of purchase, although the State may have the nonprofit corporation sell the COPs earlier if the State Treasurer determines that an earlier sale is to the advantage of the State. Even if the COPs are sold earlier, there will be no payments from the State's General Fund until after the prisons have been accepted and purchased. Because of the State's involvement, interest with respect to the COPs is tax-exempt.

The lease-purchase agreement is between the nonprofit corporation and the State. Under the agreement, which must be approved by the Council of State and the State Treasurer, the State will make lease-purchase payments to the nonprofit corporation, which will use the funds to retire the COPs. The COPs will be secured by a lien on the property and the State's failure to make payments could result in its eviction from the property. The State Treasurer determines the price to be paid for the COPs and the rate of interest to be paid on them. The State will retain the option of refinancing the debt if interest rates fall. The State also retains the option of paying off its obligations and purchasing the property before the end of the lease-purchase period. Under the lease-purchase agreement, the State will own the facilities at the end of the lease term.

Extend Tax Deadline

Session Law	*Bill #*	*Sponsor*
S.L. 2001-87	**HB 150**	**Representative Allen**

AN ACT TO WAIVE THE PENALTIES FOR FAILURE TO MEET CERTAIN TAX-RELATED DEADLINES BECAUSE OF A PRESIDENTIALLY DECLARED DISASTER.

OVERVIEW: This act waives the penalties for failure to obtain a license, failure to file a return, and failure to pay taxes when due, if these activities should be performed during the period of

time federal tax-related deadlines have been extended by the Secretary of the Treasury in an area of the State because of a Presidentially declared disaster.

FISCAL IMPACT: There is no fiscal impact because the act conforms State law to the actual administrative practice of the Department of Revenue.

EFFECTIVE DATE: The act became effective on May 17, 2001.

ANALYSIS: This act adds a new subsection to G.S. 105-249.2 that prohibits the Secretary from assessing any penalties for failure to obtain a business license, failure to file a return, or failure to pay taxes if the license, return, or taxes are due during the time federal tax-related deadlines are extended because of a Presidentially declared disaster. The taxpayer residing or having a business in the affected area is still liable for interest that accrues from the original due date until the date the tax is paid. This proposal codifies the Department of Revenue's current published penalty policy: the occurrence of a disaster is an automatic reason to waive penalties.

BACKGROUND:

Existing State Law

G.S. 105-237 authorizes the Secretary to waive or reduce any penalty. It is the policy of the Department of Revenue that the occurrence of a disaster is an automatic reason to waive penalties, but such a waiver was not previously required under North Carolina law.

In certain specific circumstances penalties must be waived. G.S. 105-249.2 provides that the Secretary of Revenue may not assess a penalty or interest against a taxpayer during any period that federal tax deadlines are postponed under the Code because of the taxpayer's service in a combat zone or the taxpayer's hospitalization because of injuries received while serving in a combat zone. The taxpayer is also granted an extension of time to file a return or take another action concerning a State tax during this period. A key distinction between this provision and the provision regarding Presidentially declared disasters is that this provision also prohibits the Secretary from assessing interest against a taxpayer[4].

In addition, G.S. 105-263 authorizes the Secretary to extend the time to file a report or return with the Secretary. An extension for filing a franchise tax return, income tax return, or gift tax return does not extend the time for paying the tax due or the time when a penalty attaches. An extension for filing a report or any other return does extend the time for paying the tax due and the time when a penalty attaches. When an extension for filing a report or return extends the time for paying the tax expected to be due, interest accrues on the tax due from the original due date of the report or return to the date the tax is paid. This provision differs from the provision regarding Presidentially declared disasters in that it does not prohibit the assessment of penalties related to filing a franchise tax return, an income tax return, or a gift tax return.

Existing Federal Law

Section 7508A of the Code authorizes the Secretary of the Treasury to prescribe regulations to postpone certain deadlines for up to 120 days[5] for a taxpayer affected by a Presidentially declared

---

[4] This distinction is also made in the corresponding provisions in the Code, Sections 7508 and 7508A.

[5] As of January 1, 2001, the reference date for the Code, deadlines could be postponed for up to 90 days, rather than 120 days, for a taxpayer affected by a Presidentially declared disaster.

disaster area.[6] A "Presidentially declared disaster area" means any disaster which, with respect to the area in which the property is located, resulted in a subsequent determination by the President that the area warrants assistance by the Federal Government under the Disaster Relief and Emergency Assistance Act. Deadlines that may be postponed are the same as ones postponed because of service in a combat zone. They include the deadlines for all of the following:

- Filing of any return of income, estate, or gift tax (except for employment or withholding taxes).
- Payment of any income, estate, or gift tax (except employment or withholding taxes).
- Filing of a Tax Court petition for redetermination of a deficiency or review of Tax Court decision.
- Allowance of a credit or refund.
- Filing of a claim for credit or refund.
- Bringing of any suit on the claim for credit or refund.
- Assessment of any tax.
- The giving or making of any notice or demand for payment of any tax or with respect to any liability to the United States in respect of any tax.
- The collection by levy or otherwise of any tax liability.
- The bringing of a suit by the U.S. with respect to any tax liability.
- Any other act required or permitted under the related regulations.

Previous disaster responses

After Hurricanes Fran and Floyd, the Department issued press releases granting an extension for tax-related deadlines. The extension allowed after Fran was in conformity with the extension granted by the IRS. However the extension allowed after Floyd was not as long as the IRS extension. After Floyd the State granted an extension to December 15, while the IRS extended the time for returns and payments and for enforcement activities to January 31. This discrepancy resulted in some taxpayers filing their State returns and making payments on the January 31 IRS extension date. These taxpayers were subject to additional interest and penalties. These penalties were waived if the taxpayer notified the Department.

Property Tax Amendments

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-139	**SB 162**	**Senator Hartsell**

[6] Postponement does not apply to the determination of interest on any overpayment or underpayment. However, §6404(h) of the Code requires the IRS to abate the assessment of interest in Presidentially declared disaster areas if the time for filing an income tax return and paying income tax is extended.

AN ACT TO AMEND VARIOUS PROPERTY TAX LAWS.

OVERVIEW: This act is a recommendation of the Revenue Laws Study Committee. It makes the following changes to the property tax laws recommended to the Committee by the Department of Revenue, the Institute of Government, and the Association of Assessing Officers:

- It clarifies the application process for property tax exemptions and exclusions.
- It gives the assessor the authority to remove a property's preferential tax classification if the taxpayer does not provide the assessor with the information requested to verify the property's qualifications for the preferential tax classification. It provides that an owner has 60 days, rather than 30 days, to respond to the assessor's request for information. It also provides that any deferred taxes that were paid as a result of a revocation of present-use value status must be refunded to the taxpayer once the taxpayer has responded to the assessor's request for information unless the information discloses that the property no longer qualifies for the classification.
- It gives all boards of equalization and review the authority to meet after its adjournment date to hear cases related to use value, exempt property, discoveries, and motor vehicle valuation.
- It clarifies the changes allowed in a non-reappraisal year.
- It shortens the waiting period for in rem foreclosures.
- It conforms the interest rate on unpaid motor vehicle taxes to the interest rate due on other unpaid property taxes.

FISCAL IMPACT: The act's fiscal impact is expected to be minimal. Most provisions will have no impact. The use value, interest rate, and preferential tax treatment removal provisions could create a small revenue gain for local governments. However, because the primary effect of these sections of the act will be to prod taxpayers to act, no noticeable revenue increase is expected. The ability to change valuations in a non-revaluation year could result in a positive or negative revenue impact, depending on the changes made to the property and its use.

EFFECTIVE DATE: The part of the act that clarifies the changes allowed in a non-appraisal year becomes effective for taxes imposed for taxable years beginning on or after July 1, 2002. The part of the act that shortens the waiting period for in rem foreclosure proceedings became effective July 1, 2001, and applies to in rem foreclosure proceedings begun on or after that date. The part of the act that conforms the interest rate on unpaid motor vehicle taxes with other unpaid property taxes became effective for taxes imposed for taxable years beginning on or after July 1, 2001. The remainder of this act became effective on May 31, 2001.

ANALYSIS: The act makes the following changes to the property tax laws:

Exemption and Exclusion Application Provisions (Section 1)

The act clarifies when an application for a property tax exemption or exclusion must be made. As a general rule, property tax exemptions and exclusions, and preferential property tax rates and values, must be applied for annually. However, some exemptions and exclusions may apply automatically, while others need to be applied for only once. The Department of Revenue, Property Tax Division, undertook a thorough examination of the exemptions and exclusions and their application process. Section 1 of this act represents its suggestion of the appropriate application time period for all of the property tax exemptions and exclusions. In most instances,

the time period remains the same. However, in the following instances, annual application classifications are moved to a single application requirement: severable development rights, real and personal property belonging to the NC Low-Level Radioactive Waste Management Authority or to the NC Hazardous Waste Management Commission, objects of art held by the NC Art Society, property of private water companies, and Brownfields property. In four instances, the application period is changed so that the preferential classification attaches automatically without the property owner needing to apply at all: poultry, livestock, and feed used in the production of poultry and livestock; vehicles subject to the gross receipts tax on short-term rentals; buildings equipped with a solar energy heating or cooling system; and real property that lies within a transportation corridor.

Clarify Changes Allowed in a Non-revaluation Year (Section 2)

Effective for taxes imposed for taxable years beginning on or after July 1, 2002, the assessor may increase or decrease a property's value during a non-revaluation year for the following additional reasons:

- A change in value resulting from a physical change to the land or to the improvements on the land, such as an addition to a structure.
- A change in value resulting from a change in the legally permitted use of the property, such as a zoning change.

Annual Review of Property with Preferential Tax Treatment (Sections 3, and 4)

Under existing law, the assessor must annually review 1/8 of the properties exempt or excluded from taxation to verify that they continue to qualify for their exemption or exclusion. Likewise, the assessor must annually review 1/8 of the properties classified for present-use value to verify that they qualify for the preferential tax value. The law requires the owner to provide the information requested by the assessor to determine the property's qualifications for the exemption or exclusion. However, the law does not penalize the taxpayer if the taxpayer fails to comply with the request. The act provides a consequence if the owner fails to give the requested information to the assessor. If the owner does not without good cause provide the information within 60 days from the date of the assessor's written request, the owner loses the preferential tax classification.

Annual Review of Transportation Maps (Section 5)

The act requires the assessor to annually review the transportation corridor official maps and amendments to them. These properties are currently taxed at 20% of the general tax rate. Under prior law, a taxpayer had to apply for this preferential tax rate. However, under the act, the preferential tax rate will attach to the property automatically (See Section 1). To ensure proper oversight of the preferential classification, the act also provides that the assessor must annually review the transportation corridor official maps.

Allow E&R Board to Meet After Adjournment to Hear Use Value, Exempt Property, Discoveries, and Motor Vehicle Cases (Sections 6 and 7)

The act provides that a county board of equalization and review may meet after its adjournment date to hear appeals relating to motor vehicle property taxes, discoveries, and property reviewed annually to determine its continued qualification for exemption or exclusion. Cabarrus, Lincoln, and Stokes Counties already have this authority under local acts.

Interest Rate on Unpaid Motor Vehicle Taxes (Section 8)

The act conforms the interest rate due on unpaid motor vehicle taxes to the interest rate due on other unpaid property taxes: 2% for the first month following the date the taxes were due and ¾% for each month thereafter. Under prior law, the amount of interest due on unpaid motor vehicle taxes was ¾% per month. This amount was not enough to encourage people to pay their tax in a timely manner.

Shorten Waiting Period of In Rem Foreclosures (Section 9)

The act shortens the waiting period of in rem foreclosures from six month to three months. Prior law allowed a property tax judgment to be executed at any time after six months and before two years from the indexing of the judgment. This change allows the judgment to be acted upon within three months of the date the judgment is indexed.

Various Motor Fuel Tax Changes

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-205	**SB 967**	**Senator Kerr**

AN ACT TO MAKE TECHNICAL AND ADMINISTRATIVE CHANGES TO THE MOTOR FUELS TAX LAW.

OVERVIEW: This act clarifies information sharing, provides a procedure for fuel tax refunds using third party credit cards, modifies refunds for kerosene used for certain non-highway purposes, and makes technical changes to the motor fuel tax laws, as requested by the Department of Revenue.

FISCAL IMPACT: No estimate available. The acceleration of kerosene tax refunds will produce a minor loss of interest revenue to the Highway Fund/Highway Trust Fund, and a corresponding minor gain of interest for the General Fund because of sales tax paid on exempt motor fuels.

EFFECTIVE DATE: This act became effective October 1, 2001, except for the section allowing the sharing of information, which became effective June 18, 2001.

ANALYSIS: First, the act makes an exception to the tax secrecy law to allow the Department of Revenue to provide identifying information about motor carriers whose licenses have been revoked. The information can be provided only to the administrator of a national criminal justice system that serves as an information clearinghouse for use only by criminal justice agencies and public safety organizations. The Department of Revenue currently participates in such a system, the State On-Line Enforcement Network (STOLEN). Sharing information about motor carriers whose licenses have been revoked will promote cooperative efforts under the International Fuel Tax Agreement (IFTA), an agreement between member taxing jurisdictions to assist each other in the collection and administration of taxes paid by interstate motor carriers on their use of motor fuel. Under the IFTA, a motor carrier declares one member jurisdiction to be the carrier's base jurisdiction for registering the carrier's vehicles for purposes of the road taxes and reporting the taxes due to all the member jurisdictions. The base jurisdiction then collects the road taxes payable by the motor carrier to every member jurisdiction and remits the taxes collected to the appropriate jurisdictions. By centralizing the payment and collection of road taxes, the IFTA greatly simplifies

the payment of road taxes by motor carriers and the collection of road taxes by the member jurisdictions.

Second, the act establishes a procedure for administering tax refunds on fuel sold to an exempt entity that uses a third-party exempt credit card to purchase the fuel, effective October 1, 2001. Under existing law, an entity whose use of motor fuel is exempt from tax may obtain a refund of the tax it pays on fuel. In the alternative, a person who sells motor fuel to an exempt entity may obtain a refund of the tax it pays on the fuel if it does not pass the tax on to the exempt entity. The prior law also specified that a supplier may issue a card or code to the exempt entity that enables the entity to purchase motor fuel at retail without paying the tax. The supplier is liable if such a card is issued to an entity whose use of fuel is not exempt. The exempt entity is liable if it uses the card to purchase fuel for a purpose other than an exempt purpose. The prior law did not cover a third situation: when a credit card company, rather than the supplier, issues the exempt card. When the exempt entity uses the exempt card to purchase motor fuel, the seller does not charge the entity for the tax but subsequently bills the credit card company for the entire sale, including the tax. The credit card company pays the seller and seeks a refund of the tax from the State. Section 3 of the act provides that the credit card company may obtain a refund of the tax in this situation. Section 4 of the act provides that the credit card company is responsible for determining that the entity to which the card is issued is exempt, and provides that the credit card company is liable if the card is issued to an entity that is not exempt. Section 5 of the act authorizes the Secretary of Revenue to require a credit card company to file a bond if the Secretary determines after an audit that a bond is necessary to assure collection of tax due pursuant to the audit.

Third, the act expands the situations in which a monthly rather than an annual refund is allowed for motor fuel tax paid on kerosene, effective October 1, 2001. Under existing law, if a person purchases tax-paid fuel and uses it for a non-highway purpose, the person can get an annual refund of the fuel tax (less the applicable sales tax). In addition, a distributor may obtain a monthly refund for fuel tax it pays on kerosene it dispenses into an end user's storage facility that contains fuel used only for heating. This monthly refund is not net of applicable sales tax, but the distributor collects and remits sales tax on the sale to the end user. The act adds two more exempt purposes to the distributor's monthly refund: drying crops and manufacturing. Heating, drying crops, and manufacturing are the same three purposes designated in the statute allowing dyed (untaxed) diesel fuel to be stored in containers installed in a manner that makes it improbable that the fuel can be used for any purpose other than those three.

Finally, Section 2 of the act corrects a cross-reference and Section 7 makes a technical change to the diesel fuel storage statute.

Special Obligation Bonds for Water/Sewer

Session Law #	Bill #	*Sponsor*
S.L. 2001-238	**SB 123**	**Senator Carpenter**

AN ACT TO AUTHORIZE LOCAL GOVERNMENTS TO ISSUE SPECIAL OBLIGATION BONDS FOR WATER AND SEWER PROJECTS.

OVERVIEW: This act expands local governments' existing authority to issue special obligation bonds for solid waste projects to include water and sewer projects.

FISCAL IMPACT: This act will have no direct impact on State or local revenues or expenditures. Once the financing option is used, the local unit will incur debt service requirements. These needs will be funded from the dedicated revenue sources.

EFFECTIVE DATE: This act became effective June 23, 2001.

ANALYSIS: In 1989, the General Assembly authorized local governments to issue special obligation bonds to finance solid waste management projects. This act expands their authority to issue special obligation bonds for the following types of water and sewer projects:

- A water supply system, as defined in G.S. 159G-3.
- A water conservation project, as defined in S.L. 1998-132.
- A water reuse project, as defined in S.L. 1998-132.
- A wastewater collection system, as defined in G.S. 159G-3.
- A wastewater treatment works, as defined in G.S. 159G-3.

A special obligation bond does not require a vote of the people because it does not pledge the taxing power or full faith and credit of the government issuing the bond. The bond is secured by a pledge of designated nontax revenues. The nontax revenues can be fees or they can be taxes that are levied by another unit of government and shared with the local government that proposes to issue the special obligation bonds. For example, a city can pledge its share of local sales and use taxes because the county levies those taxes. A county can pledge landfill fees or State-shared tax revenue, such as deed stamp tax revenue. Special obligation bonds are sometimes more appropriate than installment purchase financing for solid waste projects because lenders are reluctant to take a security interest in solid waste projects due to potential liability for environmental contamination.

Make Meals Tax Penalties Uniform

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-264	**HB 1448**	**Representative Buchanan**

AN ACT TO PROVIDE UNIFORM PENALTIES FOR LOCAL MEALS TAXES.

OVERVIEW: This act makes all local meals tax penalties uniform by applying the existing State sales and use tax penalty charges to meals taxes. This act will improve tax administration by making the tax penalties for each local meals tax uniform.

FISCAL IMPACT: Four counties and one town are currently collecting a meals tax. They are Cumberland County (S.L. 93-413), Dare County (S.L. 91-177), Mecklenburg County (S.L. 89-821 and S.L. 89-922), Wake County (S.L. 91-954 and S.L. 95-458), and the Town of Hillsborough (S.L. 93-449 and S.L. 99-304). Under prior law, Mecklenburg County collected $177,000 in penalties in the previous fiscal year. Because 98% of that revenue was from the $10 per day penalty, which is

not in the sales tax law, they could see a revenue decrease. Wake County will not be impacted as they already adhere to the sales tax law on penalties. Dare County collected $8,090.50 in meals tax penalties in FY 1997-98 and $7,060.66 in the previous year. No estimate is available on how the act will change this revenue stream. No data is available from Cumberland County or Hillsborough.

EFFECTIVE DATE: The act became effective October 1, 2001.

ANALYSIS: G.S. 105-236 sets out the penalties that apply to State taxes, including sales taxes. It provides that the penalty for failure to file is 5% of the tax due per month, up to a maximum of 25%. The penalty for failure to pay tax is 10% of the tax due. In the case of negligence, there is a 10% penalty, which increases to 25% if the amount of the deficiency is more than 25% of the tax liability.

This act extends the above uniform penalty provisions that apply to State sales and use taxes to all local meals taxes. Because local meals taxes are a type of sales tax and the retailers who collect those taxes also collect sales taxes, the tax system is much simpler if taxpayers do not have to keep up with different penalties for different taxes in different localities. The governing board of a taxing city or county is also given the same authority to waive the penalties for a local meals tax that the Secretary of Revenue has to waive the penalties for State sales and use taxes.

Correct Dry-Cleaning/White Goods Laws

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-265	**HB 1062**	**Representative Gibson**

AN ACT TO CORRECT CERTAIN ENVIRONMENTAL LAWS RELATING TO THE DRY-CLEANING SOLVENT CLEANUP ACT OF 1997 AND THE MANAGEMENT OF WHITE GOODS.

OVERVIEW: This act makes two changes to the tax laws concerning the dry-cleaning solvent tax and the white goods tax. The act moves up the effective date of a tax increase on dry-cleaning solvents from October 1, 2001, to August 1, 2001, and it restored a prohibition on the taxation of white goods by local governments that was mistakenly repealed in an earlier session.

FISCAL IMPACT: The act generates an additional $87,572 for the Dry-Cleaning Solvent Cleanup Fund. This amount represents the revenue estimated to be generated during the months of August and September 2001 by the dry-cleaning solvent tax.

EFFECTIVE DATE: July 4, 2001.

ANALYSIS: This act makes several changes to the laws regarding the management of white goods and the cleanup of properties contaminated with dry-cleaning solvent. Two of the changes are finance related.

The General Assembly enacted the Dry-Cleaning Solvent Cleanup Act of 1997 to facilitate the cleanup of contamination at dry-cleaning facilities. The 1997 Act provides that owners of dry-cleaning facilities, after satisfying applicable deductibles and co-payments, may seek reimbursement from the Dry-Cleaning Solvent Cleanup Fund (Fund) for costs associated with the cleanup of contaminated dry-cleaning sites. The Fund is funded by a tax on dry-cleaning solvent

and by an earmarking of 15% of the revenue generated from the sales tax on dry-cleaning and laundry services. In S.L. 2000-19, the General Assembly increased the tax on the solvent, effective October 1, 2001, from $5.85 to $10 per gallon of dry-cleaning solvent that is chlorine-based and from $0.80 to $1.35 per gallon of dry-cleaning solvent that is hydrocarbon-based. This act moves up the effective date of the increase in the tax rate on dry-cleaning solvent from October 1, 2001, to August 1, 2001.

The act also restores a prohibition on the taxation of white goods by local governments that was mistakenly repealed by legislation in 1998. Since no local governments have taken advantage of this oversight to create their own white goods tax, there is no fiscal impact from these sections. These sections became effective retroactively.

Electronic Listing for Property Taxes

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-279	**SB 365**	**Senator Reeves**

AN ACT TO PROVIDE FOR ELECTRONIC LISTING OF BUSINESS PERSONAL PROPERTY FOR AD VALOREM TAXES AND TO ALLOW COUNTIES TO EXTEND THE LISTING PERIOD FOR ELECTRONIC LISTING.

OVERVIEW: This act authorizes counties to allow electronic listing of business personal property and to extend from January 31 to until June 1 the deadline for listing business personal property electronically.

FISCAL IMPACT: Because the act is permissive, it is not known what impact it may have on counties.

EFFECTIVE DATE: July 13, 2001.

ANALYSIS: This act allows the board of county commissioners to adopt a resolution authorizing the electronic listing of business personal property. If the county commissioners adopt such a resolution, then the assessor must publish this information, including the timetable and procedures for electronic listing, in the notice informing taxpayers of the listing process. The act provides that the listing may be signed electronically. An abstract submitted by electronic listing would be considered filed when received in the office of the assessor.

In 2000, the General Assembly enacted Article 11A of Chapter 66 of the General Statutes, to encourage government agencies to provide electronic access to their services, and Article 11B of Chapter 66 of the General Statutes, to provide for the development of centralized Web portals to allow citizens to access State government services. In 2000, the General Assembly also enacted the Uniform Electronic Transactions Act (UETA), Article 40 of Chapter 66 of the General Statutes. In general, UETA provides a legal framework for electronic transactions and gives electronic signatures and records the same validity and enforceability as manual signatures and paper-based transactions, without changing any of the substantive rules of law that would otherwise apply. UETA applies only to transactions in which each party has agreed to conduct the transaction electronically. UETA sets forth four fundamental provisions:

- A record or signature may not be denied legal effect or enforceability solely because it is in electronic form.
- A contract may not be denied legal effect or enforceability solely because an electronic record was used in its formation.
- Any law that requires a writing will be satisfied by an electronic record.
- Any signature requirement in the law will be met if there is an electronic signature.

This act also authorizes counties to extend the listing period for business personal property listed electronically. Under existing law, a county may, for good cause, give a taxpayer an extension until April 15 to list property. An April 15 deadline is often difficult for taxpayers to meet because the general income tax deadline is also April 15. Under this act, if a county allows electronic listing of business personal property, it may extend the period for electronic listing until as late as June 1. Counties may be reluctant to extend the electronic listing deadline as late as June 1 because this deadline might prevent a county from meeting its budget-making responsibilities in a timely manner. The Local Government Budget and Fiscal Control Act require local governments to have a balanced budget. The tax rate for the upcoming fiscal year, and the appropriations, must be set in the budget ordinance. In order to determine the appropriate tax rate, the tax base must be determined. The budget ordinance must be adopted no later than July 1 and it must be presented to the board at least 10 days prior to its adoption. In fact, many local governments adopt their budget ordinances by mid-June.

Property Tax Homestead Exclusion

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-308	**HB 42**	**Representative Allred**

AN ACT TO PROVIDE PROPERTY TAX REDUCTIONS BY AUTHORIZING LOCAL GOVERNMENTS TO REDUCE PROPERTY TAXES IN LIGHT OF THE GOVERNOR'S UNANTICIPATED RELEASE OF WITHHELD REIMBURSEMENTS AND BY EXPANDING HOMESTEAD PROPERTY TAX RELIEF FOR ELDERLY AND DISABLED HOMEOWNERS.

OVERVIEW: This act amends the property tax homestead exclusion and gives local governments the authority to lower their property taxes as a result of unanticipated revenues. Sections 1 and 2 of the act amend the property tax homestead exclusion in three ways:

- It expands the homestead exclusion amount from $20,000 to the greater of $20,000 or 50% of the tax value of the property. (Recommendation of the Revenue Laws Study Committee)
- It increases the income eligibility amount from $15,000 to $18,000, and for every year thereafter, it adjusts the income amount by a percentage equal to the cost of living adjustment (COLA) percentage used to increase social security benefits for the preceding calendar year. (Recommendation of the Revenue Laws Study Committee)

- It extends the time allowed for a person to submit an application for the exclusion from April 15 until June 1.

The act does not provide for any local government reimbursement. Section 3 of the act gives local governments the authority to lower their property tax rates as a result of unexpected revenues received after July 1, 2001. This authority expires October 1, 2001.

FISCAL IMPACT: There is no fiscal impact on the General Fund. The overall estimated impact on local governments due to changes in the property tax homestead exclusion is as follows:

($ million)

FY 2002-02	*FY 2002-03*	*FY 2003-04*	*FY 2004-05*	*FY 2005-05*
0	(11.8)	(12.0)	(12.2)	(12.5)

No estimate is available for Section 3 of the act, which grants local governments the authority to reduce property tax rates until October 1, 2001.

EFFECTIVE DATE: Sections 1 and 2 of the act become effective for taxes imposed for taxable years beginning on or after July 1, 2002. Section 3 of the act became effective July 1, 2001, and expires October 1, 2001.

HOMESTEAD EXCLUSION ANALYSIS: The homestead exclusion is a partial exclusion from property taxes for the residence of a person who (1) is either age 65 or older or totally and permanently disabled and (2) has an income of not more than $15,000. The current exclusion from property taxes is $20,000. This exclusion amount was last increased in 1996, when it was increased from $15,000 to $20,000. The income eligibility amount was last increased in 1996, when it was increased from $11,000 to $15,000. The income used to determine the income eligibility amount includes moneys received from every source other than gifts or inheritances received from a spouse, lineal ancestor, or lineal descendant. For married applicants residing with their spouses, the income of both spouses is included, whether or not the property is in both names.

Prior to 1987, local governments absorbed most of the cost of the homestead exclusion. From 1987 to 1991, the State reimbursed counties and cities for 50% of their losses from the homestead exclusion. In 1991, the General Assembly froze the amount of reimbursements made to local governments to the amount each city and county was entitled to receive in 1991. That amount is approximately $7.9 million. No additional reimbursement was provided when the exclusion amount was increased in 1993. The State reimbursed counties and cities for 50% of the loss they incurred for two years when the exclusion amount and the income eligibility amount were increased in 1996.

This act changes the property tax homestead exclusion in three ways:

- increases the homestead exclusion amount for eligible property owners whose homes are appraised at a value greater than $40,000. The act provides that the homestead exclusion amount is $20,000 or 50% of the tax value of the home whichever is greater. This was a recommendation of the Revenue Laws Study Committee.
- increases the income eligibility amount from $15,000 to $18,000. For every year thereafter, it indexes the income eligibility amount of $18,000 by a percentage equal to the cost-of-living adjustment (COLA) percentage used to increase social security benefits for the preceding calendar year. The automatic COLAs for social security benefits are

announced in October of each year. The COLAs are based on increases in the Consumer Price Index for Urban Wage Earners and Clerical Workers from the third quarter of the prior year to the corresponding quarter of the current year in which the COLA is effective. The COLA for 2000 was 3.5%. The Revenue Laws Study Committee had recommended that the income eligibility amount of $15,000 be indexed by a percentage equal to COLA.

- extends the time a person has to apply for the homestead exclusion from April 15 to June 1. Under the existing law, a person must file for preferential property tax classifications during the regular listing period, which ends January 31.[7] However, an application for the homestead exclusion may be made and must be accepted at any time prior to April 15. This act extends this period until June 1.

During the 2001 Session, a total of six homestead bills were introduced.[8]

Authorization for Local Governments to Reduce Property Tax Rate: The act gives local governments the authority to lower their property tax rates as a result of unexpected revenues received after July 1, 2001.[9] This is a one-time change that expired October 1, 2001. This change was proposed after Governor Mike Easley placed the $95 million April 2001 inventory tax reimbursement in escrow because of the budget shortfall and then unexpectedly released the reimbursement to the local governments effective June 30, 2001.[10] Local governments cannot make a change in their property tax rates after July 1 without legislative authorization, because G.S. 159-13 requires that they adopt a budget ordinance no later than July 1.

Enforce Tax Compliance & Equality

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-327, as amended by S.L. 2001-427	**HB 1157**	**Representatives Hackney**

---

[7] A board of county commissioners may accept an untimely application upon a showing of good cause by the applicant. G.S. 105-307

[8] HB 11 would have raised the income eligibility amount to $25,000. HB 50 and SB 90 would have authorized a constitutional amendment to be considered by voters to give counties the option of further increasing the homestead exclusion amount and the income eligibility amount. SB 298 would have raised the income eligibility amount and the homestead exclusion amount to $25,000. HB 102, recommended by the Revenue Laws Study Committee, would have adjusted the income eligibility amount by the same percentage as the COLA percentage and the exclusion amount to $20,000 or 50% of the value of the property, whichever is greater. HB 42 initially would have increased the income eligibility amount and homestead exclusion amount to $30,000 for the first year, and then indexed these amounts for each year thereafter using the Consumer Price Index.

[9] Only one county exercised this authority. Anson County lowered its property tax rate from 90¢ to 87¢ on the $100 of appraised value of property subject to taxation.

[10] S.L. 2001-424 repeals all of the State reimbursement payments to local governments, effective beginning with the 2003-04 fiscal year. State reimbursements are amounts distributed to local units to compensate them for revenue lost as a result of the removal by the General Assembly of property from the local sales and use tax base, the local property tax base, or the intangibles tax base. State reimbursements consist of reimbursements for the repeal of the property tax on inventories and on poultry and livestock, the repeal of the intangibles tax, the "homestead exemption" from property tax, and the repeal of local sales and use taxes on food purchased with food stamps.

AN ACT TO COMBAT TAX FRAUD, ENHANCE CORPORATE COMPLIANCE WITH TAXES ON TRADEMARK INCOME, ASSURE THAT FRANCHISE TAX APPLIES EQUALLY TO CORPORATE ASSETS, AND CONFORM CORPORATE DIVIDEND TREATMENT TO THE GENERALLY ACCEPTED FORMULA USED IN OTHER STATES.

OVERVIEW: This act makes three corporate tax law changes:

- It clarifies that income from using trademarks in this State is taxable to this State and provides a reporting option for royalty payments between related parties.[11]
- It provides that franchise tax will apply equally to corporate assets held by affiliated LLCs so that a corporation cannot avoid paying franchise tax on its assets by transferring them to an affiliated LLC. It also restates the fraud penalty for willful evasion of franchise tax on these assets.[12]
- It piggybacks the federal dividends received deduction for State corporate income tax purposes.[13]

The act also requires the Department of Revenue to report to the Revenue Laws Study Committee on its implementation of this act by December 1, 2001.[14] The Department must also report on the effects of this act to the Committee by May 1, 2002, and December 1, 2002.

FISCAL IMPACT: The fiscal impact of this act is as follows:

($millions)

	FY 01-02	*FY 02-03*	*FY 03-04*	*FY 04-05*	*FY 05-06*
LLC's	$10.5	$11.0	$11.4	$11.7	$12.2
Royalty Provision	20.0	21.0	21.8	22.4	23.3
Subsidiary Dividends	30.8	32.3	33.6	34.5	35.9
Total	**$61.3**	**$64.3**	**$66.8**	**$68.6**	**$71.4**

[11] The Senate initially considered this part of the act in SB 1058, introduced by Sen. Kerr. It was a recommendation of the Governor's Loophole Study Commission and the Governor. The Senate included it as one of its revenue raising items in its budget bill, the 3rd Edition of SB 1005.

[12] The Revenue Laws Study Committee recommended legislation on this issue – SB 242 introduced by Sen. Dalton. It was also a recommendation of the Governor's Loophole Study Commission and the Governor. As a result of study and talks during the session, this act addresses the loophole differently. The Senate included this provision as one of its revenue raising items in its budget bill, the 3rd Edition of SB 1005.

[13] The Governor's Loophole Study Commission and the Governor recommended this provision to the General Assembly. The Senate included it as one of its revenue raising items in its budget bill, the 3rd Edition of SB 1005.

[14] The Revenue Laws Study Committee did not meet prior to December 1, 2001, because the 2001 Legislative Session did not end until December 6, 2001. The Department of Revenue sent a memorandum to the Committee's chairs, Sen. John Kerr and Rep. Paul Luebke, on November 30, 2001, reporting on the Department's implementation of the act.

EFFECTIVE DATE: The LLC franchise tax provision is effective for taxes due on or after January 1, 2002. The other two changes are effective for tax years beginning on or after January 1, 2001.

ANALYSIS:

Royalty Reporting Option

This part of the act enhances corporate compliance with taxes on trademark income by partially closing a loophole that allows a corporation to avoid North Carolina tax on income from using intellectual property in this State when the corporation transfers the intellectual property to a related company in another state. This provision solves the problem as it relates to trademarks and trade names, but does not address other types of intellectual property, such as patents, or other types of intangible assets. The provision is effective beginning with the 2001 taxable year.

The act creates a new statute in the Corporate Income Tax Act addressing trademark payments between related members. It states that royalties received for the use of trademarks in this State are income derived from doing business in this State and thus are subject to North Carolina income tax. Some corporations have argued that an out-of-state investment company's receipt of royalty income from the use of trademarks in this State does not subject the investment company to North Carolina income tax on the royalties. Some corporations have relied on such an argument to create an arrangement to avoid North Carolina tax on their North Carolina income.

For example, a corporation may have substantial profits from operating retail stores or manufacturing facilities in North Carolina. As part of its business, it uses trademarks on these stores or on the goods it manufactures. The operating corporation creates a subsidiary in another state and transfers its trademarks to the subsidiary. It owes the subsidiary royalties for the use of the trademarks in North Carolina. If the operating corporation is late paying these royalties, it also owes the subsidiary late fees. The operating corporation deducts against its North Carolina income the royalties and late fees it owes the subsidiary. The subsidiary likely pays little or no tax to another state on these receipts because the receipts may be exempt or apportioned away from that state. The subsidiary's receipts are paid back to the operating corporation as dividends but remain free of North Carolina tax because subsidiary dividends are deductible. As a result of this arrangement, although the operating corporation may generate substantial profits from its retail or manufacturing activities in the State, it ends up paying little or no North Carolina tax on these profits by deducting the royalties and late fees it passes through its subsidiary in another state.

This provision addresses these arrangements first by restating that a company's receipts from royalty payments for the use of trademarks in North Carolina are income from doing business in North Carolina. Then it provides adjustments to assure full and fair accountability of this income in relationship to where it is actually earned. In cases where the recipient of the North Carolina royalty income is unrelated to the payer, the recipient is required to pay tax on the income to North Carolina. In cases where the recipient and the payer are related, they have an option on how the income is reported to North Carolina. Either the payer can deduct the North Carolina royalty payments on its North Carolina return and the recipient can include them on its North Carolina return, or the payer can add them to its North Carolina income and the recipient can deduct them on its North Carolina return.[15]

[15] See *Geoffrey, Inc. v. South Carolina Tax Com'n*, 437 S.E.2d 13 SC, 1993, cert. denied by U.S. Supreme Court, 114 S.Ct. 50 (1993) The South Carolina Supreme Court held that (1) royalty income of a foreign

Equalize Franchise Tax on Corporate Affiliated LLCs

This part of the act closes a loophole that existed in the State's corporate tax laws. Prior to the enactment of this provision, a corporation could avoid paying franchise tax on its assets by transferring them to an affiliated limited liability company (LLC).[16] Under North Carolina law, LLCs are not subject to the franchise tax.[17] In 1997, the North Carolina law regarding LLCs was changed to allow for a single-member LLC. This change had the unintended consequence of opening a loophole in North Carolina tax law. It enabled a corporation subject to North Carolina franchise tax to set up an LLC and transfer assets to the LLC in a tax-free transfer.[18] The assets then held by the LLC would not be subject to the franchise tax. Thus, the corporation could avoid a significant portion of its franchise tax liability by transferring assets into a wholly owned LLC subsidiary without affecting its income tax liability.

This part of the act closes this loophole by requiring a corporation to include in its franchise tax base some or all of the assets of an LLC if (1) the corporation is a member of the LLC and (2) the corporation (and/or members of its affiliated group) is entitled to receive 70% or more of the LLC's assets upon dissolution. If the corporation is entitled to receive 100% of the LLC's assets upon dissolution, the corporation includes 100% of the LLC's assets in its franchise tax base. If the corporation is entitled to receive less than 100% of the LLC's assets, then the corporation includes in its franchise tax base only that percentage of the LLC's assets that it would be entitled to receive upon dissolution. If a corporation is required to include an LLC's assets in its franchise tax base, it is allowed to exclude its investment in the LLC from its franchise tax base. This provision is effective beginning with the 2002 tax year.

In the act, the General Assembly stated its intent to apply the franchise tax equally to assets held by corporations and assets held by corporate-affiliated limited liability companies. To this end, the act provides that a taxpayer who fraudulently underpays the franchise tax on assets it transfers to an affiliated LLC is guilty of a Class H felony, the existing law penalty for tax fraud.

Conform North Carolina's Subsidiary Dividend Deduction to the Generally Accepted Treatment Used in Other States

This part of the act repeals North Carolina's dividends received deduction and instead piggybacks the federal law. The act also equalizes the tax treatment of domestic and foreign source dividends by providing that dividends of foreign corporations may be deducted from taxable income to the extent they are included in federal taxable income.[19] Adopting the federal approach simplifies tax

---

corporation, obtained from trademark licenses issued to an affiliate, could be taxed without violating due process clause and (2) tax could be imposed without violating interstate commerce clause.

[16] A limited liability company is a business entity that is essentially a hybrid of a partnership and a corporation. Like a corporation, an LLC limits the liability of its owners. Like a partnership, an LLC is usually not subject to entity-level taxation.

[17] The State franchise tax is among the oldest taxes in North Carolina. It is a tax on S Corporations and C Corporations for the privilege of doing business in the State. The tax rate is $1.50 per $1,000 of value of the greatest of (1) apportioned net book value of the corporation; (2) 55% of appraised value of real and tangible personal property in NC; or (3) total actual investment in tangible property in NC.

[18] S.L. 2001-508 simplified this transfer by permitting the board of directors of a corporation to transfer corporate assets to a wholly owned limited liability company, limited partnership, registered limited liability partnership, or any other unincorporated entity *without the approval of the shareholders*.

[19] Under federal law, foreign dividends are generally included in income and the taxpayer is allowed a credit for foreign tax paid.

administration and compliance. To the extent North Carolina income tax law conforms to federal law, tax administration and compliance are simplified because the taxpayer is required to make fewer adjustments to taxable income in order to calculate State net income. This part of the act became effective beginning with the 2001 tax year.

Prior to this tax law change a corporation could deduct all dividends received from corporations in which it owned more than 50% of the outstanding voting stock from its State taxable income. Under the federal approach, a parent company may continue to receive a 100% deduction if it is owns 80% or more of the stock of a subsidiary. If a parent company owns more than 50% but less than 80% of a subsidiary, the amount of its deduction is reduced from 100% under prior law to 80% under this act. If a company owns 50% or less of another company, it has no dividends deduction under North Carolina law prior to this act but will get a dividend deduction of either 70% or 80% under the act. Thus some parent companies should gain under the act and some should lose. If a parent company is subject to the federal cap limiting deductible dividends to 70% or 80% of its taxable income, the limit will reduce the amount it can deduct for North Carolina purposes.

The federal deduction is a gross deduction. However, under G.S. 105-130.5(c)(3), the dividend deduction for US companies under North Carolina tax law is net of related expenses. S.L. 2001-427 amended this act to clarify that foreign source dividends must also be net of related expenses so that they would be treated the same for state income tax purposes as domestic source dividends.[20]

Modify Partnership Tax Credit

Session Law #	**Bill #**	*Sponsor*
S.L. 2001-335	**HB 146**	**Representative Luebke**

AN ACT TO MODIFY THE PASS-THROUGH DISTRIBUTION OF PARTNERSHIP INCOME TAX CREDITS.

OVERVIEW: This act corrects and clarifies the law governing allocation of partnerships' tax credits, so that any dollar amount limitation on a credit allowed to a partnership applies to the total credit. The limited amount is then allocated by the partnership among the partners on a proportional basis. The original bill was a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: There is no available data to determine the General Fund revenue gain that will result from this act.

EFFECTIVE DATE: The act became effective beginning in the 2002 tax year, except that its effect on real property donation credits is delayed until 2005.

[20] G.S. 105-130.5(c)(3) does not apply to adjustments made under G.S. 105-130.5(a) or (b). Since the deduction for foreign source dividends is contained in G.S. 105-130.5(b), the proviso in G.S. 105-130.5(c)(3) requiring that the expenses be netted does not apply. See also the summary for S.L. 2001-427, HB 232.

ANALYSIS: Generally, partnerships are treated under North Carolina law as under federal law. Both North Carolina and federal law recognize that a partnership is a separate entity. When the partnership is entitled to a tax credit, the partnership allocates the credit among its partners on a proportional basis. The partners can then claim the amount of credit allocated to them. This is done because the partnership itself is not a taxable entity. Under prior North Carolina law, a partnership that passed an income tax credit through to its partners would be subject to all limitations on the credit, except for two[21]**:**

1. The limitation that the credit may not exceed the amount of the income tax imposed on the taxpayer.
2. A cap on the otherwise allowable amount of the credit, expressed as a specific maximum dollar amount or a specific percentage of the tax imposed on the taxpayer.

Federal law does not recognize the second of these, the exemption from a specific dollar amount limitation. Additionally, North Carolina law does not recognize such an exemption for S corporations[22]. Thus, this provision of North Carolina law regarding taxation of partnerships was inconsistent with both federal law regarding taxation of partnerships and North Carolina law regarding taxation of S corporations.

This act removes the partnership's exemption from the specific dollar amount limitation. This makes North Carolina law consistent with federal law on this point as well as consistent with North Carolina law regarding S corporations. Limited liability companies are treated like partnerships under North Carolina law for income tax purposes. Thus, this change also applies to limited liability companies.

The change affects relatively few tax credits. The following tax credits have specific dollar amount limitations:

- Worker training (G. S. 105-129.11)
- Investing in central administrative office property (G. S. 105-129.12)
- Investing in business property (G. S. 105-129.16)
- Investing in renewable energy property (G. S. 105-129.16A)
- Real property donations (G. S. 105-151.12)
- Conservation tillage equipment (G. S. 105-151.13)
- Construction of a poultry composting facility (G.S. 105-151.25)

The act delays until 2005 the imposition on partnerships and limited liability companies of the dollar amount limitation on the credit allowed for real property donations. The credit for real property donations is allowed when a person makes a qualified donation of an interest in real property that is useful for public beach access, public access to public waters or trails, fish and wildlife conservation, or other similar land conservation purposes. The credit is equal to 25% of the fair market value of the donated property interest. To be eligible for the credit, the interest in property must be donated to and accepted by the State, a local government, or a body that is both organized to receive and administer lands for conservation purposes and qualified to receive

---

[21] All limitations on the tax credit also apply to each partner individually.

[22] An S corporation is a business entity that is similar in most respects to a partnership for tax purposes.

charitable contributions under the Internal Revenue Code. The credit amount may not exceed $250,000.

Streamlined Sales and Use Tax Agreement

Session Law #	**Bill #**	*Sponsor*
S.L. 2001-347, as amended by S.L. 2001-489.	**SB 144**	**Senator Kerr**

AN ACT TO ENABLE NORTH CAROLINA TO ENTER THE STREAMLINED SALES AND USE TAX AGREEMENT.

OVERVIEW: S.L. 2001-347 establishes the Uniform Sales and Use Tax Administration Act. Most of the provisions in the Act are provisions the General Assembly enacted last year.[23] The act also simplifies North Carolina's sales and use tax laws by adopting many of the uniform provisions required under the Act to be adopted before the State can participate in the Streamlined Sales and Use Tax Agreement. The purpose of this Agreement is to develop a substantially simplified sales tax system that can better accommodate interstate commerce and thereby help equalize the playing field between remote (catalog and internet) vendors and Main Street merchants. The act is a recommendation of the Revenue Laws Study Committee.

Nineteen other states and the District of Columbia enacted legislation in 2001 authorizing participation in the Streamlined Sales and Use Tax Agreement: Arkansas, Florida, Illinois, Indiana, Kentucky, Louisiana, Maryland, Michigan, Minnesota, Nebraska, Nevada, North Dakota, Oklahoma, Rhode Island, Tennessee, Texas, Utah, Wisconsin, and Wyoming.

FISCAL IMPACT: The changes are expected to create a small but unquantifiable revenue increase.

EFFECTIVE DATE: Part 1 of this act, establishing the Uniform Sales and Use Tax Administration, became effective August 8, 2001. Part 1 expires January 1, 2006, unless one of the following occurs: (i) 15 states have signed the Streamlined Sales and Use Tax Agreement, or (ii) states representing a combined resident population equal to at least ten percent (10%) of the national resident population, as determined by the 2000 federal decennial census, have signed the Agreement. Part 2 of the act, shifting mill machinery and mill machinery parts and accessories from a sales tax to a privilege tax of the same rate, becomes effective January 1, 2006. The remainder of Part 2 of this act became effective January 1, 2002.

BACKGROUND: In 2000 the Revenue Laws Study Committee recommended, and the General Assembly enacted, legislation to enable North Carolina to participate in the Streamlined Sales Tax Pilot, which is part of the Streamlined Sales Tax Project. The Project is an initiative created by state governments, with input from local governments and the private sector, to simplify and modernize sales and use tax administration for all types of commerce. The Project is focused on improving sales and use tax administration systems for both Main Street and remote sellers for all types of commerce. By July 2001, at least 32 of the 45 states that have a sales and use tax were

---

[23] S.L. 2000-120 began the first step in simplifying and streamlining the sales and use tax collection system for remote and in-state retailers. It authorized the Secretary of Revenue to enter into the Streamlined Sales Tax Agreement and made statutory changes to enable North Carolina to enter the Agreement.

participating in the project and another six states were observing. A "Participating" state is one where the Governor has signed an Executive Order or the legislature has passed legislation authorizing state personnel to participate in the discussion of the Project. "Observer" states represent those states that have expressed an interest in the Project's mission but have not received the executive or legislative authorization to become a Participating state. North Carolina is one of the most active of the participating states involved in the Project. This State, along with Kansas, Michigan, and Wisconsin, are the four states involved in the Streamlined Sales Tax Pilot.

The key features of the Streamlined Sales Tax System include:

- **Uniform definitions within tax bases. –** Legislatures still choose what is taxable and exempt but will use the common definitions.
- **Simplified exemption administration for use- and entity-based exemptions. –** Sellers are relieved of the "good faith" requirements that exist in current law and will not be liable for uncollected tax. Purchasers will be responsible for incorrect exemptions claimed.
- **Rate simplification. –** States will be responsible for the administration of all state and local taxes and the distribution of the local taxes to the local governments. State and local governments will use common tax bases and accept responsibility for notice of rate and boundary changes. States will be encouraged to simplify their own state and local tax rates.
- **Uniform sourcing rules. –** The states will have uniform sourcing rules for all property and services.
- **Uniform audit procedures. –** Sellers who participate in one of the certified Streamlined Sales Tax System technology models will either not be audited or will have a limited scope audit, depending on the technology model used.
- **Paying for the system. –** To reduce the financial burdens on sellers, states will assume the responsibility for implementing the Streamlined Sales Tax System.

The North Carolina General Assembly made several changes in the 2000 Regular Session of the 1999 General Assembly in anticipation of the Streamlined Sales Tax Project. These changes included the following: simplified exemption administration, uniform audit procedures, certification of software and tax collectors, uniform sourcing rule, limitation of local government rate changes to twice a year, and payment provisions. S.L. 2001-347 builds upon this earlier legislation. It continues to raise issues that need to be resolved if North Carolina is to enter into the Streamlined Sales Tax Agreement. As the model legislation continues to be developed, the State will need to address other issues raised by it.

ANALYSIS: **Part 1** of the act establishes the Uniform Sales and Use Tax Administration Act. It authorizes the Secretary of Revenue to enter into the Streamlined Sales and Use Tax.

Agreement. However, the Secretary may not enter into the Agreement unless the Agreement requires each state to abide by the following requirements:

- Uniform State Rate
- Consumer Privacy
- Uniform Standards
- Monetary Allowances

- Uniform Definitions
- State Compliance Certification
- Central Registration
- Local Sales and Use Tax Limitations
- No Nexus Attribution

Section 1.1 recodifies many of the provisions the General Assembly enacted last year on this issue into the a Uniform Sales and Use Tax Administration Act established in this act. Section 1.2 repeals provision that is incorporated into the Act, which is created under Section 1.3.

Part 2 of the act makes conforming changes by beginning the process of establishing uniform rates, standards, and definitions that are required to enter into the Streamlined Sales and Use Tax Agreement.

Conforming Changes: Uniform Definitions

Sections 2.1 through 2.5 add or amend the following definitions to the State's sales and use tax laws: candy, delivery charges, dietary supplements, food, food sold through a vending machine, purchase price, soft drink, prepared food, retail sale, and sales price. Sections 2.18 through 2.22 conform the definition of prepared food used in the local prepared meals tax acts with the one amended by Section 2.3. Use of the defined terms results in the following changes to the State's sales and use tax laws:

- What food is exempt from sales tax.– The act, as amended by Sections 3.(a) and 3.(b) of S.L. 2001-489, maintains the current exemption for foods that may be purchased with food stamps. The food stamp program applies to food purchased for home consumption. The act, as amended, provides that candy, prepared food, and soft drinks are taxed unless they are purchased for home consumption and would be exempt if purchased under the Federal Food Stamp Program.[24] Alcoholic beverages, dietary supplements, and food sold through a vending machine also continue to be taxed under G.S. 105-164.13B, as amended in S.L. 2001-489.[25]
- Delivery charges – Under the uniform act, all delivery charges are included in the sales price of an item and therefore subject to tax. Under prior law, delivery charges may or may not have been included as part of the sales price, depending upon where the title to the property passed to the purchaser. Under this act, all delivery charges are included in the definition of "sales price" and are subject to tax. Section 2.11 repeals the law concerning freight and delivery transportation charges.
- Installation charges – Under the uniform act, installation charges are included in the sales price. The act includes them in the definition of "sales price", but Section 2.12 maintains

[24] Section 2.13 of the act arguably broadened the sales tax exemption for prepared foods to include all take-out food items from restaurants and fast food chains and all catered food. These food items are taxable under current law. An exemption for take-out food items would have resulted in a General Fund loss of approximately $60 million a year.

[25] Section 2.2 of the act excluded alcoholic beverages from the definition of food in the uniform act. Because local meals tax laws are linked to the sales tax definitions, this language would have inadvertently exempted prepared alcoholic beverages (beer, wine, and mixed drinks) from the local meals taxes.

the current exemption by specifically providing that installation charges are exempt from sales and use tax.

- Food purchased from vending machines – Under the uniform act, food purchased from vending machines is considered food. Prior to the act, North Carolina taxed food purchased from vending machines, because it was not considered food for home consumption. However, the State's definition of sales price provided that any tangible item purchased through a vending machine, other than closed container soft drinks or tobacco products, would be taxed at 50% of its sales price. Section 2.13 of the act, as amended in Section 3.(b) of S.L. 2001-489, provides that food purchased through a vending machine is subject to tax. However, Section 2.12 maintains the 50% exemption by specifically listing it as an exemption from the sales and use tax.

- Certain deposits – Prior to the act, certain deposits on beverage containers and certain deposits on aeronautic, automotive, industrial, marine, or farm replacement parts were not subject to sales and use tax because they were not considered part of the sales price, as that term was defined. These deposits are considered part of the sales price under the uniform definition in Section 2.5. However, Section 2.12 maintains the exemption by adding these deposits to the list of items exempt from sales and use tax.

Section 2.6 conforms the definition of "use" for sales and use tax purposes to the definition used in neighboring states. The change in the definition provides that the use tax is applicable to the distribution of direct mail catalogs printed out-of-state to instate residents by a business that has nexus with the State. The definition in the act is consistent with the U.S. Supreme Court's decision in *D.H. Holmes v. McNamara,* 486 U.S. 24 (1988).

Section 2.7 recodifies some of the current definitions so that the definitions added by this act can be placed in the correct alphabetical order.

Conforming Changes: Uniform Sourcing Rules

Section 2.9 adopts the sourcing rule established in the Streamlined Sales and Use Tax Agreement. Under prior law, the sale of a product was determined by the location of the retailer's business. Under the act, the sale of a product is determined by the location where the purchaser receives the product.

- If the purchaser receives the product at a business location, then the sale is sourced to that business location.
- If the purchaser receives the product at a location specified by the purchaser and the location is not a business location of the seller, then the sale is sourced to the location where the purchaser receives the product.
- If the seller does not know the address where a product is received, then the sale is sourced to either the business or home address of the purchaser, the billing address of the purchaser, or the address of the seller.

This sourcing rule does not apply to telecommunications services.[26]

Sections 2.10, 2.15, and 2.16 provide that the uniform sourcing rule established in Section 2.9 applies to the State use tax and to the local sales and use tax acts. The rule will impact the

[26] See S.L. 2001-430, as amended by S.L. 2001-424 and S.L. 2001-487, for the tax treatment of telecommunications services.

distribution of the 1 cent[27] local sales and use tax revenue distributed on a point-of-origin basis.[28] Under prior law, G.S. 105-467 stipulated that the situs of a transaction was the retailer's place of business. Under the sourcing rule, a retailer does not need to maintain sales tax records indicating where a product is shipped. However, under the destination-sourcing rule, a retailer will have to submit sales tax reports indicating the counties where a product is shipped so that the tax revenue from that sale can be correctly distributed to that county. It is unknown what impact the uniform sourcing rule will have on the distribution of the 1 cent local sales and use tax revenue.[29]

Conforming Changes: Uniform Rate

The Uniform Sales and Use Tax Administration Act requires a state to have a limited number of sales and use tax rates. The states have until 2005 to simplify their rates. This act begins the process of simplifying North Carolina's rates by exempting mill machinery and mill machinery parts and accessories from the sales and use tax and imposing in its place a privilege tax on these items. The privilege tax rate would be the same as the current sales and use tax rate: 1% of the sales price of the machinery, part, or accessory purchases, subject to a maximum tax of $80. This change in the law means that retailers are not responsible for collecting and remitting the tax.

Section 2.8 repeals the current sales and use tax rate of 1%, $80 cap on mill machinery and mill machinery parts and accessories. Section 2.12 adds mill machinery and mill machinery parts and accessories to the list of exemptions from the sales and use tax. Section 2.17 establishes the privilege tax on mill machinery. These changes in Sections 2.8, 2.12, and 2.17, do not become effective until January 1, 2006.

Conforming Changes: Administration of Returns

The Streamlined Sales Tax Agreement provides that a taxpayer would file only one return a month. Under prior law, taxpayers who were consistently liable for at least $20,000 a month in State and local sales and use taxes were required to pay the tax and file a return twice a month. Section 2.14 provides that the taxpayer must pay the tax owed twice a month, but only needs to file the return once a month. The monthly return must cover both semimonthly payments.

DOR Debt Collection Changes

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-380	**SB 353**	**Senator Kerr**

[27] 1.5 cent for Mecklenburg County.

[28] Article 39 of Chapter 105. The two ½ cent local sales and use taxes, Articles 40 and 42 of Chapter 105, are distributed on a per capita basis.

[29] Prior to March 1, 1988, North Carolina used a destination-based sourcing rule for the situs of the 1 cent local sales and use tax. In S.L. 1987-832, the General Assembly stipulated that the situs of a sale was considered to be the retailer's place of business. This change in situs from the purchaser's county to the seller's county would have resulted in a shift of revenues by certain counties. To hold counties harmless, the General Assembly adjusted the two ½ cent taxes which are distributed on a per capita basis. Although this act returns the sourcing of a sale to the purchaser's county, it does not repeal the adjustment factors in G.S. 105-486. This correlation between the adjustment factors and the local sourcing rule was not raised in the discussion of this act.

AN ACT TO PROVIDE A PERMANENT MECHANISM FOR THE COLLECTION OF TAX DEBTS.

OVERVIEW: Since 1999, the General Assembly has authorized a pilot program for the collection of tax debts owed by nonresidents and a study of the Department of Revenue's delinquent collection practices. "Project Collect Tax", an initiative of the Department to collect at least $100 million in overdue taxes in the 2001-03 biennium, is an outgrowth of these efforts. This act enables the Department to execute its "Project Collect Tax" by making the following changes in the tax laws:[30]

- It makes permanent the Department's authority to use collection agencies to collect out-of-State tax debts.
- It authorizes the Department to use collection agencies to collect in-State tax debts for two years.
- It imposes a collection assistance fee of 20% on all tax debts that remain unpaid for 90 days after they become final.
- It allows the Department to use the receipts from the collection assistance fee to provide the resources needed for "Project Collect Tax".

FISCAL IMPACT: This act enables the Department of Revenue to launch its "Project Collect Tax" to reduce its $370 million backlog in accounts receivables. The Department plans to bring in $50 million in additional revenue in FY 2001-02 and the same amount in FY 2002-03. This additional revenue was included in the Current Operations and Capital Improvements Appropriations Act of 2001, S.L. 2001-424.

EFFECTIVE DATE: Except as noted in the analysis, the act became effective on August 20, 2001.

ANALYSIS:

Outsourcing Tax Debts

In 1999, the General Assembly provided the Department of Revenue a source of funds to contract for the collection of tax debts owed by nonresidents and foreign entities for the 1999-2000 biennium. A tax debt is the amount of tax, interest, and penalties due for which a final notice of assessment has been mailed to the taxpayer after the taxpayer no longer has the right to contest the debt. In September 2000, the Department, in conjunction with the Office of the State Auditor, began outsourcing some of its out-of-state tax debts. Between September 2000 and May 2001, it collected in excess of $12 million in out-of-state receivables using a combination of outsourcing and in-house collection techniques.

The cost of contracting for the collection of these tax debts was retained from the taxes collected. The actual cost of collection for the Department of Revenue on the outsourced tax debts was what the contractor charged the Department to collect the debt. The contractor charged a percentage of the amount collected. That percentage averaged 20% of the tax debt. As the number of tax debts outsourced to a contractor increases, the percentage amount charged to the Department to collect the debt is expected to decrease.

[30] The General Assembly also appropriated funds for 52 new positions in the Department of Revenue and 12 contract positions for Project Collect Tax.

This act substitutes a broader debt collection program for the pilot program. Under this program:

- The Department of Revenue may outsource out-of-state tax debts permanently and may outsource in-state tax debts for two years.[31]
- The cost of collecting tax debts that are at least 90 days overdue is shifted from the State's general revenues to the delinquent taxpayer, by providing that the taxpayer must pay a collection assistance fee of 20% of the overdue tax debt.[32]

The act provides permanent authority for the Department of Revenue to outsource tax debts as long as it continues its practice of notifying the taxpayer prior to submitting the debt to a collection agency. The taxpayer has 30 days after the notice is sent to pay the tax debt. If the debt remains unpaid at the end of the 30 days, then the debt may be outsourced to a collection agency. The collection agencies that contract to collect tax debts are prohibited from revealing confidential tax information. If a contractor reveals tax information, it is subject to a misdemeanor penalty, its contract is terminated, and it is barred from contracting again for five years.

The act also establishes a system under which the cost of collecting overdue tax debts is to be borne by the delinquent taxpayers, not by the taxpayers who pay their taxes on time. The act provides that a collection assistance fee is imposed if the Department gives the taxpayer 30 days' notice and the taxpayer does not pay the debt within that period. The 30-day fee notice cannot be mailed until at least 60 days after the final assessment for the tax debt, with the result that the fee applies only to tax debts that remain unpaid for 90 days or more after final assessment. The fee does not apply to a tax debt if the taxpayer entered into an installment agreement within 90 days after the final assessment and remains current with payments under the agreement. In addition, the Secretary of Revenue may waive the fee in other situations to the same extent as if the fee were a penalty.

The collection assistance fee is 20% of the overdue tax debt and is a receipt of the Department. The proceeds of the fee are credited to a special, non-reverting account to be used only for collecting overdue tax debts.[33] The Department of Revenue may apply the fee proceeds to pay contractors for collecting tax debts and to pay the fee charged by the federal government for collecting tax debts by offset. The remaining proceeds of the fee may be spent for collecting overdue tax debts only pursuant to appropriation by the General Assembly.

The Department of Revenue must report periodically on its debt collection activities to the Joint Legislative Commission on Governmental Operations and to the Revenue Laws Study Committee.[34] The reports must include a breakdown of the amount and age of tax debts collected

---

[31] Section 8 of the act provides that the authority to outsource tax debts owed by North Carolina taxpayers sunsets October 1, 2003. During this two-year period, the Department would like to outsource low priority in-state tax cases to a collection agency. The Department anticipates referring income tax assessments with a value of $25.00 to $500.00 in initial referrals.

[32] The act states the General Assembly's findings that the Department of Revenue's cost of collecting overdue tax debts equals or exceeds 20% of the tax debts and that the cost of collecting overdue tax debts is currently borne by taxpayers who pay their taxes on time. It is the General Assembly's intent that the collection assistance fee will pass that cost on to delinquent taxpayers who owe overdue tax debts.

[33] The Current Operations and Appropriations Act of 2001, S.L. 2001-424, Section 14D.1, provides that the proceeds of the fee are to be transferred to a separate Fund Code in the Department of Revenue's budget.

[34] The reports must be submitted quarterly beginning November 1, 2001, and semiannually beginning November 1, 2002.

by collection agencies on contract, tax debts collected by the Department through warning letters, and tax debts otherwise collected by Department personnel. They must also include a long-term collection plan, a timeline for implementing each step of the plan, a summary of steps taken since the last report and their results, and any other data requested.

The act makes several conforming changes:

- The State submits some tax debts for collection through the U.S. Department of the Treasury Offset Program. Under prior law, the Department of Revenue imposed a $15.00 collection assistance fee on each tax debt collected through the federal Treasury Offset Program. Because this act imposes a collection assistance fee on all overdue tax debts, the act repeals the fee that applied to debts submitted to the federal Treasury Offset Program, in order to avoid a double fee.
- It deletes a redundant provision allowing the Secretary of Revenue to contract for debt collection.
- It adds a provision to the Tax Secrecy Law allowing the Secretary of Revenue to provide the necessary information to collection agencies to allow them to identify the taxpayers and the amount of the overdue tax debts to be collected.
- It provides funds to pay debt collectors for debts outsourced in the 2000-2001 fiscal year but not collected until after July 1, 2001. The existing law provided authority to pay debt collectors for outsourced debts during the 2000-2001 fiscal year but, because of the time required to collect tax debts, some debts outsourced during the 2000-2001 fiscal year were not collected until after July 1, 2001. For these debts, this act provides that the debt collector may be paid from the proceeds collected.

Centralize and Automate Debt Collection System

In 1999, the General Assembly authorized the Department of Revenue and the Office of the State Controller to conduct a study of the Department's delinquent collection practices. The Office of the State Controller's existing contract with PricewaterhouseCoopers (PwC) was modified and PwC conducted the study. PwC recommended that the Department centralize its collection process, make technology upgrades such as telefile and predictive telephone calling, and implement an automated case management tool with debt scoring and performance measures. PwC projected that the impact of this recommendation would be an increase of delinquent tax collections by $11 million to $30 million annually. To implement this recommendation, the Department will enter into a performance-based contract where the person who provides the automated system would be paid from the proceeds of the system based upon some variable that pertains to how well the system works. Last year, the General Assembly authorized the Secretary of Revenue to use General Fund revenues collected in fiscal year 2000-2001 to obtain assistance in developing a request for proposals for the performance-based contract. However, with the fiscal crisis the State was experiencing, the Office of State Budget and Management asked the Department to delay this effort until after July 1, 2001. The act allows the Department of Revenue to spend up to $500,000 from the collection assistance fee account during the 2001-2002 fiscal year to develop and bid the contract.[35]

[35] The Current Operations and Appropriations Act of 2001, S.L. 2001-424, Section 14D.2, requires the Department of Revenue to report to the Joint Legislative Commission on Governmental Operations

Car Property Tax Credit

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-406	**HB 1431**	**Representative Hackney**

AN ACT TO PREVENT DOUBLE TAXATION OF MOTOR VEHICLES WHOSE TAX YEAR CHANGES DUE TO A CHANGE IN REGISTRATION.

OVERVIEW: This act prevents double property taxation on a motor vehicle whose tax year changes due to a change in registration.

FISCAL IMPACT: There is no General Fund impact due to this act. A few counties that did not already offer a tax release or credit in this situation may see a minimal fiscal impact.

EFFECTIVE DATE: September 14, 2001.

ANALYSIS: Under existing law, a taxpayer may receive a release or refund of property taxes paid on a motor vehicle if the taxpayer surrenders the motor vehicle's registration plates because the person has transferred the vehicle to a new owner or because the person has moved out-of-state and registered the vehicle in that state. However, before this act went into effect, the law did not address the situation when a person surrenders a motor vehicle's registration plates for other reasons and later re-registers the vehicle, occasionally resulting in double taxation. For example, a person leaves the country for an extended period of time and does not wish to keep the motor vehicle insured while away. The person can surrender the vehicle's registration plates and cancel the vehicle's insurance. The person has already paid that year's property taxes on the vehicle. Upon returning to the country, the person must register the motor vehicle again and obtain new registration plates. The registration triggers a new property tax bill and a new property tax year. If the vehicle's new registration is obtained before the vehicle's original registration would have expired, then the taxpayer is paying property taxes twice on the vehicle for those months remaining in the vehicle's original tax year.

This act allows the county tax collector to give a taxpayer a credit against the taxes owed on a motor vehicle if both of the following conditions are met:

- The tax year for the vehicle changes because of a change in the vehicle's registration year for a reason other than the transfer of its registration plates to another vehicle.
- The vehicle's new tax year begins before the expiration of the vehicle's original tax year.

The amount of the credit is equal to 1/12 of the amount of taxes paid on the vehicle for its original tax year times the number of full calendar months remaining in the original tax year as of the first day of the new tax year. The credit is given in the form of a release against the taxpayer's taxes for the new tax year. To obtain the credit, the taxpayer must apply within 30 days after the taxes for the new tax year are due and must provide the county tax collector information establishing the vehicle's original tax year, the amount of taxes paid on the vehicle for that year, and the reason for the change in registration.

---

monthly on its progress in developing the RFP. The Department must consult with the Commission before it can issue the RFP.

Mulch Blower Fuel Tax Refunds

Session Law	*Bill #*	*Sponsor*
S.L. 2001-408	**HB 170**	**Representative Walend**

AN ACT TO ALLOW A FUEL TAX REFUND FOR OFF-ROAD FUEL USE BY MULCH-BLOWING EQUIPMENT.

OVERVIEW: This act allows a commercial vehicle that delivers and spreads mulch and similar materials and that uses a power takeoff to deliver or unload the materials to receive a partial annual refund of the motor fuel taxes paid on the fuel consumed by the vehicle.

FISCAL IMPACT: With only three companies and eight trucks that qualify for this refund, the cost to the Highway Fund and Highway Trust Fund is approximately $2,000 per year. There is a $200 to $300 gain to the General Fund from sales tax.

EFFECTIVE DATE: Applies to motor fuel consumed on or after January 1, 2001.

ANALYSIS: G.S. 105-449.107(b) allows annual refunds of motor fuel and alternative fuel taxes for certain vehicles with power attachments fueled by motor fuel. This reflects the policy that the motor fuel tax is intended to apply only to fuel used for highway purposes and that the sales tax applies to fuel used for other purposes. Before this act went into effect, only the following vehicles were allowed an annual partial refund of the motor fuel and alternative fuel taxes paid on fuel consumed by the vehicles:

- A concrete mixing vehicle.
- A solid waste compacting vehicle.
- A bulk feed vehicle that delivers feed to poultry or livestock and uses a power takeoff to unload the feed.
- A vehicle that delivers lime or fertilizer in bulk to farms and uses a power takeoff to unload the lime or fertilizer.
- A tank wagon that delivers alternative fuel or motor fuel or another type of liquid fuel into storage tanks and uses a power takeoff to make the delivery.

The annual partial refund of the fuel taxes is equal to 33 1/3% of the following: (i) the flat cents-per-gallon rate in effect for the year for which a refund is claimed, plus (ii) the average of the two variable cents-per-gallon rates in effect during that year, less (iii) the amount of sales and use tax due on the fuel. This formula assumes that one-third of the fuel that is used by the vehicle is used in its mixing, compacting, or unloading operations as distinguished from propelling the vehicle on the roads.

This act allows an additional type of vehicle to qualify for the refund: a commercial vehicle that delivers and spreads mulch, soils, composts, sand, sawdust, and similar materials and uses a power takeoff to unload, blow, and spread the materials. The same formula is used to determine the amount of the refund.

Revenue Laws Technical Changes

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-414	**SB 165**	**Senator Hartsell**

ACT TO MAKE TECHNICAL AND CLARIFYING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

OVERVIEW: This act makes numerous technical and clarifying changes to the revenue laws and related statutes. The original bill was a recommendation of the Revenue Laws Study Committee.

FISCAL IMPACT: No State or local fiscal impact.

EFFECTIVE DATE: The Goodness Grows license plate change is effective retroactively to August 2, 2000. The streamlined sales tax conforming changes are effective January 1, 2002. The remainder of the act became effective September 14, 2001.

ANALYSIS: The following table provides a section-by-section summary of the act:

SECTION	G.S./S.L.	EXPLANATION
1	SL 2000-56	Corrects an incorrect section number reference in a session law.
2	GS 105-111	Repeals an obsolete statute (Duties of Secretary of Revenue relating to privilege licenses).
3-5	GS 105-113.21(a) GS 105-113.39 GS 105-113.85	Conform the discount statutes for the excise taxes on tobacco products and the excise taxes on beer and wine to a uniform rule that requires both timely filing and timely payment. Sections 3 and 4 clarify that a distributor of tobacco products must send a timely payment as well as filing a timely report to receive the 4% discount. Section 5 deletes a gender-specific phrase and clarifies that a wholesaler or importer of wine or malt beverages must send a timely payment and file a timely report to receive the 4% discount.
6	GS 105-129.3A(c)	Corrects an incorrect cross-reference.
7	GS 105-129.4(b)	Clarifies that the Bill Lee Act's wage standard test must be measured based on all full-time jobs, including those subject to seasonal layoffs.
8	GS 105-129.8(a)	Corrects an incorrect word and conforms terminology.
9	GS 105-129.13(c)	Adds missing words.
10	GS 105-129.19	Designates the Revenue Laws Study Committee rather than the Legislative Research Commission to receive a Department of Revenue report on tax credits.

SECTION	G.S./S.L.	EXPLANATION
11	GS 105-151.21(b)(1)	Conforms a cross-reference to a statute that has been recodified.
12	GS 105-163.013(g)	Designates the Revenue Laws Study Committee rather than the Legislative Services Commission to receive the Secretary of State's report on businesses that have registered as a qualified grantee business or a qualified business venture.
13	GS 105-163.41	Clarifies that corporate estimated tax payments are based on net tax due minus allowable credits.
14	G.S. 105-164.3(4)	Repeals the sales tax definition of "cost price", which is no longer needed because S.L. 2001-347 defines the term "purchase price" to replace the term "cost price". Effective January 1, 2002.
15-19	GS 105-164.6(a) GS 105-164.12B(a) GS 105-164.12B(f) GS 105-164.16(a) GS 105-164.23	Change the term "cost price" to "purchase price" to conform to the change made by S.L. 2001-347. Effective January 1, 2002.
20	GS 105-164.27A(d)	Supplies missing word.
21-22	GS 105-164.32 GS 105-187.16	Change the term "cost price" to "purchase price" to conform to the change made by S.L. 2001-347. Effective January 1, 2002.
23	GS 105-228.90	Adds reference in Chapter 105 to the timber tax levied in Chapter 113A of the General Statutes, which is collected by the Department of Revenue.
24	GS 105-249.2	Adds subheadings.
25	GS 143B-218.1	Recodifies a reporting requirement into Chapter 105 of the General Statutes.
26	GS 105-256	Adds cross-references to reporting requirements codified outside of Chapter 105 of the General Statutes.
27	GS 105-449.60(41)	Corrects misspelling.
28	GS 105-446(c)	Deletes duplicate phrase.
29-30	GS 105-467 Chapter 1096 of the 1967 Session Laws	Conforms the local sales tax definition of food with the changes made by S.L. 2001-347. Effective January 1, 2002.
31	GS 20-87(6)	Changes $3 motorcycle charge from "tax" to "fee" and provides that any revenue from the motorcycle fee, in

SECTION	G.S./S.L.	EXPLANATION
		addition to any other funds appropriated for this purpose, shall be used to implement the Motorcycle Safety Instruction Program.
32	GS 20-79.7(b)	Corrects the distribution amounts of a $25 license fee. (Fees for the "Goodness Grows" license plate were set at $25; however, the distribution amount was inadvertently set at $20.) Effective retroactively to August 2, 2000.
33	GS 69-25.4	Clarifies that a fire protection district is a unit of local government. Article V, Section 2(5) of the NC Constitution allows the General Assembly to authorize units of local governments to levy taxes on property. Article 3A of Chapter 69 of the General Statutes authorizes a fire protection district to levy property taxes, subject to a referendum; however, it does not define what a fire protection district is. Article 3A was enacted in 1951, prior to the rewrite of the Constitutional provision in 1969. This section explicitly provides that a fire protection district is a municipal corporation organized for a special purpose.
34-44	GS Ch. 96	Conforms Employment Security law's references to Internal Revenue Code, clarifies wording, and conforms structure of G.S. 96-12.01
45-46	GS Ch. 116	Clarifies internal cross-references in Chapter 116D (Higher Education Bonds).
47	GS 143B-221	Repeals a statute that no longer serves its given purpose. The statute sets out how the Department of Revenue would be initially organized. The Department is no longer organized under this statute; it is organized under the general provisions for the organization of State agencies in G.S. 143B-10.
48—50	GS Ch. 159	Clarifies that a municipality participating in a joint venture or undertaking may issue revenue bonds to finance its portion of the undertaking.
51	GS 160A-215.1(e)	Supplies a missing word.
52	S.L. 97-380	Repeals the session law that established the Forsyth-Guilford Metro. Baseball Park District and provided for a referendum on a baseball park. (The voters defeated the proposal, and the entity has no assets or liabilities.)

SECTION	G.S./S.L.	EXPLANATION
53	Effective Dates	Except as follows, the act became effective September 14, 2001: • *Section 32 (dealing with the "Goodness Grows" license plate fee distribution) is effective retroactively to August 2, 2000.* • *Sections 14 through 19, 21, 22, 29, and 30 (conforming changes necessitated by S.L. 2001-347) became effective January 1, 2002.*

Reallocate Clean Water Bond Funds

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-416	**SB 247**	**Senator Kerr**

AN ACT TO REALLOCATE THE PROCEEDS OF THE CLEAN WATER BONDS AND TO DEFER THE ISSUANCE OF THE CLEAN WATER BONDS, NATURAL GAS BONDS, AND PUBLIC SCHOOL BUILDING BONDS UNTIL AFTER JANUARY 1, 2002.

OVERVIEW: This act does two things:

- It reallocates $71.4 million of Clean Water Bonds proceeds remaining in a loan program administered by DENR to related grant programs administered by the Rural Economic Development Center and for related administrative expenses. Converting loan funds to grant funds will reduce loan repayments that would have otherwise been credited to the General Fund.
- It provides that Clean Water Bonds, Natural Gas Bonds, and Public School Building Bonds cannot be issued during the period from September 1, 2001, until January 1, 2002. Delaying the issuance of the bonds until after January 1, 2002, moves their repayment costs into the 2002-03 fiscal year. The act provides that payments to local governments or payments to match federal funds that otherwise would have been made from the proceeds of Clean Water Bonds issued during the period September 1, 2001, and January 1, 2002, may be paid from General Fund cash balances.

FISCAL IMPACT: The act does not affect the first year of the biennium. It reduces General Fund revenue by $2.5 million in fiscal year 2002-03, $5.1 million in fiscal year 2003-04, $7.6 million in fiscal year 2004-05, and $7.5 million in fiscal year 2005-06. The Department of Natural and Economic Resources and the Rural Economic Development Center administer the loans and grants affected. The enactment of this act does not affect the budget requirements of either entity.

EFFECTIVE DATE: September 22, 2001.

ANALYSIS:

Reallocation of Clean Water Bond Proceeds

S.L. 1998-132, the Clean Water Bond Act, authorized the issuance of $800 million in Clean Water Bonds. The voters approved the bonds in November 1998. Of the $800 million, $300 million was designated for loans to local governments, administered by DENR, to be used for water supply systems, water conservation projects, water reuse projects, wastewater collection systems, and wastewater treatment works. Repayments of the loans are credited to the General Fund. The remaining $500 million of Clean Water Bond proceeds was allocated for various grant programs and to match federal wastewater or water assistance funds. S.L. 1998-132 provided that the $800 in Clean Water Bonds could be reallocated by the General Assembly between the various loan and grant programs designated in the act. S.L. 2000-156 withdrew $200 million of the $300 million loan funds and reallocated the funds for four grant programs that were established in the Clean Water Bonds Act: High Unit Cost grants administered by DENR and Unsewered Community, Supplemental, and Capacity grants, administered by the Rural Economic Development Center. The 2000 legislation also adjusted the annual caps on the amount of Supplemental and Capacity grants that can be issued each year.

This act shifts the remaining, uncommitted $71.4 million of the $300 million loan funds and reallocates the funds as follows:

- $35.6 million for Unsewered Community Grants. Unsewered Community Grants are grants administered by the Rural Economic Development Center for units of local government serving small, rural communities not served by centralized sewer systems for wastewater collection and treatment. These funds are expected to be granted over four years, with two grant cycles each year.
- $35.6 million for Supplemental Grants. Supplemental Grants are grants administered by the Rural Economic Development Center to help local governments match other grant or loan funds. The act also makes a conforming change to the annual cap on these Supplemental grants, so that the additional $35.6 will be granted over four years, with two grant cycles each year.
- $200,000 for administrative expenses of the Rural Economic Development Center in making grants of bond funds. The funds are remitted to the Center as soon as possible after July 1, 2001. The act requires the Rural Center to include with its annual reports to the Joint Legislative Commission on Governmental Operations details on how these funds have been spent.

The Rural Center may change the allocation of funds between Unsewered Community grants and Supplemental grants if it determines that there has been a change in the relative needs for the two types of grants. The Rural Center must consult with the Joint Legislative Commission on Governmental Operations at least 30 days before making a reallocation. The act also requires the Rural Center to include in its annual report to the Commission a description of the criteria and point system it uses to award grants. The Rural Center must report to the Commission at least 60 days before changing the criteria or point system for awarding grants.

Defer Issuance of Certain Bonds

The act provides that no Clean Water Bonds, Natural Gas Bonds, or Public School Building Bonds may be issued before January 1, 2002. These bonds were scheduled to be issued in September 2001. The issuance of these bonds creates General Fund debt service requirements. The reallocation of some of the Clean Water Bonds from loans to grants, as authorized by this act,

increases debt service on those bonds. Delaying issuance of the bonds until January 1, 2002, or a later date moves the fiscal impact of their issuance into the 2002-2003 fiscal year.

The act provides that payments to local governments or payments to match federal funds that otherwise would have been made from the proceeds of Clean Water Bonds issued during the period between September 1, 2001, and January 1, 2002, may be paid from General Fund cash balances. The Director of the Budget may not use more than $50,000,000 in General Fund cash balances for this purpose. The General Fund must be repaid from the Clean Water Bond proceeds after the Clean Water Bonds are issued for any costs covered with General Fund cash balances.

The Appropriations Act of 2001

Session Law	*Bill #*	*Sponsor*
S.L. 2001-424, as amended by S.L. 2001-476, 2001-497, and 2001-489	**SB 1005**	**Senator Plyler**

AN ACT TO MAKE BASE BUDGET APPROPRIATIONS FOR CURRENT OPERATIONS OF STATE DEPARTMENTS, INSTITUTIONS, AND AGENCIES, AND FOR OTHER PURPOSES.

OVERVIEW, FISCAL IMPACT, AND EFFECTIVE DATES:

Section #	*Description and Effective Dates*	*Fiscal Impact*
34.13	**Increase State Sales Tax** Increases the State sales tax by ½ cent for the period October 16, 2001 to July 1, 2003.	The General Fund revenue gain is as follows: FY 2001-02 $246.3 million FY 2002-03 $398.7 million FY 2003-04 $ 27.8 million

Section #	*Description and Effective Dates*	*Fiscal Impact*
34.14	**Local Option Sales Tax** Authorizes an additional ½ cent local sales tax effective July 1, 2003. This local option tax can be enacted by a special election or by a vote of the county commissioners. Effective July, 1, 2003, provides hold harmless payments to those local governments whose gain from a half cent local sales tax increase is less than 100% of their loss from the repealed state tax reimbursements.	If all 100 counties approve the ½ sales tax, the local revenue gain is as follows: FY 2003-04 $419.8 million FY 2004-05 $441.2 million FY 2005-06 $462.8 million Hold harmless payments begin in FY 2003-04 and have the following General Fund impact: FY 2003-04 -$23.3 million FY 2004-05 -$19.1 million FY 2005-06 -$15.6 million
34.15	**Local Government Reimbursements** Effective July 1, 2003, repeals the State reimbursement to local governments for property tax losses related to the repeal of taxes on inventories and intangibles, as well as some of the tax loss associated with the homestead exclusion. Also repealed is the reimbursement for sales taxes that are no longer paid on items purchased with food stamps.	This will produce a General Fund revenue gain of $333.4 million per year beginning in FY 2003-04.
34.16	**Sales Tax Holiday** Effective January 1, 2002, creates a Sales Tax Holiday -- a temporary, three-day sales tax exemption each August for clothing, sports and recreational equipment, school supplies, computers, printers, and educational software.	The provision produces the following General Fund revenue loss: FY 2002-03 -$8.4 million FY 2003-04 -$7.7 million FY 2004-05 -$8.1 million FY 2005-06 -$8.4 million And the following local government revenue loss: FY 2002-03 -$3.7 million FY 2004-05 -$4.9 million FY 2005-06 -$5.1 million

Section #	*Description and Effective Dates*	*Fiscal Impact*
34.17	**Equalize Taxation of Satellite TV and Cable TV** Effective January 1, 2002, imposes a 5% State tax on the gross receipts derived from providing direct-to-home satellite TV service to subscribers.	The tax will generate the following General Fund revenue gain: FY 2002-03 $9.8 million FY 2003-04 $21.7 million FY 2004-05 $24.1 million FY 2005-06 $25.3 million
34.18	**New Income Tax Bracket** Effective for taxable years beginning on or after January 1, 2001, and expiring for taxable years beginning on or after January 1, 2004. Creates new 8.25% tax bracket for taxable incomes over the following amounts: $200,000 Married filing jointly $160,000 Head of household $120,000 Single $100,000 Married filing separately	The new rate is estimated to affect 9,848 single filers, 52,463 married couples, and 1,148 heads of households. The General Fund revenue gain is as follows: FY 2001-02 $125.5 million FY 2002-03 $102.9 million FY 2003-04 $61.6 million
34.19	**Eliminate Marriage Tax Penalty for Standard Deduction** Changes standard deduction for married filing jointly taxpayers from $5,000 to $5,500 in tax year 2002 and then to $6,000 in tax year 2003.	It is estimated that this change will benefit 762,340 couples in tax year 2002. The General Fund revenue loss is as follows: FY 2001-02 $9.7 million FY 2002-03 $32.0 million FY 2003-04 $45.0 million FY 2004-05 $45.8 million FY 2005-06 $46.5 million
34.20	**Increase Tax Credit for Children** Increases the tax credit for children from $60 to $75 per child in tax year 2002 and then to $100 in tax year 2003.	It is estimated that this change will benefit 18,354 single tax filers, 496,286 married couples, and 411,648 heads of households. The General Fund revenue loss is as follows: FY 2002-03 -$19.8 million FY 2003-04 -$54.8 million FY 2004-05 -$55.0 million FY 2005-06 -$55.3 million

Section #	*Description and Effective Dates*	*Fiscal Impact*
34.21	**Eliminate Children's Health Insurance Credit** Repeals the Children's Health Insurance Credit effective for tax year 2001.	In 1999, 117,972 taxpayers filed for $18.9 million in Child Health Insurance credits. $18.9 million is used as the General Fund revenue gain each year from repeal of the credit.
34.22	**Equalize Taxation of HMOs and Medical Service Companies** Taxes the gross premiums of HMOs and Medical Service Companies (Blue Cross/Blue Shield and Delta Dental) at 1.1% in 2003 and at 1% for every year thereafter, as amended by S.L. 2001-489.	The General Fund revenue gain is as follows: FY 2002-03 $28.2 million FY 2003-04 $30.6 million FY 2004-05 $33.2 million FY 2005-06 $35.9 million
34.23	**Spirituous Liquor Sales Tax and Excise Tax** Imposes a 6% State sales tax on spirituous liquor effective December 1, 2001. Reduces the excise tax on spirituous liquor sold in ABC stores from 28% to 25% effective February 1, 2002.	The tax will be collected on retail sales at 392 Alcoholic Beverage Control (ABC) Commission stores in the State. Actual liquor sales in FY 1999-00 were $367.7 million and are anticipated to increase 3.82% per year. The following General Fund revenue gain is expected: FY 2001-02 $11.9 million FY 2002-03 $24.7 million FY 2003-04 $25.6 million FY 2004-05 $26.6 million FY 2005-06 $27.6 million The General Fund revenue loss is as follows: FY 2001-02 -$3.5 million FY 2002-03 -$10.9 million FY 2003-04 -$11.4 million FY 2004-05 -$12.0 million FY 2005-06 -$12.6 million

Section #	*Description and Effective Dates*	*Fiscal Impact*
34.24	**No Tax Break for Luxury Cars** Deletes the $1,500 cap on the 3% Highway Use Tax for non-commercial vehicles effective October 1, 2001. Also exempts from the Highway Use Tax all fire trucks and rescue vehicles purchased by volunteer fire departments and rescue squads. S.L. 2001-489 provided that the repeal of the $1,500 highway use tax cap did not apply to vehicle titles issued pursuant to a sale or a contract entered into before October 1, 2001. S.L. 2001-497 restored the $1,500 highway use tax cap for recreational vehicles that do not qualify as commercial vehicles, effective retroactively as of October 1, 2001.	The net revenue gained from these changes will be transferred from the Highway Trust Fund to the General Fund in the following amounts: FY 2001-02 $1.7 million FY 2002-03 $2.4 million FY 2003-04 $2.6 million FY 2004-05 $2.7 million FY 2005-06 $2.9 million The amendments in S.L. 2001-489 and S.L. 2001-497 did not reduce the amounts transferred to the General Fund from the Highway Trust Fund. Therefore, the cost of restoring the cap on recreational vehicles will be borne by the Highway Trust Fund. The loss to the Highway Trust Fund for FY 2001-02 is expected to be $632,000 and $909,000 for FY 2002-03.
34.25	**Uniform Telecommunications Tax at 6%** Effective January 1, 2002.	See Summary of S.L. 2001-430.

ANALYSIS:

INCREASE STATE SALES TAX BY ONE-HALF CENT UNTIL JULY 1, 2003

Section 34.13 increases the State sales tax from 4% to 4.5%, effective October 16, 2001. The tax increase is repealed July 1, 2003. The State sales tax rate was last increased in 1991 from 3% to 4%.

LOCAL OPTION SALES TAX/ HOLD HARMLESS

Sec. 34.14 authorizes all counties of the State to levy a one-half cent sales tax. Like the State sales tax, this new tax would not apply to food. As with the existing statewide local options sales taxes, the county could choose to levy the tax by resolution after 10 days' public notice and a public hearing, or could choose to submit the question to the voters in a special election held after 30 days' public notice. The earliest the new tax could become effective in a county is July 1, 2003.

The net proceeds of the tax would first be allocated among the counties. One-half would be allocated on a point-of-origin basis and one-half would be allocated on a per capita basis. Each county's allocation would then be divided between the county and the municipalities in the county using the same formula by which the existing local sales taxes are divided in that county. As with

the existing local sales taxes, the State's costs of collecting and administering the new tax come from the local tax proceeds.

Sec. 34.14 also provides an annual hold-harmless distribution from the State's General Fund to counties and cities to ensure that none of them would lose money when the local government reimbursements repealed in Sec. 34.15 of the act are netted against the estimated proceeds of the sales tax if it were levied in each county as of July 1, 2003. The hold-harmless distribution provides that if a county's or city's estimated proceeds of a half-cent tax would be less than 100% of the amount it would have gotten under the repealed reimbursements, it will receive reimbursement for the difference. If a county's or city's estimated gain from the half-cent tax exceeds 100% of its repealed reimbursement amount, it does not receive a hold-harmless payment from the State. The hold-harmless payment is the same whether or not the new tax is levied in the county. The Department of Revenue will make the hold-harmless distribution annually, drawing the funds from State sales tax collections. The hold-harmless payments must be made by September 15 of each year, beginning in 2003.

LOCAL GOVERNMENT REIMBURSEMENTS

Section 34.15 repeals all of the State's reimbursement payments to local governments, effective beginning with the 2003-2004 fiscal year. State reimbursements are amounts distributed to local units to compensate them for revenue lost as a result of the removal by the General Assembly of property from the local sales and use tax base, the local property tax base, or the intangibles tax base. State reimbursements consist of reimbursements for the repeal of the property tax on inventories and on poultry and livestock, the repeal of the intangibles tax, the "homestead exclusion" from property tax, and the repeal of local sales and use taxes on food purchased with food stamps.

SALES TAX HOLIDAY

Section 34.16 provides that certain purchases made during the first weekend in August of each year are exempt from the State and local sales and use tax, beginning in August 2002.[36] The exempt purchases include the following:

- Clothing with a sales price of $100 or less per item.
- School supplies with a sales price of $100 or less per item.
- Computers, printers and printer supplies, and education computer software with a sales price of $3,500 or less per item. The term "computer" means a central processing unit and any peripherals sold with it and any computer software installed at the time of purchase.
- Sport or recreational equipment with a sales price of $50 or less per item.

Exclusions from the list of exemptions include:

- Clothing accessories or equipment. Clothing accessories are defined as "incidental items worn on the person or in conjunction with clothing including jewelry, cosmetics, eyewear, wallets, and watches.

[36] S.L. 2001-476 excluded "clothing accessories" and "protective equipment" from the Sales Tax Holiday, included "sports and recreation equipment" in the Sales Tax Holiday, incorporated definitions from the Streamlines Sales Tax Project, and made other technical and conforming changes.

- Protective equipment.
- Furniture
- Items on layaway.
- Items used in trade or business
- Rentals.

New York became the first state to enact a sales tax holiday in 1996. By 2000, Florida, Texas, Iowa, Maryland, Connecticut, Pennsylvania, and South Carolina had enacted sales tax holidays. Oklahoma enacted a sales tax holiday in 2001. The District of Columbia held two sales tax holiday in 2001; one in August and one in late November and early December. The period of time during which certain purchases are exempt from sales and use tax varies from state to state, as do the purchases that are exempt.

EQUALIZE TAXATION OF SATELLITE TV AND CABLE TV

Section 34.17 establishes a 5% State sales tax on the gross receipts derived from providing satellite TV services, effective January 1, 2002. The gross receipts are not subject to the local 2% sales tax. Currently, cable TV may be subject to a local franchise tax of up to 5%. Satellite TV is not subject to a local franchise tax. This part of the act equalizes the tax treatment between satellite TV and cable TV by providing that both are subject to a 5% tax on their gross receipts. The equalization of the taxation of cable TV and satellite TV was part of the Governor's recommended tax loophole closings.

The State's taxation of entertainment varies depending upon the type of entertainment. This section begins taxing two similar types of entertainment at the same rate. However, other forms of entertainment will continue to be taxed differently. For example, live entertainment is subject to a 3% gross receipts tax while movies are subject to a 1% gross receipts tax and video rentals are subject to a 6.5% State and local sales tax.

NEW TAX BRACKET FOR INCOME OVER $200,000

Section 34.18 adds a new tax bracket that imposes an additional ½ % income tax on certain North Carolina taxable income for three years. Under prior North Carolina law, tax was imposed at the following rates on individuals' North Carolina taxable income (NCTI):

Tax Rate	*NCTI married filing jointly*	*NCTI heads of household*	*NCTI unmarried individuals*	*NCTI married filing separately*
6.0%	Up to $21,250	Up to $17,000	Up to $12,750	Up to $10,625
7.0%	Over $21,250 and up to $100,000	Over $17,000 and up to $80,000	Over $12,750 and up to $60,000	Over $10,625 and up to $50,000
7.75%	Over $100,000	Over $80,000	Over $60,000	Over $50,000

This section creates a fourth tax bracket with a marginal tax rate of 8.25% on taxable income over $200,000 for married couples filing jointly, over $160,000 for heads of household, over $120,000 for unmarried individuals, and over $100,000 for married individuals filing separately. This change

will affect approximately 2% of North Carolina taxpayers. The new bracket will be in effect only for the 2001, 2002, and 2003 tax years.

As of the end of the 1999 tax year, 43 states imposed a tax on individual income. Up to ten states had a marginal rate of tax that equals or exceeds 8.5%.[37] None of these states are located in the Southeast. The highest marginal tax rates on individual income in the four states that border North Carolina ranged from 5.75% to 7% in 1999.

ELIMINATE THE MARRIAGE TAX PENALTY FOR THE STANDARD DEDUCTION

Section 34.19 will reduce North Carolina income taxes on married couples who claim the standard deduction by increasing the amount of the standard deduction.[38] Since 1989, the basic standard deduction for a single person in North Carolina has been $3,000 while that for a married couple filing jointly has been $5,000. Section 34.19 of this act increases the standard deduction for married couples from $5,000 to $6,000, so that it will be twice that of a single taxpayer. The increase in the deduction is phased in over the 2002 and 2003 tax years. The standard deduction for married persons filing separately is one-half that for a married couple filing jointly, so this act phases it up from $2,500 to $3,000 over the 2002 and 2003 tax years.

The so-called marriage tax penalty is the result of a tax system that recognizes that a married couple's living expenses are less than the expenses of two single people living separately but more than the expenses of one single person. In addition, if one spouse is not employed full-time, a married couple's income would be less than that of two comparable single people who work full-time, but more than that of one single person. The tax law addresses these situations through the tax brackets, the personal exemptions, and the standard deduction. The result of these tax provisions is that a married couple with only one spouse working experiences a tax reduction when they marry, a married couple where one spouse earns substantially more than the other experiences no tax reduction or increase when they marry, and a married couple with both spouses earning roughly the same amount experiences a tax increase when they marry.

INCREASE TAX CREDIT FOR CHILDREN

The 1995 General Assembly enacted a tax credit of $60 per child for taxpayers who have dependent children and have family adjusted gross income below $100,000 for a married couple and $80,000 for a head of household. Section 34.20 increases the tax credit to $75 for the 2002 tax year and $100 for the 2003 tax year.

The credit is in addition to the federal and state tax credits or exclusions for child care expenses. The credit is allowed for each dependent child for whom the eligible taxpayer could take a federal personal exemption under section 151(c)(1)(B) of the Internal Revenue Code. That Code section allows an exemption for each dependent child who either is less than 19 years old at the end of the taxable year or is a student and is less than 24 years old at the end of the taxable year. A child

---

[37] California (9.3%), the District of Columbia (9.5%), Hawaii (8.75%), Iowa (8.98%), Maine (8.5%), and Montana (11%) all had marginal rates that equaled or exceeded 8.5%. Massachusetts had three flat rates of taxation that are applied to different sources of income. One of these rates is 12%. North Dakota had a marginal rate of 12%, though most taxpayers use an alternate calculation based on federal tax liability (14% of federal tax liability). Finally, Rhode Island and Vermont had an income tax calculated as a percentage of federal tax liability (26.5% for RI and 25% for VT). In 1999, the highest federal marginal tax rate was 39.6%.

[38] Roughly 70% of North Carolina taxpayers claim the standard deduction.

is a son, stepson, daughter, or stepdaughter. A dependent child is a child over half of whose support was provided by the taxpayer.

ELIMINATE THE CHILDREN'S HEALTH INSURANCE CREDIT

In 1998, the General Assembly enacted a refundable individual income tax credit for certain taxpayers who purchase health insurance for their dependent children. The credit was equal to the amount of premiums paid, up to $300 for those taxpayers with incomes below 225% of the Federal Poverty Level and up to $100 for those taxpayers above the 225% threshold. Taxpayers who had their health insurance premiums deducted from their income before it is taxed did not qualify for the credit. Taxpayers whose adjusted gross income was higher than $100,000 (joint return) did not qualify for the credit.

Governor Hunt convened the General Assembly in an extra session beginning March 24, 1998, to address the issue of uninsured children. In 1998, there were more than 71,000 uninsured children in North Carolina whose parents made too much money to qualify for Medicaid but who could not afford to purchase health insurance for their children. Under Title XXI of the Social Security Act, North Carolina had the opportunity to receive $79.9 million in federal money in order to provide health care for children if the State established a Health Insurance Program for Children that met federal guidelines.

The 1998 legislation established a Health Insurance Program for Children. To be eligible for the program, the person must be ineligible for other government-sponsored health insurance, be under the age of 19 and enrolled in school, be uninsured for six months prior to application, be in a family that meets the income requirements, be a State resident, and pay the required premium amount. The premium amounts vary depending upon the family's income from zero to $5 per child per month with a $15 per month family unit cap to $10 per child per month with a $28 per month family unit cap. A family who loses coverage under the Program due to an increase in income may purchase extended coverage through the Program for one year by paying the full premium costs.

In addition to creating a Health Insurance Program for Children, the General Assembly enacted a tax credit for taxpayers who purchase health insurance for their children to help bridge the gap between assisted health insurance costs under the Heath Insurance Program and unassisted health insurance costs as a family begins earning too much income to qualify for the Program. The credit was not allowed for the reduced premiums paid under the Program; it was allowed for premiums paid to purchase extended coverage under the Program. Section 34.21 repeals this credit, effective for taxable years beginning on or after January 1, 2001.

EQUALIZE TAXATION OF HMOs AND MEDICAL SERVICE COMPANIES

Section 34.22 imposes a uniform gross premiums tax on Health Maintenance Organizations and on Article 65 corporations. As amended by S.L. 2001-489, the tax rate is 1.1% for taxable years beginning on or after January 1, 2003 and 1% for taxable years beginning on or after January 1, 2004.[39]

---

[39] Originally, the tax rate would have been 0.833% for the 2002 tax year and 1% for taxable years beginning on or after January 1, 2003. The General Assembly modified the tax rates at the request of the HMO and medical service corporation industry because they had already sent their customers rate notices for the 2002 tax year that did not include the 0.83% rate for the 2002 tax year.

Under current law, Article 65 corporations, such as Blue Cross/Blue Shield and Delta Dental Corporation, pay a gross premiums tax of 0.5%. HMOs do not pay a gross premiums tax; however, they are subject to the State's corporate income and franchise tax levies. Other insurance providers pay a gross premiums tax of 1.9%. Companies that pay a gross premiums tax are automatically exempt from corporate income and franchise taxes.

This section subjects all insurance carriers to the gross premiums tax in lieu of the State's corporate income and franchise taxes. All 50 states impose a gross premiums tax on insurance companies; 23 states extend the tax to HMOs. The extension of the tax base to include gross premiums on insurance contracts issued by HMOs was part of the Governor's recommended tax loophole closings.

SPIRITUOUS LIQUOR SALES TAX AND EXCISE TAX

Section 34.23 imposes a 6% sales tax on spirituous liquor, effective December 1, 2001, and reduces the excise tax on spirituous liquor from 28% to 25%, effective February 1, 2002. Under prior law, mixed beverages were subject to sales tax but spirituous liquor (liquor sold in ABC stores) was exempt. The statute levying the 28% excise tax on liquor sold in ABC stores stated that the excise tax was in lieu of sales tax.

This section repeals the sales tax exemption for spirituous liquor and provides that liquor sold in ABC stores is subject to a 6% State sales tax, effective December 1, 2001. If the liquor is sold to a mixed beverage permittee or guest room cabinet permittee for resale, the permittee may apply for a certificate of resale under existing law and not be subject to the sales tax. Mixed beverages will continue to be subject to sales tax at a combined State and local rate of 6.5%.

Spirituous liquor and mixed beverages are defined in the ABC law as follows:

- "Spirituous liquor" or "liquor" means distilled spirits or ethyl alcohol, including spirits of wine, whiskey, rum, brandy, gin and all other distilled spirits and mixtures of cordials, liqueur, and premixed cocktails, in closed containers for beverage use regardless of their dilution.
- "Mixed beverage" means either of the following:
    a. A drink composed in whole or in part of spirituous liquor and served in a quantity less than the quantity contained in a closed package.
    b. A premixed cocktail served from a closed package containing only one serving.

The 28% (reduced in this act to 25%) excise tax levied on liquor sold in ABC stores is levied on the price of liquor calculated as the sum of the following components:

- The distiller's price.
- The State ABC warehouse freight and bailment charges.
- A markup for local ABC boards.

NO TAX BREAK FOR LUXURY CARS/NO FIRE & RESCUE VEHICLE TAX

Section 34.24 deletes the $1,500 cap on the 3% highway use tax on all non-commercial vehicles except recreational vehicles.[40] It also exempts from the highway use tax fire trucks and rescue vehicles owned by volunteer fire departments and volunteer rescue squads. To qualify for the exemption, the volunteer fire department or rescue squad must not be a part of a unit of local government, must have no more than two paid employees, and must be exempt from State income tax under G.S. 105-130.11. The vehicles that may be exempt from the tax are: an emergency services vehicle, a fire truck, a pump truck, a tanker truck, a ladder truck used to suppress fire, and a four-wheel drive vehicle intended to be mounted with a water tank and hose and used for forest fire fighting. An ambulance is not a Class A or B commercial vehicle and so would be subject to the full 3% tax if it were not exempted by this section. The remaining fire and rescue vehicles would be considered Class A or Class B commercial vehicles and would be subject to the $1,000 maximum highway use tax if not exempted by this act.

These changes became effective for certificates of title issued on or after October 1, 2001.[41] The estimated net revenue gain from these two tax changes will be credited from the Highway Trust Fund to the General Fund each year on July 1. This transfer reflects the fact that before 1989, sales tax on motor vehicles was a General Fund revenue source.

The General Assembly enacted the highway use tax in 1989 as a revenue source for the Highway Trust Fund. The highway use tax is payable when a certificate of title is issued for a motor vehicle. The tax is 3% of the retail value of a motor vehicle, formerly subject to a maximum tax of $1,500 for automobiles and other vehicles that weigh no more than 26,000 pounds and a maximum tax of $1,000 for Class A or Class B commercial vehicles that weigh more than 26,000 pounds. In general, the commercial vehicles subject to the $1,000 maximum tax are truck tractors and large trucks and, to drive them, a person must have the appropriate class of commercial driver's license. The maximum tax of $1,500 on all other motor vehicles meant that a vehicle valued at an amount over $50,000 did not pay the highway use tax at a full 3% rate because the cap was reached once the vehicle's value reached $50,000. The highway use tax is in addition to the $35.00 fee that is charged for the issuance of a title and the $10.00 or $20.00 fee that is charged for the transfer or issuance of a license plate.

The highway use tax replaced the former sales tax on motor vehicles. Sales tax revenue is credited to the General Fund. Revenue from the highway use tax is credited to the Highway Trust Fund. Each year, $170 million is transferred from the Highway Trust Fund to the General Fund. This amount was chosen by the General Assembly in 1989 because it was the amount of sales tax revenue the General Fund received from the sale of motor vehicles before the repeal of the sales tax on motor vehicles.

---

[40] This act removed the $1,500 cap on all non-commercial vehicles. S.L. 2001-497 (House Bill 72) reinstated the $1,500 cap for recreational vehicles that are not subject to the $1,000 cap. A recreational vehicle is defined as "a motorized or towable vehicle that combines transportation and temporary living quarters for travel, recreation, and camping."

[41] This effective date was amended by S.L. 2001-489 (House Bill 748) so that it did not apply to certificates of title issued as a result of a purchase made before October 1, 2001, or made pursuant to a contract entered into or awarded before October 1, 2001.

PROVIDE UNIFORM TAXATION OF TELECOMMUNICATIONS AT 6%

S.L. 2001-430 established one tax at one rate for all telecommunications services. The rate set in that act is 4.5%. Section 34.25 of this act changes the rate from 4.5% to 6% effective January 1, 2002. Under prior law, local telecommunications were subject to a 3.22% gross receipts franchise tax and a 3% sales tax, intrastate long distance was subject to a 6.5% sales tax, and interstate long distance was not taxed at all. Under S.L. 2001-430, all telecommunication services are subject to a State sales tax at a uniform rate.[42]

Budget Revenue Provisions

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-427	**HB 232**	**Representative Allen**

AN ACT TO SET THE INSURANCE REGULATORY CHARGE, THE PUBLIC UTILITY REGULATORY FEE, AND THE ELECTRIC MEMBERSHIP CORPORATION REGULATORY FEE; INCREASE THE NONRESIDENT FEE FOR SEARCHING PUBLIC ARCHIVES; UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE; ACCELERATE PAYMENT OF WITHHOLDING TAXES; ACCELERATE PAYMENT OF SALES AND UTILITY TAXES; AUTHORIZE CERTAIN COUNTIES TO ACQUIRE PROPERTY FOR PUBLIC SCHOOLS; PROVIDE GENERAL ASSEMBLY OVERSIGHT OF AGENCY FEES; EXEMPT FROM FUEL TAX FUEL USED BY COMMUNITY COLLEGES; MAKE CLARIFYING CHANGES IN THE SUBSIDIARY DIVIDEND PROVISIONS; AUTHORIZE THE COMMISSIONER OF LABOR TO ESTABLISH CERTAIN FEES; MAKE TECHNICAL AND CLARIFYING CHANGES TO THE FRANCHISE TAX; ACCELERATE PAYMENT OF LOCAL SALES AND USE TAX REVENUE TO LOCAL GOVERNMENTS; AND ACCELERATE PAYMENT OF THE REVENUE GENERATED BY THE STATE EXCISE TAX ON CONVEYANCES TO THE STATE AND EXEMPT PRISONS LOCATED ON LAND OWNED BY THE STATE AND BUILT PURSUANT TO A CONTRACT WITH THE STATE FROM PROPERTY TAX.

OVERVIEW: This act contains the following fee and budget-related items:

- Sets the insurance regulatory charge at 6.5% for the 2001 calendar year.

[42] For further discussion of changes to taxation of telecommunications, see the summary of S.L. 2001-430 – Simplify Taxes on Telecommunications.

- Sets the utilities regulatory fee at 0.1% for the 2001-2002 tax year and the public utility regulatory fee imposed on electric membership corporations at $200,000.
- Increases the nonresident search fee from $10 to $25.
- Updates the reference to the Internal Revenue Code from January 1, 2000, to January 1, 2001.
- Accelerates the payment of withholding taxes.
- Accelerates the payment of sales and utility taxes.
- Authorizes Bertie, Chatham, Clay, Rutherford, Transylvania, and Yadkin Counties to use certificates of participation to acquire property for public schools.
- Provides that agencies may not establish or increase a fee without consulting with the Joint Legislative Commission on Governmental Operations.
- Exempts community colleges from paying the motor fuels tax.
- Clarifies that foreign source dividends are treated the same for State income tax purposes as domestic source dividends.
- Authorizes the Commissioner of Labor to establish elevator and amusement device inspection fees.
- Makes a technical and clarifying change to the franchise tax statute.
- Accelerates distribution of local sales and use tax revenue to local governments.
- Accelerates payment of the revenue generated by the State excise tax on conveyances to the State.
- Exempts prisons located on land owned by the State and built pursuant to a contract with the State from property tax.

ANALYSIS, EFFECTIVE DATE, AND FISCAL IMPACT: The following is a section-by-section summary of the act, setting out the analysis, effective date, and fiscal impact of each section:

Insurance Regulatory Charge (Section 1)

This section reduces the insurance regulatory charge from 7% to 6.5% for the 2001 calendar year. This fee is assessed on the premiums tax paid by insurers. The charge is expected to generate $23.82 million for the 2001-2002 fiscal year. This Section became effective September 28, 2001.

Regulatory Fee for Utilities Commission (Section 2(a))

This section sets the tax rate for the public utility regulatory fee for the 2001-2002 tax year at 0.1%. This rate must be set by the General Assembly each year. This rate is slightly higher than the 0.09% rate in effect 2000-2001 fiscal year. Increasing this fee for fiscal year 2001-02 to fund the operations of the Utilities Commission and the Public Staff is expected to produce $10.5 million in fiscal year 2001-02. This Section became effective July 1, 2001.

North Carolina Electric Membership Corporation Fee (Section 2(b))

The section sets at $200,000 the annual public utility regulatory fee imposed on electric membership corporations whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale, as provided in G.S. 117-16. This is the same rate that was in effect for the 2000-2001 fiscal year. The North Carolina Electric Membership Corporation is the only

electric membership corporation that fits this description. The proceeds of the fee will be credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating electric membership corporations. This Section became effective July 1, 2001.

Increase Nonresident Search Fee (Section 3)

This section allows the Department of Cultural Resources to increase the fee cap from $10 to $25 for searches of archived public records pursuant to a written request by a nonresident. The increased fee will generate approximately $50,000 to $60,000 each year. This Section became effective January 1, 2002.

Update Internal Revenue Code Reference (Section 4)

This section rewrites the definition of the Code to change the reference date from January 1, 2000, to January 1, 2001. Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State tax law previously tracked federal law. The section further provides that the federal tax law changes that could increase an individual's or a corporation's State taxable income for the 2000 tax year will not become effective for the 2000 tax year but will instead apply only to taxable years beginning on or after January 1, 2001. This provision is necessary because Article 1, Section 16, of the North Carolina Constitution prohibits the legislature from passing a law that will retroactively increase the tax liability of any taxpayer.

Four Congressional bills were enacted in calendar year 2000 that have an impact on State individual and corporate income tax law. Public Law 106-230 requires organizations to disclose political activities. Public Law 106-554 makes changes in low income housing tax credits, HUD renewal communities, HUD empowerment zones, brownfield remediation, corporate computer donations, and medical savings accounts. Public Law 106-573 reverses

a prohibition of using accrual method in reporting income. Public Law 106-591 repeals foreign sales corporations. The estimated General Fund impact is as follows:

FY 2001-02	- $3.37 million
FY 2002-03	- $3.82 million
FY 2003-04	- $3.40 million
FY 2004-05	- $3.59 million
FY 2005-06	- $5.13 million

Accelerate Payment of Withholding Taxes (Section 5)

Under prior law, those employers liable for less than $500 a month in employee wage withholding were given the option to pay quarterly. Subsections (a) and (b) of Section 5 change the $500 threshold to $250, so that those employers liable for $250 to $500 a month will pay monthly but employers liable for less than $250 a month may still choose to pay quarterly. These subsections became effective January 1, 2002, and apply to payments of withheld income taxes made on or after that date. The Secretary of Revenue is required to review the thresholds for the accelerated payment of withheld taxes to evaluate the efficiency, burden, and level of compliance and to report the findings to the Revenue Laws Study Committee. The estimated General Fund impact is as follows:

FY 2001-02	$57.12 million (nonrecurring.) $ .88 million (recurring)
FY 2002-03	$ 1.85 million
FY 2003-04	$ 2.00 million
FY 2004-05	$ 2.16 million
FY 2005-06	$ 2.33 million

Accelerate Payment of Sales and Utility Taxes (Section 6)

This Section increases the number of taxpayers required to submit semimonthly sales tax payments and accelerates the payment schedules for the sales tax on telecommunications and electricity and for the excise tax on piped natural gas:

- Subsection (a) changes the threshold for paying sales taxes semimonthly from $20,000 a month to $10,000 a month. Subsection (b) allows the Secretary to require sales tax returns to be filed electronically Semimonthly payers are required to pay by electronic funds transfer. The returns would continue to be due monthly. The estimated General Fund impact is as follows:

FY 2001-02	$9.72 million (nonrecurring) $ .21 million (recurring)
FY 2002-03	$ .45 million
FY 2003-04	$ .48 million
FY 2004-05	$ .50 million
FY 2005-06	$ .52 million

- Subsections (c) and (e) make the payment schedule for electricity and telephone sales taxes the same as regular sales taxes.[43] This requires some of the state's largest utilities to shift from monthly to semimonthly payments of sales taxes owed on electricity and telephone. The estimated General Fund impact is as follows:

FY 2001-02	$15.3 million (nonrecurring) $ .85 million (recurring)
FY 2002-03	$ 1.77 million
FY 2003-04	$ 1.84 million
FY 2004-05	$ 1.91 million
FY 2005-06	$ 1.99 million

- Subsection (f) requires piped gas excise taxes to be paid on a semimonthly schedule rather then the current monthly schedule. The estimated General Fund impact is as follows:

---

[43] Section 6.(e) of the act was repealed in S.L. 2001-487, because the franchise tax on telecommunications was replaced with a uniform gross receipts sales tax in S.L. 2001-430. However, under the act, as amended, the payment schedule for telephone sales taxes will still be the same as regular sales taxes. G.S. 105-164.16, as amended in Section 6 (a) of the act, sets out the general rule for payment of sales and use taxes, and this general rule now includes sales and use taxes on utilities.

FY 2001-02	$14.5 million	(nonrecurring)
FY 2002-03	$ 1.87 million	
FY 2003-04	$ 1.95 million	
FY 2004-05	$ 2.02 million	
FY 2005-06	$ 2.11 million	

- Subsection (g) requires the Secretary to review the thresholds in G.S. 105-163.6 for accelerated payment of withheld taxes to evaluate the efficiency, burden, and level of compliance. The Secretary is also required to take steps to assure taxpayer compliance and report to the Revenue Laws Study Committee by April 1, 2002. This review and enforcement action were necessitated because some employers who are required to remit State income taxes on an accelerated basis (within 3 days after the payroll date) are continuing to send the money in monthly. The estimated General Fund impact from enforcement of the accelerated payment is $12.6 million for FY 2001-02. This is a one-time revenue gain. Subsection (h) authorizes the Revenue Laws Study Committee to study the reporting requirements for electric power companies and the method by which the franchise tax on these companies is distributed to cities to determine simpler ways to achieve the goals of the current requirements and distribution method.

Section 6 became effective January 1, 2002.

Certificates of Participation (COPSs) for Certain Counties (Section 7)

This Section adds Bertie, Chatham, Clay, Rutherford, Transylvania, and Yadkin Counties to the list of counties authorized to acquire school property on behalf of their boards of education. The 2001 General Assembly earlier enacted S.L. 2001-76 granting this authority to Anson, Craven, McDowell, Montgomery, and Pamlico Counties. Eighty-one counties currently have this authority. This Section became effective September 1, 2001. No General Fund Impact is expected.

General Assembly Oversight of Agency Fees (Section 8)

This Section provides that an agency may not establish or increase a fee or charge unless one of the following conditions has been met:

- The General Assembly has set the fee or charge amount and the purpose of that fee or charge by statute.
- The General Assembly has given the agency general authority to establish or increase a fee or charge by statute and the agency has consulted with the Joint Legislative Commission on Governmental Operations before establishing or increasing that fee or charge.

This section became effective September 1, 2001.

Community College Fuel Tax Exemption (Section 9)

This Section exempts community colleges from paying the motor fuels tax, effective January 1, 2002. Allowing community colleges to buy non-tax paid fuel directly from suppliers will decrease revenues in the Highway Fund and Highway Trust Fund by approximately $50,000 a year.

Clarifying Changes in the Subsidiary Dividend Provisions (Section 10)

This Section amends S.L. 2001-327 to clarify that foreign source dividends are treated the same for State income tax purposes as domestic source dividends. Under S.L. 2001-327, North Carolina

piggybacks the federal dividends received deduction for State corporate income tax purposes. This deduction pertains to dividends of domestic (US) corporations. The federal deduction is a gross deduction, but under G.S. 105-130.5(c)(3) the expenses are required to be netted.

To equalize the tax treatment of domestic and foreign source dividends, S.L. 2001-327 provided in G.S. 105-130.5(b) that dividends of foreign corporations could also be deducted from taxable income to the extent they are included in federal taxable income. Because the deduction for foreign source dividends is contained in G.S. 105-130.5(b), the provision in G.S. 105-130.5(c)(3) requiring that the expenses be netted does not apply. This Section clarifies that the dividends of domestic and foreign source dividends are to be taxed the same by providing that the deduction for foreign source dividends is also net of related expenses. This Section became effective for taxable years beginning on or after January 1, 2001. There is no fiscal impact.

Labor Commissioner Fee Authority (Section 11)

Subsection (c) of this Section gives the Commissioner of Labor the authority to set the fees for the inspection and issuance of certificates of operation for the devices in Subsections (e) and (f) of this Section. This fee-setting ability will put the Department of Labor in a position to make its Elevator and Amusement Device Division fee-supported. Under prior law, these fee amounts were specifically set by statute and varied based upon factors such as the cost of the installation or alteration, the number of building floors, and the type of amusement device. Subsection (c) became effective September 28, 2001.

Subsection (e) of this Section provides in G.S. 95-110.5(20) that the fee for inspecting elevators, dumbwaiters, escalators, moving walks, personnel hoists, stairway chair lifts, wheelchairs lifts, manlifts, and special equipment may not exceed $200. Subsection (e) became effective September 28, 2001.

Subsection (f) of this Section provides in G.S. 95-111.4(19) that the fee for inspecting amusement devices may not exceed $250. Subsection (f) became effective September 28, 2001.

Subsection (d) of this Section specifies that all fees collected under G.S. 95-111.4may be used only for inspection and certification purposes. Subsection (d) became effective September 28, 2001.

To establish the fees in G.S. 95-110.5(20) and G.s. 95-111.4(19), the Commissioner must go through the rule-making process. Under the administrative procedure act, a recent act of the General Assembly authorizes the agency to adopt temporary rules. The adoption of a temporary rule establishing the fee amounts is subject to the requirements of Section 8 of this act.[44]

Subsection (a) of this section repeals the current statutory fee amounts when the rules establishing the fee amounts in Subsections (e) and (f) become effective.

The fees proposed by the Commissioner of Labor will yield an additional $1 million in FY 2001-02 and $1.6 million in 2002-03.

Technical and Clarifying Changes to the Franchise Tax (Section 12)

In 1996, the General Assembly repealed the corporate income tax credit for qualified business investments, effective for investments made on or after January 1, 1997, because it was advised by the Attorney General's Office that the credit unconstitutionally favored businesses headquartered and operating in North Carolina. Prior to its repeal, the corporate income tax credit could have

[44] Section 8 of the act provides that an agency must consult with the Joint Commission on Governmental Operations before a rule establishing or increasing a fee amount may become effective.

been claimed against the franchise tax and a reference to this credit was in the franchise tax law. When the corporate credit was repealed, a conforming change to the franchise tax statute was not made. The act makes this conforming change. It also adds standard language to the remaining credit referenced in G.S. 105-122(d1)[45] clarifying that the credit is not a refundable tax credit. Section 12 became effective September 28, 2001.

Accelerate Payment of Local Sales and Use Tax Revenues (Section 13)

The local governments have a 2% sales and use tax rate. Unlike other local taxes, this local tax is collected by the State and distributed to the counties and municipalities quarterly.

Section 13 provides that the distribution must be made monthly, effective July 1, 2003. The State's loss of interest on these funds will be as follows:

FY 2003-04	- $9.6 million
FY 2004-05	- $10.1 million
FY 2005-06	- $10.6 million

Accelerate Payment of Excise Tax on Conveyances (Section 14)

The State levies an excise tax on each deed, instrument, or writing by which any interest in real property is conveyed to another person. The amount of the tax is $1.00 on each $500 of the consideration or value of the interest or property conveyed. The tax must be paid to the county register of deeds before an instrument may be recorded. One-half of this amount is retained by the county and credited to the county's general fund. The remainder is remitted to the State quarterly. Of the amount remitted to the State, 75% is credited to the Parks and Recreation Trust Fund and 25% is credited to the Natural Heritage Trust Fund.

Section 14 of the act requires that the portion of the tax revenue due to the State must be remitted monthly, as opposed to quarterly. This section becomes effective July 1, 2003, and applies to amounts collected on or after that date. No fiscal estimate is possible.

Prison Property Tax Exemption (Section 15)

Section 15 exempts a correctional facility that is located on State land, but constructed pursuant to a contract with the State, from local property taxes. This includes construction in progress and any leasehold interest in the land owned by the State upon which the correctional facility is located.

S.L. 2001-84, effective May 17, 2001, authorized the Department of Administration and Department of Correction to award a contract for the construction of up to three new close custody prisons. Governmental Operations recommended two prisons but did not designate sites. This recommendation was accepted by the Council of State. S.L. 2001-424 (SB 1005) and S.L. 2001-322 (SB 34) authorized construction of three prisons after acceptance by the Council of State.

The vendor will finance the prison construction. S.L. 2001-84 then authorizes the State to set up a Special Non-Profit Corporation to issue certificates of participation to purchase the prisons upon completion and then lease the prisons to the State. The Department of Correction (DOC) will operate the prisons. The Request for Proposal issued by DOC indicated that the State would be responsible for the property tax, rather than the vendor. Section 3 of S.L. 2001-84 exempts the

---

[45] A corporation may claim a credit against its franchise tax liability equal to one-half of the amount of excise tax it paid on piped natural gas during the taxable year.

State from paying property tax during the period the State is leasing the prisons from the Special Non-Profit Corporation. The Department of Correction indicates that construction began in November 2001 for two prisons and will begin on the third prison in winter, 2002. Completion dates for all three prisons are expected to be in fiscal year 2003-04. The sites for the three prisons are Alexander, Scotland and Anson Counties.

Section 15 became effective for taxable years beginning on or after July 1, 2001.

The State will save the following tax payments:

FY 2001-02	$ 700,000
FY 2002-03	$1,680,000
FY 2003-04	$ 980,000

Simplify Taxes on Telecommunications

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-430, as amended by S.L. 2001-424 and S.L. 2001-487	**HB 571**	**Representative Allen**

AN ACT TO SIMPLIFY THE COLLECTION OF TELECOMMUNICATIONS TAXES.

OVERVIEW: This act, as amended, simplifies the collection of telecommunications taxes, by (1) combining multiple tax rates into one uniform rate equal to 6%[46], (2) broadening the tax base by eliminating exemptions for interstate calls and telephone membership corporations, (3) taxing prepaid phone cards at the point of sale instead of at the point of use, (4) adjusting the tax on the gross receipts from pay phones, (5) setting a call center tax cap of $50,000 a year, and (6) replacing the 3.09% franchise tax distribution to municipalities with a distribution of 18.26% of the new revenue total (less the previous freeze amount).

FISCAL IMPACT: The overall fiscal impact of the act is as follows:

($millions)

	FY 2001-02	*FY 2002-03*	*FY 2003-04*	*FY 2004-05*	*FY 2005-06*
New Rate (6.0%) & Interstate	34.4	87.9	87.9	87.9	87.9

[46] This act originally set the uniform rate at 4.5%. Section 34.25(a) of SL 2001-424 changed the uniform rate to 6%.

Coin Telephones	0.4	1.6	1.6	1.6	1.6
Prepaid Phone Cards	* See Assumptions and Methodology *				
Call Centers	* See Assumptions and Methodology *				
TOTAL	34.8	89.5	89.5	89.5	89.5

EFFECTIVE DATE: The act became effective January 1, 2002, and applies to taxable services reflected on bills dated on or after January 1, 2002.

BACKGROUND: Until this act, the General Assembly had not revised the tax structure for telecommunications since 1987. Since that time, changes in the telecommunications industry had occurred that were not contemplated by the 1987 tax law changes.

Under former law, two taxes applied to telecommunications services. The applicability of the tax varied depending upon the identity of the provider and the type of service. One of these taxes was a gross receipts franchise tax equal to 3.22% of the gross receipts derived by the provider for the provision of local telecommunications services. The second tax was a sales tax. The rate of sales tax varied: it was 3% for local telecommunications and 6.5% for intrastate long-distance calls (toll telecommunications services or private telecommunications services that both originated from and terminated in the State). By definition, the taxes did not apply to interstate long-distance calls. Telephone membership corporations had been exempt from the sales tax on telecommunications for many years and coin-operated pay telephone calls, where the call is paid for by a coin, were exempted from the sales tax in 1998.

Under the prior law distribution of part of the tax revenue to cities, a city would receive 3.09% of the gross receipts franchise tax that was collected from sales of local telecommunications service within the city, subject to a freeze deduction and a hold-harmless provision. Cities did not receive a percentage of the sales tax revenues. This distribution had become increasingly complicated to administer. The advent of cellular phones had made the task of deciding whether a call is attributable to a particular city very difficult.

During the 1990s, prepaid calling cards had become increasing popular and easy to use. They could be purchased at retail stores and other places. However, they were not taxable as tangible personal property under the State and local sales tax like most items sold in the stores where the cards were most often purchased. Because the card represented a telecommunications service, the gross receipts franchise tax and the telecommunications sales tax were imposed on the "air time" and the tax rate differed depending on the type of call. To correctly levy the tax, telephone companies had to track the minutes used by the cardholder and the type of call placed by the cardholder.

ANALYSIS: This act addresses some of the difficulties in the existing tax structure:

- It taxes prepaid telephone calling arrangements as personal property at the point of sale.

- It applies one tax at one rate to telecommunications services.
- It taxes all telecommunications services equally by eliminating exemptions for, interstate telecommunications service, coin telephone calls, and telephone membership corporations.
- It establishes a sourcing rule for mobile telecommunications.
- It preserves the revenue stream to cities while simplifying the distribution formula.

Sections 1 and 6 of the act add definitions for use in taxing telecommunications. The definition for "prepaid telephone calling arrangement" is consistent with the definition used in other states. Many of the definitions are similar to the ones previously used in G.S. 105-120. The act defines some new terms: "service address", and "mobile telecommunications service". Those definitions are consistent with the definitions in the federal Mobile Telecommunications Act and in the draft legislation being developed by a working group established by the National Conference of State Legislatures.

Section 2 repeals the definition of "utility" from the sales tax statutes because it is no longer needed. With the separate taxation of telecommunications and piped natural gas, the only industry remaining in the definition of "utility" is electricity. The act rewrites the sales tax statutes pertaining to electricity so that the term is not needed. (Sections 3, 7, and 8)

Section 4 originally set a uniform tax rate of 4.5% for all telecommunications services, except prepaid telephone calling arrangements. The 4.5% rate was chosen as a revenue neutral rate for the General Fund. Section 34.25(a) of SL 2001-424 changed the uniform rate to 6%.

Section 5 taxes prepaid telephone-calling arrangements as personal property at the point of sale and identifies the point of sale. Consequently, it sets the tax rate for prepaid telephone calling arrangements at the general State rate of 4% (after the 2001 half-cent expires in 2003) plus the applicable local rates, which are expected to be 3% in Mecklenburg County and 2 ½% in all other counties beginning in 2003.

Section 6 is the heart of the act. It sets forth the taxation of telecommunications:

- It adopts a sourcing rule for mobile telecommunications service that is substantially the same as the sourcing rule in the federal Mobile Telecommunications Act. Mobile telecommunications service is provided in this State if the customer's service address is in this State. A service address for mobile telecommunications service may be determined by the provider based upon the customer's telephone number, the mailing address to which the bills are sent, or a street address provided by the customer.
- It addresses the taxation of telecommunications service that is bundled with a service that is not taxable. In those cases, a proportion of the gross receipts from the total charges is taxable based on the unbundled price of each service or based on an allocation of revenue to each service.
- It taxes all telecommunications service, including interstate telecommunications service and service provided through a telephone membership corporation. When the General Assembly last changed the telecommunications tax laws in 1987, it was unclear whether states could constitutionally tax interstate telecommunications. However, in 1989, the U.S. Supreme Court removed this uncertainty in Goldberg v. Sweet, 488 U.S. 252, 109 S.Ct. 582, when it held that states can tax interstate telecommunications.

- It replaces the 3.22% franchise tax on local telecommunications and the 3% and 6.5% sales tax on local telecommunications with a uniform gross receipts sales tax on telecommunications.
- It eliminates the tax exemption for telecommunications service provided by means of public coin-operated pay telephones and paid for by coin. (See Section 4) It excludes from tax the receipts of a pay telephone provider from the sale of pay telephone service because the provider pays the sales tax on its purchase of those services.
- It taxes interstate private lines as follows:
  - 100% of the charge imposed at each channel termination point in this State.
  - 100% of the charge imposed for the total channel mileage between each channel termination point in this State.
  - 50% of the charge imposed for the total channel mileage between the first channel termination point in this State and the nearest channel termination point outside this State.
- It caps the tax on call centers at $50,000 a year. The cap applies to a person who purchases interstate telecommunications service that originates outside the State and terminates in this State and who has a direct pay permit issued by the Secretary of Revenue. A direct pay permit authorizes the holder to purchase telecommunications service without paying tax to the seller and authorizes the seller to not collect any tax on a sale to a permit holder. The permit holder pays the tax directly to the Department. (Section 9)

Section 10 establishes a new distribution formula that replaces the 3.09% distribution to cities from the telephone gross receipts franchise tax with a distribution from the sales tax on telecommunications service established under this act. The new distribution formula eliminates the need for telephone companies to separately track and report local versus other calling services and the need to determine where wireless falls in the local/nonlocal mix of calls.

Under the new distribution formula, each quarter the Secretary of Revenue must first deduct from the net amount of the tax to be distributed to the cities the amount of $2,620,948. This is the amount by which the distribution to the cities of the gross receipts franchise tax on telephone companies was required to be reduced in fiscal year 1995-96. After the required deduction, the Secretary must distribute the remaining net tax proceeds to the cities. Cities incorporated before January 1, 2001, will receive a proportionate share based on the amounts they received from the gross receipts franchise tax on telephone companies. Cities incorporated on or after January 1, 2001, and cities served by telephone membership corporations will receive a per capita share.[47]

Section 11 makes a conforming change to the local franchise tax distribution formula by eliminating references to the gross receipts franchise tax on telephone companies and by clarifying that the freeze deduction applies only to the receipts attributable to electric power companies and natural gas companies.

[47] The provision for cities served by telephone membership corporations was added by section 67 of S.L. 2001-487.

Section 12 repeals the 3.22% gross receipts franchise tax on telephone companies. The tax is repealed because it is merged into the uniform tax on telecommunications services established in this act.

Sections 13 and 14 conform the local sales tax statutes by adding prepaid telephone calling arrangements to the local sales tax base.

Section 15 requires the Department of Revenue to report to the Revenue Laws Study Committee in October 2003 and October 2007 on the amounts collected under this act and on the distributions made to cities. The Department, in consultation with the League of Municipalities, may recommend changes to the distribution formula.

Sections 16 and 17 preserve the prohibition on county and city taxes on telecommunications services that is now contained in G.S. 105-120(d).

Section 18, as amended[48], requires the Utilities Commission to reduce the rates set for telecommunications services to reflect the repeal of G.S. 105-120 and the resulting liability of local telecommunications companies for the new uniform sales tax. The North Carolina Supreme Court upheld the Utilities Commission's authority to reduce rates under its rulemaking procedure to reflect a tax reduction that affects an industry uniformly in State ExRel. Utility Commission v. Nantahala Power & Light Company, 236 N.C. 190 (1990).

Section 19 directs the Revenue Laws Study Committee to recommend to the 2002 Session of the General Assembly any changes necessary to conform North Carolina's tax laws with the federal Mobile Telecommunications Sourcing Act.

Pass-Through Entity/Housing Tax Credit

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-431	**SB 181**	**Senator Harris**

AN ACT TO ALLOW A PASS-THROUGH ENTITY TO ALLOCATE A HOUSING TAX CREDIT TO ANY OF ITS OWNERS AT THE DISCRETION OF THE PASS-THROUGH ENTITY.

OVERVIEW: This act amends the low-income housing tax credit in two ways:

- It allows a pass-through entity to allocate the low-income housing credit to any of its owners at its discretion. In effect, it allows developers of low-income housing to sell federal and State low-income housing tax credits to separate investors. The credit amount may not exceed the owner's adjusted basis in the pass-through entity. If the credit is ever forfeited, the forfeiture applies to the owners in the same proportion as the credit was allocated.

[48] Section 119 of S.L. 2001-487 amended Section 18 of this act to clarify that the Utilities Commission has some flexibility in lowering rates, rather than being limited to lowering only basic local line rates by the exact amount of the reduced tax burden.

- It expands the credit by allowing it to be taken against the gross premiums tax on insurance companies.

FISCAL IMPACT: The fiscal impact of this act is not known because it is not known whether the changes to the credit allowed under this act will increase the use of the State tax credit. In calendar year 2000, only 70% of the low-income housing projects receiving the federal tax credit also requested the State tax credit. Under federal law, each state receives a tax credit of a specified per capita amount.[49] The State's tax credit is a percentage of the federal tax credit. Therefore, there is a ceiling on the total amount of State tax credit that can be claimed.

EFFECTIVE DATE: Effective for taxable years beginning on or after January 1, 2001, and applies to buildings that are placed in service on or after January 1, 2001.

ANALYSIS: In the Tax Reform Act of 1986, Congress created the Low Income Housing Tax Credit program to fund housing for low- and moderate-income households. Each state receives a limited amount of credit each year. The IRS allocates the per capita low-income housing tax credits to state housing agencies such as the North Carolina Housing Finance Agency (NCHFA). The NCHFA reviews housing project proposals and awards the tax credits to project developers based on selection criteria designed to reward projects that will serve the lowest income tenants for the longest periods. The federal credit requires that the low-income housing be used for that purpose for at least 30 years. If that requirement is not met, all or part of the taxpayer's credit is recaptured.

In S.L. 1999-360, North Carolina authorized a State income tax credit equal to a percentage of a taxpayer's federal tax credit for low income housing constructed in North Carolina.[50] The credit is equal to 75% of the federal credit for low-income housing located in Tier one or Tier two counties and for housing located in a county affected by a hurricane in 1999.[51] The credit is equal to 25% of the federal credit for low-income housing located in other counties. In addition to the federal requirements, low-income housing located in a Tier three, four, or five county must meet the following State eligibility requirements:

- Housing located in a Tier three or Tier four county must have at least 40% of its residential units rent restricted and occupied by individuals whose income is 50% or less of median gross income.
- Housing located in a Tier five county must have at least 40% of its residential units rent restricted and occupied by individuals whose income is 35% or less of median gross income.

The State tax credit must be taken over a five-year period, beginning when the federal credit is first claimed for the building.[52] The federal credit is taken over an eleven-year period. If any part of the federal credit is recaptured, the taxpayer forfeits the North Carolina credit to the same extent. In addition, if the taxpayer no longer qualifies for the federal credit during one of the five

[49] In 2000, Congress increased the per capita credit to $1.50 in 2001 and $1.75 in 2002, and then indexed the credit to the CPI beginning in 2003.
[50] The credit expires for buildings allocated federal credits on or after January 1, 2006.
[51] The General Assembly modified the credit in S.L. 2000-56 to make housing in a county affected by a hurricane in 1999 eligible for the 75% State tax credit. This modification of the credit expires July 1, 2005.
[52] The federal credit is first claimed either when the building is placed in service, or the next year, at the taxpayer's election.

years a State installment could otherwise be claimed, the taxpayer is no longer eligible for the State credit.[53]

A project developer awarded the low-income housing tax credits sells the State and federal credits to an investment group to acquire financing for a project. The investment group financing the projects may consist of pass-through entities.[54] Under federal law, tax credits are allocated among S corporation shareholders in accordance with their pro rata share of the corporation, which is determined on the basis of stock ownership, and tax credits are allocated among partners in a partnership in accordance with the partnership agreement. The allocation made by the partnership agreement must have a substantial economic effect, which means that the allocation agreement must reflect the economic interest of the partners in the partnership and cannot be based solely on tax consequences. Therefore, the allocation agreement of partners cannot give one partner a disproportionate share of the income, loss, or credits of the partnership. Generally, under North Carolina law, the pass-through entity is required to allocate a tax credit among its owners in the same proportion that other items, such as the low-income housing credit, are allocated under the Internal Revenue Code.

Prior to this act, an investment group had to purchase both the State and federal credits. This restriction limited the number of investors able to use the State tax credit primarily to in-state groups. This act allows the State credits to be allocated in a different manner than the federal credits. It allows a pass-through entity to allocate the credit among any of the entity's owners, in the entity's discretion, as long as the amount of credit allocated does not exceed the owner's adjusted basis in the pass-through entity. In effect, this act allows developers of low-income housing to sell federal and State low-income housing tax credits to separate investors. It is similar to the bifurcation or separate sale of federal and State historic tax credits approved in the 1999 Session of the General Assembly in S.L. 1999-389.[55] Most housing finance experts agree that this act will increase the competition for State tax credits and that this competition will affect the price paid for a credit put up for bid. However, it is unknown whether these changes will increase the participation of developers in the State credit program. The statutory mandates on the number of rent controlled units in a project appear to prevent the 100% utilization of the State tax credit and this act does not change those restrictions.[56]

Under this act, when an allocation is claimed by a pass-through entity, the pass-through entity and its owners must include a statement with their tax return that shows both the allocations made and the allocation that would otherwise have been required.[57] If an owner of a pass-through entity that qualified for the credit disposes of all or a portion of the owner's interest in the pass-through entity within five years from the date the federal credit is first claimed so that the owner's interest is reduced to less than 2/3 of its interest at the time the federal credit is first claimed, the owner must forfeit a portion of the credit. This recapture does not apply if the change in ownership is due to the death of the owner or to a merger or consolidation requiring approval of the members

---

[53] This situation could occur if the taxpayer sold its interest in the low-income housing.
[54] A pass-through entity is an entity that is treated as owned by individuals or other entities under federal tax law and whose income, losses, and credits are reported by the owners on their State income tax returns. Examples of pass-through entities include partnerships, LLCs, and Subchapter S corporations.
[55] See the summary for S.L. 2001-476, *Pass-Through Entity Allocation Extension*.
[56] All 7 projects in Tier one and two counties and all 6 projects in Tier three and flood relief counties utilized the 75% State tax credit. However, only 12 of the 23 projects in Tier four and five counties utilized the 25% State tax credit.
[57] See G.S. 105-131.8 and G.S. 105-269.15.

of the taxpayer's pass-through entity to the extent the entity does not receive cash or property. Under existing law, any forfeiture of the credit triggers the taxpayer's liability for all past taxes avoided plus interest. The past taxes and interest are due 30 days after the credit is forfeited.

Lastly, this act makes the State tax credit for low-income housing attractive to insurance companies by allowing the credit to be applied against the gross premiums tax. Prior to this act, the credit for low-income housing was allowed only against the franchise tax or the income tax. Insurance companies pay gross premiums tax in lieu of income and franchise tax.

Counties Collect Delinquent Taxes Before Record Deeds

Session Law	*Bill #*	*Sponsor*
S.L. 2001-464, as amended by S.L. 2001-513	**HB 108**	**Representative Haire**

AN ACT TO AUTHORIZE ALLEGHANY, ANSON, BEAUFORT, CABARRUS, CAMDEN, CHEROKEE, CHOWAN, CURRITUCK, FORSYTH, GRAHAM, GRANVILLE, HARNETT, HAYWOOD, JACKSON, LEE, MADISON, MONTGOMERY, PASQUOTANK, PERQUIMANS, PITT, STANLY, SWAIN, VANCE, WARREN, AND YADKIN COUNTIES TO REQUIRE THE PAYMENT OF DELINQUENT PROPERTY TAXES BEFORE RECORDING DEEDS CONVEYING PROPERTY.

OVERVIEW: This act authorizes the county commissioners in 25 different counties to require the register of deeds to refuse to register a deed unless the county tax collector has certified that no delinquent taxes are due on the property. S.L. 2001-513 gives this same authority to the county commissioners in an additional 10 counties.

FISCAL IMPACT: The fiscal impact on local governments is unknown. The act provides counties with a potential tool to assist them with the collection of delinquent property taxes.

EFFECTIVE DATE: This act became effective November 16, 2001. S.L. 2001-513 became effective January 4, 2002.

ANALYSIS: Since 1963, the General Assembly has prohibited the register of deeds in several counties from recording deeds unless the tax collector certifies that no delinquent taxes are due: Avery County (1963); Mitchell County (1987); Ashe County (1993); the Towns of Newland, Spruce Pine, and Alleghany County (1997); the Town of Banner Elk (1998); and the Town of Bakersville (1999).

This act gives the county commissioners in 25 counties the authority to adopt a resolution requiring the county tax collector to certify that no delinquent taxes that the collector is charged to collect are due on the property before a deed transferring the property can be recorded. Those

25 counties are: Alleghany[58], Anson, Beaufort, Cabarrus, Camden, Cherokee, Chowan, Currituck, Forsyth, Graham, Granville, Harnett, Haywood, Jackson, Lee, Madison, Montgomery, Pasquotank, Perquimans, Pitt, Stanley, Swain, Vance, Warren, and Yadkin Counties. S.L. 2001-513 gives the same authority to the following 10 counties: Carteret, Cleveland, Davidson, Gaston, Iredell, Martin, Person, Rockingham, Rowan, and Washington Counties. Unlike the previous local acts, the authority given by these two acts is permissive. To use this collection tool, the board of county commissioners must adopt a resolution on the matter. The resolution may describe the form the certification must take.

GRAPE GROWERS COUNCIL FUND

AN ACT TO INCREASE THE AMOUNT OF WINE TAX PROCEEDS EARMARKED ANNUALLY FOR THE GRAPE GROWERS COUNCIL.

Session Law	*Bill #*	*Sponsor*
S.L. 2001-475	**SB 970**	**Senator Kerr**

OVERVIEW: This act expands the quarterly distribution of a portion of the excise tax on wine to the North Carolina Grape Growers Council by increasing the earmarking to 100% of the excise tax and raising the cap from $175,000 to $350,000.

FISCAL IMPACT: The act doubles the amount of tax revenue that may be distributed to the North Carolina Grape Growers Council from $175,000 to $350,000.[59] It is anticipated that the Council will receive an additional $109,382 in fiscal year 2001-02 and an additional $147,936 in fiscal year 2002-03 before reaching the $350,000 cap in fiscal year 2003-04. The additional funds that will go to the Council would, under prior law, be divided between the State's General Fund and the counties and cities in which the sale of wine is authorized.[60] Therefore, the gain in revenues to the Council is accompanied by a corresponding reduction in the revenues distributed to the State and the applicable counties and cities.

EFFECTIVE DATE: October 1, 2001.

ANALYSIS: Under prior law, 94% of the net proceeds of the excise tax collected on unfortified wine bottled in North Carolina during the previous quarter and 95% of the net proceeds of the excise tax collected on fortified wine bottled in North Carolina during the previous quarter were credited to the Department of Agriculture. The amount credited could not exceed $175,000 per fiscal year. The act changes the distribution amount to 100% of each tax on wine bottled in North Carolina, and raises from $175,000 to $350,000 the annual cap on the amount to be distributed.

---

[58] Alleghany County currently has the authority. This act includes Alleghany County because it allows the county commissioners to decide what form the certification may take, something the original authorization does not expressly address.

[59] The prior $175,000 cap did not come into play until the final quarter of the 1999-2000 fiscal year.

[60] Under G.S. 105-113.82, the Secretary of Revenue must annually distribute the net amount of excise taxes collected on fortified and unfortified wine, less the amount of net proceeds distributed to the North Carolina Grape Growers Council, to local governments. Local governments receive 62% of the net amount of excise taxes collected on unfortified wine and 22% of the net taxes collected on fortified wine. The remainder is credited to the General Fund.

The Department of Agriculture must continue to allocate these funds to the North Carolina Grape Growers Council to be used to promote the North Carolina grape and wine industry and to contract for research and development services to improve viticultural and enological practices in North Carolina. If any of the earmarked funds are not expended during the fiscal year, they do not revert to the General Fund but remain available to the Grape Growers Council.

Bill Lee Act Changes

Session Law	*Bill #*	*Sponsor*
S.L. 2001-476, as amended by S.L. 2001-487	**SB 748**	**Senator Hoyle**

AN ACT TO AMEND THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT; TO APPLY A GRADUATED TAX RATE TO SALES OF ELECTRICITY TO MANUFACTURERS BASED ON ANNUAL VOLUME OF ELECTRICITY USED; TO APPLY DEFINITIONS FROM THE STREAMLINED SALES TAX PROJECT TO THE SALES TAX HOLIDAY; AND TO PROVIDE A FOUR-YEAR EXTENSION ON THE EXEMPTION FROM BIDDING LAW REQUIREMENTS FOR THE PIEDMONT TRIAD INTERNATIONAL AIRPORT AUTHORITY.

OVERVIEW: This act makes numerous changes to the William S. Lee Quality Jobs and Business Expansion Act, modifies the sales tax rate that applies to electricity used by manufacturers, modifies definitions in the new sales tax holiday to conform to the streamline legislation, and extends the bidding law exemption for the Piedmont Triad Airport Authority.

EFFECTIVE DATES AND FISCAL IMPACT:

Extension of special allocation rules for pass-through entities for the historic rehabilitation credit.	Effective November 29, 2001.	

ANALYSIS:

The William S. Lee Quality Jobs and Business Expansion Act (hereinafter Bill Lee Act) was enacted in 1996, effective beginning with the 1996 tax year with a 2002 sunset. The Act is a package of State tax incentives and has been modified in each subsequent year. The incentives are primarily in the form of tax credits for investment in machinery and equipment and real property, for job creation, for worker training, and for research and development. Counties are divided into five economic distress tiers based on the unemployment rate, per capita income, and population growth of the county. For many of the credits, the lower the tier of a county, the more favorable

the incentive. The Act requires the Department of Commerce and the Department of Revenue to report periodically on the credits allowed by the Act.

Before 1996, North Carolina had made little use of tax incentives to lure businesses to the State. Even without incentives, North Carolina was consistently one of the top states in attracting industry. The array of credits authorized by the Bill Lee Act was viewed as an experiment, to be evaluated in five years to determine whether the incentives were cost effective and actually affected behavior, or merely provided tax reductions to businesses that would have located or expanded in any case. In 1999, the General Assembly expanded existing tax incentives for businesses, added new tax incentives and tax reductions for specific businesses, and made related changes. The General Assembly also extended the 2002 sunset to 2006.

During the 2000 Session, the General Assembly further modified the Bill Lee Act and related economic development laws by enacting application fee changes, extending credit carryforwards, requiring wage standards for grants, prohibiting funding for defaulting grantees, expanding credits, amending the tier designation formula, and making technical corrections.

This act makes the following changes to the Bill Lee Act:

Eligible business rules and definitions.

Sections 1 and 6 of this act make numerous clarifications and changes to the definitions regarding eligible businesses under the Act.

Section 1(a) clarifies that a taxpayer is eligible for a credit under the Bill Lee Act only if the primary business of the taxpayer is an eligible business under the Act. There had been some confusion on the part of taxpayers as to whether a taxpayer whose primary business is not an eligible business but who nonetheless engaged in eligible business activities at a certain location was eligible for credits under the Act. This clarification is consistent with the interpretation of the Act by the Department of Revenue[61]. This is a clarifying amendment and does not change existing law. Section 1(a) became effective when it became law, November 29, 2001.

Section 1(b) amends the definitions to remove the requirements regarding primary business from the definitions. These requirements are moved to the eligible business statute, G.S. 105-129.4(a), in Section 6(a) of the act. Section 1(b) also amends the definition of "data processing" by splitting it into two definitions, "computer services" and "data processing", and restricting it so that in order for a taxpayer to be engaged in one of these activities, the services must be provided primarily to entities that are not related entities[62]. In addition, Section 1(b) provides a new definition of data processing that does not explicitly refer to the NAICS definition. Section 1(b) is effective for taxable years beginning on or after January 1, 2001.

Section 6(a) of the act amends G.S. 105-129.4(a), effective for taxable years beginning on or after January 1, 2001, to relax the eligible business requirements as follows:

- Computer services. The law is expanded to allow a taxpayer to qualify for credits if it has an establishment whose primary activity is in computer services. Under previous law, a taxpayer was eligible for a credit for this industry only if the primary business of the taxpayer was in that industry.

[61] G.S. 105-264 imposes the duty of interpreting the tax laws upon the Secretary of Revenue.
[62] Section 1(b) incorporates the definition of related entity found in G.S. 105-130.7A. G.S. 105-130.7A was enacted into law earlier this session in House Bill 1157 – Enforce Tax Compliance and Equality/No Fraud.

- Electronic mail order house. The law is expanded to allow a taxpayer to qualify for credits if it has an establishment whose primary activity is an electronic shopping and mail order house. Under previous law, a taxpayer was eligible for a credit for an electronic mail order house only if the primary business of the taxpayer was an electronic shopping and mail order house.
- Warehousing. Under previous law, a taxpayer was engaged in warehousing only if the primary business of the taxpayer was warehousing. The law is expanded to include a taxpayer whose primary business is not an eligible business if it has an establishment whose primary activity is warehousing and it meets each of the following conditions:
  - The establishment is located in an enterprise tier one, two, or three area.
  - The establishment is at a site separate from other subdivisions of the taxpayer.
  - The establishment serves at least 25 establishments in at least five different counties in one or more states.
- Multiple businesses. The law is expanded to allow a taxpayer to claim credits under the Bill Lee Act if the primary business of the taxpayer is manufacturing, warehousing, or wholesale trade, and the jobs, investment, or activity with respect to which a credit is claimed are used in any of those types of business. Under previous law, a taxpayer could claim a credit under the Act only if the jobs, investment, or activity with respect to which a credit was claimed were used within the primary business of the taxpayer.

In each of these cases, it has been argued that a taxpayer whose primary business is in another industry might nonetheless engage in significant activities in one of these areas. Section 6(a) allows such a taxpayer to be eligible for credits under the Bill Lee Act.

Tier designation formula change

Section 3 of this act makes two changes to the tier designation formula. In general, counties are divided into five economic distress tiers based on the unemployment rate, per capita income, and population growth of the county. In 1999, the General Assembly amended the tier designation formula to give a more favorable tier designation to certain lower-population counties. Under previous law there are three exceptions for lower-population counties:

1. A county that had a population of less than 10,000 and more than 16% of its population below the federal poverty level was designated an enterprise tier one area.
2. A county that had a population of less than 50,000 and more than 18% of its population below the federal poverty level was given a tier designation one level lower than it otherwise would have received.
3. A county that had a population of less than 25,000 could not be designated higher than an enterprise tier three area.

This act increases the population thresholds that are used in 1. and 3. above from 10,000 to 12,000 and from 25,000 to 35,000, respectively. The Department of Commerce reports that the counties that are affected by the first change are Alleghany and Jones. The counties affected by the second change are Alexander, Dare, Davie, Macon, and Transylvania. This section became effective when it became law, November, 29, 2001, and applies to tier designations that are made on or after that date.

Call center

In 1999, the General Assembly amended the Bill Lee Act so that certain electronic mail order houses and certain customer service centers were eligible for credits under the Bill Lee Act. The first incentive extends all of the Bill Lee Act credits to electronic mail order houses that create at least 250 jobs and that are located in an enterprise tier one or two area. The second incentive extends all of the Bill Lee Act credits to certain customer service centers located in an enterprise tier one or two area. An eligible customer service center is a subdivision of a telecommunications or financial services company that provides support services to the company's customers by telephone to support the company's products and services. To qualify, at least 60% of the center's calls must be incoming. This requirement prevents telemarketing operations from qualifying.

This act (Section 6) expands the number of taxpayers eligible for credits under the Bill Lee Act by including customer service centers and electronic mail order houses located in enterprise tier three areas. This change is effective for taxable years beginning on or after January 1, 2001.

Clarification of expiration of credits

In 2000, the General Assembly amended the Bill Lee Act to clarify that if a taxpayer ceased to engage in an eligible business, credits under the Act would expire and the taxpayer would not be allowed to take any further installments of the credit. Expiration of a credit, however, does not prevent a taxpayer from taking any carryforwards of previous installments of the credit. In several instances, an eligible business is defined not only by industry type, but also by the number of jobs created or the enterprise tier designation of the location. It was not entirely clear what the effect would be on a taxpayer's credits if the taxpayer was still involved in an eligible industry, but the number of employees dropped below the applicable threshold or the enterprise tier designation of the location rose above the applicable threshold.

Section 6 of this act clarifies that credits under the Bill Lee Act expire if the number of jobs at a central administrative office drops below 40 or if the number of jobs at an electronic mail order house drops below 250. Section 6 further clarifies that a change in the tier designation of the location of a customer service center or an electronic mail order house does not result in expiration of the credits. These changes became effective when the act became law, November 29, 2001.

Section 6 also clarifies the period of time during which a central administrative office may meet the requirement that it create at least 40 jobs.

Wage standard

To be eligible for the credits under the Bill Lee Act, jobs must meet the applicable wage standard. Under previous law, for the credit for worker training or the credit for creating new jobs, the jobs for which a credit was claimed were required to meet the applicable wage standard. For the credit for investing in machinery and equipment, the credit for research and development, and the credit for investing in central office and aircraft facility property, the jobs at the location with respect to which a credit was claimed were required to meet the applicable wage standard. For a tier one county, the jobs were required to pay an average weekly wage that was equal to the applicable average weekly wage for that county. For other tier counties, the average weekly wage of the jobs had to equal 110% of the applicable average weekly wage for that county.

Section 6 of this act makes several changes to the wage standard test. First, this act clarifies that the average wage of all jobs at the facility must exceed the applicable average weekly wage for the credit for investing in machinery and equipment, the credit for research and development, the credit for investing in central office and aircraft facility property, and the credit for substantial

investment in other real property[63]. Second, this act changes the wage standard test for the credit for worker training and the credit for creating new jobs. For those two credits, the average wage of the jobs for which the credit is claimed and the average wage of all jobs at the facility must exceed the applicable average weekly wage.

Safety and health and environmental eligibility amendments

Section 5 of this act makes changes to the safety and health program eligibility requirement under the Bill Lee Act. Previously, a taxpayer was ineligible for a credit under the Bill Lee Act if the taxpayer had any outstanding violations under the Occupational Safety and Health Act or had had any serious violations of that Act in the past three years. Section 5 of the act changes this standard in two ways. First, the new standard focuses only on citations that have become a final order. Second, instead of looking for "serious" violations the new standard looks for "willful serious" or "failure to abate serious" violations. The new standard would make more taxpayers eligible for credits under the Bill Lee Act. Section 5 is retroactive to taxable years beginning on or after January 1, 2000.

Section 6 of this act also changes the reporting procedures for the safety and health eligibility requirement and for the environmental impact requirements. Under previous law, Commerce had to report to the Department of Labor those taxpayers who claimed to meet the safety and health eligibility requirement and Labor could audit them randomly. Section 6 of the act provides that instead Labor will report to the Department of Revenue those employers who have final orders that would make them ineligible for credits. Similarly, under previous law, Commerce had to report to the Department of Environment and Natural Resources those taxpayers who claimed to meet the environmental impact eligibility requirements and DENR could perform random audits. Section 6 of the act provides that instead DENR will report to Revenue those persons who have pending or final determinations that would disqualify them from claiming credits.

Extended carryforward periods

The Bill Lee Act credits may not exceed 50% of the tax against which they are claimed. The limitation applies to the cumulative amount of credit claimed by the taxpayer, including carryforwards. As a general rule, any unused portion of a credit may be carried forward five years. Previously, the Bill Lee Act provided three exceptions that allowed longer carryforwards. Those three exceptions are:

1. Any unused portion of a credit with respect to a large investment may be carried forward for 20 years. A large investment is one where an eligible business purchases or leases, and places in service within a two-year period, $150 million worth of one or more of the following: real property, machinery and equipment, or central office or aircraft facility property.
2. Any unused portion of a credit with respect to the technology commercialization credit may be carried forward for 20 years. The General Assembly created the technology investment credit in 1999 as an alternative to the 7% credit for investing in machinery and equipment. The credit applies only to investments in machinery and equipment used in production based on technology licensed from a research university. The investments must be located in a tier one, two, or three county and must equal at least $10 million during the taxable year and must total at least $100 million over a five-year period.

[63] This is a new credit created by this act and is discussed further below.

3. Any unused portion of a credit may be carried forward for 10 years if the Secretary of Commerce certifies that the taxpayer will purchase or lease, and place in service in connection with an eligible business within a two-year period, at least $50 million worth of one or more of the following: real property, machinery and equipment, or central office or aircraft facility property. If the taxpayer fails to make the level of investment certified within the two-year period, the taxpayer forfeits the enhanced carryforward period.

This act (Section 7) creates two additional exceptions that allow longer carryforwards. Under this act, any unused portion of a credit with respect to research and development under G.S. 105-129.10 may be carried forward for 15 years. Additionally, any unused portion of a credit for substantial investment in other property[64] under G.S. 105-129.12A may be carried forward for 20 years. These changes are effective for taxable years beginning on or after January 1, 2002, and apply to credits that are first claimed on or after that date.

Statute of Limitations

Section 7 of the act establishes a statute of limitations so that Bill Lee Act credits cannot be taken more than six months after the deadline for filing the tax return (including extensions) on which they are claimed. This change is effective beginning with the 2001 tax year. In general, an overpayment may be refunded only if the discovery is made or the written request for a refund made within 3 years of the date set by statutes for filing the return or within 6 months of the date of the overpayment, whichever is later.

Bill Lee credits applications, fees, and reports

Under previous law, to claim a credit under the Bill Lee Act a taxpayer had to provide with the tax return the certification of the Secretary of Commerce that the taxpayer met all of the eligibility requirements with respect to each credit that the taxpayer claimed. This act (Sections 8 and others) eliminates the requirement that a taxpayer must get the certification of the Secretary of Commerce in order to claim a Bill Lee Act credit. Commerce will continue to establish enterprise tier and development zone designations and will make written determinations regarding the requirements for development zone projects, large investments, the investment amount for enhanced carryforwards, and the investment amount for the new credit for substantial investment in other property.

As amended by S.L. 2001-487, this change is effective for business activities occurring on or after January 1, 2002, and for business activities occurring before January 1, 2002, for which no application has been filed with the Department of Commerce by January 1, 2003. For business activities occurring before January 1, 2002, for which an application is filed with the Department of Commerce before January 1, 2003, special interim procedures are used. The taxpayer must file an application, along with any applicable fees, with the Department of Commerce. The Department of Commerce shall not make any determination regarding eligibility for the credits and shall not issue a certification, but shall instead mark the application as paid and return it to the taxpayer. The taxpayer must then submit the marked application to the Department of Revenue with the relevant tax return. The fees shall be divided between the two departments as under previous law. These interim procedures were put into place as the result of a compromise between the Department of Commerce and the Department of Revenue. Since the Department of Commerce's role in certification was being eliminated, that department wanted to end all

[64] This is a new credit created by this bill and is discussed further below.

association with certification as soon as possible. The Department of Revenue needed the interim period because that department had no feasible way to collect the fee during 2002.

Taxpayers will still pay the fee that is currently paid with the application, but under this act it must be paid to the Department of Revenue with the tax return filed for the year in which the eligible activity was engaged. The fee may be paid late, however, as long as it is paid before the credit is claimed.

Under Section 6 of this act, a taxpayer may seek an advisory ruling from the Secretary of Revenue regarding the taxpayer's eligibility for a credit. Such a ruling will help taxpayers determine in advance whether planned activity will qualify for a credit. This change became effective beginning with the 2002 taxable year.

Section 9 of this act changes the requirement that taxpayers report the number of development jobs that are filled by residents of development zones. This requirement now applies only to jobs located in development zones. This change became effective beginning with the 2002 taxable year.

Section 2 of the act provides that the Department of Commerce's equity and impact studies ("Luger Report") will be updated every two years. This change became effective November 29, 2001. Previously, the Department of Commerce was required to perform these studies only once and to report on them by April 1, 2001.

Section 8 of the act requires that more detailed information be published annually by the Department of Revenue, including an itemization of Bill Lee Act credits by individual taxpayer. Section 8 became effective beginning with the 2002 tax year.

Machinery and equipment credit changes

Section 10 clarifies how the threshold applies to taxpayers who invest in more than one tier. The threshold varies depending on the enterprise tier where the machinery and equipment are placed in service. Previous law stated that if machinery and equipment were placed in service in more than one area, the threshold applied separately to each area. The Department of Revenue had interpreted "area" to mean "enterprise tier area". Section 10 of this act clarifies that the threshold applies separately to each establishment of the taxpayer rather than to each enterprise tier area. An establishment is generally a site or location. Section 10 became effective for machinery and equipment placed in service on or after January 1, 2002.

Central office or aircraft facility property credit

Section 12 of this act removes a provision regarding the expiration of the credit for investing in central office or aircraft facility property. Under previous law, the credit for investing in central office or aircraft facility property expired if the total number of people employed at the taxpayer's central office or aircraft facilities Statewide fell by 40 or more. This provision applied only to the credit for investing in central office or aircraft facility real property – the other credits under the Act were not affected by a drop of 40 or more employees. Section 12 removes this provision. However, as is clarified in Section 6 of the act, the credit for investing in central office or aircraft facility property expires if the number of employees at the office or facility falls to below 40. Section 12 is effective for taxable years beginning on or after January 1, 2001.

New credit for substantial investment in other property

Section 13 creates a new credit under the Bill Lee Act for substantial investment in other real property. This credit is modeled upon the existing credit for investment in central office or aircraft facility property. There are, however, some notable differences between the two credits. In order

for the taxpayer to claim the credit for substantial investment in other property, the Secretary of Commerce must make a written determination that the taxpayer is expected to invest at least $10 million in real property at a location within a three-year period and that the location will create at least 200 new jobs within two years of the time that the property is first used in an eligible business. In contrast, there is no minimum investment amount for the credit for investing in central office or aircraft facility property. For both credits, the taxpayer may begin to claim the credit once the property is first used in an eligible business. The amount of the credit for substantial investment in other property is equal to 30 percent of the eligible investment amount and must be taken in installments over a seven-year period. There is no ceiling on the amount of the credit. In contrast, the credit for investing in central office or aircraft facility property is equal to seven percent of the eligible investment amount and has a ceiling of $500,000. The credit for substantial investment in other property expires if the number of people employed at the location falls below 200. As mentioned earlier, the carryforward period for the credit for substantial investment in other property is 20 years, whereas the carryforward period for the credit for investment in central administrative office or aircraft facility property is the standard five years. A taxpayer may not claim both the credit for substantial investment in other property and the credit for investing in central office or aircraft facility property with respect to the same property.

In several other sections of the act, conforming changes related to this new credit were made. This credit became effective for taxable years beginning on or after January 1, 2002, and applies to property first used in an eligible business on or after that date.

FedEx extension

In 1998, the General Assembly amended the Bill Lee Act and other tax laws to provide an incentive for the development of interstate air courier hubs. An air courier is an air carrier that delivers individually addressed letters, parcels, and packages. Examples of air couriers include UPS and Federal Express. One provision of that act granted a bidding law exemption for the Piedmont Triad Airport Authority. The exemption is effective for a five-year period beginning January 1, 1999, and applies to design and construction of an air freight distribution facility on airport property, and related supplies, equipment, and services. Section 16 of this act extends the period of that exemption for an additional four years, until January 1, 2008. This extension would benefit the Federal Express project in Greensboro. This change became effective November 29, 2001.

Sales tax on certain electricity

Section 17 of the act, as amended by S.L. 2001-487, reduces the sales tax on electricity sold to manufacturers. Currently, electricity that is sold to a manufacturer for use at a manufacturing facility and that is separately metered or measured is subject to the sales and use tax at a rate of 2.83% – most other sales of electricity are taxed at the rate of 3%. Section 17 enacts a new tax rate schedule that will apply to all manufacturers, based on volume of electricity used annually. Beginning January 1, 2002, each taxpayer will pay one rate on electricity throughout the year. The rate will be based initially on actual usage the previous year or, in the case of a new manufacturer, estimated usage for the current year. At the end of the year, if the taxpayer has used a volume of electricity that would qualify the taxpayer for a different rate, the taxpayer would be eligible for a refund of excess taxes paid or liable for a deficiency. Beginning on January 1, 2002, manufacturers who use more than 900,000 megawatt-hours of electricity annually will pay a rate of 0.17% while

all other manufacturers will continue to pay a rate of 2.83%. Beginning, July 1, 2005, the following rate schedule goes into effect[65]:

Megawatt-hours used annually	Rate
5,000 or less	2.83%
Over 5,000 and up to 250,000	2.25%
Over 250,000 and up to 900,000	2.00%
Over 900,000	.17%

This section also clarifies that electricity does not "enter into" or become a component part of tangible personal property that is manufactured and is not an accessory to equipment.

Section 15 of the act requires the Revenue Laws Study Committee to review the taxation of electricity and piped natural gas used by manufacturers.

Sales tax holiday amendments

Section 18 of the act incorporates certain definitions from the Streamlined Sales Tax Project into the sales tax holiday provision. The definitions of "clothing", "clothing accessories or equipment", "protective equipment", and "sport or recreational equipment" were not included in S.L. 2001-347, Senate Bill 144, because at the time that act became law there was no special treatment of these items for sales tax purposes. The enactment of the sales tax holiday in S.L. 2001-424, Senate Bill 1005, created an instance of differential treatment of these items. Handbags appear to be the only item negatively affected by this change – with this amendment they would no longer be exempt from sales tax during the sales tax holiday. Sport and recreational equipment would be included in the sales tax holiday; it is unclear if these items would be included under the sales tax holiday as enacted by S.L. 2001-424.

Pass-through entity allocation extension

Taxpayers are allowed an income tax credit of 20% of the expenses of rehabilitating an income-producing historic structure if the taxpayer qualifies for the federal credit. A pass-through entity may qualify for the rehabilitation credit and pass the credit on to its owners. A pass-through entity is an entity, such as a partnership, a limited liability company, or a Subchapter S corporation, that is treated as owned by individuals or other entities under federal tax law and whose income, losses, and credits are reported by the owners on their State income tax returns. Under the Code, tax credits are allocated among S corporation shareholders in accordance with their pro rata share of the corporation, which is determined on the basis of stock ownership, and tax credits are allocated among partners in a partnership in accordance with the partnership agreement. The allocation made by the partnership agreement must have a substantial economic effect, which means that the allocation agreement must reflect the economic interest of the partners in the partnership and cannot be based solely on tax consequences. Therefore, the allocation agreement of partners cannot give one partner 100% of the income, loss, or credits of the partnership. Generally, under North Carolina law, the pass-through entity is required to allocate a tax credit among its owners in the same proportion that other items, such as the federal rehabilitation credit,

[65] Under S.L. 2001-476, the number of megawatt-hours used to receive the lower rate was 1,200,000 and the effective date for the lower rate was July 1, 2002. S.L. 2001-487 reduced the number of megawatt-hours used to 900,000 and changed the effective date to January 1, 2002.

are allocated under the Code. In 1999, the General Assembly amended G.S. 105-129.35 to allow a pass-through entity to allocate this particular credit among its owners at its discretion. That change would have expired for taxable years beginning on or after January 1, 2002. This section extends that provision for an additional two years.

Technical, conforming, and clarifying changes

Section 6 of the act clarifies the forfeiture language of G.S. 105-129.4, as requested by the Department of Commerce. Section 6 and other sections remove references to Commerce "certifying" that taxpayers "will" make certain investments, and provides instead that Commerce will "determine in writing" that the taxpayer "is expected to" make the investment. In addition there are numerous other technical and conforming changes throughout the act related to the new credit for substantial investment in other property and to the elimination of the certification process.

Technical Correction Act

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-487	**HB 338**	**Representative Culpepper**

AN ACT TO MAKE TECHNICAL CORRECTIONS AND CONFORMING CHANGES TO THE GENERAL STATUTES AS RECOMMENDED BY THE GENERAL STATUTES COMMISSION; AND TO MAKE VARIOUS OTHER CHANGES TO THE GENERAL STATUTES AND SESSION LAWS.

OVERVIEW: This act makes technical corrections, conforming and other changes to various statutes and session laws. This summary covers those sections of the act that contain changes related to finance matters.

FISCAL IMPACT: The part of the act that reduces the megawatt-hour volume threshold for determining tax rates for electricity used by manufacturers and amends the effective date for this rate change reduces General Fund revenues for fiscal year 2001-02 by $322,000.

EFFECTIVE DATE: See the analysis.

ANALYSIS: Section 67 makes technical changes to S.L. 2001-430, Simplify Taxes on Telecommunications. It corrects statutory references and terminology and it amends G.S. 105-164.44F to provide for a tax distribution to cities served by a telephone membership corporation.[66] This section became effective January 1, 2002.

Section 68 provides that no highway use tax applies when a motor vehicle title is reissued to remove one or more co-owner's names as long as there is no consideration for the transfer. This change became effective December 16, 2001.

Section 69 deletes redundant language since the applicable oath requirement for tax returns is already contained in G.S. 105-252. It also exempts from sales tax telecommunications charges that would otherwise be inadvertently subjected to tax under S.L. 2001-430, Simplify Taxes on

[66] See the summary for S.L. 2001-430 for a more complete explanation of this tax law change.

Telecommunications, due to a change in definitions. These charges are paid by State agencies and local governments and are not taxed. This section became effective January 1, 2002.

Section 70 deletes a redundant word that was left in the statute due to a redlining error. This section became effective December16, 2001.

Section 118 repeals a section of S.L. 2001-427 that no longer has an effect since it amends a statute that has been subsequently repealed. It also corrects the introductory language of another section of the same session law to correctly reflect what is being set out for redlining. This section became effective December 16, 2001.

Section 119 amends a provision passed in the Current Operations and Appropriations Act of 2001 in order to clarify that the Utilities Commission has some flexibility in lowering rates, rather than being limited to lowering only basic local line rates by the exact amount of the reduced tax burden. This change related to the telecommunications changes enacted in S.L. 2001-430. This section became effective December 16, 2001.

Section 122 reduces the megawatt-hour volume threshold for determining tax rates for electricity received by industries or plants. It also amends the effective date for the electricity provisions of S.L. 2001-476, Bill Lee Act Changes.[67] This section becomes effective December 16, 2001, and applies to sales made on or after January 1, 2002.

Section 123 amends S.L. 2001-476 to eliminate the Department of Commerce's role in certifying applications for credits as soon as possible, but to still maintain a mechanism for the collection of fees paid in connection with the credits until the Department of Revenue can take over. This section became effective December 16, 2001.

Vehicle Transition/HMOs/Prepared Food

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-489	**HB 748**	**Representative Nesbitt**

AN ACT TO PROVIDE TRANSITIONAL PROVISIONS FOR THE REPEAL OF THE HIGHWAY USE TAX CAP ON NONCOMMERCIAL MOTOR VEHICLES, TO TEMPORARILY MODIFY THE TAXATION OF HMOS AND MEDICAL SERVICE CORPORATIONS, AND TO CLARIFY THE SALES TAX EXEMPTION FOR PREPARED FOOD.

OVERVIEW: This act contains the three provisions listed below:

- Section 1 provides that the repeal of the $1,500 highway use tax cap effective October 1, 2001, does not apply to vehicle titles issued pursuant to a sale or a contract entered into or awarded before October 1, 2001.
- Section 2 delays by one year the premiums tax equalization for HMOs and Medical Service Corporations, and makes up the revenue by one-time estimated payments and a slightly higher rate in 2003.

[67] See the summary for S.L. 2001-476 for a more complete explanation of this tax law change.

- Section 3 clarifies that prepared food is taxed the same under the Streamlined Sales and Use Tax Agreement, enacted earlier this session as S.L. 2001-347, as it was taxed under previous law. Section 3 also deletes part of a definition that would have inadvertently exempted alcoholic beverages served in restaurants from local meals taxes.

FISCAL IMPACT: No fiscal impact is expected as a result of the enactment of Section 1. Any refunds to be made are based on over collections that were not anticipated in S.L. 2001-424, the Appropriations Act

No fiscal impact is expected in FY 2001-02 as a result of Section 2 (premiums tax). The specifics of the new plan were designed in such a way that the new revenue produced for 2002-03 would be equal to the amount captured for that year under S.L. 2001-424. Thus this section is revenue neutral for 2002-03 with regard to the provisions adopted in that act. For future years it is difficult to determine the exact impact of either the prior change or the new provisions due to the uncertainty in the health insurance marketplace. For 2003-04 there might be a revenue loss (compared to S.L. 2001-424) due to the acceleration of estimated tax payments into 2002-03 to ensure revenue neutrality for that year.

Enactment of Section 3 in and of itself has no fiscal impact as it returns the definition to that anticipated in the original fiscal note for S.L. 2001-347. However, failure to enact this change would have resulted in a substantial revenue loss to the State by eliminating the State sales tax on all take-out, drive-thru, and delivery foodstuffs. Based on the 1997 Economic Census, Fiscal Research believes the minimum loss from not enacting this section of the act is as follows:

FY 2001-02	-	*$30.26 million*
FY 2002-03	-	*$62.84 million*
FY 2003-04	-	*$63.34 million*
FY 2004-05	-	*$65.72 million*
FY 2005-06	-	*$70.26 million*

This is only a minimum estimate as it does not include take-out from a full service restaurant or any other restaurant that is not primarily drive-thru, take-out, or delivery.

EFFECTIVE DATE: Section 1 and subsections a and b of section 2 became effective on December 19, 2001. Subsections f and g of Section 2 (premiums tax) are effective for taxable years beginning on or after January 1, 2004. The remainder of Section 2 is effective for taxable years beginning on or after January 1, 2003. Section 3 (prepared food) became effective January 1, 2002, and applies to sales made on or after that date.

ANALYSIS:

Motor Vehicle Transition

Section 1 of the act is a transitional provision regarding the repeal of the highway use tax cap on noncommercial vehicles. Section 34.24 of S.L. 2001-424 repealed the $1,500 highway use tax cap that applied to certificates of title issued for motor vehicles other than certain commercial motor vehicles. This repeal became effective for certificates of title issued on or after October 1, 2001. The budget became law on September 26, 2001, only a few days before the repeal of the tax cap went into effect. Some motor vehicle dealers complained that they sold or contracted to sell vehicles, including expensive recreational vehicles, before October 1, 2001, but did not apply for

the titles until after October 1. In these cases, they did not collect the additional tax from the purchaser but were liable to the State for the additional tax. Section 1 of this act provides that the repeal of the tax cap does not apply to titles issued as a result of a sale or a contract awarded or entered into before October 1, 2001.

Modify Taxation of HMOs and Medical Service Corporations

Section 2 of the act temporarily modifies the gross premiums tax on HMOs and Medical Service Companies. Section 34.22 of S.L. 2001-424 levied a gross premiums tax on HMOs and raised the rate of gross premiums tax on Medical Service Corporations. The rate for the 2002 tax year was to be 0.83% and the rate for 2003 and later tax years was to be 1%. Section 2 of the act changes that provision as follows:

- The tax changes are delayed from the 2002 tax year until the 2003 tax year.
- The tax rate for 2003 will be 1.1% and the tax rate for 2004 and later tax years will be 1%.
- For the 2003 tax year only, HMOs and Medical Service Corporations will pay the following estimated payments of the 2003 tax: 50% on April 15, 2003 and 50% on June 15, 2003, with true-up the following March 15. For subsequent tax years, the general law on installment payments of gross premiums tax will apply.

The HMO and medical service corporation industry requested this change because they had already sent their customers rate notices for the 2002 tax year that did not include the 0.83% rate for the 2002 tax year.

Clarify Sales Tax on Prepared Food and Meals Tax on Prepared Alcoholic Beverages

Under existing law, prepared foods that were prepared at a grocery store and sold in an unheated state were exempt from sales tax because they were eligible to be purchased for home consumption under the Federal Food Stamp Program. When the General Assembly enacted S.L. 2001-347, Streamlined Sales and Use Tax Agreement, it made the policy decision to tax candy, soft drinks, and prepared food in the same manner as under existing law. However, as the language in that act was drafted, some argued that it broadened the sales tax exemption for prepared food to include all take-out food items from restaurants and fast food chains and all catered food. These food items were taxable under existing law. An exemption for take-out food items would have resulted in a General Fund loss of approximately $60 million a year. Subsection 3(b) of this act rewrites the language in the Streamlined Sales and Use Tax Agreement to make it clear that only those food items that were exempt under existing law will be exempt under the Streamlined Sales and Use Tax Agreement.

In addition, under existing law, local meals taxes applied to the entire meal, including alcoholic beverages. When the definition of food was rewritten in S.L. 2001-347 the definition excluded alcoholic beverages because, for sales tax purposes, alcoholic beverages were not entitled to the food tax exemption. Because local meals tax laws were linked to the sales tax definitions, prepared alcoholic beverages (beer, wine, mixed drinks) would have been inadvertently exempted from local meals taxes effective January 1, 2002. Section 3 maintains the existing law by providing that local meals tax continues to apply to alcoholic beverages. The following local governments have a meals tax: Cumberland County; Dare County; Mecklenburg County; Wake County; Town of Hillsborough

Modify Vehicle Tax Refund & Tax Cap

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-497	**HB 72**	**Representative Allred**

AN ACT TO EXTEND THE DEADLINE FOR APPLYING FOR A RELEASE OR REFUND OF PROPERTY TAXES AFTER THE OWNER HAS SURRENDERED THE VEHICLE LICENSE PLATE, AND TO CAP THE HIGHWAY USE TAX ON CERTAIN RECREATIONAL VEHICLES AT $1,500 PER VEHICLE.

OVERVIEW: This act does two things:

- It extends from 120 days to one year the time a taxpayer has to request a refund for property taxes paid on a motor vehicle for which the taxpayer has surrendered the vehicle's registration plate.
- It places a maximum highway use tax of $1,500 on recreational vehicles that do not qualify for the existing $1,000 maximum tax.

FISCAL IMPACT: Due to a lack of data, the General Assembly's Fiscal Research Division cannot determine how many taxpayers do not file for the refund and/or release once the plates are surrendered or what proportion of those taxpayers who did not apply will apply under the extended timeline. As such, no formal estimate is possible. However, both the Division of Motor Vehicles and Fiscal Research believe the number of taxpayers that will take advantage of the deadline extension will be insignificant.

Based on sales data from the years 2000 and 2001 from 3 high volume RV dealerships, the total revenue gained from removing the $1,500 highway use tax cap on recreational vehicles is $842,811 in a full year. Passage of this bill for the nine months in FY 2001-02 will result in the loss of $632,000 to the Highway Trust Fund. The loss occurs because the anticipated gain from removing the cap in S.L. 2001-424 was transferred to the General Fund. While the cap was restored for recreational vehicles in this act, the General Fund transfer has not been reduced.

Applying the growth rates projected by the Office of State Budget and Management for the highway use tax, the future revenue loss is a follows:

Fiscal Year	Revenue
FY 2001-02	$ 632,000
FY 2002-03	$ 908,550
FY 2003-04	$ 961,246
FY 2004-05	$1,016,037
FY 2005-06	$1,068,871

EFFECTIVE DATE: The effective date of the extension of the deadline for requesting a refund was December 19, 2001. The effective date for the reapplication of the $1,500 cap on the highway use tax is retroactive to October 1, 2001

ANALYSIS:

Property Tax Change

An owner of a motor vehicle who a) either transfers the motor vehicle to another owner or moves out-of-state and registers the vehicle in another jurisdiction, and b) surrenders the registration plates from the vehicle to the Division of Motor Vehicles may apply for a release or refund of taxes on the vehicle for the full calendar months that remain in the vehicle's tax year. In 1995, the General Assembly extended the time period to apply for this refund or release to 120 days to give the taxpayer sufficient time to ask for a release or refund of taxes after the taxpayer received a property tax bill. This time period appeared to be sufficient except in instances where the tax bill was received late for some reason. Section 1 of this act extends the period of time a taxpayer has to request a refund for property taxes paid on a motor vehicle for which the taxpayer has surrendered the vehicle's registration plate from 120 days to one year.

A taxpayer who has a valid defense to a tax also has the ability to ask for a refund of a property tax at any time within five years after the tax first became due or within six months from the date the tax was paid, whichever is the later date. This time period is the same for real property, personal property, and motor vehicles. There are three valid defenses to the enforcement of the collection of a tax assessed upon property:

- The tax is imposed through clerical error.
- The tax is levied for an illegal purpose.
- The tax is an illegal tax.

The board of county commissioners holds the county tax collector accountable for the amount of taxes collected. Unpaid taxes on motor vehicles are often collected when DMV refuses to renew the vehicle's registration until the taxes are paid. The unpaid taxes may also be collected through the enforcement measures of levy, attachment, and garnishment. The tax collector has 10 years from the date the property taxes become due to begin enforcement proceedings. This statute of limitations is the same for all types of property. If the tax is uncollectible because the taxpayer is insolvent, the board of county commissioners may, in its discretion, relieve the tax collector of the responsibility of collecting the tax if the tax is five or more years past due. This time period is shortened to one year for motor vehicles when the board finds that the taxes are uncollectible.

Highway Use Tax Change

Section 34.24 of the Current Operations and Appropriations Act, S.L. 2001-424, repealed the $1,500 highway use tax cap that applied to certificates of title issued for motor vehicles other than certain commercial motor vehicles. Class A and Class B commercial motor vehicles are subject to a $1,000 highway use tax cap. The Attorney General's office has written a letter indicating that recreational vehicles that weigh more than 26,000 pounds qualify as Class B commercial motor vehicles, and so are subject to the $1,000 tax cap. Section 2 of this act restores a $1,500 Highway Use Tax cap for lighter recreational vehicles, which are not subject to the $1,000 cap because they do not qualify as commercial vehicles. Section 2 is effective retroactively to October 1, 2001, so that a $1,500 cap applies to non-commercial recreational vehicles both before and after the removal of the $1,500 tax cap for other vehicles. The maximum tax of $1,500 on certain

recreational vehicles means that a vehicle valued at over $50,000 does not pay the highway use tax at a full 3% rate because the cap is reached once the vehicle's value reaches $50,000.

Amend Use Value Statutes

Session Law #	Bill #	*Sponsor*
S.L. 2001-499	**HB 1427**	**Agriculture Committee**

AN ACT TO AMEND THE PRESENT-USE VALUE STATUTES AND TO ESTABLISH THE PROPERTY TAX STUDY COMMISSION.

OVERVIEW: The act makes two changes to the present-use value statutes:

- It provides that the owner of land classified as agricultural land, horticultural land, or forestland can transfer the property, regardless of whether the new owner already has property in the classification, without losing the property's use value tax status.
- It allows the owner of land classified as agricultural land, horticultural land, or forestland to prepay any deferred taxes that are lien on the property.

The act also authorizes a Property Tax Study Commission.

FISCAL IMPACT: There is no General Fund impact due to this act. The estimated fiscal impact to local governments cannot be determined.

EFFECTIVE DATE: January 1, 2002.

BACKGROUND: Property tax law provides that unless property is exempted or classified for special tax treatment, it is to be taxed at its market value. Agricultural land, horticultural land, and forestland may be classified as a special class of property and taxed at their value in the land's present use as agricultural land, horticultural land, or forestland. The special classification for farm property was enacted in the 1970s to help preserve family farms. The difference between the taxes due on the present use value treatment and the taxes that would have been payable in the absence of this special treatment, together with any interest, penalties, or costs, are a lien on the property. The difference in taxes is carried forward in the records of the taxing unit as deferred taxes. The deferred taxes for the preceding three years become payable whenever the property loses its eligibility for the benefit of the special use value law.

ANALYSIS: Section 1 of the act expands the applicability of the use-value program to farmer-to-farmer transfers. Under current law, the property must be the owner's residence on have been owned by the person for four years before the property can be classified in the use-value program. When an owner transfers property to a person who does not qualify for the use-value program, then the previous owner is responsible for paying the deferred taxes. Prior to the act, there was an exception to the four-year ownership requirement, if the new owner owned other property classified in the use-value program. In this situation, the deferred taxes would still be due but the property could immediately qualify for use value in the hands of the new owner. Section 1 expands this exception in two ways. First, it removes the requirement that the new owner have other property classified in the use-value program. However, the new owner must acquire the land for the purposes of and continue to use the land for the purposes it was classified under the use-value program. Second, the deferred taxes d not become due; instead, the new owner is liable

for the deferred taxes. The years of deferred taxes, plus the current year's taxes including interest and penalties, on the classified property become due when the property no longer qualifies for the classification.

Section 2 of the act clarifies that a person may pay the deferred taxes for any given year for that year without the qualifying land becoming ineligible for use-value status. This prepayment of deferred taxes may be a helpful planning tool for a person who is planning to transfer the land in the near future to a person who does not meet the ownership requirements or to use the land in the future in a way that does not meet the use requirements.

Section 3 of the act establishes the Property Tax Study Commission. Both the Speaker of the House and the President Pro Tempore of the Senate may appoint eight members each: four legislative members and four public members. The Committee may submit a report to the 2002 Regular Session and must submit a report on or before the convening of the 2003 Session. The Committee may study all of the following issues:

General Property Tax Issues

Examine all classifications of property, including the taxability of nonprofit charitable hospitals, as well as other exemptions and exclusions of property from the property tax base.

Present-Use Value Issues

Study the present-use value system, including the following:

- Examine the implementation and application of the current use value statutes
- Evaluate other tax credits, including adjustments to and credits for ad valorem taxes, to encourage agricultural, forestry, and horticultural use of land.
- Evaluate the treatment of undeveloped land in ad valorem tax.
- Evaluate the possibility of tax incentives to encourage conservation and environmental protection of land. The study must include the feasibility of allowing forestland managed for conservation purposes and the preservation of wildlife habitats to be taxed at its present-use value.
- Review other issues related to the taxation of agricultural, horticultural, and forestland, including reducing the acreage requirement for land to qualify as forestland.

Certain Manufactured Homes Real Property

Session Law #	Bill #	*Sponsor*
S.L. 2001-506	**HB 253**	**Representative Brubaker**

AN ACT TO PROVIDE THAT MANUFACTURED HOMES NEED NOT HAVE MULTIPLE SECTIONS TO QUALIFY AS REAL PROPERTY FOR PROPERTY TAX PURPOSES, TO REQUIRE AN OWNER TO SURRENDER CERTIFICATE OF TITLE WHEN THE MANUFACTURED HOME BECOMES REAL PROPERTY, AND TO

REQUIRE AN OWNER TO FILE EVIDENCE OF THE SURRENDER OF TITLE WITH THE REGISTER OF DEEDS.

OVERVIEW: The act makes the following changes to the laws regarding the classification of a manufactured home as real property:

- Amends the definition of "real property" in the property tax laws by removing the requirement that a manufactured home must have multiple sections to be considered real property.
- Codifies the current policy of the Division of Motor Vehicles (DMV) requiring an owner of a manufactured home to submit an affidavit and surrender the certificate of title to DMV when the manufactured home becomes real property under the property tax laws.
- Requires the owner of real property who has surrendered the certificate of title to a manufactured home on the real property and submitted an affidavit to DMV to then file the returned affidavit in the officer of the register of deeds where the property is located.
- Allows the owner of real property on which an untitled manufactured home has been or will be placed to file a declaration of intent to place a manufactured home on the real property and to convey or encumber the real property, including the manufactured home.

FISCAL IMPACT: There is no General Fund impact due to this act. The fiscal impact to local governments cannot be determined.

EFFECTIVE DATE: The change to the definition of "real property" in the property tax laws is effective for taxes imposed for taxable years beginning on or after July 1, 2002. The remainder of the act became effective January 1, 2002, and applies to manufactured home title cancellations and to declarations of intent, deeds, deeds of trust, and other instruments recorded after that date.

BACKGROUND: Since 1987, North Carolina law has provided that a residential manufactured home constitutes "real property" for property tax purposes if it meets the following requirements: is multi-sectioned (two or more sections); has the moving hitch, wheels, and axles removed; and has been placed on a permanent foundation on land owned by the owner of the home. Manufactured homes, in many cases, are titled by DMV through the issuance of a certificate of title. When a home is treated as real property for property tax purposes, the owner will often apply to DMV to cancel the title, as the financing may be obtained through a real estate mortgage recorded in the local register of deeds office, rather than a personal property lien reflected on the title. DMV has developed an informal procedure for canceling these titles upon the owner's request, and with the consent of the lender. DMV, the manufactured housing industry, mortgage lenders, title insurance companies, and real estate closing attorneys have been interested in clarifying this procedure and enacting it into law. This act codifies and clarifies the procedure.

ANALYSIS: Under prior law, the tax assessor was to consider the manufactured home as real property for property tax purposes if it was a multi-section residential structure; had the moving hitch, wheels, and axles removed; and was placed upon a permanent enclosed foundation on land owned by the owner of the home. Section 1 removes the multi-section requirement from the definition of "real property" in G.S. 105-273. Section 1 also clarifies that a residential manufactured home will be considered tangible personal property if the moving hitch, wheels, and axles are still intact, and the home has not been placed on a permanent foundation on land owned by the owner of the home. This change will allow for a more uniform procedure for determining whether a manufactured home is real or personal property for tax purposes.

Section 2 of the act codifies the current policy of the DMV to require an owner of a manufactured home to submit an affidavit and surrender the certificate of title to DMV when the manufactured home meets the definition of real property under G.S. 105-273. The affidavit must contain information of the manufacturer, vehicle identification number and serial number of the home, legal description of the property on which the home is placed, any security interests in the home, and the Division's notation that the title has been surrendered and cancelled. After canceling the title, DMV must return the original affidavit to the owner. The owner must then file the affidavit in the office of the register of deeds where the owner's real property is located. Section 2 also provides for a procedure to apply for a new certificate of title if the owner later seeks to remove the manufactured home from the real property. A violation of section 2 is a civil penalty of up to $100 to be imposed in the discretion of the Commissioner of Motor Vehicles. This change was enacted to prevent manufactured home owners from attempting to have their homes assessed as personal property once the homes became affixed to the owner's real property and met the other requirements of "real property" in G.S. 105-273.

Sections 3 and 4 of the act, add new provisions to Chapter 47 (Probate and Registration) of the General Statutes regarding filing documents with the register of deeds when a manufactured home becomes attached to real property or will become attached to real property. Section 3 requires an owner of real property who has filed an affidavit and surrendered a certificate of title to a manufactured home on the real property to DMV, to then file the returned affidavit with the office of the register of deeds. Once this affidavit is recorded, the manufactured home is considered an improvement to real property, and all existing liens on the real property are considered to include the manufactured home.

Section 4 of the act adds a provision to Chapter 47 that allows the owner of real property on which an untitled manufactured home has or will be placed to file a declaration of intent to place a manufactured home on the real property and to convey or encumber the real property, including the manufactured home. A manufactured home may not have been titled in a situation where there is a new manufactured home and the buyer and seller intend for the home to be located on a permanent foundation and sold and financed as a real estate transaction. Section 4 allows the owner of the real property to record a declaration of intent that contains the same information that would be required in an affidavit submitted to DMV if that home had been previously titled. Upon filing of the declaration of intent, the manufactured home is treated as an improvement to the real property. Therefore, all liens or mortgages against the real property will include the manufactured home.

Corporate Asset Transfers

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-508	**HB 168**	**Representative Culpepper**

AN ACT TO PERMIT A CORPORATION TO TRANSFER ASSETS TO A WHOLLY OWNED UNINCORPORATED ENTITY, AS RECOMMENDED BY THE GENERAL STATUTES COMMISSION, TO AMEND THE INDEMNIFICATION PROVISIONS OF THE PATIENT'S BILL OF RIGHTS, TO SUPPORT TROOPS

PARTICIPATING IN OPERATIONS ENDURING FREEDOM AND NOBLE EAGLE, AND TO PERMIT LEAVE FOR DISASTER SERVICE VOLUNTEERS.

OVERVIEW: This act makes the changes listed below. This summary addresses in detail only those provisions of the act that affect the tax laws.

- Permits the board of directors of a corporation to transfer corporate assets to a wholly owned limited liability company, limited partnership, registered limited liability partnership, or other unincorporated entity without the approval of the shareholders. (Section 1)
- Amends the indemnification provisions of the Patient's Bill of Rights. (Section 2)
- Supports troops participating in Operations Enduring Freedom and Noble Eagle by authorizing the Governor to waive deadlines, fees, and penalties; extending applicable deadlines for paying property taxes and listing property for taxation; and allowing community college and UNC system refunds and waiver of legislative tuition grants to deployed students who are unable to complete the semester. (Sections 3 – 5 and 7 – 9)
- Permits State agencies to grant State employees who are certified Red Cross volunteers paid leave from work to assist with disaster relief. Under prior law, leave was permitted only for services related to a disaster occurring with the State. The act permits paid leave to employees providing services related to a disaster occurring anywhere within the United States. (Section 6)

FISCAL IMPACT: Under certain circumstances, there could be tax advantages to transferring corporate assets to an unincorporated entity. However, many of these potential tax advantages were removed with the enactment of S.L. 2001-327. As a result, the North Carolina Department of Revenue does not believe passage of this legislation, in and of itself, will substantially affect State revenue. While there is a potential for a fiscal loss as an indirect consequence of the act, that impact is expected to be minimal. No estimates were available on the fiscal impact of the remaining sections of the act.

EFFECTIVE DATE: Section 2 (indemnification rights) is effective July 1, 2002; the remainder of the act became effective on December 19, 2001, the date the bill became law. Section 1 of the act applies to transfers occurring on or after that date.

ANALYSIS:

Corporate Asset Transfers

Section 1 of this act expands the types of entities to which the board of directors of a corporation can transfer corporate assets without shareholder approval to include wholly owned unincorporated entities. The term "unincorporated entity" is defined in the North Carolina Business Corporation Act to mean domestic or foreign limited liability companies, domestic or foreign limited partnerships, registered limited liability partnerships, and other partnerships. The articles of incorporation or the bylaws of the parent company could still prohibit such a transfer. This section was a recommendation of the General Statutes Study Commission.

Support Troops/Civil Relief

Section 5 of this act extends property tax deadlines for military personnel called to active duty as a result of the terrorist attacks on September 11, 2001. Section 5(a) provides that these individuals are allowed 90 days after the end of their deployment to pay property taxes that became due or delinquent during the deployment. If the taxes are paid within this 90-day period, no interest is due. Section 5(b) of the act provides that deployed military personnel are allowed 90 days after the end of their deployment to list for taxation property that was otherwise required to be listed during their deployment. If the property is listed within this 90-day period, no penalties for failure to list apply.

No Tax on Newspapers Sold in Vending Machines

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-509	**SB 400**	**Senator Hoyle**

AN ACT TO TREAT NEWSPAPER VENDING MACHINES AS STREET VENDORS FOR SALES TAX PURPOSES.

OVERVIEW: This act exempts all sales of newspapers sold through vending machines from sales and use tax.

FISCAL IMPACT: Data are not available to estimate the fiscal impact of this act. However, it is expected the impact of this act will be relatively small given the limited number of papers sold through stand alone machines and the fact that all vending machine sales that were primarily taxable were subject to only 50% of the tax rate.[68]

EFFECTIVE DATE: January 1, 2002.

ANALYSIS: This act exempts all sales of newspapers through vending machines from sales and use tax. Confusion had arisen about the tax status of newspapers sold through vending machines at convenience stores, shopping areas, and malls. This act simplifies the taxation issue by exempting all sales of newspapers sold through vending machines.

Newspapers sold by a street vendor are specifically exempt from sales and use tax. Prior to January 1, 2002, the taxability of newspapers sold through vending machines depended upon whether the vending machine could be considered analogous to a "street vendor". Under the Department of Revenue's longstanding interpretation of the law, vending machines located in public areas, such as shopping centers and malls, airport terminals, train stations, bus stations, and other locations that were not inside or on the premises of a store or business, were considered a form of "street vendor". As such, the sale of newspapers through those machines was exempt from tax. However, newspapers sold through vending machines located inside or on the premises of a store or business were not considered analogous to a "street vendor" and therefore those sales were subject to tax.

The issue became more pronounced when the Department of Revenue began to consider the sale of newspapers through vending machines located inside or on the premises of a business in its sales tax audits of those businesses. As a result of the confusion on this issue, the Department agreed not to pursue any of these taxes before April 1, 2001, and not to attempt to collect back taxes prior to this date.

[68] G.S. 105-164.13(50).

Tax Revenue for Turfgrass Research

Session Law #	*Bill #*	*Sponsor*
S.L. 2001-514	**HB 688**	**Representative Gibson**

AN ACT TO TAX THE SALES OF FERTILIZERS AND SEED TO NONFARMERS AND TO APPROPRIATE REVENUES FOR TURFGRASS RESEARCH AND EDUCATION AND THE SAVINGS RESERVE ACCOUNT.

OVERVIEW: This act does three things:

- It imposes a 6.5% State and local sales tax on fertilizers and seed sold to consumers other than farmers.
- It appropriates $700,000 from the General Fund for each year in the 2001-03 biennium budget for turfgrass research and education.
- It credits $750,000 from the General Fund to the Savings Reserve Account in fiscal year 2001-02.

FISCAL IMPACT: The fiscal impact of the act is as follows:

	FY 2001-02	*FY 2002-03*	*FY 2003-04*	*FY 2004-05*	*FY 2005-06*
General Fund	$2,305,937	$6,271,702	$5,745,039	$5,867,577	$5,990,116
NCSU	(600,000)	(600,000)			
Dept. of Ag.	(100,000)	(100,000)			
Savings Res.	(750,000)	-	-	-	-
Net General Fund	$855,937	$5,571,702	$5,745,039	$5,867,577	$5,990,116

EFFECTIVE DATE: The act is effective February 1, 2002.

ANALYSIS: This act imposes the 6.5% State and local sales tax on seeds and fertilizers sold to non-farmers.[69] Prior to the enactment of this act, fertilizers used for agricultural purposes and seeds were not subject to State or local sales tax. The General Assembly enacted this exemption when farmers primarily used these items. Today, non-farmers purchase an increasing volume of these items.

The act appropriates $700,000 from the General Fund for each of the two fiscal years in this biennium for turfgrass research and education. Of this amount, $600,000 is appropriated to The University of North Carolina to be allocated to North Carolina State University (NCSU). The remaining $100,000 is appropriated to the Department of Agriculture and Consumer Services for

[69] The Governor's Loophole Study Commission and the Governor recommended this provision to the General Assembly. The Senate included it as one of its revenue raising items in its budget bill, the 3rd Edition of SB 1005.

the purpose of educating the public on the results of the research conducted by the Center for Turfgrass Environmental Research and Education at NCSU.

NCSU estimates that it needs approximately $1,000,000 annually to support current turfgrass research at the University. It has not received an appropriation of more than $200,000 for this purpose. This act provides $600,000 for this funding need. The remaining $400,000 will come from the turfgrass industry and other private sources.

NCSU approved the establishment of the Center for Turfgrass Environmental Research and Education in March 2001. The Center will be the focus of turfgrass research activities at NCSU. It will be established as a partnership with the North Carolina turfgrass industry and serve a key educational role in communicating with the turfgrass community and the general public. The Center will be the first of its kind; one of its goals is to position the Turfgrass Program in North Carolina at the forefront of turfgrass research and education in the United States.

A faculty member at NCSU will serve as the Director of the Center. The Director will coordinate research and on-site extension activities. An "Industry Advisory Board" will meet annually to review research and outreach efforts and offer suggestions on focus, impact, and directions for the new program. The Board will set priorities and make decisions on project funding. The Board will be composed of leaders in the turfgrass industry. This act specifies that the Board must include representatives from NCSU and NC A&T University. The Board may receive requests for funding proposals from both NCSU and NC A&T University.

The act provides that the Board of Governors and the Commissioner of Agriculture must report to the Joint Legislative Commission on Governmental Operations and to the Fiscal Research Division by November 1, 2002, on the use of the funds allocated to the Center for Turfgrass Education and Research and the sharing of the research with the other constituent institutions.

Lastly, the act requires the State Controller to credit $750,000 from the General Fund to the Savings Reserve Account by June 30, 2002. The Savings Reserve Account is a restricted reserve in the General Fund. The funds in the Savings Reserve Account cannot be used unless the use has been approved by an act of the General Assembly.

EXTEND SUNSET ON STATE PORTS TAX CREDIT

Session Law	*Bill #*	*Sponsor*
S.L. 2001-517	**HB 1388**	**Representative Hurley**

AN ACT TO EXTEND THE SUNSET ON THE STATE PORTS TAX CREDIT.

OVERVIEW: This act extends the sunset on the credit for North Carolina State Ports Authority wharfage, handling, and throughput charges to January 1, 2003.

FISCAL IMPACT: The act is expected to reduce General Fund revenues $657,000 annually.

EFFECTIVE DATE: The bill is effective for taxable years beginning on or after March 2, 2000. The bill is effective retroactive to March 2, 2000, so that the availability of the credit remains uninterrupted.

ANALYSIS: This act extends the sunset on the State Ports tax credit an additional 34 months. Before the enactment of this act, the credit expired for tax years ending on or before February 28, 2001.

The State Ports Authority tax credit is allowed to a taxpayer who loads or unloads waterborne cargo from an ocean carrier at the State-owned port terminal at Wilmington or Morehead City. The credit is allowed against the taxpayer's income tax. The taxpayer may be either an individual (G.S. 105-151.22) or a corporation (G.S. 105-130.41). The amount of the tax credit is equal to the amount of wharfage, handling, and throughput charges paid to the North Carolina State Ports Authority in the taxable year that exceeds the average amount of charges paid to the Authority for the current tax year and the two previous tax years. The credit is limited to 50% of the tax imposed on the taxpayer for the taxable year. Any excess credit may be carried forward and applied to the taxpayer's income tax liability for the next five years. The maximum cumulative credit that one taxpayer may claim is $2 million.

In 1992, the General Assembly enacted the State Ports income tax credit to encourage exporters to use the two State-owned port terminals at Wilmington and Morehead City. When enacted, the credit applied to amounts paid by a taxpayer on any cargo exported at either port. In 1994, the General Assembly expanded the credit to include all amounts assessed on exported cargo, regardless of who paid the shipping costs. In 1995, the General Assembly expanded the credit to include some imports by allowing a credit for break-bulk cargo and container cargo imported at either Wilmington or Morehead City and for bulk cargo imported at Morehead City. It did not allow a credit for bulk cargo imported at Wilmington. In addition, the credit for bulk exports was then limited to bulk exports at only the Morehead City terminal. In 1996, the General Assembly expanded the State ports income tax credit to include the importing and exporting at either terminal of one specific type of bulk cargo: forest products. All imports and exports of bulk cargo at the Morehead City terminal were already covered, so the effect of this change was to allow a credit for forest product imports and exports at the Wilmington terminal. In 1997, the General Assembly extended the sunset of the State ports income tax credit from February 28, 1998 to the taxable year ending on or before February 28, 2001, and increased the maximum cumulative credit from $1 million to $2 million per taxpayer. This increase became effective for taxable years beginning on or after January 1, 1998.

Although not defined by the relevant statutes, the various types of cargo differ as follows:

- Bulk cargo is a type of commodity that is loose and usually stockpiled. Examples of this type of commodity include coal, grain, salt, and wood chips.
- Break-bulk cargo consists of commodities that are packaged and stored on pallets or in cases that must be handled and stacked onto a ship by hand, crane, etc. Break-bulk cargo also includes machinery,
- Container cargo consists of commodities that are packaged in a metal trailer box that can be locked onto a tractor-trailer chassis and then detached and put on a ship without any other handling.

2000 Tax Law Changes

REFORM LOCAL TAX ON RENTAL CARS

Session Law #	Bill #	Sponsor
S.L. 2000-2	SB 1076	Senator Cooper

AN ACT TO REPEAL THE PROPERTY TAX ON CERTAIN VEHICLES LEASED OR RENTED UNDER RETAIL SHORT-TERM LEASES OR RENTALS AND TO REPLACE THE TAX REVENUE WITH A LOCAL TAX ON GROSS RECEIPTS DERIVED FROM RETAIL SHORT-TERM LEASES OR RENTALS.

OVERVIEW: This act repeals the property tax on vehicles owned and offered for short-term rental by someone engaged in the business of renting vehicles to the public, and enacts in its place local option county and city gross receipts taxes on short-term vehicle rentals.[1]

FISCAL IMPACT: There is no General Fund or Highway Fund impact. The property tax exemption will result in an annual loss to local governments of at least $5.6 million. Because the county and city gross receipts taxes are local option, it is not known how much revenue they would generate.

EFFECTIVE DATE: July 1, 2000.

BACKGROUND & ANALYSIS: This act excludes from property tax vehicles[2] that are offered at retail for short-term lease or rental, if the vehicle is owned or leased by an entity engaged in the business of leasing vehicles short-term to the general public. A short-term lease or rental is a lease or rental for fewer than 365 continuous days. Under prior law, rental car businesses paid property taxes on their vehicle inventory.

The act replaces the property tax on short-term rental inventory with a local option gross receipts tax. Long-term rental inventory remains subject to property tax. In order to recover its revenue lost due to the property tax exclusion, each county and each city may levy a gross receipts tax of up to 1.5% on short-term vehicle rentals. A vehicle is defined as any of the following:

- A passenger-type vehicle (including vans and sports utility vehicles).
- A cargo-type vehicle other than (1) a truck over 26,000 pounds, (2) a truck used to transport commercial freight, or (3) a truck that requires the driver to have a commercial drivers license.
- A trailer or semitrailer under 6,000 pounds.

---

[1] Technical corrections were made to this act by S.L. 2000-140.
[2] The term "vehicle" is not defined for purposes of the property tax exclusion.

The tax would be collected and retained by the taxing city or taxing county and would apply to agreements under which the customer takes possession of the vehicle in the taxing city or county. The taxing city or county would administer the local gross receipts tax in the same manner as the sales tax and the alternate highway use tax on rental vehicles. The taxing city or county would have the same collection powers that the Secretary of Revenue has in collecting local sales taxes, and the same penalties and remedies would apply. The act provides that the tax will be passed on to the customer. The lease or rental agreement must specify the rate of the local gross receipts tax being charged.

The act requires the Fiscal Research Division to determine the total amount of revenue generated by local gross receipts taxes authorized by the act and compare that to the total amount of ad valorem taxes that would have been generated if the act had not excluded short-term rental vehicles. The Fiscal Research Division must report its findings to the 2003 session.

BONDS FOR HIGHER EDUCATION

Session Law #	Bill #	Sponsor
S.L. 2000-3	SB 912	Senator Rand

AN ACT TO (1) TO AUTHORIZE THE ISSUANCE OF THREE BILLION ONE HUNDRED MILLION DOLLARS GENERAL OBLIGATION BONDS OF THE STATE, SUBJECT TO A VOTE OF THE QUALIFIED VOTERS OF THE STATE, TO PROVIDE FUNDS FOR CAPITAL IMPROVEMENTS FOR THE UNIVERSITY OF NORTH CAROLINA AND GRANTS TO COMMUNITY COLLEGES FOR CAPITAL IMPROVEMENTS AND (2) TO AUTHORIZE THE BOARD OF GOVERNORS OF THE UNIVERSITY OF NORTH CAROLINA TO ISSUE SPECIAL OBLIGATION BONDS FOR IMPROVEMENTS TO THE FACILITIES OF THE UNIVERSITY OF NORTH CAROLINA AND FOR THE UNIVERSITY OF NORTH CAROLINA HOSPITALS AT CHAPEL HILL AND OTHER FACILITIES OF THE UNIVERSITY OF NORTH CAROLINA HEALTH CARE SYSTEM.

OVERVIEW: This act known as the Michael K. Hooker Higher Education Facilities Finance Act, creates a new Chapter 116D of the General Statutes to establish the following mechanisms for debt financing of higher education facilities:

- It authorizes the State to issue general obligation bonds to finance $2.5 billion of capital facilities for the University of North Carolina and $600 million of capital facilities for community colleges. The bonds would be subject to approval by the voters in the November 2000 statewide general election.
- It authorizes the UNC Board of Governors to issue special obligation bonds to finance capital facilities for the University. The University's receipts other than tuition or

appropriations from the General Fund would secure the bonds. S.L. 2000-168 sets forth the first projects that will be funded by special obligation bonds.

FISCAL IMPACT: The act limits the maximum amount of general obligation bonds that may be issued each year for the next six fiscal years. The debt service costs paid from the State General Fund will be $28.7 million for fiscal year 2001-2002, increasing to $194.9 million by fiscal year 2004-2005.

EFFECTIVE DATE: The act became effective May 25, 2000.

BACKGROUND & ANALYSIS: Eva Klein, consultant to the Board of Governors for the study of the equity and adequacy of capital facilities, prepared a report detailing the deterioration of the current facilities of The University of North Carolina. In response to this report, the General Assembly began considering a significant bond proposal in 1999. The Speaker and the President Pro Tempore appointed a conference committee towards the end of the 1999 Session to consider the differences between the houses on the bond bill. During the interim, a Joint Select Committee on Higher Education Facilities Needs met and toured various campuses within the University of North Carolina and the North Carolina Community College System. Shortly after the convening of the 2000 Session, the General Assembly enacted this act.

This act creates two different funding mechanisms to finance higher education facilities. First, it authorizes the State to issue $3.1 billion of general obligation bonds to finance capital facilities for the University of North Carolina and for community colleges. The voters in the November 2000 statewide general election must approve the bonds before they may be issued. The UNC projects that can be financed with the bond revenues are set out in this act. Second, it authorizes the UNC Board of Governors to issue special obligation bonds to finance capital facilities for the University. The bonds would not be subject to a referendum because they are not secured by the taxing power of the State. The University's receipts other than tuition or appropriations from the General Fund would secure the bonds. Although this act does not authorize any particular projects, S.L. 2000-168 gives legislative approval for at least one project financed with special obligation bond revenues. The act also imposes reporting requirements to allow the General Assembly to monitor all aspects of the proposed bonds.

General Obligation Bonds

Article 2 of the new Chapter 116D created by this act authorizes the State to issue university improvement general obligation bonds to acquire, construct, and improve University property and Article 4 of the new Chapter 116D authorizes the State to issue community college general obligation bonds to acquire, construct, and improve community college property. Both bonds must be approved by the voters of the State in a single ballot question in November 2000. If a majority of those voting on the question do not approve the bonds, neither the UNC bonds nor the Community College bonds can be issued.

The university improvement general obligation bonds would be used for construction, improvement, and acquisition of capital facilities for constituent and affiliated institutions of The University of North Carolina, including the Center for Public Television, the UNC Health Care System, the School of Science and Mathematics, and the North Carolina Arboretum. Similarly, the community college general obligation bonds would be used for grants to community colleges for construction, improvement, and acquisition of their capital facilities. The act specifically defines capital facilities as buildings, utilities, structures, and other facilities and property developments, including streets, landscaping, equipment, and furnishings in connection with a building project,

and land acquisition. The facilities may include physical education facilities, housing, and administrative offices as well as educational buildings.

The bonds would be issuable by the Treasurer only to fund allocations established by the General Assembly; those allocations are set out in this act. The act limits the amount of bonds that may be issued each year over six years as follows:

FISCAL YEAR	UNIVERSITY	COMMUNITY COLLEGES
2000-2001	$201,600,000	$ 48,400,000
2001-2002	241,900,000	58,100,000
2002-2003	483,900,000	116,100,000
2003-2004	483,900,000	116,100,000
2004-2005	564,500,000	135,500,000
2005-2006	$524,200,000	$125,800,000

The full faith and credit and the taxing power of the State would secure the proposed general obligation bonds; a statement to this effect would appear on the face of the bonds. These general obligation bonds would be repaid from the General Fund. The maximum maturity on the bonds would be 25 years.

The allocations established in the act include a $25 million reserve for repair and renovations and cost overruns. If the cost of a project changed, the Board of Governors could reallocate funds from one project to another, but only between projects at the same institution. The act states the intent of the General Assembly that the repairs and renovations shall preserve the historical and architectural fabric of the buildings.

The act also sets out the amount allocated to sites at each community college for new construction and for repairs and renovations and requires that the allocations must be used in accordance with the State Board of Community Colleges' funding formulas for new construction needs and repair and renovation needs at each community college. A community college could reallocate to another site new construction funds that the consultant's report allocates to a specific site only if (1) the community college finds that the funds are not needed at the site for which the report allocates them and (2) the State Board approves the reallocation, except that funds allocated to a site away from the main campus county may not be reallocated back to the main campus county. Bond proceeds allocated for repair and renovations could be used only for repair and renovations, but bond proceeds allocated for new construction could be used either for new construction or for repair and renovations. The local board of trustees is directed to allocate repair and renovation funds in accordance with need, subject to approval by the State Board of Community Colleges.

Under general law, community colleges are required to match State capital funds on a dollar-for-dollar basis. The act provides three limited exceptions to this requirement for the bond proceeds. First, bond proceeds allocated for repair and renovations need not be matched. Second, community colleges that the consultant's report determined had a matching ability of less than 40%, based on ability to pay, need not match allocations for new construction. Third, community colleges which the consultant's report determined had a matching ability of 40% or more must

match new construction allocations only at the matching ability percentage assigned to them in the report. If any community colleges could not meet their matching requirements by July 1, 2006, the funds that were not matched would be pooled and reallocated among those community colleges that had met their requirements, based on capital improvement needs determined by the State Board of Community Colleges.

Under current law, a community college project in the amount of $100,000 or more is subject to approval and supervision by the State Construction Office under G.S. 143-341. An exception created under this act limits the approval and supervision requirement for bond-funded projects to those that exceed $250,000.

UNC Special Obligation Bonds

Article 3 of the new Chapter 116D created by this act authorizes the UNC Board of Governors to issue a second type of self-liquidating bonds, known as special obligation bonds. Prior to the enactment of this act, the Board of Governors could issue revenue bonds. Revenue bonds are payable from rentals, charges, fees, and other revenues, such as gifts. This act broadens the authority of the Board by allowing it to issue special obligation bonds payable with any sources of income or receipts of the Board of Governors or a constituent or affiliated institution, but not including tuition payments or appropriations from the General Fund. Special obligation bond proceeds may be used for construction, improvement, and acquisition of any capital facilities located at UNC constituent and affiliated institutions. The maximum maturity on the bonds is 25 years.

Special obligation bonds are not general obligation bonds and thus are not required to be approved by the voters. The full faith and credit or the taxing power of the State does not secure them and a statement to this effect would appear on the face of the bonds. Property could not be pledged to secure the bonds. The Board of Governors' pledge of obligated resources would secure the bonds. Obligated resources, defined in G.S. 116D-22, would include rents, charges, or fees to be derived by the Board of Governors or a constituent institution from any activity, earnings on the investment of an endowment fund, and funds to be received from grants and contracts. Obligated resources would not include tuition payments or appropriations of general revenues. Obligated resources derived from one institution could not be used to finance a bond project located at a different institution.

To the extent the generation of obligated resources is within the control of the Board of Governors, the Board is authorized and required to increase the underlying fees or charges as necessary to generate sufficient revenues to pay the bonds. An individual institution can not increase a fee or charge without approval of the Board of Governors. The Board must set aside a sufficient amount of obligated resources on a regular basis into a sinking fund pledged to pay the principal and interest on the bonds. The act provides that the State pledges and contracts that it will not limit or alter the rights vested in the Board of Governors with respect to the bonds as long as any bonds are outstanding.

Special obligation bonds may be issued only for projects specifically authorized by the General Assembly, as is the current practice for revenue bonds (self-liquidating bonds). Although this act does not give specific legislative approval for special obligation bond projects, S.L. 2000-168 provides for at least one project financed through special obligation bond proceeds.

The amount of special obligation bonds that can be issued is limited by the extent to which the Board of Governors finds that sufficient obligated resources are "reasonably expected" to be

available to pay the debt service. In submitting proposed special obligation bond projects to the General Assembly for approval, the Board of Governors must justify the need for each project and must itemize the cost of the project, the estimated operating costs upon completion, and the sources and amounts of obligated resources to be pledged for repayment of the bonds. The Board of Governors may submit a proposed project for approval by the General Assembly only if the project has been approved by the board of trustees of the institution at which the project would be located.

Reports and Oversight

The act imposes reporting requirements to allow the General Assembly to monitor all aspects of the proposed bonds. The State Treasurer is required to report annually, and upon each issuance of university improvement general obligation bonds and community college general obligation bonds, on debt service requirements for the bonds. The Community Colleges System Office is required to report quarterly to the Joint Legislative Education Oversight Committee on projects funded from community college general obligation bonds, including total project costs, the amount funded by bonds, expenditures to date, and progress to completion. And the Board of Governors is required to report annually to the Joint Legislative Commission on Governmental Operations on the following:

- The university improvement general obligation bonds, including total project costs, amount funded by bonds, expenditures to date, progress to completion, and estimated operating costs and their proposed source of payment.
- The special obligation bonds, including, for each institution, outstanding debt, specific projects, debt service requirements, actual repayments, compliance with all applicable financial requirements, and trends and revenue streams for obligated resources.

The act also creates a Higher Education Bond Oversight Committee, which will consist of ten members appointed as follows: three by the Speaker of the House of Representatives, three by the President Pro Tempore of the Senate, two by the UNC Board of Governors, and two by the State Board of Community Colleges. It has the authority to receive reports and information from the facilities officers at UNC and its institutions, from the State Treasurer and the State Construction Office, from the Community Colleges System facilities officers, and from representatives of individual community colleges. It is required to review this information and make recommendations regarding the issuance of the bonds and the construction of the projects.

The act provides that existing minority business participation goals apply to projects funded with the bond proceeds. It requires annual reports on this issue to the General Assembly from the State Construction Office and the Board of Governors with respect to university improvement bonds and from the Community Colleges System Office with respect to community college bonds.

The act requires the State Treasurer to provide contracting opportunities for historically underutilized businesses in providing professional services in connection with the issuance of the bonds. It directs the State Treasurer to strive to increase the amount of legal, financial, and other professional services acquired by it from historically underutilized businesses, and to report quarterly to the Office for Historically Underutilized Businesses in the Department of Administration

The act directs the Board of Governors to continue to study and monitor any inequities in funding for capital improvements and facilities needs which may still exist on North Carolina's public historically black colleges and universities and the University of North Carolina at Pembroke,

beyond the funding of the projects provided for in the act. The Board must report annually to the Joint Legislative Commission on Governmental Operations on any remaining inequities found, including recommendations as to how those inequities should be addressed.

Repairs and Renovations

The act contains two uncodified sections addressing the issue of maintaining the Universities' capital facilities. In the act, the General Assembly finds that the facilities of the universities have been allowed to deteriorate due to inadequate maintenance. Through the act, the General Assembly commits to responsible stewardship of the facilities by requiring monitoring and reporting of the conditions of all facilities and their needs for repair and renovation. The act states the intent of the General Assembly to assure that adequate oversight, funding, and accountability is continually provided with respect to the maintenance of university facilities. The Board of Governors must report annually to Governmental Operations and Education Oversight on the condition of all university capital facilities, the status of ongoing repair and renovation projects, and needs for additional funding. In addition, the act requires the Board of Governors to study the current repairs and renovation funding formula and make recommendations regarding its adequacy, scope, and methodology.

EXCISE TAX ON TIMBER CONTRACTS

Session Law #	Bill #	Sponsor
S.L. 2000-16	HB 1545	Representative Pope

AN ACT TO CLARIFY THAT THE EXCISE TAX ON CONVEYANCES APPLIES TO TIMBER DEEDS AND CONTRACTS FOR THE SALE OF STANDING TIMBER.

OVERVIEW: This act clarifies that the State excise tax on instruments conveying an interest in real property applies to timber deeds and contracts for the sale of standing timber. The Revenue Laws Study Committee recommended this legislation to end any confusion resulting from two court decisions regarding the treatment of timber deeds and contracts for the sale of standing timber.

FISCAL IMPACT: No impact.

EFFECTIVE DATE: The act became effective July 1, 2000, and applies to timber deeds and contracts for the sale of standing timber executed on or after that date.

BACKGROUND & ANALYSIS: Historically, timber interests have been treated as an interest in real property, and the State excise tax on conveyances has been applied to deeds conveying timber. With the adoption of the Uniform Commercial Code, the sale of standing timber was deemed to be a sale of goods. Two North Carolina court decisions have addressed timber rights since the adoption of the UCC. The cases have led to disagreement among legal scholars and registers of deeds as to whether contracts for the sale of standing timber and timber deeds constitute a sale of personal property or a sale of real property for purposes of the excise tax on conveyances.

The proponents of timber as real property claim that these court decisions refer to timber as goods under the UCC only when the timber is subject to a contract for sale. The proponents of timber

as personal property claim that both contracts and deeds for the sale of timber are governed by the UCC and, therefore, do not convey an interest in real property. This act clarifies that the excise tax on instruments conveying an interest in real property applies to timber deeds and contracts for the sale of standing timber. For purposes of Article 8E, Excise Tax on Conveyances, the timber will be treated as if it were real property. The act remedies any confusion resulting from the court decisions regarding the treatment of timber deeds and contracts for the sale of standing timber.

The excise tax on conveyances applies to conveyances of an interest in real property. The tax is imposed at the rate of $1.00 on each $500.00 or fractional part of the consideration or value of the interest or property conveyed. It is payable to the register of deeds at the time the interest in the property is recorded. One-half of the money generated by the tax stays with the county and the remainder is remitted to the State and credited to the Parks and Recreation Trust Fund and the Natural Heritage Trust Fund.

North Carolina adopted the UCC as Chapter 25 of the General Statutes in 1965. G.S. 25-2-107(2), as amended in 1975, provides that "(a) contract for the sale … of timber to be cut is a contract for the sale of goods within this article…" Consequently, the excise tax should not be imposed on timber deeds or contracts for the sale of standing timber if they are sales of personal property. However, G.S. 25-2-107(3) recognizes that a contract for the sale of standing timber can be treated as a conveyance of real property: "The provisions of this section are subject to any third-party rights provided by the law relating to realty records, and the contract for sale may be executed and recorded as a document transferring an interest in land and shall then constitute notice to third parties of the buyer's rights under the contract for sale."

There have been two North Carolina cases that have ruled on timber rights since the adoption of the UCC. In *Mills v. New River Wood Corp.,* 77 N.C. App. 576, 333 S.E.2d 759 (1985), the Court ruled that contracts for the sale of "timber to be cut" were governed by G.S. 25-2-107(2). In *Mills,* the cause of action was based on a timber deed, which the Court described as evidencing the underlying contract of sale. In a more recent case, the North Carolina Supreme Court concluded that when North Carolina adopted the UCC, it began classifying timber as goods when timber was the subject of a contract for sale. *Fordham v. Eason,* 521 S.E. 2d 701 (1999).

Despite these recent court decisions that argue timber deeds are personal property, most registers of deeds have continued to impose an excise tax on transfers of interests in timber deeds and contracts. This act ends the confusion by expressly providing that the excise tax on instruments conveying an interest in real property applies to timber deeds and contracts for the sale of standing timber.

EXEMPT DISABLED VETERAN VEHICLES

Session Law #	Bill #	Sponsor
S.L. 2000-18	HB 133	Representative Rogers

AN ACT TO EXEMPT FROM PROPERTY TAX MODIFIED MOTOR VEHICLES OWNED BY DISABLED VETERANS WHO ARE ELIGIBLE FOR FEDERAL SPECIAL EQUIPMENT ALLOWANCES.

OVERVIEW: This act exempts motor vehicles that are (1) owned by veterans with certain service-related disabilities and (2) altered with special equipment to accommodate the service-related disability from property tax.

FISCAL IMPACT: The act will not affect State revenues. It will reduce revenues of local governments by approximately $120,00 per year.

EFFECTIVE DATE: Effective for tax years beginning on or after July 1, 2000.

BACKGROUND & ANALYSIS: Under current law, a property tax exemption is granted to vehicles that the U.S. government gives to veterans on account of disabilities they suffered in World War II, the Korean Conflict, or the Vietnam Era. This act also gives a property tax exemption to vehicles owned by veterans with certain service-related disabilities when the vehicles have been altered to accommodate the disability. Vehicles owned by these veterans and so altered would be eligible for the property tax exemption. To qualify for the exemption, the person must meet the following requirements under federal law:

- Veteran – Be a person who served in active military, naval, or air service, and who was discharged or released under conditions other than dishonorable.
- Service-related disability – Be disabled from an injury incurred or disease contracted in or aggravated by active service. The disability must be loss of one or both hands or feet, permanent loss of use of one or both hands or feet, or permanent impairment of vision of both eyes.
- Adaptive equipment – Have a vehicle that has been adapted for the disability. Adaptive equipment includes, but is not limited to, power steering, power brakes, power window lifts, power seats, and special equipment necessary to assist the veteran into and out of the automobile or other conveyance. The term also includes (1) air-conditioning equipment when the equipment is necessary to the health and safety of the veteran and to the safety of others, regardless of whether the vehicle is to be operated by the veteran or for the veteran by another person, and (2) any modification of the size of the interior space of the vehicle if needed because of the physical condition of the veteran in order for the veteran to enter or operate the vehicle.

The United States Department of Veterans Affairs (VA) offers a one-time payment of up to $8,000 towards the purchase of an automobile to all eligible veterans. In addition, the VA will also pay for adaptive equipment and for the repair, replacement, or reinstallation of adaptive equipment. Veterans who are eligible for these federal benefits will also be entitled to the tax exemption provided by this act.

In order to receive the exemption, the veteran must first file an application with the county assessor. Once an approved exemption is on file, it remains in effect and the vehicle is omitted from the tax rolls. The application need not be renewed each year.

DRY CLEANING SOLVENT CLEANUP AMENDS.

Session Law #	Bill #	Sponsor

S.L. 2000-19	HB 1326	Representative Gibson

AN ACT TO DESIGNATE THE STATE SALES TAX REVENUE FROM DRY-CLEANING AND LAUNDRY SERVICES TO THE DRY-CLEANING SOLVENT CLEANUP FUND; TO INCREASE THE STATE SALES TAX ON DRY-CLEANING SOLVENTS; TO AMEND THE DRY-CLEANING SOLVENT CLEANUP ACT OF 1997 TO REPEAL THE REQUIREMENT OF FINANCIAL RESPONSIBILITY FOR DRY-CLEANING FACILITIES AND WHOLESALE DRY-CLEANING SOLVENT DISTRIBUTION FACILITIES; TO ALLOW THE ENVIRONMENTAL MANAGEMENT COMMISSION TO ENTER INTO CONTRACTS WITH PRIVATE CONTRACTORS FOR ASSESSMENT AND REMEDIATION ACTIVITIES AT DRY-CLEANING SOLVENT DISTRIBUTION FACULTIES; TO DIRECT THE SECRETARY OF ENVIRONMENT AND NATURAL RESOURCES TO STUDY THE USE OF DRY-CLEANING SOLVENTS IN NORTH CAROLINA, AND TO MAKE OTHER CHANGES IN THE DRY-CLEANING SOLVENT CLEANUP ACT OF 1997.

OVERVIEW: This act earmarks a percentage of the State sales and use taxes collected on dry-cleaning and laundry services to the Dry-Cleaning Solvent Cleanup Fund, increases the privilege and excise taxes on dry-cleaning solvents, and clarifies that the sales tax is treated as part of the sales price for services as well as tangible personal property.

FISCAL IMPACT: Beginning in fiscal year 2003-2004, approximately $9.1 million per year will be transferred from the General Fund to the Dry-Cleaning Solvent Cleanup Fund due to the earmarking of State sales and use taxes collected on dry-cleaning and laundry services. The increase in the privilege and excise taxes on dry-cleaning solvents will generate an additional $500,000 in revenue each year for the Dry-Cleaning Solvent Cleanup Fund. The provision that clarifies that the sales tax is treated as part of the sales price for services as well as tangible personal property has no effect on State revenues.

EFFECTIVE DATE: The earmarking of sales and use tax proceeds becomes effective April 1, 2003, and expires June 30, 2010. The increase in the privilege and excise taxes becomes effective October 1, 2001, and expires January 1, 2010. The clarifying provision became effective June 26, 2000.

BACKGROUND & ANALYSIS*:* The Dry-Cleaning Solvent Fund was created by the General Assembly in 1997. The Fund is to be used to reimburse persons who clean up sites polluted by dry-cleaning solvents that have contaminated the water or surface or subsurface soils of the State. The Department of Environment and Natural Resources administers the Fund. Under current law, the major source of revenue for the Fund is a dry-cleaning solvent tax on in-state retailers that sell solvent to dry-cleaning facilities, and on dry-cleaning facilities that purchase solvent outside the State. The solvent tax is a per gallon privilege tax equal to $5.85 per gallon of chorine-based solvents, and 80 cents per gallon of hydrocarbon-based solvents. The tax became

effective October 1, 1997 and expires January 1, 2010. The Department of Revenue collects the tax in the same manner as a sales tax.

This act increases the revenues of the Fund in two significant ways. First, under this act, at the end of each quarter, the Department of Revenue will transfer fifteen percent (15%) of the net revenues collected from the sales and use tax on dry-cleaning and laundry services in the previous fiscal year. Under current law, the 4% State sales and use tax is imposed on the gross receipts of the following retailers:

- Persons engaged in the business of operating a dry-cleaning, pressing, or hat-blocking establishment, a laundry, or any similar business.
- Persons engaged in the business of renting clean linen or towels or wearing apparel, or any similar business.
- Persons engaged in the business of soliciting cleaning, pressing, hat blocking, laundering, or linen rental business for any of these businesses.

The following receipts are exempt from the State sales and use tax: receipts derived from services performed for resale by a retailer that pays the tax on the total gross receipts derived from the services; and receipts derived from coin, token, or card-operated washing machines, extractor, and dryers.

Second, this act increases the rate of the privilege tax imposed on the dry-cleaning solvent retailer and the rate of the excise tax imposed on dry-cleaning solvent purchased outside of the State for storage, use, or consumption within the State. The privilege tax and excise tax rate is raised from $5.85 per gallon to $10.00 per gallon for dry-cleaning solvent that is chlorine-based. The privilege tax and excise tax rate is raised from $.80 per gallon to $1.35 per gallon for dry-cleaning solvent that is hydrocarbon based.

HEALTH CARE FACILITY/CCRC TAX EXEMPT

Session Law #	Bill #	Sponsor
S.L. 2000-20	HB 1573	Representative Jarrell

AN ACT TO CLARIFY THE PROPERTY TAX TREATMENT OF A HEALTH CARE FACILITY UNDERTAKEN BY THE MEDICAL CARE COMMISSION PURSUANT TO THE HEALTH CARE FACILITIES FINANCE ACT AND TO EXTEND THE SUNSET ON THE PROPERTY TAX EXEMPTION FOR CONTINUING CARE RETIREMENT CENTERS.

OVERVIEW: This act does two things. First, it provides that the current property tax exemption for continuing care retirement centers (CCRCs) will remain in effect for one more year, by extending the exemption's sunset from July 1, 2000, to July 1, 2001. Second, it clarifies the property tax exemption for health care facilities financed with bonds or notes issued by the Medical Care Commission in two ways:

- The amount of the exemption cannot exceed the lesser of the principal amount of the bonds or notes or the assessed value of the facility.
- Only the part of a health care facility financed by bonds or notes issued by the Medical Care Commission is exempt from property tax. When bonds or notes are used to finance an expansion or a renovation of an existing facility, only the new part of the facility or the renovated part of the facility may be exempt from property tax, not the entire facility.

FISCAL IMPACT: The act has no fiscal impact on State revenues. The extension of the sunset of the CCRC property tax exemption has no fiscal impact on local governments. The Medical Care Commission bond clarification will not affect facilities funded under existing bonds. Since Fiscal Research cannot anticipate the amount of bonds to be issued in the future to these facilities, no fiscal estimate is possible.

EFFECTIVE DATE: The extension of the sunset of the CCRC property tax exemption became effective July 1, 2000. The clarification of the property tax exemption for facilities financed with bonds issued by the Medical Care Commission act becomes effective October 1, 2000, and applies to bonds or notes issued on or after that date.

BACKGROUND & ANALYSIS: The Revenue Laws Study Committee recommended two property tax proposals that were combined into this one act:

Extension of the Property Tax Exemption for CCRCs

North Carolina has long exempted from property tax homes for the aged, sick, and infirm if the homes are used exclusively for a charitable purpose and the owner of the property is not organized for profit. (G.S. 105-278.6) In 1983 and 1984, the North Carolina courts ruled that two retirement homes that had sought to claim this property tax exemption did not qualify because the homes were not charitable. In response to the courts' rulings, the General Assembly enacted a property tax exemption in 1987 for certain homes for the "aged, sick, or infirm". To qualify for the exemption, a CCRC did not have to be operated as a charity, but it did have to be owned and operated by a nonprofit organization that was a religious or Masonic organization. [G.S. 105-275(32)]

In 1998, Springmoor, Inc., a nonprofit corporation that manages and operates a self-contained residential community for the elderly, successfully challenged the constitutionality of the 1987 legislation. Springmoor alleged that its center met all the requirements of G.S. 105-275(32), except that it was not affiliated with a religious or Masonic organization as required by a subpart of the statute. The North Carolina Supreme Court agreed that the statute violated the First Amendment because it was an unconstitutional establishment of religion. Instead of severing the unconstitutional subpart from the statute, which would have given Springmoor exempt status, the Court ruled the entire statute unconstitutional. The Court explained that it was not the General Assembly's intent to provide a blanket exclusion for all nonprofit homes for the elderly.

After the *Springmoor* decision, the General Assembly enacted G.S. 105-278.6A. This statute temporarily revises the property tax exemption for retirement communities that was held unconstitutional in *Springmoor*. The exemption was scheduled to expire July 1, 2000. The Revenue Laws Study Committee appointed a subcommittee consisting of interested parties (including representatives of the CCRCs, the counties, and the tax assessors) to review the tax status of the CCRCs and to seek a compromise. During its six meetings, the subcommittee discussed numerous proposals and looked at other states' laws. Because the subcommittee did not reach a consensus,

it recommended extension of the sunset on the property tax exemption for one year, until July 1, 2001, in order to give all interested parties more time to seek a compromise.

Medical Care Commission Bonds

This act clarifies the property tax exemption for health care facilities financed with bonds or notes issued by the Medical Care Commission in two ways:

- The amount of the exemption cannot exceed the lesser of the principal amount of the bonds or notes or the assessed value of the facility.
- Only the part of a health care facility financed by bonds or notes issued by the Medical Care Commission is exempt from property tax. When bonds or notes are used to finance an expansion or a renovation of an existing facility, only the new part of the facility or the renovated part of the facility may be exempt from property tax, not the entire facility.

In 1975, the General Assembly enacted the Health Care Facilities Finance Act to help and encourage the modernization and expansion of the State's health care facilities. Under the Act, the Medical Care Commission may issue bonds or notes to finance the cost of building or improving health care facilities for public or nonprofit agencies. The Medical Care Commission indicates that over the last 20 years, approximately $5 billion in bonds or notes have been issued. Approximately 90% of these bonds or notes have been issued to hospitals for expansion and renovation of hospital facilities and for purchasing hospital equipment.

The Act provides that a health care facility financed through bonds or notes issued by the Medical Care Commission is exempt from property tax until the bonds or notes are retired. At the time the Act was enacted, the Medical Care Commission actually owned most, if not all, of the facilities financed through bond revenues until the bonds or notes were retired. Ownership was given to a public or nonprofit agency after the bonds or notes were retired. Today, the Commission does not generally own the facilities being financed; ownership remains with the public and nonprofit health care facilities requesting the financing. Most of these facilities are exempt from property tax under G.S. 105-278.8. The exemption being amended by this act was included in the law in 1975 because the Medical Care Commission did not fall within the tax exemption for charitable hospital purposes.

LINCOLN COUNTY E&R BOARD

Session Law #	Bill #	Sponsor
S.L. 2000-40	HB 1656	Representative Kiser

AN ACT TO AUTHORIZE THE APPOINTMENT OF A SPECIAL BOARD OF EQUALIZATION AND REVIEW FOR LINCOLN COUNTY.

OVERVIEW: This act revises Lincoln County's authority to appoint a special board of equalization and review. Most notably, it allows the board to continue meeting after it has adjourned for the purposes of hearing and deciding appeals related to discovered property, classified motor vehicles, audits of property classified at present-use value, and audits of property exempted from or excluded from taxation.

FISCAL IMPACT: None

EFFECTIVE DATE: June 30, 2000

BACKGROUND & ANALYSIS: Under general law (G.S. 105-322), all counties must have a board of equalization and review (E&R board) to review the county's property tax listings and appraisals and to hear taxpayers' appeals. The E&R board is composed of the board of county commissioners unless the board of county commissioners adopts a resolution appointing a special board. This act makes local modifications to G.S. 105-322 for Lincoln County, setting forth specific qualifications for the E&R board and expanding its powers and duties.[3] Specifically, this act makes the following local modifications to G.S. 105-322:

- **Membership**: This act provides that if the Lincoln County board of commissioners chooses to form a special E&R board, they must appoint five members and three alternate members. To be eligible for appointment, the person must have knowledge of or experience in real estate, fee appraisals, banking, farming, or other business management. Members serve two-year terms, and no member may serve more than three consecutive terms. The Lincoln County board of county commissioners will fill vacancies. Under general law, the county board of commissioners can specify the membership, qualifications, and terms of office and the filling of vacancies on the board.

- **Appeals**: Under general law, when a county appoints a special E&R board, it may allow taxpayers to appeal to the board of county commissioners from decisions of the special board. This act deletes that authority for Lincoln County. Thus, if Lincoln County appoints a special E&R board, the special board's decisions are appealable directly to the Property Tax Commission (G.S. 105-290) and from there to the court of appeals (G.S. 105-345).

- **Quorum**: This act specifies that a majority of the members of the special board constitute a quorum for the purpose of transacting business. Decisions are made by a majority of the members present. An alternate member, when sitting as a member, has all of the powers and duties of a regular board member.

- **Clerk**: Under general law, only the assessor can serve as clerk to a special E&R board. This act provides that for Lincoln County either the assessor or a person designated by the assessor will serve as clerk. Under general law, the clerk's duties include being present at all meetings, maintaining accurate minutes of the actions of the boards, and providing the board with information on the listing and valuation of taxable property in the county. This act expands the clerk's duties for Lincoln County to include drafting all written decisions of the special board, and specifies that the chair will review all written decisions drafted by the clerk. Furthermore, the act stipulates that only the chair, or in the chair's absence, the vice chair, can execute the decisions of the special board.

- **Time of Meeting**: The act maintains the general law setting an April or early May starting date for meetings of the E&R board, but changes the deadline for the completion of duties. Under general law, in non-revaluation years, a special E&R board must complete its duties within four weeks, although this deadline may be extended to July 1 if necessary. In revaluation years, a special E&R board must complete its duties by December 1, except

[3] Currently, at least 11 other counties have received modifications to G.S. 105-322 to fit their specific needs: Buncombe, Cabarrus, Catawba, Craven, Cumberland, Durham, Henderson, Iredell, Mecklenburg, Rockingham, Stokes, and Union.

to hear taxpayers' appeals filed before its adjournment. The act provides that the Lincoln County E&R board must complete its duties by July 1, except that it may sit year round to hear taxpayer appeals related to discovered property, classified motor vehicles, audits of present-use value property, and audits of exempt or excluded property. Under general law (G.S. 105-325), the board of county commissioners may meet after its special E&R board has adjourned only for limited purposes such as to correct clerical errors, to add discovered property to the lists, and to address facts that should have been, but were not, known before the special board adjourned.

- **Powers and Duties**: The act also expands the duties and powers of the Lincoln County E&R board by adding the following powers and duties:
    1. Duty to Appoint Motor Vehicle Review Subcommittee: The chair of the E&R board must appoint a subcommittee at the first meeting of the calendar year to meet as needed to hear and decide all appeals relating to the appraisal, situs, and taxability of classified motor vehicles. Because motor vehicles are taxed on a staggered, year-round schedule, the subcommittee must be available throughout the year to hear motor vehicle appeals.
    2. Power to Designate Reappraisal Year Panels: In a reappraisal year, the chair of the E&R board may divide the board into separate panels of three members, which may include the alternate board members. A decision of the panel constitutes a decision of the E&R board.

MODIFY BILL LEE ACT

Session Law #	Bill #	Sponsor
S.L. 2000-56	**HB 1560**	**Representative Allen**

AN ACT TO MAKE MODIFICATIONS TO THE WILLIAM S. LEE ACT AND TO RELATED ECONOMIC DEVELOPMENT LAWS.

OVERVIEW: This act modifies the William S. Lee Quality Jobs and Business Expansion Act and related economic development laws by enacting application fee changes, extending credit carryforwards, requiring wage standards for grants, prohibiting funding for defaulting grantees, expanding credits, and making technical corrections. The provisions of the act are listed below:

PROVISION	EFFECTIVE DATE	FISCAL IMPACT
Application Fee Exemptions		
Exempts taxpayers applying for certification for a tax credit in a development zone from the $500 per credit application fee. Clarifies that there is no application fee associated with the application filed with the Department of Commerce concerning the credit for	1/1/2001 for applications made on or after that date	Insignificant impact

PROVISION	EFFECTIVE DATE	FISCAL IMPACT
contributions for a development zone project.		
Extend Credit Carryforwards		
Provides an enhanced carryforward of 10 years for a taxpayer who certifies that it will purchase or lease, and place in service within two years, at least $50 million worth of real property, machinery and equipment, or central office or aircraft facility property. The general Bill Lee Act carryforward is five years.	1/1/00	No fiscal impact until fiscal year 2013-2014
Require Wage Standard for Grants		
Requires the following to meet the Bill Lee Act wage standard: • A business seeking a grant from the Industrial Recruitment Competitive Fund. • A local government seeking a loan or grant from the Industrial Development Fund.	7/1/00	N/A
Prohibit Funding for Defaulting Grantee		
Prohibits the Department of Commerce from making a loan or awarding a grant to a person who is currently in default on any loan made by the Department.	7/1/00	N/A
Aircraft Maintenance Facility Credit		
Allows an auxiliary subdivision of an interstate passenger air carrier engaged primarily in aircraft maintenance and repair services or aircraft rebuilding to qualify for the Bill Lee Act tax credits.	1/1/01	This change is expected to reduce General Fund revenues by $30,000 in fiscal year 2002-2003, $60,000 in fiscal year 2003-2004, and $90,000 in fiscal year 2004-2005
Employee Buyout Incentive		
Revises the test for what constitutes an acquisition of a business by an employee buyout. An existing business that is acquired through an employee buyout is able to qualify for the Bill Lee Act credits to the same extent as a new business.	5/1/99	Insignificant impact

PROVISION	**EFFECTIVE DATE**	**FISCAL IMPACT**
Low-Income Housing Credit Changes		
Allows a 75% credit for low-income buildings located in a county that has been designated as having sustained severe or moderate damage from a hurricane or hurricane-related disaster.	1/1/01	Insignificant impact
Clarifies that a building that fails to meet the eligibility requirements for the State low-income housing credit during the five-year installments of the credit forfeits the remaining installments.	1/1/00	Insignificant impact
Modify Credit and Expiration Provisions		
Modifies the jobs tax credit to allow a taxpayer to claim a tax credit for creating a full-time job when it has 5 full-time employees regardless of how many weeks those employees work during the taxable year.	1/1/00	Insignificant impact
Corrects a provision in the tax credit for investing in machinery and equipment that penalizes a taxpayer for replacing recently acquired equipment with new equipment.	1/1/00	N/A
Clarifies that a taxpayer loses any remaining installments on tax credits claimed under the Bill Lee Act if the taxpayer ceases to engage in an eligible business.	1/1/00	N/A
Technical Correction		
Clarifies that an insurance company qualifies for a sales tax refund on certain purchases if it is operated for the exclusive purpose of providing insurance products to certain nonprofit organizations or to public institutions and their employees.	5/1/99	N/A

Background & Analysis:

History of the Bill Lee Act

The William S. Lee Quality Jobs and Business Expansion Act (hereinafter Bill Lee Act) was enacted in 1996, effective beginning with the 1996 tax year with a 2002 sunset. The Act is a package of State tax incentives and has been modified in each subsequent year. The incentives are primarily

in the form of tax credits for investment in machinery and equipment, job creation, worker training, and research/development. For many of the credits the counties are divided into five economic distress tiers based on the unemployment rate, per capita income, and population growth of the county. In general, the lower the tier of a county, the more favorable the incentive.

The Act requires the Department of Commerce to report annually on the credits allowed by the Act. In 1997, the General Assembly added specific issues that the Department of Commerce was required to study and report back on in 1999. Before 1996, North Carolina had made little use of tax incentives to lure businesses to the State. Even without incentives, North Carolina was consistently one of the top states in attracting industry. The array of credits authorized by the Bill Lee Act was viewed as an experiment, to be evaluated in five years to determine whether the incentives were cost effective and actually affected behavior, or merely provided tax reductions to businesses that would have located or expanded in any case. In 1999, the General Assembly expanded existing tax incentives for businesses, added new tax incentives and tax reductions for specific businesses, and made related changes. The General Assembly also extended the 2002 sunset to 2006.

During the 2000 Session, the General Assembly further modified the Bill Lee Act and related economic development laws by enacting application fee changes, extending credit carryforwards, requiring wage standards for grants, prohibiting funding for defaulting grantees, expanding credits, and making technical corrections.

Application Fee Exemptions

To claim a credit under the Bill Lee Act, a taxpayer must provide with the tax return the certification of the Secretary of Commerce that the taxpayer meets all of the eligibility requirements with respect to each credit that the taxpayer claims. The taxpayer must file an application for certification with the Secretary. In 1999, the General Assembly eliminated the $75 application fee for credits claimed in tiers one and two counties. For tiers three, four, and five counties, the application fee was increased to $500 per credit claimed with a cap of $1,500 per applicant. This act extends the fee exemption to apply not only to credits claimed in tiers one and two, but also credits claimed in a development zone. A development zone is an area within the corporate limits of a city with a population over 5,000. The area, composed of one or more contiguous census tracts or census block groups, must have a population of 1,000 or more. Of that population, more than 10% must be below the poverty level or the area must be adjacent to a tract or group that has more than 20% of its population below the poverty level.

This act also clarifies that there is no fee for an application filed with the Department of Revenue concerning the credit for a development zone project. In 1999, the General Assembly created a new tax credit for taxpayers that contribute cash or property to certain nonprofit agencies to be used for an improvement project in a development zone. An improvement project is a project to construct or improve real property for community development purposes or to acquire real property and convert it for community development purposes. The credit allowed is 25% of the amount contributed by the taxpayer. The total amount of credits that may be allowed in a taxable year is capped at $4 million. Taxpayers are required to apply to the Secretary of Revenue for these credits. If the total amount of credit applied for in a year exceed $4 million, the Secretary will reduce each applicant's credit proportionally.

These changes become effective January 1, 2001, and apply to applications made on or after that date.

Extend Credit Carryforwards

The Bill Lee Act credits may not exceed 50% of the tax against which they are claimed. The limitation applies to the cumulative amount of credit claimed by the taxpayer, including carryforwards. As a general rule, any unused portion of a credit may be carried forward five years. The Bill Lee Act provides two exceptions that allow twenty-year carryforwards. This act creates a third exception that allows a ten-year carryforward, effective for taxable years beginning on or after January 1, 2000. The three exceptions are:

- Any unused portion of a credit with respect to a large investment may be carried forward for 20 years. A large investment is one where an eligible business purchases or leases, and places in service within a two-year period, $150 million worth of one or more of the following: real property, machinery and equipment, or central administrative office property.
- Any unused portion of a credit with respect to the technology commercialization credit may be carried forward for 20 years. The General Assembly created the technology investment credit in 1999 as an alternative to the 7% credit for investing in machinery and equipment. The credit applies only to investments in machinery and equipment used in production based on technology licensed from a research university. The investments must be located in a tier one, two, or three county and must equal at least $10 million during the taxable year and must total at least $100 million over a five-year period.
- This act allows any unused portion of a credit to be carried forward for 10 years if the Secretary of Commerce certifies that the taxpayer will purchase or lease, and place in service in connection with an eligible business within a two-year period, at least $50 million worth of one or more of the following: real property, machinery and equipment, or central office or aircraft property. If the taxpayer fails to make the level of investment certified within the two-year period, the taxpayer forfeits the enhanced carryforward period.

Require Wage Standards for Grants

To be eligible for the credits under the Bill Lee Act, the jobs for which a credit is claimed and the jobs at the location with respect to which a credit is claimed must meet the applicable wage standard. For a tier one county, the jobs must pay an average weekly wage that is equal to the average weekly wage for that county. For other tier counties, the average weekly wage must equal 110% of the average weekly wage for that county. Effective July 1, 2000, this act requires jobs at the following projects also to meet the Bill Lee Act wage standards:

- A project for which a business seeks a grant from the Industrial Recruitment Competitive Fund. The purpose of this Fund is to provide financial assistance to those businesses or industries deemed by the Governor to be vital to a healthy and growing State economy and that are making significant efforts to establish or expand in the State.
- A project for which a local government seeks a loan or grant from the Industrial Development Fund. The purpose of this Fund is to assist local government units of the most economically distressed counties in creating jobs in certain industries.

Prohibit Funding for Defaulting Grantees

Effective July 1, 2000, the act prohibits the Department of Commerce from making a loan or awarding a grant to any individual, organization, or governmental unit that is currently in default on any loan made by the Department of Commerce.

Aircraft Maintenance Facility Credit

The act expands the list of eligible businesses that qualify for a credit under the Bill Lee Act to include an auxiliary subdivision of an interstate passenger air carrier engaged primarily in aircraft maintenance and repair services or aircraft rebuilding. An interstate passenger air carrier is a person whose primary business is scheduled passenger air transportation. This change is effective for taxable years beginning on or after January 1, 2001. It allows the air carrier to qualify for the central administrative office credit as well as the credit for creating jobs, credit for investing in machinery and equipment, credit for research and development, and credit for worker training. It also allows the air carrier to qualify for the enhanced twenty-year carryforward for large investments.

Employee Buyout Incentive

The act revises the test for what constitutes an acquisition by an employee buyout. Prior to 1998, the acquisition of a business by an employee buyout did not qualify for Bill Lee Act credits. The credits were allowed only for new and expanding businesses. As a general rule, the acquisition of a business, or any other transaction by which an existing business reformulates itself as another business, does not create new eligibility in the succeeding business. In 1998, the General Assembly provided an exception from this general rule for a business that has closed, has filed a federally required notice that closure is imminent, or has been purchased in an employee buyout. In these cases, the business is able to qualify for the credits to the same extent as a new business.

Effective May 1, 1999, the act revises the test for what constitutes an acquisition of a business by an employee buyout. It provides that the term "acquired" means that as part of the initial purchase of a business by employees, the purchase included an agreement for the employees, through the employee stock option transaction or another similar mechanism, to obtain one of the following:

- Ownership of more than 50% of the business.
- Ownership of not less than 40% of the business within seven years if the business has tangible assets with a net book value in excess of $100 million and has a majority of its operations located in an enterprise tier one, two, or three area.

Low-Income Housing Credit Changes

The act expands the applicability of the low-income housing credit and clarifies that the credit is forfeited under certain circumstances. In 1999, the General Assembly enacted a new tax credit for rehabilitating or constructing low-income housing. The credit is equal to a percentage of the amount of the taxpayer's federal credit for low-income housing with respect to eligible North Carolina low-income housing. The credit is 75% for buildings located in tier one or two counties and 25% for buildings located in other tiers. This act provides that the 75% credit is also allowed for buildings located in a county that has been designated as having sustained severe or moderate damage from a hurricane or a hurricane-related disaster, according to the Federal Emergency Management Agency impact map, revised on September 25, 1999. These counties are Bertie, Beaufort, Bladen, Brunswick, Carteret, Columbus, Craven, Dare, Duplin, Edgecombe, Greene, Halifax, Hertford, Jones, Lenoir, Martin, Nash, New Hanover, Northampton, Onslow, Pasquotank, Pender, Pitt, Washington, Wayne, and Wilson Counties. This change is effective for

taxable years beginning on or after January 1, 2001, applies to buildings to which federal credits are allocated on or after January 1, 2001, and expires January 1, 2005.

To qualify for the State credit, the test of what constitutes low-income housing for a building located in a tier three, four, or five county is harder to meet than under the federal law. The federal law requires that either (1) at least 20% of the residential units are rent-restricted and occupied by individuals whose income is 50% or less of area median gross income, or (2) at least 40% of the residential units are rent-restricted and occupied by individuals whose income is 60% or less of area gross income. The State law for a tier three or four county requires that at least 40% of its residential units are rent-restricted and occupied by individuals whose income is 50% or less of area median gross income. For a tier five county, the State law requires that at least 40% of its residential units are rent-restricted and are occupied by individuals whose income is 35% or less of area median gross income. If, in one of the five years in which an installment is claimed, the taxpayer no longer qualifies for the federal credit, the taxpayer is no longer eligible for the State credit. This act clarifies that if a building in a tier three, four, or five county no longer meets the more stringent State tax credit requirements, the remaining installments of the credit may not be taken, even though the building may continue to qualify for the federal credit. This clarification is effective for taxable years beginning on or after January 1, 2000.

Modify Credit and Expiration Provisions of the Bill Lee Act.

The act makes three changes to credits in the Bill Lee Act and to the credits' expiration, effective for taxable years beginning on or after January 1, 2000. These changes were recommended by the Revenue Laws Study Committee and do the following:

- Modify the jobs tax credit to allow a taxpayer to claim a tax credit for creating a full-time job when it has five full-time employees regardless of how many weeks those employees work during the taxable year.
- Correct a provision in the tax credit for investing in machinery and equipment that penalizes a taxpayer for replacing recently acquired equipment with new equipment.
- Clarify that a taxpayer loses any remaining installments on tax credits claimed under the Bill Lee Act if the taxpayer ceases to engage in an eligible business.

Jobs Tax Credit Change

The Department of Commerce asked the Revenue Laws Study Committee to make this change to eliminate a restriction that has the unintended consequence of preventing a taxpayer from taking a tax credit for jobs created under certain circumstances. Under prior law, a taxpayer that met the eligibility requirement of the Bill Lee Act, had five or more employees for at least 40 weeks of the taxable year, and hired an additional full-time employee to fill a full-time position located in this State could claim a tax credit for creating a new full-time position. The credit for any specific full-time position may be claimed only once and must be taken in installments over four years. This act amends the jobs tax credit by eliminating the 40-week requirement, since it does not serve any apparent purpose.

The 40-week requirement had the unintended effect of denying the job tax credit to certain taxpayers. For example, an employer was not eligible for this credit if it began operations with more than five employees 13 or more weeks into the taxable year. However, a taxpayer could get around this 40-week requirement by signing a letter of commitment with the Department of

Commerce to create at least 20 new full-time jobs in a specific area within a two-year period. This taxpayer would be eligible for a credit in the taxable year after at least 20 employees were hired.

The elimination of the 40-week requirement will have a minimal fiscal impact, since most taxpayers have been able to get around the requirement by signing a letter of commitment. The taxpayers who will benefit from this change are those that did not qualify for a letter of commitment and who began operations with between five and twenty employees more than 12 weeks into the taxable year.

Correct Investment Tax Credit

The act corrects a "reverse loophole" in the Bill Lee Act credit for investing in machinery and equipment. Under prior law, if a taxpayer earned a credit for investing in machinery and then, within the seven-year period that installments of the credit are allowed, replaced the machinery with newly acquired machinery, the taxpayer suffered two consequences. The taxpayer lost the remaining installments earned on the original machinery and received no credit for investing in the replacement machinery except to the extent its value exceeded the value of the original machinery. The act corrects this reverse loophole by providing that the remaining installments of the credit for the original machinery may be taken if the value of newly acquired machinery in the same enterprise tier offsets at least 80% of the value of the original machinery taken out of service. As under prior law, a new credit is allowed to the extent the remaining value of the newly acquired machinery creates a net investment increase in excess of the applicable investment threshold, and there is no penalty if the taxpayer replaces the machinery after the end of the seven-year installment period.

Clarify Expiration of Credits

The act clarifies that if a taxpayer that claims a Bill Lee Act credit ceases to engage in the type of business required for qualification of the credit, then the taxpayer loses any remaining installments of the credit (but does not lose accrued carryforwards).

Technical Correction

In 1999, the General Assembly provided a sales tax refund to certain nonprofit insurance companies for State and local taxes they pay on building materials, supplies, fixtures, and equipment that become a part of their real property and on capitalized computer systems hardware and software. To qualify for these refunds, the insurance company must be operated for the exclusive purposes of providing insurance products to nonprofit charitable organizations and their employees. In addition, the Secretary of Commerce must certify that the insurance company will invest at least $20 million in this State. This act added the underlined language to clarify that to be eligible for this refund, an insurance company must be operated for the exclusive purpose of providing insurance products to organizations exempt from federal income tax and their employees or to public institutions and their employees. This change became effective May 1, 1999, and applies to taxes paid on or after that date.

CHARTER SCHOOL FUEL EXEMPTION

Session Law #	Bill #	Sponsor

S.L. 2000-72	HB 1302	Representative Bonner

AN ACT TO EXEMPT FROM TAX MOTOR FUEL SOLD TO CHARTER SCHOOLS.

OVERVIEW: This act exempts charter schools from paying the motor fuels tax.

FISCAL IMPACT: This act is expected to reduce Highway Fund revenues by about $24,000 a year and to reduce Highway Trust Fund Revenues by about $8,000 a year.

EFFECTIVE DATE: October 1, 2000.

BACKGROUND & ANALYSIS: This act adds "motor fuel sold to a charter school for use for charter school purposes" to the list of exemptions from the motor fuel excise tax. Thus, charter schools will join the following list to which the motor fuel excise tax does not apply:

- Motor fuel removed in this State for transportation to another state if the supplier collects tax on the motor fuel at the rate of the motor fuel's destination state.
- Motor fuel sold to the federal government for its use.
- Motor fuel sold to the State for its use.
- Motor fuel sold to a local board of education for use in the public school system.
- Diesel that is kerosene and is sold to an airport.

The motor fuel excise tax rate has two components: a flat rate and a variable rate. The flat rate is 17.5¢ per gallon. The variable component may change every six months. It is added to the flat rate. The variable component is equal to the greater of 3.5¢ a gallon or 7% of the weighted average wholesale price of gasoline and No. 2 diesel fuel for the most recent six-month base period. The current motor fuel tax rate is 23.1¢ a gallon. Due to increases in the weighted wholesale price of these motor fuels, the tax increased during each of the last two six-month base periods from a low of 21¢ in late 1999.

One-half cent a gallon of the motor fuel tax revenue is dedicated to the two underground storage tank funds and the water and air quality account. Seventy-five percent (75%) of the remainder of the revenue generated by this tax is allocated to the Highway Fund and the remaining 25% is credited to the Highway Trust Fund.

A charter school is defined in this act as a nonprofit corporation that has a charter under Part 6A of Article 16 of Chapter 115C of the General Statutes to operate a charter school. G.S. 115C-238.29D limits the number of charter schools to 100 schools statewide. Any person, group of persons, or nonprofit corporation may apply to the State Board of Education to establish a charter school. However, according to this act, a charter school will qualify for the exemption only if it is operated by a nonprofit corporation. To be approved as a charter school, the applicant must meet the statutory requirements of Part 6A of Article 16 of Chapter 115C and the Board must find that the proposed school will meet one or more of the following objectives:

- Improve student learning.
- Increase learning opportunities for all students.

- Encourage the use of different and innovative teaching methods.
- Create new professional opportunities for teachers.
- Provide expanded educational choices for parents and students.

To enable the Department of Revenue to administer the tax exemption and to verify the eligibility of the applicant for the exemption, this act requires the State Board of Education to direct the Department of Public Instruction to notify the Department of Revenue when the State Board terminates, fails to renew, or grants a charter for a charter school.

Charter schools will be able to buy non-tax-paid fuel directly from suppliers. The Department of Revenue will keep a list of exempt charter schools. Fuel suppliers will be able to check that list and then issue an "exempt card" to the school. The fuel supplier can then sell non-tax-paid fuel to the school, either directly or through a contractor. The school would need to have a storage tank or container for the fuel. Additionally, if the school buys fuel on which the tax has been paid, such as from a retail station, it can obtain a refund from the Department of Revenue.

AMEND BILL LEE ACT TIER DESIGNATIONS

Session Law #	Bill #	Sponsor
S.L. 2000-73	**SB 1318**	**Senator Dalton**

AN ACT TO PROVIDE THAT AN ENTERPRISE TIER TWO AREA MAY NOT BE REDESIGNATED AS A HIGHER-NUMBERED TIER AREA UNTIL IT HAS BEEN AN ENTERPRISE TIER TWO AREA FOR TWO CONSECUTIVE YEARS.

OVERVIEW: This act amends the Bill Lee Act by providing that an enterprise tier two area may not be redesignated as a higher numbered tier area until it has been an enterprise tier two area for at least two consecutive years. In 1997 (S.L. 1997-277), the General Assembly amended the Bill Lee Act to guarantee that a county that obtained a tier one status could not lose that status for two years. The act extends this guarantee to a county designated as a tier two area.

FISCAL IMPACT: The act is expected to reduce General Fund revenues by $111,000 in fiscal year 2001-2002, $233,000 in fiscal year 2002-2003, $344,500 in fiscal year 2003-2004, and $456,000 in fiscal year 2004-2005. The act has no impact on fiscal year 2000-2001 because the credits are taken in the year after the investment and job creation activity take place.

EFFECTIVE DATE: Retroactive to tier designations for the 2000 and later calendar years.

BACKGROUND & ANALYSIS: Under the Bill Lee Act, all counties are divided into five enterprise tiers, ranked by economic distress as measured by a formula that combines unemployment, per capita income, and population growth. Those counties in lower-numbered tiers receive more favorable incentives than those in higher tiers. For example, enterprise tier one and two counties are the counties considered most in need of economic development based on high unemployment, low per capita income, and low population growth.

In 1997, the General Assembly amended the Bill Lee Act to guarantee that a county that obtained a tier one status could not lose that status for two years regardless of what the annual rankings

would otherwise require. This act extends this guarantee to a county designated as a tier two area, so that a tier two area may not be redesignated as a higher numbered tier area until it has been a tier two area for two consecutive years.

During the 1999 Session, the Bill Lee Act was amended to provide the following three incentives for development in enterprise tier one and two counties:

- Extended the Bill Lee Act credits to electronic mail order houses that create at least 250 jobs in tiers one and two.
- Extended the Bill Lee Act credits to customer service centers in tiers one and two.
- Allowed an annual refund of 6% sales taxes paid on capitalized machinery and equipment sold to businesses eligible for Bill Lee Act credits and located in tiers one and two.

In 1999, the General Assembly also allowed certain counties to qualify for a lower enterprise tier designation, effective January 1, 2000. The rules for assigning enterprise tier designations were changed to provide that the tier number that would otherwise be assigned by the formula is reduced by one for counties that have a population of less than 50,000 and also have more than 18% of their residents below the federal poverty level. Under this change, Alleghany, Ashe, Beaufort, Cherokee, Perquimans, Scotland, Vance, and Yancey Counties moved from tier two to tier one. Bladen, Hoke, Jones, Madison, Pamlico, and Pasquotank Counties moved from tier three to tier two. The 1999 change also provided that a county that has a population of less than 25,000 cannot be designated higher than tier three. Finally, the 1999 change provided that a county is designated as tier one if it has a population of less than 10,000 and also has more than 16% of its residents below the federal poverty level. Under this change, Camden, Clay, and Jones qualified as tier one counties.

EXTEND CABARRUS E&R BOARD

Session Law #	Bill #	Sponsor
S.L. 2000-92	**SB 1364**	**Senator Hartsell**

AN ACT TO AUTHORIZE THE CABARRUS BOARD OF EQUALIZATION AND REVIEW TO MEET AFTER ITS FORMAL ADJOURNMENT.

OVERVIEW: The act authorizes the Cabarrus County Board of Equalization and Review to meet after its regular adjournment, in order to hear appeals relating to discovered property, motor vehicles, and audits of property taxed at preferential rates.

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: July 7, 2000.

BACKGROUND & ANALYSIS: This act adds Cabarrus County to Section 2 of S.L. 1999-353, which originally applied only to Stokes County. The effect of adding Cabarrus County is to authorize the Cabarrus County Board of Equalization and Review to continue meeting after it has completed its regular duties for the year. Under general law, a special board of equalization and review has the duty to examine and review the tax lists for the current year and to hear any timely

request of a taxpayer with respect to the listing or appraisal of property. Under general law, in non-revaluation years, a special E&R board must complete its duties within four weeks, although this deadline may be extended to July 1 if necessary. In revaluation years, a special E&R board must complete its duties by December 1, except to hear taxpayers' appeals filed before its adjournment. This act provides an exception for Cabarrus County, allowing its E&R board to continue to meet after completing its regular duties in order to carry out the following duties:

- To hear and decide appeals relating to discovered property.
- To hear and decide appeals relating to the appraisal, situs, and taxability of classified motor vehicles.
- To hear and decide appeals relating to audits of property classified at present-use value and relating to audits of property exempted or excluded from taxation.

2000 FEE BILL

Session Law #	Bill #	Sponsor
S.L. 2000-109	HB 1854	Representative Miller

AN ACT TO SET THE PUBLIC UTILITY REGULATORY FEES AND THE INSURANCE REGULATORY CHARGE, TO INCREASE COURT COSTS, TO INCREASE JAIL FEES FOR PERSONS PAYING JAIL FEES PURSUANT TO PROBATIONARY SENTENCES, TO INCREASE THE FEE IMPOSED FOR EMERGENCY PLANNING, TO AUTHORIZE CERTAIN CHANGES IN PERMITS FOR OVERSIZE LOADS AND ESTABLISH PENALTIES FOR PERMIT VIOLATIONS, TO AUTHORIZE AGENCIES TO PROVIDE ACCESS TO SERVICES THROUGH ELECTRONIC AND DIGITAL TRANSACTIONS AND TO IMPOSE A FEE FOR THOSE TRANSACTIONS, AND TO REPEAL THE SUNSET OF THE WHITE GOODS TAX AND DIRECT THE DEPARTMENT OF ENVIRONMENT AND NATURAL RESOURCES TO STUDY ISSUES RELATED TO THE SCRAP TIRE DISPOSAL TAX AND THE WHITE GOODS DISPOSAL TAX.

OVERVIEW: This act makes four tax law changes and five fee law changes; only the tax law changes are summarized here. The tax law changes are:

- Set the tax rates for the public utility regulatory fee for the 2000-2001 tax year.
- Set the tax rate for the North Carolina Electric Membership Corporation regulatory fee for the 2000-2001 fiscal year.
- Set the tax rate for the insurance regulatory charge for the 2000 calendar year.
- Repeal the July 2001 sunset on the White Goods tax.

FISCAL IMPACT:

- Public Utility Regulatory Fee: This fee is expected to generate $9.06 million.
- NC Electric M'ship Corp: This fee is expected to generate $200,000.
- Insurance Regulatory Charge: This fee is expected to generate $25.65 million.
- White Goods Sunset Repeal: This tax generates approximately $4 million a year, which is distributed as follows:
    - The Solid Waste Management Fund receives 8% of the tax.
    - The White Goods Management Account receives 20%.
    - The counties receive the remaining 72%.

EFFECTIVE DATE:

- Public Utility Regulatory Fee: 2000-2001 tax year
- NC Electric M'ship Corp Fee: 2000-2001 tax year
- Insurance Regulatory Charge: 2000 calendar year
- White Goods Sunset Repeal: July 13, 2000

BACKGROUND & ANALYSIS:

Public Utility Regulatory Fee

The act sets the general rate for the public utility regulatory fee at 0.09% for the 2000-2001 fiscal year. This is the same rate that was in effect for both the 1997-1998 and 1998-1999 fiscal years, and is expected to generate $9.06 million. The utility regulatory fee is a tax that was first imposed in 1989. The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating public utilities. The regulatory fee is imposed on all utilities that are subject to regulation by the North Carolina Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenues. In general, jurisdictional revenue is revenue derived from providing utility service in North Carolina.

In addition to funding the State's cost in regulating public utilities, the money in the Utilities Commission and Public Staff Fund is currently used to finance the work of the Study Commission on the Future of Electric Service in North Carolina. The General Assembly established the Commission in 1997 to examine the cost, adequacy, availability, and pricing of electric rates and service in North Carolina to determine whether legislation is necessary to assure an adequate and reliable source of electricity and economical, fair, and equitable rates for all consumers of electricity in North Carolina.

North Carolina Electric Membership Corporation Fee

The act sets at $200,000 the annual public utility regulatory fee imposed on electric membership corporations whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale, as provided in G.S. 117-16, effective for the 2000-2001 fiscal year. The North Carolina Electric Membership Corporation is the only electric membership corporation that fits this description. The proceeds of the fee will be credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating electric membership corporations.

The 1999 General Assembly enacted S.L. 1999-180, which authorized electric membership corporations to form subsidiary corporations that may provide energy services and products, telecommunications services and products, and water and wastewater collection and treatment. The subsidiaries must fully compensate the electric membership corporation for its use of the corporation's personnel, services, equipment, and property. The Utilities Commission is charged with regulating this aspect of the subsidiary's business and, to pay for this regulation, S.L. 1999-180 levied a flat-rate regulatory fee to be paid annually by the North Carolina Electric Membership Corporation. The General Assembly must establish the fee amount each year. The North Carolina Electric Membership Corporation is the only electric membership corporation whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale, as provided in G.S. 117-16. It is a "generation and supply cooperative" owned by its members. Its members are all but one of the existing North Carolina electric membership corporations, which are "distribution cooperatives." Thus, the fee imposed on the North Carolina Electric Membership Corporation will be passed on to its member electric membership corporations.

Insurance Regulatory Charge

The act sets the insurance regulatory charge at 7% for the 2000 calendar year, the same rate used in the 1999 calendar year. The charge is expected to generate $25.65 million for the 2000-2001 fiscal year. The insurance regulatory charge is a tax that was enacted in 1991 to defray the State's cost of regulating the insurance industry. The charge is a percentage of each insurance company's premiums tax liability. The insurance regulatory charge is imposed on insurance companies that pay the gross premiums tax and, beginning in 2000, on health maintenance organizations and medical service corporations. For health maintenance organizations and medical service corporations, the fee is levied on each company's hypothetical gross premiums tax liability determined at the 1.9% gross premiums tax rate applied to its premiums base. The hypothetical calculation is necessary because medical service corporations pay premiums tax at a rate of 0.5% rather than 1.9% and because health maintenance organizations do not pay premiums tax.

Prior to 2000, the insurance regulatory charge was imposed only on insurance companies that paid the gross premiums tax. Medical service corporations were exempt, and health maintenance organizations did not pay the regulatory charge because they do not pay a gross premiums tax. Prior to 1995, these entities contributed to the Department of Insurance Fund through insurance audit and examination fees. However, in 1995, the General Assembly eliminated the insurance audit and examination fees for insurance companies, health maintenance organizations, medical corporations, and guaranty associations. The costs of the audits are now paid for by the insurance regulatory charge as part of the costs of regulating the insurance industry.

White Goods Sunset Repeal

This act repeals the sunset on the white goods tax. Under prior law, the white goods tax was scheduled to sunset July 1, 2001. The Department of Environment and Natural Resources reports annually to the Environmental Review Commission on the management of white goods. This act directs the Department to study the scrap tire disposal tax as well as the white goods disposal tax, and evaluate whether the amounts of these taxes should be altered or whether the distribution of the proceeds of the taxes should be reapportioned. The Department must make a report on this study to the Environmental Review Commission by October 1, 2000.

The white goods tax was imposed effective January 1, 1994. The purpose of the tax is to provide a source of revenue for the proper disposal of discarded white goods. A white good is a domestic or commercial large appliance, such as a refrigerator, a water heater, an air conditioner unit, or a

dishwasher. The tax is a flat rate charged on every new white good purchased in this State or brought into this State for storage or use. The tax rate is $3.00 per white good. The tax generates approximately $4 million each year.

Proceeds from the white goods tax are distributed as follows: 8% to the Solid Waste Management Trust Fund, 20% to the White Goods Management Account, and 72% to counties. Counties may use the white goods tax proceeds distributed to them only for the management of discarded white goods, which may include capital improvements for infrastructure to manage discarded white goods, operating costs associated with managing discarded white goods, and cleanup of white goods at illegal disposal sites.

Counties are limited in the amount of surplus white goods tax proceeds they can accumulate. Counties receive their distributions of white goods tax proceeds on a quarterly basis. If at the end of a fiscal year, the county has a surplus of white goods tax proceeds that equals or exceeds 25% of the amount it was eligible to receive for the fiscal year, it may not receive additional distributions until its surplus falls below that level. The amount that would have been distributed to a county will instead be credited to the White Goods Management Account.[4]

Counties must include in their annual financial information report to the Local Government Commission information about their management of white goods and their receipt and expenditure of white goods tax proceeds and related revenues. The annual financial information report must be certified by the county finance officer based on an independent audit by a certified public accountant.

TAX ENFORCEMENT

Session Law #	Bill #	Sponsor
S.L. 2000-119	HB 1551	Representative Miller

AN ACT TO MODIFY THE AUTHORITY OF DEPARTMENT OF REVENUE LAW ENFORCEMENT AGENTS, TO ALLOW THE SECRETARY OF REVENUE TO ADMINISTER THE OATH OF OFFICE TO DEPARTMENT OF REVENUE LAW ENFORCEMENT AGENTS, TO PROVIDE A CIVIL PENALTY FOR FILING A FRIVOLOUS INCOME TAX RETURN, AND TO CHANGE THE PROCEDURES FOR LAW ENFORCEMENT REPORTING ON NON-TAX-PAID UNAUTHORIZED SUBSTANCES.

OVERVIEW: This act makes the following changes to the law to facilitate enforcement of the tax laws:

[4] Funds in the White Goods Management Account are available for grants to assist local governments in managing white goods. Special legislation in 1999 diverted some of the funds to address specific hazardous waste sites.

- It expands the offenses revenue law enforcement officers may enforce to include misdemeanor offenses as well as felony offenses. This part of the act became effective July 14, 2000.
- It authorizes the Secretary of Revenue to administer the oath of office to revenue law enforcement officers. This part of the act became effective July 14, 2000.
- It creates a civil penalty for filing a frivolous income tax return. A frivolous return is one that meets both of the following conditions: (1) it does not include information on which the substantial correctness of the return may be judged or contains information that indicates that the return is substantially incorrect. (2) It evidences an intention to delay, impede, or negate the revenue laws of this State or purports to adopt a position that is lacking in seriousness. The penalty for filing a frivolous return is up to $500. This part of the act becomes effective October 1, 2000, and applies to returns filed on or after that date.
- It streamlines the procedures State and local law enforcement agencies must use to report arrests made for the failure to pay tax on unauthorized substances by allowing them to give the information directly to the Department of Revenue. This part of the act becomes effective December 1, 2000, and applies to arrests or seizures occurring on or after that date.

FISCAL IMPACT: The creation of a civil penalty for filing a frivolous income tax return could produce $300,000 to $1 million in revenue each year for the General Fund.

EFFECTIVE DATE: See the Overview above.

BACKGROUND & ANALYSIS: The Revenue Laws Study Committee recommended this act to the General Assembly, at the recommendation of the Department of Revenue. The act makes several changes to the law to facilitate the enforcement of the tax laws.

Authority of Law Enforcement Agents

The act expanded the offenses revenue law enforcement officers may enforce to include the following misdemeanor offenses:

- Willful failure to collect, withhold, or pay over tax. G.S. 105-236(8).
- Willful failure to file a return, supply information, or pay tax. G.S. 105-236(9).
- Highway use of dyed diesel or other non-tax-paid fuel. G.S. 105-449.117.
- Miscellaneous fuel tax misdemeanors. G.S. 105-449.120.
- Sale of certain packages of cigarettes. G.S. 14-401.18.

Revenue law enforcement officers already have the authority to enforce felony tax violations under G.S. 105-236 and to enforce numerous other offenses under State law when they involve a State tax. The act rewrites G.S. 105-236.1(a) by listing the offenses a revenue law enforcement officer may enforce.

Secretary to Administer Oath of Office

The act authorizes the Secretary of Revenue to administer the oath of office to revenue law enforcement officers. The Secretary is not one of the individuals who have general authorization

under G.S. 11-7.1 to administer oaths. The Secretary does, however, have authority under G.S. 105-261 to administer an oath to a person with respect to a tax return or report. The act puts the qualifications for becoming a revenue law enforcement officer, including the oath of office, in a separate subsection.

Civil Penalty for Filing a Frivolous Income Tax Return

The act creates a civil penalty for filing a frivolous income tax return. In order for a return to be frivolous, it must meet both of the following conditions:

- The return does not include information on which the substantial correctness of the return may be judged or it contains information that positively indicates the return is incorrect.
- The return evidences an intention to delay or impede the revenue laws of this State or purports to adopt a position that is lacking in seriousness.

The penalty for filing a frivolous return could be up to $500. As with other penalties assessed under Subchapter I of Chapter 105, this penalty would be assessed as an additional tax. This penalty is similar to a penalty imposed on the federal level under section 6702 of the Internal Revenue Code.

The Criminal Investigations Division of the Department of Revenue requested this change in the law. In its work, the Division has investigated cases in which a taxpayer will knowingly file an incorrect return in order to inflate deductions and thus increase the amount of the taxpayer's refund. For example, a taxpayer may claim extra dependents or exaggerate the amount of charitable contributions. The current penalties do not provide a proper remedy because they are based upon failure to pay the amount of tax due. In most of these cases, there is no amount of tax due because the taxpayer is already due a refund. The offense is that the taxpayer is claiming a greater refund than the taxpayer is entitled to receive.

Streamline the Procedures for Reporting on Non-Tax-Paid Unauthorized Substances

The act relieves the SBI of the burden of reporting drug-related offenses to the Department of Revenue. Under current law, State and local law enforcement agencies have to report to the SBI within 48 hours the arrest of any individual in possession of certain threshold amounts of drugs that do not bear unauthorized substances tax stamps. The SBI must then notify the Department of Revenue on a daily basis of the reports it receives. The SBI does not need this information and requested that it be relieved of this responsibility. Effective December 1, 2000, State and law enforcement agencies will report these arrests directly to the Department of Revenue, as opposed to the SBI. The act makes the following conforming changes: It moves the reporting requirement from Chapter 114 to Article 2D of Chapter 105; it repeals the requirement that the SBI notify the Department on the reports it receives.

STREAMLINED SALES TAX SYSTEM

Session Law #	Bill #	Sponsor
S.L. 2000-120	HB 1624	Representative Miller

AN ACT TO IMPLEMENT THE RECOMMENDATION OF THE NATIONAL GOVERNORS' ASSOCIATION FOR A STREAMLINED

SALES TAX COLLECTION SYSTEM AND TO OTHERWISE IMPROVE COLLECTION.

OVERVIEW: *This act is a recommendation of the Revenue Laws Study Committee. It seeks to improve the State's tax collections in several different ways:*

- It simplifies and streamlines the sales and use tax collection system for remote and in-state retailers.
- It provides that a remote seller who does not agree to collect the State's use tax may not use the State's courts to collect debts owed to it by a purchaser of its product in this State.
- It allows the Department of Revenue to exchange information concerning a taxpayer's social security number with the Division of Motor Vehicles when it is necessary to identify a taxpayer.
- It provides the Department of Revenue with the resources to continue its collection of delinquent tax debts owed by nonresidents and foreign entities for the remainder of this biennium.
- It allows the Department of Revenue to retain necessary funds from revenues it collects from its nonresident delinquent tax debt contracts to obtain assistance in developing a performance-based contract for an automated collection system. The General Assembly asked the Department and the State Controller to study how to collect taxes more efficiently. The centralization and automation of the Department's delinquent tax debts are the primary recommendations of this study, conducted by PricewaterhouseCoopers.
- It provides that, effective January 1, 2001, the penalty for misusing an exemption certificate applies not only to a certificate of resale, but also to a direct pay certificate and a farmer's certificate.
- It repeals the requirement that a taxpayer report use tax on the income tax return.

FISCAL IMPACT: No fiscal estimate is possible because the legislation is only the first step in establishing a new remote sales and use tax collection system. However, once this remote sales and use tax collection system is completed, the fiscal impact could be significant. A recent study by the University of Tennessee estimates that by 2003 the incremental State and local revenue loss on e-commerce transactions will be $238 million for North Carolina. If the current revenue losses on catalog sales and e-commerce transactions are included, the total amount could be over $400 million.

It is estimated that the implementation of an automated case management tool would increase delinquent tax collections by $11 million to $30 million annually. Additionally, contracting with collection agencies for out-of-state debts and for long-term delinquent accounts would yield an initial $20 million in additional revenues and an increase in recurring revenues of up to $23 million per year.

EFFECTIVE DATE: The provision dealing with the sales tax exemption certificate (Section 7) becomes effective January 1, 2001. The provisions dealing with the repeal of the use tax reporting requirement (Sections 10 and 11) becomes effective for taxable years beginning on or after January 1, 2003. The remainder of the act became effective July 14, 2000.

BACKGROUND & ANALYSIS:

Streamlined Sales Tax Collection System

This act enables North Carolina to become one of four states to participate in the streamlined sales tax collection system pilot project. The National Governors' Association recommended the streamlined sales tax collection system. The recommendation addresses the difficulty states have collecting sales and use taxes on purchases from remote retailers. The recommendation provides a simplified collection process that would allow participating retailers to use a computer software program to be able to calculate the amount of tax due to the State on a purchase based upon the customer's ship-to address. The administration of the program would be the responsibility of a person certified by the State to collect its taxes, not the retailer.

To begin this method of collection, the State must certify a person to act as its tax collector. It is anticipated that the identity of the "certified sales tax collector" will vary depending upon the type of retailer involved. Certain large retailers may choose to act as their own collector.

To be certified as a sales tax collector, this act would require the Secretary of Revenue to find that the person meets all of the following conditions:

- Uses a sales tax collection software program certified by the Secretary. To be certified by the Secretary, the program must be able to determine the applicable tax rate based on a ship-to address, determine whether or not an item is exempt from tax, determine whether or not an exemption certificate is valid, calculate the tax due, and generate the reports and returns required by State law.
- Agrees to update its certified software program upon notification by the Secretary.
- Agrees to integrate the certified software program with the retailer's system for which the person collects the tax.
- Remits the tax due and files the necessary returns on behalf of the retailers for whom the person collects the tax.
- Enters into a contract with the Secretary and agrees to comply with the conditions of the contract.
- Files a bond or an irrevocable letter of credit with the Secretary in an amount set by the Secretary.

The State would assume the responsibility for the costs of the system by contracting with the collector to reimburse the collector for the costs of operating the system and for the costs of integrating the system with those of participating retailers. The amount a collector charges under a contract is considered a cost of collecting the tax and is payable from the amount collected. The payments to the collector will be made on a per transaction basis based on negotiated rates. The per-transaction fee could be in the form of a flat per transaction rate, a percentage rate, or a combination of the two types of rates.

Participation in the program by retailers is voluntary. To participate in the program, a retailer must agree to let the certified sales tax collector integrate the certified software with the retailer's system so that the tax due on a sale can be determined at the time of the sale. The information on the amount of tax due will be available to a customer before completion of a transaction. Once the customer approves the purchase, the retailer will send the transaction through the payment

processing system and the amount paid to the retailer will be the full amount of the purchase plus tax. A participating retailer will be required to enter into a standing debit authorization agreement with the collector that will enable the collector to debit the retailer's account on an agreed upon schedule for the amount of tax owed all participating states according to transactions processed by the collector. The collector will be liable for remitting the appropriate tax to the participating states. In the absence of fraud, the participating retailer will not be subject to audits by the states on the transactions it processes using the collector's software program. A contract with a collector will not be a factor in considering whether a person has nexus with a state for payment of a tax.

The act also makes the following statutory changes to meet the uniformity features needed to successfully implement the streamlined sales tax collection system:

- It makes the exemption process easier to administer by eliminating the "good faith" requirement when accepting an exemption certificate number from a purchaser on a sale made over the Internet or by other remote means. (Section 6) It codifies a long-standing practice of the Department of Revenue to issue "direct pay certificates" to a person who is unsure how property the person purchases should be taxed at the time the property is purchased. (Section 1) And it provides that, effective January 1, 2001, the penalty for misusing an exemption certificate applies not only to a certificate of resale, but also to a direct pay certificate and a farmer's certificate. (Sections 7 and 18)
- It establishes a uniform sourcing rule that calculates the amount of tax due on a sale based on its "ship-to address". (Section 2) To accomplish this sourcing rule, the bill expands the current sales tax exemption for printed materials that are shipped out-of-state and not subsequently used by the purchaser to include all tangible personal property. (Section 5)
- It provides that the customer of a retailer who participates in the program may not elect to pay the tax directly to the Secretary rather than to the seller. (Section 4)
- It provides that local government sales and use tax rate changes may only be made twice a year and the local government must give the State at least 90 days notice of any tax rate change. (Sections 12 and 13)

Use of NC Courts by Out-of-State Retailers

Under current law, a loan made by a person who fails to pay or comply with the State privilege tax statute, G.S. 105-88, may not be collected through the State's courts. This act extends this exclusion to include debts owed to a retailer who is required by G.S. 105-164.8(b) to collect use tax for the State but refuses to do so if the retailer reported gross sales of at least $5,000,000 on its most recent federal income tax return. (Sections 3 and 9) The exclusion would also apply to any person to whom the debt is assigned. The exclusion would only apply to debts owed on tangible personal property purchased from the retailer. A retailer is required to collect use tax for the State under G.S. 105-164.8(b) if the retailer maintains retail offices in the State, has representatives in the State who solicit business, or purposefully and systematically exploits the market in this State by any media-assisted means such as direct mail advertising, distribution of catalogs, computer-assisted shopping, television, radio, etc.

DMV Disclose Social Security Number to DOR:

Under federal law, 42 U.S.C. 405(c)(2)(C), a state may use a person's social security number for the purpose of identification in the administration of its tax laws. The Department of Revenue has used social security numbers to identify taxpayers for many years. Up until recently, the

Department was able to obtain a taxpayer's social security number from the Division of Motor Vehicles. The Department may have asked the Division for a taxpayer's social security number when the Department had more than one number on file for a taxpayer and needed to know which number was correct, or when it needed to locate a taxpayer. The exchange of information between the Division and the Department was not addressed by statute. In 1997, the General Assembly amended the drivers license law to require all applicants for a drivers license to provide their social security numbers. The legislation gave specific authority for the Division to disclose social security numbers to the Child Support Enforcement Program. The law did not address the disclosure of the numbers to the Department of Revenue. As a result, the practice between the Division and the Department has stopped.

This act rewrites the drivers license statute pertaining to social security numbers to allow the Division to disclose a social security number to the Department for the purpose of verifying taxpayer identification. (Section 14) It also provides that the Division of Motor Vehicles may not use an applicant's social security number as the identifying number for the license holder. (Section 15) This clarification resolves a conflict between two subsections in G.S. 20-7: subsection (b1) provides that an applicant's social security number may not be printed on the license, while subsection (n) says that the license holder's social security number may be the license holder's identifying number.

Contract for Collection of Delinquent Tax Debts

Last session, the General Assembly allowed the Department of Revenue to contract for the collection of delinquent tax debts owed by nonresidents and foreign entities. A delinquent tax debt is the amount of tax due as stated in a final notice of assessment issued to the taxpayer when the taxpayer no longer has the right to contest the debt. The legislation stated that "[T]he Secretary of Revenue shall contract during the 1999-2001 fiscal biennium for the collection of delinquent tax debts…" However, the legislation provided a funding mechanism for only the first year of the biennium. This act provides funding for the second year of the biennium. It allows the Secretary to retain the costs of the contracts from the amounts collected under the contracts. (Section 16)

The Department is currently involved in a pilot effort to contract for the collection of out-of-state accounts receivable in conjunction with the Office of the State Controller. On March 16, 2000, the Department sent 1,016 accounts with a value of $927,170.46 to the Office of the State Controller for referral to a collection agency. Within the first 30 days, the Department realized a 2.5% return.

Implement Recommendation of PricewaterhouseCoopers to Centralize and Automate Debt Collection System

Last session, the General Assembly authorized the Department of Revenue and the Office of the State Controller to conduct a study of the Department's delinquent collection practices and present findings and recommendations to the Revenue Laws Study Committee. The Office of the State Controller's existing contract with PricewaterhouseCoopers (PwC) was modified and PwC conducted the study. PwC made the following recommendations to improve the Department's debt collection practices:

- Implement an automated case management tool with debt scoring and performance measures. The projected impact of this recommendation would be an increase of delinquent tax collections by $11 million to $30 million annually.

- Centralize the collection process for individual income taxes, installment agreements, low-dollar debts, and wage garnishments. The impact of this recommendation would be a more efficient use of the Department's resources.
- Contract with collection agencies for out-of-state debts. The impact of this recommendation would be an initial $20 million in additional revenues and $3 million in recurring revenues.
- Contract with collection agencies for long term delinquent accounts. The impact of this recommendation would be up to $20 million in additional revenues per year.

The Department would like to implement the recommendations of this study. To centralize its collection process, the Department would like to enter into a performance-based contract where the person who provides the automated system would be paid from the proceeds of the system based upon some variable that pertains to how well the system works. To enable the Secretary of Revenue to obtain assistance in developing a request for proposal for the performance-based contract, this act allows the Secretary to draw the amount needed from the revenue collected pursuant to the contracts for the collection of delinquent tax debts owed by nonresidents and foreign entities. (Section 17)

CONFORM WITH FEDERAL LAW

Session Law #	Bill #	Sponsor
S.L. 2000-126	HB 1559	Representative Luebke

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS, TO CONFORM TO FEDERAL LAW REGARDING PENSION TAX WITHHOLDING AND DEADLINES FOR PAYMENTS OF CERTAIN ESTIMATED INCOME TAXES, TO CLARIFY THE SALES FACTOR FOR DETERMINATION OF STATE CORPORATE INCOME AND FRANCHISE TAX, AND TO ENABLE THE COLLECTION OF TAX DEBT OWED TO NORTH CAROLINA THROUGH THE FEDERAL TREASURY OFFSET PROGRAM.

OVERVIEW: This act was a recommendation of the Revenue Laws Study Committee and makes the following changes relating to tax law:

- **Update IRC Reference.** It rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from June 1, 1999, to January 1, 2000. This change became effective for taxable years beginning on or after January 1, 2000.
- **Conform Pension Tax Withholding.** It requires withholding of State income taxes on an eligible rollover distribution to the extent permitted under federal law. This change becomes effective January 1, 2001.

- **Conform Estimated Tax Deadline for farmers and fishers.** It returns the withholding law for farmers and fishers to conformity with federal law, correcting an inadvertent change made in 1985. This change became effective July 14, 2000.
- **Clarify Sales Factor.** It amends the definition of "sales" for purposes of the apportionment formula to clarify that the receipts of a multi-state corporation should include only the net gain realized from the sale or maturity of securities, not the rolled over capital or return of principal and not receipts otherwise exempt from tax. This change became effective July 14, 2000.
- **Participate in Treasury Offset Program.** It enables the Department of Revenue to collect delinquent tax debts owed to the State through the United States Department of the Treasury Offset Program by providing for the imposition of a collection assistance fee. This change became effective July 14, 2000.[5]

FISCAL IMPACT: The Code Update is expected to reduce General Fund revenues by $2,030,000 in fiscal year 2000-2001, and $4,350,000 in fiscal year 2001-2002. The Code Update is expected to increase General Fund revenues by $650,000 in fiscal year 2002-2003, $850,000 in fiscal year 2003-2004, and $600,000 in fiscal year 2004-2005. Conforming the tax deadline and the pension tax withholding, and clarifying the sales factor for multi-state corporations have no fiscal impact. Participating in the Treasury Offset Program has a potential revenue gain, but no estimate is available.

EFFECTIVE DATE: *See Overview section.*

BACKGROUND & ANALYSIS:

Update Code Reference

Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State tax law previously tracked federal law. Since the General Assembly updated the State's reference to the Internal Revenue Code to June 1, 1999, Congress enacted Public Law 106-170, the Tax Relief Extension Act of 1999. That Act extends several expired and expiring tax provisions, some of which affect federal taxable income. Since the computation of State taxable income begins with federal taxable income, any changes to federal taxable income affect State taxable income.

This act rewrites the definition of the Code to change the reference date from June 1, 1999, to January 1, 2000. The act further provides that the federal tax law changes that could increase an individual's or a corporation's State taxable income for the 1999 tax year will not become effective for the 1999 tax year but will instead apply only to taxable years beginning on or after January 1, 2000. This provision is necessary because Article 1, Section 16, of the North Carolina Constitution prohibits the legislature from passing a law that will retroactively increase the tax liability of any taxpayer. There are a few changes in Public Law 106-170 that could increase taxable income for the 1999 tax year. Because the act could not be ratified until after the 2000 Session of the 1999 General Assembly convened, these changes were given a delayed effective date.

[5] This change was not part of the recommendation of the Revenue Laws Study Committee but was later recommended by the Department of Revenue.

The following is a summary of the provisions of the Tax Relief Extension Act of 1999 that may affect State taxable income. These changes apply to taxable years beginning on or after January 1, 2000.

- Delays the sunset of the exclusion from gross income of up to $5,250 annually for employer-provided educational assistance for undergraduate courses. The exclusion would have expired with respect to courses beginning on or after June 1, 2000. Public Law 106-170 extends the exclusion with respect to courses beginning before January 1, 2002.
- Clarifies that no charitable contribution deduction is allowed for a transfer to or for the benefit of a charitable organization if, in connection with the transfer, the organization directly or indirectly pays any premium on any personal benefit contract with respect to the transferor. A personal benefit contract is a life insurance, annuity, or endowment contract. The clarification of this provision does not infer that a charitable split-dollar insurance arrangement was allowed under prior law. It does not apply to a person that benefits exclusively under a bona fide charitable gift annuity within the meaning of the Code.
- Delays the sunset of the work opportunity tax credit and the welfare-to-work tax credit. These credits would have expired for wages paid or incurred to a qualified individual who began work for an employer before July 1, 1999. Public Law 106-170 extends these credits for wages paid to qualified individuals who began work for the employer on or after July 1, 1999, and before January 1, 2000. To the extent an employer claims the federal credit, the employer must reduce its federal deduction for wages by the amount of the credit. Since North Carolina does not have comparable credits, it allows a taxpayer who claims the federal credits to claim a deduction from federal taxable income for the amount by which the employer's deduction for wages was reduced.
- Delays the sunset of the expensing of environmental remediation expenditures. The Code authorizes taxpayers to treat certain environmental remediation expenditures that would otherwise be chargeable to capital account as deductible in the year paid or incurred. The end of that period of time during which qualifying expenditures can be expensed is extended from January 1, 2001 to January 1, 2002.
- Provides that an option to accelerate the receipt of a payment under a production flexibility contract between the Secretary of Agriculture and a farmer will not accelerate the recognition of income. A taxpayer generally is required to include an item in income no later than the time of its actual or constructive receipt. If a taxpayer has an unrestricted right to demand the payment of an amount, the taxpayer is in constructive receipt of that amount whether or not the taxpayer makes the demand and actually receives the payment. The production flexibility contract payments are to be included in gross income in the year they are actually received. These contracts generally cover crop years 1996 through 2002.
- Prohibits use of the installment method by accrual method taxpayers. Under prior law, the installment method of reporting income from dispositions of property could be used by a taxpayer regardless of whether the taxpayer used the cash method or accrual method of accounting. An accrual method taxpayer is generally required to recognize income when all the events have occurred that fix the right to the receipt of the income and the amount of the income can be determined with reasonable accuracy. The installment method of accounting allows a taxpayer to defer the recognition of income from the disposition of

certain property until payment is received, regardless of whether the taxpayer uses the cash method or accrual method of accounting. Public Law 106-170 generally prohibits accrual method taxpayers from using the installment method of reporting income from dispositions of property. It retains the present law regarding the availability of the installment method for dispositions of property used or produced in the trade or business of farming and for dispositions of timeshares or residential lots if the taxpayer elects to pay interest under section 453(l) of the Code. It does not change the ability of a cash method taxpayer to use the installment method.

- Adds new categories of non-capital assets. Three categories have been added to the list of assets the gain or loss on which is treated as ordinary income, as opposed to a capital gain or loss. The new categories are: commodities derivatives held by commodities derivatives dealers, hedging transactions, and supplies of a type regularly consumed by the taxpayer in the ordinary course of the taxpayer's trade or business.

- Limits conversion of character of income from constructive ownership transactions. Public Law 106-170 limits the amount of long-term capital gains a taxpayer can recognize from derivative transactions with respect to certain pass-through entities to the amount of gain the taxpayer would have had if the taxpayer owned a direct interest in the pass-through entity during the term of the derivative contract.

- Delays sunset on transfers of excess pension benefits to retiree health benefits accounts. The period of time permitting qualified transfers of excess defined benefit pension plan assets to retiree health benefits accounts under section 401(h) of the Code has been extended to include transfers that take place before January 1, 2006. The period of time would have expired on December 31, 2000.

- Allows a basis reduction to assets of a corporation if stock in the corporation is distributed by a partnership to a corporate partner. This reduction applies if, after the distribution, the corporate partner controls the distributed corporation.

- Delays sunset of exceptions under subpart F of the Code for active financing income of controlled foreign corporations. A foreign corporation is a "controlled foreign corporation" (CFC) if more than 50% of its outstanding voting stock, or more than 50% of the value of all its outstanding stock, is owned by U.S. shareholders. A "U.S. shareholder" is a U.S. citizen or resident, or a U.S. corporation, partnership, estate or trust, that owns 10% or more of the foreign corporation's total combined voting stock. In general, the foreign-source income of a foreign corporation is not taxable to its U.S. shareholders until it is distributed to them. Recognizing that income could be accumulated in a CFC, thus deferring U.S. tax on this income indefinitely, Congress enacted the subpart F provisions of the Code in 1962. These provisions require certain items of income to be treated as deemed paid to U.S. shareholders and, therefore, subject to U.S. taxation. The income subject to current inclusion under the subpart F rules includes foreign personal holding company income, insurance income, and foreign base company services income. Examples of foreign personal holding company income include dividends, rents, royalties, annuities, net gains from commodity transactions, net gains from foreign currency transactions, and payments in lieu of dividends. Insurance income subject to inclusion under the subpart F rules includes any income of a CFC attributable to the issuing or reinsuring of any insurance or annuity contract in connection with risks located in a country other than the CFC's country of organization. "Foreign base company services

income" is income derived from services performed for a related person outside the country in which the CFC is organized. Temporary exceptions from foreign personal holding company income, foreign base company services income, and insurance income apply for subpart F purposes for certain income that is derived in the active conduct of a banking, financing, or similar business, or in the conduct of an insurance business. These exceptions were set to expire on December 31, 1999. Public Law 106-170 extends these exceptions for two years, until January 1, 2002.

Background for Code Update

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code on a particular date instead of referring to the Code and any future amendments to it. The answer to the question lies in both a policy decision and a potential restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law from year to year, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue losses. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

In 1997, the Revenue Laws Study Committee explored the possibility of legislation that would automatically adopt federal changes to the Code each year, with legislative review and approval required in the succeeding legislative session. It was hoped that this approach would avoid the practical difficulties that occur when Code changes go into effect many months before the General Assembly has a chance to pass legislation adopting the changes. The Attorney General's Office reviewed the relevant case law in this State and other states before concluding that this approach would be unlikely to withstand a constitutional challenge.

Conform Pension Tax Withholding

Under federal law, withholding is required on pensions, annuities, and certain deferred income, including IRAs, unless the taxpayer makes an election not to have the tax withheld. There is one exception to this rule: withholding is required on an eligible rollover distribution, and a taxpayer may not elect not to have the tax withheld.[6]

[6] For practical purposes, an eligible rollover distribution is a distribution from a pension plan before retirement that is includable in gross income and that is not a payment required under federal law (such as a death benefit). The payment must be eligible for rollover into another 401(k) or IRA. Generally, an eligible rollover distribution occurs when an individual changes jobs.

In 1999, the General Assembly passed S.L. 1999-414, which tracks part of the federal law. Under S.L. 1999-414, a pension payer must withhold State income tax on a pension payment, other than an eligible rollover distribution, if the pension payer was withholding federal income tax on the payment. As under federal law, a recipient of a pension payment that is not an eligible rollover distribution may elect not to have tax withheld from the pension payment. Unlike federal law, S.L. 1999-414 did not require that tax be withheld from an eligible rollover distribution. Effective January 1, 2001, this act requires that North Carolina tax be withheld on eligible rollover distributions to the same extent as required under federal law. A taxpayer may not elect not to have the tax withheld. The effect of this change is to conform North Carolina law to federal law in this regard.

Conform Estimated Tax Deadline

The act corrects an inadvertent change made in 1985 by conforming the State's estimated tax deadline for farmers and fishers to the federal deadline. Federal law forgives the penalty for late payment of estimated taxes by farmers and fishers if the final return is filed, with taxes paid in full, by March 1 following the end of the taxable year. Prior State law erroneously based the forgiveness on March 1 payment of estimated tax.

Prior to 1985, the federal and State tax law requirements to pay estimated tax and the imposition of the underpayment penalty were contained in different statutes. In 1984, federal law was rewritten to consolidate several Code sections regarding the payment of estimated tax into one Code section. In 1985, North Carolina enacted similar legislation consolidating the State statutes into one statute. The bill was entitled "AN ACT TO CONFORM PAYMENTS OF NORTH CAROLINA ESTIMATED TAX PENALTIES FOR INDIVIDUALS TO FEDERAL ESTIMATED TAX PAYMENT PENALTIES." The exceptions were intended to remain the same and the Department of Revenue has administered those exceptions in that manner since the federal legislation was enacted.

Clarify Sales Factor

A multi-state corporation that has income from business activity which is taxable in more than one state must allocate and apportion a percentage of its income to North Carolina for purposes of the State's corporate income and franchise tax law. An excluded corporation apportions its income to the State by multiplying its income by the sales factor. An "excluded corporation" is a corporation engaged in business as a building or construction contractor, a securities dealer, a loan company, or a corporation that receives more than 50% of its ordinary gross income from investments or dealings in intangible property. The sales factor is a fraction, the numerator of which is the total sales of the corporation in this State during the income year and the denominator of which is the total sales of the corporation everywhere during the income year.

The definition of "sales" is the gross receipts of the corporation except for receipts from a casual sale of property and receipts otherwise allocated by statute, such as rents, royalties,

sales of real property, interest, and net dividends. This act clarifies the definition of "sales" by excluding from gross receipts the following:

- Receipts exempt from taxation.
- The portion of receipts realized from the sale or maturity of securities or other obligations that represents a return of principal.

To include these receipts in the gross amount would distort the sales factor. For example, it is not unusual for working capital to be turned over repeatedly by investing in short term securities. When the receipts include both principal and interest, the principal may be included in the denominator several times. When the denominator is inflated, the fraction is diluted and it cannot accurately reflect the true net earnings of the corporation in North Carolina. The act clarifies that only the net gain from the sale or maturity of securities should be included in the sales factor, not the rolled over capital or return of principal and not receipts otherwise exempt from taxation.

Participate in Treasury Offset Program

The Department of Revenue may collect delinquent tax debts owed to the State through the U.S. Department of the Treasury Offset Program. To participate in this method of collection, the State must pay a fee of $9.65 per offset claim to the Program, send a certified letter to the delinquent taxpayer at a cost of $3.01, and incur other incidental expenses. The act enables the Department of Revenue to impose a $15.00 collection assistance fee on each tax debt collected through the Treasury Offset Program. The Department requested the collection fee because of the cost of participating in the Program. The State already imposes a collection assistance fee on debts collected through the State debt setoff collection act. The amount of that fee cannot exceed $15.00. The collection assistance fee authorized by the act is added to the amount of the tax liability submitted to the U.S. Department of the Treasury for setoff. As under the State setoff debt collection act, the collection assistance fee has priority over the debt setoff. Therefore, if the federal setoff covers only part of the tax due, the collection assistance fee has priority over the tax due.

RENEWABLE ENERGY MFR. CREDIT

Session Law #	Bill #	Sponsor
S.L. 2000-128	HB 1473	Representative Hackney

AN ACT TO MODIFY THE INCOME TAX CREDIT FOR MANUFACTURERS OF CERTAIN RENEWABLE ENERGY EQUIPMENT AND TO FURTHER ADJUST THE SHARE CERTAIN CITIES RECEIVE FROM THE STATE GROSS RECEIPTS TAX.

OVERVIEW: This act expands the current corporate tax credit for a corporation that constructs a facility for the production of photovoltaic equipment to include the construction of a facility for the production of other types of renewable energy equipment. The act provides that the credit must be taken in five equal installments and extends the carryforward from five to ten years. The act also adjusts the distribution of the State franchise tax on utility gross receipts that is shared with cities.

FISCAL IMPACT: The current corporate income tax credit for constructing photovoltaic manufacturing facilities has not been used since it was created in 1981. Thus, neither the number of companies nor the amount of the credit to be requested can be estimated. However, if only one company applies for the credit, there will be a General Fund revenue loss due to the absence of applicants for the current tax credit program.

There is no State budget impact from the redistribution of the franchise tax proceeds among the cities.

EFFECTIVE DATE: Section 1 of this act, relating to the tax credit, is effective for taxable years beginning on or after January 1, 2000, and is repealed for costs incurred during taxable years beginning on or after January 1, 2006. Section 2 of the act, relating to the redistribution of the franchise tax, is effective October 1, 2000, and applies to distributions made on or after that date.

BACKGROUND & ANALYSIS:

Tax Credit for Manufacturers of Renewable Energy Equipment

Under prior law, a corporation that constructed a facility for the production of photovoltaic equipment was allowed a credit equal to 25% of the installation and equipment costs of construction paid during the taxable year. The amount of the credit could not exceed the amount of tax owed; any unused credit would be carried forward for five years. Photovoltaic equipment means products designed, manufactured, and produced to convert sunlight directly into electricity. The credit was not allowed to the extent that federal, State, or local grants provide any of the costs of the equipment. To secure the credit, the taxpayer must own or control the facility at the time of construction.

This act allows a corporation that constructed a facility in North Carolina for the manufacture of renewable energy equipment to receive a corporate income tax credit equal to 25% of the installation and equipment costs of construction paid during the taxable year. Renewable energy equipment is defined in the act as biomass equipment, solar electric or thermal equipment, and wind energy equipment. This broad definition encompasses the definition of photovoltaic equipment. As with the prior credit, the new credit is not allowed to the extent that any of the cost of the equipment is provided by governmental grants. The credit allowed under this act differs from the former credit in the following ways:

- The entire credit cannot be taken for the taxable year in which the costs are paid, but must be taken in five equal installments beginning with the taxable year in which the costs are paid.
- The cumulative amount of the credit, including carryforwards, may not exceed 50% of the amount of the tax imposed for the taxable year.
- Any unused portion of the credit may be carried forward for ten years instead of five years.
- A taxpayer that claims any other credit with respect to the construction of a facility to manufacture renewable energy equipment may not take this credit with respect to the same facility.

Adjustment to Franchise Tax Distribution Formula for Cities

This act also makes an adjustment to the franchise tax distribution formula for cities. The State distributes part of the State franchise tax imposed on utilities to the cities. Before July 1, 1999, the franchise taxes that were distributed were the taxes on electricity, piped natural gas, and telephone service. The rate for each utility was 3.22%. In S.L. 1998-22, the General Assembly combined the franchise gross receipts and the sales taxes on piped natural gas into a single per therm excise tax. That act preserved the distribution of the gross receipts tax to cities by providing that 50% of the new excise tax on piped gas service within a city would be distributed to that city.

As part of the resolution of the 1991 State budget crisis, the State eliminated the future growth to cities of this shared revenue. The total amount distributed was frozen but the relative share of each city changed based on the proportion of that city's receipts compared to the total of all cities' receipts. When the 1993 General Assembly restored growth, effective beginning with the 1995-96 fiscal year, it was decided that the State would hold back an amount equal to the growth of the distribution base from 1990-91 to 1994-95 as the contribution of each city to the State's budget problems. After growth was restored in 1995-96, it was discovered that some cities received less net distribution than in 1990-91, the last year prior to the "growth freeze". This happened to cities that experienced a temporary franchise tax base growth in the freeze years (1990-91 through 1994-95) and then a reduction of the base in 1995-96. To adjust for this loss of tax base growth, the 1997 General Assembly reduced the holdback amount, thereby increasing the amount of State franchise tax distributed to 40 cities. These 40 cities were the ones whose 1995-96 distributions were less than 95% of their 1990-91 distributions. The 1997 act increased the annual distribution to the affected cities by a total of $194,841. The annual distribution to the other 500 cities was reduced by the same amount, so that the State share of the franchise tax was not reduced. The 1997 adjustment, however, was not sufficient to hold the Town of Denton's loss to a level that did not go below its 1990-91 distribution. The reason the 1997 adjustment formula did not fully compensate Denton is because the manufacturing facility that was the basis of the holdback had not fully closed by 1995-96.

This act allows the adjustment formula for a city that, in the 1995-96 fiscal year, received from gross receipts taxes less than 60% of the amount it received in the 1990-91 fiscal year, to be based upon the 1999-2000 fiscal year distribution rather than the higher 1995-96 distribution. Based on actual tax base holdback, and distribution data from the Department of Revenue, it is estimated that in future years the Town of Denton will receive an additional $14,000 per year.

This exception to the adjustment formula would apply to distributions made on or after October 1, 2000.

2000 TECHNICAL CORRECTIONS

Session Law #	Bill #	Sponsor
S.L. 2000-140	**SB 1335**	**Senator Hartsell**

AN ACT TO MAKE TECHNICAL CORRECTIONS AND CONFORMING CHANGES TO THE GENERAL STATUTES AS RECOMMENDED BY THE GENERAL STATUTES COMMISSION, TO MAKE OTHER TECHNICAL AND CONFORMING CHANGES, AND TO AMEND LAWS RELATING TO URBAN WATERFRONT DEVELOPMENT AND THE CLASSIFICATION OF GAMMA HYDROXYBUTYRIC ACID (GHB) AS A CONTROLLED SUBSTANCE.

OVERVIEW: This act makes conforming and technical changes to various statutes and session laws. Most of these changes were recommended by the General Statutes Commission. The sections of the act explained in the table below are changes made to the revenue laws and related statutes. These changes were recommended by the Revenue Laws Study Committee, the

Department of Revenue, and legislative staff. Additional technical and conforming changes were made in House Bill 1290, enacted as S.L. 2000-173.

FISCAL IMPACT: Insignificant impact.

EFFECTIVE DATE: July 21, 2000, unless otherwise provided *(see Background & Analysis section).*

BACKGROUND & ANALYSIS: The following table provides a section-by-section analysis of the changes that affect the revenue laws and related statutes:

SECTION	*EXPLANATION*
56	Reorganizes and clarifies new regulatory fee levied in 1999 on certain electric membership corporations.
61	Updates the statute catchline to reflect that the nature of the tax on amusements has changed from a license tax to a privilege tax.
62	Makes conforming change to reflect that natural gas tax is now levied and distributed under a different statute.
63	Corrects wording problems that resulted when two different 1999 acts amended the same statutes.
64	Modernizes outdated language in the corporate income tax statutes.
65	Makes a conforming change to recognize that certain State, local, and federal government retirement benefits are exempt from North Carolina income tax pursuant to settlement of the *Bailey*, *Emory*, and *Patton* cases.
66	Repeals a criminal penalty for willful failure to pay corporate estimated tax, because it duplicates a penalty already provided in G.S. 105-236(9), in the general administrative section of the Revenue Act.
67	Conforms the statute to reflect that only one statewide retail sales tax license is required, reorganizes and consolidates two similar statutes, deletes obsolete language regarding renewal fees, and repeals a criminal penalty that duplicates a penalty already provided in the general administrative section of the Revenue Act.
68	Corrects the form of a reference to the Internal Revenue Code.
69	Adds a definition of "Department" in Chapter 105 of the General Statutes, consistent with the way the term is used in that Chapter to mean "Department of Revenue."
70	Adds the missing word "the" to the statute.
71	Corrects indentation of statute.
72	Corrects a numerical cite in G.S. 105-275, as amended in S.L. 2000-2, and clarifies the definition for the term "vehicle".

SECTION	EXPLANATION
73	Makes a conforming change regarding a mailed notice to reflect a 1999 change in the content of property tax lien lists published in the newspapers. This section becomes effective January 1, 2001, the same date the 1999 changes become effective
74	Corrects definitional cross-references to avoid problems when definitions are renumbered.
75	Makes further technical corrections to S.L. 2000-2, effective July 1, 2000.
85	Extends hold harmless period for piped gas distributions to municipalities to allow the Revenue Laws Study Committee more time to evaluate whether the new distribution method enacted in 1998 will yield distribution amounts that are similar enough to those provided under prior law.
88	Corrects effective date for 1999 change to G.S. 105-241.1, the scope of which was inadvertently limited.

FINANCE NEW WILDLIFE CENTERS

Session Law #	Bill #	Sponsor
S.L. 2000-143	**SB 1477**	**Senator Kerr**

AN ACT TO PROVIDE FOR A NEW, SUSTAINABLY DESIGNED, STATE OFFICE BUILDING AND WILDLIFE EDUCATION CENTER WITH RELATED PARKING FACILITIES, TO BE USED BY THE WILDLIFE RESOURCES COMMISSION, PURSUANT TO AN INSTALLMENT FINANCING CONTRACT IN A PRINCIPAL AMOUNT NOT TO EXCEED THIRTEEN MILLION FIVE HUNDRED THOUSAND DOLLARS, AND TO PROVIDE FOR A NEW EASTERN WILDLIFE EDUCATION CENTER WITH RELATED PARKING FACILITIES, TO BE ADMINISTERED BY THE WILDLIFE RESOURCES COMMISSION, PURSUANT TO AN INSTALLMENT FINANCING CONTRACT IN A PRINCIPAL AMOUNT NOT TO EXCEED FOUR MILLION DOLLARS.

OVERVIEW: This act authorizes the State to construct and finance two projects: a new, sustainably designed, office building and Wildlife Education Center for the Wildlife Resources Commission, to be located in Raleigh, and a new Eastern Wildlife Education Center, to be located in Currituck County. The projects would be financed with one or two installment purchase contracts under which the State would borrow up to $13.5 million for the Raleigh project and up

to $4 million for the Currituck County project. Repayment of the debt would be secured by a lien on the building, land, or both.

FISCAL IMPACT: The construction financing costs authorized by this act have no General Fund impact, but rather are borne entirely by the Wildlife Resources Commission (WRC). The WRC expects to fund the construction of the new administration and education center and the Eastern Wildlife Education Center internally, with currently unbudgeted funds. The anticipated yearly loan payment cost of the $13.5 million Raleigh administration and education facility at 5.1% interest for 25 years is $956,495. The annual loan payment for the $4 million Eastern Wildlife Education Center given the same loan term and interest rate is $283,406.

EFFECTIVE DATE: This act became effective August 2, 2000.

BACKGROUND & ANALYSIS: This act would authorize the construction of two projects: a new office building and Wildlife Education Center for the Wildlife Resources Commission in Raleigh and a new Eastern Wildlife Education Center in Currituck County. The Raleigh project would include the 63,000 square foot building, related furnishings and equipment, and parking facilities, and would be located on the Centennial Campus of North Carolina State University. The land would be leased from the Centennial Campus under a long-term lease. The Currituck project would include the 19,800 square foot building, related furnishings and equipment, and parking facilities, and would be located on land adjacent to the Currituck Beach Lighthouse and the historic Whalehead Club. This land is available at no cost from Currituck County.

These two projects would be financed with one or more installment purchase financing contracts. Under such a contract, the State would borrow up to $13.5 million for the Raleigh project and up to $4 million for the Eastern Wildlife Education Center. It is anticipated the amounts borrowed would be repaid with interest in installments over a period of 20 to 25 years. The debt would be tax-exempt. It is the intent of the General Assembly that the repayments would be made not from the General Fund but with funds available to the Wildlife Resources Commission from the Wildlife Resources Fund[7] and the Wildlife Endowment Fund[8].

The debt would be secured by a security interest in the buildings, the land, or both. There would be no pledge of the State's taxing power or full faith and credit. Thus, voter approval is not necessary for the borrowing. If the Wildlife Resources Commission defaulted on its repayments, the buildings could be disposed of to generate funds to satisfy the debt. Under the act, the funds could be borrowed either from a single entity or by the sale of certificates of participation. A certificate of participation represents the holder's undivided interest in the right to receive the installment payments to be made by the State. If certificates of participation are issued, a nonprofit corporation will have to be created to facilitate the financing.

Before a financing contract could be entered into, it would have to be approved by the Council of State. The Council of State would, by resolution, set the maximum interest rate and the maximum number of years over which the debt would be repaid. In addition, the State Treasurer must

---

[7] The Wildlife Resources Fund consists of revenues derived from hunting, fishing, and related license fees, other than commercial fishing license fees. The Fund and its earnings are designated for the purposes of the Wildlife Resources Commission. G.S. 143-250.

[8] The Wildlife Endowment Fund consists of the proceeds from the sale of lifetime licenses as well as gifts and grants. The Fund is a special trust fund to support wildlife conservation programs. The earnings of the Fund may be spent for this purpose, while the principal is to be preserved. G.S. 143-250.1.

approve the financing, finding that the amount to be borrowed is adequate and not excessive and will not require an excessive increase in any State revenues to provide for repayment.

It is intended that the Raleigh facility will be sustainably designed, i.e., the building and surrounding environs will be designed using features that are energy efficient, incorporate reusable and renewable resources, provide natural lighting, are nontoxic, require low maintenance, are congruent with the natural characteristics of the site, and cause minimum adverse impact to the environment.

VIDEO POKER MACHINES ILLEGAL

Session Law #	Bill #	Sponsor
S.L. 2000-151	**SB 1542**	**Senator Wellons**

AN ACT TO BAN THE INTRODUCTION OF NEW VIDEO GAMING MACHINES INTO THIS STATE, TO LIMIT THE NUMBER OF VIDEO GAMING MACHINES PER LOCATION, TO PROVIDE FOR REGISTRATION OF MACHINES, INCREASING CRIMINAL PENALTIES FOR VIOLATION, PROVIDING FOR SUSPENSION OR REVOCATION OF LICENSES FOR VIOLATION, AND PROVIDING FOR SEIZURE OF UNLAWFUL VIDEO GAMING MACHINES.

OVERVIEW: This act bans video gaming machines unless they were in lawful operation in the State as of June 30, 2000, and were listed in the State by January 31, 2000, for ad valorem taxation for the 2000-2001 tax year. The act does not ban machines that do not issue replays or redeemable coupons or tokens. The act also prohibits the operation of more than three video gaming machines at one location and requires, subject to a grandfather clause, that locations where video gaming machines are located be at least 300 feet from one another. In addition, the act contains other prohibitions, registration requirements, and reporting requirements, and increases the penalties for violations of the gaming laws. Video machines that give cash payouts are still illegal.

CURRENT LAW: Current law allows the operation of video gaming machines that limit to eight the number of accumulated credits or replays that may be played at one time and that award free replays or paper coupons that may be exchanged for prizes or merchandise with a value not exceeding ten dollars ($10.00), but may not be exchanged or converted to money. Video machines that give cash payouts are illegal.

BILL ANALYSIS: Section 1 of the bill adds a new section (G.S. 14-306.1) that regulates video gaming machines. A video gaming machine is defined as a slot machine as defined in G.S. 14-306(a) and other forms of electrical, mechanical, or computer games, such as video poker, that requires deposit of any coin, token, or use of a credit card, debit card, or any other method that requires payment to activate play. However, the prohibitions contained in G.S. 14-306.1 do not apply to assemblers, manufacturers, and transporters of video gaming machines who assemble, manufacture, and transport them for sale in another state so long as the machines, while located in North Carolina, cannot be used to play the prohibited games. Nor do the prohibitions apply to those who assemble, manufacture, and sell such machines for the use only by a federally recognized Indian Tribe if such machines may be lawfully used on Indian Land under the Indian

Gaming Regulatory Act. Likewise, G.S. 14-306.1 does not make any activities of a federally recognized Indian Tribe unlawful or against public policy if the activities are otherwise lawful for any federally recognized Indian Tribe under the Indian Gaming Regulatory Act.

The new G.S. 14-306.1 makes it unlawful, effective when the bill becomes law, for any person to operate, allow to be operated, place into operation, or keep in that person's possession for the purpose of operation any video gaming machine unless:

- The machine was in lawful operation and available for play within North Carolina on or before June 30, 2000, and was listed in the State by January 31, 2000, for ad valorem taxation for the 2000-2001 tax year; or
- The machine is within the scope of the exclusion provided by G.S. 14-306(b)(1), which is a new subdivision that provides that machines that are operated and played for amusement and that involve the use of skill or dexterity to solve problems or tasks or to make varying scores or tallies and do not emit, issue, display, print out, or otherwise record any receipt, paper, coupon, token, or other form of record which is capable of being redeemed, exchanged, or repurchased for cash, cash equivalent, or prizes, or award free replays are excluded from the definition of slot machines.

Effective October 1, 2000, this section limits to three the number of video gaming machines that a person may operate, allow to be operated, place into operation, or keep in possession for the purpose of operation at one location. Effective October 1, 2000, the following are also prohibited:

- A person under the age of 18 playing a video gaming machine (this violation is an infraction, which is a noncriminal violation of law not punishable by imprisonment).
- An operator of a video gaming machine knowingly allowing a person under the age of 18 to play a video gaming machine.
- The operation or allowing the operation of any video gaming machine during the hours of 2:00 A.M. Sunday through 7:00 A.M. Monday.
- The operation of a video gaming machine that is not in plain view of persons visiting the premises.
- Advertising the operation of video gaming machines by use of on-premise or off-premise signs.

Effective 30 days after the bill becomes law, it is unlawful to warehouse video gaming machines, except in conjunction with the permitted assembly, manufacture, and transportation of these machines.

Effective October 1, 2000, each location where it is lawful to operate video gaming machines must be at least 300 feet in any plane from any other location where other video gaming machines are located. A "location" is defined as a permanent building having or being within a single exterior structure. However, two or more places where video gaming machines were lawfully operated under separate ownership on June 30, 2000, shall be considered to be separate locations more than 300 feet from each other, regardless of the distance from each other or whether they are located in the same building or edifice. Video gaming machines may be operated only within permanent buildings.

The owner of a video gaming machine must register the machine by October 1, 2000, with the Sheriff of the county in which the machine is located using a standardized registration form supplied by the Sheriff. The registration form must be signed under oath and a material false statement in the registration form shall subject the owner to seizure of the machine under G.S. 14-298 in addition to any other punishment imposed by law. If the video gaming machine is moved to a different location, the owner is required to reregister the machine with the appropriate Sheriff prior to its being placed in operation. The registration form must include, at a minimum, the following:

- Evidence of the date on which the machine was placed in operation.
- The serial number of the machine.
- The location of the facility at which the machine is operated.
- The name of the owner of the facility.

Each Sheriff is required to report to the Joint Legislative Commission on Governmental Operations no later than November 1, 2000, on the total number of machines registered in that county, itemizing how many locations have one, two, or three machines.

The owner of each machine or the agent of that owner must report each calendar quarter to the Department of Revenue the total amount of gross receipts itemized by each machine, the number of machines at that location, and the total value of prizes and merchandise awarded to players of each machine at that location. The first such report is due April 15, 2001. Failure of the owner or agent to timely file the required report, or filing a report containing a material false statement, shall subject the owner of the machine to seizure of the machine under G.S. 14-298 in addition to any other punishment imposed by law. Upon request of a Sheriff, the Department of Revenue shall forward a copy of the report to the Sheriff of the county where the machines are located. The Department of Revenue shall compile the reports and make a summary each quarter to the Joint Legislative Commission on Governmental Operations.

The North Carolina Sheriffs' Association, Inc., after consultation with the Division of Alcohol Law Enforcement, and the Conference of District Attorneys of North Carolina, shall report to the Joint Legislative Commission on Governmental Operations no later than January 1, 2001, its estimates of the costs of the registration process and the cost of enforcement of this section, suggested fees to make the registration and enforcement self-supporting, and recommendations as to a system with registration at the State level and primary enforcement at the local level.

G.S. 14-306.1 explicitly provides that counties and municipalities are not preempted from adopting ordinances that more stringently regulate video gaming machines.

A person who has been convicted once under G.S. 14-309(a) may not possess any video gaming machines for a period of one year. A person who has been convicted twice under G.S. 14-309(a) may not possess any video gaming machines for a period of two years. A person who has been convicted three or more times under G.S. 14-309(a) may not possess any video gaming machines.

<u>Section 2</u> of the bill adds a new section (G.S. 14-306.2) that makes it clear that a violation of G.S. 14-306.1 is a violation of gambling statutes for purposes of G.S. 18B-1005(a)(3). G.S. 18B-1005(a)(3) provides that it is unlawful for an ABC permittee, or his agent or employee, to knowingly allow a violation of the gambling statutes on the licensed premises.

Section 3 amends G.S. 14-309 to make any person who violates any provision of G.S. 14-304 through G.S. 14-309 guilty of a Class 1 misdemeanor for the first offense, guilty of a Class I felony for the second offense, and a Class H felony for a third or subsequent offense. However, a violation of the provisions of G.S. 14-306.1 involving the operation of five or more video gaming machines is a Class G felony.

Section 4 amends G.S. 14-306 to clarify that coin-operated machines, video games, pinball machines and other computer, electronic or mechanical devices operated and played for amusement, that involve the use of skill or dexterity to solve problems or tasks or to make varying scores or tallies and do not emit, issue, display, print out, or otherwise record any receipt, paper, coupon, token, or other form of record which is capable of being redeemed, exchanged, or repurchased for cash, cash equivalent, or prizes, or award free replays are not included in the definition of slot machine.

This section also requires that a video gaming machine that is lawful under G.S. 14-306(b)(2) must have affixed to it in view of the player a sticker informing the player that it is a criminal offense with the potential of imprisonment to pay more than that which is allowed by law. In addition, if the machine has an attract chip that allows programming, the static display shall contain the same message.

This section clarifies that the exemption provided by G.S. 14-306(b)(2) does not apply to a machine that pays off in cash. The exemption provided by G.S. 14-306(b)(2) also does not apply where the prizes, merchandise, credits, or replays are either repurchased for cash or rewarded for cash, exchanged for merchandise of a value more than ten dollars, or where there is a cash payout of any kind by the person operating or managing the machine or the premises, or any agent or employee of that person. Any person making an unlawful payout is subject to punishment under G.S. 14-309.

Section 5 amends G.S. 14-298 to provide that sheriffs and police may seize and destroy any video gaming machine prohibited by G.S. 14-306 or G.S. 14-306.1.

Section 6 directs the Legislative Research Commission to study the implementation of this legislation and recommend any changes it deems necessary in order to strengthen it. The Legislative Research Commission may make its report to the 2001 General Assembly no later than April 1, 2001.

Section 6.1 allows the Department of Revenue to draw from collections under Article 4 of Chapter 105 of the General Statutes for the 2000-2001 fiscal year its actual costs of implementing G.S. 14-306.1(e1), which is the subsection requiring the reporting of the amount of gross receipts itemized by machine and the prizes and merchandise awarded by video gaming machines.

Section 7 contains a severability clause.

Section 8 is the effective date clause. The effective dates of the individual provisions are noted in the text of this summary. The bill becomes law when the Governor signs it.

REALLOCATE WATER BOND FUNDS

Session Law #	Bill #	Sponsor

S.L. 2000-156	SB 1381	Senator Kerr

AN ACT TO REALLOCATE THE PROCEEDS OF THE CLEAN WATER BONDS.

OVERVIEW: This act reallocates $200 million in Clean Water Bonds proceeds from a program that makes loans to local governments, to related grant programs. The act also revises caps on some of the grants, places a moratorium on making grants from one-half of the reallocated proceeds, and requires the State Infrastructure Council to study the geographic distribution of loans and grants from Clean Water Bonds proceeds.

FISCAL IMPACT: Converting some of the loan funds to grant funds will reduce loan repayments credited to the General Fund in an amount estimated to range from about $1 million to $20 million a year between 2001 and 2005.

EFFECTIVE DATE: August 1, 2000.

BACKGROUND: S.L. 1998-132 authorized the issuance of $800 million in Clean Water Bonds. The bonds were approved by the voters in November 1998. Of the $800 million, $300 million was designated for loans to local governments, administered by DENR, to be used for water supply systems, water conservation projects, water reuse projects, wastewater collection systems, and wastewater treatment works. Repayments of the loans are credited to the General Fund. The remaining $500 million of Clean Water Bond proceeds was allocated for various grant programs and to match federal wastewater or water assistance funds. S.L. 1998-132 provided that the $800 in Clean Water Bonds could be reallocated by the General Assembly between the various loan and grant programs designated in the act.

ANALYSIS: This act withdraws $200 million of the $300 million loan funds and reallocates the funds for the following four grant programs that were established in the Clean Water Bonds act:

- $146 million for High Unit Cost Grants. High Unit Cost Grants are grants administered by DENR for wastewater and water system projects that would otherwise require estimated household water and sewer user fees greater than 1.5% of the median household income. These grants are administered under the Clean Water Revolving Loan and Grant Fund.
- $25.9 million for Unsewered Community Grants. Unsewered Community Grants are grants administered by the Rural Economic Development Center for units of local government serving small, rural communities not served by centralized sewer systems for wastewater collection and treatment.
- $28.1 million for Supplemental and Capacity Grants. Supplemental Grants are grants administered by the Rural Economic Development Center to help local governments match other grant or loan funds. Capacity Grants are grants administered by the Rural Economic Development Center to help local governments pay the cost of preparing grant and loan applications, capital improvement plans, and other efforts to support growth and development in rural areas. The act also makes a conforming change to the annual total limits on these Supplemental and Capacity Grants, raising the Supplemental Grant limit from $8 million to $12 million and raising the Capacity Grant limit from $2 million to $3 million.

The act places a moratorium on granting part of the $200 million in bond proceeds reallocated for grants. Only one-half of these funds may be granted before March 31, 2001; the remainder may be granted after that date. The first one-half of the $146 million reallocated for High Unit Costs Grants is available only to units whose applications were filed with DENR by July 1, 2000. The moratorium was imposed in response to concerns by some local governments that the Clean Water Bond proceeds were being awarded in a manner that favored some geographical areas over others. To address these concerns, the act directs the State Infrastructure Council, an advisory body established in the Clean Water Bond Act, to study the geographic distribution of loans and grants and report any disparities or inequities by December 1, 2000.

Finally, this act modifies the cap on grants made under the Clean Water Revolving Loan and Grant Fund. Under prior law, a unit of local government could not receive grants exceeding $3 million a year. This act reduces the cap to $3 million over three years, except that the cap is not reduced for water districts and sewer districts that include three or more local government units, or for counties in which less than 50% of the population is served by a government or nonprofit public water system. The reduction of the cap on grants will apply to grants made on or after the date the act became law, July 13, 2000, but will take into account grants made on or after July 1, 1999, in determining whether the three-year cap has been exceeded. The purpose of this change was to address concerns by some units of local government that too much of the available funds was going to larger grants to a small number of units.

BROWNFIELDS TAX INCENTIVE

Session Law #	Bill #	Sponsor
S.L. 2000-158	**SB 1252**	**Senator Odom**

AN ACT TO CREATE A TAX INCENTIVE FOR THE REDEVELOPMENT OF BROWNFIELDS PROPERTIES, AS RECOMMENDED BY THE ENVIRONMENTAL REVIEW COMMISSION.

OVERVIEW: This act allows a partial exclusion from property taxes for qualifying improvements made on brownfields property. The partial exclusion is limited to five years and decreases from an exclusion of 90% in the first year to an exclusion of 10% in the fifth year. The Environmental Review Commission recommended this exclusion. Additionally, this act amends the statute governing brownfields agreements so that the Department will give particular consideration to the written comments of units of local government with taxing jurisdiction over property subject to the brownfields agreement.

FISCAL IMPACT: This act does not affect General Fund revenues. The fiscal impact of this act on local government revenues is not clear. However, Department of Environment and Natural Resources staff and numerous county tax assessors feel that the additional property tax revenue provided by improvements to brownfields sites would be far greater than the combined tax loss over the five-year partial exemption period.

EFFECTIVE DATE: The section of this act that established the property tax exclusion becomes effective for taxable years beginning on or after July 1, 2001. The remainder of the act became effective August 2, 2000.

BACKGROUND & ANALYSIS: This act provides that improvements made to real property that is subject to a brownfields agreement will be granted a partial property tax exclusion for the first five taxable years beginning after completion of qualifying improvements made after the later of July 1, 2000, or the date of the brownfields agreement. The property entitled to the exclusion must be appraised annually during the period that the owner is entitled to the exclusion.

The amount of the exclusion declines over the five-year period as follows:

YEAR	PERCENT OF APPRAISED VALUE EXCLUDED
1	90%
2	75%
3	50%
4	30%
5	10%

Additionally, this act amends G.S. 130A-310.34(d) to require the Department of Environment and Natural Resources, when developing brownfields agreements, to give particular consideration to written comment from the local governments having taxing jurisdiction over the brownfields property.

In 1997, the General Assembly enacted The Brownfields Property Reuse Act of 1997. Brownfields property is defined in that act as abandoned, idled, or underused property at which expansion or redevelopment is hindered by actual environmental contamination or the possibility of environmental contamination and that is or may be subject to remediation. Under the 1997 act, the Department of Environment and Natural Resources may enter into a brownfields agreement with a prospective developer. These brownfields agreements allow a developer to clean up a contaminated property to a level that is less "clean" than would otherwise be required by law in exchange for subjecting the property to land-use restrictions. A developer who complies with the agreement will not be held liable for clean-up of areas of contaminants identified in the agreement, so long as the activities conducted on the property do not increase the risk of harm to public health or the environment.

NONHAZARDOUS DRY-CLEANING TECH. INCENTIVE

Session Law #	Bill #	Sponsor

S.L. 2000-160	HB 1583	Representative Gibson

AN ACT TO PROVIDE AN INCENTIVE FOR INVESTING IN DRY-CLEANING EQUIPMENT THAT DOES NOT USE HAZARDOUS SUBSTANCES AND TO MODIFY THE AUTHORIZATION FOR INVESTING STATE FUNDS IN RURAL NORTH CAROLINA.

OVERVIEW: This act provides a tax credit for commercial dry-cleaners who invest in environmentally friendly dry-cleaning equipment. Additionally, this act modifies the way in which the State Treasurer may invest certain funds held by the State Treasurer. The Environmental Review Commission recommended the dry-cleaning portion of this act.

FISCAL IMPACT: The estimated General Fund loss of the tax credit enacted by this act is as follows:

FISCAL YEAR	FISCAL IMPACT
2001-2002	($584,100)
2002-2003	($423,000)
2003-2004	($507,600)
2004-2005	($625,200)

EFFECTIVE DATE: The tax credit enacted by this act is effective for taxable years beginning on or after July 1, 2001, and is repealed for taxable years beginning on or after January 1, 2006. The remainder of this act became effective August 2, 2000.

BACKGROUND & ANALYSIS: This act adds a new section to Article 3B of Chapter 105 of the General Statutes, which provides tax credits for investing in general business property, renewable energy property, and low-income housing. The new section provides a tax credit for commercial dry-cleaners who buy or lease "qualified dry-cleaning equipment." "Qualified dry-cleaning equipment" is defined as dry-cleaning equipment that does not use any of the following:

- A chlorine-based solvent.
- A hydrocarbon-based solvent.
- A solvent that contains a hazardous substance as defined in the federal Comprehensive Environmental Response, Compensation, and Liability Act.
- A solvent that contains a substance determined by the Environmental Protection Agency or the National Institute of Occupational Safety and Health to possess carcinogenic potential to humans.
- A substance that the Department of Environment and Natural Resources (DENR) determines to pose a threat to human health or the environment.

It is estimated that 99% of the State's dry-cleaners currently use chlorine-based or hydrocarbon-based solvent. Use of these solvents has led to soil and groundwater contamination.

The new credit, which is similar to the renewable energy credit that was enacted in 1999, (*See*: S.L. 1999-342) provides a credit for equipment placed in service in this State equal to 20% of the taxpayer's cost. Like the other credits in Article 3B, this credit may be taken against corporate or individual income tax or corporate franchise tax, at the taxpayer's choice. The total credits allowed under Article 3B may not exceed 50% of the taxpayer's tax liability in any given year. Any excess over this limit may be carried forward for up to five years. Article 3B requires the taxpayer to maintain and make available in case of audit any records necessary to determine and verify the amount of the credit to which the taxpayer is entitled. A taxpayer claiming the credit allowed under the new section must file with the tax return a certification by DENR that the equipment purchased or leased by the taxpayer is "qualified dry-cleaning equipment." No credit is allowed under this section for equipment for which the taxpayer claims another credit under Chapter 105 of the General Statutes.

Section 2 of this act modifies the ways in which the State Treasurer may invest certain State funds. G.S. 147-69.2 sets out the permitted investments for cash in trust funds and special funds held by the State for any purpose other than meeting State appropriations. Under prior law, G.S. 147-69.2 allowed the State Treasurer to invest up to $20 million in the obligations and securities of the North Carolina Enterprise Corporation. Section 2 expands this authorization to include the North Carolina Economic Opportunities Fund. Since $10 million is currently invested in the North Carolina Enterprise Corporation, the State Treasurer could, but is not required to, invest up to $10 million in the North Carolina Economic Opportunities Fund.

The North Carolina Economic Opportunities Fund is a Small Business Investment Corporation (SBIC). An SBIC is an investment company licensed by the federal Small Business Administration to invest in small businesses. Once licensed, the SBIC can leverage two dollars in federal investment funds for each dollar in non-federal funds invested. The purpose of the North Carolina Economic Opportunities Fund is to provide venture capital for smaller companies in rural North Carolina. Initial financings would typically range from $500,000 to $2 million with investments generally in the form of preferred stock, common stock, or subordinated debts with warrants.

Section 2 of this act also modifies G.S. 147-69.2 to allow the reinvestment in venture capital investments of any income from these venture capital investments without regard to the respective $20 million and $30 million[9] caps. The result of the change is that the State Treasurer could invest substantially more than $50 million in capital projects depending on the economic success of past projects.

The State Treasurer has a fiduciary duty to seek the best possible investments in terms of return and safety. Existing law reflects the policy of the State that the State Treasurer's investment decisions should be professional decisions made in the best interest of the owner of the assets and not influenced by political or economic development considerations. The Treasurer is independent of fiscal control by the Governor and is authorized to contract with independent professionals and experts as necessary for proper administration of the investment programs. The Treasurer is required to establish annual yield targets for investments and to report annually to the General Assembly on the nature and character of all investments, the return on the investments,

---

[9] Currently the State Treasurer may also invest up to $30 million as a limited partner in a partnership whose primary purpose is to invest in venture capital or corporate buyout transactions.

and the extent to which the annual yield targets have been reached. The Treasurer is also required to report quarterly on all investments to the Joint Legislative Commission on Governmental Operations and to the Co-Chairs of the House and Senate Appropriations Committee

UNC APPROPRIATED CAPITAL/REVENUE BONDS

Session Law #	Bill #	Sponsor
S.L. 2000-168	**HB 1853**	**Representative Miller**

AN ACT TO AUTHORIZE THE CONSTRUCTION AND THE FINANCING, WITHOUT APPROPRIATIONS FROM THE GENERAL FUND, OF CERTAIN CAPITAL IMPROVEMENTS PROJECTS OF THE CONSTITUENT INSTITUTIONS OF THE UNIVERSITY OF NORTH CAROLINA AND TO AMEND THE LAWS REGARDING CERTAIN REVENUE BONDS THAT MAY BE ISSUED BY THE BOARD OF GOVERNORS.

OVERVIEW: This act authorizes the construction of several projects by The University of North Carolina. The projects will be financed through revenue bonds and special obligation bonds, not appropriations from the General Fund.

FISCAL IMPACT: The projects authorized by this act will not be constructed with General Fund revenues. However, there are two projects that the institutions will request a General Fund appropriation for operating expenses. The General Fund expenditure for fiscal year 2001-2002 is expected to be $113,179.

EFFECTIVE DATE: The act became effective July 10, 2000.

BACKGROUND & ANALYSIS: There are two types of self-liquidating bonds that may be issued by the Board of Governors of the University of North Carolina: revenue bonds and special obligation bonds. These bonds are not payable from tax revenues. However, the General Assembly must authorize the projects for which special obligation bonds may be issued. Although the statute does not expressly require legislative authorization of revenue bond projects, the General Assembly has historically authorized the projects for many years. This act sets forth the self-liquidating projects the Board of Governors plans to finance with revenue or special obligation bonds this year.

Article 21 of Chapter 116 of the General Statutes authorizes the Board of Governors to issue revenue bonds for the types of projects enumerated in the article. The types of projects for which revenue bonds may be issued include educational buildings, dormitories, recreational facilities, dining facilities, student centers, health care buildings, parking decks, etc. The revenue bonds are payable from rentals, charges, fees, and other revenues such as gifts.

Article 3 of Chapter 116D of the General Statutes, enacted this session by S.L. 2000-3, authorizes the Board of Governors to issue special obligation bonds. Special obligation bonds are payable with any sources of income or receipts of the Board of Governors or a constituent or affiliated institution, but not including tuition payments or appropriations from the General Fund from

State revenues. The bond proceeds could be used for construction, improvement, and acquisition of any capital facilities located at UNC constituent and affiliated institutions.

This act also rewrites the existing revenue bond law for clarification purposes. It rewrites the definition of "institution" to recognize that UNC Hospitals at Chapel Hill is now referred to and known as the UNC Health Care System and to include The University of North Carolina General Administration. It rewrites the definition of "project" in the revenue bond law to conform the authority of the Board of Governors to issue revenue bonds for academic facilities to the wording of the authority granted in the special obligation law this year with the passage of S.L. 2000-3.

REFUND OVERPAYMENT OF DEED STAMP TAX

Session Law #	Bill #	Sponsor
S.L. 2000-170	**HB 1544**	**Representative Pope**

AN ACT TO CLARIFY THAT A TAXPAYER IS ENTITLED TO A REFUND OF AN OVERPAYMENT OF THE STATE EXCISE TAX ON CONVEYANCES.

OVERVIEW: This act establishes a procedure through which a taxpayer may request a refund of an overpayment of the State excise tax on conveyances.

FISCAL IMPACT: No General Fund impact. The bill will affect other funds as follows:

- Parks & Rec. Trust Fund — No Impact to Less than $2000 per Year
- Natural Heritage Trust Fund — No Impact to Less than $1000 per Year
- Local Government — Minimal Impact in Selected Counties

EFFECTIVE DATE: July 13, 2000, and applies retroactively to taxes paid on or after January 1, 2000.

BACKGROUND & ANALYSIS: The excise tax on conveyances, known as the deed stamp tax, is a State tax on instruments transferring an interest in real property. The register of deeds of the county in which the property is located collects the tax when the deed transferring the property is recorded. The person presenting the instrument for recording is responsible for indicating on the instrument the amount of tax due. The register of deeds must collect the tax due and mark on the instrument to indicate payment of the tax and the amount paid. The tax rate is $1.00 for each $500.00 (0.2%) of the value of the property conveyed. The county retains one-half of the net proceeds of the tax and remits the remaining one-half to the State. Seventy-five percent of the funds remitted to the State is dedicated to the Parks and Recreation Trust Fund created in G.S.

113-44.15[10] and 25% is dedicated to the Natural Heritage Trust Fund created in G.S. 113-77.7.[11] None of the State's share of the excise tax on conveyances goes to the General Fund.

The prior law did not provide a mechanism for a taxpayer to receive a refund of an overpayment of the excise tax on conveyances. The tax is governed generally by the administrative provisions in Article 9 of Chapter 105 of the General Statutes. Under Article 9, a taxpayer must apply to the Secretary of Revenue for a refund of an overpayment of tax. However, the State excise tax is administered at the county level, as opposed to the State level. Therefore, the refund procedure in Article 9 did not work well for the excise tax on conveyances.

This act provides that a taxpayer that pays more tax than is due may request a refund of the overpayment by filing a written request for a refund with the board of commissioners of the county where the tax was paid. The request must be filed within six months after the date the tax was paid and must explain why the taxpayer believes a refund is due. There will probably be few situations in which a refund is requested, because the taxpayer is responsible for indicating the amount of tax due. However, there are instances when an instrument is recorded in the wrong county. In those cases, no tax would be due in the county where the instrument was recorded and the taxpayer should be entitled to a refund of the tax paid.

The act provides that the board of county commissioners must review a request for a refund within the time limitations of G.S. 105-266.1. The board must hold a hearing on the request within 90 days after receiving it. The board must make its decision on the request within 90 days after the hearing and it must send a copy of its decision to the Secretary of Revenue. If the board determines that a refund is due, it must refund the county's portion of the overpayment with interest to the taxpayer. If the board determines that a refund is not due, it must inform the taxpayer that the taxpayer may request the Secretary of Revenue to review the decision.

To obtain the Secretary's review of the board's decision, the taxpayer must request a hearing in writing. The request must be filed within 30 days after the taxpayer receives the board of county commissioners' decision denying the refund. Like the board, the Secretary must review the request for a refund within 90 days after the Secretary receives the request. The Secretary must send the board a copy of the Secretary's decision. The Secretary's decision is binding on the board of county commissioners. If the Secretary determines that a refund is due, the board must refund the county's portion of the overpayment with interest to the taxpayer.

A taxpayer that disagrees with the Secretary's decision may bring an action against the county and the State to recover the disputed amount. The action may be brought in the Superior Court of Wake County or in the superior court of the county where the tax was paid.

Before the taxpayer may receive a refund, the taxpayer must record a new instrument indicating the correct amount of tax due. If no tax is due because the instrument was recorded in the wrong county, the taxpayer must record an instrument stating that no tax was owed and the reason why. Once the correcting instrument has been recorded, the register of deeds must notify the county finance officer and the Secretary of Revenue so that the overpayment may be refunded to the

[10] The Parks and Recreation Trust Fund is used for capital expenditures for the State Parks System, matching funds for local government park and recreation purposes, and the Coastal and Estuarine Water Beach Access Program.

[11] The Natural Heritage Trust Fund is used to acquire land that represents the ecological diversity of the State, land for State parks, wildlife areas, and similar public purposes, and land that contributes to a balanced State program of historic properties.

taxpayer. Like other State taxes, the overpayment bears interest at the rate established in G.S. 105-241.1. The interest begins to accrue on the overpayment 30 days after the taxpayer requests a refund of the tax.

2000 REVENUE LAWS CLARIFYING CHANGES

Session Law #	Bill #	Sponsor
S.L. 2000-173	**HB 1290**	**Representative Luebke**

AN ACT TO IMPROVE THE ADMINISTRATION OF THE TAX LAWS BY MAKING CLARIFYING AND CONFORMING CHANGES TO THE REVENUE AND RELATED LAWS.

OVERVIEW: This act makes numerous clarifying and conforming changes to the revenue laws and related statutes as recommended by the Revenue Laws Study Committee. These changes were originally included in House Bill 1575. Additional conforming and technical changes to the revenue laws were made in Senate Bill 1335, enacted as S.L. 2000-140.

FISCAL IMPACT: Only section 2 of the act has a fiscal impact *(see Background & Analysis section).*

EFFECTIVE DATE: August 2, 2000, unless otherwise provided *(see Background & Analysis section).*

BACKGROUND & ANALYSIS: The following table provides a section-by-section analysis of the changes:

SECTION	EXPLANATION
1	Reorganizes the sunsets for the William S. Lee Act and the General Business Credits Act, so that the sunset language will be codified within each Act. Also codifies the William S. Lee Study provisions with the sunset. Codifying the sunsets separates the two Acts' sunsets, which were in the same session law, and makes them easier for taxpayers to find. This section also clarifies the sunset of the Renewable Energy Tax Credits added to the General Business Credits Act in 1999.
2	Clarifies that the $100 local tax limitation enacted in S.L. 1999-438 for loan agencies and other related businesses does not repeal the pre-existing local authority to tax pawnbrokers up to $275 a year. This section becomes effective July 1, 2001. This section will allow local governments to regain revenue lost due to the 1999 legislation. Based on a 1996 survey of local governments, if all local governments changed their ordinance in response to the 1999 legislation, they would have experienced a loss of $47,999.

SECTION	EXPLANATION
3	Clarifies that a county or city does not share in the distribution of beer and wine tax if the only place where beer and wine sales are authorized in the county or city is a sports club. Also repeals an obsolete subsection.
4	Eliminates the requirement that resident breweries, resident wineries, and nonresident vendors file an invoice with the Secretary and that two copies of the invoice be given to wholesalers and importers. The person will still be required to file a report that contains the information required by the Secretary.
5	Conforms the discount statutes for excise taxes on beer, wine, and liquor to those for tobacco products so that they are uniform. The language, that the discount is not allowed on taxpaid beverages given as free goods for advertising, is removed because similar language is not included in the tobacco product article. The Department of Revenue plans to administer the excise tax on tobacco products and the excise taxes on beer, wine, and liquor through the same computer program.
6	Allows the resident breweries, resident wineries, and nonresident vendors to keep information needed to file reports with the Department of Revenue in a format that is useful to them by not restricting them to invoices. These businesses will have to keep records of the information needed to file reports and returns for three years.
7	Repeals the special franchise taxes on telegraph companies and street bus companies. According to the Department of Revenue, there are no taxpayers paying tax under these provisions. With repeal of these special taxes, the general corporate franchise tax will apply to any company that might have otherwise fallen under the provisions of the special taxes.
8	Repeals a cross-reference to the special franchise tax on street bus companies, repealed by section 7 of the act, and reorganizes the language of the statute.
9	Changes the form of the definition of "manufactured home" in the sales tax law from a restatement of federal standards to a cross-reference to federal standards. This section also codifies an administrative application of the sales tax definition for 'manufactured home" to include a modular home that is built on a permanent chassis and is transportable in one or more sections.
10	Clarifies that a retailer for purposes of the Highway Use Tax must be engaged in the business of selling or leasing motor

SECTION	EXPLANATION
	vehicles, and clarifies and updates definition language in Chapter 20 of the General Statutes.
11	Allows the Department of Revenue to exchange information with the Division of Adult Probation and Parole of the Department of Correction. This change will assist in collecting the controlled substances tax.
12	Clarifies that motor carrier fuel tax assessments based on presumed mileage are used only if the Department of Revenue considers the presumption reasonable. The section also corrects incorrect terminology and changes sentence order.
13	Effective July 1, 2000, changes the method by which tax on fuel is charged at the destination state's rate when the fuel is simultaneously sold from one supplier, to another supplier, to a customer who picks the fuel up at the rack for export. S.L. 1998-146 attempted to address this situation by expanding the definition of two-party exchange to include buy-sell agreements as one type of two-party transaction for purposes of the definition of "supplier". That change created confusion and led to mismatches between terminal operator reports and supplier returns. This section changes back to the old, narrower definition of two-party exchange and then adds a specific provision allowing the destination state's tax rate to be paid when the fuel is transferred at the rack pursuant to a buy-sell agreement.
14	Restores to the definition of "user" a provision that was inadvertently deleted, and makes conforming changes to reflect defined term. This added provision, regarding vehicle weight threshold was formerly provided in G.S. 105-449.9 (repealed). Since users are subject to audit, the vehicle weight threshold will limit the audits to larger vehicles.
15	Conforms the motor fuel excise tax exemption statute to reflect that an unlicensed exporter or distributor is liable for the tax under G.S. 105-449.82(c). This change exempts fuel from the tax only when it is removed by a licensed distributor or licensed exporter.
16	Conforms the statute catchline by removing a reference to a repealed provision.
17	Incorporates a change concerning "locked pumps" made by the federal law in 1998. The federal change already applies in the State, and the bill simply codifies the change and clarifies that a distributor is still eligible for a refund of the excise taxes paid on kerosene if the pump meets the requirements of federal law. A

SECTION	EXPLANATION
	"locked pump" is one that is kept locked by the retailer and must be unlocked by the retailer for each sale of kerosene. The distributor may currently apply for a refund if the dispensing device for the kerosene is not suitable for use in fueling a highway vehicle.
18	Restores a provision making fuel retailers and bulk-end users subject to audit by the Department of Revenue. S.L. 1999-438 repealed the requirement that retailers and bulk-end users obtain licenses. An unintended consequence of this repeal was elimination of the Department's audit authority over these users and sellers of motor fuel.
19	Moves the tax exemption language for "911" telephone service from G.S. 62A-5 to the corporate income tax statutes. This change makes Articles 1 and 2 of Chapter 62A consistent.
20	Effective date

CONDUIT AGENCY FINANCING

Session Law #	Bill #	Sponsor
S.L. 2000-179	**SB 1472**	**Senator Rand**

AN ACT TO PROVIDE REVENUE BOND FINANCING OF CERTAIN PRIVATE PROJECTS THAT PERFORM A PUBLIC PURPOSE AND TO REORGANIZE THE INDUSTRIAL FACILITIES AND POLLUTION CONTROL FINANCING AUTHORITY.

OVERVIEW: This act provides specific statutory authority for conduit financing of special purpose projects through County Industrial Facilities and Pollution Control Financing Authorities and the North Carolina Capital Facilities Finance Agency. In a conduit financing, a governmental entity issues its bonds to finance facilities for a private party, then receives payments from the private party to service the bonds. The "special purpose projects" that may be financed through conduit financing include:

- Water systems and facilities
- Sewage disposal systems or facilities
- Public transportation systems, facilities, or equipment
- Public parking facilities
- Public auditoriums and similar facilities
- Recreational facilities

- Solid waste facilities
- Facilities for persons with disabilities and for the disadvantaged, such as Goodwill stores and sheltered workshops, but not including retail establishments unless 75% of the inventory is used, donated goods and 75% of the employees will be disadvantaged or disabled persons
- Student housing facilities owned by entities other than educational institutions

FISCAL IMPACT: No fiscal impact.

EFFECTIVE DATE: The act became effective July 1, 2000.

BACKGROUND & ANALYSIS: This act provides specific statutory authority for conduit financing of special purpose projects. In a conduit financing, a governmental entity issues its bonds to finance facilities for a private party, then receives payments from the private party to service the bonds. If the federal tax law permits tax-exempt bond issues for the type of facility financed, the private party is able to borrow at tax-exempt rates

Prior to the enactment of this act, conduit financing was available to a limited extent in North Carolina. County Industrial Facilities and Pollution Control Financing Authorities and the NC Industrial Facilities and Pollution Control Financing Authority can provide conduit agency financing for private industrial and pollution facilities. The NC Educational Facilities Finance Agency can provide conduit financing for educational facilities. Counties and cities may also provide conduit financing directly.

Federal law allows tax-exempt conduit financing for a variety of projects beyond the industrial, pollution control, and educational projects currently authorized in Chapters 159C, 159D, and 115E of the General Statutes. Recent financings have been proposed and entered into for new types of projects, such as recreational facilities to be leased to or operated by a YMCA. The Treasurer's Office had two concerns about the expansion of the type of projects being financed under the prior law. First, although the projects had a public purpose and satisfied federal requirements, the North Carolina statutes did not clearly authorize conduit financing for these types of projects. Second, to the extent the conduit financing was conducted directly by a local government, rather than a special purpose authority, the local government's credit rating was at risk if the private entity were to go into default.

This act addresses the Treasurer's concerns by providing specific statutory authority for conduit financing of special purpose projects. To accomplish this expansion, it makes the following changes regarding revenue bonds issued on behalf of private entities:

- Expands the NC Educational Facilities Finance Agency to become the NC Capital Facilities Finance Agency, and authorizes the agency to issue bonds on behalf of private entities for various projects that have a public purpose ("special purpose projects").
- Authorizes County Industrial Facilities and Pollution Control Financing Authorities to issue bonds on behalf of private entities for various projects that have a public purpose.
- Dissolves the NC Industrial Facilities and Pollution Control Financing Authority and transfers its powers and duties to the NC Capital Facilities Finance Agency.

"Special purpose projects" encompass a variety of private, public purpose projects. The types of projects that the act gives County Industrial Facilities and Pollution Control Financing Authorities and the NC Capital Facilities Finance Agency the power to finance are:

- Water systems and facilities
- Sewage disposal systems or facilities
- Public transportation systems, facilities, or equipment
- Public parking facilities
- Public auditoriums and similar facilities
- Recreational facilities
- Solid waste facilities
- Facilities for persons with disabilities and for the disadvantaged, such as Goodwill stores and sheltered workshops, but not including retail establishments unless 75% of the inventory is used, donated goods and 75% of the employees will be disadvantaged or disabled persons

Student housing facilities owned by entities other than educational institutions would also be authorized for the Capital Facilities Financing Agency. Under prior law, the NC Educational Facilities Financing Agency could provide conduit financing for student housing facilities owned or operated by an educational institution. The inclusion in this act of student housing that is not owned or operated by an educational facility addresses current proposals to finance private, nonprofit housing for students at various universities, including Appalachian State University, Fayetteville State University, and North Carolina Agricultural and Technical State University.

The act renames the NC Educational Facilities Finance Agency and it recodifies its statutes from Chapter 115E of the General Statutes to Article 2, of Chapter 159D of the General Statutes to reflect the broader financing authority given to it under this act. Besides educational facilities, the authority, renamed the NC Capital Facilities Finance Agency, may provide conduit financing for special purpose projects. One reason for the expansion of this authority is to allow it to provide conduit financing for multi-county projects, such as a proposed multi-county recreational facility to be operated by a YMCA near Winston-Salem. Industrial Facilities and Pollution Control Financing Authorities created by county governments have limited ability to finance multi-county projects.

The act also authorizes the NC Educational Facilities Finance Agency to take over the remaining responsibilities of the NC Industrial Facilities and Pollution Control Financing Authority, which is dissolved under this act. The Industrial Facilities and Pollution Control Financing Authority, created under Chapter 159D of the General Statutes, is a State entity that issued bonds in the late 1980s and early 1990s for purposes similar to those provided for County Industrial Facilities and Pollution Control Financing Authorities. The State authority is moribund at this time due to the loss of records regarding its creation and membership. However, administrative duties regarding its outstanding bonds continue to arise from time to time. Although additional bonds are not expected to be issued under Chapter 159D for industrial or pollution control projects, the act makes a few changes to conform the provisions to those governing County Industrial Facilities and Pollution Control Financing Authorities in Chapter 159C, and to delete obsolete provisions.

Under the act, a private entity (either nonprofit or for-profit) could obtain financing from a County Industrial Facilities and Pollution Control Financing Authority or from the North Carolina Capital Facilities Finance Agency in order to acquire, construct, and improve a special purpose project. The act authorizes both the initial financing of special purpose projects and the refinancing of pre-existing debt for special purpose projects. The financing would usually be tax-exempt under federal law and could include revenue bonds or other forms of debt, but would not include any financing that pledges the faith or credit of the State, a local government, or any political subdivision. The advantage to private entities of tax-exempt financing is that interest rates on tax-exempt financing are significantly lower than on taxable financing. The private entity must pay for the entire cost of the financing and of the facility being financed.

Besides providing tax-exempt financing for capital facilities for special purpose projects, conduit financing may cover land acquisition, landscaping, site preparation, furniture, and machinery and equipment, as well as engineering and architectural services and other administrative expenses related to construction or acquisition of a project. Financing from the Capital Facilities Finance Agency is not available for projects that discriminate based on race, creed, color, or national origin. The law governing County Industrial Facilities and Pollution Control Financing Authorities does not contain a similar restriction.

Conduit financing through the State would be administered by the Capital Facilities Finance Agency, which is located in the Department of State Treasurer. The Agency has seven members: the State Treasurer, the State Auditor, one member appointed upon the recommendation of the President Pro Tempore of the Senate, one member appointed upon the recommendation of the Speaker of the House of Representatives, and three members appointed by the Governor. The appointive members must be residents of North Carolina and cannot hold other public office. The Agency is audited annually and submits an annual report to the Governor and the General Assembly.

A private entity could qualify for financing only if the Agency found it to be financially responsible and capable of fulfilling its obligations. Before financing is approved, the Agency must find that the entity has provided adequately for the payment of principal and interest on the bonds and for the operation, repair, and maintenance of the facility to be financed. The act clarifies that the Agency, in making this finding, may consider whether the private entity on behalf of whom the bonds will be issued has arranged for delivery of a letter of credit or for any other credit enhancement to secure the obligations. Similar provisions are found in the current law governing County Industrial Facilities and Pollution Control Financing Authorities.

Public notice and a public hearing are required before the bonds may be approved. The governing body of the county, and of any municipality, in which the project will be located must be notified of the hearing.

The Agency may issue bonds only if the Local Government Commission approves them. The Local Government Commission sets the interest rates on the bonds and administers their sale. The bonds may be secured by a trust agreement with a corporate trustee, such as a bank. The Agency will require the private entity to pay fees, loan repayments, rents, or other charges sufficient to cover the payment of principal and interest on the bonds and the operation, repair, and maintenance of the facility to be financed, and the bonds will be secured by the pledge of these revenues.

1999 Tax Law Changes

ELIMINATE STAMPS FOR DEED TAX

Session Law #	Bill #	Sponsor
S.L. 1999-28	HB 56	Representative Hill

AN ACT TO ELIMINATE THE USE OF STAMPS TO INDICATE WHETHER THE EXCISE TAX ON CONVEYANCES HAS BEEN PAID AND TO MAKE THE PENALTIES THAT APPLY TO THIS TAX THE SAME AS FOR OTHER TAXES.

OVERVIEW: *This act eliminates the requirement that tax stamps be used to indicate whether the excise tax on conveyances has been paid. It also makes the penalties for failure to pay the tax the same as for other taxes.*

FISCAL IMPACT: The act will not affect local or State revenues significantly.

EFFECTIVE DATE: July 1, 2000.

BACKGROUND & ANALYSIS: The excise tax on conveyances, known as the deed stamp tax, is a State tax on instruments transferring an interest in real property. The register of deeds of the county in which the property is located collects the tax when the deed transferring the property is recorded. The person presenting the instrument for recording is responsible for indicating on the instrument the amount of tax due. The register of deeds must collect the tax due and mark on the instrument to indicate payment of the tax and the amount paid. The tax rate is $1.00 for each $500.00 (0.2%) of the value of the property conveyed. The county retains one-half of the net proceeds of the tax and remits the remaining one-half to the State. 75% of the funds remitted to the State is dedicated to the Parks and Recreation Trust Fund created in G.S. 113-44.15 and 25% is dedicated to the Natural Heritage Trust Fund created in G.S. 113-77.7. None of the State's share of the deed stamp tax goes to the General Fund.

Under prior law, the Register of Deeds had to use tax stamps to indicate the tax had been paid. This act removes the requirement that tax stamps be used to indicate the tax has been paid. Tax stamps are no longer the best method for tracking payment of the conveyance tax now that metering machines and similar equipment are available. About 85 of the 100 counties have switched from stamps to more modern methods of tracking the tax. The act does not prohibit a county from using stamps to indicate that the tax has been paid. However, effective July 1, 2000, the Department of Revenue will no longer be responsible for ordering and maintaining an inventory of various denominations of stamps to sell to the counties that choose to use them.

The act continues the work the legislature began last session when it amended several sections of the Revenue Act to make tax penalties uniform by providing that the civil and criminal penalties applicable to all other State taxes apply to the conveyance tax. Under prior law, willful evasion of the tax was a Class 3 misdemeanor punishable by a fine of between $100 and $1,000. The general penalty contained in Article 9 of Chapter 105 for failure to pay the tax due is 10% of the amount of tax due. The penalty for willfully failing to pay the correct amount of tax due is a Class 1 misdemeanor. Attempting to evade a tax due is punishable as a Class H felony.

The Revenue Laws Study Committee, upon the recommendation of the Department of Revenue recommended this legislation.

CONTINUING CARE RETIREMENT HOMES

Session Law #	Bill #	Sponsor
S.L. 1999-191	SB 325	Senator Hoyle

AN ACT TO MAKE CORRECTIONS AND CONFORMING CHANGES RELATING TO TAXATION OF CONTINUING CARE RETIREMENT HOMES.

OVERVIEW: *The act makes corrections and conforming changes to the 1998 legislation that temporarily revised a property tax exemption for continuing care retirement centers (CCRCs), which had been held unconstitutional in 1998. The act makes the following changes retroactive to the 1998 tax year:*

- Removes an unconstitutional grandfather clause from the exemption.
- Clarifies that the entity that selects the governing board of the nonprofit CCRC may be a corporation or an unincorporated association.
- Provides that the entity that selects the governing board of the nonprofit CCRC may be a charitable organization, a fraternal beneficiary association, or a domestic fraternal association.
- Discourages counties and cities from collecting prior years' taxes on exempt CCRCs on or after January 1, 1998.

FISCAL IMPACT: Insignificant impact.

EFFECTIVE DATE: Changes are retroactive to the 1998 tax year.

BACKGROUND & ANALYSIS: In 1998, the General Assembly exempted from property tax those CCRCs whose governing body is not self-perpetuating but is selected by another publicly supported charitable nonprofit. That act effectively restored the exemption for those CCRCs that were exempt under the law struck down by the North Carolina Supreme Court[1], but retained taxability of those CCRCs that had been taxed all along. It did not affect charitable homes for the aging, which were already exempt and were not affected by the court case.

While the 1998 legislation was in committee, an amendment was added limiting the exemption to those CCRCs who met the definition as of a certain date. Such a grandfather clause in a property tax provision is not a valid classification under the North Carolina Constitution. After the law was enacted, the Institute of Government noted the unconstitutional grandfather clause, and some counties determined that they would not recognize the exemption because it had this unconstitutional provision. This act removes the unconstitutional grandfather clause that limited the property tax exemption to CCRCs whose charter or bylaws met the definition on August 15, 1998.

---

[1] In re Springmoor, 348 N.C. 1 (1998).

The act also expands the definition of the appointing entity to include associations and fraternal entities. To qualify for the property tax exemption under the 1998 law, the governing board of the CCRC had to be appointed by a publicly supported charitable 501(c)(3). After the 1998 legislation was enacted, some CCRCs determined that their boards were appointed by nonprofit associations, rather than corporations, and that some of these nonprofits were fraternal (501(c)(8) and (10)) rather than charitable.

The act removes the financial incentive for assessing retroactive taxes on exempt CCRCs. It does so by reducing the annual State reimbursement to a county or municipality for the repeal of the intangibles tax by 110% of the amount of taxes collected in that year on exempt CCRCs for a year prior to the 1998 tax year. This part of the act is repealed effective September 1, 2003, because the five-year discovery period will have expired then.

Lastly, the act authorizes the Legislative Research Commission to study the issue of property tax exemptions for nonprofits and directs the Legislative Research Commission to report its findings and recommendations to the 2000 Session of the 1999 General Assembly. On August 25, 1999, the Legislative Research Commission referred this issue to the Revenue Laws Study Committee.

REAL PROPERTY TAX PENALTY

Session Law #	Bill #	Sponsor
S.L. 1999-297	SB 817	Senator Ballance

AN ACT TO PROVIDE AN EXCEPTION TO THE LATE LISTING PENALTY FOR CERTAIN REAL PROPERTY IN COUNTIES THAT HAVE NOT ADOPTED PERMANENT LISTING AND TO PHASE IN PERMANENT LISTING IN ALL COUNTIES.

OVERVIEW: *This act requires the board of county commissioners of each county to install a permanent listing system. (*Note: *The act only applies to the following six counties: Clay, Graham, Swain, Vance, Warren, and Yancey.) It also provides that the 10% late listing penalty will not apply to property that has not been improved or transferred since it was last listed.*

FISCAL IMPACT: Insignificant impact.

EFFECTIVE DATE: Each of the six counties affected must have a permanent listing system for taxable years beginning on or after July 1, 2004. The prohibition on imposing the 10% late listing penalty is effective for taxes imposed for taxable years beginning on or after July 1, 1999 and sunsets July 1, 2004.

BACKGROUND & ANALYSIS: There are only six counties that have not adopted a permanent listing system for property tax purposes: Clay, Graham, Swain, Vance, Warren, and Yancey. Under a permanent listing system, the assessor rather than the owner is responsible for listing all real property for property tax purposes. The owner of the property does not need to respond to the listing form unless the property has been improved or transferred since the last listing. The 10% late listing penalty does not apply to property listed under a permanent listing system. However, the penalty does apply if the taxpayer fails to furnish the assessor with information concerning improvements to the property not reflected on the listing form.

To encourage counties to install a permanent listing system as soon as possible, the act provides that, effective for taxes imposed for taxable years beginning on or after July 1, 1999, the 10% late listing penalty will not apply to property that has not been improved or transferred since it was last listed. The prohibition on imposing the late listing penalty sunsets July 1, 2004. The late listing penalty applies to property that should have been listed for tax purposes but is not. When the property is "discovered", the property is taxed for the year it was discovered and the preceding five years it escaped taxation. Each year's taxes are computed separately. A late listing penalty equal to 10% of the amount of the tax for the earliest year the property was not listed is added to the amount of tax due. The penalty is computed separately for each year the failure to list occurred.

TECHNOLOGY COMMERCIALIZATION CREDIT

Session Law #	Bill #	Sponsor
S.L. 1999-305	**SB 1110**	**Senator Rand**

AN ACT TO PROVIDE AN INCENTIVE FOR BUSINESSES TO FIND COMMERCIAL USES FOR TECHNOLOGY DEVELOPED BY RESEARCH UNIVERSITIES.

OVERVIEW: This act adds a new investment tax credit, the technology commercialization credit, to the William S. Lee Quality Jobs and Business Expansion Act, effective for taxable years beginning on or after January 1, 2000.[2]

FISCAL IMPACT: Beginning with the 2000-2001 fiscal year, the maximum General Fund revenue loss is expected to be $2.1 million per year.

EFFECTIVE DATE: Effective for taxable years beginning on or after January 1, 2000.

BACKGROUND & ANALYSIS: The new investment tax credit is an alternative to the existing 7% tax credit for investing in machinery and equipment. The technology commercialization credit applies only to investments in machinery and equipment used in production based on technology licensed from a research university. In addition, to qualify, the machinery and equipment must be located in a tier one, two, or three enterprise area. Finally, the taxpayer's investment must equal at least $10 million during the taxable year, and must total at least $100 million over a five-year period. If the investment totals between $100 million and $150 million over five years, the technology commercialization credit is equal to 15% of the amount invested. If the investment equals or exceeds $150 million over five years, the technology commercialization credit is equal to 20% of the amount invested. The technology commercialization credit remains available for 10 years of investments at a single location. The taxpayer's eligibility for the technology commercialization credit is based on the Secretary of Commerce's certification that the taxpayer will invest either $100 or $150 million over five years. If the taxpayer does not achieve the certified level of investment, the credit is forfeited. As for the existing investment tax credit, forfeiture of the credit

[2] The William S. Lee Quality Jobs and Business Expansion Act, enacted by the General Assembly in 1996, was designed to promote economic development throughout the State by providing various business tax credits. These credits were expanded by the General Assembly in S.L. 1997-277, S.L. 1998-55, and S.L. 1999-360.

triggers forfeiture of any worker training credit taken for training workers to operate the new machinery and equipment.

The technology commercialization credit is more generous than the existing investment tax credit under the William S. Lee Act in the following ways:

- The existing investment tax credit is 7% of the amount invested. The technology commercialization credit is 15% or 20% of the amount invested, depending upon the size of the investment.
- The existing investment tax credit must be taken in seven annual installments beginning the year after the year the investment is placed in service. The technology commercialization credit may be taken in the year the investment is placed in service.
- The existing investment tax credit applies only to the extent the new investment is not offset by the amount of machinery and equipment the taxpayer either sold or took out of service in the three-year period before the new investment was placed in service. This restriction limits the existing credit to net increases in North Carolina investment, and disallows it for investments that are in effect a replacement or relocation of pre-existing machinery and equipment. The technology commercialization credit is not required to be offset by machinery and equipment sold to another taxpayer if the new owner keeps the machinery and equipment in service in North Carolina. In addition, this new investment tax credit is not required to be offset by machinery and equipment the taxpayer takes out of service if it was in service at a separate location and was used in a business that is not competitive with the technology commercialization business.
- The existing investment tax credit, like all other William S. Lee Act credits, may be taken against the taxpayer's income tax or franchise tax, but not both. The technology commercialization credit may be taken against both income tax and franchise tax. The taxpayer must determine what percentage of the credit will be taken against each tax, and must maintain the same percentage for the purpose of carryforwards. If new investment is made in a second or subsequent tax year, the taxpayer may elect a different percentage with respect to the credit for each tax year. The election is binding.
- The existing investment tax credit, like all other William S. Lee Act credits, may be carried forward for five years unless the investment amount exceeds $150 million over a two-year period, in which case it may be carried forward for 20 years. The technology commercialization credit may be carried forward for 20 years.

ZERO ESC TAX/TRAINING CONTRIBUTION

Session Law #	Bill #	Sponsor
S.L. 1999-321	**HB 275**	**Representative Redwine**

AN ACT TO IMPLEMENT A ZERO UNEMPLOYMENT INSURANCE TAX RATE FOR MORE EMPLOYERS WITH POSITIVE EXPERIENCE RATINGS, AND TO TEMPORARILY REDUCE THE UNEMPLOYMENT INSURANCE TAX BY TWENTY PERCENT FOR

MOST EMPLOYERS AND SUBSTITUTE AN EQUIVALENT CONTRIBUTION TO FUND ENHANCED EMPLOYMENT SERVICES AND WORKER TRAINING PROGRAMS.

OVERVIEW: This act makes two changes to unemployment insurance taxes:

- It changes the minimum credit ratio of employers who are granted a zero tax rate from 5% to 4%, effective April 1, 1999.
- It temporarily reduces unemployment insurance taxes for most employers by 20% and levies a corresponding contribution to be used for enhanced reemployment services and worker training programs, effective January 1, 2000. The rate of contribution is the lesser of 20% or a percentage that yields an amount that, when combined with the employer's unemployment insurance taxes, is no greater than the amount of tax the employer would have paid under existing law. These changes will sunset in two years.

FISCAL IMPACT: *See Background & Analysis section.*

EFFECTIVE DATE:

Minimum credit ratio change	April 1, 1999
Reduce UI Tax/Reemployment fund contribution	January 1, 2000; Sunset January 1, 2002

BACKGROUND & ANALYSIS:

Minimum Credit Ratio Change. In 1995, the General Assembly set a zero unemployment insurance tax rate for employers with credit ratios of 5% or greater. This act allows more employers to have a zero unemployment tax rate by lowering the threshold from 5% to 4%. The credit ratio is the ratio of an employer's credit balance in the Unemployment Insurance (UI) Fund relative to the employer's payroll. The UI Fund is maintained by the U.S. Treasury and funded by the State unemployment insurance tax. This part of the act is effective with respect to calendar quarters beginning on or after April 1, 1999. The Employment Security Commission (ESC) recommended this change due to the solvency of North Carolina's UI Fund and the increasing stability of labor markets. As of April 30, 1999, the balance in the Unemployment Insurance Trust Fund stood at $1.22 billion. In addition, a reserve fund contains an additional $200 million, due to the Fund's solvency and North Carolina's low unemployment rate. ESC estimates this change will affect over 10,000 employers, with a tax savings to employers of over $1,000,000 in the first year. With an additional 6,400 employers reaching the 4% credit ratio each year, ESC estimates that 38,000 employers will benefit from this zero tax rate by 2004.

Reduce UI Tax/Reemployment Fund Contribution. The act also reduces the unemployment insurance taxes employers pay to the Employment Security Commission. The reduction is 20% for most employers, slightly less for new employers, and less for roughly 3,400 employers with a high debit ratio. Those employers who pay at a zero tax rate are not affected by this change. The act levies a new tax equal to a percentage of each employer's unemployment insurance tax. The tax is called a "training and reemployment contribution." The percentage rate of the contribution is the lesser of 20% or a percentage that yields an amount that, when combined with the employer's reduced UI tax, is no greater than the amount of UI tax the employer would have paid under the prior law. Thus, when the UI tax reduction and the new contribution are netted, all employers will pay the same or slightly less. These changes become effective January 1, 2000, and sunset January 1, 2002.

It is estimated that the new contribution will generate $22.9 million in FY 1999-2000 and $60.8 million in FY 2000-2001. The new contribution will be credited to a non-reverting account subject to appropriation by the General Assembly. The account is called the "Employment Security Commission Training and Employment Account." The act states the intent of the General Assembly that 4/5 of the proceeds will be appropriated annually from the account to the Department of Community Colleges for nonrecurring expenditures for various worker training programs. The act amends *The Current Operations and Capital Improvements Appropriations Act of 1999* to appropriate from the Employment Security Commission Training and Employment Account to the Community Colleges System Office the sum of $18 million for the 1999-2000 fiscal year and the sum of $48.5 million for the 2000-2001 fiscal year. The act states the intent of the General Assembly that the remaining 1/5 of the proceeds will be appropriated annually from the account to the Employment Security Commission for the costs of collecting and administering the new contribution, and for nonrecurring expenditures for enhanced reemployment services. The act amends the budget bill to appropriate from the Account to the Employment Security Commission the sum of $4.5 million for the 1999-2000 fiscal year and the sum of $12.1 million for the 2000-2001 fiscal year.

Unemployment insurance taxes are paid by employers on a quarterly basis and deposited into the State Unemployment Insurance Trust Fund. After deducting any refunds payable from the Fund pursuant to G.S. 96-10(f), the money is deposited with the secretary of the treasury of the United States to the credit of this State's account in the Unemployment Trust Fund. Funds in the State's account earn interest that is also credited to the account. As money in the State's account is needed to pay benefits, it is transferred to the State and credited to the benefits account of the State's Unemployment Insurance Fund to be used to pay benefits to people who lose their job through no fault of their own. Federal law prohibits transfer of or payment of refunds from money in the Trust Fund.

The General Assembly reduced unemployment insurance tax rates in recent years because the balance in the federal trust fund was higher than needed to pay benefits. The tax rates will automatically double when the trust fund balance falls below $800 million. By reducing the unemployment insurance tax rates by 20% for two years, the changes made by this act could cause the balance in the trust fund to fall faster, triggering an automatic tax increase earlier than might otherwise occur. On the other hand, it is hoped that the enhanced reemployment services funded by the new contribution would shorten the average period before a worker is reemployed, thereby reducing benefit payments for the trust fund. The new contribution would sunset automatically if a drop in the trust fund balance triggered an unemployment insurance tax increase.

History of UI Fund Reductions. Since 1992, the General Assembly has enacted the following **legislation to reduce the amount of money in the Unemployment Insurance Fund:**

- **1992 -** suspended the 20% surcharge on unemployment taxes.
- **1993 -** cut unemployment taxes for positive rated employers by an average of 30% for any calendar year in which the balance in the Fund equals or exceeds $800,000,000.
- **1994 -** cut the unemployment taxes for positive rated employers by an average of 38.7% and cut the unemployment taxes for new employers by 20%.
- **1995** - cut the unemployment taxes for positive rated employers by an average of 23%, set a zero rate for employers with credit ratios of 5.0 or over, and reduced from 60% to 50% the percentage of annual average wages used to calculate the taxable wage base.

- **1996** - reduced unemployment taxes in three ways by (1) assigning a one-year zero unemployment insurance tax rate for all positive rated employers, (2) giving overdrawn employers additional time to make contributions to their accounts so that they may qualify for the zero tax rate in 1996, and (3) permanently reducing the tax rate for new employers from 1.8% to 1.2%.

INTANGIBLES TAX SETTLEMENT

Session Law #	Bill #	Sponsor
S.L. 1999-327	**SB 1043**	**Senator Rand**

AN ACT TO PROVIDE FUNDS TO MEET THE REQUIREMENTS OF A CONSENT JUDGMENT UNDER THE INTANGIBLES TAX CASES.

OVERVIEW: **This act approves a settlement agreement executed by the Speaker of the House of Representatives and the President Pro Tempore of the Senate on July 8, 1999, in settlement of Smith, et al. v. State, 95 CVS 06715 and Shaver, et al. v. State, 98 CVS 00625. These cases were initiated by taxpayers who paid intangibles tax on stocks for tax years 1990, 1991, 1992, 1993, and 1994, without protesting the payment in a timely manner. The act also appropriates the funds necessary for the refunds.**

Fiscal Impact:

- Appropriates $200 million on October 1, 1999, from the Savings Reserve Account for fiscal year 1999-2000 to a settlement fund to pay tax refunds claimed by the above taxpayers.
- Directs the General Assembly to allocate the remaining $240 million to the settlement fund by July 10, 2000.

EFFECTIVE DATE: July 20, 1999.

BACKGROUND & ANALYSIS: On July 8, 1999, a settlement agreement was signed by the President Pro Tempore of the Senate, the Speaker of the House of Representatives, and the Class Counsel for the plaintiffs in two pending lawsuits dealing with the question of when refunds should be paid to taxpayers who paid intangibles tax on stocks for the 1990-94 tax years and who did not timely protest payment of this tax. The agreement was in response to two Superior Court of Wake County decisions regarding nonprotester refunds. On May 25, 1999, the superior court held the State liable for $360 million of refunds and interest for the 1991-94 tax years in Smith, et al. v. State of North Carolina, 95 CVS 06715.[3] In a more recent decision, the superior court held that the State was liable for $110 million in refunds and interest for the 1990 tax year in Shaver, et al. v. State, 98 CVS 00625.

---

[3] This decision was issued by the superior court on remand from the North Carolina Supreme Court decision in Smith et al. v. State, 349 N.C. 332 (1998). The Supreme Court held that the trial court erred in dismissing the claims of individuals who paid the intangibles tax for the years in question but did not give notice challenging the legality of the tax. The Court remanded the case to the superior court to determine the details.

On the same day as the July 8, 1999, settlement agreement, the Superior Court of Wake County entered a consent order tentatively approving the settlement agreement. The consent order provides for the following:

- The General Assembly will appropriate $440 million to a settlement fund over the next two years:
    1. The General Assembly must allocate $200 million to the fund before October 1, 1999. This money will be drawn from the Savings Reserve Account.
    2. The General Assembly must allocate the remaining $240 million to the fund by July 10, 2000.
- Within the Settlement Fund, 85% of the funds will be allocated to the "Smith/Shaver Claims Fund Account" and 15% will be allocated to the "Smith/Shaver Administration Account". Interest and earning on all proceeds will be added as principal to the taxpayers' Claims Fund Account.
- The class counsel under the supervision of the court will administer the Settlement Fund.
- No disbursement will be made from the Claims Fund Account until after August 1, 2000.
- Class members will be provided full notice of the terms of the settlement agreement and their rights.
- The State is immune from any further liability for claims brought by taxpayers regarding the payment of intangibles tax on shares of stock under the repealed G.S. 105-203. This statute imposed an intangibles tax on shares of stock and provided a taxable percentage deduction reducing a taxpayer's liability for this tax in proportion to the issuing company's income taxed in North Carolina. In 1997, the North Carolina Supreme Court held the statute unconstitutional because it violated the commerce clause by discriminating against out-of-state companies.
- The Class Counsel will be developing a timetable for implementing the refund procedures and payment to individual taxpayers.

Pursuant to the terms of the above consent order, the act provides for the following appropriations:

- $200 million is appropriated from the Savings Reserve Account for the 1999-2000 fiscal year to the Department of the State Treasurer on October 1, 1999. This sum is to go to a reserve for the Smith/Shaver cases and is to be held in reserve for allocation pursuant to the above consent order. The act states the intent of the General Assembly to restore to the Savings Reserve Account the sum of $200 million during the 2000-2001 fiscal year.
- An additional $240 million is allocated no later than July 10, 2000, in accordance with the above consent order.

PHASE II FUNDS/IMMUNITY/TAX EXEMPT

Session Law #	Bill #	Sponsor

S.L. 1999-333	HB 74	Representative Baker

AN ACT TO AUTHORIZE THE APPOINTMENT BY THE SPEAKER OF THE HOUSE OF REPRESENTATIVES AND THE PRESIDENT PRO TEMPORE OF THE SENATE OF MEMBERS OF THE BOARD OF DIRECTORS OF THE CERTIFICATION ENTITY FOR THE PHASE II SETTLEMENT FUNDS, TO PROVIDE THE MEMBERS OF THE BOARD OF DIRECTORS LIMITED IMMUNITY FROM CIVIL LIABILITY, TO PROVIDE AN EXEMPTION FROM STATE INCOME TAX FOR INTEREST, INVESTMENT EARNINGS, AND GAINS OF CERTAIN TRUST FUNDS, TO PROVIDE A CORPORATE INCOME TAX CREDIT FOR MANUFACTURERS PRODUCING CIGARETTES FOR EXPORTATION TO A FOREIGN COUNTRY, AND TO PROHIBIT THE SALE OF CERTAIN PACKAGES OF CIGARETTES.

Overview: The act does the following:

- Board of Directors. It provides for the appointment of the board of directors of a nonprofit corporation that will be the certifying entity to distribute money to tobacco growers and allotment holders in North Carolina. Pursuant to an agreement among four tobacco manufacturers, the manufacturers will pay the sum of $5.15 billion into the National Tobacco Grower Settlement Trust over a twelve-year period. This trust will provide payments to tobacco growers and allotment holders in fourteen grower states, including North Carolina. This money, referred to as Phase II settlement funds, will be used to ameliorate potential adverse economic consequences of likely changes in the tobacco market on grower states. This provision became effective July 22, 1999.

- Board of Directors' Immunity. It provides immunity to the board of directors for certain acts or omissions arising out of the performance of the member's duties as a member of the nonprofit corporation. This provision became effective July 22, 1999.

- Income Tax Exemption. It provides an income tax exemption for the interest, investment earnings, and gains of a trust that is established to compensate those who suffer economic loss as a result of a settlement agreement between the State and one or more manufacturers to settle claims of the State against the manufacturers for damages arising from a product of the manufacturers. This change is effective for taxable years beginning on or after January 1, 1999.

- Corporate Income Tax Credit. It creates a corporate income tax credit for manufacturers who produce cigarettes for exportation to a foreign country. The amount of the credit varies depending upon the amount of cigarettes exported in the tax year compared to the amount exported in 1998. This credit is effective for taxable years beginning on or after January 1, 1999, and sunsets for cigarettes exported on or after January 1, 2005.

- Unlawful to Sell Certain Cigarettes. It makes it unlawful to sell cigarettes in North Carolina if the cigarettes were originally manufactured for export to a foreign country. The Secretary of Revenue is authorized to cancel the license or certificate of registration of a person who

violates this law. This change is effective December 1, 1999, and applies to offenses committed on or after that date.

FISCAL IMPACT: The above tobacco export credit and tax exemption for the earnings of the settlement trust fund are expected to reduce General Fund revenues by $8.7 million in fiscal year 1999-2000, $9 million in fiscal year 2000-2001, $9.3 million in fiscal year 2001-2002, $9.6 million in fiscal year 2002-2003, and $9.9 million in fiscal year 2003-2004.

EFFECTIVE DATE: *See Overview section.*

BACKGROUND & ANALYSIS:

History of the Master Settlement Agreement. On November 23, 1998, forty-six states, including North Carolina, and four tobacco manufacturers signed a Master Settlement Agreement, that settled existing and potential claims of the states against the manufacturers for damages arising from the tobacco products of the manufacturers.[4] The manufacturers agreed to make payments to the states totaling $206 billion through the year 2025. Pursuant to the terms of the Master Settlement Agreement, North Carolina and the four tobacco manufacturers entered into a consent decree, filed in Wake County Superior Court on December 21, 1998. State of North Carolina v. Phillip Morris, Incorporated, et al., 98 CVS 14377. This consent decree directed the Attorney General to create a nonprofit corporation for purposes of receipt and distribution of 50% of the funds allocated to North Carolina under the Master Settlement Agreement. The consent decree also required that the creation of the corporation had to be approved by the General Assembly. On March 16, 1999, the General Assembly in Senate Bill 6 (S.L. 1999-2) approved the creation of a nonprofit corporation to distribute 50% of Phase I of the settlement funds allocated to North Carolina. S.L. 1999-2 directs that these funds be used for the public charitable purposes of providing economic impact assistance to economically affected or tobacco-dependent regions of the State. S.L. 1999-2 further states the intent of the General Assembly to allocate the remaining 50% of the Phase I settlement funds as follows:

- 25% to a trust fund to be established by the General Assembly for the benefit of tobacco producers, tobacco allotment holders, and persons engaged in tobacco-related businesses.
- 25% to a trust fund to be established by the General Assembly for the benefit of health.[5]

Under the terms of the Master Settlement Agreement, the four manufacturers also acknowledged the adverse effect that the terms of the Agreement would have on the tobacco grower community. The Agreement contains provisions, such as market restrictions, that are expected to result in a decline in demand for tobacco products. As part of the consideration for settling the claims, the Agreement obligated the manufacturers to address these economic concerns of the tobacco growers and tobacco quota holders.

To meet the obligation, the manufacturers agreed to establish a trust called the National Tobacco Grower Settlement Trust. They agreed to pay up to $5.15 billion over the next twelve years into the Trust, referred to as Phase II settlement funds. Proceeds of the Trust would be allocated directly to tobacco growers and tobacco allotment holders in fourteen grower states, including North Carolina, based on a plan developed by a nonprofit corporation in each state composed of

[4] The four tobacco manufacturers are Phillip Morris, Inc., R. J. Reynolds Tobacco Company, Brown & Williamson Tobacco Corporation, and Lorillard Tobacco Company.

[5] As of August 1999, the General Assembly had not established trust funds for the remaining 50% of the Phase I settlement funds.

government leaders and public members. The Superior Court of Wake County must approve the trust and the payments made under it.[6]

The trust is designed to be a qualified settlement fund under the Internal Revenue Code. As such, it is taxable as a corporate taxpayer at the tax rate of a trust. The primary benefit of being a qualified settlement fund is that the manufacturers who contribute the principal to the fund may claim a tax deduction on the contributions when they are paid into the fund. If it is determined that the trust does not meet the requirements of a qualified settlement fund, the trust's taxation does not change because contributions to a trust are not included in its gross income. However, the manufacturers would not be able to claim a deduction for their contributions until the money was distributed to the growers and quota holders.

For federal and state tax purposes, the contributions to the trust are tax-exempt. To calculate North Carolina taxable income for both corporations and trusts, one begins with federal taxable income. Since the contributions are not included in income for federal tax purposes, they are not included in income for State tax purposes. However, the interest, investment earnings, and gains of both a qualified settlement fund and a trust are taxable for federal and State tax purposes. Some states exempt qualified settlement funds from state income tax. Locating the settlement fund in a state that does not tax it can maximize the amount of funds distributed to those who suffer economic loss because of the Master Settlement Agreement. Because of North Carolina's role in producing the economic loss, and the desire to have the settlement fund located in this State, the act exempts the interest, investment earnings, and gains of the settlement fund from State income tax.

Provisions of the act. The act carries out the management and distribution of the Phase II funds as follows:

- Board of Directors/Immunity. It authorizes the Speaker of the House of Representatives to appoint one State Representative and the Senate Pro Tempore to appoint one State Senator to the certification board. This is the board that will determine how the Phase II funds will be distributed to North Carolina tobacco farmers and allotment holders. The other members of the board are the Governor, the Commissioner of Agriculture, the Attorney General, two members of the North Carolina congressional delegation selected by the delegation, and four to seven citizens appointed by the Governor. The act provides for limited immunity from liability for the members of the board while performing their duties on behalf of the board. Immunity is not provided for intentional wrongdoing, willful or wanton misconduct, or motor vehicle accidents. Since the board will be a private board, not a State agency, its members will not be covered by the liability insurance coverage the State obtains for its officers and employees.

- Corporate Income Tax Deduction. It provides for a corporate income tax deduction from federal taxable income on the interest, investment earnings, and gains earned on funds in a qualified settlement fund that meets the following conditions:

    1. The settlors of the fund are two or more manufacturers that signed a settlement agreement with North Carolina to settle existing and potential claims of the State

[6] A court settlement was signed in Wake County Superior Court on August 20, 1999, approving the settlement of the Phase II funds and the distribution of the payments out of these funds to the fourteen grower states.

against the manufacturers for damages attributable to a product of the manufacturers.

2. The purpose of the fund is to address potential adverse economic consequences resulting from a decline in demand of the manufactured product expected to occur because of market restrictions and other provisions in the settlement agreement.

3. A court of North Carolina approves and retains jurisdiction over the fund.

4. Certain portions of the distributions from the fund are made in accordance with certifications that meet the criteria in the settlement agreement and are provided by a nonprofit entity, the governing board of which includes State officials

- Income Tax Deductions for Trusts. It provides for an income tax deduction for trusts similar to the above deduction. The provision for a tax deduction is set out in both the corporate and trust income tax statutes in case it is determined that the trust does not meet the requirements of a qualified settlement fund.

- Corporate Income Tax Credit/Cigarette Exportation. It allows a corporate income tax credit for tobacco manufacturers who export cigarettes to foreign countries. The credit is a dollar amount per cigarette exported for those manufacturers who export at least 50% as many cigarettes in the taxable year as they did in calendar year 1998. The dollar amount ranges from forty cents to twenty cents per 1,000 cigarettes exported. The credit is capped at the lesser of $6 million per year or 50% of the manufacturer's corporate tax liability for any given year. Prior to enactment of the act by the General Assembly in the 1999 Session, the issue was raised as to whether or not this tax credit violates GATT, one of the international trade agreements. The General Assembly staff was of the opinion that the tax credit violates GATT, while counsel for one of the four tobacco manufacturers disagreed. It is clear, however, that any challenge to the credit must come from a foreign government. If a foreign government challenges the credit, then the U.S. Justice Department may sue North Carolina. If the Department wins, then federal statute provides that relief is prospective only and persons who have already used the credit cannot be required to repay it. Private citizens have no cause of action on the issue.

- Unlawful to Sell Certain Cigarettes. It prohibits the sale in North Carolina of a package of cigarettes that meets one or more of the following descriptions:

  1. The package differs from the labeling requirements of federal law.

  2. The package is labeled "For Export Only", "U.S. Tax Exempt", "For Use Outside U.S.", or with similar wording.

  3. The package was altered by adding or deleting the wording described in the above two descriptions.

  4. The package was imported into the United States after January 1, 2000, in violation of federal law.

  5. The package violates federal trademark or copyright laws.

A violation of this law is a Class A1 misdemeanor and an unfair trade practice. A package of cigarettes that violates this law is considered contraband and may be seized by a law enforcement officer. The Secretary of Revenue is authorized to cancel the license or the certificate of registration, whichever is applicable, of a person who violates this law.

1999 REVENUE LAWS TECHNICAL CHANGES

Session Law #	Bill #	Sponsor
S.L. 1999-337	**SB 55**	**Senator Cochrane**

AN ACT TO MAKE TECHNICAL AND CONFORMING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

OVERVIEW: This act makes numerous technical and clarifying changes to the revenue laws and related statutes as recommended by the Revenue Laws Study Committee.

FISCAL IMPACT: Insignificant impact.

EFFECTIVE DATE: July 22, 1999, unless otherwise provided *(see Background & Analysis section)*.

BACKGROUND & ANALYSIS: The following table provides a section-by-section analysis of the changes:

SECTION	*EXPLANATION*
1	Corrects an incorrect effective date for the income tax treatment of enhanced wireless 911 fees.
2	Updates list of debtors' property that is retained free of creditors' claims, to add Roth IRAs to regular IRAs and to update terminology for regular IRAs.
3	Reinstates increase in notary commission fee from $25 to $30 that was enacted in the 1998 budget bill but was deleted inadvertently by another 1998 bill. This fee increase became effective October 1, 1999.
4 – 11	Changes references to the inheritance tax, which was replaced with an estate tax effective for the estates of decedents dying on or after January 1, 1999.
12	Corrects a grammatical error by deleting the word "or" in G.S. 93B-15.
13	Deletes language in G.S. 105-32.8 that a person "is subject to the penalties in G.S. 105-236" when that person fails to report a federal correction or determination of the maximum state death tax credit allowed an estate or of the maximum state generation-skipping transfer tax credit allowed. Failure to report to the Secretary of Revenue would still result in forfeiture of the right to any refund due by reason of the determination. Since repeal of the inheritance tax laws, there are no penalties in G.S. 105-236 that apply to this section.
14	Combines G.S. 105-37.1 (Amusements) and G.S. 105-38 (Amusements-Circuses and other traveling amusements) into one statute. These are the amusements subject to 3% gross receipts tax.

SECTION	*EXPLANATION*
15	Moves the language that exempts certain motion pictures from the privilege tax imposed on motion pictures in G.S. 105-38.1 to the list of exemptions in G.S. 104-40 (Amusements exempt from tax).
16	Repeals G.S. 105-109.1 because it is no longer needed. This statute provides that interest will be assessed on the taxes on gross receipts levied on amusements in G.S. 105-37.1 and G.S. 105-38, the tax on installment paper dealers, and the tax on publishers of newsprint publications. This interest runs from the time these taxes were due until paid. This statute is no longer needed now that Article 9 (General Administration; Penalties and Remedies) applies to the privilege license statutes. This repeal also clarifies that interest applies to late payments of the 1% gross receipts tax on movies.
17	Repeals G.S. 105-113 because it is obsolete. This statute requires the sheriff of each county and clerk of the board of alderman of each city to make an annual report to the Secretary of Revenue containing the name and business of every person in the county or city required to obtain a State license under Article 2 of Chapter 105 of the General Statutes.
18	Clarifies that the possession of more than six hundred cigarettes <u>on which tax has been paid to</u> (was "bearing the tax stamp of") another state or country, by any person other than a licensed distributor, is prima facie evidence that the cigarettes are possessed in violation of this State's tobacco products tax. The underlined language clarifies how the Department currently administers this law. This change is needed because there are states that do not use stamps.
19	Updates the statutory cross-references in the Unauthorized Substance tax law.
20	Clarifies scope of franchise tax to include savings and loan associations, as enacted in 1998.
21	Clarifies that a corporation that owes franchise tax but not income tax must apportion its franchise tax using the apportionment formula that would apply to income tax if the corporation were subject to that tax. The law is silent on this issue, and this new language sets out the Department's position.
22	Removes a reference to G.S. 105-130.17 concerning the form of an affirmation because the subsection in that statute pertaining to the form of the affirmation was repealed in 1998. It provides that the affirmation must be in the form required by the Secretary. It also modernizes statutory language. The reference to G.S. 105-236 is unnecessary because the administrative provisions in G.S. 105-236 automatically apply to the corporate income tax statutes.

SECTION	*EXPLANATION*
23	Restores the word "generator" which was inadvertently deleted in 1998. This statute was later repealed by S.L. 1999-342.
24	Changes "Division" to "Part" to conform to new terms enacted in 1998.
25	Changes the reference to the Code section in G.S. 105-152(e). This statute concerns joint tax liability and the innocent spouse. In the IRS Restructuring Act of 1998, the Code section 6013(e) was deleted and substituted in section 6015.
26	Removes reference to repealed statute.
27	Changes "Division" to "Part" to conform to new terms enacted in 1998.
28	Transfers the definitions of "moped" and "special mobile equipment" from Chapter 20 to the sales tax statute in Chapter 105, and then places a cross-reference to the sales tax statute in Chapter 20. These items are subject to sales tax. The Department of Revenue, rather than the DMV, administers the sales tax on special mobile equipment.
29	Adds the term "card-operated" to the sales tax exemption from receipts derived from coin or token-operated washing machines, extractors, and dryers. New technology permits the use of credit and debit cards on this equipment, and the Department has administratively allowed the sales tax exclusion for equipment operated with cards.
30	Clarifies that the certificate of registration filed with the Department by a retailer who makes taxable sales is void if for a period of 18 months the retailer files no returns or files returns showing no sales. Some retailers make only wholesale sales or exempt sales. Those retailers do not need to file sales tax returns and their certificate should not be void because they fail to file a return for a period of 18 months. There was a similar provision in the law prior to its rewrite last session.
31	Deletes the word "burlap" from the reference to the sales tax exemption for the lease or rental of burlap tobacco sheets used in handling tobacco in the warehouse and transporting tobacco to and from the warehouse. This change is necessary because tobacco sheets are now made of other material.
32	Clarifies the filing requirement for the excise tax on piped natural gas. Payment is required monthly and a return is required quarterly. The Department is currently administering the filing requirement this way.
33	Changes references to the inheritance tax, which was replaced with an estate tax effective for the estates of decedents dying on or after January 1, 1999.
34	Adds reference to limited liability companies to conform to remainder of statute.

SECTION	*EXPLANATION*
35	Revises and recodifies a statute that included redundant references to the taxability of property transferred to a tax-exempt nonprofit corporation.
36	Changes statutory references to conform with the movement of the definitions from Chapter 20 to Chapter 105 made in section 28 of this act.
37-42	Deletes references to the "annual filing" of motor carrier reports. The Department of Revenue does not allow annual filing because of the International Fuel Tax Agreement requirements. The reports must be filed quarterly. They also change the reference to motor fuel from "gasoline and other motor fuel" to "motor fuel and alternative fuel". These references were not changed when tax at the rack was enacted in 1995 and need to be updated. Section 41 also conforms the registration of motor carriers with the current administrative practice.
43-44	Conforms motor fuel penalty-hearing statute to other hearing procedure statutes. Also clarifies that a request for a hearing must explain why the person is not liable for the penalty.
45	Corrects an incorrect statute reference.
46	Savings clause
47	Effective date

OMNIBUS ESC CHANGES

Session Law #	Bill #	Sponsor
S.L. 1999-340	**HB 276**	**Representative Redwine**

AN ACT MAKING VARIOUS CHANGES TO THE EMPLOYMENT SECURITY LAWS OF NORTH CAROLINA.

OVERVIEW: This act contains a number of changes recommended by the Employment Security Commission. It includes the following tax law changes, which became effective July 22, 1999, as well as technical and conforming changes:

- Section 1 authorizes electronic funds transfer and credit card payments for unemployment insurance taxes.
- Section 2 extends the requirement for automated filing of employee information in the "Employer's Quarterly Tax and Wage Report" to employers with 100 or more employees.
- Section 8 authorizes the Department of Revenue to share with the Employment Security Commission additional taxpayer information for use in the NC WORKS study and Section 10 prohibits the Commission from disclosing this information.

FISCAL IMPACT: Insignificant impact.

EFFECTIVE DATE: July 22, 1999.

BACKGROUND & ANALYSIS:

EFT/Credit Card Payments. Before enactment of this act, the employment security law contained no provisions allowing payment of unemployment insurance contributions by electronic funds transfer (EFT) or by credit card. Section 1 of this act authorizes employers to utilize EFT for paying unemployment insurance contributions. The act defines "EFT" as a transfer of funds using an electronic terminal, a telephone, a computer, or magnetic tape to instruct or authorize a financial institution to credit or debit an account. This definition is identical to the definition of EFT that applies in the Revenue Act, as provided in G.S. 105-228.90. Section 1 also authorizes the Employment Security Commission to establish policies to permit employers to pay unemployment insurance contributions by credit card. The policies must require the employer to pay any fee charged to the ESC for use of the card.

Automated Filing of Employee Information. Under prior law, an employer with 250 or more employees, and an agent who reports wages for an employer with 250 or more employees, must file the employee information portion of the quarterly tax and wage report on magnetic tapes or diskettes, as prescribed by the Employment Security Commission. Section 2 of this act extends the electronic filing requirement to employers with 100 or more employees, and to their reporting agents.

Information for Use in NC WORKS Study. G.S. 108A-29(r) requires each county's Job Service Employer Committee or Workforce Development Board to study the working poor in that county and report annually to various oversight committees of the General Assembly. This report is called the NC WORKS report. The tax secrecy law authorizes the Department of Revenue to disclose individual income taxpayer information to the Employment Security Commission in order to assist the county committees and boards with the report. The Employment Security Commission may use the information only in a nonidentifying form for statistical and analytical purposes. The prior law authorized the Department of Revenue to share the following information: name, social security number, spouse's name, county of residence, filing status, federal personal exemptions, federal taxable income and North Carolina additions to it, North Carolina income, and total income. Section 8 of this act expands the type of information that may be shared to include spouse's social security number, exemption for children, nonresidents' and part-year residents' exemption for children, credit for children, and detailed information related to the credit for child care and employment-related expenses. Section 10 of this act clarifies that this information is subject to the same confidentiality law as other tax information obtained by the Employment Security Commission.

USE TAX PAYMENT/OTHER CHANGES

Session Law #	Bill #	Sponsor
S.L. 1999-341	HB 1433	Representative Miller

AN ACT TO PROVIDE FOR INDIVIDUALS TO PAY THEIR ANNUAL USE TAX WITH THEIR INCOME TAX FORMS, TO PROMOTE ELECTRONIC FILING, AND TO IMPROVE TAX COLLECTION.

OVERVIEW: This act simplifies use tax collection and seeks to improve tax collection in several ways:

- It provides that an individual who owes use tax to the State on non-business purchases can pay the tax with the individual's income tax return.
- It promotes the electronic filing of semimonthly sales tax reports.
- It directs the Secretary of Revenue to contract for the collection of delinquent tax debts owed by nonresidents and foreign entities.
- It directs the Department of Revenue and the State Controller to study the feasibility of a central collection operation.
- It prohibits State agencies from contracting with a vendor who is required under G.S. 105-164.8(b) to collect State sales and use tax but refuses to do so.

FISCAL IMPACT: The act is expected to increase General Fund revenues by $1.67 million in fiscal year 1999-2000, $1.75 million in fiscal year 2000-2001, $1.84 million in fiscal year 2001-2002, $1.93 million in fiscal year 2002-2003, and $2.03 million in fiscal year 2003-2004.

EFFECTIVE DATE: *See Background & Analysis section.*

BACKGROUND & ANALYSIS: North Carolina has a State and Local sales and use tax at the combined rate of 6%. (The combined rate is 6 ½ % in Mecklenburg County.) The sales tax is paid on purchases made in this State. The tax is collected by the retailer and remitted to the State. The use tax complements the sales tax by taxing transactions that are not subject to the sales tax because of movement in interstate commerce. Like the sales tax, the use tax is imposed on the purchaser. Unlike the sales tax, the responsibility for remitting the use tax to the Department of Revenue is also on the purchaser.

The 1997 General Assembly enacted S.L.1997-77, which established an annual filing period for the payment of use taxes owed by consumers on mail-order and other out-of-state purchases. This change relieved consumers of the need to file either monthly or quarterly returns. *(For additional background information on use taxes, see below.)*

Use Tax Payable on Income Tax Returns. The act further simplifies use tax collection by providing that the use tax will be paid on the taxpayers' income tax returns. An individual who owes use tax on nonbusiness purchases and who must remit a State income tax return must pay the use tax owed with the income tax return. The income tax return will have space on it to indicate the amount of use tax owed. By placing the use tax on the individual income tax return, as opposed to a separate use return sent to the taxpayer with the income tax return, it is hoped that taxpayers' awareness of their responsibility to pay the tax will increase since taxpayers must affirm that the information on the income tax return is true and complete by signing the return. The Secretary of Revenue is required to provide information on the individual income tax form and instructions to explain a person's obligation to pay use tax on items purchased from mail order, Internet, or other sellers that do not collect State sales tax on items. The Secretary must also provide a method to help a person determine the amount of use tax owed. This method must list categories of items that are commonly sold by mail order or Internet and must include a table that gives the average amounts of use tax payable by taxpayers in various income ranges.

This portion of the act is effective for taxable years beginning on or after January 1, 1999.

Use of Use Tax Revenue. The act allows the Department of Revenue to use some of the additional use tax revenue collected under it to promote tax collections as follows:

- The Department may use $150,000 to pay for the costs of programming, form revision, and resources for taxpayer assistance in connection with the new use tax collection method.
- The Department may use $500,000 to implement a program to allow semimonthly sales and use taxpayers to file their returns electronically.
- The Department may use some of the revenue to contract for the collection of delinquent tax debts owed by nonresidents and foreign entities. A delinquent tax debt is the amount of tax due as stated in a final notice of assessment issued to the taxpayer when the taxpayer no longer has the right to contest the debt. The Department must report on its collections pursuant to this contract to the Revenue Laws Study Committee.
- The Department may use up to $50,000 to conduct a study, in cooperation with the State Controller, to identify and evaluate proposals for more efficient collection of taxes. The Department must report is findings, recommendations, and estimated revenue gains to the Revenue Laws Study Committee by May 1, 2000.

State Contracts with Certain Vendors Prohibited. Effective July 1, 1999, the State is prohibited from contracting with a vendor for goods or services if the vendor is required by G.S. 105-164.8(b) to collect use tax for the State but refuses to do so. G.S. 105-164.8 requires a retailer that is engaged in business in this State to collect use tax on a mail order sale. Subsection (b) of this statute provides that a retailer that makes a mail order sale is engaged in business in this State if the retailer meets one or more of the following conditions:

- Is a corporation engaged in business under the laws of this State.
- Maintains offices in this State.
- Has representatives in this State who solicit business or transact business on behalf of the retailer.
- Is purposefully or systematically exploiting the market in this State by any media-assisted, media-facilitated, or media-solicited means, including direct mail advertising, distribution of catalogs, computer-assisted shopping, etc.
- Resides in a jurisdiction that has a compact or reciprocity with North Carolina to support North Carolina's taxing power.
- Consents to the imposition of the collection of the tax.

Disclosure of Information. Effective July 1, 1999, the act also amends the tax secrecy provisions to allow the Secretary of Revenue to make two disclosures.

1. The Secretary may provide the Secretary of Administration with a list of vendors who refuse to collect the State's use tax even though they are required to do so under G.S. 105-164.8.
2. The Secretary may provide the public with access to a database containing the names and account numbers of taxpayers who are not required to pay sales and use tax because of an exemption or because they are authorized to pay the tax directly to the Department.

Additional Background on Use Tax Collections: In the 1980s, states around the country became increasingly aware of the revenue loss associated with taxpayer avoidance of the use tax. The potential increase in State and local revenue for North Carolina, if full taxpayer compliance were achieved, would exceed $100 million.

The most cost-effective manner to collect the tax, from a state's point-of-view, is to require the out-of-state retailers to collect and remit the use tax. However, in 1967, the U.S. Supreme Court ruled in National Bellas Hess Inc. v. Department of Revenue that a state could not require an out-of-state retailer to collect its use tax unless the retailer has enough contacts with the state to subject it to the state's taxing jurisdiction. The Supreme Court reaffirmed this decision in 1992 in Quill Company v. North Dakota.

States have negotiated with direct marketers on at least two occasions to craft a voluntary collection agreement where marketers would collect the tax and states would simplify their reporting requirements. Both of these efforts were unsuccessful.

There are three efforts currently under way to address the issue of out-of state purchases:

- The National Tax Association Communications and Electronic Commerce Tax Project is focusing on a simplified multi-state approach to sales and use taxation of remote sellers which would require states to adopt common definitions of tax base components and impose a single tax rate statewide.
- The Advisory Commission on Electronic Commerce was established by the Internet Tax Freedom Act. This Act was part of the omnibus federal budget bill signed into law on October 21, 1998. The Advisory Commission has 18 months from this date to study electronic commerce issues and to make a report to Congress.
- The Multistate Tax Commission Tax Simplification Project is comprised of representatives of business and state and local governments who are focusing on ways to simplify the sales and use tax in the areas of uniformity and reporting. The act contains several recommendations made to the Project by the North Carolina representatives. These recommendations are (1) the promotion of electronic filing of semimonthly sales and use tax reports, (2) the authority of the Secretary of Revenue to provide the Secretary of Administration with a list of vendors who refuse to collect the State's use tax even though the vendors are required by law to collect the tax, and (3) the authority of the Secretary of Revenue to provide the public with access to a database containing the names and account numbers of taxpayers who are not required to pay sales and use tax.

SIMPLIFY RENEWABLE ENERGY CREDITS

Session Law #	Bill #	Sponsor
S.L. 1999-342	HB 1472	Representative Hackney

AN ACT TO SIMPLIFY AND MODERNIZE TAX CREDITS FOR INVESTING IN RENEWABLE ENERGY SOURCES.

OVERVIEW: This act repeals nine corporate and individual income tax credits relating to energy savings devices and replaces them with a tax credit for investing in renewable energy property.

FISCAL IMPACT: The effect of this act on General Fund revenues cannot be estimated.

EFFECTIVE DATE: The act becomes effective beginning with the 2000 taxable year.

BACKGROUND & ANALYSIS: The General Assembly enacted several individual and corporate income tax credits in the 1980s to encourage the following energy saving investments:

- Solar energy equipment.
- Conversion of industrial boilers to wood fuel.
- Peat facility.
- Olivine brick facility.
- Methane gas facility.
- Wind energy device.
- Hydroelectric generator.

Of these credits, there is no evidence that the ones for peat, wind energy, olivine bricks, and methane have ever been used. This act repeals nine income tax credits for these types of property and substitutes a general credit for investing in renewable energy property. The new credit applies to a broader category of property and is, generally, more generous than the prior law credits. The intent of the act is that the broader category of renewable energy property will reflect technological advances in renewable energy and that the more generous credit percentages, caps, and carryforwards will encourage more investment in renewable energy property.

The credit percentage for the prior law credits ranged from 10% to 40% of the taxpayer's investment; the new credit percentage is 35% of the investment. Most of the prior law credits were capped at between $1,000 and $25,000 per installation. The renewable energy credit is capped at between $1,400 and $10,500 for residential installations and at $250,000 per installation for nonresidential installations (although the credit must be taken in five annual installments unless it is for a single family dwelling installation). The prior law credits were allowed against income tax only; the renewable energy credit is allowed against either income or franchise tax, but may not exceed 50% of the taxpayer's tax liability for a taxable year. Only about half of the prior law credits allowed carryforwards; the renewable energy credit may be carried forward for five years.

The act defines renewable energy property as any of the following machinery and equipment or real property:

- Biomass equipment that uses renewable biomass resources for biofuel production of ethanol, methanol, and biodiesel. Renewable biomass resources are organic matters produced by terrestrial and aquatic plants and animals, such as standing vegetation, forestry and agricultural residues, landfill wastes, and animal wastes.
- Hydroelectric generators.
- Solar energy equipment.
- Wind equipment.

The amount of the credit is 35% of the cost of the property placed in service. In the case of renewable energy property that serves a single-family dwelling, the credit must be taken for the taxable year in which the property is placed in service. For all other renewable energy property,

the credit must be taken in five equal installments, beginning with the taxable year in which the property is placed in service. The credit may not exceed the following amounts:

TYPE OF PROPERTY	*MAXIMUM CREDIT*
Nonresidential Property	$250,000 per installation
Residential Property – Solar energy equipment for domestic water heating	$1,400 per dwelling unit
Residential Property – Solar energy equipment for active space heating, combined active space and domestic hot water systems, and passive space heating	$3,500 per dwelling unit
Residential Property – All other renewable energy property for residential purposes	$10,500 per installation

The credit is patterned after the business tax credit and is codified in the same Article. Like the business tax credit, the renewable energy tax credit has the following limitations and conditions:

- The renewable energy tax credit may not exceed 50% of the tax against which it is claimed for the taxable year. Any unused portion of the credit may be carried forward for the succeeding five years.
- A taxpayer that claims any other credit allowed with respect to renewable energy property may not take the renewable energy tax credit with respect to the same property.
- A taxpayer may not take the renewable energy tax credit if the taxpayer leases the property from another person, unless the taxpayer obtains the lessor's written certification that the lessor will not claim a credit with respect to this property.
- The Department of Revenue must report each year on the number of taxpayers claiming the credits, the cost of the property for which the credits were claimed, and the total cost to the General Fund of the credits claimed.
- The business tax credit is repealed effective January 1, 2002, while the remainder of the Article is repealed effective January 1, 2006. Consequently, the renewable energy tax credit is set to sunset on January 1, 2006.

Prior Credits Repealed. The following chart lists the prior law credits repealed by this act:

G.S.	*SHORT TITLE*	*%*	*CEILING*	*CARRY-FOR WARD*
105-130.23.	Credit against corporate income tax for solar energy equipment in residential buildings.	40%	$1,500 per unit	Five years
105-151.2.	Credit for solar energy equipment.	40%	$1,500 per unit	Five years

G.S.	SHORT TITLE	%	CEILING	CARRY-FOR WARD
105-130.26 & 105-151.5.	Credit for conversion of industrial boiler to wood fuel.	15%	None	Five years
105-130.27A.	Credit for construction of a peat facility.	20%	None	Five years
105-130.29.	Credit for construction of an olivine brick facility.	20%	None	Five years
105-130.30 & 105-151.10.	Credit for construction of a methane gas facility.	10%	$2,500 per installation	None
105-130.31 & 105-151.9.	Credit for installation of a wind energy device.	10%	$1,000 per installation	None
105-130.32 & 105-151.8.	Credit for installation of solar energy equipment for the production of heat or electricity in certain processes.	35%	$25,000 per installation	None
105-130.33 & 105-151.7.	Credit against corporate income tax for installation of a hydroelectric generator.	10%	$5,000 per installation	None

NEWSPRINT TAX CREDIT CHANGE

Session Law #	Bill #	Sponsor
S.L. 1999-346	**HB 1479**	**Representative Miller**

AN ACT TO AMEND THE NEWSPRINT RECYCLING TAX.

OVERVIEW: **This act modifies the excise tax on virgin newsprint by postponing the increase in the percentage of recycled content required and by expanding the credit for recycling.**

FISCAL IMPACT: The act is expected to reduce revenues in the Solid Waste Management Trust Fund by less than $1,000 per year.

EFFECTIVE DATE: July 1, 1999

BACKGROUND & ANALYSIS: A publisher must pay a privilege license tax of $15 for each ton of newsprint it consumes that does not have a minimum recycled content. The General Assembly enacted this excise tax on newsprint in 1991 to encourage the use of recycled newsprint. The minimum amount of recycled paper required has been phased up since 1991 from 12% to 35% and was set to increase to 40% in 2001. This act delays this increase in the minimum recycled content percentage until 2005.

There is a credit that can be used towards the recycled content percentage goals for publishers who develop and operate, or contract for the operation of, a newspaper recycling program. Under prior law, a publisher could receive one-half ton credit toward its total recycled content tonnage for each ton of newsprint it recycled. This act increases the credit from one-half ton to one ton, and expands it to include recycling of magazines as well as newsprint.

The proceeds of the tax are earmarked for the Solid Waste Management Trust Fund[7]. The tax generates less than $2,000 a year in revenue. The tax does not apply if the producer cannot meet the recycled content goal because of an inability to obtain newsprint made from recycled paper at a price or quality comparable to other newsprint, to acquire an amount needed for a publication, or to acquire the amount needed in a reasonable amount of time.

MOTOR VEHICLE TAX VALUE/E&R BOARD

Session Law #	Bill #	Sponsor
S.L. 1999-353	**HB 315**	**Representative C. Wilson**

AN ACT TO PROVIDE THAT A MOTOR VEHICLE'S PROPERTY TAX VALUE IS DETERMINED AS OF JANUARY 1 PRECEDING THE DUE DATE OF THE TAX AND TO AUTHORIZE THE STOKES BOARD OF EQUALIZATION AND REVIEW TO MEET AFTER ITS FORMAL ADJOURNMENT.

OVERVIEW: **This act provides that a classified motor vehicle's property tax value is to be determined on January 1 of the year the taxes are due, effective for taxes imposed for taxable years beginning on or after July 1, 2000. The act also extends the authority of the Stokes County Board of Equalization and Review to meet after its adjournment upon completion of its duties to examine and review the county's tax list for the current year and to hear a request from a taxpayer regarding the taxpayer's property appraisal or listing.**

FISCAL IMPACT:

- Motor vehicle tax value change: This change does not affect General Fund revenues but is expected to reduce local government revenues by $27.6 million in fiscal year 2000-2001, $29.5 million in fiscal year 2001-2002, $31.6 million in fiscal year 2002-2003, and $33.8 million in fiscal year 2003-2004.
- Stokes Co. E&R Bd. Change: No fiscal impact.

EFFECTIVE DATE:

- Motor Vehicle Tax Value Change: Effective for taxes imposed on taxable years beginning on or after July 1, 2000.

[7] The money in this Fund is used to fund activities of the Department of Environment and Natural Resources (DENR) to promote waste reduction and recycling, to fund research on the solid waste stream in North Carolina, to fund activities related to the development of secondary materials markets, to fund demonstration projects, and to fund research by in-State colleges and universities.

- Stokes County E&R Bd. Change: July 22, 1999.

BACKGROUND & ANALYSIS:

Motor Vehicle Property Tax Change. The act changes the date for the determination of the property tax value of a classified motor vehicle from January 1 preceding the date the new registration is applied for or the current registration expires to January 1 of the year the taxes are due. Under the current system, classified vehicles are taxed on a revolving, year-round schedule. Every month, the Division of Motor Vehicles (DMV) provides each county a list of the motor vehicles in the county for which registration was renewed or obtained two months earlier. The county lists and appraises the vehicles and sends each vehicle owner a bill for the county, city, and special district taxes due. If the owner does not pay the taxes due on a classified, registered vehicle, DMV will refuse to renew the vehicle registration the following year unless the owner obtains a receipt showing that the taxes have been paid.

For classified motor vehicles, the ownership, situs, and taxability of the vehicle are determined annually as of the day on which a new registration is applied for or the day on which the current vehicle registration is renewed. However, the value of the vehicle is determined annually as of January 1 preceding the date the new registration is applied for or the current registration expires. Therefore, property tax bills that taxpayers receive in January through April of each year are based on the value of the vehicles as of January of the preceding year. This means that the property tax assessment can reflect values as old as 16 months. By moving the property tax valuation date to January 1 of the year the taxes are due, the act ties the value of the vehicle closer to its true value in money. The taxes become due on the first day of the fourth month after the registration is applied for (or the previous registration expired). Thus if the registration is applied for in September or later, the valuation date is the following January. If the registration is applied for before September, the valuation date is the preceding January.

The value of a vehicle, like all other tangible personal property, is based upon its true value in money as prescribed by G.S. 105-283.

Stokes County Equalization and Review Board Change. The second part of the act authorizes the Stokes County Board of Equalization and Review to continue meeting after the Board has performed its statutory duties of examining and reviewing the tax lists for the current year and of hearing any request of a taxpayer with respect to the listing or appraisal of property. G.S. 105-322(e) requires a board of equalization and review to complete the above duties by a specified date. The act amended this statute, effective July 22, 1999, to allow the Stokes County Board of Equalization and Review to continue to meet upon completion of these statutory duties in order to carry out the following duties:

- To hear and decide all appeals relating to discovered property.
- To hear and decide all appeals relating to the appraisal, situs, and taxability of classified motor vehicles.
- To hear and decide all appeals relating to audits of property classified at present-use value and to audits of property exempted or excluded from taxation.

AMEND BILL LEE ACT/INCENTIVES

Session Law #	Bill #	Sponsor
S.L. 1999-360	**SB 1115**	**Senator Kerr**

AN ACT TO PROVIDE FOR WIDELY SHARED PROSPERITY BY AMENDING THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT, BY PROVIDING ADDITIONAL TAX INCENTIVES FOR VARIOUS BUSINESSES, AND BY MAKING RELATED CHANGES.

OVERVIEW: This act amends the tax laws to expand existing tax incentives for businesses, add new tax incentives and tax reductions for specific businesses, and make related changes. The provisions of the act are listed below, followed by a detailed summary of each provision.	*EFFECTIVE DATE*	*FISCAL IMPACT*
Extend Sunsets on Bill Lee Act Credits.		
Extend sunset on Bill Lee Act from 2002 to 2006, and require Department of Commerce to continue studying impact of Bill Lee Act incentives.	8/4/99	The extension of the sunset will result in a loss of revenue to the General Fund of approximately $13.1 million in the 2002-2003 fiscal year; the loss is expected to increase to as much as $38.1 million by fiscal year 2005-2006.
Incentives for Interstate Passenger Air Carrier Hubs.		
Add passenger air carrier training centers to Bill Lee Act credits.	1/1/99	This change will have an insignificant impact on General Fund revenues.
Allow an interstate passenger air carrier a sales tax exemption for aircraft parts and accessories purchased for use at its hub in this State.	5/1/99	This change will reduce General Fund revenues by approximately $1.2 million a year. It will also reduce local sales tax revenues.
Reduce sales tax from 6% to 1% with an $80 cap for flight crew training aircraft simulators purchased by an interstate passenger air carrier for use at its hub in this State.	5/1/99	This change will reduce General Fund revenues by approximately $400,000 a year. It will also reduce local sales tax revenues.

Incentives for Non-Profit Insurance Companies.		
Allow certain nonprofit insurance companies an eight-year sales tax refund for taxes paid on building materials and fixtures, and a four-year sales tax refund for taxes paid on capitalized computer equipment.	5/1/99	These changes will reduce General Fund revenues by approximately $600,000 in fiscal year 2000-2001, $1.2 million in fiscal years 2001-2002 and 2002-2003, and by approximately $100,000 in fiscal year 2003-2004.
Incentives for Tiers One and Two.		
Extend Bill Lee Act credits to electronic mail order houses that create at least 250 jobs in tiers one and two.	1/1/00	This change will reduce General Fund revenues by approximately $2.7 million beginning in fiscal year 2001-2002; the loss in revenues is expected to grow to $5.8 million in fiscal year 2004-2005 and decline slightly in fiscal year 2005-2006 to approximately $4.4 million.
Extend Bill Lee Act credits to customer service centers in tiers one and two.	1/1/00	This change will reduce General Fund revenues by approximately $600,000 a year in fiscal year 2001-2002; the loss in revenues is expected to grow to an annual loss of $2.4 million by fiscal year 2005-2006.
Allow annual refund of 6% sales taxes paid on capitalized machinery and equipment sold to businesses eligible for Bill Lee Act credits and located in tiers one and two.	1/1/00	This change will reduce General Fund revenues by approximately $100,000 a year beginning in fiscal year 2000-2001. The annual loss is expected to increase to $1 million by fiscal year 2005-2006.
Incentives for Small Counties.		

Give a more favorable tier designation to small counties.	1/1/00	This change is expected to have an insignificant impact on General Fund revenues.
Close Development Zone Loopholes.		
Close loopholes in definition of development zones.	8/1/99	This change is expected to increase General Fund revenues by $100,000 a year in fiscal years 2000-2001 and 2001-2002, by $600,000 a year in fiscal year 2002-2003, and by $300,000 a year in fiscal year 2003-2004.
Credit for Development Zone Projects.		
Allow a 25% credit for contributions to nonprofits for capital projects within development zones.	1/1/00	This change is expected to reduce General Fund revenues by $2.5 million in fiscal year 2001-2002 and by $4 million for each year thereafter.
Affordable Housing Tax Credit.		
Allow a credit for rehabilitating or constructing affordable housing, effective for new projects.	Beginning: 1/1/00 Sunset: 1/1/06	This change is expected to reduce General Fund revenues by $1.5 million a year in fiscal year 2001-2002, and by as much as $10.1 million a year by fiscal year 2005-2006.
Extend Bill Lee Act Credits to Insurance Company Administrative Offices.		
Allow all Bill Lee Act credits to be taken against insurance premiums tax.	1/1/99	This change is not expected to significantly affect General Fund revenues.
Quality Jobs Assurance.		
Require businesses to provide health insurance and meet environmental, safety, and health standards in order to qualify for Bill Lee Act credits.	1/1/00	This change is not expected to significantly affect General Fund revenues.

Application Fee and Information Changes.		
Eliminate the $75 application fee for Bill Lee Act credits in tiers one and two and increase the fee to $500 per credit in other tiers, with a cap of $1,500 per applicant.	9/4/99	This change is not expected to significantly affect General Fund revenues.
Require applicants for Bill Lee Act credits to provide additional information to enable Commerce to evaluate the effectiveness of the credits in providing employment to residents of development zones.	9/4/99	N/A
Require taxpayers to include with their tax returns the information that they must generate under current law to establish eligibility for the Bill Lee Act credits.	1/1/00	N/A
Clarify Business Definitions and Refunds.		
Clarify definitions of industries covered by Bill Lee Act, effective immediately	8/4/99	N/A
Clarify sales tax refunds for sales of fuel to interstate air carriers.	10/1/99	N/A
Research and Development Credit.		
Provide that research and development credit will not expire when the corresponding federal credit expires.	1/1/99	This change is not expected to significantly affect General Fund revenues.
Industrial Development Fund/Environmental Certification.		
Require projects to obtain an environmental certification in order to qualify for funding from the Industrial Development Fund (Building Renovation Fund), effective when the act becomes law.	8/4/99	N/A
Dept. of Commerce to Oversee Interstate Cooperative Efforts.		
Require the Department of Commerce to support reasonable efforts to reduce interstate competition in luring businesses from one state to another.	8/4/99	N/A
Brownfields Property Fee Changes.		
Increase fees paid to the Department of Environment, Health, and Natural	8/4/99	This change is not expected to significantly

Resources for brownfields agreements applied for after the act becomes law.		affect General Fund revenues.

<u>FISCAL IMPACT</u>: *See chart above.*

<u>EFFECTIVE DATE</u>: *See chart above.*

<u>BACKGROUND & ANALYSIS</u>:

<u>Extend Sunset on Bill Lee Act Credits</u>. The William S. Lee Quality Jobs and Business Expansion Act was enacted in 1996, effective beginning with the 1996 tax year, with a sunset effective in 2002. The Act required the Department of Commerce to report annually on the credits allowed by the Act. In 1997, the General Assembly added specific issues that the Department of Commerce was required to study and report back on in 1999. Before 1996, North Carolina had made little use of tax incentives to lure businesses to the State. Even without incentives, North Carolina was consistently one of the top states in attracting industry. The array of credits authorized by the William S. Lee Act was viewed as an experiment, to be evaluated in five years to determine whether the incentives were cost effective and actually affected behavior, or merely provided tax reductions to businesses that would have located or expanded in any case. This act extends the 2002 sunset for an additional four years, to 2006, and it renews the requirement that the Department of Commerce study the effect and effectiveness of the Bill Lee Act incentives and report the results of its study to the 2001 General Assembly.

<u>Incentives for Interstate Passenger Air Carrier Hubs</u>. The act provides three incentives for interstate passenger air carriers with hubs in this State. A hub is defined as the airport where the carrier has allocated at least 60% of its aircraft property tax value and at which the majority of its boarding passengers are connecting from other airports, not originating at that airport. U.S. Airways, whose hub is in Charlotte, qualifies for the credit. Midway Airlines, whose hub is at Raleigh-Durham, should qualify for the credit by the end of 1999.

The first incentive for passenger air carriers is to provide that the Bill Lee Act definition of central administrative offices includes centralized training offices at an air carrier's hub, effective beginning with the 1999 tax year. This change allows the air carrier to qualify for the central administrative office credit, described below, as well as for the existing Bill Lee Act credit for creating jobs, credit for investing in machinery and equipment, credit for research and development, and credit for worker training. These credits can be taken with respect to the training center only.

The central administrative office credit is allowed to taxpayers that purchase or lease real property to be used as central administrative office property with 40 or more employees. The amount of the credit is equal to 7% of the eligible investment amount and may not exceed $500,000. The credit is taken in seven equal installments over the seven years following the taxable year in which the property is first used as a central administrative office.

The second incentive for passenger air carriers is a sales tax exemption for the carrier's purchases of aircraft lubricants, parts, and accessories for use at its hub, effective beginning May 1, 1999. These purchases would otherwise be subject to sales tax at 6%, but interstate air carriers are allowed a partial refund of the tax under G.S. 105-164.14(a). In 1998, the General Assembly enacted a similar exemption for air couriers (Federal Express), effective January 1, 2001.

The third incentive for passenger air carriers is a sales tax reduction from 6% to 1% with an $80 cap, for purchases of aircraft simulators for flight crew training for use at the hub, effective

beginning May 1, 1999. The tax reduction would also apply to interstate air couriers. U.S. Airways plans to establish a flight crew training center at its Charlotte hub, where it would use aircraft simulators.

Incentive for Nonprofit Insurance Companies. The act provides a sales tax refund to certain nonprofit insurance companies for State and local taxes they pay on building materials, supplies, fixtures, and equipment that become a part of their real property and on capitalized computer systems hardware and software. The refund is effective beginning with taxes paid on May 1, 1999. The computer equipment refund expires for taxes paid on or after January 1, 2004, and the building materials refund expires for taxes paid on or after January 1, 2008. To qualify for these refunds, the insurance company must be operated for the exclusive purpose of providing insurance products to nonprofit charitable organizations and their employees. In addition, the Secretary of Commerce must have certified that the insurance company will invest at least $20 million in this State. TIAA, which has announced plans to build an office in Mecklenburg County, fits this description.[8] If TIAA fails to make the $20 million investment within five years after it first receives a refund, it forfeits all refunds it received as a result of this incentive.

Incentives for Enterprise Tiers One and Two. The act provides three incentives for development in enterprise tier one and two counties, which are the counties considered most in need of economic development based on high unemployment, low per capita income, and low population growth.[9] The first incentive extends all of the Bill Lee Act credits to electronic mail order houses that create at least 250 jobs located in an enterprise tier one or two county. The second incentive extends all of the Bill Lee Act credits to certain customer service centers located in an enterprise tier one or two county. An eligible customer service center is a subdivision of a telecommunications or financial services company that provides support services to the company's customers by telephone to support the company's products and services. To qualify, at least 60% of the center's calls must be incoming. This requirement will prevent telemarketing operations from qualifying. The credits allowed under the Bill Lee Act, which this act extends to these electronic mail order houses and customer service centers effective January 1, 2000, are the credit for creating jobs, the credit for investing in machinery and equipment, the credit for research and development, the credit for worker training, and the credit for investing in central administrative office property.

The third incentive allows an annual sales tax refund on taxes paid at 6% (6.5% in Mecklenburg County) on capitalized machinery and equipment sold to a taxpayer engaged in one of the businesses eligible for Bill Lee Act credits, for use in an enterprise tier one or two county. This provision will become effective for taxes paid on or after January 1, 2000. In addition to tier one and two customer service centers and electronic mail order houses discussed above, the following businesses are eligible for Bill Lee Act credits: air courier services, central administrative offices (with at least 40 new jobs), data processing, manufacturing, warehousing, and wholesale trade.

Incentives for Small Counties. The act allows certain counties to qualify for a lower enterprise tier designation, effective January 1, 2000. Under the Bill Lee Act, all counties are divided into five

---

[8] There may be one or more other nonprofit insurance companies that could qualify, but only if they make a $20 million investment.

[9] The following 13 counties are in tier one for 1999: Bertie, Edgecombe, Graham, Halifax, Hertford, Hyde, Martin, Northampton, Richmond, Swain, Tyrrell, Warren, and Washington. The following 15 counties are in tier two for 1999: Alleghany, Anson, Ashe, Beaufort, Cherokee, Columbus, Mitchell, Montgomery, Onslow, Perquimans, Robeson, Rutherford, Scotland, Vance, and Yancey.

enterprise tiers, ranked by economic distress as measured by a formula that combines unemployment, per capita income, and population growth. Those counties in lower-numbered tiers receive more favorable incentives than those in higher tiers.

First, this act changes the rules for assigning enterprise tier designations to provide that the tier number that would otherwise be assigned by the formula is reduced by one for counties that have a population of less than 50,000 and also have more than 18% of their residents below the federal poverty level. Under this provision, Alleghany, Ashe, Beaufort, Cherokee, Perquimans, Scotland, Vance, and Yancey Counties would move from tier two to tier one; Bladen, Hoke, Jones, Madison, Pamlico, and Pasquotank Counties would move from tier three to tier two; and Duplin, Greene, and Watauga Counties would move from tier four to tier three. Second, the act provides that a county that has a population of less than 25,000 cannot be designated higher than tier three. Under this provision, Polk and Currituck Counties would move from tier five to tier three. Third, the act provides that a county is designated as tier one if it has a population of less than 10,000 and also has more than 16% of its residents below the federal poverty level. Under this provision, Camden, Clay, and Jones Counties would become tier one counties.

Close Development Zone Loopholes. In 1998, the General Assembly amended the Bill Lee Act to provide additional incentives for businesses that locate or expand in development zones, which are economically distressed areas located within cities. The statutory conditions for qualifying as a development zone were designed to target only these relatively small, economically distressed areas. The statutory conditions contained loopholes, however, that allowed large areas outside of cities to qualify, even if they were not economically distressed throughout. The act closes those loopholes, effective for development zone designations made on or after January 1, 2000.

The 1998 legislation defined a development zone as an area that meets all of the following conditions: (1) consists of one or more contiguous census tracts, block groups, or both, (2) has a population of 1,000 or more, at least 20% of whom are below the poverty level, and (3) is located at least partly in a city with a population over 5,000. This act closes the loopholes in this definition by requiring that:

- Every census tract and census block group in the zone must be located in whole or in part within the primary corporate limits of the city.
- Every census tract and census block group in the zone must have more than 10% of its population below the poverty level, or must be immediately adjacent to a tract or group that has more than 20% of its population below the poverty level.
- None of the census tracts or census block groups may be located in another development zone.

The act also shortens the period during which designation as a development zone is effective, from four years to two years, and requires zone applicants to notify every city in which part of the proposed zone would be located.

The following enhanced incentives apply in development zones: If a business locates in a development zone, the wage standard it has to meet is the same as for tier one counties -- slightly lower than the standard for other counties. In addition, if a business locates in a development zone, its maximum worker training credit is $1,000 rather than $500, it receives an additional $4,000 per job on its jobs tax credit, and there is no threshold for the credit for investing in machinery and equipment.

Credit for Development Zone Projects. The act creates a new tax credit for taxpayers that contribute cash or property to certain nonprofit agencies to be used for an improvement project in a development zone. An improvement project is a project to construct or improve real property for community development purposes or to acquire real property and convert it for community development purposes. The new credit becomes effective beginning with the 2000 tax year.

The credit allowed is 25% of the amount contributed by the taxpayer. The total amount of credits that may be allowed in a taxable year is capped at $4 million. Taxpayers are required to apply to the Secretary of Revenue for these credits. If the total amount applied for in a year exceeds $4 million, the Secretary will reduce each applicant's credit proportionally.

The credit is allowed for contributions to a development zone agency, defined as a community action agency, a community-based development organization, a community development corporation, a community development financial institution, a community housing development organization, or a local housing authority. To qualify for the credit, all of the following conditions must be met:

- The agency must contract in writing to use the contribution for an improvement project in a development zone and to repay the taxpayer with interest if the contribution is not so used.
- The Department of Commerce must certify that the agency will undertake an improvement project in a development zone.[10] To support this certification, the agency must provide the Department documentation establishing the identity of the agency, the nature of the project, and that the project is for a community development purpose in a development zone.
- The taxpayer must be unrelated to the agency and must not control, be controlled by, or be under common control with the agency.
- The taxpayer must not receive anything of value for the contribution.

A taxpayer forfeits the tax credit for a contribution to the extent the development zone agency uses the contribution for anything other than an improvement project in a zone. Development zone agencies are required to file with the Department of Commerce annual, audited financial statements. If the Department of Commerce finds that any part of a contribution was used for a purpose other than an improvement project, it must notify the Department of Revenue of the resulting forfeiture.

Affordable Housing Tax Credit. The act creates a new tax credit for rehabilitating or constructing low-income housing, effective for buildings allocated federal credits on or after January 1, 2000. The credit expires for buildings allocated federal credits on or after January 1, 2006. The credit is equal to a percentage of the amount of the taxpayer's federal credit for low-income housing with respect to eligible North Carolina low-income housing. The credit is 75% for buildings located in tier one or two and 25% for buildings located in other tiers. North Carolina low-income housing is eligible if it meets one of the following conditions:

- It is located in a tier one or two enterprise area.

[10] The Secretary of Commerce may not certify a development zone agency if it, any of its officers or directors, or any partner of the agency has ever used part of an improvement project contribution for any purpose other than the improvement project.

- It is located in a tier three or four enterprise area and has at least 40% of its residential units that are rent-restricted and are occupied by individuals whose income is 50% or less of area median gross income.
- It is located in a tier five enterprise area and has at least 40% of its residential units that are rent-restricted and are occupied by individuals whose income is 35% or less of area median gross income.

The credit is not taken in one year but is spread out over five years beginning when the federal credit is first claimed for the building. The federal credit is first claimed either when the building is placed in service, or the next year, at the taxpayer's election. The federal credit is taken over eleven years.

The federal credit requires that either (1) at least 20% of the residential units are rent-restricted and occupied by individuals whose income is 50% or less of area median gross income or (2) at least 40% of the residential units are rent-restricted and occupied by individuals whose income is 60% or less of area gross income. By providing a higher credit for tier one and two projects and by limiting the State credit to projects that are either in tier one or two or serve lower-income residents, the act is designed to steer investments toward these projects.

The federal credit requires that the low-income housing be used for that purpose for at least 30 years. If this requirement is not met, all or part of the taxpayer's credit is recaptured. Under the State credit, if federal recapture is required, the taxpayer forfeits the North Carolina credit to the same extent. In addition, if the taxpayer no longer qualifies for the federal credit during one of the five years a State installment could otherwise be claimed, the taxpayer is no longer eligible for the State credit. This situation could occur if the taxpayer sold its interest in the low-income housing.

Under federal law, a limited amount of credit is allowed to each state each year, and these credits are allocated among applicants based on selection criteria designed to reward projects that will serve the lowest income tenants for the longest periods. At least 10% of the credits each year must be set aside for projects sponsored by nonprofits. The amount of federal credit allocated to North Carolina will be $9.2 million for the 2000 through 2002 tax years and is expected to increase to $13 million for the 2003 and 2004 tax years. By limiting the State credit to a percentage of the federal credit, the act automatically caps the potential revenue loss to the State.

Extend Bill Lee Act Credits to Insurance Company Administrative Offices. The act allows all the Bill Lee Act credits to be taken against gross premiums tax, effective beginning in the 1999 tax year. Currently, only the real property credit for central administrative offices may be taken against gross premiums tax.

In 1997, the General Assembly extended the Bill Lee Act credits to central administrative offices that created at least 40 new jobs and created a new tax credit for taxpayers that purchase or lease real property to be used as central administrative office property. In 1998, the General Assembly allowed the real property credit for central administrative offices to be taken against the gross premiums tax as well as against the income tax and the corporate franchise tax. Insurance companies pay gross premiums tax in lieu of income tax. The 1998 legislation did not change the rule that the other Bill Lee Act credits could be taken against only income tax and corporate franchise tax. The 1998 change created a situation in which insurance companies were treated differently from other businesses with respect to central administrative offices. A business, other than an insurance company, that builds a central administrative office can take against income tax not only the real property credit for that office, but also the jobs credit, the investment tax credit,

and the worker training credit. An insurance company can take against gross premiums tax only the real property credit, but not the jobs credit, the investment tax credit, or the worker training credit. By extending the other Bill Lee Act credits to gross premiums tax, the act provides uniform treatment for insurance companies and other businesses that build central administrative offices.

Quality Jobs Assurance. The purpose of the original William S. Lee Act was to provide incentives for "high quality jobs." Accordingly, only certain industries qualify for the Bill Lee Act credits and a taxpayer must meet a wage standard with respect to the jobs at the locations for which it claims a credit. This act adds three additional standards to assure that credits are allowed only with respect to high quality jobs. These standards become effective for new credits beginning January 1, 2000. First, the taxpayer must pay at least 50% of basic health insurance coverage for the full-time positions for which it takes a credit. Second, the taxpayer must certify that the business location with respect to which it claims a credit has not had a significant environmental violation in the last five years and has no pending enforcement actions for significant environmental violations. Third, the taxpayer must certify that the business location with respect to which it claims a credit has no outstanding or unresolved OSHA citations and has had no serious violation within the last three years. The Department of Environment and Natural Resources and the Department of Labor are authorized to audit the environmental and OSHA certifications, respectively, and report to the Department of Revenue if they determine that a certification was inaccurate.

Application, Fee, and Information Changes. A taxpayer that wishes to claim a Bill Lee Act credit must apply to the Department of Commerce for certification that it meets the eligibility requirements for the credit. The application must include information to enable the Department of Commerce to determine the applicant's eligibility, and be accompanied by a $75 fee to defray part of the costs of administering the program. This act requires applicants to include information necessary to enable the Department of Commerce to provide data required in its periodic reports to the General Assembly. This data will assist the General Assembly in evaluating the cost effectiveness of the Bill Lee Act credits.

The act also eliminates the $75 fee for credits claimed with respect to enterprise tier one and two counties. For other credits, the fee is increased to $500 per credit claimed, not to exceed $1,500 per taxpayer. The Department of Commerce will retain ¼ of the fee proceeds for the costs of administering the program, and remit the remaining proceeds to the Department of Revenue for its use in administering and auditing the Bill Lee Act credits. These changes became effective September 4, 1999.

The Bill Lee Act incentives recommended by the Department of Commerce over the last four years have contained many conditions and standards a taxpayer must meet in order to be eligible for the incentives. The incentives also contain what are known as "clawback" provisions, which require a taxpayer to forfeit a targeted incentive if it turns out the taxpayer did not meet the conditions for qualifying for the incentive, and to lose future installments of a tax credit if the job or investment on which the credit was based does not remain in place. This act requires taxpayers that claim Bill Lee Act credits to include with their tax returns information about whether the jobs and investments have remained in place and whether other conditions have been met. The act allows the Department of Revenue to share this information with the Employment Security Commission and the Department of Commerce; this sharing should enable the Department of Commerce to evaluate whether the incentives are accomplishing their purpose of creating high-quality jobs throughout the State.

Clarify Business Definitions and Refunds. The act clarifies the statutory definitions of the types of businesses that are eligible for the Bill Lee Act credits. In 1998, the General Assembly changed the statutory references from the Standard Industrial Classifications (SIC) to the North American Industrial Classification System (NAICS) to conform to the federal system adopted effective January 1, 1999. This system is used to classify most of the data available about industries or kinds of business in the economy. Upon review of the NAICS system, it was discovered that further terminology changes were needed to the Bill Lee Act definitions to assure that the credits would be available to the types of businesses covered by the prior law's definitions.

The act clarifies that interstate air carriers are allowed a partial refund of sales taxes paid on fuel, effective October 1, 1999. This clarification will not change the way the law is currently administered.

Research and Development Credit. The act modifies the research and development credit so that it will not automatically expire if the corresponding federal credit expires. The credit for research and development is allowed only to taxpayers that claim one of the federal research and development credits. In past years, the federal credit has expired and then been renewed retroactively, creating uncertainty for taxpayers. This act amends the State credit so that it is based on the federal credit as of January 1, 1999. Expiration of the federal credit will not affect the State credit. If the federal credit is later modified, the General Assembly can consider whether to update its cross-reference to adopt the federal modifications.

Industrial Development Fund Environmental Certification. The act requires, as a condition for funding from the Industrial Development Fund (Building Renovation Fund), that a project receives certification from the Department of Environment and Natural Resources that it will not have a significant adverse effect on the environment. This change became effective when the act became law, August 4, 1999.

Commerce to Pursue Interstate Cooperative Efforts. The act requires the Department of Commerce to encourage reasonable interstate agreements and federal legislation to control the use of excessive incentives in interstate competition in luring businesses from one state to another. The Department is to report on these efforts by March 1, 2000, and March 1, 2001.

Brownfields Property Fee Changes. Lastly, the act makes changes related to the fees collected by the Department of Environment and Natural Resources in connection with brownfields agreements, effective when the act becomes law, August 4, 1999. These changes increase the application fee from $1,000 to $2,000, and increase the agreement fee from $500 to the actual cost to the State of all activities relating to the brownfields agreement. The $2,000 application fee is a credit against the agreement fee. These sections provide that interest on fees accrues to the Department's Brownfields Account rather than to the General Fund, that unpaid fees are a lien on all of the developer's property as well as on the brownfields property, and that the Department may contract for services necessary to implement the brownfields property law.

Brownfields property is abandoned, idle, or underused property at which expansion or redevelopment is hindered by actual or possible environmental contamination and that is or may be subject to cleanup requirements under State or federal law. Under current law, the Department of Environment and Natural Resources can enter into a brownfields agreement with the owner of brownfields property, under which the owner is allowed to clean up the property to a level that will allow the property to be used for specified purposes but would not meet current cleanup standards. The owner agrees to clean up the property as specified in the agreement and to limit future uses of the property to those specified in the agreement, i.e., uses that are safe given the

less than complete cleanup of the property. This agreement benefits the State by causing a contaminated property to be at least partially cleaned up and put to productive use in place of having a "greenfield" pristine site developed. Under the agreement, the owner is relieved of liability for further cleanup of the property.

MODIFY HISTORIC REHABILITATION CREDIT

Session Law #	Bill #	Sponsor
S.L. 1999-389	**SB 251**	**Senator Horton**

AN ACT TO ALLOW THE HISTORIC REHABILITATION TAX CREDIT TO BE ALLOCATED BY A PASS-THROUGH ENTITY TO ITS OWNERS AND TO REQUIRE CORPORATIONS THAT ARE REQUIRED TO PAY FEDERAL-ESTIMATED INCOME TAX BY ELECTRONIC FUNDS TRANSFER TO PAY STATE-ESTIMATED INCOME TAX BY ELECTRONIC FUNDS TRANSFER.

OVERVIEW: This act modifies the tax credit for rehabilitating income-producing historic property and it requires corporations that are required to pay federal income tax estimated payments by electronic funds transfer (ETF) to pay State income tax estimated payments by ETF. The Revenue Laws Study Committee recommended the latter change in House Bill 62, introduced by Rep. Gray. The House Finance Committee added the provisions of House Bill 62 to this act.

FISCAL IMPACT:

- Historic Rehabilitation Tax Credit: The fiscal impact of the tax credit changes is unclear.
- Corp. Income Tax Payable by EFT: The Department of Revenue estimates an annual gain of $334,662 to the General Fund from the EFT requirement.

EFFECTIVE DATE:

- Historic Rehabilitation Tax Credit: The changes to the tax credit for rehabilitating income-producing historic property are effective for taxable years beginning on or after January 1, 1999.
- Corp. Income Tax Payable by EFT: The requirement for corporations to pay State income tax estimated payments by EFT becomes effective for taxable years beginning on or after January 1, 2000.

BACKGROUND & ANALYSIS:

Historic Rehabilitation Tax Credit. This act modifies the tax credit for rehabilitating income-producing historic property in two substantive ways and one technical way:

- It allows a pass-through entity, such as a Subchapter S corporation, to allocate the credit among any of the entity's owners, as long as the amount of credit allocated does not exceed the owner's adjusted basis in the pass-through entity. The credit amount may be allocated among any of the pass-through entity's owners, in the entity's discretion. The allocation

provision sunsets in three years. Under prior law, the credits were allocated in the same proportion as other income items allocated to the owners under the Code.

- It adds provisions to recapture the credit if the taxpayer is required to recapture the credit under the Code or if a partner or owner disposes of its interest in the pass-through entity.
- It consolidates the credits for rehabilitating an historic property into one tax Article. The credits are currently duplicated in two separate statutes in the individual and corporate parts of the income tax Article in Chapter 105.

Taxpayers are allowed an income tax credit of 20% of the expenses of rehabilitating an income-producing historic structure and a credit of 30% of the expenses of rehabilitating an historic structure that is not income-producing. The credit for income-producing structures is lower because federal law also allows a 20% credit for those expenses, yielding a combined credit of 40%. The 20% credit is allowed only if the taxpayer qualifies for the federal credit and the 30% credit is allowed only if the taxpayer does not qualify for the federal credit. The credit may not be taken for the tax year the property is placed in service but must be taken in installments over five years after the historic structure is placed in service. Any unused portion of a credit may be carried forward for a five-year period.

A pass-through entity may qualify for the rehabilitation credits and pass the credits on to its owners. A pass-through entity is an entity, such as a partnership, a limited liability company, or a Subchapter S corporation, that is treated as owned by individuals or other entities under federal tax law and whose income, losses, and credits are reported by the owners on their State income tax returns.

Under the Code, tax credits are allocated among S corporation shareholders in accordance with their pro rata share of the corporation, which is determined on the basis of stock ownership, and tax credits are allocated among partners in a partnership in accordance with the partnership agreement. The allocation made by the partnership agreement must have a substantial economic effect, which means that the allocation agreement must reflect the economic interest of the partners in the partnership and cannot be based solely on tax consequences. Therefore, the allocation agreement of partners cannot give one partner 100% of the income, loss, or credits of the partnership. Under prior North Carolina law, the pass-through entity was required to allocate a tax credit among its owners in the same proportion that other items, such as the federal rehabilitation credit, were allocated under the Code. This meant that if foreign investors were involved in a qualifying rehabilitation project, their tax credits could not be redistributed to North Carolina investors with State income tax liability.

In putting together an investment group for an income-producing historic rehabilitation project, the project sponsors may find some investors that can benefit from only the federal credit, because they have little or no North Carolina tax liability, and other investors that can benefit from both the federal and the North Carolina credit because they have both types of tax liability. This act changes the allocation of the credit to allow the maximum tax credit available for each of the project investors. It allows a pass-through entity to allocate the credit for rehabilitating an income-producing historic structure among any of its owners, as long as the amount of the allocated credit does not exceed the owner's adjusted basis in the entity, as determined under the Code. The adjusted basis is determined at the end of the taxable year in which the historic structure is placed in service. Each year an allocated credit is claimed, the pass-through entity and its owners must include a statement with their tax return that shows both the allocation made and the allocation that would otherwise have been required under G.S. 105-131.8 and G.S. 105-269.15.

G.S. 105-131.8 provides that the tax credit allowed a shareholder in a Subchapter S corporation is based on the percentage of stock held by the shareholder in the corporation. G.S. 105-269.15 provides that the tax credit allowed a partner is based on the partnership agreement, which must have substantial economic effect.

The act also requires forfeiture of all or part of the credit for an income-producing historic structure when the following occurs:

- Forfeiture for Disposition. -- When a taxpayer is required by the Code to recapture part or all of the federal credit, then the taxpayer must forfeit the corresponding part of the State credit. Under the Code, the recapture does not apply if the property is disposed of because of the death of the taxpayer, a mere change in form of doing business, or a transfer between spouses or incident to a divorce.

- Forfeiture for Change in Ownership. -- If an owner of a pass-through entity that qualified for the credit disposes of all or a portion of the owner's interest in the pass-through entity within five years after the date the structure was placed in service so that the owner's interest is reduced to less than 2/3 of its interest at the time the structure was placed in service, the owner must forfeit a portion of the credit. This recapture does not apply if the change in ownership is due to the death of the owner or to a merger or consolidation requiring approval of the members of the taxpayer pass-through entity to the extent the entity does not receive cash or property.

If a taxpayer or owner of a pass-through entity forfeits the credit, then the taxpayer or owner is liable for all past taxes avoided plus interest. The past taxes and interest are due 30 days after the credit is forfeited.

Electronic Funds Transfer. The act requires corporations that are required to pay federal income tax estimated payments by EFT to pay State income tax estimated payments by EFT, effective for taxable years beginning on or after January 1, 2000. This change in the law will eliminate thousands of returns, not payments, each year. It will enable the State to receive tax payments more quickly and thus gain three to five days of interest on the payments.

In 1993, the General Assembly authorized the Department of Revenue to collect taxes by EFT. The average tax payment must be at least $20,000 a month before the tax payment must be submitted by EFT. The $20,000 threshold applies separately to each tax. This act creates a different rule for corporate estimated income tax payments in order to increase the efficiency of State tax collections and to conform the State's method of collecting corporate estimated income tax payments with federal law so that a taxpayer has only one set of rules to learn and follow. For federal purposes, a corporation whose depository taxes exceed $200,000 in a twelve-month period must pay its corporate income tax estimated payments by EFT. The federal regulations list the different types of depository taxes. Examples of depository taxes include social security taxes, withheld income taxes, and corporate estimated income taxes. The Internal Revenue Service raised the threshold from $50,000 to $200,000 in July 1999. The higher threshold will limit the EFT requirement to the largest 9% of taxpayers, but other taxpayers are expected to use EFT voluntarily.

1999 FEE BILL

Session Law #	Bill #	Sponsor
S.L. 1999-413	HB 1289	Representative Luebke

AN ACT TO SET THE PUBLIC UTILITY REGULATORY FEES, TO SET THE INSURANCE REGULATORY CHARGE, TO IMPOSE THE INSURANCE REGULATORY CHARGE ON SERVICE CORPORATIONS AND ON HEALTH MAINTENANCE ORGANIZATIONS IN THE YEAR 2000, TO ALLOW THE DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES TO IMPOSE FEES THAT REFLECT THE ACTUAL COST OF RENDERING THE SERVICE, AND TO LIMIT THE FEE THAT AN APPLICANT MUST PAY FOR A WATER QUALITY CERTIFICATION THAT IS REQUIRED FOR A PERMIT UNDER THE COASTAL AREA MANAGEMENT ACT OF 1974.

OVERVIEW: **This act makes three tax law changes and two fee changes; only the tax law changes are summarized here. This act sets the tax rates for the public utility regulatory fee for the 1999-2000 tax year and for the insurance regulatory fee for the 1999 calendar year. The act also expands the scope of the insurance regulatory fee to include health maintenance organizations and medical service corporations, effective beginning in the 2000 calendar year.**

FISCAL IMPACT:

- Public Utility Regulatory Fee: This fee is expected to generate $8.5 million.
- NC Electric M'ship Corp.: This fee is expected to generate $200,000.
- Insurance Regulatory Fee: The fee is set at 7% for the 1999 calendar year (the 1998 rate was 6%). This charge is expected to generate $20.65 million for the 1999-2000 fiscal year (an increase of $1.45 million over the previous year). In addition, effective in 2000, health maintenance organizations (HMO's) and medical services corporations will be required to pay the fee. This requirement will generate between $2.45 million and $2.8 million. *(See Background & Analysis section for more detailed information.*

EFFECTIVE DATE:

- Public Utility Regulatory Fee: 1999-2000 tax year
- NC Electric M'ship Corp.: 1999-2000 tax year
- Insurance Regulatory Fee: 1999 calendar year;
  effective for HMOs and medical services corporations in 2000.

BACKGROUND & ANALYSIS:

Public Utility Regulatory Fee: The act sets the general rate for the public utility regulatory fee at 0.09% for the 1999-2000 fiscal year. This is the same rate that was in effect for the 1997-1998 fiscal year and is expected to generate $8.5 million. The utility regulatory fee is a tax that was first imposed in 1989. The proceeds of the fee are credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating public utilities. The regulatory fee is imposed on all utilities that are subject to regulation by the North Carolina Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenues. In general, jurisdictional revenue is revenue derived from providing utility service in North Carolina.

In addition to funding the State's cost in regulating public utilities, the money in the Utilities Commission and Public Staff Fund is currently used to finance the work of the Study Commission on the Future of Electric Service in North Carolina. The General Assembly established the Commission in 1997 to examine the cost, adequacy, availability, and pricing of electric rates and service in North Carolina to determine whether legislation is necessary to assure an adequate and reliable source of electricity and economical, fair, and equitable rates for all consumers of electricity in North Carolina.

Secondly, the act sets at $200,000 the special public utility regulatory fee imposed on the North Carolina Electric Membership Corporation, effective for the 1999-2000 fiscal year. The proceeds of the fee will be credited to the Utilities Commission and Public Staff Fund and used to defray the State's cost in regulating electric membership corporations. The 1999 General Assembly enacted S.L. 1999-180, which authorized electric membership corporations to form subsidiary corporations that may provide energy services and products, telecommunications services and products, and water and wastewater collection and treatment. The subsidiaries must fully compensate the electric membership corporation for its use of the corporation's personnel, services, equipment, and property. The Utilities Commission is charged with regulating this aspect of the subsidiary's business and, to pay for this regulation, S.L. 1999-180 levies a flat-rate regulatory fee to be paid by the North Carolina Electric Membership Corporation. The General Assembly must establish the fee amount each year. The North Carolina Electric Membership Corporation is the only electric membership corporation in North Carolina whose principal purpose is to furnish or cause to be furnished bulk electric supplies at wholesale, as provided in G.S. 117-16. It is a "generation and supply cooperative" owned by its members. Its members are all but one of the existing North Carolina electric membership corporations, which are "distribution cooperatives." Thus, the fee imposed on the North Carolina Electric Membership Corporation will be passed on to its member electric membership corporations.

Insurance Regulatory Fee: First, the act sets the insurance regulatory charge at 7% for the 1999 calendar year, an increase from the 6% rate in effect for 1998. The charge is expected to generate $20.65 million for the 1999-2000 fiscal year, an increase of $1.45 million over the previous year. The insurance regulatory charge is a tax that was enacted in 1991 to make the Department of Insurance receipt-supported and thereby eliminate General Fund support for the Department. The charge is a percentage of each insurance company's premiums tax liability.

Second, the act imposes the insurance regulatory charge on health maintenance organizations and medical service corporations, effective beginning in 2000. The fee will be levied on each company's hypothetical gross premiums tax liability determined at the 1.9% gross premiums tax rate applied to its premiums base. The hypothetical calculation is necessary because medical service corporations pay premiums tax at a rate of 0.5% rather than 1.9% and because health maintenance

organizations do not pay premiums tax. Adding health maintenance organizations and medical service corporations to the insurance regulatory charge will increase the base against which the charge is levied by $35 to $40 million. At a regulatory charge rate of 7%, this would generate $2.45 to $2.8 million in proceeds.

Prior to the enactment of this act, the insurance regulatory charge was imposed only on insurance companies that pay the gross premiums tax, other than medical service corporations such as Blue Cross Blue Shield and Delta Dental Corporation, which were exempt. Health maintenance organizations did not pay the regulatory charge because they do not pay the gross premiums tax. Prior to 1995, these entities contributed to the Department of Insurance Fund through insurance audit and examination fees. However, in 1995, the General Assembly eliminated the insurance audit and examination fees for insurance companies, health maintenance organizations, medical corporations, and guaranty associations. The revenue generated by these audit fees was an estimated $4.5 million annually. The costs of the audits are now paid for by the insurance regulatory charge as part of the costs of regulating the insurance industry. This act distributes the responsibility for funding the Department of Insurance among all the entities that it regulates.

PENSION TAX WITHHOLDING

Session Law #	Bill #	Sponsor
S.L. 1999-414	HB 1466	Representative Cansler

AN ACT TO PROVIDE FOR WITHHOLDING OF NORTH CAROLINA INCOME TAXES FROM TAXABLE PENSIONS, ANNUITIES, AND DEFERRED COMPENSATION.

OVERVIEW: This act requires a person paying pensions, annuities, and deferred compensation to withhold North Carolina individual income tax from the payments unless the recipient elects not to have the tax withheld, effective January 1, 2001. Income that is exempt from tax is exempt from this withholding requirement. Therefore, the act does not apply to federal, State, and local retirees with five years of creditable service as of August 12, 1989, because these groups are exempt from State income tax due to a court decision in the Bailey, Emory, and Patton lawsuits.

FISCAL IMPACT: Unable to determine.

EFFECTIVE DATE: Taxable years beginning on or after January 1, 2001.

BACKGROUND & ANALYSIS: Under federal law, withholding is required on pensions, annuities, and certain deferred income, including IRAs. Prior to this act, North Carolina has not piggybacked this aspect of federal law. This act provides that a pension payer required to withhold federal income tax on a pension payment to a resident of North Carolina must also withhold State income tax. A recipient may elect to not have tax withheld from the pension payment. The pension payer must notify each recipient of the right to elect not to have tax withheld. An individual who elects not to have tax withheld from the pension payment must estimate their income tax liability each year and pay the tax in four installments.

In the case of periodic payments, the pension payer must withhold as if the recipient were a married person with three exemptions, unless the recipient provides an exemption certificate

reflecting a different filing status or number of exemptions. For a non-periodic payment, the pension payer must withhold 4% of the payment. A pension payer who fails to withhold or remit the tax that is withheld is liable for the tax.

Currently, the Department of Revenue allows voluntary withholding by employers. The holder of an IRA, although not an employer, may also enter into a voluntary withholding agreement. However, if the payer withholds the tax but does not pay it to the Department of Revenue, the taxpayer's only recourse is against the payer. The Department cannot credit the taxpayer and pursue the payer. Under this act, effective for taxable years beginning on or after January 1, 2001, the withholding will be mandatory unless the recipient elects not to have the tax withheld.

UPDATE CODE/CRIMINAL DEADLINE/RESEARCH

Session Law #	Bill #	Sponsor
S.L. 1999-415	HB 1476	Representative Miller

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS, TO EARMARK PART OF THE RESULTING REVENUE GAIN FOR TAX RESEARCH, TO DIRECT THE STATE AUDITOR TO CONDUCT A PERFORMANCE AUDIT OF THE DEPARTMENT OF REVENUE, TO CONFORM TO THE FEDERAL STATUTE OF LIMITATIONS FOR WILLFUL FAILURE TO COMPLY WITH STATE TAX LAWS, AND TO INCREASE THE AMOUNT OF TIME A TAXPAYER HAS TO PROTEST THE PAYMENT OF A TAX.

OVERVIEW: **This act makes the following changes relating to tax law:**

- **Update IRC Reference.** It rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from September 1, 1998, to June 1, 1999. This change became effective August 5, 1999.
- **Conform Criminal Deadline to Federal.** It conforms the State statute of limitations, with respect to the willful failure to comply with the State's tax laws, to the federal statute of limitations. This change is effective December 1, 1999, and applies to prosecutions brought on or after the date for cases where the existing statute of limitations had not expired prior to December 1, 1999.
- **Extend Protest Period.** It increases the amount of time a taxpayer has to protest the payment of a tax from one year to three years. This change is effective for taxes paid on or after January 1, 1999.
- **Dept. of Revenue Tax Research Positions.** It earmarks part of the revenue generated by this act to pay for four new tax research positions for the Department of Revenue, as

recommended by the Revenue Laws Study Committee. This change became effective August 5, 1999.

- **Performance Audit.** It earmarks part of the revenue generated by this act for a performance audit of the Department of Revenue, to be conducted by the State Auditor, addressing technology issues, internal organization, budgeting and fiscal management, staffing, and other issues. This change became effective August 5, 1999.

FISCAL IMPACT: The Code Update is expected to increase General Fund revenues by $11.55 million in fiscal year 1999-2000, $2.95 million in fiscal year 2000-2001, $1.4 million in fiscal year 2001-2002, $900,000 in fiscal year 2002-2003, and $100,000 in fiscal year 2003-2004.

EFFECTIVE DATE: *See Overview section.*

BACKGROUND & ANALYSIS:

Update Code Reference. Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law previously tracked federal law. This update generally has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law.

Since the General Assembly updated the State's reference to the Internal Revenue Code to September 1, 1998, Congress has enacted two bills that affect the Code. On October 21, 1998, the President signed into law Public Law 105-277, which includes the Tax and Trade Relief Extension Act of 1998. On April 19, 1999, the President signed into law Public Law 106-21, which extends the tax benefits available with respect to services performed in a combat zone to services performed in the Kosovo area.

Public Law 105-277: This federal law extended the research and development credit, created or extended tax breaks aimed particularly at individuals, small businesses, and farmers, narrowed some tax exemptions, and made many technical changes. The following is a summary of some of the more significant provisions:

- It extends the research and development credit through June 30, 1999. North Carolina's credit for research and development is based upon this federal credit.

- It accelerates the deduction for health insurance costs of self-employed individuals. Self-employed individuals are entitled to deduct a portion of the amount paid for health insurance for the self-employed individual and the individual's spouse and dependents. Under prior law, the amount that could be deducted was being phased up from 45% in 1998 to 100% in 2007. Public Law 105-277 accelerated the amount that could be deducted to 60% for tax years beginning in 1999 through 2001, to 70% for tax years beginning in 2002, and to 100% for tax years beginning in 2003 and thereafter. This change will treat the self-employed the same as employees, who may exclude from income 100% of employer-provided health insurance.

- It provides a five-year net operating loss carryback for farmers, effective for net operating losses arising in taxable years beginning after December 31, 1997. A net operating loss is the amount by which business deductions exceed business gross income. Generally, a net operating loss may be carried back two years and forward 20 years to offset taxable income in such years. Public Law 105-277 created an exception for farming losses. A farming loss

is defined as the amount of any net operating loss attributable to the income and deductions of a farming business.

- It permanently extends the income averaging provision for farmers. An individual engaged in a farming business may elect to compute current year tax liability by averaging, over the prior three-year period, all or a portion of the taxable income that is attributable to the farming business. This provision would have expired for taxable years beginning on or after January 1, 2001.

- It allows a taxpayer that wins a contest, lottery, jackpot, etc., and elects to take the payment as an annuity to claim the prize winnings as income at the time they are received. Prior to the enactment of this law, a person who had the option of receiving either a lump-sum distribution or an annuity was required to include the value of the award in gross income in the year in which the prize was won, even if the annuity option was exercised.

- It permanently extends the charitable market-value deduction for contributions of qualified appreciated stock to private foundations.

- It limits specified liability losses to product liability losses and amounts allowable as a deduction that are in satisfaction of a liability under a federal or state law requiring reclamation of land, decommissioning of a nuclear power plant, dismantlement of a drilling platform, remediation of environmental contamination, or a payment under any workers compensation act. A specified liability loss may be carried back 10 years rather than being limited to the general two-year carryback period. Prior to the enactment of this law, a specified liability loss included other liabilities that arose under federal or state law or out of any tort of the taxpayer.

- It requires certain deductible liquidating distributions of a regulated investment company or real estate investment trust to an 80% corporate owner to be included in the corporation's income.

Public Law 106-21: This federal law extends the tax benefits available under the Internal Revenue Code with respect to services performed in a combat zone to services performed in a "qualified hazardous duty area". The term "qualified hazardous duty area" means any area of the Federal Republic of Yugoslavia, Albania, the Adriatic Sea, and the northern Ionian Sea during the period that any member of the Armed Forces of the United States is entitled to combat pay for services performed in the area.

Under the Code, all or most of military personnel's combat pay is exempt from income tax. Since North Carolina begins its calculation of taxable income with federal taxable income, this pay is also exempt from State income tax. The Code also extends the time military personnel and those serving in support of the military personnel have to file and pay their taxes. Public Law 106-21 extends these provisions to those individuals within the "qualified hazardous duty area" defined above and to those individuals supporting Operation Allied Force who are away from their permanent duty stations.[11] The extension lasts until 180 days after taxpayers leave the defined areas or their supporting operation, plus the number of days they were there during the tax filing season after the air strikes began on March 24, 1999. The tax relief provisions also apply during

---

[11] Operation Allied Force began on March 24, 1999, when U.S. military forces, acting with NATO allies, commenced air strikes against Serbian military targets in the Former Yugoslavia. On June 20, 1999, Operation Allied Force was officially terminated.

any period of hospitalization resulting from injuries or illness incurred while serving in the combat zone. During the extension, affected taxpayers will not accrue any interest or penalty charges and the IRS will not pursue any tax enforcement action. G.S. 105-249.2 prohibits the Secretary of Revenue from assessing interest or a penalty against a taxpayer for any period that is disregarded for federal income tax purposes.

Background for Code Update. Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code on a particular date instead of referring to the Code and any future amendments to it. The answer to the question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of many changes made in federal tax law from year to year, the State may not want to adopt automatically federal changes, particularly when these changes have a substantial impact on revenues. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Article V, Section 2(1) of the Constitution provides in pertinent part that the "power of taxation… shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would…be invalidated as an unconstitutional delegation of legislative power."

In 1997, the Revenue Laws Study Committee explored the possibility of legislation that would automatically adopt federal changes to the Code each year, with legislative review and approval required in the succeeding legislative session. It was hoped that this approach would avoid the practical difficulties that occur when Code changes go into effect many months before the General Assembly has a chance to pass legislation adopting the changes. The Attorney General's Office reviewed the relevant case law in this State and other states before concluding that this approach would be unlikely to withstand a constitutional challenge.

Conform Criminal Deadline to Federal. Under North Carolina law, it is a Class 1 misdemeanor to willfully fail to collect, withhold, or pay over taxes or to willfully fail to file a return or pay the tax due. Under prior law, the State had three years from the date of the violation to prosecute the taxpayer that violated the tax law. Under federal law, the IRS has six years from the date of the prosecution to pursue the violation. Sections 2 and 3 of this act conform the State statute of limitations to the federal statute of limitations by extending the time the State has to pursue a violation of the tax laws from three years to six years. This change is effective December 1, 1999, for cases where the three-year statute of limitations has not already expired.

Extend Protest Period. The act extends the time a taxpayer has to challenge the unconstitutionality of most taxes from one year to three years, effective for taxes paid on or after January 1, 1999. The time limit remains at 30 days for excise taxes on alcoholic beverages, soft drinks, tobacco products, and controlled substances. In North Carolina, if a taxpayer believes a

tax is unconstitutional, the taxpayer must pay the tax and contest the tax by requesting a refund after paying the tax. This procedure is known as "paying under protest".

Tax Research Positions. Upon recommendation of the Revenue Laws Study Committee, the act authorizes the Secretary of Revenue to draw funds from the revenues generated by updating the Internal Revenue Code reference to fund four tax research positions in the Department of Revenue, effective January 1, 2000. The Revenue Laws Study Committee determined that there is a need for in-depth tax research that cannot be met by the current three-person staff. Adding four new tax analyst positions would provide a tax research resource capable of serving the needs of the legislative and executive branches for analyses of various tax proposals and of the effect of changes in the economy on the tax base.

Performance Audit. The act directs the Office of the State Auditor to conduct a performance audit of the Department of Revenue, addressing the following areas: (i) tax collection and tax auditing activity, with particular attention to the cost, efficiency, and effectiveness of the Integrated Tax Administration System and subsequent automation projects; (ii) current methods of processing tax returns and payments and the ability to employ the latest technology in this processing; (iii) internal organization and management; (iv) budgeting and fiscal management; (v) current and future staffing requirements; and (vi) any other issues the State Auditor considers necessary or desirable. The State Auditor is to submit an interim progress report to the Senate and House Appropriations Subcommittee on General Government and the General Assembly's Fiscal Research Division by May 30, 2000, and a final report to the General Assembly by January 1, 2001. The Secretary of Revenue is directed to draw $100,000 from funds generated by the act to pay for the performance audit.

NO SALES TAX FEE/OTHER CHANGES

Session Law #	Bill #	Sponsor
S.L. 1999-438	SB 1112	Senator Kerr

AN ACT TO PROMOTE ELECTRONIC COMMERCE BY REPEALING THE SALES TAX REGISTRATION FEE AND TO MAKE OTHER CHANGES TO THE TAX LAWS AND RELATED STATUTES.

OVERVIEW: This act makes numerous tax law changes as described below:

- **Privilege Tax on Loan Agencies.** It reduces the annual privilege tax on loan agencies from $750.00 to $250.00. In addition, the act expands the scope of the tax to include pawnbrokers and check cashers. This change is effective July 1, 1999.
- **Repeal Sales Tax Registration Fee.** It repeals the one-time $15.00 registration fee retailers and wholesalers must pay when registering with the Department of Revenue for sales and use tax purposes. This change is effective January 1, 2000.
- **Repeal Sales Tax on Medical Equipment and Sundries.** It exempts durable medical equipment and medical sundries from sales tax. This change is effective October 1, 1999.
- **Repeal Sales Tax on Prescription Drugs.** It exempts physicians and other medical professionals who buy drugs to administer to their patients, and State hospitals (other than

UNC hospitals) from paying sales and use tax on prescription drugs. (Note: other prescription drugs, including prescriptions, drugs purchased by the UNC hospitals, drug samples distributed by the manufacturer, and drugs purchased for use in the commercial production of animals, are either exempt from sales and use tax or the tax is refundable.) This change is effective October 1, 1999.

- **Repeal Sales Tax Exemption for Traded-In Items.** It repeals the sales tax exemption for certain traded-in items. This change is effective October 1, 1999.

- **Repeal Unconstitutional Sales Tax Provisions.** It repeals two sales tax provisions that may be unconstitutional: the requirement that a nonprofit corporation must be chartered in North Carolina in order to claim an exemption from collecting sales tax on items sold as a part of an annual fundraiser, and the sales tax exemption for sales of paper, ink, and other tangible personal property to commercial printers and publishers for use in free publications that contained advertising of a general nature. Both changes are effective October 1, 1999.

- **Airport Authority Sales Tax Refunds.** It entitles all local airport authorities created by the General Assembly to receive sales tax refunds. This change is effective July 1, 1999.

- **Tax Penalty and Assessment Changes.** It makes several changes to tax penalty and assessment rules, including authorizing the Secretary of Revenue to waive bad check penalties in the same manner as other penalties are waived, and conforming the negligence penalty for large corporate income tax deficiencies with other large tax deficiencies. The tax penalty changes are effective October 1, 1999, and the assessment changes are effective August 10, 1999.

- **Special Mobile Equipment Changes.** The act allows untaxed diesel fuel to be used in special mobile equipment, effective October 1, 1999, and also allows a quarterly refund for tax paid on any taxed motor fuel used to operate special mobile equipment, effective for taxes paid on or after January 1, 1999. It also increases the registration fee for special mobile equipment from $20.00 to $40.00, effective January 1, 2000. Finally, it expands the maximum width of special mobile equipment from 96 inches to 102 inches, effective August 10, 1999.

- **Miscellaneous Tax Law Changes.** The act also makes the following minor tax law changes:

  - Political Parties Financing Fund. Requires that the individual income tax return contain a line authorizing a contribution to the Political Parties Financing Fund, effective August 10, 1999.

  - Definition of a Utility for Sales Tax Purposes. Clarifies the definition of a utility for sales tax purposes, effective August 10, 1999.

  - No Sales or Use Tax/Certain Tangible Personal Property. Provides that sales and use taxes do not apply to tangible personal property that a merchant manufactures or purchases for resale but then withdraws from inventory and donates to a governmental entity, effective October 1, 1999.

- Increase Restaurant Service Charges Not Subject to Sales Tax. Increases the amount of the service charge that may be added to a restaurant patron's bill without being subject to sales tax, effective October 1, 1999.
- Information Sharing/DOR and Law Enforcement. Authorizes the Department of Revenue to share information about excise taxes on tobacco, alcohol, and unauthorized substances with law enforcement officials, effective August 10, 1999.
- Repeal Certain Motor Fuel Tax Licenses. Repeals the requirement that bulk-end users and retailers of undyed diesel fuel obtain a motor fuel tax license, and clarifies that a motor fuel supplier is allowed a discount of the tax due only if the tax is paid on time, effective August 10, 1999. Repeals the requirement that a bonded importer of motor fuel was required to obtain an import confirmation number, effective August 10, 1999.
- DOR Authorized to Use Certain Information. Authorizes the Department of Revenue to use information in the State Directory of New Hires to administer tax collection, effective August 10, 1999.

FISCAL IMPACT: Taken as a whole, the act is expected to increase General Fund revenues by less than $1 million a year the first three years it is in effect and then reduce General Fund revenues by less than $1 million a year the next two years it is in effect.

EFFECTIVE DATE: *See Overview section.*

BACKGROUND & ANALYSIS:

Privilege Tax on Loan Agencies. Under prior law, loan agencies were subject to an annual privilege tax of $750. Effective July 1, 1999, Section 2 of this act reduces the tax to $250 a year and expands its scope to apply to pawnbrokers and check cashers. This change is expected to reduce General Fund revenues by less than $300,000 a year. Pawnbrokers and check cashers are engaged in a similar business as loan agencies; the intent of the act is that similar taxpayers should be treated the same. Earlier versions of the bill would have retained the tax at $750, but the tax was reduced in response to complaints from pawnbrokers. The privilege tax statute caps at $100 the local privilege tax that counties and towns may levy on these businesses. Under former law, counties and towns were authorized to levy a local privilege tax of up to $275 on pawnbrokers.

Repeal Sales Tax Registration Fee. Under prior law, retailers and wholesalers were required to pay a fee of $15 when registering with the Department of Revenue for sales and use tax purposes. Registration is a one-time requirement before a merchant can begin a business that is subject to sales or use tax. Sections 1 and 1.1 of this act repeal the $15 fee effective January 1, 2000. Eliminating the fee will enable the Department of Revenue to handle registrations electronically. This change is expected to reduce General Fund revenues by approximately $540,000 a year.

Repeal Sales Tax on Medical Equipment and Sundries. Section 5 of this act exempts from sales tax durable medical equipment and medical sundries that are eligible for coverage under Medicare and Medicaid, effective October 1, 1999. This change is expected to reduce General Fund revenues by approximately $700,000 a year. The new exemption applies only to items purchased on prescription or by a certificate of medical necessity. While the item must be eligible under Medicare or Medicaid, the exemption applies whether or not it is purchased by a beneficiary under those programs. Durable medical equipment includes a variety of medical items such as

wheelchairs, IV bag holders, and cane stands. Medical sundries are items that are easily and frequently disposed of, like latex gloves, gauze, medical tape, and syringes.

Repeal Sales Tax on Prescription Drugs. Sections 6 and 7 of this act exempt from sales tax all prescription drugs, effective October 1, 1999. This change is expected to reduce General Fund revenues by approximately $2 million a year. Under prior law, most prescription drugs were already either exempt from State and local sales and use taxes or refundable. The prior exemptions for prescription drugs applied to drugs purchased with a prescription (G.S. 105-164.13(13)), prescription drugs distributed free of charge by the manufacturer of the drugs (G.S. 105-164.13(13b)), and prescription drugs purchased for use in the commercial production of animals (G.S. 105-164.13(2a)). Prescription drugs distributed free of charge by the manufacturer include samples given to physicians to give to patients and drugs donated to groups such as the American Red Cross.

Most hospitals receive refunds of State and local sales and use taxes paid on prescription drugs they acquire. G.S. 105-164.14(b) allows all nonprofit hospitals, except those operated by the State, and all for-profit hospitals to receive refunds of State and local sales and use taxes paid on prescription drugs. G.S. 105-164.14(c) allows the University of North Carolina Hospitals at Chapel Hill to receive refunds of State and local sales and use taxes paid on prescription drugs acquired for use by the hospital. The State General Fund receives a refund of local sales and use taxes paid by the other State hospitals on prescription drugs.

Thus, after combining the exemptions and refunds for prescription drugs, the only entities that were paying tax on prescription drugs were physicians and other medical professionals who buy the drugs to administer to patients in the course of their practice and State hospitals, other than the UNC hospitals. The exemptions and refunds for prescription drugs had evolved over the years in a piecemeal fashion, leaving this small segment subject to the taxes.

In addition to the UNC hospitals, the State operates four psychiatric hospitals: Dorothea Dix Hospital, Broughton Hospital, Cherry Hospital, and John Umstead Hospital. The State also operates various Alcohol and Drug Treatment Centers and Mental Retardation Centers around the State. These centers are in-patient facilities similar to hospitals. State agencies generally do not receive a refund of State sales and use taxes. These agencies receive an appropriation from the State that includes the amount needed to pay sales and use taxes.

Repeal Sales Tax Exemption for Traded-in Items. Section 8 of this act simplifies the sales tax treatment of traded-in items by repealing the exemption for certain traded-in items, effective October 1, 1999. This change is expected to increase General Fund revenues by approximately $1.2 million a year. Under prior law, if a used item were traded-in on the purchase of a new item, the used item would not be subject to sales tax when it was resold if the person who traded it in paid the full amount of sales tax on the new item purchased. This law created problems for retailers who were required to retain the tax records on the new item with the used item to determine the sales tax treatment of the used item when it was resold. If the items in question were subject to a reduced tax rate, as farm equipment is, then upon resale the traded-in item would be subject to local but not State sales tax, an added complication for retailers. Under this section, traded-in items will be subject to full State and local sales tax, as other used items are.

Repeal Unconstitutional Sales Tax Provisions. Sections 9 and 10 of this act address two sales tax provisions that are probably unconstitutional. Under prior law, certain nonprofit corporations were not required to collect sales taxes on items sold as part of an annual fundraiser. To qualify for the exemption, the corporation was required to have been chartered in North Carolina for two

years. This classification does not have a rational basis and thus probably violated the uniformity requirements of the constitution. Section 9 of this act repeals the requirement that the corporation be chartered in North Carolina, effective October 1, 1999. This change is expected to have a negligible impact on General Fund revenues.

Prior law granted a sales tax exemption for sales of paper, ink, and other tangible personal property to commercial printers and publishers for use as component parts in free circulation publications that contained advertising of a general nature. The exemption applied to general shoppers guides but not to more specialized guides, such as real estate guides. The first amendment of the United States Constitution does not allow a state to discriminate between publications based on their content. The prior law exemption clearly violated this rule by exempting guides with general content but not those with narrower content. Section 10 of this act repeals the exemption, effective October 1, 1999, so that supplies sold for all free publications will be subject to tax on a uniform basis. This change is expected to increase General Fund revenues by approximately $2.5 million a year.

Airport Authority Sales Tax Refunds. Under prior law, a local airport authority created by local act of the General Assembly was entitled to an annual refund of sales and use taxes it paid if the local act creating it gave it all the rights of a municipality, declared it to be a municipality, or specifically authorized it to receive sales tax refunds. Section 14 of this act expands the refunds to all local airport authorities created by the General Assembly, effective for purchases made on or after July 1, 1999. This change is expected to reduce General Fund revenues by between $4,000 and $18,000 a year.

Under prior law, 24 of the 33 local airport authorities were authorized to receive the sales tax refunds. Each year, local bills would be introduced to grant refunds for additional airport authorities. Two were added in 1999 by S.L. 1999-104. Because there appeared to be no reason to distinguish between those authorities entitled to refunds and those not entitled to refunds, Section 14 provides that all local airport authorities will be treated alike and local bills will no longer be necessary to add airport authorities one by one to the refund provision.

The refunds apply to direct purchases of tangible personal property. They also apply to sales and use tax liability indirectly incurred by a local airport authority on building materials, supplies, fixtures, and equipment that become a part of any building that is owned or leased by the authority and is being built, altered, or repaired for use by the authority. To obtain a sales and use tax refund, an authority must request the refund in writing within six months after the end of its fiscal year. The request must include any information and documentation required by the Secretary of Revenue.

Tax Penalty and Assessment Changes. Sections 15, 16, 17, and 19 of this act make changes in tax penalties and tax assessment rules. The tax penalty changes are effective October 1, 1999, and the assessment changes are effective August 10, 1999. No estimate is available of the impact these changes will have on General Fund revenues.

Under prior law, the Secretary of Revenue was permitted to waive all tax penalties except the penalty for bad checks. The exception had been made at the request of the Department of Revenue to reduce the administrative burden of having to consider and act on waiver requests with respect to bad checks. Sections 15 and 17 repeal the exception for the bad check penalty, so that all tax penalties will be subject to the same waiver authority. This change is not expected to have a significant impact on General Fund revenues. The penalty for bad checks is 10% of the amount of the check, with a minimum of $1 and a maximum of $1,000.

Under prior law, there were three general categories of negligence penalties: a general negligence penalty of 10% and two large tax deficiency penalties of 25%. The large negligence penalty applied to income tax only if the taxpayer understated taxable income by an amount equal to ¼ or more of gross income. The large negligence penalty applied to other taxes if the taxpayer understated tax liability by ¼ or more. The large deficiency test for income taxes is more forgiving than the stricter large deficiency test for other taxes. Section 16 of this act, requested by the Department of Revenue, limits the more forgiving large deficiency test to individual incomes taxes and moves corporate income taxes to the stricter large deficiency test that applies to other taxes.

The authority of the Department of Revenue to assess taxes and to make refunds of taxes is subject to statutory time limitations. Under prior law, a taxpayer that is under investigation by the Department of Revenue could voluntarily waive the time limit for assessments in order to allow time for the investigation to be completed properly. The time limit for making refunds could not be extended, however. Thus, if the additional investigation to which the taxpayer agreed showed that a refund, rather than an assessment, was appropriate, the refund could not be made. Section 19 of this act, requested by the Department of Revenue, modifies the tax refund time limitations to state that the taxpayer's extension of the assessment time limits automatically extends the time in which the taxpayer can request a refund.

Special Mobile Equipment Changes. Sections 22, 24, and 27 through 29 of this act make changes related to special mobile equipment. Special mobile equipment is a vehicle that has a permanently attached crane, mill, ditch-digging apparatus, or similar attachment. The vehicle is driven on the highway only to get to and from a non-highway job. It is not designed or used primarily for the transportation of persons or property.

Sections 22, 24, and 27 address a problem relating to motor fuel tax. The motor fuel tax is designed to apply only to fuel used for highway purposes. Motor fuel used for non-highway purposes is instead subject to sales tax. Thus, special mobile equipment should not have to pay motor fuel tax on the fuel it uses for non-highway purposes. However, under prior law, it could not use dyed (untaxed) diesel fuel and was not authorized to receive a refund of motor fuel tax paid on clear (taxed) diesel fuel. Section 22 of this act provides that dyed (untaxed) diesel fuel may be used in special mobile equipment, effective October 1, 1999. Section 24 of this act allows a quarterly refund for tax paid on motor fuel used to operate special mobile equipment off-highway, effective for taxes paid on or after January 1, 1999. As a result of these changes, the motor fuel used in special mobile will be subject to sales tax rather than motor fuel tax. This change will result in a small but unknown reduction in Highway Fund revenues and a corresponding increase in General Fund revenues. Section 27 of this act increases the registration fee for special mobile equipment from $20 to $40, effective January 1, 2000. This increase should generate about $40,000 or more in annual Highway Fund revenues to offset the decrease that will result from the motor fuel tax changes in Sections 22 and 24.

Section 28 of this act expands the maximum width of special mobile equipment from 96 inches to 102 inches. Section 29 of this act provides that vehicles being towed by special mobile equipment may carry property that does not exceed the weight of the towed vehicle. These sections, effective August 10, 1999, conform the law to reflect prevailing practices with regard to special mobile equipment.

Miscellaneous Changes. The remaining sections of this act make minor changes to various tax law statutes.

- Political Parties Financing Fund. The law requires that the individual income tax return contain a line authorizing a contribution to the Political Parties Financing Fund. Section 3 of this act removes the requirement that the line be color-contrasted with the color scheme of the remainder of the return. Beginning next year, income tax returns will have a uniform ink color for purposes of optical character reading. With the implementation of optical character reading, the color contrast requirement is not compatible with efficient processing of the millions of tax returns filed each year because the contrast color would interfere with recognition of the proper fields.

- Definition of a Utility for Sales Tax Purposes. Sections 4 and 12 clarify the definition of a utility for sales tax purposes. Under prior law, the definition contained a sales exemption for municipalities that are supplied electricity by the federal government and are required to make payments in lieu of taxes. These sections move the exemption from the definition statutes to the exemption statutes. Under prior law, the definition included electric power companies subject to the gross receipts tax under G.S. 105-116. In anticipation of a possible rewrite of the gross receipts tax statutes as part of deregulation, these sections remove the cross-reference to the gross receipts tax and clarify that all sellers of electric power are considered utilities for sales tax purposes.

- No Sales or Use Tax/Certain Tangible Personal Property. Section 11 of this act provides that sales and use taxes do not apply to tangible personal property that a merchant manufactures or purchases for resale but then withdraws from inventory and donates to a governmental entity, effective October 1, 1999. This change is not expected to have significant impact on General Fund revenues. The prior law granted a tax exemption only for property donated to a nonprofit organization. In some cases, merchants donate property to schools or other governmental entities; this change allows these donations to benefit from the same sales tax exemption as donations to nonprofits. A wholesale merchant or retailer does not pay sales or use taxes when purchasing the products or the ingredients used to manufacture the products because the products are to be resold. Sales and use taxes do not apply to property purchased for resale or ingredients purchased to manufacture products for resale. If the wholesale merchant or retailer chooses not to sell the goods, the wholesale merchant or retailer becomes liable for use tax on the goods because the resale exemption no longer applies. Without these specific exemptions for donations, a merchant who donates to charity would become liable for sales and use tax.

- Increase Restaurant Services Charges Not Subject to Sales Tax. Section 13 of this act increases the amount of the service charge that may be added to a restaurant patron's bill without being subject to sales tax, effective October 1, 1999. Under prior law, sales tax applied to a service charge added to the sales price of food and beverages unless the service charge (1) did not exceed 15%, (2) was stated separately on the menu and the bill, and (3) was turned over to the personnel who served the meals. This section increases the maximum percentage of the service charge from 15% to 20%, to reflect the current practice in some restaurants. If the three conditions are met, the service charge is considered a tip and is not part of the sales price for sales tax purposes.

- Information Sharing/DOR and Law Enforcement. Section 18 of this act amends the tax secrecy law effective August 10, 1999, to allow the Department of Revenue to share with law enforcement agencies information about the tobacco products excise taxes, alcoholic beverages excise taxes, and unauthorized substances excise taxes, when this information

is needed to fulfill a duty imposed on the Department of Revenue or on the law enforcement agency. The Department of Revenue works closely with law enforcement agencies to enforce the excise taxes on controlled substances and illicit liquor.

- Repeal Certain Motor Fuel Tax Licenses. Sections 20 and 21 of this act repeal the requirement that bulk end users and retailers of undyed diesel fuel get a motor fuel tax license, effective August 10, 1999. The licenses are not necessary because the Department of Revenue can obtain the same information from the Department of Agriculture and Consumer Services. Because there was no fee for these licenses, their repeal will have no fiscal impact.

  A motor fuel supplier that files a timely motor fuel tax return is allowed a discount of 0.1% of the tax due, not to exceed $8,000 a month, to cover the supplier's expenses incurred in collecting the motor fuel tax. Section 23 of this act clarifies that the discount is allowed only if the tax is paid on time, effective August 10, 1999.

  Under prior law, a bonded importer of motor fuel was required to obtain an import confirmation number using a transport truck to import fuel obtained from a supplier that is not a trustee for remittance of the motor fuel tax to the State on behalf of the importer. Section 25 of this act repeals this requirement effective August 10, 1999. The Department of Revenue requested this change, which is not expected to have any fiscal impact. The Department determined that the import confirmation number was not necessary because there are very few bonded importers in this category and the suppliers from whom they obtain the fuel have been collecting the tax and remitting it to the Department.

- DOR Authorized to Use State Directory of New Hires. Section 30 of this act allows the Department of Revenue to use information in the State Directory of New Hires for the purpose of administering the taxes it has a duty to collect. The State Directory of New Hires was established in 1997 to assist in the location of persons owing child support. The Department of Health and Human Services maintains the Directory. Every employer in the State must report to the Directory the hiring of every employee for whom a federal W-4 form is required to be completed. The report must contain the name, address, and social security number of the newly hired employee and the name, address, and federal and State tax ID numbers of the employer. This section became effective August 10, 1999.

TAX LIEN ADVERTISEMENT & COLLECTION

Session Law #	Bill #	Sponsor
S.L. 1999-439	**HB 120**	**Representative Owens**

AN ACT TO IMPROVE THE PROCEDURES FOR NOTIFYING OWNERS AND ADVERTISING TAX LIENS ON REAL PROPERTY.

OVERVIEW: This act makes the following changes relating to property tax collection, effective January 1, 2001:

- In the case of real property that the owner transferred after the January 1 visitation date, the taxing unit's newspaper advertisement of tax liens for delinquent taxes must be in the name of the person to whom the property was transferred.
- Before the newspaper advertisement is published, the tax collector must mail a notice to the listing owner and, if the listing owner has transferred the property after the visitation date, to the person to whom the property was transferred.
- It allows the taxing unit to begin in rem foreclosure proceedings 30 days after the tax liens are advertised, rather than waiting six months as required under prior law.

FISCAL IMPACT: Small, one-time impact on the costs of county operations.

EFFECTIVE DATE: January 1, 2001.

BACKGROUND & ANALYSIS: Property must be listed for property tax in January of each year. The listing owner is the taxpayer who owned the property as of January 1 (the visitation date). The listing owner is liable for property taxes for the fiscal year beginning July 1 following the visitation date, even if the property is transferred to another person after the visitation date. The taxes become due in September and become delinquent on January 6 of the following year. Although most counties send tax listing notices and tax bills to the taxpayer, they are not required by law to do so. Property owners are charged with notice that they must list their property for taxes and pay the taxes; otherwise, enforcement measures will be taken against the property. The legal effect of this law is to prevent a taxpayer from using lack of notice as an excuse for not paying property taxes or as a defense to a collection remedy against the property.

If property taxes remain unpaid by February of the fiscal year in which they become due, the taxing unit (a county, city, or taxing district) is required by statute to order the tax collector to advertise the tax liens in a local newspaper under the name of the listing owner. This act provides that the tax collector must send a notice of the amount of the tax liens by first class mail at least 30 days before the tax lien advertisement is to be published. The notice must go to the person who listed the property (the listing owner) and, if the property was transferred during the one-year period beginning on the January 1 visitation date preceding the fiscal year in which the taxes become due, also to the person to whom the property was transferred (the record owner).

This act also changes the content of the tax lien advertisement. Under prior law, the advertisements contained the listing owners' names followed by a description of the property and the amount of delinquent tax due. This act provides that each parcel's tax lien will be noted under the record owner's name rather than the listing owner's name if the property was transferred after the January 1 visitation date preceding the fiscal year the taxes become due.

If delinquent property taxes remain unpaid after the advertisement of the tax lien, the tax collector may begin an in rem foreclosure proceeding against the property. Under prior law, the tax collector was required to wait six months after the advertisement before foreclosing. The earliest tax liens can be advertised is March; therefore, September was the earliest an in rem foreclosure proceeding could be initiated. Because a local government's fiscal year begins July 1, the collection of property taxes through an in rem foreclosure proceeding could not begin until the succeeding fiscal year after the taxes are due. This act allows the tax collector to initiate an in rem foreclosure proceeding as early as 30 days after the tax liens were advertised. This change enables collectors to collect the taxes in the fiscal year in which they are due.

REGIONAL TRANSPORTATION AUTHORITY AMENDMENTS

Session Law #	Bill #	Sponsor
S.L. 1999-445	HB 937	Representative Gray

AN ACT TO AMEND THE REGIONAL TRANSPORTATION AUTHORITY ACT CONCERNING JURISDICTION OF THE ENTIRE AREA OF THE COUNTY IN CERTAIN CIRCUMSTANCES AND MEMBERSHIP OF THE AUTHORITY, AND TO AUTHORIZE THE AUTHORITY TO CREATE SPECIAL TAX DISTRICTS WITHIN ITS JURISDICTION.

OVERVIEW: **The act makes the following three changes affecting regional transportation authorities:**

- **Jurisdiction of Piedmont Authority for Regional Transportation.** It expands the jurisdiction of a regional transportation authority (Piedmont Authority for Regional Transportation) to include the entire area of any county that has a member of its board of commissioners serving on the authority's board of trustees.
- **Membership of Piedmont Authority for Regional Transportation.** It expands the board of a regional transportation authority (Piedmont Authority for Regional Transportation) to include the chair of the airport authorities of the two most populous counties within the authority's jurisdiction.
- **Special Tax Districts.** It provides that a regional transportation authority (the Piedmont Authority for Regional Transportation) may create special tax districts consisting of one or more entire counties within the authority's jurisdiction and may levy its taxes within the special districts to the extent the taxes have not already been levied throughout the entire jurisdiction of the authority. The authority may not levy or increase a tax within the special district unless the board of commissioners of each county in the special district has adopted a resolution approving the levy or increase.

FISCAL IMPACT: The above changes affect only local revenues.

EFFECTIVE DATE: August 10, 1999.

BACKGROUND & ANALYSIS: In 1997, the General Assembly enacted S.L. 1997-417, which authorized a regional transit authority to levy a gross receipts tax of up to 5% on retailers within the region engaged in the business of renting passenger motor vehicles and motorcycles. The tax was expanded by S.L. 1999-452 to include property-hauling vehicles under 7,000 pounds. The tax applies only to short-term rentals, i.e., rentals for a period of less than one year. The tax is collected by the authority but is otherwise administered in the same way as the optional highway use tax on gross receipts from vehicle rentals. This optional highway use tax is 8% on short-term rentals, so the combined tax within the jurisdiction of the authority would be 13% if the authority levies the full 5%. Each authority may use the proceeds of the tax for its public transportation purposes.

Before levying or increasing the tax, the authority must obtain approval from each county in the region.

A regional transit authority is a regional public transportation authority created under Article 26 of Chapter 160A of the General Statutes or a regional transportation authority created under Article 27 of Chapter 160A of the General Statutes. The authority created under Article 26 is the Triangle Transit Authority for Wake, Durham, and Orange Counties. The Authority created under Article 27 is the Piedmont Authority for Regional Transportation, which serves Forsyth, Guilford, Randolph, Davidson, and Alamance Counties.

The 1997 law also authorized the Piedmont Authority for Regional Transportation and any multi-county public transportation authorities organized under pre-existing law to levy a $5 vehicle registration tax identical to the tax already authorized for, and levied by, the existing Triangle Transit Authority. A public transportation authority is an entity created by one or more local government entities under Article 25 of Chapter 160A of the General Statutes to provide public transportation. There are three multi-county public transportation authorities. The Choanoke Public Transportation Authority consists of Bertie, Halifax, Hertford, and Northampton Counties. The Kerr Area Transportation Authority consists of Franklin, Granville, Person, Vance, and Warren Counties. The Inter-County Public Transportation Authority consists of Camden, Chowan, Currituck, Pasquotank, and Perquimans Counties.

An authority must obtain the approval of each county within its jurisdiction before it can levy the $5 vehicle registration tax. The Division of Motor Vehicles will collect the tax in counties that are entirely located within the authority's jurisdiction. If the authority's jurisdiction includes just part of one or more counties, the authority will collect the registration tax in those parts of counties. The authority may contract with local governments to collect this tax.

Jurisdiction of Piedmont Authority for Regional Transportation. Under prior law, the jurisdiction of a regional transportation authority created under Article 27 of Chapter 160A of the General Statutes (the Piedmont Authority for Regional Transportation) included all or part of five contiguous counties whose boards of commissioners have representatives on the board of trustees, and included parts of other contiguous counties if the boards of commissioners of the affected counties consented by resolution. The authority's board of trustees could choose to add a member of the affected county's board of commissioners to the board of trustees. Section 1 of the act provides that if a member of an affected county's board of commissioners has been added to the authority's board of trustees, the authority's jurisdiction includes the entire area of the county. By expanding the jurisdiction of an authority, this change expands the authority's taxing power.

Membership of Piedmont Authority for Regional Transportation. The act expands the membership of a regional transportation authority created under Article 27 of Chapter 160A of the General Statutes (the Piedmont Authority for Regional Transportation) to include the chair of the principal airport authority or airport commission of each of the two most populous counties within the authorities jurisdiction. In the case of the Piedmont Authority for Regional Transportation, this means the chair of the Forsyth County Airport Commission and the chair of the Piedmont Triad Airport Authority.

Special Tax Districts. A regional transportation authority (either the Triangle Transit Authority or the Piedmont Authority for Regional Transportation) may levy within its jurisdiction the vehicle rental tax of up to 5% and the vehicle registration tax of up to $5, as described above. The act provides that if a regional transportation authority created under Article 27 of Chapter

160A of the General Statutes (the Piedmont Authority for Regional Transportation) has not levied either tax up to the maximum rate, it may create a special tax district within its jurisdiction consisting of the entire area of one or more counties. The authority may levy within the special tax district the balance of either or both taxes, up to their maximum rates. The proceeds of a tax levied within a special tax district may be used only for public transportation purposes for the benefit of the special district. The levy and administration of a tax within a special district, like that of a tax within the entire jurisdiction of the authority, may not be levied unless there is a public hearing and each county in the special district has approved the tax. In addition, the authority may not levy or increase a tax within the special district unless the board of commissioners of each county in the special district has adopted a resolution approving the levy or increase.

MOTOR VEHICLE TECHNICAL AMENDMENTS

Session Law #	Bill #	Sponsor
S.L. 1999-452	**HB 280**	**Representative Cole**

AN ACT TO MAKE TECHNICAL, CLARIFYING, AND OTHER CHANGES TO THE MOTOR VEHICLE LAWS.

OVERVIEW: **This act makes numerous changes to the motor vehicle laws and two changes to the tax laws. The tax law changes are:**

- **Transit Authority Vehicle Rental Tax.** An expansion of the scope of the transit authority vehicle rental tax to include more types of vehicles.
- **DOR to Share Motor Fuel Tax Information.** An expansion of the Department of Revenue's authority to share motor fuel tax information to help in collecting motor fuel taxes.

FISCAL IMPACT: Insignificant impact.

EFFECTIVE DATE: October 1, 1999.

BACKGROUND & ANALYSIS:

Transit Authority Vehicle Rental Tax. Sections 26 through 28 of this act broaden the scope of the transit authority vehicle leasing tax to include certain property-hauling vehicles, effective October 1, 1999. A regional transit authority may levy a gross receipts tax on a retailer who leases or rents vehicles. The tax rate may not exceed 5% of the gross receipts derived from the short-term (less than 365 continuous days) lease or rental of the vehicles. This tax is added to the lease or rental price and paid by the lessee. This act broadens the scope of this tax from its current scope (U-drive-it passenger vehicles and motorcycles) to include U-drive-it property-hauling vehicles as well. A U-drive-it vehicle is defined in G.S. 20-4.01 as any of the following rented to a person who will operate it: a motorcycle; a property hauling vehicle under 7,000 pounds rented for a term of less than one year (and not hauling products for hire); and a private passenger vehicle rented for a term of less than one year (and not rented to public schools for driver training instruction).

A regional transit authority is a regional public transportation authority created under Article 26 of Chapter 160A of the General Statutes or a regional transportation authority created under Article 27 of Chapter 160A of the General Statutes. The authority created under Article 26 is the

Triangle Transit Authority for Wake, Durham, and Orange Counties. The Authority created under Article 27 is the Piedmont Authority for Regional Transportation, which serves Forsyth, Guilford, Randolph, Davidson, and Alamance Counties.

DOR Authorized to Share Motor Fuel Tax Information. The tax secrecy law authorizes the Department of Revenue to exchange taxpayer information with the Division of Motor Vehicles to the extent necessary for these agencies to fulfill their duties. Section 28.1 of this act amends this provision to allow the Department of Revenue to exchange information with the International Fuel Tax Association, Inc., as well, effective October 1, 1999. The International Fuel Tax Association is a nonprofit, membership organization whose mission is to provide oversight, planning, and coordination of activities necessary to promote uniform administration of the International Fuel Tax Agreement (IFTA). The IFTA is an agreement between member taxing jurisdictions to assist each other in the collection and administration of taxes paid by interstate motor carriers on their use of motor fuel. These taxes are frequently referred to as road taxes or highway use taxes and are not to be confused with the motor vehicle titling tax enacted in 1989 that is also referred to as a highway use tax. The road tax is a tax on the amount of fuel a motor carrier uses in its operations in a state. The tax is at the same rate as the state's per-gallon excise tax on motor fuel and a credit is given for excise taxes paid to the state on motor fuel. Thus, the purpose of the tax is to tax motor carriers who drive in a state using fuel purchased in another state.

Under the IFTA, a motor carrier declares one member jurisdiction to be the carrier's base jurisdiction for registering the carrier's vehicles for purposes of the road taxes and reporting the taxes due to all the member jurisdictions. The base jurisdiction then collects the road taxes payable by the motor carrier to every member jurisdiction and remits the taxes collected to the appropriate jurisdictions. By centralizing the payment and collection of road taxes, the agreement greatly simplifies the payment of road taxes by motor carriers and the collection of road taxes by the member jurisdictions.

MUNICIPAL INCORPORATION PROCESS

Session Law #	Bill #	Sponsor
S.L. 1999-458	HB 964	Representative Jarrell

AN ACT TO REVISE THE MUNICIPAL INCORPORATION PROCESS SO AS TO PROVIDE MORE SCRUTINY.

OVERVIEW: This act makes four changes to the municipal incorporation process:

- **Changes to Criteria for Municipal Incorporation.**
    - It requires that a petition filed with the Joint Legislative Commission on Municipal Incorporations contain a statement that the proposed municipality will have a budget ordinance with a property tax levy of at least five cents per $100.00 valuation upon all taxable property within its corporate limits and that the proposed municipality will offer four municipal services no later than the first day of the third fiscal year following the date of incorporation. This change applies to

municipalities for which the Commission makes recommendations on or after August 13, 1999.

- It changes the criteria for incorporation that the Joint Legislative Commission on Municipal Incorporations considers when making its recommendation to the General Assembly on whether an area should be allowed to incorporate. Among these changes is the repeal of the development criteria in G.S. 120-169.1(a). This repeal is effective August 13, 1999.

- **Distribution of State-Shared Revenues and Local Sales Tax Revenues.**
  - It provides that a municipality, incorporated on or after January 1, 2000, may not receive local sales tax revenues or State-shared tax revenues unless it levies a property tax at a rate of at least five cents per $100.00 valuation upon all taxable property within its corporate limits, collects at least 50% of the property tax due, and provides at least four municipal services.
  - It provides that a municipality, incorporated on or after January 1, 2000, may not receive State-shared revenues or local sales tax revenues unless a majority of the mileage of its streets is open to the public.

The above changes, other than the repeal of the criteria for incorporation in G.S. 120-169.1(a), do not apply to any community that first filed a petition with the Joint Legislative Commission on Municipal Incorporations before July 20, 1999. These changes also do not apply to the Community of Gray's Creek in Cumberland County nor to the Community of Union Cross in Forsyth County if either community files a petition with the Commission before July 1, 2002.

FISCAL IMPACT: Unable to determine.

EFFECTIVE DATE: *See Overview section.*

BACKGROUND & ANALYSIS: In 1985, the General Assembly created the Joint Legislative Commission on Municipal Incorporations.[12] Although a municipality does not need the recommendation of the Commission to be incorporated, it is highly encouraged. Also Rule 35.1 of the permanent rules of the Regular Sessions of the House of Representatives of the 1999 General Assembly requires that a municipality seeking incorporation have an assessment report from the Commission before the House of Representatives may consider it.

Criteria for Municipal Incorporation. Prior to this act the Commission was required to give the proposed area to be incorporated a positive recommendation if the area met all of the following criteria:

- Petition requirements and notice requirements have been met.
- The proposed municipality is not located within one mile of a city of 5,000 to 9,999; within three miles of a city of 10,000 to 24,999; within four miles of a city of 25,000 to 49,999; or within five miles of a city of 50,000 or more. G.S. 120-166(b) sets out four exceptions to this requirement.
- The proposed municipality has a permanent population of at least 100.

[12] This Commission consists of two senators, two House members, one city manager or elected city official, and one county commissioner or county manager. (G.S. 120-158)

- At least 40% of the area is developed for residential, commercial, industrial, institutional, or governmental uses, or is dedicated as open space. This requirement does not apply if the entire proposed municipality is within two miles of the Atlantic Ocean, Albemarle Sound, or Pamlico Sound.
- None of the proposed municipality is located within an existing municipality.
- The proposed municipality can provide at a reasonable tax rate the services requested by the petition and also can provide at a reasonable tax rate the types of services usually provided by similar municipalities.
- The proposed municipality plans to provide at least two municipal services.

The act changes the above criteria for municipal incorporation as follows:

- It adds a new requirement that the proposed municipality have a proposed budget ordinance with a property tax rate of at least five cents per $100.00 valuation upon all taxable property within its corporate limits. This change applies to municipalities for which the Commission makes recommendations on or after August 13, 1999.
- It increases the number of services the proposed municipality must plan to provide from two to four. These services must be provided within the third fiscal year of incorporation. The types of services the municipality can offer include police protection, fire protection, solid waste collection or disposal, water distribution, street maintenance, street construction, street lighting, and zoning. This change applies to municipalities for which the Commission makes recommendations on or after August 13, 1999.
- It adds a requirement that the proposed municipality must have a population density of at least 250 persons per square mile. This is in addition to the pre-existing requirement of a permanent population of at least 100 persons. This change does not apply to any community that first filed a petition with the Commission before July 20, 1999.
- It removes the exception from the requirement that at least 40% of the area be developed for urban uses or dedicated as open space. This exception applied to a proposed municipality located within two miles of the Atlantic Ocean, Albemarle Sound, or Pamlico Sound. This change does not apply to any community that first filed a petition with the Commission before July 20, 1999.
- It repeals the development criteria set out in G.S. 120-169.1(a) of the General Statutes because it was in conflict with a pre-existing requirement for municipal incorporation. G.S. 120-169.1(a), enacted by the General Assembly in 1998, prohibited the Commission from making a positive recommendation on the proposed incorporation, unless the entire area met the development criteria for involuntary annexation set out in G.S. 160A-36(c) or G.S. 160A-48(c) of the General Statutes. These two sections of Chapter 160A required a higher percentage of urban use in the proposed municipality than the pre-existing requirement of 40% in G.S. 120-168. The repeal of G.S. 120-169.1(a) became effective August 13, 1999.
- It adds a requirement that the Commission must include in its report the impact on other municipalities and counties of the diversion of already levied local taxes and State-shared revenues to support services in the proposed municipality. This requirement does not

apply to any community that first filed a petition with the Commission before July 20, 1999.

Distribution of State-Shared Revenues and Local Sales Tax Revenues. Cities receive the following State-shared taxes: the franchise tax in Article 3 of Chapter 105 on telephone companies, electric power companies, natural gas companies, and regional natural gas districts; the tax on motor fuel and alternative fuel in Articles 36C and 36D of Chapter 105; and the excise tax on malt beverages and wine in Part 4 of Article 26 of Chapter 105. Together these taxes contribute 10% to 25% of a city's general fund revenue. Under prior law, a municipality did not need to meet any conditions to receive local sales tax distributions. However, to receive motor fuel and alternative fuel tax revenue, known as Powell Bill funds, a municipality had to meet the following conditions:

- It has levied a pro[13]perty tax for the current fiscal year of at least five cents per $100.00 valuation upon all taxable property within its corporate limits.
- It has actually collected at least 50% of the total property tax levied for the preceding fiscal year.
- It has adopted a budget ordinance showing revenue received from all sources and showing that funds have been appropriated for at least two of the following services: water, wastewater, garbage collection, fire protection, police protection, street maintenance, or street lighting.

Pursuant to G.S. 136-41.1, the Powell Bill funds are allocated to municipalities based upon the municipality's population and the municipality's mileage of public streets that are not part of the State highway system. A municipality may use Powell Bill funds only for the purpose of maintaining, repairing, constructing, reconstructing, or widening public streets.

Effective for municipalities incorporated on or after January 1, 2000, the act increases the number of services a municipality must offer from two to four in order to receive Powell Bill funds. It also places the same conditions on the other State-shared revenues as well as on local sales tax distributions. Therefore, for a municipality incorporated on or after January 1, 2000, to receive franchise tax revenues, malt beverage and wine tax revenues, and local sales tax revenues, it must meet all of the following conditions:

- It levies a property tax of at least five cents per $100.00 valuation.
- It collected at least 50% of the total property tax levied for the preceding fiscal year.
- Its adopted budget ordinance shows that funds have been appropriated for at least four of the following services – police protection, fire protection, solid waste collection, water distribution, street maintenance, street construction, street lighting, and zoning.

The act further bars the distribution of revenue to municipalities that do not have public streets. Effective for distributions of State-shared revenues and local sales tax revenues made on or after July 1, 1999, a municipality incorporated on or after January 1, 2000, may not receive State-shared revenues or local sales tax revenues, unless a majority of the mileage of its streets are open to the public. In recent years at least two municipalities have been incorporated that do not have streets open to the public. They are Grandfather Village in Avery County (S.L. 1987-419) and the newly

[13]

incorporated Bermuda Run in Davie County (S.L. 1999-94). Since these two municipalities were incorporated before January 1, 2000, this restriction would not apply.

1998 Tax Law Changes

Prepared by Cindy Avrette, Martha H. Harris, and Martha K. Walston

S.L. 1998-1 Extra Session (Senate Bill 2, Senator Rand)

AN ACT TO ESTABLISH THE HEALTH INSURANCE PROGRAM FOR CHILDREN AND TO AUTHORIZE A TAX CREDIT FOR CERTAIN PURCHASERS OF DEPENDENT HEALTH INSURANCE.

Section 5 of this act creates a refundable individual income tax credit for certain taxpayers who purchase health insurance for their dependent children. The credit is equal to $300 for those taxpayers with incomes below 225% of the Federal Poverty Level and $100 for those taxpayers above the 225% threshold. Taxpayers who have their health insurance premiums deducted from their income before it is taxed do not qualify for the credit. Taxpayers whose adjusted gross income is higher than the threshold amount set by the act do not qualify for the credit. The threshold amount for married filing jointly is $100,000 and the threshold amount for head of household is $80,000. The credit is effective for taxable years beginning on or after January 1, 1999, and it expires on the effective date of an act repealing the Health Insurance Program for Children established by this act. It is estimated that the tax credit will produce a General Fund revenue loss of $64.5 million in FY 1999-2000.

Governor Hunt convened the General Assembly in an extra session beginning March 24, 1998, to address the issue of uninsured children. In 1998, there were more than 71,000 uninsured children in North Carolina whose parents made too much money to qualify for Medicaid but who could not afford to purchase health insurance for their children. Under Title XXI of the Social Security Act, North Carolina had the opportunity to receive $79.9 million in federal money in order to provide health care for children if the State established a Health Insurance Program for Children that met federal guidelines.

This act establishes a Health Insurance Program for Children. To be eligible for the program, the person must be ineligible for other government-sponsored health insurance, be under the age of 19 and enrolled in school, be uninsured for six months prior to application, be in a family that meets the income requirements, be a State resident, and pay the required premium amount. The premium amounts vary depending upon the family's income from zero to $5 per child per month with a $15 per month family unit cap to $10 per child per month with a $28 per month family unit cap. A family who loses coverage under the Program due to an increase in income may purchase extended coverage through the Program for one year by paying the full premium costs.

In addition to creating a Health Insurance Program for Children, the General Assembly enacted a tax credit for taxpayers who purchase health insurance for their children to help bridge the gap between assisted health insurance costs under the Health Insurance Program and unassisted health insurance costs as a family begins earning too much income to qualify for the Program. The credit is not allowed for the reduced premiums paid under the Program; it is allowed for premiums paid to purchase extended coverage under the Program.

The amount of the credit differs depending upon the taxpayer's adjusted gross income, stated as a percentage of the applicable federal poverty level, based upon the taxpayer's family size.

For purposes of the credit, a taxpayer's family size is the number of persons for whom the taxpayer may deduct a personal exemption on the taxpayer's tax return. This qualification means that a non-custodial parent who pays health insurance premiums for a child will not qualify for the credit if the parent cannot claim the child as a dependent on the parent's return. Under federal law, the custodial parent is entitled to claim the child as a dependent on the parent's income tax return unless the custodial parent signs a written declaration that the parent will not claim the child as a dependent for that taxable year.

To prevent a double tax benefit, the tax credit may not be claimed if the amount paid by the taxpayer for insurance coverage is deducted from or not included in the taxpayer's gross income for income tax purposes. If a taxpayer claimed a deduction for health insurance costs of self-employed individuals for the taxable year, the amount of credit otherwise allowed is reduced by the amount of the deduction. In 1999, a self-employed individual may deduct 45% of health insurance costs from income tax. This percentage increases to 100% by the year 2007. If a taxpayer claims a deduction for medical care expenses, the taxpayer is not allowed a credit. Lastly, if a taxpayer uses "pre-tax" dollars to pay the health insurance premiums through a cafeteria plan, the taxpayer is not allowed a credit. Roughly 40% of the parents now paying health insurance premiums for their children do so with "pre-tax" dollars and, therefore, are not eligible for the credit.

The tax credit may not exceed the amount of health insurance premium the taxpayer paid during the taxable year that provided insurance coverage for the taxpayer's dependent children. However, the amount of the credit may exceed the amount of tax owed by the taxpayer. If the credit allowed exceeds the amount of tax imposed, the excess is refundable to the taxpayer. In computing the amount of tax against which multiple credits are allowed, nonrefundable credits are subtracted before refundable credits. This credit is North Carolina's first refundable tax credit. To claim the credit, approximately 20,000 families that do not currently have to file a State income tax return will have to file a tax return to receive this refundable credit. Many low income families do not currently file income tax returns because their personal exemptions and standard deductions exceed their tax liability.

The ability of the Department of Revenue to ensure compliance with this credit will be difficult. The Department does not currently require a taxpayer to include a copy of the taxpayer's federal return with the State return. However, the Department will need this information to ensure that the taxpayer did not claim a self-employed health insurance deduction or a medical expenses deduction for the premiums. The Department will probably require the federal return to be attached if the credit is claimed. How to determine whether premiums were paid with "pre-tax" dollars is more difficult since the wage and tax statement does not state whether health insurance premiums were paid with pre-tax dollars. To help the Department ensure compliance with the law, the act states the General Assembly's intent to appropriate funds to the Department for the 1999-2000 fiscal biennium to cover the costs of auditing 10% of the tax credits claimed for child health insurance premiums. The Department believes it will need 10 auditors and two clerical support positions to monitor 10% of the tax credits claimed.

S.L. 1998-22 (Senate Bill 1327, Senator Dalton)

AN ACT TO PRESERVE THE TAX-EXEMPT STATUS FOR PIPED NATURAL GAS SOLD BY MUNICIPALITIES, TO MAKE THE TAXES

ON OTHER SALES OF PIPED NATURAL GAS MORE UNIFORM, TO ADJUST THE CITIES DISTRIBUTION OF THE TAX PROCEEDS UNTIL JUNE 30, 2000, TO DIRECT THE REVENUE LAWS STUDY COMMITTEE TO DETERMINE THE IMPACT OF THE TAX ON THE DISTRIBUTION TO CITIES, AND TO DIRECT THE UTILITIES COMMISSION TO STUDY THE ISSUE OF TRANSPORTATION RATES.

This act combines the current gross receipts and sales taxes on piped natural gas into a single, per therm excise tax and applies the tax uniformly to all sales of piped natural gas not exempt from the tax, effective July 1, 1999. The act also preserves the tax-exempt status for piped natural gas sold by the eight municipalities that operate their own piped gas system, by exempting them from the excise tax. The act is expected to reduce General Fund revenues by about $3.6 million a year.

There are three types of sellers of piped natural gas: a utility company, a gas marketer, and a gas city. A utility company is a utility regulated by the Utilities Commission. A gas marketer is a person who sells piped natural gas but is not a regulated utility. Gas marketers use the pipeline infrastructure of the utilities to deliver the gas they sell and they pay a transportation charge to the utilities for this service.[1] Piped natural gas is increasingly sold by persons who are not utilities. A gas city is a city that operates its own piped gas system. Eight cities in the State have done this since at least the 1950s: Bessemer City, Greenville, Kings Mountain, Lexington, Monroe, Rocky Mount, Shelby, and Wilson.

Before enactment of this act, two taxes applied to piped natural gas, franchise gross receipts tax and sales tax. The applicability and rate of each tax varied depending upon both the identity of the seller and the identity of the consumer. The franchise gross receipts tax was imposed at the rate of 3.22% of the gross receipts derived by a utility from the business of furnishing piped natural gas.[2] The tax applied only to the receipts of a regulated utility. This gross receipts tax on piped natural gas was enacted in the 1920s, when only regulated utilities could sell piped natural gas. Federal and state regulation of the piped natural gas industry has changed. Now, persons who are not utilities are allowed to sell piped natural gas. The gross receipts tax was not extended to these new sellers, however. Thus, gas marketers and gas cities were not subject to the tax, except to the extent the tax was imposed on the transportation charges paid by gas marketers or was embedded in the price paid for gas bought from a utility for resale to customers.

A special sales tax of 3% also applied to utilities' retail sales of piped natural gas. This tax was imposed in 1985, when the General Assembly split the existing 6% franchise gross receipts tax into a 3% sales tax and a 3.22% gross receipts tax, to make the sales tax portion deductible by individuals on their federal income tax returns. Although the federal tax law changes in 1986 removed this deduction, North Carolina did not change its taxation of utilities. Like the franchise

---

[1][1] The act directs the Utilities Commission to study the transportation rates utilities charge for delivering gas from the interstate pipeline.

[2] If the general corporate franchise tax under G.S. 105-122 exceeded the franchise gross receipts tax under G.S. 105-116, the company was required to pay the excess as well. The same structure is retained under the new piped natural gas tax, which combines both the gross receipts tax and the sales tax, by requiring piped natural gas companies to pay the general corporate franchise tax but allowing them a credit against the tax equal to 50% of the new piped natural gas tax.

gross receipts tax, this special sales tax did not apply to sales by gas marketers or gas cities because, by its terms, it was limited to sales by utilities.

The act eliminates bifurcated taxation of piped natural gas and applies a uniform excise tax to all piped natural gas consumed in this State. The excise tax exempts gas distributed to or by a gas city but does not otherwise distinguish between sales by utilities and sales by others. The tax is due monthly and is payable, generally, by the company that delivers the gas to the end-user. The tax rate is structured as a "declining block" that decreases as the amount of therms of piped gas consumed in a month increases.

A declining block tax rate is used to preserve the prior allocation of the tax burden among the three classes of piped gas customers: residential, business, and industrial. The sales and gross receipts taxes were a percentage of price; residential prices are the highest, business prices are in the middle, and industrial prices are the lowest. The combination of price and tax rate therefore resulted in a higher effective rate of tax on residential customers and a lower rate on business and industrial customers. The new tax preserves this differential in the burden by applying a lower tax rate to those who use higher volumes

The only sales tax exemption applicable to piped natural gas under prior law was the "products of the mine" exemption. Under that exemption, the sale of piped gas by the producer of the gas, in the producer's capacity as a producer, was exempt from sales and use tax. Few consumers of piped natural gas buy their gas directly from the producer. This act does not, therefore, retain this exemption in the new excise tax imposed in lieu of the franchise gross receipts tax and sales tax.

Under prior law, a percentage of the franchise gross receipts tax on piped natural gas service provided inside municipalities was distributed to the municipalities. This act preserves the distribution by providing that 50% of the new excise tax on piped gas service provided within a municipality will be distributed to that municipality. To minimize the difference between the former distribution amounts and the new distribution amounts, the tax provides that the amount distributed to cities will be adjusted for the first year, fiscal year 1999-2000. Any distribution adjustments will be made within the monies distributed to the cities. No State money is involved. The act directs the Revenue Laws Study Committee to look at the distribution formula and recommend to the General Assembly any changes it believes are necessary.

For several years before 1998, the Department of Revenue did not impose the general 4% State and 2% local sales and use tax on the sale of piped natural gas. However, upon reexamination of the law, the Department determined that piped natural gas is tangible personal property as that term is defined in the sales and use tax statutes and all sales of piped natural gas are, therefore, subject to tax. Based on this determination, therefore, all retail sales of piped natural gas would have become subject to the general sales and use tax effective July 1, 1998, if they had not been exempted by this act.

The sale of piped gas by a gas city or by a gas marketer would not have been exempt from sales and use tax. Therefore, the retail sale of piped gas by these sellers would have been subject to a 6% State and local sales and use tax unless a lower rate applied. The law provided a lower rate of 3% for all sales made by regulated utilities and a lower rate of 2.83% for sales made to farmers, manufacturers, and laundries. Piped natural gas taxed at the State rate of 3% or 2.83% was not subject to the 2% local sales and use tax. The use tax would have applied to a person who purchased piped natural gas from a seller who was not required to collect North Carolina sales tax.

S.L. 1998-24 (Senate Bill 124, Senator Odom)

AN ACT TO REDUCE THE WHITE GOODS DISPOSAL TAX RATE TO ONE RATE FOR ANY WHITE GOOD REGARDLESS OF WHETHER THE WHITE GOOD CONTAINS CHLOROFLUOROCARBONS, TO EXTEND THE WHITE GOODS DISPOSAL TAX SUNSET, TO ALTER THE DISTRIBUTION OF THE TAX PROCEEDS FROM THIS TAX, TO CLARIFY HOW THE COUNTIES MAY USE THE TAX PROCEEDS, AND TO LIMIT THE AMOUNT OF SURPLUS A COUNTY MAY ACCUMULATE BY HOLDING FURTHER TAX DISTRIBUTIONS UNTIL THE SURPLUS IS REDUCED.

This act reduces the white goods tax rate, delays the sunset of the tax, changes the formula for distributing the tax proceeds, clarifies the purposes for which counties may use the proceeds of the tax, and provides for detailed reporting on counties' white goods management programs, effective July 1, 1998. The act also provides that counties that have excess tax proceeds may not receive additional distributions until they have spent the excess tax proceeds, effective January 1, 1999. The act does not affect the General Fund.

The white goods tax was imposed effective January 1, 1994. The purpose of the tax is to provide a source of revenue for the proper disposal of discarded white goods. A white good is a domestic or commercial large appliance, such as a refrigerator, a water heater, an air conditioner unit, or a dishwasher.

The white goods tax was scheduled to sunset July 1, 1998. This act extends the sunset three years, to July 1, 2001. The tax is a flat rate charged on every new white good purchased in this State or brought into this State for storage or use. The former tax rates were $10.00 for white goods that contain chlorofluorocarbon refrigerants and $5.00 for white goods that do not contain chlorofluorocarbon refrigerants[3]. This act reduces the tax to $3.00 per white good, whether or not it contains chlorofluorocarbon refrigerants.[4] The reduction of the tax rate will reduce revenues by about one-half.

Under prior law, the tax proceeds were distributed as follows: 5% to the Solid Waste Management Trust Fund[5], 20% to the White Goods Management Account[6], and 75% to counties on a per capita basis. This act changes the formula so that 8% of the tax proceeds will be distributed to the Solid Waste Management Trust Fund and 72% will be distributed to counties. The 20% allocation to the White Goods Management Account does not change.

---

[3] Chlorofluorocarbon refrigerant is a type of gas that must be removed from a white good under federal law.

[4] Chlorofluorocarbon refrigerants were banned by the federal Environmental Protection Agency as of January 1, 1996.

[5] The money in this Fund is used to fund activities of the Department of Environment and Natural Resources (DENR) to promote waste reduction and recycling, to fund research on the solid waste stream in North Carolina, to fund activities related to the development of secondary materials markets, to fund demonstration projects, and to fund research by in-State colleges and universities.

[6] The money in this Account is used to make grants to local governmental units to assist them in managing discarded white goods.

Counties may use the white goods tax proceeds distributed to them only for the management of discarded white goods. This act clarifies that expenditures of the tax proceeds must be related directly to the management of discarded white goods. It also specifies that authorized uses include capital improvements for infrastructure to manage discarded white goods, operating costs associated with managing discarded white goods, and cleanup of illegal disposal sites that consist of more than 50% discarded white goods. If an illegal disposal site consists of 50% or less discarded white goods, the tax proceeds may be used only to clean up the discarded white goods portion of the site.

The act limits the amount of surplus white goods disposal tax proceeds that a county can accumulate. Counties receive their distributions of white goods tax proceeds on a quarterly basis. Effective January 1, 1999, this act provides that if, at the end of a fiscal year, the county has a surplus of white goods tax proceeds that equals or exceeds 25% of the amount it was eligible to receive for the fiscal year, it may not receive additional distributions until its surplus falls below that level. The amount that would have been distributed to a county will instead be credited to the White Goods Management Account.

Counties submit an annual financial information report to the Local Government Commission. This act directs the Local Government Commission to require counties to include in the reports information about their management of white goods and their receipt and expenditure of white goods tax proceeds and related revenues. This requirement will make counties more accountable for their white goods management programs. The annual financial information report must be certified by the county finance officer based on an independent audit by a certified public accountant.

The Department of Environment and Natural Resources reports annually to the Environmental Review Commission on the management of white goods. This act requires the Department to provide this report to the Revenue Laws Study Committee as well, and to include in the report a summary of the information about counties' white goods management programs provided in their annual financial information reports to the Local Government Commission.

S.L. 1998-55 (Senate Bill 1569 , Senator Hoyle) Bill Lee Act Changes.

AN ACT (1) TO ALLOW CERTAIN RECYCLING FACILITIES AN INVESTMENT TAX CREDIT, A REFUNDABLE INCOME TAX CREDIT, A SALES TAX REDUCTION FOR CRANES AND MATERIALS HANDLING EQUIPMENT, A SALES TAX REFUND FOR CONSTRUCTION MATERIALS, A SALES TAX EXEMPTION FOR ELECTRICITY, AND A PROPERTY TAX EXEMPTION FOR RECYCLING PROPERTY; (2) TO ALLOW AIR COURIERS A SALES TAX REDUCTION FOR MATERIALS HANDLING EQUIPMENT USED AT A HUB, A SALES TAX EXEMPTION FOR AIRCRAFT LUBRICANTS AND PARTS USED AT A HUB, AND A PROPERTY TAX EXEMPTION FOR AIRCRAFT USED AT A HUB; (3) TO EXPAND THE INDUSTRIAL DEVELOPMENT FUND AND UTILITY ACCOUNT TO

INCLUDE THE SAME BUSINESSES AS THE WILLIAM S. LEE ACT, TO EXPAND THE UTILITY ACCOUNT TO TIER TWO COUNTIES, TO RAISE THE MAXIMUM GRANT UNDER THE INDUSTRIAL DEVELOPMENT FUND, AND TO ALLOW LOCAL GOVERNMENTS TO USE PART OF THE INDUSTRIAL DEVELOPMENT FUND GRANT FUNDS TO ADMINISTER THE GRANT; (4) TO PROVIDE FOR THE DESIGNATION OF STATE DEVELOPMENT ZONES, TO PROVIDE A LOWER WAGE STANDARD, A HIGHER WORKER TRAINING CREDIT, A ZERO THRESHOLD FOR THE INVESTMENT TAX CREDIT, AND AN ADDITIONAL JOBS TAX CREDIT WITHIN ZONES, AND TO GIVE ZONES PRIORITY FOR COMMUNITY DEVELOPMENT BLOCK GRANTS; AND (5) TO AMEND THE WILLIAM S. LEE ACT BY EXPANDING THE CENTRAL ADMINISTRATIVE OFFICE CREDIT TO GROSS PREMIUMS TAXES AND TO JOBS CREATED BEFORE THE PROPERTY IS CONSTRUCTED, BY PROVIDING THAT THE INVESTMENT TAX CREDIT THRESHOLD APPLIES ONLY ONCE FOR A TWO-YEAR PROJECT, BY EXPANDING THE INVESTMENT TAX CREDIT TO OPERATING LEASES FOR PROJECTS OVER ONE HUNDRED FIFTY MILLION DOLLARS, BY EXPANDING THE RESEARCH AND DEVELOPMENT TAX CREDIT, BY SIMPLIFYING THE WORKER TRAINING TAX CREDIT, BY IMPOSING A FEE FOR INCENTIVE APPLICANTS, BY EXTENDING THE CREDIT CARRYFORWARD PERIOD FOR PROJECTS OVER ONE HUNDRED FIFTY MILLION DOLLARS, BY PROVIDING FOR A SINGLE TIER DESIGNATION FOR TWO-COUNTY INDUSTRIAL PARKS, BY CLARIFYING THAT CREDITS ARE ALLOWED FOR BUSINESSES THAT ARE SOLD ONLY IF THERE IS IMMINENT CLOSURE OR AN EMPLOYEE BUYOUT, BY CLARIFYING THE METHOD OF CALCULATING THE INVESTMENT TAX CREDIT FOR LEASES, AND BY CLARIFYING THE DEFINITIONS OF THE TYPES OF BUSINESSES ELIGIBLE FOR INCENTIVES.

The act is designed to promote economic development throughout the State in five ways:

1. It makes various amendments to the William S. Lee Act to encourage large investments and remove technical problems with the Act.
2. It authorizes enhanced incentives for development zones, which are economically distressed areas located within municipalities.
3. It expands and modifies the Industrial Development Fund to provide financial support for projects in rural and less prosperous areas of the State.

4. It provides sales tax and property tax reductions for air couriers and provides a temporary bidding law exemption for specific projects of the Piedmont Triad Airport Authority to encourage development of air courier hubs.
5. It provides an investment tax credit for large and major recycling facilities that locate in Tier One counties to encourage development of a recycling industry in Tier One counties. In addition, it provides a refundable reinvestment credit and sales tax reductions for major recycling facilities.

The act is expected to reduce General Fund revenues by $2.22 million in fiscal year 1998-99, $1.21 million in fiscal year 1999-2000, $6.81 million in fiscal year 2000-01, $12.97 million in fiscal year 2001-02, and $16.33 million in fiscal year 2002-03.

William S. Lee Act Modifications.

Part I of the act makes a number of technical and substantive changes to the William S. Lee Quality Jobs and Business Expansion Act. Unless a different date is given, these changes all become effective beginning with the 1999 tax year. The William S. Lee Act, enacted by the General Assembly in 1996, extended the jobs tax credit to all 100 counties, enacted a new tax credit for worker training expenses, enacted a new tax credit for increasing research activities, and enacted two new tax credits for investing in machinery and equipment. In 1997, the General Assembly expanded the types of businesses eligible for the credits and created a new tax credit for taxpayers who purchase or lease real property to be used as central administrative office property.

The act makes two changes to the central administrative office credit that was enacted last year. First, it allows the credit to be taken against the insurance gross premiums tax. This change will permit insurance companies to qualify for the credit. Second, it clarifies that a central administrative office meets the requirements for creating new jobs if the jobs begin before the office property is in service but are located at a temporary facility that the business occupies while waiting for its office property to be completed.

It also makes two changes to the credit for investing in machinery and equipment. First, it provides that for projects that span two tax years, the threshold applies only once to the investment. Otherwise, a project put in service over several months within a calendar year would receive more benefit than a project put in service over several months starting in one calendar year and ending in the next. This change went into effect beginning with the 1998 tax year. Second, it expands the credit to include machinery and equipment the taxpayer uses under an operating lease, but only if the machinery and equipment are part of a project valued at $150 million or more.

The act expands the credit for research and development. This credit piggybacks the federal credit, allowing a State credit equal to approximately ¼ of the federal credit as it relates to North Carolina activities. In 1997, Congress enacted an alternative credit for research and development. The act modifies the State credit to also allow a credit equal to approximately ¼ of the federal alternative credit as it relates to North Carolina activities.

The act simplifies the credit for worker training by replacing the credit measured by costs of training with a credit for wages paid to workers while they are being trained (not including on-the-job training). The credit is restricted to employees for whom the taxpayer qualifies for the jobs tax credit and employees being trained to operate machinery and equipment for which the taxpayer qualifies for the credit for investing in machinery and equipment. In order to qualify under former law for this credit, the taxpayer was required to get its planned training certified in

advance by the Department of Community Colleges. This requirement was difficult both for taxpayers and for the Department of Community Colleges.

Finally, Part I of the act makes a number of administrative and technical changes to the William S. Lee Act. First, it levies a $75.00 application fee on taxpayers who seek to qualify for a credit. The proceeds of the fee will help the Department of Commerce defray its costs in administering the credits. This fee becomes effective January 1, 1999. Second, the act extends the credit carryforward period for investments over $150 million. The act provides that for large investments, the excess may be carried forward for up to 20 years (was five years). Third, the act clarifies that credits are allowed only for new and expanding businesses, not for existing businesses that are sold to another taxpayer. An exception is made for a business that has closed, has filed a federally required notice that closure is imminent, or has been purchased in an employee buyout. In these cases, the business will be able to qualify for the credits to the same extent as a new business. Fourth, the act provides that if an industrial park is located in and owned by two counties who both contribute significantly to its development, the industrial park as a whole is considered to have the tier designation of the lower-tiered county. This change promotes regional cooperation in industrial development and avoids an industrial zone that is split into two tier designations. Fifth, the act clarifies and renumbers the definitions of the different types of businesses that are eligible for credits[7] and clarifies the method of calculating the investment tax credit and the business tax credit for property acquired by a capital lease.

State Development Zones.

Part I of the act provides for the designation of economically distressed areas located within municipalities as State development zones and authorizes enhanced incentives for businesses that locate in a development zone, effective beginning with the 1999 tax year. The act defines a development zone as an area that meets all of the following conditions: (1) consists of one or more contiguous census tracts, block groups, or both, (2) has a population of 1,000 or more, at least 20% of whom are below the poverty level, and (3) is located at least partly in a municipality with a population over 5,000. If a business locates in a development zone, the wage standard it has to meet is the same as for Tier One counties - slightly lower than the standard for other counties. In addition, if a business locates in a development zone, its maximum worker training credit is $1,000 rather than $500, it receives an additional $4,000 per job on its jobs tax credit, and there is no threshold for the credit for investing in machinery and equipment.

The Secretary of Commerce will designate development zones upon request of a taxpayer or a local government. The designation is effective for four years. The act provides that a development zone may qualify for priority in receiving community development block grants if the municipality's governing body adopts a strategy to improve the zone and establishes a

[7] The bill changes statutory references from the Standard Industrial Classifications (SIC) to the North American Industrial Classification System (NAICS) to conform to the federal system. These references are used in the William S. Lee act to define various types of businesses. The bill also changes the term "manufacturing and processing" to "manufacturing" and the term "warehousing and distribution" to "warehousing and wholesale trade" to conform to the NAICS. In April 1997, the United States Office of Management and Budget announced the adoption of a new industry classification replacing the SIC, a system used to classify most of the data we have about industries or kinds of business in our economy. The updating of industry classifications is nothing new. Since its origination in the 1930s, the SIC system has been revised or updated every 10 or 15 years to reflect new developments in the American economy and to address problems identified by data users and statistical agencies. It was last revised in 1987.

committee to implement the strategy, in accordance with guidelines established by the Department of Commerce. The Department of Commerce is required to report annually to the Department of Revenue and the General Assembly's Fiscal Research Division on the number of new jobs created within development zones and percentage of those jobs that were filled by residents of those development zones.

Infrastructure Funds.

Part II of the act, effective July 1, 1998, states the intent of the General Assembly to appropriate funds to the Industrial Development Fund and the Utility Account of the Industrial Development Fund. The Governor's budget requested an appropriation of $18 million for the Fund and $14 million for the Utility Account. The Current Operations Appropriations and Capital Improvement Appropriations Act of 1998 provides nonrecurring funding of $1.5 million to the Utility Account for economic development grants for water and sewer infrastructure. Under prior law, money in the Utility Account could be used in Tier One counties for construction or improvements to new or existing water, sewer, gas, or electrical utility distribution lines or for existing, new, or proposed industrial buildings to be used in manufacturing and processing, warehousing and distribution, or data processing. The act expands the scope of the Utility Account to include Tier Two counties.

Under prior law, the Industrial Development Fund provided funding for manufacturing projects in Tier One, Two, and Three counties as well as in areas experiencing major economic dislocations. The funds could be used for equipment, capital improvements, and utility distribution lines. Projects in Tier Two and Three Counties were required to match the State funds on a $1/$3 basis. The funding was capped at $4,000 per job to be created and $400,000 per project. The act raises the per-job cap to $5,000 and the per-project cap to $500,000. The act also expands the industries covered by both the Industrial Development Fund and the Utility Account to include all of the following: manufacturing, central administrative offices, air courier services, data processing, and warehousing and wholesale trade.

Finally, Part II of the act amends the statute to allow local governments receiving industrial development funds to use up to 2% of these funds to verify that the funds are used as required by law and otherwise to administer the grant or loan.

Air Courier Hubs.

Part III of the act provides sales tax and property tax reductions for interstate air couriers in order to encourage the development of air courier hubs in North Carolina. An air courier is an air carrier that delivers individually addressed letters, parcels, and packages. Effective January 1, 2001, the act provides that sales to an interstate air courier of equipment for handling and storing materials at its hub will be subject to a reduced sales tax of 1%, capped at $80 per item. In addition, the act provides a sales tax exemption for sales to an interstate air courier of aircraft lubricants, aircraft repair parts, and aircraft accessories for use at the air courier's hub in this State. Effective beginning with the 2001 property tax year, the act provides a property tax exemption for aircraft owned by an air courier and apportioned for property tax purposes to the courier's hub in this State. A hub is the place in this State where the air courier allocates for property tax purposes more than 60% of its North Carolina aircraft value and where its primary function is to receive packages from consolidation locations for sorting and distribution, rather than to consolidate packages for delivery to another airport for sorting and distribution.

Part III of the act also grants a bidding law exemption for the Piedmont Triad Airport Authority. The exemption is effective for a five-year period beginning January 1, 1999, and applies to design and construction of an air freight distribution facility on airport property, and related supplies, equipment, and services.

Recycling Facilities.

Part IV of the act provides tax incentives for "large" and "major" recycling facilities located in Tier One counties at the time of initial construction. A recycling facility is a plant that manufactures products, most of which are made from at least 50% post-consumer waste material. The facility also includes related infrastructure, buildings, and equipment on land near (and in the same county as) the plant. A large recycling facility is one that will involve at least $150 million in new investment and 155 new jobs within a two-year period. A major recycling facility is one that will involve at least $300 million in new investment and 250 new jobs within a four-year period. In order to qualify for the applicable tax incentives, the owner of the facility must obtain certification from the Department of Commerce that it will meet the minimum investment and new job requirements. If the facility fails to meet either requirement within the applicable time period, it forfeits any tax benefit it received as a result of being certified.

Part IV of the act provides an investment tax credit for both large and major recycling facilities, effective beginning with the 1998 tax year. This investment tax credit is in lieu of the investment tax credit provided in the William S. Lee Act. The recycling facility investment tax credit differs from the Lee Act credit in the following ways:

1. The Lee Act credit is equal to 7% of the cost of machinery and equipment, while the large recycling facility credit is equal to 20% of the cost and the major recycling facility credit is equal to 50% of the cost.
2. The credit is allowed at the time the owner of the recycling facility accrues expenses to purchase or lease machinery and equipment, rather than at the time machinery and equipment are placed in service, as under the Lee Act. If the facility fails to put the machinery and equipment in service within 30 months after taking the credit, the credit is forfeited and must be repaid.
3. The credit is allowed against both the corporate franchise tax and the corporate income tax. The Lee Act allows the credit against either but not both taxes.
4. The credit may equal 100% of the tax due from the owner of the facility. The Lee Act limits the credit to 50% of tax due.
5. The excess credit may be carried forward for 25 years. Under the Lee Act, as revised by this act, the relevant carryforward period would be 20 years.

Part IV of the act also provides to major recycling facilities locating in Tier One counties a refundable corporate income tax "credit for reinvestment", effective beginning with the 1998 tax year. The credit applies if the major recycling facility is not accessible by ocean barge or ship and incurs additional expenses due to transporting its materials and products by alternative modes of transportation. The reinvestment credit is equal to the amount of these additional expenses, which must be documented annually to the Secretary of Commerce. The credit is subject to a dollar cap each year, in increasing amounts. In 1999, the cap is $640,000. In 2004, the cap levels off at $10.4 million a year. The act sunsets this reinvestment credit effective with the 2008 tax year. The act states the intent, however, to postpone the sunset if any major recycling facility can document that

it is still experiencing additional expenses in 2008 due to its inability to use ocean barges or ships to transport materials and products.

The reinvestment credit is refundable. That means that if the amount of credit exceeds the major recycling facility's tax liability after all other credits are subtracted, the balance is paid out in cash. For the first ten years the reinvestment credit is in effect, a major recycling facility must use the amount received in credit to invest in rail and roads associated with the facility, in transportation infrastructure to reduce the expense of transporting materials and products to and from the facility, or in land and infrastructure for industrial sites, other than the facility itself, in the same county. If there are not enough reasonable opportunities for investments in those purposes in a given year, however, the major recycling facility may invest the amount of credit received in the facility itself, but only after it has made the minimum investment of $300 million required to qualify as a major recycling facility. The facility must document its compliance with this reinvestment requirement and it forfeits any part of the credit it spends for another purpose.

Part IV of the act provides several sales and use tax reductions for major recycling facilities located in Tier One counties, effective beginning July 1, 1998. First, it provides that a reduced sales tax rate of 1%, capped at $80 per item, applies to cranes, foundations, transportation equipment, and material handling equipment used at the major recycling facility. These items would otherwise be subject to 4% State sales tax and 2% local sales tax. Second, it exempts from sales tax lubricants and other additives for vehicles and machinery used at the plant, and other materials and supplies (not including machinery and equipment) that are used or consumed directly in the manufacturing process. These items would also otherwise be subject to a combined State and local rate of 6%. Third, it exempts from sales tax electricity purchased for use at the major recycling facility. This electricity would otherwise be subject to State sales tax at 3% or 2.83%. Fourth, it provides an annual sales tax refund for taxes a major recycling facility pays directly or indirectly on building materials, building supplies, fixtures, and equipment that become a part of the real property of the recycling facility located in a Tier One county.

Finally, Part IV of the act provides for major recycling facilities an expanded version of the existing property tax exemption for property used for recycling. Under general law, to qualify for exemption, the property must be used exclusively for recycling and have recycling as its primary purpose. Effective beginning with the 1999-2000 property tax year, the act provides that, for major recycling facilities only, the property must be used predominantly for recycling and have recycling as a purpose. The Department of Environment and Natural Resources determined that these changes would be necessary to prevent a major recycling facility from being disqualified because it adds fillers or other materials to the post-consumer waste material when manufacturing products.

S.L. 1998-67 (Senate Bill 186, Senator Foxx)

AN ACT TO PROVIDE THAT THE GOVERNING BODY OF A TAXING UNIT MAY DELAY THE ACCRUAL OF INTEREST ON CERTAIN UNPAID PROPERTY TAXES.

This act is a Statewide, public act that addresses a specific local problem concerning the payment of local property taxes for the 1997-98 fiscal year. The specific local problem is that after Gaston County conducted its octennial revaluation of property in 1997, 22,000 appeals were filed. This was many more appeals than had been anticipated. Although the statutory due date for the

1997 taxes was January 5, 1998, many of the appeals were still under consideration by the board of equalization and review at that time. Counties do not have the authority to release, refund, or compromise tax liabilities except as specifically provided by law.

This act allows the governing body of each affected taxing unit to adopt a resolution that waives interest on taxes paid between January 6, 1998, and March 7, 1998. The act is limited to taxing units whose tax receipts were not delivered to the tax collector before October 3, 1997. September 1 is the statutory due date for delivering tax receipts. The act applies to Gaston County and the units for which it collects taxes because the tax receipts were not delivered to the tax collector of Gaston County until October 3. Gaston County collects taxes for 13 of its 14 municipalities and for all of its 19 fire districts.

Generally, the law provides taxpayers two avenues to protest the amount of property tax due. A taxpayer may submit a written demand for a release of a tax claim any time prior to the payment of the tax. However, taxpayers who choose not to pay all or part of their taxes by the due date are subject to interest. Counties do not have the statutory authority to release taxpayers from the accruing interest, even if the taxpayers' appeals are under consideration. This is a rigid prohibition and failure to abide by it carries personal liability for each member of the board of commissioners. The rates of interest are 2% from January 6 to February 1 and ¾% for each month or part of a month after that. The second avenue to contest the payment of property tax is to pay the tax when due. If the tax is reduced on appeal, then the taxpayer receives a refund.

This act is a Statewide act rather than a local one because it must be Statewide to avoid conflicting with the prohibition in the North Carolina Constitution on certain local acts. Article II, section 24(1)(k) of the State Constitution prohibits local acts that extend the time for collecting taxes or otherwise relieve a tax collector from the performance of this duty. Although the act is nominally Statewide, it applies only to Gaston County because it applies only to units whose tax receipts were not delivered to the tax collector before October 3, 1997. Gaston County is the only taxing unit whose tax receipts were not delivered by that date. The General Assembly enacted a similar act for Beaufort County in 1995 and for Buncombe County in 1990.

S.L. 1998-69 (Senate Bill 1229, Senator Kerr)

AN ACT TO ABOLISH TAX WAIVERS FOR THE TRANSFER OR DELIVERANCE OF A DECEDENT'S PROPERTY.

This act repeals the provisions of the former inheritance tax law (which was itself repealed by S.L. 1998-212) that required an inheritance tax waiver before the property of a decedent could be transferred. The estate tax, known as the pick-up tax, which replaced the former inheritance tax effective January 1, 1999, has no inheritance tax waiver requirement. This act does not affect the General Fund.

Former law required that when a person died, the Department of Revenue had to be notified of any accounts, stocks, and bonds in the name of the decedent and of the contents in the decedent's safe-deposit box. The Department would then issue inheritance tax waivers authorizing the bank or financial institution in possession of the decedent's property to transfer or release the property. Accounts held by the decedent and spouse with right of survivorship did not require a waiver before transfer.

This act repealed the inheritance tax waiver requirement and related penalties for failure

to obtain waivers and forms required for the waivers, effective for decedents dying on or after August 1, 1998. The inheritance tax itself was repealed effective for decedents dying on or after January 1, 1999. This act was a recommendation of the Revenue Laws Study Committee.

S.L. 1998-95 (Senate Bill 1252, Senator Hoyle)

AN ACT TO SIMPLIFY AND MODIFY PRIVILEGE LICENSE AND EXCISE TAXES AND RELATED PERMIT FEES.

This act incorporates two bills that the Revenue Laws Study Committee recommended to the 1998 General Assembly: Senate Bill 1252 and House Bill 1320. Senate Bill 1252 made numerous changes to the State privilege license taxes on amusements, professionals, installment paper dealers, banks, and alcoholic beverages. House Bill 1320 reduced the current 3% gross receipts tax on motion pictures to 1%.

Amusements.

The former law imposed an annual $50 State privilege license tax and a 3% gross receipts tax on any form of entertainment not otherwise taxed or specifically exempted under Article 2 of Chapter 105 of the General Statutes. The State privilege license tax on amusements was treated as an advance payment of the corresponding gross receipts tax, and the license tax was applied as a credit upon the gross receipts tax. This act repeals the State privilege license taxes on amusements. Amusements will continue to pay a 3% gross receipts tax and any existing local license tax. This repeal simplifies the taxes assessed on amusements. It does not reduce revenues because the license tax was a credit against the gross receipts tax. This part of the act becomes effective July 1, 1999.

This act also reorganizes the list of amusements exempt from the tax so that all of the exemptions appear in one statute. The list includes those amusements that are currently exempt in Article 2, amusements that are listed as exempt in other sections of the statutes (the North Carolina Symphony Society and amusements organized under the Agriculture Chapter), and outdoor historical dramas that are described in Chapter 143 of the General Statutes and that have generally been exempt under the current definition for exemptions in G.S. 105-40. Exempt amusements set out in Article 2 are high school and elementary school athletic contests, teen centers, dances and amusements promoted and managed by a corporation that operates a center for the performing and visual arts when the dance or amusement is held at the center, and amusements on the Cherokee Indian reservation where the entity providing the amusement is authorized to do business on the reservation and pays the tribal gross receipts levy to the tribal council.

The act expands the exemption for elementary and secondary school dances and other amusements to include all such amusements. Former law exempted only the first $1,000 of gross receipts derived from dances and amusements actually promoted and managed by secondary schools when the proceeds were used exclusively for the school and not to defray expenses.

Motion Pictures.

The act imposes a lower rate of tax on one form of amusements: motion picture shows. The act imposes a 1% gross receipts tax on this form of amusement, effective October 1, 1998, as opposed to the 3% gross receipts tax imposed on other forms of amusements. A 1% gross

receipts tax on movie admissions is expected to generate $1.5 million in General Fund revenue in fiscal year 1998-99.

The act clarifies that if a taxpayer offers an entertainment or amusement that includes both a motion picture and an entertainment or amusement that is subject to the 3% gross receipts tax, then the higher rate applies. The act also clarifies the exemption of motion pictures that are shown at a center for the performing and visual arts that is promoted and managed by an organization organized for religious, charitable, scientific, literary, or educational purposes. The showing of the motion picture show may not be the primary purpose of the center. North Carolina's policy of taxing movie concessions is consistent with other states and the District of Columbia.

Prior to July 1, 1997, the State imposed a privilege tax on motion picture shows. Motion picture shows were not subject to the 3% gross receipts tax imposed on other forms of entertainment or amusement because it does not apply to amusements "otherwise taxed". During the Second Extra Session of the 1996 Session, the General Assembly repealed a number of State privilege license taxes, including the privilege taxes on motion picture shows. When the privilege license tax was repealed, motion picture shows fell into the category of amusements not otherwise taxed and, therefore, became subject to the 3% gross receipts tax. The Department of Revenue chose not to assess this tax in fiscal year 1997-98 until the General Assembly clarified that the tax should be collected. The Department's uncertainty arose from the absence of debate by the 1996 General Assembly on the issue of imposing a gross receipts tax on movies.

The Revenue Laws Study Committee considered this issue at length and heard from several interested parties. The Committee learned that 27 states tax movie admissions in one fashion or another. Twenty-one states simply apply their sales tax to theater admissions. Alabama and Arkansas have a specific gross receipts tax on movie admissions, while Connecticut and South Carolina have a general admissions tax. Arizona has a transaction privilege tax on theaters and Indiana has a gross income tax on theaters. Twenty-five of these twenty-seven states have movie taxes higher than North Carolina's 3% gross receipts tax. Eleven of the states that tax movie admissions are members of the Southern Legislative Conference. After much debate, the Committee recommended imposing a 1% gross receipts tax on movies, as opposed to the 3% gross receipts tax imposed on other, similar forms of entertainment and amusements.

Professionals.

The act makes several clarifying and technical changes to the statewide privilege license tax on persons practicing certain professions or engaging in certain businesses. It also reorganizes the existing exemptions from the tax found throughout the statutes so that all exemptions will appear in one place. Lastly, it ends the practice of charging half the privilege license tax to an individual who applies after the midpoint of the fiscal year. This part of the act becomes effective July 1, 1999, and is expected to generate $14,375 in General Fund revenues in fiscal year 1999-2000.

The statute exempts persons age 75 and over and certain persons practicing the professional art of healing from the privilege license tax. The act adds to this list blind persons engaging in a trade or profession as a sole proprietor. The exemption for blind persons was formerly set out in another section of Chapter 105, which this act repeals.

The act repeals an exemption from occupational license taxes for persons serving in the armed forces and replaces it with a general provision in Chapter 93B of the General Statutes that allows an individual who is serving in the armed forces of the U.S. an extension of time to pay any

license fee charged by an occupational licensing board if the individual qualifies for the extension of time to file a tax return under G.S. 105-249.2. This statute provides that the Secretary of Revenue may not assess interest or penalty against a taxpayer for any period that is disregarded under section 7508 of the Internal Revenue Code in determining the taxpayer's liability for a federal tax. This section of the Internal Revenue Code postpones tax liability for an individual serving in the armed forces, or serving in support of the armed forces, in an area designated by the President as a "combat zone". The period of service in such an area, plus the period of continuous qualified hospitalization attributable to an injury received while serving in that area, and the next 180 days thereafter, are disregarded in determining tax liability. The provision belongs in the Occupational Licensing Chapter, as opposed to the Chapter on Taxation, because it relates to occupational licensing, not to taxes.

Installment Paper Dealers.

Installment paper dealers are persons engaged in the business of dealing in, buying, or discounting installment paper, notes, bonds, contracts, or evidences of debt, when at the time or in connection with the execution of these instruments, a lien is reserved or taken on personal property located in the State to secure the payment of the obligations. These dealers paid an annual $100 license tax and a quarterly tax of .275% of the total face value of the obligations within the preceding quarterly calendar months. This act repeals the $100 license tax and increases the quarterly tax of .275% to .277% to offset the loss of revenue from repealing the annual $100 license tax. According to the Department of Revenue, this increase in rate will cover $112,811 of the $123,800 loss. This provision becomes effective July 1, 1999.

Banks.

Under former law, banks were issued a privilege license each year and paid a tax at the rate of $30 for each $1,000,000, or fractional part thereof, of total assets held. These assets were determined by averaging the total assets shown in the four quarterly call reports of condition (consolidation domestic subsidiaries) for the preceding calendar year as required by bank regulatory authorities. This act eliminates the license and requires the banks to submit instead an annual report to the Department of Revenue showing the average of their total assets. The privilege tax must be paid with the report by July 1. The submission of a report in lieu of issuing an annual license will relieve the Department of having to issue licenses that vary yearly for each bank. The Department's computer system has had difficulty issuing licenses that vary each year, and this problem will become even more difficult with the year 2000 changeover. Also, a report will assist the Department in auditing banks.

The act also repeals the $100 annual privilege tax for banks that have been in operation for less than a year. New banks will be required instead to pay a tax on the average of the total assets determined by the number of days in operation. These changes related to banks become effective July 1, 1999, and are expected to generate $1,400 in General Fund revenues.

Alcoholic Beverages.

The act repeals annual privilege licenses on ABC permittees, raises the ABC permit fees by the corresponding amounts, and simplifies the tax rate on malt beverages. This part of the act becomes effective May 1, 1999, and is not expected to affect General Fund Revenues.

Under former law, a person had to obtain both a permit issued by the ABC Commission and a corresponding annual State license issued by the Department of Revenue to engage in a business involving alcoholic beverages. The person had to obtain the ABC permit before applying

for the license. Upon payment of the State license tax, issuance of the license was mandatory if the applicant had the corresponding ABC permit. The information and qualifications required for the annual State license were the same as the information and qualifications required for the corresponding one-time ABC permit. The additional State license served no purpose other than to raise revenue. The act repeals these privilege licenses in order to eliminate the duplicate requirement of applying for a State privilege license and a corresponding ABC permit. The approximately $3.1 million revenue loss from the repeal of these privilege licenses is offset by an increase in the ABC permit fees set out in G.S. 18B-902(d), by repeal of the reduced fees for combined permits in G.S. 18B-902(e), and by an increase in the annual renewal fees for mixed beverage and guest room cabinet permits in G.S. 18B-903(b).

The act also simplifies the filing requirements for malt beverage taxpayers by setting a single rate of excise tax on malt beverages. Formerly, an excise tax of 48.387 cents per gallon was assessed against malt beverages in barrels holding at least 7¾ gallons and an excise tax of 53.376 cents per gallon was assessed against malt beverages in cans, bottles, barrels, or other containers holding less than 7¾ gallons. The act imposes an excise tax of 53.177 cents per gallon on the sale of any malt beverage, regardless of the container. Thus, the act simplifies the filing and reporting requirements for malt beverages by eliminating the requirement that vendors of these products specify the size and type of containers sold in their monthly reports to the Secretary.

S.L. 1998-96 (Senate Bill 1001, Senator Cochrane)

AN ACT TO PROVIDE AN AMUSEMENTS TAX EXEMPTION FOR CERTAIN NONPROFIT ARTS ORGANIZATIONS AND COMMUNITY FESTIVALS.

The State levies a 3% gross receipts privilege license tax on anyone engaged in the business of offering amusements, athletic events, dances, and entertainments for which an admission is charged. This act creates two new, narrow exemptions from this privilege license tax for nonprofit arts festivals and community festivals that meet certain conditions. The act applies to events such as "First Night" of Raleigh and the Azalea Festival of Wilmington. The act became effective August 14, 1998. The Department of Revenue estimates that the revenue loss to the General Fund will be less than $25,000 a year.

Under the act, an arts festival is exempt from the privilege license tax if the person holding the festival meets all of the following conditions:

- The person holds no more than two festivals a year.
- Each of the festivals lasts no more than seven days.
- The arts festivals are held outdoors on public property and involve a variety of exhibitions, entertainments, and activities.
- The person is exempt from State income tax.

Under the act, a community festival is exempt from the privilege license tax if the person holding the festival meets all of the following conditions:

- The person holds no more than one community festival a year.

- The festival lasts no more than 7 days.
- The festival involves a variety of exhibitions, entertainments, and activities, the majority of which are held outdoors and are open to the public.
- The person is exempt from State income tax.

S.L. 1998-98 (Senate Bill 1226, Senator Cochrane)

AN ACT TO MAKE TECHNICAL AND CONFORMING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

This act makes numerous technical and clarifying changes to the revenue laws and related statutes as recommended by the Revenue Laws Study Committee. The following table provides a section-by-section analysis of the changes:

Section	Explanation
1	Recodifies the corporate income and franchise taxes on savings institutions. These entities currently pay tax under Article 8D of Chapter 105 of the General Statutes. The taxes are identical to the income and franchise taxes paid by other corporations, with two adjustments. This section moves the taxation of savings institutions from Article 8D to the regular corporate income and franchise taxes in Articles 3 and 4. The two adjustments are retained. In addition, a general exemption in Article 8D has been transferred to the relevant privilege tax statutes: G.S. 105-83, G.S. 105-88, and G.S. 105-102.3. This technical change was reviewed and approved by the Bankers Association, which represents savings institutions.
2 - 3	Repeals obsolete provisions of the inheritance tax.
4	Conforms cross-reference to corporate tax credits to reflect that some credits are in other Articles of the Revenue Act.
5 - 8	Makes conforming changes to Subchapter S Corporation law to reflect the fact that trusts may now be shareholders.
9	Repeals an individual income tax definition for a term that is no longer used in the individual income tax law.
10	Adds cross-reference to two individual income tax credits that do not apply to estates and trusts.
11	Corrects grammar.
12 - 13	Clarifies that withholding is not required on payments to tax-exempt entities.
13.1	Removes cross-references to soft drink excise tax, which has been repealed effective July 1, 1999.
13.2	Removes reference to type of payment for food purchased under the Food Stamp Program, because counties are beginning to use a system in which a type of credit card will be used in lieu of food stamps or coupons.

14	Removes references to sales tax applying to two types of motor fuel for which motor fuel tax refunds are allowed, because refunds are not made on these types of motor fuel (accidental mixes and fuel sold to marinas). With respect to accidental mixes, the sales and use tax applies when they are later reblended. If there is an accidental mix of dyed diesel fuel with tax-paid motor fuel, a refund of the excise tax is allowed. The product is then blended back in with dyed diesel stock and a resale is made for purposes of off-highway use or home heating and sales tax is charged. If there is an accidental mix of gasoline with diesel fuel, this mix has to be rerefined. It cannot be used in its current state because it is so highly combustible. If there is an accidental mix of undyed diesel fuel with dyed kerosene, then you reblend it with dyed kerosene, resell it, and sales tax is paid at resale.
14.1	Removes reference to type of payment for food purchased under the Food Stamp Program, because counties are beginning to use a system in which a type of credit card will be used in lieu of food stamps or coupons.
15	Modifies the definition of interstate carrier for purposes of sales tax refunds to reflect the deregulation of the industry.
15.1	Makes a conforming change to reflect a change under the Equitable Distribution Laws that now provides for the distribution of marital property and divisible property.
16	Provides that a gift tax return is not required for gifts that are exempt from tax: gifts to charity and gifts between spouses. The 1997 federal tax act made a similar change to the federal gift tax, which formerly required returns for gifts to charity above $10,000.
17	Removes incorrect language describing the calculation of the gross premiums tax.
18	Clarifies insurance company tax exemption language. G.S. 105-228.10 was enacted in 1945 to provide that local governments may not levy additional taxes on insurers and other entities subject to the gross premiums tax. This section rewrites the statute to state that cities and counties are prohibited from levying a privilege license tax or a gross premiums tax on entities subject to gross premiums tax. The vague language of the statute is rewritten to clarify that insurance companies are not exempt from local sales taxes, local meals taxes, and other similar taxes that the General Assembly has authorized for local governments since this statute was enacted in 1945. Insurance companies currently pay these taxes and the terms of the tax statutes make it clear that they are not exempt.
19	Deletes an individual income tax exemption that is no longer needed because federal law exempts the same income and our law piggybacks the federal law.
20	Provides that tax information may be shared on a reciprocal basis with tax officials from jurisdictions outside the United States, as required by the International Fuel Tax Agreement.
21	Clarifies that taxpayers may rely upon all interpretations published by the Department of Revenue to the same extent as provided under current law only for specified types of interpretations.
22 - 24	Remove ambiguities in the use value property tax law that were created unintentionally when these statutes were rewritten and reorganized in 1995. The rewrite created

	potential, although strained, interpretations that deferred taxes were no longer required to be paid in some or in many cases where the law has always intended for them to be paid. These sections clarify that the law with respect to "rollback" of deferred taxes was not restricted by the 1995 rewrite. They also make further clarifying changes to the language.
25	Revises definition of public service company to reflect deregulation of carriers and to conform to Institute of Government interpretation that regulation requirement applies only to catch-all category of "any other company performing a public service."
26 - 27	Repeal two property tax provisions that have expired.
28	Clarifies that motor fuel sold to the federal government is exempt only if sold for use by the federal government.
29	Repeals a provision allowing refunds for motor fuel tax paid by marinas. Federal law no longer requires marinas to pay tax on motor fuel they purchase, so refunds are no longer necessary.
30	Corrects an incorrect cross-reference.
30.1	Removes reference to type of payment for food purchased under the Food Stamp Program, because counties are beginning to use a system in which a type of credit card will be used in lieu of food stamps or coupons.
31 - 32	Deletes provisions that have expired.
33 - 35	Corrects incorrect term describing short-term rental vehicles.
36	Reenacts a law modifying historic rehabilitation tax credits. The law was not roll called. Although the law expands the credits, in certain instances it could postpone part of the tax benefit allowed under prior law.
37	Repeals an obsolete tax on consigned candy products.
38	Amends the Setoff Debt Collection Act to reflect the new names given to public assistance programs by the 1997 welfare reform legislation, and to remove excess verbiage that resulted from a redlining error.
39	Conforms the structure of the Revenue Laws Study Committee statute to fit the requirements of the General Assembly's new computer system, and corrects gender-specific language.
40	Repeals list of cross-references to Highway Bond Acts. The list is incomplete and serves no purpose.
41 - 54	Change from "Division" to "Part" the name of the subdivisions within Articles of Chapter 105 of the General Statutes, in order to be consistent with all other General Statutes. The new computer statutory database software will function better with consistent nomenclature.
55 - 67	Eliminate the term "Schedule" used as an additional name for Articles in Chapter 105 of the General Statutes, in order to be consistent with all other General Statutes. The new computer statutory database software will function better with consistent nomenclature.

68 - 113	Change cross-references to "Divisions" and "Schedules" to "Parts" and "Articles," respectively.
114	Provides that the act is effective when it becomes law, August 6, 1998.

S.L. 1998-100 (House Bill 1422, Representative C. Wilson)

AN ACT TO REMOVE UNCONSTITUTIONAL RESTRICTIONS ON INDIVIDUAL INCOME TAX CREDITS FOR CHILD CARE AND FOR CONSTRUCTING DWELLINGS FOR THE HANDICAPPED.

This act amends two individual income tax credits to remove restrictions that prevent nonresidents from taking the credits. These restrictions are probably unconstitutional in light of a recent United States Supreme Court case. The act is effective for taxable years beginning on or after January 1, 1998. Its impact upon the General Fund is expected to be no more than $600,000 a year. This act is a recommendation of the Revenue Laws Study Committee.

On January 21, 1998, the United States Supreme Court held in Lunding v. New York that a state's tax laws must treat nonresidents on terms of 'substantial equality' with residents. The Court found that New York's individual income tax could not deny the alimony deduction to nonresidents while granting it to residents. The Court concluded that while the Privileges and Immunities Clause of the United States Constitution affords states considerable discretion in formulating their income tax laws, there must be a substantial reason for the difference in treatment of residents and nonresidents within a tax structure.

North Carolina has two individual income tax credits that only residents could claim: the credit for construction of dwelling units for handicapped persons and the credit for child care and certain employment-related expenses. As discussed below, there does not appear to be any reason, much less a substantial one, for prohibiting nonresidents from taking either credit. It appears, therefore, that the part of each credit limiting it to residents would likely have been ruled unconstitutional if challenged. This act removes the restriction of the construction credit to residents, and modifies the child care credit so that a nonresident may take a proportional amount of the credit based on the percentage of his or her income that is taxable to North Carolina.

G.S. 105-151.1 grants an individual income tax credit for construction of multi-family rental units that conform with mandatory building code requirements related to accessibility by the handicapped. The dwelling units must be located in North Carolina. The credit was limited to North Carolina residents. The residence of the owner bears no relation to the benefit to this State of having handicapped-accessible dwellings constructed. Furthermore, the same credit is allowed under the corporate income tax law, but without any restriction based on the residence or domicile of the taxpayer that constructs the dwelling units.

G.S. 105-151.11 grants an individual income tax credit for child care or similar expenses incurred so the taxpayer may be gainfully employed. The credit was not allowed to nonresidents. For nonresidents employed in North Carolina, the expenses would be directly related to the taxpayer's North Carolina income and thus there seems to be a substantial reason that the credit should be allowed rather than disallowed. In any case, legislative history of this credit shows that the provision preventing nonresidents from claiming the credit was retained in the law due to an oversight in 1981, when it should have been repealed.

The tax credit for child care expenses was formerly a deduction. On July 9, 1981, the General Assembly repealed the deduction and replaced it with a credit. At that time, nonresidents were not allowed to take income tax deductions that were not directly connected to their North Carolina income. Thus, in changing the deduction to a credit, the General Assembly retained the rule that nonresidents could not take advantage of the tax benefit. A few months later, however, the General Assembly abandoned its policy of disallowing nonresidents' deductions for expenses unrelated to North Carolina income and enacted a new law allowing a nonresident to take a proportional amount of these deductions. Through an oversight, the restriction that had been carried forward from the child care deduction to the child care credit was not similarly modified. Because this restriction remained in the law only because of an oversight, a court would have been unlikely to find the required substantial reason for it to be upheld in a constitutional challenge.

S.L. 1998-121 (House Bill 1367, Representative Hill)

AN ACT TO RAISE THE SALES TAX QUARTERLY THRESHOLD AND TO REPEAL THE ANNUAL WHOLESALE SALES TAX LICENSE.

This act makes three changes to the sales tax law, as recommended by the Revenue Laws Study Committee:

- It raises the sales tax quarterly threshold from $50 to $100, effective July 1, 1999.
- It repeals the annual wholesale sales tax license, effective July 1, 1998.
- It changes the name of the retail sales tax license to certificate of registration.

The act is expected to reduce General Fund revenues by about $1.3 million a year. It will also cause a one-time shift of about $2 million from the 1999-2000 fiscal year to the 2000-01 fiscal year.

Taxpayers that are consistently liable for at least $20,000 a month in State and local sales and use taxes must file sales and use tax returns and remit taxes on a semimonthly basis. Under prior law, taxpayers that were liable for less than $50.00 a month in State and local sales and use taxes could file returns and remit the sales and use taxes owed on a quarterly basis. All other taxpayers would file returns and remit taxes on a monthly basis.

Section 1 of this act increases the sales tax quarterly threshold from $50 to $100, effective July 1, 1999. This change means that approximately 10,000 taxpayers that are now filing monthly sales and use tax returns will be able to file quarterly returns. The change will reduce the number of returns currently being filed by one-third. The threshold was last increased in 1991 from $25 to $50. This change in the law will mean that approximately $2 million that would have been collected in fiscal year 1999-2000 will not be collected until fiscal year 2000-01 because two months of collections are shifted into the 2000-01 fiscal year.

Under prior law, a wholesale merchant was required to obtain both a wholesale sales tax license and a certificate of registration, referred to in the statute as a retail sales tax license. The form for the two licenses was the same and the information necessary to obtain both of these licenses was the same. The only difference was that the wholesale sales tax license was an annual license that costs $25. The certificate of registration needs to be acquired only once and costs $15.

Section 2 of this act repeals the wholesale sales tax license, effective July 1, 1998. The Department of Revenue does not need the information from this license because the wholesale merchant has already provided the Department with the information it needs on the certificate of registration. The tax is also expensive to collect and document and is a nuisance tax for wholesale businesses to report and pay.

Section 3 rewrites the law to clarify that both wholesale merchants and retailers must obtain a certificate of registration before beginning business. Although the statute refers to the certificate as a "retail sales tax license", it must be obtained by both wholesale merchants and retailers because a privilege tax is imposed on both of them under the sales and use tax article. The act changes the name of the license to a "certificate of registration" because that more accurately reflects the nature of the document. It also corresponds to the name it is most commonly known as in the business community: a "Merchant's Certificate of Registration".

Unlike the annual wholesale sales tax license, the certificate of registration needs to be obtained only once. It is valid unless it is revoked because the retailer or wholesale merchant fails to comply with the sales and use tax law. In the case of a retailer, the certificate becomes void if the retailer does not make any sales for a period of 18 months. If the certificate is revoked or becomes void, the retailer or wholesale merchant must register with the Department and obtain a new certificate of registration before engaging in business.

S.L. 1998-132 (Senate Bill 1354, Senator Kerr)

AN ACT TO AUTHORIZE THE ISSUANCE OF GENERAL OBLIGATION BONDS OF THE STATE, SUBJECT TO A VOTE OF THE QUALIFIED VOTERS OF THE STATE, TO ADDRESS STATEWIDE CRITICAL INFRASTRUCTURE NEEDS BY PROVIDING FUNDS (1) FOR GRANTS AND LOANS TO LOCAL GOVERNMENT UNITS FOR WATER SUPPLY SYSTEMS, WASTEWATER COLLECTION SYSTEMS, WASTEWATER TREATMENT WORKS, AND WATER CONSERVATION AND WATER REUSE PROJECTS AND (2) FOR GRANTS, LOANS, OR OTHER FINANCING TO PUBLIC OR PRIVATE ENTITIES FOR CONSTRUCTION OF NATURAL GAS FACILITIES.

The act, known as the "Clean Water and Natural Gas Critical Needs Bond Act of 1998", authorizes the issuance of general obligation bonds in the amount of $1 billion. The issuance of these bonds, $800 million for water and sewer bonds and $200 million for natural gas bonds, was approved by a majority of the voters in the November 1998 election. The act also increases the maximum principal amount of revolving loans and grants that may be made to local government units from the funds in the Clean Water Revolving Loan and Grant Fund. The maximum principal amount of grants made to any one local government unit during any fiscal year is increased from $1 million to $3 million. Finally, the act establishes a 19-member State Infrastructure Council within the Department of Environment and Natural Resources (DENR). The purpose of the Council is to develop a State strategic plan that addresses the State's water supply and distribution and wastewater treatment needs.

Use of Clean Water Bond and note proceeds.

The act provides for the issuance of $800 million of Clean Water Bonds. Public necessity and specific criteria listed in the act for various allocations of the Clean Water Bonds are the primary considerations in granting and loaning these proceeds. In addition, special emphasis is placed on the creation of efficient water supply and wastewater collection and disposal systems, sound fiscal policies, creative planning, efficient operation and management, development of a capital improvement plan, compliance with watershed protection requirements, and use of proceeds to address current critical infrastructure needs.[8] None of the Clean Water Bond proceeds may be used for a low-pressure pipe wastewater system or for construction of a new water and sewer line to provide water and sewer connection in a designated watershed area.[9]

$500 million of the proceeds of the Clean Water Bonds are to be issued as follows:

- $330 million are to be used by DENR to provide high-unit cost grants to local government units. These grants are for the purpose of paying the cost of water supply systems, wastewater collection systems and wastewater treatment works, water conservation projects, water reuse projects, and rural school water or wastewater projects. In order for a high-unit water supply or wastewater project to be eligible for a grant, the project must require estimated average household water and sewer user fees greater than 1 ½% of the median household income in the local government unit in which the project is located. S.L. 1998-212, enacted October 30, 1998, clarifies the statutory criteria used to determine eligibility of an applicant for a high-unit cost grant for a wastewater or water supply project. The amended definition clarifies that if an applicant is constructing its first utility or has only a single utility and is upgrading that utility, then the applicant's eligibility is determined by comparing the project's debt service, operation, and maintenance costs to ¾% of the median household income in the local government unit. The requirement that a project's debt service, operation, and maintenance cost be compared to 1 ½% of the median household income applies only when the applicant has two utilities (water and sewer).

- $35 million are to be used by DENR to provide State matching funds for federal wastewater or water supply funds.

- $20 million are to be awarded and administered by the Department of Commerce for the purpose of making grants to local government units to pay the cost of clean water projects in connection with the location of industry to, and expansion of industry, in the State. These grants may be made only for projects that are located in economically distressed counties, that will have a favorable impact on the State's clean water objectives, and that deal with manufacturing and warehousing and wholesale trade.

- $60 million are to be awarded and administered by the Rural Economic Development Center as supplemental and capacity grants to eligible local government units. Eligibility criteria include the requirement that an applicant be a rural county, a local government unit in a rural county, or a county applying for a grant on behalf of a rural school. Projects located within economically distressed counties receive priority. A

[8] These special emphases do not apply to the allocation of $35 million of Clean Water Bonds for State matching funds or the allocation of $20 million of Clean Water Bonds for economic development.

[9] These prohibitions on the use of Clean Water Bonds do not apply to the allocation of $35 million of Clean Water Bonds for State matching funds.

grant awarded to a rural county that is not an economically distressed county must be matched by the county on a dollar-for-dollar basis.

- $55 million are to used for grants to local government units that are unsewered communities, that have a population of 5,000 persons or less, and that have a median household income that does not exceed 90% of the national median household income. To be eligible for a grant, a local government unit must agree to adopt a fee schedule that reflects at least the average annual water and wastewater cost per household calculated at 1 ½% of the median household income in the unit's jurisdiction. S.L. 1998-212, enacted October 30, 1998, clarifies that a local government unit that is constructing its first utility or that has only a single utility and is upgrading that utility, is eligible for these grants if it agrees to adopt a fee schedule that reflects at least the average annual water or wastewater cost per household calculated at ¾% of the median household income in the applicant's jurisdiction. These grants are to be awarded and administered by the Rural Economic Development Center. The act defines unsewered communities as "lacking centralized publicly owned wastewater collection systems and wastewater treatment works."

The remaining $300 million of the $800 Clean Water Bonds are to be used to provide loans to local government units to pay the cost of water supply systems, water conservation projects, water reuse projects, wastewater collection systems, and wastewater treatment works. A county may also apply for a loan for one of these projects on behalf of a rural school located in the county. DENR is to set the priorities for the loans. DENR and the Local Government Commission determine the eligibility of local government units for these loans. Each loan applicant must demonstrate its financial capacity to repay the loan and agree to adopt and effect a schedule of fees and charges that will provide for proper operation, maintenance, and administration of the projects.

Use of Natural Gas Bond and note proceeds.

The act provides that $200 million of Natural Gas Bonds are to be used for the purpose of providing grants, loans, or other financing to natural gas local distribution companies, persons seeking natural gas distribution franchises, State or local government agencies, or other entities for construction of natural gas facilities in unserved areas of the State. The following 22 counties are currently unserved: Alleghany, Ashe, Camden, Carteret, Cherokee, Chowan, Clay, Currituck, Dare, Gates, Graham, Hyde, Jackson, Jones, Madison, Pamlico, Pasquotank, Pender, Perquimans, Swain, Tyrrell, and Washington.

Reports required.

The entities making grants or loans under the act must file a yearly report with the Joint Legislative Commission on Governmental Operations and the Fiscal Research Division. Each report must show the allocation and making of loans or grants authorized by the act for the preceding fiscal year. Entities making the grants must also monitor compliance with the statutory goals for participation in projects by minority businesses and report to the General Assembly annually regarding minority business participation.

S.L. 1998-134 (House Bill 1617, Representative Mitchell)

AN ACT TO EXTEND THE INCOME TAX CREDIT FOR POULTRY COMPOSTING FACILITIES TO CORPORATE ENTITIES AND TO REMOVE THE SUNSET FOR THE INDIVIDUAL INCOME TAX CREDIT.

This act removes the sunset from the individual income tax credit for constructing a poultry composting facility in this State for composting poultry carcasses resulting from commercial poultry operations. The credit would otherwise have expired in the 1998 tax year. The individual income tax credit was available only to individuals, shareholders in Subchapter S corporations, and other individual owners of pass-through entities. This act expands the credit to C corporations. The act is expected to reduce General Fund revenues by approximately $30,000 a year.

The amount of the credit allowed is 25% of the installation, equipment, and materials costs of building the facility, not to exceed $1,000. The credit does not apply to costs paid with funds provided to the taxpayer by a State or federal agency. The amount of the credit allowed cannot exceed the amount of tax imposed for the taxable year and any unused credit may not be carried forward to succeeding taxable years.

A poultry composting facility is a structure or an enclosure in which whole, unprocessed poultry carcasses are decomposed by a natural process into an organic, biologically safe byproduct that can be used for plant food. Every person engaged in raising poultry for commercial purposes who has a flock of at least 200 fowl is required to dispose of the poultry carcasses in a pit, an incinerator, or a poultry composting facility that has been approved by the Department of Agriculture. In the poultry business, the grower of a bird is often not the owner of the bird. The burden of disposing of poultry carcasses is usually on the grower of the bird.

The purpose of the credit is to encourage people who raise turkeys, chickens, or other poultry to compost the dead poultry rather than burn it or put it in a pit. By composting the poultry carcasses, the by-product can be converted into a useful product.

S.L. 1998-139 (House Bill 1489, Representative Neely)

AN ACT TO IMPROVE COLLECTION OF LOCAL TAXES BY ALLOWING CERTAIN GOVERNMENT OFFICIALS TO SHARE SPECIFIED TAX INFORMATION AND BY ALLOWING A TAXPAYER TO RECEIVE A RELEASE OR REFUND OF PRORATED VEHICLE PROPERTY TAXES IF THE TAXPAYER MOVES OUT-OF-STATE.

This act makes three changes relating to local taxes. The changes, which became effective September 14, 1998, relate to sharing of certain tax information and to property taxation of motor vehicles. First, the act authorizes the Department of Revenue and county tax officials to share information about the taxes paid on leased vehicles with each other and with a regional public transportation authority or a regional transportation authority. Second, it authorizes State tax officials to share information regarding sales and use taxes with city and county government representatives. Third, it also gives counties the specific authority to release or refund the taxes on a motor vehicle when the taxpayer moves out of state and surrenders his or her license plate. This last change was recommended by the Revenue Laws Study Committee.

Information sharing of taxes on leased vehicles by the Department of Revenue.

The Department of Revenue collects the alternate highway use tax, which is a gross receipts tax on vehicle rentals. Regional transit authorities are authorized to levy gross receipts taxes on vehicle rentals. The act provides an exception to G.S. 105-259, which prohibits the Department of Revenue from revealing confidential tax information. The act authorizes the Department of Revenue to provide regional transit authorities, on an annual basis, identifying information about the retailers from whom it collects the State vehicle rental tax. The compliance and audit information gathered by the Department of Revenue in collecting the State vehicle rental tax will assist regional authorities in enforcing their local vehicle rental taxes.

In 1997, the General Assembly enacted S.L. 1997-417, which authorized a regional transit authority to levy a gross receipts tax of up to 5% on retailers within the region engaged in the business of renting passenger motor vehicles and motorcycles. The tax applies only to short-term rentals, i.e., rentals for a period of less than one year. The tax is collected by the authority but is otherwise administered in the same way as the optional highway use tax on gross receipts from vehicle rentals. This optional highway use tax is 8% on short-term rentals, so the combined tax within the jurisdiction of the authority would be 13% if the authority levies the full 5%. Each authority may use the proceeds of the tax for its public transportation purposes. Before levying or increasing the tax, the authority must obtain approval from each county in the region.

A regional transit authority is a regional public transportation authority created under Article 26 of Chapter 160A of the General Statutes or a regional transportation authority created under Article 27 of Chapter 160A of the General Statutes. The authority created under Article 26 is the Triangle Transit Authority for Wake, Durham, and Orange Counties. Article 27 authorizes the creation of a regional transit authority for the Triad region. The counties served by the Authority would be Forsyth, Guilford, Randolph, Davidson, and Alamance. The four major cities involved in the Authority's creation are Greensboro, High Point, Winston-Salem, and Burlington.

Information sharing of sales and use taxes by the Department of Revenue.

The Department of Revenue also collects sales and use taxes from retailers, including restaurants and other businesses that sell prepared food and beverages. Several local governments are authorized to levy local taxes on prepared food and beverages. They are Charlotte/Mecklenburg, Cumberland County, Dare County, Wake County, and the Town of Hillsborough. The act authorizes the Department of Revenue to provide counties and cities, on an annual basis, identifying information about the retailers from whom it collects sales and use taxes who might be engaged in the business of selling prepared food and beverages. This sharing of information will assist local governments in enforcing their local taxes on prepared food and beverages.

Information sharing of taxes by counties and regional transit authorities.

Some counties audit vehicle rental dealers for property tax purposes and audit retailers of prepared food and beverages for purposes of the local meals tax. G.S. 153A-148.1, however, prohibits counties from sharing tax information about a taxpayer's income or receipts. This information could assist regional transit authorities in enforcing their vehicle rental taxes and could assist the State in enforcing the sales and use tax it collects. The act adds two exceptions to the statute so that counties and regional transit authorities may (1) exchange tax information about vehicle rental dealers with one another when the exchange will aid either agency in fulfilling its

duties, and (2) provide tax information to the Department of Revenue when the information will help the Department in its duties.

Property Taxation of Motor Vehicles.

Since 1993, counties have taxed motor vehicles that are registered with the Division of Motor Vehicles (DMV) on a revolving, year-round basis. If the taxes remain unpaid for more than four months after they become due, the county places a block on the vehicle's registration with DMV. This block provides an incentive for taxpayers to pay the taxes. The block has no impact on a taxpayer who has moved out of the State during the tax year. In most instances the taxpayer is willing to pay the taxes on the part of the tax year that the vehicle was registered in North Carolina but does not want to pay the entire year's taxes. In the past, some counties have prorated the amount of taxes due in order to obtain part of the tax liability, although they did not have the statutory authority to do so. The act provides that authority, by requiring the partial release or refund of property taxes on a motor vehicle when the taxpayer surrenders the vehicle's registration plate to the DMV because the taxpayer has moved out of state and registered the vehicle in another jurisdiction. The taxpayer may apply for a release or refund of taxes on the vehicle for any full calendar months remaining in the vehicle's tax year after the date of surrender.

S.L. 1998-146 (Senate Bill 1230, Senator Kerr)

AN ACT TO CLARIFY THE TAXATION OF KEROSENE AND TO MAKE OTHER CHANGES IN THE MOTOR FUEL TAX LAWS.

This act makes changes in several different areas of the motor fuel tax laws that needed addressing. It clarifies the taxation of kerosene, provides automatic refunds to motor carriers, imposes a penalty for improper reporting, and makes several clarifying and conforming changes to the motor fuel tax laws.

As a means to address motor fuel tax evasion, the federal government in 1994 began requiring motor fuel to be dyed if it was non-tax-paid fuel. North Carolina passed a similar act in 1994. Under federal and State law, it is unlawful to use dyed diesel fuel in a vehicle used on the highway because the dye indicates that fuel taxes have not been paid on that fuel. Effective July 1, 1998, the federal government began requiring kerosene to be dyed. This act conforms North Carolina's law with the federal law by amending the definition of the term "diesel fuel" to include kerosene. This change makes it a State violation, as well as a federal violation, to use dyed kerosene for a highway use.

This change in the law also means that undyed kerosene will be taxed at the rack. Prior to July 1, 1998, the taxation of kerosene occurred when it was blended with other fuel to be used for highway purposes. This part of the act applies to kerosene sold on or after July 1, 1998. To help the Department of Revenue track the path of kerosene that had been removed from the terminal transfer system prior to July 1, 1998, the act required retailers, distributors, importers, and suppliers who had kerosene on hand or in their possession as of 12:01 a.m. on July 1, 1998, to inventory the kerosene and report the results of the inventory to the Secretary of Revenue by July 15, 1998. Originally, the legislation required these people to pay tax on this kerosene. The act, however, does not require the tax to be paid, but it does require the inventory to be made and submitted to the Department of Revenue.

The act makes conforming changes to the motor fuel tax laws to provide the proper exemptions from, and refunds of, the excise tax on motor fuels for undyed kerosene used for non-highway purposes. It adds diesel fuel that is kerosene and that is sold to an airport to the list of fuels exempt from the motor fuels tax. It provides that a distributor will be allowed to obtain a refund of the tax paid on kerosene when it is sold to an end user for heating if the kerosene is dispensed into the end user's storage facility that contains fuel used only for heating. It also provides that a distributor will be allowed to obtain a refund of the tax paid on the kerosene when it is sold to a retailer for non-highway use if the kerosene is dispensed into a storage facility marked for non-highway use and the storage facility is equipped with a dispensing device that is not suitable to fuel highway vehicles. The act clarifies that kerosene sold for a non-highway use is subject to sales tax.

Effective July 1, 1998, the act provides for an automatic refund to a motor carrier whose credit exceeds its tax liability. A carrier operating in this State is taxed on the amount of motor fuel the carrier used in the State and is entitled to a credit for the motor fuels tax it paid on purchases made in this State. Under former law, a carrier had two years to request a refund when its tax credits exceeded its tax liability. If the motor carrier failed to request a refund within two years of tax payment, then the Department of Revenue kept the overpayment. From 1990 to 1996, the Department earned $6 million or approximately $83,300 per quarter from lapsed refunds. Since the complete implementation of the International Fuel Tax Agreement in 1996, motor carriers have been more aggressive in seeking refunds owed to them. Based on a review of the second quarter of 1997, the amount of lapsed refunds was down to $60,000. Under this act, carriers will automatically receive refunds and the Highway Fund will no longer receive $240,000 in unanticipated revenues from lapsed refunds each year.

Effective January 1, 1999, the act imposes a penalty on a licensed distributor or licensed importer who deducts an exempt sale when paying the excise tax to a supplier and then fails to report the exempt sale when filing a reconciling return. The amount of the penalty is $250.00. The Department of Revenue anticipates a revenue gain from this penalty, but it cannot estimate the amount.

The act also makes the following changes to the motor fuel tax laws. With the exception of the first change listed below, the changes became effective when the act became law, September 18, 1998:

- It expands the definition of "two-party exchange" to include sales between suppliers to address buy-sell agreements. This change is effective for transactions occurring on or after January 1, 1999.

- It requires a carrier who denies liability for a penalty to pay the penalty under protest and then apply to the Department for a hearing.

- It gives the Secretary of Revenue the authority to send a letter of release instead of returning a bond when a license holder files a bond or irrevocable letter of credit as a replacement for a previously filed bond or letter of credit and the license holder has paid all taxes and penalties due. The Secretary already has this authority under G.S. 105-449.76 when a license is canceled.

- It creates a presumption that <u>all</u> fuel delivered to a storage facility marked for non-highway use was used for highway purposes and is therefore subject to tax **if** the Secretary determines that a bulk-end user or retailer used or sold <u>any</u> of the untaxed

dyed diesel fuel from that storage facility to operate a highway vehicle. This presumption currently applies to alternative fuels in G.S. 105-449.138(b).

- It clarifies the due date for applications for refunds of the motor fuel tax.
- It requires an applicant for a license to engage in the alternative fuel business to be incorporated, organized, or formed in this State or authorized to transact business in this State. If the applicant is an individual or a general partnership, the applicant must designate an agent for service of process in this State. An applicant for a license to engage in the motor fuel business must already meet this requirement.

S.L. 1998-158 (Senate Bill 1242, Senator Hoyle)

AN ACT TO PROVIDE FOR A WIRELESS ENHANCED 911 SYSTEM FOR THE USE OF CELLULAR, PERSONAL COMMUNICATIONS SERVICE, AND OTHER WIRELESS TELEPHONE CUSTOMERS, AS RECOMMENDED BY THE JOINT LEGISLATIVE UTILITY REVIEW COMMITTEE, AND TO ALLOW STATE AGENCIES TO LEASE PUBLIC PROPERTY FOR THE CONSTRUCTION OF WIRELESS COMMUNICATIONS TOWERS AND TO ENCOURAGE CO-LOCATION OF SERVICES TO THOSE TOWERS, AND TO MAKE A TECHNICAL CORRECTION TO G.S. 62A-10.

This act establishes a system for charging cellular telephone users for enhanced 911 service and establishes a method of administering and distributing the funds collected. An enhanced 911 system is one that provides cellular users with 911 service, directs wireless 911 calls to the appropriate dispatch agency based on where the calls originate, and enables the dispatch agency to determine the location and telephone number of the caller.

The service charges authorized by the act went into effect October 1, 1998. The revenues will be used to reimburse cellular service providers and 911 dispatch agencies for their costs in establishing federally required wireless enhanced 911 systems. Thus, the act does not affect the General Fund.

The act creates a thirteen-member Wireless 911 Board that will determine the service charge to be levied on cellular telephone users for wireless enhanced 911 service, aggregate the charges collected, and distribute them for purposes of paying for these systems. The Board is apparently a State entity; it is chaired by the Secretary of Commerce.

The initial service charge is 80¢ per month. The Board may adjust the rate every two years to a rate that will ensure full cost recovery by cellular service providers and 911 dispatch agencies over a reasonable period of time. The charge cannot exceed 80¢ per month.

Cellular service providers will collect the monthly service charge from their customers and may deduct 1% of the amounts collected as reimbursement for administrative expenses. The funds are to be deposited with the State Treasurer within 30 days after the end of each month. The Board will distribute these funds, and may retain 1% for administrative expenses. The act clarifies that the service charges are not considered taxable gross receipts or taxable income to the cellular service providers that collect them.

Sixty percent of the funds may be used to reimburse cellular service providers for complying with federal wireless 911 requirements, including design, upgrade, purchasing, leasing, programming, installing, testing, and maintaining of hardware and software components and data necessary to operate the system. Forty percent will be distributed to the agencies that receive incoming 911 calls and make the dispatches. Half of this 40% is distributed on a pro rata basis and the other half is distributed on the basis of population served. Dispatch agencies may use the funds only for the direct costs of establishing and maintaining a wireless enhanced 911 system. The act establishes audit and reporting requirements to assure that the funds are used only in accordance with law.

In 1996 and 1997, the Federal Communications Commission adopted orders intended to foster major improvements in the quality and reliability of 911 services available to customers of cellular service providers. The orders directed cellular service providers to adopt systems that automatically inform 911 dispatch agencies of the location and telephone number of cellular 911 callers. The FCC orders indicated that this requirement applies only if the system is requested by the 911 dispatch agencies, the dispatch agencies have made the necessary investment in equipment to receive the information, and a cost recovery mechanism is in place. This act provides the necessary cost recovery system.

S.L. 1998-162 (House Bill 1318, Representative Neely)

AN ACT TO LIMIT THE NONRESIDENT WITHHOLDING REQUIREMENT TO ATHLETES AND ENTERTAINERS, TO INCREASE THE THRESHOLD REQUIREMENT FOR NONRESIDENT WITHHOLDING, AND TO PROVIDE A MECHANISM TO ENHANCE COLLECTION OF TAXES FROM NONRESIDENTS ENGAGED IN CONSTRUCTION-RELATED BUSINESSES.

This act limits the withholding requirement for payments to nonresident contractors so that it applies only to payments to contractors doing business as athletes and entertainers. It clarifies that radio programs, like television and film programs, are a form of entertainment for purposes of the withholding requirement. It also limits the requirement to payments to a nonresident contractor in excess of $1,500 a year. These changes relating to withholding become effective retroactively as of January 1, 1998. Originally, the withholding requirement also applied to construction-related trades. Although this act removes construction-related trades from the income tax withholding requirements, it does require occupational licensing boards for construction-related trades to cooperate with the Department of Revenue to assure that nonresidents pay delinquent taxes before being licensed to do business in this State. Most of these changes affecting occupational licensing become effective July 1, 1999. The changes made by this act are expected to reduce General Fund revenues by $7 million a year.

Many nonresidents who derive income from North Carolina do not pay the North Carolina tax due on this income. To address this collection problem, the 1997 General Assembly enacted S.L. 1997-109 to require payers to withhold 4% from the compensation paid to nonresident individuals and nonresident entities for personal services performed in North Carolina if the compensation exceeded $600 in the calendar year. The nonresident withholding

requirement was suggested by the Department of Revenue and recommended to the 1997 General Assembly by the Revenue Laws Study Committee. The withholding requirement was phased in as follows: beginning January 1, 1998, it applied to payments to individuals for any personal services and payments to entities for services relating to entertainment, athletic events, and construction; it was to be expanded to payments to entities for all personal services effective January 1, 1999.

After S.L. 1997-109 became law, legislators, staff, and the Department of Revenue were contacted by businesses that were required to withhold from their payments for personal services. These businesses stated that the withholding requirement would create an expensive, time-consuming burden on them. They would have to reprogram their accounting software, examine invoices manually, and make difficult judgment calls regarding where services were performed. Large, multistate corporations in particular claimed that the new law would be burdensome. In response to these concerns, the Revenue Laws Study Committee recommended this act, which repeals nearly the entire withholding requirement. The only part that it retains is the requirement to withhold from payments for services relating to entertainment and athletic events.

As enacted by S.L. 1997-109, the withholding requirement applied to payments made to nonresident contractors only if the total payments exceeded $600 during a calendar year. The $600 threshold is the federal threshold for tax reporting under section 6041 of the Internal Revenue Code. This act raises the threshold for withholding from contract payments to nonresident athletes and entertainers from $600 to $1,500 a year. The higher threshold will have the effect of insulating organizations, such as PTAs, from having to withhold on their occasional payments to out-of-state entertainers.

The rollback of the withholding requirement becomes effective retroactively as of January 1, 1998. Anyone who had been complying with the law by withholding for services other than those performed by athletes and entertainers could choose to refund the withheld taxes only if the taxes had not yet been paid into the Department of Revenue. All taxpayers who had taxes withheld from their payments will receive a credit for the withheld taxes when they file their income tax return.

The rationale for limiting the withholding requirement to athletes and entertainers is that athletic and entertainment events can be easily identified by those required to withhold, the entire performance is clearly taxable to the state where it occurs, and, because of the large sums often involved, the administrative burden of withholding is small compared to the benefit the State receives. For other personal services performed by nonresidents, the burden of compliance outweighs the benefit because the services are less easily identified and may be performed partly in this state and partly in another state. For those, such as large, multistate corporations, who deal with a myriad of contractors for goods and services throughout the nation, the burden can be significant.

The act also adds reporting and licensing requirements for nonresident individuals and foreign entities that seek occupational licenses for construction-related occupations. These changes affect four occupational licensing boards:

1. The State Licensing Board for General Contractors
2. The State Board of Examiners of Plumbing, Heating, and Fire Sprinkler Contractors
3. The State Board of Examiners of Electrical Contractors
4. The North Carolina State Board of Examiners for Engineers and Surveyors.

The act provides that each of these licensing boards must require a nonresident corporation or a nonresident limited liability company to first obtain a certificate of authority from the Secretary of State before being licensed by the board to do business or, in the case of engineers and surveyors, before having their certificate of licensure renewed. This requirement would become effective July 1, 1999. General law requires all foreign corporations and foreign limited liability companies to obtain a certificate of authority from the Secretary of State before transacting business in this State. G.S. 55-15-01, G.S. 57C-7-02.

The act also provides a mechanism to prevent nonresident individuals and foreign entities from renewing their occupational licenses if they (or one of their partners or members, in the case of a partnership or limited liability company) owe a delinquent income tax debt. A delinquent income tax debt is a final debt after the taxpayer has been notified of the final assessment and no longer has the right to contest the amount. The provisions relating to individuals go into effect July 1, 1999. The provisions relating to entities go into effect July 1, 2000.

If requested by the Secretary of Revenue, each construction-related licensing board will provide the Secretary of Revenue annual lists identifying the name, address, and tax identification number of every nonresident individual and foreign entity licensed by the board. Occupational licensing boards are already required to obtain individual licensees' social security numbers under G.S. 93B-14. The Department of Revenue will check these lists against its records of taxpayers who owe delinquent income tax debts. If the Department of Revenue finds that a nonresident individual or a foreign corporation owes a delinquent tax debt, the Department will instruct the licensing board not to renew the taxpayer's license until the debt has been settled. If the Department of Revenue finds that a partner in a foreign partnership or a member of a foreign limited liability company owes a delinquent tax debt, the Department will instruct the licensing board not to renew the partnership or limited liability company's license until the debt has been settled. The license may be renewed once the licensing board receives written notice from the Secretary of Revenue that the debt has been settled.

This provision is similar to G.S. 93B-13, which revokes an occupational license if the licensee fails to comply with child support requirements. The provision is also similar to the law regarding property taxes on motor vehicles. The Division of Motor Vehicles provides the counties periodic lists of motor vehicles registered and renewed in this State. If the owner fails to pay local property taxes on the vehicle, the county notifies DMV not to renew the vehicle registration until the taxes are paid. This mechanism provides an incentive for taxpayers to pay their taxes.

Section 8 of the act clarifies that taxpayers are not entitled to an additional administrative hearing regarding a board's refusal to renew a license based on a delinquent income tax debt. The Department of Revenue will block renewals only for those debts for which the taxpayer has already been afforded full procedural rights required by the Due Process Clause of the United States Constitution.

S.L. 1998-171 (House Bill 1326, Representative Gray)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS, TO EXTEND THE CORPORATE INCOME TAX CARRY FORWARD FOR NET

ECONOMIC LOSSES, TO CONFORM TO FEDERAL GIFT TAX TREATMENT OF CONTRIBUTIONS TO QUALIFIED TUITION PROGRAMS, AND TO CORRECT TWO REDLINING ERRORS IN 1998 TAX LEGISLATION.

This act makes the following changes relating to tax law:

1. Upon recommendation of the Revenue Laws Study Committee, it rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from January 1, 1997, to September 1, 1998.
2. It conforms North Carolina tax law to the federal gift tax treatment of qualified tuition programs for taxable years beginning on or after January 1, 1998.
3. It extends the carryforward period for corporate net economic losses from five years to 15 years, effective for taxable years beginning on or after January 1, 1999, with a three-year cap on the amount of the extended losses that may be deducted.

Update Code Reference.

Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State law previously tracked federal law. This update generally has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law. Congress made numerous, significant changes to the Code in 1997 that will affect taxable income. Other changes to the Code were made by the Internal Revenue Service Restructuring and Reform Act of 1998. Because the State corporate and individual income taxes are based upon federal taxable income, these changes affect State policies and revenues.

The act provides that the recent federal tax changes that could increase a taxpayer's North Carolina taxable income for the 1997 tax year will not become effective until January 1, 1998. Under Article 1, Section 16 of the North Carolina Constitution, the General Assembly cannot pass a law that will increase a tax retroactively. There are a number of provisions in the federal Taxpayer Relief Act of 1997 and the Internal Revenue Service Structuring and Reform Act of 1998 that could increase taxable income for the 1997 tax year. Because the Code Update could not be acted upon until the 1998 Session of the General Assembly, these changes had to be given a delayed effective date.

The Code Update is expected to reduce General Fund revenues by $6.97 million in fiscal year 1998-99, $4.01 million in fiscal year 1999-2000, $10.70 million in fiscal year 2000-01, $18.53 million in fiscal year 2001-02, and $33.64 million in fiscal year 2002-03.

The following list summarizes some of the more significant changes to the Code:

1. Repeals the former rules on rollover and one-time exclusion for capital gains on the sale of a taxpayer's principal residence and replaces them with an exclusion of $250,000 ($500,000 for joint filers) of capital gain from the sale of a residence occupied by a taxpayer as a principal residence for two of the previous five years.
2. Expands the business expense deduction for self-employed individuals' health insurance to a percentage of 50% effective in 2000. The percentage is then phased up reaching 100% in 2007.

3. Establishes Roth IRAs effective for tax years beginning on or after 1/1/98, which allow nondeductible contributions of up to $2,000 of compensation (limited for those with adjusted gross income above a certain amount).
4. Expands existing IRAs by increasing the income limits and allowing an IRA for the spouse of a disqualified active participant, effective for taxable years beginning on or after 1/1/98.
5. Provides an income tax exemption for the annual earnings on amounts contributed to qualified tuition programs, such as North Carolina's Parental Savings Trust Fund, for the future payment of room or board at an institution of higher education. (Since North Carolina law already exempted these earnings, the North Carolina exemption is repealed because the law will automatically piggyback the federal exemption.)

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of bills like this. The answer to the question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law from year to year, the State may not want to adopt automatically all federal changes. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Section 2(1) of Article V of the Constitution provides in pertinent part that the "power of taxation…shall never be surrendered, suspended, or contracted away." Relying on this provision, the North Carolina court decisions on delegation of legislative power to administrative agencies, and an analysis of the few federal cases on the issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would…be invalidated as an unconstitutional delegation of legislative power."

The Revenue Laws Study Committee explored the possibility of legislation that would automatically adopt federal changes to the Code each year, with legislative review and approval required in the succeeding legislative session. It was hoped that this approach would avoid the practical difficulties that occur when Code changes go into effect many months before the General Assembly has a chance to pass legislation adopting the changes. The Attorney General's Office reviewed the relevant case law in this State and other states before concluding that this approach would be unlikely to withstand a constitutional challenge.

Qualified Tuition Plan Gift Tax.

The act adopts for North Carolina gift tax purposes the provisions of federal law listed below. Conforming to federal law will relieve taxpayers from unexpected gift tax liability and will simplify tax compliance and administration.

1. A distribution from a qualified tuition program is not a taxable gift, unless a new beneficiary, who is a generation below the original beneficiary, is named to the account or receives the account in a rollover.

2. A contribution to a qualified tuition program is a gift to the designated beneficiary, but not a gift of a future interest. If the contribution were considered a gift of a future interest, a gift tax return would have to be filed even if the amount were under the $10,000 annual exclusion amount.
3. A contribution to a qualified tuition program is not a direct payment of tuition. If it were, it would be exempt from gift tax.
4. If a contribution exceeds the $10,000 annual gift tax exclusion amount, the donor may elect to avoid gift tax by treating the contribution as if it had been made over a five-year period. For example, a $25,000 contribution would not be taxable because it would be considered a gift of $5,000 a year over five years and thus would be below the $10,000 annual exclusion amount. These provisions apply to any qualified state tuition program under section 529 of the Internal Revenue Code. North Carolina's Parental Savings Trust Fund is such a program.

Corporate Loss Carryforwards.

The act extends the corporate income tax carryforward for net economic loss deductions from five years to 15 years, effective beginning with the 1999 tax year. Losses from 1993 and later tax years will benefit from this extension. For the first three years this extension is in effect, the carryforward deduction for losses more than five years old is restricted to 15% of taxable income. Beginning with the 2002 tax year, there will be no cap on the deduction for losses carried forward. A net economic loss is the amount by which a corporation's deductions for a taxable year exceed its income from all sources, including income not taxable by the State. Income not taxable includes income items that are deductible in determining State net income as well as a multi-state corporation's nonbusiness income that is allocable to another state.

The carryforward period for the similar net operating loss deduction under the Internal Revenue Code was recently extended from 15 to 20 years, but most states allow no more than a fifteen-year carryforward period. Because it may be difficult for an auditor to substantiate a loss carryforward based on deductions that are ten to fifteen years old, the act clarifies that the corporation must maintain records that verify the amount of the loss deduction claimed and also provides that the taxpayer or the Secretary of Revenue may redetermine an item for a tax year that is closed under the statute of limitations in order to calculate a loss carried forward to an open year. The net economic loss carryforward is expected to reduce General Fund revenues by $3.70 million for each fiscal year beginning fiscal year 1999-2000 and ending fiscal year 2001-02. The reduction for fiscal year 2002-03 and thereafter will be $16 million a year.

S.L. 1998-178 (Senate Bill 1228, Senator Dalton)

AN ACT TO ENHANCE THE CRIMINAL PROVISIONS FOR TAX VIOLATIONS.

This act increases the criminal penalties for willful tax evasion and for aiding and abetting tax evasion, effective December 1, 1998. The act was recommended by the Revenue Laws Study Committee.

Before 1995, a person who willfully attempted to evade paying the amount of tax due, or who willfully helped another taxpayer attempt to evade paying the amount of tax due, could be

punished by an active prison sentence, a monetary fine, or both. Effective January 1, 1995, however, a person who committed these crimes could be punished only by a monetary fine. In some cases, the amount of tax money involved is quite large. In others, the deception is egregious. Some of the people charged with these crimes are charged with them repeatedly.

The Criminal Investigations Division of the Department of Revenue informed the General Assembly that punishment by fine only is not sufficient to deter many would-be tax evaders. For this reason, the Division recommended changing the classification of these two crimes from a Class I felony to a Class H felony, so that a sentencing judge would have the discretion to sentence defendants to active time if the circumstances justify such a punishment.

The act changes the nature of the offense for attempting to evade a tax and for attempting to help another evade a tax from a Class I felony to a Class H felony. For Class I felonies, a sentencing judge is limited to imposing a fine unless the person has been convicted of the crime several times. For Class H felonies, a sentencing judge may impose not only a fine, but also an active sentence for first-time offenders if it is justified. Unless otherwise stated, the amount of the fine is left to the discretion of the court. In order to give a sentencing judge more latitude, the act also deletes the tax statutes' cap on the fine that may be imposed for these offenses.

S.L. 1998-183 (House Bill 20, Representative McMahan)

AN ACT TO INCREASE TO SEVEN PERCENT THE INCOME TAX CREDIT FOR CHARITABLE CONTRIBUTIONS BY NONITEMIZERS.

This act increases the individual income tax credit for charitable contributions by nonitemizers, in order to provide an additional incentive for charitable giving. It increases the amount of the credit from 2.75% to 7% of eligible contributions, effective beginning with the 1999 tax year. The act is expected to reduce General Fund revenues by almost $8 million a year.

Under the federal Internal Revenue Code, an individual who itemizes deductions may deduct contributions to nonprofit charitable organizations. Individuals who elect the standard deduction, however, may not deduct charitable contributions. An individual's North Carolina's income tax is based on the federal calculation of taxable income, with some adjustments. The federal disallowance of charitable deductions for nonitemizers is "piggybacked" by North Carolina tax law. Legislation was introduced in Congress in 1996 to allow nonitemizers to deduct charitable contributions, but it did not pass.

Individuals who elect the standard deduction are those whose total itemized deductions (such as mortgage interest, State and local property and income taxes, medical expenses, and charitable contributions) do not exceed the standard deduction amount. The federal standard deduction amounts for 1997 are $6,900 for a married couple filing a joint return and $4,150 for a single individual.

In 1996, the General Assembly enacted G.S. 105-151.26, which allows a North Carolina income tax credit for 2.75% of a nonitemizer's charitable contributions to the extent the contributions exceed 2% of the taxpayer's adjusted gross income. A tax credit is a dollar-for-dollar subtraction from tax rather than a subtraction from taxable income. Thus, if a taxpayer pays tax at the 7% rate, a 7% tax credit is equal to a full deduction. North Carolina's tax rates are 6%, 7%, and 7.75%. By raising the credit from 2.75% to 7%, this act would make the credit equivalent to

the deduction currently enjoyed by most itemizers.

The House Select Committee on Nonprofits recommended a 7% nonitemizers tax credit to the 1996 General Assembly, but the percentage was reduced in the course of the legislative session. This act raises the credit to the level originally proposed. In the course of its study, the Committee on Nonprofits considered whether tax incentives make a difference in charitable giving. It learned that federal tax incentives do but state tax incentives probably do not because the state tax is so small that it does little to influence individual giving. However, the Committee believed that a state incentive may affect perceptions, and thus behavior, even if the tax reduction is too small to provide a significant economic incentive.

S.L. 1998-186 (Senate Bill 1150, Senator Dalton)

AN ACT TO DELAY THE SUNSET OF THE REQUIREMENT THAT COUNTIES USE PART OF THE TWO HALF-CENT LOCAL SALES TAX PROCEEDS ONLY FOR PUBLIC SCHOOL CAPITAL OUTLAY PURPOSES.

This act, based on a recommendation of the Education Oversight Committee, extends the period of time during which counties must use part of their local sales tax proceeds for public school capital outlay purposes. The act does not affect General Fund revenues.

There are three Articles of the Revenue Act that authorize counties to levy local sales and use taxes. Article 39 authorizes a one-cent tax, Article 40 authorizes a half-cent tax, and Article 42 authorizes an additional half-cent tax. Article 40 and Article 42 provide that the county is required to use a percentage of the tax revenue for public school capital outlay purposes, including retirement of outstanding debt. The earmarking in Article 40, enacted in 1983, was for the first ten fiscal years the tax was in effect and the earmarking in Article 42, enacted in 1986, was for the first eleven years that the tax was in effect. In 1993, the earmarking was extended for an additional five years for both Articles. Most counties enacted the first half-cent tax under Article 40 in 1983, so its 15 years' earmarking would have expired in 1998; most counties enacted the second half-cent tax under Article 42 in 1986, so its 16 years' earmarking would have expired in 2002.

This act extends the time periods under Articles 40 and 42 by 13 years and 9 years, respectively, so that the earmarking will continue to the year 2011. For these additional years, counties will be required to use 30% of the tax revenue from the first half-cent local sales tax (Article 40) and 60% of the tax revenue from the second half-cent local sales tax (Article 42) only for public school capital outlay purposes. In 1985, the General Assembly exempted Burke County from the restriction that it use a percentage of the first half-cent local sales tax for public school capital outlay purposes. This exemption will remain in effect.

If a county can demonstrate that it does not need the earmarked revenue to meet its public school capital needs, it may petition the Local Government Commission to authorize it to use the money for any public purposes. In making its decision, the Commission must consider not only the public school capital needs but also the other capital needs of the county.

This act also defines public school capital outlay purposes as the term is defined in the School Budget and Fiscal Control Act. The term is defined broadly in that act to include appropriations for the acquisition of real property and buildings for school purposes as well as the

acquisition of furniture, computers, equipment, buses, etc. The Local Government Commission currently interprets the term as it is defined in the School Budget and Fiscal Control Act. Therefore, this clarification of the law will not change the way counties are currently using the money.

S.L. 1998-197 (House Bill 1126, Representative Miner)

AN ACT TO EXEMPT LOCAL PAY PHONE SERVICES FROM SALES TAX.

This act exempts from sales tax pay telephone calls that are paid for by coin, effective January 1, 2000. Credit card calls and other calls not paid for by coin would not be exempt. The sales tax exemption allowed by this act is expected to reduce General Fund revenues by approximately $2 million annually. The gross receipts from sales of all local telecommunications services are subject to State sales tax at 3% (G.S. 105-164.4(a)(4a)) and State gross receipts tax at 3.22% (G.S. 105-120). There is no local sales tax on these services.

House Bill 1126 was introduced in April 1997 when pay telephone calls were regulated so that the owners were not permitted to raise the price of a call above 25¢. The owners complained that the sales tax forced them to operate at a loss because they could not increase the price of the calls to cover the tax. Later in 1997, however, pay telephones were deregulated and the price of most calls immediately increased by 40% or more, generating more than enough revenue to cover the 3% tax. Therefore, the effect of this act is to grant additional tax relief to pay phone owners.

Current law is very inconsistent with regard to sales taxes on sales from coin-operated machines. The following table shows the current law treatment:

Type of Coin Sale	State Sales Tax	Local Sales Tax	Tax Break
Phone Calls	0%	None	Exempt
Cigarettes	4%	2%	None
Soft Drinks	4%	2%	None
Other Vending Sales	4%	2%	50% Reduction
Washers & Dryers	0%	0%	Exempt

Coin-operated washers and dryers are exempt from sales tax. Sales taxes on other coin-operated vending machines, except soft drink and cigarette machines, are reduced by 50%. Sales taxes on coin-operated soft drink and cigarette machines are subject to the full 4% State sales tax and 2% local sales tax. Vending machine sales of food and beverages do not qualify for the reduced State sales tax on food, and are not subject to local prepared meals taxes.

S.L. 1998-218 (Senate Bill 1554, Senator Rand)

AN ACT TO AMEND THE EXCISE TAX ON CONTROLLED SUBSTANCES.

This act reduces certain tax rates of the excise tax on controlled substances in order to remove features of the tax found unconstitutional by the United States Court of Appeals for the Fourth Circuit in Lynn v. West.[10] It also removes the 50% penalty for failure to pay the tax and provides instead that interest and penalties for this tax will be the same as for all other taxes. The tax, at these new, lower rates, is expected to generate $1.3 million in General Fund revenues and $3.9 million for State and local law enforcement agencies. The act became effective October 26, 1998.

The purpose of the tax rate reductions is to remove features of the tax that caused the federal court to hold it unconstitutional. If these rate reductions have the effect of rendering the tax constitutional, then the State can collect the tax. If a court later holds that these rate reductions did not render the tax constitutional, the State could be required to refund taxes illegally collected or to rescind criminal drug prosecutions. The rate reductions appear to address the federal court's concerns but, because the federal court did not provide a clear test of what would make the tax constitutional, there remains some risk that the tax might later be invalidated again notwithstanding the rate reductions. The issues, outlined below, are complex.

In Lynn v. West, the federal court ruled that the controlled substance tax was, "in reality," a criminal penalty rather than a tax, and could not be enforced without all the criminal procedure safeguards guaranteed by the Fifth and Sixth Amendments of the United States Constitution. As a result of the Lynn case, the Department of Revenue was forced to stop collecting the tax on the date the opinion was issued, January 13, 1998. The Department of Revenue did not stop collecting the tax on illicit spirituous liquor, however. The United States Supreme Court declined to review the Lynn case, so the case is now the controlling law.

The double jeopardy clause was not an issue in the Lynn case because only the federal government, not the State, had brought criminal charges against Lynn for illegal drug possession. The double jeopardy clause protects against successive prosecutions by the same sovereign, but not against prosecutions by different sovereigns. The holding in the Lynn case that the tax is a criminal penalty means, however, that North Carolina would not be able to collect the tax from an individual and also prosecute the individual for a criminal drug violation. Therefore, the State was required to drop criminal charges against some drug defendants who had also been assessed the controlled substance tax.

The federal court in the Lynn case analyzed the tax under the United States Supreme Court's 1994 Kurth Ranch[11] case holding Montana's illegal drug tax unconstitutional because it was a second punishment, not a true tax, and thus violated the double jeopardy clause of the Fifth Amendment. In analyzing a civil measure to determine if it is in fact a criminal penalty, the court will look first at whether the legislature intended it as a civil penalty and second, even if it is so intended, whether it is so punitive either in purpose or in effect to transform it into a criminal penalty. The Court in the Kurth Ranch case stated that the tax must be examined as a whole to determine whether it has crossed the line to becoming a criminal punishment. Neither a high rate

---

[10] Lynn v. West, 134 F.3d. 582, cert. denied, 119 S. Ct. 47 (1998).
[11] Department of Revenue v. Kurth Ranch, 511 U.S. 767 (1994).

of tax alone nor an obvious deterrent purpose alone would make a tax a criminal punishment, but these factors are significant, the Court ruled. The Court found both these factors present in the Montana law, as well as the fact that the tax was conditioned on the commission of a crime and had no relationship to lawful possession.

In the Lynn case, the federal court found that all four of these same factors were present in North Carolina's controlled substance tax: a high rate of tax, a deterrent purpose, application only to illegal activity, and no relationship to lawful possession. For this reason, the court ruled that North Carolina's controlled substance tax is a criminal penalty. This act lowers the tax rates, and the civil penalty for failure to pay, in the hope of addressing the first factor, high rates. It would be difficult to address the deterrent purpose of the tax, its application only to illegal drug possession, or its lack of a relationship to legal position.

Nearly a kilogram of cocaine was seized from Lynn in 1993. The tax rate was $200 a gram, with a penalty equal to 100% of the tax.[12] Although no evidence of the value of cocaine had been offered, the court found that its market value was $25,000 a kilogram, which translates to $25 a gram. Thus, the court found the tax rate to be eight times the market value of the cocaine, which, when combined with the 100% tax penalty, yielded a total tax that was sixteen times the market value of the cocaine. The tax rate in the Kurth Ranch case, by comparison, was eight times the market value of the drug. The Lynn court's concern with North Carolina's high tax rate was compounded by the fact that the full rate applies no matter how pure or dilute the controlled substance may be.

This act provides a separate tax rate of $50 a gram for cocaine and changes the tax rate on drugs sold by dosage units from $400 to $200 per ten dosage units. Crack cocaine is sold in dosage units. The bill also reduces the 50% failure to pay penalty to 10%, to keep it in line with a 1998 reduction in the tobacco tax penalty. Based on the court's holding that cocaine's market value is $25 a gram, the proposed rate tax would be twice the market value; when the 10% penalty is added, the total would be only slightly more than twice the market value. The act does not address the court's concern that the same tax rate applies whether the substance is pure or dilute.

The General Assembly enacted the excise tax on controlled substances in 1989 as a means of generating revenue for State and local law enforcement agencies and for the General Fund. Under the law, a person who acquires illegal drugs is required to pay tax on them within 48 hours of acquiring possession if the tax has not already been paid as evidenced by a tax stamp. A person paying the tax is not required to disclose his or her identity and any information obtained in assessing the tax is confidential and cannot be used in a criminal prosecution other than a prosecution for failure to comply with the tax statute itself. Seventy-five percent of the revenue generated by assessments of the tax is distributed to the law enforcement agencies whose investigation led to the assessment. The remainder of the revenue is credited to the General Fund.

The North Carolina Court of Appeals upheld the constitutionality of the State's excise tax on controlled substances in 1996 and the North Carolina Supreme court affirmed March 7, 1997. Because the constitutionality of the tax depends on an interpretation of the federal constitution, the federal courts are not bound by the opinion of the North Carolina courts.

---

[12] The tax on marijuana is $3.50 a gram, except for separated stems and stalks, which are taxed at 40 cents a gram. The tax on "low-street-value" drugs is $50.00 for ten dosage units and the tax on other drugs not sold by weight is $400.00 for ten dosage units.

S.L. 1998-212 (Senate Bill 1366, Senator Plyler)

AN ACT TO MODIFY THE CURRENT OPERATIONS AND CAPITAL IMPROVEMENTS APPROPRIATIONS ACT OF 1997 AND TO MAKE OTHER CHANGES IN THE BUDGET OPERATION OF THE STATE.

The Current Operations Appropriations and Capital Improvement Appropriations Act of 1998 contains the following thirteen tax law changes:

1. Repeals the State sales tax on food.
2. Repeals the State inheritance tax.
3. Allows public schools to obtain an annual sales tax refund.
4. Extends the deduction for subsidiary dividends to foreign corporations.
5. Allows a State individual income tax credit for long-term care insurance.
6. Decreases the insurance regulatory charge from 8.75% to 6%.
7. Sets the public utility regulatory fee at 0.09%.
8. Increases the conservation tax credit for corporate and individual taxpayers.
9. Amends the Revenue Act to make tax penalties uniform.
10. Extends the sunset for the qualified business investment tax credit.
11. Modifies the qualified business investment tax credit for the movie industry.
12. Directs a study of taxpayer attorney fees.
13. Revises the property tax exemption for continuing care retirement homes.

Repeal State Sales Tax on Food.

In 1996, the General Assembly reduced the State sales tax on food from 4% to 3%, effective January 1, 1997. In 1997, the General Assembly reduced the State sales tax on food from 3% to 2%, effective July 1, 1998. This act completes the reduction by eliminating the remaining 2% State sales tax on food, effective May 1, 1999. The act also authorizes the Secretary of Revenue to earmark up to $174,000 of sales tax collections for 1998-99 for the administrative costs of revising and mailing forms. This section of the act is expected to reduce General Fund revenues by $18.4 million in fiscal year 1998-99, $184.5 million in fiscal year 1999-2000, $190 million in fiscal year 2000-01, $195.7 million in fiscal year 2001-02, and $201.6 million in fiscal year 2002-03.

The sale of tangible personal property in North Carolina is subject to a 4% State sales tax unless it is specifically exempt from the tax. In 1971, 1983, and 1986, the General Assembly passed legislation allowing local governments to impose a local sales tax. The local sales tax rate is 2%. On most tangible personal property, the combined State and local sales tax rate is 6%. However, because of past legislation reductions, the combined State and local sales tax rate on food, effective July 1, 1998, was 4%. This section of the act repeals the State's remaining 2% sales tax rate on food, but retains the 2% local sales tax rate. Therefore, when the provision becomes effective, there will only be a local 2% sales tax on food.

The sales tax on food applies to food that may be purchased with food stamps or other methods under the food stamp program. Federal law determines what can be purchased under

the food stamp program and, therefore, what food is exempt from the State sales tax. Food purchased with food stamps is already exempt from both the State and the local sales tax, as required by federal law.

Eliminate North Carolina Inheritance Tax.

The act repeals the State's inheritance tax but retains a State estate tax that is equivalent to the federal state death tax credit allowed on a federal estate tax return. This type of State estate tax is known as a "pick-up" tax because it picks up for the State the amount of federal estate tax that would otherwise be paid to the federal government. The repeal of the State's inheritance tax is effective January 1, 1999, and applies to the estates of decedents dying on or after that date. This section of the act is expected to reduce General Fund revenues by $52.5 million in fiscal year 1999-2000, $79.4 million in fiscal year 2000-01, $85.7 million in fiscal year 2001-02, and $92.6 million in fiscal year 2002-03.

Under prior law, North Carolina imposed an inheritance tax on property transferred by a decedent. The amount of tax payable depended on the relationship of the person transferring the property (the decedent) to the person receiving the property (the beneficiary). This was in contrast to federal law, which has a single rate schedule for estates.

State law classified beneficiaries into three classes and set different inheritance tax rates for each class. A Class A beneficiary was a lineal ancestor, a lineal descendant, an adopted child, a stepchild, or a son-in-law or daughter-in-law whose spouse was not entitled to any of the decedent's property. A Class B beneficiary was a sibling, a descendant of a sibling, or an aunt or uncle by blood. A Class C beneficiary was anyone who was not a Class A or Class B beneficiary.

Class A beneficiaries had the lowest inheritance rates and a $600,000 inheritance tax exemption. Class B beneficiaries had higher rates and no exemption. Class C beneficiaries had the highest rates and no exemption. Thus, North Carolina's rate structure favored transfers to children and parents by giving those transfers the lowest rates plus an exemption and preferred transfers to other close family members over transfers to more distant relatives or to persons who were not related.

Sales Tax Refunds for Schools.

This section of the act adds local school administrative units to the list of governmental entities that may obtain an annual refund of the State and local sales and use taxes paid by them. The change became effective July 1, 1998, and applies to taxes paid on or after that date. The refunds apply to direct purchases of tangible personal property. They also apply to sales and use tax liability indirectly incurred by a local school administrative unit on building materials, supplies, fixtures, and equipment that become a part of any building that is owned or leased by the unit and is being built, altered, or repaired for use by the unit. To obtain the refund, a local school administrative unit must request the refund in writing within six months after the end of the unit's fiscal year. The request must include any information and documentation required by the Secretary of Revenue. This section of the act is expected to reduce General Fund revenues by $14.8 million in fiscal year 1999-2000, $15 million in fiscal year 2000-01, $14.4 million in fiscal year 2001-02, and $12.6 million in fiscal year 2002-03.

Prior to 1961, the State granted sales and use tax exemptions to State and local governmental entities, including public schools, and nonprofit entities. Because of the number of abuses involving the exemption and the difficulty of auditing these transactions, the General Assembly changed the law in 1961 to allow refunds as opposed to outright exemptions. The statute

lists those entities that are entitled to a refund. Nonprofit educational institutions, as well as most other nonprofit entities, are entitled to a semiannual refund of State and local sales and use tax.

The General Assembly did not include State agencies in the list of entities entitled to an annual refund of State and local sales taxes because the refund process would not benefit the General Fund, from which the agencies receive their appropriations, and would create unnecessary paperwork for the agencies. The General Assembly did not include public schools in the list of entities entitled to an annual refund for similar reasons. First, public school books and school lunches are exempt from sales tax. Second, most of the operating money for public schools comes from the General Fund, although most of the capital money comes from the counties.

Prior to the act, although a school board could not receive sales tax refunds, a county was entitled to a refund of State sales and use taxes paid if it purchased items on behalf of its school board. More than one-half of the counties have statutory authority to acquire property on behalf of their school boards and thus may receive sales tax refunds if they exercise that authority. The other counties do not have this authority, although the Attorney General's Office has stated that they may acquire property on behalf of their school board if they enter into an interlocal agreement with the school board. Under this act, the school board can receive the refunds directly, without having to arrange for the county to acquire the property and apply for the refunds on its behalf.

Corporate Dividend Technical Change.

This section of the act extends the deduction for subsidiary dividends to corporations domiciled in other States. This is a technical change only because, due to the requirements of the Interstate Commerce Clause of the United States Constitution, the Department of Revenue was forced in 1997 to extend the deduction to out-of-state corporations. The statutory change conforms the statutes to the current practice and to the requirements of the Constitution. This provision passed both the House and the Senate in 1997 but was not enacted that year.

Under prior law, G.S. 105-130.7 allowed a corporation domiciled in North Carolina that held more than 50% of the outstanding voting stock of another corporation (a subsidiary) to deduct dividends it receives from the subsidiary plus any expenses related to the dividends. The restriction of this deduction to North Carolina corporations created interstate commerce clause problems in light of the United States Supreme Court's 1996 Fulton decision, which struck down a similar provision in the intangibles tax. The Attorney General's Office advised the Department of Revenue that, if the General Assembly did not resolve the constitutional problem with this tax preference, the Department of Revenue could not enforce it. There was too much risk of personal liability on the part of Department of Revenue personnel in enforcing a provision that was so clearly flawed in the wake of the Fulton decision. This section of the act resolves the constitutional problem by extending the deduction to non-North Carolina companies, as the Department of Revenue had already done administratively.

The 1994-95 Revenue Laws Study Committee had recommended a different solution to this problem: allowing both North Carolina corporations and non-North Carolina corporations to deduct subsidiary dividends but not expenses related to the deductible dividends. The Revenue Laws recommendation was based on the basic tax principle that expenses related to untaxed income should not be deductible from taxed income. This policy is reflected in section 265 of the Internal Revenue Code and in G.S. 105-130.5(c)(3). The Revenue Laws Study Committee's recommendation was introduced in 1996, but was not enacted.

Credit for Long-Term Care Insurance.

This section of the act allows a State individual income tax credit of 15% of the premium paid each year on long-term care insurance. The credit may not exceed $350 for each policy for which the credit is claimed. The credit may not exceed the amount of tax owed by the taxpayer, and there is no provision to allow unused portions of the credit to be carried forward. The credit becomes effective for taxable years beginning on or after January 1, 1999, and expires for taxable years beginning on or after January 1, 2004. This section of the act is expected to reduce General Fund revenues by $7.98 million in fiscal year 1999-2000, $8.87 million in fiscal year 2000-01, $9.82 million in fiscal year 2001-02, and $10.89 million in fiscal year 2002-03. The Legislative Research Commission is directed to study the effect of the credit on the State's Medicaid costs and to report its finding to the 2004 Session of the 2003 General Assembly.

A taxpayer may claim a credit for policies that provide coverage for either the taxpayer, the taxpayer's spouse, or a family member for whom the taxpayer provides over half of the support and whose income is below an exemption amount. A long term-care insurance policy is one that provides only coverage of long-term care services and that meets the following requirements:

1. Is guaranteed renewable.
2. Does not provide for a cash surrender value.
3. Provides that refunds and dividends may be used only to reduce future premiums or to increase future benefit.
4. Does not pay or reimburse expenses that are reimbursable under Medicare.
5. Satisfies consumer protection laws.

Under federal law, premiums paid on long-term care insurance contracts are treated as deductible medical expenses. Under the medical expense itemized deduction, unreimbursed medical expenses may be deducted to the extent that the expenses exceed 7.5% of adjusted gross income. To the extent a taxpayer will receive a deduction for long-tern care insurance premiums under the Code, the taxpayer will receive a deduction for State income tax purposes as well since North Carolina uses federal taxable income as the starting point for calculating State taxable income. To prevent a double tax benefit in those cases, the credit is limited to those expenses for which a deduction has not been claimed. The language in the act concerning no double tax benefit is identical to the language used in the credit for child health insurance enacted earlier in 1998.

Insurance Regulatory Charge.

The act decreases the insurance regulatory charge from 8.75% to 6%, effective January 1, 1998. This charge was first imposed in 1991. Its purpose is to make the Department of Insurance receipt-supported and thereby eliminate General Fund support of the Department. The regulatory charge is imposed on insurance companies that pay the gross premiums tax, other than service corporations such as Blue Cross/Blue Shield and Delta Dental Corporation. Health maintenance organizations do not pay the regulatory charge because they do not pay the gross premiums tax. The charge is a percentage of the insurance company's premiums tax liability.

In 1997, the General Assembly clarified that the premiums tax liability upon which the charge is levied is not reduced by any tax credits allowed a taxpayer for guaranty or solvency fund assessments. This change explains in part the reason why the charge is able to be decreased this fiscal year by 2.75%. The act ensures that the regulatory charge will continue to be based upon gross premium tax collections by providing that the premium tax liability upon which the charge

is levied is not reduced by any tax credits allowed a taxpayer under Chapter 105 of the General Statutes. The Economic Opportunity Act of 1989, passed this session by the General Assembly, allows a tax credit against the gross premiums tax for investing in central administrative office property.

Public Utility Regulatory Fee.

The act sets the public utility regulatory fee for fiscal year 1998-99 at 0.09%. This rate maintains the current 0.09% rate set in fiscal year 1997-98. The utility regulatory fee was imposed in 1989. Its purpose is to defray the State's cost in regulating public utilities. The regulatory fee is imposed on all utilities that are subject to regulation by the North Carolina Utilities Commission. The fee is a percentage of the utility's North Carolina jurisdictional revenues. In general, jurisdictional revenue is revenue derived from providing utility service in North Carolina.

Amend Conservation Tax Credits.

For taxable years beginning on or after January 1, 1999, the act increases an individual taxpayer's limit for the conservation tax credit from $100,000 to $250,000 and increases a corporate taxpayer's credit limit from $250,000 to $500,000. This section of the act is expected to reduce General Fund revenues each fiscal year by $1.2 million. In 1997, the General Assembly increased the individual credit limit from $25,000 to $100,000, and increased the corporate credit limit from $25,000 to $250,000. The act also repeals the requirement that individual taxpayers add back the fair market value of the donated real property to their taxable income. This add-back requirement was originally placed in the law to prohibit individual taxpayers from receiving both a tax credit and a charitable deduction for the donated property.

This tax credit is allowed to individual and corporate taxpayers who make a qualified donation of an interest in North Carolina real property that is useful for public beach access or use, public access to public waters or trails, fish and wildlife conservation, or other similar land conservation purposes. The tax credit is equal to 25% of the fair market value of the property donated to the State, a local government, or a body that is both organized to receive and administer lands for conservation purposes and qualified to receive charitable contributions. Both corporate and individual taxpayers are allowed to carry forward for five years any unused portion of the credit.

North Carolina is the only state that allows a conservation tax credit. The credit was enacted in 1983. The General Assembly did not want an individual to receive a double tax benefit for the donation, so it prohibited a charitable contribution deduction for the portion of the donation used to calculate the tax credit. In 1989, federal taxable income became the starting point in determining North Carolina taxable income. In order to maintain the single tax benefit, an addition to the federal taxable income in the year of the donation was required in the amount of the fair market value of the donated property. This add-back can be a disincentive to donating property in two cases:

1. If the taxpayer never deducts the entire fair market value of the donation as a charitable deduction. This situation can occur because the federal law imposes limitations on the amount of charitable contributions deductions in any year based on the taxpayer's adjusted gross income (usually 30% of adjusted gross income).
2. If the taxpayer never claims the entire tax credit for the donation. This can occur because the taxpayer may be unable to claim the entire amount of the credit within the six-year period.

The act remedies these disincentives by no longer requiring an individual taxpayer to add the fair market value of the donated property to federal taxable income in arriving at North Carolina taxable income. This change results in an individual taxpayer receiving both a charitable contribution deduction and a tax credit for the donation. Current law does not allow a corporation to take a charitable contribution deduction for its donation.

Under the Internal Revenue Code, a donation of real property for conservation purposes is treated as a charitable deduction. A qualified appraisal of the donated land is required if the claimed deduction is more than $5,000. This appraisal must be attached to the federal tax return. No appraisal is required by the North Carolina Department of Revenue.

Revenue Penalties Uniform.

The act amends several sections of the Revenue Act to make tax penalties uniform. This portion of the act was requested by the Department of Revenue and recommended by the Revenue Laws Study Committee. These amendments, which are effective January 1, 1999, do the following:

- Repeal several penalties that are obsolete or ineffective.
- Provide that refunds of sales taxes, motor fuel taxes, and excise taxes on sacramental wine are barred only if filed more than 3 years after their due date. The current law provides a reduction of the amount refunded for late applications filed before the 3-year period expires.
- Clarify that additional taxes are assessable as penalties so that it is clear the taxes may be waived by the Secretary. The act also clarifies that penalties are assessable as additional taxes to ensure the taxpayer receives the full administrative and judicial remedies applicable to tax assessments. This clarification conforms with the following statutory definition of "tax" in G.S. 105-228.90: "[T]he terms 'tax' and 'additional tax' include penalties and interest as well as the principal amount."
- Provide a uniform penalty for most tax deficiencies that exceed 25% of the tax liability.
- Expand the statute concerning the personal liability of corporate officers who fail to remit certain taxes when due to include the manager and managing members of a limited liability company.

Extend Qualified Business Credit Sunset.

The act extends the sunset for the qualified business investment tax credit an additional four years, until the year 2003. The act retains the current $6 million cap on the credit. This change became effective when the act became law on October 30, 1998.

The qualified business investment tax credit was enacted in August 1987 to promote economic development for North Carolina businesses. The initial credits applied to both corporations and individuals taxpayers, and there was a $12 million cap on the total amount of all tax credits. In response to a 1996 United States Supreme Court decision in Fulton Corp. v. Faulkner, the General Assembly reduced the $12 million cap to $6 million, limited the credit to individuals and small pass-through entities, and removed the requirement that the qualified businesses be headquartered or operating in North Carolina. The credit was to expire for investments made on or after January 1, 1999. The act extends the credit for four additional years until January 1, 2003.

The credit is allowed for an individual taxpayer who purchases the equity securities or subordinated debt of a qualified business venture or a qualified grantee business directly from that business. The credit is equal to 25% of the amount invested and may not exceed $50,000 per individual in a single taxable year. An individual investor may also claim the allocable share of credits obtained by "pass-through entities" of which the investor is an owner. Pass-through entities include limited partnerships, general partnerships, S corporations, and limited liability companies. The credit may not be taken in the year the investment is made. Instead, the credit is taken in the year following the calendar year in which the investment was made, but only if the taxpayer filed an application with the Secretary of State. The unused credit may be carried forward for the next five years. The total amount of credits allowed to all taxpayers for investments made in a calendar year may not exceed $6 million. The Secretary of Revenue calculates the total amount of tax credits claimed from applications filed with the Secretary of State. If the amount exceeds the cap, then the Secretary allows a portion of the tax credits claimed by allocating the total of $6 million in tax credits in proportion to the size of the credit claimed by each taxpayer.

Under the 1996 Fulton case, the original credit provisions clearly violated the interstate commerce clause of the federal constitution because they reduced a taxpayer's tax liability by an amount equal to 25% of the cost of purchasing stock in either a North Carolina business or an investment company whose purpose is to invest in North Carolina businesses, while no tax reduction was allowed for purchasing similar stock in out-of-state businesses or investment companies whose purpose is to invest in businesses that may not be North Carolina businesses. In response to the Fulton case, the Revenue Laws Study Committee discussed this credit along with several others, at great length. The original proposal of the Committee was to repeal all qualified business investment credits, effective January 1, 1997. In response to appeals to the Committee and to the General Assembly, the credit was expanded to include investments in businesses located both inside and outside North Carolina, but was no longer allowed for investments in investment companies and was limited to investments made by individuals and small pass-through entities under the theory that these investors are not likely to invest outside of a 50-mile radius of their home.

Qualified Business Credit for Movies.

The act modifies the qualified business investment tax credit to make it more accessible for investors who provide capital for the film industry, effective for taxable years beginning on or after January 1, 1999. Specifically, the act modifies the qualified business investment tax credit in two ways:

1. Allows a qualified business venture in the film industry to pay off its investors in less than five years without causing the investors to forfeit the tax credit.
2. Provides that the effective date of registration for a qualified business venture whose application is accepted for registration is 60 days before the date its application was filed.

To be a qualified business venture eligible for the qualified business investment tax credit, the business must be engaged primarily in manufacturing, processing, warehousing, wholesaling, research and development, or a service-related industry and the business must be registered with the Secretary of State. The film industry is eligible to qualify for the credit, as a service-related industry.

To obtain a tax credit, a person must purchase the equity securities or subordinated debt directly from the qualified business. Subordinated debt is indebtedness that by its terms matures five or more years after its issuance, is not secured, and is subordinated to all other indebtedness. A taxpayer forfeits the credit if the qualified business redeems the securities purchased by the taxpayer within five years after the investment was made. In the film industry, a project in which a person may invest does not usually last five years, making it difficult to satisfy the five-year minimum for the investment. The act addresses this problem by allowing a business engaged primarily in the film production industry to redeem its securities within five years and to mature its subordinated debt within five years without causing an investor to forfeit the tax credit. The act provides that this redemption is allowed only if (1) the redemption occurred because the qualified business venture completed the production of a film, sold the film, and was liquidated, and (2) neither the qualified business venture nor a related person continues to engage in business with respect to the film produced by the venture.

Under former law, no tax credit was allowed for an investment made in a qualified business venture before the date of the business's registration with the Secretary of State. In the film industry, a person invests in a project before the project is started. The practice is that the investments are placed in an escrow account until a sufficient amount of capital is obtained to begin a film's production. If enough funds are not raised, then the money in escrow is returned to the investors. To accommodate this unique situation, the act extends the time in which a taxpayer may make an eligible investment. It provides that the effective date of a business's registration is 60 days before the date its application is filed, as opposed to the date it is filed. The act also provides that if a taxpayer's investment is placed initially in escrow conditioned upon other investors' commitment of additional funds, the date of the taxpayer's investment is the date escrowed funds are transferred to the qualified business venture free of the condition, as opposed to the date the investment was actually made.

Study Taxpayer Attorney Fee Issue.

The act directs the Revenue Laws Study Committee to study whether the State should reimburse a taxpayer for legal costs when the taxpayer substantially prevails in an administrative appeal or lawsuit with respect to the amount in controversy or with respect to the most significant issue or set of issues presented. Rule 11 of the North Carolina Rules of Civil Procedure is the general rule governing when a party to a legal action may recover reimbursement for legal costs, including attorney fees. Under this Rule, a party may be ordered to reimburse the other party its legal costs, including a reasonable attorney's fee, when the party's case is not well grounded in fact and law or is begun for an improper purpose, such as to harass the other party. This Rule is used in court actions, but does not apply to administrative appeals before the Tax Review Board. The Revenue Laws Study Committee is directed to report its recommendations to the 1999 General Assembly.

Continuing Care Retirement Homes Exempt.

The act temporarily revises an existing property tax exemption for retirement facilities that was recently held unconstitutional by the North Carolina Supreme Court.[13] The act exempts nonprofit continuing care retirement communities (CCRCs) whose governing body is not self-perpetuating but is selected by another publicly supported 501(c)(3) nonprofit. The act was agreed to by the Association of County Commissioners, the Association for Nonprofit Homes

---

[13] In re Springmoor, 348 N.C. 1 (1998).

for the Aging, and other interest groups representing nonprofit entities of various types. It effectively restores the exemption for those CCRCs that were exempt under the law struck down by the court, but retains taxability of those CCRCs that have been taxed all along. It does not affect charitable homes for the aging, which are exempt under current law and were not affected by the court case.

The exemption will remain in effect for two years, the 1998-99 and 1999-2000 property tax years. During this period, the act directs the Legislative Research Commission to study the issue of property tax exemptions for nonprofit institutions in general and to report its findings and recommendations to the 2000 Regular Session of the 1999 General Assembly.

The distinction between CCRCs that have a governing body selected by a publicly supported 501(c)(3) and CCRCs that have a self-perpetuating governing body is rational under the constitution. A self-perpetuating nonprofit is less answerable to the public. The Internal Revenue Code recognizes the important distinction between publicly supported 501(c)(3)s and other 501(c)(3)s (private foundations). A publicly supported 501(c)(3) that selects the CCRC's governing body is more answerable to the public and less controlled by private interests.

Property owned by a nonprofit home for the aged, sick, or infirm is exempt from property tax if used for a charitable purpose.[14] A charitable purpose is defined as "one that has humane and philanthropic objectives; it is an activity that benefits humanity or a significant rather than limited segment of the community without expectation of pecuniary profit or reward." The property tax exemption set out in the act is necessary because some continuing care retirement centers may not be charitable and therefore would not qualify for this exemption. In the 1980s, two cases held that certain continuing care retirement centers were not charitable for purposes of property tax exemption.[15] In concluding that the institutions were not charitable in these cases, the court noted the following facts about one or both institutions:

1. The institution refused to admit applicants with health problems rendering them physically unable to care for themselves.
2. Substantial entrance fees and monthly fees were required from all residents, and applicants had to demonstrate that they were financially capable of supporting themselves for the period of their life expectancy.
3. The operation of the institution was funded entirely or mainly from fees paid by residents, not by donations or endowments.
4. The costs were so high that only a small percentage of the elderly could afford the home.[16]
5. The home retained the right to terminate a resident for nonpayment of fees unless nonpayment was beyond the resident's control.

---

[14] G.S. 105-278.6. In addition, retirement centers that are funded by North Carolina Medical Commission bonds are also exempt from property taxes under G.S. 131A-21 as long as the bonds are outstanding. See In re Appeal of Glenaire, (N.C. Ct. App. 2/7/95, unpublished), rev. denied 360 N.C. 261 (1995).

[15] In re Chapel Hill Residential Retirement Center, 60 N.C. App. 294, rev. denied, 308 N.C. 386 (1983); In re Appeal of Barham, 70 N.C. App., rev. denied, 312 N.C. 622 (1984).

[16] According to another case, Southminster, Inc. v. Justus, 119 N.C. App. 669 (1995), the average annual income in 1988 of residents of the Pines was $43,000 and their average net worth was $444,000. At Southminster, 88% of residents had net worths over $200,000 and 63% had net worths over $350,000.

In each case, the court concluded that merely supplying care and attention to elderly pensions cannot, alone, constitute charity. The court found that these retirement communities were not providing for the special needs of individuals who are in need of charity, the aid of whom benefits society as a whole in addition to the residents. The court in one case also noted that allowing such a retirement home to qualify because its residents were elderly would give those residents preferential treatment over the elderly who live in their own homes and must pay property taxes.[17]

Under the act, an institution that fails to qualify as charitable will receive a property tax exemption for its property if it meets all of the following conditions:

1. The institution owns the property and uses it for a retirement community that includes a skilled nursing facility or an adult care facility and also includes independent living units. (In other words, as under prior law, the exemption applies to continuing care retirement communities, but not stand-alone nursing homes or rest homes.)
2. The institution must be nonprofit and exempt from income tax, and its assets upon dissolution must revert to a 501(c)(3) charitable organization.
3. The institution must have an active fund-raising program to assist it in providing services to those who do not have the financial resources to pay the fees.
4. The governing body of the institution must be selected by a charitable nonprofit that is exempt under section 501(c)(3) of the Internal Revenue Code and is a publicly supported charity. (A publicly supported charity is a charity that is not a private foundation under section 509 of the Code).

From its enactment in 1987 until it was struck down by the North Carolina Supreme court as unconstitutional in 1998, G.S. 105-275(32) provided a property tax exemption for continuing care retirement centers that were owned and operated by religious or Masonic organizations. The court found that the exemption was an establishment of religion in violation of the First Amendment of the United States Constitution. The effect of the court case is that the property of continuing care retirement centers previously exempt under the statute would have been taxable beginning with the 1998-99 property tax year, unless they qualified for exemption as charitable homes under G.S. 105-278.6.[18] There would be no taxation for earlier years, however. As earlier noted, this act temporarily revises this property tax exemption effective for taxes imposed for taxable years beginning on or after July 1, 1998.

[17] Low-income elderly homeowners qualify for partial exemption under the homestead exemption. G.S. 105-277.1.

[18] The Springmoor case does not affect the sales tax refunds to which continuing care retirement centers are entitled under G.S. 105-164.14. Under the Southminster case, cited above, these homes are considered charitable for purposes of sales tax refunds even if they do not qualify as charitable for property tax purposes.

1997 Tax Law Changes

Prepared by Cindy Avrette, Martha H. Harris, and Martha K. Walston

S.L. 1997-6 (Senate Bill 33, Senator Cochrane)

AN ACT TO MAKE TECHNICAL AND CONFORMING CHANGES TO THE REVENUE LAWS AND RELATED STATUTES.

This act makes numerous technical and clarifying changes to the revenue laws and related statutes. These changes were recommended to the 1997 General Assembly by the Revenue Laws Study Committee. The following table provides a section-by-section analysis of the proposed changes.

Sec.	Explanation
1	Repeals an obsolete statute that requires gun owners to list their guns for property taxes. This statute is not needed because nonbusiness personal property is exempt from property taxes and the listing requirements for business personal property are contained in the Machinery Act.
2	Increases the inheritance tax return filing threshold for Class A beneficiaries from $450,000 to $60[1]0,000 to conform to the increased credit enacted in 1996. This change became effective January 1, 1997, and applies to estates of decedents dying on or after that date.
3 - 4	Correct incorrect cross-references to the North Carolina Building Code and Building Accessibility Section of the Department of Insurance and modernize language.
5	Places definitions in alphabetical order and renumbers them. The definition of "security" was out of order and could not be included in the correct order with-out renumbering the list of definitions.
6	Deletes the definition of "fiduciary" from the with-holding tax Article because the term is not used in the Article.
7	Removes improper quotation marks.
8	Restores language that was inadvertently deleted in 1996 due to a redlining error.
9	Corrects a grammatical error.
10	Restores the missing word "the".
11	Restores the missing word "or".
12 - 15	Make it clear that the per gallon motor fuel tax refunds do not apply to the inspection tax.
16	Repeals three obsolete subsections concerning taxes payable by electric membership corporations for 1965 and 1966.

1

17 - 18	Make it clear that a motor fuel supplier that sells kerosene is not required to have a separate license as a kerosene supplier.
19	Makes a conforming change to a cross-reference to a subdivision and modernizes language.
20	Deletes an improper comma and modernizes language.
21	Provides a savings clause.
22	Provides that the act became effective when it became law, March 21, 1997.

S.L. 1997-17 (Senate Bill 388, Senator Hoyle)

AN ACT TO PROHIBIT THE ASSESSMENT OF INTANGIBLES TAX FROM TAXPAYERS WHO BENEFITED FROM THE TAXABLE PERCENTAGE DEDUCTION IN THE FORMER INTANGIBLES TAX STATUTE.

On February 10, 1997, the North Carolina Supreme Court held that the taxable percentage deduction in the North Carolina intangible tax on stock violated the commerce clause by discriminating against out-of-state companies. The deduction reduced a taxpayer's liability for the tax in proportion to the amount of business the corporation did in North Carolina. The court did not order refunds. Instead, it allowed the possibility of curing the past discrimination by the assessment of intangibles tax on those who did not pay in reliance on the unconstitutional taxable percentage deduction. Upon the advice of the Attorney General's Office, the Secretary of Revenue began preparing to assess the intangibles tax on those who did not pay the tax in reliance on the unconstitutional taxable percentage deduction.

In response to the Secretary's preparations, the General Assembly ratified this act. This act directs the Secretary of Revenue to take no action to collect or assess back intangibles tax for tax years 1990 through 1994. In effect, this act foreclosed the possibility of assessments on those who relied on the taxable percentage deduction. The passage of this act made the State liable for refunds to those intangibles taxpayers who paid tax on shares of stock and who protested the payment of the tax within 30 days of payment. The General Assembly enacted House Bill 96, S.L. 1997-318, on July 21, 1997. S.L. 1997-318 directs the Secretary of Revenue to make refunds of the intangibles tax to taxpayers who filed a timely protest.

The General Assembly repealed the intangibles tax in 1995. The potential for the Department of Revenue to assess and collect the intangibles tax on those taxpayers who did not pay intangibles tax prior to 1995 in reliance on the unconstitutional taxable percentage deduction resulted from the North Carolina Supreme Court's 1997 decision in the Fulton case. In 1995, the Department estimated that eliminating the taxable deduction in the North Carolina intangibles tax on stock would generate $55 to $75 million dollars. As a practical matter, however, it would be difficult for the Department to discover and value taxable shares in those North Carolina corporations that are not publicly traded because there is no public information on these holdings.

S.L. 1997-23 (House Bill 295, Representative Cansler)

AN ACT TO EXEMPT MOST INTANGIBLE PERSONAL PROPERTY FROM PROPERTY TAX.

This act exempts from local property taxes all intangible property except leasehold interests in exempted real property. The act became effective July 1, 1997, and applies to taxable years beginning on or after that date. The act is not expected to result in a significant decrease in local government property tax revenues.

Intangible personal property has been subject to property taxes for over 100 years. The property is taxable unless specifically excluded. Although cash and bank deposits have been excluded from property tax since 1985, it was not until 1995 that the General Assembly excluded other forms of financial intangibles, such as stocks, bonds, accounts receivable, and beneficial interest in trusts, from property tax. These financial intangibles were taxed by the State and the revenues generated by the tax were distributed to local government units. The intangibles tax repeal in 1995 repealed the tax on intangible property that was levied by the State; it did not affect the local governments' power to tax intangible property that had not been taxed by the State and was not otherwise excluded from local property taxation.

This act exempts most of the remaining forms of intangible personal property, such as franchise rights, patents, copyrights, trademarks, and goodwill, from property taxation. The tax situs of a business intangible is generally the location of the company's headquarters. Most counties have never taxed this type of property even though it was clearly subject to tax. Two recent developments raised county tax assessors' awareness of this potential revenue source. First, the Uniform State Abstract for listing business personal property, prepared by the Department of Revenue, was revised for use beginning in tax year 1997 to include a specific schedule D for intangible property. The memorandum accompanying the new abstract advised that the appraisal of intangible property would be a first time endeavor for many appraisers across the State. At the beginning of the 1997 tax year, 23 counties asked taxpayers to list intangible assets, such as patents, copyrights, secret processes, formulae, goodwill, trademarks, trade brands, and franchises, on their 1997 business personal property tax form. Before 1997, only a few counties were listing this type of property. Second, a recent case before the North Carolina Court of Appeals, Edward Valves, Inc., highlighted both the potential and the difficulties of taxing intangible personal property. In that case, Wake County levied a property tax on a set of exclusive engineering drawings. The drawings were valued at more than $12 million. The court found that the county's methodology for taxing self-created intangible property was unconstitutional and that it violated the statutory requirement that property taxes be levied uniformly.

The act also clarifies that the exclusion of intangible property from property tax does not affect the appraisal of real property or tangible personal property. One of the most commonly used methods of valuing commercial property is the income approach to value. Under the income approach, the contribution of intangible assets to a business' income is an inherent part of the valuation process. The act will allow counties and cities to continue considering intangible personal property, such as trademarks and goodwill, when they assess other real property and tangible personal property.

The act discourages counties and cities from discovering prior years' taxes on intangible personal property excluded by this act on or after January 1, 1997. It does so by reducing the annual State reimbursement to a county or municipality for the repeal of the intangibles tax on

money, accounts receivable, bonds, stock, and beneficial trust interests by the amount of taxes collected in that year on intangible property for a year prior to the 1997 tax year. This part of the act is repealed effective September 1, 2002, because the five-year discovery period will have expired then.

Lastly, the act seeks to preserve the legislature's authority to classify property for taxation by providing a non-severability clause in the current software property tax exemption. If any part of the exemption is ever ruled unconstitutional, then the entire exemption will be defeated. Consequently, all computer software will be subject to property tax unless the General Assembly acts to re-classify it for exemption. In 1994, the General Assembly carefully crafted an across-the-board property tax exemption for all computer software other than embedded software and software that is required by generally accepted accounting principles to be treated as a capital asset. This exemption was the result of a compromise between the North Carolina Association of County Commissioners and a taxpayer group called the North Carolina Software Coalition.

S.L. 1997-55 (House Bill 59, Representative Neely)

AN ACT TO UPDATE THE REFERENCE TO THE INTERNAL REVENUE CODE USED IN DEFINING AND DETERMINING CERTAIN STATE TAX PROVISIONS.

This act rewrites the definition of the Internal Revenue Code used in State tax statutes to change the reference date from March 20, 1996, to January 1, 1997. It was recommended by the Revenue Laws Study Committee. Updating the Internal Revenue Code reference makes recent amendments to the Code applicable to the State to the extent that State tax law previously tracked federal law. This update generally has the greatest effect on State corporate and individual income taxes because these taxes are based on federal taxable income and are therefore closely tied to federal law. The franchise tax, gift tax, highway use tax, inheritance tax, and insurance company premiums tax also determine some exemptions based on the provisions of the Code.

Congress made significant changes to the Code in 1996 that will affect federal taxable income. Because federal taxable income is the starting point for calculating State corporate and individual income taxes, these federal changes adopted by this act will affect State policies and revenues. The act is expected to reduce General Fund revenues by approximately $8.5 million in 1997-98, $16.8 million in 1998-99, $11.5 million in 1999-2000, $13 million in 2000-01, and $17 million in 2001-02.

The federal Small Business Job Protection Act made two tax changes that will affect the General Fund proportionally more than the other tax changes: the amount of property that may be expensed under Code section 179 is increased from $17,500 to $25,000 over a period of 5 years and the amount a self-employed person may deduct for health insurance costs is increased from 30% to 80% over a period of 10 years. The Small Business Job Protection Act made major changes to the S Corporation rules, introduced a new type of retirement plan (SIMPLE), and narrowed the exclusion for punitive damages received on account of personal injury or sickness. It also created a new adoption credit and exclusion and increased the amount a nonworking spouse could contribute to an IRA.

The federal Health Insurance Portability and Accountability Act created a pilot test program for tax-favored medical savings accounts (MSAs) and added two new exceptions to the

10% penalty for premature withdrawals from IRAs. It provided that costs of long-term care services and some long-term care insurance premiums will be considered medical expenses for itemized deduction purposes. The Health Insurance Portability and Accountability Act also allowed an income tax exclusion for long-term care benefits to chronically ill insureds and extended the income tax exclusion for life insurance death benefits to benefits paid during life to the terminally ill.

This act provides that the federal tax law changes that could increase an individual's or corporation's North Carolina taxable income for the 1996 tax year will not become effective for 1996 tax years but will instead apply only to taxable years beginning on or after January 1, 1997. Under Section 16 of Article 1 of the North Carolina Constitution, the legislature cannot pass a law that will retroactively increase the tax liability of any taxpayer. There are a few provisions in the federal tax law changes that could increase taxable income for the 1996 tax year. Because this act could not be ratified until after the 1997 General Assembly convened, theses changes were given a delayed effective date.

Since the State corporate income tax was changed to a percentage of federal taxable income in 1967, the reference date to the Internal Revenue Code has been updated periodically. In discussing bills to update the Code reference, the question frequently arises as to why the statutes refer to the Code on a particular date instead of referring to the Code and any future amendments to it, thereby eliminating the necessity of bills like this one. The answer to the question lies in both a policy decision and a potential legal restraint.

First, the policy reason for specifying a particular date is that, in light of the many changes made in federal tax law from year to year, the State may not want to adopt automatically federal changes, particularly when these changes result in large revenue increases or decreases. By pinning references to the Code to a certain date, the State ensures that it can examine any federal changes before making the changes effective for the State.

Secondly, and more importantly, however, the North Carolina Constitution imposes an obstacle to a statute that automatically adopts any changes in federal tax law. Section 2(1) of Article V of the Constitution provides in pertinent part that the "power of taxation … shall never be surrendered, suspended, or contracted away." Relying on this provision, on the North Carolina court decisions on delegation of legislative power to administrative agencies, and on an analysis of the few federal cases on this issue, the Attorney General's Office concluded in a memorandum issued in 1977 to the Director of the Tax Research Division of the Department of Revenue that a "statute which adopts by reference future amendments to the Internal Revenue Code would … be invalidated as an unconstitutional delegation of legislative power."

S.L. 1997-60 (Senate Bill 98, Senator Kerr)

AN ACT TO IMPROVE THE ADMINISTRATION OF THE MOTOR FUEL TAX LAWS.

This act makes changes to the method of collecting motor fuel taxes commonly referred to as "tax at the rack", that was enacted by the General Assembly in the 1995 Session and became effective January 1, 1996. The method bears this name because it imposes the per gallon excise tax when motor fuel is delivered to a transport truck or railroad tank car by means of a "rack" at a refinery, terminal, or bulk plant. This act changes the licensing requirements for exporters and

makes several conforming changes as described below.

Section 1 of the act ensures that the State's motor fuel tax will be considered a "pass-through" tax, by expressly stating that the tax is collected from the supplier or importer of the fuel but that the tax becomes part of the cost of the fuel and is consequently paid by the consumer. This statutory language was added in order to protect the State from a challenge to its motor fuel tax laws similar to that in the U.S. Supreme Court case of Oklahoma Tax Commission v. Chickasaw Nation (decided June 14, 1995). There the Oklahoma gas tax was held not to apply to Native American retailers because of tribal sovereign immunity, even though the tax was collected by the fuel distributor and passed through the chain of distribution on to the ultimate consumer. The Court emphasized that the Oklahoma statute imposing this tax did not expressly identify the party that bears the burden of the tax, and more importantly, did not contain a pass-through provision requiring distributors and retailers to pass the tax on to consumers.

Sections 2 and 4 of the act require exporters to be licensed. Under prior law, an exporter could have been but was not required to be licensed. A licensed exporter paid tax at the destination state rate, while an unlicensed exporter had to pay tax at the North Carolina rate. This difference in treatment resulted in the unlicensed exporter paying both the North Carolina tax and the tax of the destination state and then having to apply to North Carolina for a refund. The requirement under this act, that all exporters be licensed, parallels the existing requirement that all importers be licensed.

Section 3 of the act makes the following changes to the importer licensing provisions for a bulk-end user, such as a trucking company:

1. Allows bulk-end users to be bonded importers and thereby buy fuel at an out-of state terminal that does not precollect the North Carolina motor fuel tax. Prior law prohibited a bulk-end user from obtaining a bonded importer license.
2. Relieves bulk-end users of the importer licensing requirement if they buy all their imported fuel at an out-of-state terminal that precollects the North Carolina tax. Prior law required an occasional importer license in this circumstance. This change parallels the existing treatment of distributors, i.e., a distributor that imports only from a terminal that precollects the North Carolina tax is not required to have an importer license.

Section 5 of the act deletes the requirement that an exporter file a bond. This change was made because the act requires all exporters to be licensed. The purpose of licensing is primarily to track cross-border shipments of fuel, and the bonding requirement is not necessary for this purpose. Prior law required an exporter who chose to be licensed to pay a bond or provide an irrevocable letter of credit in an amount not less than $2,000 or more than $250,000.

Section 6 of the act deletes all references to unlicensed exporters, since sections 2 and 4 of the act require all exporters to be licensed.

Section 7 of the act imposes potential liability on an unlicensed exporter for the North Carolina tax on the fuel exported. If an unlicensed exporter buys fuel, the Department of Revenue can assess tax on the fuel purchased at the North Carolina rate.

Sections 8 and 22 of the act reduce the marking requirements for dyed diesel storage tanks so that they only apply to a person who is a retailer of dyed diesel fuel or who stores both dyed fuel and undyed diesel fuel for use by that person or another person. Prior law required all dyed diesel storage tanks to be labeled "For Nonhighway Use" unless the fuel in the tank was for home

heating, drying crops, or manufacturing and the tank was installed so that use of the fuel for any other purpose was made improbable.

Section 9 of the act clarifies the tax liability concerning the use of exempt cards and exempt access codes. A supplier is not liable for any tax due on fuel sold to a distributor or importer who represented that the fuel would be resold to an exempt governmental entity but who did not resell the fuel to a tax-exempt entity. Distributors and importers make this representation by using a card or access code issued by the supplier when getting the fuel at the terminal, and this card or code allows the distributor or importer to buy the fuel tax-free. If a distributor or importer in this circumstance sells tax-free fuel to a person who is not exempt, the distributor or importer is liable for any tax due on the fuel. The act also makes clear that a supplier that issues a card or code, enabling a person to buy fuel at retail without being charged the tax already paid on the fuel, has a duty to determine if the person is actually tax-exempt. A supplier is responsible for any tax due if the person to whom the supplier issued the card is not an exempt entity.

Section 10 of the act requires an out-of-state bulk-end user that buys fuel at a North Carolina terminal, as opposed to a bulk plant, to be licensed as a distributor or exporter. This change accompanies the changes made by Sections 2 and 4 of the act that require all exporters to be licensed. Unless the bulk-end user falls within the grandfather group of users that can get distributor licenses, the user will need to be licensed as an exporter.

Section 11 of the act changes the due date of a tax return of an occasional importer from the first of each month to the third of each month. This change was made at the request of sellers of racing gasoline who pointed out that if they buy fuel on the last day of a month it is difficult to prepare the return and send it in the next day. G.S. 105-449.66 defines an "occasional importer" as any of the following that imports motor fuel by any means outside the terminal transfer system:

1. A distributor that imports motor fuel on an average basis of no more than once a month during a calendar year.
2. A bulk-end user that is not a distributor.
3. A distributor that imports motor fuel for use in a race car.

Section 12 of the act deletes references to unlicensed exporters.

Section 13 of the act deletes references to an exporter.

Section 14 of the act adds imports to the categories of information contained on a supplier's return. It does this by replacing references to specific license holders in some places with the generic reference to "person receiving the fuel" and by adding references to "importer" in others.

Section 15 of the act allows a supplier to take a deduction on the supplier's return for taxes paid by the supplier on fuel that was subsequently sold at retail to a person who is exempt from tax and who used a card issued by the supplier to indicate his or her tax-exempt status when buying the fuel.

Section 16 of the act adds importers to the groups of license holders that must receive certain information from suppliers and about whom the suppliers must notify the Department of Revenue.

Section 17 of the act clarifies that anyone who pays tax on fuel that is exempt from tax

can apply for a refund of the tax paid.

Section 18 of the act adds a civil penalty for failure to get an importer confirmation number. The penalty is the same as the penalty for transporting motor fuel without a shipping document or with a false or incomplete document or for delivering motor fuel to a destination state other than as shown on the document. Prior law contained no penalty.

Section 19 of the act clarifies that the penalty for using dyed diesel or other non-tax-paid fuel in a highway vehicle applies to all fuel used in the vehicle. Prior law applied the penalty to fuel used "for highway use". This language could have been construed to mean that a vehicle that is parked at a rest area or the parking lot of a business and that had dyed diesel in its tanks was not subject to the penalty, because the fuel was not at that moment being used for a highway use.

Section 20 of the act clarifies that failure to pay a tax under the prior motor fuel tax laws is to be treated the same as a failure to pay under the revised laws. When tax at the rack was implemented, the existing motor fuel tax laws were repealed and replaced by the new provisions. Many assessments for taxes owed under the prior laws have not been paid.

Section 23 of the act requires a retailer or bulk user of alternative fuel that will be the taxpayer for the fuel to file a bond or irrevocable letter of credit with the Secretary of Revenue.

Section 24 of the act changes when the liability for tax on certain alternative fuel accrues. The section allows those retailers and users that use the same storage tank for highway and nonhighway alternative fuel to pay tax on the highway alternative fuel when it is metered from the tank. Prior law required taxes on alternative fuel to be paid when the fuel was delivered to the retailer of the fuel or the bulk user of the fuel. This created a problem when alternative fuel was used for a dual purpose, since the provider of the fuel did not know how much fuel would be used for a highway purpose when the fuel was delivered to the retailer or user.

Section 25 of the act allows retailers and bulk-end users of alternative fuel to store the fuel in a tank that holds both highway and nonhighway alternative fuel if the tank has separate metering devices to measure the fuel that is used for a highway use and fuel that is used for some other purpose.

All sections of the act, except three clarifying changes, became effective October 1, 1997. The clarifying changes became effective when the act became law (May 16, 1997).

S.L. 1997-77 (House Bill 36, Representative Capps)

AN ACT TO RELIEVE CONSUMERS OF THE REQUIREMENT OF FILING MONTHLY USE TAX RETURNS.

This act was a recommendation of the Revenue Laws Study Committee. It establishes an annual filing period for the payment of use taxes owed by consumers on mail-order and other out-of-State purchases. The annual filing period relieves consumers of the need to file either monthly or quarterly returns. The act became effective May 15, 1997, and applies to purchases made on or after January 1, 1997.

In 1991, the Department of Revenue began including an annual use tax return (Form E-554) on the individual income tax booklets. Under the State sales and use tax law, a person is responsible for paying use tax on their out-of-state purchases. Prior law specified only two

reporting periods – a quarterly period if the tax owed was less than $50.00, and a monthly period if the tax owed was more. Arguably, therefore, North Carolina customers of mail-order catalog companies should have been filing either monthly or quarterly returns.

The act improves the collection of the use tax by minimizing the compliance burden. Individuals who owe use tax on goods purchased out-of-state for a non-business purpose are now able to file an annual return. The return and the tax are due at the same time as the individual income tax return. In theory, residents who are subject to use tax for out-of-state purchases are more likely to comply if the reporting and payment procedure is not unduly burdensome.

The use tax complements the sales tax by taxing transactions that are not subject to the sales tax because of movement in interstate commerce. Like the sales tax, the use tax is imposed on the purchaser. Unlike the sales tax, the responsibility for remitting the tax to the Department is also on the purchaser. In the 1980s, states around the country became increasingly aware of the revenue loss from taxpayer avoidance of the use tax. The Department estimated in 1995 that the potential increase in State and local revenue for North Carolina, if full taxpayer compliance were achieved, would be $71.1 million.

The most cost-effective manner to collect the tax, from a state's point-of-view, is to require the out-of-state retailers to collect and remit the use tax. However, in 1967, the U.S. Supreme Court ruled in Bellas Hess that a state cannot require an out-of-state retailer to collect its use tax unless the retailer has enough contacts with the state to subject it to the state's taxing jurisdiction. The Supreme Court reaffirmed this decision in 1992 in Quill Company v. North Dakota.

The Direct Marketers Association, the Federation of Tax Administrators, the Multi-state Tax Commission, and the National Governors' Association have been negotiating a possible agreement under which more direct marketers would voluntarily collect use tax on behalf of customers in states in which the marketers do not have nexus. The group is likely to have a final agreement by July 1, 1998. If a final proposed agreement is reached, it will then be up to the states and the marketers to enter into the agreement.

In an effort to collect a larger percentage of this tax, North Carolina has entered a cooperative agreement with other southeastern states called the Southeastern States Exchange Agreement. The member states to this agreement exchange information gained through tax audits of businesses, such as the names and addresses of North Carolina customers to whom untaxed sales were made. The Department of Revenue may then contact these customers for the collection of the use tax, plus penalties and interest.

S.L. 1997-109 (House Bill 57, Representative Neely)

AN ACT TO REQUIRE WITHHOLDING FROM CERTAIN PAYMENTS TO NONRESIDENTS IN ORDER TO PREVENT NONRESIDENTS FROM AVOIDING NORTH CAROLINA INCOME TAXES, TO MODIFY THE DEFINITION OF EMPLOYMENT WITH RESPECT TO AGRICULTURAL LABOR, AND TO CONFORM TO FEDERAL RULES ON WAGE WITHHOLDING BY FARMERS.

This act makes two changes concerning the collection of taxes owed to North Carolina. First, it requires withholding from compensation paid to nonresident individuals and nonresident

entities for personal services performed in North Carolina. Second, it conforms State law to the federal law regarding agricultural employees' wages (both withholding from the wages and unemployment insurance tax on the wages).

The changes made by the act become effective at different times. The requirement to withhold from compensation paid to nonresident individuals and from compensation for athletic, entertainment, and construction services paid to nonresident partnerships, corporations, or limited liability companies becomes effective January 1, 1998. The requirement to withhold from all other compensation paid to these nonresident entities for personal services becomes effective January 1, 1999. This phase in of the withholding requirement was requested by North Carolina Citizens for Business and Industry. The nonresident withholding provisions of the act were suggested by the Department of Revenue and recommended by the Revenue Laws Study Committee. It is anticipated that the collection of income taxes owed by nonresident companies and individuals to the State will increase by $8 to $10 million a year as a result of these provisions.

The requirement to withhold from agricultural wages to the same extent as is required under federal law becomes effective January 1, 1998. Conformity to the federal unemployment tax exemption for certain aliens performing agricultural labor, as requested by the Farm Bureau, becomes effective immediately.

North Carolina taxes the income of its residents and also that income derived by nonresidents from businesses, trades, and occupations carried on in this State. Most other states that have an income tax apply the tax to nonresidents' income in this way. Like North Carolina, these states generally give their residents a credit for income tax paid to other states on income derived from those states.

Many nonresidents who derive income from North Carolina do not pay the North Carolina tax due on this income. This problem is particularly troublesome with respect to single event performers such as athletes or entertainers who may be paid large amounts for their work in North Carolina. It is difficult, expensive, and inefficient for the Department of Revenue to trace and pursue these nonresidents who do not pay the tax they owe.

This act imposes a withholding requirement on payments made to nonresidents for services performed in this state. This requirement is similar to the existing law which requires employers to withhold taxes from wages paid their employees. The new requirement will not apply to wages, which are already covered under the existing law; the new requirement applies to payments to independent contractors.

Examples of nonresidents targeted by the new withholding requirement are musicians, actors, and individual athletes. Because these individuals may be paid through a partnership, limited liability company, or corporation that does not have ties to this State, the withholding requirement applies to payments to these entities as well. If the entity is registered in this State or maintains a permanent office in this State, payments to it are not subject to withholding. Payments it makes to nonresidents for their services will, however, be subject to withholding, under either the new requirement for contract payments or the existing requirement for wages.

Under this act, a person or entity who, in the course of a trade or business, pays a nonresident more than $600 for personal services in this State will be required to withhold 4% of the payment and deposit the withheld taxes with the Department of Revenue. The withholding agent must register with the Department of Revenue. The withheld taxes are due by the last day of the first month after the end of the calendar quarter in which the withholding agent paid the

nonresident. As is the case with employers who withhold from employees' wages, the withholding agent will be required to give each nonresident a statement similar to a W-2 form in January and to provide a compilation of these statements to the Department of Revenue. Filing these documents relieves the agent of the existing information reporting requirement of G.S. 105-154.

The withheld taxes will be credited to the nonresident individual or entity from which they were withheld. If the entity is a pass-through entity such as a partnership, Subchapter S corporation, or limited liability company, the credit will pass through to the partners or other owners of the entity. The nonresident will receive credit for the withheld taxes by filing a North Carolina income tax return; any excess will be refunded to the taxpayer.

A number of other states have instituted withholding programs and special audit programs to close the loophole that allows nonresidents to avoid paying state income taxes they owe. California, Connecticut, Minnesota, New Jersey, and South Carolina have withholding requirements. Michigan, Missouri, and New York have special audit programs.

S.L. 1997-111 (House Bill 474, Representative Sutton)

AN ACT TO CLARIFY WHICH PREINDUCEMENT EXPENDITURES MAY BE FINANCED WITH INDUSTRIAL REVENUE BONDS.

This act clarifies the Department of Commerce's current policy of what costs may be reimbursed with Industrial Revenue Bond proceeds. The policy is derived from federal tax law. Under federal law, two types of expenditures may be reimbursed from bond proceeds:

1. An expenditure that is incurred or paid within 60 days of the date the Financing Authority took some action indicating its intent that the expenditure would be financed or reimbursed from bond proceeds.
2. Incidental expenditures that are incurred prior to the commencement of the acquisition, construction, or rehabilitation of a project. Examples of this type of expenditure include architectural costs, engineering costs, surveying costs, soil testing costs, and bond issuance costs.

Industrial Revenue Bonds offer manufacturing companies long-term debt financing at interest rates substantially below the current prime rate. Under the program, a local Financing Authority may enter into a financing agreement with a company to provide revenue bond proceeds to the company to be used to finance capital expenditures, such as fixed assets, land, buildings, new equipment, existing equipment, etc. The amounts payable by the company to the authority under the financing agreement must be sufficient to pay all of the principal and interest on the bonds.

Bond proceeds cannot be used to refinance existing debt or as venture capital. Current law does not define the term "refinance." Under federal law, bond proceeds may be used to reimburse certain expenses the company incurs prior to any action of the authority indicating its intent that the expenditure would be financed or reimbursed from bond proceeds. This act allows North Carolina the full flexibility available under federal law to reimburse certain preinducement expenditures.

S.L. 1997-118 (Senate Bill 34, Senator Cochrane)

AN ACT TO ADJUST THE SHARE THE CITIES RECEIVE FROM THE STATE GROSS RECEIPTS TAX TO MAKE THE DISTRIBUTION MORE EQUITABLE AND TO ALLOW THE DEPARTMENT OF REVENUE TO GIVE CITY FINANCE OFFICIALS INFORMATION NEEDED TO VERIFY THE ACCURACY OF A CITY'S DISTRIBUTION.

This act increases the amount of State franchise tax that is distributed to 40 cities. The cities whose distributions are increased are those whose 1995-96 distributions were less than 95% of their 1990-91 distributions. The act increases the distributions for these cities by reducing the "hold-back amount" that is deducted from a city's share. The act applies to distributions made for fiscal year 1995-96 and subsequent years. The act increases the annual distribution to the affected cities by a total of $194,841. The annual distribution to the other 500 cities is reduced by the same amount, so that the State share of the franchise tax is not reduced under this act. This act was recommended by the Revenue Laws Study Committee.

The State distributes part of the State franchise tax imposed on utilities to the cities. The franchise taxes that are distributed are the taxes on electricity, piped natural gas, and telephone service. The State imposes a franchise tax on these utilities at the rate of 3.22%. The State distributes to cities the amount of tax collected from service provided inside the cities that equals a tax of 3.09%. Thus, the cities receive the majority of these taxes.

The amount to be distributed to a city is reduced by that city's "hold-back" amount. The "hold-back" amount is the amount by which the city's distribution of these franchise taxes increased from fiscal year 1990-91 to fiscal year 1994-95. During this period, the total amount distributed was frozen but the relative share of each city changed based on the proportion of that city's receipts compared to the total of all cities' receipts. When the freeze was lifted in 1995-96, a requirement was imposed to calculate and deduct a "hold-back" amount. The effect of the deduction of a hold-back amount from the cities' distribution is the retention by the State of the growth that occurred in the franchise tax base during the freeze years. The hold-back amount is considered the cities' contribution to the State budget crisis in the early 1990s.

The "hold-back" amount reduced the amount distributed in fiscal year 1995-96 to some cities below the amount that was distributed to them in 1990-91. This occurred to cities that experienced a temporary franchise tax base growth in the freeze years (1990-91 through 1994-95) and then a reduction of the base in 1995-96. The hold-back deduction requires these cities to deduct taxes attributable to growth that is no longer in their tax base.

The act adjusts for this loss of tax base growth by reducing the hold-back amount. The amount distributed to a city in 1995-96 is compared to the amount distributed in 1990-91. If the 1995-96 amount is less than 95% of the 1990-91 amount, the hold-back amount is reduced in accordance with the formula in the act to the greater of zero or the amount that would have caused the city's 1995-96 distribution to equal the 1990-91 amount.

In the course of developing this proposal, a number of reporting errors from utilities were discovered. To address this concern, the act amends the tax secrecy provisions to allow the Department of Revenue to give finance officials of a city a list of the utility taxable gross receipts that were derived from sales within the city and used to determine the franchise tax distribution to the city. This provision will allow cities to verify the data that determines their share of the State franchise tax distribution.

S.L. 1997-121 (Senate Bill 106, Senator Cooper)

AN ACT TO ALLOW REGIONAL SALES OF PERSONAL PROPERTY SEIZED FOR UNPAID TAXES TO BE HELD IN ANY COUNTY.

This act gives the Department of Revenue the ability to sell in any county in this State personal property the Department has seized for payment of delinquent State taxes. Current law requires this property to be sold in Wake County or the county in which the property was seized. It was recommended to the 1997 General Assembly by the Revenue Laws Study Committee.

G.S. 105-242(a)(2) authorizes the Secretary of Revenue to levy on a taxpayer's personal property to collect delinquent unpaid taxes and to sell the property either in Wake County or in the county in which it was seized. This statute is used almost exclusively by the Controlled Substance Tax Division, which collects the tax on illegal drugs. The 1997 General Assembly expanded the tax on illegal drugs to include a tax on illegal liquor. Vehicles and other property are often seized for these taxes pursuant to G.S. 105-113.111 and sold at auction. Seventy-five percent of the proceeds of these sales are distributed among the law enforcement agencies whose investigation led to the assessment and the remaining 25% is credited to the General Fund.

The current practice of the Department is to store and sell all seized property in Wake County. The Department does this because it is too costly to store and sell property in all 100 counties. The Department contracts to have seized property hauled from the counties in which it is seized to Wake County where it is stored until an auction site is available. Rental of auction sites in Wake County is expensive and, because of delays due to waiting for a site, the Department incurs extra costs for storing the property.

The Department plans to implement this act by establishing regional sites in Eastern, Central, and Western North Carolina for the sale of seized property. Expanding the permissible locations for sales will reduce costs because the property will not have to be hauled as far and there will be less storage time waiting for an auction site to become available. In addition, more companies will be able to compete for the transportation, storage, and sale business because they will no longer have to have Statewide operations in order to qualify, and this increase in competition could yield a lower contract price. The Department estimates that it will be able to reduce expenses incurred in selling seized property by at least $39,000 a year.

S.L. 1997-139 (Senate Bill 323, Senator Horton)

AN ACT TO ALLOW AN INCOME TAX CREDIT FOR EXPENDITURES TO REHABILITATE HISTORIC STRUCTURES.

This act expands the current State income tax credit for rehabilitating an income-producing historic structure, effective beginning in the 1998 tax year. It is expected to reduce General Fund revenues by approximately $56,000 in 1998-99, $965,000 in 1999-2000, $2 million in 2000-01, and $3.5 million in 2001-02.

The act increases the credit for rehabilitating income-producing structures from 5% to 20% of the rehabilitating expenditures and allows a new 30% credit for rehabilitating non-income producing structures. The 20% credit will yield a combined federal and State credit equal to 40% of the rehabilitating expenditures for income-producing historic structures. A taxpayer is allowed

the 30% State tax credit for rehabilitating non-income producing historic residential structures only if the taxpayer does not qualify for the federal tax credit for income-producing historic structures.

The act also provides that the credits may not be taken in one year but must be spread out in installments over five years after the historic structure is placed in service. Any unused portion of a credit may be carried forward for a five-year period.

Federal law provides a federal income tax credit equal to 20% of qualified rehabilitation expenditures for certified historic structures that are used in connection with a trade or business or held for the production of income. This credit is available for both residential rental buildings and nonresidential buildings that are listed in the National Register or that are located in a registered historic district and certified as being of historic significance. Former State tax law provided an individual and corporate income tax credit for rehabilitating a certified historic structure for which the taxpayer was allowed a credit under federal law if the historic structure was located in North Carolina. Federal tax law does not provide an income tax credit for rehabilitating an historic structure that is used as the owner's residence and thus is not income-producing. This act expands the existing State credit to include certified historic structures that are not otherwise eligible for the federal tax credit because they are not income-producing. To be eligible for the credit for rehabilitating a non-income producing historic structure, a taxpayer must attach a copy of the certification received from the State Historic Preservation Office verifying that the improvements made are consistent with the Secretary of the Interior's Standards for Rehabilitation. In addition, the costs of the improvements must exceed $25,000 over a 24-month period.

S.L. 1997-205 (Senate Bill 1064, Senator Hoyle)

AN ACT TO ALLOW A TAXPAYER WHO PREVAILS IN A PROPERTY TAX APPEAL TO RECEIVE INTEREST ON ANY OVERPAYMENT OF TAX AND TO AUTHORIZE THE LEGISLATIVE RESEARCH COMMISSION TO STUDY VARIOUS PROPERTY TAX ISSUES.

This act allows a taxpayer who has prevailed in a property tax appeal to receive interest on the overpayment of property taxes, effective for appeals made to the Property Tax Commission on or after July 1, 1997. The Property Tax Commission hears and decides appeals from decisions concerning the listing, appraisal, or assessment of property made by county boards of equalization and review and boards of county commissioners. Any property owner who is dissatisfied with the decisions of these county boards may appeal to the Commission. Under prior law, if the Property Tax Commission determined that a taxpayer's property had been overvalued and that the taxpayer had therefore paid more tax than was owed on the property, there was no payment of interest on the overpayment. The act provides that the overpayment will bear interest at the rate borne by all other assessments of tax. Under current law this rate is determined in accordance with G.S. 105-241.1(i). The statute permits the Secretary of Revenue to set interest paid on State taxes semiannually after giving due consideration to current market conditions and to the rate that will be in effect on that date pursuant to the Internal Revenue Code.

The act authorizes the Legislative Research Commission to study methods used by counties to develop the schedules of value for a general reappraisal of real property, the process

for appealing the value or listing of property, and the octennial revaluation schedule. In conducting this study, the Commission may determine whether the procedures used in developing schedules of value produce unrealistic values on nonresidential real property, whether representatives of the Department of Revenue should be given more authority in resolving taxpayer appeals, and whether the Property Tax Commission should be replaced with a State Tax Court. The Commission may assign these property tax issues to a tax study committee or create a separate study committee to study these issues. The Commission may make an interim report of its findings to the 1998 Regular Session of the 1997 General Assembly and a final report to the 1999 General Assembly.

S.L. 1997-209 (Senate Bill 153, Senator Odom)

AN ACT TO EXTEND THE SCRAP TIRE DISPOSAL TAX AT ITS CURRENT RATE FOR FIVE MORE YEARS, TO AMEND THE SCRAP TIRE DISPOSAL ACT TO DISCOURAGE THE DISPOSAL OF SCRAP TIRES FROM OUTSIDE THE STATE, AND TO COMPLETE THE CLEANUP OF NUISANCE TIRE COLLECTION SITES, AS RECOMMENDED BY THE ENVIRONMENTAL REVIEW COMMISSION.

This act makes a number of changes to the scrap tire tax and the use of the tax proceeds. It was recommended by the Environmental Review Commission. The scrap tire disposal tax was enacted in 1989 and applies to tires sold at retail and tires sold for placement on vehicles to be sold or leased at retail. The tax generates almost $10 million a year in revenue.

The act moves the sunset date on the 1993 increase in the tax from June 30, 1997, to June 30, 2002. Therefore, the 1993 tax increase will expire five years later than it would have if this act had not been enacted. Effective October 1, 1993, the tax rate was increased from 1% to 2% for tires with a bead diameter of less than 20 inches. Bead width is the width of the inside opening of the tire. Tires for cars, vans, and pick-up trucks have a bead width of less than 20 inches. When the tax increase sunsets, the tax on these tires will revert back to 1%.

The scrap tire tax proceeds are distributed as follows: 27% to the Scrap Tire Disposal Account, 5% to the Solid Waste Management Trust Fund, and 68% to the counties on a per capita basis. This act repeals a provision that, effective June 30, 1997, would have sunset the Scrap Tire Disposal Account and discontinued the 27% earmarking to the Account, increased from 5% to 10% the earmarking to the Solid Waste Management Trust Fund, and increased from 68% to 90% the percentage distributed to counties.

The act increases from 25% to 50% the maximum amount in the Scrap Tire Disposal Account that may be used for grants to local governments to assist in the disposal of scrap tires, and allows up to 40% of the amount in the Account to be used for grants to encourage the use of processed scrap tire materials. The remaining funds in the Account will continue to be used to clean up nuisance scrap tire collection sites. Under prior law, the Department of Environment and Natural Resources (DENR) could use up to 25% of the funds in this Account to make grants to counties for scrap tire disposal and was required to use the remaining funds in the Account to clean up nuisance scrap tire collection sites.

The act adds a factor for DENR to consider when making grants to local units from the Scrap Tire Disposal Account to assist them in disposing of scrap tires. That factor is the effort made by the local unit to prevent out-of-state tires from being disposed of for free. G.S. 130A-309.58(e) prohibits counties from charging a fee for scrap tire disposal unless the tires are defective new tires or tires that have a certificate indicating they came from outside the State and therefore were not replacements for tires on which the scrap tire tax was paid. Despite the certificate requirement, many out-of-state tires are being disposed of for free in this State's disposal sites.

S.L. 1997-213 (House Bill 15, Representative Cansler)

AN ACT TO CONFORM TO FEDERAL TAX TREATMENT OF INCOME RESTORED UNDER A CLAIM OF RIGHT.

This act conforms North Carolina’s income tax law to the Internal Revenue Code with respect to the tax treatment of "restored income.” Restored income is $3,000 or more of income that a taxpayer receives from a person in one year but then has to pay back in a later year. It was recommended by the Revenue Laws Study Committee. The act applies retroactively to the 1995 tax year to address a specific situation that was brought to the attention of the Revenue Laws Study Committee.

A taxpayer may receive a substantial amount of income in year one and pay tax on the income for that year. Then, in year two, for example, the taxpayer may be required to pay back some of the income that was received in year one and taxed. If this occurs and the amount given back is at least $3,000, the taxpayer may deduct in year two the amount of income that was paid back. The deduction in year two of the “restored” income offsets the inclusion of the income in year one if the taxpayer’s income in year two is large enough to be able to take the deduction.

If the taxpayer’s income in year two is smaller than the amount to be deducted, the taxpayer is in the position of having paid taxes on income that, as it turns out, did not belong to the taxpayer. Even with individual net loss deductions, the taxpayer may never have enough income to deduct the amount the taxpayer had to pay back. The taxpayer is not allowed to file an amended return for year one to subtract the restored income because the taxpayer did in fact receive the income in year one. If the taxpayer had restored the income in year one rather than year two, however, the two events would have offset one another and there would have been no tax consequence.

For federal purposes, the Internal Revenue Code provides relief in these cases if the amount restored is at least $3,000 and there is insufficient income in the later year to offset the deduction and thus reduce the taxpayer’s tax by the amount it was increased in year one because of the inclusion of the restored amount. Section 1341 of the Code gives the taxpayer, in effect, instead of a deduction in year two, a credit for the amount by which the taxpayer’s tax would have been reduced in year one if the restored amount had not been included in taxable income for that year. The credit is treated as a payment of tax made by the taxpayer, which can then be refunded.

North Carolina’s individual and corporate income taxes piggyback the federal Code to a large extent but, under prior law, did not conform to section 1341 because that section is structured as an alternative tax rather than as a reduction in taxable income. Because there was no corresponding provision in the North Carolina income tax law, a taxpayer would end up paying

North Carolina income tax on income the taxpayer later had to repay to another. This act conforms the North Carolina law to the federal on this issue by allowing the excess tax paid to be refunded.

The circumstances addressed by this act are rare and its fiscal impact is minimal. The situation sometimes occurs with taxpayers who receive employer disability payments while an application for federal disability payments is pending. A federal disability application may take a year or two to process and, if federal benefits are approved retroactively, the taxpayer is usually required to pay back to the employer the amount of employer disability payments received while the federal case was pending.

The case that was brought to the attention of the Revenue Laws Study Committee involved an individual who invented a formula for producing a chemical product and sold the formula to a manufacturer for nearly $2 million in 1994. The inventor's former employer sued the inventor claiming that the employer had licensing rights to the formula. The inventor settled the suit by paying the employer more than $400,000 of the $2 million sales proceeds in 1995. The inventor paid tax on the full $2 million in 1994; in 1995, the inventor had little income to offset the $400,000 deduction for the amount restored to the employer. Thus, without this act, the inventor would have forfeited the more than $25,000 in North Carolina income tax paid on the remainder of the $400,000 in 1994.

S.L. 1997-226 (House Bill 260, Representative Gray)

AN ACT TO INCREASE THE CAP ON THE INCOME TAX CREDIT FOR REAL PROPERTY DONATED FOR CONSERVATION PURPOSES, TO ENSURE THAT CONSERVATION AND PRESERVATION AGREEMENTS ARE CONSIDERED IN DETERMINING THE APPRAISED VALUE OF LAND AND IMPROVEMENTS, AND TO ESTABLISH THE CONSERVATION GRANT FUND.

This act directs the Department of Environment and Natural Resources (DENR) to develop a program to encourage a Statewide network of protected natural areas, riparian buffers, and greenways. The success of the program lies in the voluntary donation by property owners of conservation easements in land that is important to the ecological system of the State. A conservation easement is a written agreement between a landowner and a qualifying conservation organization or public agency. The landowner agrees to keep the property covered by the easement in its natural condition, without extensive disturbance. The organization or agency is granted the right to enforce the covenants of the easement and to monitor the property.

The act provides two different methods of carrying out its purpose. First, it increases the tax credit for certain real property donations where the land is useful for land conservation purposes. Second, it creates a Conservation Grant Fund to stimulate the use of conservation easements, to improve the capacity of private nonprofit land trusts to successfully accomplish conservation projects, to better equip real estate related professionals to pursue opportunities for conservation, to increase citizen participation in land and water conservation, and to provide an opportunity to leverage private and other public monies for conservation easements. The fiscal impact of the act from the increase in tax credits is estimated to be a loss of $3.2 million a year.

The increase in tax credits was effective beginning on or after January 1, 1997. The Conservation Easements Fund became effective July 1, 1997.

Under prior law, a taxpayer could receive a tax credit equal to 25% of the fair market value of a property interest donated to the State, a unit of local government, or a body organized to receive and administer lands for conservation purposes. The act increases the $25,000 cap on this credit to $100,000 for individual income taxes and $250,000 for corporate income taxes.

The act also makes a conforming change to ensure that a taxpayer who chooses to claim the State credit does not also claim and receive a deduction for federal income tax purposes. This is necessary since federal taxable income is the starting point for calculating State taxable income.

The act further provides that county property tax assessors shall take into account changes in the property's value resulting from conservation or preservation agreements.

The act directs DENR to develop a nonregulatory program, known as the Conservation Easements Program, that uses conservation tax credits as a prominent tool to accomplish conservation purposes and that creates the Conservation Grant Fund to be administered by DENR. Grants from the Fund may be used only to pay for one or more of the following costs and may not be used to pay the purchase price for any interest in land:

1. Reimbursement for all or part of the transaction costs associated with a donation of property.
2. Management support.
3. Monitoring compliance with conservation easements, the related use of riparian buffers, natural areas, and greenways, and the presence of ecological integrity.
4. Educational materials that will encourage conservation purposes.
5. Stewardship of land.
6. Transaction costs, including legal expenses, closing and title costs, and unusual direct costs, such as overnight travel.
7. Administrative costs for short-term growth or for building capacity.

The grant money under the Conservation Grant Fund is available for land that possesses or has a high potential to possess ecological value, is reasonably restorable, and qualifies for the conservation tax credits. A private nonprofit land trust organization is eligible for grant money if it qualifies for the conservation tax credits and is certified under section 501(c)(3) of the Internal Revenue Code.

The Conservation Grant Fund consists of any monies appropriated from the General Fund and any monies received from public or private sources. Any unspent General Fund money appropriated to the Fund reverts at the end of the fiscal year unless the General Assembly provides otherwise. Unexpended monies in the Fund from other sources do not revert at the end of the fiscal year. No money was appropriated to the Fund by this act, nor was any money appropriated in the 1997 General Assembly's budget bill.

S.L. 1997-270 (House Bill 529, Representative Clary)

AN ACT TO PROVIDE THAT DEFERRED TAXES DUE ON CERTAIN PROPERTY THAT IS TAXED AT ITS PRESENT-USE VALUE WILL BE PAID BY THE PERSON TO WHOM THE LAND IS TRANSFERRED IF THE PROPERTY IS TRANSFERRED BECAUSE OF CONDEMNATION.

This act provides that when the State or a local government or a private condemnor condemns property that qualifies for farm use value taxation, the condemnor must reimburse the owner for deferred property taxes owed on the property if the owner is a natural person and has other property that qualifies for farm use value taxation. The act become effective August 1, 1997.

Before its enactment, an earlier version of the bill made the condemnor liable for paying the deferred taxes directly to the taxing unit, but this requirement was changed to a reimbursement requirement because government entities -- most condemnors -- cannot be taxed under the Constitution. They can, however, be required to reimburse the taxpayer.

The act does not impose a reimbursement requirement on the federal government. Federal law governs federal condemnation and cannot be amended by the State.

It has been pointed out that this act, with or without the technical amendment, may create more litigation. Condemnors may argue that the amount of compensation paid should be reduced to reflect the requirement that they reimburse the owner for the deferred taxes. Because of this requirement, the fair market value is arguably lower than it would otherwise be. If this argument were to prevail, the financial burden would be shifted back to the farmer.

Property tax law provides that all property is to be taxed at its market value. A special use value law makes an exception for agricultural land, horticultural land, and forestland: it can be taxed at its value in its current use. The additional property taxes that would otherwise have been due are deferred and become a lien on the land, however. If the use value property is transferred or otherwise becomes ineligible for use value taxation, three years of these deferred taxes become due and payable to the local government taxing units.

The power of eminent domain is the power of a public or private entity to take any interest in property from the owner of the property against the owner's will upon the payment of just compensation for the interest. Condemnation is the procedure for exercising the power of eminent domain: the condemnor files a court action to determine the condemnor's right to condemn the property and the amount of just compensation to be paid the owner. A condemnor may negotiate with the owner to purchase the property it would otherwise condemn.

The following entities have the power of eminent domain: the State, the federal government, counties, cities, school districts, certain other local government entities, and certain private entities, including public utility companies, private educational institutions (to the extent necessary to obtain a water supply for the institution), and railroad companies. The Department of Transportation and other State agencies benefit from the "quick take" procedure in Article 9 of Chapter 136 of the General Statutes, in which title vests in the condemnor when the condemnation proceeding is instituted. Depending upon the purpose for which a local government entity seeks to condemn property, G.S. 40A-42 provides that the title may vest in the condemnor when the proceeding is instituted or when the property owner fails to contest the authority of the condemnor to condemn the property. In the case of a private condemnor, G.S. 40A-42 provides that title vests in the condemnor only after final resolution of the condemnation proceeding. Under current law, the condemnor is required to reimburse the owner for property

taxes allocable to the period after title vests in the condemnor; this would not include the taxes deferred for earlier tax years because the property was taxed at use value rather than market value.

S.L. 1997-272 (Senate Bill 508, Senator Plyler)

AN ACT TO PROVIDE THAT A TURKEY GROWER SHALL NOT BE DISQUALIFIED FROM USE VALUE TAXATION FOR A TWO-YEAR PERIOD IF THE GROWER'S LAND IS TAKEN OUT OF PRODUCTION SOLELY BECAUSE OF THE PRESENCE OF TURKEY DISEASE IN THE AREA.

This act allows agricultural land used in the production of turkey growing within the preceding two years to continue to qualify for present-use value for property tax purposes, even if the property has been taken out production because of an infectious, transmissible disease known as Poult Enteritis-Mortality Syndrome. This disease is characterized by growth depression and high mortality among turkeys. To eradicate the disease, turkey farmers must suspend their production of turkeys. The act is effective for taxes imposed for taxable years beginning on or after July 1, 1997.

Many turkey farmers participate in the use value deferment program. Under this program, agricultural land, forestland, and horticultural land are valued for property tax purposes based upon their present use value rather than fair market value. The difference between the taxes due on the property's use value and its fair market value is deferred until the property loses its eligibility for the program. At that time, taxes for the preceding three fiscal years which have been deferred, together with interest which accrues on the deferred taxes as if they had been payable on the dates on which they originally became due, become immediately due and payable.

To qualify for use value treatment, property must meet certain ownership, use, and income requirements. Besides being individually owned, agricultural land must be in actual production and it must have produced an average gross income of at least $1,000 for the three years preceding January 1 of the year for which the tax benefit is claimed. When turkey farmers must suspend their production of turkeys in an effort to eradicate the disease, they may lose their eligibility for the use value deferment program because the land is no longer in actual production or because the agricultural income is reduced below the $1,000 threshold. This act provides that these farmers will not lose their eligibility for the program solely on the grounds that the land is being held out of production for the purposes of eradicating the disease of Poult Enteritis-Mortality Syndrome. This exception, however, lasts for only two years. The two-year period should allow farmers to remain in the use value deferment program until they recover.

S.L. 1997-277 (Senate Bill 316, Senator Kerr)

AN ACT TO AMEND THE WILLIAM S. LEE QUALITY JOBS AND BUSINESS EXPANSION ACT.

This act began as an agency bill requested by the North Carolina Department of Commerce. It amends several of the business tax credits that were expanded or enacted by the 1996 General Assembly. As part of the 1996 William S. Lee Quality Jobs and Business Expansion

Act, the General Assembly extended the jobs tax credit to all 100 counties, enacted a new tax credit for worker training expenses, enacted a new tax credit for increasing research activities, and enacted two new tax credits for investing in machinery and equipment. To be eligible for the jobs credit, the worker training expense credit, the credit for research activities, and one of the investment credits, the taxpayer had to be engaged in manufacturing or processing, warehousing or distributing, or data processing and the wages of the jobs affected had to be at least 10% above the average weekly wage in the county where the job was created or the business claiming the credit was located, as appropriate.

This act expands the types of businesses eligible for the credits to include air courier services, effective January 1, 1998. Air courier services are businesses primarily engaged in furnishing over-night delivery of individually addressed letters, parcels, and packages. Examples of air courier services include UPS and Federal Express.

This act expands the types of businesses eligible for the credits to include central administrative offices, effective October 1, 1997. Central administrative offices are businesses engaged in providing management and general administrative functions for other businesses of the same enterprise. They may perform such services as general management, accounting, computing, tabulating, or data processing, purchasing, engineering and systems planning, advertising, public relations or lobbying, and legal, financial, or related managerial functions. For a business to qualify for these credits as a central administrative office, it must create at least 40 new full time jobs (not including jobs transferred from elsewhere in the State).

The act also creates a new tax credit for taxpayers who purchase or lease real property to be used as central administrative office property, effective October 1, 1997. The amount of the credit is equal to 7% of the eligible investment amount. The eligible investment is the lesser of: (1) the cost of the property or (2) the cost of the taxpayer's total North Carolina property used as central administrative offices on the last day of the taxable year minus the cost of the taxpayer's total North Carolina property used as central administrative offices on the last day of the base year. The base year is that year, of the three immediately preceding taxable years, in which the taxpayer was using the most property as central administrative offices in this State. This calculation prevents a taxpayer from receiving a credit for an office moved from one part of the State to another. For leased property, the cost of the property equals the lease payments over a seven-year period, plus any expenditures made by the taxpayer to improve the property before it is used as the taxpayer's central administrative office if the expenditures are not reimbursed or credited by the lessor. The tax credit for investing in central administrative office property may not exceed $500,000, and is taken in seven equal installments over the seven years following the taxable year in which the property is first used as a central administrative office. If the property ceases to be used as a central administrative office during the seven-year period, then the credit expires and the taxpayer may not take any remaining installment of the credit. The credit also expires if the total number of the taxpayer's employees at all of its central administrative offices drops by 40 or more.

The act expands the credit for investing in machinery and equipment and the business property credit to include leased personal property. This change is effective for taxable years beginning on or after January 1, 1997.

The act changes the formula for determining a county's ranking and tier designation for several of the tax credits in two ways. First, it changes the factors in the formula. Under prior law, the Secretary of Commerce assigned an enterprise factor to each county each year based on the county's rank in a ranking of counties by unemployment (from lowest to highest), by per capita

income (from highest to lowest), and by population growth (from highest to lowest). The act changes the unemployment and per capita income components from a one-year standing to a standing based on the average of the most recent three years. Second, the act guarantees that a county that obtains Tier 1 status cannot lose that status for two years regardless of what the annual rankings would otherwise require. The first of these changes is effective when the act becomes law and applies to designations for the 1998 and later calendar years. The guarantee of at least a two-year Tier 1 status applies retroactively to 1997 and subsequent years.

The act changes the wage standard that applies to all but one of the investment credits in two ways. The prior wage standard was 110% of the average weekly wage in the county. The wage standard for Tier 1 counties now equals the lower of three figures: the average private sector weekly wage in the county; the average private sector weekly wage in the State; and the average private sector weekly wage in the county multiplied by the "county income/ratio wage adjustment" factor. The "county income/wage adjustment" determines a single county's ratio per capita income to its annualized private sector wages, and compares this ratio to the same measure for the State as a whole. The act also replaces the prior wage standard for the other tier areas with a standard 10% above the lower of the three figures described above. These changes are effective for the 1997 tax year and later years. The purpose of these changes is to provide an appropriate standard for counties that have unusual situations, such as a single, large employer.

The act allows a taxpayer to specify the tax (income or franchise) against which the credit is claimed when filing a tax return rather than when applying for the credit with the Department of Commerce. This change is effective retroactively to the 1996 tax year and applies to all future years. This change was needed because, when initially applying for the credit, the company may not yet know which tax it will claim the credit against.

The act amends the credit for investing in machinery and equipment by providing that a taxpayer that signs a letter of commitment to place specific machinery and equipment in service in an area within two years after the date the letter is signed, and in fact does so, may calculate the credit based upon the tier the county was in when the taxpayer signed the letter. This same provision is already allowed for purposes of the jobs tax credit. This change, which allows companies to plan major investments without risking a possible tier redesignation for the location of the planned investment, becomes effective for taxable years beginning on or after January 1, 1998.

The act directs the Department of Commerce to study tax incentives for new and expanding businesses enacted in 1996, including their effects on tax equity, their distribution across new and existing businesses, the patterns of business development before and after their enactment, and their costs and benefits, and to study the use of tax incentives by other states. The Department of Commerce must report the results of its study to the General Assembly by April 1, 1999.

The fiscal impact of the act is estimated to be a loss to General Fund revenues beginning at $ .2 to $ .5 million for fiscal year 1997-98, and growing to a maximum of $14.5 million for fiscal year 2001-02.

S.L. 1997-292 (House Bill 754, Representative Dickson)

AN ACT TO LEVY AN EXCISE TAX ON ILLICIT SPIRITUOUS LIQUOR, AN EXCISE TAX ON MASH, AND AN EXCISE TAX ON ILLICIT MIXED BEVERAGES.

This act expands the excise tax on controlled substances to include a tax on illicit spirituous liquor, mash, and illicit mixed beverages, effective October 1, 1997. Mash is a fermentable starchy mixture from which spirituous liquor can be distilled. Illicit spirituous liquor and illicit mixed beverages are primarily non-tax-paid liquor and mixed beverages that contain non-tax-paid liquor. The new tax is expected to generate between $300,000 and $500,000 annually, of which approximately 75% will be distributed to State and local law enforcement agencies and 25% will be credited to the General Fund.

The tax rate on illicit spirituous liquor is $31.70 for each gallon or fraction thereof sold by the drink and $12.30 for each gallon or fraction thereof not sold by the drink. The tax rate on mash is $1.28 for each gallon or fraction thereof. The tax rate on illicit mixed beverages is $20.00 on each four liters and a proportional sum on lesser quantities. These tax rates are equivalent to the mixed beverage taxes that would be due on the liquor or mixed drinks or on liquor made from the mash. Failure to pay the tax due triggers a penalty equal to 50% of the tax due, the same as the tobacco tax.

The General Assembly enacted the excise tax on controlled substances in 1989 as a means of generating revenue for State and local law enforcement agencies and for the General Fund. Under the law, a person who acquires illegal drugs is required to pay tax on them within 48 hours of acquiring possession if the tax has not already been paid as evidenced by a tax stamp. A person paying the tax is not required to disclose his or her identity and any information obtained in assessing the tax is confidential and cannot be used in a criminal prosecution other than a prosecution for failure to comply with the tax statute itself. Seventy-five percent of the revenue generated by assessments of the tax is distributed to the law enforcement agencies whose investigation led to the assessment. The remainder of the revenue is credited to the General Fund. The excise tax on illicit liquor, mash, and illicit mixed beverages will be administered and distributed in the same manner as the excise tax on controlled substances.

The North Carolina Court of Appeals upheld the constitutionality of the State's excise tax on controlled substances in 1996 and the North Carolina Supreme court affirmed March 7, 1997. The case, State v. Ballenger, was based on the United States Supreme Court's 1995 opinion holding Montana's illegal drug tax unconstitutional because it was a second punishment, not a true tax, and thus violated the double jeopardy clause of the Fifth Amendment. The United States Supreme Court decision was based on two key aspects of Montana's tax: it was at an unusually high rate when applied to certain low-value drugs and it did not apply until a person was arrested for a drug violation. Our Attorney General's office reviewed the Montana case and concluded that our drug tax is not unconstitutional because it applies whether or not a person is arrested for a drug violation. The General Assembly enacted several changes to the law in 1995 to further clarify that the tax is not a punishment, but is in fact a true tax designed to raise revenue.

S.L. 1997-300 (Senate Bill 784, Senator Webster)

AN ACT TO PROVIDE TAX RELIEF AND SIMPLIFICATION BY CONFORMING STATE TAX LAW TO THE FEDERAL RULE THAT

GRANTS A FILING EXTENSION EVEN IF THE REQUEST IS NOT ACCOMPANIED BY PAYMENT.

This act conforms the State tax law on filing extensions for certain taxes with federal law by authorizing an extension for filing a return whether or not the tax is paid. The filing extension is not an extension of time for paying the tax, however. The act becomes effective for returns due on or after January 1, 1998.

Under current State law, to obtain an extension of time for filing an income tax return, a corporate franchise tax return, or a gift tax return, the taxpayer must pay the amount expected to be due. If the taxpayer does not pay the tax, the filing extension is not granted and the taxpayer faces penalties for both late filing and late payment. This law was enacted in 1990 to bring State law in conformity with federal law. The federal law has since changed, however. The Internal Revenue Service recently adopted a rule granting a filing extension whether or not the tax is paid. The filing extension is not an extension of time to pay the tax, however. If the tax is not paid by the original due date, a taxpayer who pays when filing the return on the extended date still faces a late payment penalty but not a late filing penalty.

The purpose of granting a filing extension whether or not the tax is paid is to obtain a record of the taxpayer. A taxpayer who could not pay the tax by the due date and thus could not obtain a filing extension under prior law had no incentive to file a request for an extension or to file a return by the extended date. In fact, the accumulated filing penalties could have made the taxpayer less likely to file at all. If a taxpayer does not request an extension or file a return, the Department of Revenue might have no record of the taxpayer and thus might not be able to pursue the unpaid taxes. If the taxpayer requests an extension but does not pay the tax, the Department can contact the taxpayer and try to collect the unpaid taxes, perhaps through an installment agreement.

Conforming the State law to the federal law will simplify tax compliance for taxpayers, who will not have to track separate State and federal rules for obtaining a filing extension. The proposed change will result in some nonrecurring computer programming costs for the Department of Revenue. The Department is authorized to draw these one-time costs from 1997-98 fiscal year income tax collections.

S.L. 1997-307 (Senate Bill 249, Senator Carpenter)

AN ACT TO CLARIFY WHAT FUNDS MAY BE USED TO REPAY SPECIAL OBLIGATION BONDS AND TO MAKE OTHER CHANGES IN THE LAWS CONCERNING THESE BONDS.

This act changes the law on special obligation bonds issued by a unit of local government for a solid waste project, such as a landfill or an incinerator, in the following ways:

1. It allows a local unit that has issued a solid waste special obligation bond to pledge additional nontax revenue in payment of the bond after the bond has been issued.
2. It applies the terms and conditions that apply under G.S. 160A-20 to security interests granted in installment financing agreements to security interests in property to be financed by a local solid waste special obligation bond. Applying these criteria makes it clear that the security interest may extend to land already owned as well as the

building to be financed, requires the local government to hold a public hearing before granting the security interest, and requires approval by the Local Government Commission before granting the security interest.

3. It clarifies that local solid waste special obligation bonds are secured by the nontax funds that are pledged for their payment but can be paid from other funds.

In 1989, the General Assembly authorized local governments to issue special obligation bonds to finance solid waste management projects. A special obligation bond does not require a vote of the people. A solid waste special obligation bond must be secured by a pledge of designated nontax revenues. The nontax revenues can be fees or can be taxes that are levied by another unit of government and shared with the local government that proposes to issue the special obligation bonds. For example, a city can pledge its share of local sales and use taxes because the county levies those taxes. A county can pledge landfill fees or State-shared tax revenue, such as franchise tax revenue.

S.L. 1997-318 (House Bill 96, Representative Dickson)

AN ACT TO DIRECT THE SECRETARY OF REVENUE TO (1) MAKE REFUNDS OF THE INTANGIBLES TAX TO TAXPAYERS WHO PRESERVED THEIR RIGHT TO A REFUND BY PROTESTING PAYMENT WITHIN THE TIME LIMITS SET BY G.S. 105-267 AND (2) NOTIFY AFFECTED INTANGIBLES TAXPAYERS BY MAIL AS SOON AS POSSIBLE OF THE COURT NOTICE IN THE CLASS ACTION LAWSUIT REGARDING REFUNDS.

This act provides a refund of the intangibles tax on stock, with interest, to taxpayers who made a timely protest for the 1990 through 1994 tax years. The State obligated itself to pay protesters their refunds when the General Assembly enacted S.L. 1997-17. In that act, the General Assembly directed the Secretary of Revenue to take no action to collect or assess back intangibles tax for tax years 1990 through 1994 from those taxpayers who did not pay the intangibles tax on North Carolina stock in reliance on the unconstitutional taxable percentage deduction.

In 1996, in Fulton Corp. v. Faulkner[2], the United States Supreme Court held that the taxable percentage deduction in the North Carolina intangible tax on stock violated the commerce clause by discriminating against out-of-state companies. The deduction reduced a taxpayer's liability for the tax in proportion to the amount of business the corporation did in North Carolina. On remand in February 1997, the North Carolina Supreme Court did not order refunds. Instead, it allowed the possibility of curing the past discrimination by the assessment of intangibles tax on those who did not pay in reliance on the unconstitutional taxable percentage deduction. The General Assembly prohibited the assessment of the tax from taxpayers who benefited from the taxable percentage deduction in S.L. 1997-17.

This act does not provide relief to nonprotesters. The Attorney General's office issued an opinion in April 1997 that it would be unconstitutional for the General Assembly to refund intangible taxes not filed under protest. Because the State has no legal obligation to these taxpayers,

[2] Fulton Corp. v. Faulkner, 516 U.S. 325, 116 S. Ct. 848, 133 L. Ed. 2d 796 (1996).

any payments would be an exclusive emolument prohibited by Article I, Section 32 of the North Carolina Constitution. The exclusive emoluments provision of the State Constitution prohibits the legislature from extending special privileges to a select group of individuals except in consideration of public services.

Prior to the ratification of this act, the Wake County Superior Court certified Smith v. State as a class action case representing all taxpayers who paid intangibles tax under timely protest. On June 11, 1997, the court entered judgment in favor of the protesters, awarding them full refunds with interest. The attorneys for the protesters requested attorneys fees equal to 16% of the total amount to be paid to protesters. Any such award will be deducted from the interest paid on refunds to the protesters who are members of the class.

In late June and early July of 1997, the court published a notice of the lawsuit and the possibility of opting out in the classified section of the newspapers. The deadline for opting out was July 28, 1997. By opting out, a taxpayer could avoid having attorneys fees deducted from the taxpayer's intangibles tax refund. A taxpayer who opted out will still receive a refund for any of the tax years from 1992 through 1994 for which the taxpayer was a timely protester. Most taxpayers who protested did so only for 1993, 1994, or both. If a taxpayer paid under protest for 1991 but did not "preserve" the protest by filing suit, the taxpayer will not receive a refund for that year unless the taxpayer remained in the class. Most taxpayers did not pay under protest for the 1991 tax year, however.

The Department of Revenue and the State of North Carolina are opposing any award of attorneys fees on the grounds that the Department of Revenue would pay all protesters for the 1992 through 1994 tax years anyway, whether or not there is a court order. To ensure that as many affected taxpayers as possible received actual, complete information before the deadline set by the court for taxpayers to make a decision regarding the class action lawsuit, the General Assembly directed the Secretary of Revenue to mail a copy of the court's notice to as many affected taxpayers as possible.

S.L. 1997-328 (Senate Bill 466, Senator Hartsell)

AN ACT TO EXEMPT FROM STATE INCOME TAX ALL OF THE ANNUAL INVESTMENT INCOME EARNED BY CONTRIBUTORS ON DEPOSITS IN THE PARENTAL SAVINGS TRUST FUND AS WELL AS THE DISTRIBUTIONS TO BENEFICIARIES OF THAT FUND.

This act excludes two types of income from State individual income tax. The items excluded are the annual earnings on amounts contributed to the Parental Savings Trust Fund for the future payment of room or board at an institution of higher education and the earnings distributed to a beneficiary of the Fund that are used to pay for higher education expenses. The act is effective for taxable years beginning on or after January 1, 1998. The revenue loss to the General Fund is expected to be a little over $3,000 in fiscal year 1998-99. The revenue loss will increase to as much as $819,000 by the year 2007.

The Parental Savings Trust Fund is part of the State Education Assistance Authority. The Fund is authorized by G.S. 116-209.25, which was enacted by the 1996 General Assembly. A person can contribute amounts into the Parental Savings Trust Fund for a child who is less than 16 years old. The amount contributed in the account, along with its interest and investment

earnings, can be used to pay the expenses of the beneficiary at any accredited public or private college or community college. Either the child or the person making the contributions must be a resident of this State. The Authority plans to begin the Fund in the fall of 1997. The Parental Savings Trust Fund is a kind of qualified state tuition program under section 529 of the Internal Revenue Code.

Section 529 of the Code excludes some of the amounts earned by contributors to a qualified state tuition program from federal tax and, therefore, North Carolina tax as well. Under federal law, earnings on amounts contributed for the payment of tuition, fees, books, supplies, and equipment at an institution of higher education are excluded from tax but not the earnings on amounts contributed for room and board. Earnings on amounts contributed for room and board are taxable. The taxation of amounts contributed for room and board is consistent with section 117 of the Code concerning the taxation of scholarships. Under that section, an amount received as a scholarship is excluded from taxable income to the extent the amount is for tuition, fees, books, supplies, and equipment required for courses of instruction. The amount of a scholarship that is intended for living expenses (room and board) is subject to tax.

Also under federal law, the amount distributed to a beneficiary of the Parental Savings Trust Fund for tuition, fees, books, supplies, and equipment that exceeds the amount contributed is taxable. Thus, under federal law, the tax on the investment earnings is simply deferred until a distribution is made, at which time the earnings are taxable to the beneficiary rather than the contributor.

The two exclusions allowed by the act will result in a lack of conformity with federal income tax law on these items and with the State and federal law on the subject of income received for the payment of room and board at an educational institution. Because federal taxable income is the starting point for determining State taxable income and the two exclusions in the act differ from federal law, the new exclusions will require new deduction calculations to be made on the State income tax return and necessitate the revision of the form.

S.L. 1997-340 (House Bill 1044, Representative Rogers)

AN ACT TO AUTHORIZE COUNTIES TO DESIGNATE AN OFFICIAL TO RECEIVE SALES TAX REFUND INFORMATION.

The act authorizes a board of county commissioners, in a resolution adopted by the board, to designate a county official to receive certain sales tax refund information from the Secretary of Revenue. Prior law provided for only the chair of the board of county commissioners to receive this information. If the board does not adopt a resolution, then the Secretary will continue to send the requested information to the chair of the board of county commissioners.

In 1995, the General Assembly gave counties access to information regarding local sales tax refunds paid to certain nonprofit entities and governmental entities. Under G.S. 105-164.14, these entities may seek a refund of State and local sales taxes they pay on their purchases by filing a written request for refund with the Department of Revenue and naming the counties where the purchases were made. The Secretary of Revenue then deducts the claimed refunds of local sales taxes from tax revenue distributed to the counties. Prior to 1995, counties did not have access to information regarding local sales tax refunds because the local sales tax is collected by the State and the tax secrecy statute, G.S. 105-259, prevented the Department of Revenue from disclosing

information about individual taxpayers. Without this information, counties were not able to audit claims for refunds against them. The counties had to rely on the Department of Revenue to audit the claims, but the Department did not have enough resources to provide the level of audit some counties wished to provide for themselves.

To obtain information concerning local sale tax refunds, a county must request the information in writing from the Secretary of Revenue. The Secretary has 30 days to provide the designated county official with a list of each nonprofit entity or governmental entity that received a refund of at least $1,000 of that county's local taxes within the last 12 months. The county uses the list it receives from the Department of Revenue to identify entities whose refund claims the county may wish to audit. Upon the written request of the county, the entity that has received a refund must provide the county with a copy of the request for refund, along with supporting documentation requested by the county in order to verify the request. If an entity determines that a refund it has received has been charged to the wrong county, it must file an amended return for the refund. The amended return enables the Department to make the appropriate adjustments in the subsequent quarterly distribution of local sales tax revenue.

The act makes a conforming change to the local sales tax exception to the tax secrecy statute, set out in G.S. 105-259(b)(6a), by providing that a list of claimants that have received a refund may be furnished to a designated county official.

S.L. 1997-355 (House Bill 1158, Representative R. Hunter)

AN ACT TO PROVIDE THAT ANTIQUE AIRPLANES SHALL BE VALUED AT NO MORE THAN FIVE THOUSAND DOLLARS FOR PROPERTY TAX PURPOSES.

This act grants property tax relief to owners of antique airplanes similar to the relief that the 1995 General Assembly gave to owners of antique automobiles. The act provides that antique airplanes that are not used for the production of income will be assessed at the lower of their true value or $5,000, effective for taxable years beginning on or after July 1, 1998. The act is expected to reduce local government property tax revenues by less than $100,000 a year.

An airplane qualifies for this property tax reduction if it meets all of the following conditions:

- It is registered with the Federal Aviation Administration.
- It is a model year 1954 or older.
- It is maintained primarily for use in exhibitions, club activities, air shows, and other public interest functions.
- It is used only occasionally for other purposes.
- It is used by the owner for a purpose other than the production of income.

Non-business property has been exempt from property taxes since 1987. Non-business property means personal property that is used by the owner of the property for a purpose other than the production of income and that is not used in connection with a business. Non-business personal property includes household furnishings, clothing, pets, and lawn equipment. The term

includes collectibles such as antique furniture, coins, and paintings. However, the term does not include aircraft. In 1995, the General Assembly granted property tax relief to owners of antique automobiles. Like the non-business personal property tax exemption, the antique automobile tax relief applied only to individuals, not other entities, and applied only if the automobile is not used in connection with a business. This act is not limited to non-business aircraft; it reduces property taxes on antique airplanes even if they are owned by a corporation or other entity and even if they are used in connection with a business.

S.L. 1997-369 (Senate Bill 374, Senator Odom)

AN ACT TO EXEMPT FROM SALES AND USE TAX NUTRITIONAL SUPPLEMENTS SOLD BY CHIROPRACTORS.

This act creates a new State and local sales and use tax exemption. The new exemption is for "nutritional supplements sold by a chiropractic physician at a chiropractic office to a patient as part of the patient's plan of treatment." The exemption became effective October 1, 1997; it will not result in a significant loss of revenue to either the State or the local governments.

The act does not define a nutritional supplement. The federal Dietary Supplement Health and Education Act of 1994 defines a dietary supplement as a product that meets the following three criteria: (i) is intended to supplement the diet and contains a vitamin, mineral, herb, or other botanical, amino acid, or other dietary substance (or a concentrate, metabolite, constituent, extract, or combination of any such ingredient); (ii) is intended for ingestion in tablet, capsule, powder, softgel, gelcap, or liquid form; or if not in such form, is not represented as conventional food or as the sole item of a meal or of the diet; and (iii) is labeled as a dietary supplement.

There are no laws that require any dietary supplements to be sold only by health care providers. The dispensing of dietary supplements does not require a prescription. As a marketing tool, vendors of dietary supplements sell some of their products only to health care providers.

S.L. 1997-370 (House Bill 14, Representative Cansler)

AN ACT TO MODIFY THE SALES TAX DEFINITION OF CUSTOM COMPUTER SOFTWARE.

This act modifies the sales tax definition of custom computer software to make a clear distinction between software that is subject to State and local sales and use taxes and software that is not subject to these taxes. The act is based on a recommendation of the Revenue Laws Study Committee and reflects an agreement between the Department of Revenue and the North Carolina Electronic & Information Technologies Association on the definition of custom computer software. It becomes effective October 1, 1997, and is expected to cause a General Fund revenue gain of approximately $700,000 a year. Local governments will experience a local sales tax revenue gain of approximately $350,000 a year.

Canned software is subject to sales and use taxes and custom software is not subject to these taxes. The North Carolina sales and use tax law excludes custom computer software from tax to implement the policy that computer services are not subject to sales and use taxes. The cost for custom computer programs is attributable to the programming services provided rather than

the cost of producing a tangible form of the program on a cd rom or tape. The definition of custom software in the prior law was very broad, however, and could include off-the-shelf "shrink-wrap" programs and programs that had been modified only slightly by the vendor. Under that definition, custom computer software included all software recommended to the purchaser by the seller after performing an analysis of the purchaser's needs. Thus, under prior law, a common product such as Microsoft's Word program became exempt from sales and use tax if the seller of the program analyzed the customer's needs and decided that Word was better for the customer than WordPerfect or another competing product. This act deletes an analysis of a customer's needs as a determining factor in whether a program is custom (exempt) or canned (taxable).

The definition of custom software in the prior law also included all programs adapted by the seller of the program to be used in a particular computer and its associated input/output devices such as printers. This type of adaptation can be slight, such as the completion of a "fill-in-the-blank" series in which the particular hardware to be used with the program is designated, or it can include extensive changes to the lines of source code in the software. Under the prior law definition, any slight adaptation of a program made the entire program exempt from State and local sales and use taxes. This act changes the law by providing that custom software does not include prewritten software that can be installed and executed with no changes to the software's source code other than changes made to configure hardware or software.

S.L. 1997-380 (Senate Bill 389, Senator Hoyle)

AN ACT TO ESTABLISH THE FORSYTH-GUILFORD METROPOLITAN BASEBALL PARK DISTRICT, TO PROVIDE FOR A REFERENDUM ON BASEBALL PARK FINANCING IN THE DISTRICT, AND TO ALLOW BASEBALL PARK DISTRICTS TO ENTER INTO INSTALLMENT FINANCING AGREEMENTS.

This act establishes the Forsyth-Guilford Metropolitan Baseball Park District and its governing body, the Park Authority. The bill authorizes the Authority to:

- Construct, finance, and operate a major league baseball park.
- Levy a 1% prepared meals tax and a 50¢ baseball park ticket tax.
- Finance the baseball park by using certificates of participation.

The District will be a unit of local government and will consist of Forsyth and Guilford Counties. The proposed 1% District meals tax and 50¢ baseball park ticket tax will be put to a vote in both counties on May 5, 1998. If the majority of voters in either of these counties does not vote in favor of the proposed taxes, the District is dissolved and the tax cannot be levied in either county.

The Authority will have 13 members, appointed as follows:

- One by the Governor
- Two the General Assembly upon the recommendation of the President Pro Tempore of the Senate

- Two by the General Assembly upon the recommendation of the Speaker of the House of Representatives
- Four by the Guilford County Board of Commissioners
- Four by the Forsyth County Board of Commissioners

All appointees must be residents of the District at the time of their appointment and the appointees of Guilford and Forsyth County must be residents of the appointing county.

When constructing and operating a baseball park, the Authority is exempt from most of the purchase and contract procedures that apply to local units of government. It also has the power of eminent domain, which can be used to acquire land for the baseball park or for highway improvements that will benefit the baseball park. However, the power of eminent domain may not be used until after Major League Baseball has announced approval of the award of a franchise for a location within the District. Also, the board of commissioners of the county in which the property to be condemned is located must have approved of the condemnation by adoption of a resolution.

The Authority can levy a 1% prepared meals tax in the District and a 50¢ baseball park ticket tax if Major League Baseball has announced the approval of an award of a franchise in a location in the District by December 31, 2001, and the voters in the District approve the levy. The tax proceeds can be used for any activity of the District. Any tax proceeds used to design, construct, equip, or improve the baseball park must be matched by private funds. Every $2.00 of tax proceeds must be matched by $1.00 in private funds.

The Authority may not levy the prepared meals tax unless it also levies the ticket tax. If the Authority repeals the ticket tax, the prepared meals tax is automatically repealed on the same date. The prepared meals tax can be used to finance a principal amount of no more than $140 million for constructing the baseball park, plus interest, issuance costs, and related debt service. The prepared meals tax sunsets once this amount has been raised, as determined by the Authority Finance Officer. The prepared meals tax also sunsets after all debt incurred to design, construct, equip, or improve the baseball park has been retired, as determined by the Authority Finance Officer.

Any lease of the baseball park must be a triple net lease for a minimum of 25 years. The Authority has zoning power over land owned by the District, and land owned by the District is not subject to involuntary annexation.

S.L. 1997-388 (House Bill 611, Representative Hackney)

AN ACT TO INCREASE THE COMPENSATION PROVIDED TO PERSONS ERRONEOUSLY CONVICTED OF FELONIES WHO HAVE RECEIVED PARDONS OF INNOCENCE, TO EXEMPT THE COMPENSATION FROM STATE INCOME TAX, AND TO PROVIDE FOR THE INDUSTRIAL COMMISSION TO HANDLE THE CLAIMS OF THOSE PERSONS.

This act makes several changes to the law that allows the State to compensate people who have been erroneously convicted and imprisoned of a felony:

- It increases the amount a person may be awarded.
- It changes the agency that determines the award from the Department of Correction to the Industrial Commission.
- It provides that the petition must be presented to the Industrial Commission within five years after the pardon was granted.
- It repeals the requirement that the claimant must have sustained pecuniary loss through the erroneous conviction and imprisonment.
- It allows the Industrial Commission to make the award, rather than the Governor upon the approval of the Council of State.
- It clarifies that the amount awarded to the claimant is exempt from State income tax.

Under prior law, a person who had been granted a pardon of innocence for the erroneous conviction and imprisonment of a felony could petition the State for compensation for the financial loss sustained by the person through the erroneous conviction and imprisonment. The petition was presented to the Department of Correction and the Parole Commission would conduct a hearing. To support an award, the Parole Commission had to find that the person was erroneously convicted and imprisoned and that the person sustained a financial loss as a result. The Parole Commission would then report its conclusions and recommendations to the Governor. The Governor, upon the approval of the Council of State, was authorized to award the claimant the amount recommended by the Parole Commission. The Governor could not make an award that exceeded $500 for each year imprisoned or a total of $5,000.

Under this act, a person would have five years from the granting of the pardon to present a petition to the Industrial Commission for compensation from the State for the financial loss the person suffered because of an erroneous conviction and imprisonment. Upon finding that the person was granted a pardon of innocence, the Commission must determine the amount the claimant is entitled to be paid and must enter an award for that amount. A claimant will be entitled to an amount equal to $10,000 for each year or the pro rata amount for the portion of each year of the imprisonment. The compensation may not exceed a total of $150,000. The Commission must give written notice of its decision to all parties concerned. Its determination is subject to judicial review.

Section 4 of the act clarifies that the amount awarded to a claimant is not subject to State income tax. Under existing law, it is unclear whether the amount awarded to a claimant is exempt from federal income tax. Prior to 1996, section 104 of the Internal Revenue Code exempted amounts received as damages on account of personal injuries and sickness. In 1996, Congress amended this section to say that gross income does not include "the amount of damages received on account of personal physical injuries or physical sickness." Because of the 1996 federal tax law change, it is questionable whether the compensation would be exempt under federal law. To the extent the income is subject to federal income tax, it would automatically be subject to State income tax. Section 4 provides that to the extent the compensation is included in federal taxable income, it may be deducted for State income tax purposes.

The act is effective when it becomes law and applies to persons pardoned on or after July 1, 1995. The income tax clarification becomes effective for taxable years beginning on or after January 1, 1997.

S.L. 1997-392 (House Bill 225, Representative Weatherly)

AN ACT TO PROVIDE FOR CLEANUP OF DRY-CLEANING SOLVENT CONTAMINATION IN NORTH CAROLINA, AS RECOMMENDED BY THE ENVIRONMENTAL REVIEW COMMISSION.

This act requires owners and operators of dry-cleaning facilities to maintain financial responsibility for liability arising from dry-cleaning solvent pollution and creates a Dry-Cleaning Solvent Cleanup Fund to be used to reimburse persons who clean up sites polluted by dry-cleaning solvents that have contaminated the water or surface or subsurface soils of the State. The Fund will be administered by the Department of Environment and Natural Resources. No more than 20% of the amount of revenue in the Fund may be used by the Department for the costs of administering the Fund. The act is a recommendation of the Environmental Review Commission.

The major source of revenue for the Fund is the imposition of a dry-cleaning solvent tax on in-State retailers that sell solvent to dry-cleaning facilities and on dry-cleaning facilities that purchase solvent outside the State. The solvent tax is a per gallon privilege tax equal to $5.85 per gallon of chlorine-based solvents and 80¢ per gallon of hydrocarbon-based solvents. The tax is effective October 1, 1997, and expires January 1, 2010. The Department of Revenue will collect the tax in the same manner as a sales tax. The Secretary of Revenue may retain the Department's cost of collection, not to exceed $125,000 a year. After subtracting these costs and the Department of Environment and Natural Resources administration costs, the tax is expected to generate about $1 million a year for the Dry-Cleaning Solvent Cleanup Fund.

If the amount of claims exceeds the amount of revenue in the Fund, the claims with the highest priority will be paid first. The Department of Environment and Natural Resources must adopt rules to implement the act, including rules for the prioritization of sites and scheduling of funding for assessment and remedial response activities. A petitioner for money from the Fund must meet certain requirements and make a financial contribution. The amount a petitioner may receive from the Fund is capped at $200,000 a year unless the contamination poses an immediate threat to human health or a serious risk of irreparable damage to the environment, in which case a cap of $400,000 applies.

S.L. 1997-397 (Senate Bill 847, Senator Odom)

AN ACT TO EXEMPT FROM SALES AND USE TAX REUSABLE INDUSTRIAL CONTAINERS USED AS PACKAGING FOR TANGIBLE PERSONAL PROPERTY.

This act provides a sales and use tax exemption for containers that are used as packaging to enclose property delivered to a purchaser and must then be returned to the owner. Under prior law, packaging items were exempt from sales tax only if they constituted part of the property being sold and were delivered with the property to the customer. The act becomes effective October 1, 1997. It is not known how much the act will reduce General Fund revenues and local government sales tax revenues.

The act applies to barrels used to transport chemicals and tanks used to transport gases,
