The Honorable Mike Hager, Co-Chair
The Honorable Brent Jackson, Co-Chair

GENERAL ASSEMBLY

FISCAL RESEARCH DIVISION

FROM: Matthew Dockham, Director of Legislative Affairs

SUBJECT: Inactive Hazardous Waste Sites Program Report

DATE: November 18, 2015

Pursuant to G.S. 130A-310.10, (a) The Secretary shall report on inactive hazardous sites to the Joint Legislative Commission on Governmental Operations, the Environmental Review Commission, and the Fiscal Research Division on or before October 1 of each year. (a1) On or before October 1 of each year, the Department shall report to each member of the General Assembly who has an inactive hazardous substance or waste disposal site in the member's district. Please consider the attached as the formal submission this report.

If you have any questions or need additional information, please contact me by phone at (919) 707-8618 or via e-mail at matthew.dockham@ncdenr.gov.

cc: Tom Reeder, Assistant Secretary for Environment, NCDEQ
Linda Culpepper, Director of Waste Management, NCDEQ

**Report to the North Carolina General Assembly
on the**

Division of Waste Management's

Inactive Hazardous Sites Program

**North Carolina Department of Environmental Quality
Division of Waste Management**

<http://portal.ncdenr.org/web/wm/sf/ihome>

October 2015

EXECUTIVE SUMMARY

The N.C. General Assembly created the Inactive Hazardous Sites Program in the Department of Environmental Quality's (DEQ) Division of Waste Management (DWM) to identify, investigate and clean up properties contaminated with hazardous substances. The program also manages the assessment and cleanup of old pre-regulatory landfill sites that have environmental contamination and that predate modern landfill standards designed to prevent contamination. This report satisfies the requirements, set out in G.S. 130A-310.10, for an annual report to the General Assembly.

A total of 3,102 chemical spill or disposal sites and old, unlined dumps or landfills (pre-regulatory) have been cataloged. Of this number 2,559 still require work to address public health or environmental hazards.

Of the 2,559 remaining open cases, 673 are old, unlined landfills that predate solid and hazardous waste permitting laws. One half of the proceeds of a statewide solid waste disposal tax are directed by statute to address contamination at these pre-regulatory landfills. DWM has established contracts with private firms to assess and remediate the pre-regulatory landfill sites.

At the end of FY2014-15, the uncommitted cash balance in the Inactive Hazardous Sites Cleanup Fund (IHSCF) dedicated to addressing the non-landfill inactive hazardous waste sites was \$0. The fund receives a \$400,000 appropriation for this purpose from the General Fund each year.

The program has recovered funds for assessment and remediation through bankruptcy claims for several sites over the years. In most cases, these new monies go into special trust funds, since the payments can only be used for specific sites in accordance with bankruptcy settlement agreements.

Session Law 2011-186 authorized an alternate approach to remediating contaminated groundwater. The bill allows use of site-specific risk-based groundwater remediation standards for cleanup at certain industrial properties where the owner can show that contamination has not migrated off the property and will not in the future. DWM has received four whole or partial applications for risk-based cleanup. A total of \$72,000 has been collected in associated fees received for review of these applications.

The following provides a status of sites cataloged by the Inactive Hazardous Sites Program.

Catalog of Contaminated Sites:

Total Number of Inactive Hazardous Sites Cataloged	3,102
Chemical Spill or Disposal Sites	2,425
Pre-Regulatory Landfills	677

Total Number of Sites Requiring No Further Action	543
Chemical Spill or Disposal Sites	539
Pre-Regulatory Landfill Sites	4

Remaining Open Sites	2,559
Chemical Spill or Disposal Sites	1886
Pre-Regulatory Landfills	673

Program Activities for FY2014-15:

Chemical Spill or Disposal Sites:

Oversight of Responsible Party Cleanup Actions - Total	273
Registered Environmental Consultant (REC)-Supervised Remedial Actions	132
Staff-Supervised Remedial Actions under Administrative Agreements	61
Additional Staff-Supervised Actions Pending Administrative Agreements	71
Spill Response Actions	9

Oversight of Orphan Priority Actions (completed and ongoing)	113
---	------------

Inactive Hazardous Sites Cleanup Fund Actions in FY2014-15

Contaminated Site Assessments Completed or Ongoing	36
Contaminated Soil/Waste Removal Actions Completed or Ongoing	6
Homes Provided Alternate Water or Treatment Systems Maintained	8

Testing Conducted by Staff

Water Supply Wells Sampled at Non-Landfill Sites	164
Sites with Other Testing (soils, surface water)	28

New Site Screenings

Sites Screened	83
Sites Added to Cataloging	44

Sites Evaluated for No Further Action (NFA) Status

Sites Evaluated	29
NFAs Granted	29

Pre-Regulatory Landfill Sites:

1st Phase Assessments Completed (<i>receptor research, geophysical perimeter assessment</i>)	9
Delineation Phase Assessments (<i>can be multiple field events</i>)	18
1st Phase Assessments Ongoing	3
Delineation Phase Assessments Ongoing	42
Remedial Design Ongoing	13
Remedial Action Ongoing	8
Remedial Action Completed	2
New Site Evaluations	2

Homes Provided Alternate Water or Treatment Systems Maintained	23
Number of water supply wells sampled	152

Other program activities include response to public inquiries (these generally run 2000 to 3000 each year), filing bankruptcy claims to generate cleanup funds, and implementation of the Bernard Allen Emergency Drinking Water Program (BAP) (data for the BAP is provided in a separate report to the N.C. General Assembly).

I. THE INACTIVE HAZARDOUS SITES INVENTORY AND THE INACTIVE HAZARDOUS WASTE SITES PRIORITY LIST

The Division of Waste Management's (DWM) Inactive Hazardous Sites Branch implements the Inactive Hazardous Sites Response Act of 1987 (IHSRA). The IHSRA requires DWM to maintain a catalog of inactive hazardous substance or waste disposal sites. The program has cataloged 2425 chemical spill sites and 677 old unlined landfills. Of these, 543 sites now have all work completed and are assigned "No Further Action" status. Thirty-one completed all work and were assigned "No Further Action" status in FY2014-15. This number includes two Pre-Regulatory Landfill sites. Table 2, on page 2, provides a list of those sites. Table 1, on page 2, provides a list of sites added to that inventory in FY2014-15. A total of 46 new sites were added this past fiscal year and one site was reopened. Two of these are Pre-Regulatory Landfill sites.

N.C.G.S. 130A-310.2 requires DWM to prioritize sites cataloged in the Inactive Hazardous Sites Inventory based on the threat to public health and the environment. Sites are first cataloged in the "Evaluations Pending" category of the Inactive Hazardous Sites Inventory until DWM ranks the site based on rules found in 15A NCAC 13C .0200. Once ranked, sites are transferred to the Inactive Hazardous Waste Sites Priority List. The priority list is provided in an appendix to this report organized in order of the threat to public health and the environment. The purpose of this list is to prioritize full-scale (complete) remedial actions at sites without responsible parties. The rank or absence of a site on the priority list does not limit DWM in conducting abatement actions at sites with immediate hazards.

N.C.G.S. 130A-310.10 requires reporting of the location of each inactive hazardous waste disposal site, the type and amount of hazardous substances or waste known or believed to be located at each of these sites, the last action taken at each of these of these sites and the date of the last action. Due to the large numbers of contaminated sites, most of the sites have not undergone complete assessments needed to provide all of this information. Appendix B provides the supplemental information to the extent available.

II. SITES THAT MAY OR ARE KNOWN TO REQUIRE USE OF THE INACTIVE HAZARDOUS SITES CLEANUP FUND

Purpose of the Fund

The Inactive Hazardous Sites Cleanup Fund is used to: (1) address imminent hazard sites; (2) pay for assessment and cleanup when responsible parties do not comply with orders to clean up sites; (3) pay for assessment and cleanup of sites without financially-viable responsible parties (orphan sites); and (4) pay for preparation of a notice of Inactive Hazardous Substance or Waste Disposal Site if the owner does not comply with orders to record a notice. When a financially viable responsible party exists, the state must attempt to recover its expenditures from the responsible party.

The Inactive Hazardous Waste Sites Priority List helps determine priorities for cleanup. Responsible parties for top priority sites are encouraged to voluntarily clean up their sites. When a responsible party does not comply with a request and subsequent order to clean up a site, the state must perform the cleanup using the Inactive Hazardous Sites Cleanup Fund. The demand for state funds to conduct site cleanups depends on two factors: (1) how often responsible parties refuse to comply with orders to conduct cleanup and (2) the number of sites that lack financially viable responsible parties.

Inactive Hazardous Sites Cleanup Fund Actions

The Inactive Hazardous Sites Cleanup Fund was used to address several sites this year. A summary of the work is provided in Table 3.

Table 3. Summary of Inactive Hazardous Sites Cleanup Fund Expenditures FY2014-15

<i>Site Name</i>	<i>City/ County</i>	<i>Activity</i>	<i>FY 2014-15 Fund Expenditure</i>
Allen Lane Contaminated Wells	Hillsborough/ Orange	Soil and groundwater testing to attempt to identify source of contamination in a residential area. Water treatment systems installed on 2 water supply wells and soil gas testing conducted to determine potential for vapors from contaminated groundwater to enter homes.	\$44,911
Azalea Lane Contamination	Charlotte/ Mecklenburg	Vapor testing and water supply well sampling initiated.	\$4,910

Beckman Durham Sandefur	Durham/ Durham	Water supply sampling. Testing also conducted to evaluate the potential for vapors from contaminated groundwater to enter homes.	\$12,850
Best Sand & Gravel Shop	Goldsboro/ Wayne	Initiated water supply well survey and sampling residential wells adjacent to facility.	\$2,521.60
Brekenwood Subdivision	Pleasant Garden/ Guilford	Maintenance of a treatment system installed on a contaminated residential well.	\$2,805
Busick Road	Reidsville/ Rockingham	Maintenance of a treatment system installed on a contaminated residential well.	\$2,196.01
Burke's Hardware	Raleigh/ Wake	Conducted water supply well survey, sampled water supply wells, and conducted testing to determine potential for vapors from contaminated groundwater to enter homes.	\$17,070
Cedar Grove Drive Site	Gastonia/ Gaston	Initiated water supply well survey in residential areas near contamination.	\$11,721
Cinderella Knitting Mills	Kings Mountain/ Cleveland	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes.	\$15,096
Christian Creek Rd PCE	Swannanoa/ Buncombe	Activities associated with closing a contaminated water supply well.	\$489
College Street Solvents	Clarkton/ Bladen	Water supply well survey initiated.	\$887
Cress Property/Bostian Heights	Salisbury/ Rowan	Contaminated groundwater has affected a water supply well. Removed contaminated soils. Also installed groundwater treatment point to allow for future treatment of contaminated groundwater. Resampling of drinking water well.	\$57,322
Cribbs Hobby	Wilmington/ New Hanover	Groundwater assessment completed and sampling of drinking water supply wells located near site.	\$28,755
Crowders Mountain State Park	Gastonia/ Gaston	DWM and the U.S. EPA have conducted waste and soil removal on park and residential property in previous reporting years. In FY2014-15 DWM conducted additional groundwater testing.	\$6,530
Danny Roberts/Interstate BP	Durham/ Durham	Maintenance of a treatment system previously installed on a contaminated residential well.	\$2,491

Diamondback Products	Lexington/ Davidson	Groundwater monitoring wells installed at an adjacent mobile home park.	\$13,983
Dodson Exterminators/US Cellular	Jacksonville/ Onslow	Planning and access permission to sample water supply wells.	\$1,351
Dupont Dump	Navassa/ Brunswick	Testing conducted to determine if contaminated groundwater and any associated vapors were present in nearby residential area that could threaten water supply wells and result in vapors entering homes.	\$4,158
Durwood Grocery	Willard/ Pender	Groundwater investigation initiated to determine threat to residences in the area. Vapor testing conducted previous fiscal year.	\$1,813
Encee Chemical	Bridgeton/ Craven	Initiated water supply well sampling.	\$617
Harwell Road Septic pits/Country Acres	Gastonia/ Gaston	Initiated water supply well survey.	\$1,402
Hodge Rd and Satterwhite Drive	Knightdale/ Wake	Water supply well testing.	\$4,731
Jimmy's Quickie Mart	Providence/ Caswell	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes.	\$12,675
Jimmy Green Metals	Nashville/ Nash	Groundwater sampling of existing monitoring wells following a U.S. EPA soil removal action as site has home on property.	\$5,443
John Price Road Site	Charlotte/ Mecklenburg	Multiple homes with groundwater contaminant concentrations at levels that may pose a risk of vapors from contaminated groundwater entering homes. Conducted preliminary work for conducting vapor testing around the homes.	\$2,582
Lee Paving/ NCDOT #31	Sanford/Lee	Water supply well survey.	\$3,841
Lytle Cove Road Solvents	Swannanoa/ Buncombe	Conducted engineering evaluation to determine if affected and threatened homes could be connected to city water service, installed a treatment system on one water supply well when municipal water could not be extended to home, conducted testing to determine potential for vapors from contaminated groundwater to enter affected	\$23,467

		residence, initiated groundwater investigation to locate source of drinking water contamination as well, and conducted sampling of nearby water supply wells.	
Main Street Solvents	Sanford/Lee	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes.	\$20,569
Metal Industries	Marion/McDowell	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes, water supply well survey conducted, and conducted testing of soil, groundwater, surface water and water supply wells in the area.	\$37,964
Metal Recycling Services	Whiteville/Columbus	Soil and groundwater investigation conducted due to water supply wells near the site.	\$24,446
NCDOT #44/Quail Ridge	Sanford/Lee	A water supply well survey was completed to determine what wells are near the site that may need to be sampled in the future.	\$3,486
Old Stake Road	Chadbourn/Columbus	Removal of lead contaminated soils in a residential area. Work initiated in previous fiscal year and completed this reporting year.	\$124,305
One Hour Martinizing	Greensboro/Guilford	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes.	\$13,488
Poole Road PCE	Raleigh/Wake	Initiated work to conduct a soil and groundwater assessment to identify source of contamination in water supply wells.	\$5,540
Primrose Ave PCE	Charlotte/Mecklenburg	Conducted groundwater investigation in a residential area with groundwater contamination.	\$20,460
Priddy Property	Lawsonville/Stokes	Maintenance of a treatment system installed on a contaminated residential well.	\$3,224
Quarter Horse Lane Property	Ocean Isle/Brunswick	Initiated site access to sample water supply wells.	\$1,702
Ray Paving	Wake Forest/Wake	Planning and access permission to conduct sampling of water supply wells.	\$607
REA Construction-West Raleigh	Raleigh/Wake	Groundwater investigation conducted due to nearby water supply wells.	\$28,446

Reeves Bros	Albemarle/ Stanly	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes.	\$17,365
Rivenbark Residence	Rocky Mount/ Edgecombe	Groundwater assessment conducted on contaminated residential property. Additional assessment planned.	\$9,210
Spectrum Dyed Yarns	Kings Mt/ Cleveland	Closure of contaminated water supply wells following connection of affected homes during a previous reporting year.	\$5,945
Southside Road Incident	Lincolnton/ Lincoln	Initiated water supply well survey.	\$5,042
Staley PCE/Brown's Grocery	Staley/ Randolph	Maintenance of a treatment system installed on a contaminated well	\$2,734
Stevens Cleaners	Fairmont/ Robeson	Conducted testing to determine potential for vapors from contaminated groundwater to enter nearby homes.	\$23,919
Trawick Road/Bond Street	Raleigh/ Wake	Evaluation of records and development of work plan for investigating potential contaminant sources of affected water supply wells.	\$9,260
Texfi Industries	Fayetteville/ Cumberland	Assessment, removal action and treatment of soil contamination in an on-site ditch. Site restoration of ditch completed. This work is a continuation of work that has been conducted at this site over the years to remove and treat sources of groundwater contamination using bankruptcy and special appropriations funding.	\$155,198
Ulah Battery/Battery Piles	Asheboro/ Randolph	Removal of lead contaminated soils in a residential area is ongoing. This removal follows previous state and U.S. EPA soil and waste removal events that have occurred in previous fiscal years.	\$159,850
Watts, Levi	Tabor City/ Columbus	Removal of lead contaminated soils and debris on residential property continuing from the previous fiscal year.	\$113,148
WoodLeaf and Ridge PCE	Salisbury/ Rowan	Maintenance of a treatment system installed on a contaminated residential well.	\$4,426

Inactive Hazardous Sites Program Bankruptcy Actions

DWM's Inactive Hazardous Sites Program has also recovered some funds to address specific sites through bankruptcy claims. Since first seeking to recover prospective cleanup costs through bankruptcy claims, DWM's Superfund Section, in conjunction with the Attorney General's office, has recovered over \$18 million. All of these funds are held in private escrow accounts or in

separate subaccounts of the Inactive Hazardous Sites Cleanup Fund. The following summarizes bankruptcy activities conducted in FY2014-15:

- **CMC** - \$925,000 was recovered for assessment and cleanup of the Elkin site and is held in a private trust. Remedial action was implemented in FY10-11. Conducting periodic monitoring of groundwater. Funds in the amount of \$231,928 remain for monitoring. This reporting year, DWM has been coordinating an effort with the trustee of the account, the trustee of the CMI accounts (see below) and the City of Elkin to transfer the property and some of the adjoining former CMI properties to the City of Elkin to be managed as park space.
- **CMI** – \$1.25 million, \$750,000 and \$100,000 have been recovered of three CMI sites in Elkin and the monies are held in private escrow accounts. These funds have been used to conduct assessment/remediation. \$10,751, \$24,013, and \$33,456 remain, respectively, for each site. This reporting year, DWM has been coordinating an effort with the trustee of the account, the trustee of the CMC account and the City of Elkin to transfer the CMC property (see above) and some of the adjoining former CMI properties to the City of Elkin to be managed as park space. Additional contaminant assessment has also been conducted.
- **Fuel Systems** - \$98,010 was recovered in FY2012-13 for assessment and cleanup of the Kysor site in Charlotte. An additional distribution of \$5,966 was recovered in FY2014-15. Action pending.
- **Gilbert and Bennett** - \$87,912 recovered for the Cape Fear Wood site in Fayetteville in FY2005-06. Another responsible party is conducting remediation work under DWM's Hazardous Waste Section. Once completed, the bankruptcy funds will be used to conduct remaining cleanup actions.
- **Furniture Brands** - Bankruptcy claim was filed in FY2013-14 for the Lane Venture #14 and Broyhill sites in Conover, the Henredon site in Morganton, and the Thomasville Furniture site in West Jefferson. The total sum of DWM's claim is \$16,618,646. DWM continues to negotiate its claim for a settlement.
- **GM** - \$20,205 recovered in FY2011-12 for the GM Training Center site in Charlotte. An additional \$3,322 was recovered in FY2013-14. A limited scope of work will be implemented with the available funds. Action pending.
- **Mark IV** – A total of \$42,738 was recovered for three Dayco sites in Haywood County in FY2010-11. A limited scope of work will be implemented with the available funds. Action pending.
- **Pillowtex** – A total of \$244,800, constituting multiple disbursements, has been recovered to address the Fieldcrest Mills site in Spencer and the Cannon Mills site in Kannapolis. Sampling conducted at the Spencer site shows widespread groundwater contamination. The Cannon Mills site will be addressed through the Pre-Regulatory Landfill program. DWM is evaluating where best to spend remaining \$198,216 in funds.
- **SCM** – \$5.3 million was obtained to address the SCM site in Charlotte. The funds are held in a private trust fund. The trustee contracts the work at DWM's direction. Funds support one third of a position to oversee work. Contaminant characterization is completed. Remedial action pending.
- **Texfi Inc.** – A total of \$941,215 in funds recovered in FY2005-06 that was used to remove sources of contamination at the Fayetteville property. Bankruptcy funds are depleted. Special appropriations were used this reporting year to conduct additional

removal of heavily contaminated soils. Insufficient funds are available to conduct a complete removal of sources of groundwater contamination at the site. Removal costs are estimated to be between \$25-60 million.

Chemical Spill or Disposal Sites That Shall or May Require Use of the Inactive Hazardous Sites Cleanup Fund

An appropriation of \$400,000 a year is used to address the highest risk chemical spill sites without responsible parties that can pay. A total of 385 sites are currently known to have no financially-viable responsible party available to pay for contaminant testing and cleanup. Of these, 339 sites are identified as higher risk because they are used for residential purposes, have contaminated water supply wells or have a drinking water source located within one-quarter mile of the site. The total number of orphan sites is unknown but expected to be a high percentage of the remaining open cases. It is difficult to prove who caused the contaminant releases at these sites. When it is known, those responsible parties are often no longer in business or are financially unsound. Determining whether a responsible party exists (and thus, whether state funds will be needed for assessment and cleanup) most often requires research, inquiry and sampling. Due to the level of effort required, DWM performs responsible party research for sites that are next in priority for action.

Orphan site work can include determining the nature and extent of contamination through testing and other investigation, soil and waste cleanup, waterline installation or groundwater restoration projects. An average cost-per-site was determined by first calculating the average cost for orphan soil cleanup actions conducted by DWM's Inactive Hazardous Sites Branch and averaging that figure with an average site cleanup cost for several state programs, published by the Association of State and Territorial Solid Waste Management Officials, adjusting for inflation. That figure comes to \$661,421 per site. The total cost for cleanup is estimated to be \$224,221,719 for 339 highest risk orphan sites. For all of the 385 orphan sites identified thus far, the estimated total comes to \$254,647,085.

As of July 1, 2015, the balance of the Inactive Hazardous Sites Cleanup Fund was \$225,684. Of this, \$5,121 consists of bankruptcy proceeds dedicated to conducting contaminant source remediation at the Texfi-Fayetteville site. The remaining funds are committed toward payment of contracted work in progress or completed and not yet billed. A total of \$403,245 in income from all sources was deposited in the fund in FY2014-15.

Pre-Regulatory Landfills

Session Law 2007- 550 established a statewide tax on solid waste disposal, half of which goes to address the hazards posed by landfills that predate federal and state rules on solid waste disposal. The portion of the solid waste disposal tax received by the program may be used only for addressing the pre-regulatory landfill threats. DWM received \$9,088,737 in tax revenue in FY2104-15. Thirteen percent may be used for administrative expenses. Included in the administrative expense allowance is \$300,000 for administration of the non pre-regulatory landfill portion of the Inactive Hazardous Sites Program and \$500,000 of DWM's Solid and Hazardous Waste Section programs, leaving approximately \$400,000 for administration of the Pre-Regulatory Landfill Program.

DWM has cataloged a total of 677 unpermitted, unlined landfills. Initial work at each site involved confirming the location, determining the current use of the property, and identifying the use of surrounding property to help prioritize the sites for action. Based on inspections conducted as part of that work, 77 percent of the sites have been determined to have a water supply source, residence, school, church, day care or park on or within 1000 feet of the landfill and thus are considered higher risk priority sites. DWM established contracts for contaminant assessment and mitigation of the sites. Using these contracts, the nature and extent of the contamination was defined through testing. A remedy is then designed and implemented to address the exposure risks. DWM also provides review and approval of contaminant assessment work being conducted by local governments at these sites and reimburses the cost of that work from the tax proceeds. Two of the ongoing contaminant assessments are currently being conducted by local governments with DWM oversight and reimbursement.

In FY2014-15, DWM completed first phase remedial investigations at nine sites. Three other sites have ongoing first phase assessments. That work involves updating information on location of water supply wells, streams, structures and other potential exposure routes, and conducting assessment needed to determine the perimeter of the waste. DWM completed the contaminant delineation phase during which multiple testing events are conducted to determine the nature and extent of contamination in soils, groundwater, vapors and surface water at eighteen sites. An additional 42 sites had contaminant delineation investigations ongoing but not yet completed. Also in FY2014-15, 23 sites were in the remedial action phase, including two sites where all work was completed this year. The program also sampled 152 private water supply wells on or near pre-regulatory landfills and provided alternate water supplies or maintained treatment systems on wells for 23 homes with unsafe levels of contamination. Two new sites were screened for program qualification.

The assessment and cleanup process can be a complex one. In addition to the complexities of addressing exposure issues caused by contaminated water supplies, contaminated vapors entering buildings, methane gas posing explosion risks and exposed wastes on residential property, difficulties can arise in attempting to gain access to the multiple affected properties at each site, in dealing with illegal dumping continuing during the investigation and remedial action and in balancing the owner's current and planned use of the property with acceptable safe usage.

The sites in remedial action during FY2014-15 were:

Brevard Dump*	Brevard, Transylvania County
Buncombe County LF	Enka, Buncombe County
Bunn Dump	Bunn, Franklin County
Burnt Mill Creek LF	Kannapolis, Rowan County
Cannon Mills Landfill	Kannapolis, Rowan County
Central Park LDFL	Winston-Salem, Forsyth County
City of Wilson Landfill-1	Wilson, Wilson County
Cliffside Mill Dump	Cliffside, Rutherford County
Clyde Leach Dump	Arabia, Hoke County
Double Oaks Landfill	Charlotte, Mecklenburg County
Fairview Landfill	Fairview, Buncombe County

Glass, EH County Landfill
Glen Alpine Dump*
Hildebran Disposal Area
Jacksonville WWTP Landfill at Sturgeon City
Lake Lure Dump
Mangum Estates
 Mooresville Landfill
Rolesville Dump
Spring Hope Dump
W.C. Beck Property
Walnut Cove Dump
Walton's Sanitation Service Dump

Greensboro, Guilford County
Glen Alpine, Burke County

Jacksonville, Onslow County
Lake Lure, Rutherford County
Wake Forest, Wake County
 Mooresville, Iredell County
Rolesville, Wake County
Spring Hope, Nash County
Durham, Durham County
Walnut Cove, Stokes County
Morrisville, Wake County

* - Remedial Action completed.

III. FEDERAL NATIONAL PRIORITIES LIST SITES REQUIRING A STATE COST SHARE

National Priorities List (NPL) sites are those hazardous substance or waste disposal sites that are priorities for cleanup under the federal Comprehensive Environmental Response, Compensation and Liability Act (CERCLA), more commonly known as Superfund. These are sites identified by the U.S. EPA as high priorities for environmental cleanup because of the nature of the contamination and actual or potential threat to human health and the environment. North Carolina has 39 NPL sites.

The NPL includes both sites with financially-viable responsible parties and orphan sites. Cleanup costs are financed either by responsible parties or by a federal trust fund with a state cost share. When the federal trust fund is used, CERCLA requires North Carolina to pay 10 percent of the cleanup cost plus 100 percent of the cost to operate and maintain the remediation system.

Table 4 provides a list of the North Carolina NPL sites and the following information for each site: location, investigation/cleanup status, estimated costs and projected start dates for cleanup. Part I of Table 4, found on page 15, includes those sites where the Federal Trust Fund/North Carolina cost share is required. A summary of North Carolina's cost-share obligations is provided at the end of this part. Part II of Table 4, found on page 17, includes the status of responsible party-funded cleanups.

SUMMARY OF NORTH CAROLINA COST-SHARE REQUIREMENTS (AS OF JUNE 30, 2015)

- Estimated total cost of pending/ongoing federal trust fund/state cost-share cleanups (based on signed contracts): \$119,191,674*
- N.C.’s 10 percent cost share for pending/ongoing cleanups (based on signed contracts): \$11,919,167*
- Amount of cost share funds distributed in FY2014-15 \$74,923
- Fund balance: \$5,840,862
- Encumbered amount of the fund balance for cost share payments and operation and maintenance of remedies: \$3,935,749

*This number will increase due to remedial action cost estimates not being available for all sites. Also, other sites may be added to the National Priorities List, which will require a state cost-share and increases in remedial costs from the original state/U.S. EPA contract amounts can occur.

**Date applies to either entire site or operable unit.

IV. RESPONSIBLE PARTY VOLUNTARY SITE REMEDIAL ACTION

When the Inactive Hazardous Sites Branch requests that a person responsible for contamination at a priority site take action to address the risks, some parties agree to voluntarily conduct a cleanup. Some responsible parties and owners also initiate an approved assessment and/or remedial action on their own. Due to the number of voluntary remediation projects and very limited staff resources, the General Assembly authorized the Division of Waste Management (DWM) to privatize oversight of voluntary remediation activities at lower-priority sites. DWM continues to provide oversight for assessment and remediation at sites that present more severe public health threats or other concerns.

The privatized portion of the voluntary cleanup program is called the Registered Environmental Consultant (REC) Program. Under this program, a responsible party hires a private consultant to conduct the site assessment and cleanup and to certify that those activities comply with regulations. The REC'S certification replaces DWM oversight of the assessment and cleanup. Firms must meet certain requirements to qualify as an REC. DWM audits a number of the REC projects each year to ensure program integrity. DWM has the authority to sanction an REC where necessary. DWM staff conducts REC certification, training, and performance audits. These staffers are funded through fees collected from the voluntary program participants.

A current list of the 192 sites where assessments and cleanups are underway in accordance with an administrative agreement with the state is provided in Table 5 on the following page. These are a mixture of REC-directed and DWM-directed actions. Table 6, found on page 24, is a list of additional DWM-directed responsible party assessment and cleanup actions not under administrative agreements.

Note: Inactive Hazardous Sites Branch staff is conducting work at many other sites not listed in Tables 5 and 6. Such work includes (1) assessing and abating risk from contaminated drinking water wells and other contamination at residential properties where there are no identifiable responsible parties, (2) investigating responsible parties at higher priority sites, (3) preparing bankruptcy claims, (4) responding to requests for “No Further Action Status” reviews, (5) responding to spills, (6) screening of newly discovered sites and (7) responding to public inquiries on sites.

V. IMMINENT HAZARD SITES

DWM and the U.S. EPA are committed to addressing imminent hazard sites when identified. Table 7 provides a list of sites where potential imminent hazards were reported, or where abatement activities continued, in FY2014-15. Their location, a site description, status and funding source are also provided.

TABLE 7. SUMMARY OF IMMINENT HAZARD SITES

<i>Site</i>	<i>City/ County</i>	<i>Site Description</i>	<i>Status</i>	<i>Funding Source</i>
Allen Lane Contaminated Wells	Hillsborough/ Orange	Chlorinated solvents were detected in water supply wells. Contamination source is unknown.	DWM sampled water supply wells in the area, installed three treatment systems on affected water supply wells and conducted soil gas sampling to evaluate the potential vapors from contaminated groundwater to enter homes.	DWM
AMI, Limited	Burlington/ Alamance	Tetrachloroethene was released from a dry-cleaning machine inside a building on the property. Homes with water supply wells are close to the site.	DWM conducted soil gas sampling to evaluate the potential for vapors from contaminated groundwater to enter homes and sampled water supply wells at nearby residences. One well exceeds drinking water standards but is no longer used for drinking. Soil gas samples at one residence exceeded screening concentrations for potential structural vapor intrusion. The homeowner was sent a request (by mail, phone, in person, and through a neighbor) for additional testing. The owner has not responded.	DWM
Apex Martin Complaint	Apex/Wake	Complaint of buried hazardous materials associated with a former poultry operation.	Developer excavated test pits in area identified by the complainant. No material was encountered. DWM conducted an inspection as well and did not observe any indication of buried material. No further work planned.	NA
Beckmann Durham Sandefur	Durham/ Durham	Several residences and other property found to have drinking water wells with contaminants above federal drinking water standards. Source of contamination not known.	U.S. EPA has connected four residences to city service. DWM connected one residence to city water in FY2013-14. In FY2014-15 DWM sampled one other private well and collected soil gas samples on Durham Public School property and four residential properties. No contaminants were detected in the sample collected from the water supply well. Soil gas sampling results show the risk of vapor intrusion at the site is within acceptable levels.	DWM/U.S. EPA
Bowman Body Shop	Henderson/ Vance	Residential properties with contaminated water supply wells near site were previously connected to city water system. Concerns other wells may be in the area.	DWM conducted water supply well sampling at properties not connected with city water. Only two wells had contaminants detected (chloroform and MTBE). Levels are below groundwater standards.	DWM
Continental Automotive Systems Acid Spill	Fletcher/ Henderson	A faulty valve allowed release of 4500 gallons of hydrochloric acid.	Further investigation found that the contents of the spill had been successfully held in the containment structure for the tank and no releases to the environment occurred as a result of the spill.	Responsible Party
Cress Propety/ Bostian Heights	Salisbury/ Rowan	A residential property where dry-cleaning activities previously occurred. A drinking water well at the fire department next door found to be contaminated.	DWM excavated soil from former drum storage and burn barrel area, installed and sampled a monitoring well, and sampled adjacent fire department drinking water well. The fire department previously installed a treatment system on their well. The recent DWM sampling results showed that the solvent concentrations were above the drinking water standards. The fire department replaced the treatment filter on the well.	DWM/ Bostian Heights Fire Department

Cribbs-Hobby	Wilmington/ New Hanover	PCE detected in water supply well serving rental homes on junkyard property following a fire.	DWM sampled soils, groundwater, and on-site and neighboring water supply wells to determine extent and severity of contamination. Data is currently being evaluated for further action.	DWM
Crowders Mountain State Park	Gastonia/ Gaston	Large disposal of drummed wastes located on residential and park property.	DWM removed some of the drums. Due to large numbers, DWM did not have the resources to remove all of the drums and contaminated soils. The U.S. EPA agreed to take over the drum/contaminated soil removal. All of the wastes and contaminated soils have been removed. Following the removal action, DWM detected solvents in one monitoring well at the site. DWM monitors two water supply wells located 200 feet from the contaminated monitoring well twice a year. Both wells have remained clean since monitoring began in 2012.	U.S. EPA/ DWM
Diamondback Products, Inc.	Lexington/ Davidson	Former textile facility with trichloroethene contamination in groundwater. Residences are located near site.	DWM conducted groundwater investigation to determine magnitude and extent of plume. An evaluation of the potential for vapors entering buildings is warranted and planned.	DWM
Dupont Dump	Navassa/ Brunswick	The site was an industrial dump that is in contact with surface water and there are water supply wells in the area.	DWM sampled groundwater and surface water. One metal (manganese) was detected in groundwater above the state groundwater standard but below the federal drinking water standard. Detection is likely naturally occurring.	DWM
Eaton Corporation	Fayetteville/ Cumberland	PCB-containing wastewater spill at site.	Responsible party performed cleanup of spill area. Confirmation sampling did not show any residual contamination. No further work planned.	Responsible Party
Emerald Carolina Chemical Formaldehyde Spill	Charlotte/ Mecklenburg	A complaint investigation revealed intermittent low volume spillage of formaldehyde at one of the facility's process tanks when periodically filled.	Liquid product transfer process changed to minimize spillage. Soil testing found limited contamination not exceeding soil remediation standards. No further work planned.	Responsible Party
Jimmy's Quickie Mart	Providence/ Caswell	Several residential and commercial properties found to have drinking water wells with contaminants above federal drinking water standards. Source of contamination not known.	Several wells previously connected to municipal water supply. DWM collected soil gas samples at three residential and one commercial property with highest levels of contamination in groundwater to evaluate potential vapor intrusion pathway. Soil gas sampling results did not show the risk of vapor intrusion at the site.	DWM
Kinder Morgan Southeast Terminal	Charlotte/ Mecklenburg	Truck fire with flame retarding foam discharged onto ground storm drain to ditch leading into nearby stream.	Responsible party diluted with water only with no soil abatement. Lab tests confirmed no detections of contaminants of concern.	Responsible Party
Main Street Solvents	Locust/ Stanly	Elevated groundwater contamination from a drycleaner and a service station pose threats for contaminated vapors to enter residences.	DWM conducted soil-gas sampling to evaluate the potential for vapors from contaminated groundwater to enter homes on four residential properties. Soil gas sampling results did not show the risk of vapor intrusion at the site.	DWM
Milkco, Inc. Sodium Hydroxide Spill	Asheville/ Buncombe	1100 gallon release of sodium hydroxide at facility.	Material was captured on site on an impermeable surface using sand. Material taken off site for proper disposal. No further work planned.	Responsible Party
Old Hollow Road Dumping	Winston Salem/ Forsyth	An unmarked box truck driver was caught dumping unknown chemicals onto the ground.	DWM directed county emergency staff and contractor to contain and remove impacted soil. Soil sampling at the site is planned.	Forsyth County/DWM
Old Stake Road	Chadbourn/ Columbus	Residential property contaminated with lead from battery casing disposal.	U.S. EPA conducted a partial removal of the contaminated soils. DWM then completed an assessment of the remainder of contaminated soils in FY2013-14 and completed the removal of contaminated materials and soils in FY2014-15. No further action planned.	U.S. EPA/ DWM
One Hour Martinizing	Greensboro/ Guilford	Concentration of tetrachloroethene in groundwater exceeded screening level for potential for vapors from contaminated groundwater to enter buildings at a closed dry cleaner.	DWM conducted soil gas and crawl space air sampling at nearby residential houses for potential vapor intrusion pathway. The sampling results showed that the vapor intrusion risk is within acceptable levels.	DWM

Patterson Ave Battery Dump	Concord/ Cabarrus	Soil contaminated with battery casing chips and high levels of lead found in residential area.	The U.S. EPA completed a removal of the contaminated soils with DWM assistance.	U.S. EPA
Pender Plating	Burgaw/ Pender	High levels of chromium in soil and groundwater in a residential area.	DWM completed assessment of contamination in FY11/12. U.S. EPA completed removal of contaminated materials in FY14-15. Post-removal sample confirmation data is pending.	DWM/U.S. EPA
PWC Transformer Spill	Fayetteville/ Cumberland	PCB's found in site soils in January of 2014 after an underground transformer caught fire. The Fire Department used foam to extinguish the fire spreading the transformer oil away from its source.	Responsible party removed 20 gallons of mixed transformer oil and firefighting foam and 1.8 tons of contaminated soils. Post removal sampling showed no contamination remaining. No further action planned.	Responsible Party
Quarterhorse Lane Property	Ocean Isle/ Brunswick	Local complaint of chemical dumping. Investigation found trash piles with concrete finishing chemicals. An oily sheen in puddles around a water supply well was also observed.	DWM has been attempting to gain access to sample site and neighboring water supply wells. Business owners are uncooperative and unwilling to perform investigation or provide access. Surrounding wells will be sampled while permission to access source area is pursued.	DWM
REA Construction-West Raleigh	Raleigh/ Wake	TCE was detected in shallow groundwater near the downgradient property line at levels well above groundwater standards, potentially posing a structural vapor intrusion threat to nearby buildings. A school is in close proximity.	DWM sampled shallow and deep groundwater and surface water on two adjacent properties downgradient of the site. Low concentrations of TCE were detected in deep groundwater and surface water samples at concentrations below state standards.	DWM
Reeves Brothers, Inc.	Albemarle/ Stanly	Groundwater found to have levels of chlorinated solvents exceeding screening levels indicating potential structural vapor intrusion threat to nearby homes.	DWM collected oil gas samples from five residential properties surrounding the site to evaluate the potential vapor intrusion pathway. Soil gas sampling results did not show an elevated risk of structural vapor intrusion.	DWM
RPM Wood Finishing Fire	Hudson/ Caldwell	A fire occurred at facility on 4/13. Due to proximity of chemical storage to the fire suppression water, chemical releases were possible.	Post fire inspection revealed chemical containers intact and fire suppression water was contained. Approximately 3000 gallons of fire suppression water was vacuumed into a tanker and taken off site for proper disposal. No further work planned.	Responsible Party
Salisbury Ethanol Truck Rollover	Salisbury/ Rowan	A tank truck carrying 5000 gallons of ethanol (mixed with gasoline) overturned and spilled its entire load.	DWM-IHSB directed emergency on-site remediation. The site was later transferred to UST for further investigation and remediation.	Responsible Party
Sodium Chlorite Truck Wreck Spill	Cove Creek/ Haywood	Truck wreck released approximately 600 gallons of sodium chlorite into a median and a ravine under a bridge next to Rube Rock Branch.	No apparent impact to surface water. Affected soils excavated. DWM reviewed work. No further work planned.	Responsible Party
Southern States Urea Ammonium Nitrate Spill	Mebane/ Alamance	About 2800 gallons of urea ammonium nitrate liquid fertilizer was released from a ruptured pipe at a storage tank.	DWM directed responsible party to excavate and properly dispose of contaminated soils. No further action is required.	Responsible Party
Stevens Cleaners	Fairmont/ Robeson	Chlorinated solvents detected at levels in monitor wells at a former drycleaner potentially posing structural vapor intrusion threats to nearby buildings.	DWM collected soil gas samples to evaluate the potential of contaminants to off-gas from contaminated groundwater and enter structures. Results indicate that occupied buildings meet acceptable soil gas screening levels.	DWM
Stewart Creek Anhydrous Ammonia Spill	Charlotte/ Mecklenburg	County reported fish kill in Stewart Creek to DWM. Source found to be rainwater runoff from area of soils contaminated with ammonia from refrigerant spillage entering storm drain.	Upon investigation, refrigeration repair company found to have discharged leftover ammonia refrigerant to soils. DWM required soil testing, removal and proper disposal of contaminated soils and confirmation sampling.	Responsible Party
Stoller Chemical	Severn/ Northampton	Former fertilizer formulating company. Hazardous substances left behind after bankruptcy in decaying structures along a river segment.	DWM conducted assessment of abandoned wastes and contaminated soils at the property. The U.S. EPA conducted further assessment in FY2013-14 and a removal action in FY2014-15. All fertilizer/pesticide wastes were excavated, treated and properly disposed by U.S. EPA. No further action planned.	U.S. EPA/DWM

Stony Hill Road Contamination	Wake Forest/Wake	Widespread groundwater contamination in residential area caused by former circuit board assembly business. Two probable source areas.	DWM sampled local water supply wells as part of a site investigation. Discovery of large plume led to U.S. EPA connecting affected residents to community water. U.S. EPA and DWM negotiating with responsible parties. DWM performed vapor intrusion investigation on multiple local residences. U.S. EPA and DWM are negotiating a remedial action agreement with potential responsible party.	U.S. EPA/DWM
Texfi Industries	Fayetteville/Cumberland	Chlorinated solvent groundwater contaminant plume has migrated from a former textile mill to the City of Fayetteville's water plant property. The City's finished drinking water holding tank sits in contact with contaminated groundwater. The City's drinking water intakes on the Cape Fear River are 450 feet downstream from the Texfi property line.	DWM constructed a subsurface barrier wall in 2001 to prevent further contaminant migration to the holding tank area and installed extraction wells to remove contaminated groundwater in the area of the tank. Areas with highly elevated contaminant concentrations in groundwater were treated with injection of HRC-X. Concentrations of chlorinated solvents have decreased. However, contamination found dispersed in a deeper clay layer is causing groundwater contamination to persist. The depth and low permeability of this clay layer makes source removal/treatment extremely expensive. In FY2014-15, DWM completed removal of removed highly contaminated soils discovered in a ditch and treatment of surface water. Limited bankruptcy funds remaining will be used for monitoring in FY15-16.	DWM
Trawick Road	Raleigh/Wake	Solvent and pesticide contamination discovered in water supply wells.	DWM provided alternate water to 3 homes through the Bernard Allen Memorial Drinking Water Fund. DWM continuing to evaluate sources and conduct sampling of area to determine extent and severity of contamination.	DWM
TruGreen Spill - Lockhand Circle	Troutman/Iredell	150 gallons of TruGreen product spilled from truck-mounted tank.	DWM directed responsible party to excavate and properly dispose of affected soils. Post-excavation samples meet cleanup standards.	Responsible Party
Twin State Battery	Newton/Catawba	Sump containing 7500 gallons of battery wash water in imminent state of overflow.	U.S. EPA conducted removal of wastes. Work continues under the DWM Hazardous Waste (HW) Section. Outstanding contaminant issues outside of HW Section jurisdiction exist. As a result, the site will return to DWM-IHSB oversight once HW Section guidelines are satisfied.	U.S. EPA
Ulah Battery/ Battery Piles	Asheboro/Randolph	Residential area contaminated with lead from battery casing disposal.	DWM and the U.S. EPA have conducted removal of contaminated soils. DWM plans to complete removal in FY2015-16.	DWM
US 158 Hexamine Truck Rollover	Watertown/Forsyth	A tank truck carrying 5000 gallons of hexamine overturned on the highway. All of the product in the tank was released and about 1200 gallons were recovered.	DWM directed responsible party to excavate and properly dispose of the impacted soils. Nearby residential property connected to city water and groundwater and soil samples were collected. Results showed that no further action is required.	Responsible Party
USA Dutch	Efland/Orange	Metal fabrication shop found to have groundwater contaminated with tetrachloroethene. Water supply wells exist in the area.	DWM sampled two water supply wells in the vicinity of the site. Tetrachloroethene was detected in one well above the state groundwater standard but below the federal drinking water standard. A Health Risk Evaluation was provided to the property owner.	DWM
U.S. Coast Guard Station	Elizabeth City/Pasquotank	Aqueous sodium hydroxide spill on to asphalt, resulting from tank overflow.	U.S.C.G. personnel conducted cleanup. DWM reviewed action summary report. No further action required.	Responsible Party
VA Hospital-Asheville Propylene Glycol Spill	Asheville/Buncombe	Trenching work severed an underground propylene glycol pipe.	Vacuum truck deployed with some soil excavation from trench. Site work reviewed by DWM. No further action deemed necessary.	Responsible Party
Watts, Levi Property	Tabor City/Columbus	Residential area contaminated with lead from battery casing disposal.	DWM conducted removal of contaminated soils on several properties. Final removal and restoration activities completed in FY2014-15. No further action planned.	DWM

**VI. SUMMARY OF THE INACTIVE HAZARDOUS SITES CLEANUP FUND AND
NATIONAL PRIORITIES LIST COST SHARE FUND**

**Inactive Hazardous Sites Cleanup Fund
Fund 6372
FY2014-15**

Beginning Cash Balance	\$893,798
Deposits (FY2014-15)	
Interest	\$245*
Appropriation	\$400,000
No Further Action review fees	\$3,000
Total Deposits	\$403,245
Expenditures (FY2014-15)	
Texfi Industries-Fayetteville source remediation contract	\$155,198
Orphan priority site sampling/removal contract/alternate water supplies	\$916,161
Total Expenditures	\$1,071,359
Ending Cash Balance	\$225,684
Obligations (Contract encumbrances-actual and pending)	
Texfi source remediation contract	\$5,121
Orphan priority site sampling/removal commitments	\$220,563
Total Current Obligations	\$225,684
Current Effective Cash Balance	\$0
Orphan Cleanup Cost Requirements (see Chapter II for more details)	
Funds needed for 339 higher priority orphan sites identified	\$224,221,719
Funds needed for all orphan sites thus identified (333 sites)	\$254,647,085

* This fund no longer receives interest income.

Additional Funds from Bankruptcy Proceedings

Since initiating bankruptcy recover actions, DWM has recovered over \$18 million in funds for assessment and remediation of sites. Payments out of a bankruptcy proceeding must go into a special trust account to be used only for the specific sites identified in the bankruptcy settlement agreement. Some of the settlement funds are also held in private escrow accounts.

Funds recovered through bankruptcy proceedings in FY2014-15 include:

Fuel Systems/Kysor - An additional \$5,966 recovered this year for a total of \$104,006.

**Revenue Dedicated to the Pre-Regulatory Landfills
FY2014-15**

Beginning Cash Balance	\$30,247,101
Deposits (FY2014-15)	
Tax	\$9,088,737*
Interest	\$5,679**
Total Deposits	\$9,094,416
Expenditures (FY2014-15)	
Contracts	\$9,237,722
Local government reimbursement	\$70,215
Operating budget	\$1,321,448***
Total Expenditures	\$10,629,385
Ending Cash Balance	\$28,712,429
Total Current Contract and Local Government Obligations	\$24,392,470
Current Effective Cash Balance	\$4,319,959

* Income reported in the general ledger was \$9,089,035. However \$297 of this figure was a refund of an overcharge of an expense and not tax income.

** This fund no longer receives interest income.

*** The operating budget expenses are also used to fund a portion of the staff overseeing work at non-Pre-Regulatory Landfill Inactive Hazardous Waste Sites (\$300,000) and staff conducting work for DWM's Solid and Hazardous Waste Programs (\$500,000).

The graph below shows how expenditures will soon deplete the current surplus, which accumulated during the early years when the program was conducting mostly lower cost assessment work. Active remediation is now underway at several sites and the program's rate of disbursements is rising.

**Revenue Dedicated to Support Special Technical Review of Sites Applying for Risk-Based
Remediation Pursuant to N.C.G.S. 130A-310.65 – 310.77
FY2014-15**

Number sites applying for program to date:	4
Number of total acres covered:	16
Total fees collected:	\$72,000
Interest earned to date:	\$544
Funds expended:	\$0
Balance:	\$72,544

**National Priorities List Cost-Share Fund
Fund 6375
FY2014-15**

Estimated cost of federal trust fund/N.C. cost-share cleanups	\$119,191,674
North Carolina's 10 percent cost-share for pending/ongoing cleanups	\$11,919,167*
Total fund disbursements for cost-share payments	\$8,879,403
Current balance	\$5,840,862
Encumbered amount of the fund balance for cost-share payments	\$3,039,764
Encumbered amount for operation and maintenance contract	\$895,985
Effective Cash Balance	\$1,905,113*

* Cleanup cost estimates are not yet available for all sites. The cost-share figure will increase as cost estimates become available. Other sites may be added to the National Priorities List that will require a state cost-share. This account is also used to pay for the state's operation and maintenance obligations at these sites. The fund has no continuing source of income.

APPENDIX B. INACTIVE HAZARDOUS SITES INVENTORY – SITE STATUS
N.C.G.S. 130A-310.10(a1) Supplemental Reporting

Note: Upon discovery, sites are added to the Evaluations Pending or Pollutant Only Site-Open categories of the Inactive Hazardous Sites Inventory. As resources are available, the sites are ranked and transferred to the Sites Priority List. The Sites Priority List is used to determine the order of full-scale remedial actions at sites without responsible parties, providing funds are available. If a party volunteers to clean up a site and enters into an agreement with the DWM, the site is then transferred to the Voluntary Action category. Once cleanup is complete, the site is transferred to one of the "No Further Action" categories (NFAs). Information on contaminants and contaminated media have only been compiled for the Sites Priority List. That information can be found in Appendix A. Other information on sites activities this reporting year can be found in sections II -V of this report. Location information on the pre-1983 landfills can be found in Appendix C.
