## Appendix A: Dispositional Model Definitions

Pre-plea diversion/deferred prosecution: Participants enter the program as a condition of pretrial supervision or pursuant to a pretrial diversion agreement, with the understanding that the arrest charge(s) will be dismissed upon successful completion of treatment. Because no guilty plea is entered, the case resumes processing through the criminal justice system in the event of unsuccessful termination.

Post-plea diversion/deferred sentence: Participants are required to plead guilty or no contest to the charge(s) or stipulate to (acknowledge the truth of) the facts in the criminal complaint. The plea or stipulation is then held in abeyance and is vacated or withdrawn if the participant completes the program successfully. Some jurisdictions may also expunge the arrest or guilty plea from the participant's record if he or she remains arrest-free for an additional waiting period.

Post-sentence or term of probation: Participants are ordered into the treatment court program per the terms of a probation sentence or a probation violation sentence. In post-sentencing drug courts, the record of the conviction stands, but participants avoid incarceration or reduce their probation obligations if they succeed in treatment.

## Appendix B: County Profiles for JMARC Counties

This appendix presents an overview of data for North Carolina counties served by at least one JMARC program. The data included in each “county profile” were gathered from a variety of sources and are organized in 5 tables. Table 1 presents specific county-level characteristics, collected from the U.S. Census Bureau (2023)<sup>1</sup> and NC Department of Health and Human Services, Office of Rural Health (2019).<sup>2</sup> Table 2 presents data obtained from the NC Department of Adult Correction (DAC) for the calendar years 2021-2023. This table includes the percentage of probationers with the following characteristics: criminogenic risk/need classification, veteran status, mental health flag, substance use flag, and on probation for a Driving While Impaired (DWI) offense. Table 3 presents the total rate per 1,000 persons and the total number of DWI convictions (levels 1A-3) for the calendar years 2022 and 2023, as reported by the NC Administrative Office of the Courts (AOC).<sup>3</sup> Table 4 presents drug overdose data for the county and state from the NC Opioid and Substance Use Action Plan Data Dashboard.<sup>4</sup>

Table 5 presents data regarding child welfare. First, data from The Annie E. Casey Foundation, KIDS COUNT Data Center<sup>5</sup> provides the percentage of children in foster care due to parental substance use for calendar year 2021. Second, the NC Department of Health Human Services (NCDHHS)<sup>6</sup> provided the percentage and

<sup>6</sup> Data were provided by the NCDHHS.

---

number of children with a substantiated / maltreatment-indicated case and substance use and/or mental health confirmed for 2023.

Lastly, in counties that currently have one or more opioid treatment program(s) (OTP), we have provided the name and contact information for the program(s).

Below is an example of how to interpret these data using Avery County as an example. Avery County is situated in District 35, had a total population of 15,011 in 2023 based on the American Community Survey (2023),<sup>1</sup> and has been classified as a rural county by the NC Department of Health and Human Services, Office of Rural Health (see Table 1). The total number of individuals on probation in Avery County between calendar years 2021-2023 was 430, which represented less than 1% (0.1%) of all probationers in North Carolina. Among the 430 individuals on probation in Avery County, 6.5% were classified as high risk/high need, 8.6% as high risk/moderate need, and 8.4% as high risk/low need. The greatest percentage of individuals (17.7%) were characterized as moderate risk/high need followed closely by low risk/moderate need (17.4%).

No probationers in Avery County between calendar years 2021-2023 identified as a veteran. However, 60.2% of Avery County probationers were flagged for a mental health issue and 81.6% were flagged for substance use. These figures are both higher than the state figures where 57.1% of probationers were flagged for mental health and 76.5% were flagged for substance use. Also presented are the risk/need classification of probationers with both substance use and mental health flags. Only 5.6% of Avery County probationers were being supervised for a Driving While Impaired (DWI) conviction, which is slightly lower than the state figure (8.5%).

---

Table 3 shows that the DWI (1A-3) conviction rate per 1,000 persons was 0.72 in 2022 and 0.53 in 2023 for Avery County. This represents a small number of convictions in the state. Table 4 presents drug overdose information for both Avery County and the state. The 2022 drug overdose death rate was 28.5 (per 100,000 persons), which is lower than the state rate of 41.4 (per 100,000 persons). Similarly, in 2022, 20.0% of overdose deaths involved illicit opioids in Avery County, whereas the state rate was roughly *four times* higher (78.9 per 100,000 persons). In 2023, the rate of emergency department visits due to an overdose was 102.5 (per 100,000 persons) in Avery County. This is significantly lower than the state rate of 161.4 (per 100,000 persons).

Lastly, table 5 shows that in 2021, 42.2% of Avery County children in foster care was due to parental substance use. This is slightly less than the state figure where 45.7% of children in foster care was due to parental substance use. Additionally, the percentage of children with a substantiated/ maltreatment-indicated case and substance use and/or mental health confirmed for 2023 in Avery County was 55.0%, whereas the state percentage was 32.8%.

The following is a list of providers that have implemented an Opioid Treatment Program (OTP) in your county. These entities could serve as a valuable resource for existing JMARC and those programs that may be implemented in the future.

**McLeod Centers for Wellbeing**

500 Archdale Dr., Charlotte, NC 28217

Phone: (704) 755-0150

**New Season - Charlotte Treatment Center**

3315 Wilkinson Blvd., Charlotte, NC 28208

Phone: (704) 697-0044

**Queen City Treatment Center**

4949 Albemarle RD., Charlotte, NC 28205

Phone: (704) 532-4262

**Zenith Hope Center**

508 Eastway Drive Charlotte, NC 28205

Phone: (704) 248-0246

## Appendix C: County Profiles for Non-JMARC Counties

This appendix presents an overview of data for North Carolina counties that are not served by any JMARC programs. The data included in each “county profile” were gathered from a variety of sources and are organized in 5 tables. Table 1 presents specific county-level characteristics, collected from the U.S. Census Bureau (2023)<sup>7</sup> and NC Department of Health and Human Services, Office of Rural Health (2019).<sup>8</sup> Table 2 presents data obtained from the NC Department of Adult Correction (DAC) for the calendar years 2021-2023. This table includes the percentage of probationers with the following characteristics: criminogenic risk/need classification, veteran status, mental health flag, substance use flag, and on probation for a Driving While Impaired (DWI) offense. Table 3 presents the total rate per 1,000 persons and the total number of DWI convictions (levels 1A-3) for the calendar years 2022 and 2023, as reported by the NC Administrative Office of the Courts (AOC).<sup>9</sup> Table 4 presents drug overdose data for the county and state from the NC Opioid and Substance Use Action Plan Data Dashboard.<sup>10</sup>

Table 5 presents data regarding the percentage of children in foster care due to parental substance use for calendar year 2021. These data were obtained from The Annie E. Casey Foundation, KIDS COUNT Data Center.<sup>11</sup> Second, the NC Department of Health Human Services (NCDHHS)<sup>12</sup> provided the percentage and number of

<sup>12</sup> Data was provided by the NCDHHS.

---

children with a substantiated/maltreatment-indicated case and substance use and/or mental health confirmed for 2023.

Lastly, in counties that currently have one or more opioid treatment program(s) (OTP), we have provided the name and contact information for the program(s).

Below is an example of how to interpret these numbers using Alamance County as an example. Alamance County is situated in District 17, had a total population of 139,859 in 2023 based on the American Community Survey (2023),<sup>1</sup> and has been classified as an urban county by the NC Department of Health and Human Services, Office of Rural Health (see Table 1). The total number of individuals on probation in Alamance County between calendar years 2021-2023 was 4,701, which represented less than 1% (0.9%) of all probationers in North Carolina. Among the 4,701 individuals on probation in Alamance County, 13.7% were classified as high risk/high need, 14.2% as high risk/moderate need, and 10.7% as high risk/low need.

No probationers in Alamance County between calendar years 2021-2023 identified as a veteran. However, 58.8% of Alamance County probationers were flagged for a mental health issue and 76.3% were flagged for substance use. These figures are both very close to the state figures where 57.1% of probationers were flagged for mental health and 76.5% were flagged for substance use. Also presented are the risk/need classification of probationers with both substance use and mental health flags. Of Alamance County probationers, 13.4% were being supervised for a Driving While Impaired (DWI) conviction, which is higher than the state figure (8.5%).

Table 3 shows that the DWI (1A-3) conviction rate per 1,000 persons was 1.87 in 2022 and 1.44 in 2023 in Alamance County. This represents a small number of convictions in the state. Table 4 presents drug overdose information for both Alamance

---

County and the state. The 2022 drug overdose death rate was 34.2 (per 100,000 persons), which is lower than the state rate of 41.4 (per 100,000 persons). Similarly, in 2022, 77.6% of overdose deaths involved illicit opioids in Alamance County, whereas the state rate was slightly higher (78.9 per 100,000 persons). In 2023, the rate of emergency department visits due to an overdose was 167.5 (per 100,000 persons) in Alamance County. This is higher than the state rate of 161.4 (per 100,000 persons).

Lastly, table 5 shows that in 2021, 45.4% of Alamance County children in foster care was due to parental substance use. This is roughly the same as the state figure where 45.7% of children in foster care was due to parental substance use. Additionally, the percentage of children with a substantiated / maltreatment-indicated case and substance use and / or mental health confirmed for 2023 in Alamance County was 43.8%, whereas the state percentage was 32.8%.
