

Enbridge Gas North Carolina

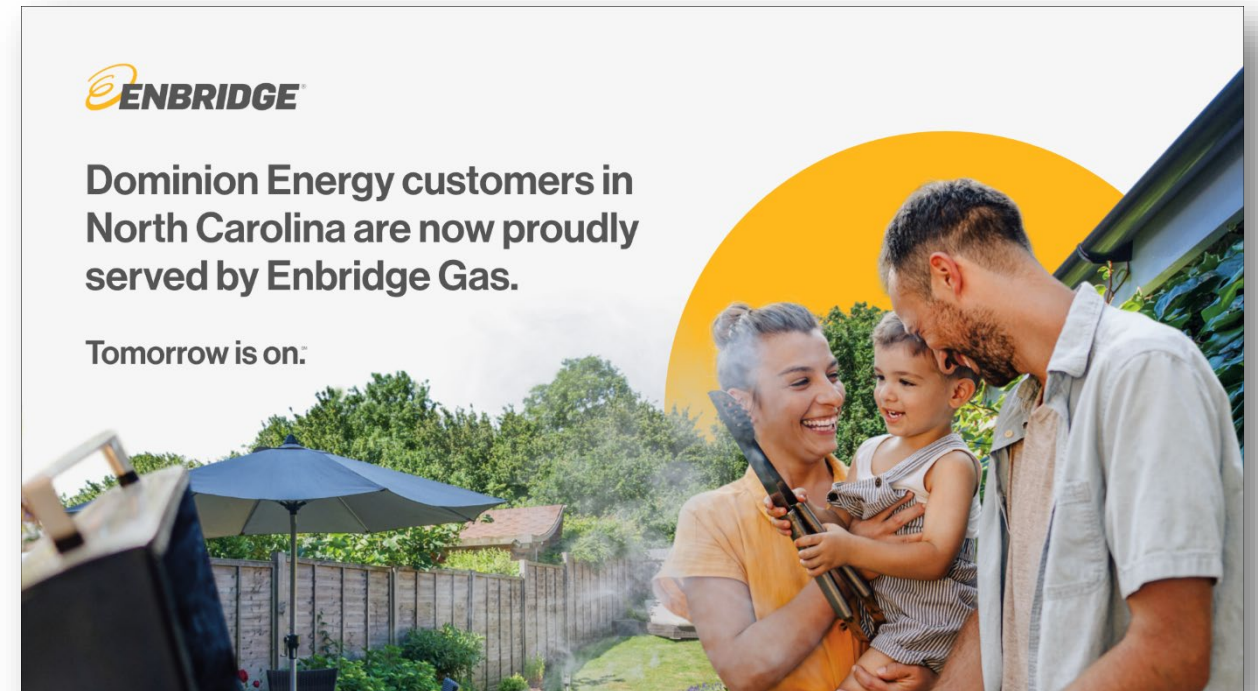

Rusty Harris, General Manager and Vice President

Enbridge Gas

Committed to a smooth transition for customers

- Enbridge, Inc. acquired Public Service Company of North Carolina from Dominion Energy on Oct. 1, 2024.
- Enbridge Gas North Carolina is comprised of the same customer-dedicated team focused on safety, reliability and affordability.
- The expansion of Enbridge Gas is an opportunity to leverage the strengths and best practices of each organization.
- Since October, Enbridge has already disbursed half a million dollars in charitable giving.

What is truly important to us as a company

Our vision, to provide energy, in a more planet-friendly way, everywhere people need it—drives our mission to be the first-choice energy delivery company in North America and beyond.

Our values are key to our ongoing success.

- Safety
- Integrity
- Respect
- Inclusion
- High Performance

About us

Enbridge is a first-choice energy provider.

Liquids pipelines

- World's longest, most complex transportation system
- 29,104 km/18,085 mi. of pipe
- Moving ~5.8 million barrels/day

Transports **~30%**
of crude oil produced
in North America

Natural gas pipelines

- 116,761* km/72,552* mi. of pipe
- Moving 24.6 Bcf/day
- Enough natural gas for >170M people

Delivers **~20%**
of the natural gas
consumed in the U.S.

Natural gas utilities

- 178,002 km/110,606 mi. of pipe
- Delivering energy for 175 years
- Over 7,000 valued employees

Delivering to
7 million
customers in Canada and the U.S.

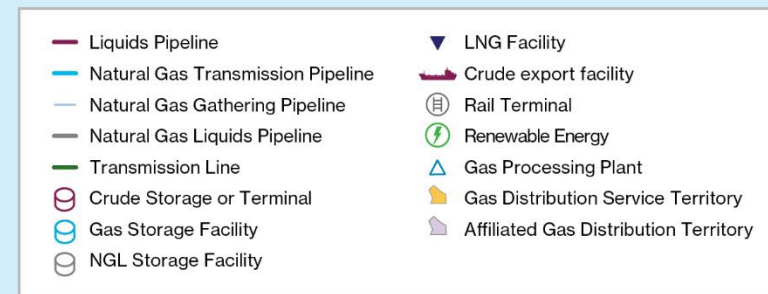

Renewable power

- 39 renewable power facilities
- 5,261 MW generating capacity
- Committed more than US\$7 billion (C\$10 billion) since 2002

1,137,227[†]
homes powered
by our assets

* Includes DCP Midstream assets

† Estimated numbers of households powered calculated using regional energy consumption data: [Energy Consumption – U.S. homes](#) and [Energy Consumption – Canadian homes](#).

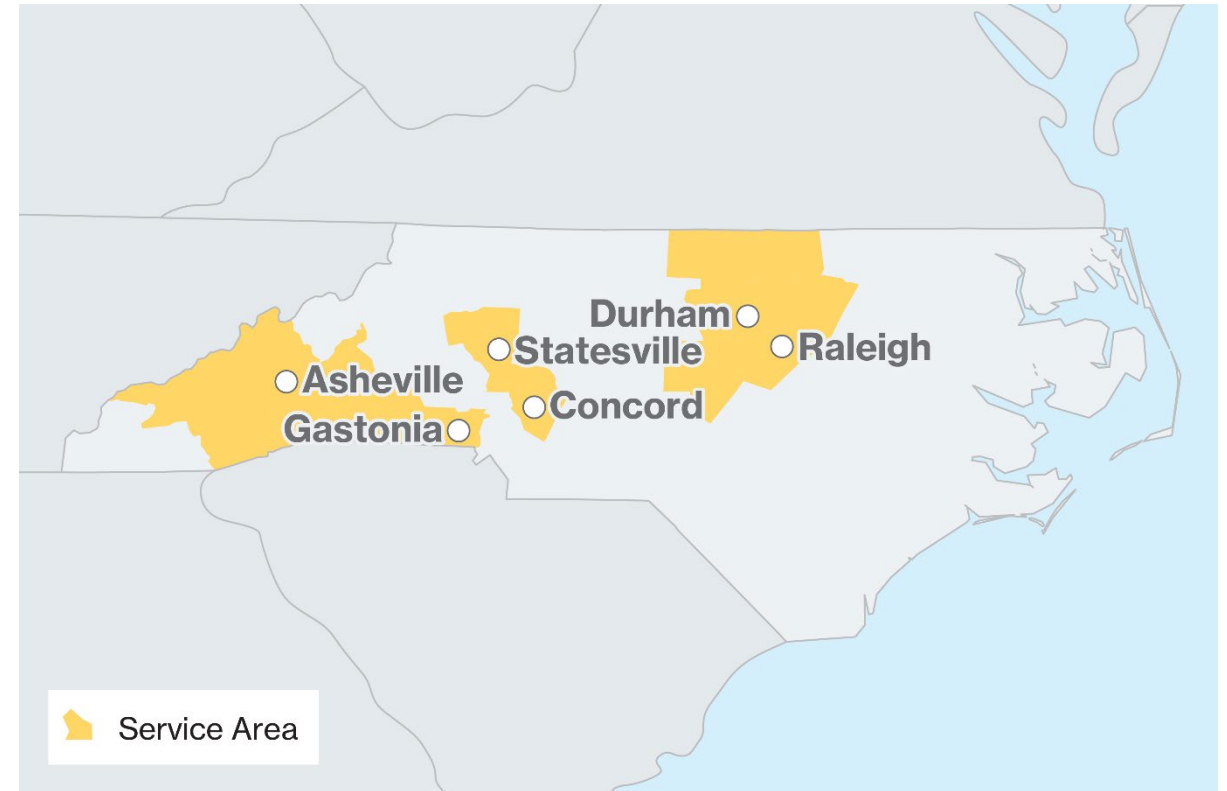

Enbridge Gas North Carolina

We deliver the energy that enhances people's quality of life.

- **Experience:** Celebrating 87 years of experience providing safe and reliable service. First franchised natural gas utility in North Carolina.
- **Distribution business:** Over 660,000 customers and 800 employees.
- **Assets:** Approximately 13,000 miles of pipelines, a liquefied natural gas storage facility in operation and one under construction.

Responding to Helene

- Customers who were able to receive gas during and after the storm were served reliably.
- Crews quickly activated in restoration and system stabilization efforts in impacted areas.
- System rebuilding and relocating projects are ongoing.
- Supported the Red Cross, Operation Airdrop, Manna Food Bank, Transylvania Tomorrow and other relief and recovery efforts.

Fueling the future

Enbridge Gas North Carolina is embarking on critical customer growth and reliability projects

Moriah Energy Center

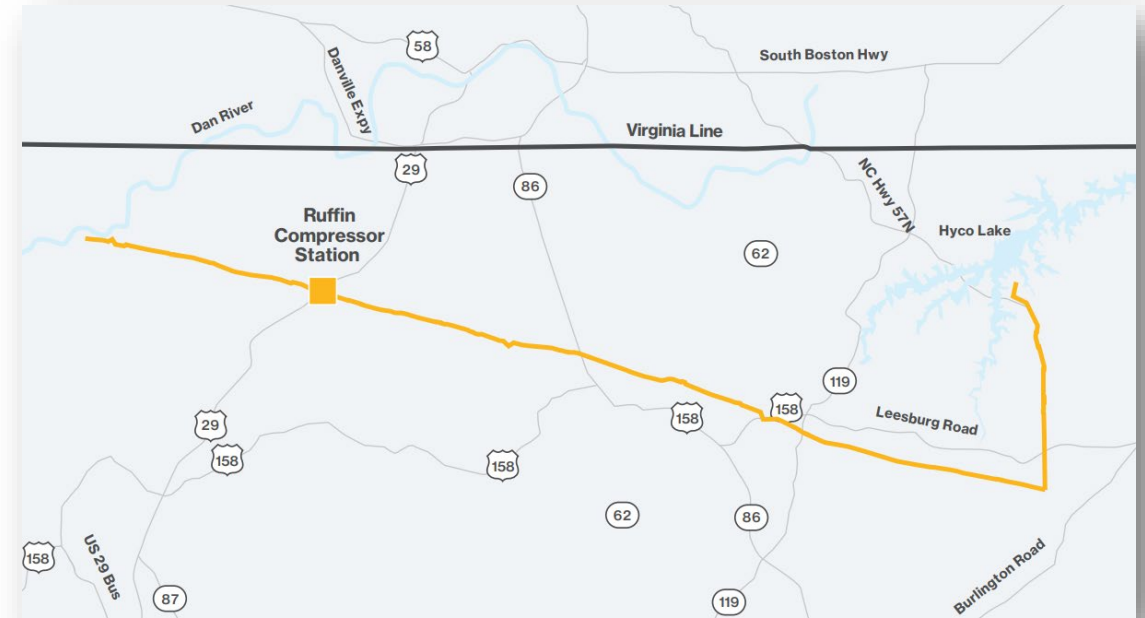

- In recent years, the increasing demand for natural gas in North Carolina has resulted in supply constraints.
- Enbridge Gas is building a 25-million-gallon liquefied natural gas (LNG) storage facility in Person County.
- Store gas when demand is low; send out gas when demand is high, increasing service reliability.

Enhancing service reliability through storage

T15 Reliability Project

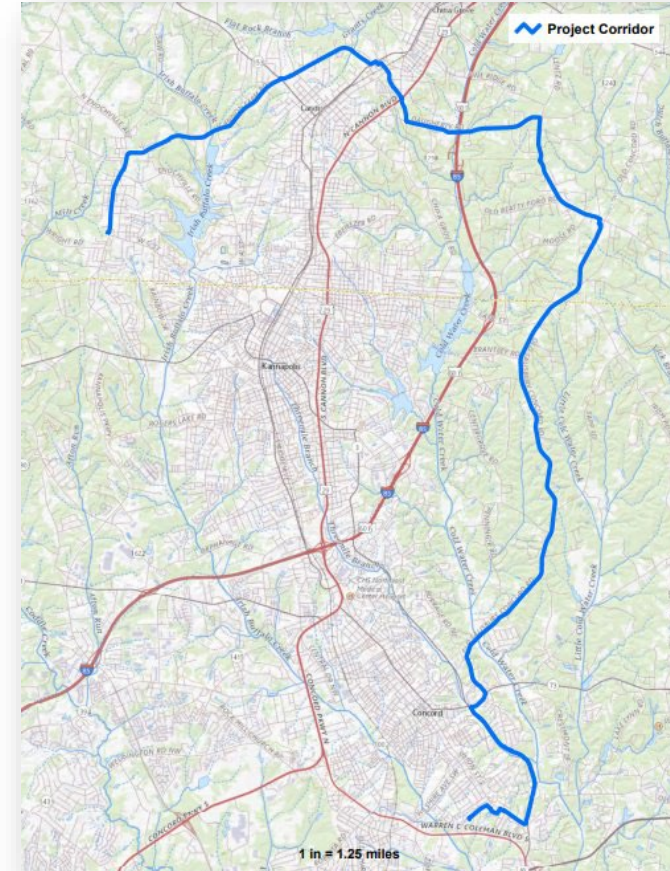

- An existing vintage pipeline that carries much of the natural gas used in the Triangle has reached its capacity limit.
- To continue complying with safety regulations, a new pipeline is needed to support system integrity, safety and growth.
- In addition to strengthening system reliability, the new pipeline would also serve electric generation.

Enhancing system integrity and reliability through modernization

Kannapolis to Concord System Enhancement

- Enbridge Gas is expanding its system through Rowan and Cabarrus counties as part of a 24-mile pipeline project.
- Construction began in 2024, and the project is expected to be in service by the end of this summer.
- Once in service, the pipeline will strengthen system reliability, economic development and provide gas service to underserved areas.

Enhancing access through expansion

Enbridge is committed to meeting the growing energy needs of the future while reducing emissions.

Preparing for the energy future

The Decarbonize Drive hydrogen blending pilot is located in Gastonia, NC at a closed-loop employee training facility

- We are working to achieve net-zero greenhouse gas emissions from our operations by 2050.*
- Our approach is two-fold:
 1. Reducing emissions from our operations
 2. Investing in future lower-carbon energies
- Enbridge is developing cutting-edge, innovative solutions to help prepare for the energy transition, like spearheading the first utility hydrogen blending project in the Carolinas.

* GHG emissions included within our targets are from assets over which we have operational control (Scope 1 and Scope 2 emissions). Absolute emissions.
